OFFICE OF THE FEDERAL REGISTER

FEDERAL REGISTER

Vol. 78 Friday,
No. 249 December 27, 2013

Pages 78693–79282

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov*.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Printing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com*.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov*.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 77 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

[NRC–2012–0020]

RIN 3150–AJ10

List of Approved Spent Fuel Storage Casks: Transnuclear, Inc. Standardized NUHOMS® Cask System

AGENCY: Nuclear Regulatory Commission.

ACTION: Direct final rule; confirmation of effective date.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is confirming the effective date of January 7, 2014, for the direct final rule that was published in the **Federal Register** on October 24, 2013. This direct final rule amended the NRC's spent fuel storage regulations by revising the Transnuclear, Inc. Standardized NUHOMS® Cask System listing within the "List of Approved Spent Fuel Storage Casks" to include Amendment No. 11 to Certificate of Compliance (CoC) No. 1004.

DATES: The effective date of January 7, 2014, is confirmed for the direct final rule published October 24, 2013 (78 FR 63375).

ADDRESSES: Please refer to Docket ID NRC–2012–0020 when contacting the NRC about the availability of information for this direct final rule. You may access publicly-available information related to this direct final rule by any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2012–0020. Address questions about NRC dockets to Carol Gallagher; telephone: 301–287–3422; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly available documents online in the NRC Library at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select "*ADAMS Public Documents*" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Gregory Trussell, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–6445, email: *Gregory.Trussell@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Discussion

On October 24, 2013 (78 FR 63375), the NRC published a direct final rule amending its regulations at § 72.214 of Title 10 of the *Code of Federal Regulations* (10 CFR) by revising the Transnuclear, Inc. Standardized NUHOMS® Cask System listing within the "List of Approved Spent Fuel Storage Casks" to include Amendment No. 11 to CoC No. 1004. Amendment No. 11 added a new transfer cask, the OS197L, for use with the 32PT and 61BT dry shielded canisters, and converted the CoC No. 1004 Technical Specifications to the format in NUREG–1745, "Standard Format and Content for Technical Specifications for 10 CFR Part 72 Cask Certificates of Compliance." In addition, the amendment made several other changes as described in Section III, "Discussion of Changes," section of the direct final rule.

II. Public Comments on the Companion Proposed Rule

In the direct final rule, the NRC stated that if no significant adverse comments were received, the direct final rule would become effective on January 7, 2014. The NRC received one public comment on the companion proposed rule (78 FR 63408), from Mr. Richard Ochs (ADAMS Accession No. ML13320A027). Mr. Ochs stated his concern that the neutron emissions inside the outer shell of nuclear waste storage containers are dangerous to living organisms, including insects, microbes, bacteria or virus that attach to dust that passes through the screened windows in the outer steel covers of storage containers. Specifically, Mr. Ochs raises a concern based on the emergence of Lyme's Disease in Lyme, Connecticut, which he asserts occurred following an unintended release of radioactive gas from the nearby Millstone Nuclear Reactor. According to his comment, "[T]he Deer Tick has carried a spirochete bacteria for millions of years, but after the Millstone release, that spirochete was mutated, causing the emergence of Lyme's Disease."

The NRC staff reviewed this comment and concluded that this comment is not a significant adverse comment as defined in NUREG–BR–0053, Revision 6, "United States Nuclear Regulatory Commission Regulations Handbook" (ADAMS Accession No. ML052720461), as it is beyond the scope of this rulemaking. Instead, this comment raises a generic concern regarding the use of any spent fuel storage casks and is not specific to any issue or concern with the amendment to the cask certificate that is the subject of this rulemaking effort.

Moreover, the NRC staff has concluded that there would be no significant environmental impacts as confirmed in Section VII, "Finding of No Significant Environmental Impact: Availability," of the direct final rule. This comment does not challenge that finding because, as the Environmental Assessment explained, this amendment to the rule will not result in any significant change in the types or significant revisions in the amounts of any effluent released, no significant increase in the individual or cumulative radiation exposure, and no significant increase in the potential for or consequences from radiological accidents. This amendment continues to ensure that the Commission's regulations regarding dose rates, found in 10 CFR Part 20, are maintained. A challenge to those dose rates, or the method by which the Commission

establishes those dose rates, would be most appropriately addressed as a petition for rulemaking pursuant to 10 CFR 2.802. Therefore, this rule will become effective as scheduled.

Dated at Rockville, Maryland, this 20th day of December 2013.

For the Nuclear Regulatory Commission.

Helen Chang,

Acting Chief, Rules, Announcements, and Directives Branch, Division of Administrative Services, Office of Administration.

BILLING CODE 7590–01–P

FEDERAL HOUSING FINANCE AGENCY

12 CFR Part 1238

[No. 2013–N–19]

Orders: Supplemental Orders on Reporting by Regulated Entities of Stress Testing Results as of September 30, 2013

AGENCY: Federal Housing Finance Agency.

ACTION: Orders.

SUMMARY: In this document, the Federal Housing Finance Agency (FHFA) provides notice that it issued Orders to supplement its Orders dated November 26, 2013, with respect to reporting under section 165(i)(2) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).

DATES: Each Order is effective on the date signed.

FOR FURTHER INFORMATION CONTACT: Naa Awaa Tagoe, Senior Associate Director, Office of Financial Analysis, Modeling and Simulations, (202) 649–3140, *naaawaa.tagoe@fhfa.gov;* Stefan Szilagyi, Examination Manager, FHLBank Modeling, FHLBank Risk Modeling Branch, (202) 649–3515, *stefan.szilagy@fhfa.gov;* or Mark D. Laponsky, Deputy General Counsel, Office of General Counsel, (202) 649–3054 (these are not toll-free numbers), *mark.laponsky@fhfa.gov.* The telephone number for the Telecommunications Device for the Hearing Impaired is (800) 877–8339.

SUPPLEMENTARY INFORMATION:

I. Background

FHFA is responsible for ensuring that the regulated entities operate in a safe and sound manner, including the maintenance of adequate capital and internal controls, that their operations and activities foster liquid, efficient, competitive, and resilient national housing finance markets, and that they carry out their public policy missions through authorized activities. *See* 12 U.S.C. 4513. These Supplemental Orders are being issued under 12 U.S.C. 4514(a), which authorizes the Director of FHFA to require by Order that the regulated entities submit regular or special reports to FHFA and establishes remedies and procedures for failing to make reports required by Order. The Supplemental Orders provide to the regulated entities two additional appendices of scenario assumptions to be used for stress testing.

II. Orders

For the convenience of the affected parties, the text of the Supplemental Orders, without appendices, follows below in its entirety. You may access these Orders with Appendices 11 and 12 from FHFA's Web site at *http://www.fhfa.gov/Default.aspx?Page=440.* The Supplemental Orders and Summary Instructions and Guidance will be available for public inspection and copying at the Federal Housing Finance Agency, Eighth Floor, 400 Seventh St. SW., Washington, DC 20024. To make an appointment, call (202) 649–3804.

The text of the Supplemental Orders is as follows:

Federal Housing Finance Agency

Order Nos. 2013–OR–B–3, 2013–OR–FNMA–3, and 2013–OR–FHLMC–3

SUPPLEMENTAL ORDER ON REPORTING BY REGULATED ENTITIES OF STRESS TESTING RESULTS AS OF SEPTEMBER 30, 2013

Whereas, section 165(i)(2) of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") requires certain financial companies with total consolidated assets of more than $10 billion, and which are regulated by a primary Federal financial regulatory agency, to conduct annual stress tests to determine whether the companies have the capital necessary to absorb losses as a result of adverse economic conditions;

Whereas, FHFA's rule implementing section 165(i)(2) of the Dodd-Frank Act is codified as 12 CFR part 1238 and requires that "[e]ach regulated entity must file a report in the manner and form established by FHFA." 12 CFR § 1238.5(b);

Whereas, on November 26, 2012, FHFA issued an Order to each regulated entity accompanied by appendices numbered 1 through 10 and amended Summary Instructions and Guidance relating to the performance of stress tests as of September 30, 2013, and the reporting of the results of such tests;

Whereas, FHFA's Acting Director has determined that it is appropriate to supplement the appendices to the November 26, 2013 Orders with two additional appendices;

Whereas, section 1314 of the Safety and Soundness Act, 12 U.S.C. § 4514(a) authorizes the Director of FHFA to require regulated entities, by general or specific order, to submit such reports on their management, activities, and operations as the Director considers appropriate.

Now therefore, it is hereby ordered as follows:

Each regulated entity shall report to FHFA and to the Board of Governors of the Federal Reserve System the results of stress testing as required by 12 CFR § 1238, in the form and with the content described therein and in the Summary Instructions and Guidance accompanying the November 26, 2013 Orders, and using the scenarios provided in Appendices 1 through 10 to those Orders and Appendices 11 and 12 that accompany this Order.

This Order is effective immediately.

Signed at Washington DC, this 13th day of December, 2013.

Edward J. DeMarco,

Acting Director, Federal Housing Finance Agency.

Dated: December 13, 2013.

Edward J. DeMarco,

Acting Director, Federal Housing Finance Agency.

[FR Doc. 2013–30567 Filed 12–26–13; 8:45 am]

BILLING CODE 8070–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2013–0365; Directorate Identifier 2012–NM–223–AD; Amendment 39–17704; AD 2013–25–08]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding airworthiness directive (AD) 2009–24–09 for all Airbus Model A330–200 and –300 series airplanes, and Model A340–200 and –300 series airplanes. AD 2009–24–09 required a repetitive inspection program on certain check valves in the hydraulic systems that includes, among other things, inspections for lock wire presence and integrity, traces of seepage or black deposits, proper torque, alignment of the check valve and manifold, installing new lock wire, and corrective actions if needed. This new AD expands the applicability, reduces the compliance time, changes torque values of the check valve tightening, and requires a repetitive inspection program for certain check valves in the

hydraulic systems on airplanes that have had a certain modification embodied during production or in-service. This AD was prompted by multiple reports of hydraulic line check valves loosening. We are issuing this AD to detect and correct such check valve loosening, which could result in hydraulic leaks, possibly leading to the loss of all three hydraulic systems and consequent loss of control of the airplane.

DATES: This AD becomes effective January 31, 2014.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of January 31, 2014.

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of December 14, 2009 (74 FR 62208, November 27, 2009).

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov/#!docketDetail;D=FAA-2013-0365;* or in person at the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to the specified products. The NPRM was published in the **Federal Register** on May 8, 2013 (78 FR 26716), and proposed to supersede AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009). The NPRM proposed to correct an unsafe condition for the specified products. The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA Airworthiness Directive 2012–0244R1, dated January 25, 2013 (referred to after this as the Mandatory Continuing Airworthiness Information, or "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

> An A330 operator experienced a yellow hydraulic circuit low level due to a loose check valve, Part Number (P/N) CAR401. During the inspection on the other two hydraulic systems, the other three check valves P/N CAR401 were also found to be loose with their lock wire broken in two instances. Airbus A340 aeroplanes are also equipped with P/N CAR401 high pressure manifold check valves.
>
> Additional cases of P/N CAR401 check valve loosening have been reported on aeroplanes having accumulated more than 1,000 [total] flight cycles (FC). The check valve fitted on the Yellow hydraulic system is more affected, due to additional system cycles induced by cargo door operation.
>
> This condition, if not detected and corrected, could result in hydraulic leaks, possibly leading to the loss of all three hydraulic systems and consequent loss of control of the aeroplane.
>
> To address this unsafe condition, EASA issued Emergency AD 2009–0223–E (*http://ad.easa.europa.eu/blob/easa_ad_2009_0223E_superseded.pdf/EAD_2009-0223-E_1*) [which corresponds to FAA AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009)] to require an inspection programme to detect any check valve loosening and if necessary, to apply the applicable corrective actions.
>
> EASA AD 2010–0145 (*http://ad.easa.europa.eu/blob/easa_ad_2010_0145_Superseded.pdf/AD_2010-0145_1*), which superseded EASA EAD 2009–0223–E retaining its requirements, was issued to expand the applicability to the newly certified models A330–223F and A330–243F.
>
> Prompted by further reported in-service events of check valve P/N CAR401 loosening before reaching the threshold of 700 FC, EASA AD 2011–0139 (*http://ad.easa.europa.eu/blob/easa_ad_2011_0139_superseded.pdf/AD_2011-0139_1*), which superseded EASA AD 2010–0145, retaining its requirements, was issued to:
>
> —Extend the requirement to identify the P/N CAR401 check valves to all aeroplanes, and to
>
> —reduce the inspection threshold for aeroplanes fitted with check valve P/N CAR401, either installed in production through Airbus modification 54491, or installed in service through Airbus Service Bulletin (SB) A330–29–3101 or Airbus SB A340–29–4078.
>
> EASA AD 2012–0070 (*http://ad.easa.europa.eu/blob/easa_ad_2012_0070_Correction_superseded.pdf/AD_2012-0070_1*), which superseded EASA AD 2011–0139, retaining its requirements, was issued to require an increased torque value of the check valve tightening and High Pressure (HP) manifold re-identification.
>
> Since EASA AD 2012–0070 was issued, additional in-service events have been reported on aeroplanes fitted with check valves on which the increased torque value had been applied. Based on those events, it has been concluded that the action to re-torque the check valves with an increased value is not a satisfactory terminating action for addressing the issue of those check valves.
>
> For the reasons described above, this new [EASA] AD partially retains the requirements of EASA AD 2012–0070, which is superseded. Additionally, for aeroplanes equipped with P/N CAR401 on which the increased torque value has been applied, this new [EASA] AD requires repetitive inspections of the check valves and HP manifolds. Finally, this [EASA] AD also requires application of a lower torque value when a check valve P/N CAR401 is installed on an aeroplane.
>
> This [EASA] AD is considered to be an interim action and further AD action may follow.
>
> Note: the reporting and the torque value increase requirements for check valves P/N CAR401 of EASA AD 2012–0070 are no longer part of this new [EASA] AD.

You may obtain further information by examining the MCAI in the AD docket. You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov/#!documentDetail;D=FAA-2013-0365-0003.*

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comment received.

Request To Change Compliance Time

US Airways requested that we change the compliance time in paragraph (j) of the NPRM (78 FR 26716, May 8, 2013) to 1,000 flight hours after the effective date of the AD, or within 1,000 flight hours after the date of issuance of the original export certificate of airworthiness, whichever occurs later. US Airways stated that this will provide an inspection threshold for new airplane deliveries.

We disagree with changing the compliance time to base it, in part, on the date of issuance of the original export certificate of airworthiness. In developing appropriate compliances time for this final rule, we considered the safety issue as well as the recommendations of the manufacturer, the availability of necessary repair parts, and the practical aspect of accomplishing the required inspection within an interval of time that corresponds to the normal maintenance schedules of most affected operators. In addition, the compliance time of "Within 1,000 flight hours after the effective date of this AD" specified in paragraph (j) of this final rule corresponds with the compliance time given in the MCAI. We have not changed this final rule in this regard.

Change Made to This Final Rule

We reformatted paragraph (n) of this final rule, and removed an unnecessary sentence that appeared at the end of paragraph (n)(2) of the NPRM (78 FR 26716, May 8, 2013).

Conclusion

We reviewed the available data, including the comment received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes:

- Are consistent with the intent that was proposed in the NPRM (78 FR 26716, May 8, 2013) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (78 FR 26716, May 8, 2013).

Costs of Compliance

We estimate that this AD affects 67 airplanes of U.S. registry.

The actions that are required by AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009), and retained in this AD take about 8 work-hours per product, at an average labor rate of $85 per work hour. Based on these figures, the estimated cost of the currently required actions is $680 per product.

We estimate that it will take about 2 work-hours per product to comply with the new requirements of this AD. The average labor rate is $85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be $11,390, or $170 per product.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov/#!docketDetail;D=FAA-2013-0365;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing airworthiness directive (AD) 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009), and adding the following new AD:

2013–25–08 Airbus: Amendment 39–17704. Docket No. FAA–2013–0365; Directorate Identifier 2012–NM–223–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective January 31, 2014.

(b) Affected ADs

This AD supersedes AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009).

(c) Applicability

This AD applies to Airbus Model A330–201, –202, –203, –223, –223F, –243, –243F, –301, –302, –303, –321, –322, –323, –341, –342, and –343 airplanes; and Model A340–211, –212, –213, –311, –312, and –313 airplanes; certificated in any category; all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 29, Hydraulic power.

(e) Reason

This AD was prompted by multiple reports of hydraulic line check valves loosening. We are issuing this AD to detect and correct such check valve loosening, which could result in hydraulic leaks, possibly leading to the loss of all three hydraulic systems and consequent loss of control of the airplane.

(f) Compliance

You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

(g) Retained Actions

This paragraph restates the requirements of paragraph (g) of AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009). Except for Model A330–223F and A330–243F airplanes: Do the actions required by paragraphs (g)(1) and (g)(2) of this AD.

(1) For airplanes that do not have Airbus Modification 54491 embodied in production, or Airbus Service Bulletin A330–29–3101 or Airbus Service Bulletin A340–29–4078 embodied in service: Within 100 flight cycles or 28 days after December 14, 2009 (the effective date of AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009)), whichever occurs first, inspect the check valves on the blue, green, and yellow hydraulic systems to identify their part numbers (P/Ns), in accordance with the instructions of Airbus All Operators Telex (AOT) A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes); or AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes). Accomplishment of the inspection required by paragraph (h) of this AD terminates the requirements of this paragraph.

(i) If check valves having P/N CAR401 are installed on all three hydraulic systems, before further flight, do the actions specified in paragraph (g)(2)(i) of this AD. After accomplishing the actions required by paragraph (g)(2)(i) of this AD, do the actions specified in paragraphs (g)(2)(ii) and (g)(2)(iii) of this AD at the applicable compliance times specified in those paragraphs. Accomplishment of the inspection required by paragraph (i) of this AD terminates the requirements of this paragraph.

(ii) If check valves having P/N CAR401 are not installed on all three hydraulic systems, no further action is required by this paragraph until any check valve having P/N CAR400 is replaced with a check valve having P/N CAR401. If any check valve having P/N CAR400 is replaced by a check valve having P/N CAR401, before further flight, do the inspection specified in paragraph (g)(1) of this AD to determine if all three hydraulic systems are equipped with check valves having P/N CAR401. Accomplishment of the inspection required by paragraph (h) of this AD terminates the requirements of this paragraph.

(2) For airplanes on which Airbus Modification 54491 was embodied in production, or Airbus Service Bulletin A330–29–3101 or Airbus Service Bulletin A340–29–4078 was embodied in service, do the actions specified in paragraphs (g)(2)(i), (g)(2)(ii), and (g)(2)(iii) of this AD.

(i) Except as required by paragraph (g)(1)(i) of this AD, at the applicable times specified in paragraphs (g)(2)(i)(A) and (g)(2)(i)(B) of this AD, as applicable: Do the inspection program (detailed inspection of the lock wire for presence and integrity, a detailed inspection for traces of seepage or black deposits, and an inspection for proper torque) on yellow and blue high pressure manifolds, install new lock wires, and do all applicable corrective actions, in accordance with the instructions of paragraph 4.1.1 of Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes); or AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes). Do all applicable corrective actions before further flight. Accomplishment of the inspection required by paragraph (h)(1) of this AD terminates the requirements of this paragraph.

(A) For airplanes on which Airbus Modification 54491 has been embodied in production: At the later of the times specified in paragraphs (g)(2)(i)(A)(*1*) and (g)(2)(i)(A)(*2*) of this AD.

(*1*) Before the accumulation of 1,000 total flight cycles since first flight but no earlier than the accumulation of 700 total flight cycles since first flight.

(*2*) Within 100 flight cycles or 28 days after December 14, 2009 (the effective date of AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009)), whichever occurs first.

(B) For airplanes on which Airbus Service Bulletin A330–29–3101 or A340–29–4078 was embodied in service: At the later of the times specified in paragraphs (g)(2)(i)(B)(*1*) and (g)(2)(i)(B)(*2*) of this AD.

(*1*) Within 1,000 flight cycles since the embodiment of Airbus Service Bulletin A330–29–3101 or A340–29–4078 but no earlier than 700 flight cycles after the embodiment of Airbus Service Bulletin A330–29–3101 or A340–29–4078.

(*2*) Within 100 flight cycles or 28 days after December 14, 2009 (the effective date of AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009)), whichever occurs first.

(ii) Within 900 flight hours after accomplishment of paragraph (g)(2)(i) of this AD, do the inspection program (detailed inspection of the lock wire for presence and integrity, a detailed inspection for traces of seepage or black deposits, and an inspection for proper torque) and install a new lock wire on the green high pressure manifold; and do an inspection (detailed inspection for traces of seepage or black deposits, and detailed inspection to determine alignment of the check valve and manifold) on the yellow and blue high pressure manifolds, and do all applicable corrective actions; in accordance with the instructions of paragraph 4.1.2 of Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes); or AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes). Do all applicable corrective actions before further flight. Accomplishment of the inspection program required by paragraph (i) of this AD terminates the requirements of this paragraph.

(iii) Within 900 flight hours after accomplishment of paragraph (g)(2)(ii) of this AD, and thereafter at intervals not to exceed 900 flight hours, do the inspection program (detailed inspection for traces of seepage or black deposits, and detailed inspection to determine alignment of the check valve and manifold) on the green, yellow, and blue high pressure manifolds, and do all applicable corrective actions, in accordance with the instructions of paragraph 4.1.3 of Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes); or AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes). Do all applicable corrective actions before further flight. Accomplishment of the inspection program required by paragraph (i) of this AD terminates the requirements of this paragraph.

(h) New Inspection and Actions

For airplanes equipped with check valves having P/N CAR400; and for airplanes equipped with check valves having P/N CAR401, except for airplanes on which Airbus Modification 201384 has been embodied during production, or on which Airbus Service Bulletin A330–29–3119 (for Model A330–200, –200F, and –300 series airplanes) or Airbus Service Bulletin A340–29–4091 (for Model A340–200 and –300 series airplanes) has been embodied in service: Within 900 flight hours after the effective date of this AD, inspect the check valves on the blue, green, and yellow hydraulic systems to identify their part numbers, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011 (for Model A330–200, –200F and –300 series airplanes); or Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011 (for Model A340–200 and –300 series airplanes). Accomplishment of the actions required by this paragraph terminates the requirements specified in paragraphs (g)(1) and (g)(1)(ii) of this AD.

(1) If check valves having P/N CAR401 are installed on all three hydraulic systems: Before further flight, do the inspection program (detailed inspection for red mark presence and alignment integrity of the check valve and manifold, a detailed inspection for traces of seepage or black deposits, and an inspection for proper torque) on yellow and blue high pressure manifolds, and do all applicable corrective actions, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011 (for Model A330–200, –200F, and –300 series airplanes); or Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011 (for Model A340–200 and –300 series airplanes). Accomplishment of the actions required by this paragraph terminates the requirements specified in paragraph (g)(2)(i) of this AD.

(2) If check valves having P/N CAR401 are not installed on all three hydraulic systems, no further action is required by this paragraph until any check valve having P/N CAR400 is replaced with a check valve having P/N CAR401. If any check valve having P/N CAR400 is replaced by a check valve having P/N CAR401: Before further flight after such replacement, do the actions specified in paragraph (h) of this AD, to determine if all three hydraulic systems are equipped with check valves having P/N CAR401. If check valves having P/N CAR401 are installed on all three hydraulic systems: Before further flight, do the actions specified in paragraphs (h)(1) and (i) of this AD.

(i) New Repetitive Inspection Program and Corrective Actions

Within 900 flight hours after accomplishment of paragraph (h)(1) of this AD, do the inspection program (detailed inspection for red mark presence and alignment integrity of the check valve and manifold, a detailed inspection for traces of seepage or black deposits, and an inspection for proper torque) on the green, yellow, and blue system check valves, and do all applicable corrective actions, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011 (for Model A330–200, –200F, and –300 series airplanes); or Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011 (for Model A340–200 and –300 series airplanes). Repeat the inspection program thereafter at intervals not to exceed 900 flight hours. Do all applicable corrective actions before further flight. Accomplishment of the actions required by this paragraph terminates the requirements specified in paragraphs (g)(1)(i), (g)(2)(ii), and (g)(2)(iii) of this AD.

(j) New Repetitive Inspection for Certain Airplanes

For airplanes equipped with check valves having P/N CAR401 and on which Airbus Modification 201384 has been embodied during production, or on which Airbus Service Bulletin A330–29–3119 (for Model A330–200, –200F, and –300 series airplanes); or Airbus Service Bulletin A340–29–4091 (for Model A340–200 and –300 series airplanes) has been embodied in service: Within 1,000 flight hours after the effective date of this AD, do a general visual

inspection of the green, yellow, and blue high pressure manifolds and check valves having P/N CAR401 for any sign of rotation of the check valve head, and for any signs of hydraulic fluid leakage or seepage (including black deposits), in accordance with the instructions of Airbus Alert Operators Transmission A29L001–12, dated October 11, 2012. Repeat the inspection thereafter at interval not to exceed 900 flight hours.

(k) New Corrective Action for Certain Airplanes

If, during any inspection required by paragraph (j) of this AD, any sign of rotation of the check valve head is found, or any sign of hydraulic fluid leakage or seepage (including black deposits) is found: Before further flight, do all applicable corrective actions, in accordance with the instructions of Airbus Alert Operators Transmission A29L001–12, dated October 11, 2012.

(l) No Terminating Action

Accomplishment of the corrective actions required by this AD does not constitute terminating action for the repetitive inspections required by this AD.

(m) Replacement Check Valve Torque Value

As of the effective date of this AD, at each replacement of a check valve with a check valve having P/N CAR401, apply a torque of 141 to 143 newton metre (N.m) (103.98 to 105.45 pounds-foot (lbf.ft)) during installation.

(n) Credit for Previous Actions

(1) This paragraph restates the credit specified in paragraph (g)(2)(iv) of AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009). This paragraph provides credit for actions required by paragraph (g)(2)(i) of this AD, if those actions were performed before December 14, 2009 (the effective date of AD 2009–24–09), using the applicable service information specified in paragraphs (n)(1)(i) and (n)(1)(ii) of this AD.

(i) Airbus AOT A330–29A3111, dated September 2, 2009 (for Model A330–200 and –300 series airplanes), which is not incorporated by reference in this AD.

(ii) Airbus AOT A340–29A4086, dated September 2, 2009 (for Model A340–200 and –300 series airplanes), which is not incorporated by reference in this AD.

(2) This paragraph provides credit for actions required by paragraph (h) of this AD, if those actions were performed before the effective date of this AD using the applicable service information specified in paragraphs (n)(2)(i) through (n)(2)(iv) of this AD.

(i) Airbus AOT A330–29A3111, dated September 2, 2009 (for Model A330–200 and –300 series airplanes), which is not incorporated by reference in this AD.

(ii) Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009 (for Model A330–200 and –300 series airplanes).

(iii) Airbus AOT A340–29A4086, dated September 2, 2009, (for Model A340–200 and –300 series airplanes), which is not incorporated by reference in this AD.

(iv) Airbus AOT A340–29A4086, Revision 1, dated October 8, 2009 (for Model A340–200 and –300 series airplanes).

(o) No Reporting

Although the service information specified in paragraphs (o)(1) through (o)(5) of this AD specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(1) Airbus Alert Operators Transmission A29L001–12, dated October 11, 2012.

(2) Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011.

(3) Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011.

(4) Airbus AOT A330–29A3111, Revision 1, dated October 8, 2009.

(5) Airbus AOT A340–29A4086, Revision 1, dated October 8, 2009.

(p) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD. AMOCs approved for AD 2009–24–09, Amendment 39–16068 (74 FR 62208, November 27, 2009), are approved as AMOCs for the corresponding provisions of this AD, except AMOC ANM–116–11–172 is not approved as an AMOC for the corresponding provisions of this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(q) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information European Aviation Safety Agency Airworthiness Directive 2012–0244R1, dated January 25, 2013, for related information. You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov/#!documentDetail;D=FAA-2013-0365-0003.*

(2) Service information identified in this AD that is not incorporated by reference may be obtained at the addresses specified in paragraphs (r)(5) and (r)(6) of this AD.

(r) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(3) The following service information was approved for IBR on January 31, 2014.

(i) Airbus Alert Operators Transmission A29L001–12, dated October 11, 2012.

(ii) Airbus Mandatory Service Bulletin A330–29–3111, Revision 02, dated June 23, 2011.

(iii) Airbus Mandatory Service Bulletin A340–29–4086, Revision 02, dated June 23, 2011.

(4) The following service information was approved for IBR on December 14, 2009 (74 FR 62208, November 27, 2009).

(i) Airbus Alert Operators Telex A330–29A3111, Revision 1, dated October 8, 2009. Only the first page of this document contains the document number, revision level, and date; no other pages of this document contain this information.

(ii) Airbus Alert Operators Telex A340–29A4086, Revision 1, dated October 8, 2009. Only the first page of this document contains the document number, revision level, and date; no other pages of this document contain this information.

(5) For service information identified in this AD, contact Airbus SAS—Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email *airworthiness.A330-A340@airbus.com*; Internet *http://www.airbus.com.*

(6) You may review copies of the service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(7) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on November 26, 2013.

Jeffrey E. Duven,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2013–29998 Filed 12–26–13; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2013–0603; Directorate Identifier 2009–SW–079–AD; Amendment 39–17706; AD 2013–25–10]

RIN 2120–AA64

Airworthiness Directives; Bell Helicopter Textron Canada Limited Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain serial-numbered Bell Helicopter Textron Canada Limited (BHTC) Model 206L, 206L–1, 206L–3, and 206L–4 helicopters with a certain tailboom upper left attachment fitting (fitting). This AD requires inspecting the fitting for a crack and other conditions. This AD was prompted by the manufacturer revising and extending the 100 hour time-in-service (TIS) inspection requirements for the fitting. The actions of this AD are intended to detect a crack, loose rivet, corrosion, or any other damage, which could lead to loss of the tailboom and subsequent loss of control of the helicopter.

DATES: This AD is effective January 31, 2014.

The Director of the Federal Register approved the incorporation by reference of a certain document listed in this AD as of January 31, 2014.

ADDRESSES: For service information identified in this AD, contact Bell Helicopter Textron Canada Limited, 12,800 Rue de l'Avenir, Mirabel, Quebec J7J1R4, telephone (450) 437–2862 or (800) 363–8023, fax (450) 433–0272, or at *http://www.bellcustomer.com/files/*. You may review the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the foreign authority's AD, any incorporated-by-reference service information, the economic evaluation, any comments received, and other information. The street address for the Docket Operations Office (phone: 800–647–5527) is U.S. Department of Transportation, Docket Operations Office, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Sharon Miles, Aerospace Engineer, FAA, Regulations and Policy Group, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone: (817) 222–5110; email: *sharon.y.miles@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

On July 12, 2013, at 78 FR 41886, the **Federal Register** published our notice of proposed rulemaking (NPRM), which proposed to amend 14 CFR part 39 to add an AD that would apply to BHTC Model 206L, 206L–1, 206L–3, and 206L–4 helicopters with an upper left attachment fitting part number 206–032–409–001 installed. The NPRM proposed to require within 100 hours TIS and thereafter at intervals not exceeding 110 hours TIS, inspecting the upper left tailboom attachment fitting for a crack, corrosion, damage, or a loose rivet. If there is a crack or corrosion or damage beyond acceptable limits, the NPRM proposed to require replacing the upper left tailboom attachment fitting. If there is corrosion or damage within acceptable limits, the NPRM proposed to require repairing the fitting. If there is a loose rivet, the NPRM proposed to require replacing the loose rivet. The proposed requirements were intended to detect a crack, loose rivet, corrosion, or any other damage, which could lead to loss of the tailboom and subsequent loss of control of the helicopter.

The NPRM was prompted by AD No. CF–2009–41, dated November 16, 2009, issued by Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada. TCCA issued AD No. CF–2009–41 to correct an unsafe condition for certain 206L series helicopters, specifically: Model 206L, serial number (S/N) 45004 through 45153, and 46601 through 46617; Model 206L–1, S/N 45154 through 45790; Model 206L–3, S/N 51001 through 51612; and Model 206L–4, all S/Ns. TCCA advises that AD No. CF–2009–41 was prompted by a new airworthiness limitation for the fitting that requires an inspection of fitting part number 203–032–409–001 at each 100-hour or annual inspection. The TCCA AD requires inspecting the fitting, and replacing or repairing it if necessary, in accordance with the Accomplishment Instructions of BHTC Alert Service Bulletin (ASB) 206L–09–158, Revision A, dated August 31, 2009 (ASB 206L–09–158 Revision A). TCCA further states that incorporating this inspection into the applicable maintenance manual revision constitutes terminating action to TCCA AD No. CF–2009–41. The actions in TCCA AD No. CF–2009–41 are intended to detect a crack in a tailboom attachment fitting, which could result in loss of the tailboom and subsequent loss of control of the helicopter.

Comments

We gave the public the opportunity to participate in developing this AD, but we did not receive any comments on the NPRM (78 FR 41886, July 12, 2013).

FAA's Determination

These helicopters have been approved by the aviation authority of Canada and are approved for operation in the United States. Pursuant to our bilateral agreement with Canada, TCCA, its technical representative, has notified us of the unsafe condition described in the TCCA AD. We are issuing this AD because we evaluated all information provided by TCCA and determined the unsafe condition exists and is likely to exist or develop on other helicopters of these same type designs and that air safety and the public interest require adopting the AD requirements as proposed.

Differences Between This AD and the TCCA AD

The TCCA AD requires a recurring inspection every 100 hours, while this AD requires the inspection at intervals not to exceed 110 hours to align with the Bell ASB.

Related Service Information

We reviewed ASB 206L–09–158, Revision A for certain serial-numbered Model 206L, L–1, L–3, and L–4 helicopters with certain tailboom assemblies installed. The ASB requires an inspection of the fitting for a crack, loose rivets, corrosion, and damage at each 100-hour or annual inspection. If there is a crack, the ASB specifies replacing the fitting with an airworthy fitting. If there is a loose rivet, the ASB specifies replacing the rivet with an airworthy rivet. If the fitting has corrosion or mechanical damage, the ASB specifies determining if the corrosion or mechanical damage is within acceptable limits. If the corrosion or mechanical damage is within acceptable limits, the ASB specifies repairing the damage in accordance with the instructions contained in the ASB. If the damage is not within acceptable limits, the ASB specifies replacing the fitting with an airworthy

fitting. TCCA classified this ASB as mandatory and issued AD No. CF–2009–41 to ensure the continued airworthiness of these helicopters.

Since that time, BHTC has issued ASB 206L–09–158, Revision B, dated June 1, 2011, for all Model 206L series helicopters. Revision B of the ASB changes the recurring inspection interval from every 100 flight hours to every 110 flight-hours.

Costs of Compliance

We estimate that this AD affects 783 helicopters of U.S. Registry. We estimate that operators may incur the following costs in order to comply with this AD. At an average labor rate of $85 per work-hour, inspecting the fitting requires about 1 work-hour, for a cost per helicopter of $85 and a total cost to U.S. operators of $66,555 per inspection cycle.

We estimate the following costs to do any necessary repairs or replacements that would be required based on the results of the proposed inspection. We have no way of determining the number of aircraft that might need these repairs or replacements. Repairing a damaged fitting requires about 8 work-hours and required parts cost about $10, for a cost per helicopter of $690. Replacing a fitting which is damaged beyond the allowable repair limits requires about 8 work-hours and required parts cost about $793, for a cost per helicopter of $1,473. Replacing a loose rivet requires about 1 work-hour, and required parts cost about $1, for a cost per helicopter of $86.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on helicopters identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866;

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2013–25–10 Bell Helicopter Textron Canada (BHTC): Amendment 39–17706; Docket No. FAA–2013–0603; Directorate Identifier 2009–SW–079–AD.

(a) Applicability

This AD applies to BHTC Model 206L, 206L–1, 206L–3, and 206L–4 helicopters with an upper left attachment fitting part number 206–032–409–001 installed, certificated in any category.

(b) Unsafe Condition

This AD defines the unsafe condition as a crack in a tailboom attachment fitting, which could result in loss of the tailboom and subsequent loss of control of the helicopter.

(c) Effective Date

This AD becomes effective January 31, 2014.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

(1) At the next 100-hour inspection, and thereafter at intervals not to exceed 110 hours time-in-service, inspect each tailboom upper left attachment fitting (fitting) for a crack, a loose rivet, corrosion, or damage as depicted in Figure 2 of BellAlert Service Bulletin 206L–09–158, Revision B, dated June 1, 2011 (ASB 206L–09–158).

(2) If there is a crack, corrosion, or damage beyond the acceptable limits of Figure 2 of ASB 206L–09–158, before further flight, replace the fitting with an airworthy fitting.

(3) If there is corrosion or damage within the acceptable limits of Figure 2 of ASB 206L–09–158, before further flight, repair the fitting as described in the Accomplishment Instructions, Part I, paragraphs 5.b.(1) through 5.b.(6), of ASB 206L–09–158.

(4) If there is a loose rivet, before further flight, replace the loose rivet with an airworthy rivet.

(f) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Safety Management Group, FAA, may approve AMOCs for this AD. Send your proposal to: Sharon Miles, Aerospace Engineer, FAA, Regulations and Policy Group, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone: (817) 222–5122; fax: (817) 222–5961; email: *sharon.y.miles@faa.gov*.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office, before operating any aircraft complying with this AD through an AMOC.

(g) Additional Information

The subject of this AD is addressed in Transport Canada Civil Aviation (TCCA) AD No. CF–2009–41, dated November 16, 2009. You may view the TCCA AD at *http://www.regulations.gov* in Docket No. FAA–2013–0603.

(h) Subject

Joint Aircraft Service Component (JASC) Code: 5302: Rotorcraft Tailboom.

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Bell Alert Service Bulletin 206L–09–158, Revision B, dated June 1, 2011.

(ii) Reserved.

(3) For Bell service information identified in this AD, contact Bell Helicopter Textron Canada Limited, 12,800 Rue de l'Avenir, Mirabel, Quebec J7J1R4, telephone (450) 437–2862 or (800) 363–8023, fax (450) 433–0272, or at *http://www.bellcustomer.com/files/*.

(4) You may view this service information at FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html*.

Issued in Fort Worth, Texas, on December 5, 2013.

Kim Smith,

Directorate Manager, Rotorcraft Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain The Boeing Company Model 737–300, –400, and –500 series airplanes. This AD was prompted by fuel system reviews conducted by the manufacturer. This AD requires, depending on airplane configuration, replacing fuel pump power control relays with new relays having a ground fault interrupter (GFI) feature, installing ground studs and a bonding jumper, doing certain bonding resistance measurements, and changing the GFI relay position. This AD also requires revising the maintenance program to incorporate certain airworthiness limitations. We are issuing this AD to prevent damage to the fuel pumps caused by electrical arcing that could introduce an ignition source in the fuel tank, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

DATES: This AD is effective January 31, 2014.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of January 31, 2014.

ADDRESSES: For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com*. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov;* or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Georgios Roussos, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6482; fax: 425–917–6590; email: *georgios.roussos@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. The NPRM published in the **Federal Register** on May 16, 2013 (78 FR 28764). The NPRM proposed to require, depending on airplane configuration, replacing fuel pump power control relays with new relays having a ground fault interrupter (GFI) feature, installing ground studs and a bonding jumper, doing certain bonding resistance measurements, and changing the GFI relay position. The NPRM also proposed to require revising the maintenance program to incorporate certain airworthiness limitations.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the proposal (78 FR 28764, May 16, 2013) and the FAA's response to each comment.

Support for the NPRM

Boeing concurred with the content of the proposed rule.

Request To Include Certain Instructions and Delete Certain Step

All Nippon Airways (ANA) requested that we include instructions for the removal and installation of certain relay sockets, and for removal of paint on the mounting panel under Step 5 of Figure 5 of Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012. ANA stated that without removal of the paint on the mounting panel, the required bonding resistance measurements cannot be obtained. In addition, ANA requested that we delete step 6 of Figure 5 of Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012, which describes removal of paint around the relay cutout. ANA stated that paint removal around the relay cutout is not needed since the relay sockets are mounted to the cutout area of the panel and the relays are a spacer-mounted type.

We disagree with providing additional instructions that would expand the scope of this final rule, requiring additional notice and comment. We find that delaying this action would be inappropriate in light of the urgency of the identified unsafe condition. Operators should note that a general AMOC, which was requested by Boeing on behalf of all operators, has been issued for AD 2011–12–09, Amendment 39–16716 (76 FR 33988, June 10, 2011). The AMOC provides essentially the same relief as that requested by the commenter. Once this final rule is effective, we may issue a similar AMOC. Any person may request approval of an alternative method of compliance (AMOC) under the provisions of paragraph (l) of this AD for procedures that help them meet the bonding resistance requirements. We have not changed this final rule in this regard.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD

as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (78 FR 28764, May 16, 2013) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (78 FR 28764, May 16, 2013).

Costs of Compliance

We estimate that this AD affects 14 airplanes of U.S. registry. We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replace fuel pump power control relays, install ground studs and a bonding jumper, and do certain bonding resistance measurements, and change the GFI relay position, depending on airplane configuration.	Up to 31 work-hours × $85 per hour = $2,635.	Up to $21,338 ..	Up to $23,973 ..	Up to $335,622.
Maintenance program revision	1 work-hour × $85 per hour = $85.	$0	$85	$1,190.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2013–25–05 The Boeing Company: Amendment 39–17701; Docket No. FAA–2013–0421; Directorate Identifier 2013–NM–003–AD.

(a) Effective Date

This AD is effective January 31, 2014.

(b) Affected ADs

Certain requirements of this AD terminate certain requirements of AD 2011–12–09, Amendment 39–16716 (76 FR 33988, June 10, 2011).

(c) Applicability

This AD applies to The Boeing Company Model 737–300, –400, and –500 series airplanes; certificated in any category; identified as Groups 5, 6, 7, and 9 in Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012.

(d) Subject

Joint Aircraft System Component (JASC)/ Air Transport Association (ATA) of America Code 2822, Fuel boost pump.

(e) Unsafe Condition

This AD was prompted by fuel system reviews conducted by the manufacturer. We are issuing this AD to prevent damage to the fuel pumps caused by electrical arcing that could introduce an ignition source in the fuel tank, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Installation of Ground Studs and Bonding Jumper and Fuel Boost Pump Relays Replacement

For airplanes in Groups 5, 6, 7, and 9, Configuration 1, as identified in Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012 (airplanes on which Boeing Alert Service Bulletin 737–28A1212 was not done): Within 60 months after the effective date of this AD, install ground studs and a bonding jumper, replace fuel boost pump relays, and do certain bonding resistance measurements, in accordance with Part 1 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012. Doing the actions required by this paragraph terminates the requirements of paragraph (g) of AD 2011–12–09, Amendment 39–16716 (76 FR 33988, June 10, 2011), for airplanes in Groups 5, 6, 7, and 9, Configuration 1 only, provided that the requirements of paragraph (g) of this AD are done at the time given in AD 2011–12–09.

(h) Ground Studs and Bonding Jumper Installation and GFI Relay Position Change

For airplanes in Groups 5, 6, 7, and 9, Configuration 2, as identified in Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012 (airplanes on which Boeing Alert Service Bulletin 737–28A1212, dated July 23, 2009 was done): Within 60 months after the effective date of this AD, install ground studs and a bonding jumper, change the GFI relay position, and do certain bonding resistance measurements, in accordance with Part 2 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012. Doing the actions required by this paragraph terminates the requirements of paragraph (h) of AD 2011–12–09, Amendment 39–16716 (76 FR 33988,

June 10, 2011), for airplanes in Groups 5, 6, 7, and 9, Configuration 2 only, provided that the requirements of paragraph (h) of this AD are done at the time given in AD 2011–12–09.

(i) Ground Fault Interrupt (GFI) Relay Position Change

For airplanes in Groups 5, 6, 7, and 9, Configuration 3, as identified in Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012 (certain airplanes on which Boeing Alert Service Bulletin 737–28A1212, Revision 1, dated August 27, 2010 was done): Within 60 months after the effective date of this AD, change the GFI relay position and do certain bonding resistance measurements, in accordance with Part 4 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012.

(j) Maintenance Program Revision

Concurrently with accomplishing the actions required by paragraph (g), (h), or (i) of this AD, or within 30 days after the effective date of this AD, whichever occurs later: Revise the maintenance program by incorporating Airworthiness Limitation 28–AWL–22 of Boeing 737–100/200/200C/300/400/500 AWL and Certification Maintenance Requirements (CMRs), Document D6–38278–CMR, Revision August 2012. The initial compliance time for the actions specified in AWL 28–AWL–22 of Boeing 737–100/200/200C/300/400/500 AWL and Certification Maintenance Requirements (CMRs), Document D6–38278–CMR, Revision August 2012, is within 1 year after accomplishing the installation required by paragraph (g), (h), or (i) of this AD, or within 1 year after the effective date of this AD, whichever occurs later.

(k) No Alternative Actions, Intervals, and/or Critical Design Configuration Control Limitations (CDCCLs)

After accomplishing the revision required by paragraph (j) of this AD, no alternative actions (e.g., inspections) or intervals may be used unless the actions or intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (l) of this AD.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(m) Related Information

For more information about this AD, contact Georgios Roussos, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6482; fax: 425–917–6590; email: *georgios.roussos@faa.gov.*

(n) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Service Bulletin 737–28A1212, Revision 2, dated October 18, 2012.

(ii) Airworthiness Limitation 28–AWL–22 of Boeing 737–100/200/200C/300/400/500 AWL and Certification Maintenance Requirements (CMRs), Document D6–38278–CMR, Revision August 2012. Page 1.0–33, where Airworthiness Limitation 28–AWL–22 is listed, is dated May 2009.

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.*

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on December 4, 2013.

John P. Piccola,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2013–0706; Directorate Identifier 2013–NM–067–AD; Amendment 39–17708; AD 2013–25–12]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain The Boeing Company Model DC–9–10, DC–9–30, and DC–9–40 series airplanes. This AD was prompted by an evaluation by the design approval holder (DAH) indicating that the aft pressure bulkhead web area is subject to widespread fatigue damage (WFD). This AD requires modifying the aft pressure bulkhead. The modification includes inspecting for cracks around the rivet holes, and repair of any cracking. We are issuing this AD to prevent fatigue cracking of the aft pressure bulkhead, which could result in reduced structural integrity of the airplane.

DATES: This AD is effective January 31, 2014.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 31, 2014.

ADDRESSES: For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, 3855 Lakewood Boulevard, MC D800–0019, Long Beach, CA 90846–0001; telephone 206–544–5000, extension 2; fax 206–766–5683; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2013–0706; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Eric Schrieber, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: (562) 627–5348; fax: (562) 627–5210; email: *eric.schrieber@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to the specified products. The NPRM published in the **Federal Register** on September 11, 2013 (78 FR 55662). The NPRM proposed to require modifying the aft pressure bulkhead. The modification includes inspecting for cracks around the rivet holes, and repair of any cracking.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM (78 FR 55662, September 11, 2013) or on the determination of the cost to the public.

Change Made to this AD

We have revised the service information citations throughout this final rule to correctly identify the manufacturer name specified on the service information.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD with the change described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (78 FR 55662, September 11, 2013) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (78 FR 55662, September 11, 2013).

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Costs of Compliance

We estimate that this AD affects 6 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Modification (includes inspection)	542 work-hours × $85 per hour = $46,070	$4,680	$50,750	$304,500

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2013–25–12 The Boeing Company: Amendment 39–17708; Docket No. FAA–2013–0706; Directorate Identifier 2013–NM–067–AD.

(a) Effective Date

This AD is effective January 31, 2014.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model DC–9–11, DC–9–12, DC–9–13, DC–9–14, DC–9–15, and DC–9–15F airplanes, DC–9–31, DC–9–32, DC–9–32 (VC–9C), DC–9–32F, DC–9–33F, DC–9–34, DC–9–34F, and DC–9–32F (C–9A, C–9B) airplanes, and DC–9–41 airplanes, certificated in any category, identified in McDonnell Douglas DC–9 Alert Service Bulletin A53–144, Revision 2, dated February 23, 1984.

(d) Subject

Joint Aircraft System Component (JASC) Code 5312, Fuselage Main Bulkhead.

(e) Unsafe Condition

This AD was prompted by an evaluation by the design approval holder (DAH) indicating that the fuselage bulkhead web area is subject to widespread fatigue damage (WFD). We are issuing this AD to prevent fatigue cracking of the bulkhead, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Modification

For airplanes on which the modification (AD4 rivets replaced with AD5 rivets) required by AD 85–01–02 R1, Amendment 39–5241 (51 FR 6101, dated February 20, 1986), has not been done: Before the accumulation of 72,000 total flight cycles, or within 18 months after the effective date of this AD, whichever occurs later, modify the aft pressure bulkhead by removing all affected AD4 rivets and doing either a fluorescent penetrant or eddy current inspection around the rivet holes for cracks, repairing any cracking, and installing five-leaf doublers with AD5 rivets, in accordance with the Accomplishment Instructions of McDonnell Douglas DC–9 Alert Service Bulletin A53–144, Revision 2, dated February 23, 1984; except as required by paragraph (h) of this AD.

Note 1 to paragraph (g) of this AD: Information on additional procedures for the modification can be found in Notes 4, 5, and 6, as applicable, of paragraph 1.D., "Compliance" of McDonnell Douglas DC–9 Alert Service Bulletin A53–144, Revision 2, dated February 23, 1984.

(h) Exception to Service Information

If any crack is found during any inspection required by this AD, and McDonnell Douglas DC–9 Alert Service Bulletin A53–144, Revision 2, dated February 23, 1984, specifies to contact the manufacturer for appropriate action: Before further flight, repair using a method approved in accordance with the procedures specified in paragraph (j) of this AD.

(i) No Reporting Required

Sheet 1 of Service Sketch 3109, and Sheet 7 of Service Sketch 3110B of McDonnell Douglas DC–9 Alert Service Bulletin A53–144, Revision 2, dated February 23, 1984; specify reporting the details of any cracks found; however, this AD does not require reporting.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the Los Angeles ACO, send it to the attention of the person identified in paragraph (k) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by Structures Authorized Representative for the Boeing Commercial Airplanes Delegation Option Authorization Organization who has been authorized by the Manager, Los Angeles ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and 14 CFR 25.571, Amendment 45, and the approval must specifically refer to this AD.

(k) Related Information

For more information about this AD, contact Eric Schrieber, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: (562) 627–5348; fax: (562) 627–5210; email: *eric.schrieber@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the **Federal Register** approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) McDonnell Douglas DC–9 Alert Service Bulletin A53–144, Revision 2, dated February 23, 1984.

(ii) Reserved.

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, 3855 Lakewood Boulevard, MC D800–0019, Long Beach, CA 90846–0001; telephone 206–544–5000, extension 2; fax 206–766–5683; Internet *https://www.myboeingfleet.com.*

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on December 10, 2013.

John P. Piccola,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2013–0416; Directorate Identifier 2012–NM–144–AD; Amendment 39–17707; AD 2013–25–11]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2010–24–07 for all Airbus Model A318 series airplanes, Model A319 series airplanes, Model A320 series airplanes, and Model A321 series airplanes. AD 2010–24–07 required repetitive inspections of the 80VU rack lower lateral fittings for damage, repetitive inspections of the 80VU rack lower central support for cracking, and corrective action if necessary. AD 2010–24–07 also specified optional terminating action for the repetitive inspections. This new AD reduces the inspection compliance time, adds an inspection of the upper fittings and shelves of the 80VU rack, and adds airplanes to the applicability. This AD was prompted by reports of worn lower lateral fittings of the 80VU rack. We are issuing this AD to detect and correct damage or cracking of the 80VU fittings and supports, which could lead to possible disconnection of the cable harnesses to one or more computers, and if occurring during a critical phase of flight, could result in reduced control of the airplane.

DATES: This AD becomes effective January 31, 2014.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 31, 2014.

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of January 11, 2011 (75 FR 75878, December 7, 2010).

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov/#!docketDetail;D=FAA-2013-0416;* or in person at the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone (425) 227–1405; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to the specified products. The NPRM was published in the **Federal Register** on May 14, 2013 (78 FR 28152), and proposed to supersede AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010). The NPRM proposed to correct an unsafe condition for the specified products. The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA Airworthiness Directive 2012–0134, dated July 18, 2012 (referred to after this as the Mandatory Continuing Airworthiness Information, or "the MCAI"), to correct an unsafe condition for the specified products. The MCAI states:

> Damage to the lower lateral fittings of the 80VU rack, typically elongated holes, migrated bushes, and/or missing bolts have been reported on in-service aeroplanes. The 80VU rack contains computers for flight controls, communication and radio-navigation. In addition, damage to the lower

central support fitting (including cracking) has been reported.

Failure of the 80VU fittings, in combination with a high load factor or strong vibration, could lead to failure of the rack structure and/or computers or rupture/disconnection of the cable harnesses to one or more computers located in the 80VU rack. Even though the computer functions are duplicated across other racks, multiple system failures or (partial) disconnection of systems, if occurring during a critical phase of flight, could result in reduced control of the aeroplane.

To address this potential unsafe condition, EASA issued AD 2007–0276 to require repetitive inspections of the lower lateral 80VU fittings and the lower central 80VU support and, depending on findings, the accomplishment of corrective actions. [EASA] AD 2007–0276 was revised to introduce a reinforced lower central support as an optional terminating action for the repetitive inspections.

Since issuance of EASA AD 2007–0276R1 [*http://ad.easa.europa.eu/blob/easa_ad_2007_0276_R1_superseded.pdf/AD_2007–0276R1_1*] [which corresponds to FAA AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010)], and prompted by in-service experience, the previous inspection programme has been reassessed. New conditions of inspection for a new finding on the lower central fitting attachment (crack in the lower of the lateral flanges), and a new visual inspection of the upper fittings and shelves of the 80VU are introduced by this inspection programme. In addition, the replacement of a cracked lateral fitting or central support with a lateral fitting or central support having the same part number is no longer preferable as corrective action. Instead, the installation of the reinforced lower central support is now defined as optional terminating action for the repetitive inspections required by this [EASA] AD.

For the reasons described above, this [EASA] AD supersedes EASA AD 2007–0276R1 and requires implementation of an amended inspection programme with a reduced inspection threshold.

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov/#!documentDetail;D=FAA-2013-0416-0002.*

Comments

We gave the public the opportunity to participate in developing this AD. We have considered the comments received.

Request to Change Compliance Time

United Airlines (UAL) requested that we change the compliance time for the corrective actions specified in paragraphs (m), (o), and (p) of the NPRM (78 FR 28152, May 14, 2013) from "before further flight" to the following.

- Within one deferral flight cycle, or the applicable time given in Paragraph E.(2), "Accomplish Timescale," of Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012, whichever is later.
- Within 50 flight cycles or at the applicable time given in Paragraph E.(2), "Accomplish Timescale," of Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012, whichever is later.

UAL stated that the first option would give operators a chance to fly a ferry flight to a more equipped resourced base maintenance station, and that the second option would give operators an option to create a short-term deferred item to plan for its accomplishment by creating a formal maintenance task with planned allocated resources.

UAL stated that due to the inspection threshold and repeat interval of 500 flight cycles, it is concerned that the inspection will take place at mainly airplane line maintenance stations, with significant exposure to possible damage conditions that require correction before further flight. UAL commented that typical airplane line stations might not have the resources, materials, and equipment to perform this type of modification, repair, and access. UAL also stated that certain corrective actions require approximately 57 work-hours, which would lead to lengthy out-of-service time and costs to the airline.

We do not agree with UAL's request to extend the compliance time. The FAA AD provides a provision for operators to apply for a special flight permit in accordance with 14 CFR 21.197, which allows operators to fly airplanes to a base where repairs, alterations, or maintenance can be performed. These airplanes may not fully meet applicable airworthiness requirements, but are capable of safe flight for reasons stated in 14 CFR 21.197. In developing an appropriate compliance time for this final rule, we considered the urgency associated with the subject unsafe condition, the availability of required parts, and the practical aspect of accomplishing the required corrective actions. Some safety issues are more time-sensitive than others, so we consider the overall risk to the fleet, including the severity of the failure and the likelihood of the failure's occurrence in establishing the compliance time in this final rule. The commenter has not provided sufficient substantiation for revising the corrective action compliance time for repairing certain damage conditions that will meet an acceptable level of safety to mitigate risk to the fleet.

Under the provisions of paragraph (s) of this AD, we will consider requests for approval of an extension of the compliance time if sufficient data are submitted to substantiate that the new compliance time would provide an acceptable level of safety. We have not changed this final rule in this regard.

Additional Changes to This AD

We have revised paragraph (o)(1) of this final rule to include the option of contacting the EASA (or its delegated agent) for repair instructions.

Paragraph (p) of the NPRM (78 FR 28152, May 14, 2013) incorrectly referred to "paragraphs (m) and (o) of this AD" for certain special detailed inspections. Those special detailed inspections are specified in paragraphs (l) and (n) of this AD. We have revised paragraph (p) of this AD to refer to paragraphs (l) and (n) of this AD.

Conclusion

We reviewed the available data, including the comment received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these changes:

- Are consistent with the intent that was proposed in the NPRM (78 FR 28152, May 14, 2013) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (78 FR 28152, May 14, 2013).

Costs of Compliance

We estimate that this AD affects about 755 products of U.S. registry.

The actions that are required by AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010), and retained in this AD, take about 82 work-hours per product, at an average labor rate of $85 per work hour. Required parts cost about $2,592 per product. Based on these figures, the estimated cost of the currently required actions is $9,562 per product.

We estimate that it takes about 5 work-hours per product to comply with the new basic requirements of this AD. The average labor rate is $85 per work-hour. Where the service information lists parts costs that are covered under warranty, we have assumed that there will be no charge for these parts. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of this AD on U.S. operators to be $320,875, or $425 per product.

In addition, we estimate that any necessary follow-on actions would take about 189 work-hours and require parts costing $7,047, for a cost of $23,112 per product. Where the service information lists required parts costs that are

covered under warranty, we have assumed that there will be no charge for these parts. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov/#!docketDetail;D=FAA-2013-0416;* or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the MCAI, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing airworthiness directive (AD) 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010), and adding the following new AD:

2013–25–11 Airbus: Amendment 39–17707. Docket No. FAA–2013–0416; Directorate Identifier 2012–NM–144–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective January 31, 2014.

(b) Affected ADs

This AD supersedes AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010).

(c) Applicability

This AD applies to Airbus Model A318–111, –112, –121, and –122 airplanes; Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes; Model A320–111, –211, –212, –214, –231, –232, and –233 airplanes; and Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes; certificated in any category; all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 25, Equipment/Furnishings; and Code 53, Fuselage.

(e) Reason

This AD was prompted by reports of worn lower lateral fittings of the 80VU rack. We are issuing this AD to detect and correct damage or cracking of the 80VU fittings and supports, which could lead to possible disconnection of the cable harnesses to one or more computers, and if occurring during a critical phase of flight, could result in reduced control of the airplane.

(f) Compliance

You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

(g) Retained Repetitive Inspections of the 80VU Rack Lower Lateral Fittings

This paragraph restates the requirements of paragraph (g) of AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010). Except for Model A318–121 and –122 airplanes, and except for airplanes on which Airbus Modification 34804 has been embodied in production, or on which Airbus Service Bulletins A320–25–1557 and A320–53–1215 have been done in service, prior to the accumulation of 24,000 total flight cycles, or within 500 flight cycles after January 11, 2011 (the effective date of AD 2010–24–07), whichever occurs later: Do a special detailed inspection of the 80VU rack lower lateral fittings for damage (e.g., broken fitting, missing bolts, migrated bushings, material burr, or rack in contact with the fitting) of the 80VU rack lower lateral fittings, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 02, dated November 5, 2008. Repeat the inspection thereafter at the interval specified in paragraph (g)(1) or (g)(2) of this AD, as applicable. Modifying the 80VU lower lateral fittings, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–25–1557, Revision 02, dated November 5, 2008, terminates the inspection requirements of this paragraph. Doing the initial inspection specified in paragraph (l) of this AD terminates the requirements of this paragraph.

(1) For airplanes on which the 80VU rack lower lateral fittings have not been replaced in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 02, dated November 5, 2008: Repeat the inspection thereafter at intervals not to exceed 4,500 flight cycles.

(2) For airplanes on which the 80VU rack lower lateral fittings have been replaced in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 02, dated November 5, 2008: Do the next inspection within 24,000 flight cycles after doing the replacement and repeat the inspection thereafter at intervals not to exceed 4,500 flight cycles.

(h) Retained Corrective Actions With Additional New Corrective Actions

This paragraph restates the requirements of paragraph (h) of AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010), with new corrective actions. If any damage is found during any inspection required by paragraph (g) of this AD, do all applicable corrective actions (inspection and/or repair), in accordance with the Accomplishment Instructions and timeframes in Airbus Mandatory Service Bulletin A320–25A1555, Revision 02, dated November 5, 2008; or in accordance with and at the time specified in paragraph (q) of this AD. As of the effective date of this AD, if any

damage is found, do all applicable corrective actions in accordance with and at the times specified in paragraph (q) of this AD.

(i) Retained Repetitive Inspections of the 80VU Rack Lower Central Support

This paragraph restates the requirements of paragraph (i) of AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010). Except for airplanes on which Airbus Modification 34804 has been embodied in production or on which Airbus Service Bulletins A320–25–1557 and A320–53–1215 have been done in service, prior to the accumulation of 24,000 total flight cycles, or within 500 flight cycles after January 11, 2011 (the effective date of AD 2010–24–07), whichever occurs later: Do a special detailed inspection of the 80VU rack lower central support for cracking, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 02, dated November 5, 2008. Repeat the inspection thereafter at the interval specified in paragraph (i)(1) or (i)(2) of this AD, as applicable. Replacing the pyramid fitting on the 80VU rack with a new, reinforced fitting, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–53–1215, dated November 5, 2008, terminates the inspection requirements of this paragraph. Doing the initial inspection specified in paragraph (n) of this AD terminates the requirements of this paragraph.

(1) For airplanes on which the 80VU rack lower central support has not been repaired or replaced using Airbus Mandatory Service Bulletin A320–25A1555 or Airbus Service Bulletin A320–25–1557: Repeat the inspection thereafter at the interval specified in paragraph (i)(1)(i) or (i)(1)(ii) of this AD, as applicable.

(i) For airplanes on which the lower central support has accumulated 30,000 total flight cycles or more: At intervals not to exceed 500 flight cycles.

(ii) For airplanes on which the lower central support has accumulated fewer than 30,000 total flight cycles: At intervals not to exceed 4,500 flight cycles, without exceeding 30,750 total flight cycles on the support for the first repetitive inspection.

(2) For airplanes on which the 80VU rack lower central support has been repaired or replaced using Airbus Mandatory Service Bulletin A320–25A1555 or Airbus Service Bulletin A320–25–1557: Do the next inspection within 24,000 flight cycles after the repair or replacement and thereafter repeat the inspection at the interval specified in paragraph (i)(1)(i) or (i)(1)(ii) of this AD, as applicable.

(j) Retained Corrective Actions for Paragraph (i) of This AD

This paragraph restates the requirements of paragraph (j) of AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010). If any crack is found during any inspection required by paragraph (i) of this AD: Before further flight, replace the pyramid fitting on the 80VU rack with a new, reinforced fitting, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–53–1215, dated November 5, 2008. Doing this replacement terminates the inspection requirements of paragraph (i) of this AD.

(k) Retained Optional Terminating Action

This paragraph restates the requirements of paragraph (k) of AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010). Doing the actions specified in paragraphs (k)(1) and (k)(2) of this AD terminates the repetitive inspections required by this AD.

(1) Replacing the pyramid fitting on the 80VU rack with a new, reinforced fitting, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–53–1215, dated November 5, 2008.

(2) Modifying the 80VU lower lateral fittings, in accordance with Airbus Service Bulletin A320–25–1557, Revision 02, dated November 5, 2008.

(l) New Requirement of This AD: Repetitive Inspection of Lower Lateral Support Fittings

Except for airplanes on which Airbus Modification 34804 has been embodied in production, or on which the 80VU rack lower lateral support has been modified, as specified in the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25–1557, dated June 14, 2007; Revision 01, dated February 7, 2008; or Revision 02, dated November 5, 2008: At the latest of the applicable times specified in paragraphs (l)(1) through (l)(4) of this AD, do a special detailed (borescope) inspection of the 80VU rack lower lateral fittings for damage (e.g., broken fitting, missing bolts, migrated bushings, material burr, or rack in contact with the fitting), in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012. Repeat the inspection thereafter at intervals not to exceed 500 flight cycles until the terminating action specified in paragraph (k) of this AD is done. Doing the initial inspection specified in this paragraph terminates the requirements of paragraph (g) of this AD.

(1) Before the accumulation of 20,000 total flight cycles from the airplane first flight, or within 750 flight cycles after the effective date of this AD, whichever occurs later, without exceeding 24,000 total flight cycles.

(2) Within 20,000 flight cycles after the most recent repair or replacement of the 80VU rack lower lateral fittings was done, as specified in the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, dated June 24, 2007; Revision 01, dated February 18, 2008; or Revision 02, dated November 5, 2008.

(3) Within 500 flight cycles after the effective date of this AD, without exceeding 4,500 flight cycles after the most recent inspection of the 80VU rack lower lateral fittings was done, as specified in the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, dated June 14, 2007; Revision 01, dated February 18, 2008; or Revision 02, dated November 5, 2008.

(4) Within 500 flight cycles after the effective date of this AD.

(m) New Requirement of This AD: Corrective Action for Damage of Lower Lateral Support Fittings

If any damage is found during any inspection required by paragraph (l) of this AD: At the applicable time given in paragraph E.(2)., "Accomplishment Timescale," in Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012, accomplish the applicable corrective actions, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012; except where this service information specifies to contact Airbus for further instructions, before further flight, contact either the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA) (or its delegated agent) for instructions; and do those instructions.

(n) New Requirement of This AD: Repetitive Inspection on Lower Central Support

Except for airplanes on which Airbus Modification 34804 has been embodied in production, or on which the 80VU rack lower central support has been modified, as specified in the Accomplishment Instructions of Airbus Service Bulletin A320–53–1215, dated November 5, 2008: At the latest of the applicable times specified in paragraphs (n)(1) through (n)(6) of this AD, do a special detailed (borescope) inspection of the 80VU rack lower central support for cracking, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012. Repeat the inspection thereafter at intervals not to exceed 500 flight cycles until the terminating action specified in paragraph (k) of this AD is done. Doing the initial inspection specified in this paragraph terminates the requirements of paragraph (i) of this AD.

(1) Before the accumulation of 20,000 total flight cycles from the airplane first flight, or within 750 flight cycles after the effective date of this AD, whichever occurs later, without exceeding 24,000 total flight cycles.

(2) Within 20,000 flight cycles after the most recent repair or replacement of the 80VU rack lower central support was done, as specified in the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, dated June 14, 2007; Revision 01, dated February 18, 2008; or Revision 02, dated November 5, 2008.

(3) Within 20,000 flight cycles after modification of the 80VU rack lower central support was done, as specified in the Accomplishment Instructions of Airbus Service Bulletin A320–25–1557, dated June 14, 2007; or Revision 01, dated February 07, 2008.

(4) For airplanes on which, as of the effective date of this AD, the 80VU rack lower central support has accumulated fewer than 30,000 total flight cycles: Within 500 flight cycles after the effective date of this AD, without exceeding 4,500 flight cycles after the most recent inspection of the 80VU rack lower central support was done, as specified in the Accomplishment Instructions of Airbus Mandatory Service

Bulletin A320–25A1555, dated June 24, 2007; Revision 01, dated February 18, 2008; or Revision 02, dated November 5, 2008.

(5) For airplanes on which, as of the effective date of this AD, the 80VU rack lower central support has accumulated 30,000 total flight cycles or more: Within 500 flight cycles after the most recent inspection of the 80VU rack lower central support was done, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, dated June 14, 2007; Revision 01, dated February 18, 2008; or Revision 02, dated November 5, 2008.

(6) Within 500 flight cycles after the effective date of this AD.

(o) New Requirement of This AD: Corrective Action for Damage to Lower Central Support

If any cracking is found during any inspection required by paragraph (n) of this AD: Before further flight do the actions in paragraph (o)(1) or (o)(2) of this AD.

(1) If kits 25A1555A01 thru A05 are available, contact the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA) (or its delegated agent); for instructions and do the repair.

(2) Do the actions specified in paragraph (k)(1) and (k)(2) of this AD.

(p) New Requirement of This AD: Repetitive Inspection of Upper Fittings and Shelves

Concurrently with each special detailed inspection required by paragraphs (l) and (n) of this AD: Do a general visual inspection for damage (cracking or deformation) of the upper fittings and shelves of the 80VU rack, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012. If any damage is found: Before further flight, repair the damage using a method approved by either the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA (or its delegated agent).

(q) New Requirement of This AD: Corrective Action for Previous Findings

For airplanes that have been inspected before the effective date of this AD as specified in Airbus Service Bulletin A320–25A1555, dated June 14, 2007; Airbus Mandatory Service Bulletin A320–25A1555, Revision 01, dated February 18, 2008; or Airbus Mandatory Service Bulletin A320–25A1555, Revision 02, dated November 5, 2008; and on which damage of the fittings was found, except for airplanes specified in paragraph (q)(1) or (q)(2) of this AD: At the applicable time given in paragraph E.(2)., "Accomplishment Timescale," of Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012, accomplish the applicable corrective actions, in accordance with the Accomplishment Instructions of Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012, except where this service information specifies to contact Airbus for further instructions, before further flight, contact either the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or EASA (or its delegated agent); for instructions and follow those instructions. Accomplishing the actions required by this paragraph terminates the requirements of paragraph (h) of this AD.

(1) Airplanes on which Airbus Modification 34804 has been embodied in production.

(2) Airplanes on which the terminating action specified in paragraph (k) of this AD has been done.

(r) Credit for Previous Actions

This paragraph restates the credit given in paragraph (l) of AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010).

(1) This paragraph provides credit for actions required by paragraphs (g), (h), and (i) of this AD, if those actions were performed before January 11, 2011 (the effective date of AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010)), using the service bulletins specified in paragraph (r)(1)(i) or (r)(1)(ii) of this AD.

(i) Airbus Mandatory Service Bulletin A320–25A1555, Revision 01, dated February 18, 2008, which is not incorporated by reference in this AD.

(ii) Airbus Service Bulletin A320–25A1555, dated June 14, 2007, which is not incorporated by reference in this AD.

(2) This paragraph provides credit for actions required by paragraphs (g) and (k)(2) of this AD, if those actions were performed before January 11, 2011 (the effective date of AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010)), using the service bulletins specified in paragraph (r)(2)(i) or (r)(2)(ii) of this AD.

(i) Airbus Service Bulletin A320–25–1557, dated June 14, 2007, which is not incorporated by reference in this AD.

(ii) Airbus Service Bulletin A320–25–1557, Revision 01, dated February 7, 2008, which is not incorporated by reference in this AD.

(s) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone (425) 227–1405; fax (425) 227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD. AMOCs approved previously for AD 2010–24–07, Amendment 39–16526 (75 FR 75878, December 7, 2010), are approved as AMOCs for the corresponding provisions of this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they were approved by the State of Design Authority (or its delegated agent, or the Design Approval Holder with a State of Design Authority's design organization approval, as applicable). For a repair method to be approved, the repair approval must specifically refer to this AD. You are required to ensure the product is airworthy before it is returned to service.

(t) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information European Aviation Safety Agency Airworthiness Directive 2012–0134, dated July 18, 2012, for related information. You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov/#!documentDetail;D=FAA-2013-0416-0002.*

(2) Service information identified in this AD that is not incorporated by reference may be obtained at the addresses specified in paragraphs (u)(5) and (u)(6) of this AD.

(u) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(3) The following service information was approved for IBR on January 31, 2014.

(i) Airbus Mandatory Service Bulletin A320–25A1555, Revision 03, dated February 28, 2012.

(ii) Reserved.

(4) The following service information was approved for IBR on January 11, 2011 (75 FR 75878, December 7, 2010).

(i) Airbus Mandatory Service Bulletin A320–25A1555, Revision 02, excluding Appendix 1, dated November 5, 2008.

(ii) Airbus Service Bulletin A320–25–1557, Revision 02, dated November 5, 2008.

(iii) Airbus Service Bulletin A320–53–1215, dated November 5, 2008.

(5) For service information identified in this AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com*; Internet *http://www.airbus.com.*

(6) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(7) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on December 4, 2013.

John P. Piccola,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2013–0340; Directorate Identifier 2010–SW–081–AD; Amendment 39–17630; AD 2013–21–06]

RIN 2120–AA64

Airworthiness Directives; Eurocopter Deutschland GmbH Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for Eurocopter Deutschland GmbH (Eurocopter) Model EC135 P1, EC135 P2, EC135 P2+, EC135 T1, EC135 T2, EC135 T2+, and MBB–BK 117 C–2 helicopters with a certain external mounted hoist system (hoist) with boom support assembly (boom) installed. This AD requires inspecting the boom for a crack and, if a crack exists, replacing the boom with an airworthy boom. Until the boom is inspected, this AD requires, before further flight, and thereafter before the first flight of each day, checking the hoist for a crack. This AD was prompted by cracks found on the boom during a pre-flight check of a hoist on an MBB–BK 117 C–2 helicopter. The actions of this AD are intended to detect a crack and prevent failure of the boom, loss of the boom and attached loads, and subsequent loss of helicopter control.

DATES: This AD is effective January 31, 2014.

The Director of the Federal Register approved the incorporation by reference of a certain document listed in this AD as of January 31, 2014.

ADDRESSES: For service information identified in this AD, contact American Eurocopter Corporation, 2701 N. Forum Drive, Grand Prairie, TX 75052; telephone (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at *http://www.eurocopter.com/techpub*, and contact UTC Aerospace Systems (formerly the Goodrich Corporation), 2727 East Imperial Highway, Brea, CA 92821; telephone (714) 984–1461; fax 714–984–1675, or at *www.goodrich.com*. You may review the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the foreign authority's ADs, any incorporated-by-reference service information, the economic evaluation, any comments received, and other information. The street address for the Docket Operations Office (phone: 800–647–5527) is U.S. Department of Transportation, Docket Operations Office, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Matt Wilbanks, Aviation Safety Engineer, Rotorcraft Certification Office, Rotorcraft Directorate, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222–5110; email *matt.wilbanks@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

On April 15, 2013, at 78 FR 22209, the **Federal Register** published our notice of proposed rulemaking (NPRM), which proposed to amend 14 CFR part 39 by adding an AD that would apply to Eurocopter Model EC135 P1, EC135 P2, EC135 P2+, EC135 T1, EC135 T2 and EC135 T2+ helicopters with a Goodrich Corporation (Goodrich) hoist with a boom, Part Number (P/N) 44301–500, 44307–500, or 44307–500–1 installed, and Model MBB–BK 117 C–2 helicopters with a Goodrich hoist with boom P/N 44307–500 installed. The NPRM proposed to require dye penetrant inspecting the boom for a crack and, if a crack exists, replacing the boom with an airworthy boom. Until the inspection is completed, the NPRM proposed to require, before the first flight of each day, a visual check of the hoist for a crack. The NPRM proposed to allow an owner/operator (pilot) holding at least a private pilot certificate to conduct that check. The performance of the check would be required to be entered into the aircraft's maintenance records showing compliance with this AD in accordance with applicable regulations. This authorization marks an exception to our standard maintenance regulations. The proposed requirements were intended to detect a crack and prevent failure of the boom, loss of the boom and attached loads, and subsequent loss of helicopter control.

The NPRM was prompted by AD No. 2010–0154, dated August 13, 2010, issued by the European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union. EASA issued AD No. 2010–0154 to correct an unsafe condition for Eurocopter Model MBB–BK 117 C–2, EC135, and EC635 series helicopters. EASA AD No. 2010–0154 supersedes EASA AD No. 2009–0093–E, dated April 17, 2009. EASA advises that cracks were detected on the boom, P/N 44307–500, during a pre-flight check of the hoist on a Model MBB–BK 117 C–2 helicopter. EASA advises that this condition, if not detected and corrected, would impair the structural strength of the boom and could lead to failure of the boom. EASA advises that this could result in the loss of the boom and attached loads. According to EASA, boom P/Ns 44301–500 and 44307–500–1 are of similar design to P/N 44307–500, and therefore are also subject to this unsafe condition. As a result, EASA issued Emergency AD No. 2009–0093–E to require repetitive visual checks of the affected boom and removal or replacement of the boom when cracks are found.

EASA advises that since AD No. 2009–0093–E was issued, further technical investigation determined that torque values that were too high have been applied. EASA advises that Goodrich Corporation, the manufacturer of the affected booms, had developed an inspection that would determine the need for further action. As a result, EASA superseded its AD to include a new inspection to detect damage, by issuing EASA AD No. 2010–0154. EASA AD states that if no damage is found during this new inspection, that constitutes terminating action.

Comments

We gave the public the opportunity to participate in developing this AD, but we received no comments on the NPRM (78 FR 22209, April 15, 2013).

FAA's Determination

These helicopters have been approved by the aviation authority of Germany and are approved for operation in the United States. Pursuant to our bilateral agreement with Germany, EASA, its technical representative, has notified us of the unsafe condition described in the EASA AD. We are issuing this AD because we evaluated all information provided by EASA and determined the unsafe condition exists and is likely to exist or develop on other helicopters of these same type designs and that air

safety and the public interest require adopting the AD requirements as proposed.

Differences Between This AD and the EASA AD

The EASA AD requires you to notify and return parts to the manufacturer, and this AD does not. The EASA AD also applies to the Eurocopter EC635 series military helicopters, while this AD does not because these models are not type certificated in the United States.

Related Service Information

Eurocopter has issued Emergency Alert Service Bulletin (EASB) No. EC135–85A–036, Revision 2, dated June 23, 2010, and EASB No. MBB BK117 C–2–85A–024, Revision 1, dated June 23, 2010, which specify a visual check of the boom for cracks, and removing or replacing the boom before the next flight if there is a crack. The EASBs also require compliance with the visual and dye penetrant inspection procedures specified in Goodrich Corporation Service Bulletin 44307–500–03, Revision 2, dated April 30, 2010. EASA classified these EASBs as mandatory, and issued EASA AD No. 2010–0154, dated August 13, 2010, to ensure the continued airworthiness of these helicopters.

Costs of Compliance

We estimate that this AD affects 350 helicopters of U.S. Registry and a labor rate of $85 per work-hour. Based on these estimates, we expect the following costs:

- We estimate that the cost of the daily visual check is minimal.
- We estimate that removing the hoist and boom assembly, performing the dye penetrant inspection, and reinstalling the equipment requires 1.5 work hours. No parts are needed, for a total cost of about $128 per helicopter and $44,800 for the U.S. fleet.
- Replacing the hoist and boom assembly, if needed, requires about a 0.33 work-hour for a labor cost of about $28. Parts cost $10,833 for a total cost of $10,861 per helicopter.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on helicopters identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866;

(2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2013–21–06 Eurocopter Deutschland GmbH Helicopters: Amendment 39–17630; Docket No. FAA–2013–0340; Directorate Identifier 2010–SW–081–AD.

(a) Applicability

This AD applies to Eurocopter Deutschland GmbH (Eurocopter) Model EC135 P1, EC135 P2, EC135 P2+, EC135 T1, EC135 T2, and EC135 T2+ helicopters with a Goodrich Corporation (Goodrich) external mounted hoist system (hoist) with boom support assembly (boom) Part Number (P/N) 44301–500, 44307–500, or 44307–500–1 installed, and Model MBB–BK 117 C–2 helicopters with a Goodrich hoist with boom P/N 44307–500 installed, certificated in any category.

(b) Unsafe Condition

This AD defines the unsafe condition as a crack in the boom. This condition could result in loss of the boom and attached loads, and subsequent loss of helicopter control.

(c) Effective Date

This AD becomes effective January 31, 2014.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

(1) Before further flight, and thereafter before the first flight of each day until you have performed the inspection required by paragraph (e)(2) of this AD, clean the hoist and visually check for a crack, paying particular attention to the areas that are circled as depicted in Figure 1 to paragraph (e) of this AD. The actions required by this paragraph may be performed by the owner/operator (pilot) holding at least a private pilot certificate, and must be entered into the aircraft records showing compliance with this AD in accordance with 14 CFR 43.9(a)(1)–(4) and 14 CFR 91.417(a)(2)(v). The record must be maintained as required by 14 CFR 91.417, 121.380, or 135.439.

BILLING CODE 4910–13–P

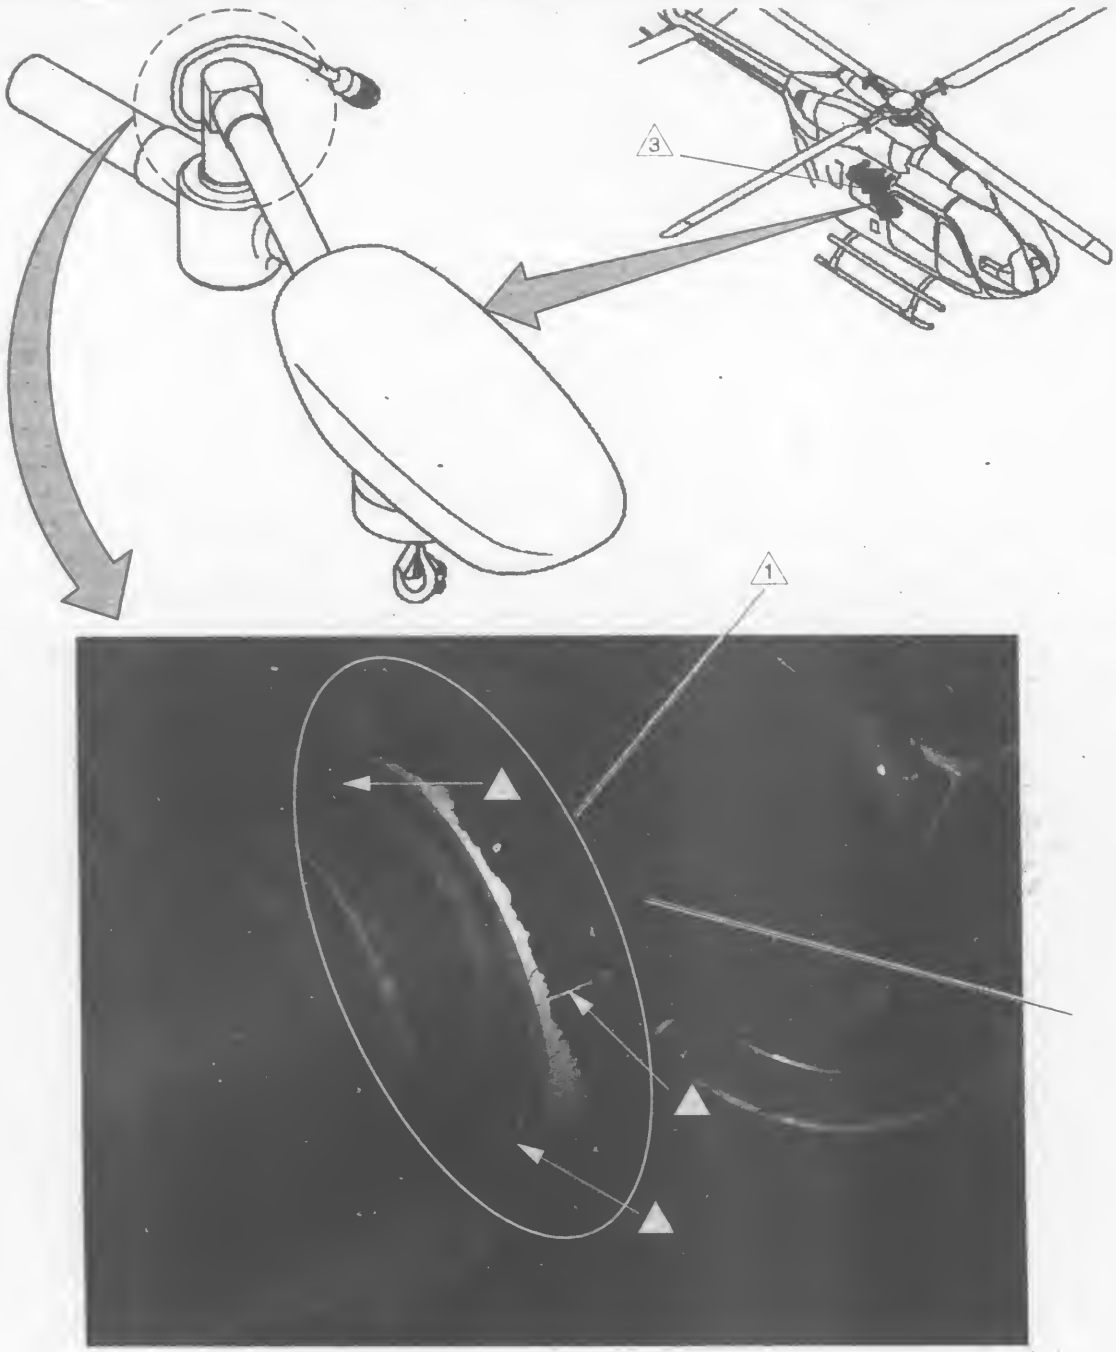

Figure 1 to Paragraph (e)

BILLING CODE 4910–13–C

(2) Within 30 days, perform a dye penetrant inspection of the boom in accordance with the Accomplishment Instructions, Section 2.D, of the Goodrich Service Bulletin 44307–500–03, Revision 2, dated April 30, 2010 (SB).

Note 1 to paragraph (e)(2) of this AD: A copy of the SB is attached to Eurocopter Emergency Alert Service Bulletin (EASB) EC135–85A–036, Revision 2, and Eurocopter EASB MBB BK117 C–2–85A–024, Revision 1, both dated June 23, 2010.

(3) If a crack exists in the boom, replace the cracked boom with an airworthy boom before further flight.

(f) Special Flight Permits

Special flight permits would be allowed provided the hoist is disabled during the ferry flight.

(g) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Safety Management Group, FAA, may approve AMOCs for this AD. Send your proposal to: Matt Wilbanks, Aviation Safety Engineer, Rotorcraft Certification Office, Rotorcraft Directorate, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222–5110; email *matt.wilbanks@faa.gov*.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office, before operating any aircraft complying with this AD through an AMOC.

(h) Additional Information

(1) Eurocopter EASB EC135–85A–036, Revision 2, and Eurocopter EASB MBB BK117 C–2–85A–024, Revision 1, both dated June 23, 2010, which are not incorporated by reference, contain additional information about the subject of this AD. For Eurocopter service information identified in this AD, contact American Eurocopter Corporation, 2701 N. Forum Drive, Grand Prairie, TX 75052; telephone (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at *http://www.eurocopter.com/techpub*. DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 30934; Amdt. No. 3569]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective December 27, 2013. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 27, 2013.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located;

3. The National Flight Procedures Office, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html*.

Availability—All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit *http://www.nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Richard A. Dunham III, Flight Procedure Standards Branch (AFS–420), Flight Technologies and Programs Divisions, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) Telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), by establishing, amending, suspending, or revoking SIAPS, Takeoff Minimums and/or ODPS. The complete regulators description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The applicable FAA Forms are FAA Forms 8260–3, 8260–4, 8260–5, 8260–15A, and 8260–15B when required by an entry on 8260–15A.

The large number of SIAPs, Takeoff Minimums and ODPs, in addition to their complex nature and the need for a special format make publication in the **Federal Register** expensive and impractical. Furthermore, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their depiction on charts printed

by publishers of aeronautical materials. The advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA forms is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAPs and the effective dates of the, associated Takeoff Minimums and ODPs. This amendment also identifies the airport and its location, the procedure, and the amendment number.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as contained in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPS and Takeoff Minimums and ODPS, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPS contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPS and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedures before adopting these SIAPS, Takeoff Minimums and ODPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, and Navigation (Air).

Issued in Washington, DC, on December 6, 2013.

John Duncan,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures and/or Takeoff Minimums and/or Obstacle Departure Procedures effective at 0902 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

Effective 9 January 2014

Needles, CA, Needles, Takeoff Minimums and Obstacle DP, Amdt 1
Camilla, GA, Camilla-Mitchell County, Takeoff Minimums and Obstacle DP, Amdt 2
Bonners Ferry, ID, Boundary County, RNAV (GPS) RWY 2, Orig-B

Effective 6 February 2014

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 30935; Amdt. No. 3570]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective December 27, 2013. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the **Federal Register** as of December 27, 2013.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located;

3. The National Flight Procedures Office, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

Availability—All SIAPs are available online free of charge. Visit *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Richard A. Dunham III, Flight Procedure Standards Branch (AFS–420)Flight Technologies and Programs Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082 Oklahoma City, OK 73125) telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) by amending the referenced SIAPs. The complete regulatory description of each SIAP is listed on the appropriate FAA Form 8260, as modified by the National Flight Data Center (FDC)/Permanent Notice to Airmen (P–NOTAM), and is incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of Title 14 of the Code of Federal Regulations.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAP and the corresponding effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP as modified by FDC/P–NOTAMs.

The SIAPs, as modified by FDC P–NOTAM, and contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these changes to SIAPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore— (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97:

Air Traffic Control, Airports, Incorporation by reference, and Navigation (Air).

Issued in Washington, DC on December 6, 2013.

John Duncan,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal regulations, Part 97, 14 CFR part 97, is amended by amending Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

§§97.23, 97.25, 97.27, 97.29. 97.31, 97.33, 97.35 [Amended]

■ 2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

Effective Upon Publication

AIRAC date	State	City	Airport	FDC No.	FDC date	Subject

BILLING CODE 4910–13–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 520

[Docket No. FDA–2013–N–0002]

Withdrawal of Approval of New Animal Drug Applications; Roxarsone

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect the withdrawal approval of five new animal drug applications (NADAs) for roxarsone oral dosage form products at the sponsor's request because the products are no longer manufactured or marketed.

DATES: Withdrawal of approval is effective January 6, 2014.

FOR FURTHER INFORMATION CONTACT: John Bartkowiak, Center for Veterinary Medicine (HFV–212), Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 240–276–9079, *john.bartkowiak@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Zoetis Inc., 333 Portage St., Kalamazoo, MI 49007 has requested that FDA withdraw approval of the following five NADAs for roxarsone oral dosage form products, used to make medicated drinking water for chickens, turkeys, and swine, because the products are no longer manufactured or marketed:

NADA	Proprietary name
005–414	REN–O–SAL (roxarsone) Tablets.
006–019	Zuco Poultry Tablets.
006–081	Korum Improved Formula.
008–274	Pig Scour Tablets.
093–025	3–NITRO (roxarsone) Soluble.

Elsewhere in this issue of the **Federal Register**, FDA gave notice that approval of NADAs 005–414, 006–019, 006–081, 008–274, and 093–025, and all supplements and amendments thereto, is withdrawn, effective January 6, 2014. As provided in the regulatory text of this document, the animal drug regulations are amended to reflect these voluntary withdrawals of approval.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects in 21 CFR Part 520

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under the authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 520 is amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

■ 1. The authority citation for 21 CFR part 520 continues to read as follows:

Authority: 21 U.S.C. 360b.

§§ 520.2087, 520.2088, and 520.2089 [Removed]

■ 2. Remove §§ 520.2087, 520.2088, and 520.2089.

Dated: December 20, 2013.

Bernadette Dunham,

Director, Center for Veterinary Medicine.

[FR Doc. 2013–30838 Filed 12–26–13; 8:45 am]

BILLING CODE 4160–01–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

33 CFR Part 207

Reservoirs at Headwaters of the Mississippi River; Use and Administration.

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Final rule.

SUMMARY: The U.S. Army Corps of Engineers is amending the rules regarding use and administration of the reservoirs at the headwaters of the Mississippi River by deleting from the Code of Federal Regulations all references to minimum discharges and to operating limits for the reservoirs. Following extensive public input and environmental review, the St. Paul District of the Corps of Engineers recently adopted an updated operating plan for the Mississippi River Headwaters reservoirs containing minimum flow values that differ from those currently codified in the *Code of Federal Regulations*. Deleting all references to minimum flows in the regulations will eliminate the current discrepancy between the regulations and the approved operating plan for the reservoirs. The operating limits are also contained in the operating plan for the reservoirs, and eliminating both the minimum flow values and the operating limits from the rule will make it unnecessary to amend the regulations each time the values are modified in the operating plan in the future.

DATES: *Effective Date:* January 27, 2014.

FOR FURTHER INFORMATION CONTACT: Headquarters, Engineering and Construction Community of Practice, Washington, DC at 202–761–4922, or Mr. Kenton Spading, U.S. Army Corps of Engineers, St. Paul District, at 651–290–5623.

SUPPLEMENTARY INFORMATION:

Executive Summary

The purpose of this action is to amend the current rule regarding minimum discharges and minimum operating limits of the reservoirs at the headwaters of the Mississippi River to ensure that the regulations do not conflict with the current operating plan for those reservoirs.

The Corps' authority to amend the minimum flow values and minimum operating limits for the reservoirs of the headwaters of the Mississippi River is Section 7 of the Rivers and Harbors Act of 1917 (40 Stat. 266; 33 U.S.C. 1) and Section 216 of the Flood Control Act of 1970 (84 Stat. 1830; 33 U.S.C. 549a).

Background

The Rivers and Harbors Acts of June 14, 1880, and August 2, 1882, authorized the construction of dams at each of the six Mississippi River Headwaters lakes for the purpose of augmenting Mississippi River flow for navigation. The lakes affected by these acts are Winnibigoshish, Leech, Pokegama, Sandy, Cross (Pine River), and Gull. Following authorization of the reservoirs, the Secretary of War prescribed regulations governing operation of the reservoirs on February 11, 1931, which were codified at 33 CFR 207.340. The current regulations list minimum discharges for each reservoir at 33 CFR 207.340(d)(2). The current regulations also list minimum operating limits, or the lowest level at which the Corps may operate each reservoir, at 33 CFR 207.340(d)(7).

The Corps' procedure adopting and publishing regulations related to reservoirs has changed since the aforementioned regulations were originally codified in 1931. The present-day practice is to include minimum flow values, operating limits and other related information in Water Control Manuals that are adopted following an extensive public and environmental review process, as outlined in Engineer Regulation (ER) 1110–2–240. Moreover, the operating limits in the Water Control Manuals prescribe not only the minimum level at which a reservoir may operate but also the absolute upper limit on reservoir operations, effectively providing a band within which the Corps may operate a reservoir.

As a precursor to updating the Water Control Manuals for the Mississippi River Headwaters reservoirs in 2009, we completed a study known as the Mississippi River Headwaters Reservoir Operating Plan Evaluation (ROPE). The primary purpose of the ROPE was to evaluate alternative operating plans for the Headwaters reservoirs in an attempt to improve the operation of the system while balancing tribal trust obligations, flood risk reduction, environmental concerns, water quality, water supply, recreation, navigation, hydropower, and other public interests.

On January 19, 2010, after thoroughly assessing potential environmental impacts and involving the public in the process, the District Engineer for the St. Paul District signed a Record of Decision approving the ROPE's recommended operating plan for the Headwaters reservoirs. The ROPE's recommended plan adopts minimum discharges that were scientifically developed using a habitat in-stream flow analysis (Tenant 1976), as described in the ROPE. The minimum discharges in the ROPE's recommended plan differ from the minimum discharges listed in 33 CFR 207.340 as it is currently written. We are in the process of updating the Water Control Manuals for the Headwaters reservoirs to implement the recommendations from the 2009 ROPE. Once the Water Control Manuals are revised, the minimum discharge values in the revised Water Control Manuals will also be in conflict with 33 CFR 207.340 if the regulation is not amended. Table No. 1 illustrates the differences between the current regulations and the 2009 ROPE study minimum flows.

