Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured covers/  
Couverture de couleur
- Covers damaged/  
Couverture endommagée
- Covers restored and/or laminated/

method

The copy filmed here has been reproduced thanks to the generosity of:

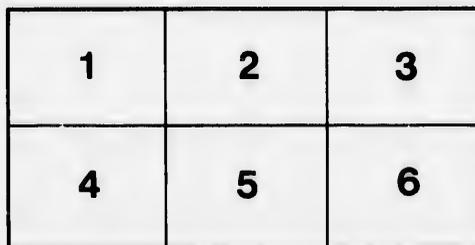

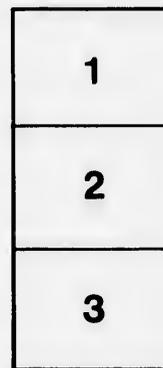

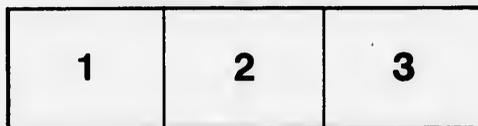

Library of the Public  
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives  
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "À SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

THE  
**FARMER'S**  
**ALMANACK,**

FOR THE YEAR OF OUR LORD

**1824;**

Being Bissextile or Leap Year,

CALCULATED FOR THE MERIDIAN OF HALIFAX IN NOVA-SCOTIA,

*But will serve for any part of the Province.*

AND CONTAINING AMONG OTHER USEFUL MATTER

**A TIDE TABLE,**

By means of which, the time of High Water at the principal ports in America and in the Bay of Fundy, may be ascertained with accuracy.

ALSO,

The Rising and Setting of the Sun—Sun's Declination—Length of Days, and Days Increase in hours and minutes—Equation of Time—Moon's Southing—Moon's Age, and time of rising and setting—High Water at Halifax—Aspects, Holidays and Weather—Farmer's Calendar and the Eclipses for the present Year.

---

For Sale wholesale and retail, at the Bookstore of C. H. Belcher, and at the Free Press Office, Halifax, N. S.

*Directions for coming up Halifax Harbour, taken from the printed Directions in the Custom-House at Halifax.*

**S**AMBRO island and light house is in latitude 44 deg. 30 min. N. and longitude 63 deg. 32 min. W.

From the westward, bring the light to bear N. E. if it bears more easterly, stretch to the southward till it bears N. E. and as much northerly as you please, there being no shoal or ledge to the southward; then keep it open on your larboard bow: give it more than a mile and a half birth as much more as you please.

Note —The western ledges lie from the light S W distant two miles, the other W S W about one league; the eastern ledges lie in a range nearly, some above water; the outermost one mile and a half from the light bearing from it E N E.

When the light bears north distant about 2 miles, run N E 4 miles, then north will carry you to Chedabucto Head at a proper distance clear of all danger.

When a breast of Chedabucto Head, run N.  $\frac{1}{2}$  W for the south point of George's Island.

When within half a mile of George's island you may enter the harbour west of it in 18 fathoms, or east of it in 15.

In passing between Sandwich point and Meagher's beach run nearest the point to shun a shoal which runs off S W from the beach.

There is also a shoal lying one mile south of Sandwich point.

Coming from the eastward, run for the light and you cannot fail seeing Chedabucto Head as you open Halifax Harbour; the light being 4 miles distant from the Head to the S W.

*Signals made at Fort George when vessels are coming up the harbour.*

One ball close for one square rigged vessel.	A do under a ball for six do
One ball half hoisted for two do.	A do over a do half hoisted for 7 do
Two balls close for three do	A do under 2 do close for 8 do
Two balls separated for four do	A do between 2 do separated for 9 do
A pendant of any colour for five do	A flag of any colour for 10 or more do

[The above are hoisted at the east or west yard arm, according to the quarter the vessel first appears in, with the addition of a ball at the centre of the yard until the vessel can be seen, when one or more of the following descriptive colours will be hoisted at the mast head.]

An Union for a Flag-Ship, with or without a Squadron.	A blue Pendant for a Merchant Ship
Do with a Red Pendant over it, for a Two <sup>d</sup> decker.	A red Pendant for a Merchant Brig
Do with a blue Pendant over it for a Frigate.	A white Pendant for a Topsail schr. or Sloop.
Do with a white Pendant over it for a small armed Vessel.	A blue and white flag horizontally divided Neutral Fleet
A red flag pierced white for a Packet	White and blue Pendant Neutral Man of War
	Blue Flag Neutral Merchant Ship.