TABLE 1—MISSISSIPPI RIVER HEADWATER RESERVOIR SYSTEM OPERATING LIMITS AND CFR VERSUS ROPE MINIMUM DISCHARGES

	Winnibigoshish	Leech	Pokegama	Sandy	Cross L. Pine R.	Gull
Total Operating Limit	1294.94–1303.14	1292.70–1297.94	1270.42–1278.42	1214.31–1221.31	1225.32–1235.30	1192.75–1194.75.
Minimum Flow: 33 CFR § 207.340.	150 cfs	70 cfs	200 cfs	80 cfs	90 cfs	30 cfs.
Minimum Flow: 2009 ROPE.	≥ 1294.94 100 cfs < 1294.94 50 cfs.	≥ 1292.70 120 cfs < 1292.70 60 cfs.	≥ 1273.17 200 cfs < 1273.17 Sum of Flow From Winnibigoshish plus Leech.	≥ 1214.31 20 cfs < 1214.31 10 cfs.	≥ 1225.32 30 cfs < 1225.32 15 cfs.	≥ 1192.75 20 cfs < 1192.75 10 cfs

The Mississippi River Headwaters proposed rule change was published for review and comment in the **Federal Register** on July 15, 2013 (78 FR 42030). The regulations.gov docket number was COE–2013–0008. No comments were

received by the end of the review and comment period on September 13, 2013.

We are amending the regulations to delete all references to minimum flows to eliminate any conflict between the regulations and the Water Control Manuals that guide operations at the Mississippi River Headwaters reservoirs. We are removing the minimum operating limits from the regulations. Any future changes to the minimum flows or the operating limits of the Headwaters reservoirs will be handled through revisions to the Water Control Manuals, which will be accomplished in accordance with the guidance provided in ER 1110–2–240 after public input and any necessary environmental reviews. The change to the rule will eliminate the necessity of amending the Code of Federal Regulations each time a Water Control Manual is updated.

Administrative Requirements

Plain Language

In compliance with the principles in the President's Memorandum of June 1, 1998, (63 FR 31855) regarding plain language, this preamble is written using plain language. The use of "we" in this notice refers to the Corps. We have also used the active voice, short sentences, and common everyday terms except for necessary technical terms.

Paperwork Reduction Act

This action will not impose any new information collection burden under the provisions of the Paperwork Production Act (44 U.S.C. 3501 et seq.). The modification would eliminate minimum flow values and operating limits from the rule. Since the rule does not involve any additional collection of information from the public, this action is not subject to the Paperwork Reduction Act.

Executive Order 12866

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Corps must determine whether the regulatory action is "significant" and therefore subject to review by OMB and the requirements of the Executive Order. The Executive Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, we have determined that the rule is not a "significant regulatory action" because it does not meet any of these four criteria. The rule modifies the regulations to be consistent with an approved, updated operating plan for the Mississippi River Headwaters reservoirs.

Executive Order 13132

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires the Corps to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have Federalism implications." The phrase "policies that have Federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

The rule does not have Federalism implications. We do not believe that amending the regulation to eliminate references to minimum flow values and operating limits for the Mississippi River Headwaters reservoirs will have substantial direct effects on the States, on the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. The rule does not impose new substantive requirements. In addition, the changes will not impose any additional substantive obligations on State or local governments. Therefore, Executive Order 13132 does not apply to this rule.

Regulatory Flexibility Act, as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 601 et seq.

The Regulatory Flexibility Act generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice-and-comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations and small governmental jurisdictions.

For purposes of assessing the impacts of this rule on small entities, a small entity is defined as: (1) A small business based on Small Business Administration size standards; (2) a small governmental jurisdiction that is a government of a city, county, town, school district, or special district with a population of less than 50,000; or (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of the rule on small entities, we believe that this action will not have a significant economic impact on a substantial number of small entities. The rule is consistent with current agency practice, does not impose new substantive requirements, and therefore would not have a significant economic impact on a substantial number of small entities.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and Tribal governments and the private sector. Under Section 202 of the UMRA, the agencies generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and Tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Before promulgating a rule for which a written statement is needed, Section 205 of the UMRA generally requires the agencies to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows an agency to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the agency publishes with the final rule an explanation why that alternative was not adopted. Before an agency establishes any regulatory requirements that may significantly or uniquely affect small governments, including Tribal governments, it must have developed, under Section 203 of the UMRA, a small government agency plan. The plan must provide for notifying potentially

affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

We have determined that the rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and Tribal governments, in the aggregate, or the private sector in any one year. The rule is consistent with current agency practice, does not impose new substantive requirements and therefore does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and Tribal governments, in the aggregate, or the private sector in any one year. Therefore, the rule is not subject to the requirements of Sections 202 and 205 of the UMRA. For the same reasons, we have determined that the rule contains no regulatory requirements that might significantly or uniquely affect small governments. Therefore, the rule is not subject to the requirements of Section 203 of UMRA.

Executive Order 13045

Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), applies to any rule that: (1) is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that we have reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, we must evaluate the environmental health or safety effects of the rule on children, and explain why the regulation is preferable to other potentially effective and reasonably feasible alternatives.

The rule is not subject to this Executive Order because it is not economically significant as defined in Executive Order 12866. In addition, it does not concern an environmental or safety risk that we have reason to believe may have a disproportionate effect on children.

Executive Order 13175

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 6, 2000), requires agencies to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." The phrase "policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes."

The rule does not have tribal implications. It will not have substantial direct effects on tribal governments, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes. It is generally consistent with current agency practice and does not impose new substantive requirements. Therefore, Executive Order 13175 does not apply to this rule.

Environmental Documentation

The purpose of this rule is to make the Code of Federal Regulations consistent with the current operating plan for the Mississippi River Headwaters Reservoirs. This action is solely administrative in nature. There is no intended change in the use or operation of the reservoirs as a result of this action. The substantive change in reservoir operations has already occurred as a consequence of the adoption of an updated operating plan, as approved in the Record of Decision for Mississippi River Headwaters Reservoir Operating Plan Evaluation dated January 19, 2010. The potential environmental impacts of the updated operating plan were thoroughly assessed in the Final Integrated Reservoir Operating Plan Evaluation and Environmental Impact Statement dated September 2009. Because the present action is merely administrative and an environmental analysis was completed at the time the substantive changes to the operating plan were adopted, no additional environmental documentation will be required at this time.

Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. We will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. The rule is not a "major rule" as defined by 5 U.S.C. 804(2).

Executive Order 12898

Executive Order 12898 requires that, to the greatest extent practicable and permitted by law, each Federal agency must make achieving environmental justice part of its mission. Executive Order 12898 provides that each Federal agency conduct its programs, policies, and activities that substantially affect human health or the environment in a manner that ensures that such programs, policies, and activities do not have the effect of excluding persons (including populations) from participation in, denying persons (including populations) the benefits of, or subjecting persons (including populations) to discrimination under such programs, policies, and activities because of their race, color, or national origin.

The rule is not expected to negatively impact any community, and therefore is not expected to cause any disproportionately high and adverse impacts to minority or low-income communities.

Executive Order 13211

The rule is not a "significant energy action" as defined in Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The proposed rule is consistent with current agency practice, does not impose new substantive requirements and therefore will not have a significant adverse effect on the supply, distribution, or use of energy.

List of Subjects in 33 CFR Part 207

Navigation (water), Penalties, Reporting and recordkeeping requirements, Waterways.

Dated: December 20, 2013.

James R. Hannon,

Chief, Operations and Regulatory.

For the reasons stated in the preamble, the Corps amends 33 CFR part 207 as follows:

PART 207—NAVIGATION REGULATIONS

■ 1. The authority citation for part 207 continues to read as follows:

Authority: 40 Stat. 266 (33 U.S.C. 1).

■ 2. Revise § 207.340 to read as follows:

§ 207.340 Reservoirs at headwaters of the Mississippi River; use and administration.

(a) *Description.* These reservoirs include Winnibigoshish, Leech Lake, Pokegama, Sandy Lake, Pine River and Gull Lake.

(b) *Penalties.* The River and Harbor Act approved August 11, 1888 (25 Stat. 419, 33 U.S.C. 601) includes the following provisions as to the administration of the headwater reservoirs:

And it shall be the duty of the Secretary of War to prescribe such rules and regulations in respect to the use and administration of said reservoirs as, in his judgment, the public interest and necessity may require; which rules and regulations shall be posted in some conspicuous place or places for the information of the public. And any person knowingly and willfully violating such rules and regulations shall be liable to a fine not exceeding five hundred dollars, or imprisonment not exceeding six months, the same to be enforced by prosecution in any district court of the United States within whose territorial jurisdiction such offense may have been committed.

(c) *Previous regulations now revoked.* In accordance with the above act, the Secretary of War prescribed regulations for the use and administration of the reservoirs at the headwaters of the Mississippi River under date of February 11, 1931, which together with all subsequent amendments are hereby revoked and the following substituted therefor.

(d) *Authority of officer in charge of the reservoirs.* The accumulation of water in, and discharge of water from the reservoirs, including that from one reservoir to another, shall be under the direction of the U.S. District Engineer, St. Paul, Minnesota, and of his authorized agents subject to the following restrictions and considerations:

(1) Notwithstanding any other provision of this section, the discharge from any reservoir may be varied at any time as required to permit inspection of, or repairs to, the dams, dikes or their appurtenances, or to prevent damage to lands or structures above or below the dams.

(2) During the season of navigation on the upper Mississippi River, the volume of water discharged from the reservoirs shall be so regulated by the officer in charge as to maintain as nearly as practicable, until navigation closes, a sufficient stage of water in the navigable reaches of the upper Mississippi and in those of any tributary thereto that may be navigated and on which a reservoir is located.

(e) *Passage of logs and other floating bodies.* Logs and other floating bodies may be sluiced or locked through the dams, but prior authority for the sluicing of logs must be obtained from the District Engineer when this operation necessitates a material change in discharge.

(f) *Obstructions to flow of water.* No person shall place floating bodies in a stream or pond above or below a reservoir dam when, in the opinion of the officer in charge, such act would prevent the necessary flow of water to or from such dam, or in any way injure the dam and its appurtenances, its dikes and embankments; and should floating bodies lying above or below a dam constitute at any time an obstruction or menace as beforesaid, the owners of said floating bodies will be required to remove them immediately.

(g) *Trespass.* No one shall trespass on any reservoir dam, dike, embankment or upon any property pertaining thereto.

BILLING CODE 3720–58–P

POSTAL SERVICE

39 CFR Part 111

Deferral of Compliance Date: Full-Service Intelligent Mail Barcode Requirement To Qualify for Automation Prices

AGENCY: Postal Service™.

ACTION: Final rule; partial deferral of compliance date.

SUMMARY: The Postal Service gives notice that it is deferring the previously-announced compliance date of January 26, 2014, for mailers to use full-service Intelligent Mail® to qualify for automation prices when mailing First-Class Mail®, Standard Mail®, Periodicals®, and Bound Printed Matter® mailpieces.

DATES: The compliance date of the relevant portions of the final rule published April 18, 2013 (78 FR 23137) is delayed indefinitely.

FOR FURTHER INFORMATION CONTACT: Lizbeth J. Dobbins at 202–268–3781.

SUPPLEMENTARY INFORMATION: In Order No. 1890 (November 21, 2013), the Postal Regulatory Commission (PRC) determined that the price changes proposed in Docket No. R2013–10 could take effect as scheduled only if the Postal Service elected to defer the requirement for mailers to use full-service Intelligent Mail to qualify for automation prices.

Consistent with this Order, the United States Postal Service® hereby gives notice that the January 26, 2014, deadline to comply with the full-service Intelligent Mail requirements to qualify for automation prices, previously published on April 18, 2013, in a final rule in the **Federal Register** (78 FR 23137–23149), is deferred until further notice. Specifically, this deferral applies to the requirements specified in DMM 233.5.1 (First-Class commercial letters and cards); DMM 243.6.1.2, 243.6.4.1, 243.6.5.1, and 243.7.1 (Standard Mail letters); DMM 333.5.1 (First-Class automation flats); DMM 343.7.1 (Standard Mail automation flats); DMM 363.4.1 and 363.6.1 (Bound Printed Matter flats); DMM 705.24.1 (advanced preparation and special postage payment systems); and DMM 707.13.4, 707.14.1, and 707.14.2 (Periodicals). *See*, 78 FR 23146–23148.

All other requirements that were published in the **Federal Register** (78 FR 23137–23149) will be implemented on January 26, 2014.

Stanley F. Mires,

Attorney, Legal Policy & Legislative Advice.

[FR Doc. 2013–30705 Filed 12–26–13; 8:45 am]

BILLING CODE 7710–12–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2009–0965; FRL–9904–71–Region 5]

Approval and Promulgation of Air Quality Implementation Plans; Indiana; Disapproval of State Implementation Plan Revision for ArcelorMittal Burns Harbor

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: On December 10, 2009, Indiana submitted a request for a revision to its sulfur dioxide (SO_2) state implementation plan (SIP) for the ArcelorMittal Burns Harbor LLC (ArcelorMittal) facility in Porter County, Indiana. This revision would remove the SO_2 emission limit for the blast furnace gas flare at the facility. The Environmental Protection Agency (EPA) proposed to disapprove this requested revision on March 20, 2013. The EPA is addressing comments and finalizing the disapproval action.

DATES: This final rule is effective on January 27, 2014.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2009–0965. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information may not be publicly available, i.e., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Mary Portanova, Environmental Engineer, at (312) 353–5954 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Mary Portanova, Environmental Engineer, Control Strategies Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 353–5954, *Portanova.mary@epa.gov*.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This supplementary information section is arranged as follows:

I. What is the background for this action?

On December 10, 2009, the Indiana Department of Environmental Management (IDEM) submitted a request for revision of its SO_2 SIP. This revision would amend 326 Indiana Administrative Code (IAC) 7–4–14, Porter County SO_2 Emission Limitations, by removing the SO_2 limit for the blast furnace flare at the ArcelorMittal steel mill. To be approved, this SIP revision request must comply with section 110(l) of the Clean Air Act (CAA), which states that the Administrator shall not approve a SIP revision if it would interfere with attainment and maintenance of the national ambient air quality standards (NAAQS), reasonable further progress, and any other applicable requirements. 42 U.S.C. 7410(l).

After reviewing the state's submittal, EPA determined that the proposed SIP revision does not meet the requirements of CAA section 110(l). Removal of the flare limit eliminates the only requirement which directly addresses the sulfur content of the blast furnace gas which ArcelorMittal uses to fuel other combustion units in the facility. Although blast furnace gas is considered to be a low-sulfur fuel, the state's submittal indicates that the sulfur content of blast furnace gas can vary, and the proposed SIP revision would allow ArcelorMittal's blast furnace gas to increase in sulfur content without limit. This would be inconsistent with the state's prior attainment demonstration for the SO_2 NAAQS.

The state has not fully evaluated the ambient impact of new operating scenarios in which ArcelorMittal generates and uses higher-sulfur blast furnace gas. It did not provide sufficient information for EPA to confirm the assertion that the SIP emission limits would continue to be met, with or without the use of the flare, under maximum blast furnace capacity without limitations on blast furnace gas sulfur content. Since the state's SIP submittal did not meet the requirements of CAA section 110(l), EPA published a notice of proposed disapproval for this SIP revision request on March 20, 2013 (78 FR 17157). EPA received four letters commenting on the proposed disapproval.

II. What comments were received, and what is EPA's response?

EPA received two comments in support of the proposed disapproval, from an Indiana public interest group (March 22, 2013) and a private citizen (April 18, 2013). Both IDEM and ArcelorMittal disagreed with the proposal to disapprove the SIP revision request. IDEM submitted its comments on April 18, 2013. ArcelorMittal submitted its comments on April 19, 2013. Their comments are addressed below.

Comment: The flare limit represents an inequity in the state's treatment of blast furnace gas flares; a similar facility nearby does not have SO_2 limits on its functionally identical flares. The limits for Lake County, Indiana, were established after the limits for Porter County, where ArcelorMittal is located. Emission inventories and modeling parameters had improved, and through extensive consultation with EPA, it was determined to be unnecessary to establish SO_2 emission limits specific to the flares for similar facilities in Lake County (i.e. U.S. Steel Gary Works). IDEM was able to establish SIP limits for sources such as U.S. Steel Gary Works which did not include SO_2 limits on the flares. EPA approved those limits. There is no material reason for ArcelorMittal's blast furnace gas flares in Porter County to be treated different from the blast furnace gas flares operated by U.S. Steel in Lake County. It would be arbitrary for EPA to disapprove the Porter County SIP revision to remove blast furnace gas flare limits as unnecessary and redundant limits after approving the 2005 Lake County SO_2 SIP that did not include blast furnace gas flare limits because they were unnecessary and redundant. IDEM's attempt to remove this arbitrary difference between neighboring counties should be considered an appropriate correction to a historic error and approved. This SIP revision would harmonize the Lake and Porter County treatment of flares combusting excess blast furnace gas.

Response: Indiana's December 10, 2009, submission did not demonstrate that ArcelorMittal's revised SO_2 SIP would continue to protect the SO_2 NAAQS or meet the requirements of CAA section 110(l). Therefore, the SIP revision cannot be approved. Emission limits, or the lack thereof, at other facilities are not relevant to this demonstration. The fact that SO_2 SIPs have been approved without the need for SO_2 limits on certain flares is not in itself a justification for removing SO_2 limits on flares from other sources in the absence of a showing that the removal will not interfere with attainment and maintenance of the NAAQS.

Comment: This should not be considered a matter of backsliding or relaxation of the SIP, but a technical correction that is necessary to establish consistency. The limit should have been excluded from the start; therefore, this corrective action has no impact on the approved SIP or the modeling conducted to support it.

Response: The state established ArcelorMittal's flare limit in the SIP as part of its strategy to attain and maintain the SO_2 NAAQS in Porter County. The SIP was approved by EPA in 1989 and has remained in effect. CAA section 110(l) does not provide an exception for "technical corrections." Even if it did, it would not be appropriate to treat the state's December 10, 2009, SIP revision request as a technical correction because it can be expected to affect air quality and because the state has not provided a demonstration that in 1989 it did not intend to establish an SO_2 limit applicable to the blast furnace flare now operated by ArcelorMittal. Likewise, to the extent that the commenter is suggesting the SIP provision was approved in error and should be

corrected pursuant to CAA section 110(k)(6). EPA notes that the state has not provided a basis for concluding that the approval of this provision in 1989 was an error. In addition, EPA does not believe that emission limit relaxations can be justified on the basis of establishing consistency without also satisfying the requirements of CAA section 110(l). Therefore, the proposed SIP revision's effects on the existing SIP and on the state's maintenance of the NAAQS must be evaluated in accordance with CAA section 110(l).

Comment: IDEM and ArcelorMittal were led in 2007–2009 to believe that the flare limit removal would be approvable. IDEM and ArcelorMittal received no information to the contrary until 2012. EPA was unwilling to establish fruitful dialogue with the state prior to proposing disapproval. In its proposed disapproval, EPA did not cite or recognize the wealth of information provided to supplement the SIP revision.

Response: EPA's concerns with this SIP revision did not arise until EPA received and began review of Indiana's December 10, 2009, SIP submittal. Following a thorough review of the submittal and additional information subsequently provided by Indiana, EPA concluded that the submittal did not meet the requirements of CAA section 110(l). EPA regularly communicated the progress of EPA's review of the submittal during monthly conference calls with IDEM and offered opportunities for further dialogue, which is documented in call summaries prepared by IDEM.

As early as January 2010, EPA identified potential issues with this SIP revision request. EPA acknowledges that IDEM and ArcelorMittal provided EPA with additional information in response to its questions, which EPA carefully considered. However, the state's submittal, including supplemental information, did not demonstrate that the proposed SIP revision would satisfy CAA section 110(l). IDEM's monthly call summaries indicate that EPA had begun working on a disapproval in January 2012, after expressing continuing concerns in September 2011. EPA formally communicated the deficiencies of the revision in the March 20, 2013, notice of proposed rulemaking (78 FR 17157). EPA's proposal was based on an evaluation of the state's official submittal using the applicable requirements of the CAA, related regulations and guidance.

Comment: The flares should not have a limit, especially a mass limit (pounds per hour), because the flare needs to be available for full usage to maintain operational safety. Additionally, a flare limit presents a major hardship for compliance testing and enforcement.

Response: EPA agrees that the ArcelorMittal flare must be allowed to operate as necessary for operational safety and proper disposal of waste gases. EPA also agrees that direct compliance testing of flare emissions can be difficult. ArcelorMittal's existing flare emission limit would not limit the flare's actual usage while the blast furnace gas generated by the facility continued to meet the flare emission limit. Deleting the flare limit, however, has additional consequences for the SIP which Indiana did not adequately address in its SIP revision request.

Comment: The commenter states that the *Montana Sulphur* case which EPA cited does not apply to this SIP revision because Indiana's SIP includes limits on all the emissions from blast furnace gas combustion that were used in the modeling to demonstrate attainment. The flares were not attributed any mass emissions in the modeling demonstration or the SIP. The *Montana Sulphur* case involved a state's decision to include flares in the modeling demonstration but not include corresponding emission limits in the SIP rule.

Response: The *Montana Sulphur* case affirms that flares are not exempt from having SIP emission limits, particularly where flare emissions were quantified in an attainment demonstration that assumed flare emissions would occur at a certain level. Indiana has submitted information to EPA indicating that the blast furnace flare was included in the original modeled attainment demonstration for the Porter County SO_2 SIP, with its SO_2 emissions calculated from blast furnace gas with a sulfur content of 0.07 pounds SO_2 per million British Thermal Units (lb/mmBtu). Allowing higher-sulfur blast furnace gas would affect SO_2 emissions at several emission points, including the flare, which could affect the adequacy of the prior modeled attainment demonstration, which relied upon the use of blast furnace gas with a sulfur content of 0.07 lb/mmBtu. Therefore, it is reasonable for the SIP to require the flare and the other sources using blast furnace gas to meet that emission rate or demonstrate compliance with applicable emission limits based on that emission rate. Indiana has not provided a demonstration which fully addresses the effect on the attainment demonstration of relaxing the SIP requirements to allow the facility to generate, use, and flare higher-sulfur blast furnace gas. Likewise, in the SIP disapproval that was the subject of the *Montana Sulphur* case, the state's attainment demonstration had assumed SO_2 emissions from flares would occur at a certain rate, but had not shown in its enforceable SIP emissions limits how the assumed emissions would be achieved. It is true that EPA has not required all flares in all SO_2 SIPs to be subjected to emission limits. But where an attainment demonstration relies upon SO_2 emissions to occur at certain levels, including those from flares, the SIP must contain adequate emission limits to support the demonstration. The problem both in *Montana Sulphur* and here was that the attainment demonstration submitted by the state could not be so supported. (The blast furnace flare limit helped support Indiana's demonstration for the ArcelorMittal facility when the SO_2 SIP was approved in 1989.) Consequently, EPA's disapproval of the proposed SIP relaxation is fully consistent with the Court's reasoning in the *Montana Sulphur* case and with EPA's SIP disapproval action that was the subject of that case.

Comment: The flare SO_2 limit is in units of lb/mmBtu. This is not a mass limit, which would be given as pounds of SO_2 per hour (lb/hr). Therefore the form of the limit is not designed to be protective of the NAAQS. Only the mass based lb/hr limits are relevant to ensuring SO_2 NAAQS attainment in the SIP. The 0.07 lb/mmBtu SO_2 emission rate is a factor that is no longer necessary or relevant after the lb/hr limits were established and included in the SIP. Exclusion of this limit is no less protective than the current SIP limit.

Response: Emission limits given in units of lb/mmBtu are common in SO_2 SIPs. By directly limiting the sulfur content of the fuels combusted in a given unit or facility, this type of limit allows flexibility of unit operations. When the individual units are modeled at their maximum heat input rates (in units of million British Thermal Units per hour), assuming fuel at the lb/mmBtu limit, the SIP can be shown to protect the NAAQS for any actual heat input rate, including continual maximum operations, with compliant fuel. The removal of a lb/mmBtu emission limit would enable the burning of a higher-sulfur fuel, which could result in SO_2 concentrations in excess of the NAAQS and adversely affect public health.

Comment: Given the existing flare SIP limit of 0.07 lb/mmBtu, an emission rate of 8.9 lb/hr could be assumed for the flare, for modeling purposes. Over a year of continuous operation, this would total less than 39 tons per year, which is below the Significant Emission

Rate for SO_2 (40 tons per year). Actual emissions would be lower, because flares operate intermittently. Since the facility is in an attainment area, the flare would normally be excluded from modeling because it was considered de minimis. Recent EPA guidance suggests that intermittent sources can be excluded from modeling.

Response: The commenter's statements regarding the relative importance of the flare's SO_2 emissions do not eliminate the need for a CAA section 110(l) demonstration addressing the full effects of the proposed SIP revision. The comment references the flare's total annual emissions while in compliance with the current SO_2 emission limit, but it does not consider the increase in annual SO_2 emissions which the proposed SIP revision would allow. In comparing the flare's total annual emissions to the Significant Emission Rate, the commenter appears to be referencing New Source Review/ Prevention of Significant Deterioration program requirements which are not relevant to this SIP action. The designation of an area as attainment of the NAAQS does not automatically exempt emission sources from inclusion in SIP attainment demonstrations. It is not clear that ArcelorMittal's blast furnace flare would qualify as an intermittent source under EPA's March 1, 2011, memorandum *Additional Clarification Regarding Application of Appendix W Modeling Guidance for the 1-hour NO_2 National Ambient Air Quality Standard* (which is what EPA assumes the commenter is referencing), or that it would be appropriate to disregard the flare's emissions in a SIP modeling analysis per this memorandum, and the state did not provide an analysis justifying such an approach within a modeled demonstration for the 1-hour SO_2 standard.

Comment: The pressure surge events that concern EPA are rare and unexpected events that cannot be quantified. The allowable SO_2 emission rates are sufficiently conservative to account for all such surges within the current allowable emissions inventory. Therefore, the commenter disagrees with EPA's assertion that the SIP revision would enable an increase in allowable SO_2 emissions.

Response: EPA referenced pressure surges in the March 20, 2013, notice of proposed rulemaking because the documentation provided by the state indicated that the blast furnace flare gas generation or distribution systems were known to experience pressure surge events. However, the state's declarations regarding flare usage and worst-case facility operations did not address these events. We acknowledge the commenter's additional assurances regarding the frequency and magnitude of pressure surges. As discussed above, EPA is not solely concerned with pressure surge events, but also with the effect on air quality of removing the blast furnace flare limit from the SIP.

Comment: The commenter declared a strong economic incentive to use this gas as fuel, flaring as little of it as possible.

Response: EPA understands that it is ArcelorMittal's intent to use its blast furnace gas as fuel rather than flaring it, thus minimizing flare emissions. However, the company has acknowledged the need to use the flare for the safe operation of the blast furnace gas operating system, regardless of the economic incentives to do otherwise. Whether the flare is used frequently or not, the full effect of removing the flare's emission limit must be addressed. The state did not provide a CAA section 110(l) demonstration which adequately addressed the effect of the proposed SIP revision on air quality, taking into consideration the facility's ability to continue using all of its generated gases as fuel and the lack of a sulfur limit on blast furnace gas.

Comment: The commenter stated that the amount of process gas generation is limited by enforceable restrictions. The facility's Part 70 operating permit places a limit on the amount of hot metal that can be produced in the blast furnace, which effectively limits the amount of blast furnace gas that can be produced by the facility. The coke oven batteries have enforceable SIP limits on the amount of coke oven gas that can be produced. The commenter said that the maximum amount of blast furnace gas and coke oven gas that can be generated within these restrictions can be consumed in the existing combustion units when operated at maximum capacity. When IDEM modeled the allowable emissions from the facility, combustion of all the blast furnace gas and coke oven gas is properly included and there is no additional blast furnace gas to attribute to the flare.

Response: The commenter referred to hot metal production limits within the facility's Part 70 permit which were originally derived from a construction permit and are therefore permanent. The commenter stated that these restrictions would affect blast furnace gas production, but did not provide calculations or documentation which identified the maximum amount of blast furnace gas that can be generated while in compliance with the hot metal limitation in the facility's Part 70 permit. The total coke oven gas production allowable under the cited coke battery limits was not given. The SIP includes SO_2 emission limits for various fuel combustion units at ArcelorMittal which can use blast furnace gas and coke oven gas, such as the blast furnace stoves, coke battery underfire, slab mill soaking pits, and power station boilers, which are referred to in this document as "the combustion units." No calculations were provided to show the amount of process gas by volume which can be burned in the combustion units at their maximum heat input capacities, for comparison with maximum gas production in support of the commenter's assertion. The state's submittal did not address the amounts of each fuel gas which corresponded to the emission rates used in the dispersion modeling analysis which the state cited in support of the SIP revision. Therefore, EPA does not have sufficient information to confirm that the maximum amount of blast furnace gas and coke oven gas which can be generated within the facility's enforceable production restrictions can be entirely consumed in the combustion units when operated in compliance with the SO_2 SIP emission limits.

Comment: The sum of allowable SO_2 lb/hr rates for all combustion units burning process gases at the ArcelorMittal facility is 8,692 lb/hr. This rate is more than double the maximum SO_2 emissions from combustion of all the process gases that can be produced at the facility within current enforceable restrictions on hot metal and coke oven gas. The commenter provided calculations to support this assertion.

Response: The calculations which the commenter provided appear to be based on actual annual facility gas production data, rather than a calculated maximum value which would be allowed by the enforceable limits, as suggested by the comment. The comment letter contains a table of calculated SO_2 emissions from blast furnace gas and coke oven gas. This table is identical to a table in ArcelorMittal's June 29, 2011, letter to IDEM. In that letter, the blast furnace gas production data was identified as the facility's highest recent annual production amount (2004), and the coke oven gas was identified as the highest recent annual production amount (2009). EPA has already considered this information. The June 29, 2011, letter did not indicate that the 2004 blast furnace gas production totals represented the maximum amount of process gas that could be generated while in compliance with the hot metal limit in the Part 70 permit. The

comment on EPA's March 20, 2013, proposed disapproval does not provide additional calculations or documentation to identify the true maximum blast furnace gas production which would be possible within the hot metal limitation in ArcelorMittal's Part 70 permit, or to demonstrate that the 2004 actual production value is equal to the maximum possible production rate. EPA therefore concludes that the comment continues to cite actual production data from 2004, which is not sufficient to prove that the existing SIP limits will continue to accommodate all of the gas ArcelorMittal can generate, when the blast furnace gas sulfur content is no longer restricted by the flare limit.

Comment: Since the worst-case scenario attributes no blast furnace gas to the flare, a change in the actual emissions at the flare is irrelevant for purposes of attainment and maintenance of the SO_2 NAAQS. Any increase in emissions at the flare reflects a corresponding reduction from another source already modeled and must be considered a departure from the worst-case scenario that must be modeled for the attainment demonstration. This is how EPA endorsed modeling similar sources in Lake County.

Response: A change in actual SO_2 emissions at the flare is only irrelevant if the SIP truly covers all possible blast furnace gas production and sulfur content increases which would be allowed under the revised SIP. The range of potential blast furnace gas sulfur content at this facility has not been established. When blast furnace gas is no longer assured of meeting 0.07 lb/mmBtu, the new worst-case operating scenario may differ from the scenario which was previously modeled to support the original SO_2 SIP for this facility. The state has not demonstrated that the SIP fully covers new potential operating scenarios which could occur.

Comment: One of the commenters disagreed with EPA's statement that the limitations on the sulfur content of the process gases need to be addressed in the SIP. The comment stated that the purpose of the SIP is to attain and maintain the NAAQS and ensure reasonable further progress, and for this purpose, IDEM established the SO_2 lb/hr emission limits for all fuel burning sources that use process gases when operating at their full utilization rates. These rates were modeled and attainment of the SO_2 NAAQS was demonstrated at the time of adoption of 326 IAC 7–4–14 as noted in 53 FR 34314 (September 6, 1988). The modeled rates were included as emission limits in the SIP. The conservative modeled scenario provides an adequate margin of safety to ensure than the attainment demonstration remains valid and protective of the NAAQS. The modeled emission rates for the combustion units remain unchanged and are not affected by the SIP revision. Therefore, the revision does not interfere with protection of the NAAQS. The other commenter added the statement that the limits established to support compliance of the NAAQS are applicable regardless of the sulfur content in the fuel used.

Response: The SIP revision request removes an emission limit which is directly linked to the sulfur content of the blast furnace gas generated and used at ArcelorMittal. The sulfur content of the blast furnace gas is directly linked to the facility's compliance with its remaining lb/hr SIP emission limits, because the emissions from many of those units correspond directly to the sulfur content of the blast furnace gas and coke oven gas which are allowed to be used together as fuel. The state has not demonstrated how ArcelorMittal will continue to meet and demonstrate continuous compliance with these limits if blast furnace gas is no longer assured of meeting a sulfur content of 0.07 lb/mmBtu. The state has not limited or quantified the expected increase in blast furnace gas sulfur content under the revised SIP. The existing SIP does not require the sulfur content of blast furnace gas to be analyzed for compliance purposes. The facility's sampling and analysis plan under 326 IAC 7–4–14(1)(F) would allow ArcelorMittal to calculate its combustion unit SO_2 emissions by assuming that its blast furnace gas sulfur content is 0.07 lb/mmBtu, even though the SIP would no longer require the gas to meet that limit at any combustion unit. The state has not shown that 0.07 lb/mmBtu will continue to be a representative SO_2 emission factor for ArcelorMittal's blast furnace gas. The compliance requirements for the combustion units have not been revised. The state has not provided a basis for EPA to conclude that the revised SIP will have no effect on the operation of the combustion sources or on the facility's need to flare excess fuel gases. Therefore, the state has not demonstrated that relaxing ArcelorMittal's SIP will satisfy the requirements of CAA section 110(l).

Comment: The commenter disagrees that actual flaring data is needed for the SIP revision. Actual flaring events reflect something other than the worst-case operating scenario for blast furnace gas combustion and are therefore irrelevant for establishing attainment and maintenance of the NAAQS.

Response: As the commenter states, actual flaring data is not in itself a requirement for SIP approval. The state's arguments for removing the flare limit hinge on the concept that the facility intends to and is able to use all of its process gas in its combustion units, minimizing flare usage, and that flare usage events correspond to overall facility emissions below the SIP allowable levels. EPA's proposed disapproval simply pointed out that no historical flaring data was provided.

III. What action is EPA taking?

EPA is disapproving Indiana's December 10, 2009, submittal requesting a SIP revision to remove the SO_2 emission limit on the blast furnace gas flare at ArcelorMittal Burns Harbor in Porter County. The commenters on the proposed disapproval contend primarily that the facility's blast furnace gas flare does not need an emission limit in order to maintain the NAAQS. The comments did not demonstrate that the revised SIP satisfactorily addresses the results of removing an emission limit that had had the effect of requiring the facility to maintain a specific sulfur content in its blast furnace gas. Nor did other information in the record provide a basis to conclude that this SIP revision satisfies the requirements of CAA section 110(l). Accordingly, EPA is disapproving the submittal.

IV. Statutory and Executive Order Reviews

Executive Order 12866: Regulatory Planning and Review

This site-specific action is exempt from review under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011).

Paperwork Reduction Act

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Regulatory Flexibility Act

This action merely disapproves state law as not meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, I certify that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Unfunded Mandates Reform Act

Because this rule disapproves pre-existing requirements under state law

and does not impose any additional enforceable duty beyond that required by state law, it does not contain an unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

Executive Order 13132: Federalism

This action also does not have Federalism implications because it does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely disapproves a state rule, and does not alter the relationship or the distribution of power and responsibilities established in the CAA.

Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (59 FR 22951, November 9, 2000).

Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the Executive Order has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997). This SIP disapproval under section 110 will not in-and-of itself create any new rules but simply disapproves a state rule proposed for inclusion into the SIP.

Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

Because it is not a "significant regulatory action" under Executive Order 12866 or a "significant energy action," this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001).

National Technology Transfer Advancement Act

In reviewing state submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the state to use voluntary consensus standards (VCS), EPA has no authority to disapprove a state submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a state submission, to use VCS in place of a state submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629 (Feb. 16, 1994)) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA lacks the discretionary authority to address environmental justice in this action. In reviewing SIP submissions, EPA's role is to approve or disapprove state choices, based on the criteria of the CAA. Accordingly, this action merely disapproves certain state requirements for inclusion into the SIP under section 110 and will not in-and-of itself create any new requirements. Accordingly, it does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898.

Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. section 804(2).

Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 25, 2014. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2012–0453; FRL–9904–35–Region 5]

Approval and Promulgation of Air Quality Implementation Plans; Indiana; Volatile Organic Compound Emission Control Measures for Industrial Solvent Cleaning for Northwest Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a request from the Indiana Department of Environmental Management to revise its volatile organic compound state implementation plan (SIP) for industrial solvent cleaning rule for manufacturers of coatings, inks, adhesives, and resins. These revisions are approvable because they are consistent with EPA's Industrial Solvent Cleaning Control Technique Guidelines document and therefore satisfy the reasonable available control technology requirements of the Clean Air Act. EPA proposed to approve these revisions on September 10, 2013, and did not receive any comments.

DATES: This final rule is effective on January 27, 2014.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2012–0453. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Anthony Maietta, Environmental Protection Specialist, at (312) 353–8777 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Anthony Maietta, Environmental Protection Specialist, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 252–8777, *maietta.anthony@epa.gov*.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This supplementary information section is arranged as follows:

I. What is the background for the action?

On September 10, 2013, EPA proposed to approve rule revisions contained in a May 29, 2012, submittal from IDEM into the **Federal Register** (78 FR 55234). The submittal requested that EPA approve a revision to the Indiana SIP regarding the industrial solvent cleaning rule for manufacturers of coatings, inks, adhesives, and resins. EPA received no comments on the proposed action.

II. What action is EPA taking?

EPA is approving revisions to Title 326, Article 8, Rule 17 of the Indiana Administrative Code (IAC) as submitted to EPA on May 29, 2012. Specifically, EPA is approving revisions to 326 IAC 8–17–2, 326 IAC 8–17–4, and 326 IAC 8–17–7.

III. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register.** A major rule cannot take effect until 60 days after it is published in the **Federal Register.** This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 25, 2014. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule

or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2013–0286; FRL–9904–30]

Copper Sulfate Pentahydrate; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of copper sulfate pentahydrate when applied to all food contact surfaces in public eating places, dairy-processing equipment, and food-processing equipment at a maximum level in the end use concentration of 80 parts per million (ppm). Toxcel on behalf of OhSo Clean, Inc., submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting establishment of an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of copper sulfate pentahydrate.

DATES: This regulation is effective December 27, 2013. Objections and requests for hearings must be received on or before February 25, 2014, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2013–0286, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), EPA West Bldg., Rm. 3334, 1301 Constitution Ave., NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review

the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Lois Rossi, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2013–0286 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before February 25, 2014. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2013–0286, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Petition for Exemption

In the **Federal Register** of July 19, 2013 (78 FR 43115) (FRL–9392–9), EPA issued a document pursuant to FFDCA section 408, 21 U.S.C. 346a, announcing the filing of a pesticide petition (PP 2E8116) by Toxcel, P.O. Box 363, 7140 Heritage Village Plaza, Gainesville, VA 20156, on behalf of OhSo Clean, Inc., 315 Pacific Ave., San Francisco, CA 94111. The petition requested that 40 CFR 180.940 be amended by establishing an exemption from the requirement of a tolerance for residues of copper sulfate pentahydrate (Chemical Abstracts Service Registry Number (CAS Reg. No.) 7758–99–8) when used as an inert ingredient (emulsion stabilizer) in antimicrobial pesticide formulations (food contact surface sanitizing solutions) not to exceed 80 ppm. That document referenced a summary of the petition prepared by Toxcel LLC., 7140 Heritage Village Plaza, Gainesville, VA 20155, the petitioner, which is available in the docket, *http://www.regulations.gov.* There were no comments received in response to the notice of filing.

III. Inert Ingredient Definition

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125 and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): Solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply non-toxicity; the ingredient may or may not be chemically active. Generally, EPA has exempted inert ingredients from the requirement of a tolerance based on the low toxicity of the individual inert ingredients.

IV. Aggregate Risk Assessment and Determination of Safety

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . ."

EPA establishes exemptions from the requirement of a tolerance only in those cases where it can be clearly demonstrated that the risks from aggregate exposure to pesticide chemical residues under reasonably foreseeable circumstances will pose no appreciable risks to human health. To determine the risks from aggregate exposure to pesticide inert ingredients, the Agency considers the toxicity of the inert in conjunction with possible exposure to residues of the inert ingredient through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings. If EPA is able to determine that a finite tolerance is not necessary to ensure that there is a reasonable certainty that no harm will result from aggregate exposure to the inert ingredient, an exemption from the

requirement of a tolerance may be established.

Consistent with FFDCA section 408(c)(2)(A), and the factors specified in FFDCA section 408(c)(2)(B), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for copper sulfate pentahydrate including exposure resulting from the exemption established by this action. EPA's assessment of exposures and risks associated with copper sulfate pentahydrate follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered their validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the adverse effects caused by copper sulfate pentahydrate, as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies, are discussed in the final rule published in the **Federal Register** of August 11, 2006 (71 FR 46106) (FRL–8085–3).

Copper is ubiquitous in nature and is a necessary nutritional element for both animals (including humans) and plants. Copper is found naturally in the food we eat including fruits, vegetables, meats, and seafood. It is found in the water we drink, the air we breathe and in our bodies themselves. Some of the environmental copper is due to direct modification of the environment by humans such as mining and smelting of the natural ore. It is one of the elements found essential to life. The National Academy of Science establishes recommended daily allowances (RDAs) of vitamins and minerals for the diet. The RDA for copper ranges from approximately 400 micrograms per day (µg/d) in young children to 900 µg/d in adults. Additionally, over the counter dietary supplements containing copper at level ranging from 0.33 milligram (mg) to 3 mg are available for individuals with low levels of copper. The copper ion is present in the adult human body with nearly two-thirds of the body copper content located in the skeleton and muscle. The liver is the primary organ for the maintenance of plasma copper concentrations.

The 2006 Reregistration Eligibility Decision for copper compounds reviewed and summarized all toxicity studies submitted for copper and has determined that the toxicological database is sufficient to assess the hazard from pesticides containing copper. Copper generally has moderate to low acute toxicity based on acute oral, dermal, and inhalation studies in animals. However, copper sulfate pentahydrate specifically has a been classified as moderate for acute oral toxicity, low for acute dermal toxicity and dermal irritation, and high for primary eye irritation. All effects resulting from acute exposure to copper-containing pesticides are due to acute body responses to minimize excessive absorption or exposure to copper. Current available data in animals do not show any evidence of upper limit toxicity level that warrant determining acute toxicity endpoints.

Based on available data summarized in the 2006 Reregistration Eligibility Decision for Coppers, there is no evidence of any dietary, oral, and dermal or inhalation adverse effects warranting quantitative assessment of sub-chronic or chronic risk. Available short-term feeding studies with rats and mice indicate decreased food and water intake with increasing oral concentrations of copper. Irritation of the stomach was seen at higher copper concentrations. Longer-term feeding studies indicate decreased feed intake with reductions in body weight gains, and increased copper concentration of the liver. Available reproductive and developmental studies by the oral route of exposure generally indicate that the main concern in animals for reproductive and teratogenic effects of copper has usually been associated with the deficiency rather than the excess of copper.

Oral ingestion of excessive amounts of the copper ion from pesticidal uses including the proposed use is unlikely. Copper compounds are irritating to the gastric mucosa. Ingestion of large amounts of copper results in prompt emesis. This protective reflex reduces the amount of copper ion available for absorption into the human body. Additionally, at high levels humans are also sensitive to the taste of copper. Because of this organoleptic property, oral ingestion would also serve to limit high doses.

Only a small percentage of ingested copper is absorbed, and most of the absorbed copper is excreted. The human body appears to have efficient mechanisms in place to regulate total body copper. The copper ion occurs naturally in food and the metabolism of copper is well understood.

Finally, sulfate has little toxic effect and is routinely used in medicine as a cathartic when combined with magnesium or sodium; the only adverse manifestations from this use being dehydration if water intake is concurrently limited.

B. Toxicological Points of Departure/ Levels of Concern

No endpoints of toxicological concern were identified for risk assessment purposes for copper sulfate pentahydrate. Copper sulfate pentahydrate readily hydrolyzes into the copper cation and the sulfate anion. Copper is a required essential nutritional element for both plants and animals. Indeed, current available data and literature studies indicate that there is a greater risk from the deficiency of copper intake than from excess intake. Copper also occurs naturally in a number of food items including fruits, meats, seafood, and vegetables. In humans, as part of the utilization of copper as an essential nutrient, there is an effective homeostatic mechanism that is involved in the dietary intake of copper and that protects humans from excess body copper. Given that copper is ubiquitous, is an essential nutrient, and is routinely consumed as part of the daily diet, exposure to copper as a result of the use of copper sulfate pentahydrate as a pesticide chemical would not be of toxicological concern. Further, the sulfate anion is also ubiquitous; it is the substrate in a number of normal human biosynthetic reactions. Following ingestion, sulfate is poorly absorbed via the gastrointestinal tract and is excreted in the urine. Other than a slight laxative effect at extremely high doses, sulfate has no known adverse toxic effects.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to copper sulfate pentahydrate, EPA considered exposure under the proposed exemption from the requirement of a tolerance. EPA assessed dietary exposures from copper sulfate pentahydrate in food as follows:

The main source of copper for infants, children, and adults, regardless of age, is the diet. Copper is typically present in mineral rich foods like chocolate, fruits (peaches and raisins), grains (wheat and rye), nuts (peanuts and pecans), and vegetables (potatoes and legumes (beans and peas)) in levels that range from 0.3 to 3.9 ppm. It is not likely that the approval of this petition

would significantly increase exposure over that of the existing levels of copper.

2. *Dietary exposure from drinking water.* Copper is a natural element found in the earth's crust. As a result, most of the world's surface water and ground water that is used for drinking purposes contains copper. The actual amount varies from region to region, depending on how much is present in the earth, but in almost all cases the amount of copper in water is extremely low. Naturally occurring copper in drinking water is safe for human consumption, even in rare instances where it is at levels high enough to impart a metallic taste to the water. Residues of copper in drinking water are regulated under the Safe Drinking Water Act. A Maximum Contaminant Level Goal of 1.3 ppm has been set by the Agency for copper. According to the National Research Council's Committee on Copper in Drinking Water, this level is "set at a concentration at which no known or expected adverse health effects occur and for which there is an adequate margin of safety." The Agency believes that this level of protection would not cause any potential health problems, i.e., stomach and intestinal distress, liver and kidney damage, and anemia. It is not likely that the approval of this petition would significantly increase exposure over that of the existing levels of copper.

3. *From non-dietary exposure.* The term "residential exposure" is used in this document to refer to non-occupational, non-dietary exposure (e.g., carpets; hard surface disinfection on walls, floors, and tables; swimming pools; and textiles (clothing and diapers)).

Residential (oral, dermal, and inhalation) exposure to copper sulfate pentahydrate from its use as an inert ingredient in food-contact surface sanitizing solutions for public eating places, dairy processing equipment, and food-processing equipment and utensils is possible. However, since there are no toxicological effects of concern identified in the available database, it is not necessary to conduct a quantitative assessment of residential (non-occupational) exposures.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity." EPA has not found copper sulfate pentahydrate to share a common mechanism of toxicity with any other substances, and copper sulfate pentahydrate does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that copper sulfate pentahydrate does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's Web site at *http://www.epa.gov/pesticides/cumulative.*

D. Safety Factor for Infants and Children

FFDCA, as amended by the Food Quality Protection Act (FQPA), directs the Agency to use an additional 10X safety factor (SF), to account for potential pre- and postnatal toxicity and completeness of the data with respect to exposure and toxicity to infants and children. FQPA authorizes the Agency to modify the 10X FQPA SF only if reliable data demonstrate that the resulting level of exposure would be safe for infants and children. Since copper is an essential trace element, with copper deficiency more common in humans than toxicity from the excess, a quantitative assessment using safety factors was not conducted for potential human health exposure to copper sulfate pentahydrate. For the same reason the 10X FQPA SF was not retained.

E. Aggregate Risks and Determination of Safety

Taking into consideration the information discussed on copper sulfate pentahydrate, EPA has determined that there is a reasonable certainty that no harm to any population subgroup, including infants and children, will result from aggregate exposure to copper sulfate pentahydrate under reasonable foreseeable circumstances. Therefore, the establishment of an exemption from tolerance under 40 CFR 180.940(a) for residues of copper sulfate pentahydrate when used as an inert ingredient in pesticide formulations applied to food-contact surfaces in public eating places, dairy-processing equipment, and food-processing equipment and utensils at a limit of 80 ppm is safe under FFDCA section 408.

V. Other Considerations

A. Analytical Enforcement Methodology

An analytical method is not required for enforcement purposes since the Agency is not establishing a numerical tolerance for residues of copper sulfate pentahydrate in or on any food commodities. EPA is establishing a limitation on the amount of copper sulfate pentahydrate that may be used in pesticide formulations.

The limitation is enforced through the pesticide registration process under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136 *et seq.*). EPA will not register any pesticide for sale or distribution that contains greater than 80 ppm of copper sulfate pentahydrate in the pesticide formulation.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nation Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level. The Codex has not established a MRL for copper sulfate pentahydrate.

VI. Conclusions

Therefore, an exemption from the requirement of a tolerance is established under 40 CFR 180.940(a) for copper sulfate pentahydrate (CAS Reg. No. 7758–99–8) when used in antimicrobial pesticide formulations applied to all food contact surfaces in public eating places, dairy-processing equipment, and food-processing equipment and utensils at a maximum level in the end use concentration of 80 ppm.

VII. Statutory and Executive Order Reviews

This final rule establishes a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this final rule has been exempted from review under Executive Order 12866, this final rule is

not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This final rule directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this final rule. In addition, this final rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note).

VIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 20, 2013.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.940, alphabetically add the following inert ingredient to the table in paragraph (a) to read as follows:

§ 180.940 Tolerance exemptions for active and inert ingredients for use in antimicrobial formulations (Food-contact surface sanitizing solutions).

* * * * *

40 CFR Part 180

[EPA–HQ–OPP–2012–0420; FRL–9903–92]

Indoxacarb; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of indoxacarb in or on multiple commodities and removes previously established commodities that will be superseded by tolerances established in this action, which are identified and discussed later in this document. Interregional Research Project Number 4 (IR–4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective December 27, 2013. Objections and requests for hearings must be received on or before February 25, 2014, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2012–0420, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), EPA West Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Lois Rossi, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2012–0420 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before February 25, 2014. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2012–0420, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of July 25, 2012 (77 FR 43562) (FRL–9353–6), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 2E8029) by IR–4, 500 College Rd. East, Suite 201 W., Princeton, NJ 08540. The petition requested that 40 CFR 180.564 be amended by establishing tolerances for residues of the insecticide indoxacarb, (S)-methyl 7-chloro-2,5-dihydro-2-[[(methoxycarbonyl)[4-(trifluoromethoxy)phenyl] amino]carbonyl]indeno[1,2-e][1,3,4][oxadiazine-4a(3*H*)-carboxylate, and its R-enantiomer, (R)-methyl 7-chloro-2,5-dihydro-2-[[(methoxycarbonyl)[4-(trifluoromethoxy)phenyl] amino]carbonyl]indeno[1,2-e][1,3,4][oxadiazine-4a(3*H*)-carboxylate, in or on bean, dry, seed at 0.07 parts per million (ppm); bean, forage at 37 ppm; bean, succulent at 0.64 ppm; berry, low growing, except strawberry, subgroup 13–07H at 0.9 ppm; small fruit, vine climbing, except fuzzy kiwifruit, subgroup 13–07F at 2.0 ppm. The petition additionally requested to remove established tolerances of indoxacarb in or on grape at 2.0 ppm and cranberry at 0.90 ppm, upon approval of the updated crop groups or subgroups. That document referenced a summary of the petition prepared on behalf of IR–4 by DuPont Crop Protection, the registrant, which is available in the docket, *http://www.regulations.gov.* There were no comments received in response to the notice of filing.

Based upon review of the data supporting the petition, EPA has revised several proposed tolerances, has corrected the commodity terminology for bean forage to cowpea forage, and has determined that a tolerance should be established on cowpea hay. The reasons for these changes are explained in Unit IV.C.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue* * *."

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for indoxacarb including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with indoxacarb follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

Indoxacarb products are frequently formulated as a mixture of the insecticidally active S-enantiomer (DPX–KN128) and the insecticidally inactive R-enantiomer (DPX–MP062). DPX–MP062 is an formula mixture containing the indoxacarb S-enantiomer and its R-enantiomer at approximately a 75:25 ratio. DPX–JW062 is the racemic mixture of the enantiomers at a 50:50 ratio. EPA has determined that it is appropriate to use data from DPX–

JW062 (50:50) to satisfy the requirements for dietary subchronic, chronic, oncogenicity and reproductive studies and that toxicology data using DPX–JW062 and DPX–MP062 may be bridged to DPX–KN128 formulations.

The toxicity profile for KN128, MP062, and JW062 in rats, mice, and dogs with both subchronic and chronic oral exposures were qualitatively similar. Dermal subchronic exposure in the rat also resulted in a similar profile. Signs of toxicity occurred at similar doses and with a similar magnitude of response (females generally being more sensitive than males), and included decreases in body weight, weight gain, food consumption, and food efficiency. These compounds also affected the hematopoietic system by decreasing the red blood cell count, hemoglobin, and hematocrit in rats, dogs, and mice. Exposure to indoxacarb was frequently accompanied by an increase in reticulocytes in all three species and an increase in Heinz bodies in dogs and mice only. These signs of toxicity did not appear to increase in severity over time.

Neurotoxicity was observed in rats and mice, and was characterized by one or more of the following symptoms in both male and female rats and mice: Weakness, head tilting, and abnormal gait or mobility with inability to stand or ataxia. There was possible evidence of lung damage in the acute inhalation studies with both MP062 and JW062.

The immunotoxicity study in mice did not indicate toxicity to the immune system at the highest dose tested. In the 28-day inhalation study in rats, increased spleen weights, pigmentation, and hematopoiesis in the spleen, and hematological changes were observed at the highest dose tested. Increased spleen weights were also observed in the 28-day dermal rat study. The increase in spleen weights are not considered immunological in origin but can be considered a result of the hemolytic effects, which is the mode of action of indoxacarb.

There was no evidence of carcinogenicity in either the rat or mouse in acceptable studies (JW062). JW062 was not mutagenic in a complete battery of mutagenicity studies. There was also no evidence of mutagenicity with either KN128 or MP062. Therefore, all formulations (KN128, MP062, and JW062) were classified as not likely to be carcinogenic in humans by all relevant routes of exposure.

Specific information on the studies received and the nature of the adverse effects caused by indoxacarb as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at *http://www.regulations.gov* in document: "Indoxacarb. Human Health Risk Assessment for the Proposed New Use on Dry Beans, Succulent Beans, Small Fruit Vine Climbing Subgroup (except kiwifruit) 13–07F and Low Growing Berry Subgroup (except strawberry) 13–07H" at pp. 50–55 in docket ID number EPA–HQ–OPP–2012–0420.

B. Toxicological Points of Departure/Levels of Concern

Once a pesticide's toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see *http://www.epa.gov/pesticides/factsheets/riskassess.htm*.

A summary of the toxicological endpoints for indoxacarb used for human risk assessment is shown in Table 1 of this unit.

TABLE 1—SUMMARY OF TOXICOLOGICAL DOSES AND ENDPOINTS FOR INDOXACARB FOR USE IN HUMAN HEALTH RISK ASSESSMENT

Exposure/scenario	Point of departure and uncertainty/safety factors	RfD, PAD, LOC for risk assessment	Study and toxicological effects
Acute dietary (General population including infants and children and females 13–49 years old).	NOAEL = 12 mg/kg/day UF_A = 10x. UF_H = 10x FQPA SF = 1x	Acute RfD = 0.12 mg/kg/day. aPAD = 0.12 mg/kg/day	Acute oral rat neurotoxicity study. LOAEL = 50 mg/kg based on decreased body weight and body-weight gain in females (MP062).*
Chronic dietary (All populations)	NOAEL= 2.0 mg/kg/day. UF_A = 10x UF_H = 10x FQPA SF = 1x	Chronic RfD = 0.02 mg/kg/day. cPAD = 0.02 mg/kg/day	Weight of evidence approach was used from four studies: 1. Subchronic toxicity study—rat (MP062). 2. Subchronic neurotoxicity study—rat (MP062). 3. Chronic/carcinogenicity study—rat (JW062). 4. 2-generation rat reproduction study (JW062). LOAEL = 3.3 mg/kg/day based on decreased body weight, body-weight gain, food consumption, and food efficiency; decreased hematocrit, hemoglobin, and red blood cells only at 6 months.

TABLE 1—SUMMARY OF TOXICOLOGICAL DOSES AND ENDPOINTS FOR INDOXACARB FOR USE IN HUMAN HEALTH RISK ASSESSMENT—Continued

Exposure/scenario	Point of departure and uncertainty/safety factors	RfD, PAD, LOC for risk assessment	Study and toxicological effects
Incidental oral short-term (1 to 30 days), intermediate-term (1 to 6 months), and long-term (> 6 months).	NOAEL= 2.0 mg/kg/day. UF_A = 10x UF_H = 10x FQPA SF = 1x	LOC for MOE = 100	Weight of evidence approach was used from four studies: 1. Subchronic toxicity study—rat (MP062). 2. Subchronic neurotoxicity study—rat (MP062). 3. Chronic/carcinogenicity study—rat (JW062). 4. Two generation rat reproduction study (JW062). LOAEL = 3.3 mg/kg/day based on decreased body weight, body-weight gain, food consumption, and food efficiency; decreased hematocrit, hemoglobin and red blood cells only at 6 months.
Inhalation short-term (1 to 30 days).	Inhalation study NOAEL= 6 mg/kg/day. UF_A = 10x UF_H = 10x FQPA SF = 1x	LOC for MOE = 100	28-day rat inhalation toxicity study (MP062). The LOAEL of 75.69 mg/kg/day is based on increased spleen weights, pigmentation, and hematopoiesis in the spleen, hematological changes and mortality (females).
Cancer (Oral, dermal, inhalation).	"Not likely" to be carcinogenic to humans since no evidence of carcinogenicity in either the rat or mouse studies, and no evidence of mutagenicity.		

FQPA SF = Food Quality Protection Act Safety Factor. LOAEL = lowest-observed-adverse-effect-level. LOC = level of concern. mg/kg/day = milligram/kilogram/day. MOE = margin of exposure. NOAEL = no-observed-adverse-effect-level. PAD = population adjusted dose (a = acute, c = chronic). RfD = reference dose. UF = uncertainty factor. UF_H = potential variation in sensitivity among members of the human population (intraspecies).

*The LOAEL of 50 mg/kg was based on a 7% body weight decrease in females only on day 8. No significant differences were noted for days 1, 2, or 15. Currently, a 10% decrease in adult body weight is the threshold for an adverse effect, thus this study NOAEL is considered to be conservative.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to indoxacarb, EPA considered exposure under the petitioned-for tolerances as well as all existing indoxacarb tolerances in 40 CFR 180.564. EPA assessed dietary exposures from indoxacarb in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure. Such effects were identified for indoxacarb. In estimating acute dietary exposure, EPA utilized Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM-FCID) Version 3.16, which uses food consumption data from the U.S. Department of Agriculture's National Health and Nutrition Examination Survey, What We Eat in America, (NHANES/WWEIA) from 2003 to 2008. Anticipated residues (ARs) for most registered and proposed food commodities were based on field trial data, and in some crops tolerance-level residues were used. Residue estimates for some current uses were further refined using percent crop treated (PCT) data, and 100 PCT estimates were assumed for the remaining uses.

Available processing data for indoxacarb were used to refine ARs for apples/pears (juice), cotton (oil), grapes (raisin and juice), peanut (oil), potato (dry, chips), prunes (dried), mint (oil), soybean (oil), and tomato (paste and puree), and other commodities where translation was applicable. DEEM-FCID™ (ver. 7.81) default processing factors were assumed for all other processed commodities.

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment, EPA used the same assumptions as described in Unit III.C.1.i.

iii. *Cancer.* Based on the data summarized in Unit III.A., EPA has concluded that indoxacarb does not pose a cancer risk to humans. Therefore, a dietary exposure assessment for the purpose of assessing cancer risk is unnecessary.

iv. *Anticipated residue and PCT information.*

Section 408(b)(2)(E) of FFDCA authorizes EPA to use available data and information on the anticipated residue levels of pesticide residues in food and the actual levels of pesticide residues that have been measured in food. If EPA relies on such information, EPA must require pursuant to FFDCA section 408(f)(1) that data be provided 5 years after the tolerance is established, modified, or left in effect, demonstrating that the levels in food are not above the levels anticipated. For the present action, EPA will issue such data call-ins as are required by FFDCA section 408(b)(2)(E) and authorized under FFDCA section 408(f)(1). Data will be required to be submitted no later than 5 years from the date of issuance of these tolerances.

Section 408(b)(2)(F) of FFDCA states that the Agency may use data on the actual percent of food treated for assessing chronic dietary risk only if:

- Condition a: The data used are reliable and provide a valid basis to show what percentage of the food derived from such crop is likely to contain the pesticide residue.
- Condition b: The exposure estimate does not underestimate exposure for any significant subpopulation group.
- Condition c: Data are available on pesticide use and food consumption in a particular area, the exposure estimate does not understate exposure for the population in such area.

In addition, the Agency must provide for periodic evaluation of any estimates used. To provide for the periodic evaluation of the estimate of PCT as required by FFDCA section 408(b)(2)(F), EPA may require registrants to submit data on PCT.

The Agency estimated the PCT for existing uses as follows for the acute dietary assessment: Apples, 10%; broccoli, 70%; cabbage, 35%; cauliflower, 60%; cherries, 2.5%;

lettuce, 40%; peaches, 2.5%; peanuts, 10%; pears, 2.5%; potatoes, 2.5%; soybeans, 2.5%; spinach, 5%; sweet corn, 10%; and tomatoes, 40%.

The Agency estimated the PCT for existing uses as follows for the chronic dietary risk assessment: Apples, 5%; broccoli, 50%; cabbage, 25%; cauliflower, 40%; celery, 5%; cherries, 1%; grapes, 1%; lettuce, 10%; peaches, 2.5%; peanuts, 2.5%; pears, 1%; potatoes, 1%; soybeans, 1%; spinach, 2.5%; sweet corn, 2.5%; and tomatoes, 20%.

In most cases, EPA uses available data from United States Department of Agriculture/National Agricultural Statistics Service (USDA/NASS), proprietary market surveys, and the National Pesticide Use Database for the chemical/crop combination for the most recent 6–7 years. EPA uses an average PCT for chronic dietary risk analysis. The average PCT figure for each existing use is derived by combining available public and private market survey data for that use, averaging across all observations, and rounding to the nearest 5%, except for those situations in which the average PCT is less than one. In those cases, 1% is used as the average PCT and 2.5% is used as the maximum PCT. In cases where the average PCT is less than 2.5, 2.5% is used as the average PCT. Similarly, in cases where the maximum PCT is less than 2.5, 2.5% is used as the maximum PCT. EPA uses a maximum PCT for acute dietary risk analysis. The maximum PCT figure is the highest observed maximum value reported within the recent 6 years of available public and private market survey data for the existing use and rounded up to the nearest multiple of 5%.

The Agency believes that the three conditions discussed in Unit III.C.1.iv. have been met. With respect to Condition a, PCT estimates are derived from Federal and private market survey data, which are reliable and have a valid basis. The Agency is reasonably certain that the percentage of the food treated is not likely to be an underestimation. As to Conditions b and c, regional consumption information and consumption information for significant subpopulations is taken into account through EPA's computer-based model for evaluating the exposure of significant subpopulations including several regional groups. Use of this consumption information in EPA's risk assessment process ensures that EPA's exposure estimate does not understate exposure for any significant subpopulation group and allows the Agency to be reasonably certain that no regional population is exposed to residue levels higher than those estimated by the Agency. Other than the data available through national food consumption surveys, EPA does not have available reliable information on the regional consumption of food to which indoxacarb may be applied in a particular area.

2. *Dietary exposure from drinking water.* A Total Toxic Residue (TTR) approach was used for the parent indoxacarb and the degradation products with toxicological concern (IN–JT333, IN–KG4333, IN–KT413, IN–ML437–0H) for the drinking water assessment. Therefore, the Agency used screening level water exposure models in the dietary exposure analysis and risk assessment for indoxacarb and its metabolites in drinking water. These simulation models take into account data on the physical, chemical, and fate/transport characteristics of indoxacarb. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at *http://www.epa.gov/oppefed1/models/water/index.htm.*

Based on the Provisional Cranberry Model and Screening Concentration in Ground Water (SCI–GROW) models, the estimated drinking water concentrations (EDWCs) of indoxacarb and its metabolites for surface water are expected to be 59.26 parts per billion (ppb) for acute exposures and 18.48 for chronic exposures. For ground water, the EDWC is estimated to be 0.33 ppb for acute and chronic exposures.

Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model. The water concentration values of 59.26 ppb and 18.48 ppb were used to assess the contribution to drinking water for the acute and chronic dietary risk assessments, respectively.

3. *From non-dietary exposure.* The term "residential exposure" is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets). Indoxacarb is currently registered for several uses that could result in residential exposures:

- Ready-to-use (RTU) bait stations.
- Spot-on applications of gels (crack and crevices and indoor spot directed treatments) for household insect control (indoor treatments).
- Spot-on treatments for the control of fleas and ticks on dogs and cats.
- Broadcast, perimeter and ant mound treatment on ornamentals, trees, and lawns/turf, utilizing granular and liquid formulations (outdoor treatments).
- Indoor spray applications with granular and liquid formulations for insect control on households/domestic dwellings (crack and crevice and spot directed treatments).

Adult handlers were assessed for potential short-term inhalation toxicity from mixing/loading/applying the following:

- Granular formulation for insect control on lawns/turf.
- Liquid flowable formulation for insect control on lawns/turf.
- Water-soluble packaging formulation for indoor spray applications with manually pressurized hand wand (crack and crevice and spot directed treatments) for insect control in households/domestic dwellings.
- Liquid flowable formulation for indoor spray applications with manually pressurized hand wand (crack and crevice and spot directed treatments) for insect control on households/domestic dwellings.

Residential handler exposure is expected to be short-term in duration only, as intermediate-term exposures are not likely because of the intermittent nature of applications by homeowners.

Potential postapplication exposures to indoxacarb were considered for adults and children (1–<2 years old), based on the following scenarios:

- Treated pets (dogs and cats) to children from short-, intermediate-, and long-term incidental oral exposures.
- Physical activities on turf to children from short-term incidental oral exposures.
- Crack and crevice and indoor spot-directed spray applications, including short-term inhalation exposures to adults and both short-term inhalation and short-term incidental oral exposures to children.

Since there is no expectation of non-dietary oral exposures to adults from contact with treated pets, that aggregate risk is not quantified.

Since inhalation and incidental oral exposure routes share a common toxicological endpoint (i.e., hematological changes), risk estimates have been combined for those routes. Therefore, the postapplication exposure scenarios that were combined for children 1 < 2 years old are the inhalation and hand-to-mouth (the highest incidental oral exposure assessment) for the indoor surfaces directed spray applications. This combination is considered protective of children's exposure to indoxacarb from residential uses.

Because of the preventative nature of pet products and the potential for extended use in more temperate parts of the country, the residential

postapplication exposures to treated pets may be short-, intermediate-, or long-term in duration. Postapplication incidental oral exposures from treated golf courses were not quantified since youth old enough to play golf are not expected to exhibit significant hand-to-mouth behavior. Furthermore, the residential lawn assessment provides the highest estimate of potential exposure from turf applications and is protective of any exposures to children from indoxacarb turf treatment scenarios. Finally, the residential handler and postapplication assessments consider inhalation and/or oral exposures only, since a dermal toxicity endpoint has not been identified for indoxacarb.

Further information regarding EPA standard assumptions and generic inputs for residential exposures may be found at *http://www.epa.gov/pesticides/trac/science/trac6a05.pdf.*

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity."

EPA has not found indoxacarb, an oxadiazine class insecticide, to share a common mechanism of toxicity with any other substances, and indoxacarb does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that indoxacarb does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's Web site at *http://www.epa.gov/pesticides/cumulative.*

D. Safety Factor for Infants and Children

1. *In general.* Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the Food Quality Protection Act Safety Factor (FQPA SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor.

2. *Prenatal and postnatal sensitivity.* There was no quantitative or qualitative evidence of increased prenatal or postnatal sensitivity in the two developmental toxicity studies in rats with DPX–JW062, one developmental toxicity study in rats with DPX–MP062 and DPX–KN128, one developmental toxicity study in rabbits with DPX–JW062, one 2-generation reproduction studies in rats with DPX–JW062, and the developmental neurotoxicity (DNT) study in rats with DPX–KN128. In these studies, developmental toxicity was observed only in the presence of maternal toxicity.

3. *Conclusion.* EPA has determined that reliable data show the safety of infants and children would be adequately protected if the FQPA SF were reduced to 1x. That decision is based on the following findings:

i. The toxicity database for indoxacarb is complete.

ii. EPA has determined that an additional uncertainty factor is not needed to account for neurotoxicity. Neurotoxicity was seen in animal studies in rats and mice, but at higher doses than the hematologic effects on which EPA's risk assessments are based. To evaluate the potential for increased sensitivity of infants and children to neurotoxic effects, EPA required a rat developmental neurotoxicity (DNT) study. There was no evidence of increased sensitivity of offspring in the submitted study. Clinical observations, motor activity, acoustic startle habituation, and learning and memory testing were all comparable between the control and treated groups. Mean brain weight, gross and microscopic examinations, and morphometric measurements of the brain were also comparable between the controls and treated groups.

iii. There is no evidence that indoxacarb results in increased susceptibility in *in utero* rats or rabbits in the prenatal developmental studies or in young rats in the 2-generation reproduction study.

iv. There are no residual uncertainties identified in the exposure databases. The acute and chronic dietary food exposure assessments utilized anticipated residues that are based on reliable field trial, as well as PCT data. For the new uses, a conservative estimate of 100 PCT is assumed. EPA made conservative (protective) assumptions in the ground and surface water modeling used to assess exposure to indoxacarb in drinking water. EPA used similarly conservative assumptions to assess postapplication exposure of children as well as incidental oral exposure of toddlers. These assessments will not underestimate the exposure and risks posed by indoxacarb.

E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute risk.* An acute aggregate risk assessment takes into account acute exposure estimates from dietary consumption of food and drinking water. Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to indoxacarb will occupy 49% of the aPAD for all infants less than 1 year old, the population group receiving the greatest exposure.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to indoxacarb from food and water will utilize 12% of the cPAD for children 1–2 years old, the population group receiving the greatest exposure. Long-term (chronic) aggregate risk for indoxacarb also includes the contribution from dietary (food and drinking water) exposure plus the long-term postapplication exposure to treated pets. EPA has concluded the combined long-term food, water, and residential exposures result in an aggregate MOE of 420 for children 1-<2 years old. Because EPA's level of concern for indoxacarb is a MOE of 100 or below, this MOE is not of concern.

3. *Short-term risk.* Short-term aggregate exposure takes into account short-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Indoxacarb is currently registered for uses that could result in short-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with short-term residential exposures to indoxacarb.

Using the exposure assumptions described in this unit for short-term

exposures, EPA has concluded the aggregate short-term exposure (food, water, and residential exposures) result in the lowest aggregate MOEs of 110 for children 1-<2 years old (resulting from the postapplication crack and crevice and spot directed treatment indoor spray) and 1,600 for adults (resulting from the handler turf use). Because EPA's level of concern for indoxacarb is a MOE of 100 or below, these MOEs are not of concern.

4. *Intermediate-term risk.* Intermediate-term aggregate exposure takes into account intermediate-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Indoxacarb is currently registered for uses that could result in intermediate-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with intermediate-term residential exposures to indoxacarb.

Using the exposure assumptions described in this unit for intermediate-term exposures, EPA has concluded that the combined intermediate-term food, water, and residential exposures (from pet treatments) result in an aggregate MOE of 420 for children 1-<2 years old Because EPA's level of concern for indoxacarb is a MOE of 100 or below, this MOE is not of concern.

5. *Aggregate cancer risk for U.S. population.* Based on the lack of evidence of carcinogenicity in two adequate rodent carcinogenicity studies, indoxacarb is not expected to pose a cancer risk to humans.

6. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to indoxacarb residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (high-performance liquid chromatography (HPLC)/column switching/ultraviolet (UV) method AMR 2712–93 with confirmation/specificity provided by gas chromatography (GC)/mass-selective detector method AMR 3493–95, Supplement No. 4) is available to enforce the tolerance expression.

The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; email address: *residuemethods@epa.gov.*

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has established MRLs for indoxacarb in or on cranberries at 1 ppm, dry chickpea at 0.2 ppm, dry cowpea at 0.1 ppm, dry mung bean at 0.2 ppm, and grapes at 2 ppm, based on measurement of indoxacarb and its R-enantiomer. U.S. tolerances for subgroup 13–07F (represented by grape) at 2 ppm and subgroup 13–07H (represented by cranberry) at 1 ppm are harmonized with the corresponding Codex MRLs. Additionally, the U.S. tolerance level for dry bean is being established at 0.2 ppm, in order to harmonize with the Codex MRLs for dry chickpea and dry mung bean. The Codex has not established MRLs for the other commodities associated with this action.

C. Revisions to Petitioned-For Tolerances

Based on the data submitted with the petition, EPA revised the proposed tolerances for several commodities, as follows: Succulent bean from 0.64 ppm to 0.9 ppm; and low growing berry, except strawberry, subgroup 13–07H from 0.9 ppm to 1 ppm. EPA also determined that the proposed tolerance in or on bean forage at 37 ppm should be revised to 50 ppm, and the Agency determined that the commodity should be listed as cowpea forage because the cowpea forage and hay are the only significant feedstuffs associated with dry beans. Because of that reason, EPA also determined that a tolerance is necessary for cowpea hay at 100 ppm. Finally, EPA revised the tolerance on bean, dry, seed from 0.07 ppm to 0.2 ppm in order to harmonize with Codex MRLs. The Agency revised these tolerance levels based on analysis of the residue field trial data using the Organization of Economic Cooperation and Development (OECD) tolerance calculation procedures.

V. Conclusion

Therefore, tolerances are established for residues of indoxacarb, (S)-methyl 7-chloro-2,5-dihydro-2-[[(methoxycarbonyl)[4-(trifluoromethoxy)phenyl] amino]carbonyl]indeno[1,2-e][1,3,4][oxadiazine-4a(3H)-carboxylate, and its R-enantiomer, (R)-methyl 7-chloro-2,5-dihydro-2-[[(methoxycarbonyl)[4-(trifluoromethoxy)phenyl] amino]carbonyl]indeno[1,2-e][1,3,4][oxadiazine-4a(3*H*)-carboxylate, in or on bean, dry seed at 0.2 ppm; bean, succulent at 0.9 ppm; cowpea, forage at 50 ppm; cowpea, hay at 100 ppm; berry, low growing, except strawberry, subgroup 13–07H at 1 ppm; and fruit, small vine climbing, except fuzzy kiwifruit, subgroup 13–07F at 2 ppm. This regulation additionally removes the established tolerances in or on cranberry at 0.90 ppm and grape at 2.0 ppm.

VI. Statutory and Executive Order Reviews

This final rule establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this final rule has been exempted from review under Executive Order 12866, this final rule is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule,

the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This final rule directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this final rule. In addition, this final rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 16, 2013.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.564:

■ a. Remove the commodities "Cranberry" and "Grape" in the table in paragraph (a)(1).

■ b. Add alphabetically the following commodities to the table in paragraph (a)(1). The amendments read as follows:

§ 180.564 Indoxacarb; tolerances for residues.

(a) * * *

(1) * * *

Commodity	Parts per million
* * * * *	
Bean, dry, seed	0.2
Bean, succulent	0.9
* * * * *	
Berry, low growing, except strawberry, subgroup 13–07H	1
* * * * *	
Cowpea, forage	50
Cowpea, hay	100
* * * * *	
Fruit, small vine climbing, except fuzzy kiwifruit, subgroup 13–07F	2
* * * * *	

* * * * *

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2013–0071; FRL–9904–04]

Pendimethalin; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation amends the current tolerance for combined residues of pendimethalin and its metabolite, expressed as pendimethalin equivalents in or on almond, hulls. BASF Corporation, 26 Davis Drive, Research Triangle Park, NC 27709 requested this tolerance under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective December 27, 2013. Objections and requests for hearings must be received on or before February 25, 2014, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2013–0071, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), EPA West Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Lois Rossi, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How Can I Get Electronic Access to Other Related Information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2013–0071 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before February 25, 2014. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2013–0071, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of February 27, 2013 (78 FR 13295) (FRL–9380–2), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 2F8133) by BASF Corporation, 26 Davis Drive, Research Triangle Park, NC 27709. The petition requested that 40 CFR 180.361 be amended by establishing a tolerance for the combined residues of the herbicide pendimethalin, *N*-(1-ethylpropyl)-3,4-dimethyl-2,6- dinitrobenzenamine, and its 3,5-dinitrobenzyl alcohol metabolite (CL202347), in or on almond, hulls at 6.0 parts per million (ppm). That document referenced a summary of the petition prepared by BASF Corporation, the registrant, which is available in the docket, *http://www.regulations.gov.* There were no comments received in response to the notice of filing.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue . . .."

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for pendimethalin - including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with pendimethalin follows.

The toxicity database for pendimethalin is complete. On August 29, 2012, the Agency published a final rule (77 FR 52240) (FRL–9360–5) establishing tolerances for combined residues of pendimethalin and its metabolite in or on various commodities. In the risk assessment supporting that action, EPA assessed the toxicity of pendimethalin. Since that assessment, EPA's hazard characterization of pendimethalin has not changed, and no additional data were needed to assess an increase in the tolerance of pendimethalin on almond hulls (see "Pendimethalin: Human Health Risk Assessment to Support an Amended Use on Almonds"; in docket ID number EPA–HQ–OPP–2013–0071).

In the 2012 assessment, EPA assessed the dietary risk from residues of pendimethalin on almond hulls, which are an animal feed item. Based on that assessment, EPA concluded that there is no reasonable expectation of finite residues in meat, milk, poultry, and eggs. Because EPA expects residues of pendimethalin on almond hulls to be higher under this revised tolerance, EPA recalculated the ruminant reasonable dietary burden with the new tolerance levels for almond hulls and concluded that there would be no increase in the ruminant dietary burden. Furthermore, the increase in tolerance on almond hulls will not impact the residential exposure and risk assessments that the Agency conducted in 2012. As there is no change to the residential and dietary risk assessments, a new aggregated risk assessment was not needed.

Therefore, based on the findings of the 2013 risk assessment and the 2012 final rule and risk assessment, the Agency concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to pendimethalin residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

PAM Volume II lists four Gas Chromatography/Electron Capture Detector (GC/ECD), methods for the determination of pendimethalin and its 3,5-dinitrobenzyl alcohol metabolite in plant commodities. Methods I and III determine residues of the parent, whereas Methods II and IV determine residues of the 3,5-dinitrobenzyl alcohol metabolite.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is

different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established a MRL for almond hulls for pendimethalin.

C. Revisions to Petitioned-For Tolerances

Although the petitioner requested that EPA establish a new tolerance for residues of pendimethalin on almond hulls, there is already a tolerance for almond hulls at 0.4 ppm. Therefore, EPA is simply revising that existing tolerance, rather than establishing a new tolerance.

V. Conclusion

Therefore, 40 CFR 180.361 is amended by revising the established tolerance for the combined residues of the herbicide pendimethalin and its metabolite, in or on almond, hulls from 0.4 ppm to 6.0 ppm.

VI. Statutory and Executive Order Reviews

This final rule modifies a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this final rule has been exempted from review under Executive Order 12866, this final rule is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This final rule directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this final rule. In addition, this final rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 16, 2013.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.361, in the table in paragraph (a), revise the tolerance level for "Almond, hulls" to read as follows:

§ 180.361 Pendimethalin; tolerances for residues.(a) * * *

Commodity	Parts per million
* * * * *	
Almond, hulls	6.0
* * * * *	

* * * * *

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2012–0509; FRL–9903–53]

Isopyrazam; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of isopyrazam in or on apple and peanut for which there are no accompanying United States registrations. Syngenta Crop Protection, Inc., requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective December 27, 2013. Objections and requests for hearings must be received on or before February 25, 2014, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2012–0509, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), EPA West Bldg., Rm. 3334, 1301 Constitution Ave., NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Lois Rossi, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.* To access the OCSPP test guidelines referenced in this document electronically, please go to *http://www.epa.gov/ocspp* and select "Test Methods and Guidelines."

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2012–0509 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before February 25, 2014. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2012–0509, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of September 28, 2012 (77 FR 59578) (FRL–9364–6), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 2E8039) by Syngenta Crop Protection, Inc., 410 Swing Rd., P.O. Box 18300, Greensboro, NC 27419–8300. The petition requested that 40 CFR 180.654 be amended by establishing tolerances for residues of the fungicide isopyrazam, in or on apple at 0.6 parts per million (ppm) and peanut at 0.01 ppm. That document referenced a summary of the petition prepared by Syngenta Crop Protection, Inc., the registrant, which is available in the docket, *http://www.regulations.gov.* Comments were received on the notice of filing. EPA's response to these comments is discussed in Unit IV.C.

Based upon review of the data supporting the petition EPA has proposed a higher tolerance level for apple. The reason for this change is explained in Unit IV.D.

There are no registered food uses for isopyrazam in the United States. These tolerances were requested in connection with use of isopyrazam on apples and peanuts grown outside the United States. These tolerances will allow apples and peanuts containing isopyrazam residues to be imported into the United States.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . ."

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for isopyrazam including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with isopyrazam follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

Subchronic and chronic oral toxicity studies in the rat, mouse, and dog demonstrate that the primary target organ for isopyrazam is the liver (increased organ weight and centrilobular hepatocyte hypertrophy). Liver toxicity is usually accompanied by reductions in bodyweight and food consumption.

Isopyrazam did not cause reproductive toxicity. Effects seen in the offspring (bodyweight gain during lactation and increase liver weight at weaning) in the rat reproduction study

occurred at the same doses that cause general toxicity in the parents. Developmental effects described as small eyes and/or microphthalmia were observed in both the Himalayan and New Zealand rabbit strains. However, in the Himalayan strain, the intraocular abnormalities occur in the absence of maternal toxicity while in the New Zealand the ocular abnormalities occurred at doses that were maternally toxic. Developmental effects observed in the rat (increased post-implantation loss, reduced fetal weight and a slight retardation of ossification) occurred at doses that also produced maternal toxicity (mortality, decreased body weights, body weight gains, and food consumption).

No evidence of specific neurotoxicity was seen in acute and subchronic oral neurotoxicity studies in rats. Clinical signs seen in two subchronic dog studies (side-to-side head wobble, ataxia, reduced stability) are consistent with neurotoxic effects. However detailed and specific neuropathological analyses were not conducted for the dog studies (i.e., functional observational battery, motor activity, detailed histopathology with special stains). Consequently, there is uncertainty regarding whether the effects seen in the dog studies are in fact signs of neurotoxicity. However, clear no observed adverse effect levels (NOAELs)/lowest adverse effect levels (LOAELs) were established for both subchronic dog studies. The point of departure selected for the acute dietary assessment is based on clinical signs seen on day 2 in one of four males in the subchronic dog study. This study provides the lowest NOAEL in the database (most sensitive endpoint) for a single dose effect. The dose used for the chronic dietary risk assessment is eight times lower than the dose at which clinical effects were seen at four weeks in the second subchronic dog study.

There is no evidence of immunotoxicity based on a 28-day dietary immunotoxicity study in rats. The LOAEL for immunotoxicity was not identified and the NOAEL for immunotoxicity was 1,356 milligrams/kilograms (mg/kg).

Isopyrazam is classified as "Likely to be Carcinogenic to Humans" based on increased incidence of uterine endometrial adenocarcinomas and liver hepatocellular adenomas in female rats and increased incidence of thyroid follicular cell adenomas and/or carcinomas in male rats. Isopyrazam is not carcinogenic in the mouse. There is no evidence of genotoxicity, mutagenicity, or clastogenicity in the *in vivo* and *in vitro* studies. There are no structural relationships with other known carcinogens. A linear low-dose approach (Q_1*) was used to extrapolate experimental animal tumor data for the quantification of human cancer risk.

Isopyrazam is of low acute toxicity by the oral, dermal, and inhalation routes and is not a skin or eye irritant.

Specific information on the studies received and the nature of the adverse effects caused by isopyrazam as well as the NOAEL and the LOAEL from the toxicity studies can be found at *http://www.regulations.gov* in the document "Human Health Risk Assessment for the Establishment of Tolerances with No U.S. Registrations for Isopyrazam in/on Imported Apple and Peanut" at pp. 14–18 in docket ID number EPA–HQ–OPP–2012–0509.

B. Toxicological Points of Departure/Levels of Concern

Once a pesticide's toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see *http://www.epa.gov/pesticides/factsheets/riskassess.htm*. A summary of the toxicological endpoints for used for human risk assessment is shown in Table 1 of this unit.

TABLE 1—SUMMARY OF TOXICOLOGICAL DOSES AND ENDPOINTS FOR ISOPYRAZAM FOR USE IN HUMAN HEALTH RISK ASSESSMENT

Exposure/scenario	Point of departure (mg/kg/day)	Uncertainty/FQPA safety factors	RfD, PAD, level of concern for risk assessment (mg/kg/day)	Study and toxicological effects
Acute Dietary (All populations)	NOAEL= 30	UF_A = 10x UF_H = 10x FQPA SF = 1x	Acute RfD = 0.30 aPAD = 0.30	Subchronic Toxicity—Dog. LOAEL = 100 mg/kg/day based on clinical signs (side-to-side head wobble) in male dogs.
Chronic Dietary (All populations).	NOAEL = 5.5	UF_A = 10x UF_H = 10x FQPA SF = 1x	Chronic RfD = 0.055. cPAD = 0.055	Chronic Toxicity/Carcinogenicity—Rats. LOAEL = 27.6 mg/kg/day based on decreased body weight and body weight gain in females; increased incidences of hepatocellular hypertrophy, pigment in centrilobular hepatocytes, eosinophilic foci of altered hepatocytes, vacuolation of centrilobular hepatocytes, bile duct hyperplasia, and bile duct fibrosis in both sexes; and brown pigment in the kidney in females.

TABLE 1—SUMMARY OF TOXICOLOGICAL DOSES AND ENDPOINTS FOR ISOPYRAZAM FOR USE IN HUMAN HEALTH RISK ASSESSMENT—Continued

Exposure/scenario	Point of departure (mg/kg/day)	Uncertainty/ FQPA safety factors	RfD, PAD, level of concern for risk assessment (mg/kg/day)	Study and toxicological effects
Cancer (All routes)	Classification: CARC classified isopyrazam as "Likely to be Carcinogenic to Humans" based on increased liver and uterine endometrial epithelial tumors in female rats and increased thyroid follicular cell tumors in male rats. A cancer slope factor (Q_1^*) of 0.00629 (mg/kg/day)$^{-1}$ was calculated based on an increase in increase in liver tumors in female rats.			

CARC = Cancer Assessment Review Committee. Food Quality Protection Act Safety Factor = FQPA SF. LOAEL = lowest observed adverse effect level. mg/kg/day = milligram/kilogram/day. NOAEL = no observed adverse effect level. PAD = population adjusted dose (a = acute, c = chronic). Point of Departure = A data point or an estimated point that is derived from observed dose-response data and used to mark the beginning of extrapolation to determine risk associated with lower environmentally relevant human exposures. Q_1^* = Linear low-dose approach. RfD = reference dose. UF = uncertainty factor. UF_A = extrapolation from animal to human (interspecies). UF_H = potential variation in sensitivity among members of the human population (intraspecies).

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to isopyrazam, EPA considered exposure under the petitioned-for tolerances as well as all existing isopyrazam tolerances in 40 CFR 180.654. EPA assessed dietary exposures from isopyrazam in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure. In estimating acute dietary exposure, EPA used food consumption information from the U.S. Department of Agriculture (USDA) 2003–2008 National Health and Nutrition Examination Survey, What We Eat in America (NHANES/WWEIA). As to residue levels in food, maximum residues of isopyrazam (as the sum of its *syn*-isomer and *anti*-isomer) plus its tertiary alcohol metabolite (CSCD460260; as the sum of its *syn*-isomer (CSCD459488; free and conjugated) and *anti*-isomer (CSCD459489; free and conjugated)) from field trials reflecting maximum use rates and 100 percent crop treated (PCT) assumptions were used. Dietary Exposure Evaluation Model (DEEM) default processing factors were used for all processed commodities including dried apple (8.0), apple juice/cider (1.3), dried banana/plantain (3.9), and peanut butter (1.89). In the absence of peanut processing data, the maximum theoretical concentration factor was used for peanut oil (2.8).

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment, EPA used the food consumption data from the USDA 2003–2008 NHANES/WWEIA. As to residue levels in food, EPA used the same residue levels, processing factors and PCT assumptions as in the acute dietary exposure analysis.

iii. *Cancer.* Isopyrazam is classified as "Likely to be Carcinogenic to Humans" based on increased liver and uterine endometrial epithelial tumors in female rats and increased thyroid follicular cell tumors in male rats. In the absence of mode of action data, a linear low dose extrapolation for cancer risk assessment was used. A cancer slope factor (Q_1^*) of 0.00629 (mg/kg/day)$^{-1}$ was used for the quantification of human cancer risk. In evaluating cancer risk, EPA used the same residue levels, processing factors, and PCT assumptions as the acute and chronic dietary exposure analyses.

iv. *Anticipated residue and PCT information.* While EPA did not use PCT information in the dietary assessment for isopyrazam; anticipated residues were used. Maximum residues from field trials conducted at the maximum use rates were used to estimate residues of isopyrazam (as the sum of its *syn*-isomer and *anti*-isomer) plus its tertiary alcohol metabolite (CSCD460260; as the sum of its *syn*-isomer (CSCD459488; free and conjugated) and *anti*-isomer (CSCD459489; free and conjugated)). Analyses assumed 100 PCT and used DEEM default processing factors. In the absence of peanut processing data, the maximum theoretical concentration factor was used as a processing factor for peanut oil (2.8).

Section 408(b)(2)(E) of FFDCA authorizes EPA to use available data and information on the anticipated residue levels of pesticide residues in food and the actual levels of pesticide residues that have been measured in food. If EPA relies on such information, EPA must require pursuant to FFDCA section 408(f)(1) that data be provided 5 years after the tolerance is established, modified, or left in effect, demonstrating that the levels in food are not above the levels anticipated. For the present action, EPA will issue such data call-ins as are required by FFDCA section 408(b)(2)(E) and authorized under FFDCA section 408(f)(1). Data will be required to be submitted no later than 5 years from the date of issuance of these tolerances.

2. *Dietary exposure from drinking water.* An assessment of residues in drinking water is not needed for isopyrazam because there is no drinking water exposure associated with the existing (banana) and proposed uses (apple and peanut) which are all non-domestic.

3. *From non-dietary exposure.* The term "residential exposure" is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets). Isopyrazam is not registered for any specific use patterns that would result in residential exposure.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity."

EPA has not found isopyrazam to share a common mechanism of toxicity with any other substances, and isopyrazam does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that isopyrazam does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate

the cumulative effects of such chemicals, see EPA's Web site at *http://www.epa.gov/pesticides/cumulative.*

D. Safety Factor for Infants and Children

1. *In general.* Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the Food Quality Protection Act Safety Factor (FQPA SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional SF when reliable data available to EPA support the choice of a different factor.

2. *Prenatal and postnatal sensitivity.* There are no residual uncertainties for pre- and/or post natal susceptibility even though qualitative susceptibility was observed in the range-finding developmental studies in rabbits. Developmental effects (eye abnormalities) were observed in the absence of maternal toxicity in two range finding developmental toxicity studies in the Himalayan rabbit. However, the eye effects were only observed at relatively high doses (200–400 mg/kg/day) with clear NOAELs/LOAELs established for the developmental effects. Developmental effects observed in the rat (reduced fetal weight and a slight retardation of ossification) occurred only at doses that also produced maternal toxicity (mortality, decreased body weights, body weight gains, and food consumption). There was no evidence of increased susceptibility in a 2-generation reproduction study following pre- or postnatal exposure to isopyrazam. There was also no evidence of neuropathology or abnormalities in the development of the fetal nervous system from the available toxicity studies conducted with isopyrazam. Clear NOAELs/LOAELs were established for the developmental effects observed in rats and rabbits as well as for the offspring effects (increased liver weights) seen in the 2-generation reproduction study and a dose-response relationship for the effects of concern is well characterized. The dose used for the acute dietary risk assessment (30 mg/kg/day), based on effects seen in the subchronic dog study, is protective of the developmental effects seen in rats (44.5 mg/kg/day) and rabbits (200 mg/kg/day). Based on these considerations, there are no residual uncertainties for pre- and/or postnatal susceptibility

3. *Conclusion.* EPA has determined that reliable data show the safety of infants and children would be adequately protected if the FQPA SF were reduced to 1X. That decision is based on the following findings:

i. The toxicity database for isopyrazam is complete.

ii. As discussed in Unit III.D.2, there are no residual uncertainties for pre- and/or postnatal susceptibility and thus, it is unnecessary to retain the 10X FQPA SF to adequately protect infants and children.

iii. The dietary risk assessment is based on parent plus metabolite residues and will not underestimate dietary exposure to isopyrazam. For the acute, chronic and cancer dietary analyses, maximum residues of parent plus metabolite and 100 PCT assumptions were used for all treated commodities. There are no residual uncertainties identified in the exposure databases.

E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute risk.* Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food to isopyrazam will occupy 4.2% of the aPAD for children 1–2 years old, the population group receiving the greatest exposure.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to isopyrazam from food will utilize 6.1% of the cPAD for children 1–2 years old, the population group receiving the greatest exposure.

3. *Short- and intermediate-term risk.* Short- and intermediate-term aggregate exposure takes into account short- and intermediate-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Isopyrazam is not registered in the United States. Short- and intermediate-term risk is assessed based on short- and intermediate-term residential exposure plus chronic dietary exposure. Because there is no short- or intermediate-term residential exposure and chronic dietary exposure has already been assessed under the appropriately protective cPAD, no further assessment of short- or intermediate-term risk is necessary, and EPA relies on the chronic dietary risk assessment for evaluating short- and intermediate-term risk for isopyrazam.

4. *Aggregate cancer risk for U.S. population.* Using the exposure assumptions discussed in this unit for cancer exposure, the cancer dietary risk estimate for the U.S. population is 2×10^{-6}.

EPA generally considers cancer risks (expressed as the probability of an increased cancer case) in the range of 1 in 1 million (or 1×10^{-6}) or less to be negligible. The precision that can be assumed for cancer risk estimates is best described by rounding to the nearest integral order of magnitude on the logarithmic scale; for example, risks falling between 3×10^{-7} and 3×10^{-6} are expressed as risks in the range of 10^{-6}. Considering the precision with which cancer hazard can be estimated, the conservativeness of low-dose linear extrapolation, and the rounding procedure described above, cancer risk should generally not be assumed to exceed the benchmark level of concern of the range of 10^{-6} until the calculated risk exceeds approximately 3×10^{-6}. This is particularly the case where some conservatism is maintained in the exposure assessment. For isopyrazam, EPA's exposure assessment assumes maximum residues of concern from field trials reflecting the maximum use rates, default processing factors, the maximum theoretical concentration for residues in peanut oil and 100 PCT, which is highly conservative. Accordingly, EPA has concluded the cancer risk from exposure to isopyrazam falls within the range of 1×10^{-6} and is thus negligible.

5. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population or to infants and children from aggregate exposure to isopyrazam residues.