A red white and Blue Flag an Ene-  
my's Fleet

A red flag an Enemy's merchantman

An Union Jack over Neutral or Ene-  
my's Signals Vessel is detained or  
prize.

A white Flag over any Signal Ves-  
sel bears a Flag of Truce

A ball at the mast head—Vessel is on  
shore or in distress; should im-  
mediate aid be necessary guns to  
be fired.

### Explanation of Signals

Made on the Ensign Staff at Fort George to denote the Part which  
Vessels entering the Harbour of Halifax have arrived from.

A red Flag from Great Britain

A red and white do the Mediterranean

A red Pendant the Continent of Eu-  
rope

A white and red Pendan, Madeira,  
Canary or Western Isles

A blue Flag, West Indies

A blue Pendant Bermudas Bahamas  
or Turk's Islands

A blue and white Flag United States

A white Flag Newfoundland

A red and white flag horizontally di-  
vided, Quebec or Gulf of St. Law-  
rence

A blue and white Flag horizontally  
divided, New Brunswick or Bay  
of Funday

A white and blue Pendant—Vessel  
has an English Mail on board

A white Pendant—Coasts of Nova-  
Scotia and Cape Breton.

### Repeat from Out Ports at Fort George.

For a square rigged vessel—two balls of a size.

A ship—A large ball at the end of the yard, with a small ball in the centre.

A brig—a small ball at the end of the yard with a large ball in the centre

A lozenge in the centre close up—a sloop or schooner

Do do half hoisted—two or more schooners.

### Merchants' Private Signals, Port of Halifax.

J & M Tobin. A red flag crossed white

RED, &c.

Geo Gracie & Co. Do crossed white diagonally

Deblois & Mitchell. A do centre a white square

Alexander Mitchell. Do centre 2 blue balls in a white square

Frasers & Co. Red and white, white next the mast

Jesse Woodward. A red Burgee

John Brown Do centre letter B

Hartshorne, Boggs & Co. A chequered flag, red and white, red Upper-

most.

## JANUARY bath XXXI Days.

There is nothing of which we are so liberal as of advice.  
 We may give advice; but we cannot give conduct.  
 We pass often from love to ambition; but we seldom return from am-  
 bition to love.

31	Hi tid. ♂ O ♀

Farmer's Calendar.

On the first day of January, every year, have a complete reckoning with yourself; your books all posted up, your accounts of more than one year's standing, all balanced, your controversies with all men settled; and you will have good neighbours, and complain less of hard times than some do. Improve the long evenings in useful reading. The Letters of Agricola costs only 12s 6d and are loaded with information for the agriculturalist. It is not best to be too full of new schemes; but when real improvements are made in the science of farming, it is well to know what they are, and to derive benefit from them if you can.

Timber cut now will be more durable than if cut in summer when full of sap. Finish killing your pork. If it has been well fattened and your wife is a good manager, my word for it, you will have pork next hay time, whether you kill it in the old of the moon or the new. Finish thrashing your grain as soon possible, that it may not be destroyed by the rats. Let your cattle receive an early visit; feed them twice in

## FEBRUARY hath XXIX Days.

Those who apply themselves too much to little things, commonly become incapable of great ones.

Few things are impracticable in themselves; and it is for want of application, rather than of means, that men fail of success.

Avarice often produces contrary effects. There are many people who sacrifice their whole fortunes to dubious and distant expectations; there are others who contend great for little present advantages.

First Quarter 7th Day, 10 h. 46 m. Evening.

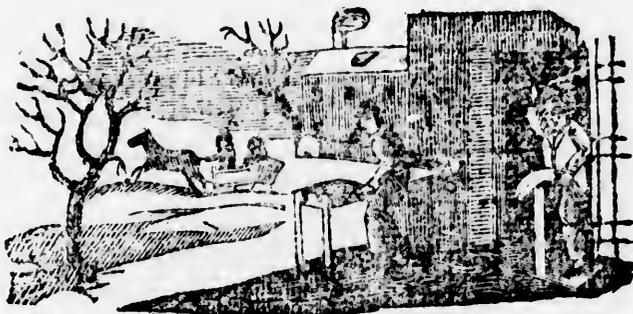

Full Moon 14th Day 3 h. 7 m. Evening.