IV. Other Considerations

A. Analytical Enforcement Methodology.

Adequate enforcement methodology (Method GRM006.01B) is available to enforce the tolerance expression. The

method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; email address: *residuemethods@epa.gov*.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs). MRLs established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

No Codex or MRLs have been established for residues of isopyrazam in or on apple or peanut commodities.

C. Response to Comments

EPA received a comment to the notice of filing which said that no residues of isopyrazam should be permitted on food. The Agency understands the commenter's concerns and recognizes that some individuals believe that pesticides should be banned on agricultural crops. However, the existing legal framework provided by FFDCA section 408 states that tolerances may be set when persons seeking such tolerances or exemptions have demonstrated that the pesticide meets the safety standard imposed by that statute. This citizen's comment appears to be directed at the underlying statute and not EPA's implementation of it; the citizen has made no contention that EPA has acted in violation of the statutory framework.

D. Revisions to Petitioned-For Tolerances

For the purposes of harmonization with a pending European Union MRL for residues of isopyrazam in or on pome fruit (0.7 mg/kg), EPA is establishing a tolerance of 0.70 ppm in or on apple in lieu of the 0.6 ppm as requested by the petitioner. This increase to the proposed tolerance is supported by the data reviewed for the petition. No changes were made to the proposed tolerance for peanut.

V. Conclusion

Therefore, tolerances are established for residues of isopyrazam in or on apple at 0.70 ppm and peanut at 0.01 ppm. The Agency is also revising the tolerance expression to clarify that determining compliance with the tolerance requires measuring both the *syn*-isomer and the *anti*-isomers of isopyrazam. This change is supported by the available enforcement method which sums the two isomers for the tolerance detection. The tolerance expression revision will not impact the current banana tolerance.

VI. Statutory and Executive Order Reviews

This final rule establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this final rule has been exempted from review under Executive Order 12866, this final rule is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This final rule directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian Tribes. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this final rule. In addition, this final rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 19, 2013.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.654:

■ a. Revise the introductory text in paragraph (a).

■ b. Add alphabetically the commodities "Apple" and "Peanut" to the table in paragraph (a).

■ c. Revise footnote one to the table in paragraph (a).

The additions and revisions read as follows:

§ 180.654 Isopyrazam; tolerances for residues.

(a) *General.* Tolerances are established for residues of the fungicide isopyrazam, including its metabolites and degradates, in or on the commodities listed in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only isopyrazam (3-(difluoromethyl)-1-methyl-*N*-[1,2,3,4-tetrahydro-9-(1-methylethyl)-1;4-methano-naphthalen-5-yl]-1*H*-pyrazole-4-carboxamide), as the sum of its *syn*-isomer (3-(difluoromethyl)-1-methyl-*N*-[(1RS, 4SR, 9RS)-1,2,3,4-tetrahydro-9-(1-methylethyl)-1,4-methanonaphthalen-5-yl]-1*H*-pyrazole-4-carboxamide) and *anti*-isomer (3-(difluoromethyl)-1-methyl-*N*-[(1RS, 4SR, 9SR)-1,2,3,4-tetrahydro-9-(1-methylethyl)-1,4-methano-naphthalen-5-yl]-1*H*-pyrazole-4-carboxamide) in or on the commodity.

Commodity	Parts per million
Apple [1]	0.70
* * * * *	
Peanut [1]	0.01

[1] There are no U.S. registrations for use of isopyrazam on apple, banana, or peanut.

* * * * *

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2013–0777; FRL–9904–15]

Extension of Tolerances for Emergency Exemptions (Multiple Chemicals)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation extends time-limited tolerances for the pesticides listed in this document. These actions are in response to EPA's granting of emergency exemptions under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) authorizing use of these pesticides. In addition, the Federal Food, Drug, and Cosmetic Act (FFDCA) requires EPA to establish a time-limited tolerance or exemption from the requirement for a tolerance for pesticide chemical residues in food that will result from the use of a pesticide under an emergency exemption granted by EPA.

DATES: This regulation is effective December 27, 2013. Objections and requests for hearings must be received on or before February 25, 2014, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2013–0777 is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), EPA West Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Lois Rossi, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2013–0777 in the subject line on the first page of your submission. All requests must be in writing, and must be received by the Hearing Clerk on or before February 25, 2014. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2013–0777 by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.htm.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Background and Statutory Findings

EPA published final rules in the **Federal Register** for each chemical listed. The initial issuance of these final rules announced that EPA, on its own initiative, under FFDCA section 408, 21 U.S.C. 346a, was establishing time-limited tolerances.

EPA established the tolerances because FFDCA section 408(l)(6) requires EPA to establish a time-limited tolerance or exemption from the requirement for a tolerance for pesticide chemical residues in food that will result from the use of a pesticide under an emergency exemption granted by EPA under FIFRA section 18 . Such tolerances can be established without providing notice or time for public comment.

EPA received requests to extend the use of these chemicals for this year's growing season. After having reviewed these submissions, EPA concurs that emergency conditions exist. EPA assessed the potential risks presented by residues for each chemical. In doing so, EPA considered the safety standard in FFDCA section 408(b)(2), and decided that the necessary tolerance under FFDCA section 408(l)(6) would be consistent with the safety standard and with FIRA section 18.

The data and other relevant material have been evaluated and discussed in the final rule originally published to support these uses. Based on that data and information considered, the Agency reaffirms that extension of these time-limited tolerances will continue to meet the requirements of FFDCA section 408(l)(6). Therefore, the time-limited tolerances are extended until the date listed. EPA will publish a document in the **Federal Register** to remove the revoked tolerances from the Code of Federal Regulations (CFR). Although these tolerances will expire and are revoked on the date listed, under FFDCA section 408(l)(5), residues of the pesticide not in excess of the amounts specified in the tolerance remaining in or on the commodity after that date will not be unlawful, provided the residue is present as a result of an application or use of a pesticide at a time and in a manner that was lawful under FIFRA, the tolerance was in place at the time of the application, and the residue does not exceed the level that was authorized by the tolerance. EPA will take action to revoke these tolerances earlier if any experience with, scientific data on, or other relevant information on this pesticide indicate that the residues are not safe.

Tolerances for the use of the following pesticide chemicals on specific commodities are being extended:

Fenoxaprop-ethyl. EPA has authorized under FIFRA section 18 the use of fenoxaprop-ethyl on grasses grown for seed for control of grassy weeds in Oregon. This regulation extends the time-limited tolerances for residues of the herbicide fenoxaprop-ethyl, (±)-ethyl 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoate, and its metabolites, 2-[4-[(6-chloro-2-benzoxazolyl)oxy]phenoxy]propanoic acid and 6-chloro-2,3-dihydrobenzoxazol-2-one, calculated as the stoichiometric equivalent of fenoxaprop-ethyl, in or on grass forage and grass hay at 0.05 ppm for an additional 3-year period. These tolerances will expire and are revoked on December 31, 2016. The time-limited tolerances originally published in the **Federal Register** of June 13, 2008 (73 FR 33714) (FRL–8366–6).

Propiconazole. EPA has authorized under FIFRA section 18 the use of propiconazole on avocado for control of Laurel wilt in Florida. This regulation extends the time-limited tolerance for residues of the fungicide propiconazole (1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl] methyl]-1H-1,2,4-triazole) and its metabolites determined as 2,4-dichlorobenzoic acid and expressed as parent compound, in or on avocado at 10 ppm for an additional 3-year period. This tolerance will expire and is revoked on December 31, 2016. The time-limited tolerance originally published in the **Federal Register** of May 11, 2011 (76 FR 27261) (FRL–8873–2).

Fipronil. EPA has authorized under FIFRA section 18 the use of fipronil on rutabaga and turnip for control of the cabbage maggot in Oregon. This regulation extends the time-limited tolerances for residues of the insecticide fipronil (5-amino-1-[2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(1R,S)-(trifluoromethyl)sulfinyl]-1H-pyrazole-3-carbonitrile) and its metabolites 5-amino-1-[2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(trifluoromethyl) sulfonyl]-1H-pyrazole-3-carbonitrile and 5-amino-1-[2,6-dichloro-4-(trifluoromethyl) phenyl]-4-[(trifluoromethyl)thio]-1H-pyrazole-3-carbonitrile and its photodegradate 5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(1R,S)-(trifluoromethyl)]-1H-pyrazole-3-carbonitrile in or on turnip and rutabaga at 1.0 ppm for an additional 3-year period. These tolerances will expire and are revoked on December 31, 2016. The time-limited tolerances originally published in the **Federal Register** of August 22, 2007 (72 FR 46906) (FRL–8142–6).

Bifenazate. EPA has authorized under FIFRA section 18 the use of bifenazate on timothy grass for control of spider mites in Nevada. This regulation extends the time-limited tolerances for residues of the miticide bifenazate, (1-methylethyl 2-(4-methoxy[1,1′-biphenyl]-3-yl)hydrazinecarboxylate) and its metabolite diazinecarboxylic acid, 2-(4-methoxy-[1,1′-biphenyl]-3-yl), 1-methylethyl ester (expressed as bifenazate), in or on timothy forage at 50 ppm and timothy hay at 150 ppmfor an additional 3-year period. These tolerances will expire and are revoked on December 31, 2016. The time-limited tolerances originally published in the **Federal Register** of January 28, 2005 (70 FR 4032) (FRL–7696–2).

III. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established MRLs for propiconazole in or on avocado; fenoxaprop-ethyl in or on grass forage or hay; fipronil in or on rutabaga or turnip; nor for bifenazate in or on timothy forage or hay.

IV. Statutory and Executive Order Reviews

This final rule establishes a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this final rule has been exempted from review under Executive Order 12866, this final rule is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require

any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This final rule directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian Tribes. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this final rule. In addition, this final rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note).

V. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 19, 2013.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

§ 180.430 [Amended]

■ 2. In § 180.430, in the table to paragraph (b), amend the entries for grass, forage and grass, hay by revising the expiration dates "12/31/13" to read "12/31/16."

§ 180.434 [Amended]

■ 3. In § 180.434, in the table to paragraph (b), amend the entry for avocado by revising the expiration date "12/31/13" to read "12/31/16."

§ 180.517 [Amended]

■ 4. In § 180.517, in the table to paragraph (b), amend the entries for rutabaga and turnip by revising the expiration dates "12/31/13" to read "12/31/16."

§ 180.572 [Amended]

■ 5. In § 180.572, in the table to paragraph (b), amend the entries for timothy, forage and timothy, hay by revising the expiration dates "12/31/13" to read "12/31/16."

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2013–0540; FRL–9902–90]

2,5-Furandione, polymer With ethenylbenzene, Reaction Products With polyethylene-polypropylene glycol 2-aminopropyl Me ether; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether; minimum number average molecular weight (in amu), 14,000 (CASRN 162568–32–3); when used as an inert ingredient in a pesticide chemical formulation. Huntsman Corp. submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether on food or feed commodities.

DATES: This regulation is effective December 27, 2013. Objections and requests for hearings must be received on or before February 25, 2014, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2013–0540, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), EPA West Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Lois Rossi, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).

- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.*

C. Can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2013–0540 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before February 25, 2014. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any CBI) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2013–0540, by one of the following methods.

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Background and Statutory Findings

In the **Federal Register** of September 12, 2013 (78 FR 56187) (FRL–9399–7), EPA issued a notice pursuant to FFDCA section 408, 21 U.S.C. 346a, announcing the receipt of a pesticide petition (IN–10607) filed by Huntsman Corp., 8600 Gosling Rd., The Woodlands, TX 77381. The petition requested that 40 CFR 180.960 be amended by establishing an exemption from the requirement of a tolerance for residues of 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether. That notice included a summary of the petition prepared by the petitioner and solicited comments on the petitioner's request. The Agency did not receive any comments.

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the exemption is "safe." Section 408(c)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and use in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing an exemption from the requirement of a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue . . ." and specifies factors EPA is to consider in establishing an exemption.

III. Risk Assessment and Statutory Findings

EPA establishes exemptions from the requirement of a tolerance only in those cases where it can be shown that the risks from aggregate exposure to pesticide chemical residues under reasonably foreseeable circumstances will pose no appreciable risks to human health. In order to determine the risks from aggregate exposure to pesticide inert ingredients, the Agency considers the toxicity of the inert in conjunction with possible exposure to residues of the inert ingredient through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings. If EPA is able to determine that a finite tolerance is not necessary to ensure that there is a reasonable certainty that no harm will result from aggregate exposure to the inert ingredient, an exemption from the requirement of a tolerance may be established.

Consistent with FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action and considered its validity, completeness and reliability and the relationship of this information to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. In the case of certain chemical substances that are defined as polymers, the Agency has established a set of criteria to identify categories of polymers expected to present minimal or no risk. The definition of a polymer is given in 40 CFR 723.250(b) and the exclusion criteria for identifying these low-risk polymers are described in 40 CFR 723.250(d). 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether conforms to the definition of a polymer given in 40 CFR 723.250(b) and meets the following criteria that are used to identify low-risk polymers.

1. The polymer is not a cationic polymer nor is it reasonably anticipated to become a cationic polymer in a natural aquatic environment.
2. The polymer does contain as an integral part of its composition the atomic elements carbon, hydrogen, and oxygen.
3. The polymer does not contain as an integral part of its composition, except as impurities, any element other than those listed in 40 CFR 723.250(d)(2)(ii).
4. The polymer is neither designed nor can it be reasonably anticipated to substantially degrade, decompose, or depolymerize.
5. The polymer is manufactured or imported from monomers and/or reactants that are already included on the TSCA Chemical Substance Inventory or manufactured under an applicable TSCA section 5 exemption.
6. The polymer is not a water absorbing polymer with a number average molecular weight (MW) greater than or equal to 10,000 daltons.
7. The polymer does not contain certain perfluoroalkyl moieties

consisting of a CF3- or longer chain length as specified in 40 CFR 723.250(d)(6).

Additionally, the polymer also meets as required the following exemption criteria specified in 40 CFR 723.250(e).

8. The polymer's number average MW is greater than or equal to 10,000 daltons. The polymer contains less than 2% oligomeric material below MW 500 and less than 5% oligomeric material below MW 1,000.

Thus, 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether meets the criteria for a polymer to be considered low risk under 40 CFR 723.250. Based on its conformance to the criteria in this unit, no mammalian toxicity is anticipated from dietary, inhalation, or dermal exposure to 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether.

IV. Aggregate Exposures

For the purposes of assessing potential exposure under this exemption, EPA considered that 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether could be present in all raw and processed agricultural commodities and drinking water, and that non-occupational non-dietary exposure was possible. The number average MW of 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether is 14,000 daltons. Generally, a polymer of this size would be poorly absorbed through the intact gastrointestinal tract or through intact human skin. Since 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether conform to the criteria that identify a low-risk polymer, there are no concerns for risks associated with any potential exposure scenarios that are reasonably foreseeable. The Agency has determined that a tolerance is not necessary to protect the public health.

V. Cumulative Effects From Substances With a Common Mechanism of Toxicity

Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity."

EPA has not found 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether to share a common mechanism of toxicity with any other substances, and 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's Web site at *http://www.epa.gov/pesticides/cumulative*.

VI. Additional Safety Factor for the Protection of Infants and Children

Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base unless EPA concludes that a different margin of safety will be safe for infants and children. Due to the expected low toxicity of 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether, EPA has not used a safety factor analysis to assess the risk. For the same reasons the additional tenfold safety factor is unnecessary.

VII. Determination of Safety

Based on the conformance to the criteria used to identify a low-risk polymer, EPA concludes that there is a reasonable certainty of no harm to the U.S. population, including infants and children, from aggregate exposure to residues of 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether.

VIII. Other Considerations

A. Analytical Enforcement Methodology

An analytical method is not required for enforcement purposes since the Agency is establishing an exemption from the requirement of a tolerance without any numerical limitation.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established a MRL for 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether.

IX. Conclusion

Accordingly, EPA finds that exempting residues of 2,5-furandione, polymer with ethenylbenzene, reaction products with polyethylene-polypropylene glycol 2-aminopropyl Me ether from the requirement of a tolerance will be safe.

X. Statutory and Executive Order Reviews

This final rule establishes a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these rules from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this final rule has been exempted from review under Executive Order 12866, this final rule is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant

to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This final rule directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes, or otherwise have any unique impacts on local governments. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this final rule. In addition, this final rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*).

Although this action does not require any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994), EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. As such, to the extent that information is publicly available or was submitted in comments to EPA, the Agency considered whether groups or segments of the population, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide discussed in this document, compared to the general population.

XI. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register.** This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 17, 2013.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.960, in the table, alphabetically add the following polymer before the entry for "Hexadecyl acrylate-acrylic acid copolymer * * *" to read as follows:

§ 180.960 Polymers; exemptions from the requirement of a tolerance.

42 CFR Part 411

[CMS–1454–F]

RIN 0938–AR70

Medicare Program; Physicians' Referrals to Health Care Entities With Which They Have Financial Relationships: Exception for Certain Electronic Health Records Arrangements

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule.

SUMMARY: This final rule revises the exception to the physician self-referral law that permits certain arrangements involving the donation of electronic health records items and services. Specifically, this final rule extends the expiration date of the exception to December 31, 2021, excludes laboratory companies from the types of entities that may donate electronic health records items and services, updates the provision under which electronic health records software is deemed interoperable, removes the electronic prescribing capability requirement, and clarifies the requirement prohibiting any action that limits or restricts the use, compatibility, or interoperability of donated items or services.

DATES: With the exception of the amendment to § 411.357(w)(13), this regulation is effective on March 27, 2014. The amendment to § 411.357(w)(13) is effective on December 31, 2013.

FOR FURTHER INFORMATION CONTACT: Lisa Ohrin, (410) 786–8852.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Purpose of the Regulatory Action

Section 1877 of the Social Security Act (the Act), codified at 42 U.S.C. 1395nn, also known as the physician self-referral statute: (1) prohibits a physician from making referrals for certain designated health services (DHS) payable by Medicare to an entity with which he or she (or an immediate family member) has a financial relationship (ownership interest or compensation arrangement), unless the requirements of an exception are satisfied; and (2) prohibits the entity from submitting claims to Medicare for those referred services, unless the requirements of an

exception are satisfied. The statute establishes a number of exceptions and grants the Secretary the authority to create additional regulatory exceptions for financial relationships that do not pose a risk of program or patient abuse. Since the original enactment of the statute in 1989, we have published a series of final rules interpreting the statute and promulgating numerous exceptions.

In accordance with our statutory authority, we published an exception to the physician self-referral law to protect certain arrangements involving the provision of interoperable electronic health records software or information technology and training services. The final rule for this exception was published on August 8, 2006 (71 FR 45140) (hereinafter referred to as the August 2006 final rule) and is scheduled to expire on December 31, 2013 (see 42 CFR 411.357(w)(13)). In the April 10, 2013 **Federal Register** (78 FR 21308), we published a proposed rule that would update certain aspects of the electronic health records exception and extend the expiration date of the exception. The purpose of this final rule is to address the public comments received on the proposed rule and to finalize certain aspects of the proposed rule.

B. Summary of the Final Rule

This final rule amends the current exception in several ways. First, this final rule extends the expiration date of the exception to December 31, 2021. Second, it excludes laboratory companies from the types of entities that may donate electronic health records items and services. Third, this rule updates the provision under which electronic health records software is deemed interoperable. Fourth, this rule clarifies the requirement at § 411.357(w)(3) prohibiting any action that limits or restricts the use, compatibility, or interoperability of donated items or services. Finally, it removes from the exception the requirement related to electronic prescribing capability.

C. Costs and Benefits

This final rule modifies an existing exception to the physician self-referral law. The exception permits certain entities to provide to physicians certain software and information technology and training services necessary and used predominantly to create, maintain, transmit, or receive electronic health records. The modifications to the exception do not impose new requirements on any party. This is not a major rule, as defined at 5 U.S.C. 804(2). It is also not economically significant, because it will not have a significant effect on program expenditures and there are no additional substantive costs to implement the resulting provisions. We expect the exception, as modified by this final rule, to continue to facilitate the adoption of electronic health records technology.

II. Background

A. Physician Self-Referral Statute and Exceptions

Section 1877 of the Act, codified at 42 U.S.C. 1395nn, also known as the physician self-referral statute: (1) prohibits a physician from making referrals for certain DHS payable by Medicare to an entity with which he or she (or an immediate family member) has a financial relationship (ownership interest or compensation arrangement), unless the requirements of an exception are satisfied; and (2) prohibits the entity from submitting claims to Medicare for those referred services, unless the requirements of an exception are satisfied. The statute at 42 U.S.C. 1395nn(b)(4) establishes a number of exceptions and grants the Secretary the authority to create additional regulatory exceptions for financial relationships that do not pose a risk of program or patient abuse. Since the original enactment of the statute in 1989, we have published a series of final rules interpreting the statute and promulgating numerous exceptions.

B. The Electronic Health Records Items and Services Exception

On August 8, 2006 (71 FR 45140), we published a final rule that, among other things, finalized at § 411.357(w) an exception to the physician self-referral law for protecting certain arrangements involving interoperable electronic health records software or information technology and training services (the "electronic health records exception"). Also in the August 8, 2006 **Federal Register** (71 FR 45110), the Department of Health and Human Services' (HHS) Office of Inspector General (OIG) published similar final regulations at § 1001.952 that, among other things, adopted a safe harbor under the Federal anti-kickback statute (section 1128B(b) of the Act, codified at 42 U.S.C. 1320a–7b(b)) for certain arrangements involving interoperable electronic health records software or information technology and training services. As set forth at § 411.357(w)(13) and § 1001.952(y)(13), the physician self-referral law electronic health records exception and the Federal anti-kickback electronic health records safe harbor, respectively, are scheduled to expire on December 31, 2013.

On April 10, 2013 (78 FR 21308), we published a proposed rule that would set forth certain proposed changes to the electronic health records exception. First, we proposed to update the provision under which electronic health records software is deemed interoperable. Second, we proposed to remove from the exception the requirement related to electronic prescribing capability. Third, we proposed to extend the expiration date of the exception. In addition to these proposals, we solicited public comment on other possible amendments to the exception, including our proposal to limit the types of entities that may donate electronic health records items and services under the exception and to add or modify conditions to limit the risk of data and referral lock-in. Elsewhere in the same issue of the **Federal Register** (78 FR 21314), OIG proposed almost identical changes to the Federal anti-kickback statute safe harbor. Within the limitations imposed by the differences in the respective underlying statutes, we attempted to ensure as much consistency as possible between our proposed modifications to the exception at § 411.357(w) and OIG's proposed modifications to the safe harbor. We noted in the proposed rule that, due to the close nexus between our proposed rule and the OIG's proposed rule, we might consider comments submitted in response to OIG's proposal in finalizing this rule.

This final rule adopts some of the proposed changes to the electronic health records exception to the physician self-referral law. First, this final rule extends the expiration date of the exception to December 31, 2021. Second, it excludes laboratory companies from the types of entities that may donate electronic health records items and services under the exception. Third, this rule updates the provision under which electronic health records software is deemed interoperable. Fourth, this rule clarifies the requirement at § 411.357(w)(3) prohibiting any action that limits or restricts the use, compatibility, or interoperability of donated items or services. Finally, it removes from the exception the requirement related to electronic prescribing capability.

Elsewhere in this issue of the **Federal Register**, the OIG is finalizing almost identical changes to the electronic health records safe harbor [1] under the Federal anti-kickback statute. We attempted to ensure as much

[1] 42 CFR 1001.952(y).

consistency as possible between our changes to the physician self-referral law exception and OIG's safe harbor changes. We have considered and responded to the timely comments we received as well as those received by OIG. Similarly, OIG considered comments submitted in response to our proposed rule in crafting its final rule. For purposes of this final rule, we treat comments that were made with respect to the Federal anti-kickback statute as if they had been made with respect to the physician self-referral law, except where they relate to differences in the underlying statutes.

III. Provisions of the Proposed Regulations and Analysis of and Responses to Public Comments

We received approximately 110 timely items of correspondence for the proposed rule. We summarize and respond to comments later in this section of the final rule. For ease of reference, we divided the comments and responses into the following categories: the deeming provision; the electronic prescribing provision; the "sunset" provision; and additional proposals and considerations.

A. The Deeming Provision

Our current electronic health records exception requires at § 411.357(w)(2) that the donated software must be "interoperable" (as defined at § 411.351) at the time it is provided to the physician. This provision further provides that software is deemed to be interoperable if a certifying body recognized by the Secretary has certified the software no more than 12 months prior to the date it is provided to the physician. We proposed two modifications to § 411.357(w)(2), which is known as the "deeming provision." Both modifications to the deeming provision were proposed to reflect recent developments in the Office of the National Coordinator for Health Information Technology's (ONC) certification program.

The first proposed modification would reflect ONC's responsibility for authorizing certifying bodies. The second would modify the timeframe during which donated software must be certified. Currently, to comply with the deeming provision, the exception requires donated software to be certified no more than 12 months prior to the date of donation.

After the issuance of the August 2006 final rule, ONC developed a regulatory process for adopting certification criteria and standards which is anticipated to result in a cyclical rulemaking process. (For more information, see ONC's September 4, 2012 final rule entitled "Health Information Technology: Standards, Implementation Specifications, and Certification Criteria for Electronic Health Record Technology, 2014 Edition; Revisions to the Permanent Certification Program for Health Information Technology" (77 FR 54163).) Our proposal would have modified the deeming provision to track ONC's anticipated regulatory cycle. As a result, software would be eligible for deeming if, on the date it is provided to the physician, it has been certified to any edition of the electronic health record certification criteria that is identified in the then-applicable definition of Certified EHR Technology in 45 CFR part 170. By way of example, for 2013, the applicable definition of Certified EHR Technology includes both the 2011 and the 2014 editions of the electronic health record certification criteria. Therefore, in 2013, software certified to meet either the 2011 edition or the 2014 edition would have satisfied the requirement of the exception as we proposed to modify it. Additionally, we solicited comments on whether removing the current 12-month certification requirement would impact donations and whether we should retain the 12-month certification period as an additional means of determining eligibility under the deeming provision.

After consideration of the public comments received, we are finalizing the proposed revisions to § 411.357(w)(2) with one clarification to our proposed regulatory text to ensure that the deeming provision closely tracks ONC's certification program. We are revising § 411.357(w)(2) to state that software is deemed to be interoperable if, on the date that it is provided to the physician, it has been certified by a certifying body authorized by the National Coordinator for Health Information Technology to an edition of the electronic health record certification criteria identified in the then-applicable 45 CFR part 170. As we stated in the August 2006 final rule (71 FR 45156), we understand "that the ability of software to be interoperable is evolving as technology develops. In assessing whether software is interoperable, we believe the appropriate inquiry is whether the software is as interoperable as feasible given the prevailing state of technology at the time the items or services are provided to the physician recipient." We believe that our final rule with respect to this requirement is consistent with that understanding and our objective of ensuring that software is certified to the current required standard of interoperability when it is donated.

Comment: All of the commenters that addressed this issue in their comments supported the proposed modification that would amend the exception to recognize ONC as the agency responsible for authorizing certifying bodies on behalf of the Secretary, with one commenter requesting that we clarify that software need not be certified to ONC's standards to be eligible for donation.

Response: We appreciate the commenters' support for this modification. With respect to the request for clarification, the commenter is correct that § 411.357(w)(2) does not require software to be certified to ONC's standards in order to be eligible for donation. As we discussed in the August 2006 final rule (71 FR 45156), the deeming provision offers one way for parties to be certain that the interoperability requirement of § 411.357(w)(2) is met at the time of donation. Even if donated software is not deemed to be interoperable, the arrangement would satisfy the interoperability requirement of the exception if the software meets the definition of "interoperable" at § 411.351.

Comment: One commenter expressed concerns about linking the interoperability requirement of the exception to ONC's certification criteria and standards because they do not, in the commenter's assessment, reflect contemporary views of interoperability. The commenter suggested that we instead implement a broad definition of interoperability adopted by the International Organization for Standardization or, alternatively, that we adopt interoperability functional definitions developed by the American National Standards Institute.

Response: Although we are mindful that other non-governmental organizations may be developing their own standards to encourage the adoption of interoperable electronic health records technology, ONC's certification criteria and standards are the core policies the Department is utilizing to accelerate and advance interoperability and health information exchange. On March 7, 2013, ONC and CMS jointly published a Request for Information (78 FR 14793) to solicit public feedback on a set of possible policies "that would encourage providers to routinely exchange health information through interoperable systems in support of care coordination across health care settings." The process by which ONC considers the implementation of new certification

criteria and standards is a public, transparent effort that allows the Department's electronic health records technology experts to consider appropriately the comments submitted in light of the goal "to accelerate the existing progress and enhance a market environment that will accelerate [health information exchange] across providers. . . ." (78 FR 14795).

We believe that it is reasonable and appropriate to link the deeming provision to ONC's certification criteria and standards because of ONC's expertise and its public process for considering and implementing its criteria and standards. ONC is the agency within the Department with expertise in determining the relevant criteria and standards to ensure that software is as interoperable as feasible given the prevailing state of technology. ONC expects to revise and expand such criteria and standards incrementally over time to support greater interoperability of electronic health records technology. (See the September 4, 2012 final rule (77 FR 54269).) Additionally, we believe that utilizing ONC's certification criteria and standards, which are implemented through a public process, affords the best opportunity for interested parties to comment on, understand, and ultimately implement those criteria and standards. Therefore, we are not adopting the commenter's suggestion.

Comment: One commenter stated that many electronic health records systems lack the capabilities to function within a patient-centered medical home. The commenter suggested that we finalize policies that further strengthen the use of core electronic health records features.

Response: We are not adopting the commenter's suggestion. As discussed, ONC is the agency within the Department with expertise in determining the relevant criteria and standards for electronic health records technology, including those related to the use of core features. The public process through which ONC's certification criteria and standards are implemented affords the best opportunity for interested parties to comment on, understand, and ultimately implement those criteria and standards.

Comment: Of the commenters that addressed the deeming provision, most supported our proposal to modify the timeframe within which donated software must have been certified to track more closely the current ONC certification program. Commenters asserted that aligning the exception's certification timeframe with ONC's certification program will provide donors and physician recipients more certainty about the deemed status of donated software because the software must be certified to meet only one set of standards on the same certification cycle to comply with both ONC's certification criteria and the deeming provision of the exception. One commenter supported the modification, but suggested that the 12-month certification timeframe also be retained or, alternatively, that we allow software to be deemed to be interoperable if it has been certified to *any* edition of ONC's electronic health record certification criteria.

Response: We agree that aligning the exception's certification timeframe with ONC's certification program provides more certainty to donors and physician recipients. We believe that the modification we are making to the requirement at § 411.357(w)(2) will support the dual goals of the deeming provision: (1) to ensure that donated software is as interoperable as feasible given the prevailing state of technology at the time it is provided to the physician recipient; and (2) to provide donors and physician recipients a means to have certainty that donated software satisfies the interoperability requirement of the exception.

We are not persuaded to adopt the commenter's suggestion to retain the 12-month certification timeframe, as this would not ensure that software is certified to the current required standard of interoperability. In the course of evaluating the commenter's suggestion, however, we realized that our proposed regulatory text may be too narrow to satisfy the dual goals of the deeming provision. Under our proposed regulatory text, software would be deemed interoperable if it was certified to an edition [2] of certification criteria referenced in the then-applicable definition of "Certified EHR Technology" at 45 CFR 170.102. That definition applies only to the Medicare and Medicaid Electronic Health Record Incentive Programs (the EHR Incentive Programs). See generally, 42 CFR part 495. However, ONC also has the authority to adopt into its regulations in 45 CFR part 170 certification criteria for health information technology, including electronic health records, that may not be referenced in the definition of "Certified EHR Technology" because they are not related to the EHR Incentive Programs. If we finalize the proposed regulatory text, software certified to criteria in editions not included in the definition "Certified EHR Technology" would not be eligible for deeming under the exception. Further, we have recently learned that ONC intends to retire outdated editions of certification criteria by removing them from the regulatory text in 45 CFR part 170. Accordingly, software certified to an edition identified in the regulations in effect on the date of the donation would be certified to a then-applicable edition, regardless of whether the particular edition was also referenced in the then-applicable definition of Certified EHR Technology. Thus, we are finalizing revisions to § 411.357(w)(2) to track more closely ONC's certification program in the deeming provision: We are finalizing a modification to our regulatory text to provide that software is deemed to be interoperable if, on the date it is provided to the physician recipient, it has been certified by a certifying body authorized by the National Coordinator for Health Information Technology to an edition of the electronic health record certification criteria identified in the then-applicable version of 45 CFR part 170. We believe that this is consistent with our intent, as articulated in the proposed rule, to modify the deeming provision by removing the 12-month timeframe and substituting a provision that more closely tracks ONC's certification program. Further, we believe that the regulatory text, as modified, will support the goals of the deeming provision described previously.

Comment: One commenter suggested that, for deeming purposes, we should require that software be certified to the *latest* edition of electronic health record certification criteria rather than any edition then applicable. This commenter also suggested that the electronic directory of service (e-DOS) standard should be a certification requirement for donated software, and asserted that both recommendations would help ensure electronic health records software is interoperable.

Response: We decline to adopt the commenter's suggested requirements for the exception at § 411.357(w). We believe that requiring donated software to be certified to editions that are adopted and not yet retired by ONC through its certification program ensures that the software is certified to interoperability standards updated regularly by the agency of the Department with the relevant expertise. Further, adding requirements to the ONC certification criteria and standards is outside the scope of this rulemaking. Therefore, we are not implementing the commenter's suggestions.

[2] ONC has recently begun characterizing sets of adopted certification criteria as "editions."

B. The Electronic Prescribing Provision

At § 411.357(w)(11), our current electronic health records exception specifies that the donated software must "contain [] electronic prescribing capability, either through an electronic prescribing component or the ability to interface with the physician's existing electronic prescribing system that meets the applicable standards under Medicare Part D at the time the items and services are provided." In the preamble to the August 2006 final rule (71 FR 45153), we stated that we included "this requirement, in part, because of the critical importance of electronic prescribing in producing the overall benefits of health information technology, as evidenced by section 101 of the [Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA), Pub. L. 108–173]." We also noted that it was "our understanding that most electronic health records systems already include an electronic prescribing component" (71 FR 45153).

We continue to believe in the critical importance of electronic prescribing. However, in light of developments since the August 2006 final rule, we proposed to delete from the exception the requirement at § 411.357(w)(11). Based on our review of the public comments and for the reasons stated in the proposed rule, we are finalizing our proposal to eliminate the requirement that electronic health records software contain electronic prescribing capability in order to qualify for protection under the exception at § 411.357(w).

Comment: Two commenters disagreed that it is no longer necessary to require the inclusion of electronic prescribing capability in donated electronic health records software. One of the commenters stated that it was encouraged by the growth in the number of physicians using electronic prescribing between 2008 and 2012, but believed that the requirement should remain for patient safety reasons because electronic prescribing is critical to lowering the incidences of preventable medication errors.

Response: Like the commenters, and as we stated in the proposed rule (78 FR 21311), we believe in the importance of electronic prescribing. However, we are persuaded that other existing policy drivers, many of which did not exist in August 2006 when the exception was promulgated, sufficiently support the adoption of electronic prescribing capabilities. We do not want to undermine important public policy goals by requiring redundant and sometimes expensive software capabilities that may not contribute to the interoperability of a given system. As we discussed in the proposed rule, electronic prescribing technology will remain eligible for donation under the electronic health records exception or under the electronic prescribing exception at § 411.357(v). We do not believe that removing this requirement would increase the risk of fraud or abuse posed by donations made pursuant to the exception.

Comment: Many commenters supported our proposal to eliminate the requirement that donated software must include electronic prescribing capability at the time it is provided to the physician recipient, agreeing that developments since the promulgation of the exception make it unnecessary to retain this requirement. One of the commenters asserted that the goal of the requirement for the inclusion of electronic prescribing technology in donated electronic health records software—that is, increasing the use of electronic prescribing—had been achieved through the electronic prescribing incentive program authorized by the Medicare Improvements for Patients and Providers Act of 2008.

Response: We appreciate the commenters' support and, for the reasons explained in more detail previously in this final rule, we are eliminating the requirement at § 411.357(w)(11) that donated electronic health records software must contain electronic prescribing capability, either through an electronic prescribing component or the ability to interface with the physician's existing electronic prescribing system that meets the applicable standards under Medicare Part D at the time the items and services are provided.

C. The "Sunset" Provision

Protected donations under the current electronic health records exception must be made on or prior to December 31, 2013. In adopting this requirement of the electronic health records exception, we acknowledged in the August 2006 final rule (71 FR 45162), "that the need for donations of electronic health records technology should diminish substantially over time as the use of such technology becomes a standard and expected part of medical practice."

As we discussed in the proposed rule, although the industry has made great progress in the adoption and meaningful use of electronic health records technology, the use of such technology has not yet been adopted nationwide. Continued use and further adoption of electronic health records technology remains an important goal of the Department. We continue to believe that, as progress on this goal is achieved, the need for an exception for donations of electronic health records items and services should continue to diminish over time. Accordingly, we proposed to extend the expiration date of the exception to December 31, 2016, selecting this date for the reasons described in the proposed rule (78 FR 21311). We also specifically sought comment on whether we should, as an alternative, select a later expiration date and what that date should be. For example, we stated that we were considering an expiration date of December 31, 2021 (78 FR 21311). In response to comments, we are extending the expiration date of the exception to December 31, 2021.

Comment: Numerous commenters urged us to make permanent the exception at § 411.357(w). According to these commenters, a permanent exception could: (1) provide certainty with respect to the cost of electronic health records technology for physicians; (2) encourage adoption by physicians who are new entrants into medical practice or have postponed adoption based on financial concerns regarding the ongoing costs of maintaining and supporting an electronic health records system; (3) encourage adoption by providers and suppliers that are not eligible for incentive payments through the Medicare and Medicaid programs; and (4) preserve the gains already made in the adoption of interoperable electronic health records technology, especially where hospitals have invested in health information technology infrastructure through protected donations of such technology. According to some commenters, although the exception was implemented to encourage the adoption of health information technology, it is now a necessity for the creation of new health care delivery and payment models. Some commenters also stated their support for a permanent exception because the adoption of electronic health records technology has been slower than expected, and allowing the exception to expire in 2016 would adversely affect the rate of adoption. Some of these commenters requested that, if CMS is not inclined to make the exception permanent, we extend the availability of the exception through the latest date noted in the proposed rule—December 31, 2021.

Response: We agree with the commenters that the continued availability of the exception at § 411.357(w) plays a part in achieving

the Department's goal of promoting electronic health records technology adoption. However, we do not believe that making the exception permanent is required or appropriate at this time. The permanent availability of the exception could serve as a disincentive to adopting interoperable electronic health records technology in the near-term. Moreover, as described in the proposed rule (78 FR 21312) and elsewhere in this final rule, we are concerned about inappropriate donations of electronic health records items and services that lock in data and referrals between a donor and physician recipient, among other risks. A permanent exception might exacerbate these risks over the longer term without significantly improving adoption rates. However, in light of other modifications we are making in this final rule to mitigate such ongoing risks, including removing laboratory companies as protected donors of electronic health records items and services, we are persuaded to permit use of the exception for more than the additional 3-year period that we proposed.

The adoption of interoperable electronic health records technology still remains a challenge for some providers and suppliers despite progress in its implementation and meaningful use since the August 2006 promulgation of the exception at § 411.357(w). (*See* ONC's Report to Congress on Health IT Adoption (June 2013) at *http://www.healthit.gov/sites/default/files/rtc_adoption_of_healthit_and_relatedefforts.pdf* and the U.S. Department of Health and Human Services Assistant Secretary for Planning and Evaluation's EHR Payment Incentives for Providers Ineligible for Payment Incentives and Other Funding Study (June 2013) at *http://aspe.hhs.gov/daltcp/reports/2013/ehrpi.shtml*.) Although we believe that the protection afforded by the exception encourages the adoption of such technology, its permanence is not essential to the achievement of widespread adoption. It is only one of a number of ways that physicians are incented to adopt electronic health records technology, including the incentives offered by the EHR Incentive Programs and the movement in the health care industry toward the electronic exchange of patient health information as a means to improve patient care quality and outcomes.

Balancing our desire to encourage further adoption of interoperable electronic health records technology against our concerns about potential disincentives to adoption and the misuse of the exception to lock in referral streams, we are establishing a December 31, 2021 expiration date for the exception. We believe that this expiration date will support earlier adoption of electronic health records technology, provide a timeframe that aligns with the financial incentives for electronic health records adoption currently offered by the Federal government, and safeguard against foreseeable future fraud risks, while still providing adequate time for donors and physician recipients to maximize the financial incentives currently offered by the Federal government.

Comment: Two commenters agreed that the availability of the exception at § 411.357(w) should be extended, but not beyond December 31, 2016. One of these commenters asserted that a relatively short extension of the sunset date for the exception would allow a wider range of people to obtain access to health information technology services while not diminishing the incentive for providers to acquire, implement and standardize the necessary electronic health records systems. Another commenter supported our proposal to extend the availability of the exception through December 31, 2016, and encouraged us to consider an additional extension as that date approaches. One commenter suggested that we extend the availability of the exception for at least 6 years, although a shorter or longer time period could be established after review of adoption rates across the range of providers that may or may not be eligible for meaningful use incentives under the EHR Incentive Programs. Other commenters supported our alternative proposal to extend the availability of the exception through December 31, 2021, which corresponds to the statutory end of the Medicaid incentive program. These commenters noted that more remains to be done to promote electronic health records technology adoption, and suggested that maintaining the exception through this date will help maximize the incentives for eligible physicians to adopt electronic health records technology and thereby increase use of electronic health records. Two other commenters suggested tying the expiration of the exception to the corresponding date for assessing "penalties" under the Medicare EHR Incentive Program in order to align appropriately Federal regulation of electronic health records technology adoption and use.

Response: We share the commenter's concerns regarding diminishing incentives for providers to acquire, implement and standardize the necessary electronic health records systems. However, after consideration of all of the comments on this issue, we believe that an extension of the exception would advance the Department's goals regarding the adoption of interoperable electronic health records technology and improvements in patient care, while providing an incentive for providers to adopt electronic health records technology in the near-term. Therefore, we are extending the availability of the exception at § 411.357(w) through December 31, 2021, which corresponds to the end of incentive payments under the Medicaid EHR Incentive Program.

We note that the two commenters that suggested tying the expiration of the exception to the corresponding date for assessing penalties under the Medicare EHR Incentive Program appear to misunderstand the duration of the downward payment adjustments under this program, which will continue until an eligible participant adopts and meaningfully uses appropriate electronic health records technology. (For additional information, see the July 28, 2010 (75 FR 44448) final rule entitled "Medicare and Medicaid Programs; Electronic Health Record Incentive Program.") The practical effect of the commenters' suggestion would be to extend permanently the exception at § 411.357(w). For the reasons stated elsewhere in this final rule, we do not believe that making the exception permanent is required or appropriate at this time, and we are not adopting the commenters' suggestion.

Comment: A few commenters expressed general support for extending the availability of the exception, but did not specify whether the extension should be for 3 years, 8 years, or some other length of time. Commenters noted that failure to extend the availability of the exception would negatively impact the adoption of electronic health records technology, as well as its continued use.

Response: As described previously, we are finalizing our alternative proposal to extend the exception through December 31, 2021.

Comment: A number of commenters urged us to let the exception at § 411.357(w) expire on December 31, 2013. Some of the commenters asserted that the exception permits the exact behavior the law was intended to stop, namely, referrals tied to financial relationships between physicians and entities furnishing DHS, in this case, entities that donate electronic health records items and services. Other commenters asserted that the exception permits "legalized extortion" or provides "legal sanction to trample the competition." Another commenter

asserted that the inclusion of "non-market factors" (that is, the influence of donors, rather than end users) in the decision to adopt electronic health records technology may result in lower quality products or services and/or higher costs, often with an adverse impact on technology adoption and innovation. Still others asserted that, given the financial incentives that the government itself has provided, it is no longer necessary to spur the adoption of electronic health records technology through the underwriting of the cost of electronic health records technology by outside entities.

Response: Although we appreciate the commenters' concerns, we continue to believe that the exception serves to advance the adoption and use of interoperable electronic health records. However, we caution that a compensation arrangement involving the donation of electronic health records technology runs afoul of the physician self-referral law unless it satisfies each requirement of the exception at § 411.357(w). Arrangements that disguise the "purchase" or lock-in of referrals and donations that are solicited by the physician recipient in exchange for referrals would fail to satisfy the requirements of the exception. We disagree with the commenters that asserted that encouragement for the "underwriting" of electronic health records technology by organizations other than the government is no longer necessary, particularly in light of the developments in integrated patient care delivery and payment models.

Comment: Numerous commenters suggested that the exception at § 411.357(w) should sunset as scheduled on December 31, 2013, but only with respect to laboratories and pathology practices, "ancillary service providers," entities not listed in section 101 of the MMA (authorizing an exception for certain donations of electronic prescribing items and services), or entities that are not part of an accountable care organization or not integrated in a meaningful manner.

Response: We consider these comments to be related to "protected donors" and address them in section III.D.1. of this final rule.

D. Additional Proposals and Considerations

1. Protected Donors

As we discussed in the proposed rule, despite our goal of expediting the adoption of electronic health records technology, we have concerns about the potential for abuse of the exception by certain types of providers and suppliers (including suppliers of ancillary services that do not have a direct and primary patient care relationship and a central role in the health care delivery infrastructure). The OIG indicated that it has concerns related to the potential for laboratories and other ancillary service providers to abuse its safe harbor, as it has received comments suggesting that abusive donations are being made under the electronic health records safe harbor. In order to address these concerns, we proposed to limit the scope of protected donors under the electronic health records exception.

In the proposed rule, we stated that we were considering revising the exception to cover only the MMA-mandated donors we originally proposed when the exception was first established: hospitals, group practices, prescription drug plan sponsors, and Medicare Advantage (MA) organizations. We stated that we were also considering whether other individuals or entities with front-line patient care responsibilities across health care settings, such as safety net providers, should be included, and, if so, which ones. Alternatively, we stated that we were considering retaining the current broad scope of protected donors, but excluding specific types of donors—suppliers of ancillary services associated with a high risk of fraud and abuse—because donations by such suppliers may be more likely to be motivated by a purpose of securing future business than by a purpose of better coordinating care for beneficiaries across health care settings. In particular, we discussed excluding laboratory companies from the scope of permissible donors, as their donations have been the subject of complaints. We also discussed excluding other high-risk categories of potential donors, such as durable medical equipment (DME) suppliers and independent home health agencies. We sought comment on the alternatives under consideration, including comments (with supporting reasons) regarding particular types of providers or suppliers that should or should not be permitted to utilize the exception given its goals.

Many commenters raised concerns about donations of electronic health records items and services by laboratory companies and strongly urged us to adopt our proposal to eliminate protection for such donations, either by excluding laboratory companies from the scope of protected donors (if we extend the availability of the exception), or by letting the exception sunset altogether. (For more detailed discussion of comments concerning the sunset provision, see section III.C. of this final rule.) Other commenters raised similar concerns, but did not suggest a particular approach to address them.

We carefully considered the comments that we received on this proposal and, based on the concerns articulated by commenters and the wide-ranging support from the entire spectrum of the laboratory industry (from small, pathologist-owned laboratory companies to a national laboratory trade association that represents the industry's largest laboratory companies), we are finalizing our proposal to exclude laboratory companies from the types of entities that may donate electronic health records items and services under the exception. We believe this decision is consistent with and furthers our continued goal of promoting the adoption of interoperable electronic health records technology that benefits patient care while reducing the likelihood that the exception will be misused by donors to secure referrals. We also believe that our decision will address situations identified by some of the commenters involving physician recipients conditioning referrals for laboratory services on the receipt of, or redirecting referrals for laboratory services following, donations from laboratory companies.

Comment: Many commenters raised concerns that, notwithstanding a clear prohibition in the exception, laboratory companies are, explicitly or implicitly, conditioning donations of electronic health records items and services on the receipt of referrals from the physician recipients of those donations or establishing referral quotas and threatening to require the physician recipient to repay the cost of the donated items or services if the quotas are not reached. Some commenters suggested that such *quid pro quo* donations, and donations by laboratory companies generally, are having a negative effect on competition within the laboratory services industry (including increased prices for laboratory services) and impacting patient care, as referral decisions are being made based on whether a laboratory company donated electronic health records items or services, not whether that company offers the best quality services or turnaround time. A few commenters also raised concerns that laboratory companies are targeting potential physician recipients based on the volume or value of their anticipated referrals.

Response: The current requirement at § 411.357(w)(6) prohibits determining the eligibility of a physician recipient or the amount or nature of the items or

services to be donated in a manner that directly takes into account the volume or value of referrals or other business generated between the parties. Accordingly, the *quid pro quo* arrangements and targeted donations described by the commenters would not satisfy this requirement of the exception. Such arrangements are not consistent with the purpose of the exception and can result in the precise types of harm the physician self-referral law is designed to prevent, such as financial self-interest that may affect a physician's medical decision making. We urge those with information about such arrangements to contact the OIG's fraud hotline at 1–800–HHS–TIPS or visit *https://forms.oig.hhs.gov/hotlineoperations/* to learn of other ways to report fraud.

We appreciate the commenters' support for our proposal to remove donations by laboratory companies from the protection of the exception. We believe that our decision to exclude laboratory companies from the scope of protected donors is the best way to encourage and facilitate the adoption of interoperable electronic health records technology without risk of program or patient abuse.

Comment: Several commenters raised concerns about laboratory company arrangements with electronic health records technology vendors. The commenters described agreements involving laboratory companies and vendors that result in the vendors charging other laboratory companies high fees to interface with the donated technology or prohibiting other laboratory companies from purchasing the technology for donation to their own clients. One of the commenters also raised a concern that volume discount arrangements between laboratory companies and vendors of electronic health records technology are resulting in donations of electronic health records items and services that may not best suit the needs of the physician recipient. The commenter asserted that donor laboratory companies are pushing a particular vendor's specific electronic health records system onto physician recipients because of the donor's close relationship with the vendor.

Response: Excluding potential competitors of the donor from interfacing with donated items or services, as described by the commenters, can result in data and referral lock-in. We discuss the issue of lock-in elsewhere in this final rule in more detail. We believe that our determination to exclude laboratory companies from the scope of protected donors will help address the data and referral lock-in risks posed by arrangements such as those described by the commenters. We also believe that the changes to § 411.357(w)(1) that we are finalizing regarding the types of entities that may donate electronic health records items and services will help address the commenter's concern about the negative impact of relationships between laboratory companies and vendors on the selection of electronic health records technology by physicians. We stated in the August 2006 final rule that, although physician recipients remain free to choose any electronic health records technology that suits their needs, we do not require donors to facilitate that choice for purposes of the exception. However, as we also stated in the August 2006 final rule (71 FR 45157), our regulations require donors to offer interoperable products and donors must not impede the interoperability of any electronic health records software they decide to offer. Any agreement between a donor and a vendor that precludes or limits the ability of competitors to interface with the donated electronic health records software would raise significant questions regarding whether the donation meets the requirement at § 411.357(w)(3).

Comment: Many commenters noted that several states—including Missouri, New Jersey, New York, Pennsylvania, Tennessee, Washington, and West Virginia—have prohibited or restricted donations of electronic health records technology by laboratory companies to address fraud and abuse concerns. Some of the commenters urged us to effectuate a similar prohibition or restriction by removing laboratory companies as potential donors under the exception. One of these commenters asserted that laboratory companies licensed in states that strictly prohibit them from donating to referring physicians all or part of the costs of electronic health records technology are put at a considerable disadvantage in the marketplace because of "the need for [electronic health records technology] subsidies to compete for business."

Response: We believe that our determination to exclude laboratory companies from the types of entities that may donate electronic health records items and services under the exception will address the fraud and abuse concerns referenced by the commenters. With respect to the commenter's concern about being disadvantaged, we note that our decision to prohibit laboratory companies from utilizing the exception applies equally to all laboratory companies, regardless of their location.

Comment: Several commenters, including a national laboratory trade association that represents the industry's largest laboratory companies, took exception to what they perceived as an allegation that laboratory companies are solely responsible for problematic donations of electronic health records items and services. Some of these commenters asserted that electronic health records technology vendors are encouraging physicians to seek or demand donations from laboratory companies, and that physicians are threatening to withhold referrals or send laboratory business elsewhere if donations are not made. According to one commenter, because physicians are not paying for a significant portion of the cost of these items and services, electronic health records technology vendors are able to charge high prices and the size of donations (in dollars) has increased exponentially in recent years. The commenter also suggested that vendors may be manipulating pricing to maximize the amount a laboratory company pays for donated items and services while minimizing or eliminating any physician responsibility. Another commenter raised a related concern that electronic health records technology vendors have increased the costs of their products because they know that laboratories are paying for them. Generally, commenters raising concerns about the conduct of electronic health records technology vendors and physicians recommended that we remove laboratory companies from the universe of permissible donors under the exception.

One commenter asserted that physicians are no longer choosing electronic health records technology based on which system is most appropriate, but rather based on which will produce the largest donation of items and services. Another commenter asserted that many physicians will change laboratory companies and seek a new donation once an existing donor laboratory company ceases to subsidize the physicians' electronic health records technology costs. This commenter stated that such conversions to different electronic health records technology are not only inefficient, but undermine the spirit of the regulatory requirement that physicians do not possess the same or equivalent items or services as those being donated.

Response: Our proposed modification related to the universe of donors potentially covered under the exception; thus, the focus of our discussion in the proposed rule was on donor conduct. Some of the comments we describe in

this final rule also raise concerns about the conduct of physician recipients. In response, we are clarifying that we do not believe that problematic donations involving laboratory companies are solely the result of questionable conduct by laboratory companies. We believe that our decision to exclude laboratory companies from the universe of protected donors is the best way to reduce the risk of misuse of the exception at this time and addresses the concerns identified by the commenters.

We note that § 411.357(w)(5) prohibits the physician recipient and the physician recipient's practice from making the receipt, amount or nature of the donated items or services a condition of doing business with the donor. This provision recognizes the program integrity risk posed by a potential physician recipient who demands a donation in exchange for referrals. This type of *quid pro quo* arrangement is no less troubling than *quid pro quo* arrangements that originate with the donor and would not satisfy the requirements of the exception. Whether a *quid pro quo* donation is for an initial installation of a donated item or service or a conversion to a different donated item or service would not change our analysis. Additionally, we caution those engaging in conversion arrangements to be mindful of the limitations in the exception at § 411.357(w)(8) concerning the donation of equivalent items or services.

Comment: Several commenters suggested that laboratory companies should be prohibited from donating electronic health records items and services to physicians or that physicians should pay for their own electronic health records technology. Other commenters asserted that laboratory companies do not share an essential interest in their referring clients having electronic health records technology. Still other commenters stated simply that laboratory companies represent a high risk of fraud and abuse.

Response: Based on the complaints previously received by OIG, which are described in more detail in the proposed rule, and the information provided by the commenters regarding some of the arrangements between laboratory companies and physician recipients of donated electronic health records items and services, we agree that donations of electronic health records items and services by laboratory companies present a high risk of fraud and abuse. Exceptions promulgated using our authority under section 1877(b)(4) of the Act may provide protection from the physician self-referral law's prohibitions only for those financial relationships that pose no risk of program or patient abuse. We do not believe that continuing to permit laboratory companies to make protected donations under the exception at § 411.357(w) would meet this standard. Therefore, we are modifying the requirements of the exception to eliminate laboratory companies from the types of entities that may provide donations under the exception. We do not agree with the commenters that laboratory companies necessarily do not have an essential interest in their referring clients having electronic health records technology. It is the behavior of laboratory companies and physician recipients of donations from laboratory companies of which we are aware that drives our determination to finalize our proposal to eliminate laboratory companies from the types of entities that may provide donations under the exception.

Comment: A few commenters noted that, rather than electronic health records, laboratory companies typically use a laboratory information system (LIS), anatomic pathologist information system, and/or blood banking system to store and share patients' laboratory results, and that these systems should not be confused with an electronic health record that includes a patient's full medical record comprised of information from many medical specialties, including pathology. One of these commenters asserted that laboratories already bear the cost of establishing LIS interfaces that they provide to physicians in order to exchange laboratory services data electronically, and that clinical and anatomic laboratories could continue to do so legally even if they were no longer protected donors under the exception. One commenter lamented the costs associated with interfaces, other commenters requested that CMS clarify its position on the donation of interfaces by laboratory companies, and one commenter asserted that interfaces were not analogous to facsimile machines, which we have stated in the past may be provided to physicians under certain circumstances.

Response: We appreciate the general information provided by the commenters regarding the various types of technology that laboratory companies generally use or do not use. The more relevant technology in the laboratory setting is the interface that exchanges data electronically between the laboratory and its referral sources. These comments provide us an opportunity to discuss more fully our position on the donation of interfaces by laboratory companies.

Our decision to exclude laboratory companies from the universe of protected donors under the exception does not affect our interpretation of the physician self-referral law as it relates to whether the provision of an item or service qualifies as "remuneration" that establishes a compensation arrangement that implicates the law's referral and billing prohibitions. In section 1877(h)(1)(A) of the Act, "compensation arrangement" is defined as "any arrangement involving any remuneration" between a physician (or an immediate family member of such physician) and an entity furnishing DHS. Section 1877(h)(1)(B) of the Act defines "remuneration" to include "any remuneration, directly or indirectly, in cash or in kind." However, under section 1877(h)(1)(C) of the Act, "remuneration" does not include "the provision of items, devices, or supplies that are used solely to: (i) collect, transport, process, or store specimens for the entity providing the item, device, or supply; or (ii) order or communicate the results of tests or procedures for such entity." Therefore, the provision of such items, devices or supplies does not result in a compensation arrangement that implicates the physician self-referral law's referral and billing prohibitions. We discussed this further in CMS Advisory Opinion 2008–01, which can be found at *http://www.cms.gov/Medicare/Fraud-and-Abuse/PhysicianSelfReferral/Downloads/CMS-AO-2008-01.pdf*. Accordingly, the provision of certain interfaces, such as those described by the commenters, need not satisfy the requirements of § 411.357(w).

We disagree with the commenter that asserted that interfaces are not sufficiently analogous to facsimile machines. We believe that a limited-use interface (as described previously) is the contemporary analog to the limited-use computer or facsimile described in the example from the 1998 proposed rule preamble (63 FR 1693 and 1694 (January 9, 1998)). Moreover, the mode of technology is not restricted by the language of section 1877(h)(1)(c) of the Act nor is its cost, which is, in any event, outside the scope of this rulemaking.

Comment: Several commenters inquired whether our proposal to prohibit use of the exception for donations of electronic health records items and services by laboratory companies would apply to suppliers of both anatomic and clinical pathology services, and suggested that our proposal should apply to both. Commenters also inquired about the application of this proposal to hospitals

that operate laboratory companies for non-hospital affiliated customers. Raising concerns about an uneven playing field, some of these commenters urged us to exclude such hospitals from the universe of protected donors if we determined to exclude laboratory companies. One commenter suggested that we effectuate this limitation by restricting protected hospital donations to those made to the hospital's employed physicians and the hospital's wholly-owned physician practices.

Response: Our proposal applied to "laboratory companies" and did not distinguish between those that provide anatomic pathology services and those that provide clinical pathology services. We intend that references to "laboratory company" or "laboratory companies" include entities that furnish both types of DHS.

With respect to the commenters' suggestion to limit or prohibit hospital donations of electronic health records items and services, we appreciate the concerns articulated by the commenters, but are not adopting their suggestion at this time. We continue to believe that hospitals have a substantial and central stake in patients' electronic health records. Further, the types and prevalence of the concerns that have been brought to the OIG's attention and discussed elsewhere in this final rule about donations by laboratory companies have not arisen, to our knowledge, in the hospital-donation context.

We are also clarifying that, if a hospital furnishes clinical laboratory services through a laboratory that is a department of the hospital for Medicare purposes (including cost reporting), and the hospital bills for the services through the hospital's provider number, then the hospital would not be a "laboratory company" and would continue to qualify as a protected donor under the modified exception. However, if a hospital-affiliated or hospital-owned company with its own supplier number furnishes clinical laboratory services that are billed using a billing number assigned to the company and not to the hospital, the company would be a "laboratory company" and would no longer qualify as a protected donor. The ability of the affiliated hospital to avail itself of the exception would be unaffected. We remind readers that it is the substance, not the form, of an arrangement that governs under the physician self-referral law.

Comment: One commenter requested that, if we finalize our proposal to exclude laboratory companies from the universe of protected donors, we specifically clarify that "[laboratory companies] are prohibited from providing [ ] software to physicians unless they comply with another one of the existing exceptions." The commenter went on to cite examples of software leases and sales at fair market value that could potentially qualify for protection under an exception other than the one at § 411.357(w).

Response: We decline the commenter's invitation to make this clarification. Exceptions set forth specific requirements that, if satisfied, assure the parties involved that physician referrals to the entity for DHS are not prohibited and that the entity may bill Medicare for the services furnished pursuant to those physician referrals. As we have stated in prior rulemakings, an arrangement need not satisfy the requirements of a particular exception. Rather, the parties to an arrangement may avail themselves of any applicable exception to protect the physician's referrals to the DHS entity with which he or she (or an immediate family member) has a financial relationship.

Comment: One commenter shared its concerns about a practice that it described as "post-donation in-sourcing." The commenter stated that it is aware of situations in which laboratory companies are donating electronic health records technology to referring physicians only to have those physicians in-source their laboratory services shortly after the donation. The commenter suggested that the donations enable referring physicians to avoid bearing the full cost of electronic health records technology without continued referrals to the donating laboratory company.

Response: We are not modifying the exception to address the commenter's concern. We remind stakeholders that the exception does not require the physician recipient to make referrals to the donor. To the contrary, § 411.357(w)(5) prohibits the physician recipient and his or her practice from making the receipt, amount, or nature of the donated items or services a condition of doing business with the donor. Moreover, § 411.357(w)(6) prohibits determining the eligibility of a physician recipient or the amount or nature of the items or services to be donated in a manner that directly takes into account the volume or value of referrals or other business generated between the parties. Whether protection is afforded under the exception to the types of arrangements described by the commenter will depend on whether all of the requirements of the exception are satisfied.

Comment: Two commenters raised issues regarding the type of remuneration permissible under the exception at § 411.357(w). One commenter characterized the exception as allowing laboratory companies to donate funds to physician recipients to help them implement electronic health records technology. Another commenter noted that some donations from laboratory companies have included hardware.

Response: We remind stakeholders that the exception at § 411.357(w) applies only to the donation of *nonmonetary* remuneration (in the form of software or information technology and training services) necessary and used predominantly to create, maintain, transmit, or receive electronic health records. As stated in the preamble to the August 2006 final rule (71 FR 45161), reimbursement for previously incurred expenses is not protected, as it poses a substantial risk of program and patient abuse. We also remind stakeholders that the exception does not protect the donation of hardware.

Comment: Although the majority of commenters supported excluding laboratory companies from the types of entities that may donate electronic health records items and services under the exception, some commenters made other recommendations related to protected donors. A number of commenters recommended that we maintain our current scope of protected donors; that is, allow any entity (as defined at § 411.351) to provide electronic health records items and services to a physician. Some of these commenters stated that limiting the scope of protected donors could have an impact on specialists, who, according to the commenters, still have relatively low rates of electronic health records adoption. Along the same lines, one commenter stated that limiting the categories of donors that may seek protection under the exception will negatively impact physician recipients by preventing certain entities from helping to move the entire healthcare system toward more interoperable electronic health record systems. Others cautioned that restricting the universe of permissible donors will stymie innovation and restrict learning from the technology. Finally, some commenters contended that laboratory companies and other ancillary service providers have a legitimate clinical interest in donating electronic health records technology and that many physician practices depend on it.

Some commenters, while acknowledging our concerns regarding abusive donation practices, suggested

alternative means to address the concerns we articulated in the proposed rule. These commenters variously recommended that we strengthen interoperation requirements, provide physician education materials, or adopt enforcement policies to prevent abuses rather than limiting the universe of potential donors of electronic health records items and services.

Response: We agree with many of the reasons articulated by the commenters supporting a fully expansive universe of protected donors under the exception. We recognize that limiting the universe of potential donors could constrain the ability of many physicians to adopt electronic health records technology. However, we are persuaded by the commenters that cited examples or patterns of program abuse by laboratory companies and are amending the exception to limit permissible donors under § 411.357(w) by excluding laboratory companies. Other than with respect to laboratory companies, the universe of protected donors will remain the same. We will continue to monitor and may, prior to the end of 2021, reconsider in a future rulemaking the risk of program or patient abuse relating to the use of the exception by other donors or categories of donors.

We appreciate the suggestions from commenters regarding alternative means of addressing abusive donation practices. However, our authority under section 1877(b)(4) of the Act permits us to establish exceptions to the physician self-referral law only where protected financial relationships would pose no risk of program or patient abuse. We do not believe that adopting the commenters' alternative suggestions for addressing our concerns would meet this standard.

Comment: We received a number of comments requesting that we retain certain categories of providers and suppliers within the universe of permissible donors of electronic health records items and services under the exception at § 411.357(w). For example, commenters that provide dialysis services specifically requested that they remain protected donors. One of the dialysis-provider commenters noted that excluding this specialty would have a chilling effect on the development and availability of the specialized electronic health records systems used by nephrologists. A few commenters requested that we continue to include hospitals and health systems as protected donors in order for them to retain the ability to assist physicians in adopting electronic health records technology. Other commenters requested that we explicitly retain home health agencies as permissible donors. In support of retaining home health agencies, one commenter stated that the depth, breadth, and frequency of communications between home health agencies and other direct care providers makes the use of interoperable electronic health records technology essential to improving clinical outcomes and financial efficiencies. We also received comments in support of retaining safety net providers and pharmacies as protected donors.

Response: We agree generally with the thrust of these comments. We recognize the value of permitting entities that participate directly in the provision of health care to patients and that have a need to coordinate with care providers to donate electronic health records items and services to facilitate those interactions. We take no action in this final rule to prohibit entities other than laboratory companies from utilizing the exception.

Comment: Some commenters agreed with the option we presented in the proposed rule to retain the ability of any DHS entity to donate electronic health records items and services, except suppliers of ancillary services associated with a high risk of fraud and abuse. A few of these commenters suggested that a targeted approach would minimize the risk of unintended consequences. One of these commenters asserted that we should exclude the particular individuals or entities that have been the subject of complaints. Another of these commenters specifically recommended that we target categories of suppliers with a history or pattern of abusive behavior.

Other commenters variously recommended excluding laboratories, DME suppliers, home health agencies, or safety net providers from the types of entities that may donate electronic health records items and services under the exception. One commenter asserted that entities like laboratory companies and DME suppliers do not have an overarching and essential interest in having physicians use electronic health records, nor do they coordinate the patient's care. In contrast, one commenter objected to singling out a provider or supplier type to exclude from the scope of protected donors. This commenter stated that such an action unjustly: (1) penalizes a whole category of providers or suppliers when most, in the commenter's assessment, are law-abiding; and (2) supports other providers or suppliers that may have similar motivations.

Response: We respond elsewhere in this final rule to the commenters who expressly recommended removing only laboratory companies from the universe of permissible donors. With respect to the other commenters, we note that, in the proposed rule (78 FR 21312), we specifically requested comments, "with supporting reasons," regarding whether particular provider or supplier types should be prohibited from utilizing the exception at § 411.357(w). Some commenters suggested that we prohibit other types of entities from donating electronic health records items and services under the exception, but the comments did not provide specific examples of abusive practices with respect to donations of electronic health records items and services by such donors, nor did the comments indicate problems with other types of entities comparable to those that are arising in the context of laboratory companies. Finally, we do not agree with the commenters that laboratory companies, DME suppliers, home health agencies, safety net providers, or, for that matter, any other "ancillary" service providers necessarily do not have an overarching and essential interest in having physicians use electronic health records, or that they do not coordinate the patient's care. It is the behavior of laboratory companies and physician recipients of donations from laboratory companies of which we are aware that drives our determination to finalize our proposal to exclude laboratory companies from the types of entities that may provide donations under the exception. We have not heard the same concerns about other categories of donors or types of donation arrangements and, therefore, believe it is premature to exclude potential donors (other than laboratory companies). We also decline to identify particular individuals or organizations in the regulation.

Comment: A few commenters recommended restricting the entities that may donate electronic health records items and services under the exception to those types listed in the MMA. These commenters also suggested imposing additional restrictions on donations from this limited universe of donors. For example, one commenter recommended limiting the application of the exception to hospitals and providers operating in an integrated setting and to MA plans and providers under contract with them. Another commenter suggested limiting the application of the exception to a similar integration model, and to hospitals that donate electronic health records items and services to their employed physicians and the physician groups that they own. In contrast, one

commenter suggested that limiting the protected donor types to the original MMA list would be too restrictive. The commenter believed that some provider types not listed in the MMA should have the opportunity to make donations (for example, ambulatory surgical centers that now perform many procedures previously only performed in hospitals).

Response: We agree that providers and suppliers operating in an integrated environment need interoperable electronic health records. However, we do not believe that the need for this technology is limited to those individuals and entities in an integrated care setting. Patients may receive care from providers and suppliers that are not in the same integrated system, and the patient's medical records need to be shared with those providers and suppliers that also care for the patient. The Department's goal continues to be fostering broad adoption of interoperable electronic health records technology. In furtherance of that goal, we seek to limit the applicability of the exception vis-à-vis permissible donors only to the extent necessary to prevent program and patient abuse. At this time, we believe that excluding laboratory companies from the types of entities that may utilize the electronic health records exception, rather than limiting the universe of permissible donors to the MMA list of donors (or some other subset of permissible donors) strikes the right balance between furthering the Department's goal and preventing program and patient abuse.

2. Data Lock-In and Exchange

We solicited comments on what new requirements could be added to, or how we could modify existing requirements of, the exception at § 411.357(w) in order to achieve our goals of: (1) preventing misuse of the exception that results in data and referral lock-in; and (2) encouraging the free exchange of data (in accordance with protections for privacy). Additionally, we requested comments on whether such requirements, if any, should be in addition to, or in lieu of, our proposal to limit the entities whose donations of electronic health records items and services may qualify for protection under the exceptions. Finally, we solicited comments on possible modifications to § 411.357(w)(3), which requires that, in order to qualify for the protection of the exception, "[t]he donor (or any person on the donor's behalf) does not take any action to limit or restrict the use, compatibility, or interoperability of the items or services with other electronic prescribing or electronic health records systems." We solicited these comments to explore whether this requirement could be modified to reduce the possibility of data and referral lock-in.

Comment: Many commenters asserted that the current requirements of the exception provide adequate safeguards to prevent donations of electronic health records items and services that result in data or referral lock-in between the donor and physician recipient. These commenters expressed general support for the investigation of arrangements that may not satisfy the requirements of the exception. Several of these commenters were also concerned that adding or modifying requirements may increase the burden of compliance and, therefore, lead to fewer entities willing to make appropriate donations of electronic health records items and services.

Response: In general, we agree with these commenters. We are not persuaded to adopt significant new requirements or modifications to the exception to address the issue of data or referral lock-in. In addition, we do not wish to take any action that inadvertently discourages donors and physician recipients from entering into appropriate donation arrangements. However, we are making limited clarifications to § 411.357(w)(3) to reflect our intended meaning of this requirement and our interpretation of existing requirements for interoperability as it pertains to potential data or referral lock-in. We also remain committed to assisting our law enforcement partners in the investigation of potentially abusive arrangements that purport to satisfy the requirements of the exception but, in fact, do not.

Comment: Several commenters expressed concerns about donations of electronic health records items and services that lead to data lock-in. As described elsewhere in this final rule, some commenters suggested that, although some donated electronic health records software has the ability to be interoperable, vendors may charge providers who do not use the same donated software high fees to interface with it. The commenters contended that these business practices result in electronic health records software that is not practically interoperable because non-donor providers cannot afford to connect to the donated electronic health records items and services. Other commenters expressed general concerns that donated electronic health records items or services are capable of interoperation, but that physician recipients implicitly agree to send referrals using the technology only to the donor. These commenters did not provide specific recommendations to modify the data lock-in requirements of the exception, but generally supported our efforts to prevent data lock-in.

Two commenters representing laboratory companies expressed specific concerns about a feature of donated software that may lead to data lock-in. These commenters explained that some software is designed to limit the accessibility of data that is received from an electronic health records system that is different than the donated software. Most often, data sent from the non-donated electronic health records system cannot populate automatically in a patient's electronic health record or other limits are placed on the portability of data sent from the non-donated electronic health records system. According to these commenters, the limited accessibility of the data makes it harder for the physician recipient to access and use it for clinical purposes. As a result, a physician recipient is more likely to utilize only the donor's services to make sure that necessary data is easily accessible. These commenters asserted that there are no technical solutions to reducing the possibility of data lock-in; rather, the only solution is to remove laboratory companies from the types of entities whose donations may be protected under § 411.357(w).

Several other commenters generally endorsed our efforts to prevent data and referral lock-in. These commenters evidenced strong support for the free exchange of health information across different provider types to better coordinate care for patients. However, apart from supporting our efforts to ensure that electronic health records systems are interoperable, the commenters made no specific recommendations regarding modifications to the exception.

Response: We share the commenters' concerns about the interoperability of donated electronic health records software. Arrangements involving the donation of electronic health records software that has limited or restricted interoperability due to action taken by the donor or by any person on the donor's behalf (which could include the physician recipient acting on the donor's behalf) would fail to satisfy the requirement at § 411.357(w)(3) and would be inconsistent with an important purpose of the exception, which is to promote the use of technology that is able to communicate with products from other vendors. For example, arrangements in which the donor takes an action to limit the use,

communication, or interoperability of the electronic health records items or services by entering into an agreement with the physician recipient to preclude or inhibit any competitor from interfacing with the donated items or services would not satisfy the requirement of § 411.357(w)(3). Other donation arrangements described by the commenters in which electronic health records technology vendors charge high interface fees to non-recipient providers or competitors may also fail to satisfy the requirements of § 411.357(w)(3). We believe that any action taken by a donor (or any person on behalf of the donor, including the electronic health records technology vendor or the physician recipient) to limit the use of the donated electronic health records items or services by charging fees to prevent non-recipient providers and the donor's competitors from interfacing with the donated items or services would pose legitimate concerns that parties were improperly locking in data and referrals, and that the arrangement in question would not satisfy the requirements of the exception. However, whether a donation actually satisfies the requirements of the exception depends on the specific facts of the donation arrangement.

Comment: One commenter expressed concern regarding data lock-in and supported ensuring that donations of electronic health records items and services are transparent and free of any attempts to steer future business. Although it denied knowledge of any specific abuse of the exception, the commenter requested that we allow individuals or entities to remedy noncompliance with the physician self-referral law due to a donation that may not be protected by the exception. The commenter suggested that the remedy for violation of the physician self-referral law due to an arrangement's failure to satisfy the requirements of the exception at § 411.357(w) should be to make physician recipients pay the fair market value of any costs for ongoing support of the donated electronic health records items or services. The commenter suggested allowing 3 years for the physician recipient to either pay full value for the donated electronic health records items and services or transition to a new system.

Response: We appreciate the commenter's concern and recommendation; however, we decline to make the suggested modification. Implementing the commenter's suggestions would be outside the scope of our statutory authority under section 1877(b)(4) of the Act to promulgate exceptions to the physician self-referral law that pose no risk of program or patient abuse.

Comment: A few commenters urged us to amend the exception to require the physician recipient or the donor to participate in health information exchange with an electronic health records system that is different from the one donated. One commenter specifically suggested that the physician recipient should have to demonstrate exchange with at least one other electronic health records system within a certain timeframe after receipt of the donation. Another commenter suggested that the donor should have to—upon request—enable the physician recipient of the donation to engage in bi-directional exchange of data with competitors not using the same electronic health records system.

Response: We appreciate the commenters' recommendations; however, we are not modifying the exception to require the parties to an arrangement for the donation of electronic health records items and services to demonstrate interoperation. We question whether adequate demonstration of interoperation could occur only after the donation has been made, which would create uncertainty about whether the donation satisfies the requirements of the exception. This uncertainty would undermine the Department's broad goal for the exception—that is, to support widespread adoption of interoperable electronic health records technology. However, it is our intent and expectation that interoperation of donated items and services will, in fact, occur, and we believe the requirements of the exception, in their entirety, promote such interoperation. Moreover, routine interoperation with systems other than those of the donor may be evidence that neither the donor nor any person on the donor's behalf has taken any action to limit or restrict the use, compatibility, or interoperability of the items or services with other electronic prescribing or electronic health records systems, as required under § 411.357(w)(3).

Further, we note that the Department is considering a number of policies to accelerate and advance interoperability and health information exchange. As part of this process, ONC and CMS issued a notice requesting input from the public on possible policies and programmatic changes to accelerate electronic health information exchange among individuals and entities that furnish health care items and services, as well as new ideas that would be both effective and feasible to implement (78 FR 14793). We believe that the process through which ONC and CMS will jointly act is better-suited than this exception to consider and respond to evolving functionality related to the interoperability of electronic health records technology. The paper that addresses the public comments we received and outlines the Department's strategy for accelerating health information exchange is available at: *http://www.healthit.gov/policy-researchers-implementers/accelerating-health-information-exchange-hie.*

Comment: In response to our solicitation of comments, some commenters provided suggestions as to how we could broaden the current requirements related to data lock-in. Two commenters suggested amending § 411.357(w)(3), which prohibits the donor (or any person on the donor's behalf) from taking any action to limit or restrict the use, compatibility, or interoperability of the items or services with other "electronic prescribing or electronic health records systems." Specifically, the commenters suggested that we replace the reference to "electronic prescribing or electronic health records systems" with "health information technology platforms or other health care providers." The commenters asserted that this proposed change reflects the development of health information technology that may not be classified as an electronic health records system, but supports the free exchange of health information. These two commenters also suggested that we modify § 411.357(w)(3) to state that neither the donor *nor the physician recipient* may take any action to limit the interoperability of donated electronic health records items or services and that we require that the modified condition be included as part of the written agreement required under § 411.357(w)(7).

Another commenter suggested amending § 411.357(w)(3) by providing a non-exhaustive list of actions that would cause a donation not to satisfy this requirement and by establishing a process for entities to provide the Department with information about potential abuses of the exception. A representative of several health plans suggested modifying the exception to ensure that, in the context of health information exchange, the interoperability requirement of the exception requires that all key stakeholders, including health insurance plans, have access to the health information exchange. The commenter suggested that we modify the interoperability condition at 42 CFR 411.357(w)(2) to prohibit restrictions on the communication and exchange of

data with any covered entity as defined at 45 CFR 160.103.

Response: The language in the existing regulatory text prohibits donors (or persons on the donor's behalf) from taking any action to limit or restrict the use, compatibility, or interoperability of donated items or services with other "electronic prescribing or electronic health records systems." The term "electronic prescribing or electronic health records systems" was intended to be broad in order to account for developments in the health information technology industry. Based on the commenters' suggestions it appears, however, that stakeholders may have read this term more narrowly. This narrow reading is inconsistent with our intended meaning. We have always believed and continue to believe that an action taken by a donor (or on behalf of the donor) that limits the use, compatibility, or interoperability of donated items or services with *any other health information technology* may impede the free exchange of data and limit the ability of providers and suppliers to coordinate care, which is inconsistent with the goals of the exception. Therefore, we are clarifying 42 CFR 411.357(w)(3) by adding, by way of example and without limitation, a non-exhaustive list of some of the forms of technologies that we believe are included within the meaning of the existing regulatory language. We are not adopting the commenters' suggested edit, as we do not believe that it is necessary in light of our clarification. We also decline to modify 42 CFR 411.357(w)(2) to prohibit restrictions on the communication and exchange of data with any covered entity as defined at 45 CFR 160.103. We believe that existing 42 CFR 411.357(w)(3), which we have clarified in this final rule as including health information technology applications, products, or services, promotes interoperability with a variety of providers and suppliers, as well as other health care entities that may play a role in the coordination of care, including health plans that operate health information technology applications, products, or services.

We are also not adopting the commenters' suggestion to modify the exception to state that neither the donor nor the physician recipient may take any action to limit the interoperability of donated electronic health records items or services. The requirement at § 411.357(w)(3) prohibits the donor (or any person on behalf of the donor) from taking any action that limits or restricts the use, compatibility, or interoperability of the donated electronic health records items or services. To the extent that a physician recipient takes an action on the donor's behalf to limit the use, compatibility, or interoperability of donated items or services, that donation would fail to qualify for protection under the exception. Because we see no obvious reason, other than at the behest of the donor or as a condition of the donation, why a physician recipient would take action to limit the use, compatibility, or interoperability of donated items or services, we believe that any action of this type by a physician recipient would be suspect. We are not making the suggested modification because we believe the concern articulated by the commenters is already addressed by the existing regulatory language and the policies we are adopting in this final rule. Accordingly, we are not making any corresponding revisions to require that the recommended provision be incorporated into the written agreement required under § 411.357(w)(7).

Finally, we are not revising the exception to provide in regulation text examples of actions that may cause a donation not to satisfy the requirements of § 411.357(w)(3). Whether a donation satisfies the requirements of the exception requires a case-by-case analysis and depends on the specific facts of the donation.

Comment: One commenter objected to the use of the exception to address the issue of data lock-in. The commenter contended that data lock-in may arise in response to legitimate concerns, such as the Health Insurance Portability and Accountability Act (HIPAA) privacy and security rules, liability issues, licensing requirements, and antitrust issues. Further, according to the commenter, data lock-in conditions may cause uncertainty for donors because parties may not be able to determine whether a donation satisfies the requirements of the exception until after donation.

Response: Nothing in this final rule is intended to prohibit legitimate actions taken to ensure that electronic health records items and services appropriately protect data, including measures to ensure the privacy and security of health information data. We recognize that there may be appropriate security, privacy and other business reasons to protect data. This final rule addresses only actions that inappropriately lock in data, for example, locking in data to secure future referrals.

Comment: One commenter expressed support for preventing electronic health records data lock-in and the free exchange of data. However, the commenter did not agree that additional requirements designed to promote these goals would be effective. Instead, the commenter suggested that we adopt payment models that continue to foster care coordination activities.

Response: We appreciate the commenter's suggestion; however, changes to our payment models are outside the scope of the proposed rule. We note that, in our joint Request for Information, we and ONC solicited input on options for improving several different CMS payment models to support better the adoption of interoperable electronic health records technology (78 FR 14797). As noted earlier, the paper that addresses the public comments we received and outlines the Department's strategy for accelerating health information exchange is available at: *http://www.healthit.gov/policy-researchers-implementers/accelerating-health-information-exchange-hie.*

Comment: Two commenters suggested data lock-in could be limited by requiring electronic health records software to be open or "open source." Both commenters asserted that open source software would limit data lock-in due to the transparent nature of open source software. In addition, it would lead to greater interoperability of electronic health records systems. One commenter also suggested that we require mandatory advance disclosure of the operational and business policies and practices associated with the electronic health records technologies. One commenter suggested that we adopt the e-DOS standard as certification criteria for electronic health records.

Response: Although we share the commenters' support for the free exchange of health information where appropriate protections for privacy and security exist, we are not adopting their recommendations because software certification criteria and standards are determined by ONC and are, therefore, outside the scope of this rulemaking.

3. Covered Technology

In the proposed rule, we noted that we received questions concerning whether certain items or services fall within the scope of the technology potentially covered under the exception at § 411.357(w). There, we stated that the answer to such questions depends on the exact items or services being donated. We referenced our discussion in the August 2006 final rule regarding our interpretation of the term "software, information technology and training services necessary and used predominantly." We stated that we believe that the current regulatory text, when read in light of the preamble discussion, is sufficiently clear concerning the scope of covered

technology. Nonetheless, because we received suggestions from stakeholders to modify § 411.357(w) to reflect explicitly this interpretation, in the proposed rule (78 FR 21313), we sought comments from the public regarding this issue. After considering the public comments with respect to this issue, we determined not to make any changes to the regulation text to address the scope of covered technology.

Comment: Several commenters stated that the regulatory text describing the scope of technology covered by the exception, when read in light of the August 2006 final rule preamble, is sufficiently clear. One of these commenters urged us not to revise the regulation in any way that might limit the scope of covered technology, limit the ability of donors and physician recipients in the design and selection of items and services, or create barriers to achieving interoperability. Other commenters agreed that the current definition of covered technology is appropriate, with two of these commenters suggesting that we revisit the definition in the future as health information technology evolves. Still other commenters asserted that the existing regulatory language can be interpreted to include "services that enable the interoperable exchange of electronic health records data;" thus, no revisions to the regulatory text are required. In contrast, one commenter suggested that we incorporate into the regulatory text the preamble language from the August 2006 final rule where we discussed examples of items and services that would qualify for coverage under the exception. Another commenter suggested that we revise the regulatory text to include as many examples of covered "software, information technology and training services" as possible while emphasizing that the list is not exhaustive.

Response: We agree that maintaining flexibility is important, particularly as health information technology evolves. We endeavor to avoid revisions to the regulation text that could inadvertently narrow the exception, which is intended to promote the adoption of interoperable electronic health records technology. Moreover, our interpretation of what is covered by the exception has not changed. As we stated in the proposed rule (78 FR 21313), whether specific items or services fall within the scope of covered technology under the exception depends on the exact items or services that are being donated. If the "services that enable the interoperable exchange of electronic health records data" are of the type that do not meet the requirements for covered technology (for example, because they include hardware, storage devices, or have core functionality other than electronic health records), they would not be eligible for protection under the exception at § 411.357(w).

For these reasons, we are not revising the regulation text at § 411.357(w) to identify any specific types of items or services that may be donated if the other requirements of the exception are satisfied. We are also not modifying the examples identified in the preamble discussion in the August 2006 final rule (71 FR 45151). The exception continues to protect nonmonetary remuneration in the form of software, information technology and training services necessary and used predominantly to create, maintain, transmit, or receive electronic health records.

Comment: A few commenters requested clarification regarding whether third-party fees related to the exchange of health information, such as health information exchange service charges for interconnectivity, are "covered technologies" under the exception.

Response: The exception protects only *nonmonetary* remuneration, in the form of software and information technology and training services, that is necessary and used predominantly to create, maintain, transmit, or receive electronic health records. Whether particular items or services, such as interconnectivity services, may be donated under the exception depends on the exact items or services being donated.

Comment: One commenter suggested that, in addition to maintaining as much flexibility as possible, we broaden the scope of the technology covered by the exception to include software and services used for care coordination, quality measurement, improving population health, or improving the quality or efficiency of health care delivery among parties. The commenter noted that some of these items may be covered by the waivers issued in connection with the Medicare Shared Savings Program (MSSP); however, because those waivers extend only to parties participating in that program, protection for the donation of items or services that advance the Department's goal of encouraging the adoption of health information technology that supports public policy objectives is not available to other health care industry stakeholders. To advance these goals in a broader way, the commenter suggested that the exception be expanded to include items potentially covered by the MSSP pre-participation waiver, such as electronic health information exchanges that allow for electronic data exchange across multiple platforms, data reporting systems (including all-payer claims data reporting systems), and data analytics (including staff and systems, such as software tools, to perform analytic functions). Another commenter suggested that we broaden the scope of technology covered by the exception to include software separate from the certified electronic health records software as long as it is interoperable with the electronic health records software. The commenter gave as examples of such electronic health records-associated components "patient portals that support patient engagement, direct and other standards-compliant means for secure patient information exchange between providers, solutions to support transition care, and tools that may assist in inter- and intra-patient matching." A third commenter urged us to consider a broader array of covered technologies, provided that they support policy goals such as reducing hospital readmissions and coordinated care across settings outside of traditional office settings, including telemonitoring and telemedicine. Another commenter suggested that we expand the protection of the exception to cover "any additional items or services that will be required or helpful in meeting Stage 2 or Stage 3 requirements for [the EHR Incentive Programs]."

Response: As stated previously, whether specific items or services fall within the scope of covered technology under the exception at § 411.357(w) depends on the exact items or services that are being donated. Some of the particular items and services that may be included within the broad categories identified by the commenters may be eligible for donation. For example, if a particular software product related to transitions of care was necessary and used predominantly to create, maintain, transmit, or receive electronic health records, then it would be eligible for donation, provided that the donation satisfied all of the other requirements of the exception. As noted previously in this final rule, software is not required to be certified to ONC certification criteria in order to be donated under the exception at § 411.357(w). Thus, software that is separate from certified software may still be eligible for donation if it satisfies the definition of "interoperable" at § 411.351.

To the extent that the commenters suggested that we expand the scope of the exception to protect items and services that are not already eligible for donation, we note that revision of the exception to include such items or services would be outside the scope of

this rulemaking. In the proposed rule (78 FR 21313), with respect to the scope of technology potentially covered by the exception, we sought input from the public regarding the singular issue of "whether the current regulatory text, when read in light of the preamble discussion, is sufficiently clear concerning the scope of covered technology." With regard to whether the scope of the technology covered under the exception should be broadened—as opposed to clarified—we are mindful of the important issues raised by the commenters and may consider them in the future. Further, we note that other exceptions to the physician self-referral law exist to protect financial relationships between physicians and entities furnishing DHS. Depending on the circumstances, some of the arrangements described by the commenters may satisfy the requirements of another exception or may not implicate the physician self-referral law.

Comment: One commenter suggested that we define "equivalent technology" for purposes of the requirement in the exception that the donor of electronic health records items or services may not have actual knowledge of, or act in reckless disregard or deliberate ignorance of, the fact that the physician recipient possesses or has obtained items or services equivalent to those being donated. This commenter also suggested that we prohibit a physician from seeking or accepting a donation of electronic health records technology before a certain period of time has elapsed since the receipt of a previous donation. Another commenter urged us to eliminate maintenance and service agreements from the scope of potentially protected donations under the exception. In the alternative, the commenter suggested that we impose a restriction on the time period that donations of such services would be permitted. The commenter noted concerns that donors may use ongoing donations of maintenance and service agreements to lock in referrals from physician recipients. A commenter that urged us not to extend the availability of the exception suggested that we prohibit the donation of all technology except interfaces for reporting of laboratory results.

Response: Although we appreciate the commenters' suggestions, we are not making the requested changes. We believe that the modifications to and clarifications of § 411.357(w) adopted in this final rule and the clarifications offered in this preamble address the concerns raised by these commenters.

Comment: One commenter asserted that the prohibition on donating equivalent items or services currently included in the exception locks physician practices into a vendor, even if they are dissatisfied with the technology, because the physician recipient must choose between paying the full amount for a new system and continuing to pay 15 percent of the cost of the substandard system. The commenter asserted that the cost differential between these two options is too high and effectively locks physician practices into electronic health records technology vendors.

Response: Although we appreciate the commenter's concern, we continue to believe that items and services are not "necessary" if the physician recipient already possesses equivalent items or services. As we stated in the August 2006 final rule (71 FR 45154), "the provision of equivalent items and services poses a heightened risk of abuse, [because] such arrangements potentially confer independent value on the physician recipient (that is, the value of the existing items and services that might be put to other uses) unrelated to the need for electronic health records technology." Therefore, we are retaining the regulatory preclusion of protection for donation arrangements where the donor has actual knowledge of, or acts in reckless disregard or deliberate ignorance of, the fact that the physician recipient possesses or has obtained equivalent items or services. We expect that physicians would not select or continue to use a substandard system if it posed a threat to patient safety.

Comment: One commenter referenced the proposed rule's statement that "software or information technology and training services necessary and used predominantly for electronic health records purposes" included "information services related to patient care (but not separate research or marketing support services)" (78 FR 21313). The commenter requested that we retract that statement and clarify that it is appropriate for health researchers to use data in electronic health records for research that is related to, for example, evidence-based medicine, population management, or other research, provided that the use complies with applicable Federal, state, and institutional requirements.

Response: We decline to retract our statement in the proposed rule. To promote adoption of electronic health records without risk of abuse, the scope of items and services permitted to be donated under the exception is limited to electronic health records items and services in the form of software and information technology and training services that are "necessary and used predominantly to create, maintain, transmit, or receive electronic health records." Donations of software used for research that is separate from clinical support and information services related to patient care are not consistent with the primary goals of the exception.

The exception at § 411.357(w) addresses only the donation of electronic health records items and services, and not the use of data. Thus, the portion of the comment related to data use is outside the scope of this rulemaking. We note, however, that nothing in the exception prohibits the use of data in electronic health records systems for research purposes (assuming the parties comply with all other applicable laws, including HIPAA privacy protections).

Comment: One commenter requested that CMS confirm that patient portals are within the scope of the technology potentially protected by the exception.

Response: We are not certain what the commenter precisely means by "patient portals." Patient portals come in a variety of forms; the key to the analysis is whether the specific item or service donated is: (1) In the form of software, information technology and training services and; (2) necessary and used predominantly to create, maintain, transmit or receive electronic health records. As we stated in the August 2006 final rule in response to a commenter's recommendation that the exception specifically protect the provision of patient portal software that enables patients to maintain on-line personal medical records, including scheduling functions (71 FR 45152), nothing in the exception precludes protection for patient portal software if it satisfies all of the requirements of the exception.

E. Comments Outside the Scope of This Rulemaking

In addition to the comments described and to which we responded previously, we received several comments from stakeholders, including suggestions on policy changes, that are outside the scope of this rulemaking. For example, one commenter raised concerns about a private insurer's proposed fee schedule for laboratory services. Another commenter expressed concern about "outrageous bills" the commenter received from a laboratory company. Although we appreciate the commenters taking the time to present these concerns, we do not address them here, as they are outside the scope of this rulemaking.

IV. Provisions of the Final Regulations

For the most part, this final rule incorporates the proposed revisions stated in the proposed rule. Specifically, we are revising the exception to exclude laboratory companies from the types of entities that may donate electronic health records items and services under the exception, and are modifying the regulation text at § 411.357(w)(1) to effectuate this change. We are also amending § 411.357(w)(2) by deleting the phrase "recognized by the Secretary" and by replacing it with the phrase "authorized by the National Coordinator for Health Information Technology" and replacing the 12-month timeframe for certification of electronic health records software with a requirement that the software be certified to an edition of the electronic health record certification criteria identified in the then-applicable version of 45 CFR part 170 (ONC's certification program). We are clarifying the requirement at § 411.357(w)(3) prohibiting any action that limits or restricts the use, compatibility, or interoperability of donated items or services. In addition, we are eliminating the requirement at § 411.357(w)(11) that donated electronic health records software include electronic prescribing capability. Finally, we are modifying § 411.357(w)(13) to extend the expiration of the exception from December 31, 2013 to December 31, 2021.

V. Waiver of the Delay in the Effective Date

Ordinarily, we provide a delay of at least 30 days in the effective date of a final rule after the date that the rule is issued. However, the 30-day delay in effective date can be waived if the rule grants or recognizes an exemption or relieves a restriction. We believe that it is appropriate to waive the 30-day delay in effective date for § 411.357(w)(13), which relieves a restriction on donations of electronic health records items and services. Specifically, this final rule amends § 411.357(w)(13) to extend the expiration of the existing exception from December 31, 2013 to December 31, 2021. Without a waiver of the requirement for a delayed effective date, the entire exception will expire on December 31, 2013 and will not be available to protect any ongoing donation arrangements or new donations of electronic health records items and services made to physicians after December 31, 2013. By waiving the 30-day delay in effective date, the exception will not expire, thereby allowing parties to continue utilizing the exception to protect donations of electronic health records items and services. We stress, however, that donations of electronic health records items and services that occur between January 1, 2014 and the effective date of the remaining provisions of this final rule (March 27, 2014) will need to satisfy all of the requirements of the existing exception. The waiver of the 30-day delay in effective date simply serves to maintain the status quo until the rest of this final rule becomes effective.

The 30-day delay in effective date can also be waived if the agency finds for good cause that the delay is impracticable, unnecessary, or contrary to the public interest, and the agency incorporates a statement of the findings and reasons in the rule issued. We find that it is unnecessary to provide a 30-day delay in effective date for § 411.357(w)(13) because an earlier effective date simply allows parties to continue making donations under the existing electronic health records items and services exception; it does not impose any new requirements or restrictions on potentially affected parties. Moreover, we find that a 30-day delayed effective date for § 411.357(w)(13) is impracticable because it would cause the entire exception to expire, thereby nullifying this final rule.

VI. Collection of Information Requirements

The provisions in this final rule will not impose any new or revised information collection, recordkeeping, or disclosure requirements. Consequently, this rule does not need additional Office of Management and Budget review under the authority of the Paperwork Reduction Act of 1995.

VII. Regulatory Impact Analysis

We have examined the impact of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). We believe that this final rule does not reach the economic threshold for being considered economically significant and, thus, is not considered a major rule. It is not economically significant because it will not have a significant effect on program expenditures, and there are no additional substantive costs to implement the resulting provisions. The rule modifies an existing exception to the physician self-referral law, and the modifications would not impose additional substantive costs on those seeking to utilize the exception. Further, the donation of electronic health records items or services and the use of the exception to protect such donations is entirely voluntary. In section III. of this final rule, we provide a detailed discussion and analysis of the alternatives considered in this final rule, including those considered for extending the expiration date of the electronic health records exception, limiting the types of entities that may donate electronic health records items and services, and tying the timeframe for deeming electronic health records software to ONC's certification program. Finally, we received no public comments specific to the RIA set forth in the proposed rule.

This final rule extends the exception's expiration date to December 31, 2021; excludes laboratory companies from the types of entities that may donate electronic health records items and services; updates the provision under which electronic health records software is deemed interoperable; clarifies the requirement at § 411.357(w)(3) prohibiting any action that limits or restricts the use, compatibility, or interoperability of donated items or services; and removes the requirement related to electronic prescribing capability. Neither this final rule nor the regulations it amends requires any entity to donate electronic health records items and services to physicians, but we expect these changes to continue to facilitate the adoption of electronic health records technology by eliminating perceived barriers rather than creating the primary means by which physicians would adopt this technology.

The summation of the economic impact analysis regarding the effects of electronic health records in the ambulatory setting that is presented in

the August 2006 final rule (71 FR 45164) still pertains to this final rule. However, since the August 2006 final rule, several developments have occurred to make us conclude that it is no longer necessary to retain a requirement related to electronic prescribing capability in the electronic health records exception. These developments include the passage of two laws encouraging adoption of electronic prescribing and electronic health records: (1) the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA), Public Law 110–275; and (2) the Health Information Technology for Economic and Clinical Health (HITECH) Act, Title XIII of Division A and Title IV of Division B of the American Recovery and Reinvestment Act of 2009 (ARRA), Pub. L. 111–5. In addition, there has been an increase over the past few years in the rate of electronic health records-based electronic prescribing capabilities.[3]

As discussed in more detail in the preamble to the proposed rule, section 132 of MIPPA authorized an electronic prescribing incentive program (starting in 2009) for certain types of eligible professionals. The HITECH Act authorized us to establish the EHR Incentive Programs for certain eligible professionals, eligible hospitals, and critical access hospitals. Also, the HITECH Act required that eligible professionals under the EHR Incentive Programs demonstrate meaningful use of certified electronic health records technology, including the use of electronic prescribing. Specifically, the final rule for Stage 2 EHR Incentive Programs (September 4, 2012; 77 FR 53968) includes more demanding requirements for electronic prescribing and identifies electronic prescribing as a required core measure. As a result, beginning in calendar year 2015, an eligible professional risks a reduction in the Medicare Physician Fee Schedule payment amount that will otherwise apply for covered professional services if he or she is not a meaningful electronic health records technology user for a reporting period during that year. Our intent remains to allow physicians not to receive products or services they already own, but rather to receive electronic health records items and services that advance the adoption and use of electronic health records. Lastly, according to ONC, electronic prescribing by physicians using electronic health records technology has increased from 7 percent in December 2008 to approximately 48 percent in June 2012.[4] Furthermore, the rules recently published to implement Stage 2 of the EHR Incentive Programs (77 FR 54198 and 77 FR 53989), continue to encourage physicians' use of electronic prescribing technology. However, due to data limitations, we are unable to estimate accurately how much the electronic health records exception has contributed to the increase in electronic prescribing. Nevertheless, we believe that, as a result of recent developments, physician adoption of electronic prescribing and electronic health records technology will continue to increase despite removal of the electronic prescribing capability requirement in the electronic health records exception.

The RFA requires agencies to analyze options for regulatory relief of small entities, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of less than $7.0 million to less than $35.5 million in any 1 year. Individuals and States are not included in the definition of a small entity. This final rule does not result in an economic effect on small entities of 3 to 5 percent or more of their total revenues or costs. As a result, the Secretary has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area for Medicare payment regulations and has fewer than 100 beds. The Secretary has determined that this final rule would not have a significant economic impact on the operations of a substantial number of small rural hospitals (that is, an effect of more than 3 to 5 percent of their total revenues or costs).

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2013, that threshold is approximately $141 million. This final rule imposes no mandates and, as a result, will have no consequential effect on State, local, or tribal governments, or on the private sector, of $141 million or more.

Executive Order 13132 establishes certain requirements that an agency must meet when it issues a final rule that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. For the reasons stated earlier, this final rule will not have a substantial effect on State or local governments, nor does it preempt State law or have Federalism implications.

In accordance with the provisions of Executive Order 12866, this rule was reviewed by the Office of Management and Budget.

List of Subjects for 42 CFR Part 411

Kidney diseases, Medicare, Physician referral, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR part 411 as set forth below:

PART 411—EXCLUSIONS FROM MEDICARE AND LIMITATIONS ON MEDICARE PAYMENT

■ 1. The authority citation for part 411 continues to read as follows:

Authority: Secs. 1102, 1860D–1 through 1860D–42, 1871, and 1877 of the Social Security Act (42 U.S.C. 1302, 1395w–101 through 1395w–152, 1395hh, and 1395nn).

■ 2. Section 411.357 is amended as follows:

■ A. Revising paragraphs (w)(1) through (3).

■ B. Removing and reserving paragraph (w)(11).

■ C. In paragraph (w)(13), removing the date "December 31, 2013" and adding the date "December 31, 2021" in its place.

The revision reads as follows:

§ 411.357 Exceptions to the referral prohibition related to compensation arrangements.

* * * * *

(w) * * *

(1) The items and services are provided to a physician by an entity (as defined at § 411.351) that is not a laboratory company.

[3] See, for example, State Variation in E-Prescribing Trends in the United States, available at *http://www.healthit.gov/sites/default/files/us_e-prescribingtrends_onc_brief_4_nov2012.pdf.*

[4] See, for example, State Variation in E-Prescribing Trends in the United States, available at *http://www.healthit.gov/sites/default/files/us_e-prescribingtrends_onc_brief_4_nov2012.pdf.*

(2) The software is interoperable (as defined in § 411.351) at the time it is provided to the physician. For purposes of this paragraph, software is deemed to be interoperable if, on the date it is provided to the physician, it has been certified by a certifying body authorized by the National Coordinator for Health Information Technology to an edition of the electronic health record certification criteria identified in the then-applicable version of 45 CFR part 170.

(3) The donor (or any person on the donor's behalf) does not take any action to limit or restrict the use, compatibility, or interoperability of the items or services with other electronic prescribing or electronic health records systems (including, but not limited to, health information technology applications, products, or services).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 95

[ET Docket No. 08–59; FCC 12–54]

Medical Body Area Networks

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: In this document, the Federal Communications Commission ("Commission") announces that certain rules revised in the "Amendment of the Commission's Rules to Provide Spectrum for the Operation of Medical Body Area Networks" adopted in a *First Report and Order,* ET Docket No. 08–59 (FCC 12–54), to the extent it contained information collection requirements that required approval by the Office of Management and Budget (OMB) was approved on October 26, 2013. This document is consistent with the *First Report and Order,* which stated that the Commission would publish a document in the **Federal Register** announcing the effective date of those rules.

DATES: The amendments to 47 CFR 95.1215(c), 95.1217(a)(3), 95.1223 and 95.1225 published at 78 FR 55715, September 11, 2012 are effective December 27, 2013. In addition the incorporation by reference listed in 47 CFR 95.1223 of the rules is approved by the Director of the Federal Register as of December 27, 2013.

FOR FURTHER INFORMATION CONTACT: Nancy Brooks, Policy and Rules Division, Office of Engineering and Technology, at (202) 418–7866, or email: *Nancy.Brooks@fcc.gov.*

SUPPLEMENTARY INFORMATION: This document announces that, on November 26, 2013 OMB approved, for a period of three years, the revised information collection requirements relating to Spectrum for the Operation of Medical Body Area Networks rules contained in the Commission's *First Report and Order,* FCC 12–54, published at 78 FR 55715, September 11, 2012. The OMB Control Number is 3060–0936. The Commission publishes this document as an announcement of the effective date of the rules.

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the Commission is notifying the public that it received final OMB approval on November 26, 2013, for the information collection requirements contained in the modifications to the Commission's rules in 47 CFR part 95.

Under 5 CFR 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060–0936.

The foregoing document is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control No.: 3060–0936.

OMB Approval Date: November 26, 2013.

OMB Expiration Date: November 30, 2016.

Title: Sections 95.1215, 95.1217, 95.1223 and 95.1225—Medical Device Radiocommunications Service (MedRadio).

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit and not-for-profit institutions.

Number of Respondents: 3,120 respondents; 3,120 responses.

Estimated Time per Response: 1–3 hours.

Frequency of Response: On occasion reporting requirement, third party disclosure requirement and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151 and 303 of the Communications Act of 1934, as amended.

Total Annual Burden: 9,120 hours.

Total Annual Cost: $462,600.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: No information is requested that would require assurance of confidentiality.

Needs and Uses: The Commission received approval from the Office of Management and Budget (OMB) to revise OMB 3060–0936 to reflect new and/or modified information collections as a result of a *First Report and Order.*

On May 24, 2012, the Commission released a Report and Order, ET Docket No. 08–59, FCC 12–54, titled: "Amendment of the Commission's rules to Provide Spectrum for the Operation of Medical Body Area Networks", these rules revised the requirements for manufacturers of transmitters for the "Medical Device Radiocommunication Service" to include with each transmitting device a statement regarding harmful interference and to label the device in a conspicuous location on the device. The *First Report and Order* also adopted rules for "Medical Body Area Network" (MBAN), which requires the Commission to establish a process by which MBAN users will register and coordinate the use of certain medical devices. The frequency coordinator will make the database available to equipment manufacturers and the public. The coordinator will also notify users of potential frequency conflicts.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary, Office of Managing Director.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 130312236–3999–02]

RIN 0648–BD05

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery Off the Southern Atlantic States; Amendment 27

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement Amendment 27 (Amendment 27) to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP), as prepared and submitted by the South Atlantic Fishery Management Council (South Atlantic Council). Amendment 27 and this final rule extend the South Atlantic Council's management responsibility for Nassau grouper into the Gulf of Mexico (Gulf) exclusive economic zone (EEZ); increase the number of allowable crew members to four on dual-permitted snapper-grouper vessels (*i.e.*, vessels holding a South Atlantic Charter Vessel/Headboat Permit for Snapper-Grouper and a commercial South Atlantic Unlimited or a 225-Pound Trip Limit Snapper-Grouper Permit) that are fishing commercially; remove the prohibition on retaining any fish under the aggregate bag limit for grouper and tilefish or the vermilion snapper bag limit by captains and crew of federally permitted for-hire vessels; modify the snapper-grouper framework procedures to allow acceptable biological catch levels (ABCs), annual catch limits (ACLs), and annual catch targets (ACTs) to be adjusted via an abbreviated framework process; and remove blue runner from the FMP. The purposes of this final rule are to streamline management of Nassau grouper, improve vessel safety for dual-permitted vessels, implement consistent regulations regarding captains and crew retention limits for snapper-grouper species, expedite adjustments to snapper-grouper catch limits when new scientific information becomes available, and minimize socio-economic impacts to fishermen who harvest and sell blue runner.

DATES: This rule is effective January 27, 2014.

ADDRESSES: Electronic copies of Amendment 27, which includes an environmental assessment, a regulatory flexibility act analysis and a regulatory impact review, may be obtained from the Southeast Regional Office Web site at *http://sero.nmfs.noaa.gov*.

FOR FURTHER INFORMATION CONTACT: Kate Michie, telephone: 727–824–5305, or email: *kate.michie@noaa.gov*.

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery of the South Atlantic is managed under the FMP. The FMP was prepared by the South Atlantic Council and is implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On September 18, 2013, NMFS published a notice of availability for Amendment 27 and requested public comment (78 FR 57337). On September 27, 2013, NMFS published a proposed rule for Amendment 27 and requested public comment (78 FR 59635). NMFS approved Amendment 27 on December 16, 2013. The proposed rule and Amendment 27 outline the rationale for the actions contained in this final rule. A summary of the actions implemented by Amendment 27 and this final rule is provided below.

Management Measures Contained in This Final Rule

Extension of Management Authority for Nassau Grouper in the Gulf of Mexico to the South Atlantic Council

Amendment 27 and this final rule extend the South Atlantic Council management responsibility for Nassau grouper into Federal waters of the Gulf. The current restrictions on the harvest or possession of Nassau grouper in the Gulf EEZ and South Atlantic EEZ continue through this final rule.

Increase in Crew Member Limit for Dual-Permitted Vessels

This final rule increases the crew size limit from three to four persons on dual-permitted vessels (vessels with both a South Atlantic Charter Vessel/Headboat Permit for Snapper-Grouper and a commercial South Atlantic Unlimited or 225-Pound Permit for Snapper-Grouper) when operating commercially.

Removal of Captains and Crew Bag Limit Retention Restrictions for Snapper-Grouper Species

This final rule removes the current restriction that prohibits the captains and crew on a vessel operating as a charter vessel or headboat from retaining the bag limits of gag, black grouper, red grouper, scamp, red hind, rock hind, coney, graysby, yellowfin grouper, yellowmouth grouper, yellowedge grouper, snowy grouper, misty grouper, vermilion snapper, sand tilefish, blueline tilefish, and golden tilefish.

Modify the Framework Procedures in the Snapper-Grouper FMP

This final rule allows an ABC, ACL, and ACT to be modified using an abbreviated framework procedure. After the South Atlantic Council has taken final action to change an ABC, ACL, and/or ACT, the Council submits a letter with supporting data and information to the NMFS Southeast Regional Administrator (RA) requesting the desired change to those applicable harvest parameters. Based on the information provided by the South Atlantic Council, the RA determines whether or not the requested modifications may be warranted. If the requested modifications may be warranted, NMFS develops the appropriate documentation to comply with the National Environmental Policy Act (NEPA) and other applicable law, and proposes the action through rulemaking.

Remove Blue Runner From the FMP

Finally, this final rule removes blue runner from the FMP.

Comments and Responses

NMFS received 12 unique comment submissions on Amendment 27 and the proposed rule. The comments were submitted by one fishing association, one state agency, one environmental organization, one Federal agency, and eight individuals. One individual and one fishing association expressed general support for all the actions in the amendment. One individual and one environmental organization expressed support for the Framework Procedure modifications. Two individuals opposed, and one favored, allowing captains and crew to retain all snapper-grouper species. One individual opposed increasing the number of crew members on dual-permitted vessels. One state agency and one individual supported removing blue runner from the FMP, and one individual opposed extending the jurisdiction for Nassau grouper management. One comment was beyond the scope of the actions contained within the amendment. A summary of the comments and NMFS' responses to those comments appears below.

Comment 1: One commenter opposed extending the South Atlantic Council's

jurisdictional management authority of Nassau grouper into the Gulf.

Response: The South Atlantic Council's assumption of management authority of Nassau grouper throughout its range in the Southeast Region is consistent with Magnuson-Stevens Act National Standard (NS) 3, which states that an individual stock of fish shall be managed as a unit throughout its range, and NS 7 because it removes a duplication of management effort. The Gulf Council took action to remove Nassau grouper from the Gulf reef fish fishery management unit, for the purpose of allowing the South Atlantic Council to extend its area of jurisdiction for management of Nassau grouper to include Federal waters of the Gulf. Without the South Atlantic Council extending its jurisdiction for management of Nassau grouper into the Gulf, Nassau grouper would not be managed throughout its range. The majority of Nassau grouper are found in the South Atlantic Region; therefore, NMFS and both Councils determined that giving the South Atlantic Council sole regulatory authority over Nassau grouper in the Southeast Region is the most efficient arrangement for monitoring and managing the species.

Comment 2: Two commenters opposed allowing captains and crew of for-hire vessels (charter vessels and headboats) to harvest bag limit quantities of all snapper-grouper species because the recreational ACLs could be caught faster and could result in additional fishing pressure on the resource. One commenter supported allowing captains and crew of for-hire vessels to harvest bag limit quantities of all snapper-grouper species.

Response: For species with very low recreational ACLs (such as snowy grouper), allowing the captain and crew to retain bag limits may cause the ACL to be met earlier and reduce the amount of time private recreational anglers have access to certain species. However, the biological impacts analysis in Amendment 27 indicates the average increase in harvest of the most commonly landed snapper-grouper species under this action will be only 0.02 percent for the headboat sector and 0.35 percent for the charter vessel sector. These minor increases in harvest are not likely to result in a significantly accelerated pace of harvest compared to current harvest rates for most snapper-grouper species. Additionally, these negligible increases are unlikely to result in negative biological impacts, particularly since ACLs and accountability measures (AMs) are in place to prevent overfishing from occurring. Allowing crew members of for-hire vessels to harvest and retain bag limit quantities of gag, black grouper, red grouper, scamp, red hind, rock hind, coney, graysby, yellowfin grouper, yellowmouth grouper, yellowedge grouper, snowy grouper, misty grouper, vermilion snapper, sand tilefish, blueline tilefish, and golden tilefish will create consistent regulations for retention of all snapper-grouper species by for-hire captain and crew members in the South Atlantic. Therefore, in the South Atlantic, this action will eliminate confusion about retention restrictions for snapper-grouper species, and could help streamline enforcement efforts within this fishery.

Comment 3: One commenter opposed allowing a fourth crew member to work onboard dual-permitted vessels, because allowing the captains and crew to keep their bag limit would shorten the fishing seasons.

Response: This commenter is confusing two actions in the amendment. There is an action to remove the prohibition for captains and crew on for-hire vessels to retain the snapper-grouper bag limits (discussed in response to Comment 2), and there is an action to extend the maximum crew size limit on dual-permitted vessels from three to four. Currently, there is no restriction on the number of crew members on for-hire vessels, but there is a restriction on the number of crew members on vessels that have both a commercial vessel permit and a for-hire vessel permit for South Atlantic snapper-grouper. Allowing one additional commercial crew member to work onboard dual-permitted vessels may lead to increased efficiency of commercial fishing operations; however, the rate of harvest is not expected to substantially increase. Therefore, the addition of one crew member is not likely to result in snapper-grouper ACLs from being met earlier in the fishing season compared to the status quo.

The action to increase the crew size from three people to four on these dual-permitted vessels will resolve a conflict between the South Atlantic Council's maximum crew size restrictions (no more than three crew members) and the United States Coast Guard's minimum crew size requirements (at least four crew members) for vessels required to have a Certificate of Inspection. This action will increase safety onboard dual-permitted vessels because it allows crew members to properly use the buddy system (*i.e.*, diving as a pair instead of individually) while engaging in diving operations.

Additionally, allowing four crew members onboard dual-permitted vessels in the South Atlantic would create consistent regulations with those that apply in the Gulf of Mexico, which will benefit fishermen and the administrative environment by simplifying enforcement of the maximum crew size restriction.

Comment 4: One commenter supported more flexibility in management and minimizing regulatory delay in response to new stock assessments. One environmental organization supported the abbreviated Framework Procedure included in Amendment 27, but stressed the need for continued compliance with NMFS' Operational Guidelines, which established the circumstances under which the abbreviated Framework Process may be applied, and ensures adequate public notice and comment during the abbreviated Framework Process.

Response: Amendment 27 and this final rule will modify the current Framework Procedure for the FMP to allow for an abbreviated process for changing ABCs, ACLs, and ACTs for species in the snapper-grouper fishery management unit in response to a stock assessment. The abbreviated Framework Procedure will be utilized for the routine adjustment of these harvest parameters in keeping with NMFS' Operational Guidelines. This action will give the South Atlantic Council and NMFS the ability to implement appropriate levels of harvest more quickly in response to the latest scientific information, while ensuring adequate notice and public comment. NMFS anticipates that this more streamlined approach will minimize administrative impacts for routine changes to harvest parameters. Any action implemented through the abbreviated Framework Process will comply with the Magnuson-Stevens Act and all other applicable law.

Comment 5: One individual and one state agency supported removing blue runner from the FMP. The Florida Fish and Wildlife Conservation Commission (FWC) specifically referenced a letter from the FWC Chairman to the South Atlantic Council Chairman dated May 20, 2013. The letter explained the intent of the FWC to extend state management measures for blue runner into adjacent Federal waters if Amendment 27 is approved for implementation.

Response: According to Amendment 27, from 2005 through 2011, most recreational (99 percent) and commercial (99 percent) blue runner harvest were from Federal and state waters off Florida, and of that harvest, 76 percent of blue runner landings came from state waters. Blue runner is not

commonly retained for human consumption, is primarily used as bait, and is currently subject to management in Florida state waters, including gear prohibitions, a recreational bag limit, bycatch restrictions, penalties for unlicensed sale of blue runner, a Saltwater Products License requirement, and trip ticket requirements. Additional restrictions (gear, area closures, etc.) apply to blue runner in waters off certain Florida counties. At its September 5–6, 2013, meeting the FWC considered a draft rule for blue runner that would:

(1) Define blue runner as any fish of the species *Caranx crysos* (as it is currently defined in the Federal FMP, but was recently inadvertently mislabeled in the NMFS regulations as *Caranx bartholomaei* (yellow jack));

(2) Establish a statewide recreational daily bag limit of 100 fish per person per day;

(3) Extend this bag limit into adjacent Federal waters if Federal rules are removed; and

(4) Clarify that a Saltwater Products License is required for commercial harvest of blue runner in both state and Federal waters.

At its November 21–22, 2013, meeting the FWC approved this draft rule and stated the final rule would become effective after blue runner is removed from the Federal FMP.

Because blue runner is predominantly harvested in Florida state waters and is infrequently harvested off states other than Florida, and because Florida currently manages blue runner and intends to extend its management for fishing vessels registered under Florida law into Federal waters off Florida, NMFS determined that it is appropriate to remove the species from the FMP without having a negative biological impact on the stock.

Classification

The Regional Administrator, Southeast Region, NMFS has determined that this final rule is necessary for the conservation and management of South Atlantic snapper-grouper and is consistent with Amendment 27, the FMP, the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

A final regulatory flexibility analysis (FRFA) was prepared for this action. The FRFA incorporates the IRFA, a summary of the significant economic issues raised by public comment, NMFS' responses to those comments, and a summary of the analyses completed to support the action. The FRFA follows.

No public comments specific to the IRFA were received and, therefore, no public comments are addressed in this FRFA. Certain comments with socioeconomic implications are addressed in the comments and responses section. No changes in the final rule were made in response to public comments.

NMFS agrees that the South Atlantic Council's choice of preferred alternatives would best achieve the South Atlantic Council's objectives for Amendment 27 to the FMP while minimizing, to the extent practicable, the adverse effects on fishers, support industries, and associated communities. The preamble to this final rule provides a statement of the need for and objectives of this rule.

The final rule extends the South Atlantic Council's jurisdictional authority for management of Nassau grouper to include Gulf Federal waters and continues the harvest prohibition of Nassau grouper in the Gulf and South Atlantic EEZ; increases, from three to four, the number of crew members on any dual-permitted vessel (a vessel with both a South Atlantic for-hire snapper-grouper and a South Atlantic commercial snapper-grouper permit) when operating commercially; removes the snapper-grouper species retention restrictions for captains and crew of vessels with a South Atlantic for-hire snapper-grouper permit; modifies the South Atlantic Snapper-Grouper FMP framework procedure; and removes blue runner from the South Atlantic Snapper-Grouper FMP.

The Magnuson-Stevens Act provides the statutory basis for this final rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting, record-keeping, or other compliance requirements are introduced by this final rule. Accordingly, this final rule does not implicate the Paperwork Reduction Act.

NMFS expects the final rule to directly affect commercial fishermen and for-hire vessel operators in the South Atlantic snapper-grouper fishery. The Small Business Administration (SBA) recently modified the small entity size criteria for all major industry sectors in the U.S., including fish harvesters. A business involved in finfish harvesting is classified as a small business if independently owned and operated, is not dominant in its field of operation (including its affiliates), and its combined annual receipts are not in excess of $19.0 million (NAICS code 114111, finfish fishing) for all of its affiliated operations worldwide. For for-hire vessels, all qualifiers apply except that the annual receipts threshold is $7.0 million (NAICS code 487210, recreational industries). The SBA periodically reviews and changes, as appropriate, these size criteria. On June 20, 2013, the SBA issued a final rule revising the small business size standards for several industries effective July 22, 2013 (78 FR 37398). This rule increased the size standard for commercial finfish harvesters from $4.0 million to $19.0 million. Neither this rule, nor other recent SBA rules, changed the size standard for for-hire vessels.

From 2007 through 2011, an annual average of 336 vessels with valid commercial South Atlantic snapper-grouper permits landed at least 1 lb (0.45 kg) of blue runner. These vessels generated dockside revenues of approximately $2.1 million (2011) from all species caught in the same trips as blue runner, of which $111,000 (2011 dollars) were from sales of blue runner. Each vessel, therefore, generated an average of approximately $6,250 in gross revenues, of which $330 were from blue runner. Vessels in the coastal migratory pelagics fishery also harvested blue runner on some of their trips harvesting Spanish or king mackerel. In 2007–2011, an average of 176 vessels harvested at least 1 lb (0.45 kg) of king mackerel and 1 lb (0.45 kg) of blue runner. These vessels generated an average of about $799,000 from sales of king mackerel and $57,000 from sales of blue runner. For the same period, an average of 219 vessels harvested at least 1 lb (0.45 kg) of Spanish mackerel and 1 lb (0.45 kg) of blue runner. These vessels generated about $352,000 from sales of Spanish mackerel and $33,000 from sales of blue runner.

For more than two decades, the commercial and recreational harvest of Nassau grouper in the South Atlantic and Gulf has been prohibited, so no revenue information on commercial vessels dependent on Nassau grouper is available. Based on the revenue information presented above, all commercial vessels that will be affected by the rule can be considered small entities.

From 2007 through 2011, an annual average of 1,813 vessels had valid South Atlantic charter vessel/headboat (for-hire) snapper-grouper permits. As of January 22, 2013, 1,462 vessels held South Atlantic for-hire snapper-grouper permits, and about 75 are estimated to have operated as headboats in 2013. The for-hire fleet consists of charter vessels, which charge a fee on a vessel basis, and headboats, which charge a fee on an

individual angler (head) basis. Average annual revenues (2011 dollars) per charter vessel are estimated to be $126,032 for Florida vessels, $53,443 for Georgia vessels, $100,823 for South Carolina vessels, and $101,959 for North Carolina vessels. For headboats, the corresponding per vessel estimates are $209,507 for Florida vessels and $153,848 for vessels in the other states. Revenue figures for headboats in states other than Florida are aggregated for confidentiality reasons. Based on these average revenue figures, all for-hire operations that will be affected by the rule can be considered small entities.

NMFS expects the final rule to directly affect all federally permitted commercial vessels harvesting blue runner and for-hire vessels that operate in the South Atlantic snapper-grouper fishery. All directly affected entities have been determined, for the purpose of this analysis, to be small entities. Therefore, NMFS has determined that this rule will affect a substantial number of small entities. In addition, the issue of disproportional effects on small versus large entities does not arise in the present case.

Extending the South Atlantic Council's jurisdictional authority for management of Nassau grouper has no direct effects on the profits of commercial and for-hire vessels, because there are no accompanying changes to the management measures for this species. Any future changes to the management for Nassau grouper in the Gulf or South Atlantic EEZ will pass through the usual regulatory process, although in the future it will be solely under the South Atlantic Council's regulatory process.

Increasing the maximum number of crew members on any dual-permitted vessel that is operating commercially from three to four will generally affect only those vessels that opt to bring on board an additional crew member. Vessel owners/operators will likely weigh the additional costs and benefits of such an action. Direct costs will be in the form of compensation to the additional crew member. Benefits could come in the form of better safety conditions, especially on trips that involve diving. The net effect of this action is relatively unknown in the short term. This action will make the South Atlantic regulation on the maximum crew size of dual-permitted vessels consistent with the Gulf regulation. Preliminary reports for the Gulf for-hire sector appear to indicate that safety-at-sea has improved when vessels started adding crew members.

Removing the snapper-grouper bag limit retention restrictions for the captains and crew of for-hire vessels (*i.e.*, allowing the captains and crew to possess bag limits for all snapper-grouper species with allowable bag limits) could potentially increase the profits of for-hire vessels. These extra bag limits could be used as part of crew compensation, which would lower overall cost, or as a marketing tool to attract additional angler trips, which could bring in additional revenues. It is likely, however, that profit increases will be relatively minimal because of the small number of additional fish that could be kept if the retention restriction were removed. The total extra fish in a year that will result from allowing the captains and crew of for-hire vessels to keep bag limits is estimated to be about 51 fish on all charter trips and 138 fish on all headboat trips. From an enforcement perspective, this action will reduce confusion regarding which snapper-grouper species may be retained by the captains and crew of for-hire vessels.

Modifying the FMP framework procedure has no direct effects on commercial and for-hire vessel profits. This modification will allow for faster implementation of changes in the ABCs, ACLs, and ACTs for any snapper-grouper species based on the most recent stock assessment. The effects of those changes will be analyzed once they are considered by the South Atlantic Council.

Removing blue runner from the FMP will leave this species relatively unregulated in the South Atlantic EEZ, where 24 percent of the landings occurred from 2005–2011. As a result, commercial vessels could harvest as many blue runner as they can, using whatever gear is most efficient for their operations. In principle, therefore, this action can be expected to result in overall profit increases to commercial vessels in the short term. Historically, however, blue runner has not been a major species targeted or landed by commercial snapper-grouper or coastal migratory pelagic vessels. During 2007–2011, revenues from blue runner accounted for an average of about 5 percent of total revenues generated by snapper-grouper commercial vessels that landed at least 1 lb (0.45 kg) of blue runner. These vessels will generate additional profits mainly if they increase their effort in harvesting blue runner. This will require some changes in their harvesting strategies that may only increase fishing costs. Many vessel operators may have deemed this cost increase not worth expending, as partly evidenced by the relatively small share that sales of blue runner contribute to total vessel revenues.

The case with commercial vessels targeting mainly Spanish or king mackerel is different from that with vessels mainly dependent on snapper-grouper species. Under the no action alternative, a commercial snapper-grouper permit is required to possess and land blue runner. In addition, allowable gear types for harvesting any snapper-grouper species exclude gillnets, which are a gear type used in harvesting king and Spanish mackerel. Vessels which harvest king or Spanish mackerel, but do not possess a commercial snapper-grouper permit, must discard their catches of blue runner; or, even if they have the necessary commercial snapper-grouper permit, they may not use gillnets to harvest blue runner along with king and Spanish mackerel. For commercial vessels landing at least 1 lb (0.45 kg) of Spanish mackerel and 1 lb (0.45 kg) of blue runner, revenues from blue runner were about 10 percent of revenues from Spanish mackerel in 2007–2011; and for commercial vessels landing at least 1 lb (0.45 kg) of king mackerel and 1 lb (0.45 kg) of blue runner, revenues from blue runner were about 5 percent of revenues from king mackerel in 2007–2011. Removing blue runner from the FMP will allow these vessels to legally maintain their revenues and profits at current levels. However, some of these vessels' revenues may be forgone if Florida extends its gillnet ban into the EEZ.

Similar to commercial vessels, for-hire vessels will, in principle, benefit from removing blue runner from the FMP. These vessels may take as many trips targeting blue runner as they can. However, charter vessels and headboats accounted for only 2.4 percent and 2.5 percent, respectively, of total recreational landings of blue runner during 2007–2011. In addition, there is no record of target trips for blue runner by charter vessels, and target trips for blue runner by headboats are unknown. Given this information on landings and target trips, removing blue runner from the FMP will likely have minimal effects on the profits of for-hire vessels.

The long-term effects of removing blue runner from the FMP on commercial and for-hire vessel profits depend on whether the harvest of blue runner is sustainable in the absence of Federal management of the species. Should blue runner undergo overfishing or become overfished, commercial and for-hire vessel catches of blue runner would decline and so would their profits. However, it should be noted that about 99 percent of blue runner are caught off Florida, so with blue runner being removed from the FMP, Florida

could extend its fishing regulations into the EEZ. This could allow for continued sustainable management of the species. In addition, the South Atlantic Council expressed its intention to continue monitoring trends and landings of blue runner for possible future management actions affecting the species, should the need arise.

The following discussion analyzes the alternatives that were not preferred by the South Atlantic Council, or alternatives for which the South Atlantic Council chose the no action alternative.

Two alternatives, including the preferred alternative, were considered for extending the South Atlantic Council's jurisdictional authority for management of Nassau grouper. The only other alternative is the no action alternative. The South Atlantic Council decided two alternatives were sufficient, since the Secretary of Commerce has already designated the South Atlantic Council as the responsible fishery management council to manage Nassau grouper in the Gulf. These two alternatives are administrative in nature and therefore would have no direct effects on the profits of commercial and for-hire vessels.

Three alternatives, including the preferred alternative, were considered for modifying the crew size restriction for dual-permitted snapper-grouper vessels. The first alternative, the no action alternative, would maintain the commercial crew size limit of three persons. This alternative would have no effects on vessel profits, but it would not address safety issues particularly related to diving trips..The second alternative would remove entirely the commercial crew size limit on dual-permitted snapper-grouper vessels. This alternative would afford vessel owners/operators more flexibility in selecting the optimal crew size for every fishing trip, and thus may be expected to result in higher profits than any of the other alternatives. However, this alternative would tend to complicate the enforcement of fishing rules that differentiate between a commercial and a for-hire fishing trip. Under the alternative, dual-permitted vessels could take a for-hire trip with every angler practically considered a crew member, and then sell their catch as if a commercial vessel trip was taken. In addition to being illegal, this practice could pose problems in tracking recreational versus commercial landings of snapper-grouper species for purposes of ACL monitoring. Moreover, accountability measures could be unduly imposed on one sector if sector ACLs could not be properly monitored.

Three alternatives, including the preferred alternative, were considered for modifying the bag limit restriction on snapper-grouper species for the captains and crew of permitted for-hire vessels. The first alternative, the no action alternative, would maintain the prohibition on captains and crew of for-hire vessels from retaining bag limit quantities of the following species: Gag, black grouper, red grouper, scamp, red hind, rock hind, coney, graysby, yellowfin grouper, yellowmouth grouper, yellowedge grouper, snowy grouper, misty grouper, vermilion snapper, sand tilefish, blueline tilefish, and golden tilefish. This alternative would not change the profits of for-hire vessels, but would also forgo any potential profit that could result from the preferred alternative. The second alternative would establish a bag limit of zero for the captains and crew of permitted for-hire vessels for all species included in the FMP. Under this alternative, captains and crew of for-hire vessels would tend to forgo annually about 275 fish in charter trips, and 4,291 fish in headboat trips. If these fish were used as part of crew compensation, losing them would increase the cost of fishing; if these fish were used as a marketing tool to attract additional angler trips, those trips and associated revenues would likely not occur in the future. There is, therefore, a substantial likelihood that this alternative would adversely affect the profits of for-hire vessels, although the magnitude of effects would be relatively small.

Two alternatives, including the preferred alternative, were considered for modifying the FMP framework procedure. The only other alternative is the no action alternative. These two alternatives are administrative in nature and therefore would have no direct effects on the profits of commercial and for-hire vessels. Only one alternative was considered by the Council that would meet the purpose of this amendment and at same time address the concerns raised by NOAA General Counsel (NOAA GC). The Council had initially proposed amending the framework procedure to allow for adjustments to ACLs via publication of a notice in the **Federal Register**. However, NOAA GC advised the Council that such a process would not meet current legal requirements and NMFS would likely disapprove it. Subsequently, the Council revised the alternative to incorporate NOAA GC suggestions.

Three alternatives, including the preferred alternative, were considered for modifying the placement of blue runner in a fishery management unit and/or modifying management measures for blue runner. The first alternative, the no action alternative, would have no effect on the profits of commercial and for-hire vessels in the snapper-grouper fishery. However, commercial vessels in the coastal migratory pelagics fishery that do not possess a commercial snapper-grouper permit would have to discard their catches of blue runner unless they secure the necessary permit. Without the necessary permit, they would experience revenue and profit reductions from discarding blue runner. If they wanted to continue their practice of harvesting and selling blue runner, they would have to purchase a commercial snapper-grouper permit. Their cost would increase especially because the commercial snapper-grouper permit is under a limited access program, and the likely purchase price of a commercial snapper-grouper permit would be substantially higher than the administrative cost of securing an open access permit or renewing a commercial snapper-grouper permit. The second alternative would retain blue runner in the FMP, but would allow commercial harvest and sale of blue runner for vessels with a South Atlantic commercial Spanish mackerel permit. In addition, gillnets would be an allowable gear in the snapper-grouper fishery, although only for harvesting blue runner. This alternative would tend to maintain the current profitability of commercial vessels, especially in the coastal migratory pelagics fishery as these vessels would be allowed to harvest and sell blue runner without incurring additional costs through the purchase of commercial snapper-grouper permits. The third alternative would retain blue runner in the FMP, but would exempt the species from the commercial snapper-grouper permit requirement for purchase, harvest, and sale of snapper or grouper. This alternative would have the same effects on the profits of commercial vessels as the second alternative.

List of Subjects in 50 CFR Part 622

Fisheries, Fishing, Headboat, Reporting and recordkeeping requirements, South Atlantic.

Dated: December 20, 2013.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, performing the functions and duties of the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.1, paragraph (d), Table 1, the entry for "FMP for the Snapper-Grouper Fishery of the South Atlantic Region" is revised and footnote 6 is added to read as follows:

§ 622.1 Purpose and scope.

* * * * *

(d) * * *

TABLE 1—FMPS IMPLEMENTED UNDER PART 622

FMP title	Responsible fishery management council(s)	Geographical area
FMP for the Snapper-Grouper Fishery of the South Atlantic Region	SAFMC	South Atlantic[6]

[6] Nassau grouper in the South Atlantic EEZ and the Gulf EEZ are managed under the FMP.

* * * * *

■ 3. In § 622.2, the definition for "Charter vessel" is revised to read as follows:

§ 622.2 Definitions and acronyms.

* * * * *

Charter vessel means a vessel less than 100 gross tons (90.8 mt) that is subject to the requirements of the USCG to carry six or fewer passengers for hire and that engages in charter fishing at any time during the calendar year. A charter vessel with a commercial permit, as required under § 622.4(a)(2), is considered to be operating as a charter vessel when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew, except for a charter vessel with a commercial vessel permit for Gulf reef fish or South Atlantic snapper-grouper. A charter vessel that has a charter vessel permit for Gulf reef fish and a commercial vessel permit for Gulf reef fish or a charter vessel permit for South Atlantic snapper-grouper and a commercial permit for South Atlantic snapper-grouper (either a South Atlantic snapper-grouper unlimited permit or a 225-lb (102.1-kg) trip limited permit for South Atlantic snapper-grouper) is considered to be operating as a charter vessel when it carries a passenger who pays a fee or when there are more than four persons aboard, including operator and crew. A charter vessel that has a charter vessel permit for Gulf reef fish, a commercial vessel permit for Gulf reef fish, and a valid Certificate of Inspection (COI) issued by the USCG to carry passengers for hire will not be considered to be operating as a charter vessel provided—

(1) It is not carrying a passenger who pays a fee; and

(2) When underway for more than 12 hours, that vessel meets, but does not exceed the minimum manning requirements outlined in its COI for vessels underway over 12 hours; or when underway for not more than 12 hours, that vessel meets the minimum manning requirements outlined in its COI for vessels underway for not more than 12-hours (if any), and does not exceed the minimum manning requirements outlined in its COI for vessels that are underway for more than 12 hours.

* * * * *

■ 4. In § 622.33, a sentence is added at the end of paragraph (a) and paragraph (c) is removed and reserved.

The addition reads as follows:

§ 622.33 Prohibited species.

(a) * * * (Note: Nassau grouper in the Gulf EEZ may not be harvested or possessed, as specified in § 622.181(b)(1).)

* * * * *

■ 5. In § 622.38, paragraph (b)(2) is revised to read as follows:

§ 622.38 Bag and possession limits.

* * * * *

(b) * * *

(2) *Groupers, combined, excluding goliath grouper*—4 per person per day, but not to exceed 1 speckled hind or 1 warsaw grouper per vessel per day, or 2 gag per person per day. However, no grouper may be retained by the captain or crew of a vessel operating as a charter vessel or headboat. The bag limit for such captain and crew is zero. (Note: Nassau grouper in the Gulf EEZ may not be harvested or possessed, as specified in § 622.181(b)(4).)

* * * * *

■ 6. In § 622.181, paragraph (b)(1) is revised and paragraph (b)(4) is added to read as follows:

§ 622.181 Prohibited and limited-harvest species.

* * * * *

(b) * * *

(1) Goliath grouper may not be harvested or possessed in the South Atlantic EEZ. Goliath grouper taken in the South Atlantic EEZ incidentally by hook-and-line must be released immediately by cutting the line without removing the fish from the water.

* * * * *

(4) Nassau grouper may not be harvested or possessed in the South Atlantic EEZ or the Gulf EEZ. Nassau grouper taken in the South Atlantic EEZ or the Gulf EEZ incidentally by hook-and-line must be released immediately by cutting the line without removing the fish from the water.

* * * * *

■ 7. In § 622.187, paragraphs (b)(2), (b)(5), and (b)(8) are revised to read as follows:

§ 622.187 Bag and possession limits.

* * * * *

(b) * * *

(2) *Grouper and tilefish, combined*—3. Within the 3-fish aggregate bag limit:

(i) No more than one fish may be gag or black grouper, combined;

(ii) No more than one fish per vessel may be a snowy grouper;

(iii) No more than one fish may be a golden tilefish; and

(iv) No goliath grouper or Nassau grouper may be retained.

* * * * *

(5) *Vermilion snapper*—5.

* * * * *

(8) *South Atlantic snapper-grouper, combined*—20. However, excluded from this 20-fish bag limit are tomtate, South Atlantic snapper-grouper ecosystem component species (specified in Table 4 of Appendix A to part 622), and those specified in paragraphs (b)(1) through (7) and paragraphs (b)(9) and (10) of this section.

* * * * *

§ 622.193 [Amended]

■ 7. In § 622.193, paragraph (s) is removed and reserved.

■ 8. In Appendix A to part 622, Table 4 is revised to read as follows:

Appendix A to part 622—Species Tables

* * * * *

TABLE 4 OF APPENDIX A TO PART 622—SOUTH ATLANTIC SNAPPER-GROUPER

Balistidae—Triggerfishes
Gray triggerfish, *Balistes capriscus*
Carangidae—Jacks
Bar jack, *Caranx ruber*
Greater amberjack, *Seriola dumerili*
Lesser amberjack, *Seriola fasciata*
Almaco jack, *Seriola rivoliana*
Banded rudderfish, *Seriola zonata*
Ephippidae—Spadefishes
Spadefish, *Chaetodipterus faber*
Haemulidae—Grunts
Margate, *Haemulon album*
Tomtate, *Haemulon aurolineatum*
Sailor's choice, *Haemulon parrai*
White grunt, *Haemulon plumieri*
Labridae—Wrasses
Hogfish, *Lachnolaimus maximus*
Lutjanidae—Snappers
Black snapper, *Apsilus dentatus*
Queen snapper, *Etelis oculatus*
Mutton snapper, *Lutjanus analis*
Blackfin snapper, *Lutjanus buccanella*
Red snapper, *Lutjanus campechanus*
Cubera snapper, *Lutjanus cyanopterus*
Gray snapper, *Lutjanus griseus*
Mahogany snapper, *Lutjanus mahogoni*
Dog snapper, *Lutjanus jocu*
Lane snapper, *Lutjanus synagris*
Silk snapper, *Lutjanus vivanus*
Yellowtail snapper, *Ocyurus chrysurus*
Vermilion snapper, *Rhomboplites aurorubens*
Malacanthidae—Tilefishes
Blueline tilefish, *Caulolatilus microps*
Golden tilefish, *Lopholatilus chamaeleonticeps*
Sand tilefish, *Malacanthus plumieri*
Percichthyidae—Temperate basses
Wreckfish, *Polyprion americanus*
Serranidae—Groupers
Rock hind, *Epinephelus adscensionis*
Graysby, *Epinephelus cruentatus*
Speckled hind, *Epinephelus drummondhayi*
Yellowedge grouper, *Epinephelus flavolimbatus*
Coney, *Epinephelus fulvus*
Red hind, *Epinephelus guttatus*
Goliath grouper, *Epinephelus itajara*
Red grouper, *Epinephelus morio*
Misty grouper, *Epinephelus mystacinus*
Warsaw grouper, *Epinephelus nigritus*
Snowy grouper, *Epinephelus niveatus*
Nassau grouper, *Epinephelus striatus*
Black grouper, *Mycteroperca bonaci*
Yellowmouth grouper, *Mycteroperca interstitialis*
Gag, *Mycteroperca microlepis*
Scamp, *Mycteroperca phenax*
Yellowfin grouper, *Mycteroperca venenosa*
Serranidae—Sea Basses
Black sea bass, *Centropristis striata*
Sparidae—Porgies
Jolthead porgy, *Calamus bajonado*
Saucereye porgy, *Calamus calamus*
Whitebone porgy, *Calamus leucosteus*
Knobbed porgy, *Calamus nodosus*
Red porgy, *Pagrus pagrus*
Scup, *Stenotomus chrysops*
The following species are designated as ecosystem component species:
Cottonwick, *Haemulon melanurum*
Bank sea bass, *Centropristis ocyurus*
Rock sea bass, *Centropristis philadelphica*
Longspine porgy, *Stenotomus caprinus*
Ocean triggerfish, *Canthidermis sufflamen*
Schoolmaster, *Lutjanus apodus*

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 130710605–3999–02]
RIN 0648–BD41

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Shrimp Fishery of the Gulf of Mexico; Establish Funding Responsibilities for the Electronic Logbook Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final changes to management measures.

SUMMARY: NMFS establishes funding responsibilities for an upgrade to the shrimp electronic logbook (ELB) program as described in a framework action to the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico (FMP), as prepared by the Gulf of Mexico (Gulf) Fishery Management Council (Council). Newer and more efficient ELB units have been purchased by NMFS for the Gulf shrimp fleet and are available for installation on Gulf shrimp vessels. Therefore, NMFS establishes a cost-sharing program to fund the ELB program. NMFS will pay for the software development, data storage, effort estimation analysis, and archival activities for the new ELB units, and selected vessel permit holders in the Gulf shrimp fishery will pay for installation and maintenance of the new ELB units and for the data transmission from the ELB units to a NOAA server. The purpose of these changes is to ensure that management of the shrimp fishery is based upon the best scientific information available and that bycatch is minimized to the extent practicable.

DATES: These final changes to management measures are effective January 27, 2014.

ADDRESSES: Electronic copies of the framework action, which includes a Regulatory Flexibility Act analysis and a regulatory impact review, may be obtained from the Southeast Regional Office Web site at *http://sero.nmfs.noaa.gov/sustainable_fisheries/gulf_fisheries/shrimp/index.html*.

Comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained herein may be submitted in writing to Anik Clemens, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701; and OMB, by email at *OIRA Submission@omb.eop.gov*, or by fax to 202–395–7285.

FOR FURTHER INFORMATION CONTACT: Susan Gerhart; Southeast Regional Office, NMFS, telephone: 727–824–5305; email: *Susan.Gerhart@noaa.gov*.

SUPPLEMENTARY INFORMATION: The shrimp fishery of the Gulf is managed under the FMP. The FMP was prepared by the Council and is implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On October 22, 2013, NMFS published the proposed changes to management measures for the ELB program for the Gulf shrimp fishery and requested public comment (78 FR 62579). The proposed changes to management measures and the framework action outline the rationale for the actions contained herein. A summary of the actions implemented by the framework action is provided below.

These final changes in management measures require vessel permit holders in the Gulf shrimp fishery to share in the cost of the ELB program. NMFS will inform vessel owners that they have been selected to participate in this program, and that they have a total of 90 days to comply with the regulations to install and activate their new ELB units (30 days to activate a wireless account and 60 days to install the new ELB unit) after it has been shipped by NMFS and received by the vessel owner. Vessel owners selected to participate in the ELB program must

contact Verizon Wireless, the wireless provider, by email at *VZWGulfCoastELB@VerizonWireless.com*, or by phone: 888–211–3258, to initiate service for the new ELB unit.

The changes to the management measures are being published pursuant to section 304(b)(3) of the Magnuson-Stevens Act.

Changes From the Proposed Changes to Management Measures

As was proposed, selected vessel permit holders in the Gulf shrimp fishery will cover the costs of installing and maintaining the ELB units and the cost of data transmission from the units to a NOAA server. The cost of data transfer, however, which is the major cost to the vessel permit holders in the Gulf shrimp fishery, was previously estimated to be $720 per vessel annually. Recent negotiations with the wireless provider have substantially reduced this cost to approximately $240 per vessel annually.

Comments and Responses

NMFS received a total of nine public comments on the proposed changes to management measures; one from an organization and the remainder from individuals. Some commenters submitted suggestions for the Gulf shrimp fishery that were outside the scope of the framework action, including comments regarding monitoring catch. Seven commenters were against the framework action, one was in favor of the framework action, and one expressed no position for or against the changes but was in support of using modern vessel monitoring system (VMS) type technology. Specific comments related to the actions contained in the framework action, as well as NMFS' respective responses, are summarized below.

Comment 1: The cost sharing program will impose a financial burden on fishermen who already have high expenses because of increased operating costs and a depressed economy.

Response: The Council considered several funding alternatives for continuing the ELB program, and NMFS agrees with the Council's choice to implement the cost-sharing program. The Council and NMFS recognize the burden of the cost-sharing program on the vessel permit holders in the Gulf shrimp fishery. As analyzed in the framework action, NMFS will cover the cost of the ELB equipment, software development, data storage, effort estimation analysis, and archival activities. Vessel permit holders in the Gulf shrimp fishery selected to participate in the ELB program will cover the costs of installing and maintaining the ELB units and the cost of data transmission from the units to a NOAA server. The installation cost of approximately $200 per vessel is a one-time cost; maintenance costs are periodic; and the data transfer cost is annual. The cost of data transfer, which is the major cost to the vessel permit holders in the Gulf shrimp fishery selected to participate in the ELB program, was previously estimated at $720 per vessel annually. Recent negotiations with the wireless provider have substantially reduced this cost to approximately $240 per vessel annually to receive the same service. The division of cost is similar to that for the Gulf reef fish VMS program. NMFS will constantly evaluate the ELB program, including its costs, particularly with respect to the burden on the vessel permit holders in the Gulf shrimp fishery.

Comment 2: Fishermen should not be required to reveal where they fish. Information provided by the ELB unit transmissions should be confidential.

Response: The new ELB program collects the same data as the prior ELB program. NMFS adheres to strict confidentiality guidelines with regards to its various data collection programs, including the ELB program. To date, there have been no reported issues related to the confidentiality of information collected through the ELB program. NMFS will work with the wireless provider to ensure that data transmission under the new ELB program is secure, as in the VMS program for the Gulf reef fish fishery.

Comment 3: The new ELB units are not ready to be implemented and will not work.

Response: The new ELB units have been tested on several vessels that also have the prior ELB units. The new ELB units are functioning and the data collected by both units match. It is expected that some issues may arise with the implementation of a new system. However, NMFS is confident that any issues that arise regarding the functioning of the ELB units can be efficiently resolved.

Comment 4: The prior ELB program worked so it should be continued. NOAA should not be involved in the ELB program and should let the previous contractor continue the program.

Response: Continuing the prior ELB program would necessarily result in either NMFS or vessel permit holders in the Gulf shrimp fishery being required to cover the full cost of the program. Funding for the prior ELB program through the current contractor will cease at the end of 2013 (the end of the contract), and no new Federal money is expected to be forthcoming. Therefore, NMFS does not have the means to cover the full cost of the ELB program at this time. Additionally, NMFS recognizes that it would be very burdensome for vessel permit holders in the Gulf shrimp fishery to bear the full cost of the ELB program. Unless NMFS or the vessel permit holders in the Gulf shrimp fishery can secure outside funding, a cost-sharing program is the most appropriate funding option, and is therefore the option that the Council chose to implement at this time. NMFS' direct administration of the new ELB program is expected to reduce the cost of the ELB program and allow for a more efficient method of retrieving, archiving, and analyzing the data. The total annual cost of the new ELB program (after the first year) will be $434,000 for 500 vessels, which is substantially less than the $975,000 annual cost for the prior ELB program, for 500 vessels. If all 1,500 vessels with Federal permits are selected to participate in the new ELB program, the cost would still be less than that of the prior ELB program, at $674,000. As needed, NMFS will consult with experts, including the current contractor for the prior ELB program, in administering the program.

Comment 5: NOAA should fund the entire program. NOAA should have put the ELB program in the budget and could use BP funds to support it.

Response: As noted above, NMFS does not have the resources to fund the entire ELB program. NMFS' current budget is restricted from adding new programs for funding. Just because a program is not placed within the Federal budget, it does not lessen its importance to the government mission. There are many high priority programs which the Federal government oversees that may not have appropriations to fully fund them on an annual basis. Cost-sharing with user groups is one method that is used to fund high priority programs that do not have enough appropriations to be implemented solely under the Federal budget. Further, no funding has been made available for this program as a result of the Deepwater Horizon MC252 incident. If outside funding becomes available in the future to cover the cost of the entire ELB program, cost-sharing may not be needed. If additional funding is acquired that is less than the total cost of the new ELB program, the vessel permit holders in the Gulf shrimp fishery's portion could be covered or reduced with that funding.

Comment 6: Data from the ELB program are important for future management of the Gulf shrimp fishery, however, there might be a less expensive way to obtain it.

Response: Since before the creation of the existing program, the Council and NMFS have explored numerous options for data collection in the Gulf shrimp fishery. During the development of Amendment 13 to the Gulf Shrimp FMP, which originally established the existing ELB requirement, the Council and NMFS determined that the ELB program was an accurate and cost effective means for collecting the necessary information from the fishery. Requiring industry to bear a portion of the costs of the program does not undermine these prior determinations relative to the program. Further, NMFS has determined that these modifications to the program best achieve the Council's objectives, while minimizing, to the extent practicable, the associated burdens on industry. Should more cost effective means of collecting the information be developed in the future, industry and the public at large are encouraged to recommend these innovations to the Council and NMFS for future implementation.

Classification

The Regional Administrator, Southeast Region, NMFS has determined that these final changes to management measures are necessary for the conservation and management of Gulf shrimp and is consistent with the FMP, the Magnuson-Stevens Act, and other applicable law.

This rule has been determined to be not significant for purposes of Executive Order 12866.

A Final Regulatory Flexibility Analysis (FRFA) was prepared for this action. The FRFA incorporates the Initial Regulatory Flexibility Analysis (IRFA), a summary of the significant economic issues raised by public comment, NMFS' responses to those comments, and a summary of the analyses completed to support the action. The FRFA follows.

No public comments specific to the IRFA were received. However, some comments regarding the cost burden of the new ELB program were received, and these are addressed in the comments and responses section, specifically Comments 1 and 5. No changes in management measures were made in response to public comments.

NMFS agrees that the Council's choice of preferred alternative would best achieve the Council's objectives for the framework action to the FMP while minimizing, to the extent practicable, the adverse effects on fishers, support industries, and associated communities. The preamble for these final changes to management measures provides a statement of the need for and objectives of the management measures in the framework action.

The Magnuson-Stevens Act provides the statutory basis for the final changes to the management measures. No duplicative, overlapping, or conflicting Federal rules have been identified.

The prior ELB program for the Gulf shrimp fishery, established through the final rule to implement Amendment 13 to the FMP in 2006, required selected vessels to carry ELB units. These final changes to the management measures require selected vessels to carry new ELB units that are more modern and technologically advanced. From the standpoint of technical and professional skills needed, the new ELB units do not materially differ from the current ELB units. In fact, the new ELB units no longer require a technician to meet vessels to pull and program the memory card. Data collected by ELB units will be automatically transmitted to NMFS servers via a cellular phone connection activated when the vessel is within non-roaming cellular range. A key feature introduced by the final changes is that the vessel permit holders in the Gulf shrimp fishery will share the cost of the ELB program, whereas currently all costs of the ELB program are borne by the Federal government. Each federally permitted shrimp vessel selected to participate will be responsible for the one-time cost of installing the ELB unit ($200) and the annual cost of data transmission ($240) through a contract with the service provider. The vessel permit holders will also be responsible for the cost of repairing or replacing the ELB unit. The replacement of one ELB unit is estimated at about $425.

NMFS expects the final changes to management measures to directly affect commercial fishermen with valid or renewable Federal Gulf shrimp permits for harvesting penaeid shrimp in the Gulf exclusive economic zone (EEZ). The Small Business Administration (SBA) has established small entity size criteria for all major industry sectors in the United States, including fish harvesters. A business involved in fish harvesting is classified as a small business if independently owned and operated, is not dominant in its field of operation (including its affiliates), and its combined annual receipts are not in excess of $19.0 million from finfish fishing (NAICS code 114111), or $5.0 million from shellfish fishing (NAICS code 114112), or $7 million from other marine fishing (NAICS code 114119) for all of its affiliated operations worldwide. For for-hire vessels, all qualifiers apply except that the annual receipts threshold is $7.0 million (NAICS code 487210, recreational industries). The SBA periodically reviews and changes, as appropriate, these size criteria. On June 20, 2013, the SBA issued a final rule revising the small business size standards for several industries effective July 22, 2013 (78 FR 37398). This rule increased the size standard for commercial finfish harvesters from $4.0 million to $19.0 million and commercial shellfish harvesters from $4.0 million to $5.0 million. Neither this rule, nor other recent SBA rules, changed the size standard for for-hire vessels.

The Federal Gulf shrimp permit has been placed under a moratorium since 2007. At the start of the moratorium, 1,915 vessels qualified and received Gulf shrimp permits. Over time, the number of permitted shrimp vessels declined, and in 2012 there were 1,582 such permitted vessels. According to the Southeast Regional Office Web site, the Constituency Services Branch (Permits) unofficially listed 1,431 holders of Gulf shrimp permits as of June 25, 2013.

During the period from 2006 through 2010, an average of 4,582 vessels fished for shrimp in the Gulf EEZ and state waters, of which 20 percent held Gulf shrimp permits. Despite being a minority of the total number, vessels with Gulf shrimp permits accounted for an average of 67 percent of total shrimp landings and 77 percent of total ex-vessel revenues. Of all the vessels with Gulf shrimp permits, 73 percent were active and 27 percent were inactive (*i.e.*, did not commercially fish).

During the period from 2006 through 2010, an average federally permitted shrimp vessel generated revenues from commercial fishing ranging from around $205,000 to $244,000. An average active federally permitted vessel had revenues from commercial fishing ranging from around $233,000 to $274,000. As may be expected, revenues from commercial fishing for an average inactive permitted vessel were practically none.

Based on the revenue figures above, all federally permitted shrimp vessels are expected to be directly affected by the final changes to the management measures and are determined for the purpose of this analysis to be small business entities. Hence, NMFS determined that the action would affect a substantial number of small entities.

Because NMFS determined that all entities expected to be affected by the final changes to the management measures are small entities, the issue of disproportional effects on small versus

large entities does not arise in the present case.

The vessel permit holders' share of the cost of the new ELB program consists of a one-time cost of installing the ELB unit, an annual cost of transmitting data from the ELB unit to NMFS servers, and a periodic cost of repairing or replacing defective ELB units. On a per vessel basis, the installation cost is $200 and the annual data transmission cost is $240. In the event of equipment failure, the cost of repair could run from a de minimis amount to $425, which is the cost of replacing an ELB unit.

During the period from 2006 through 2010, an average permitted shrimp vessel had negative net operating revenues in all years, except 2009. Its net profits (*i.e.*, net operating revenues plus net receipts from non-operating activities, such as government payments) were positive in 2006 ($2,961), 2009 ($1,238), and 2010 ($94,279). However, it should be noted that the 2010 profits came mainly from earnings associated with the Deepwater Horizon MC252 (DWH) oil spill in the form of damage claims and revenues from the vessel's participation in BP's clean-up program. Without these oil spill related revenues, net profits in 2010 would have been negative $2,480.

For active federally permitted shrimp vessels, net operating revenues were negative in all years from 2006 through 2010. In addition, profits in all of those years were negative, except in 2010. Again, the positive net profits in 2010 were due to revenues associated with the DWH oil spill. The situation is worse for inactive permitted shrimp vessels, with net revenues and profits (except for 2010) being more negative than those of active permitted shrimp vessels. The average inactive permitted shrimp vessel had higher net profit in 2010 than the average active permitted shrimp vessel.

The cost of the new ELB program will impose a significant impact on the profits of an average permitted shrimp vessel. The effects will be even more significant for vessels that are not active in the fishery. It is noted that there are some vessels that are substantially more profitable than the average vessel, and thus will be able to absorb the per vessel cost of the ELB program. However, there are other vessels that are only slightly more profitable than the average vessel, and very likely the impacts on their profits will be significant.

The following discussion analyzes the alternatives that were not selected as preferred by the Council.

The management measures contained in the framework action continue the ELB program. Being adjudged and proven to be very effective in collecting shrimp effort data in the Gulf EEZ, continuation of the ELB program has been deemed necessary so that NMFS can effectively carry out its mandate to base conservation and management measures on the best scientific information available and to minimize bycatch to the extent practicable. To date, no other means of collecting shrimp effort data have been developed and tested that would be more technically and economically effective than the ELB. Therefore, no other alternative to collect shrimp effort data was considered.

However, three alternatives, including the preferred alternative, were considered for funding the ELB program. As noted above, the preferred alternative will provide for cost sharing between NMFS and the vessel permit holders in the Gulf shrimp fishery. The second alternative will require NMFS to bear the entire cost of the ELB program. NMFS recognizes the vital role that the ELB program has played in estimating shrimp effort in the Gulf, but due to budget constraints, NMFS cannot fully fund the ELB program. The third alternative will require the Gulf shrimp vessel permit holders to fund the entire cost of the ELB program. For several years now, the Gulf shrimp industry has been in relatively dire financial condition. Thus the Gulf shrimp fishery indicated that it could not possibly fund the entire cost of the ELB.

These final changes to management measures contain collection-of-information requirements subject to the requirements of the Paperwork Reduction Act (PRA), which have been approved by Office of Management and Budget (OMB) under control number 0648–0543. NMFS estimates the requirement for the Gulf shrimp fishery to share in the costs of the new ELB units, which includes installation ($200) and data transmission ($240), to average 1 hour and $440 per response for the first year. After the first year, NMFS estimates the requirement for vessel permit holders in the Gulf shrimp fishery to share in the costs of the new ELB units, which includes data transmission, to average 1 hour and $240 per response. These estimates of the public reporting burden include the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection-of-information.

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection-of-information subject to the requirements of the PRA, unless that collection-of-information displays a currently valid OMB control number.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 20, 2013.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, performing the functions and duties of the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 130409354–3999–02]

RIN 0648–BD21

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Revisions to Headboat Reporting Requirements for Species Managed by the South Atlantic Fishery Management Council

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement the Joint South Atlantic/Gulf of Mexico Generic Charter Vessel/Headboat Reporting in the South Atlantic Amendment (For-Hire Reporting Amendment). The For-Hire Reporting Amendment amends the following Fishery Management Plans (FMPs): the Snapper-Grouper Fishery of the South Atlantic Region and the Dolphin and Wahoo Fishery of the Atlantic, as prepared by the South Atlantic Fishery Management Council (South Atlantic Council); and the Coastal Migratory Pelagic (CMP) Resources of the Atlantic and Gulf of Mexico (Gulf), as prepared by the Gulf of Mexico Fishery Management Council (Gulf Council) and the South Atlantic Council. This final rule modifies the recordkeeping and reporting requirements for headboat owners and operators who fish for species managed by the South Atlantic Council through the previously mentioned FMPs. These revisions require fishing records to be submitted electronically (via computer or internet) on a weekly basis or at intervals shorter than a week if notified by the NMFS' Southeast Fisheries Science Center (SEFSC) Science and Research Director (SRD), and prohibits

headboats from continuing to fish if they are delinquent in submitting reports. The purpose of this final rule is to obtain timelier fishing information from headboats to better monitor recreational annual catch limits (ACLs), improve stock assessments, and to help obtain 100 percent compliance with reporting in South Atlantic fisheries.

DATES: This rule is effective January 27, 2014.

ADDRESSES: Electronic copies of the For-Hire Reporting Amendment, which includes an environmental assessment and a regulatory impact review, may be obtained from the Southeast Regional Office Web site at *http://sero.nmfs.noaa.gov*.

Comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this final rule may be submitted in writing to Anik Clemens, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701; and Office of Management and Budget (OMB), by email at *OIRA_Submission@omb.eop.gov*, or by fax to 202–395–7285.

FOR FURTHER INFORMATION CONTACT: Karla Gore, Southeast Regional Office, NMFS, telephone 727–824–5305; email: *Karla.Gore@noaa.gov*.

SUPPLEMENTARY INFORMATION: NMFS and the Councils manage the fisheries for South Atlantic Snapper-Grouper, Atlantic Dolphin and Wahoo, and Gulf and South Atlantic CMP under their respective FMPs. The FMPs were prepared by the Gulf and South Atlantic Councils and are implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On September 18, 2013, NMFS published a notice of availability for the For-Hire Reporting Amendment and requested public comment (78 FR 57339). On September 27, 2013, NMFS published a proposed rule for the For-Hire Reporting Amendment and requested public comment (78 FR 59641). NMFS approved the For-Hire Reporting Amendment on December 16, 2013. The proposed rule and the For-Hire Reporting Amendment outline the rationale for the actions contained in this final rule. A summary of the actions implemented by the For-Hire Reporting Amendment and this final rule is provided below.

This final rule requires electronic reporting for headboat vessels in the South Atlantic snapper-grouper, Atlantic dolphin and wahoo, and South Atlantic CMP fisheries, increases the reporting frequency for the headboat vessels in these fisheries, and prohibits headboats from continuing to fish if they are delinquent in submitting their reports.

Comments and Responses

NMFS received a total of 6 comments on the For-Hire Reporting Amendment and the proposed rule, which included comments from private citizens, fishermen, non-governmental organizations, and fishermen associations. Four comments were in support of the action contained in the amendment. Three comments provided recommendations that were outside the scope of the amendment and rulemaking. Two comments expressed concern with the requirement for increased reporting frequency. These two comments are summarized into one comment which is responded to below.

Comment: The requirement to report weekly instead of monthly is too burdensome on fishermen.

Response: NMFS estimates the requirement for headboat owners and operators to report more frequently (weekly instead of monthly) does not create more burden on headboat owners and operators. Keeping accurate records is essential to successful business operation. As a result, recording trips as they are completed, or as soon as is practical, is expected to be the common business practice. Electronic recording and reporting is expected to support additional labor and business management efficiencies because it is expected to allow better data storage, retrieval, and production of annual performance summaries for use in business planning. Therefore, the increase in the frequency of reporting is expected to require little, if any, change in business practices or associated operational costs. Headboat owners and operators will still be reporting the same amount of information; they will just be clicking the send button to transmit the data more frequently. Currently, 95 percent of headboats are reporting electronically, and 80 to 90 percent of these headboats are submitting their monthly reports on time. This requirement is intended to obtain timelier fishing information from headboats to better monitor recreational ACLs, improve stock assessments, and to help obtain 100 percent compliance with reporting in South Atlantic fisheries.

Classification

The Regional Administrator, Southeast Region, NMFS, has determined that this final rule is necessary for the management of the South Atlantic snapper-grouper, dolphin and wahoo, and CMP fisheries and is consistent with the For-Hire Reporting Amendment, the FMPs, the Magnuson-Stevens Act and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this rule would not have a significant economic impact on a substantial number of small entities. The factual basis for this determination was published in the proposed rule and is not repeated here. No comments were received regarding the certification and NMFS has not received any new information that would affect its determination. As a result, a final regulatory flexibility analysis was not required and none was prepared.

This final rule contains collection-of-information requirements subject to the requirements of the Paperwork Reduction Act (PRA), which have been approved by OMB under control number 0648–0016. NMFS estimates the requirement for South Atlantic headboat owners and operators to report electronically results in a net zero effect on the reporting burden under OMB control number 0648–0016, because headboat owners and operators will continue to report all species harvested, however, now electronically instead of by paper. NMFS estimates the requirement for headboat owners and operators to report more frequently (weekly instead of monthly) does not create more burden on headboat owners and operators, because the headboat owners and operators will still be reporting the same amount of information; they will just be clicking the send button to transmit the data more frequently. Keeping accurate records is essential to successful business operation. As a result, recording trips as they are completed, or as soon as is practical, is expected to be the common business practice. These estimates of the public reporting burden include the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection-of-information.

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection-of-information subject to the requirements of the PRA, unless that collection-of-information displays a currently valid OMB control number.

List of Subjects in 50 CFR Part 622

Fisheries, Fishing, Headboat, Reporting and recordkeeping requirements, South Atlantic.

Dated: December 20, 2013.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, Performing the functions and duties of the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.13, paragraph (g) is added to read as follows:

§ 622.13 Prohibitions—general.

* * * * *

(g) Harvest or possess fish if the required headboat reports have not been submitted in accordance with this part.

* * * * *

■ 3. In § 622.176, paragraph (b) is revised to read as follows:

§ 622.176 Recordkeeping and reporting.

* * * * *

(b) *Charter vessel/headboat owners and operators*—(1) *General reporting requirement*—(i) *Charter vessels.* The owner or operator of a charter vessel for which a charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, as required under § 622.170(b)(1), or whose vessel fishes for or lands such snapper-grouper in or from state waters adjoining the South Atlantic EEZ, who is selected to report by the SRD must maintain a fishing record for each trip, or a portion of such trips as specified by the SRD, on forms provided by the SRD and must submit such record as specified in paragraph (b)(2) of this section.

(ii) *Headboats.* The owner or operator of a headboat for which a charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, as required under § 622.170(b)(1), or whose vessel fishes for or lands such snapper-grouper in or from state waters adjoining the South Atlantic EEZ, who is selected to report by the SRD must submit an electronic fishing record for each trip of all fish harvested within the time period specified in paragraph (b)(2)(ii) of this section, via the Southeast Region Headboat Survey.

(iii) *Electronic logbook/video monitoring reporting.* The owner or operator of a vessel for which a charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, as required under § 622.170(b)(1), or whose vessel fishes for or lands such snapper-grouper in or from state waters adjoining the South Atlantic EEZ, who is selected to report by the SRD must participate in the NMFS-sponsored electronic logbook and/or video monitoring program as directed by the SRD. Compliance with the reporting requirements of this paragraph (b)(1)(iii) is required for permit renewal.

(2) *Reporting deadlines*—(i) *Charter vessels.* Completed fishing records required by paragraph (b)(1)(i) of this section for charter vessels must be submitted to the SRD weekly, postmarked no later than 7 days after the end of each week (Sunday). Completed fishing records required by paragraph (b)(1)(iii) of this section for charter vessels may be required weekly or daily, as directed by the SRD. Information to be reported is indicated on the form and its accompanying instructions.

(ii) *Headboats.* Electronic fishing records required by paragraph (b)(1)(ii) of this section for headboats must be submitted at weekly intervals (or intervals shorter than a week if notified by the SRD) by 11:59 p.m., local time, the Sunday following a reporting week. If no fishing activity occurred during a reporting week, an electronic report so stating must be submitted for that reporting week by 11:59 p.m., local time, the Sunday following a reporting week.

(3) *Catastrophic conditions.* During catastrophic conditions only, NMFS provides for use of paper forms for basic required functions as a backup to the electronic reports required by paragraph (b)(1)(ii) of this section. The RA will determine when catastrophic conditions exist, the duration of the catastrophic conditions, and which participants or geographic areas are deemed affected by the catastrophic conditions. The RA will provide timely notice to affected participants via publication of notification in the **Federal Register,** NOAA weather radio, fishery bulletins, and other appropriate means and will authorize the affected participants' use of paper forms for the duration of the catastrophic conditions. The paper forms will be available from NMFS. During catastrophic conditions, the RA has the authority to waive or modify reporting time requirements.

(4) *Compliance requirement.* Electronic reports required by paragraph (b)(1)(ii) of this section must be submitted and received by NMFS according to the reporting requirements under this section. A report not received within the time specified in paragraph (b)(2)(ii) of this section is delinquent. A delinquent report automatically results in the owner and operator of a headboat for which a charter vessel/headboat permit for South Atlantic snapper-grouper has been issued being prohibited from harvesting or possessing such species, regardless of any additional notification to the delinquent owner and operator by NMFS. The owner and operator who are prohibited from harvesting or possessing such species due to delinquent reports are authorized to harvest or possess such species only after all required and delinquent reports have been submitted and received by NMFS according to the reporting requirements under this section.

* * * * *

■ 4. In § 622.271, paragraph (b) is revised to read as follows:

§ 622.271 Recordkeeping and reporting.

* * * * *

(b) *Charter vessel/headboat owners and operators*—(1) *General reporting requirement*—(i) *Charter vessels.* The owner or operator of a charter vessel for which a charter vessel/headboat permit for Atlantic dolphin and wahoo has been issued, as required under § 622.270(b)(1), or whose vessel fishes for or lands Atlantic dolphin or wahoo in or from state waters adjoining the Atlantic EEZ, who is selected to report by the SRD must maintain a fishing record for each trip, or a portion of such trips as specified by the SRD, on forms provided by the SRD and must submit such record as specified in paragraph (b)(2) of this section.

(ii) *Headboats.* The owner or operator of a headboat for which a charter vessel/headboat permit for Atlantic dolphin and wahoo has been issued, as required under § 622.270(b)(1), or whose vessel fishes for or lands Atlantic dolphin or wahoo in or from state waters adjoining the South Atlantic EEZ, who is selected to report by the SRD must submit an electronic fishing record for each trip of all fish harvested within the time period specified in paragraph (b)(2)(ii) of this section, via the Southeast Region Headboat Survey.

(2) *Reporting deadlines*—(i) *Charter vessels.* Completed fishing records required by paragraph (b)(1)(i) of this section for charter vessels must be submitted to the SRD weekly, postmarked no later than 7 days after the end of each week (Sunday).

Information to be reported is indicated on the form and its accompanying instructions.

(ii) *Headboats.* Electronic fishing records required by paragraph (b)(1)(ii) of this section for headboats must be submitted at weekly intervals (or intervals shorter than a week if notified by the SRD) by 11:59 p.m., local time, the Sunday following a reporting week. If no fishing activity occurred during a reporting week, an electronic report so stating must be submitted for that reporting week by 11:59 p.m., local time, the Sunday following a reporting week.

(3) *Catastrophic conditions.* During catastrophic conditions only, NMFS provides for use of paper forms for basic required functions as a backup to the electronic fishing records required by paragraph (b)(1)(ii) of this section. The RA will determine when catastrophic conditions exist, the duration of the catastrophic conditions, and which participants or geographic areas are deemed affected by the catastrophic conditions. The RA will provide timely notice to affected participants via publication of notification in the **Federal Register**, NOAA weather radio, fishery bulletins, and other appropriate means and will authorize the affected participants' use of paper forms for the duration of the catastrophic conditions. The paper forms will be available from NMFS. During catastrophic conditions, the RA has the authority to waive or modify reporting time requirements.

(4) *Compliance requirement.* Electronic reports required by paragraph (b)(1)(ii) of this section must be submitted and received by NMFS according to the reporting requirements under this section. A report not received within the time specified in paragraph (b)(2)(ii) of this section is delinquent. A delinquent report automatically results in the owner and operator of a headboat for which a charter vessel/headboat permit for Atlantic dolphin and wahoo has been issued being prohibited from harvesting or possessing such species, regardless of any additional notification to the delinquent owner and operator by NMFS. The owner and operator who are prohibited from harvesting or possessing such species due to delinquent reports are authorized to harvest or possess such species only after all required and delinquent reports have been submitted and received by NMFS according to the reporting requirements under this section.

* * * * *

■ 5. In § 622.374, paragraph (b) is revised to read as follows:

§ 622.374 Recordkeeping and reporting.

* * * * *

(b) *Charter vessel/headboat owners and operators*—(1) *General reporting requirement*—(i) *Charter vessels.* The owner or operator of a charter vessel for which a charter vessel/headboat permit for Gulf coastal migratory pelagic fish or South Atlantic coastal migratory pelagic fish has been issued, as required under § 622.370(b)(1), or whose vessel fishes for or lands Gulf or South Atlantic coastal migratory pelagic fish in or from state waters adjoining the Gulf or South Atlantic EEZ, who is selected to report by the SRD must maintain a fishing record for each trip, or a portion of such trips as specified by the SRD, on forms provided by the SRD and must submit such record as specified in paragraph (b)(2)(i) of this section.

(ii) *South Atlantic headboats.* The owner or operator of a headboat for which a charter vessel/headboat permit for South Atlantic coastal migratory fish has been issued, as required under § 622.370(b)(1), or whose vessel fishes for or lands South Atlantic coastal migratory pelagic fish in or from state waters adjoining the South Atlantic EEZ, who is selected to report by the SRD must submit an electronic fishing record of each trip of all fish harvested within the time period specified in paragraph (b)(2)(ii) of this section, via the Southeast Region Headboat Survey.

(iii) *Gulf headboats.* The owner or operator of a headboat for which a charter vessel/headboat permit for Gulf coastal migratory pelagic fish has been issued, as required under § 622.370(b)(1), or whose vessel fishes for or lands Gulf coastal migratory fish in or from state waters adjoining the Gulf EEZ, who is selected to report by the SRD must maintain a fishing record for each trip, or a portion of such trips as specified by the SRD, on forms provided by the SRD and must submit such record as specified in paragraph (b)(2)(iii) of this section.

(2) *Reporting deadlines*—(i) *Charter vessels.* Completed fishing records required by paragraph (b)(1)(i) of this section for charter vessels must be submitted to the SRD weekly, postmarked no later than 7 days after the end of each week (Sunday). Information to be reported is indicated on the form and its accompanying instructions.

(ii) *South Atlantic headboats.* Electronic fishing records required by paragraph (b)(1)(ii) of this section for South Atlantic headboats must be submitted at weekly intervals (or intervals shorter than a week if notified by the SRD) by 11:59 p.m., local time, the Sunday following a reporting week. If no fishing activity occurred during a reporting week, an electronic report so stating must be submitted for that reporting week by 11:59 p.m., local time, the Sunday following a reporting week.

(iii) *Gulf headboats.* Completed fishing records required by paragraph (b)(1)(iii) of this section for Gulf headboats must be submitted to the SRD monthly and must be made available to an authorized statistical reporting agent or be postmarked no later than 7 days after the end of each month. Information to be reported is indicated on the form and its accompanying instructions.

(3) *Catastrophic conditions.* During catastrophic conditions only, NMFS provides for use of paper forms for basic required functions as a backup to the electronic reports required by paragraph (b)(1)(ii) of this section. The RA will determine when catastrophic conditions exist, the duration of the catastrophic conditions, and which participants or geographic areas are deemed affected by the catastrophic conditions. The RA will provide timely notice to affected participants via publication of notification in the **Federal Register**, NOAA weather radio, fishery bulletins, and other appropriate means and will authorize the affected participants' use of paper forms for the duration of the catastrophic conditions. The paper forms will be available from NMFS. During catastrophic conditions, the RA has the authority to waive or modify reporting time requirements.

(4) *Compliance requirement.* Electronic reports required by paragraph (b)(1)(ii) of this section must be submitted and received by NMFS according to the reporting requirements under this section. A report not received within the time specified in paragraph (b)(2)(ii) of this section is delinquent. A delinquent report automatically results in the owner and operator of a headboat for which a charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish has been issued being prohibited from harvesting or possessing such species, regardless of any additional notification to the delinquent owner and operator by NMFS. The owner and operator who are prohibited from harvesting or possessing such species due to delinquent reports are authorized to harvest or possess such species only after all required and delinquent reports have been submitted and received by NMFS according to the reporting requirements under this section.

[Docket No. 131212999–3999–01]

RIN 0648–BD84

Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Extension of Emergency Fishery Closure Due to the Presence of the Toxin That Causes Paralytic Shellfish Poisoning

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; emergency action; extension of effective period and expansion; request for comments.

SUMMARY: This temporary rule extends a closure of Federal waters for one year, through December 31, 2014. It also expands the list of species prohibited for harvest under this closure to include gastropods, commonly referred to as whelks, conchs, and snails. This temporary rule, first published in 2005, has been subsequently extended several times at the request of the U.S. Food and Drug Administration. This action also includes a correction to exclude the Federal waters west of 70 degrees West longitude.

DATES: This action extends the closure for one year, effective January 1, 2014, through December 31, 2014. Comments must be received on any part of this action by January 27, 2014.

ADDRESSES: You may submit comments, identified by NOAA-NMFS-2011-0260, by any of the following methods:

- *Electronic Submissions:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2011-0260*, click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.
- *Fax:* (978) 281–9177, Attn: Jason Berthiaume.
- *Mail:* John K. Bullard, Regional Administrator, NMFS, Northeast Regional Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope: "Comments on PSP Closure."

Instructions: All comments received are part of the public record and will generally be posted to *www.regulations.gov* without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

NMFS will accept anonymous comments. Attachments to electronic comments will be accepted via Microsoft Word, Microsoft Excel, WordPerfect, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Jason Berthiaume, Fishery Management Specialist, phone: (978) 281–9177, fax: (978) 281–9135.

SUPPLEMENTARY INFORMATION:

Background

On June 10, 2005, the U.S. Food and Drug Administration (FDA) requested that NMFS close an area of Federal waters off the coasts of New Hampshire and Massachusetts to fishing for bivalve shellfish intended for human consumption due to the presence in those waters of toxins (saxotoxins) that cause Paralytic Shellfish Poisoning (PSP). These toxins are produced by the alga *Alexandrium fundyense,* which can form blooms commonly referred to as red tides. Red tide blooms, also known as harmful algal blooms (HABs), can produce toxins that accumulate in filter-feeding shellfish. Shellfish contaminated with the toxin, if eaten in large enough quantity, can cause illness or death from PSP.

On June 16, 2005, NMFS published an emergency rule (70 FR 35047) closing the area recommended by the FDA (i.e., the Temporary PSP Closure Area). Since 2005, the closure has been extended several times and the area has been expanded and divided into northern and southern components. The Northern Temporary PSP Closure Area remained closed to the harvest of all bivalve molluscan shellfish, while the Southern Temporary PSP Closure Area was reopened to the harvest of Atlantic surfclams, ocean quahogs, and sea scallop adductor muscles harvested and shucked at sea. The current closure will expire on December 31, 2013, and this action extends this closure for one additional year, through December 31, 2014.

In addition, this emergency rule also prohibits the harvest of gastropods from the Temporary PSP Closure Areas. As discussed above, these areas are currently closed to the harvest of bivalves, but the closure does not include gastropods. Gastropods include carnivorous snails, conchs, and whelks that feed on bivalves. The bivalves, if contaminated with the toxin that causes PSP, transfer the toxins on to the gastropod. While there are few data available on how susceptible gastropods are to PSP, the available evidence suggests that gastropods typically have higher levels of the PSP toxin and retain it longer than bivalves taken from the same waters.

NMFS has recently received information that there is a developing Federal waters whelk fishery seeking to target the northern component of the Temporary PSP Closure to harvest whelks. While there has been a state waters whelk fishery in recent past, there have been few available data regarding a Federal waters fishery. The data that are available indicate that there is a Federal waters fishery, primarily Massachusetts based, where the PSP Closed Areas cover a large portion of the Massachusetts coast line. The FDA, in collaboration with the Commonwealth of Massachusetts Division of Marine Fisheries and Department of Public Health, have been actively investigating this issue, and, on October 29, 2013, the FDA and the Massachusetts Division of Marine Fisheries and Department of Public Health advised NMFS to expand the Temporary PSP Closures to also include a prohibition on the harvest of gastropods while the matter is being researched. On November 26, 2013, NMFS received a letter from the FDA, formalizing its request that NMFS modify the Temporary PSP Closures to also include a prohibition on the harvest of gastropods. Based on these recommendations, this action will prohibit the harvest and possession of gastropods from the areas currently defined as the Temporary PSP Closed Areas. The FDA is actively working on this and they have informed NMFS that they will continue to look into this issue. Therefore, until NMFS is directed otherwise by the FDA, the Temporary PSP Closed Areas will also include a prohibition on gastropod harvesting. As such, NMFS is seeking comments on the gastropod fishery, the PSP closure, and the susceptibility of gastropods and PSP.

The boundaries of the northern component of the Temporary PSP Closure Area comprise Federal waters bounded by the following coordinates specified in Table 1 below. Under this emergency rule, this area remains closed to the harvest of Atlantic surfclams, ocean quahogs, and whole or roe-on scallops, and also now includes gastropods.

TABLE 1—COORDINATES FOR THE NORTHERN TEMPORARY PSP CLOSURE AREA

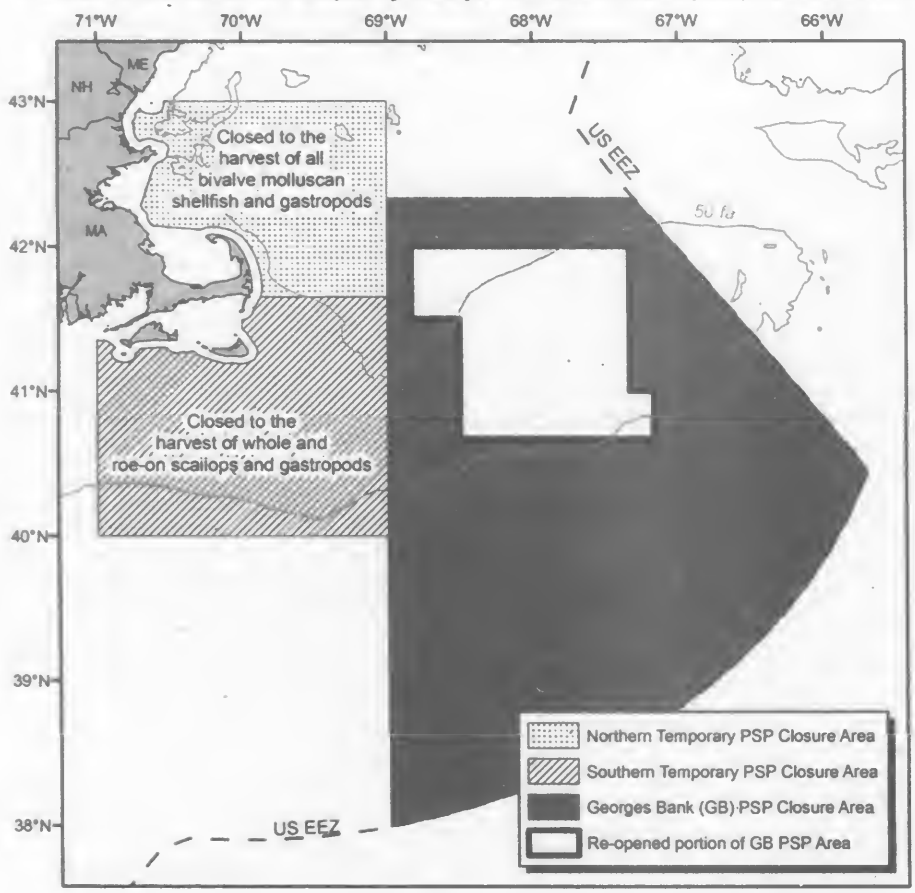
Point	Latitude	Longitude
1	43°00′ N	71°00′ W
2	43°00′ N	69°00′ W
3	41°39′ N	69°00′ W
4	41°39′ N	71°00′ W
5	43°00′ N	71°00′ W

The boundaries of the southern component of the Temporary PSP Closure Area comprise Federal waters bound by the following coordinates specified in Table 2. Under this emergency rule, the Southern Temporary PSP Closure Area remains closed to the harvest of whole or roe-on scallops, and now also includes gastropods.

TABLE 2—COORDINATES FOR THE SOUTHERN TEMPORARY PSP CLOSURE AREA

Point	Latitude	Longitude
1	41°39′ N	71°00′ W
2	41°39′ N	69°00′ W
3	40°00′ N	69°00′ W
4	40°00′ N	71°00′ W
5	41°39′ N	71°00′ W

Northern and Southern Temporary Paralytic Shellfish Poison (PSP) Closure Areas



This notice also corrects and clarifies the coordinates in the regulatory text to exclude the area known as Nantucket Shoals (also referred to as pocket waters) from the closure. The Magnuson-Stevens Fishery

Conservation and Management Act provides the Commonwealth of Massachusetts with the authority to manage the Federal waters in this area west of the 70 degrees West longitude. This change is a technical correction and will have no effects on fisheries because Massachusetts already exercises its authority in this area.

Classification

Pursuant to section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1855(c) the Assistant Administrator for Fisheries, NOAA, has determined that this emergency action is consistent with the provisions of the Magnuson-Stevens Act, and other applicable law. Section 305 of the Magnuson-Stevens Act authorizes the Secretary to act if (1) the Secretary finds that an emergency involving a fishery exists; or (2) the Secretary finds that interim measures are needed to reduce overfishing in any fishery; or (3) if the Council finds one of those factors exists and requests that the Secretary act; or (4) to respond to a public health emergency or an oil spill. Where such circumstances exist, the Secretary may promulgate emergency rules or interim measures "to address the emergency or overfishing" (16 U.S.C. 1855(c)(1) and (2)). The Secretary has delegated this authority to NMFS. Further, NMFS has issued guidance defining when "an emergency" involving a fishery exists (62 FR 44421; August 21, 1997). This guidance defines an emergency as a situation that (1) arose from recent, unforeseen events, (2) presents a serious management problem in the fishery, and (3) can be addressed through interim emergency regulations for which the immediate benefits outweigh the value of advance notice, public comment, and the deliberative consideration of the impacts on participants to the same extent as would be expected under the formal rulemaking process. Therefore, the rationale for an emergency as provided in the preamble of this rule, justifies this rule as an emergency and interim action according to the statutes and guidance as cited above.

Pursuant to section 5 U.S.C. 553(b)(B) of the Administrative Procedure Act, the Assistant Administrator for Fisheries finds there is good cause to waive prior notice and an opportunity for public comment on this action as notice and comment would be impracticable and contrary to the public interest due to a public health emergency. This action prohibits the harvest and possession of gastropods from the areas referred to as the Temporary PSP Closed Areas, which have been closed to bivalve fishing since 2005. NMFS has recently received information that the whelk fishery is a new and potentially expanding fishery in Federal waters, possibly targeting the northern component of the Temporary PSP Closure Area to harvest whelks. Based on available data, whelk are susceptible to PSP as they can ingest bivalves contaminated with the toxins that cause PSP, transferring the toxins on to the gastropod. As such, since the current closure does not include gastropods, there is risk of gastropods contaminated with PSP entering the market for human consumption. As such, to protect public health it is in the best interest of the public as well as the developing whelk fishery to have this action in place as soon as possible. Thus, there is good cause to waive prior notice and an opportunity for public comment on this action as notice and comment would be impracticable and contrary to the public interest due to a public health emergency.

In regards to the closure extension, public comment has been solicited concurrently with each of the extensions of this action, as detailed and responded to below. Under section 553(d)(3), there is good cause to waive the 30-day delay in effectiveness due to a public health emergency. The original emergency closure was in response to a public health emergency. Toxic algal blooms are responsible for the marine toxin that causes PSP in persons consuming affected shellfish. People have become seriously ill and some have died from consuming affected shellfish under similar circumstances. Pursuant to section 305(c)(3)(C) of the Magnuson-Stevens Act, the closure to the harvest of shellfish, as modified on September 9, 2005, and re-instated on October 18, 2005, may remain in effect until the circumstances that created the emergency no longer exist, provided the public has had an opportunity to comment after the regulation was published, and, in the case of a public health emergency, the Secretary of Health and Human Services concurs with the Commerce Secretary's action. During the initial comment period, June 16, 2005, through August 1, 2005, no comments were received. Two comments were received after the re-opening of the southern component of the Temporary PSP Closure Area on September 9, 2005. One commenter described the overall poor quality of water in Boston Harbor, but provided no evidence to back these claims. The other commenter expressed reluctance to re-opening a portion of the closure area without seeing the results of the FDA tests. Data used to make determinations regarding closing and opening of areas to certain types of fishing activity are collected from Federal, state, and private laboratories. NOAA maintains a Red Tide Information Center (*http://oceanservice.noaa.gov/redtide*) which can be accessed directly or through the Web site listed in the **ADDRESSES** section. Information on test results, modeling of algal bloom movement, and general background on red tides can be accessed through this information center. While NMFS is the agency with the authority to promulgate the emergency regulations, NMFS defers to the FDA in promulgating such regulations when in regard to public health. The FDA requested that NMFS lift a portion of the closure after the FDA determined that the area was safe. Based on this recommendation, NMFS lifted a portion of the closure on September 9, 2005. If necessary, the regulations may be terminated at an earlier date, pursuant to section 305(c)(3)(D) of the Magnuson-Stevens Act, by publication in the **Federal Register** of a notice of termination, or extended further to ensure the safety of human health.

This emergency action is exempt from the procedures of the Regulatory Flexibility Act because the rule is issued without opportunity for prior notice and opportunity for public comment.

This rule is not significant for the purposes of Executive Order 12866.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: December 20, 2013.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, performing the functions and duties of the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 648 is amended to read as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

■ 1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 648.14, paragraphs (a)(10)(iii) and (iv) are added to read as follows:

§ 648.14 Prohibitions.

(a) * * *

(10) * * *

(iii) Fish for, harvest, catch, possess or attempt to fish for, harvest, catch, or possess any bivalve shellfish, including

Atlantic surfclams, ocean quahogs, and mussels, with the exception of sea scallops harvested only for adductor muscles and shucked at sea, and any gastropods, including whelks, conchs, and carnivorous snails, unless issued and possessing on board a Letter of Authorization (LOA) from the Regional Administrator authorizing the collection of shellfish and/or gastropods for biological sampling and operating under the terms and conditions of said LOA, in the area of the U.S. Exclusive Economic Zone bound by the following coordinates in the order stated:

(A) 43°00′ N. lat., 71°00′ W. long.;
(B) 43°00′ N. lat., 69°00′ W. long.;
(C) 41°39′ N. lat., 69°00′ W. long.;
(D) 41°39′ N. lat., 71°00′ W. long.; and then ending at the first point.

(iv) Fish for, harvest, catch, possess, or attempt to fish for, harvest, catch, or possess any sea scallops, except for sea scallops harvested only for adductor muscles and shucked at sea, and any gastropods, including whelks, conchs, and carnivorous snails, unless issued and possessing on board a Letter of Authorization (LOA) from the Regional Administrator authorizing collection of shellfish and/or gastropods for biological sampling and operating under the terms and conditions of said LOA, in the area of the U.S. Exclusive Economic Zone bound by the following coordinates in the order stated below, excluding the Federal waters of Nantucket Sound west of 70° 00′ W. Longitude:

(A) 41°39′ N. lat., 71°00′W. long.;
(B) 41°39′ N. lat., 69°00′ W. long.;
(C) 40°00′ N. lat., 69°00′ W. long.:
(D) 40°00′ N. lat., 71°00′ W. long.; and then ending at the first point.