Last Quarter 21st Day, 0 h. 58 m. Evening.

New Moon 29th Day, 6 h. 21 m. Evening.

## MARCH hath XXXI Days.

In love there are two sorts of constancy: one arises from our continually finding in the favourable object fresh motives to love; the other, from making it a point of honour to be constant.

The greatest of all cunning is, to seem blind to the snares laid for us; men are never so easily deceived as while they are endeavouring to deceive others.

*Farmer's Calender.*

**Green Wood.** It is said that a cord of green wood weighs about fifty-six hundred weight; a cord of dry, thirty-eight hundred weight. If then a farmer consumes thirty cord's yearly, and sleds it green, he sleds twenty-seven tons of water more than his neighbour who sleds it dry. The farmer who sleds his wood half a mile up hill, will think of this. Besides, if this wood is burned green, it requires wood enough, in addition, to evaporate twenty seven tons of water, to obtain the same quantity of heat. Add to this the vexation of making a fire of green wood some of these cold mornings at day break, and it appears that there is a great saving of labour and expense, and trouble, in using dry wood.

This is a fine season to be treasuring up that information which will fit you for the stations of usefulness and trust to which the agriculturalist is often called.

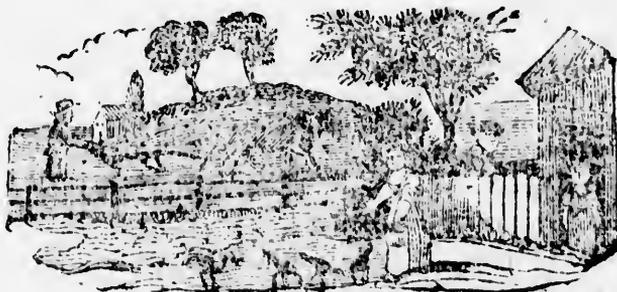

Now lay your plans for the season. See that your ploughs, hoes, carts, harrows, &c. are ready for the opening of the spring. Prepare rails and posts for setting. Attend to

APRIL hath XXX Days.

None but the contemptible are apprehensive of contempt.  
 Cunning and treachery proceed from want of capacity  
 It as is easy to deceive ourselves without our perceiving it, as it  
 difficult to deceive others without their perceiving it.  
 Decency is the least of all laws, but the most strictly observed.  
 Flattery is a sort of bad money, to which our vanity gives currency

every thing to render their labours easy and to render them happy, and they will repay you by their kind attention. Have you provided your family with means of knowledge? Do you take regularly some newspaper, which gives you and your family a view of all that is doing in the religious, political, and literary world; and which will afford your children amusement, enlarge their minds, and prepare them for active and useful life!

Fences.—As soon as possible put your fences in thorough repair. Some Farmers have a knack at teaching their cattle to jump over or shove down fences. They begin with a weak fence three poles high or thereabouts. As soon as their cattle have learnt to leap over or throw down such a fence, then another pole, and now and then a prop or a stake, which the animals soon learn to make nothing of. The farmer then does what he ought to have done in the first instance, makes a good five or six pole fence. But his cattle, having by this time found out their own strength and agility, are not to be stopped by such

JUNE hath XXX days,

A great genius will sincerely acknowledge his defects as well as his perfections; it is a weakness not to own the ill as well as the good that is in us.

Had we no faults ourselves, we would take less pleasure in observing those of others.

First Quarter 4th day, 4h. 52 m. morning

Full Moon 11th day, 10 h. 31 m. morning

Last Quarter 19th day, 1h. 4 m. evening

New Moon 26th day, 7 h 22 m. evening.

trifles and if they do not become quite so nimble as the cow that jumped over the moon and as hard to confine as Baron Trenck, they take all occasions to shew how badly they were brought up and their owner loses property as well as credit by his neglect of early discipline.