[Docket No. 121009528–2729–02]

RIN 0648–XD026

Fisheries of the Northeastern United States; 2014 Commercial Summer Flounder Quota Adjustments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Announcement of 2014 commercial summer flounder state quotas.

SUMMARY: NMFS is announcing the commercial summer flounder state quotas for fishing year 2014. The 2014 summer flounder specifications were established in December 2012. This notice incorporates any previously unaccounted for overages from fishing year 2012 and any known overages to date from fishing year 2013. These commercial state quotas may change as a result of a recent stock assessment and a recommendation by the Mid-Atlantic Fishery Management Council.

DATES: Effective January 1, 2014, through December 31, 2014.

FOR FURTHER INFORMATION CONTACT: Moira Kelly, Fishery Policy Analyst, (978) 281–9218.

SUPPLEMENTARY INFORMATION:

Background

The Mid-Atlantic Fishery Management Council (Council) and the Atlantic States Marine Fisheries Commission cooperatively manage the summer flounder, scup, and black sea bass fisheries. Specifications in these fisheries include the acceptable biological catch (ABC) limit, various catch and landing subdivisions (such as the commercial and recreational sector annual catch limits (ACLs)), annual catch targets (ACTs), sector-specific landing limits (i.e., the commercial fishery quota and recreational harvest limit (RHL)), and research set-aside (RSA) established for the upcoming fishing year. Typically, these specifications are set on an annual basis and announced in the **Federal Register** in December of each year. Because the summer flounder stock assessment was scheduled for July 2013 and the normal specification schedule would be delayed, the Council established specifications for the 2014 summer flounder fishery in December 2012 (December 31, 2012; 77 FR 76942). These specifications included the initial state allocations, as well as the state allocations after adjusting for RSA.

An important component of the annual specifications rulemaking is the notification of the commercial summer flounder state quota and overages. Overages are calculated using final landings data from the previous fishing year and landings from the current fishing year through October 31. In this case, previously unaccounted for overages from fishing year 2012 are combined with known overages from fishing year 2013, through October 31, 2013. As a result, the 2014 summer flounder state quotas, adjusted for RSA and overages, are as follows:

TABLE 1—2014 COMMERCIAL SUMMER FLOUNDER STATE QUOTAS, AS ADJUSTED BY OVERAGES AND RSA

State	FMP percent share	2014 Initial quota		2014 Initial quota, less RSA		Quota overages (through 10/31/13)		Adjusted 2014 quota, less RSA and overages

NC	27.44584	3,219,604	1,461,703	3,125,829	1,417,852	0	0	3,125,829	1,417,852
Total	100.00	11,730,754	5,326,000	11,389,082	5,166,000	155,376	70,476	11,284,065	5,118,366

On October 9, 2013, the Council met to discuss whether adjustments to the previously established 2014 specifications were necessary as a result of the updated stock assessment, and to establish fishing year 2015

specifications for the summer flounder, scup, and black sea bass fisheries. The Council determined that an adjustment was necessary for the 2014 summer flounder specifications. Table 2 below summarizes the established 2014 summer flounder specifications, as well as the specifications that the Council voted to recommend in October 2013. The Council has not yet submitted the specifications package to be reviewed by NMFS; nor has NMFS made a determination that these adjustments would be implemented. The state quotas listed in Table 1 will be in effect until and unless otherwise changed through proposed and final rulemaking.

TABLE 2—SUMMER FLOUNDER 2014 SPECIFICATIONS AND COUNCIL RECOMMENDED 2014 SPECIFICATIONS

Proposed Rules

Federal Register
Vol. 78, No. 249
Friday, December 27, 2013

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 15d

RIN 0503–AA52

Nondiscrimination in Programs or Activities Conducted by the United States Department of Agriculture

AGENCY: United States Department of Agriculture.

ACTION: Notice of proposed rulemaking.

SUMMARY: The United States Department of Agriculture (USDA or Department) proposes to amend its regulation on nondiscrimination in programs or activities conducted by the Department. The changes are proposed to clarify the roles and responsibilities of USDA's Office of the Assistant Secretary for Civil Rights (OASCR) and USDA agencies in enforcing nondiscrimination in programs or activities conducted by the Department and to strengthen USDA's civil rights compliance and complaint processing activities to better protect the rights of USDA customers. OASCR's compliance activities are detailed, and a requirement is included that each agency shall, for civil rights compliance purposes, collect, maintain, and annually compile data on the race, ethnicity, and gender of all conducted program applicants and participants by county and State. Applicants and program participants will provide the race, ethnicity, and gender data on a voluntary basis. The proposed amendment also provides that OASCR shall offer Alternative Dispute Resolution (ADR) services to complainants where appropriate. This amendment is intended to encourage the early resolution of customer complaints. Finally, USDA proposes to amend its regulation to add protection from discrimination in programs or activities conducted by the Department with respect to two new protected bases: political beliefs and gender identity. This amendment is meant to make explicit protections against discrimination based on USDA program customers' political beliefs or gender identity. Gender identity includes USDA program customers' gender expression, including how USDA program customers act, dress, perceive themselves, or otherwise express their gender.

DATES: Submit comments on or before January 27, 2014. Submit comments on the Paperwork Reduction Act package on or before February 25, 2014.

ADDRESSES: Submit comments on the proposed regulation to Anna G. Stroman, Chief, Policy Division, by mail at Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW., Washington DC, 20250. Please send written comments on the information collection or recordkeeping requirements included in this proposal to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), attention: Desk Officer for Agriculture, Washington, DC 20503.

Please state that your comments refer to Docket No. 0503–AA52. Please send a copy of your comments to: Docket No. 0503–AA52, Anna G. Stroman, Chief, Policy Division, by mail at the Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW., Washington DC, 20250. Comments on the Paperwork Reduction Act section are best assured of having their full effect if OMB receives them within 60 days of publication of this proposed rule.

FOR FURTHER INFORMATION CONTACT: Anna Stroman on (202) 205–5953 or at *anna.stroman@ascr.usda.gov.*

SUPPLEMENTARY INFORMATION:

Background

The USDA proposes to amend its regulation on nondiscrimination in programs or activities conducted by the Department. In 1964, USDA extended the nondiscrimination principles found in Title VI of the Civil Rights Act of 1964 to apply to its own federally conducted activities by prohibiting discrimination on the basis of race, color, and national origin. (See 29 **Federal Register** (FR) 16966, creating 7 CFR part 15, subpart b, referring to nondiscrimination in direct USDA programs and activities, now found at 7 CFR part 15d). Subsequently, USDA expanded the protected bases for its conducted programs to include religion, sex, age, marital status, familial status, sexual orientation, disability, and whether any portion of a person's income is derived from public assistance programs. The Secretary's intention is to hold the Department and its employees accountable for a nondiscrimination standard equal to or greater than the standard recipients of Federal financial assistance must follow.

The regulation was last revised in 1999 (64 FR 66709, Nov 30, 1999). The changes are proposed to clarify the roles and responsibilities of OASCR and USDA agencies in enforcing nondiscrimination in programs or activities conducted by the Department ("conducted programs") and to strengthen USDA's civil rights compliance and complaint processing activities to better protect the rights of USDA customers. This regulation does not address those programs for which the Department provides Federal financial assistance [1] ("federally assisted programs"), which are covered under 7 CFR parts 15, 15a and 15b.

Highlights of Changes to the Regulation

The proposed regulation outlines three specific changes to current activities. First, the proposed regulation includes a requirement that each agency shall, for civil rights compliance purposes, collect, maintain, and annually compile, by county and State, data on the race, ethnicity, and gender of all applicants and participants of programs and activities conducted by USDA. Applicants and program participants of these programs will provide this data on a voluntary basis. Although USDA first established a policy for collecting data on race, ethnicity, and gender in 1969, there is currently no uniform requirement for reporting and tabulating this data across USDA's diverse program areas. The four USDA agencies that administer the majority of USDA's conducted programs—the Farm Services Agency (FSA), the Natural Resources Conservation Service (NRCS), Rural

[1] Federally assisted programs are programs and activities receiving financial assistance through a third party such as a State or municipal government, university, or organization. Federally conducted programs, which are those programs covered in this regulation, are programs and activities receiving assistance directly from USDA.

Development (RD), and the Forest Service—already collect this data from individuals. FSA, NRCS, and RD (the "field-based agencies") collect this data under the requirements of section 14006 of the Food, Conservation, and Energy Act of 2008 (2008 Farm Bill), which requires collection of this data for each program that serves agricultural producers and landowners. This data allows USDA to track application and participation rates for socially disadvantaged and limited resources applicants and participants. Together, these four agencies capture more than 90 percent of the contacts USDA has with the public through its conducted programs. This proposed regulation will standardize the recordkeeping requirement across the Department to all programs conducted by USDA that deliver benefits to the public.

Second, the rule would require that OASCR offer ADR services to complainants where appropriate. This amendment is intended to encourage the early resolution of customer complaints and is in accordance with the Secretary of Agriculture's Blueprint for Stronger Service. Offering ADR will expand the use of techniques currently applied in the employment context that facilitate complaint resolution and shorten resolution time. It will provide a cost-effective opportunity for early complaint resolution. USDA anticipates that this measure will reduce costs associated with complaint processing while also enhancing customer experience with the Department.

Finally, USDA proposes to amend its regulation to add protection from discrimination in programs or activities conducted by the Department with respect to two new protected bases, political beliefs and gender identity. Discrimination by USDA employees on these grounds is already prohibited in USDA's nondiscrimination statement. This amendment is meant to formalize protections against discrimination based on USDA program customers' political beliefs or gender identity, which will strengthen USDA's ability to ensure that all USDA customers receive fair and consistent treatment, and align the regulations with USDA's civil rights goals. Gender identity includes USDA program customers' gender expression, including how USDA program customers act, dress, perceive themselves, or otherwise express their gender.

The inclusion of political beliefs will prohibit discrimination consistent with the Food Stamp Act of 1964, Public Law 88–525, 78 Stat. 703–709 (Aug. 31, 1964), the Civil Service Reform Act of 1978 (which covers political affiliation), and the Secretary of Agriculture's civil rights policy statements.

The inclusion of gender identity will ensure equal treatment of transgender and other gender nonconforming individuals in USDA's conducted programs and activities. For the purpose of this regulation, gender identity includes USDA program customers' gender expression, including how USDA program customers act, dress, perceive themselves, or otherwise express their gender. The inclusion of gender identity as a separate category is not intended to undermine existing protections for transgender and other nonconforming individuals under laws that prohibit sex discrimination.

The change proposed will allow USDA customers of conducted programs who believe that they have been discriminated against on the basis of political beliefs or gender identity to take advantage of USDA's existing mechanisms to file an administrative complaint and receive a response. USDA's response could include recommending additional training for USDA employees or outreach in appropriate cases, procedures which already take place and can continue to take place within existing resources. The change proposed applies only to USDA's internal administrative complaint mechanism and does not, in and of itself, create any new legal rights to bring suit against USDA, or expand the class of cases where USDA is authorized to pay money in connection with civil rights complaints.

Executive Orders 12866 and 13563 and Regulatory Flexibility Act

The proposed rule has been determined to be significant for the purposes of Executive Order 12866 by the OMB. Executive Order 12866, "Regulatory Planning and Review," and Executive Order 13563, "Improving Regulation and Regulatory Review," direct agencies to assess all costs and benefits of available regulatory alternatives, and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity).

The Regulatory Flexibility Act (RFA) requires agencies to consider the impact of their rules on small entities and to evaluate alternatives that would accomplish the same objectives without undue burden when the rules impose a significant economic impact on a substantial number of small entities.

Regulatory Impact Analysis—Benefits and Costs

The proposed changes to 7 CFR part 15d will clarify the roles and responsibilities of the United States Department of Agriculture's (USDA) Office of the Assistant Secretary for Civil Rights (OASCR) and USDA agencies in enforcing nondiscrimination in programs or activities conducted by the Department. They will also strengthen USDA's civil rights compliance and complaint processing activities to better protect the rights of USDA's customers.

Impact of Changes

This regulation will afford several benefits. First, requiring the collection of data in a standardized fashion of applicants and participants of those programs in which USDA directly provides to the public services, benefits, or resources (i.e. conducted programs) will conform with the requirements of the 2008 Farm Bill. Second, it will strengthen USDA's ability to monitor agency compliance with civil rights requirements. Third, the expansion of Alternative Dispute Resolution Services will enhance USDA's ability to resolve complaints against USDA conducted programs, and result in a small net annual savings to USDA. The expansion of protections against discrimination in the delivery of conducted programs will improve the protection of USDA customers' rights by ensuring that USDA conducted programs are delivered fairly and consistently.

These changes will impose a small, time-related cost on the public who are served by USDA's conducted programs through the data collection requirement, should they volunteer to provide the data. This data collection requirement will benefit USDA by enabling it to better monitor whether USDA programs and services are meeting the needs of all populations served by USDA. USDA does not anticipate that the proposed changes will otherwise significantly add to USDA's program costs.

The proposed changes do not affect programs administered by States, local governments, or other third-party recipients of Federal assistance from USDA, which are covered under 7 CFR parts 15, 15a and 15b. The benefits and costs of each of the three proposed changes to the rule are discussed below.

Collection of Voluntary Data on Race, Ethnicity, and Gender

The proposed rule requires that each USDA agency collect, maintain, and annually compile data on the race, ethnicity, and gender of all program

applicants and participants of conducted programs by county and State. Program users' responses will be voluntary. This will create a standard collection of data on race, ethnicity, and gender from applicants and beneficiaries of USDA-conducted programs. USDA anticipates that this expanded data collection will include additional data regarding customers who are and are not receiving USDA benefits, improve the design of USDA programs, and ultimately reduce the number of complaints of discrimination filed against USDA. While it is difficult to quantify the impact of these improvements in advance of implementation, improvements in outreach and monitoring adopted since 2009 led to a measurable drop in complaints received.

As described below, the proposed additional collection of voluntary data will impose a small new cost on the public in the form of time needed to complete the form. USDA estimates that the cost to the USDA agency to process the collection of the additional data on race, ethnicity, and gender proposed in the rule will be low. As previously described, the three field-based agencies and the Forest Service account for more than 90 percent of contacts with the public in USDA-conducted programs. However, these agencies are already collecting the data required under this rule, and USDA has already incurred the associated costs. Three additional USDA agencies currently have conducted programs that will be covered by the proposed rule, and the passage of this rule will require new data collection efforts. These three agencies are the Animal and Plant Health Inspection Service (APHIS), the Foreign Agricultural Service (FAS), and the Food and Nutrition Service (FNS). These three agencies will collect voluntary data from individuals who apply, participate in, or receive benefits from their various conducted programs. Collectively, collection of voluntary data at these three agencies will impact an estimated 1,349 additional program users per year. USDA estimates that it will take each participant 3 minutes to respond, and using a conservative 100-percent response rate, USDA estimates that the total new impact to the public from this requirement will be 68 additional burden hours to program users (Table 1). For comparison, the existing collection requirements under FSA, NRCS, RD, and the Forest Service involve a burden of about 82,800 hours. Considering USDA agency costs, USDA estimates the total cost of the additional data collection to be $5,289 (Table 2).

TABLE 1—ESTIMATED BURDEN HOURS TO PUBLIC FROM NEW DATA COLLECTION REQUIRED BY PROPOSED RULE

Agency	Contacts with program users per year [1]	Annual burden hours at 3 min. per form [2]
APHIS	1,100	55
FAS	90	5
FNS	159	8
Total	1,349	68

Source:
[1] Individual USDA Agency estimates of the number of program participants engaging in conducted programs
[2] Annual burden hours are calculated based on the unit of time needed to complete the form: 3 min./60 min. = 0.05hours per form, which is multiplied by the number of agency program users.

TABLE 2—ESTIMATED PUBLIC AND AGENCY COST OF NEW DATA COLLECTION REQUIRED BY PROPOSED RULE

Agency	Number of contacts with program users per year [1]	Estimated cost to public in time required to complete form at $0.84 per contact [2]	Cost to USDA to collect and report data at $3.08 per contact [3]	Total costs
APHIS	1,100	$924	$3388	$4312
FAS	90	76	277	353
FNS	159	134	490	624
Total [4]	1,349	1,134	4,155	5,289

Sources:
[1] Individual USDA Agency estimates of the number of program participants engaging in conducted programs.
[2] Estimated cost to the public in the time required to complete the form is estimated based on the Department of Labor Occupation Employment Survey data, which shows that for all occupations, the median wage rate is $16.71/hr. This rate equals $0.28 per minute, or $.84 per 3-minute contact. This figure is multiplied by the number of agency program users.
[3] Estimated cost to process each form is based on the assumption that the data from one contact will take 10 minutes to process by an employee at a GS–7 Step 5 salary. The Office of Personnel Management states that this salary is $18.45/hr. This rate equals $0.308 per minute, or $3.08 per 10-minute contact. This figure is multiplied by the number of agency program users.

Alternative Dispute Resolution Services Offered to Program Complainants

The proposed amendment provides that OASCR shall offer ADR services to complainants where appropriate. This amendment is intended to encourage the early resolution of customer complaints. The outcome from early resolution should improve customers' experience with the complaint process and result in reduced costs to complainants and the Department.

The proposed change to ADR will not impose or result in any costs to the public served by USDA's conducted programs. USDA anticipates that this expansion of ADR services to complainants of USDA's conducted programs will provide a small net yearly savings to USDA. USDA receives, on

average, approximately 1,055 [2] complaints from participants of all USDA programs per year; of these, 160 are under USDA's conducted programs and would be covered by this rule.

Even assuming an additional 160 program complaints per year through ADR, USDA has existing infrastructure to process these complaints. An average of 16.7 hours of staff time will be required to provide ADR in each case. Based on an hourly wage rate of $46 per hour for this staff, OASCR estimates an annual estimated cost of program ADR of $122,912.

Historically, the ADR rate of resolution for Equal Employment Opportunity cases is 16.5 percent. Should this rate be realized for program resolution, approximately 26 cases per year would be resolved through ADR. Complaints successfully resolved through ADR will allow the avoidance of several additional, costly steps currently required to resolve complaints, such as an Agency response, fact finding, investigation, adjudication, or review. OASCR estimates that avoiding these steps would save an average of 250 hours of staff time per complaint successfully resolved through ADR. Resolving 26 cases through ADR would save the agency approximately 6,500 hours in processing time. These savings amount to $299,000, yielding net savings of about $176,000 per year by implementing ADR for program complaints.

Adding Explicit Protections Against Discrimination Based on Political Beliefs and Gender Identity

Finally, USDA proposes to amend its regulation to add protection from discrimination in programs or activities conducted by the Department with respect to two new protected bases, political beliefs and gender identity. Discrimination by USDA employees on these grounds is already prohibited in USDA's nondiscrimination statement. Making these protections explicit in the governing regulations will benefit the public by strengthening USDA's ability to ensure that all USDA customers receive fair and consistent treatment, and will bring the regulations into alignment with USDA's nondiscrimination goals. The proposed change will impose no new costs on the public served by USDA-conducted programs, and USDA does not expect any significant increase in operational costs to USDA.

[2] Estimated complaints average based on data from FY 2009–2011. FY 2009–2011 Farm Bill Reports are posted on OASCR Web site.

The change proposed will allow USDA customers of conducted programs who believe that they have been discriminated against based on their political beliefs or gender identity to take advantage of USDA's existing mechanisms to file an administrative complaint and receive a response. USDA's response could include recommending additional training for USDA employees or outreach in appropriate cases, procedures that already take place within existing resources. The change proposed applies only to USDA's internal administrative complaint mechanism and does not create any new legal rights to bring suit against USDA, or expand the class of cases where USDA is authorized to pay money in connection with civil rights complaints. The inclusion of gender identity also is not intended to undermine existing protections against transgender discrimination under laws that prohibit sex discrimination.

USDA does not anticipate a significant increase in operational costs to result from specifying that discrimination based on political beliefs and gender identity may be the bases for complaints in conducted programs. Based on USDA's complaint inventory, and the experience of the Department of Housing and Urban Development (HUD) in adopting similar protections, USDA does not anticipate a significant increase in the number of complaints, and therefore the cost of processing these complaints, as a result of extending the requirement that USDA program customers are treated fairly and without bias. Any additional administrative costs to process these complaints will be offset by the benefits of extending these protections to USDA customers.

For additional context, in February 2012, HUD amended its regulations to extend protections against discrimination based on gender identity (see FR Vol. 77, No. 23 at 5662 *et seq.*). The public comment period for the HUD-proposed rule resulted in approximately 376 public comments received from a variety of commenters, including individuals, advocacy groups, legal aid offices, tenant and fair housing organizations, realtors and their representatives, law school clinics, public housing authorities, local government officials, and members of Congress. The overwhelming majority of comments were supportive of the rule, stating that it was long overdue and noting that HUD, as the Nation's housing agency, should lead the efforts to prevent discrimination against Lesbian, Gay, Bisexual, and Transgender persons in housing. Moreover, HUD's rule has not created a significant increase in complaints received. USDA expects that its rule will be similarly received.

OASCR believes that the benefits of this rule exceed its cost, but OASCR invites comments on the analysis, and is interested in receiving further information that could be used to quantify further the benefits and costs of this proposed rule.

Regulatory Flexibility Act

When an agency issues a rulemaking proposal, the Regulatory Flexibility Act (RFA) requires the agency to "prepare and make available for public comment an initial regulatory flexibility analysis" that will "describe the impact of the proposed rule on small entities." (5 U.S.C. 603(a)). Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the proposed rulemaking is not expected to have a significant economic impact on a substantial number of small entities.

7 CFR part 15d clarifies the roles and responsibilities of the USDA OASCR and USDA agencies in enforcing nondiscrimination in programs or activities conducted by the Department. The proposed regulation was last revised in 1999 (64 FR 66709, Nov 30, 1999). The changes also strengthen USDA's civil rights compliance and complaint processing activities to better protect the rights of USDA customers. As stated previously, the proposed data collection is in line with the requirements of section 14006 of the 2008 Farm Bill. The inclusion of political beliefs as a protected basis will prohibit discrimination in accordance with current civil rights laws, the Food Stamp Act of 1964, Public Law 88–525, 78 Stat. 703–709 (Aug. 31, 1964) and the Civil Service Reform Act of 1978 (which covers political affiliation) and the Secretary of Agriculture's civil rights policy statements.

The proposed rule may affect entities such as grocery and related product merchant wholesalers, establishments that export their goods on their own account that fall into category 4244 of the North American Industry Classification System (NAICS). Merchant wholesale establishments typically maintain their own warehouse, where they receive and handle goods for their customers. Goods are generally sold without transformation but may include integral functions, such as sorting, packaging, labeling, and other marketing services.

For the purpose of this analysis and following the Small Business Administration (SBA) guidelines, the potentially affected entities are classified within the following

industries: General Line Grocery Merchant Wholesalers (NAICS 424410); Packaged Frozen Food Merchant Wholesalers (NAICS 424420); Dairy Product (except Dried or Canned) Merchant Wholesalers (NAICS 424430); Poultry and Poultry Product Merchant Wholesalers (NAICS 424440); Confectionery Merchant Wholesalers (NAICS 424450); Fish and Seafood Merchant Wholesalers (NAICS 424460); Meat and Meat Product Merchant Wholesalers (NAICS 424470); Fresh Fruit and Vegetable Merchant Wholesalers (NAICS 424480); and Other Grocery and Related Products Merchant Wholesalers (NAICS 424490).

Establishments in the categories listed above are considered small by SBA standards if their employee base is less than 100 employees. According to the U.S. Census data, there are 46,272 grocery and related product merchant wholesalers that are considered small.

Based on USDA program data, it is expected that the proposed data collection requirements on those who apply, participate in, or receive benefits from various conducted programs may affect 90 participants who fall in the above cited categories. These are participants in FAS programs (Table 1). The remaining 1,259 contacts are private individuals.

USDA estimates that it will take each participant 3 minutes to respond. The race, ethnicity, and gender information will be voluntarily collected from individual applicants. Assuming an upper bound, 100-percent response rate of all 1,349 contacts, USDA estimates that the total new impact to the public from this requirement will be 68 additional burden hours per year at an estimated cost of about $1,100 (Table 2), or less than $1 per respondent should they choose to report.

The offer of ADR to program customers is not expected to have an adverse impact on small businesses. ADR will reduce the number of complaints filed, thereby reducing costs to the agency.

The inclusion of political beliefs and gender identity as protected bases is also not expected to have any adverse effect on small businesses. Instead, it will ensure that USDA is operating in accordance with the requirements of current civil rights laws and regulations and should not add additional costs to small businesses that are not participating in discriminatory activities or practices.

USDA considered the alternative of not updating its nondiscrimination regulations, however, without this rule, no additional assurances of nondiscrimination protections will be realized.

Based on the above discussion, the Assistant Secretary for Civil Rights certifies that this rule will not have a significant economic impact on a substantial number of small entities. USDA invites comment from members of the public who believe there will be a significant impact, and requests information to better inform the analysis of benefits and costs.

The 2008 Farm Bill, section 14006 requires the collection of application and participation rate data regarding socially disadvantaged farmers or ranchers. OMB has approved a form for this data collection, and the field-based agencies have already implemented it. This existing data collection already meets the requirements proposed in this rule, and therefore, the proposed rule imposes no new data collection requirements on the three field-based agencies and will not cause duplication or conflict with the 2008 Farm Bill requirements. USDA is unaware of any other Federal rules that duplicate, overlap, or conflict with the proposed rule.

Executive Order 12372

Executive Order 12372, "Intergovernmental Review of Federal Programs", requires consultation with State and local officials. The objectives of the Executive Order are to foster an intergovernmental partnership and a strengthened Federalism, by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance and direct Federal development. This rule neither provides Federal financial assistance nor direct Federal development. It does not provide either grants or cooperative agreements. Therefore, this program is not subject to Executive Order 12372.

Executive Order 12988

This rule has been reviewed in accordance with Executive Order 12988, "Civil Justice Reform." This rule would not preempt State and or local laws, and regulations, or policies unless they present an irreconcilable conflict with this rule. Before any judicial action may be brought regarding the provisions of this rule, the administrative appeal provisions of 7 CFR parts 11 and 780 must be exhausted.

Executive Order 13175

This rule has been reviewed for compliance with Executive Order 13175, "Consultation and Coordination with Indian Tribal governments." The review reveals that this rule will not have substantial and direct effects on Tribal Governments and will not have significant Tribal implications. OASCR consulted with the USDA Office of Tribal Relations in development of this proposed rule and believes that it will not impact or have direct effects on Tribal governments and will not have significant Tribal implications. OASCR continues to consult with the USDA Office of Tribal Relations to collaborate meaningfully to develop and strengthen departmental regulations.

Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandate Reform Act of 1995 (UMRA, Pub. L. 104–4) requires Federal agencies to assess the effects of their regulatory actions on State, local, or Tribal governments or the private sector. Agencies generally must prepare a written statement, including a cost benefit analysis, for proposed and final rules with Federal mandates that may result in expenditures of $100 million or more in any one year for State, local, or Tribal governments, in the aggregate, or to the private sector. The UMRA generally requires agencies to consider alternatives and adopt the more cost-effective or least burdensome alternative that achieves the objectives of the rule. This rule contains no Federal mandate as defined by Title II of UMRA for State, local, or Tribal governments or for the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of UMRA.

Paperwork Reduction Act of 1995

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et* seq.), the information collection or recordkeeping requirements included in this proposed rule will be submitted for approval to OMB. Please send written comments to the Office of Information and Regulatory Affairs, OMB, attention: Desk Officer for the Office of the Assistant Secretary for Civil Rights, Washington, DC 20503. Please state that your comments refer to Docket No. 0503–AA52. Please send a copy of your comments to: Docket No. 0503–AA52, Anna G. Stroman, Chief, Policy Division, by mail, at the Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW., Washington DC, 20250. Comments on the Paperwork Reduction Act section are best assured of having their full effect if OMB receives them within 60 days of publication of this proposed rule.

The proposed rule outlines USDA's compliance activities in greater detail, including a requirement that each agency shall, for civil rights compliance

purposes, collect, maintain, and annually compile data on the race, ethnicity, and gender of all applicants and participants of programs and activities conducted by USDA, by county and State. This requirement would not apply to programs conducted by state or local governments or other private entities that receive Federal funding from USDA. While USDA agencies will be required to seek this data, program users' responses will be voluntary. USDA estimates that it will take program users who participate no more than 3 minutes to respond.

Four USDA agencies already collect and report this data; this regulation will not impact their existing data collections. The field-based agencies, FSA, NRCS, and RD, track participation rates for socially disadvantaged limited resources applicants and participants. Collection by these three agencies is required by Section 14006 of the Food, Conservation, and Energy Act of 2008 (2008 Farm Bill). OMB has approved a form for data collection by the three field-based agencies, and USDA has already implemented collection efforts (Approved OMB No. 0503–0019). In addition, the Forest Service also has an OMB-approved form in place to collect this data through a survey (Approved OMB No. 0596–0110). The proposed regulation will standardize the recordkeeping requirement across the Department to all other programs conducted by USDA. FSA, NRCS, RD, and the Forest Service will continue to use the existing forms that OMB has approved for their data collections. Other program areas will adopt the form that has already been approved by OMB for the three field-based agencies, under control number OMB No. 0503–0019. Therefore, the provisions of this rule require no revision to the information collection requirements that were previously approved by OMB under control number 0503 0019.

There is no paperwork collection associated with the other changes in this rule.

USDA is soliciting comments from the public concerning the proposed information collection and recordkeeping requirements. These comments will help us:

(1) Evaluate whether the proposed information collection is necessary for the proper performance of the agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond (such as through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses).

Title of the Collection: 7 CFR part 15 subpart D—Data Collection Requirement

OMB Control Number: 0503–NEW

Estimate of burden hours: Public reporting burden for this collection of information is estimated to average 3 minutes per response.

Respondents: Applicant and program participants of USDA federally conducted programs.

Estimated annual number of Respondents: 1,349.

Estimated annual number of Responses per Respondent: 1.

Estimated annual number of Responses: 1,349.

Estimated total annual burden on Respondents: 68 hours.

Copies of this information collection can be obtained from: Clearance Officer, OCIO, USDA, Room 405W, 1400 Independence Avenue SW., Washington, DC 20250.

E-Government Act Compliance

OASCR is committed to complying with the E-Government Act, which requires Government Agencies in general to provide the public the option of submitting information or transacting business electronically to the maximum extent possible.

List of Subjects in 7 CFR Part 15d

Civil rights, Equal employment opportunity, Grant programs-education, Individuals with disabilities.

For the reasons set forth in the preamble, USDA proposes to revise 7 CFR Part 15d to read as follows:

PART 15d—NONDISCRIMINATION IN PROGRAMS OR ACTIVITIES CONDUCTED BY THE UNITED STATES DEPARTMENT OF AGRICULTURE

Sec.

Authority: 5 U.S.C. 301.

§ 15d.1 Purpose.

The purpose of this part is to set forth the nondiscrimination policy of the United States Department of Agriculture (USDA) in programs or activities conducted by the Department, including such programs and activities in which the Department or any agency thereof makes available any benefit directly to persons under such programs and activities.

§ 15d.2 Definitions.

For the purpose of this section, the below terms are defined as follows:

(a) *Agency* means a major organizational unit of the Department with delegated authority to deliver programs, activities, benefits, and services. Heads of Agencies receive their delegated authority as prescribed in 7 CFR Part 2.

(b) *Agency Head Assessment* means the annual Agency Civil Rights Performance Plan and Accomplishment Report conducted by the Office of the Assistant Secretary for Civil Rights (OASCR). It is an evaluation tool used by OASCR to assess USDA Agency Heads and Staff Office Directors on their civil rights activities and accomplishments to ensure accountability throughout the Department on these issues.

(c) *Alternative Dispute Resolution* or *ADR* means any number of conflict resolution procedures in which parties agree to use a third-party neutral to resolve complaints or issues in controversy. ADR methods include, but are not limited to, mediation, facilitation, fact finding, arbitration, use of ombuds, or any combination thereof.

(d) *Assistant Secretary for Civil Rights* or *ASCR* means the civil rights officer for USDA responsible for the performance and oversight of all civil rights functions within USDA, and who retains the authority to delegate civil rights functions to heads of USDA agencies and offices. The ASCR is also responsible for evaluating agency heads on their performance of civil rights functions.

(e) *Complaint* means a written statement that contains the complainant's name and address and describes an agency's alleged discriminatory action in sufficient detail to inform the ASCR of the nature and date of an alleged civil rights violation. The statement must be signed by the complainant(s) or someone authorized to sign on behalf of the complainant(s). To accommodate the needs of people with disabilities, special needs, or who have Limited English Proficiency, a complaint may be in an alternative format.

(f) *Compliance report* means a written review of an agency's compliance with civil rights requirements, to be prepared by OASCR and to identify each finding of non-compliance or other civil rights-

related issue. The review is conducted at the discretion of OASCR or if there has been a formal finding of non-compliance.

(g) *Conducted programs and activities* means the program services, benefits, or resources delivered directly to the public by USDA.

(h) *Days* mean calendar days, not business days.

(i) *Department (used interchangeably with USDA)* means the Department of Agriculture and includes each of its operating agencies and other organizational units.

(j) *Discrimination* means unlawful treatment or denial of benefits, services, rights, or privileges to a person or persons based on race, color, national origin, religion, sex (including gender identity), sexual orientation, disability, age, marital status, sexual orientation, familial status, parental status, income derived from a public assistance program, political beliefs, or gender identity.

(k) *Secretary* means the Secretary of Agriculture or any officer or employee of the Department whom the Secretary has heretofore delegated, or whom the Secretary may hereafter delegate, the authority to act in his or her stead under the regulations in this part.

§ 15d.3 Discrimination prohibited.

(a) No agency, officer, or employee of USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by USDA.

(b) No person shall be subjected to reprisal for opposing any practice(s) prohibited by this part, for filing a complaint, or for participating in any other manner in a proceeding under this part.

§ 15d.4 Compliance.

(a) *Compliance program.* OASCR shall evaluate each agency's efforts to comply with this part and shall make recommendations for improving such efforts.

(1) OASCR shall oversee the compliance reviews and evaluations, and issue compliance reports that monitor compliance efforts to ensure that there is equitable and fair treatment in conducted programs.

(2) OASCR shall monitor all settlement agreements pertaining to program complaints for compliance to ensure full implementation and enforcement.

(3) OASCR shall oversee Agency Head Assessments to ensure that Agency Heads are in compliance with civil rights laws and regulations.

(4) OASCR shall monitor all findings of non-compliance to ensure that compliance is achieved.

(5) OASCR shall require agencies to collect the race, ethnicity, and gender of applicants and program participants, who choose to provide such information on a voluntary basis, in USDA-conducted programs, for purposes of civil rights compliance, oversight, and evaluation.

(b) *Agency data collection and compliance reports.* (1) Each Agency shall, for civil rights compliance, collect, maintain, and annually compile data on all program applicants and participants in conducted programs by county and State, including but not limited to, application and participation rate data regarding socially disadvantaged and limited resources applicants and participants. At a minimum, the data should include:

(i) Numbers of applicants and participants by race, ethnicity, and gender, subject to appropriate privacy protections, as determined by the Secretary and in accordance with law; and

(ii) The application and participation rate, by race, ethnicity, and gender, as a percentage of the total participation rate.

(2) Each Agency shall submit to OASCR timely, complete, and accurate program application and participation reports containing the information described in paragraph (b)(1) of this section, on an annual basis, and upon the request of OASCR independently of the annual requirement.

(c) *Complaint reporting compliance.* OASCR shall ensure compliance with mandated complaint reporting requirements, such as those required by section 14006 of the Food, Conservation, and Energy Act of 2008 (PL 110–246).

§ 15d.5 Complaints.

(a) Any person who believes that he or she (or any specific class of individuals) has been, or is being, subjected to practices prohibited by this part may file (or file through an authorized representative) a written complaint alleging such discrimination. The written complaint must be filed within 180 calendar days from the date the person knew or reasonably should have known of the alleged discrimination, unless the time is extended for good cause by ASCR or the designee. Any person who complains of discrimination under this part in any fashion shall be advised of the right to file a complaint as herein provided.

(b) All complaints under this part should be filed with the Office of the Assistant Secretary for Civil Rights (ASCR), 1400 Independence Ave SW., U.S. Department of Agriculture, Washington, DC 20250, who will investigate the complaints. The ASCR will make final determinations as to the merits of complaints under this part and as to the corrective actions required to resolve program complaints. The complainant will be notified of the final determination on the complaint.

(c) Any complaint filed under this part alleging discrimination on the basis of disability will be processed under 7 CFR part 15e.

(d) For complaints OASCR deems appropriate for ADR, OASCR shall offer ADR services to complainants.

Dated: December 19, 2013.

Krysta Harden,

Deputy Secretary.

[FR Doc. 2013–30812 Filed 12–26–13; 8:45 am]

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2013–0957; Airspace Docket No. 13–AWP–18]

Proposed Establishment of Class E Airspace; Flagstaff, AZ

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish Class E airspace at the Flagstaff VHF Omni-Directional Radio Range/Distance Measuring Equipment (VOR/DME) navigation aid, Flagstaff, AZ, to facilitate vectoring of Instrument Flight Rules (IFR) aircraft under control of Albuquerque Air Route Traffic Control Center (ARTCC). The FAA is proposing this action to enhance the safety and management of aircraft operations within the National Airspace System.

DATES: Comments must be received on or before February 10, 2014.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366–9826. You must identify FAA

Docket No. FAA–2013–0957; Airspace Docket No. 13–AWP–18, at the beginning of your comments. You may also submit comments through the Internet at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Eldon Taylor, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA 98057; telephone (425) 203–4537.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA 2013–0957 and Airspace Docket No. 13–AWP–18) and be submitted in triplicate to the Docket Management System (see **ADDRESSES** section for address and phone number). You may also submit comments through the Internet at *http://www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA–2013–0957 and Airspace Docket No. 13–AWP–18". The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at *http://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's Web page at *http://www.faa.gov/airports_airtraffic/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 1601 Lind Avenue SW., Renton, WA 98057.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by establishing Class E en route domestic airspace extending upward from 1,200 feet above the surface at the Flagstaff VOR/DME navigation aid, Flagstaff, AZ. This action would contain aircraft while in IFR conditions under control of Albuquerque ARTCC by vectoring aircraft from en route airspace to terminal areas.

Class E airspace designations are published in paragraph 6006, of FAA Order 7400.9X, dated August 7, 2013, and effective September 15, 2013, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish controlled airspace at the Flagstaff VOR/DME navigation aid, Flagstaff, AZ.

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9X, Airspace Designations and Reporting Points, dated August 7, 2013, and effective September 15, 2013 is amended as follows:

Paragraph 6006 En route domestic airspace areas

* * * * *

AWP AZ E6 Flagstaff, AZ [New]

Flagstaff VOR/DME, AZ
(Lat. 35°08′50″ N., long. 111°40′27″ W.)

That airspace extending upward from 1,200 feet above the surface within an area bounded by lat. 35°51′00″ N., long. 109°19′00″ W.; to lat. 35°41′00″ N., long. 109°38′30″ W.; to lat. 34°47′52″ N., long.

110°18'52" W.; to lat. 34°30'00" N., long. 109°35'00" W.; to lat. 34°00'00" N., long. 108°53'00" W.; to lat. 33°52'30" N., long. 108°45'00" W.; to lat. 32°29'30" N., long. 110°45'45" W.; to lat. 33°33'12" N., long. 111°51'21" W.; to lat. 34°01'00" N., long. 114°00'00" W.; to lat. 34°40'00" N., long. 114°00'00" W.; to lat. 34°52'00" N., long. 113°42'00" W.; to lat. 34°55'00" N., long. 113°37'00" W.; to lat. 35°15'20" N., long. 112°55'40" W.; to lat. 35°23'00" N., long. 112°40'00" W.; to lat. 35°23'48" N., long. 112°09'11" W.; to lat. 35°24'00" N., long. 112°00'00" W.; to lat. 35°46'00" N., long. 111°50'30" W.; to lat. 35°42'00" N., long. 110°14'00" W., thence to the point of beginning.

Issued in Seattle, Washington, on December 11, 2013.

Christopher Ramirez,

Acting Manager, Operations Support Group, Western Service Center.

[Docket No. FDA–2013–N–0500]

RIN 0910–AG94

Supplemental Applications Proposing Labeling Changes for Approved Drugs and Biological Products; Correction and Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; correction and extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is correcting, and extending the comment period for, the proposed rule that appeared in the **Federal Register** of November 13, 2013. In the proposed rule, FDA requested comments on the proposal to revise and clarify procedures for application holders of an approved drug or biological product to change the product labeling to reflect certain types of newly acquired information in advance of FDA's review of the change. The proposed rule published without a reference or a link to the accompanying Regulatory Impact Analysis. The Agency is taking this action to correct this omission and to extend the comment period in response to requests for an extension to allow interested persons additional time to submit comments on the proposed rule.

DATES: FDA is extending the comment period on the proposed rule published November 13, 2013, at 78 FR 67985, and on information collection issues under the Paperwork Reduction Act of 1995. Submit either electronic or written comments on the proposed rule by March 13, 2014. Submit comments on information collection issues under the Paperwork Reduction Act of 1995 by February 11, 2014 (see the "Paperwork Reduction Act of 1995" section of the proposed rule).

ADDRESSES: You may submit comments, identified by Docket No. FDA–2013–N–0500 and/or Regulatory Information Number (RIN) 0910–AG94, by any of the following methods, except that comments on information collection issues under the Paperwork Reduction Act of 1995 must be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) (see the "Paperwork Reduction Act of 1995" section of the proposed rule.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Written Submissions

Submit written submissions in the following ways:

- *Mail/Hand delivery/Courier (for paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Instructions: All submissions received must include the Agency name and Docket No. FDA–2013–N–0500 and RIN 0910–AG94 for this rulemaking. All comments received may be posted without change to *http://www.regulations.gov,* including any personal information provided. For additional information on submitting comments, see the "Request for Comments" heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* and insert the docket number(s), found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Janice L. Weiner, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6304, Silver Spring, MD 20993–0002, 301–796–3601.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of November 13, 2013 (78 FR 67985), FDA published a proposed rule with a 60-day comment period to request comments on the proposal to revise and clarify procedures for application holders of an approved drug or biological product to change the product labeling to reflect certain types of newly acquired information in advance of FDA's review of the change. Comments on the proposal to permit holders of abbreviated new drug applications to distribute revised product labeling that differs in certain respects, on a temporary basis, from the labeling of its reference listed drug upon submission of a "changes being effected" supplement will inform FDA's rulemaking.

The proposed rule published without reference or a link to the accompanying Regulatory Impact Analysis. Accordingly, the following corrections are made to FR Doc. 2013–26799, appearing on page 67985, in the **Federal Register** of November 13, 2013:

1. On page 67996, in the first column, at the end of section IV. Analysis of Impacts, the following is added as a third full paragraph: "The full discussion of economic impacts is available in docket FDA–2013–N–0500 and at *http://www.fda.gov/AboutFDA/ReportsManualsForms/Reports/EconomicAnalyses/default.htm* (Ref. 3)."

2. On page 67997, in the third column, the following is added as a third reference: "3. Preliminary Regulatory Impact Analysis, Initial Regulatory Flexibility Analysis, and Unfunded Mandates Reform Act Analysis for Supplemental Applications Proposing Labeling Changes for Approved Drugs and Biological Products, available at *http://www.fda.gov/AboutFDA/ReportsManualsForms/Reports/EconomicAnalyses/default.htm.*"

The Agency has received requests for a 60-day extension of the comment period for the proposed rule. These requests conveyed concern that the current 60-day comment period does not allow sufficient time to develop a meaningful or thoughtful response to the proposed rule.

FDA has considered the requests and is extending the comment period for the proposed rule for 60 days, until March 13, 2014. FDA also is extending the comment period for information collection issues under the Paperwork

Reduction Act of 1995 for 60 days, until February 11, 2014. The Agency believes that a 60-day extension allows adequate time for interested persons to submit comments without significantly delaying rulemaking on these important issues..

II. Request for Comments

Interested persons may submit either electronic comments regarding this document to *http://www.regulations.gov* or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov*.

Dated: December 20, 2013.

Leslie Kux,

Assistant Commissioner for Policy.

BILLING CODE 4160–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R08–OAR–2011–0834; FRL–9904–90–Region 8]

Approval and Promulgation of Air Quality Implementation Plans; State of Colorado; Second Ten-Year PM_{10} Maintenance Plan for Pagosa Springs

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to partially approve and partially disapprove State Implementation Plan (SIP) revisions submitted by the State of Colorado. On March 31, 2010, the Governor of Colorado's designee submitted to EPA a revised maintenance plan for the Pagosa Springs area for the National Ambient Air Quality Standards (NAAQS) for particulate matter with an aerodynamic diameter less than or equal to 10 microns (PM_{10}). The State adopted the revised maintenance plan on November 19, 2009. As required by Clean Air Act (CAA) section 175A(b), this revised maintenance plan addresses maintenance of the PM_{10} standard for a second 10-year period beyond the area's original redesignation to attainment for the PM_{10} NAAQS. EPA is proposing to approve the revised maintenance plan with the exception of one aspect of the plan's contingency measures. EPA's proposed approval includes the revised maintenance plan's 2021 transportation conformity motor vehicle emissions budget for PM_{10}. In proposing to approve the revised maintenance plan, we are proposing to exclude from use in determining that Pagosa Springs continues to attain the PM_{10} NAAQS, exceedances of the PM_{10} NAAQS that were recorded at the Pagosa Springs PM_{10} monitor on March 22, 2009, April 3, 2009, April 5, 2010, April 28, 2010, April 29, 2010, May 11, 2010, and May 22, 2010 because the exceedances meet the criteria for exceptional events caused by high wind natural events. This action is being taken under sections 110 and 175A of the CAA.

DATES: Written comments must be received on or before January 27, 2014.

ADDRESSES: Submit your comments, identified by Docket number EPA–R08–OAR–2011–0834, by one of the following methods:

- *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.
- Email: *olson.kyle@epa.gov*.
- Fax: (303) 312–6064 (please alert the individual listed in the **FOR FURTHER INFORMATION CONTACT** section if you are faxing comments).
- Mail: Carl Daly, Director, Air Program, Environmental Protection Agency (EPA), Region 8, Mailcode 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129.
- Hand Delivery: Carl Daly, Director, Air Program, Environmental Protection Agency (EPA), Region 8, Mailcode 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129. Such deliveries are only accepted Monday through Friday, 8:00 a.m. to 4:30 p.m., excluding Federal holidays. Special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–R08–OAR–2011–0834. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The *http://www.regulations.gov* Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA, without going through *http://www.regulations.gov*, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional instructions on submitting comments, go to Section I. General Information of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Air Program, U.S. Environmental Protection Agency (EPA), Region 8, Mailcode 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129. EPA requests that if at all possible, you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section to view the hard copy of the docket. You may view the hard copy of the docket Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Kyle Olson, Air Program, U.S. Environmental Protection Agency, Region 8, Mailcode 8P–AR, 1595 Wynkoop Street, Denver, Colorado 80202–1129, (303) 312–6002, *olson.kyle@epa.gov*.

SUPPLEMENTARY INFORMATION:

Definitions

For the purpose of this document, we are giving meaning to certain words or initials as follows:

i. The words or initials *Act* or *CAA* mean or refer to the Clean Air Act, unless the context indicates otherwise.
ii. The initials *APCD* mean or refer to the Colorado Air Pollution Control Division.
iii. The initials *AQCC* mean or refer to the Colorado Air Quality Control Commission.

iv. The words *CMB* mean or refer to chemical mass balance.
v. The words *Colorado* and *State* mean or refer to the State of Colorado.
vi. The words *EPA, we, us* or *our* mean or refer to the United States Environmental Protection Agency.
vii. The initials *MVEB* mean or refer to motor vehicle emissions budget.
viii. The initials *NAAQS* mean or refer to National Ambient Air Quality Standard.
ix. The initials PM_{10} mean or refer to particulate matter with an aerodynamic diameter of less than or equal to 10 micrometers (coarse particulate matter).
x. The initials *RTP* mean or refer to the Regional Transportation Plan.
xi. The initials *SIP* mean or refer to State Implementation Plan.
xii. The initials *TIP* mean or refer to the Transportation Improvement Program.
xiii. The initials *TSD* mean or refer to technical support document.

Table of Contents

I. General Information

1. *Submitting CBI.* Do not submit CBI to EPA through *http://www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

a. Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).

b. Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

c. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

d. Describe any assumptions and provide any technical information and/or data that you used.

e. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

f. Provide specific examples to illustrate your concerns, and suggest alternatives.

g. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

h. Make sure to submit your comments by the comment period deadline identified.

II. Background

The Pagosa Springs area was designated nonattainment for PM_{10} and classified as moderate by operation of law upon enactment of the CAA Amendments of 1990. See 56 FR 56694, 56705, 56736 (November 6, 1991). EPA approved Colorado's nonattainment area SIP for the Pagosa Springs PM_{10} nonattainment area on May 19, 1994 (59 FR 26126).

On May 10, 2000, the Governor of Colorado submitted a request to EPA to redesignate the Pagosa Springs moderate PM_{10} nonattainment area to attainment for the 1987 PM_{10} NAAQS. Along with this request, the State submitted a maintenance plan, which demonstrated that the area was expected to remain in attainment of the PM_{10} NAAQS through 2012. EPA approved the Pagosa Springs maintenance plan and redesignation to attainment on June 15, 2001 (66 FR 32556).

Eight years after an area is redesignated to attainment, CAA section 175A(b) requires the state to submit a subsequent maintenance plan to EPA, covering a second 10-year period.[1] This second 10-year maintenance plan must demonstrate continued maintenance of the applicable NAAQS during this second 10-year period. To fulfill this requirement of the Act, the Governor of Colorado's designee submitted the second 10-year update of the PM_{10} maintenance plan to EPA on March 31, 2010 (hereafter, "revised Pagosa Springs PM_{10} Maintenance Plan").

As described in 40 CFR 50.6, the level of the national primary and secondary 24-hour ambient air quality standards for PM_{10} is 150 micrograms per cubic meter ($\mu g/m^3$). An area attains the 24-hour PM_{10} standard when the expected number of days per calendar year with a 24-hour concentration in excess of the standard (referred to herein as "exceedance"), as determined in accordance with 40 CFR part 50, appendix K, is equal to or less than one, averaged over a three-year period.[2] See 40 CFR 50.6 and 40 CFR part 50, appendix K.

Table 1 below shows the maximum monitored 24-hour PM_{10} values for the Pagosa Springs PM_{10} maintenance area for 1998 through 2012, excluding seven values the State flagged as being caused by exceptional events. The table reflects that most of the values for the Pagosa Springs area were below the PM_{10} NAAQS of 150 $\mu g/m^3$. In 2000 the area experienced an exceedance measured at 165 $\mu g/m^3$, and in 2009 exceedances measured at 182 and 188 $\mu g/m^3$.[3] These exceedances did not cause a violation of the PM_{10} NAAQS.

40 CFR 50.1(j) defines an exceptional event as an event which affects air quality, is not reasonably controllable or preventable, is an event caused by human activity that is unlikely to recur at a particular location or a natural event, and is determined by the Administrator in accordance with 40 CFR 50.14 to be an exceptional event. Exceptional events do not include stagnation of air masses or meteorological inversions, meteorological events involving high temperatures or lack of precipitation, or air pollution relating to source noncompliance. 40 CFR 50.14(b) states that EPA shall exclude data from use in determinations of exceedances and NAAQS violations where a state demonstrates to EPA's satisfaction that an exceptional event caused a specific air pollution concentration in excess of one or more NAAQS at a particular air quality monitoring location and

[1] In this case, the initial maintenance period described in CAA section 175A(a) was required to extend for at least 10 years after the redesignation to attainment, which was effective on August 14, 2001. See 66 FR 32556. Therefore, the first maintenance plan was required to show maintenance through 2011. CAA section 175A(b) requires that the second 10-year maintenance plan maintain the NAAQS for "10 years after the expiration of the 10-year period referred to in [section 175A(a)]." Thus, for the Pagosa Springs area, the second 10-year period ends in 2021.

[2] An exceedance is defined as a daily value that is above the level of the 24-hour standard, 150 $\mu g/m^3$, after rounding to the nearest 10 $\mu g/m^3$ (i.e., values ending in five or greater are to be rounded up). Thus, a recorded value of 154 $\mu g/m^3$ would not be an exceedance since it would be rounded to 150 $\mu g/m^3$; whereas, a recorded value of 155 $\mu g/m^3$ would be an exceedance since it would be rounded to 160 $\mu g/m^3$. See 40 CFR part 50, appendix K, section 1.0.

[3] The State flagged the exceedance of 188 $\mu g/m^3$ from April 25, 2009 as being caused by an exceptional event but, due to an administrative oversight, did not demonstrate that it was caused by an exceptional event by the June 30, 2012 regulatory deadline (see 40 CFR 50.14). Thus, EPA was unable to concur on the flag for that exceedance. In addition, it is thought that the exceedance of 182 $\mu g/m^3$ was recorded during a regional dust storm on April 8, 2009 but that the site operator mistakenly gave the filter a date of April 6, 2009. Since this supposition could not be proved, the State was unable to flag the April 6 exceedance of 182 $\mu g/m^3$.

otherwise satisfies the requirements of section 50.14.

On March 29 and 30, 2012, the State submitted exceptional events packages for two exceedances of the PM_{10} NAAQS in Pagosa Springs that measured 255 µg/m³ on March 22, 2009, and 225 µg/m³ on April 3, 2009. On June 28, 2013, the State submitted four exceptional events packages for five exceedances of the PM_{10} NAAQS in Pagosa Springs that measured 349 µg/m³ on April 5, 2010, 181 µg/m³ on April 28, 2010, 162 µg/m³ on April 29, 2010, 200 µg/m³ on May 11, 2010, and 187 µg/m³ on May 22, 2010. The Colorado Air Pollution Control Division (APCD) flagged these seven exceedances as exceptional events in EPA's Air Quality System, which is EPA's repository for ambient air quality data. EPA concurred on the APCD's flags in August, September, and November of 2013 because the State successfully demonstrated that the exceedances were caused by natural high wind exceptional events blowing desert dust from upwind natural desert areas of Arizona, Utah, New Mexico, and southwest Colorado into the Pagosa Springs area. Thus, we are proposing to exclude from use in determining that Pagosa Springs continues to attain the 24-hour PM_{10} NAAQS the exceedances of the 24-hour PM_{10} NAAQS that were recorded at the Pagosa Springs PM_{10} monitor on the seven dates listed above. See 40 CFR 50.14(b) and (c)(2)(ii).

TABLE 1—PAGOSA SPRINGS PM_{10} MAXIMUM 24-HOUR VALUES (THERE ARE TWO 2001 VALUES DUE TO THE MONITOR BEING MOVED THAT YEAR FROM THE TOWN HALL TO HIGH SCHOOL LOCATION) BASED ON DATA FROM TOWN HALL AND HIGH SCHOOL MONITORING SITES, AQS IDENTIFICATION NUMBER 08–007–0001

Year	Maximum value (µg/m³)	2nd Maximum concentration (µg/m³)	Monitoring site
1998	66	66	Town Hall.
1999	138	82	Town Hall.
2000	165	87	Town Hall.
2001	123	121	Town Hall.
2001	66	61	High School.
2002	107	82	High School.
2003	123	111	High School.
2004	79	61	High School.
2005	82	77	High School.
2006	122	53	High School.
2007	102	59	High School.
2008	149	74	High School.
2009	[4] 188	[4] 182	High School.
2010	[5] 117	73	High School.
2011	109	81	High School.
2012	147	93	High School.

Table 2 below shows the estimated number of exceedances for the Pagosa Springs PM_{10} maintenance area for the three-year periods of 1998 through 2000, 1999 through 2001, 2000 through 2002, 2001 through 2003, 2002 through 2004, 2003 through 2005, 2004 through 2006, 2005 through 2007, 2006 through 2008, 2007 through 2009, 2008 through 2010, 2009 through 2011, and 2010 through 2012. To attain the standard, the three-year average number of expected exceedances (values greater than 150 µg/m³) must be less than or equal to one. The table reflects continuous attainment of the PM_{10} NAAQS.

[4] As noted above, it is believed that these two exceedances were impacted by regional dust storms in Pagosa Springs in 2009. Also, as noted above, exceedances that occurred on March 22 and April 3, 2009 were flagged by Colorado as exceptional events and received concurrence from EPA. Colorado also flagged a value of 100 µg/m³ that was recorded on March 29, 2009. A dust storm on that date caused one exceedance of the PM_{10} NAAQS elsewhere in western Colorado. However, the 100 µg/m³ value in Pagosa Springs was not eligible for consideration under EPA's exceptional events rule because it was not an exceedance of the NAAQS. The highest two samples in 2009 not identified by Colorado to be impacted by regional dust storms were samples of 75 and 73 µg/m³.

TABLE 2—PAGOSA SPRINGS PM_{10} ESTIMATED EXCEEDANCES BASED ON DATA FROM TOWN HALL AND HIGH SCHOOL MONITORING SITES, AQS IDENTIFICATION NUMBER 08–007–0001

Design value period	3-Year estimated number of exceedances
1998–2000	0
1999–2001	0
2000–2002	0.33
2001–2003	0
2002–2004	0
2003–2005	0
2004–2006	0
2005–2007	0
2006–2008	0

2009–2011	0.7
2010–2012	0

[5] The 117 µg/m³ value recorded on March 31, 2010 was flagged by Colorado as impacted by a regional dust storm. Since it was not an exceedance of the NAAQS, it was not eligible for consideration under EPA's exceptional events rule.

III. What was the State's process?

Section 110(a)(2) of the CAA requires that a state provide reasonable notice and public hearing before adopting a SIP revision and submitting it to EPA.

The Colorado Air Quality Control Commission (AQCC) held a public hearing for the revised Pagosa Springs PM_{10} Maintenance Plan on November 19, 2009. The AQCC approved and adopted the revised Pagosa Springs PM_{10} Maintenance Plan during this hearing. The Governor's designee submitted the revised plan to EPA on March 31, 2010.

We have evaluated the revised maintenance plan and have determined that the State met the requirements for reasonable public notice and public hearing under section 110(a)(2) of the CAA. On September 30, 2010, by operation of law under CAA section 110(k)(1)(B), the revised maintenance plan was deemed to have met the minimum "completeness" criteria found in 40 CFR part 51, appendix V.

IV. EPA's Evaluation of the Revised Pagosa Springs PM_{10} Maintenance Plan

The following are the key elements of a maintenance plan for PM_{10}: Emission Inventory, Maintenance Demonstration, Monitoring Network/Verification of Continued Attainment, Contingency Plan, and Transportation Conformity Requirements/Motor Vehicle Emission Budget for PM_{10}. Below, we describe our evaluation of these elements as they pertain to the revised Pagosa Springs PM_{10} Maintenance Plan.

A. Emission Inventory

The revised Pagosa Springs PM_{10} Maintenance Plan includes three inventories of daily PM_{10} emissions for the Pagosa Springs area, one for 2007 as the base year, one interim inventory for 2015, and one inventory for 2021 as the maintenance year. The APCD developed these emission inventories using EPA-approved emissions modeling methods and updated transportation and demographics data. Each emission inventory lists estimated PM_{10} emissions for individual source categories within the Pagosa Springs PM_{10} maintenance area. A more detailed description of the 2007, 2015 and 2021 inventories and information on model assumptions and parameters for each source category are contained in the State's PM_{10} maintenance plan Technical Support Document (TSD). The inventories include the following source categories: Commercial cooking, construction, fuel combustion, non-road, structure fires, wood burning, unpaved road dust, paved road dust, highway vehicles, and agriculture. We find that Colorado has prepared adequate emission inventories for the area.

B. Maintenance Demonstration

The revised Pagosa Springs PM_{10} Maintenance Plan uses emission roll-forward modeling combined with chemical mass balance (CMB) analysis to demonstrate maintenance of the 24-hour PM_{10} NAAQS through 2021. The State's CMB analysis examined the chemical composition of material on filters from Pagosa Springs air quality monitors to determine the relative contribution from the following source categories: Geologic, burning, nitrate, sulfate, and unknown. The State collected CMB data on five days in 1994, 2006, and 2008 when ambient PM_{10} concentrations exceeded 100 $\mu g/m^3$. The State then averaged the data for the source categories to create a "design day apportionment" for each category, as follows: Geologic—79.0%; burning—7.3%; nitrate—1.0%; sulfate—1.6%; and unknown—11.1%. After subtracting background (8 $\mu g/m^3$) from the design day concentration (102 $\mu g/m^3$),[6] the State applied the CMB apportionments to apportion the design day concentration by source category. For example, the State apportioned 74.3 $\mu g/m^3$ of a total of 94 $\mu g/m^3$ to the geologic source category (94 $\mu g/m^3$ x 0.790 = 74.3 $\mu g/m^3$).

Using assumptions about the inventory source categories that contributed to the CMB categories, the State applied the percent change in emissions for the relevant inventory source categories between 2007 and 2021 to "roll-forward" the CMB apportionments to 2021. For example, the State determined that the inventory source categories of unpaved road dust, paved road dust, and highway vehicles contribute all of the geologic emissions accounted for in the CMB analysis. The State's inventories reflect that emissions from these source categories are estimated to grow by 54.9% between 2007 and 2021. Applying this growth factor, the State estimated that the 74.3 $\mu g/m^3$ of PM_{10} resulting from geologic materials would grow to 115.1 $\mu g/m^3$ in 2021.

Applying this methodology, the State projected a total concentration of PM_{10} in 2021 of 146.3 $\mu g/m^3$, which includes background. This value is below the PM_{10} NAAQS of 150 $\mu g/m^3$ and, thus, is consistent with maintenance.

To account for new data acquired since the submission of the State's Plan, we evaluated the 2010–2012 data in AQS to determine whether maintenance would be demonstrated using a more recent design value as a starting point. Excluding the exceedances in 2010 that were caused by high wind exceptional events, the third high concentration in 2010–2012 was 109 $\mu g/m^3$, which was recorded on March 21, 2011. As noted, the State's emissions inventories contain emissions estimates for 2007, 2015, and 2021. An examination of these inventories reveals that total emissions in 2015 represent a point on a line of near linear growth from 2007 to 2021.

Acknowledging that the State's analysis is complete, we used a simpler total emissions roll-forward analysis rather than the CMB-apportioned analysis the State used in projecting 2006–2008 data in order to estimate emissions growth from 2011 to 2021 and ensure that growth in emissions would result in PM_{10} remaining below the NAAQS. We did this to evaluate future maintenance in light of the somewhat higher 2010–2012 design value, compared to the 2006–2008 design value Colorado evaluated. The total emissions roll-forward approach produces a higher projected concentration than does the State's CMB-apportioned method. We first removed the 8 $\mu g/m^3$ background concentration from the 109 $\mu g/m^3$, which left 101 $\mu g/m^3$. Next, relying on the linear growth in emissions, we estimated 2011 emissions would grow 32.9 percent by 2021.[7] Using this factor, we projected the 101 $\mu g/m^3$ from 2011 forward to 2021 to arrive at a concentration of 134.2 $\mu g/m^3$. We then added the 8 $\mu g/m^3$ of background to this value to predict a total concentration in 2021 of 142.2 $\mu g/m^3$. This value is below the PM_{10} NAAQS of 150 $\mu g/m^3$ and, thus, is consistent with maintenance.

C. Monitoring Network/Verification of Continued Attainment

In the revised Pagosa Springs PM_{10} Maintenance Plan, the State commits to continue to operate an air quality monitoring network in accordance with 40 CFR part 58 and the EPA-approved Colorado Monitoring SIP Element to verify continued attainment of the PM_{10} NAAQS. This includes the continued operation of a PM_{10} monitor in the Pagosa Springs area, which the State will rely on to track PM_{10} emissions in the maintenance area. We are proposing to approve this commitment as satisfying the relevant requirements.

D. Contingency Plan

Section 175A(d) of the CAA requires that a maintenance plan include contingency provisions to promptly correct any violation of the NAAQS that occurs after redesignation of an area. To meet this requirement the State has identified contingency measures along with a schedule for the development and implementation of such measures. The revised Pagosa Springs PM_{10} Maintenance Plan indicates that, upon notification of an exceedance of the PM_{10} NAAQS, the APCD and local government staff in the Pagosa Springs

[6] Based on EPA guidance, the State determined the design day concentration to be the third highest 24-hour maximum PM_{10} value recorded in the Pagosa Springs area from 2006–2008. It was recorded in 2007.

[7] Total emissions in 2007 were 184.3 tons/year, while total emissions were projected to be 236.1 tons/year in 2015 and 282.1 tons/year in 2021; these values are nearly collinear. Updating the roll forward for growth from a 2011 monitored value to 2021 requires a projection of the growth in emissions from 2011 to 2021. Linear emissions growth from 2007 to 2011 is (282.1 tons/year—184.3 tons/year)*(2011–2007)/(2021–2007), or 27.9 tons, bringing 2011 emissions to (184.3 + 27.9) = 212.2 tons. Growth from 2011 to 2021, therefore, is (282.1 tons/year—212.24 tons/year)/212.2 tons/year * 100% = 32.9%.

area will develop appropriate contingency measures intended to prevent or correct a violation of the PM_{10} standard. According to the plan, notification to EPA and local governments of any exceedance will occur no later than 45 days and the process will be completed within six months of the notification. Upon a violation, a public hearing process at the State and local level will begin. The AQCC may endorse or approve local measures, or it may adopt State enforceable measures. The revised Pagosa Springs PM_{10} Maintenance Plan states that contingency measures will be adopted and fully implemented within one year of a violation.

The State identifies the following as potential contingency measures in the revised Pagosa Springs PM_{10} Maintenance Plan: (1) Increased street sweeping requirements; (2) additional road paving requirements; (3) more stringent street sand specifications; (4) voluntary or mandatory coal and/or wood burning curtailment; (5) bans on all coal and/or wood burning; (6) expanded use of alternative de-icers; (7) re-establishing new source review permitting requirements for stationary sources; (8) transportation control measures designed to reduce vehicle miles traveled; and (9) other emission control measures appropriate for the area based on the following considerations: cost effectiveness, PM_{10} emission reduction potential, economic and social concerns, and/or other factors.

We find that the contingency measures provided in the revised Pagosa Springs PM_{10} Maintenance Plan are sufficient and meet the requirements of section 175A(d) of the CAA, with the exception of "voluntary coal and/or wood burning curtailment." While we have not required that potential contingency measures be effective without further action by the State, we interpret the CAA as requiring measures that will be enforceable. Voluntary measures may not be widely implemented and, thus, cannot be relied on to ensure prompt emission reductions to correct a violation. Thus, we are proposing to disapprove the listing of "voluntary coal and/or wood burning curtailment" as a potential contingency measure.

E. Transportation Conformity Requirements: Motor Vehicle Emission Budget for PM_{10}

Transportation conformity is required by section 176(c) of the CAA. EPA's conformity rule at 40 CFR part 93 requires that transportation plans, programs, and projects conform to SIPs and establishes the criteria and procedures for determining whether or not they conform. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS. To effectuate its purpose, the conformity rule requires a demonstration that emissions from the Regional Transportation Plan (RTP) and the Transportation Improvement Program (TIP) are consistent with the motor vehicle emissions budget(s) (MVEB(s)) contained in a control strategy SIP revision or maintenance plan (40 CFR 93.101, 93.118, and 93.124). An MVEB is defined as the level of mobile source emissions of a pollutant relied upon in the attainment or maintenance demonstration to attain or maintain compliance with the NAAQS in the nonattainment or maintenance area. Further information concerning EPA's interpretations regarding MVEBs can be found in the preamble to EPA's November 24, 1993, transportation conformity rule (see 58 FR 62193–62196).

The revised Pagosa Springs PM_{10} Maintenance Plan contains a single MVEB of 946 lbs/day of PM_{10} for the year 2021, the maintenance year. Once the State submitted the revised plan with the 2021 MVEB to EPA for approval, 40 CFR 93.118 required that EPA determine whether the MVEB was adequate.

Our criteria for determining whether a SIP's MVEB is adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4), which was promulgated August 15, 1997 (see 62 FR 43780). Our process for determining adequacy is described in our July 1, 2004 Transportation Conformity Rule Amendments (see 69 FR 40004) and in relevant guidance.[8] We used these resources in making our adequacy determination described below.

On November 22, 2010, EPA announced the availability of the revised Pagosa Springs PM_{10} Maintenance Plan, and the PM_{10} MVEB, on EPA's transportation conformity adequacy Web site. EPA solicited public comment on the MVEB, and the public comment period closed on December 22, 2010. We did not receive any comments. This information is available at EPA's conformity Web site: *http://www.epa.gov/otaq/stateresources/transconf/reg8sips.htm#co*

By letter to the Colorado Department of Public Health and Environment dated March 17, 2011, EPA found that the revised Pagosa Springs PM_{10} Maintenance Plan and the 2021 PM_{10} MVEB were adequate for transportation conformity purposes.[9] However, we noted in our letter that the revised Pagosa Springs PM_{10} Maintenance Plan did not discuss the PM_{10} MVEB for 2012 of 7,486 lbs/day from the original PM_{10} maintenance plan that EPA approved in 2001 (see 66 FR 32556, June 15, 2001).

According to 40 CFR 93.118(e)(1), the EPA-approved 2012 PM_{10} MVEB must continue to be used for analysis years 2012 through 2020 (as long as such years are within the timeframe of the transportation plan), unless the State elects to submit a SIP revision to revise the 2012 PM_{10} MVEB and EPA approves the SIP revision. The revised Pagosa Springs PM_{10} Maintenance Plan did not revise the previously-approved 2012 PM_{10} MVEB nor establish a new MVEB for 2012. Accordingly, the MVEB ". . . for the most recent prior year . . ." (i.e., 2012) from the original maintenance plan must continue to be used (see 40 CFR 93.118(b)(1)(ii) and (b)(2)(iv)).

We note that there is a considerable difference between the 2021 and 2012 budgets—946 lbs/day versus 7,486 lbs/day. This is largely an artifact of changes in the methods, models, and emission factors used to estimate mobile source emissions. The 2021 MVEB is consistent with the State's 2021 emissions inventory for vehicle exhaust and road dust, and, thus, is consistent with the State's maintenance demonstration for 2021.

The discrepancy between the 2012 and 2021 MVEBs is not a significant issue for several reasons. As a practical matter, the 2021 MVEB of 946 lbs/day of PM_{10} would be controlling for any conformity determination involving the relevant years because conformity would have to be shown to both the 2012 MVEB and the 2021 MVEB. Also, for any maintenance plan like the revised Pagosa Springs PM_{10} Maintenance Plan that only establishes a MVEB for the last year of the maintenance plan, 40 CFR 93.118(b)(2)(i) requires that the demonstration of consistency with the budget be accompanied by a qualitative finding that there are no factors that would cause or contribute to a new violation or exacerbate an existing violation in the years before the last year

[8] "Companion Guidance for the July 1, 2004 Final Transportation Conformity Rule, Conformity Implementation in Multi-Jurisdictional Nonattainment and Maintenance Areas for Existing and New Air Quality Standards" (EPA420–B–04–012 July, 2004).

[9] In a **Federal Register** notice dated August 2, 2011, we notified the public of our finding (see 76 FR 46288). This adequacy determination became effective on August 17, 2011.

of the maintenance plan. Therefore, when a conformity determination is prepared which assesses conformity for the years before 2021, the 2021 MVEB and the underlying assumptions supporting it would have to be considered. Finally, 40 CFR 93.110 requires the use of the latest planning assumptions in conformity determinations. Thus, the most current motor vehicle and road dust emission factors would need to be used, and we expect the analysis would show greatly reduced PM_{10} motor vehicle and road dust emissions from those calculated in the first maintenance plan. In view of the above, EPA is proposing to approve the 2021 PM_{10} MVEB of 946 lbs/day.

V. Proposed Action

We are proposing to approve the revised Pagosa Springs PM_{10} Maintenance Plan that was submitted to us on March 31, 2010, with one exception. We are proposing to disapprove the listing of "voluntary coal and/or wood burning curtailment" as a potential contingency measure in section 5.F.3 of the revised Pagosa Springs PM_{10} Maintenance Plan. We are proposing to approve the remainder of the revised maintenance plan because it demonstrates maintenance through 2021 as required by CAA section 175A(b), retains the control measures from the initial PM_{10} maintenance plan that EPA approved on June 15, 2001, and meets other CAA requirements for a section 175A maintenance plan. We are proposing to exclude from use in determining that Pagosa Springs continues to attain the 24-hour PM_{10} NAAQS exceedances of the 24-hour PM_{10} NAAQS that were recorded at the Pagosa Springs PM_{10} monitor on March 22, 2009, April 3, 2009, April 5, 2010, April 28, 2010, April 29, 2010, May 11, 2010, and May 22, 2010 because they meet the criteria for exceptional events caused by high wind natural events. We are also proposing to approve the revised maintenance plan's 2021 transportation conformity MVEB for PM_{10} of 946 lbs/day.

VI. Statutory and Executive Orders Review

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k), 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. This proposed action merely proposes to approve state law as meeting federal requirements and does not propose to impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 USC 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 USC 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 USC 272 note) because application of those requirements would be inconsistent with the CAA; and,
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed action does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP would not be approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Volatile Organic Compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: December 16, 2013.

Shaun L. McGrath,

Regional Administrator, Region 8.

42 CFR Part 405

[CMS–6055–P]

RIN 0938–AS03

Medicare Program; Right of Appeal for Medicare Secondary Payer Determination Relating to Liability Insurance (Including Self-Insurance), No Fault Insurance, and Workers' Compensation Laws and Plans

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would implement provisions of the Strengthening Medicare and Repaying Taxpayers Act of 2012 (SMART Act) which require us to provide a right of appeal and an appeal process for liability insurance (including self-insurance), no-fault insurance, and workers' compensation laws or plans when Medicare pursues a Medicare Secondary Payer (MSP) recovery claim directly from the liability insurance (including self-insurance), no fault insurance, or workers' compensation law or plan.

DATES: To be assured consideration, comments must be received at one of the addresses provided, no later than 5 p.m. on February 25, 2014.

ADDRESSES: In commenting, please refer to file code CMS–6055–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed).

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the instructions under the "More Search Options" tab.

2. *By regular mail.* You may mail written comments to the following address only:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–6055–P, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address only:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–6055–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—

Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850

If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786–1066 in advance to schedule your arrival with one of our staff members.

Comments erroneously mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT:

Barbara Wright, (410) 786–4292.
Cynthia Ginsburg, (410) 786–2579.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.regulations.gov.* Follow the search instructions on that Web site to view public comments.

Comments received timely will be also available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244–1850, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, please phone 1–800–743–3951.

I. Overview and Background

A. Overview

When the Medicare program was enacted in 1965, Medicare was the primary payer for all medically necessary covered and otherwise reimbursable items and services, with the exception of those items and services covered and payable by workers' compensation. In 1980, the Congress enacted the Medicare Secondary Payer (MSP) provisions of the Social Security Act (the Act), which added section 1862(b) to the Act and established Medicare as the secondary payer to certain primary plans. Primary plan, as defined in section 1862(b)(2)(A) of the Act, means a group health plan or large group health plan, workers' compensation law or plan, automobile or liability insurance policy or plan (including self-insured plan) or no fault insurance.

Section 1862(b)(2) of the Act, in part, prohibits Medicare from making payment where payment has been made or can reasonably be expected to be made by a primary plan. If payment has not been made or cannot reasonably be expected to be made by a primary plan, Medicare may make conditional payments with the expectation that the payments will be reimbursed to the appropriate Medicare Trust Fund. That is, Medicare may pay for medical claims with the expectation that it will be repaid if the beneficiary obtains a settlement, judgment, award, or other payment (hereafter referred to as "settlement"). Section 1862(b)(2)(B) of the Act provides authority for Medicare to make conditional payments and requires the primary plan, if it is responsible for the payment, to reimburse Medicare. A primary plan and any entity that receives payment from a primary plan shall reimburse the appropriate Medicare Trust Fund for Medicare's payments for items and services if it is demonstrated that such primary plan has or had responsibility to make payment with respect to such items and services.

The responsibility for payment on the part of workers' compensation, liability insurance (including self-insurance), and no-fault insurance is generally demonstrated by "settlements." When a "settlement" occurs, the "settlement" is subject to the Act's MSP provisions because a "payment has been made" with respect to medical care of a beneficiary related to that "settlement." Section 1862(b)(2)(B)(iv) of the Act provides the Federal government subrogation rights to any right under MSP of an individual or any other entity to payment for items or services under a primary plan, to the extent Medicare payments were made for such medical items and services. Moreover, section 1862(b)(2)(B)(iii) of the Act provides the Federal government a direct right of action to recover conditional payments made by Medicare. This direct right of action, which is separate and independent from Medicare's statutory subrogation rights, may be brought to recover conditional payments against any or all entities that are or were responsible for making payment for the items and services under a primary plan. Under the direct right of action, the Federal government may also recover from any entity that has received payment from a primary plan or the proceeds of a primary plan's payment to any entity.

B. Background

The Strengthening Medicare and Repaying Taxpayers Act of 2012 (the SMART Act) was signed into law by President Obama on January 10, 2013, and amends the Act's MSP provisions (found at 42 U.S.C. 1395y(b)). Specifically, section 201 of the SMART Act added subparagraph (viii) to section 1862(b)(2)(B) of the Social Security Act. This new clause requires Medicare to promulgate regulations establishing a right of appeal and an appeals process, with respect to any determination for which the Secretary is seeking to recover payments from an applicable plan (as defined in the MSP provisions), under which the applicable plan involved, or an attorney, agent, or third-party administrator on behalf of the applicable plan, may appeal such a determination. Further, the individual furnished such an item and/or service shall be notified of the applicable plan's intent to appeal such a determination. For purposes of this provision, the term applicable plan refers to liability insurance (including self-insurance), no-fault insurance, or a workers' compensation law or plan as defined at section 1862(b)(8)(F) of the Act. (We note that the industry has expressed interest in an appeal process for determinations regarding proposed Workers' Compensation Medicare Set-

Aside Arrangement (WCMSA) amounts. This proposed rule does not address this issue. It will be addressed separately.)

Currently, if an MSP recovery demand is issued to the beneficiary as the identified debtor, the beneficiary has formal administrative appeal rights and eventual judicial review as set forth in subpart I of part 405. If the recovery demand is issued to the applicable plan as the identified debtor, currently the applicable plan has no formal administrative appeal rights or judicial review. CMS' recovery contractor addresses any dispute raised by the applicable plan, but there is no multilevel formal appeal process.

Subpart I of part 405, provides for a multilevel process including a redetermination by the contractor issuing the recovery demand, a reconsideration by a Qualified Independent Contractor (QIC), an Administrative Law Judge (ALJ) hearing, a review by the Departmental Appeals Board's (DAB) Medicare Appeals Council (MAC), and eventual judicial review. The regulations set forth details on the process including filing requirements, amount in controversy requirements, and other requirements, as appropriate. We propose to include appeals for applicable plans where Medicare is pursuing recovery directly from the applicable plan in this process. The debts at issue involve recovery of the same conditional payments that would be at issue if recovery were directed at the beneficiary. Given this, we believe it is appropriate to utilize the same multilevel appeals process for applicable plans.

II. Provisions of the Proposed Regulations

After review of the existing regulations in subpart I of 42 CFR Part 405, we are proposing the following changes, as appropriate, in order to include the applicable plan as a party when we pursue recovery directly from the applicable plan.

We propose to amend § 405.900, Basis and Scope, by revising paragraph (a) to add section 1862(b)(2)(B)(viii) of the Act as part of the statutory basis for Subpart I. Section 1862(b)(2)(B)(viii) of the Act requires an appeals process for applicable plans when Medicare pursues recovery directly from the applicable plan.

In § 405.902, Definitions, we propose to add a definition of the term "applicable plan" for purposes of Subpart I. We would adopt the statutory definition of "applicable plan" in section 1862(b)(8)(F) of the Act, which states that an applicable plan means liability insurance (including self-insurance), no-fault insurance, or a workers' compensation law or plan.

We propose to amend § 405.906, Parties to initial determinations, redeterminations, reconsiderations, hearings and reviews by adding § 405.906(a)(4) to include the applicable plan as a party for an initial determination where Medicare is pursuing recovery directly from the applicable plan. By "pursuing recovery directly from the applicable plan," we mean that the applicable plan would be the identified debtor, with a recovery demand letter requiring repayment issued to the applicable plan (or its agent or representative). Sending an applicable plan a courtesy copy of a recovery demand letter issued to a beneficiary does not qualify as "pursuing recovery directly from the applicable plan" and does not confer party status on the applicable plan. We are also proposing a technical change in the section heading for § 405.906 (adding a comma before the phrase "and reviews").

Based upon this proposed change to § 405.906, the applicable plan's party status would continue at subsequent levels of appeal. Consistent with section 1862(b)(2)(B)(viii) of the Act, the beneficiary, provider, and/or supplier are not considered parties to an appeal by an applicable plan. Thus, we propose to remove the beneficiary, as well as the provider or supplier, as a party at the redetermination level where Medicare is pursuing recovery directly from the applicable plan. This would also, in effect, remove the beneficiary and the provider or supplier as a party at subsequent levels of appeal where Medicare is pursuing recovery directly from the applicable plan. To implement our proposed changes, we would revise § 405.906 (a) to specify: (1) The circumstances under which an applicable plan is a party to an initial determination; and (2) when an applicable plan is a party to an initial determination, it is the sole party with respect to that determination. Finally, as providers and suppliers would specifically be excluded from party status for an initial determination with respect to an applicable plan, we would make it clear that the special rule for provider or supplier party status in § 405.906(c) does not apply to an initial determination with respect to an applicable plan.

In proposed § 405.910, Appointed representatives, we would add a new paragraph (e)(4) to provide the applicable plan with parallel rights to a beneficiary's rights or a provider or supplier's rights regarding the duration of an appointment of representation with respect to an MSP recovery claim. We also propose to revise § 405.910(i)(4) so that the special provision that beneficiaries as well as their representatives must receive notices or requests in a MSP recovery case continues to apply only to beneficiaries. For all other parties, including an applicable plan, we would continue to follow the regulatory provisions in § 405.910(i)(1) through (3).

In § 405.921, Notice of initial determination, we propose to add a paragraph (c) to provide specific language regarding requirements for notice to an applicable plan. This language would parallel the existing language in this section regarding the notice to beneficiaries. In addition to these changes, for consistency we have made a number of technical and formatting changes.

In order for an action to be subject to the appeal process set forth in subpart I of 42 CFR Part 405, there must be an "initial determination." We propose, in § 405.924, Actions that are initial determinations, to add a new paragraph § 405.924(b)(15) providing that a determination that Medicare has a recovery claim where Medicare is pursuing recovery directly from an applicable plan is an initial determination with respect to the amount of or existence of the MSP recovery claim. This addition would generally parallel the existing provisions in § 405.924(b)(14) addressing pursuing MSP recovery claims from a beneficiary, provider or supplier. In addition to these changes, for consistency we have made a number of technical and formatting changes.

The MSP provisions in section 1862(b) of the Act establish that Medicare has a direct right of recovery against a primary payer. Currently under § 405.926(k), determinations under these provisions that Medicare has a recovery against a particular primary payer, are not initial determinations for purposes of part 405 subpart I. Consequently, although the primary payer may dispute the recovery claim where Medicare pursues recovery against the applicable plan, it has no formal appeal rights. We propose to revise § 405.926(k) by creating an exception to the broad rule in § 405.926(k) to reflect the proposed addition of § 405.924(b)(15). The proposed revision would provide an exception to § 405.926(k) where there is an initial determination under § 405.924(b)(15) (where Medicare is pursuing recovery directly from an applicable plan). We also propose to add a new § 405.926(a)(3) to clarify that Medicare's determination regarding

who/what entity it will pursue with respect to an MSP recovery claim is not an initial determination for purposes of part 405 subpart I. Because Medicare has the right to recover conditional payments from the beneficiary, the primary payer, or any other entity that has the proceeds from payment by the primary plan, Medicare's decision regarding who/what entity it is pursuing recovery from is not subject to appeal. We also propose to add the word "facilitates" to the existing "sponsors or contributes to" language in § 405.926(k) in recognition of our longstanding position that the concept of employer sponsorship or contribution has always included facilitation efforts. Finally for consistency, we are proposing several technical changes.

We propose to add a new § 405.947, Notice to the beneficiary of an applicable plan's request for a redetermination, to add language satisfying the requirement at section 1862(b)(2)(B)(viii) of the Act that the beneficiary receive notice of the applicable plan's intent to appeal where Medicare is pursuing recovery directly from the applicable plan. As the beneficiary would not be a party to the appeal at the redetermination level or subsequent levels of appeal, we believe that a single notice at the redetermination level satisfies the intent of this provision. We also propose that the required notice be issued by the contractor adjudicating the redetermination request in order to ensure clarity and consistency in the wording of the notice.

III. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995.

IV. Response to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

V. Regulatory Impact Statement

We have examined the impact of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (February 2, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999) and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). We have determined that the effect of this proposed rule on the economy and the Medicare program is not economically significant. The proposed rule would provide a formal administrative appeal process for MSP recovery claims where the applicable plan is the identified debtor, as opposed to the current process which requires a CMS contractor to consider any defense submitted by an applicable plan but does not provide formal administrative appeal rights.

The RFA requires agencies to analyze options for regulatory relief of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of less than $7.0 million to $35.5 million in any 1 year. Individuals and States are not included in the definition of a small entity. We have determined and we certify that this proposed rule would not have a significant economic impact on a substantial number of small entities because there is and will be no change in the administration of the MSP provisions. The proposed changes would simply expand or formalize existing rights with respect to MSP recovery claims pursued directly from an applicable plan. Therefore, we are not preparing an analysis for the RFA.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis (RIA) if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 for proposed rules of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area for Medicare payment regulations and has fewer than 100 beds. We have determined that this proposed rule would not have a significant effect on the operations of a substantial number of small rural hospitals because it would simply expand and/or formalize existing rights with respect to MSP recovery claims pursued directly from an applicable plan. Therefore, we are not preparing an analysis for section 1102(b) of the Act.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2013, that threshold is approximately $141 million. This proposed rule has no consequential effect on State, local, or tribal governments or on the private sector because it would simply expand and/or formalize existing rights with respect to MSP recovery claims pursued directly from an applicable plan.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. Since this regulation does not impose any costs on State or local governments, the requirements of Executive Order 13132 are not applicable.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Medical devices, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services proposes to amend 42 CFR Part 405 as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

■ 1. The authority citation for part 405 reads as follows:

Authority: Secs. 205(a), 1102, 1861, 1862(a), 1869, 1871, 1874, 1881, 1886(k) of the Social Security Act (42 U.S.C. 405(a),

1302, 1395x, 1395y(a), 1395ff, 1395hh, 1395kk, 1395rr and 1395ww(k)), and sec. 353 of the Public Health Service Act (42 U.S.C. 263a)

■ 2. Amend § 405.900 by revising paragraph (a) to read as follows:

§ 405.900 Basis and scope.

(a) *Statutory basis.* This subpart is based on the following provisions of the Act:

(1) Section 1869(a) through (e) and (g) of the Act.

(2) Section 1862(b)(2)(B)(viii) of the Act.

* * * * *

■ 3. Amend § 405.902 by adding the definition "Applicable plan" in alphabetical order to read as follows:

§ 405.902 Definitions.

* * * * *

Applicable plan means liability insurance (including self-insurance), no-fault insurance, or a workers' compensation law or plan.

* * * * *

■ 4. Amend § 405.906 as follows:

■ A. Revising the section heading.

■ B. Adding new paragraph (a)(4).

■ C. Amending paragraph (c) by adding a sentence at the end of the paragraph.

The additions and revision read as follows:

§ 405.906 Parties to the initial determinations, redeterminations, reconsiderations, hearings, and reviews.

(a) * * *

(4) An applicable plan for an initial determination under § 405.924(b)(15) where Medicare is pursuing recovery directly from the applicable plan. The applicable plan is the sole party to an initial determination under § 405.924(b)(15) (that is, where Medicare is pursuing recovery directly from the applicable plan).

* * * * *

(c) * * *. This paragraph (c) does not apply to an initial determination with respect to an applicable plan under § 405.924(b)(15).

■ 4. Amend § 405.910 as follows:

■ A. Adding paragraph (e)(4).

■ B. Revising paragraph (i)(4).

The addition and revision read as follows:

§ 405.910 Appointed representatives.

* * * * *

(e) * * *

(4) For an initial determination of a Medicare Secondary Payer recovery claim, an appointment signed by an applicable plan which has party status in accordance with § 405.906(a)(1)(iv) is valid from the date that appointment is signed for the duration of any subsequent appeal, unless the appointment is specifically revoked.

* * * * *

(i) * * *

(4) For initial determinations and appeals involving Medicare Secondary Payer recovery claims where the beneficiary is a party, the adjudicator sends notices and requests to both the beneficiary and the beneficiary's representative, if the beneficiary has a representative.

* * * * *

■ 5. Amend § 405.921 as follows:

■ A. In paragraph (a)(1), removing ";" and adding in its place "."

■ B. In paragraph (a)(2) introductory text, removing the phrase "must contain—" and adding in its place the phrase "must contain all of the following:"

■ C. In paragraphs (a)(2)(i) and (a)(2)(ii), removing ";" and adding in its place "."

■ D. In paragraph (a)(2)(iii), removing "; and" and adding in its place "."

■ E. Redesignating the second and third sentences of paragraph (b)(1) as paragraph (b)(1)(i) and (ii), respectively.

■ F. In paragraph (b)(2) introductory text, removing the phrase "must contain:" and adding in its place the phrase "must contain all of the following:"

■ G. In paragraphs (b)(2)(i) through (b)(2)(iv), removing ";" and add in its place "."

■ H. In paragraph (b)(2)(v), removing "; and" and add in its place "."

■ I. Adding paragraph (c) to read as follows:

§ 405.921 Notice of initial determination.

* * * * *

(c) *Notice of initial determination sent to an applicable plan*—(1) *Content of the notice.* The notice of initial determination under § 405.924(b)(15) must contain all of the following:

(i) The reasons for the determination.

(ii) The procedures for obtaining additional information concerning the contractor's determination, such as a specific provision of the policy, manual, law or regulation used in making the determination.

(iii) Information on the right to a redetermination if the liability insurance (including self-insurance), no-fault insurance, or workers' compensation law or plan is dissatisfied with the outcome of the initial determination and instructions on how to request a redetermination.

(iv) Any other requirements specified by CMS.

(2) [Reserved]

■ 6. Amend § 405.924 as follows:

■ A. In paragraph (b) introductory text, removing the phrase "with respect to:" and add in its place the phrase "with respect to any of the following:"

■ B. In paragraph (b)(1) through (b)(11) removing ";" and adding in its place "."

■ D. In paragraph (b)(12) introductory text, removing the ":" and adding in its place "—".

■ C. Adding paragraph (b)(15).

The addition reads as follows:

§ 405.924 Actions that are initial determinations.

* * * * *

(b) * * *

(15) Under the Medicare Secondary Payer provisions of section 1862(b) of the Act that Medicare has a recovery claim if Medicare is pursuing recovery directly from an applicable plan. That is, there is an initial determination with respect to the amount and existence of the recovery claim.

* * * * *

■ 7. Amend § 405.926 as follows:

■ A. In the introductory text, removing the phrase "not limited to –" and adding in its place the phrase "not limited to the following:"

■ B. In the introductory text of paragraph (a), removing the phrase "for example –" and adding in its place the phrase "for example one of the following:"

■ C. In paragraphs (a)(1) and (a)(2), removing ";" and adding in its place "."

■ D. Adding paragraph (a)(3).

■ E. In paragraphs (b) through (j), removing ";" and adding in its place "."

■ F. Revising paragraph (k).

■ G. In paragraphs (l) through (q), removing ";" and adding in its place "."

■ H. In paragraph (r), removing "; and" and adding in its place "."

The addition and revision read as follows:

§ 405.926 Actions that are not initial determinations.

* * * * *

(a) * * *

(3) Determination under the Medicare Secondary Payer provisions of section 1862(b) of the Act of the debtor for a particular recovery claim.

* * * * *

(k) Except as specified in § 405.924(b)(15), determinations under the Medicare Secondary Payer provisions of section 1862(b) of the Act that Medicare has a recovery against an entity that was or is required or responsible (directly, as an insurer or self-insurer; as a third party administrator; as an employer that sponsors, contributes to or facilitates a group health plan or a large group health plan; or otherwise) to make payment for services or items that were

already reimbursed by the Medicare program.

* * * * *

■ 8. Add a new § 405.947 to subpart I to read as follows:

§ 405.947 Notice to the beneficiary of applicable plan's request for a redetermination.

(a) The contractor adjudicating the redetermination request must send notice of the applicable plan's appeal to the beneficiary.

(b) Issuance and content of the notice must comply with CMS instructions.

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: August 29, 2013.

Marilyn Tavenner,

Administrator, Centers for Medicare & Medicaid Services.

Approved: November 12, 2013.

Kathleen Sebelius,

Secretary, Department of Health and Human Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

42 CFR Part 1001

Solicitation of New Safe Harbors and Special Fraud Alerts

AGENCY: Office of Inspector General (OIG), HHS.

ACTION: Notice of intent to develop regulations.

SUMMARY: In accordance with section 205 of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), this annual notice solicits proposals and recommendations for developing new and modifying existing safe harbor provisions under the Federal anti-kickback statute (section 1128B(b) of the Social Security Act), as well as developing new OIG Special Fraud Alerts.

DATES: To ensure consideration, public comments must be delivered to the address provided below by no later than 5 p.m. on February 25, 2014.

ADDRESSES: In commenting, please refer to file code OIG–122–N. Because of staff and resource limitations, we cannot accept comments by facsimile (fax) transmission.

You may submit comments in one of three ways (no duplicates, please):

1. *Electronically.* You may submit electronic comments on specific recommendations and proposals through the Federal eRulemaking Portal at *http://www.regulations.gov.*

2. *By regular, express, or overnight mail.* You may send written comments to the following address: Patrice Drew, Office of Inspector General, Congressional and Regulatory Affairs, Department of Health and Human Services, Attention: OIG–122–N, Room 5541C, Cohen Building, 330 Independence Avenue SW., Washington, DC 20201. Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By hand or courier.* If you prefer, you may deliver, by hand or courier, your written comments before the close of the comment period to Patrice Drew, Office of Inspector General, Department of Health and Human Services, Cohen Building, Room 5541C, 330 Independence Avenue SW., Washington, DC 20201. Because access to the interior of the Cohen Building is not readily available to persons without Federal Government identification, commenters are encouraged to schedule their delivery with one of our staff members at (202) 619–1368. For information on viewing public comments, please see the Supplementary Information section.

FOR FURTHER INFORMATION CONTACT: Patrice Drew, Congressional and Regulatory Affairs Liaison, Office of Inspector General, (202) 619–1368.

SUPPLEMENTARY INFORMATION:

Submitting Comments: We welcome comments from the public on recommendations for developing new or revised safe harbors and Special Fraud Alerts. Please assist us by referencing the file code OIG–122–N.

Inspection of Public Comments: All comments received before the end of the comment period are available for viewing by the public. All comments will be posted on *http://www.regulations.gov* as soon as possible after they have been received. Comments received timely will also be available for public inspection as they are received at Office of Inspector General, Department of Health and Human Services, Cohen Building, 330 Independence Avenue SW., Washington, DC 20201, Monday through Friday from 9:30 a.m. to 5 p.m. To schedule an appointment to view public comments, phone (202) 619–1368.

I. Background

A. OIG Safe Harbor Provisions

Section 1128B(b) of the Social Security Act (the Act) (42 U.S.C. 1320a–7b(b)) provides criminal penalties for individuals or entities that knowingly and willfully offer, pay, solicit, or receive remuneration to induce or reward business reimbursable under the Federal health care programs. The offense is classified as a felony and is punishable by fines of up to $25,000 and imprisonment for up to 5 years. OIG may also impose civil money penalties, in accordance with section 1128A(a)(7) of the Act (42 U.S.C. 1320a–7a(a)(7)), or exclusion from the Federal health care programs, in accordance with section 1128(b)(7) of the Act (42 U.S.C. 1320a–7(b)(7)).

Since the statute on its face is so broad, concern has been expressed for many years that some relatively innocuous commercial arrangements may be subject to criminal prosecution or administrative sanction. In response to the above concern, section 14 of the Medicare and Medicaid Patient and Program Protection Act of 1987, Public Law 100–93 § 14, the Act, § 1128B(b), 42 U.S.C. 1320a–7b(b), specifically required the development and promulgation of regulations, the so-called "safe harbor" provisions, specifying various payment and business practices that, although potentially capable of inducing referrals of business reimbursable under the Federal health care programs, would not be treated as criminal offenses under the anti-kickback statute and would not serve as a basis for administrative sanctions. OIG safe harbor provisions have been developed "to limit the reach of the statute somewhat by permitting certain non-abusive arrangements, while encouraging beneficial and innocuous arrangements" (56 FR 35952, July 29, 1991). Health care providers and others may voluntarily seek to comply with these provisions so that they have the assurance that their business practices will not be subject to liability under the anti-kickback statute or related administrative authorities. The OIG safe harbor regulations are found at 42 CFR 1001.952.

B. OIG Special Fraud Alerts

OIG has also periodically issued Special Fraud Alerts to give continuing guidance to health care providers with respect to practices OIG finds potentially fraudulent or abusive. The Special Fraud Alerts encourage industry compliance by giving providers guidance that can be applied to their own practices. OIG Special Fraud Alerts

are intended for extensive distribution directly to the health care provider community, as well as to those charged with administering the Federal health care programs.

In developing Special Fraud Alerts, OIG has relied on a number of sources and has consulted directly with experts in the subject field, including those within OIG, other agencies of the Department, other Federal and State agencies, and those in the health care industry.

C. Section 205 of the Health Insurance Portability and Accountability Act of 1996

Section 205 of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Public Law 104–191 § 205, the Act, § 1128D, 42 U.S.C. 1320a–7d, requires the Department to develop and publish an annual notice in the **Federal Register** formally soliciting proposals for modifying existing safe harbors to the anti-kickback statute and for developing new safe harbors and Special Fraud Alerts.

In developing safe harbors for a criminal statute, OIG is required to engage in a thorough review of the range of factual circumstances that may fall within the proposed safe harbor subject area so as to uncover potential opportunities for fraud and abuse. Only then can OIG determine, in consultation with the Department of Justice, whether it can effectively develop regulatory limitations and controls that will permit beneficial and innocuous arrangements within a subject area while, at the same time, protecting the Federal health care programs and their beneficiaries from abusive practices.

II. Solicitation of Additional New Recommendations and Proposals

In accordance with the requirements of section 205 of HIPAA, OIG last published a **Federal Register** solicitation notice for developing new safe harbors and Special Fraud Alerts on December 28, 2012 (77 FR 76434). As required under section 205, a status report of the public comments related to safe harbors received in response to that notice is set forth in Appendix F to the OIG's Semiannual Report to Congress covering the period April 1, 2013, through September 30, 2013.[1] OIG is not seeking additional public comment on the proposals listed in Appendix F at this time. Rather, this notice seeks additional recommendations regarding the development of new or modified safe harbor regulations and new Special Fraud Alerts beyond those summarized in Appendix F.

A detailed explanation of justifications for, or empirical data supporting, a suggestion for a safe harbor or Special Fraud Alert would be helpful and should, if possible, be included in any response to this solicitation.

A. Criteria for Modifying and Establishing Safe Harbor Provisions

In accordance with section 205 of HIPAA, we will consider a number of factors in reviewing proposals for new or modified safe harbor provisions, such as the extent to which the proposals would affect an increase or decrease in:

- Access to health care services,
- the quality of health care services,
- patient freedom of choice among health care providers,
- competition among health care providers,
- the cost to Federal health care programs,
- the potential overutilization of health care services, and
- the ability of health care facilities to provide services in medically underserved areas or to medically underserved populations.

In addition, we will also take into consideration other factors, including, for example, the existence (or nonexistence) of any potential financial benefit to health care professionals or providers that may be taken into account in their decisions whether to (1) order a health care item or service or (2) arrange for a referral of health care items or services to a particular practitioner or provider.

B. Criteria for Developing Special Fraud Alerts

In determining whether to issue additional Special Fraud Alerts, we will consider whether, and to what extent, the practices that would be identified in a new Special Fraud Alert may result in any of the consequences set forth above, as well as the volume and frequency of the conduct that would be identified in the Special Fraud Alert.

Dated: December 17, 2013.

Daniel R. Levinson,

Inspector General.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA–2013–0002; Internal Agency Docket No. FEMA–B–7748]

Proposed Flood Elevation Determinations for Pierce County, Washington, and Incorporated Areas

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; withdrawal.

SUMMARY: The Federal Emergency Management Agency (FEMA) is withdrawing its proposed rule concerning proposed flood elevation determinations for Pierce County, Washington, and Incorporated Areas.

DATES: The proposed rule published December 6, 2007, at 72 FR 68784, corrected April 16, 2012, at 77 FR 22551, is withdrawn effective December 27, 2013.

ADDRESSES: You may submit comments, identified by Docket No. FEMA–B–7748, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–4064, or (email) *Luis.Rodriguez3@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–4064, or (email) *Luis.Rodriguez3@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: On December 6, 2007, FEMA published a proposed rulemaking at 72 FR 68784, proposing flood elevation determinations along one or more flooding sources in Pierce County, Washington. On April 16, 2012, FEMA published a proposed rulemaking at 77 FR 22551, proposing corrected flood elevation determinations along one or more flooding sources in Pierce County, Washington. Because FEMA has or will be issuing a Revised Preliminary Flood Insurance Rate Map, and if necessary a Flood Insurance Study report, featuring updated flood hazard information, the proposed rulemaking is being withdrawn. A Notice of Proposed Flood Hazard Determinations will be published in the **Federal Register** and in

the affected community's local newspaper.

Authority: 42 U.S.C. 4104; 44 CFR 67.4.

Dated: November 22, 2013.

Roy E. Wright,

Deputy Associate Administrator for Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

BILLING CODE 9110–12–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[WC Docket No. 12–375; DA 13–2379]

Rates for Interstate Inmate Calling Services

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: In this document, the Wireline Competition Bureau grants in part the Motion for Extension of Time to File Comments and Reply Comments filed on December 6, 2013 by the Ohio Department of Rehabilitation and Correction in WC Docket No. 12–375. Specifically, the Bureau agreed that a modest extension of time will facilitate a more complete record in this proceeding.

DATES: Comments are due on or before December 20, 2013; reply comments are due on or before January 13, 2014.

ADDRESSES: You may submit comments, identified by WC Docket No. 12–375, by any of the following methods:

- *Federal Communications Commission's Web site: http://fjallfoss.fcc.gov/ecfs2/.* Follow the instructions for submitting comments.
- *Mail:* Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street SW., Washington, DC 20554.
- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: *FCC504@fcc.gov* or phone: 202–418–0530 or TTY: 202–418–0432.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Lynne Engledow, Wireline Competition Bureau, Pricing Policy Division, (202) 418–1520 or *lynne.engledow@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Order, in WC Docket No. 12–375, DA 13–2379, adopted and released December 12, 2013. The complete text of this document is available for public inspection during regular business hours in the FCC Reference Information Center, Room CY–A257, 445 12th Street SW., Washington, DC 20554. It is also available on the Commission's Web site at *http://www.fcc.gov.*

1. On September 26, 2013, the Federal Communications Commission (Commission) released the Inmate Calling Report and Order and Further Notice of Proposed Rulemaking (R&O and FNPRM). *See* 78 FR 68005, November 13, 2013. In that item, the Commission adopted reforms of interstate inmate calling service rates, requiring that all providers' rates and charges be cost-based. In the FNPRM portion of the item, the Commission sought comment on a number of outstanding issues. The FNPRM set dates for comments and reply comments as December 13 and December 30, 2013 respectively.

2. The Ohio DRC requests that parties be allowed an extension of time to file comments to those questions raised in the FNPRM portion of the item: January 13, 2014 for initial comments and until February 12, 2014 for reply comments. The Ohio DRC asserts that an additional grant of time would allow for "a more complete factual and legal record in this proceeding." Three parties filed comments in support of the Ohio DRC motion, and none opposed it.

3. Section 1.46 of the Commission's rules provides that "[i]t is the policy of the Commission that extensions of time shall not be routinely granted." Upon review, however, we agree with the commenters that a modest time extension will more fully allow parties to provide us with more fulsome comments that will facilitate the compilation of a complete record in this proceeding, without causing undue delay to the Commission's consideration of these issues.

4. Accordingly, *it is ordered,* pursuant to sections 4(i), 4(j), and 303(r) of the Communications Act, as amended, 47 U.S.C. 154(i), 154(j), and 303(r); and §§ 0.91, 0.291, 1.45, and 1.415 of the Commission's rules, 47 CFR 0.91, 0.291, 1.45, and 1.415 that the Motion for Extension of Time to File Comments and Reply Comments filed by the Ohio Department of Rehabilitation and Correction on December 6, 2013 *is granted in part* to the extent described herein and *is otherwise denied,* and the deadline for filing comments to the FNPRM *is* December 20, 2013 and reply comments *is* January 13, 2014.

Federal Communications Commission.

Lynne H. Engledow,

Assistant Division Chief, Wireline Competition Bureau.

Friday, December 27, 2013

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Pacific Southwest Recreation Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Pacific Southwest Recreation Resource Advisory Committee (Recreation RAC) will meet in San Bernardino, California. The Recreation RAC is authorized under the Federal Lands Recreation Enhancement Act (REA) (Pub, L. 108–447) and operates in compliance with the Federal Advisory Committee Act (FACA) (Pub. L. 92–463). Additional information concerning the Recreation RAC can be found by visiting the Recreation RAC's Web site at: *http://www.fs.usda.gov/main/r5/recreation/racs.*

DATES: The meeting will be held on the following dates:

- Wednesday, January 15, 2014–10:00 a.m. to 5:00 p.m.
- Thursday, January 16, 2014–9:00 a.m. to 3:00 p.m. (meeting could end earlier)

ADDRESSES: The meeting will be held at the San Bernardino National Forest Supervisor's Office, 602 S. Tippecanoe Avenue, San Bernardino, California. Written comments may be submitted as described under Supplementary Information. All comments, including names and addresses, when provided, are placed in the record and available for public inspection and copying. The public may inspect comments received at the Region 5 Pacific Southwest Regional Office. Please call ahead to Ramiro Villalvazo, at 707–562–8856 to facilitate entry into the building. Attendees may participate via conference call. For anyone who would like to attend via conference call, please contact Ramiro Villalvazo at *rvillalvazo@fs.fed.us* or visit the Web site listed above.

FOR FURTHER INFORMATION CONTACT: Ramiro Villalvazo, Designated Federal Official, Region 5 Pacific Southwest Regional Office, by phone at 707–562–8856, or by email at *rvillalvazo@fs.fed.us.* Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The meeting is open to the public. The purpose of the meeting is to:

1. provide proposed fee changes for standard amenity recreation fee areas on the Angeles, Cleveland, Los Padres and San Bernardino National Forests,
2. review and make recommendations on the change in fee structure for Camp Discovery Group Campground, and
3. provide a fee increase at one site in Sycamore Grove Campground on the Mendocino National Forest.

The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should submit a request in writing by January 8, 2014 to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the Recreation RAC may file written statements with the Recreation RAC staff by January 8, 2014. Written comments and time requests for oral comments must be sent to Ramiro Villalvazo, 1323 Club Drive, Vallejo, California 94592, or by email to *rvillalvazo@fs.fed.us*, or via facsimile to 707–562–9047. A summary of the meeting will be posted on the Web site listed above within 21 days after the meeting.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled For Further Information Contact. All reasonable accommodation requests are managed on a case by case basis.

Dated: December 19, 2013.

David Scholes,

Designated Federal Official.

BILLING CODE 3410–11–P

CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

Sunshine Act Meeting

TIME AND DATE: January 30, 2014, 6:30 p.m.–9:00 p.m. PST.

PLACE: Brodniak Auditorium, Anacortes High School; 1600 20th St. Anacortes, WA 98221.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED: The Chemical Safety and Hazard Investigation Board (CSB) will convene a public meeting on January 30, 2014, starting at 6:30 p.m. PST at the Brodniak Auditorium, Anacortes High School, 1600 20th St., Anacortes, WA 98221.

At the public meeting, the Board will consider and vote on the final investigation report into the April 2, 2010, explosion and fire that fatally injured seven employees. The CSB's investigation found that at the time of the incident a bank of heat exchangers was being brought online in the refinery's naphtha hydrotreater unit when another heat exchanger in a parallel bank catastrophically failed, spewing highly flammable hydrogen and naphtha which ignited. Seven Tesoro workers who were nearby, assisting with the heat exchanger startup, were fatally burned. The accident at Tesoro was the most deadly U.S. refinery incident since the 2005 explosion at BP Texas City that killed 15 workers and injured 180 others.

At the meeting, CSB staff will present to the Board the results of the investigation findings and safety recommendations.

Following the staff presentation on proposed findings and safety recommendations, the Board will hear comments from the public.

Following the conclusion of the public comment period, the Board will consider whether to approve the final report and recommendations. All staff presentations are preliminary and are intended solely to allow the Board to consider in a public forum the issues and factors involved in this case. No factual analyses, conclusions, or findings presented by staff should be considered final.

Only after the Board has considered the staff presentations, listened to public comments, and adopted a final investigation report and recommendations will there be an

approved final record of the CSB investigation of this incident.

Additional Information

The meeting is free and open to the public. If you require a translator or interpreter, please notify the individual listed below as the "Contact Person for Further Information," at least five business days prior to the meeting.

The CSB is an independent federal agency charged with investigating accidents and hazards that result, or may result, in the catastrophic release of extremely hazardous substances. The agency's Board Members are appointed by the President and confirmed by the Senate. CSB investigations look into all aspects of chemical accidents and hazards, including physical causes such as equipment failure as well as inadequacies in regulations, industry standards, and safety management systems.

Public Comment

Members of the public are invited to make brief statements to the Board at the conclusion of the staff presentation. The time provided for public statements will depend upon the number of people who wish to speak. Speakers should assume that their presentations will be limited to five minutes or less, and may submit written statements for the record.

Contact Person for Further Information

Hillary J. Cohen, Communications Manager, *hillary.cohen@csb.gov* or (202) 446–8094. General information about the CSB can be found on the agency Web site at: *www.csb.gov*.

BILLING CODE 6350–01–P

CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

Sunshine Act Meeting

TIME AND DATE: January 15, 2014, 6:30 p.m.–8:30 p.m. PST.

PLACE: City Council Chambers, Civic Center Campus, 440 Civic Center Plaza, Richmond, CA 94804.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED The Chemical Safety and Hazard Investigation Board (CSB) will convene a public meeting on January 15, 2014, starting at 6:30 p.m. at the City Council Chambers, Civic Center Campus, 440 Civic Center Plaza, Richmond, CA 94804. At the public meeting, the Board will consider and vote on the draft regulatory report of the August 6, 2012, fire at the Chevron refinery that endangered 19 workers and sent more than 15,000 residents to the hospital for medical attention.

At the meeting, CSB staff will present to the Board the results of the second of three reports in the CSB's investigation of this incident. Subject to a vote by the board at the January 15 public meeting, the draft regulatory report would recommend that California "Develop and implement a step-by-step plan to establish a more rigorous safety management regulatory framework for petroleum refineries in the state of California based on the principles of the 'safety case' framework in use in regulatory regimes such as those in the UK, Australia, and Norway." The recommendation urges specific steps to accomplish this, including ensuring that workers are formally involved in the development of a safety case report for each covered facility. The report also urges California to work with industry in gathering refinery safety indicator data to be shared with the public.

As detailed in the CSB draft report, a safety case regime which would require companies to demonstrate to refinery industry regulators—through a written "safety case report"—how major hazards are to be controlled and risks reduced to "as low as reasonably practicable," or ALARP. The CSB report notes that the safety case is more than a written document; rather, it represents a fundamental change by shifting the responsibility for continuous reductions in major accident risks from regulators to the company.

To ensure that a facility's safety goals and programs are accomplished, a safety case report generated by the company is rigorously reviewed, audited, and enforced by highly trained regulatory inspectors, whose technical training and experience are on par with the personnel employed by the companies they oversee, the draft report says.

The CSB's first interim report—which was voted on and approved by the board at a public meeting in Richmond, CA, on April 19, 2013—found that Chevron repeatedly failed over a ten-year period to apply inherently safer design principles and upgrade piping in its crude oil processing unit, which was extremely corroded and ultimately ruptured on August 6, 2012. The CSB's investigation identified missed opportunities on the part of Chevron to apply inherently safer piping design through the use of more corrosion-resistant metal alloys. The first interim report also found a failure by Chevron to identify and evaluate damage mechanism hazards, which if acted upon, would likely have identified the possibility of a catastrophic sulfidation corrosion-related piping failure. There are currently no federal or state regulatory requirements to apply these important preventative measures. The investigation team concluded that enhanced regulatory oversight with greater worker involvement and public participation are needed to improve petroleum refinery safety.

Following the staff presentation on proposed findings and safety recommendations, the Board will hear comments from the public.

Following the conclusion of the public comment period, the Board will consider whether to approve the final report and recommendations. All staff presentations are preliminary and are intended solely to allow the Board to consider in a public forum the issues and factors involved in this case. No factual analyses, conclusions, or findings presented by staff should be considered final.

Only after the Board has considered the staff presentations, listened to public comments, and adopted a final investigation report and recommendations will there be an approved final record of the CSB investigation of this incident.

Additional Information

The meeting is free and open to the public. If you require a translator or interpreter, please notify the individual listed below as the "Contact Person for. Further Information," at least five business days prior to the meeting.

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of Petitions by Firms for Determination of Eligibility to Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration, Department of Commerce.

ACTION: Notice and Opportunity for Public Comment.

Pursuant to Section 251 of the Trade Act 1974, as amended (19 U.S.C. 2341 et seq.), the Economic Development Administration (EDA) has received petitions for certification of eligibility to apply for Trade Adjustment Assistance from the firms listed below. Accordingly, EDA has initiated investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each of these firms contributed importantly to the total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

LIST OF PETITIONS RECEIVED BY EDA FOR CERTIFICATION ELIGIBILITY TO APPLY FOR TRADE ADJUSTMENT ASSISTANCE

[12/19/2013 through 12/19/2013]

Firm name	Firm address	Date accepted for investigation	Product(s)
The Line Group, Inc.	539 W. Algonquin Road, Arlington Heights, IL 60005.	12/18/2013	The firm manufactures metal stampings and assemblies.
Nordic Tugs Incorporated	11367 Higgins Airport Way, Burlington, WA 98233.	12/19/2013	The firm manufactures recreational trawlers/yachts.
CPAC Equipment, Inc.	2364 Leicester Road, Leicester, NY 14481.		The firm manufactures dry heat sterilizers and dental evacuation equipment.
S3 Manufacturing, Inc.	29690 SE Orient Dr, Gresham, OR 97080.	12/19/2013	The firm manufactures parts for bicycle, motorcycle industry; custom job shop for other aluminum, steel and plastics.
Seating, Inc.	60 North Street, Nunda, NY 14517	12/19/2013	The firm manufactures upholstered seats with metal frames.

Any party having a substantial interest in these proceedings may request a public hearing on the matter. A written request for a hearing must be submitted to the Trade Adjustment Assistance for Firms Division, Room 71030, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than ten (10) calendar days following publication of this notice.

Please follow the requirements set forth in EDA's regulations at 13 CFR 315.9 for procedures to request a public hearing. The Catalog of Federal Domestic Assistance official number and title for the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance for Firms.

Dated: December 19, 2013.

Michael DeVillo,

Eligibility Examiner.

BILLING CODE 3510–WH–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–421–811]

Purified Carboxymethylcellulose From the Netherlands: Final Results of Antidumping Duty Administrative Review and Final No Shipment Determination; 2011–2012

AGENCY: Enforcement and Compliance, formerly Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On August 9, 2013, the Department of Commerce (the Department) published the preliminary results of the administrative review and preliminary no shipment determination of the antidumping duty (AD) order on purified carboxymethylcellulose (CMC) from the Netherlands. For the final results, we continue to find that sales of subject merchandise by Akzo Nobel Functional Chemicals, B.V. (Akzo Nobel) were made at less than normal value, and that CP Kelco, B.V. (CP Kelco) had no shipments of subject merchandise during the POR.

DATES: *Effective Date:* December 27, 2013.

FOR FURTHER INFORMATION CONTACT: John Drury or Angelica Mendoza, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0195, and (202) 482–3019, respectively.

Background

On August 9, 2013, the Department published the preliminary results of the administrative review of the AD order on purified CMC from the Netherlands.[1] We invited interested parties to comment on the *Preliminary Results.* We received no comments. The Department has conducted this administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Tolling of Deadlines

As explained in the memorandum from the Assistant Secretary for Enforcement and Compliance, the Department has exercised its discretion to toll deadlines for the duration of the

[1] *See Purified Carboxymethylcellulose From the Netherlands: Preliminary Results of Antidumping Duty Administrative Review and Preliminary No Shipment Determination; 2011–2012,* 78 FR 48649 (August 9, 2013) (*Preliminary Results*).

closure of the Federal Government from October 1, through October 16, 2013.[2] Therefore, all deadlines in this segment of the proceeding have been extended by 16 days. If the new deadline falls on a non-business day, in accordance with the Department's practice, the deadline will become the next business day. The revised deadline for the final results of this review is now December 26, 2013.

Scope of the Order

The product covered by the order is all purified CMC, sometimes also referred to as purified sodium CMC, polyanionic cellulose, or cellulose gum, which is a white to off-white, non-toxic, odorless, biodegradable powder, comprising sodium CMC that has been refined and purified to a minimum assay of 90 percent. Purified CMC does not include unpurified or crude CMC, CMC Fluidized Polymer Suspensions, and CMC that is cross-linked through heat treatment. Purified CMC is CMC that has undergone one or more purification operations, which, at a minimum, reduce the remaining salt and other by-product portion of the product to less than ten percent.

The merchandise subject to the order is currently classified in the Harmonized Tariff Schedule of the United States at subheading 3912.31.00. This tariff classification is provided for convenience and Customs purposes; however, the written description of the scope of the order is dispositive.

Determination of No Shipments

As noted in the *Preliminary Results*,[3] we received a no-shipment claim from CP Kelco, and we confirmed this claim with U.S. Customs and Border Protection (CBP). Because we continue to find that the record indicates that CP Kelco did not export subject merchandise to the United States during the POR, we determine that it had no reviewable transactions during the POR.

Our former practice concerning respondents submitting timely no-shipment certifications was to rescind the administrative review with respect to those companies if we were able to confirm the no-shipment certifications through a no-shipment inquiry with CBP.[4] As a result, in such circumstances, we normally instructed CBP to liquidate any entries from the no-shipment company at the deposit rate in effect on the date of entry.

In our May 6, 2003, clarification of the "automatic assessment" regulation, we explained that, where respondents in an administrative review demonstrate that they had no knowledge of sales through resellers to the United States, we would instruct CBP to liquidate such entries at the all-others rate applicable to the proceeding.[5] Because "as entered" liquidation instructions do not alleviate the concerns which the May 2003 clarification was intended to address, we find it appropriate in this case to instruct CBP to liquidate any existing entries of merchandise produced by CP Kelco and exported by other parties at the all-others rate. In addition, we continue to find that it is more consistent with the May 2003 clarification not to rescind the review in part in these circumstances but, rather, to complete the review with respect to CP Kelco and issue appropriate instructions to CBP based on the final results of this administrative review. *See* the "Assessment Rates" section of this notice below.

Final Results of Review

We have made no changes to our calculations announced in the *Preliminary Results*. Therefore, as a result of our review, we determine that the following weighted-average dumping margin exists for the period July 1, 2011, through June 30, 2012:

Producer	weighted-average margin (percentage)
Akzo Nobel Functional Chemicals B.V.	0.64

Assessment

Pursuant to section 751(a)(2)(A) of the Act and 19 CFR 351.212(b), the Department shall determine, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. In accordance with 19 CFR 351.212(b)(1), the Department normally calculates an assessment rate for each importer of the subject merchandise covered by the review. In this review, we have calculated, whenever possible, an importer-specific assessment rate or value for merchandise subject to this review as described below.

As noted in the *Preliminary Results*, all of Akzo Nobel's U.S. sales of CMC were constructed-export-price sales (*e.g.*, sales through Akzo Nobel's U.S. affiliate to the unaffiliated purchaser in the United States).[6] Accordingly, we divided the total dumping margins for the reviewed sales by the total entered value of those reviewed sales for each importer. We will direct CBP to assess the resulting percentage margin against the entered customs values for the subject merchandise on each importer's respective POR entries.[7]

The calculated *ad valorem* rates will be assessed uniformly on all entries made by the respective importers during the POR. Where the assessment rate is above *de minimis*, we will instruct CBP to assess duties on all entries of subject merchandise by that importer.

As stated above, the Department clarified its "automatic assessment" regulation on May 6, 2003. This clarification will apply to entries of subject merchandise during the POR produced by reviewed companies for which these companies did not know their merchandise was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.[8]

The Department intends to issue assessment instructions directly to CBP 15 days after publication of these final results of review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Tariff Act of 1930, as amended: (1) The cash deposit rate for Akzo Nobel will be the rate established in the final results of this review; (2) for previously reviewed or investigated companies not covered in this review, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this or any previous review or in the less-than-fair-value (LTFV) investigation but the manufacturer is, the cash-deposit rate will be the rate established for the most recent period for the manufacturer of

the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review or the investigation, the cash-deposit rate will continue to be the all-others rate of 14.57 percent, which is the all-others rate established by the Department in the LTFV investigation.[9] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Reimbursement of Duties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation, which is subject to sanction.

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: December 18, 2013.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Certain New Pneumatic Off-the-Road Tires From the People's Republic of China: Initiation and Preliminary Results of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, formerly Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: Zhongce Rubber Group Company Limited ("Zhongce") requested a changed circumstances review of the antidumping duty order on certain new pneumatic off-the-road tires ("OTR tires") from the People's Republic of China ("PRC") pursuant to section 751(b)(1) of the Tariff Act of 1930, as amended ("the Act") and 19 CFR 351.216(b). The Department of Commerce ("Department") is initiating this changed circumstances review and preliminarily determining, pursuant to 19 CFR 351.221(c)(3)(ii) that Zhongce is the successor-in-interest to Hangzhou Zhongce Rubber Co., Ltd. ("Hangzhou").

DATES: *Effective Date:* December 27, 2013.

FOR FURTHER INFORMATION CONTACT: Andrew Medley or Brendan Quinn, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: 202–482–4987 or 202–482–5848, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 4, 2008, the Department published in the **Federal Register** an antidumping duty order on OTR tires from the PRC.[1] Under the *Order,* in the third administrative review, Hangzhou received its own calculated rate of 112.41 percent.[2]

On November 5, 2013, Zhongce requested that the Department conduct a changed circumstances review of the *Order* to confirm that Zhongce is the successor-in-interest to Hangzhou.[3] In its submission, Zhongce explained that the only change was to the name of the company, and provided evidence supporting its claim.[4]

Scope of the Order

The merchandise covered by this *Order* includes new pneumatic tires designed for off-the-road and off-highway use, subject to certain exceptions.[5] The subject merchandise is currently classifiable under Harmonized Tariff Schedule of the United States ("HTSUS") subheadings: 4011.20.10.25, 4011.20.10.35, 4011.20.50.30, 4011.20.50.50, 4011.61.00.00, 4011.62.00.00, 4011.63.00.00, 4011.69.00.00, 4011.92.00.00, 4011.93.40.00, 4011.93.80.00, 4011.94.40.00, and 4011.94.80.00. The HTSUS subheadings are provided for convenience and customs purposes only; the written product description of the scope of the order is dispositive.

Initiation and Preliminary Results

Pursuant to section 751(b)(1) of the Act, the Department will conduct a changed circumstances review upon receipt of information concerning, or a request from, an interested party for a review of an antidumping duty order which shows changed circumstances sufficient to warrant a review of the order. As indicated in the "Background" section, we received information indicating that Hangzhou changed its name to Zhongce, effective August 19, 2013. This constitutes changed circumstances warranting a review of the order.[6] Therefore, in accordance with section 751(b)(1) of the Act and 19 CFR 351.216(d) and (e), we are initiating a changed circumstances review based upon the information contained in Zhongce's submission.

Section 351.221(c)(3)(ii) of the Department's regulations permits the Department to combine the notice of initiation of a changed circumstances review and the notice of preliminary results if the Department concludes that expedited action is warranted. In this instance, because the record contains information necessary to make a preliminary finding, we find that expedited action is warranted and have

[2] *See Certain New Pneumatic Off-the-Road Tires From the People's Republic of China: Final Results of Antidumping Duty Administrative Review and Final Rescission, in Part; 2010–2011*, 78 FR 22513 (April 16, 2013).

[3] *See* Letter from Zhongce to the Department titled "New Pneumatic Off-The-Road Tires from the PRC: Request for Hangzhou Zhongce Rubber Co., Ltd. for Changed Circumstances Review" (November 5, 2013) ("Zhongce Request for CCR").

[4] *Id.* at 2–3 and Attachments 1, 2, and 3.

[5] For a complete description of the Scope of the Order, *see Certain New Pneumatic Off-the-Road Tires From the People's Republic of China: Final Results of Antidumping Duty New Shipper Review; 2011–2012*, 78 FR 33341 (June 4, 2013), and accompanying Issues and Decision Memorandum at "Scope."

[6] *See* 19 CFR 351.216(d).

combined the notice of initiation and the notice of preliminary results.

In this changed circumstances review, pursuant to section 751(b) of the Act, the Department conducted a successor-in-interest analysis. In making a successor-in-interest determination, the Department examines several factors, including, but not limited to, changes in the following: (1) Management; (2) production facilities; (3) supplier relationships; and (4) customer base.[7] While no single factor or combination of factors will necessarily provide a dispositive indication of a successor-in-interest relationship, generally, the Department will consider the new company to be the successor to the previous company if the new company's resulting operation is not materially dissimilar to that of its predecessor.[8] Thus, if the record evidence demonstrates that, with respect to the production and sale of the subject merchandise, the new company operates as the same business entity as the predecessor company, the Department may assign the new company the cash deposit rate of its predecessor.[9]

In accordance with 19 CFR 351.216, we preliminarily determine that Zhongce is the successor-in-interest to Hangzhou. Record evidence, as submitted by Zhongce, indicates that the only change undergone was that of the name, from "Hangzhou Zhongce Rubber Co., Ltd." to "Zhongce Rubber Group Company Limited."[10] Specifically, Zhongce provided a board of directors resolution authorizing the change of company name and specifying that the registered capital and business scope of the company were to remain the same;[11] a notarized notice of change in registration, affixed with the sign and seal of the Hangzhou Municipal Administration for Industry and Commerce, showing the change of names;[12] and a copy of its new business license showing Zhongce's new name.[13] In summary, Zhongce presented evidence to support its claim of successorship and the change in name did not impact any of the criteria that the Department typically looks to when making a changed circumstances determination.

We find that the evidence provided by Zhongce is sufficient to preliminarily determine that the change of its corporate name from Hangzhou to Zhongce did not affect the company's operations in a meaningful way. Therefore, based on the aforementioned reasons, we preliminarily determine that Zhongce is the successor-in-interest to Hangzhou and, thus, should receive the same antidumping duty treatment with respect to OTR tires from the PRC as the former Hangzhou.

Public Comment

Pursuant to 19 CFR 351.310(c), any interested party may request a hearing within 30 days of publication of this notice. In accordance with 19 CFR 351.309(c)(1)(ii), interested parties may submit case briefs not later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than five days after the case briefs, in accordance with 19 CFR 351.309(d).

Consistent with 19 CFR 351.216(e), we will issue the final results of this changed circumstances review no later than 270 days after the date on which this review was initiated, or within 45 days if all parties agree to our preliminary finding. This notice is published in accordance with sections 751(b)(1) and 777(i) of the Act and 19 CFR 351.216(b), 351.221(b) and 351.221(c)(3).

Dated: December 20, 2013.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Certain Kitchen Appliance Shelving and Racks from the People's Republic of China: Rescission of Antidumping Duty Administrative Review; 2012–2013

AGENCY: Enforcement and Compliance, formerly Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce ("Department") is rescinding the administrative review of the antidumping duty order on certain kitchen appliance shelving and racks from the People's Republic of China ("PRC") for the period of review ("POR") September 1, 2012, through August 31, 2013. This rescission is based on the timely withdrawal of the request for review by the only interested party that requested a review.

DATES: *Effective Date:* December 27, 2013.

FOR FURTHER INFORMATION CONTACT: Emeka Chukwudebe, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; (202) 482–0219.

SUPPLEMENTARY INFORMATION:

Background

On September 3, 2013, the Department published in the **Federal Register** a notice of opportunity to request an administrative review of the antidumping duty order on certain kitchen appliance shelving and racks from the PRC.[1] On September 30, 2013, the Department received a timely request from U.S. importer Electrolux North America, Inc., Electrolux Home Products, Inc., and Electrolux Major Appliances (collectively "Electrolux") to conduct an administrative review of Jiangsu Weixi Group Co. ("Weixi").[2] On November 8, 2013, in response to Electrolux's September 30, 2013, request, the Department initiated an administrative review of the antidumping duty order on certain kitchen appliance shelving and racks from the PRC.[3] On December 4, 2013, Electrolux withdrew its request for an administrative review of Weixi.[4]

Rescission of Administrative Review

Pursuant to 19 CFR 351.213(d)(1), the Department will rescind an

[2] *See* letter from Electrolux to the Department titled, "Kitchen Appliance Shelving and Racks from the People's Republic of China: Withdrawal of Request for Administrative Review" (December 4, 2013) ("Electrolux Withdrawal Request").

[3] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation In Part*, 78 FR 67104 (November 8, 2013); *see also* section 751(a) of the Tariff Act of 1930, as amended ("the Act") and 19 CFR 351.221(c)(l)(i).

[4] *See* Electrolux Withdrawal Request.

administrative review, in whole or in part, if a party that requested a review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review, which in this case is February 6, 2014. On December 4, 2013, Electrolux timely withdrew its request for review within the 90-day time limit. Because no other party requested a review, pursuant to 19 CFR 351.213(d)(1), the Department is rescinding the administrative review of the antidumping duty order on certain kitchen appliance shelving and racks from the PRC covering the period September 1, 2012, through August 31, 2013.

Assessment

The Department will instruct U.S. Customs and Border Protection ("CBP") to assess antidumping duties on all appropriate entries of certain kitchen appliance shelving and racks from the PRC during the POR at rates equal to the cash deposit rate of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(l)(i). The Department intends to issue appropriate assessment instructions to CBP 15 days after the publication of this notice in the **Federal Register.**

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification Regarding Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective order ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(d)(4).

Dated: December 20, 2013.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

International Trade Administration

[Application No. 87–9A001]

Export Trade Certificate of Review

ACTION: Notice of Issuance of an Amended Export Trade Certificate of Review to Independent Film & Television Alliance, Application no. 89–9A001.

SUMMARY: The U.S. Department of Commerce issued an amended Export Trade Certificate of Review to Independent Film and Television Alliance ("IFTA") on December 20, 2013.

FOR FURTHER INFORMATION CONTACT: Joseph E. Flynn, Director, Office of Trade and Economic Analysis, International Trade Administration, by telephone at (202) 482–5131 (this is not a toll-free number) or email at *etca@trade.gov.*

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. Sections 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 15 CFR Part 325 (2013). The U.S. Department of Commerce, International Trade Administration, Trade of Trade and Economic Analysis ("OTEA") is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Secretary of Commerce to publish a summary of the issuance in the **Federal Register**. Under Section 305(a) of the Export Trading Company Act (15 U.S.C. 4012(b)(1)) and 15 CFR § 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

IFTA Export Trade Certificate of Review has been amended to:

1. Add the following companies as new Members of IFTA's Certificate: Altitude Film Entertainment Limited (London, United Kingdom), Archstone Distribution, LLC (Los Angeles, CA), Artis Films Romania (Bucharest, Romania), Bos Entertainment, Inc., d/b/a The Exchange (Los Angeles, CA), Callister Technology and Entertainment LLC d/b/a Garden Thieves Pictures (Washington, DC), Corsan NV(Antwerp, Belgium), DARO Film Distribution GmbH (Monte Carlo, Monaco), Embankment Films Limited (London, United Kingdom), EntertainME US LLC (Hollywood, CA), Entertainment One (Toronto, Ontario, Canada), Exclusive Films International, Limited (Beverly Hills, CA), Filmnation Entertainment (Los Angeles, CA), Fortune Star Media Limited (Kowloon, Hong Kong), GFM Films (London, United Kingdom), Global Asylum, The (Burbank, CA), Gold Lion Films (Los Angeles, CA), Hasbro, Inc. International Trade Administration

[Application No. 13–00001]

Export Trade Certificate of Review

ACTION: Notice of Issuance of an Export Trade Certificate of Review to Emporia Trading LLC, Application No. 13–00001.

SUMMARY: The U.S. Department of Commerce issued an Export Trade Certificate of Review to Emporia Trading LLC on December 16, 2013.

FOR FURTHER INFORMATION CONTACT: Joseph E. Flynn, Director, Office of Trade and Economic Analysis, International Trade Administration, by telephone at (202) 482–5131 (this is not a toll-free number) or email at *etca@trade.gov.*

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. Sections 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 15 CFR Part 325 (2013). The U.S. Department of Commerce, International Trade Administration, Office of Competition and Economic Analysis ("OCEA") is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Secretary of Commerce to publish a summary of the issuance in the **Federal Register**. Under Section 305(a) of the Export Trading Company Act (15 U.S.C. 4012(b)(1)) and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Members (Within the Meaning of 15 CFR 325.2(1))

Robert T "Terry" Smith, Sr. and Robert "Bobby" Smith, Jr.

Description of Certified Conduct

Emporia is certified to engage in the Export Trade Activities and Methods of Operation described below in the following Export Trade and Export Markets.

Export Trade

Products: Manufactured Products [NAICS 31–33]

Services: All services related to the export of Products.

Technology Rights: All intellectual property rights associated with Products or Services, including, but not limited to: Patents, trademarks, services marks, trade names, copyrights, neighboring (related) rights, trade secrets, know-how, and confidential databases and computer programs.

Export Trade Facilitation Services (as They Relate to the Export of Products): Export Trade Facilitation Services, including but not limited to: Consulting and trade strategy, arranging and coordinating delivery of Products to the port of export; arranging for inland and/or ocean transportation; allocating Products to vessel; arranging for storage space at port; arranging for warehousing, stevedoring, wharfage, handling, inspection, fumigation, and freight forwarding; insurance and financing; documentation and services related to compliance with customs' requirements; sales and marketing; export brokerage; foreign marketing and analysis; foreign market development; overseas advertising and promotion; Products-related research and design based upon foreign buyer and consumer preferences; inspection and quality control; shipping and export management; export licensing; provisions of overseas sales and distribution facilities and overseas sales staff; legal; accounting and tax assistance; development and application of management information systems; trade show exhibitions; professional services in the area of government relations and assistance with federal and state export assistance programs (e.g., Export Enhancement and Market Promotion programs, invoicing (billing) foreign buyers; collecting (letters of credit and other financial instruments) payment for Products; and arranging for payment of applicable commissions and fees.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operations

To engage in Export Trade in the Export Markets, Emporia Trading LLC and its individual members (collectively "Emporia") may:

1. Provide and/or arrange for the provision of Export Trade Facilitation Services;

2. Engage in promotional and marketing activities and collect information on trade opportunities in the Export Markets and distribute such information to clients;

3. Enter into exclusive and/or non-exclusive licensing and/or sales agreements with Suppliers for the export of products and services, and/or technology rights to Export Markets;

4. Enter into exclusive and/or non-exclusive agreements with distributors and/or sales representatives in Export Markets;

5. Allocate export sales or divide Export Markets among Suppliers for the sale and/or licensing of products and services and/or technology rights;

6. Allocate export orders among Suppliers;

7. Establish the price of products and services and/or technology rights for sales and/or licensing in Export Markets; and

8. Negotiate, enter into, and/or manage licensing agreements for the export of technology rights.

9. Emporia may exchange information with individual Suppliers on a one-to-one basis regarding that Supplier's inventories and near-term production schedules in order that the availability of Products for export can be determined and effectively coordinated by Emporia with its distributors in Export Markets.

Definition

"Supplier" means a person who produces, provides, or sells Products, Services, and/or Technology Rights.

Dated: December 23, 2013.

Joseph E. Flynn,

Office Director, Office of Trade and Economic Analysis.

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

National Conference on Weights and Measures 99th Interim Meeting

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: The 99th Interim Meeting of the National Conference on Weights and Measures (NCWM) will be held in Albuquerque, New Mexico, January 19 to 22, 2014. This notice contains information about significant items on the NCWM Committee agendas, but does not include all agenda items. As a result, the items are not consecutively numbered.

DATES: The meeting will be held January 19 to 22, 2014.

ADDRESSES: This meeting will be held at the Hotel Albuquerque, 800 Rio Grande Boulevard, NW., Albuquerque, NM 87104.

FOR FURTHER INFORMATION CONTACT: Ms. Carol Hockert, Chief, NIST, Office of Weights and Measures, 100 Bureau Drive, Stop 2600, Gaithersburg, MD 20899–2600. You may also contact Ms. Hockert at (301) 975–5507 or by email at *carol.hockert@nist.gov*. The meetings are open to the public, but a paid registration is required. Please see NCWM Publication 15 "Interim Meeting Agenda" (*www.ncwm.net*) to view the meeting agendas, registration forms, and hotel reservation information.

SUPPLEMENTARY INFORMATION: Publication of this notice on the NCWM's behalf is undertaken as a public service; NIST does not endorse, approve, or recommend any of the proposals or other information contained in this notice or in the publications of the NCWM.

The NCWM is an organization of weights and measures officials of the states, counties, and cities of the United States, federal agencies, and representatives from the private sector. These meetings bring together government officials and representatives of business, industry, trade associations, and consumer organizations on subjects related to the field of weights and measures technology, administration, and enforcement. NIST participates to encourage cooperation between federal agencies and the states in the development of legal metrology requirements. NIST also promotes uniformity among the states in laws, regulations, methods, and testing equipment that comprise the regulatory

control of commercial weighing and measuring devices, packaged goods, and other trade and commerce issues.

The following are brief descriptions of some of the significant agenda items that will be considered along with other issues at the NCWM Interim Meeting. Comments will be taken on these and other issues during several public comment sessions. At this stage, the items are proposals. This meeting also includes work sessions in which the Committees may also accept comments, and where recommendations for NCWM consideration and possible adoption at its 2014 Annual Meeting will be developed. The Committees may withdraw or carryover items that need additional development. The 99th Annual Meeting of the NCWM will be held July 13 to 17, 2014, at the Westin Book Cadillac Detroit, 1114 Washington Boulevard, Detroit, MI 48226.

Some of the items listed below provide notice of projects under development by groups working to develop specifications, tolerances, and other requirements for devices used in the retail sales of engine fuels and the establishment of approximate gallon and liter equivalents to diesel fuel that would be used in marketing both compressed and liquefied natural gas. Also included is a notice about efforts to establish a method of sale for pressurized containers that utilize bag-on-valve technology. These notices are intended to make interested parties aware of these development projects and to make them aware that reports on the status of the project will be given at the Interim Meeting. The notices are also presented to invite the participation of manufacturers, experts, consumers, users, and others who may be interested in these efforts.

The Specifications and Tolerances Committee (S&T Committee) will consider proposed amendments to NIST Handbook 44, "Specifications, Tolerances, and other Technical Requirements for Weighing and Measuring Devices." Those items address weighing and measuring devices used in commercial applications, that is, devices that are used to buy from or sell to the public or used for determining the quantity of product sold among businesses. Issues on the agenda of the NCWM Laws and Regulations Committee (L&R Committee) relate to proposals to amend NIST Handbook 130, "Uniform Laws and Regulations in the area of Legal Metrology and Engine Fuel Quality" and NIST Handbook 133, "Checking the Net Contents of Packaged Goods."

NCWM Specifications and Tolerances Committee

The following items are proposals to amend NIST Handbook 44:

General Code

Item 310–2 G.S.5.6. Recorded Representations.

A variety of commercial weighing and measuring devices are required to provide paper receipts for consumers at the end of a transaction. These receipts provide important information for consumers (e.g., seller identity, date, product identity, and amount delivered, along with the unit price and total price of the transaction). Sometimes receipts include details of transaction that are often not readily apparent to consumers at the time of the transaction (e.g., such as when a point of sale system in a grocery store deducts for the tare weight on a package of apples). These documents help consumers understand a transaction and reconcile the transaction with billing invoices or credit card bills in the future. Detailed receipts are especially important in transactions where the customer is often not present, such as when a delivery of heating fuel is made when the consumer is not at home. Receipts describing transaction details help prevent fraud and provide valuable protections for buyers and sellers alike. This item is a proposal to revise the General Code requirement to allow sellers to offer consumers the choice of receiving receipts via digital communications such as email or online account access.

Scales

Item 320–1 S.2.1.6. Combined Zero-Tare Key.

Some manufacturers of high-precision balances that are typically used by precious metal and gem buyers have built balances that have a single pushbutton that combines two functions: (1) Function used to keep the balance on zero and (2) the function used to deduct for the tare weight of a tray or weighing pan. Regulations adopted by most states prohibit the use of weighing devices with this type of feature in direct buying and selling transactions (i.e., where the customer is present). Consumers in direct sale transactions have a legal right under the laws of most states to view the balance indications and weighing operation to prevent fraud. Most states also require scales and balances to automatically indicate that tare has been deducted. Such features benefit both the consumer and the device user since the indication helps to ensure the accuracy of the transaction. Because many devices with the combined zero-tare key feature have found their way into direct sale applications, some manufacturers are now requesting a change to the requirement based on the assumption that there is no evidence that a combined feature key on some balances has led to an increase in fraud in these types of transactions. This item includes a proposal to amend existing regulations to allow scales and balances to be equipped with a combined "zero/tare" pushbutton if it is designed to operate within narrow limits and there are indications or controls built into the device to provide consumers with information about the zero condition of the scale or balance.

Liquefied Petroleum Gas (LPG) and Anhydrous Ammonia Measuring Devices

Item 332–1 Proposed amendments to device specifications and user requirements. This item includes several proposals that will amend the specifications and other requirements for liquid measuring devices used to sell LPG and Anhydrous Ammonia to require electronic measuring devices to be equipped with the means to retain detailed transaction information in the event of a power failure. Another proposal would require the posting of unit price and product identity adjacent to stationary devices in retail outlets. In addition, the proposed specifications would require that measuring devices used in retail applications to fill motor vehicles have a zero-setback interlock in operation to ensure that the product indications would be returned to zero following each completed transaction (note: zero-setback interlocks have been required to be provided on retail gasoline and diesel dispensers for more than 50 years). Another proposal would add requirements for measuring devices used in wholesale and contractual transactions for unit price and product identity posting as well as special requirements for devices used to sell the same products at different unit prices (e.g., discount unit price for sales where the customer purchases an optional car wash).

Mass Flow Meters

Item 337–1 (and others): Appendix D—Definitions: Diesel Liter and Diesel Gallon Energy Equivalents for Liquefied and Compressed Natural Gas.

In response to a request from a coalition of natural gas providers, the NCWM adopted Compressed Natural Gas (CNG) "equivalents" to a liter and gallon of gasoline in 1994. At that time those equivalents were based on the "approximate" value of energy in a

gallon of gasoline and were recommended by the CNG industry to promote broader acceptance and use of CNG as a vehicle fuel base on value. The "Gasoline Liter/Gallon Equivalents" were intended to provide a means for consumers to make accurate value comparisons between gasoline and CNG and to facilitate fuel economy comparisons. In a number of instances since the adoption of these "equivalents," some state weights and measures officials and several CNG providers have expressed the concern that the energy equivalent values adopted in 1994 do not provide an accurate estimate of the true energy content of natural gas. Another concern with the 1994 "equivalents" is that the equivalents have not been reevaluated to ensure that they accurately correlate with the energy content of today's gasoline and gasoline-oxygenate blends or other alternative fuels such as E85: Consequently, many weights and measures officials are reluctant to consider adding other energy "equivalency" values for additional fuels unless some mechanism is established to ensure that all of these energy equivalency values are routinely updated to reflect the current energy content (i.e., Joules/BTUs) of gasoline and diesel fuels and various blends of these products with alternative fuels. The need for such a mechanism is important considering the many blends of fuels that are currently in the marketplace and others that are anticipated to enter the fuel arena in the future (e.g., 15% or higher ethanol blends with gasoline and biodiesel blends greater than 5%). These new proposals would establish a "diesel liter equivalent (DLE)" and a "diesel gallon equivalent (DGE)" and specify equivalent mass values for these units when they are used in retail vehicle refueling applications. The proponents of these proposals indicate that the purpose of these units is to educate consumers that a DLE or DGE of "compressed" or "liquefied" natural gas contains approximately the same amount of energy they would receive if they purchased a liter or gallon of diesel fuel. Most sellers of these products believe that adoption and use of the DLE or DGE in retail fuel sales would make it easier for consumers to make price, value, and fuel economy comparisons between an energy "equivalent" liter or gallon of compressed natural gas and everyday diesel fuel. See also Items 337–2, 337–3, 337–4, and 337–5 on the Specifications and Tolerances Committee Agenda and Items 232–2 and 232–3 in the Laws and Regulations Committee Agenda regarding proposed methods of sale for the DLE and DGE.

NCWM Laws and Regulations Committee (L & R Committee)

The following items are proposals to amend NIST Handbook 130 or NIST Handbook 133:

NIST Handbook 130—Uniform Regulation for the Method of Sale of Commodities

Item 231–2: Section 10.3. Aerosols and Similar Pressurized Containers.

This item includes a proposal to establish a method of sale for pressurized containers that utilize Bag-on-Valve (BOV) technology that have their net content declarations in terms of fluid volume. Unlike most aerosol containers, packages fitted with BOV technology do not expel a propellant with the product when the valve is activated. Currently, under the Uniform Packaging and Labeling Regulation (UPLR) adopted by many states, products sold in aerosol or similar pressurized containers must be offered for sale by weight. BOV packaging, which has been in the marketplace for many years, is used to sell the same products sold in aerosol containers (e.g., sunscreen, wound wash, shaving cream, and car-care products). Because BOV containers (with their net contents declared in fluid volume) are used to sell the same type of products dispensed from aerosol containers (with their net contents declared by weight), consumers are unable to make value comparisons between similar products. The L&R Committee is aware that most countries in the European Union require aerosol and pressurized containers to display net contents in terms of fluid volume, but other countries permit these types of containers to display net contents declarations in terms of both net weight and volume.

Dated: December 19, 2013.

Willie E. May,

Associate Director for Laboratory Programs.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Manufacturing Extension Partnership Advisory Board

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of Open Meeting.

SUMMARY: The National Institute of Standards and Technology (NIST) announces that the Manufacturing Extension Partnership (MEP) Advisory Board will hold an open meeting on Tuesday, January 28, 2014 from 8:30 a.m. to 5:00 p.m. Eastern Time.

DATES: The meeting will be held Tuesday, January 28, 2014, from 8:30 a.m. to 5:00 p.m. Eastern Time.

ADDRESSES: The meeting will be held at the Hilton Charlotte University Place, 8629 J M Keynes Drive, Charlotte, North Carolina 28262.

Please note admittance instructions under the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Karen Lellock, Manufacturing Extension Partnership, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 4800, Gaithersburg, Maryland 20899–4800, telephone number (301) 975–4269, email: *Karen.Lellock@nist.gov.*

SUPPLEMENTARY INFORMATION: The MEP Advisory Board (Board) is authorized under Section 3003(d) of the America COMPETES Act (Pub. L. 110–69); codified at 15 U.S.C. 278k(e), as amended, in accordance with the provisions of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. The Board is composed of 10 members, appointed by the Director of NIST. MEP is a unique program consisting of centers across the United States and Puerto Rico with partnerships at the state, federal, and local levels. The Board provides a forum for input and guidance from Hollings MEP program stakeholders in the formulation and implementation of tools and services focused on supporting and growing the U.S. manufacturing industry, provides advice on MEP programs, plans, and policies, assesses the soundness of MEP plans and strategies, and assesses current performance against MEP program plans.

Background information on the Board is available at *http://www.nist.gov/mep/advisory-board.cfm.*

Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. App., notice is hereby given that the MEP Advisory Board will hold an open meeting on Tuesday, January 28, 2014 from 8:30 a.m. to 5:00 p.m. Eastern Time. This meeting will focus on (1) MEP administrative updates, and (2) Board input into the NIST MEP strategic planning process. The agenda may change to accommodate other Board business. The final agenda will be posted on the MEP Advisory Board Web site at *http://www.nist.gov/mep/*

advisory-board.cfm. This meeting is being held in conjunction with the MEP Update meeting that will be held January 29–30, 2014 also at the Hilton Charlotte University Place, 8629 J M Keynes Drive, Charlotte, North Carolina 28262.

Admittance Instructions: Anyone wishing to attend this meeting should submit their name, email address and phone number to Karen Lellock (*Karen.lellock@nist.gov* or 301–975–4269) no later than Tuesday, January 21, 2014, 5:00 p.m. Eastern Time.

Individuals and representatives of organizations who would like to offer comments and suggestions related to the MEP Advisory Board's business are invited to request a place on the agenda. Approximately 15 minutes will be reserved for public comments at the beginning of the meeting. Speaking times will be assigned on a first-come, first-served basis. The amount of time per speaker will be determined by the number of requests received but is likely to be no more than three to five minutes each. The exact time for public comments will be included in the final agenda that will be posted on the MEP Advisory Board Web site at *http://www.nist.gov/mep/advisory-board.cfm.* Questions from the public will not be considered during this period. Speakers who wish to expand upon their oral statements, those who had wished to speak but could not be accommodated on the agenda, and those who were unable to attend in person are invited to submit written statements to the MEP Advisory Board, National Institute of Standards and Technology, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 4800, Gaithersburg, Maryland 20899–4800, or via fax at (301) 963–6556, or electronically by email to *karen.lellock@nist.gov.*

Dated: December 20, 2013.

Phillip Singerman,

Associate Director for Innovation & Industry Services.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XC969

Draft Guidance for Assessing the Effects of Anthropogenic Sound on Marine Mammals—Acoustic Threshold Levels for Onset of Permanent and Temporary Threshold Shifts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The National Marine Fisheries Service (NMFS) on behalf of NMFS and the National Ocean Service (referred collectively here as the National Oceanic and Atmospheric Administration (NOAA)), announces the availability of draft guidance for assessing the effects of anthropogenic sound on marine mammal species under NOAA's jurisdiction. The guidance provides updated received levels, or thresholds, above which individual marine mammals are predicted to experience changes in their hearing sensitivity (either temporary or permanent) for all underwater anthropogenic sound sources. NOAA solicits public comment on the draft guidance.

DATES: Comments must be received by January 27, 2014.

ADDRESSES: The draft guidance is available in electronic form via the Internet at *http://www.nmfs.noaa.gov/pr/acoustics/.*

You may submit comments, identified by [NOAA–NMFS–2013–0177], by any of the following methods:

Electronic Submissions: Submit all electronic public comments via the Federal eRulemaking Portal *http://www.regulations.gov.*

Mail: Send comments to: Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910–3226, Attn: Acoustic Guidance.

Instructions: All comments received are a part of the public record and will generally be posted to *http://www.regulations.gov* without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

NMFS will accept anonymous comments (enter N/A in the required fields, if you wish to remain anonymous). You may submit attachments to electronic comments in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only.

NMFS will hold a public meeting and webinar to inform interested parties and solicit comments on the draft guidance document. The meeting will be held on January 14, 2014, from 2 p.m. to 5 p.m. (EST) at the NOAA Silver Spring Metro Center Complex, NOAA Science Center, 1301 East-West Highway, Silver Spring, MD 20910. This meeting is accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Amy Scholik-Schlomer, (301) 427–8449 (voice), (301) 713–0376 (fax), or *Amy.Scholik@noaa.gov* at least five days before the scheduled meeting date. Information on how to register for the online webinar will be posted on via the Internet at *http://www.nmfs.noaa.gov/pr/acoustics/* after January 1, 2014.

FOR FURTHER INFORMATION CONTACT: Amy Scholik-Schlomer, Office of Protected Resources, 301–427–8449, *Amy.Scholik@noaa.gov.*

SUPPLEMENTARY INFORMATION: The National Marine Fisheries Service and the National Ocean Service (referred collectively here as the National Oceanic and Atmospheric Administration (NOAA)), have developed draft guidance for assessing the effects of anthropogenic sound on marine mammal species under NOAA's jurisdiction. Specifically, the guidance identifies the received levels, or thresholds, above which individual marine mammals are predicted to experience changes in their hearing sensitivity (either temporary or permanent) for all underwater anthropogenic sound sources. This is the first time NOAA has presented this information in a single, comprehensive document. This guidance is intended to be used by NOAA analysts and managers and other relevant user groups and stakeholders, including other federal agencies, when seeking to determine whether and how their activities are expected to result in particular types of impacts to marine mammals via acoustic exposure. This document outlines NOAA's updated acoustic threshold levels and describes in detail how the thresholds were developed and how they will be updated in the future.

NOAA has compiled, interpreted, and synthesized the best available science to produce updated acoustic threshold levels for the onset of both temporary

(TTS) and permanent hearing threshold shifts (PTS). These thresholds replace those currently in use by NOAA. Updates include a protocol for estimating PTS and TTS onset levels for impulsive (e.g., airguns, impact pile drivers) and non-impulsive (e.g., sonar, vibratory pile drivers) sound sources, the formation of marine mammal functional hearing groups (low-, mid-, and high-frequency cetaceans and otariid and phocid pinnipeds), and the incorporation of marine mammal auditory weighting functions into the calculation of thresholds. These acoustic threshold levels are presented using the dual metrics of cumulative sound exposure level and peak sound pressure level. This document addresses how to combine multiple datasets, as well as how to determine appropriate surrogates when data are not available. While the updated acoustic thresholds are more complex than those previously used by NOAA, they accurately reflect the current state of scientific knowledge regarding the characteristics of sound that have the potential to impact marine mammal hearing sensitivity. Given the specific nature of these updates, it is not possible to compare directly the updated acoustic threshold levels presented in this document with the thresholds previously used by NOAA.

Although NOAA has updated the acoustic threshold levels from those previously used, and these changes may necessitate new methodologies for calculating impacts, the application of the thresholds in the regulatory context under applicable statutes (Marine Mammal Protection Act, Endangered Species Act, and National Marine Sanctuaries Act) remains consistent with past NOAA practice. It is important to note that these updated acoustic threshold levels do not represent the entirety of an impact assessment, but rather serve as one tool (in addition to behavioral impact thresholds, auditory masking assessments, evaluations to help understand the ultimate effects of any particular type of impact on an individual's fitness, population assessments, etc.), to help evaluate the effects of a proposed action on marine mammals and make findings required by our various statutes.

The document is classified as a Highly Influential Scientific Assessment by the Office of Management and Budget. As such, independent peer review is required prior to broad public dissemination by the Federal Government. NOAA conducted a peer review of the updated acoustic threshold levels. Details of the peer review can be found within this document, and at the following Web site: *http://www.nmfs.noaa.gov/pr/acoustics/*.

A summary of the updated acoustic threshold levels can be found in the main body of the document and additional details are provided in the appendices. Section I provides an introduction to the document and a description of how NOAA addressed uncertainty and data limitations. NOAA's updated acoustic threshold levels for onset of PTS and TTS for marine mammals exposed to underwater sound are presented in Section II. Section III describes how acoustic threshold levels are interpreted under NOAA's statutes. NOAA's plan for periodically updating acoustic threshold levels is presented in Section IV. More details on the marine mammal auditory weighting functions, the development of acoustic threshold levels, the peer review process, and a glossary of acoustic terms can be found in the appendices.

NOAA particularly encourages the public to identify any additional datasets for inclusion in the assessment, and to comment on the appropriateness of the proposed accumulation period for the cumulative sound exposure metric and the proposed low-frequency auditory weighting function for which direct measurements of hearing sensitivity are not available.

Dated: December 19, 2013.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, performing the functions and duties of the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XD049

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a joint public meeting of its Skate Oversight Committee and Skate Advisory Panel on January 15, 2014 to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Wednesday, January 15, 2014 at 9:30 a.m.

ADDRESSES: *Meeting address:* The meeting will be held at the Sheraton Harborside, 250 Market Street, Portsmouth, NH 03801; telephone: (603) 431–2300; fax: (603) 433–5649.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION: The Skate Oversight Committee and Advisory Panel will review Plan Development Team work on alternatives under consideration and impacts of these alternatives in Framework Adjustment 2 and select preferred alternatives. They will also have a preliminary discussion of the development of future actions for the Skate FMP that include addressing overfishing occurring on thorny skate as well as a discussion of establishing a control date for the wing fishery. Address other business as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 23, 2013.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: The North Pacific Fishery Management Council (NPFMC) will hold a Crab Modeling Workshop.

SUMMARY: The workshop will be held January 14–17 at the Hilton Hotel, 500 West Third Avenue, Katmai/King Salmon, Anchorage, AK.

DATES: The workshop will be held January 14–17, 2014, from 9 a.m. to 5 p.m.

ADDRESSES: The workshop will be held at the Anchorage Hilton Hotel, 500 West Third Avenue, Anchorage, AK.

Council address: North Pacific Fishery Management Council, 605 W. 4th Avenue, Suite 306, Anchorage, AK 99501–2252.

FOR FURTHER INFORMATION CONTACT: Diana Stram, NPFMC; telephone: (907) 271–2809.

SUPPLEMENTARY INFORMATION: The agenda includes:

Application of a generic crab modeling framework to two BSAI crab stocks: Bristol Bay red king crab and Norton Sound red king crab.

The Agenda is subject to change, and the latest version will be posted at *http://www.alaskafisheries.noaa.gov/npfmc/*

Although non-emergency issues not contained in this agenda may come before this group for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), those issues may not be the subject of formal action during these meetings. Actions will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Gail Bendixen at (907) 271–2809 at least 7 working days prior to the meeting date.

SUPPLEMENTARY INFORMATION: The items for discussion on the meeting agenda are as follows:

1. Economic Evaluation of Alternative Red Snapper Allocations: Updated Analyses
2. Economic Effects of Reallocation in Amendment 28
3. Social Effects of Reallocation in Amendment 28
4. Recommendations to the Council
5. Other Business

For meeting materials call (813) 348–1630.

Although other non-emergency issues not on the agenda may come before the Scientific and Statistical Committees for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act, those issues may not be the subject of formal action during this meeting. Actions of the Socioeconomic Scientific and Statistical Committee will be restricted to those issues specifically identified in the agenda and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kathy Pereira at the Council Office (see **ADDRESSES**), at least 5 working days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 23, 2013.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

RIN 0648–XC784

Takes of Marine Mammals Incidental to Specified Activities; Rockaway Delivery Lateral Project off New York, January 2013 through January 2014

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; proposed Incidental Harassment Authorization; request for comments.

SUMMARY: We have received an application from Transcontinental Gas Pipe Line Company, LLC (Transco) for an Incidental Harassment Authorization to take marine mammals, by harassment, incidental to expanding a natural gas pipeline system off the coast of New York from April 2014 through August 2014. Per the Marine Mammal Protection Act, we are requesting comments on our proposal to issue an Incidental Harassment Authorization to Transco to incidentally harass by Level B harassment only, seven species of marine mammals during pile driving and removal operations.

DATES: Comments and information must be received no later than January 27, 2014.

ADDRESSES: Comments on the application should be addressed to P. Michael Payne, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910–3225. The mailbox address for providing email comments is *ITP.Magliocca@noaa.gov*. Please include 0648–XC784 in the subject line. We are not responsible for email comments sent to other addresses other than the one provided here. Comments sent via email to *ITP.Magliocca@noaa.gov,* including all attachments, must not exceed a 10-megabyte file size.

All submitted comments are a part of the public record and we will post to *http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications* without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

To obtain an electronic copy of the application, write to the previously mentioned address, telephone the contact listed here (see **FOR FURTHER INFORMATION CONTACT**), or visit the Internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications*.

The public can view documents cited in this notice by appointment, during regular business hours, at the aforementioned address.

FOR FURTHER INFORMATION CONTACT: Michelle Magliocca, National Marine Fisheries Service, Office of Protected Resources, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) directs the Secretary of Commerce to authorize, upon request, the incidental, but not intentional, taking of small numbers of marine mammals of a species or population stock, by United States citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if, after notice of a proposed authorization to the public for review and public comment: (1) we make certain findings; and (2) the taking is limited to harassment.

We shall grant authorization for the incidental taking of small numbers of marine mammals if we find that the taking will have a negligible impact on the species or stock(s), and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant). The authorization must set forth the permissible methods of taking; other means of effecting the least practicable adverse impact on the species or stock and its habitat (i.e., mitigation); and requirements pertaining to the monitoring and reporting of such taking. We have defined "negligible impact" in 50 CFR 216.103 as " an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival."

Section 101(a)(5)(D) of the MMPA establishes a 45-day time limit for our review of an application followed by a 30-day public notice and comment period on any proposed authorizations for the incidental harassment of small numbers of marine mammals. Within 45 days of the close of the public comment period, we must either issue or deny the authorization and must publish a notice in the **Federal Register** within 30 days of our determination to issue or deny the authorization.

Except with respect to certain activities not pertinent here, the MMPA defines "harassment" as: any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].

Summary of Request

We received an application from Transco on March 21, 2013, requesting that we issue an Incidental Harassment Authorization (Authorization) for the take, by Level B harassment only, of small numbers of marine mammals incidental to the Rockaway delivery lateral project (Project) off the coast of New York from April 2014 August May 2014. We received a revised application from Transco on May 13, 2013, which reflected updates to the proposed mitigation measures, proposed monitoring measures, and incidental take requests for marine mammals. Upon receipt of additional information, we determined the application complete and adequate on May 21, 2013. Further revisions were made to the request in October 2013 due to a change in the project schedule and the application was considered complete and adequate on November 9, 2013.

Transco proposes to expand its pipeline system to meet immediate and future demand for natural gas in the New York City market area. This project would provide an additional delivery point to National Grid's (an international electricity and gas company) local distribution companies, giving National Grid the flexibility to redirect supplies during peak demand periods. The in-water portion of the project, which would require pile driving, may result in the incidental taking of seven species of marine mammals by behavioral harassment.

Description of the Proposed Specified Activities

The specific Project activity would be to install a sub-sea natural gas pipeline extending from the existing Lower New York Bay Lateral in the Atlantic Ocean to an onshore delivery point on the Rockaway Peninsula. The work would include the following:

- Horizontal directional drilling
  - Beginning onshore and exiting offshore
  - Includes excavation of the horizontal directional drilling exit pit and pile driving activities
- Offshore construction and support vessels
  - Various vessels would be used throughout the in-water work
- Sub-sea dual hot-tap installation of the existing Lower New York Bay Lateral
  - Includes use of diver-controlled hand-jetting to clear sediment around the existing pipeline
- Offshore pipeline construction
  - Includes offshore pipe laying and subsea jet-sled trenching
- Anode bed installation and cable crossing
  - Includes use of divers and hand-jetting to clear sediment around the locations of the anode bed and existing power cable crossing
- Hydrostatic test water withdrawal and discharge
  - Would occur four times during the course of in-water construction.
  - Post-installation and final (as-built) hydrographic survey
  - Includes the use of a multibeam echo sounder and high resolution side scan sonar
  - Subsea trench and HDD exit pit backfill
  - Includes the use of a small-scale crane-supported suction dredge for the trench
  - Includes the use of diver-controlled hand jetting and/or clamshell dredge for the HDD exit pit

- Operation and maintenance

Only the pile driving activities associated with horizontal directional drilling offshore construction are expected to result in the take of marine mammals by Level B harassment. Other aspects of the project are discussed in more detail in Transco's IHA application (*http://www.nmfs.noaa.gov/pr/permits/incidental.htm/#applications*). No vessels would use dynamic positioning (a system to maintain position and heading), and only two vessels—a crew boat and escort boat—would make daily trips to the Project area from shore. Elevated sound levels that would result in harassment are not expected from the clamshell dredge because the dredge would be anchored and dynamic positioning would not be used. Dredging and trenching may result in a temporary, localized increase in turbidity, but are not expected to rise to the level of harassment. A complete description of all in-water Project activities is provided in Transco's application (*http://www.nmfs.noaa.gov/pr/permits/incidental.htm/#applications*).

Vibratory Hammer Installation and Removal

Vibratory hammers are commonly used in steel pile installation and removal when the sediment conditions allow for this method. Transco will likely use the MKT V 52 model of vibratory hammer for the Project. The vibratory hammer is considered a continuous sound source because it continuously drives the pile into the substrate until the desired depth is reached. Transco would use a vibratory hammer to install about 70 piles (5 sets of temporary goal posts and up to 60 temporary fender piles). All piles would be 14- to 16-inch diameter steel pipe piles. Two vibratory hammers would be on site, but only one hammer would be used at a time. Each pile should take about 1 to 2 seconds to install per foot of depth driven, with each pile driven to a depth of about 25 to 30 feet below the seafloor. Therefore, each pile would take up to 60 seconds of continuous pile driving to install. All piles should be installed during a 1-week period, with less than 12 hours of pile driving operation. The goal posts and fenders would remain in the offshore environment for the duration of the horizontal directional drilling portion of construction (3 to 4 months). Extraction of all piles at the end of the construction period should take about as long as installation.

Location of the Specified Activity

The Project would be located mostly in nearshore waters (within approximately 3 miles of the Atlantic Ocean), southeast of the Rockaway Peninsula in Queens County, New York. A linear segment of underwater land measuring approximately 2.15 miles would be required for offshore pipe lay and trenching activities from the interconnect with Transco's pipeline to the proposed horizontal directional drilling exit point in the nearshore area, seaward of Jacob Riis Park (see Figure 1 of Transco's application). The Project area is located within the greater New York Bight region, with construction occurring within approximately 2.86 miles from the Jacob Riis Park shoreline. Vessels associated with the Project would travel between the pipe yard in Elizabeth, New Jersey, to the offshore construction site. The greater Project area, therefore, is described as the waters between the pipe yard and construction site and the waters offshore of Jacob Riis Park where construction would occur. However, pile driving activities would only take place around the horizontal directional drilling exit point in the nearshore area. All work would occur in water depths between 25 and 50 feet.

Duration of the Specified Activity

Transco initially proposed to construct the Rockaway Delivery Lateral during the winter and early spring of 2014 (January through May), with actual pile installation and removal occurring approximately 10 percent of the time. However, the construction window will likely be shifted back; pile driving activities would begin in April and should be completed in August. Total installation time for all piles is expected total less than 1 day of operation and would occur during a 1-week period. Total operating time for the extraction of all piles at the end of the construction period is expected to take a similar amount of time (1 day total over a 1-week period).

Metrics Used in This Document

This section includes a brief explanation of the sound measurements frequently used in the discussions of acoustic effects in this document. Sound pressure is the sound force per unit area, and is usually measured in micropascals (μPa), where 1 pascal (Pa) is the pressure resulting from a force of one newton exerted over an area of one square meter. We express sound pressure level as the ratio of a measured sound pressure and a reference level. The commonly used reference pressure level in underwater acoustics is 1 μPa, and the units for sound pressure levels are dB re: 1 μPa. Sound pressure level (in decibels (dB)) = 20 log (pressure/reference pressure)

Sound pressure level is an instantaneous measurement and can be expressed as the peak, the peak-peak (p-p), or the root mean square. Root mean square, which is the square root of the arithmetic average of the squared instantaneous pressure values, is typically used in discussions of the effects of sounds on vertebrates and all references to sound pressure level in this document refer to the root mean square unless otherwise noted. Sound pressure level does not take the duration of a sound into account.

Predicted Sound Levels From Vibratory Pile Driving

No source levels were available for 14- to 16-inch diameter steel pipe piles at water depths of approximately 33 feet. The most applicable source levels available are for 12-inch diameter steel pipe piles in water depths of approximately 16 feet. In-water measurements for the Mad River Slough Project in Arcata, California, indicate that installation of a 12-inch steel pipe pile in about 16 feet of water measured 10 meters from the source generated 155 dB re 1 uPa RMS. To account for the increased diameter of the piles planned for use during the Project, a change in water depth, and a different location than where the reference levels were recorded, Transco increased the source levels from the Mad River Slough Project by 5 dB. The 5 dB increase was chosen due to an overall lack of current information available for reference levels of steel pipe piles of a similar size being driven with a vibratory hammer in similar water depths. Transco expects that this increase overestimates the actual source level from the vibratory hammer.

Transco applied the practical spreading loss model to determine the approximate distance from the sound source to our acoustic threshold for marine mammal harassment. The practical spreading loss model accounts for a 4.5 dB loss per doubling of distance to determine how sound travels away from a source. The calculated distances to our current acoustic threshold criteria for harassment are shown in Table 1 below. Sound levels from vibratory pile driving would not reach the Level A harassment threshold of 180/190 dB (cetaceans/pinnipeds). However, Transco expects that sound levels within the Level B harassment threshold could occur out to 3 miles from the source (assuming no external

impedances or masking by background noise). Transco and NMFS believe that this estimate represents the worst-case scenario and that the actual distance to the Level B harassment threshold may be shorter.

TABLE 1—CALCULATED DISTANCES TO NMFS' ACOUSTIC THRESHOLD CRITERIA

Activity type	Distance to Level B harassment threshold (120 dB)	Distance to Level A harassment threshold (180/190 dB)
Vibratory pile driving (14- to 16-inch steel pipe piles)	4,600 meters	N/A

Description of Marine Mammals in the Area of the Proposed Specified Activity

Thirteen marine mammal species under our jurisdiction may occur in the proposed Project area, including four mysticetes (baleen whales), six odontocetes (toothed cetaceans), and three pinnipeds (seals). Three of these species are listed as endangered under the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*), including: the humpback (*Megaptera novaeangliae*), fin (*Balaenoptera physalus*), and north Atlantic right (*Eubalaena glacialis*) whales.

However, based on occurrence information, stranding records, and seasonal distribution, it is unlikely that humpback whales, fin whales, minke whales, Atlantic white-sided dolphins, short-finned pilot whales, or long-finned pilot whales would be present in the Project area during the winter in-water construction period. Each of these species is discussed in detail in section 3 of Transco's IHA application (*http://www.nmfs.noaa.gov/pr/permits/incidental.htm/#applications*). In summary, humpback whales are typically found in other regions of the east coast and there have been no reported observations within the vicinity of the Project area in recent years; fin whales prefer deeper offshore waters and there have been no reported observations within the vicinity of the Project area in recent years; minke whales are prevalent in other regions there have been no reported observations within the vicinity of the Project area in recent years; Atlantic white-sided dolphins generally occur in areas east and north of the Project area; and short-finned and long-finned pilot whales prefer deeper pelagic waters. Accordingly, we did not consider these species in greater detail and the proposed authorization only addresses requested take authorizations for seven species.

Table 2 presents information on the abundance, distribution, and conservation status of the marine mammals that may occur in the proposed survey area during January through August.

TABLE 2—ABUNDANCE ESTIMATES, MEAN DENSITY, AND ESA STATUS OF MARINE MAMMALS THAT MAY OCCUR IN THE PROPOSED PROJECT AREA DURING JANUARY THROUGH AUGUST

Common Name	Scientific Name	Stock	Abundance Estimate	ESA[a]	Time of Year Expected in Region
Mysticetes					
North Atlantic right whale.	*Eubalaena glacialis*	N/A	444	EN	Nov–April
Odontocetes					
Harbor porpoise	*Phocoena phocoena*	Gulf of Maine/Bay of Fundy.	89,054		Jan–March
Bottlenose dolphin	*Tursiops truncatus*	Western North Atlantic Northern Migratory.	7,147		July–Sept
Short-beaked common dolphin.	*Delphinus delphis*	Western North Atlantic	52,893		Jan–May
Pinnipeds					
Gray seal	*Halichoerus grypus*	Western North Atlantic	348,900		Sept–May
Harbor seal	*Phoca vitulina*	Western North Atlantic	99,340		Sept–May
Harp seal	*Phoca groenlandica*	Western North Atlantic	8.3 million		Jan–May

[a] ESA status codes: EN—Endangered

Refer to section 3 of Transco's application for detailed information regarding the abundance and distribution, population status, and life history and behavior of these species and their occurrence in the proposed Project area. We have reviewed these data and determined them to be the best available scientific information for the purposes of the proposed incidental harassment authorization. Further information may also be presented in NMFS' Stock Assessment Reports: *http://www.nmfs.noaa.gov/pr/sars/species.htm#largewhales*.

Potential Effects on Marine Mammals

Transco's proposed Project (i.e., pile driving and removal) would introduce elevated levels of sound into the marine environment and have the potential to adversely impact marine mammals. The potential effects of sound from the proposed activities may include one or more of the following: tolerance; masking of natural sounds; behavioral disturbance; non-auditory physical effects; and temporary or permanent hearing impairment (Richardson *et al.*, 1995). However, for reasons discussed later in this document, it is unlikely that there would be any cases of temporary or permanent hearing impairment resulting from these activities. As outlined in previous NMFS documents, the effects of sound on marine mammals

are highly variable, and can be categorized as follows (based on Richardson *et al.*, 1995):

1. The sound may be too weak to be heard at the location of the animal (i.e., lower than the prevailing ambient sound level, the hearing threshold of the animal at relevant frequencies, or both);

2. The sound may be audible but not strong enough to elicit any overt behavioral response;

3. The sound may elicit reactions of varying degrees and variable relevance to the well-being of the marine mammal; these can range from temporary alert responses to active avoidance reactions such as vacating an area until the stimulus ceases, but potentially for longer periods of time;

4. Upon repeated exposure, a marine mammal may exhibit diminishing responsiveness (habituation), or disturbance effects may persist; the latter is most likely with sounds that are highly variable in characteristics and unpredictable in occurrence, and associated with situations that a marine mammal perceives as a threat;

5. Any anthropogenic sound that is strong enough to be heard has the potential to result in masking, or reduce the ability of a marine mammal to hear biological sounds at similar frequencies, including calls from conspecifics and underwater environmental sounds such as surf sound;

6. If mammals remain in an area because it is important for feeding, breeding, or some other biologically important purpose even though there is chronic exposure to sound, it is possible that there could be sound-induced physiological stress; this might in turn have negative effects on the well-being or reproduction of the animals involved; and

7. Very strong sounds have the potential to cause a temporary or permanent reduction in hearing sensitivity, also referred to as threshold shift. In terrestrial mammals, and presumably marine mammals, received sound levels must far exceed the animal's hearing threshold for there to be any temporary threshold shift (TTS). For transient sounds, the sound level necessary to cause TTS is inversely related to the duration of the sound. Received sound levels must be even higher for there to be risk of permanent hearing impairment (PTS). In addition, intense acoustic or explosive events may cause trauma to tissues associated with organs vital for hearing, sound production, respiration and other functions. This trauma may include minor to severe hemorrhage.

Tolerance

Numerous studies have shown that underwater sounds from industrial activities are often readily detectable by marine mammals in the water at distances of many kilometers. However, other studies have shown that marine mammals at distances more than a few kilometers away often show no apparent response to industrial activities of various types (Miller *et al.*, 2005). This is often true even in cases when the sounds must be readily audible to the animals based on measured received levels and the hearing sensitivity of that mammal group. Although various baleen whales, toothed whales, and (less frequently) pinnipeds have been shown to react behaviorally to underwater sound from sources such as airgun pulses or vessels under some conditions, at other times, mammals of all three types have shown no overt reactions (e.g., Malme *et al.*, 1986; Richardson *et al.*, 1995; Madsen and Mohl, 2000; Croll *et al.*, 2001; Jacobs and Terhune, 2002; Madsen *et al.*, 2002; Miller *et al.*, 2005). In general, pinnipeds seem to be more tolerant of exposure to some types of underwater sound than are baleen whales. Richardson *et al.* (1995) found that vessel sound does not seem to strongly affect pinnipeds that are already in the water. Richardson *et al.* (1995) went on to explain that seals on haul-outs sometimes respond strongly to the presence of vessels and at other times appear to show considerable tolerance of vessels, and Brueggeman *et al.* (1992) observed ringed seals (*Pusa hispida*) hauled out on ice pans displaying short-term escape reactions when a ship approached within 0.16–0.31 mi (0.25–0.5 km).

Masking

Masking is the obscuring of sounds of interest to an animal by other sounds, typically at similar frequencies. Marine mammals are highly dependent on sound, and their ability to recognize sound signals amid other sound is important in communication and detection of both predators and prey. Background ambient sound may interfere with or mask the ability of an animal to detect a sound signal even when that signal is above its absolute hearing threshold. Even in the absence of anthropogenic sound, the marine environment is often loud. Natural ambient sound includes contributions from wind, waves, precipitation, other animals, and (at frequencies above 30 kHz) thermal sound resulting from molecular agitation (Richardson *et al.*, 1995).

Background sound may also include anthropogenic sound, and masking of natural sounds can result when human activities produce high levels of background sound. Conversely, if the background level of underwater sound is high (e.g., on a day with strong wind and high waves), an anthropogenic sound source would not be detectable as far away as would be possible under quieter conditions and would itself be masked. Ambient sound is highly variable on continental shelves (Thompson, 1965; Myrberg, 1978; Chapman *et al.*, 1998; Desharnais *et al.*, 1999). This results in a high degree of variability in the range at which marine mammals can detect anthropogenic sounds.

Although masking is a phenomenon which may occur naturally, the introduction of loud anthropogenic sounds into the marine environment at frequencies important to marine mammals increases the severity and frequency of occurrence of masking. For example, if a baleen whale is exposed to continuous low-frequency sound from an industrial source, this would reduce the size of the area around that whale within which it can hear the calls of another whale. The components of background noise that are similar in frequency to the signal in question primarily determine the degree of masking of that signal. In general, little is known about the degree to which marine mammals rely upon detection of sounds from conspecifics, predators, prey, or other natural sources. In the absence of specific information about the importance of detecting these natural sounds, it is not possible to predict the impact of masking on marine mammals (Richardson *et al.*, 1995). In general, masking effects are expected to be less severe when sounds are transient than when they are continuous. Masking is typically of greater concern for those marine mammals that utilize low-frequency communications, such as baleen whales and, as such, is not likely to occur for pinnipeds or small odontocetes in the Project area.

Disturbance

Behavioral disturbance is one of the primary potential impacts of anthropogenic sound on marine mammals. Disturbance can result in a variety of effects, such as subtle or dramatic changes in behavior or displacement, but the degree to which disturbance causes such effects may be highly dependent upon the context in which the stimulus occurs. For example, an animal that is feeding may be less prone to disturbance from a given stimulus than one that is not. For

many species and situations, there is no detailed information about reactions to sound.

Behavioral reactions of marine mammals to sound are difficult to predict because they are dependent on numerous factors, including species, maturity, experience, activity, reproductive state, time of day, and weather. If a marine mammal does react to an underwater sound by changing its behavior or moving a small distance, the impacts of that change may not be important to the individual, the stock, or the species as a whole. However, if a sound source displaces marine mammals from an important feeding or breeding area for a prolonged period, impacts on the animals could be important. In general, pinnipeds seem more tolerant of, or at least habituate more quickly to, potentially disturbing underwater sound than do cetaceans, and generally seem to be less responsive to exposure to industrial sound than most cetaceans. Pinniped responses to underwater sound from some types of industrial activities such as seismic exploration appear to be temporary and localized (Harris *et al.*, 2001; Reiser *et al.*, 2009).

Because the few available studies show wide variation in response to underwater and airborne sound, it is difficult to quantify exactly how pile driving sound would affect marine mammals in the area. The literature shows that elevated underwater sound levels could prompt a range of effects, including no obvious visible response, or behavioral responses that may include annoyance and increased alertness, visual orientation towards the sound, investigation of the sound, change in movement pattern or direction, habituation, alteration of feeding and social interaction, or temporary or permanent avoidance of the area affected by sound. Minor behavioral responses do not necessarily cause long-term effects to the individuals involved. Severe responses include panic, immediate movement away from the sound, and stampeding, which could potentially lead to injury or mortality (Southall *et al.*, 2007).

Southall *et al.* (2007) reviewed literature describing responses of pinnipeds to non-pulsed sound in water and reported that the limited data suggest exposures between approximately 90 and 140 dB generally do not appear to induce strong behavioral responses in pinnipeds, while higher levels of pulsed sound, ranging between 150 and 180 dB, will prompt avoidance of an area. It is important to note that among these studies, there are some apparent differences in responses between field and laboratory conditions. In contrast to the mid-frequency odontocetes, captive pinnipeds responded more strongly at lower levels than did animals in the field. Again, contextual issues are the likely cause of this difference. For airborne sound, Southall *et al.* (2007) note there are extremely limited data suggesting very minor, if any, observable behavioral responses by pinnipeds exposed to airborne pulses of 60 to 80 dB; however, given the paucity of data on the subject, we cannot rule out the possibility that avoidance of sound in the Project area could occur.

In their comprehensive review of available literature, Southall *et al.* (2007) noted that quantitative studies on behavioral reactions of pinnipeds to underwater sound are rare. A subset of only three studies observed the response of pinnipeds to multiple pulses of underwater sound (a category of sound types that includes impact pile driving), and were also deemed by the authors as having results that are both measurable and representative. Blackwell *et al.* (2004) is the only cited study directly related to pile driving. The study observed ringed seals during impact installation of steel pipe pile. Received underwater SPLs were measured at 151 dB at 63 m. The seals exhibited either no response or only brief orientation response (defined as "investigation or visual orientation"). It should be noted that the observations were made after pile driving was already in progress. Therefore, it is possible that the low-level response was due to prior habituation. During a Caltrans installation demonstration project for retrofit work on the East Span of the San Francisco Oakland Bay Bridge, California, sea lions responded to pile driving by swimming rapidly out of the area, regardless of the size of the pile-driving hammer or the presence of sound attenuation devices (74 FR 63724).

Several available studies provide information on the reactions of pinnipeds to non-pulsed underwater sound. Kastelein *et al.* (2006) exposed nine captive harbor seals in an approximately 82 × 98 ft (25 × 30 m) enclosure to non-pulse sounds used in underwater data communication systems (similar to acoustic modems). Test signals were frequency modulated tones, sweeps, and bands of sound with fundamental frequencies between 8 and 16 kHz; 128 to 130 ±3 dB source levels; 1- to 2-s duration (60–80 percent duty cycle); or 100 percent duty cycle. They recorded seal positions and the mean number of individual surfacing behaviors during control periods (no exposure), before exposure, and in 15-min experimental sessions (n = 7 exposures for each sound type). Seals generally swam away from each source at received levels of approximately 107 dB, avoiding it by approximately 16 ft (5 m), although they did not haul out of the water or change surfacing behavior. Seal reactions did not appear to wane over repeated exposure (i.e., there was no obvious habituation), and the colony of seals generally returned to baseline conditions following exposure. The seals were not reinforced with food for remaining in the sound field.

Reactions of harbor seals to the simulated sound of a 2-megawatt wind power generator were measured by Koschinski *et al.* (2003). Harbor seals surfaced significantly further away from the sound source when it was active and did not approach the sound source as closely. The device used in that study produced sounds in the frequency range of 30 to 800 Hz, with peak source levels of 128 dB at 1 m at the 80- and 160-Hz frequencies.

Ship and boat sound do not seem to have strong effects on seals in the water, but the data are limited. When in the water, seals appear to be much less apprehensive about approaching vessels. Some would approach a vessel out of apparent curiosity, including noisy vessels such as those operating seismic airgun arrays (Moulton and Lawson, 2002). Gray seals (*Halichoerus grypus*) have been known to approach and follow fishing vessels in an effort to steal catch or the bait from traps. In contrast, seals hauled out on land often are quite responsive to nearby vessels. Terhune (1985) reported that northwest Atlantic harbor seals were extremely vigilant when hauled out and were wary of approaching (but less so passing) boats. Suryan and Harvey (1999) reported that Pacific harbor seals commonly left the shore when powerboat operators approached to observe the seals. Those seals detected a powerboat at a mean distance of 866 ft (264 m), and seals left the haul-out site when boats approached to within 472 ft (144 m).

The studies that address responses of high-frequency cetaceans (such as the harbor porpoise) to non-pulse sounds include data gathered both in the field and the laboratory and related to several different sound sources (of varying similarity to chirps), including: pingers, AHDs, and various laboratory non-pulse sounds. All of these data were collected from harbor porpoises. Southall *et al.* (2007) concluded that the existing data indicate that harbor porpoises are likely sensitive to a wide range of anthropogenic sounds at low received

levels (around 90 to 120 dB), at least for initial exposures. All recorded exposures above 140 dB induced profound and sustained avoidance behavior in wild harbor porpoises (Southall *et al.*, 2007). Rapid habituation was noted in some but not all studies.

Southall *et al.* (2007) also compiled known studies of behavioral responses of marine mammals to airborne sound, noting that studies of pinniped response to airborne pulsed sounds are exceedingly rare. The authors deemed only one study as having quantifiable results. Blackwell *et al.* (2004) studied the response of ringed seals within 500 m of impact driving of steel pipe pile. Received levels of airborne sound were measured at 93 dB at a distance of 63 m. Seals had either no response or limited response to pile driving. Reactions were described as "indifferent" or "curious."

Marine mammals are expected to traverse through and not remain in the Project area. Therefore, animals are not expected to be exposed to a significant duration of construction sound.

Vessel Operations—Fifteen vessels would be used in association with the Project, including a dive support vessel, various barges, a crew boat, an escort boat, and six tug boats. Only the crew boat and the escort boat would make daily trips between shore and the offshore construction site and most vessels would remain stationary during construction activities. During pipe lay activities, the pipe transport barge would also be transported between the pipe yard and the offshore construction site about once or twice a day. Transco would abide by current vessel activity and speed restrictions in place to protect the north Atlantic right whale. Similar and much larger vessels already use the surrounding area in moderately high numbers; therefore, the vessels to be used in the Project area do not represent a new sound source, only a potential increase in the frequency and duration of these sound source types.

There are very few controlled tests or repeatable observations related to the reactions of marine mammals to vessel noise. However, Richardson *et al.* (1995) reviewed the literature on reactions of marine mammals to vessels, concluding overall that pinnipeds and many odontocetes showed high tolerance to vessel noise. Mysticetes, too, often show tolerance of slow, quieter vessels. Because the Project area is highly industrialized, it seems likely that marine mammals that transit the Project area are already habituated to vessel noise, thus the additional vessels that would occur as a result of construction activities would likely not have an additional effect on these animals. Proposed vessel noise and operations in the Project area are unlikely to rise to the level of harassment.

Physical Disturbance—Vessels and in-water structures have the potential to cause physical disturbance to marine mammals. As previously mentioned, various types of vessels already use the Project area in high numbers. Tug boats and barges are slow moving and follow a predictable course. Marine mammals would be able to easily avoid these vessels while transiting through the Project area and are likely already habituated to the presence of numerous vessels. Therefore, vessel strikes are extremely unlikely and, thus, discountable. Potential encounters would likely be limited to brief, sporadic behavioral disturbance, if any at all. Such disturbances are not likely to result in a risk of Level B harassment of marine mammals transiting the Project area.

Hearing Impairment and Other Physiological Effects

Temporary or permanent hearing impairment is a possibility when marine mammals are exposed to very strong sounds. Non-auditory physiological effects might also occur in marine mammals exposed to strong underwater sound. Possible types of non-auditory physiological effects or injuries that may occur in mammals close to a strong sound source include stress, neurological effects, bubble formation, and other types of organ or tissue damage. It is possible that some marine mammal species (i.e., beaked whales) may be especially susceptible to injury and/or stranding when exposed to strong pulsed sounds, particularly at higher frequencies. Non-auditory physiological effects are not anticipated to occur as a result of proposed construction activities. The following subsections discuss the possibilities of temporary threshold shift (TTS) and permanent threshold shift (PTS).

TTS—TTS, reversible hearing loss caused by fatigue of hair cells and supporting structures in the inner ear, is the mildest form of hearing impairment that can occur during exposure to a strong sound (Kryter, 1985). While experiencing TTS, the hearing threshold rises and a sound must be stronger in order to be heard. TTS can last from minutes or hours to (in cases of strong TTS) days. For sound exposures at or somewhat above the TTS threshold, hearing sensitivity in both terrestrial and marine mammals recovers rapidly after exposure to the sound ends.

Marine mammal hearing plays a critical role in communication with conspecifics and in interpretation of environmental cues for purposes such as predator avoidance and prey capture. Depending on the degree (elevation of threshold in dB), duration (i.e., recovery time), and frequency range of TTS and the context in which it is experienced, TTS can have effects on marine mammals ranging from discountable to serious. For example, a marine mammal may be able to readily compensate for a brief, relatively small amount of TTS in a non-critical frequency range that takes place during a time when the animal is traveling through the open ocean, where ambient noise is lower and there are not as many competing sounds present. Alternatively, a larger amount and longer duration of TTS sustained during a time when communication is critical for successful mother/calf interactions could have more serious impacts if it were in the same frequency band as the necessary vocalizations and of a severity that it impeded communication. The fact that animals exposed to levels and durations of sound that would be expected to result in this physiological response would also be expected to have behavioral responses of a comparatively more severe or sustained nature is also notable and potentially of more importance than the simple existence of a TTS. NMFS considers TTS to be a form of Level B harassment, as it consists of fatigue to auditory structures rather than damage to them. Few data on sound levels and durations necessary to elicit mild TTS have been obtained for marine mammals, and none of the published data concern TTS elicited by exposure to multiple pulses of sound.

Human non-impulsive sound exposure guidelines are based on exposures of equal energy (the same sound exposure level [SEL]; SEL is reported here in dB re: 1 μPa^2-s/re: 20 μPa^2-s for in-water and in-air sound, respectively) producing equal amounts of hearing impairment regardless of how the sound energy is distributed in time (NIOSH, 1998). Until recently, previous marine mammal TTS studies have also generally supported this equal energy relationship (Southall *et al.*, 2007). Three newer studies, two by Mooney *et al.* (2009a, b) on a single bottlenose dolphin (*Tursiops truncatus*) either exposed to playbacks of U.S. Navy mid-frequency active sonar or octave-band sound (4–8 kHz) and one by Kastak *et al.* (2007) on a single California sea lion exposed to airborne octave-band sound (centered at 2.5 kHz), concluded that for all sound exposure situations, the equal

energy relationship may not be the best indicator to predict TTS onset levels. Generally, with sound exposures of equal energy, those that were quieter (lower SPL) with longer duration were found to induce TTS onset more than those of louder (higher SPL) and shorter duration. Given the available data, the received level of a single seismic pulse (with no frequency weighting) might need to be approximately 186 dB SEL in order to produce brief, mild TTS.

In free-ranging pinnipeds, TTS thresholds associated with exposure to brief pulses (single or multiple) of underwater sound have not been measured. However, systematic TTS studies on captive pinnipeds have been conducted (e.g., Bowles *et al.*, 1999; Kastak *et al.*, 1999, 2005, 2007; Schusterman *et al.*, 2000; Finneran *et al.*, 2003; Southall *et al.*, 2007). Finneran *et al.* (2003) studied responses of two individual California sea lions. The sea lions were exposed to single pulses of underwater sound, and experienced no detectable TTS at received sound level of 183 dB peak (163 dB SEL). There were three studies conducted on pinniped TTS responses to non-pulsed underwater sound. All of these studies were performed in the same lab and on the same test subjects, and, therefore, the results may not be applicable to all pinnipeds or in field settings. Kastak and Schusterman (1996) studied the response of harbor seals to non-pulsed construction sound, reporting TTS of about 8 dB. The seal was exposed to broadband construction sound for 6 days, averaging 6 to 7 hours of intermittent exposure per day, with SPLs from just approximately 90 to 105 dB.