Two farmers who were neighbours had their crops of early peas killed by the frost. One of them came to condole with the other on their misfortune. 'Ah!' cried he, 'how unfortunate we have been, neighbour! Do you know I have done nothing but fret ever since. But bless me! you seem to have a fine healthy crop coming up just now. What are these?' 'These,' cried the other, 'Why these are what I sowed immediately after my loss.' 'What coming up already?' cried the fretter. 'Yes, while you were fretting. I was working!' 'What, and don't you fret when you have a loss?' 'Yes, but I always put it off until I have repaired the mischief.' 'Lord, why then you have no need to fret at all.' 'True,' replied the industrious gardener, 'and that's the very reason; in truth, it is very pleasant to have no longer reason

Farmer's Calendar.

to think of misfortunes: and it is astonishing how many might be repaired by a little alacrity and energy.

Clear the door yards on every side of your house, of every thing that will make manure, and put it in your compost. It is better for health, pleasure and profit, to clean your wood yard, every year. Plant cucumbers in June. Calculate this year to make some improvements in husbandry. Get Reports of Agricultural Societies. Mark your cattle with a branding iron, near the top of the horn, and your sheep on the ear, and have these marks recorded. "Always have work prepared for a rainy day." Put your barns, carts, scythes, rakes, forks, every thing, in perfect order for haying and harvest. Burn limestone under the eave-pillars on your fruit trees. Rise early and hear the music of the birds. It is better for land, to plough it and hoe it while the dew is on, than later in the day. Do not calculate to get the weeds out of your gardens and cornfields, but keep them out. Be in the field with your sons, when

## AUGUST hath XXXI Days.

He who is pleased with nobody, is much more unhappy than he with whom nobody is pleased.

Most men, like plants, have secret properties, which chance discovers.

There are reproaches that praise, and praises that reproach.

It is not enough to have great qualities, we must also have the management of them.

First Quarter 1st Day, 5 h. 38 m. Evening.

Full Moon 9th Day, 3 h. 15 m. evening.

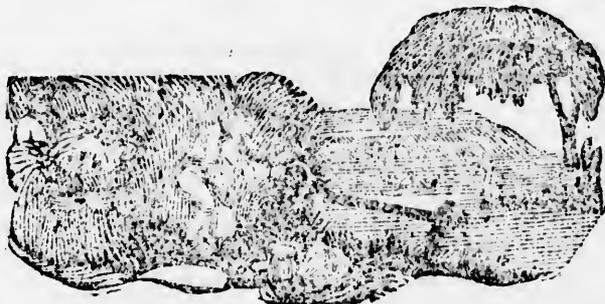

Last Quarter 17th Day, 4 h. 15 m. Evening.

New Moon 24th Day, 10 h. 10 m. Morning.

First Quarter 31st Day, 4 h. 17 m. Morning.

ver it is practicable, not to rule them with the rod of a tyrant, but to cheer and encourage them, and show them that you are willing to share in their labours. Walk with them as if your farm was common property to them and you, do not always say my oxen, my horses; but our oxen, our horses, and tell them your plans respecting the management of your farm. Ask their advice, that you may bring their minds to be active as well as their bodies. By tyrannizing over them and keeping them in ignorance, you will fit them only to be ignorant and selfless as long as they live.

Now give every attention to your dairy. Vessels of lead, copper, and brass contain poisonous qualities; and should not be used much for milk. Look to your summer schools and let the instructress to whom you commit your little ones, teach them by her example to be good. Remember the poor widow and orphan, and impart to them a portion from your stores.

Much hard work is to be done this month. Drink neither too much hot rum, or cold water. Make

SEPTEMBER hath XXX Days.

No man can answer for his courage who has never been in danger.  
 When our vices have left us, we flatter ourselves that we have left them.

Prosperity is a stronger trial of virtue than adversity.

The virtues are lost in interest, as rivers are in the sea.

To the honour of virtue it must be acknowledged, that the greatest mistortunes befall men from their vices.

Self love is more artful than the most artful of men.

Full Moon 8th Day, 7 h. 22 m Morning.