Kastak *et al.* (1999) reported TTS of approximately 4–5 dB in three species of pinnipeds (harbor seal, California sea lion, and northern elephant seal) after underwater exposure for approximately 20 minutes to sound with frequencies ranging from 100–2,000 Hz at received levels 60–75 dB above hearing threshold. This approach allowed similar effective exposure conditions to each of the subjects, but resulted in variable absolute exposure values depending on subject and test frequency. Recovery to near baseline levels was reported within 24 hours of sound exposure. Kastak *et al.* (2005) followed up on their previous work, exposing the same test subjects to higher levels of sound for longer durations. The animals were exposed to octave-band sound for up to 50 minutes of net exposure. The study reported that the harbor seal experienced TTS of 6 dB after a 25-minute exposure to 2.5 kHz of octave-band sound at 152 dB (183 dB SEL). The California sea lion demonstrated onset of TTS after exposure to 174 dB and 206 dB SEL.

Southall *et al.* (2007) reported one study on TTS in pinnipeds resulting from airborne pulsed sound, while two studies examined TTS in pinnipeds resulting from airborne non-pulsed sound. Bowles *et al.* (unpubl. data) exposed pinnipeds to simulated sonic booms. Harbor seals demonstrated TTS at 143 dB peak and 129 dB SEL. California sea lions and northern elephant seals experienced TTS at higher exposure levels than the harbor seals. Kastak *et al.* (2004) used the same test subjects as in Kastak *et al.* 2005, exposing the animals to non-pulsed sound (2.5 kHz octave-band sound) for 25 minutes. The harbor seal demonstrated 6 dB of TTS after exposure to 99 dB (131 dB SEL). The California sea lion demonstrated onset of TTS at 122 dB and 154 dB SEL. Kastak *et al.* (2007) studied the same California sea lion as in Kastak *et al.* 2004 above, exposing this individual to 192 exposures of 2.5 kHz octave-band sound at levels ranging from 94 to 133 dB for 1.5 to 50 min of net exposure duration. The test subject experienced up to 30 dB of TTS. TTS onset occurred at 159 dB SEL. Recovery times ranged from several minutes to 3 days.

Additional studies highlight the inherent complexity of predicting TTS onset in marine mammals, as well as the importance of considering exposure duration when assessing potential impacts (Mooney *et al.*, 2009a, 2009b; Kastak *et al.*, 2007). Generally, with sound exposures of equal energy, quieter sounds (lower SPL) of longer duration were found to induce TTS onset more than louder sounds (higher SPL) of shorter duration (more similar to subbottom profilers). For intermittent sounds, less threshold shift will occur than from a continuous exposure with the same energy (some recovery will occur between intermittent exposures) (Kryter *et al.*, 1966; Ward, 1997). For sound exposures at or somewhat above the TTS-onset threshold, hearing sensitivity recovers rapidly after exposure to the sound ends. Southall *et al.* (2007) considers a 6 dB TTS (that is, baseline thresholds are elevated by 6 dB) to be a sufficient definition of TTS-onset. NMFS considers TTS as Level B harassment that is mediated by physiological effects on the auditory system; however, NMFS does not consider TTS-onset to be the lowest level at which Level B harassment may occur. Southall *et al.* (2007) summarizes underwater pinniped data from Kastak *et al.* (2005), indicating that a tested harbor seal showed a TTS of around 6 dB when exposed to a nonpulse noise at sound pressure level 152 dB re: 1 µPa for 25 minutes. Some studies suggest that harbor porpoises may be more sensitive to sound than other odontocetes (Lucke *et al.*, 2009; Kastelein *et al.*, 2011). While TTS onset may occur in harbor porpoises at lower received levels (when compared to other odontocetes), NMFS' 160-dB and 120-dB threshold criteria are based on the onset of behavioral harassment, not the onset of TTS. The potential for TTS is considered within NMFS' analysis of potential impacts from Level B harassment.

Although underwater sound levels produced by the proposed project may exceed levels produced in studies that have induced TTS in marine mammals, there is a general lack of controlled, quantifiable field studies related to this phenomenon, and existing studies have had varied results (Southall *et al.*, 2007). Therefore, it is difficult to extrapolate from these data to site-specific conditions for the proposed project. For example, because most of the studies have been conducted in laboratories, rather than in field settings, the data are not conclusive as to whether elevated levels of sound would cause marine mammals to avoid the Region of Activity, thereby reducing the likelihood of TTS, or whether sound would attract marine mammals, increasing the likelihood of TTS. In any case, there are no universally accepted standards for the amount of exposure time likely to induce TTS. While it may be inferred that TTS could theoretically result from the proposed project, it is impossible to quantify the magnitude of exposure, the duration of the effect, or the number of individuals likely to be affected. Exposure is likely to be brief because marine mammals use the Region of Activity for transiting, rather than breeding or hauling out. In summary, it is expected that elevated sound would have only a slight probability of causing TTS in marine mammals.

PTS—When PTS occurs, there is physical damage to the sound receptors in the ear. In some cases, there can be total or partial deafness, whereas in other cases, the animal has an impaired ability to hear sounds in specific frequency ranges. There is no specific evidence that exposure to underwater industrial sounds can cause PTS in any marine mammal (see Southall *et al.*, 2007). However, given the possibility that marine mammals might incur TTS, there has been further speculation about the possibility that some individuals occurring very close to industrial activities might incur PTS. Richardson

et al. (1995) hypothesized that PTS caused by prolonged exposure to continuous anthropogenic sound is unlikely to occur in marine mammals, at least for sounds with source levels up to approximately 200 dB. Single or occasional occurrences of mild TTS are not indicative of permanent auditory damage in terrestrial mammals. Studies of relationships between TTS and PTS thresholds in marine mammals are limited; however, existing data appear to show similarity to those found for humans and other terrestrial mammals, for which there is a large body of data. PTS might occur at a received sound level at least several decibels above that inducing mild TTS.

Southall *et al.* (2007) propose that sound levels inducing 40 dB of TTS may result in onset of PTS in marine mammals. The authors present this threshold with precaution, as there are no specific studies to support it. Because direct studies on marine mammals are lacking, the authors base these recommendations on studies performed on other mammals. Additionally, the authors assume that multiple pulses of underwater sound result in the onset of PTS in pinnipeds when levels reach 218 dB peak or 186 dB SEL. In air, sound levels are assumed to cause PTS in pinnipeds at 149 dB peak or 144 dB SEL (Southall *et al.*, 2007). Sound levels this high are not expected to occur as a result of the proposed Project.

The potential effects to marine mammals described in this section of the document do not take into consideration the proposed monitoring and mitigation measures described later in this document (see the Proposed Mitigation and Proposed Monitoring and Reporting sections). It is highly unlikely that marine mammals would receive sounds strong enough (and over a sufficient duration) to cause PTS (or even TTS) during the proposed activities. When taking the mitigation measures proposed for inclusion in the regulations into consideration, it is highly unlikely that any type of hearing impairment would occur as a result of Transco's proposed activities.

Anticipated Effects on Marine Mammal Habitat

Pile driving activities may have temporary impacts on marine mammal habitat by producing temporary in-water acoustic disturbances. However, elevated in-water sound levels would only occur for less than 2 days of pile driving activity, spread out over an 8-week period. While it is anticipated that the specified activity may result in marine mammals avoiding certain areas due to temporary ensonification, this impact to habitat is temporary and reversible and was considered in further detail earlier in this document as behavioral modification. Furthermore, it is possible that marine mammals within the vicinity of the Project area may not be able to perceive noise from the vibratory pile driver due to the potentially louder background noise, which is likely to be dominated by loud low-frequency commercial vessel noise. There are no known pinniped haul-outs within the vicinity of the Project area and the closest known haul-out is about 10 miles away. There is also no designated critical habitat with the proposed Project area. Increased turbidity and changes in prey distribution may also result from pile driving activities, but are expected to be temporary and return to normal shortly after construction is complete. The proposed Project is not anticipated to have any permanent impact on habitats used by the marine mammals in the proposed Project area, including the food sources they use (i.e., fish and invertebrates).

Anticipated Effects on Fish

Fish are a primary dietary component of the marine mammals mentioned previously in this document. Similar to marine mammals, fish can also be affected by noise both physiologically and behaviorally. However, the amount of information regarding impacts on fish from human-generated acoustic sources is limited.

Behavioral disturbance of fish prey species could occur as a result of vibratory pile driving. Fish may avoid the Project area due to disturbing levels of sound during vibratory hammer operation; however, behavioral changes are expected to be temporary. Injury of fish prey species is not expected to occur during the proposed Project because Project-related noise would not exceed NMFS' threshold criteria for fish injury.

Proposed Mitigation

In order to issue an incidental take authorization under section 101(a)(5)(D) of the MMPA, we must set forth the permissible methods of taking pursuant to such activity, and other means of effecting the least practicable adverse impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and the availability of such species or stock for taking for certain subsistence uses.

To reduce the potential for disturbance from acoustic stimuli associated with the activities, Transco has proposed to implement the following mitigation measures for marine mammals:

(1) Vibratory pile driving only;

(2) Pile driving during daylight hours only;

(3) Shutdown procedures;

(4) Soft-start (ramp-up) procedures; and

(5) Discharge control.

Separately, Transco acknowledges the vessel activity and speed restrictions that are already in place along the east coast for the north Atlantic right whale. While the Seasonal Management Area is in effect (November-April), vessel operators would comply with the established regulations.

Vibratory Pile Driving Only

Transco proposes to use a vibratory hammer instead of an impact hammer for all pile driving activities in order to reduce in-water sound levels while installing and removing up to 70 temporary steel pipe piles. The sound source level for the vibratory hammer is less than the source level for an impact hammer, and by avoiding use of an impact hammer Transco removes the potential for Level A harassment of marine mammals.

Pile Driving During Daylight Hours Only

Pile driving installation and removal would only be conducted when lighting and weather conditions allow the protected species observers to visually monitor the entire Level B harassment area through the use of binoculars or other devices.

Soft-Start (Ramp-Up) Procedures

Transco would implement soft-start procedures at the beginning of each pile driving session. Contractors would initiate the vibratory hammer for 15 seconds at 40 to 60 percent reduced energy, followed by a 1-minute waiting period. This procedure would be repeated two additional times before reach full energy.

Shutdown Procedures

Protected species observers would monitor the entire Level B harassment area for marine mammals displaying abnormal behavior. Such behavior may include aggressive signals related to noise exposure (e.g., tail/flipper slapping or abrupt directed movement), avoidance of the sound source, or an obvious startle response (e.g., rapid change in swimming speed, erratic surface movements, or sudden diving associated with the onset of a sound source). At NMFS' recommendation, if a protected species observer sees any abnormal behavior, this information

will be related to the construction manager and the vibratory hammer would be shutdown until the animal has moved outside of the Level B harassment area.

Control of Discharge

All in-water construction activities would comply with federal regulations to control the discharge of operational waste such as bilge and ballast waters, trash and debris, and sanitary and domestic waste that could be generated from all vessels associated with the Project. All Project vessels would also comply with the U.S. Coast Guard requirements for the prevention and control of oil and fuel spills (see Transco's application for more detail).

NMFS has carefully evaluated the applicant's proposed mitigation measures and considered a range of other measures in the context of ensuring that NMFS prescribes the means of effecting the least practicable adverse impact on the affected marine mammal species and stocks and their habitat. Our evaluation of potential measures included consideration of the following factors in relation to one another:

- The manner in which, and the degree to which, the successful implementation of the measure is expected to minimize adverse impacts to marine mammals;
- The proven or likely efficacy of the specific measure to minimize adverse impacts as planned; and
- The practicability of the measure for applicant implementation.

Based on our evaluation of the applicant's proposed measures, as well as other measures considered by NMFS, NMFS has preliminarily determined that the proposed mitigation measures provide the means of effecting the least practicable adverse impact on marine mammal species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Proposed Monitoring and Reporting

In order to issue an incidental take authorization for an activity, section 101(a)(5)(D) of the MMPA states that we must set forth "requirements pertaining to the monitoring and reporting of such taking." The MMPA implementing regulations at 50 CFR 216.104 (a)(13) indicate that requests for an authorization must include the suggested means of accomplishing the necessary monitoring and reporting that would result in increased knowledge of the species and our expectations of the level of taking or impacts on populations of marine mammals present in the proposed action area.

Visual Monitoring

Two NMFS-approved protected species observers would survey the Level B harassment area (~3 miles) for marine mammals 30 minutes before, during, and 30 minutes after all vibratory pile driving activities. The observers would be stationed on an escort boat, located about 1.5 miles from the pile hammer. The escort boat would circle the pile hammer at a 1.5-mile distance so that the entire Level B harassment area could be surveyed. Information recorded during each observation within the Level B harassment area would be used to estimate numbers of animals potentially taken and would include the following:

- Numbers of individuals observed;
- Frequency of observation;
- Location within the Level B harassment area (i.e., distance from the sound source);
- Vibratory pile driving status (i.e., soft-start, active, post pile driving, etc.); and
- Reaction of the animal(s) to pile driving (if any) and observed behavior within the Level B harassment area, including bearing and direction of travel.

If the Level B harassment area is obscured by fog or poor lighting conditions, vibratory pile driving would be delayed until the area is visible. If the Level B harassment area becomes obscured by fog or poor lighting conditions while pile driving activities are occurring, pile driving would be shutdown until the area is visible again.

Proposed Reporting

Transco would provide NMFS with a draft monitoring report within 90 days of the conclusion of monitoring. This report would include the following:

- A summary of the activity and monitoring plan (i.e., dates, times, locations);
- A summary of mitigation implementation;
- Monitoring results and a summary that addresses the goals of the monitoring plan, including the following:
  - Environmental conditions when observations were made;
    - Water conditions (i.e., Beaufort sea-state, tidal state)
    - Weather conditions (i.e., percent cloud cover, visibility, percent glare)
  - Survey-specific data:
    - Date and time survey initiated and terminated;
  - Date, time, number, species, and any other relevant data regarding marine mammals observed (for pre-activity, during activity, and post-activity surveys);
  - Description of the observed behaviors (in both the presence and absence of activities):
    - If possible, the correlation to underwater sound level occurring at the time of any observable behavior
    - Estimated exposure/take numbers during activities
- An assessment of the implementation and effectiveness of prescribed mitigation and monitoring measures.

Transco would submit a final report within 30 days after receiving NMFS comments on the draft report. If NMFS has no comments, the draft report would be considered final.

In the unanticipated event that the specified activity clearly causes the take of a marine mammal in a manner not permitted by the authorization (if issued), such as an injury, serious injury, or mortality (e.g., ship-strike, gear interaction, and/or entanglement), Transco shall immediately cease the specified activities and immediately report the incident to the Incidental Take Program Supervisor, Permits and Conservation Division, Office of Protected Resources, NMFS, at 301–427–8401 and/or by email to *Jolie.Harrison@noaa.gov* and *Michelle.Magliocca@noaa.gov*. The report must include the following information:

- Time, date, and location (latitude/longitude) of the incident;
- Name and type of vessel involved;
- Vessel's speed during and leading up to the incident;
- Description of the incident;
- Status of all sound source use in the 24 hours preceding the incident;
- Water depth;
- Environmental conditions (e.g., wind speed and direction, Beaufort sea state, cloud cover, and visibility);
- Description of all marine mammal observations in the 24 hours preceding the incident;
- Species identification or description of the animal(s) involved;
- Fate of the animal(s); and
- Photographs or video footage of the animal(s) (if equipment is available).

Transco shall not resume its activities until we are able to review the circumstances of the prohibited take. We will work with Transco to determine what is necessary to minimize the likelihood of further prohibited take and ensure MMPA compliance. Transco may not resume their activities until notified by us via letter, email, or telephone.

In the event that Transco discovers an injured or dead marine mammal, and

the lead visual observer determines that the cause of the injury or death is unknown and the death is relatively recent (i.e., in less than a moderate state of decomposition as we describe in the next paragraph), Transco shall immediately report the incident to the Incidental Take Program Supervisor, Permits and Conservation Division, Office of Protected Resources, at 301–427–8401 and/or by email to *Jolie.Harrison@noaa.gov* and *Michelle.Magliocca@noaa.gov*. The report must include the same information identified in the paragraph above this section. Activities may continue while we review the circumstances of the incident. We would work with Transco to determine whether modifications in the activities are appropriate.

In the event that Transco discovers an injured or dead marine mammal, and the lead visual observer determines that the injury or death is not associated with or related to the authorized activities (e.g., previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), Transco would report the incident to the Incidental Take Program Supervisor, Permits and Conservation Division, Office of Protected Resources, at 301–427–8401 and/or by email to *Jolie.Harrison@noaa.gov* and *Michelle.Magliocca@noaa.gov*, within 24 hours of the discovery. Transco would provide photographs or video footage (if available) or other documentation of the stranded animal sighting to us.

Estimated Take by Incidental Harassment

Except with respect to certain activities not pertinent here, the MMPA defines "harassment" as: Any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].

We propose to authorize take by Level B harassment for the proposed Project. Acoustic stimuli (i.e., increased underwater sound) generated during vibratory pile driving and removal activities have the potential to result in the behavioral disturbance of marine mammals. There is no evidence that planned activities could result in serious injury or mortality within the specified geographic area for the requested authorization. The required mitigation and monitoring measures would minimize any potential risk for serious injury or mortality and reduce the amount of Level B harassment takes.

Transco estimated potential take by multiplying the area of the zone of influence (the Level B harassment area) by the local animal density. This provides an estimate of the number of animals that might occupy the Level B harassment area at any given moment during vibratory pile driving activities. However, density estimates for marine mammals within the coastal mid-Atlantic are limited, and there are no density estimates for the specific Project area along the southern coast of Long Island. Therefore, estimated takes were calculated based on the best available information for the region, including density estimates developed by the U.S. Navy through their Navy Operating Area Density Estimate (NODE) for the Northeast operating areas (Boston, Narragansett Bay, and Atlantic City) (DON, 2007). These estimates cover all continental shelf waters from the southern point of New Jersey to Nova Scotia, Canada, from the coast out past the continental shelf. The Navy's report presents density estimates either determined by models created with species-specific data or derived from abundance estimates found in NMFS' 2007 Stock Assessment Reports. Of the Navy's density surface models, two were for species which have the potential to be harassed during this Project: The short-beaked common dolphin and the harbor porpoise. Other density estimates were determined based on shipboard and aerial surveys conducted by the Northeast Fisheries Science Center during summer months between 1998 and 2004. Density for all species was calculated based on seasons and spatial strata. Details on these calculations and how they were applied to each species are provided in section 6.3 of Transco's IHA application (*http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications*).

Transco's requested take amounts may over-estimate the actual number of animals that would be harassed for the following reasons:

- Vibratory pile driving would only occur for 4 days over a 5-month period and the estimated exposures likely do not equate to takes of individual animals;
- The density seasons used in the Navy's NODE report include additional months outside of the proposed Project's schedule for in-water construction (which may have higher density estimates); and
- The density estimates assume even distribution throughout strata and are largely derived from adjacent stratum that may not represent density accurately in the Project area.

Table 2 shows Transco's requested take based on estimated density and the methods described earlier and in section 6.3 of Transco's IHA application.

TABLE 2—ESTIMATED DENSITIES AND REQUESTED MARINE MAMMAL TAKE FOR THE PROJECT

Species	Estimated density (per 100 km^2) Winter[1]	Estimated density (per 100 km^2) Spring[1]	Estimated density (per 100 km^2) Summer[1]	Estimated take by Level B harassment Winter	Estimated take by Level B harassment Spring	Estimated take by Level B harassment Summer	Total takes by Level B harassment requested
Gray seal	N/A	N/A	N/A	7	7	0	14
Harbor seal	156.41	156.41	156.41	69	69	69	138
Harp seal	N/A	N/A	N/A	0	4	0	4
North Atlantic right whale	0.03	0.03	0.03	0.02	0.02	0.02	1
Bottlenose dolphin	0.21	8.14	26.91	0	4	12	16
Short-beaked common dolphin	145.35	1.91	3.59	64	1	2	67
Harbor porpoise	6.40	19.90	0.00	3	9	0	12

Negligible Impact and Small Numbers Analyses and Determinations

As a preliminary matter, we typically include our negligible impact and small numbers analyses and determinations under the same section heading of our **Federal Register** notices. Despite co-locating these terms, we acknowledge that negligible impact and small numbers are distinct standards under the MMPA and treat them as such. The analyses presented below do not conflate the two standards; instead, each standard has been considered independently and we have applied the relevant factors to inform our negligible impact and small numbers determinations.

We have defined "negligible impact" in 50 CFR 216.103 as "an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival." In making a negligible impact determination, we consider the following:

(1) Number of anticipated mortalities (none in this case);

(2) Number and nature of anticipated injuries (none in this case);

(3) Number, nature, intensity, and duration of Level B harassment (all relatively limited); and

(3) The context in which the takes occur (i.e., impacts to areas of significance, impacts to local populations, and cumulative impacts when taking into account successive/contemporaneous actions when added to baseline data);

(4) The status of stock or species of marine mammals (i.e., depleted, not depleted, decreasing, increasing, stable, impact relative to the size of the population);

(5) Impacts on habitat affecting rates of recruitment/survival; and

(6) The effectiveness of monitoring and mitigation measures.

We do not anticipate that any injuries, serious injuries, or mortalities would occur as a result of Transco's proposed Project, and we do not propose to authorize injury, serious injury, or mortality for this Project.

Table 2 in this document outlines the number of requested Level B harassment takes that we anticipate as a result of these activities. Table 3 below shows the proposed take numbers compared to species population sizes. For each species, these take numbers are small (all estimates are less than one percent) relative to the affected stock size and we have provided the regional population estimates for the marine mammal species that may be taken by Level B harassment in Table 3 below.

TABLE 3—PROPOSED MARINE MAMMAL TAKES AND PERCENTAGE OF STOCK POTENTIALLY AFFECTED

Species	Takes by Level B harassment	Abundance of stock	Percentage of stock potentially affected (percent)
Gray seal	14	348,900	0.004
Harbor seal	207	99,340	0.208
Harp seal	4	8,300,000 (minimum)	0.00
North Atlantic right whale	1	444	0.225
Bottlenose dolphin	16	7,147	0.224
Short-beaked common dolphin	67	52,893	0.001
Harbor porpoise	12	89,054	0.013

Many animals perform vital functions, such as feeding, resting, traveling, and socializing, on a diel cycle (i.e., 24 hour cycle). Behavioral reactions to noise exposure (such as disruption of critical life functions, displacement, or avoidance of important habitat) are more likely to be significant if they last more than one diel cycle or recur on subsequent days (Southall *et al.*, 2007). While vibratory pile driving would occur over 2 consecutive days, this is still considered a short overall duration and it would only occur during daylight hours.

Of the seven marine mammal species under our jurisdiction that are known to occur or likely to occur in the Project area, one of these species is listed as endangered under the ESA: North Atlantic right whale. This species is also categorized as depleted under the MMPA. However, Transco is only requesting one take of a north Atlantic right whale by Level B harassment, which is less than one percent of the population. There are no known important feeding areas for north Atlantic right whales and no designated critical habitat within the proposed project area.

Our practice has been to apply the 120 dB re: 1 μPa received level threshold for underwater non-impulse sound levels to estimate take by Level B harassment. Southall *et al.* (2007) provides a severity scale for ranking observed behavioral responses of both free-ranging marine mammals and laboratory subjects to various types of anthropogenic sound (see Table 4 in Southall *et al.* [2007]).

We have preliminarily determined, provided that the aforementioned mitigation and monitoring measures are implemented, that the impact of conducting pile driving activities off Rockaway Peninsula, from January 2014 through December 2014, may result, at worst, in a modification in behavior and/or low-level physiological effects (Level B harassment) of certain species of marine mammals. There are no known important feeding areas or haul-outs within the project area. While these species may make behavioral modifications, including temporarily vacating the area during the operation of the pile hammer to avoid the resultant acoustic disturbance, the availability of similar habitat surrounding the project area and the short and sporadic duration of the specified activities, have led us to preliminary determine that this action will not adversely affect annual rates of recruitment or survival and therefore, would have a negligible impact on the species in the specified geographic region.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the mitigation and monitoring measures, we preliminarily find that Transco's proposed Project would result in the incidental take of small numbers of marine mammals, by Level B harassment only, and that the required measures mitigate impacts to affected species or stocks of marine mammals to the lowest level practicable.

Impact on Availability of Affected Species or Stock for Taking for Subsistence Uses

Section 101(a)(5)(D) of the Marine Mammal Protection Act also requires us to determine that the authorization would not have an unmitigable adverse effect on the availability of marine mammal species or stocks for subsistence use. There are no relevant subsistence uses of marine mammals in the Project area that implicate section 101(a)(5)(D) of the Marine Mammal Protection Act.

Endangered Species Act

Of the species of marine mammals that may occur in the proposed survey area, one is listed as endangered under the Endangered Species Act: The north Atlantic right whale. Under section 7 of the Act, the Federal Energy Regulatory Commission (FERC; the federal agency responsible for permitting Transco's construction) has initiated formal consultation with our Northeast Regional Office on this proposed seismic survey. We (i.e., National Marine Fisheries Service, Office of Protected Resources, Permits and Conservation Division), have also initiated formal consultation under section 7 of the Act with the Northeast Regional Office to obtain a Biological Opinion (Opinion) evaluating the effects of issuing an incidental harassment authorization for threatened and endangered marine mammals and, if appropriate, authorizing incidental take. Both agencies would conclude the formal section 7 consultation (with a single Opinion for FERC and NMFS' Office of Protected Resources, Permits and Conservation Division federal actions) prior to making a determination on whether or not to issue the authorization. If we issue the take authorization, FERC and Transco must comply with the mandatory Terms and Conditions of the Opinion's Incidental Take Statement which would incorporate the mitigation and monitoring requirements included in the Incidental Harassment Authorization.

National Environmental Policy Act (NEPA)

We are participating as a cooperating agency on the FERC's Rockaway Delivery Lateral Project Environmental Impact Statement (EIS). FERC published a Notice of Intent in the **Federal Register** on May 6, 2013 (78 FR 26354). The draft EIS was made available to the public on October 11, 2013 (78 FR 62012). We intend to adopt FERC's final EIS, if adequate and appropriate. Currently, we believe that the adoption of FERC's final EIS will allow us to meet our responsibilities under NEPA for the issuance of an Incidental Harassment Authorization to Transco. If FERC's final EIS is deemed inadequate, we would supplement the existing analysis to ensure that we comply with NEPA prior to the issuance of an authorization.

Proposed Authorization

As a result of these preliminary determinations, we propose to authorize the take of marine mammals incidental to Transco's proposed Project from January 2014 through August 2014, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. The proposed Incidental Harassment Authorization language is provided below.

Transcontinental Gas Pipe Line Company, LLC (Transco) (2800 Post Oak Boulevard, Houston, TX 77056) is hereby authorized under section 101(a)(5)(D) of the Marine Mammal Protection Act (16 U.S.C. 1371(a)(5)(D)) and 50 CFR 216.107, to harass marine mammals incidental to pile driving and removal during the Rockaway Delivery Lateral Project, subject to the following:

1. This Authorization is valid from January 2014 through December 2014.

2. This Authorization is valid for the Rockaway Delivery Lateral Project off the Rockaway Peninsula, as described in the Incidental Harassment Authorization (IHA) application.

3. Transco is hereby authorized to take, by Level B harassment only, 14 gray seals (*Halichoerus grypus*), 138 harbor seals (*Phoca vitulina*), 4 harp seals (*Phoca groenlandica*), 1 north Atlantic right whale (*Eubalaena glacialis*), 16 bottlenose dolphins (*Tursiops truncatus*), 65 short-beaked common dolphins (*Delphinus delphis*), and 12 harbor porpoises (*Phocoena phocoena*) incidental to pile driving associated with the Rockaway Delivery Lateral Project.

4. The taking of any marine mammal in a manner prohibited under this Authorization must be reported immediately to NMFS' Northeast Region, 55 Great Republic Drive, Gloucester, MA 01930–2276; phone 978–281–9328, and NMFS' Office of Protected Resources, 1315 East-West Highway, Silver Spring, MD 20910; phone 301–427–8401; fax 301–713–0376.

5. The holder or designees must notify NMFS' Region and Headquarters at least 24 hours prior to the seasonal commencement of the specified activity (see contact information in 4 above).

6. Mitigation Requirements

The holder of this Authorization is required to abide by the following mitigation conditions listed in 6(a)-(e). Failure to comply with these conditions may result in the modification, suspension, or revocation of this Authorization.

(a) *Vibratory Pile Driving:* A vibratory hammer shall be used for all pile installation and removal in order to reduce in-water sound levels.

(b) *Day-light Hours Only:* All pile installation and removal shall be conducted when lighting and weather conditions allow for adequate visual monitoring of the entire Level B harassment area through the use of binoculars or other devices.

(c) *Soft-start Procedures:* Soft-start procedures shall be implemented at the beginning of each pile driving session. Contractors shall initiate the vibratory hammer for 15 seconds at 40 to 60 percent reduced energy, followed by a 1-minute waiting period. This procedure shall be repeated two additional times before full energy is reached.

(d) *Shutdown Procedures:* If a protected species observer sees any abnormal marine mammal behavior (e.g., tail/flipper slapping, abrupt directed movement, avoidance of the sound source, rapid change in swimming speed, erratic surface movements, or sudden diving at the onset of the sound source), pile driving activities shall be shutdown until the animal has moved outside of the Level B harassment area.

(e) *Control of Discharge:* All in-water construction activities shall comply with federal regulations to control the discharge of operational waste such as bilge and ballast waters, trash and debris, and sanitary and domestic waste that could be generated from all vessels associated with the Project. All Project vessels shall also comply with the U.S. Coast Guard requirements for the prevention and control of oil and fuel spills.

7. Monitoring Requirements

The holder of this Authorization is required to abide by the following monitoring conditions listed in 7(a)-(b). Failure to comply with these conditions may result in the modification, suspension, or revocation of this Authorization.

(a) *General:* If the Level B harassment area is obscured by fog or poor lighting conditions, vibratory pile driving shall be delayed until the area is visible. If the Level B harassment area becomes obscured by fog or poor lighting conditions while pile driving activities are occurring, pile driving shall be shutdown until the area is visible again.

(b) *Visual Monitoring:* Two NMFS-approved protected species observers shall survey the Level B harassment area (~3 miles) for marine mammals 30 minutes before, during, and 30 minutes after all vibratory pile driving activities. The observers shall be stationed on an escort boat, located about 1.5 miles from the pile hammer. Information recorded during each observation within the Level B harassment area shall be used to estimate numbers of animals potentially taken and shall include the following:

- Numbers of individuals observed;
- Frequency of observation;
- Location within the Level B harassment area (i.e., distance from the sound source);
- Vibratory pile driving status (i.e., soft-start, active, post pile driving, etc.); and
- Reaction of the animal(s) to pile driving (if any) and observed behavior within the Level B harassment area, including bearing and direction of travel.

8. Reporting Requirements

The holder of this Authorization is required to submit a draft monitoring report to the Office of Protected Resources, NMFS, within 90 days of the conclusion of monitoring.

(a) The monitoring report shall contain the following information:

- A summary of the activity and monitoring plan (i.e., dates, times, locations);
- A summary of mitigation implementation;
- Monitoring results and a summary that addresses the goals of the monitoring plan, including the following:
  - Environmental conditions when observations were made:
  - Water conditions (i.e., Beaufort sea-state, tidal state)
  - Weather conditions (i.e., percent cloud cover, visibility, percent glare)
  - Survey-specific data:
  - Date and time survey initiated and terminated
  - Date, time, number, species, and any other relevant data regarding marine mammals observed (for pre-activity, during activity, and post-activity surveys)
  - Description of the observed behaviors (in both the presence and absence of activities):
    - If possible, the correlation to underwater sound level occurring at the time of any observable behavior
- Estimated exposure/take numbers during activities; and
- An assessment of the implementation and effectiveness of prescribed mitigation and monitoring measures.

(b) In the unanticipated event that the specified activity clearly causes the take of a marine mammal in a manner not permitted by the authorization (if issued), such as an injury, serious injury, or mortality (e.g., ship-strike, gear interaction, and/or entanglement), Transco shall immediately cease the specified activities and immediately report the incident to the Incidental Take Program Supervisor, Permits and Conservation Division, Office of Protected Resources, NMFS, at 301–427–8401 and/or by email to *Jolie.Harrison@noaa.gov* and *Michelle.Magliocca@noaa.gov*. The report must include the following information:

- Time, date, and location (latitude/longitude) of the incident;
- Name and type of vessel involved;
- Vessel's speed during and leading up to the incident;
- Description of the incident;
- Status of all sound source use in the 24 hours preceding the incident;
- Water depth;
- Environmental conditions (e.g., wind speed and direction, Beaufort sea state, cloud cover, and visibility);
- Description of all marine mammal observations in the 24 hours preceding the incident;
- Species identification or description of the animal(s) involved;
- Fate of the animal(s); and
- Photographs or video footage of the animal(s) (if equipment is available).

Transco shall not resume its activities until we are able to review the circumstances of the prohibited take. NMFS will work with Transco to determine what is necessary to minimize the likelihood of further prohibited take and ensure MMPA compliance. Transco may not resume their activities until notified by us via letter, email, or telephone.

(c) In the event that Transco discovers an injured or dead marine mammal, and the lead visual observer determines that the cause of the injury or death is unknown and the death is relatively recent (i.e., in less than a moderate state of decomposition as we describe in the next paragraph), Transco shall immediately report the incident to the Incidental Take Program Supervisor, Permits and Conservation Division, Office of Protected Resources, at 301–427–8401 and/or by email to *Jolie.Harrison@noaa.gov* and *Michelle.Magliocca@noaa.gov*. The report must include the same information identified in the paragraph above this section. Activities may continue while we review the circumstances of the incident. NMFS will work with Transco to determine whether modifications in the activities are appropriate.

(d) In the event that Transco discovers an injured or dead marine mammal, and the lead visual observer determines that the injury or death is not associated with or related to the authorized activities (e.g., previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), Transco would report the incident to the Incidental Take Program Supervisor, Permits and Conservation Division, Office of Protected Resources, at 301–427–8401 and/or by email to *Jolie.Harrison@noaa.gov* and *Michelle.Magliocca@noaa.gov*, within 24 hours of the discovery. Transco would provide photographs or video footage (if available) or other documentation of the stranded animal sighting to us.

9. A copy of this Authorization must be in the possession of the lead contractor on site and protected species observers operating under the authority of this Authorization.

10. This Authorization may be modified, suspended, or withdrawn if the Holder fails to abide by the conditions prescribed herein or if the authorized taking is having more than a negligible impact on the species or stock of affected marine mammals.

Information Solicited

We request interested persons to submit comments and information concerning this proposed project and our preliminary determination of issuing a take authorization (see **ADDRESSES**). Concurrent with the publication of this notice in the **Federal Register**, we will forward copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: December 23, 2013.

Perry Gayaldo,

Acting Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

[Docket No.: PTO–P–2013–0062]

Grant of Interim Extension of the Term of U.S. Patent No. 5,496,801; Recombinant Human Parathyroid Hormone

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice of interim patent term extension.

SUMMARY: The United States Patent and Trademark Office has issued an order granting interim extension under 35 U.S.C. 156(d)(5) for a one-year interim extension of the term of U.S. Patent No. 5,496,801.

FOR FURTHER INFORMATION CONTACT: Mary C. Till by telephone at (571) 272–7755; by mail marked to her attention and addressed to the Commissioner for Patents, Mail Stop Hatch-Waxman PTE, P.O. Box 1450, Alexandria, VA 22313–1450; by fax marked to her attention at (571) 273–7755; or by email to *Mary.Till@uspto.gov*.

SUPPLEMENTARY INFORMATION: Section 156 of Title 35, United States Code, generally provides that the term of a patent may be extended for a period of up to five years if the patent claims a product, or a method of making or using a product, that has been subject to certain defined regulatory review, and that the patent may be extended for interim periods of up to one year if the regulatory review is anticipated to extend beyond the expiration date of the patent.

On December 6, 2013, NPS Pharmaceuticals, Inc., timely filed an application under 35 U.S.C. 156(d)(5) for an interim extension of the term of U.S. Patent No. 5,496,801. The patent claims the human biological product recombinant human parathyroid hormone. The application indicates that Biologics License Application 125511 for the drug product, recombinant human parathyroid hormone, was filed on October 24, 2013, and is currently undergoing regulatory review before the Food and Drug Administration for permission to market or use the product commercially.

Review of the application indicates that, except for permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. 156, and that the patent should be extended for one year as required by 35 U.S.C. 156(d)(5)(B). Because the regulatory review period has continued beyond the original expiration date of the patent, December 23, 2013, interim extension of the patent term under 35 U.S.C. 156(d)(5) is appropriate.

An interim extension under 35 U.S.C. 156(d)(5) of the term of U.S. Patent No. 5,496,801 is granted for a period of one year from the original expiration date of the patent.

Dated: December 20, 2013.

Andrew Hirshfeld,

Deputy Commissioner for Patent Examination Policy, United States Patent and Trademark Office.

National Medal of Technology and Innovation Call for 2014 Nominations

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice and request for nominations.

SUMMARY: The Department of Commerce (United States Patent and Trademark Office) is accepting nominations for the National Medal of Technology and Innovation (NMTI). Since establishment by Congress in the Stevenson-Wydler Technology Innovation Act of 1980, the President of the United States has awarded the annual National Medal of Technology and Innovation (initially known as the National Medal of Technology) to our nation's leading innovators. If you know of a candidate who has made an outstanding contribution to the nation's economic, environmental or social well-being through the promotion of technology, technological innovation, or the development of technological manpower, you may obtain a nomination form from: *http://www.uspto.gov/about/nmti/index.jsp*.

ADDRESSES: The NMTI nomination form for the year 2014 may be obtained by visiting the USPTO Web site at *http://www.uspto.gov/about/nmti/index.jsp*. Nomination applications should be submitted to John Palafoutas, Program Manager, National Medal of Technology and Innovation Program, by electronic mail to *NMTI@uspto.gov* or by mail to: John Palafoutas, NMTI Program Manager, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, Virginia 22313–1450.

DATES: The deadline for submission of a nomination is 5 p.m. ET, April 1, 2014.

FOR FURTHER INFORMATION CONTACT: John Palafoutas, Program Manager, National Medal of Technology and Innovation Program, United States Patent and Trademark Office, 600 Dulany Street, Alexandria, VA 22314; telephone (571) 272–9821 or by electronic mail: *nmti@uspto.gov*.

SUPPLEMENTARY INFORMATION:

Background

As provided by Congress in the Stevenson-Wydler Technology Innovation Act of 1980, the National Medal of Technology was first awarded in 1985. On August 9, 2007, the President signed the America COMPETES (Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science) Act of 2007. The Act amended Section 16 of the Stevenson-Wydler Technology Innovation Act of 1980, changing the name of the Medal to the "National Medal of Technology and Innovation." The NMTI is the highest honor awarded by the President of the United States to America's leading innovators in the field of technology and is given annually to individuals, teams, or companies/non-profits who have made outstanding contributions to the promotion of technology or technological innovation, or to the development of technological manpower, for the improvement of the economic, environmental or social well-being of the United States. The primary purpose of the NMTI is to recognize American innovators whose vision, creativity, and brilliance in moving ideas to market or in developing of the nation's technological manpower has had a profound and significant impact on our economy and way of life. The NMTI highlights the national importance of fostering technological innovation based upon solid science, resulting in commercially successful products and services.

Eligibility and Nomination Criteria

Nomination Guidelines containing information on eligibility and nomination criteria are at *http://www.uspto.gov/about/nmti/guidelines.jsp*.

Dated: December 16, 2013.

Margaret A. Focarino,

Commissioner for Patents, Performing the functions and duties of the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

[FR Doc. 2013–31019 Filed 12–26–13; 8:45 am]

BILLING CODE P

COMMODITY FUTURES TRADING COMMISSION

Comparability Determination for Canada: Certain Entity-Level Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Comparability Determination for Certain Requirements under the Laws of Canada.

SUMMARY: The following is the analysis and determination of the Commodity Futures Trading Commission ("Commission") regarding certain parts of a joint request by the Canadian Bankers Association ("CBA"), five individual Canadian banks provisionally-registered with the Commodity Futures Trading Commission ("Commission") as swap dealers ("SDs"), and the Office of the Superintendent of Financial Institutions ("OSFI") that the Commission determine that certain laws and regulations applicable in Canada provide a sufficient basis for an affirmative finding of comparability with respect to the following regulatory obligations applicable to SDs and major swap participants ("MSPs") registered with the Commission: (i) Chief compliance officer; (ii) risk management; and (iii) swap data recordkeeping (collectively, the "Internal Business Conduct Requirements").

DATES: *Effective Date:* This determination will become effective immediately upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary Barnett, Director, 202–418–5977, *gbarnett@cftc.gov*, Frank Fisanich, Chief Counsel, 202–418–5949, *ffisanich@cftc.gov*, and Andy Chapin, Associate Director, 202–418–5465, *achapin@cftc.gov*, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 26, 2013, the Commission published in the **Federal Register** its "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" (the "Guidance").[1] In the Guidance, the Commission set forth its interpretation of the manner in which it believes that section 2(i) of the Commodity Exchange Act ("CEA") applies Title VII's swap provisions to activities outside the U.S. and informed the public of some of the policies that it expects to follow, generally speaking, in applying Title VII and certain Commission regulations in contexts covered by section 2(i). Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations promulgated thereunder.

In addition to the Guidance, on July 22, 2013, the Commission issued the Exemptive Order Regarding Compliance with Certain Swap Regulations (the "Exemptive Order").[2] Among other things, the Exemptive Order provided time for the Commission to consider substituted compliance with respect to six jurisdictions where non-U.S. SDs are currently organized. In this regard, the Exemptive Order generally provided non-U.S. SDs and MSPs in the six jurisdictions with conditional relief from certain requirements of Commission regulations (those referred to as "Entity-Level Requirements" in the Guidance) until the earlier of December 21, 2013, or 30 days following the issuance of a substituted compliance determination.[3]

On May 13. 2013, the CBA, five individual Canadian banks provisionally registered with the Commission as SDs, and OSFI (collectively hereinafter, the "applicant") submitted a request that the Commission determine that laws and regulations applicable in Canada provide a sufficient basis for an affirmative finding of comparability with respect to certain Entity-Level Requirements, including the Internal Business Conduct Requirements.[4] The applicants provided Commission staff with a supplemental submission from the Ontario Securities Commission ("OSC") dated June 7, 2013. The following is the Commission's analysis and determination regarding the Internal Business Conduct Requirements, as detailed below.[5]

II. Background

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act[6] ("Dodd-Frank Act" or "Dodd-Frank"), which, in Title VII, established a new regulatory framework for swaps.

Section 722(d) of the Dodd-Frank Act amended the CEA by adding section 2(i), which provides that the swap provisions of the CEA (including any CEA rules or regulations) apply to cross-border activities when certain conditions are met, namely, when such activities have a "direct and significant connection with activities in, or effect on, commerce of the United States" or when they contravene Commission rules or regulations as are necessary or appropriate to prevent evasion of the swap provisions of the CEA enacted under Title VII of the Dodd-Frank Act.[7] In the three years since its enactment, the Commission has finalized 68 rules and orders to implement Title VII of the Dodd-Frank Act. The finalized rules include those promulgated under section 4s of the CEA, which address registration of SDs and MSPs and other substantive requirements applicable to SDs and MSPs. With few exceptions, the delayed compliance dates for the Commission's regulations implementing such section 4s requirements applicable to SDs and MSPs have passed and new SDs and MSPs are now required to be in full compliance with such regulations upon registration with the

[1] 78 FR 45292 (July 26, 2013). The Commission originally published proposed and further proposed guidance on July 12, 2012 and January 7, 2013, respectively. *See* Cross-Border Application of Certain Swaps Provisions of the Commodity Exchange Act, 77 FR 41214 (July 12, 2012) and Further Proposed Guidance Regarding Compliance with Certain Swap Regulations, 78 FR 909 (Jan. 7, 2013).

[2] 78 FR 43785 (July 22, 2013).

[3] The Entity-Level Requirements under the Exemptive Order consist of 17 CFR 1.31, 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, 23.606, 23.608, 23.609, and parts 45 and 46 of the Commission's regulations.

[4] For purposes of this notice, the Internal Business Conduct Requirements consist of 17 CFR 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606.

[5] This notice does not address swap data repository reporting ("SDR Reporting"). The Commission may provide a comparability determination with respect to the SDR Reporting requirement in a separate notice.

[6] Public Law 111–203, 124 Stat. 1376 (2010).

[7] 7 U.S.C. 2(i).

Commission.[8] Notably, the requirements under Title VII of the Dodd-Frank Act related to SDs and MSPs by their terms apply to all registered SDs and MSPs, irrespective of where they are located, albeit subject to the limitations of CEA section 2(i).

To provide guidance as to the Commission's views regarding the scope of the cross-border application of Title VII of the Dodd-Frank Act, the Commission set forth in the Guidance its interpretation of the manner in which it believes that Title VII's swap provisions apply to activities outside the U.S. pursuant to section 2(i) of the CEA. Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations. With respect to the standards forming the basis for any determination of comparability ("comparability determination" or "comparability finding"), the Commission stated:

> In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the applicable requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including but not limited to, the comprehensiveness of those requirement(s), the scope and objectives of the relevant regulatory requirement(s), the comprehensiveness of the foreign regulator's supervisory compliance program, as well as the home jurisdiction's authority to support and enforce its oversight of the registrant. In this context, comparable does not necessarily mean identical. Rather, the Commission would evaluate whether the home jurisdiction's regulatory requirement is comparable to and as comprehensive as the corresponding U.S. regulatory requirement(s).[9]

Upon a comparability finding, consistent with CEA section 2(i) and comity principles, the Commission's policy generally is that eligible entities may comply with a substituted compliance regime, subject to any conditions the Commission places on its finding, and subject to the Commission's retention of its examination authority and its enforcement authority.[10]

In this regard, the Commission notes that a comparability determination cannot be premised on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction, but rather on whether information relevant to the Commission's oversight of an SD or MSP would be directly available to the Commission and any U.S. prudential regulator of the SD or MSP.[11] The Commission's direct access to the books and records required to be maintained by an SD or MSP registered with the Commission is a core requirement of the CEA [12] and the Commission's regulations,[13] and is a condition to registration.[14]

III. Regulation of SDs and MSPs in Canada

On May 13, 2013, the applicant submitted a request that the Commission assess the comparability of Canadian laws and regulations with the requirements of the CEA and the Commission's regulations promulgated thereunder. OSC provided a supplement to the submission on June 7, 2013. On November 8, 2013, OSFI further supplemented the application with corrections and additional materials.

All of the currently registered Canadian SDs are banks regulated under the Canadian Bank Act (the "Bank Act"),[15] relevant regulations thereunder, and guidelines, advisories, and interpretations provided by OSFI. As the governing prudential regulator in Canada, OSFI supervises all Canadian banks on a consolidated basis, including those provisionally registered with the Commission as SDs (the "Canadian Bank SDs"). To implement its "Supervisory Framework," OSFI has published guidelines, advisories, and interpretations which OSFI expects each bank to follow. Each of the five Canadian Bank SDs also has been designated as Domestic Systemically Important Banks ("DSIBs") due to the potential impact that failure could have on the domestic economy based on their size, interconnectedness, substitutability, and complexity. As DSIBs, these banks are expected to have advanced practices in terms of the design and operation of oversight functions and controls, and are subject to continued supervisory intensity, enhanced disclosure requirements, and a capital surcharge.[16]

Canada's provincial securities administrators, coordinated by the Derivatives Committee of the Canadian Securities Administrators ("CSA"), are responsible for regulating the capital markets. Harmonized policy recommendations are made at the CSA level, while regulations are made at the provincial level. Currently, the CSA has issued a Consultation Paper 91–407 on "Derivatives Registration" (comment period closed June 17, 2013).

IV. Comparable and Comprehensiveness Standard

The Commission's comparability analysis will be based on a comparison of specific foreign requirements against the specific related CEA provisions and Commission regulations as categorized and described in the Guidance. As explained in the Guidance, within the framework of CEA section 2(i) and principles of international comity, the Commission may make a comparability determination on a requirement-by-requirement basis, rather than on the

[8] The compliance dates are summarized on the Compliance Dates page of the Commission's Web site. (*http://www.cftc.gov/LawRegulation/DoddFrankAct/ComplianceDates/index.htm.*)

[9] 78 FR 45342–45.

[10] *See* the Guidance, 78 FR 45342–44.

[11] Under §§ 23.203 and 23.606, all records required by the CEA and the Commission's regulations to be maintained by a registered SD or MSP shall be maintained in accordance with Commission regulation 1.31 and shall be open for inspection by representatives of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

In its Final Exemptive Order Regarding Compliance with Certain Swap Regulations, 78 FR 858 (Jan. 7, 2013), the Commission noted that an applicant for registration as an SD or MSP must file a Form 7–R with the National Futures Association and that Form 7–R was being modified at that time to address existing blocking, privacy, or secrecy laws of foreign jurisdictions that applied to the books and records of SDs and MSPs acting in those jurisdictions. See id. at 871–72 n. 107. The modifications to Form 7–R were a temporary measure intended to allow SDs and MSPs to apply for registration in a timely manner in recognition of the existence of the blocking, privacy, and secrecy laws. In the Guidance, the Commission clarified that the change to Form 7–R impacts the registration application only and does not modify the Commission's authority under the CEA and its regulations to access records held by registered SDs and MSPs. Commission access to a registrant's books and records is a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto. The Commission has maintained an ongoing dialogue on a bilateral and multilateral basis with foreign regulators and with registrants to address books and records access issues and may consider appropriate measures where requested to do so.

[12] *See* e.g., sections 4s(f)(1)(C), 4s(j)(3) and (4) of the CEA.

[13] *See* e.g., §§ 23.203(b) and 23.606.

[14] *See* supra note 10.

[15] Consolidated Acts of Canada, S.C. 1991, c. 46.

[16] Because the applicant's request and the Commissions determinations herein are based on the comparability of Canadian requirements applicable to banks, an SD or MSP that is not a bank, or is otherwise not subject to the requirements applicable to banks upon which the Commission bases its determinations, may not be able to rely on the Commission's comparability determinations herein.

basis of the foreign regime as a whole.[17] In making its comparability determinations, the Commission may include conditions that take into account timing and other issues related to coordinating the implementation of reform efforts across jurisdictions.[18]

In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the corollary requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including, but not limited to:

- The comprehensiveness of those requirement(s),
- The scope and objectives of the relevant regulatory requirement(s),
- The comprehensiveness of the foreign regulator's supervisory compliance program, and
- The home jurisdiction's authority to support and enforce its oversight of the registrant.[19]

In making a comparability determination, the Commission takes an "outcome-based" approach. An "outcome-based" approach means that when evaluating whether a foreign jurisdiction's regulatory requirements are comparable to, and as comprehensive as, the corollary areas of the CEA and Commission regulations, the Commission ultimately focuses on regulatory outcomes (*i.e.*, the home jurisdiction's requirements do not have to be identical).[20] This approach recognizes that foreign regulatory systems differ and their approaches vary and may differ from how the Commission chose to address an issue, but that the foreign jurisdiction's regulatory requirements nonetheless achieve the regulatory outcome sought to be achieved by a certain provision of the CEA or Commission regulation.

In doing its comparability analysis the Commission may determine that no comparability determination can be made[21] and that the non-U.S. SD or non-U.S. MSP, U.S. bank that is an SD or MSP with respect to its foreign branches, or non-registrant, to the extent applicable under the Guidance, may be required to comply with the CEA and Commission regulations.

The starting point in the Commission's analysis is a consideration of the regulatory objectives of the foreign jurisdiction's regulation of swaps and swap market participants. As stated in the Guidance, jurisdictions may not have swap specific regulations in some areas, and instead have regulatory or supervisory regimes that achieve comparable and comprehensive regulation to the Dodd-Frank Act requirements, but on a more general, entity-wide, or prudential, basis.[22] In addition, portions of a foreign regulatory regime may have similar regulatory objectives, but the means by which these objectives are achieved with respect to swaps market activities may not be clearly defined, or may not expressly include specific regulatory elements that the Commission concludes are critical to achieving the regulatory objectives or outcomes required under the CEA and the Commission's regulations. In these circumstances, the Commission will work with the regulators and registrants in these jurisdictions to consider alternative approaches that may result in a determination that substituted compliance applies.[23]

Finally, the Commission will generally rely on an applicant's description of the laws and regulations of the foreign jurisdiction in making its comparability determination. The Commission considers an application to be a representation by the applicant that the laws and regulations submitted are in full force and effect, that the description of such laws and regulations is accurate and complete, and that, unless otherwise noted, the scope of such laws and regulations encompasses the swaps activities[24] of SDs and MSPs[25] in the relevant jurisdictions.[26] Further, as stated in the Guidance, the Commission expects that an applicant would notify the Commission of any material changes to information submitted in support of a comparability determination (including, but not limited to, changes in the relevant supervisory or regulatory regime) as, depending on the nature of the change, the Commission's comparability determination may no longer be valid.[27]

The Guidance provided a detailed discussion of the Commission's policy regarding the availability of substituted

---

[17] 78 FR 45343.

[18] 78 FR 45343.

[19] 78 FR 45343. The Commission's substituted compliance program would generally be available for SDR Reporting, as outlined in the Guidance, only if the Commission has direct access to all of the data elements that are reported to a foreign trade repository pursuant to the substituted compliance program. Thus, direct access to swap data is a threshold matter to be addressed in a comparability evaluation for SDR Reporting. Moreover, the Commission explains in the Guidance that, due to its technical nature, a comparability evaluation for SDR Reporting "will generally entail a detailed comparison and technical analysis." A more particularized analysis will generally be necessary to determine whether data stored in a foreign trade repository provides for effective Commission use, in furtherance of the regulatory purposes of the Dodd-Frank Act. *See* 78 FR 45345.

[20] 78 FR 45343.

[21] A finding of comparability may not be possible for a number of reasons, including the fact that the foreign jurisdiction has not yet implemented or finalized particular requirements.

[22] 78 FR 45343.

[23] As explained in the Guidance, such "approaches used will vary depending on the circumstances relevant to each jurisdiction. One example would include coordinating with the foreign regulators in developing appropriate regulatory changes or new regulations, particularly where changes or new regulations already are being considered or proposed by the foreign regulators or legislative bodies. As another example, the Commission may, after consultation with the appropriate regulators and market participants, include in its substituted compliance determination a description of the means by which certain swaps market participants can achieve substituted compliance within the construct of the foreign regulatory regime. The identification of the means by which substituted compliance is achieved would be designed to address the regulatory objectives and outcomes of the relevant Dodd-Frank Act requirements in a manner that does not conflict with a foreign regulatory regime and reduces the likelihood of inconsistent regulatory obligations. For example, the Commission may specify that [SDs] and MSPs in the jurisdiction undertake certain recordkeeping and documentation for swap activities that otherwise is only addressed by the foreign regulatory regime with respect to financial activities generally. In addition, the substituted compliance determination may include provisions for summary compliance and risk reporting to the Commission to allow the Commission to monitor whether the regulatory outcomes are being achieved. By using these approaches, in the interest of comity, the Commission would seek to achieve its regulatory objectives with respect to the Commission's registrants that are operating in foreign jurisdictions in a manner that works in harmony with the regulatory interests of those jurisdictions." 78 FR 45343–44.

[24] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under Part 23 (17 CFR Part 23) are limited in scope to the swaps activities of SDs and MSPs.

[25] No SD or MSP that is not legally required to comply with a law or regulation determined to be comparable may voluntarily comply with such law or regulation in lieu of compliance with the CEA and the relevant Commission regulation. Each SD or MSP that seeks to rely on a comparability determination is responsible for determining whether it is subject to the laws and regulations found comparable. Currently there are no MSPs organized outside the U.S. and the Commission therefore cautions any non-financial entity organized outside the U.S. and applying for registration as an MSP to carefully consider whether the laws and regulations determined to be comparable herein are applicable to such entity.

[26] The Commission has provided the relevant foreign regulator(s) with opportunities to review and correct the applicant's description of such laws and regulations on which the Commission will base its comparability determination. The Commission relies on the accuracy and completeness of such review and any corrections received in making its comparability determinations. A comparability determination based on an inaccurate description of foreign laws and regulations may not be valid.

[27] 78 FR 45345.

compliance [28] for the Internal Business Conduct Requirements.[29]

V. Supervisory Arrangement

In the Guidance, the Commission stated that, in connection with a determination that substituted compliance is appropriate, it would expect to enter into an appropriate memorandum of understanding ("MOU") or similar arrangement [30] with the relevant foreign regulator(s). Although existing arrangements would indicate a foreign regulator's ability to cooperate and share information, "going forward, the Commission and relevant foreign supervisor(s) would need to establish supervisory MOUs or other arrangements that provide for information sharing and cooperation in the context of supervising [SDs] and MSPs." [31]

The Commission is in the process of developing its registration and supervision regime for provisionally-registered SDs and MSPs. This new initiative includes setting forth supervisory arrangements with authorities that have joint jurisdiction over SDs and MSPs that are registered with the Commission and subject to U.S. law. Given the developing nature of the Commission's regime and the fact that the Commission has not negotiated prior supervisory arrangements with certain authorities, the negotiation of supervisory arrangements presents a unique opportunity to develop close working relationships between and among authorities, as well as highlight any potential issues related to cooperation and information sharing.

Accordingly, the Commission is negotiating such a supervisory arrangement with each applicable foreign regulator of an SD or MSP. The Commission expects that the arrangement will establish expectations for ongoing cooperation, address direct access to information,[32] provide for notification upon the occurrence of specified events, memorialize understandings related to on-site visits,[33] and include protections related to the use and confidentiality of non-public information shared pursuant to the arrangement.

These arrangements will establish a roadmap for how authorities will consult, cooperate, and share information. As with any such arrangement, however, nothing in these arrangements will supersede domestic laws or resolve potential conflicts of law, such as the application of domestic secrecy or blocking laws to regulated entities.

VI. Comparability Determination and Analysis

The following section describes the requirements imposed by specific sections of the CEA and the Commission's regulations for the Internal Business Conduct Requirements that are the subject of this comparability determination, and the Commission's regulatory objectives with respect to such requirements. Immediately following a description of the requirement(s) and regulatory objective(s) of the specific Internal Business Conduct Requirements that the applicant submitted for a comparability determination, the Commission provides a description of the foreign jurisdiction's comparable laws, regulations, or rules and whether such laws, regulations, or rules meet the applicable regulatory objective.

The Commission's determinations in this regard and the discussion in this section are intended to inform the public of the Commission's views regarding whether the foreign jurisdiction's laws, regulations, or rules may be comparable and comprehensive as those requirements in the Dodd-Frank Act (and Commission regulations promulgated thereunder) and therefore, may form the basis of substituted compliance. In turn, the public (in the foreign jurisdiction, in the United States, and elsewhere) retains its ability to present facts and circumstances that would inform the determinations set forth in this notice.

As was stated in the Guidance, the Commission recognizes the complex and dynamic nature of the global swap market and the need to take an adaptable approach to cross-border issues, particularly as it continues to work closely with foreign regulators to address potential conflicts with respect to each country's respective regulatory regime. In this regard, the Commission may review, modify, or expand the determinations herein in light of comments received and future developments.

A. Chief Compliance Officer (§ 3.3).

Commission Requirement: Implementing section 4s(k) of the CEA, Commission regulation 3.3 generally sets forth the following requirements for SDs and MSPs:

- An SD or MSP must designate an individual as Chief Compliance Officer ("CCO");
- The CCO must have the responsibility and authority to develop the regulatory compliance policies and procedures of the SD or MSP;
- The CCO must report to the board of directors or the senior officer of the SD or MSP;
- Only the board of directors or a senior officer may remove the CCO;
- The CCO and the board of directors must meet at least once per year;
- The CCO must have the background and skills appropriate for the responsibilities of the position;
- The CCO must not be subject to disqualification from registration under sections 8a(2) or (3) of the CEA;
- Each SD and MSP must include a designation of a CCO in its registration application;

[28] *See* 78 FR 45348–50. The Commission notes that registrants and other market participants are responsible for determining whether substituted compliance is available pursuant to the Guidance based on the comparability determination contained herein (including any conditions or exceptions), and its particular status and circumstances.

[29] This notice does not address § 23.608 (Restrictions on counterparty clearing relationships). The Commission declines to take up the request for a comparability determination with respect to this regulation due to the Commission's view that there are not laws or regulations applicable in Canada to compare with the prohibitions and requirements of § 23.608. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in Canada.

This notice also does not address capital adequacy because the Commission has not yet finalized rules for SDs and MSPs in this area, nor SDR Reporting. The Commission may provide a comparability determination with respect to these requirements at a later date or in a separate notice.

[30] An MOU is one type of arrangement between or among regulators. Supervisory arrangements could include, as appropriate, cooperative arrangements that are memorialized and executed as addenda to existing MOUs or, for example, as independent bilateral arrangements, statements of intent, declarations, or letters.

[31] 78 FR 45344.

[32] Section 4s(j)(3) and (4) of the CEA and Commission regulation 23.606 require a registered SD or MSP to make all records required to be maintained in accordance with Commission regulation 1.31 available promptly upon request to, among others, representatives of the Commission. *See also* 7 U.S.C. 6s(f); 17 CFR 23.203. In the Guidance, the Commission states that it "reserves this right to access records held by registered [SDs] and MSPs, including those that are non-U.S. persons who may comply with the Dodd-Frank recordkeeping requirement through substituted compliance." 78 FR 45345 n. 472; *see also id.* at 45342 n. 461 (affirming the Commission's authority under the CEA and its regulations to access books and records held by registered SDs and MSPs as "a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto").

[33] The Commission retains its examination authority, both during the application process as well as upon and after registration of an SD or MSP. *See* 78 FR 45342 (stating Commission policy that "eligible entities may comply with a substituted compliance regime under certain circumstances, subject, however, to the Commission's retention of its examination authority") and 45344 n. 471 (stating that the "Commission may, as it deems appropriate and necessary, conduct an on-site examination of the applicant").

- The CCO must administer the regulatory compliance policies of the SD or MSP;
- The CCO must take reasonable steps to ensure compliance with the CEA and Commission regulations, and resolve conflicts of interest;
- The CCO must establish procedures for detecting and remediating non-compliance issues;
- The CCO must annually prepare and sign an "annual compliance report" containing: (i) A description of policies and procedures reasonably designed to ensure compliance; (ii) an assessment of the effectiveness of such policies and procedures; (iii) a description of material non-compliance issues and the action taken; (iv) recommendations of improvements in compliance policies; and (v) a certification by the CCO or CEO that, to the best of such officer's knowledge and belief, the annual report is accurate and complete under penalty of law; and
- The annual compliance report must be furnished to the CFTC within 90 days after the end of the fiscal year of the SD or MSP, simultaneously with its annual financial condition report.

Regulatory Objective: The Commission believes that compliance by SDs and MSPs with the CEA and the Commission's rules greatly contributes to the protection of customers, orderly and fair markets, and the stability and integrity of the market intermediaries registered with the Commission. The Commission expects SDs and MSPs to strictly comply with the CEA and the Commission's rules and to devote sufficient resources to ensuring such compliance. Thus, through its CCO rule, the Commission seeks to ensure firms have designated a qualified individual as CCO that reports directly to the board of directors or the senior officer of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually to the Commission and the board or senior officer on compliance of the firm.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and comparable to and as comprehensive as section 4s(k) of the CEA and Commission regulation 3.3.

OSFI's Legislative Compliance Management Guideline E–13 ("LCM Guideline") requires Canadian banks to establish an enterprise-wide framework of regulatory risk management controls to ensure that regulatory compliance risks are managed effectively. The required LCM framework must meet the requirements of the LCM Guideline, which sets out OSFI's expectations. The Canadian Bank SDs are required to demonstrate that they satisfy those expectations in particular circumstances. Pursuant to the LCM Guideline:

- The compliance oversight function should be designated to a member of senior management as the bank's CCO;
- Such CCO should have sufficient stature, authority, resources, and access to achieve compliance with applicable law;
- Such CCO should have appropriate skills and knowledge to effectively fulfill the requirements of the function;
- The CCO should approve the content and frequency of reports and that such reports should be sufficient to enable the CCO, senior management, and the bank's board to discharge their compliance responsibilities;
- OSFI expects that each bank's LCM framework will include identification, assessment, communication, and maintenance of applicable regulatory requirements, compliance procedures, monitoring procedures, and reporting procedures;
- OSFI expects the CCO to be responsible for the LCM framework and to report issues directly to the board, including any material compliance issues and their remediation; and
- Normal course reports to the board should be made no less than annually, and contain discussion of material weaknesses, non-compliance issues, and remedial action plans.

In addition, the OSFI Corporate Governance Guideline of Federally Regulated Financial Institutions ("OSFI Corporate Governance Guideline") states that the bank's board of directors should be responsible for the selection, performance, management, compensation, and evaluation of a CCO. Pursuant to the OSFI Supervisory Framework, OSFI monitors banks' management of compliance risk and reports on banks' compliance with the Bank Act annually to the Canadian Minister of Finance.

Commission Determination: The Commission finds that the OSFI standards specified above are generally identical in intent to § 3.3 by seeking to ensure firms have designated a qualified individual as the compliance officer that reports directly to a sufficiently senior function of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually on compliance of the firm.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the CCO requirements of the OSFI standards, specified above, are comparable to and as comprehensive as § 3.3, with the exception of § 3.3(f) concerning certifying and furnishing an annual compliance report to the Commission.[34]

Notwithstanding that the Commission has not determined that the requirements of the OSFI standards are comparable to and as comprehensive as § 3.3(f), any SD or MSP to which both § 3.3 and the OSFI standards specified above are applicable would generally be deemed to be in compliance with § 3.3(f) if that SD or MSP complies with the OSFI standards specified above, subject to certifying and furnishing the Commission with the annual report required under the OSFI standards specified above in accordance with § 3.3(f). The Commission notes that it generally expects registrants to submit required reports to the Commission in the English language.

B. Risk Management Duties (§§ 23.600—23.609)

Section 4s(j) of the CEA requires each SD and MSP to establish internal policies and procedures designed to, among other things, address risk management, monitor compliance with position limits, prevent conflicts of interest, and promote diligent supervision, as well as maintain business continuity and disaster recovery programs.[35] The Commission adopted regulations 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606 to implement the statute.[36] The

[34] Because the Commission has not determined that the requirements of the OSFI standards are comparable to and as comprehensive as § 3.3(f), any SD or MSP to which both § 3.3 and the OSFI standards specified above are applicable would generally be deemed to be in compliance with § 3.3 if that SD or MSP complies with the OSFI standards specified above, subject to certifying and furnishing the Commission with the annual report required under the OSFI standards specified above in accordance with § 3.3(f). The Commission notes that it generally expects registrants to submit required reports to the Commission in the English language.

[35] 7 U.S.C. 6s(j).

[36] *See* Final Swap Dealer and MSP Recordkeeping Rule, 77 FR 20128 (April 3, 2012) (relating to risk management program, monitoring of position

Continued

Commission also adopted regulation 23.609, which requires certain risk management procedures for SDs or MSPs that are clearing members of a derivatives clearing organization ("DCO").[37] Collectively, these requirements help to establish a robust and comprehensive internal risk management program for SDs and MSPs with respect to their swaps activities.[38] which is critical to effective systemic risk management for the overall swaps market. In making its comparability determination with regard to these risk management duties, the Commission will consider each regulation individually.[39]

1. Risk Management Program for SDs and MSPs (§ 23.600)

Commission Requirement: Implementing section 4s(j)(2) of the CEA, Commission regulation 23.600 generally requires that:

- Each SD or MSP must establish and enforce a risk management program consisting of a system of written risk management policies and procedures designed to monitor and manage the risks associated with the swap activities of the firm, including without limitation, market, credit, liquidity, foreign currency, legal, operational, and settlement risks, and furnish a copy of such policies and procedures to the CFTC upon application for registration and upon request;
- The SD or MSP must establish a risk management unit independent from the business trading unit;
- The risk management policies and procedures of the SD or MSP must be approved by the firm's governing body;
- Risk tolerance limits and exceptions therefrom must be reviewed and approved quarterly by senior management and annually by the governing body;
- The risk management program must have a system for detecting breaches of risk tolerance limits and alerting supervisors and senior management, as appropriate;
- The risk management program must account for risks posed by affiliates and be integrated at the consolidated entity level;
- The risk management unit must provide senior management and the governing body with quarterly risk exposure reports and upon detection of any material change in the risk exposure of the SD or MSP;
- Risk exposure reports must be furnished to the CFTC within five business days following provision to senior management;
- The risk management program must have a new product policy for assessing the risks of new products prior to engaging in such transactions;
- The risk management program must have policies and procedures providing for trading limits, monitoring of trading, processing of trades, and separation of personnel in the trading unit from personnel in the risk management unit; and
- The risk management program must be reviewed and tested at least annually and upon any material change in the business of the SD or MSP.

Regulatory Objective: Through the required system of risk management, the Commission seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. To this end, the Commission believes the risk management program of an SD or MSP must contain at least the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and are comparable to and as comprehensive as section 4s(j)(2) of the CEA and Commission regulation § 23.600.

The OSFI Corporate Governance Guideline requires that each bank establish a risk appetite framework ("RAF") that:

- Guides the amount of risk the bank is willing to accept in pursuit of its strategic and business objectives.
- Sets basic goals, benchmarks, parameters, and limits, and should consider all applicable types of risks.
- Contains all elements required by an annex to the Corporate Governance Guideline, including a risk appetite statement, specific risk tolerance limits, and processes for implementation of the RAF.

Further, the OSFI Corporate Governance Guideline states that DSIBs should establish a dedicated risk committee to oversee risk management on an enterprise-wide basis, and that the oversight of the risk management activities of the bank are to be independent from operational management, adequately resourced, and have appropriate status and visibility.

The OSFI Derivatives Best Practice Guideline states that each bank should ensure that each derivative product traded is subject to a product authorization signed off by senior management, and sets forth OSFI's expectations with respect to having documented policies and procedures for risk management, creating risk tolerance limits, and measuring, reporting, managing, and controlling the risks associated with the derivatives business, including market, currency, interest rate, equity price, commodity price, credit, settlement, liquidity, operational, and legal risks.

Finally, OSFI represents that its oversight pursuant to the Supervisory Framework will assess the extent to which the risk management function integrates policies, practices, and limits with day-to-day business activities and with the bank's strategic, capital, and liquidity management policies. Under the Supervisory Framework, OSFI also will assess whether the risk management function effectively monitors risk positions against approved limits and ensures that material breaches are addressed on a timely basis. OSFI represents that it will look at various indicators, including the extent to which the bank proactively updates its policies, practices, and

---

limits, business continuity and disaster recovery, conflicts of interest policies and procedures, and general information availability, respectively).

[37] *See* Customer Documentation Rule, 77 FR 21278. Also, SDs must comply with Commission regulation 23.608, which prohibits SDs providing clearing services to customers from entering into agreements that would: (i) Disclose the identity of a customer's original executing counterparty; (ii) limit the number of counterparties a customer may trade with; (iii) impose counterparty-based position limits; (iv) impair a customer's access to execution of a trade on terms that have a reasonable relationship to the best terms available; or (v) prevent compliance with specified time frames for acceptance of trades into clearing.

[38] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under Part 23 (17 CFR Part 23) are limited in scope to the swaps activities of SDs and MSPs.

[39] As stated above, this notice does not address § 23.608 (Restrictions on counterparty clearing relationships). The Commission declines to take up the request for a comparability determination with respect to this regulation due to the Commission's view that there are not laws or regulations applicable in Canada to compare with the prohibitions and requirements of § 23.608. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in Canada.

limits in response to changes in the industry and in the institution's strategy, business activities and risk tolerances.[40]

Commission Determination: The Commission finds that the OSFI standards specified above are generally identical in intent to § 23.600 by requiring a system of risk management that seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. Specifically, the Commission finds that the OSFI standards specified above would comprehensively require SDs and MSPs to establish risk management programs containing the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the risk management program requirements of the OSFI standards, as specified above, are comparable to and as comprehensive as § 23.600, with the exception of § 23.600(c)(2) concerning the requirement that each SD and MSP produce a quarterly risk exposure report and provide such report to its senior management, governing body, and the Commission.

Notwithstanding that the Commission has not determined that the requirements of the OSFI standards are comparable to and as comprehensive as § 23.600(c)(2), any SD or MSP to which both § 23.600 and the OSFI standards specified above are applicable would generally be deemed to be in compliance with § 23.600(c)(2) if that SD or MSP complies with the OSFI standards specified above, subject to compliance with the requirement that it produce quarterly risk exposure reports and provide such reports to its senior management, governing body, and the Commission in accordance with § 23.600(c)(2). The Commission notes that it generally expects reports furnished to the Commission by registrants to be in the English language.

2. Monitoring of Position Limits (§ 23.601)

Commission Requirement: Implementing section 4s(j)(1) of the CEA, Commission regulation 23.601 requires each SD or MSP to establish and enforce written policies and procedures that are reasonably designed to monitor for, and prevent violations of, applicable position limits established by the Commission, a DCM, or a SEF.[41] The policies and procedures must include an early warning system and provide for escalation of violations to senior management (including the firm's governing body).

Regulatory Objective: Generally, position limits are implemented to ensure market integrity, fairness, orderliness, and accurate pricing in the commodity markets. Commission regulation 23.601 thus seeks to ensure that SDs and MSPs have established the necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by the Commission, a DCM, or a SEF. As part of its Risk Management Program, § 23.601 is intended to ensure that established position limits are not breached by the SD or MSP.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and comparable to and as comprehensive as section 4s(j)(1) of the CEA and Commission regulation § 23.601.

OSFI states that the monitoring of position limits is an aspect of the risk management and compliance framework for each bank. Specifically:

- OSFI's LCM Guideline requires Canadian banks to establish an enterprise-wide framework of regulatory risk management controls to ensure that regulatory compliance risks are managed effectively. The required LCM framework sets out OSFI's expectations and banks are required to demonstrate that they satisfy those expectations in particular circumstances; and
- OSFI expects that each bank's LCM framework will include identification, assessment, communication, and maintenance of applicable regulatory requirements, compliance procedures, monitoring procedures, and reporting procedures.[42]
- The applicants represent to the Commission that the OSFI requirement to monitor the effectiveness of procedures to ensure compliance with regulatory obligations includes applicable regulatory obligations of an SD or MSP under the CEA, Commission regulations, and position limits set by the Commission, a DCM, or a SEF. OSFI expects banks to comply with all applicable regulatory requirements, which includes legislation, regulations, and regulatory directives applicable to the activities of the bank or its subsidiaries worldwide.

Commission Determination: The Commission finds that the OSFI standards specified above are generally identical in intent to § 23.601 by requiring SDs and MSPs to establish necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by applicable laws and regulations, including those of the Commission, a DCM, or a SEF. Specifically, the Commission finds that the OSFI standards specified above, while not specific to the issue of position limit compliance, nevertheless comprehensively require SDs and MSPs to monitor for regulatory compliance generally, including monitoring for compliance with position limits set pursuant to applicable law (including the CEA and Commission regulations) and the responsibility of senior management (including the board of directors) for such compliance.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the compliance monitoring requirements of the OSFI standards, as specified above, are comparable to and as comprehensive as § 23.601. For the avoidance of doubt, the Commission notes that this determination may not be relied on to relieve an SD or MSP from its obligation to strictly comply with any applicable

[40] In addition to the foregoing, the applicant notes that the Canadian Bank SDs may be subject to heightened standards for their derivatives business in the near future under regulatory recommendations that would require registrants to establish, maintain and apply systems, policies and procedures that establish robust compliance and risk management systems specifically for their derivatives business. *See* CSA Consultation Paper 91–407.

[41] The setting of position limits by the Commission, a DCM, or a SEF is subject to requirements under the CEA and Commission regulations other than § 23.601. The setting of position limits and compliance with such limits is not subject to the Commission's substituted compliance regime.

[42] In addition to the foregoing, the applicant also submitted various guidelines and required best practices concerning the setting of internal risk tolerance limits and monitoring for compliance with such internal limits. Although the Commission recognizes these as prudent risk management practices, the Commission does not believe that these provisions are relevant for a comparability determination with respect to § 23.601 because § 23.601 requires monitoring for compliance with external position limits set by the Commission, a DCM, or a SEF.

position limit established by the Commission, a DCM, or a SEF.

3. Diligent Supervision (§ 23.602)

Commission Requirement: Commission regulation 23.602 implements section 4s(h)(1)(B) of the CEA and requires each SD and MSP to establish a system to diligently supervise all activities relating to its business performed by its partners, members, officers, employees, and agents. The system must be reasonably designed to achieve compliance with the CEA and CFTC regulations. Commission regulation 23.602 requires that the supervisory system must specifically designate qualified persons with authority to carry out the supervisory responsibilities of the SD or MSP for all activities relating to its business as an SD or MSP.

Regulatory Objective: The Commission's diligent supervision rule seeks to ensure that SDs and MSPs strictly comply with the CEA and the Commission's rules. To this end, through § 23.602, the Commission seeks to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and comparable to and as comprehensive as section 4s(h)(1)(B) of the CEA and Commission regulation 23.602.

- Section 157 of the Bank Act imposes a duty on the board of directors of a bank to manage or supervise the management of the business and affairs of the bank.
- OSFI's Supervisory Framework states that the board and senior management are designated as ultimately accountable for the safety and soundness of the bank.
- OSFI's Corporate Governance Guideline states that banks should appoint a senior officer, identified as the Chief Risk Officer ("CRO"), who has responsibility for the oversight of all relevant risks across the firm. The CRO must be identified in the bank's license application along with a description of the resources and authority allocated to discharge his duties. Like the CCO, the CRO should have sufficient stature and authority within the organization, be independent from operational management, have unfettered access and, for functional purposes, a direct reporting line to the board of directors or risk committee.

In addition, the applicant states that diligent supervision is an aspect of the risk management and compliance framework for each bank, which includes requirements for controls and monitoring. Specifically:

- OSFI's LCM Guideline requires Canadian banks to establish an enterprise-wide framework of regulatory risk management controls to ensure that regulatory compliance risks are managed effectively. The required LCM framework sets out OSFI's expectations and banks are required to demonstrate that they satisfy those expectations in particular circumstances; and
- OSFI expects that each bank's LCM framework will include identification, assessment, communication, and maintenance of applicable regulatory requirements, compliance procedures, monitoring procedures, and reporting procedures.
- The applicants represent to the Commission that the OSFI requirement to monitor the effectiveness of procedures to ensure compliance with regulatory obligations includes applicable regulatory obligations of an SD or MSP under the CEA and Commission regulations. OSFI expects banks to comply with all applicable regulatory requirements, which includes legislation, regulations, and regulatory directives applicable to the activities of the bank or its subsidiaries worldwide.

Commission Determination: The Commission finds that the provisions of the Bank Act and the OSFI standards specified above are generally identical in intent to § 23.602 because such standards seek to ensure that SDs and MSPs strictly comply with applicable law, which would include the CEA and the Commission's regulations. Through the provisions of the Bank Act and the OSFI standards specified above, Canadian laws and regulations seek to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with applicable law, which would include the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the internal supervision requirements of the Bank Act and the OSFI standards, as specified above, are comparable to and as comprehensive as § 23.602.

4. Business Continuity and Disaster Recovery (§ 23.603)

Commission Requirement: To ensure the proper functioning of the swaps markets and the prevention of systemic risk more generally, Commission regulation 23.603 requires each SD and MSP, as part of its risk management program, to establish a business continuity and disaster recovery plan that includes procedures for, and the maintenance of, back-up facilities, systems, infrastructure, personnel, and other resources to achieve the timely recovery of data and documentation and to resume operations generally within the next business day after the disruption.

Regulatory Objective: Commission regulation 23.603 is intended to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, this requirement seeks to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan within one business day, if necessary.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and comparable to and as comprehensive as Commission regulation 23.603.

The applicant has represented that business continuity and disaster recovery are aspects of the risk management framework for each bank. Specifically:

- OSFI's Derivatives Best Practice Guideline requires banks to regularly assess contingency plans to deal with operations and systems risks.
- OSFI's Outsourcing of Business Activities, Functions and Processes Guideline requires banks that outsource functions to ensure that adequate continuity and disaster recovery are in place.
- OSFI's Supervisory Framework subjects each bank to a "Business Continuity & Disaster Recovery Preparedness Cross Sector Review" that is divided into three broad sections: Structure, Operational Management, and Controls & Oversight. Pursuant to such review, OSFI ensures: the existence of a plan for both business continuity and disaster recovery; that such plans have essential components related to identification of documents, data, staff, supervisory personnel, back-up locations, third party disruptions,

etc.; that plans are distributed to all employees; that appropriate emergency contacts are identified; that plans are reviewed at least annually; that plans are subject to comprehensive testing and audit; and that records related to developing and maintaining the plans are maintained in accordance with banking supervisory guidelines and are accessible to OSFI.

Commission Determination: The Commission finds that the OSFI standards specified above are generally identical in intent to § 23.603 because such standards seek to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, the Commission finds that the OSFI standards specified above seek to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan in a timely manner.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the business continuity and disaster recovery requirements of the OSFI standards, as specified above, are comparable to and as comprehensive as § 23.603.

5. Conflicts of Interest (§ 23.605)

Commission Requirement: Section 4s(j)(5) of the CEA and Commission regulation 23.605(c) generally require each SD or MSP to establish structural and institutional safeguards to ensure that the activities of any person within the firm relating to research or analysis of the price or market for any commodity or swap are separated by appropriate informational partitions within the firm from the review, pressure, or oversight of persons whose involvement in pricing, trading, or clearing activities might potentially bias their judgment or supervision.

In addition, section 4s(j)(5) of the CEA and Commission regulation 23.605(d)(1) generally prohibits an SD or MSP from directly or indirectly interfering with or attempting to influence the decision of any clearing unit of any affiliated clearing member of a DCO to provide clearing services and activities to a particular customer, including:

- Whether to offer clearing services to a particular customer;
- Whether to accept a particular customer for clearing derivatives;
- Whether to submit a customer's transaction to a particular DCO;
- Whether to set or adjust risk tolerance levels for a particular customer; or
- Whether to set a customer's fees based on criteria other than those generally available and applicable to other customers.

Commission regulation 23.605(d)(2) generally requires each SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of any affiliated clearing member of a DCO to reasonably ensure compliance with the Act and the prohibitions set forth in § 23.605(d)(1) outlined above.

The Commission observes that § 23.605(d) works in tandem with Commission regulation 1.71, which requires FCMs that are clearing members of a DCO and affiliated with an SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of the FCM to reasonably ensure compliance with the Act and the prohibitions set forth in § 1.71(d)(1), which are the same as the prohibitions set forth in § 23.605(d)(1) outlined above.

Finally, § 23.605(e) requires that each SD or MSP have policies and procedures that mandate the disclosure to counterparties of material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a swap execution facility or DCM or to clear a derivative through a DCO.

Regulatory Objective: Commission regulation 23.605(c) seeks to ensure that research provided to the general public by an SD or MSP is unbiased and free from the influence of the interests of an SD or MSP arising from the SD's or MSP's trading business.

In addition, the § 23.605(d) (working in tandem with § 1.71) seeks to ensure open access to the clearing of swaps by requiring that access to and the provision of clearing services provided by an affiliate of an SD or MSP are not influenced by the interests of an SD's or MSP's trading business.

Finally, § 23.605(e) seeks to ensure equal access to trading venues and clearinghouses, as well as orderly and fair markets, by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and comparable to and as comprehensive as Commission regulation 23.605(c).

The Bank Act subsection 157(2)(c), as well as the Competition Act, requires that directors of a bank establish procedures to resolve conflicts of interest, including techniques for the identification and remediation of potential conflict situations, tied selling, exclusive dealing, and refusal to deal, and for restricting the use of confidential information.

The Bank Act subsection 157(2)(b) requires the directors of a bank to have a review committee to ensure compliance with the self-dealing provisions of the Bank Act, while 157(2)(d) requires that banks designate a committee of the board of directors to monitor the conflict of interest procedures.

The Bank Act subsection 459.1(1) prohibits a bank from imposing undue pressure on, or coercing a person to obtain a product or service from a particular person, including the bank and any of its affiliates, as a condition for obtaining another product or service from the bank.

The Bank Act subsection 459.1(4.1) requires a bank to disclose coercive tied selling arrangements.

OSFI's Supervisory Framework requires monitoring of conflicts of interest through a bank's risk management program.

The applicants have represented to the Commission that OSFI, in the process of its oversight and enforcement of the foregoing Canadian standards, would require any SD or MSP subject to such standards to resolve or mitigate conflicts of interests in the provision of clearing services by a clearing member of a DCO that is an affiliate of the SD or MSP, or the decision of a counterparty to execute a derivative on a SEF or DCM, or clear a derivative through a DCO, through appropriate information firewalls and disclosures.

Commission Determination: The Commission finds that the Bank Act standards specified above with respect to conflicts of interest that may arise in producing or distributing research are generally identical in intent to § 23.605(c) because such standards seek to ensure that research provided to the general public by an SD is unbiased and free from the influence of the interests of an SD arising from the SD's trading business.

With respect to conflicts of interest that may arise in the provision of clearing services by an affiliate of an SD or MSP, the Commission further finds that although the general conflicts of interest prevention requirements under the Bank Act standards specified above

do not require with specificity that access to and the provision of clearing services provided by an affiliate of an SD or MSP not be improperly influenced by the interests of an SD's or MSP's trading business, such general requirements would require prevention and remediation of such improper influence when recognized or discovered. Thus such standards would ensure open access to clearing.

Finally, although not as specific as the requirements of § 23.605(e) (Undue influence on counterparties), the Commission finds that the general disclosure requirements of the Bank Act standards specified above would ensure equal access to trading venues and clearinghouses by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the requirements found in the Bank Act standards specified above in relation to conflicts of interest are comparable to and as comprehensive as § 23.605.

6. Availability of Information for Disclosure and Inspection (§ 23.606)

Commission Requirement: Commission regulation 23.606 implements sections 4s(j)(3) and (4) of the CEA, and requires each SD and MSP to disclose to the Commission, and an SD's or MSP's U.S. prudential regulator (if any) comprehensive information about its swap activities, and to establish and maintain reliable internal data capture, processing, storage, and other operational systems sufficient to capture, process, record, store, and produce all information necessary to satisfy its duties under the CEA and Commission regulations. Such systems must be designed to provide such information to the Commission and an SD's or MSP's U.S. prudential regulator within the time frames set forth in the CEA and Commission regulations and upon request.

Regulatory Objective: Commission regulation 23.606 seeks to ensure that each SD and MSP captures and maintains comprehensive information about their swap activities, and is able to retrieve and disclose such information to the Commission and its U.S. prudential regulator, if any, as necessary for compliance with the CEA and the Commission's regulations and for purposes of Commission oversight, as well as oversight by the SD's or MSP's U.S. prudential regulator, if any.

The Commission observes that it would be impossible to meet the regulatory objective of § 23.606 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.606 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and comparable to and as comprehensive as Commission regulation 23.606.

OSFI relies on general reporting obligations of Canadian banks and OSFI's monitoring function under the OSFI Supervisory Framework with respect to availability of information for disclosure and inspection. Specifically, banks are expected to have appropriate policies and procedures in place to ensure that all regulatory filings are received by OSFI within specified timeframes and are error free. Banks are subject to penalties for late or erroneous filings pursuant to OSFI's Late and Erroneous Filing Penalty Framework.

With respect to data capture and retention, as part of the bank licensing process, OSFI must approve a bank's operational risk management policies, including policies related to information technology, information management and security, and records retention.

As part of the OSFI Supervisory Framework, OSFI generally requires banks to establish and maintain an enterprise-wide LCM framework. OSFI expects the LCM framework to include "Adequate Documentation" as one of its key controls. As set forth in the OSFI Derivatives Best Practice Guideline, each bank should have mechanisms in place to assure the confirmation, maintenance and safeguarding of derivatives contract documentation. In particular, it states:

> [t]he design of information systems will vary according to the risks demanded by the scope and complexity of an institution's involvement in derivatives. The degree of accuracy and timeliness of information processing should be sufficient to meet an institution's risk exposure monitoring needs. Appropriate information processing and reporting capabilities should be put in place and fully operational.

Commission Determination: The Commission finds that the OSFI standards specified above are generally identical in intent to § 23.606 because such standards seek to ensure that each SD and MSP captures and stores comprehensive information about their swap activities, and are able to retrieve and disclose such information as necessary for compliance with applicable law and for purposes of regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the OSFI standards with respect to the availability of information for inspection and disclosure, as specified above, are comparable to, and as comprehensive as, § 23.606, with the exception of § 23.606(a)(2) concerning the requirement that an SD or MSP make information required by § 23.606(a)(1) available promptly upon request to Commission staff and the staff of an applicable U.S. prudential regulator. The applicant has not submitted any provision of law or regulations applicable in Canada upon which the Commission could make a finding that SDs and MSPs would be required to retrieve and disclose comprehensive information about their swap activities to the Commission or any U.S. prudential regulator as necessary for compliance with the CEA and Commission regulations, and for purposes of Commission oversight and the oversight of any U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of the OSFI standards are comparable to and as comprehensive as § 23.606(a)(2), any SD or MSP to which both § 23.606 and the OSFI standards specified above are applicable would generally be deemed to be in compliance with § 23.606(a)(2) if that SD or MSP complies with the OSFI standards specified above, subject to compliance with the requirement that it produce information to Commission staff and the staff of an applicable U.S. prudential regulator in accordance with § 23.606(a)(2).

7. Clearing Member Risk Management (§ 23.609)

Commission Requirement: Commission regulation 23.609 generally requires each SD or MSP that is a clearing member of a DCO to:

- Establish risk-based limits based on position size, order size, margin requirements, or similar factors;
- Screen orders for compliance with the risk-based limits;

- Monitor for adherence to the risk-based limits intra-day and overnight;
- Conduct stress tests under extreme but plausible conditions of all positions at least once per week;
- Evaluate its ability to meet initial margin requirements at least once per week;
- Evaluate its ability to meet variation margin requirements in cash at least once per week;
- Evaluate its ability to liquidate positions it clears in an orderly manner, and estimate the cost of liquidation; and
- Test all lines of credit at least once per year.

Regulatory Objective: Through Commission regulation 23.609, the Commission seeks to ensure the financial integrity of the markets and the clearing system, to avoid systemic risk, and to protect customer funds. Effective risk management by SDs and MSPs that are clearing members is essential to achieving these objectives. A failure of risk management can cause a clearing member to become insolvent and default to a DCO. Such default can disrupt the markets and the clearing system and harm customers.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and comparable to and as comprehensive as Commission regulation 23.609.

OSFI stated that, to the extent that any bank is a clearing member, risk management specifically for clearing members is an aspect of the risk management framework.

OSFI Derivatives Best Practice Guideline states that banks should have knowledgeable individuals or units responsible for risk monitoring and control functions, including the responsibility for actively monitoring transactions and positions for adherence to internal policy limits. Moreover, stress tests should be performed regularly and should account for abnormally large market swings and periods of prolonged inactivity, while considering the effect of price changes on the "mid-market value" of the portfolio.

More generally, the OSFI Corporate Governance Guideline requires that each bank establish a risk appetite framework ("RAF") that:

- Guides the amount of risk the bank is willing to accept in pursuit of its strategic and business objectives.
- Sets basic goals, benchmarks, parameters, and limits, and should consider all applicable types of risks.
- Contains all elements required by an annex to the Corporate Governance Guideline, including a risk appetite statement, specific risk tolerance limits, and processes for implementation of the RAF.

Further, the OSFI Corporate Governance Guideline states that DSIBs should establish a dedicated risk committee to oversee risk management on an enterprise-wide basis, and that the oversight of the risk management activities of the bank are to be independent from operational management, adequately resourced, and have appropriate status and visibility.

The OSFI Derivatives Best Practice Guideline states that each bank should ensure that each derivative product traded is subject to a product authorization signed off by senior management, and sets forth OSFI's expectations with respect to having documented policies and procedures for risk management, creating risk tolerance limits, and measuring, reporting, managing, and controlling the risks associated with the derivatives business, including market, currency, interest rate, equity price, commodity price, credit, settlement, liquidity, operational, and legal risks.

OSFI represents that its oversight pursuant to the Supervisory Framework will assess the extent to which the risk management function integrates policies, practices, and limits with day-to-day business activities and with the bank's strategic, capital, and liquidity management policies. Under the Supervisory Framework, OSFI also will assess whether the risk management function effectively monitors risk positions against approved limits and ensures that material breaches are addressed on a timely basis. OSFI represents that it will look at various indicators, including the extent to which the bank proactively updates its policies, practices, and limits in response to changes in the industry and in the institution's strategy, business activities and risk tolerances.[43]

Specifically, OSFI has represented to the Commission that, in the process of its oversight and enforcement of the foregoing Canadian law and regulations, any SD or MSP subject to such standards that is a clearing member of a DCO would be required to comply with clearing member risk management requirements comparable to Commission regulation 23.609.

Commission Determination: The Commission finds that the OSFI standards specified above are generally identical in intent to § 23.609 because such standards seek to ensure the financial integrity of the markets and the clearing system, to avoid systemic risk, and to protect customer funds.

The Commission notes that the OSFI standards specified above are not as specific as § 23.609 with respect to ensuring that SDs and MSPs that are clearing members of a DCO establish detailed procedures and limits for clearing member risk management purposes. Nevertheless, the Commission finds that the general requirements under the OSFI standards specified above, implemented in the context of clearing member risk management and pursuant to the representations of OSFI, meet the Commission's regulatory objective specified above.

Based on the foregoing and the representations above, the Commission hereby determines that the clearing member risk management requirements of the Canadian law and regulations specified above are comparable to and as comprehensive as § 23.609.

C. Swap Data Recordkeeping (§§ 23.201 and 23.203)

Commission Requirement: Sections 4s(f)(1)(B) and 4s(g)(1) of the CEA, and Commission regulation 23.201 generally require SDs and MSPs to retain records of each transaction, each position held, general business records (including records related to complaints and sales and marketing materials), records related to governance, financial records, records of data reported to SDRs, and records of real-time reporting data along with a record of the date and time the SD or MSP made such reports. Transaction records must be kept in a form and manner identifiable and searchable by transaction and counterparty.

Commission regulation 23.203, requires SDs and MSPs to maintain records of a swap transaction until the termination, maturity, expiration, transfer, assignment, or novation date of the transaction, and for a period of five years after such date. Records must be "readily accessible" for the first 2 years of the 5 year retention period (consistent with § 1.31).

The Commission notes that the comparability determination below with respect to §§ 23.201 and 23.203 encompasses both swap data recordkeeping generally and swap data recordkeeping relating to complaints

[43] In addition to the foregoing, the applicant notes that the Canadian Bank SDs may be subject to heightened standards for their derivatives business in the near future under regulatory recommendations that would require registrants to establish, maintain and apply systems, policies and procedures that establish robust compliance and risk management systems specifically for their derivatives business. *See* CSA Consultation Paper 91–407.

and marketing and sales materials in accordance with § 23.201(b)(3) and (4).[44]

Regulatory Objective: Through the Commission's regulations requiring SDs and MSPs to keep comprehensive records of their swap transactions and related data, the Commission seeks to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

The Commission's regulations require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

By requiring comprehensive records of swap data, the Commission seeks to ensure that SDs and MSPs employ effective risk management, and strictly comply with Commission regulations. Further, such records facilitate effective regulatory oversight.

The Commission observes that it would be impossible to meet the regulatory objective of §§ 23.201 and 23.203 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.203 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Canadian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Canada are in full force and effect in Canada, and comparable to and as comprehensive as sections 4s(f)(1)(B) and 4s(g)(1) of the CEA and §§ 23.201 and 23.203.

OSFI's Supervisory Framework requires banks to establish and maintain an enterprise-wide LCM framework of regulatory risk management controls, and these controls include oversight functions that are independent of the activities they oversee. OSFI expects the LCM framework to include "Adequate Documentation" as one of its key controls.

As set forth in the OSFI Derivatives Best Practice Guideline, each bank should have mechanisms in place to assure the confirmation, maintenance, and safeguarding of derivatives contract documentation. In particular, it states:

> [t]he design of information systems will vary according to the risks demanded by the scope and complexity of an institution's involvement in derivatives. The degree of accuracy and timeliness of information processing should be sufficient to meet an institution's risk exposure monitoring needs. Appropriate information processing and reporting capabilities should be put in place and fully operational.

Finally, Sections 238, 239 and 597 of the Bank Act generally require banks carrying on business in Canada to maintain records in Canada and to ensure that OSFI can access in Canada any records necessary to enable OSFI to fulfill its supervisory mandate.

Commission Determination: The Commission finds that the Bank Act and OSFI standards specified above are generally identical in intent to §§ 23.201 and 23.203 because such standards seek to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

In addition, the Commission finds that the Bank Act and OSFI standards specified above require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

Finally, the Commission finds that the Bank Act and OSFI standards specified above, by requiring comprehensive records of swap data, seek to ensure that SDs and MSPs employ effective risk management, seek to ensure that SDs and MSPs strictly comply with applicable regulatory requirements (including the CEA and Commission regulations), and that such records facilitate effective regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements of the Bank Act and the OSFI standards with respect to swap data recordkeeping, as specified above, are comparable to, and as comprehensive as, §§ 23.201 and 23.203, with the exception of § 23.203(b)(2) concerning the requirement that an SD or MSPs make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator. The applicant has not submitted any provision of law or regulations applicable in Canada upon which the Commission could make a finding that SDs and MSPs would be required to make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of the Bank Act and the OSFI standards are comparable to and as comprehensive as § 23.203(b)(2), any SD or MSP to which both § 23.203 and the Bank Act and OSFI standards specified above are applicable would generally be deemed to be in compliance with § 23.203(b)(2) if that SD or MSP complies with the Bank Act and OSFI standards specified above, subject to compliance with the requirement that it make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator in accordance with § 23.203(b)(2).

Issued in Washington, DC on December 20, 2013, by the Commission.

Christopher J. Kirkpatrick,

Deputy Secretary of the Commission.

Appendices to Comparability Determination for Canada: Certain Entity-Level Requirements

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Chilton and Wetjen voted in the affirmative. Commissioner O'Malia voted in the negative.

Appendix 2—Joint Statement of Chairman Gary Gensler and Commissioners Bart Chilton and Mark Wetjen

We support the Commission's approval of broad comparability determinations that will be used for substituted compliance purposes. For each of the six jurisdictions that has registered swap dealers, we carefully reviewed each regulatory provision of the foreign jurisdictions submitted to us and compared the provision's intended outcome to the Commission's own regulatory objectives. The resulting comparability determinations for entity-level requirements permit non-U.S. swap dealers to comply with regulations in their home jurisdiction as a substitute for compliance with the relevant Commission regulations.

These determinations reflect the Commission's commitment to coordinating our efforts to bring transparency to the swaps market and reduce its risks to the public. The comparability findings for the entity-level requirements are a testament to the comparability of these regulatory systems as we work together in building a strong international regulatory framework.

In addition, we are pleased that the Commission was able to find comparability with respect to swap-specific transaction-

[44] *See* the Guidance for a discussion of the availability of substituted compliance with respect to swap data recordkeeping, 78 FR 45332–33.

level requirements in the European Union and Japan.

The Commission attained this benchmark by working cooperatively with authorities in Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland to reach mutual agreement. The Commission looks forward to continuing to collaborate with . both foreign authorities and market participants to build on this progress in the months and years ahead.

Appendix 3—Statement of Dissent by Commissioner Scott D. O'Malia

I respectfully dissent from the Commodity Futures Trading Commission's ("Commission") approval of the Notices of Comparability Determinations for Certain Requirements under the laws of Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland (collectively, "Notices"). While I support the narrow comparability determinations that the Commission has made, moving forward, the Commission must collaborate with foreign regulators to harmonize our respective regimes consistent with the G–20 reforms.

However, I cannot support the Notices because they: (1) Are based on the legally unsound cross-border guidance ("Guidance");[1] (2) are the result of a flawed substituted compliance process; and (3) fail to provide a clear path moving forward. If the Commission's objective for substituted compliance is to develop a narrow rule-by-rule approach that leaves unanswered major regulatory gaps between our regulatory framework and foreign jurisdictions, then I believe that the Commission has successfully achieved its goal today.

Determinations Based on Legally Unsound Guidance

As I previously stated in my dissent, the Guidance fails to articulate a valid statutory foundation for its overbroad scope and inconsistently applies the statute to different activities.[2] Section 2(i) of the Commodity Exchange Act ("CEA") states that the Commission does not have jurisdiction over foreign activities unless "those activities have a direct and significant connection with activities in, or effect on, commerce of the United States . . ."[3] However, the Commission never properly articulated how and when this limiting standard on the Commission's extraterritorial reach is met, which would trigger the application of Title VII of the Dodd-Frank Act[4] and any Commission regulations promulgated thereunder to swap activities that are outside of the United States. Given this statutorily unsound interpretation of the Commission's extraterritorial authority, the Commission often applies CEA section 2(i) inconsistently and arbitrarily to foreign activities.

Accordingly, because the Commission is relying on the legally deficient Guidance to make its substituted compliance determinations, and for the reasons discussed below, I cannot support the Notices. The Commission should have collaborated with foreign regulators to agree on and implement a workable regime of substituted compliance, and then should have made determinations pursuant to that regime.

Flawed Substituted Compliance Process

Substituted compliance should not be a case of picking a set of foreign rules identical to our rules, determining them to be "comparable," but then making no determination regarding rules that require extensive gap analysis to assess to what extent each jurisdiction is, or is not, comparable based on overall outcomes of the regulatory regimes. While I support the narrow comparability determinations that the Commission has made, I am concerned that in a rush to provide some relief, the Commission has made substituted compliance determinations that only afford narrow relief and fail to address major regulatory gaps between our domestic regulatory framework and foreign jurisdictions. I will address a few examples below.

First, earlier this year, the OTC Derivatives Regulators Group ("ODRG") agreed to a number of substantive understandings to improve the cross-border implementation of over-the-counter derivatives reforms.[5] The ODRG specifically agreed that a flexible, outcomes-based approach, based on a broad category-by-category basis, should form the basis of comparability determinations.[6]

However, instead of following this approach, the Commission has made its comparability determinations on a rule-by-rule basis. For example, in Japan's Comparability Determination for Transaction-Level Requirements, the Commission has made a positive comparability determination for some of the detailed requirements under the swap trading relationship documentation provisions, but not for other requirements.[7] This detailed approach clearly contravenes the ODRG's understanding.

Second, in several areas, the Commission has declined to consider a request for a comparability determination, and has also failed to provide an analysis regarding the extent to which the other jurisdiction is, or is not, comparable. For example, the Commission has declined to address or provide any clarity regarding the European Union's regulatory data reporting determination, even though the European Union's reporting regime is set to begin on February 12, 2014. Although the Commission has provided some limited relief with respect to regulatory data reporting, the lack of clarity creates unnecessary uncertainty, especially when the European Union's reporting regime is set to begin in less than two months.

Similarly, Japan receives no consideration for its mandatory clearing requirement, even though the Commission considers Japan's legal framework to be comparable to the U.S. framework. While the Commission has declined to provide even a partial comparability determination, at least in this instance the Commission has provided a reason: The differences in the scope of entities and products subject to the clearing requirement.[8] Such treatment creates uncertainty and is contrary to increased global harmonization efforts.

Third, in the Commission's rush to meet the artificial deadline of December 21, 2013, as established in the Exemptive Order Regarding Compliance with Certain Swap Regulations ("Exemptive Order"),[9] the Commission failed to complete an important piece of the cross-border regime, namely, supervisory memoranda of understanding ("MOUs") between the Commission and fellow regulators.

I have previously stated that these MOUs, if done right, can be a key part of the global harmonization effort because they provide mutually agreed-upon solutions for differences in regulatory regimes.[10] Accordingly, I stated that the Commission should be able to review MOUs alongside the respective comparability determinations and vote on them at the same time. Without these MOUs, our fellow regulators are left wondering whether and how any differences, such as direct access to books and records, will be resolved.

Finally, as I have consistently maintained, the substituted compliance process should allow other regulatory bodies to engage with the full Commission.[11] While I am pleased that the Notices are being voted on by the Commission, the full Commission only gained access to the comment letters from foreign regulators on the Commission's comparability determination draft proposals a few days ago. This is hardly a transparent process.

Unclear Path Forward

Looking forward to next steps, the Commission must provide answers to several outstanding questions regarding these comparability determinations. In doing so, the Commission must collaborate with foreign regulators to increase global harmonization.

First, there is uncertainty surrounding the timing and outcome of the MOUs. Critical

[11] http://www.cftc.gov/PressRoom/SpeechesTestimony/omaliastatement071213b.

questions regarding information sharing, cooperation, supervision, and enforcement will remain unanswered until the Commission and our fellow regulators execute these MOUs.

Second, the Commission has issued time-limited no-action relief for the swap data repository reporting requirements. These comparability determinations will be done as separate notices. However, the timing and process for these determinations remain uncertain.

Third, the Commission has failed to provide clarity on the process for addressing the comparability determinations that it declined to undertake at this time. The Notices only state that the Commission may address these requests in a separate notice at a later date given further developments in the law and regulations of other jurisdictions. To promote certainty in the financial markets, the Commission must provide a clear path forward for market participants and foreign regulators.

The following steps would be a better approach: (1) The Commission should extend the Exemptive Order to allow foreign regulators to further implement their regulatory regimes and coordinate with them to implement a harmonized substituted compliance process; (2) the Commission should implement a flexible, outcomes-based approach to the substituted compliance process and apply it similarly to all jurisdictions; and (3) the Commission should work closely with our fellow regulators to expeditiously implement MOUs that resolve regulatory differences and address regulatory oversight issues.

Conclusion

While I support the narrow comparability determinations that the Commission has made, it was my hope that the Commission would work with foreign regulators to implement a substituted compliance process that would increase the global harmonization effort. I am disappointed that the Commission has failed to implement such a process.

I do believe that in the longer term, the swaps regulations of the major jurisdictions will converge. At this time, however, the Commission's comparability determinations have done little to alleviate the burden of regulatory uncertainty and duplicative compliance with both U.S. and foreign regulations.

The G–20 process delineated and put in place the swaps market reforms in G–20 member nations. It is then no surprise that the Commission must learn to coordinate with foreign regulators to minimize confusion and disruption in bringing much needed clarity to the swaps market. For all these shortcomings, I respectfully dissent from the Commission's approval of the Notices.

BILLING CODE 6351–01–P

COMMODITY FUTURES TRADING COMMISSION

Comparability Determination for Hong Kong: Certain Entity-Level Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Comparability Determination for Certain Requirements under the laws of Hong Kong.

SUMMARY: The following is the analysis and determination of the Commodity Futures Trading Commission ("Commission") regarding certain parts of a request by the Hong Kong Monetary Authority ("HKMA") that the Commission determine that laws and regulations applicable in Hong Kong provide a sufficient basis for an affirmative finding of comparability with respect to the following regulatory obligations applicable to swap dealers ("SDs") and major swap participants ("MSPs") registered with the Commission: (i) Chief compliance officer; (ii) risk management; and (iii) swap data recordkeeping (collectively, the "Internal Business Conduct Requirements").

DATES: *Effective Date:* This determination will become effective immediately upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary Barnett, Director, 202–418–5977, *gbarnett@cftc.gov*, Frank Fisanich, Chief Counsel, 202–418–5949, *ffisanich@cftc.gov*, and August A. SUPPLEMENTARY INFORMATION:

I. Introduction

On July 26, 2013, the Commission published in the **Federal Register** its "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" (the "Guidance").[1] In the Guidance, the Commission set forth its interpretation of the manner in which it believes that section 2(i) of the Commodity Exchange Act ("CEA") applies Title VII's swap provisions to activities outside the U.S. and informed the public of some of the policies that it expects to follow, generally speaking, in applying Title VII and certain Commission regulations in contexts covered by section 2(i). Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations promulgated thereunder.

In addition to the Guidance, on July 22, 2013, the Commission issued the Exemptive Order Regarding Compliance with Certain Swap Regulations (the "Exemptive Order").[2] Among other things, the Exemptive Order provided time for the Commission to consider substituted compliance with respect to six jurisdictions where non-U.S. SDs are currently organized. In this regard, the Exemptive Order generally provided non-U.S. SDs and MSPs in the six jurisdictions with conditional relief from certain requirements of Commission regulations (those referred to as "Entity-Level Requirements" in the Guidance) until the earlier of December 21, 2013, or 30 days following the issuance of a substituted compliance determination.[3]

On July 12, 2013, the HKMA (the "applicant") submitted a request that the Commission determine that laws and regulations applicable in Hong Kong provide a sufficient basis for an affirmative finding of comparability with respect to certain Entity-Level Requirements, including the Internal Business Conduct Requirements.[4] The applicant provided Commission staff with updated submissions on August 8 and 19, 2013. On November 11, November 28, and December 6, 2013, the applicant further supplemented the application with corrections and additional materials. The following is

[1] 78 FR 45292 (July 26, 2013). The Commission originally published proposed and further proposed guidance on July 12, 2012 and January 7, 2013, respectively. *See* Cross-Border Application of Certain Swaps Provisions of the Commodity Exchange Act, 77 FR 41214 (July 12, 2012) and Further Proposed Guidance Regarding Compliance with Certain Swap Regulations, 78 FR 909 (Jan. 7, 2013).

[2] 78 FR 43785 (July 22, 2013).

[3] The Entity-Level Requirements under the Exemptive Order consist of 17 CFR 1.31, 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, 23.606, 23.608, 23.609, and parts 45 and 46 of the Commission's regulations.

[4] For purposes of this notice, the Internal Business Conduct Requirements consist of 17 CFR 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606.

the Commission's analysis and determination regarding the Internal Business Conduct Requirements, as detailed below.[5]

II. Background

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act[6] ("Dodd-Frank Act" or "Dodd-Frank"), which, in Title VII, established a new regulatory framework for swaps.

Section 722(d) of the Dodd-Frank Act amended the CEA by adding section 2(i), which provides that the swap provisions of the CEA (including any CEA rules or regulations) apply to cross-border activities when certain conditions are met, namely, when such activities have a "direct and significant connection with activities in, or effect on, commerce of the United States" or when they contravene Commission rules or regulations as are necessary or appropriate to prevent evasion of the swap provisions of the CEA enacted under Title VII of the Dodd-Frank Act.[7] In the three years since its enactment, the Commission has finalized 68 rules and orders to implement Title VII of the Dodd-Frank Act. The finalized rules include those promulgated under section 4s of the CEA, which address registration of SDs and MSPs and other substantive requirements applicable to SDs and MSPs. With few exceptions, the delayed compliance dates for the Commission's regulations implementing such section 4s requirements applicable to SDs and MSPs have passed and new SDs and MSPs are now required to be in full compliance with such regulations upon registration with the Commission.[8] Notably, the requirements under Title VII of the Dodd-Frank Act related to SDs and MSPs by their terms apply to all registered SDs and MSPs, irrespective of where they are located, albeit subject to the limitations of CEA section 2(i).

To provide guidance as to the Commission's views regarding the scope of the cross-border application of Title VII of the Dodd-Frank Act, the Commission set forth in the Guidance its interpretation of the manner in which it believes that Title VII's swap provisions apply to activities outside the U.S. pursuant to section 2(i) of the CEA. Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations. With respect to the standards forming the basis for any determination of comparability ("comparability determination" or "comparability finding"), the Commission stated:

> In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the applicable requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including but not limited to, the comprehensiveness of those requirement(s), the scope and objectives of the relevant regulatory requirement(s), the comprehensiveness of the foreign regulator's supervisory compliance program, as well as the home jurisdiction's authority to support and enforce its oversight of the registrant. In this context, comparable does not necessarily mean identical. Rather, the Commission would evaluate whether the home jurisdiction's regulatory requirement is comparable to and as comprehensive as the corresponding U.S. regulatory requirement(s).[9]

Upon a comparability finding, consistent with CEA section 2(i) and comity principles, the Commission's policy generally is that eligible entities may comply with a substituted compliance regime, subject to any conditions the Commission places on its finding, and subject to the Commission's retention of its examination authority and its enforcement authority.[10]

In this regard, the Commission notes that a comparability determination cannot be premised on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction, but rather on whether information relevant to the Commission's oversight of an SD or MSP would be directly available to the Commission and any U.S. prudential regulator of the SD or MSP.[11] The Commission's direct access to the books and records required to be maintained by an SD or MSP registered with the Commission is a core requirement of the CEA[12] and the Commission's regulations,[13] and is a condition to registration.[14]

III. Regulation of SDs and MSPs in Hong Kong

The HKMA administers the Hong Kong Banking Ordinance and is the government authority in Hong Kong responsible for maintaining monetary and banking stability.[15] Its main functions are:

- Maintaining currency stability within the framework of the Linked Exchange Rate system;
- Promoting the stability and integrity of the financial system, including the banking system;
- Helping to maintain Hong Kong's status as an international financial center, including the maintenance and development of Hong Kong's financial infrastructure; and
- Managing the Exchange Fund.

---

[5] This notice does not address swap data repository reporting ("SDR Reporting"). The Commission may provide a comparability determination with respect to the SDR Reporting requirement in a separate notice.

[6] Public Law 111–203, 124 Stat. 1376 (2010).

[7] 7 U.S.C. 2(i).

[8] The compliance dates are summarized on the Compliance Dates page of the Commission's Web site. (*http://www.cftc.gov/LawRegulation/DoddFrankAct/ComplianceDates/index.htm.*)

[9] 78 FR 45342–45.

[10] See the Guidance, 78 FR 45342–44.

[11] Under §§ 23.203 and 23.606, all records required by the CEA and the Commission's regulations to be maintained by a registered SD or MSP shall be maintained in accordance with Commission regulation 1.31 and shall be open for inspection by representatives of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

In its Final Exemptive Order Regarding Compliance with Certain Swap Regulations, 78 FR 858 (Jan. 7, 2013), the Commission noted that an applicant for registration as a SD or MSP must file a Form 7–R with the National Futures Association and that Form 7–R was being modified at that time to address existing blocking, privacy, or secrecy laws of foreign jurisdictions that applied to the books and records of SDs and MSPs acting in those jurisdictions. See id. at 871–72 n. 107. The modifications to Form 7–R were a temporary measure intended to allow SDs and MSPs to apply for registration in a timely manner in recognition of the existence of the blocking, privacy, and secrecy laws. In the Guidance, the Commission clarified that the change to Form 7–R impacts the registration application only and does not modify the Commission's authority under the CEA and its regulations to access records held by registered SDs and MSPs. Commission access to a registrant's books and records is a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto. The Commission has maintained an ongoing dialogue on a bilateral and multilateral basis with foreign regulators and with registrants to address books and records access issues and may consider appropriate measures where requested to do so.

[12] See e.g., sections 4s(f)(1)(C), 4s(j)(3) and (4) of the CEA.

[13] See e.g., §§ 23.203(b) and 23.606.

[14] See supra note 9.

[15] Because the applicant's request and the Commission's determinations herein are based on the comparability of the requirements applicable to Authorized Institutions ("AI") regulated by the HKMA, an SD or MSP that is not an AI, or is otherwise not subject to the requirements applicable to AIs upon which the Commission bases its determinations, may not be able to rely on the Commission's comparability determinations herein.

IV. Comparable and Comprehensiveness Standard

The Commission's comparability analysis will be based on a comparison of specific foreign requirements against the specific related CEA provisions and Commission regulations as categorized and described in the Guidance. As explained in the Guidance, within the framework of CEA section 2(i) and principles of international comity, the Commission may make a comparability determination on a requirement-by-requirement basis, rather than on the basis of the foreign regime as a whole.[16] In making its comparability determinations, the Commission may include conditions that take into account timing and other issues related to coordinating the implementation of reform efforts across jurisdictions.[17]

In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the corollary requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including, but not limited to:

- The comprehensiveness of those requirement(s),
- The scope and objectives of the relevant regulatory requirement(s),
- The comprehensiveness of the foreign regulator's supervisory compliance program, and
- The home jurisdiction's authority to support and enforce its oversight of the registrant.[18]

In making a comparability determination, the Commission takes an "outcome-based" approach. An "outcome-based" approach means that when evaluating whether a foreign jurisdiction's regulatory requirements are comparable to, and as comprehensive as, the corollary areas of the CEA and Commission regulations, the Commission ultimately focuses on regulatory outcomes (*i.e.*, the home jurisdiction's requirements do not have to be identical).[19] This approach recognizes that foreign regulatory systems differ and their approaches vary and may differ from how the Commission chose to address an issue, but that the foreign jurisdiction's regulatory requirements nonetheless achieve the regulatory outcome sought to be achieved by a certain provision of the CEA or Commission regulation.

In doing its comparability analysis the Commission may determine that no comparability determination can be made[20] and that the non-U.S. SD or non-U.S. MSP, U.S. bank that is an SD or MSP with respect to its foreign branches, or non-registrant, to the extent applicable under the Guidance, may be required to comply with the CEA and Commission regulations.

The starting point in the Commission's analysis is a consideration of the regulatory objectives of the foreign jurisdiction's regulation of swaps and swap market participants. As stated in the Guidance, jurisdictions may not have swap specific regulations in some areas, and instead have regulatory or supervisory regimes that achieve comparable and comprehensive regulation to the Dodd-Frank Act requirements, but on a more general, entity-wide, or prudential, basis.[21] In addition, portions of a foreign regulatory regime may have similar regulatory objectives, but the means by which these objectives are achieved with respect to swaps market activities may not be clearly defined, or may not expressly include specific regulatory elements that the Commission concludes are critical to achieving the regulatory objectives or outcomes required under the CEA and the Commission's regulations. In these circumstances, the Commission will work with the regulators and registrants in these jurisdictions to consider alternative approaches that may result in a determination that substituted compliance applies.[22]

Finally, the Commission will generally rely on an applicant's description of the laws and regulations of the foreign jurisdiction in making its comparability determination. The Commission considers an application to be a representation by the applicant that the laws and regulations submitted are in full force and effect, that the description of such laws and regulations is accurate and complete, and that, unless otherwise noted, the scope of such laws and regulations encompasses the swaps activities[23] of SDs and MSPs[24] in the relevant jurisdictions.[25] Further, as stated in the Guidance, the Commission expects that an applicant

---

[16] 78 FR 45343.

[17] 78 FR 45343.

[18] 78 FR 45343.

[19] 78 FR 45343. The Commission's substituted compliance program would generally be available for SDR Reporting, as outlined in the Guidance, only if the Commission has direct access to all of the data elements that are reported to a foreign trade repository pursuant to the substituted compliance program. Thus, direct access to swap data is a threshold matter to be addressed in a comparability evaluation for SDR Reporting. Moreover, the Commission explains in the Guidance that, due to its technical nature, a comparability evaluation for SDR Reporting "will generally entail a detailed comparison and technical analysis." A more particularized analysis will generally be necessary to determine whether data stored in a foreign trade repository provides for effective Commission use, in furtherance of the regulatory purposes of the Dodd-Frank Act. *See* 78 FR 45345.

[20] A finding of comparability may not be possible for a number of reasons, including the fact that the foreign jurisdiction has not yet implemented or finalized particular requirements.

[21] 78 FR 45343.

[22] As explained in the Guidance, such "approaches used will vary depending on the circumstances relevant to each jurisdiction. One example would include coordinating with the foreign regulators in developing appropriate regulatory changes or new regulations, particularly where changes or new regulations already are being considered or proposed by the foreign regulators or legislative bodies. As another example, the Commission may, after consultation with the appropriate regulators and market participants, include in its substituted compliance determination a description of the means by which certain swaps market participants can achieve substituted compliance within the construct of the foreign regulatory regime. The identification of the means by which substituted compliance is achieved would be designed to address the regulatory objectives and outcomes of the relevant Dodd-Frank Act requirements in a manner that does not conflict with a foreign regulatory regime and reduces the likelihood of inconsistent regulatory obligations. For example, the Commission may specify that [SDs] and MSPs in the jurisdiction undertake certain recordkeeping and documentation for swap activities that otherwise is only addressed by the foreign regulatory regime with respect to financial activities generally. In addition, the substituted compliance determination may include provisions for summary compliance and risk reporting to the Commission to allow the Commission to monitor whether the regulatory outcomes are being achieved. By using these approaches, in the interest of comity, the Commission would seek to achieve its regulatory objectives with respect to the Commission's registrants that are operating in foreign jurisdictions in a manner that works in harmony with the regulatory interests of those jurisdictions." 78 FR 45343–44.

[23] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under Part 23 (17 CFR Part 23) are limited in scope to the swaps activities of SDs and MSPs.

[24] No SD or MSP that is not legally required to comply with a law or regulation determined to be comparable may voluntarily comply with such law or regulation in lieu of compliance with the CEA and the relevant Commission regulation. Each SD or MSP that seeks to rely on a comparability determination is responsible for determining whether it is subject to the laws and regulations found comparable. Currently, there are no MSPs organized outside the U.S. and the Commission therefore cautions any non-financial entity organized outside the U.S. and applying for registration as an MSP to carefully consider whether the laws and regulations determined to be comparable herein are applicable to such entity.

[25] The Commission has provided the relevant foreign regulator(s) with opportunities to review and correct the applicant's description of such laws and regulations on which the Commission will base its comparability determination. The Commission relies on the accuracy and completeness of such review and any corrections received in making its comparability determinations. A comparability determination based on an inaccurate description of foreign laws and regulations may not be valid.

would notify the Commission of any material changes to information submitted in support of a comparability determination (including, but not limited to, changes in the relevant supervisory or regulatory regime) as, depending on the nature of the change, the Commission's comparability determination may no longer be valid.[26]

The Guidance provided a detailed discussion of the Commission's policy regarding the availability of substituted compliance[27] for the Internal Business Conduct Requirements.[28]

V. Supervisory Arrangement

In the Guidance, the Commission stated that, in connection with a determination that substituted compliance is appropriate, it would expect to enter into an appropriate memorandum of understanding ("MOU") or similar arrangement[29] with the relevant foreign regulator(s). Although existing arrangements would indicate a foreign regulator's ability to cooperate and share information, "going forward, the Commission and relevant foreign supervisor(s) would need to establish supervisory MOUs or other arrangements that provide for information sharing and cooperation in the context of supervising [SDs] and MSPs."[30]

The Commission is in the process of developing its registration and supervision regime for provisionally-registered SDs and MSPs. This new initiative includes setting forth supervisory arrangements with authorities that have joint jurisdiction over SDs and MSPs that are registered with the Commission and subject to U.S. law. Given the developing nature of the Commission's regime and the fact that the Commission has not negotiated prior supervisory arrangements with certain authorities, the negotiation of supervisory arrangements presents a unique opportunity to develop close working relationships between and among authorities, as well as highlight any potential issues related to cooperation and information sharing.

Accordingly, the Commission is negotiating such a supervisory arrangement with each applicable foreign regulator of an SD or MSP. The Commission expects that the arrangement will establish expectations for ongoing cooperation, address direct access to information,[31] provide for notification upon the occurrence of specified events, memorialize understandings related to on-site visits,[32] and include protections related to the use and confidentiality of non-public information shared pursuant to the arrangement.

These arrangements will establish a roadmap for how authorities will consult, cooperate, and share information. As with any such arrangement, however, nothing in these arrangements will supersede domestic laws or resolve potential conflicts of law, such as the application of domestic secrecy or blocking laws to regulated entities.

VI. Comparability Determination and Analysis

The following section describes the requirements imposed by specific sections of the CEA and the Commission's regulations for the Internal Business Conduct Requirements that are the subject of this comparability determination, and the Commission's regulatory objectives with respect to such requirements. Immediately following a description of the requirement(s) and regulatory objective(s) of the specific Internal Business Conduct Requirements that the requestor submitted for a comparability determination, the Commission provides a description of the foreign jurisdiction's comparable laws, regulations, or rules and whether such laws, regulations, or rules meet the applicable regulatory objective.

The Commission's determinations in this regard and the discussion in this section are intended to inform the public of the Commission's views regarding whether the foreign jurisdiction's laws, regulations, or rules may be comparable and comprehensive as those requirements in the Dodd-Frank Act (and Commission regulations promulgated thereunder) and therefore, may form the basis of substituted compliance. In turn, the public (in the foreign jurisdiction, in the United States, and elsewhere) retains its ability to present facts and circumstances that would inform the determinations set forth in this notice.

As was stated in the Guidance, the Commission recognizes the complex and dynamic nature of the global swap market and the need to take an adaptable approach to cross-border issues, particularly as it continues to work closely with foreign regulators to address potential conflicts with respect to each country's respective regulatory regime. In this regard, the Commission may review, modify, or expand the determinations herein in light of comments received and future developments.

A. Chief Compliance Officer (§ 3.3)

Commission Requirement: Implementing section 4s(k) of the CEA, Commission regulation 3.3 generally sets forth the following requirements for SDs and MSPs:

- An SD or MSP must designate an individual as Chief Compliance Officer ("CCO");
- The CCO must have the responsibility and authority to develop the regulatory compliance policies and procedures of the SD or MSP;

[26] 78 FR 45345.

[27] *See* 78 FR 45348–50. The Commission notes that registrants and other market participants are responsible for determining whether substituted compliance is available pursuant to the Guidance based on the comparability determination contained herein (including any conditions or exceptions), and its particular status and circumstances.

[28] This notice does not address § 23.608 (Restrictions on counterparty clearing relationships) nor § 23.609 (Clearing member risk management). The Commission declines to take up the request for a comparability determination with respect to these regulations due to the Commission's view that there are not laws or regulations applicable in Hong Kong to compare with the prohibitions and requirements of §§ 23.608 or 23.609. The Commission may provide a comparability determination with respect to these regulations at a later date in consequence of further developments in the law and regulations applicable in Hong Kong.

This notice also does not address capital adequacy because the Commission has not yet finalized rules for SDs and MSPs in this area, nor SDR Reporting. The Commission may provide a comparability determination with respect to these requirements at a later date or in a separate notice.

[29] An MOU is one type of arrangement between or among regulators. Supervisory arrangements could include, as appropriate, cooperative arrangements that are memorialized and executed as addenda to existing MOUs or, for example, as independent bilateral arrangements, statements of intent, declarations, or letters.

[30] 78 FR 45344.

[31] Section 4s(j)(3) and (4) of the CEA and Commission regulation 23.606 require a registered SD or MSP to make all records required to be maintained in accordance with Commission regulation 1.31 available promptly upon request to, among others, representatives of the Commission. *See also* 7 U.S.C. 6s(f); 17 CFR 23.203. In the Guidance, the Commission states that it "reserves this right to access records held by registered [SDs] and MSPs, including those that are non-U.S. persons who may comply with the Dodd-Frank recordkeeping requirement through substituted compliance." 78 FR 45345 n. 472; *see also id.* at 45342 n. 461 (affirming the Commission's authority under the CEA and its regulations to access books and records held by registered SDs and MSPs as "a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto").

[32] The Commission retains its examination authority, both during the application process as well as upon and after registration of an SD or MSP. *See* 78 FR 45342 (stating Commission policy that "eligible entities may comply with a substituted compliance regime under certain circumstances, subject, however, to the Commission's retention of its examination authority") and 45344 n. 471 (stating that the "Commission may, as it deems appropriate and necessary, conduct an on-site examination of the applicant").

- The CCO must report to the board of directors or the senior officer of the SD or MSP;
- Only the board of directors or a senior officer may remove the CCO;
- The CCO and the board of directors must meet at least once per year;
- The CCO must have the background and skills appropriate for the responsibilities of the position;
- The CCO must not be subject to disqualification from registration under sections 8a(2) or (3) of the CEA;
- Each SD and MSP must include a designation of a CCO in its registration application;
- The CCO must administer the regulatory compliance policies of the SD or MSP;
- The CCO must take reasonable steps to ensure compliance with the CEA and Commission regulations, and resolve conflicts of interest;
- The CCO must establish procedures for detecting and remediating non-compliance issues;
- The CCO must annually prepare and sign an "annual compliance report" containing: (i) A description of policies and procedures reasonably designed to ensure compliance; (ii) an assessment of the effectiveness of such policies and procedures; (iii) a description of material non-compliance issues and the action taken; (iv) recommendations of improvements in compliance policies; and (v) a certification by the CCO or CEO that, to the best of such officer's knowledge and belief, the annual report is accurate and complete under penalty of law; and
- The annual compliance report must be furnished to the CFTC within 90 days after the end of the fiscal year of the SD or MSP, simultaneously with its annual financial condition report.

Regulatory Objective: The Commission believes that compliance by SDs and MSPs with the CEA and the Commission's rules greatly contributes to the protection of customers, orderly and fair markets, and the stability and integrity of the market intermediaries registered with the Commission. The Commission expects SDs and MSPs to strictly comply with the CEA and the Commission's rules and to devote sufficient resources to ensuring such compliance. Thus, through its CCO rule, the Commission seeks to ensure firms have designated a qualified individual as CCO that reports directly to the board of directors or the senior officer of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually to the Commission and the board or senior officer on compliance of the firm.

Comparable Hong Kong Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Hong Kong are in full force and effect in Hong Kong, and comparable to and as comprehensive as section 4s(k) of the CEA and Commission regulation 3.3.

- Hong Kong Banking Ordinance, Section 72B requires all AIs (i.e., banks, restricted license banks and deposit-taking companies), including a bank that is registered as an SD, to appoint a manager principally responsible for the compliance function.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that the primary role of the compliance function is to ensure that the AI is in compliance with the statutory provisions, regulatory requirements, and codes of conduct applicable to its banking or other regulated activities. To this end, the compliance function must ensure that the compliance policies and procedures developed by it or other departments are adequate and effective.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that the compliance function should have appropriate standing and authority within an AI, with a direct reporting line to a designated committee (e.g., Audit Committee) or senior management. AIs are required to have a compliance function that is responsible for ensuring the firm's compliance with statutory and regulatory requirements. The compliance function must have sufficient authority and independence to function effectively. It should also be able to carry out its duties on its own initiative in all business and operating units of the AI in which compliance risk exists, with unfettered access to any records or files necessary to enable it to conduct its work.
- Under the HKMA Supervisory Policy Manual, Module CG–1, the board of directors is responsible for the appointment and removal of senior management, including the compliance manager. The board must meet regularly with senior management and internal control functions (including those responsible for internal audit, risk management and compliance) to review the policies and controls in order to identify areas that need improvement and address significant risks and issues.
- The HKMA Supervisory Policy Manual, Module CG–1 provides that senior managers, such as the compliance manager, are required to have appropriate background and skills to enable them to manage and supervise the AI's internal control and risk management functions, including compliance. Further, the manual also provides guidance for assessing whether senior management, including the CCO, is "fit and proper." One of the considerations is whether the person has a record of non-compliance with various non-statutory codes or has been reprimanded, censured, disciplined or publicly criticized by professional or regulatory bodies.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that the compliance function must monitor and test compliance. The compliance function also must establish a compliance program that sets out its planned activities.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that the compliance function must report regularly to senior management on compliance matters. Additionally, the chief executive of an AI must endorse the Certificate of Compliance submitted to the HKMA quarterly to confirm compliance with the specified statutory requirements under the Hong Kong Banking Ordinance.

Commission Determination: The Commission finds that the provisions of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual specified above are generally identical in intent to § 3.3 by seeking to ensure firms have designated a qualified individual as the compliance officer that reports directly to a sufficiently senior function of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, remediate noncompliance issues, and report regularly on compliance of the firm.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the provisions of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual that govern the compliance manager and compliance function within an AI are comparable to and as comprehensive as § 3.3, with the exception of § 3.3(f) concerning certifying and furnishing an annual compliance report to the Commission.

Notwithstanding that the Commission has not determined that the requirements of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual are comparable to and as comprehensive as § 3.3(f), any SD or

MSP to which both § 3.3 and the provisions of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual specified above are applicable would generally be deemed to be in compliance with § 3.3(f) if that SD or MSP complies with the provisions of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual specified above, subject to certifying and furnishing the Commission with the compliance reports required under the provisions of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual specified above in accordance with § 3.3(f). The Commission notes that it generally expects registrants to submit required reports to the Commission in the English language.

B. Risk Management Duties (§§ 23.600—23.609)

Section 4s(j) of the CEA requires each SD and MSP to establish internal policies and procedures designed to, among other things, address risk management, monitor compliance with position limits, prevent conflicts of interest, and promote diligent supervision, as well as maintain business continuity and disaster recovery programs.[33] The Commission adopted regulations 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606 to implement the statute.[34] The Commission also adopted regulation 23.609, which requires certain risk management procedures for SDs or MSPs that are clearing members of a derivatives clearing organization ("DCO").[35] Collectively, these requirements help to establish a robust and comprehensive internal risk management program for SDs and MSPs with respect to their swaps activities,[36] which is critical to effective systemic risk management for the overall swaps market. In making its comparability determination with regard to these risk management duties, the Commission will consider each regulation individually.[37]

1. Risk Management Program for SDs and MSPs (§ 23.600)

Commission Requirement: Implementing section 4s(j)(2) of the CEA, Commission regulation 23.600 generally requires that:

- Each SD or MSP must establish and enforce a risk management program consisting of a system of written risk management policies and procedures designed to monitor and manage the risks associated with the swap activities of the firm, including without limitation, market, credit, liquidity, foreign currency, legal, operational, and settlement risks, and furnish a copy of such policies and procedures to the CFTC upon application for registration and upon request;
- The SD or MSP must establish a risk management unit independent from the business trading unit;
- The risk management policies and procedures of the SD or MSP must be approved by the firm's governing body;
- Risk tolerance limits and exceptions therefrom must be reviewed and approved quarterly by senior management and annually by the governing body;
- The risk management program must have a system for detecting breaches of risk tolerance limits and alerting supervisors and senior management, as appropriate;
- The risk management program must account for risks posed by affiliates and be integrated at the consolidated entity level;
- The risk management unit must provide senior management and the governing body with quarterly risk exposure reports and upon detection of any material change in the risk exposure of the SD or MSP;
- Risk exposure reports must be furnished to the CFTC within five business days following provision to senior management;
- The risk management program must have a new product policy for assessing the risks of new products prior to engaging in such transactions;
- The risk management program must have policies and procedures providing for trading limits, monitoring of trading, processing of trades, and separation of personnel in the trading unit from personnel in the risk management unit; and
- The risk management program must be reviewed and tested at least annually and upon any material change in the business of the SD or MSP.

Regulatory Objective: Through the required system of risk management, the Commission seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. To this end, the Commission believes the risk management program of an SD or MSP must contain at least the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Comparable Hong Kong Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Hong Kong are in full force and effect in Hong Kong, and comparable to and as comprehensive as section 4s(j)(2) of the CEA and Commission regulation 23.600.

HKMA represents to the Commission that it generally requires AIs to have adequate risk management policies, procedures, systems and controls to identify, assess, measure, monitor, and control eight types of inherent risks arising from their activities (on and off balance sheet, and including swap activities) under SA–1 Risk-based Supervisory Approach.

HKMA also represents to the Commission that the risk management requirements in its guidelines apply to swap activities conducted by AIs.

HKMA further represents to the Commission that it has dedicated guidelines on major types of risk (e.g., management of credit (including

---

[33] 7 U.S.C. 6s(j).

[34] *See* Final Swap Dealer and MSP Recordkeeping Rule, 77 FR 20128 (April 3, 2012) (relating to risk management program, monitoring of position limits, business continuity and disaster recovery, conflicts of interest policies and procedures, and general information availability, respectively).

[35] *See* Customer Documentation Rule, 77 FR 21278. Also, SDs must comply with Commission regulation 23.608, which prohibits SDs providing clearing services to customers from entering into agreements that would: (i) Disclose the identity of a customer's original executing counterparty; (ii) limit the number of counterparties a customer may trade with; (iii) impose counterparty-based position limits; (iv) impair a customer's access to execution of a trade on terms that have a reasonable relationship to the best terms available; or (v) prevent compliance with specified time frames for acceptance of trades into clearing.

[36] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under 17 CFR Part 23 are limited in scope to the swaps activities of SDs and MSPs.

[37] As stated above, this notice does not address § 23.608 (Restrictions on counterparty clearing relationships) nor § 23.609 (Clearing member risk management). The Commission declines to take up the request for a comparability determination with respect to these regulations due to the Commission's view that there are not laws or regulations applicable in Hong Kong to compare with the prohibitions and requirements of §§ 23.608 or 23.609. The Commission may provide a comparability determination with respect to these regulations at a later date in consequence of further developments in the law and regulations applicable in Hong Kong.

counterparty credit), market, liquidity and operational risks, etc.). Specifically:

- The HKMA Supervisory Policy Manual, Module IC–1 provides that the board is responsible for articulating risk management strategies. Senior management must develop, and the board must approve, a risk management framework based on risk management strategies that is consistent with the AI's business goals and risk appetite. Senior management must: formulate detailed policies, procedures and limits for managing different aspects of risk arising from the AI's business activities; design and implement a risk management framework; and ensure that the relevant control systems within the framework function as intended. The risk management policies and procedures must be approved by the board or its designated committee(s). The board also must exercise oversight over the effectiveness of the risk management framework.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that AIs should have a dedicated risk management function. The risk management function must be independent from the risk-taking and operational units which it reviews. The risk management function must have unfettered access to information from the risk-taking and operational units.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that a set of limits should be put in place to control an AI's exposure to various quantifiable risks associated with its business activities and to control different sources of risk concentration. These limits should be documented and approved by the board or its designated committee(s). Limit utilization should be closely monitored, and excesses or exceptions should be reported promptly to senior management for necessary action.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that risk management must be conducted on a group-wide basis by managing the relevant risks of the parent bank and its group entities as a whole.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that a sound risk management system should include adequate risk measurement, monitoring and reporting systems to support all business activities and related risks. The risk management information system should be capable of reporting excesses in limits and policy exceptions, and alerting management of risk exposures approaching pre-set limits. The risk management information system also should be able to produce information at appropriate intervals, including at more frequent intervals in times of stress as required by management.
- The HKMA collects internal risk exposure reports from the AIs. AIs are required to submit quarterly capital adequacy ratio returns to the HKMA that address market risk. HKMA also conducts regular surveys on AIs' derivative exposures.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that AIs should have in place an internally approved and well-documented "new product approval policy" which addresses not only the development and approval of entirely new products and services but also significant changes in the features of existing products and services.

Commission Determination: The Commission finds that the provisions of the HKMA Supervisory Policy Manual specified above are generally identical in intent to § 23.600 by requiring a system of risk management that seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. Specifically, the Commission finds that the provisions of the HKMA Supervisory Policy Manual specified above comprehensively require SDs and MSPs to establish risk management programs containing the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the risk management program requirements of the HKMA Supervisory Policy Manual, as specified above, are comparable to and as comprehensive as § 23.600, with the exception of § 23.600(c)(2) concerning the requirement that each SD and MSP produce a quarterly risk exposure report and provide such report to its senior management, governing body, and the Commission.

Notwithstanding that the Commission has not determined that the requirements of the provisions of the HKMA Supervisory Policy Manual are comparable to and as comprehensive as § 23.600(c)(2), any SD or MSP to which both § 23.600 and the provisions of the HKMA Supervisory Policy Manual specified above are applicable would generally be deemed to be in compliance with § 23.600(c)(2) if that SD or MSP complies with the provisions of the HKMA Supervisory Policy Manual specified above, subject to compliance with the requirement that it produce quarterly risk exposure reports and provide such reports to its senior management, governing body, and the Commission in accordance with § 23.600(c)(2). The Commission notes that it generally expects reports furnished to the Commission by registrants to be in the English language.

2. Monitoring of Position Limits (§ 23.601)

Commission Requirement: Implementing section 4s(j)(1) of the CEA, Commission regulation 23.601 requires each SD or MSP to establish and enforce written policies and procedures that are reasonably designed to monitor for, and prevent violations of, applicable position limits established by the Commission, a designated contract market ("DCM"), or a swap execution facility ("SEF").[38] The policies and procedures must include an early warning system and provide for escalation of violations to senior management (including the firm's governing body).

Regulatory Objective: Generally, position limits are implemented to ensure market integrity, fairness, orderliness, and accurate pricing in the commodity markets. Commission regulation 23.601 thus seeks to ensure that SDs and MSPs have established the necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by the Commission, a DCM, or a SEF. As part of its Risk Management Program, § 23.601 is intended to ensure that established position limits are not breached by the SD or MSP.

Comparable Hong Kong Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Hong Kong are in full force and effect in Hong Kong, and comparable to and as comprehensive as section 4s(j)(1) of the

[38] The setting of position limits by the Commission, a DCM, or a SEF is subject to requirements under the CEA and Commission regulations other than § 23.601. The setting of position limits and compliance with such limits is not subject to the Commission's substituted compliance regime.

CEA and Commission regulation § 23.601.

The applicant represents to the Commission that AIs have a responsibility to comply with all applicable laws and regulations, whether in Hong Kong or outside of Hong Kong, including applicable position limits established by the Commission, a DCM, or a SEF. Under the HKMA Supervisory Policy Manual, module IC–1, General Risk Management Controls paragraph 5.1.3, an AI's internal control system must cover controls relating to compliance with statutory and regulatory requirements, which would require a system of controls to maintain compliance with applicable position limits established by the Commission, a DCM, or a SEF. AI's must maintain adequate systems of control to maintain a banking license pursuant to the Banking Ordinance, Schedule 7, paragraph 10.[39]

Commission Determination: The Commission finds that the HKMA and Banking Ordinance standards specified above are generally identical in intent to § 23.601 by requiring SDs and MSPs to establish necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by applicable laws and regulations, including those of the Commission, a DCM, or a SEF. Specifically, the Commission finds that the HKMA and Banking Ordinance standards specified above, while not specific to the issue of position limit compliance, nevertheless comprehensively require SDs and MSPs to monitor for regulatory compliance generally, including monitoring for compliance with position limits set pursuant to applicable law (including the CEA and Commission regulations) and escalation of violations to senior management (including the board of directors) responsible for such compliance.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the compliance monitoring requirements of the HKMA and Banking Ordinance standards, as specified above, are comparable to and as comprehensive as § 23.601. For the avoidance of doubt, the Commission notes that this determination may not be relied on to relieve an SD or MSP from its obligation to strictly comply with any applicable position limit established by the Commission, a DCM, or a SEF.

3. Diligent Supervision (§ 23.602)

Commission Requirement: Commission regulation 23.602 implements section 4s(h)(1)(B) of the CEA and requires each SD and MSP to establish a system to diligently supervise all activities relating to its business performed by its partners, members, officers, employees, and agents. The system must be reasonably designed to achieve compliance with the CEA and CFTC regulations. Commission regulation 23.602 requires that the supervisory system must specifically designate qualified persons with authority to carry out the supervisory responsibilities of the SD or MSP for all activities relating to its business as an SD or MSP.

Regulatory Objective: The Commission's diligent supervision rule seeks to ensure that SDs and MSPs strictly comply with the CEA and the Commission's rules. To this end, through § 23.602, the Commission seeks to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Comparable Hong Kong Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Hong Kong are in full force and effect in Hong Kong, and comparable to and as comprehensive as section 4s(h)(1)(B) of the CEA and Commission regulation 23.602.

- The HKMA Supervisory Policy Manual, Module CG–1 provides that the board is ultimately responsible for overseeing senior management to operate within the risk appetite and strategies prescribed by the board, on a prudent basis and in accordance with applicable laws, regulations and supervisory standards.
- The HKMA Supervisory Policy Manual, Module IC–1 provides that an AI's internal control system should, among others, cover controls relating to compliance with statutory and regulatory requirements.
- The Hong Kong Banking Ordinance provides that senior management are responsible for carrying out the supervisory responsibilities of the AIs, and they can be personally liable for breaches of the Banking Ordinance committed by AIs.

Commission Determination: The Commission finds that the provisions of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual specified above are generally identical in intent to § 23.602 because such standards seek to ensure that SDs and MSPs strictly comply with applicable law, which would include the CEA and the Commission's regulations. Through the provisions of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual specified above, Hong Kong laws and regulations seek to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with applicable law, which would include the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the internal supervision requirements of the provisions of the Hong Kong Banking Ordinance and the HKMA Supervisory Policy Manual, as specified above, are comparable to and as comprehensive as § 23.602.

4. Business Continuity and Disaster Recovery (§ 23.603)

Commission Requirement: To ensure the proper functioning of the swaps markets and the prevention of systemic risk more generally, Commission regulation 23.603 requires each SD and MSP, as part of its risk management program, to establish a business continuity and disaster recovery plan that includes procedures for, and the maintenance of, back-up facilities, systems, infrastructure, personnel, and other resources to achieve the timely recovery of data and documentation and to resume operations generally within the next business day after the disruption.

Regulatory Objective: Commission regulation 23.603 is intended to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, this requirement seeks to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan within one business day, if necessary.

[39] In addition to the foregoing, the applicant also submitted various guidelines and required best practices concerning the setting of internal risk tolerance limits and monitoring for compliance with such internal limits. Although the Commission recognizes these as prudent risk management practices, the Commission does not believe that these provisions are relevant for a comparability determination with respect to § 23.601 because § 23.601 requires monitoring for compliance with external position limits set by the Commission, a DCM, or a SEF.

Comparable Hong Kong Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Hong Kong are in full force and effect in Hong Kong, and comparable to and as comprehensive as Commission regulation 23.603.

- HKMA Supervisory Policy Manual, Module TM–G–2 on Business Continuity Planning requires all AIs to have adequate and regularly tested business continuity plans.

Commission Determination: The Commission finds that the provisions of the HKMA Supervisory Policy Manual specified above are generally identical in intent to § 23.603 because such standards seek to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, the Commission finds that the provisions of the HKMA Supervisory Policy Manual specified above seek to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan in a timely manner.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the business continuity and disaster recovery requirements of the provisions of the HKMA Supervisory Policy Manual, as specified above, are comparable to and as comprehensive as § 23.603.

5. Conflicts of Interest (§ 23.605)

Commission Requirement: Section 4s(j)(5) of the CEA and Commission regulation 23.605(c) generally require each SD or MSP to establish structural and institutional safeguards to ensure that the activities of any person within the firm relating to research or analysis of the price or market for any commodity or swap are separated by appropriate informational partitions within the firm from the review, pressure, or oversight of persons whose involvement in pricing, trading, or clearing activities might potentially bias their judgment or supervision.

In addition, section 4s(j)(5) of the CEA and Commission regulation 23.605(d)(1) generally prohibits an SD or MSP from directly or indirectly interfering with or attempting to influence the decision of any clearing unit of any affiliated clearing member of a DCO to provide clearing services and activities to a particular customer, including:

- Whether to offer clearing services to a particular customer;
- Whether to accept a particular customer for clearing derivatives;
- Whether to submit a customer's transaction to a particular DCO;
- Whether to set or adjust risk tolerance levels for a particular customer; or
- Whether to set a customer's fees based on criteria other than those generally available and applicable to other customers.

Commission regulation 23.605(d)(2) generally requires each SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of any affiliated clearing member of a DCO to reasonably ensure compliance with the Act and the prohibitions set forth in § 23.605(d)(1) outlined above.

The Commission observes that § 23.605(d) works in tandem with Commission regulation 1.71, which requires FCMs that are clearing members of a DCO and affiliated with an SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of the FCM to reasonably ensure compliance with the Act and the prohibitions set forth in § 1.71(d)(1), which are the same as the prohibitions set forth in § 23.605(d)(1) outlined above.

Finally, § 23.605(e) requires that each SD or MSP have policies and procedures that mandate the disclosure to counterparties of material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a swap execution facility or DCM or to clear a derivative through a DCO.

Regulatory Objective: Commission regulation 23.605(c) seeks to ensure that research provided to the general public by an SD or MSP is unbiased and free from the influence of the interests of an SD or MSP arising from the SD's or MSP's trading business.

In addition, the § 23.605(d) (working in tandem with § 1.71) seeks to ensure open access to the clearing of swaps by requiring that access to and the provision of clearing services provided by an affiliate of an SD or MSP are not influenced by the interests of an SD's or MSP's trading business.

Finally, § 23.605(e) seeks to ensure equal access to trading venues and clearinghouses, as well as orderly and fair markets, by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Comparable Hong Kong Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Hong Kong are in full force and effect in Hong Kong, and comparable to and as comprehensive as Commission regulation 23.605.

The applicant represents to the Commission that AIs that are active in the OTC derivative market are typically also registered with the Hong Kong Securities and Futures Commission ("HKSFC") and hence subject to the HKSFC's Code of Conduct. These AI's registered with the HKSFC include the current SD established in Hong Kong.

Pursuant to Section 16 of the HKSFC's Code of Conduct, registrants must have:

- Mechanisms ensuring that analysts' trading activities or financial interests do not prejudice their investment research and recommendations;
- Mechanisms ensuring that analysts' investment research and recommendations are not prejudiced by the trading activities, financial interests or business relationships of the firms that employ them;
- Reporting lines for analysts and their compensation arrangements that are structured to eliminate or severely limit actual and potential conflicts of interest;
- Written internal procedures or controls to identify and eliminate, avoid, manage, or disclose actual and potential analyst conflicts of interest;
- Procedures to ensure that undue influence of securities issuers, institutional investors, and other outside parties on analysts is eliminated or managed;
- Controls to ensure that disclosures of actual and potential conflicts of interest are complete, timely, clear, concise, specific, and prominent; and
- Policies to ensure that analysts are held to high integrity standards.

The HKMA Supervisory Policy Manual, Module CG–1 requires that the board of directors of an AI establish, implement, and maintain written policies that address the various conflicts of interest that may arise in the AI's business, and that provide for the prevention or management of these conflicts.

In addition, the Banking Ordinance requires an AI to carry on its business with integrity, prudence and the appropriate degree of professional competence. The applicant represents that if an AI permits conflicts of interest (whether general or particular) to continue, it would raise doubts with the HKMA as to whether the AI is carrying on its business with integrity, prudence

and the appropriate degree of professional competence. Carrying on business in such a manner is one of the continuing authorization criteria under the Banking Ordinance. A failure to comply with such criterion is a ground for revocation of that AI's authorization to conduct banking or deposit-taking business in Hong Kong.

Finally, the HKMA has represented to the Commission that, as part of its oversight and enforcement of the foregoing standards for AIs, the HKMA would require any AI (including an AI that is an SD) to adopt measures to prevent or manage any conflicts of interests that may areis or be discovered, including those involving the provision of clearing services by a clearing member of a DCO that is an affiliate of the AI, or the decision of a counterparty to execute a derivative on a SEF or DCM, or clear a derivative through a DCO. The measures include information barriers, segregation of duties, and, as appropriate, disclosures.

Commission Determination: The Commission finds that the HKSFC and Banking Ordinance standards specified above with respect to conflicts of interest that may arise in producing or distributing research are generally identical in intent to § 23.605(c) because such standards seek to ensure that research provided to the general public by an SD is unbiased and free from the influence of the interests of an SD arising from the SD's trading business.

With respect to conflicts of interest that may arise in the provision of clearing services by an affiliate of an SD or MSP, the Commission further finds that although the general conflicts of interest prevention requirements in the Banking Ordinance and the HKMA Supervisory Policy Manual do not require with specificity that access to and the provision of clearing services provided by an affiliate of an SD or MSP not be improperly influenced by the interests of an SD's or MSP's trading business, such general requirements would require prevention and remediation of such improper influence when recognized or discovered. Thus such standards would ensure open access to clearing.

Finally, although not as specific as the requirements of § 23.605(e) (Undue influence on counterparties), the Commission finds that the general disclosure requirements specified above would ensure equal access to trading venues and clearinghouses by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements found in Hong Kong's laws and regulations specified above, in relation to conflicts of interest are comparable to and as comprehensive as § 23.605.

6. Availability of Information for Disclosure and Inspection (§ 23.606)

Commission Requirement: Commission regulation 23.606 implements sections 4s(j)(3) and (4) of the CEA, and requires each SD and MSP to disclose to the Commission, and an SD's or MSP's U.S. prudential regulator (if any) comprehensive information about its swap activities, and to establish and maintain reliable internal data capture, processing, storage, and other operational systems sufficient to capture, process, record, store, and produce all information necessary to satisfy its duties under the CEA and Commission regulations. Such systems must be designed to provide such information to the Commission and an SD's or MSP's U.S. prudential regulator within the time frames set forth in the CEA and Commission regulations and upon request.

Regulatory Objective: Commission regulation 23.606 seeks to ensure that each SD and MSP captures and maintains comprehensive information about their swap activities, and is able to retrieve and disclose such information to the Commission and its U.S. prudential regulator, if any, as necessary for compliance with the CEA and the Commission's regulations and for purposes of Commission oversight, as well as oversight by the SD's or MSP's U.S. prudential regulator, if any.

The Commission observes that it would be impossible to meet the regulatory objective of § 23.606 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.606 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Hong Kong Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Hong Kong are in full force and effect in Hong Kong, and comparable to and as comprehensive as Commission regulation 23.606.

Under Section 56 of the Hong Kong Banking Ordinance, AIs are required to produce records and information whenever requested by the HKMA, including information and records relating to the AI's OTC derivatives or swaps activities. Under the Banking Ordinance, the failure to produce records and information when requested by the HKMA is a criminal offense. The HKMA represents that in order to produce records and information whenever requested by the HKMA, AIs must necessarily have adequate systems and infrastructure to enable them to retrieve such records and information.

Commission Determination: The Commission finds that the Banking Ordinance standards specified above are generally identical in intent to § 23.606 because such standards seek to ensure that AIs capture and store comprehensive information about their swap activities, and are able to retrieve and disclose such information as necessary for compliance with applicable law and for purposes of regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements of the Hong Kong Banking Ordinance with respect to the availability of information for inspection and disclosure, as specified above, are comparable to, and as comprehensive as, § 23.606, with the exception of § 23.606(a)(2) concerning the requirement that an SD or MSP make information required by § 23.606(a)(1) available promptly upon request to Commission staff and the staff of an applicable U.S. prudential regulator. The applicant has not submitted any provision of law or regulations applicable in Hong Kong upon which the Commission could make a finding that SDs and MSPs would be required to retrieve and disclose comprehensive information about their swap activities to the Commission or any U.S. prudential regulator as necessary for compliance with the CEA and Commission regulations, and for purposes of Commission oversight and the oversight of any U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of the Hong Kong Banking Ordinance are comparable to and as comprehensive as § 23.606(a)(2), any SD or MSP to which both § 23.606 and the Banking Ordinance standards specified above are applicable would generally be

deemed to be in compliance with § 23.606(a)(2) if that SD or MSP complies with the Banking Ordinance standards specified above, subject to compliance with the requirement that it produce information to Commission staff and the staff of an applicable U.S. prudential regulator in accordance with § 23.606(a)(2).

C. Swap Data Recordkeeping (§§ 23.201 and 23.203)

Commission Requirement: Sections 4s(f)(1)(B) and 4s(g)(1) of the CEA, and Commission regulation 23.201 generally require SDs and MSPs to retain records of each transaction, each position held, general business records (including records related to complaints and sales and marketing materials), records related to governance, financial records, records of data reported to SDRs, and records of real-time reporting data along with a record of the date and time the SD or MSP made such reports. Transaction records must be kept in a form and manner identifiable and searchable by transaction and counterparty.

Commission regulation 23.203, requires SDs and MSPs to maintain records of a swap transaction until the termination, maturity, expiration, transfer, assignment, or novation date of the transaction, and for a period of five years after such date. Records must be "readily accessible" for the first 2 years of the 5 year retention period (consistent with § 1.31).

The Commission notes that the comparability determination below with respect to §§ 23.201 and 23.203 encompasses both swap data recordkeeping generally and swap data recordkeeping relating to complaints and marketing and sales materials in accordance with § 23.201(b)(3) and (4).[40]

Regulatory Objective: Through the Commission's regulations requiring SDs and MSPs to keep comprehensive records of their swap transactions and related data, the Commission seeks to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

The Commission's regulations require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

By requiring comprehensive records of swap data, the Commission seeks to ensure that SDs and MSPs employ effective risk management, and strictly comply with Commission regulations. Further, such records facilitate effective regulatory oversight.

The Commission observes that it would be impossible to meet the regulatory objective of §§ 23.201 and 23.203 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.203 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Hong Kong Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Hong Kong are in full force and effect in Hong Kong, and comparable to and as comprehensive as sections 4s(f)(1)(B) and 4s(g)(1) of the CEA and §§ 23.201 and 23.203.

Section 20 of Schedule 2 to the Hong Kong Anti-Money Laundering and Counter-Terrorist Financing (Financial Institution) Ordinance (Cap 615) (the "AML–CTF Ordinance") provides that financial institutions must keep all documents, data, and information related to each transaction it carries out. The AML–CTF Ordinance provides that financial institutions must keep all files relating to each customer account and all business correspondence with each customer. The AML–CTF Ordinance provides that transaction records must be kept for six years after the transaction is completed.

The HKMA represents to the Commission that the recordkeeping requirements in the AML–CTF Ordinance apply to all transactions that an AI carries out with each of its customers, including swap and OTC derivative transactions.[41]

Commission Determination: The Commission finds that the Hong Kong standards specified above are generally identical in intent to §§ 23.201 and 23.203 because such standards seek to ensure the effectiveness of the internal controls of SDs and MSPs; and transparency in the swaps market for regulators and market participants.

In addition, the Commission finds that the Hong Kong standards specified above require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

Finally, the Commission finds that the Hong Kong standards specified above, by requiring comprehensive records of swap data, seek to ensure that SDs and MSPs employ effective risk management, seek to ensure that SDs and MSPs strictly comply with applicable regulatory requirements (including the CEA and Commission regulations), and that such records facilitate effective regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the recordkeeping requirements of the Hong Kong AML–CTF Ordinance with respect to swap data recordkeeping, as specified above, are comparable to, and as comprehensive as, §§ 23.201 and 23.203, with the exception of § 23.203(b)(2) concerning the requirement that an SD or MSPs make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator. The applicant has not submitted any provision of law or regulations applicable in Hong Kong upon which the Commission could make a finding that SDs and MSPs would be required to make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of the Hong Kong AML–CTF Ordinance are comparable to and as comprehensive as § 23.203(b)(2), any SD or MSP to which both § 23.203 and the Hong Kong AML–CTF Ordinance are applicable would generally be deemed to be in compliance with § 23.203(b)(2) if that SD or MSP complies with the Hong Kong AML–CTF Ordinance, subject to compliance with the requirement that it make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable

[40] *See* the Guidance for a discussion of the availability of substituted compliance with respect to swap data recordkeeping, 78 FR 45332–33.

[41] The HKMA noted that a record keeping requirement specific to OTC derivative transactions is intended to be included in the forthcoming law implementing the regulatory regime for such transactions. Pursuant to such regulatory regime, the HKMA tentatively expects that records of OTC derivatives transactions (including swaps) will be required to be maintained for the duration of the contract plus six years thereafter. The retention period for voice recordings is to be decided. The HKMA will set out specific recordkeeping requirements in the regulations or guidelines to be issued to supplement the new regulatory regime.

U.S. prudential regulator in accordance with § 23.203(b)(2).

Issued in Washington, DC on December 20, 2013, by the Commission.

Melissa D. Jurgens,

Secretary of the Commission.

Appendices to Comparability Determination for Hong Kong: Certain Entity-Level Requirements

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Chilton and Wetjen voted in the affirmative. Commissioner O'Malia voted in the negative.

Appendix 2—Statement of Chairman Gary Gensler and Commissioners Chilton and Wetjen

We support the Commission's approval of broad comparability determinations that will be used for substituted compliance purposes. For each of the six jurisdictions that has registered swap dealers, we carefully reviewed each regulatory provision of the foreign jurisdictions submitted to us and compared the provision's intended outcome to the Commission's own regulatory objectives. The resulting comparability determinations for entity-level requirements permit non-U.S. swap dealers to comply with regulations in their home jurisdiction as a substitute for compliance with the relevant Commission regulations.

These determinations reflect the Commission's commitment to coordinating our efforts to bring transparency to the swaps market and reduce its risks to the public. The comparability findings for the entity-level requirements are a testament to the comparability of these regulatory systems as we work together in building a strong international regulatory framework.

In addition, we are pleased that the Commission was able to find comparability with respect to swap-specific transaction-level requirements in the European Union and Japan.

The Commission attained this benchmark by working cooperatively with authorities in Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland to reach mutual agreement. The Commission looks forward to continuing to collaborate with both foreign authorities and market participants to build on this progress in the months and years ahead.

Appendix 3—Dissenting Statement of Commissioner Scott D. O'Malia

I respectfully dissent from the Commodity Futures Trading Commission's ("Commission") approval of the Notices of Comparability Determinations for Certain Requirements under the laws of Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland (collectively, "Notices"). While I support the narrow comparability determinations that the Commission has made, moving forward, the Commission must collaborate with foreign regulators to harmonize our respective regimes consistent with the G–20 reforms.

However, I cannot support the Notices because they: (1) Are based on the legally unsound cross-border guidance ("Guidance");[1] (2) are the result of a flawed substituted compliance process; and (3) fail to provide a clear path moving forward. If the Commission's objective for substituted compliance is to develop a narrow rule-by-rule approach that leaves unanswered major regulatory gaps between our regulatory framework and foreign jurisdictions, then I believe that the Commission has successfully achieved its goal today.

Determinations Based on Legally Unsound Guidance

As I previously stated in my dissent, the Guidance fails to articulate a valid statutory foundation for its overbroad scope and inconsistently applies the statute to different activities.[2] Section 2(i) of the Commodity Exchange Act ("CEA") states that the Commission does not have jurisdiction over foreign activities unless "those activities have a direct and significant connection with activities in, or effect on, commerce of the United States . . ."[3] However, the Commission never properly articulated how and when this limiting standard on the Commission's extraterritorial reach is met, which would trigger the application of Title VII of the Dodd-Frank Act[4] and any Commission regulations promulgated thereunder to swap activities that are outside of the United States. Given this statutorily unsound interpretation of the Commission's extraterritorial authority, the Commission often applies CEA section 2(i) inconsistently and arbitrarily to foreign activities.

Accordingly, because the Commission is relying on the legally deficient Guidance to make its substituted compliance determinations, and for the reasons discussed below, I cannot support the Notices. The Commission should have collaborated with foreign regulators to agree on and implement a workable regime of substituted compliance, and then should have made determinations pursuant to that regime.

Flawed Substituted Compliance Process

Substituted compliance should not be a case of picking a set of foreign rules identical to our rules, determining them to be "comparable," but then making no determination regarding rules that require extensive gap analysis to assess to what extent each jurisdiction is, or is not, comparable based on overall outcomes of the regulatory regimes. While I support the narrow comparability determinations that the Commission has made, I am concerned that in a rush to provide some relief, the Commission has made substituted compliance determinations that only afford narrow relief and fail to address major regulatory gaps between our domestic regulatory framework and foreign jurisdictions. I will address a few examples below.

First, earlier this year, the OTC Derivatives Regulators Group ("ODRG") agreed to a number of substantive understandings to improve the cross-border implementation of over-the-counter derivatives reforms.[5] The ODRG specifically agreed that a flexible, outcomes-based approach, based on a broad category-by-category basis, should form the basis of comparability determinations.[6]

However, instead of following this approach, the Commission has made its comparability determinations on a rule-by-rule basis. For example, in Japan's Comparability Determination for Transaction-Level Requirements, the Commission has made a positive comparability determination for some of the detailed requirements under the swap trading relationship documentation provisions, but not for other requirements.[7] This detailed approach clearly contravenes the ODRG's understanding.

Second, in several areas, the Commission has declined to consider a request for a comparability determination, and has also failed to provide an analysis regarding the extent to which the other jurisdiction is, or is not, comparable. For example, the Commission has declined to address or provide any clarity regarding the European Union's regulatory data reporting determination, even though the European Union's reporting regime is set to begin on February 12, 2014. Although the Commission has provided some limited relief with respect to regulatory data reporting, the lack of clarity creates unnecessary uncertainty, especially when the European Union's reporting regime is set to begin in less than two months.

Similarly, Japan receives no consideration for its mandatory clearing requirement, even though the Commission considers Japan's legal framework to be comparable to the U.S. framework. While the Commission has declined to provide even a partial comparability determination, at least in this instance the Commission has provided a reason: the differences in the scope of entities and products subject to the clearing requirement.[8] Such treatment creates uncertainty and is contrary to increased global harmonization efforts.

Third, in the Commission's rush to meet the artificial deadline of December 21, 2013, as established in the Exemptive Order Regarding Compliance with Certain Swap

[3] CEA section 2(i); 7 U.S.C. 2(i).

[4] Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376 (2010).

[5] *http://www.cftc.gov/PressRoom/PressReleases/pr6678–13.*

[6] *http://www.cftc.gov/ucm/groups/public/@newsroom/documents/file/odrgreport.pdf.* The ODRG agreed to six understandings. Understanding number 2 states that "[a] flexible, outcomes-based approach should form the basis of final assessments regarding equivalence or substituted compliance."

[7] The Commission made a positive comparability determination for Commission regulations 23.504(a)(2), (b)(1), (b)(2), (b)(3), (b)(4), (c), and (d), but not for Commission regulations 23.504(b)(5) and (b)(6).

[8] Yen-denominated interest rate swaps are subject to the mandatory clearing requirement in both the U.S. and Japan.

Regulations ("Exemptive Order"),[9] the Commission failed to complete an important piece of the cross-border regime, namely, supervisory memoranda of understanding ("MOUs") between the Commission and fellow regulators.

I have previously stated that these MOUs, if done right, can be a key part of the global harmonization effort because they provide mutually agreed-upon solutions for differences in regulatory regimes.[10] Accordingly, I stated that the Commission should be able to review MOUs alongside the respective comparability determinations and vote on them at the same time. Without these MOUs, our fellow regulators are left wondering whether and how any differences, such as direct access to books and records, will be resolved.

Finally, as I have consistently maintained, the substituted compliance process should allow other regulatory bodies to engage with the full Commission.[11] While I am pleased that the Notices are being voted on by the Commission, the full Commission only gained access to the comment letters from foreign regulators on the Commission's comparability determination draft proposals a few days ago. This is hardly a transparent process.

Unclear Path Forward

Looking forward to next steps, the Commission must provide answers to several outstanding questions regarding these comparability determinations. In doing so, the Commission must collaborate with foreign regulators to increase global harmonization.

First, there is uncertainty surrounding the timing and outcome of the MOUs. Critical questions regarding information sharing, cooperation, supervision, and enforcement will remain unanswered until the Commission and our fellow regulators execute these MOUs.

Second, the Commission has issued time-limited no-action relief for the swap data repository reporting requirements. These comparability determinations will be done as separate notices. However, the timing and process for these determinations remain uncertain.

Third, the Commission has failed to provide clarity on the process for addressing the comparability determinations that it declined to undertake at this time. The Notices only state that the Commission may address these requests in a separate notice at a later date given further developments in the law and regulations of other jurisdictions. To promote certainty in the financial markets, the Commission must provide a clear path forward for market participants and foreign regulators.

The following steps would be a better approach: (1) The Commission should extend the Exemptive Order to allow foreign regulators to further implement their regulatory regimes and coordinate with them to implement a harmonized substituted compliance process; (2) the Commission should implement a flexible, outcomes-based approach to the substituted compliance process and apply it similarly to all jurisdictions; and (3) the Commission should work closely with our fellow regulators to expeditiously implement MOUs that resolve regulatory differences and address regulatory oversight issues.

Conclusion

While I support the narrow comparability determinations that the Commission has made, it was my hope that the Commission would work with foreign regulators to implement a substituted compliance process that would increase the global harmonization effort. I am disappointed that the Commission has failed to implement such a process.

I do believe that in the longer term, the swaps regulations of the major jurisdictions will converge. At this time, however, the Commission's comparability determinations have done little to alleviate the burden of regulatory uncertainty and duplicative compliance with both U.S. and foreign regulations.

The G–20 process delineated and put in place the swaps market reforms in G–20 member nations. It is then no surprise that the Commission must learn to coordinate with foreign regulators to minimize confusion and disruption in bringing much needed clarity to the swaps market. For all these shortcomings, I respectfully dissent from the Commission's approval of the Notices.

COMMODITY FUTURES TRADING COMMISSION

Comparability Determination for Australia: Certain Entity-Level Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Comparability Determination for Certain Requirements under Australian Regulation.

SUMMARY: The following is the analysis and determination of the Commodity Futures Trading Commission ("Commission") regarding certain parts of a request by the Australian Bankers Association ("ABA") that the Commission determine that laws and regulations applicable in in the Commonwealth of Australia ("Australia") provide a sufficient basis for an affirmative finding of comparability with respect to the following regulatory obligations applicable to swap dealers ("SDs") and major swap participants ("MSPs") registered with the Commission: (i) Chief compliance officer; (ii) risk management; and (iii) swap data recordkeeping (collectively, the "Internal Business Conduct Requirements").

DATES: *Effective Date:* This determination will become effective immediately upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary Barnett, Director, 202–418–5977, *gbarnett@cftc.gov*, Frank Fisanich, Chief Counsel, 202–418–5949, *ffisanich@cftc.gov*, Adam Kezsbom, Special Counsel, 202–418–5372, *akezsbom@cftc.gov*, Israel Goodman, Special Counsel, 202–418–6715, *igoodman@cftc.gov*, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 26, 2013, the Commission published in the **Federal Register** its "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" (the "Guidance").[1] In the Guidance, the Commission set forth its interpretation of the manner in which it believes that section 2(i) of the Commodity Exchange Act ("CEA") applies Title VII's swap provisions to activities outside the U.S. and informed the public of some of the policies that it expects to follow, generally speaking, in applying Title VII and certain Commission regulations in contexts covered by section 2(i). Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations promulgated thereunder.

In addition to the Guidance, on July 22, 2013, the Commission issued the Exemptive Order Regarding Compliance with Certain Swap Regulations (the

[1] 78 FR 45292 (July 26, 2013). The Commission originally published proposed and further proposed guidance on July 12, 2012 and January 7, 2013, respectively. *See* Cross-Border Application of Certain Swaps Provisions of the Commodity Exchange Act, 77 FR 41214 (July 12, 2012) and Further Proposed Guidance Regarding Compliance with Certain Swap Regulations, 78 FR 909 (Jan. 7, 2013).

"Exemptive Order").[2] Among other things, the Exemptive Order provided time for the Commission to consider substituted compliance with respect to six jurisdictions where non-U.S. SDs are currently organized. In this regard, the Exemptive Order generally provided non-U.S. SDs and MSPs in the six jurisdictions with conditional relief from certain requirements of Commission regulations (those referred to as "Entity-Level Requirements" in the Guidance) until the earlier of December 21, 2013, or 30 days following the issuance of a substituted compliance determination.[3]

On April 22, 2013, the ABA (the "applicant") submitted a request that the Commission determine that laws and regulations applicable in Australia provide a sufficient basis for an affirmative finding of comparability with respect to certain Entity-Level Requirements, including the Internal Business Conduct Requirements.[4] The applicant provided Commission staff with an updated submission on June 7, 2013. On November 8, 2013, the application was further supplemented with corrections and additional materials. The following is the Commission's analysis and determination regarding the Internal Business Conduct Requirements, as detailed below.[5]

II. Background

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act[6] ("Dodd-Frank Act" or "Dodd-Frank"), which, in Title VII, established a new regulatory framework for swaps.

Section 722(d) of the Dodd-Frank Act amended the CEA by adding section 2(i), which provides that the swap provisions of the CEA (including any CEA rules or regulations) apply to cross-border activities when certain conditions are met, namely, when such activities have a "direct and significant connection with activities in, or effect on, commerce of the United States" or when they contravene Commission rules or regulations as are necessary or appropriate to prevent evasion of the swap provisions of the CEA enacted under Title VII of the Dodd-Frank Act.[7]

In the three years since its enactment, the Commission has finalized 68 rules and orders to implement Title VII of the Dodd-Frank Act. The finalized rules include those promulgated under section 4s of the CEA, which address registration of SDs and MSPs and other substantive requirements applicable to SDs and MSPs. With few exceptions, the delayed compliance dates for the Commission's regulations implementing such section 4s requirements applicable to SDs and MSPs have passed and new SDs and MSPs are now required to be in full compliance with such regulations upon registration with the Commission.[8] Notably, the requirements under Title VII of the Dodd-Frank Act related to SDs and MSPs by their terms apply to all registered SDs and MSPs, irrespective of where they are located, albeit subject to the limitations of CEA section 2(i).

To provide guidance as to the Commission's views regarding the scope of the cross-border application of Title VII of the Dodd-Frank Act, the Commission set forth in the Guidance its interpretation of the manner in which it believes that Title VII's swap provisions apply to activities outside the U.S. pursuant to section 2(i) of the CEA. Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations. With respect to the standards forming the basis for any determination of comparability ("comparability determination" or "comparability finding"), the Commission stated:

> In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the applicable requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including but not limited to, the comprehensiveness of those requirement(s), the scope and objectives of the relevant regulatory requirement(s), the comprehensiveness of the foreign regulator's supervisory compliance program, as well as the home jurisdiction's authority to support and enforce its oversight of the registrant. In this context, comparable does not necessarily mean identical. Rather, the Commission would evaluate whether the home jurisdiction's regulatory requirement is comparable to and as comprehensive as the corresponding U.S. regulatory requirement(s).[9]

Upon a comparability finding, consistent with CEA section 2(i) and comity principles, the Commission's policy generally is that eligible entities may comply with a substituted compliance regime, subject to any conditions the Commission places on its finding, and subject to the Commission's retention of its examination authority and its enforcement authority.[10]

In this regard, the Commission notes that a comparability determination cannot be premised on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction, but rather on whether information relevant to the Commission's oversight of an SD or MSP would be directly available to the Commission and any U.S. prudential regulator of the SD or MSP.[11] The Commission's direct access to the books and records required to be maintained

---

[2] 78 FR 43785 (July 22, 2013).

[3] The Entity-Level Requirements under the Exemptive Order consist of 17 CFR 1.31, 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, 23.606, 23.608, 23.609, and parts 45 and 46 of the Commission's regulations.

[4] For purposes of this notice, the Internal Business Conduct Requirements consist of 17 CFR 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606.

[5] This notice does not address swap data repository reporting ("SDR Reporting"). The Commission may provide a comparability determination with respect to the SDR Reporting requirement in a separate notice.

[6] Public Law 111–203, 124 Stat. 1376 (2010).

[7] 7 U.S.C. 2(i).

[8] The compliance dates are summarized on the Compliance Dates page of the Commission's Web site. (http://www.cftc.gov/LawRegulation/DoddFrankAct/ComplianceDates/index.htm.)

[9] 78 FR 45342–45.

[10] See the Guidance, 78 FR 45342–44.

[11] Under §§ 23.203 and 23.606, all records required by the CEA and the Commission's regulations to be maintained by a registered SD or MSP shall be maintained in accordance with Commission regulation 1.31 and shall be open for inspection by representatives of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

In its Final Exemptive Order Regarding Compliance with Certain Swap Regulations, 78 FR 858 (Jan. 7, 2013), the Commission noted that an applicant for registration as an SD or MSP must file a Form 7–R with the National Futures Association and that Form 7–R was being modified at that time to address existing blocking, privacy, or secrecy laws of foreign jurisdictions that applied to the books and records of SDs and MSPs acting in those jurisdictions. *See* id. at 871–72 n. 107. The modifications to Form 7–R were a temporary measure intended to allow SDs and MSPs to apply for registration in a timely manner in recognition of the existence of the blocking, privacy, and secrecy laws. In the Guidance, the Commission clarified that the change to Form 7–R impacts the registration application only and does not modify the Commission's authority under the CEA and its regulations to access records held by registered SDs and MSPs. Commission access to a registrant's books and records is a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto. The Commission has maintained an ongoing dialogue on a bilateral and multilateral basis with foreign regulators and with registrants to address books and records access issues and may consider appropriate measures where requested to do so.

by an SD or MSP registered with the Commission is a core requirement of the CEA [12] and the Commission's regulations,[13] and is a condition to registration.[14]

III. Regulation of SDs and MSPs in Australia

On April 22, 2013, the applicant submitted a request that the Commission assess the comparability of laws and regulations applicable in Australia with the CEA and the Commission's regulations promulgated thereunder. The applicant provided Commission staff with an updated submission on June 7, 2013. On November 8, 2013, the application was further supplemented with corrections and additional materials.

As represented to the Commission by the applicant, currently all five Australian registered SDs are Australian authorized deposit-taking institutions ("ADIs") and holders of an Australian financial services license ("AFSL"). Thus, for the purposes of the Commission's comparability determination, the Commission will consider the laws and regulations applicable to the five SD ADIs with respect to their swap activities. The relevant laws and regulations are administered by two agencies; the Australian Prudential Regulatory Authority ("APRA") and the Australian Securities and Investments Commission ("ASIC").[15]

APRA is the prudential regulator of the Australian financial services industry and oversees the banking industry. It has developed a regulatory framework for Australian ADIs under the Banking Act 1959 (the "Banking Act") that is based on the banking supervision principles published by the Basel Committee on Banking Supervision. This regulatory framework is set out in a number of different prudential standards that govern the activities of ADIs.

ASIC is Australia's corporate, markets, and financial services regulator. ASIC licenses and monitors financial services businesses to ensure they operate efficiently, honestly, and fairly. ASIC administers, among other things, the following legislation and regulations: the Corporations Act 2001 (the "Corporations Act"), the Corporations Regulations 2001, and the Australian Securities and Investments Commission Act 2001 (the "ASIC Act"). Under the Corporations Act, an Australian entity that undertakes specified activities, including dealing or market making in derivatives (including swaps) is required to hold an AFSL. The AFSL regime establishes a number of general licensing obligations that all licensees must comply with. ASIC has also issued regulatory guidance which sets out its expectations of how licensees may comply with their licensing obligations in a range of situations and taking into account the nature, size, and complexity of their financial services business.

IV. Comparable and Comprehensiveness Standard

The Commission's comparability analysis will be based on a comparison of specific foreign requirements against the specific related CEA provisions and Commission regulations as categorized and described in the Guidance. As explained in the Guidance, within the framework of CEA section 2(i) and principles of international comity, the Commission may make a comparability determination on a requirement-by-requirement basis, rather than on the basis of the foreign regime as a whole.[16] In making its comparability determinations, the Commission may include conditions that take into account timing and other issues related to coordinating the implementation of reform efforts across jurisdictions.[17]

In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the corollary requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including, but not limited to:

- The comprehensiveness of those requirement(s),
- The scope and objectives of the relevant regulatory requirement(s),
- The comprehensiveness of the foreign regulator's supervisory compliance program, and
- The home jurisdiction's authority to support and enforce its oversight of the registrant.[18]

In making a comparability determination, the Commission takes an "outcome-based" approach. An "outcome-based" approach means that when evaluating whether a foreign jurisdiction's regulatory requirements are comparable to, and as comprehensive as, the corollary areas of the CEA and Commission regulations, the Commission ultimately focuses on regulatory outcomes (*i.e.*, the home jurisdiction's requirements do not have to be identical).[19] This approach recognizes that foreign regulatory systems differ and their approaches vary and may differ from how the Commission chose to address an issue, but that the foreign jurisdiction's regulatory requirements nonetheless achieve the regulatory outcome sought to be achieved by a certain provision of the CEA or Commission regulation.

In doing its comparability analysis the Commission may determine that no comparability determination can be made [20] and that the non-U.S. SD or non-U.S. MSP, U.S. bank that is an SD or MSP with respect to its foreign branches, or non-registrant, to the extent applicable under the Guidance, may be required to comply with the CEA and Commission regulations.

The starting point in the Commission's analysis is a consideration of the regulatory objectives of the foreign jurisdiction's regulation of swaps and swap market participants. As stated in the Guidance, jurisdictions may not have swap specific regulations in some areas, and instead have regulatory or supervisory regimes that achieve comparable and comprehensive regulation to the Dodd-Frank Act requirements, but on a more general, entity-wide, or prudential, basis.[21] In addition, portions of a foreign regulatory regime may have similar regulatory objectives, but the means by which these objectives are achieved with respect to swaps market activities may not be clearly defined, or may not

[12] *See* e.g., sections 4s(f)(1)(C), 4s(j)(3) and (4) of the CEA.

[13] *See* e.g., §§ 23.203(b) and 23.606.

[14] *See* supra note 10.

[15] Because the applicant's request and the Commissions determinations herein are based on the comparability of Australian requirements applicable to ADIs and AFSL holders, an SD or MSP that is not an ADI or AFSL holder, or is otherwise not subject to the requirements applicable to ADIs and AFSL holders upon which the Commission bases its determinations, may not be able to rely on the Commission's comparability determinations herein.

[16] 78 FR 45343.

[17] 78 FR 45343.

[18] 78 FR 45343.

[19] 78 FR 45343. The Commission's substituted compliance program would generally be available for SDR Reporting, as outlined in the Guidance, only if the Commission has direct access to all of the data elements that are reported to a foreign trade repository pursuant to the substituted compliance program. Thus, direct access to swap data is a threshold matter to be addressed in a comparability evaluation for SDR Reporting. Moreover, the Commission explains in the Guidance that, due to its technical nature, a comparability evaluation for SDR Reporting "will generally entail a detailed comparison and technical analysis." A more particularized analysis will generally be necessary to determine whether data stored in a foreign trade repository provides for effective Commission use, in furtherance of the regulatory purposes of the Dodd-Frank Act. *See* 78 FR 45345.

[20] A finding of comparability may not be possible for a number of reasons, including the fact that the foreign jurisdiction has not yet implemented or finalized particular requirements.

[21] 78 FR 45343.

expressly include specific regulatory elements that the Commission concludes are critical to achieving the regulatory objectives or outcomes required under the CEA and the Commission's regulations. In these circumstances, the Commission will work with the regulators and registrants in these jurisdictions to consider alternative approaches that may result in a determination that substituted compliance applies.[22]

Finally, the Commission will generally rely on an applicant's description of the laws and regulations of the foreign jurisdiction in making its comparability determination. The Commission considers an application to be a representation by the applicant that the laws and regulations submitted are in full force and effect, that the description of such laws and regulations is accurate and complete, and that, unless otherwise noted, the scope of such laws and regulations encompasses the swaps activities[23] thnsp: of SDs and MSPs[24] in the relevant jurisdictions.[25] Further, as stated in the Guidance, the Commission expects that an applicant would notify the Commission of any material changes to information submitted in support of a comparability determination (including, but not limited to, changes in the relevant supervisory or regulatory regime) as, depending on the nature of the change, the Commission's comparability determination may no longer be valid.[26]

The Guidance provided a detailed discussion of the Commission's policy regarding the availability of substituted compliance[27] for the Internal Business Conduct Requirements.[28]

V. Supervisory Arrangement

In the Guidance, the Commission stated that, in connection with a determination that substituted compliance is appropriate, it would expect to enter into an appropriate memorandum of understanding ("MOU") or similar arrangement[29] with the relevant foreign regulator(s). Although existing arrangements would indicate a foreign regulator's ability to cooperate and share information, "going forward, the Commission and relevant foreign supervisor(s) would need to establish supervisory MOUs or other arrangements that provide for information sharing and cooperation in the context of supervising [SDs] and MSPs."[30]

The Commission is in the process of developing its registration and supervision regime for provisionally-registered SDs and MSPs. This new initiative includes setting forth supervisory arrangements with authorities that have joint jurisdiction over SDs and MSPs that are registered with the Commission and subject to U.S. law. Given the developing nature of the Commission's regime and the fact that the Commission has not negotiated prior supervisory arrangements with certain authorities, the negotiation of supervisory arrangements presents a unique opportunity to develop close working relationships between and among authorities, as well as highlight any potential issues related to cooperation and information sharing.

Accordingly, the Commission is negotiating such a supervisory arrangement with each applicable foreign regulator of an SD or MSP. The Commission expects that the arrangement will establish expectations for ongoing cooperation, address direct access to information,[31] provide for notification upon the occurrence of specified events, memorialize understandings related to on-site visits,[32] and include protections related

---

[22] As explained in the Guidance, such "approaches used will vary depending on the circumstances relevant to each jurisdiction. One example would include coordinating with the foreign regulators in developing appropriate regulatory changes or new regulations, particularly where changes or new regulations already are being considered or proposed by the foreign regulators or legislative bodies. As another example, the Commission may, after consultation with the appropriate regulators and market participants, include in its substituted compliance determination a description of the means by which certain swaps market participants can achieve substituted compliance within the construct of the foreign regulatory regime. The identification of the means by which substituted compliance is achieved would be designed to address the regulatory objectives and outcomes of the relevant Dodd-Frank Act requirements in a manner that does not conflict with a foreign regulatory regime and reduces the likelihood of inconsistent regulatory obligations. For example, the Commission may specify that [SDs] and MSPs in the jurisdiction undertake certain recordkeeping and documentation for swap activities that otherwise is only addressed by the foreign regulatory regime with respect to financial activities generally. In addition, the substituted compliance determination may include provisions for summary compliance and risk reporting to the Commission to allow the Commission to monitor whether the regulatory outcomes are being achieved. By using these approaches, in the interest of comity, the Commission would seek to achieve its regulatory objectives with respect to the Commission's registrants that are operating in foreign jurisdictions in a manner that works in harmony with the regulatory interests of those jurisdictions." 78 FR 45343–44.

[23] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under 17 CFR Part 23 are limited in scope to the swaps activities of SDs and MSPs.

[24] No SD or MSP that is not legally required to comply with a law or regulation determined to be comparable may voluntarily comply with such law or regulation in lieu of compliance with the CEA and the relevant Commission regulation. Each SD or MSP that seeks to rely on a comparability determination is responsible for determining whether it is subject to the laws and regulations found comparable. Currently, there are no MSPs organized outside the U.S. and the Commission therefore cautions any non-financial entity organized outsida the U.S. and applying for registration as an MSP to carefully consider whether the laws and regulations determined to be comparable herein are applicable to such entity.

[25] The Commission has provided the relevant foreign regulator(s) with opportunities to review and correct the applicant's description of such laws and regulations on which the Commission will base its comparability determination. Tha Commission relies on the accuracy and completeness of such review and any corrections received in making its comparability determinations. A comparability determination based on an inaccurata description of foreign laws and regulations may not be valid.

[26] 78 FR 45345.

[27] *See* 78 FR 45348–50. The Commission notes that registrants and other market participants ara responsible for determining whether substituted compliance is available pursuant to the Guidance based on tha comparability determination contained herein (including any conditions or exceptions), and its particular status and circumstances.

[28] This notice does not address § 23.608 (Restrictions on counterparty clearing relationships). The Commission declines to take up the request for a comparability determination with respect to this regulation due to the Commission's view that there are not laws or regulations applicable in Australia to compare with the prohibitions and requirements of § 23.608. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in Australia.

This notice also doas not address capital adequacy because the Commission has not yet finalized rules for SDs and MSPs in this area, nor SDR Reporting. The Commission may provide a comparability determination with respect to these requirements at a later date or in a separate notice.

[29] An MOU is ona type of arrangement between or among regulators. Supervisory arrangements could include, as appropriate, cooperative arrangements that are memorialized and executed as addenda to existing MOUs or, for example, as independent bilateral arrangements, statements of intent, declarations, or letters.

[30] 78 FR 45344.

[31] Section 4s(j)(3) and (4) of the CEA and Commission regulation 23.606 require a registered SD or MSP to make all records required to be maintained in accordance with Commission regulation 1.31 available promptly upon request to, among others, representatives of the Commission. *See also* 7 U.S.C. 6s(f); 17 CFR 23.203. In the Guidance, tha Commission states that it "reserves this right to access records held by registered [SDs] and MSPs, including those that are non-U.S. persons who may comply with the Dodd-Frank recordkeeping requirement through substituted compliance." 78 FR 45345 n. 472; see *also id.* at 45342 n. 461 (affirming tha Commission's authority under the CEA and its regulations to access books and records held by registered SDs and MSPs as "a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with tha CEA and the regulations adopted pursuant thereto").

[32] The Commission retains its examination authority, both during the application process as well as upon and after registration of an SD or MSP.

Continued

to the use and confidentiality of non-public information shared pursuant to the arrangement.

These arrangements will establish a roadmap for how authorities will consult, cooperate, and share information. As with any such arrangement, however, nothing in these arrangements will supersede domestic laws or resolve potential conflicts of law, such as the application of domestic secrecy or blocking laws to regulated entities.

VI. Comparability Determination and Analysis

The following section describes the requirements imposed by specific sections of the CEA and the Commission's regulations for the Internal Business Conduct Requirements that are the subject of this comparability determination, and the Commission's regulatory objectives with respect to such requirements. Immediately following a description of the requirement(s) and regulatory objective(s) of the specific Internal Business Conduct Requirements that the requestor submitted for a comparability determination, the Commission provides a description of the foreign jurisdiction's comparable laws, regulations, or rules and whether such laws, regulations, or rules meet the applicable regulatory objective.

The Commission's determinations in this regard and the discussion in this section are intended to inform the public of the Commission's views regarding whether the foreign jurisdiction's laws, regulations, or rules may be comparable and comprehensive as those requirements in the Dodd-Frank Act (and Commission regulations promulgated thereunder) and therefore, may form the basis of substituted compliance. In turn, the public (in the foreign jurisdiction, in the United States, and elsewhere) retains its ability to present facts and circumstances that would inform the determinations set forth in this notice.

As was stated in the Guidance, the Commission recognizes the complex and dynamic nature of the global swap market and the need to take an adaptable approach to cross-border issues, particularly as it continues to work closely with foreign regulators to address potential conflicts with respect to each country's respective regulatory regime. In this regard, the Commission may review, modify, or expand the determinations herein in light of comments received and future developments.

A. Chief Compliance Officer (§ 3.3)

Commission Requirement: Implementing section 4s(k) of the CEA, Commission regulation 3.3 generally sets forth the following requirements for SDs and MSPs:

- An SD or MSP must designate an individual as Chief Compliance Officer ("CCO");
- The CCO must have the responsibility and authority to develop the regulatory compliance policies and procedures of the SD or MSP;
- The CCO must report to the board of directors or the senior officer of the SD or MSP;
- Only the board of directors or a senior officer may remove the CCO;
- The CCO and the board of directors must meet at least once per year;
- The CCO must have the background and skills appropriate for the responsibilities of the position;
- The CCO must not be subject to disqualification from registration under sections 8a(2) or (3) of the CEA;
- Each SD and MSP must include a designation of a CCO in its registration application;
- The CCO must administer the regulatory compliance policies of the SD or MSP;
- The CCO must take reasonable steps to ensure compliance with the CEA and Commission regulations, and resolve conflicts of interest;
- The CCO must establish procedures for detecting and remediating non-compliance issues;
- The CCO must annually prepare and sign an "annual compliance report" containing: (i) A description of policies and procedures reasonably designed to ensure compliance; (ii) an assessment of the effectiveness of such policies and procedures; (iii) a description of material non-compliance issues and the action taken; (iv) recommendations of improvements in compliance policies; and (v) a certification by the CCO or CEO that, to the best of such officer's knowledge and belief, the annual report is accurate and complete under penalty of law; and
- The annual compliance report must be furnished to the CFTC within 90 days after the end of the fiscal year of the SD or MSP, simultaneously with its annual financial condition report.

Regulatory Objective: The Commission believes that compliance by SDs and MSPs with the CEA and the