D M	REMARKABLE Days &c.	Farmer's Calendar.
2 23	1	not haying and harvest an excuse
3 14	2	for intemperance, but eat and drink
4 2	3	in order to live, and not live merely
4 49	4	to eat and drink. Rise before the
5 32	5	sun, and mow while the dew is on ;
6 14	6	mow morning and evening, and
6 56	7	make hay and get it in while the
7 37	8	sun shines. Be regular, temperate
8 0	9	industrious, but not violent—and
8 18	10	your harvest will be gathered earli-
9 2	11	er and better than your neighbour
9 47	12	Thirsty's ; and when harvest is o-
10 35	13	ver you will not have the rheuma-
11 27	14	tism. Let your corn be hoed the
0 20	15	third time before it is spindled ; do
1 20	16	not make too high hills around it,
2 19	17	lest you keep off the sun and rain
3 13	18	from the roots. Put a handful of
4 12	19	ashes around every hill, previous to
5 7	20	the second hoeing. If weeds are
6 0	21	going to seed in your barnyards and
6 55	22	gardens, cut them up and put them
7 48	23	into your compost.
8 42	24	Mothers may see that herbs are
9 38	25	gathered white in their bloom. Say
10 34	26	what you will, a bowl of herb drink
11 30	27	with a mother's care, will often
0 25	28	save you from a fever, and the ex-
1 20	29	pense of a doctor's bill.
2 7	30	

sets 6h 36m. even.

St Cyprian.

## OCTOBER hath XXXI Days.

The defects of the mind, like those of the face, grow worse as we grow old.

Man's chief wisdom consists in knowing his follies.

Wisdom is to the mind what health is to the body.

Youth is continual intoxication. It is the fever of reason.

Titles instead of exalting, debase those who act not up to them.

How can we expect that another should keep our secret, when it is more than we can do ourselves.

Full Moon 7th Day 11 h. 39 m. Evening.

Last Quarter 15th Day, 0 h. 8 m. Evening.

New Moon 22d Day, 3 h. 46 m. Morning.

First Quarter 29th Day, 1 n. 45 m. Evening.

		REMARKABLE	
		Days &c.	Farmer's Calendar.
D	1	Remigias	<p><b>Hog-Str.</b> This building should contain one apartment in which the swine shall be perfectly dry, and well provided with straw for their bed. Another part of it should be open and without a wooden floor; for swine will not well bear to be wholly secluded from the weather. Besides this open part may be extended so as to afford a fine place for making manure. It should be lowest in the middle, and no water should ever run from it. With proper care, many loads of valuable manure will be made every year, where these animals are kept. The trough should be made fast at the upper side; and if the edges are covered with iron, it will be well. There should be stakes before it so thick that only one swine can get his head between any two of them. The keeping of swine is very profitable to the farmer. Indian corn is the best food for them, but it should be ground or boiled till it is soft. Like human creatures however, they require some variety in their food. Boiled potatoes may be given them with much advantage.</p> <p>Lay up a rich store of winter ap-</p>

## NOVEMBER hath XXX. Days.

Advice is seldom welcome, and those who want it the most, always like it the least.

A great action will always meet with the approbation of mankind, and the inward pleasure which it produces is not to be expressed.

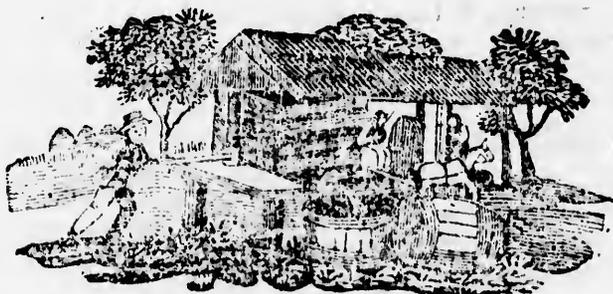

Every man has a natural right to his liberty; and whoever endeavours to ravish it from him, deserves death more than the robber who attacks us for our money on the highway.

*Farmer's Calender.*

ples; let them not be bruised in picking. Pile up stones to be removed by sledding. Look to your poultry if you would have a fat turkey on your table at Christmas. Possibly you will like two, to present one to your minister, if he visits his people. —Do not cut your corn before it is ripe unless it is bitten by the frost, in which case cut it up by the roots and stack it. —It will be cheaper to husk your corn with your own workmen than to make a huskiog.

Carefully lay up tools that have been used in the autumn. Be posting up your books, and settle all accounts the first day of January. Many farmers are very negligent in keeping their accounts. Hence they do not know how much property they really possess, their expenditures are suffered to exceed their income; and if they are suddenly removed from life, their property is left in confusion, their estates vanish under the hands of executors; & their children who perhaps have been trained up delicate, are left poor and dependant.

In these long evenings you want

## DECEMBER. hath XXXI days:

A proper secrecy is the only mystery of able men; mystery is the only secrecy of weak and cunning ones.

Smooth your way to the head through the heart. The way of reason is a good one; but it is commonly something longer, and perhaps not so sure.

Knowledge may give weight; but accomplishments only give lustre; and many more people see than weigh.

Farmer's Calender.

the company of friends. (and the best are your own family) of a well edited Newspaper, and a book. Furnish your children with books that will be so interesting that they cannot refrain from reading them.

*The Jarewell.*—Let us cease to look abroad for sources of sudden wealth—let each of us attend to his farm understandingly—know his own plan and pursue it steadily.—Let him do his work well and in season—See that all is in order and fit for what is designed—Contribute cheerfully to objects of usefulness and public improvement, regarding with anxious care the interests of his church and schools—Let him discountenance idle and vicious habits, and promote good conduct and vital piety in the circle around him by his own example—Let him in short, strive earnestly to discharge his duty to himself, his neighbours and his God, and he cannot fail of success; but with an approving conscience, and the smiles of Heaven he will secure to himself the fruits of an honest, intelligent, and independent man.

### TIDE TABLE for the American Coast.

Amelia Island	add 1	00	Machias	add 3	30
Boston Harbour	add 4	00	Martha's Vineyard	add 0	07
Bell Island Strs	add 1	45	Nantucket	add 0	07
Bermuda In.	sub. 0	30	Nanaganset Bay	add 0	07
Cape Fear	add 0	30	New York	add 1	24
Cape Charles	add 0	15	Ovacock In.	add 1	30
Cape May & Haplopn.	add 1	15	Pussamaquoddy	add 4	00
Cape Roman	add 0	30	Penobscot Bay	add 3	15

Charleston Bar	sub. 0	15	Portland	add 3	15
Chebucto Bay	0	00	Prsmth. & Newbrprt.	add 3	45
Florida Keys	add 1	20	Quebec	add 0	30
Fundy Bay	add 1	15	Sundy Hook	subt. 0	53
Hell Gate	add 1	54	Savannah	add 0	45
Kennebeck entr	add 3	15			

The times in the above Table are to be added to or subtracted from the time of high water at Halifax, according to the directions there given. Example—To find the time of high water at Quebec May 1 1824. The time of high water at Halifax May 1 by the Almanack is 9h 30m. To this add 30m (the time set against Quebec in the Table) and you have the time of high water at Quebec 10h.

### ECLIPSES IN THE YEAR 1824.

I. Jan. 16 Moon eclipsed visible.		III. July 10. Moon eclipsed,	
h. m.		visible.	h. m.
Beginning, 2 34	} Apparent time morning.	Beginning 10 41	} Apparent time evening.
Middle, 3 59½		Middle, 11 25	
Ecliptic $\delta$ , 4 5½		Ecliptic $\delta$ , 11 36	
End, 5 25		End, 0 9	
Duration 2 51		Duration, 1 28	
Digits eclipsed 9° 22¼' on $\gamma$ 's north limb,		Digits eclipsed 1° 37¼' on $\gamma$ 's south limb.	
II. June 26, Sun eclipsed, chiefly invisible.		IV. December 20 Sun eclipsed invisible.	
Eclipse will begin at 7h 25m ev		$\delta$ 5h 56m morning,	
Sun sets 7h 33m,		$\gamma$ 's latitude 9¼' S,	
$\delta$ 6h 55m.			

☿ The Planet Venus will be morning star till July 29th then evening star through the year.

Most arts require long study and application ; but the most useful art of all, that of pleasing, requires only the desire.

### DIRECTIONS FOR MEASURING CATTLE ;

*So as to ascertain their Weight while Living.*

This is of the first utility for all those who are by no means experienced judges enough by the eye, or others who have a beast above the common weight of the species; and by which

means, fol

within a m

Take a

behind the

inches he

string mea

C

I

Which mu

Then mult

allowed to

9 and more

The dim

calves or h

necessary

Stock, an

means, following these directions, they will come to the mark, within a mere trifle.

Take a string, put it round the beast, standing square, just behind the shoulder blade, measure on a foot rule the feet and inches he is circumference, this is called the girth; then with the string measure from that bone of the tail which plumbs the line with the hinder part of the buttock; direct the line along the back to the fore-part of the shoulder blade; take the dimensions on the foot rule as before, which is the length, and work the figures in the following manner;

Girth of an ordinary bullock	6	4
Length along the back	5	3

Which multiplied together, make 31 square superficial feet, that again multiplied by 23 (which is the number of pounds allowed to each Superficial foot, of all cattle measuring less than 7 and more than 5 feet in girth) makes 713 pounds;—

Again suppose a pig, or any small beast should measure 2 feet in girth and 2 feet long.

Girth of a small pig	2	0
Length along the back	2	0

Which multiplied together makes 4 0 Square feet. That again multiplied by 11 (which is the number of pounds allowed for each square foot of all cattle measuring less than 3 feet in girth,) makes 44 pounds.

Again suppose any hog, calf, &c. should measure 4 feet 6 inches and 3 feet 9 inches in length say.

Girth	4	6
Length	3	9

Which multiplied together makes  $16\frac{1}{2}$  square feet. The square superficial feet and inches multiplied by 16, (which is the number of pounds allowed to all cattle measuring less than 5 and more than 3 feet in girth) makes 264 pounds;

Again suppose a beast measures 8 feet 4 inches in girth, and 7 feet 3 inches in length, to know how much he mus. weigh, say

Girth of a large Ox	8	4
Length along the back	7	3

Which multiplied together, makes 57 square superficial feet. Then multiply the feet by 30 (which is the number of pounds allowed to each superficial foot of all cattle measuring less than 9 and more than 7 feet in girth) makes 1767.

The dimensions of the girth and length of black cattle, Sheep, calves or hogs, may be as exactly taken this way as is at all necessary for any computation, or for the purpose of valuation of Stock, and will answer to the four quarters, sinking the offal

and which every man who can get even a bit of chalk, may easily perform.

N B.—A deduction must be made for a half fatted beast of 14 pounds to 280, from that of a fat one: and for a cow that has had calves, 14 pounds must be allowed, and 14 more for not being properly fat.

### Time of going through the Falls.

**T**HE Falls are level (or still water) about three hours and an half on the Flood and about two hours and an half on the ebb which makes it passable four times in 24 hours about 10 or 15 minutes each time.—No other rule can be given, as much depends on the floods in the River St John and the time of high water or full sea, which is often hastened by winds, and in proportion to the height of them.

### To Travellers.

*For the information of Travellers between Windsor and Parrsborough, &c.*

**T**HE Parrsborough Packet sails regularly between Windsor and Parrsborough every week from the first April to Christmas, viz.—leaves Parrsborough on Monday; wind and weather permitting so as to be at Windsor on Tuesday; and will sail from thence the first high water that happens at or after eight o'clock in the morning of that day; the Packet frequently goes twice or three times a week when business requires it.

**MANURE.** The substances which make excellent manure are much more numerous than seems to be generally supposed by farmers. Among many others are the following; putrified flesh, bones, woollen rags, fish, leather, soap suds, urine of all animals, brine, dung of all kinds, scrapings of door yards and streets, rubbish of old houses, lime, plaster of Paris; mud from ponds; rivers, swamps and the sea; shells, turfs, ashes, earth that has been long under cover, weeds that grow in gardens, fields, ponds, rivers, the sea, &c. refuse hay, ferns or brakes, leaves of trees, moss, rotten wood, &c. &c. All these substances, whenever they can be obtained, should be collected together in a compost, which is one of the most essential requisites to good husbandry.

**Barn-yard.** As this yard is the most favourable place on the farm, to make manure, the outer parts of it should be so much higher than the middle, that no manure shall be washed out of it by the greatest rains. As many of the barns and out houses as is practicable, should stand on this yard, that the manure and rubbish which they afford, may be easily conveyed into it. The yard should be considerably large, to afford sufficient room for making manure; and should have several apartments into which sheep, calves, &c. may be put, as occasion requires.

In November secure your cellars from frost. Fasten loose clap boards, shingles, &c. Secure a good school master, a man of learning and good moral principles. Better give twenty dollars for a good man, than have a poor one for nothing. Supply your children with books; and let them know that you respect their teacher, and place a high estimate on the privileges they enjoy under his instructions, and that they will find you steadfast in maintaining good government at school; as well as in your own family. Be grateful to the God who is crowning the year with his goodness.

**CLEMENT H. BELCHER**

**HAS** constantly for Sale at his Store, opposite the Province Building, an excellent assortment of School Books, Stationary, &c. &c.
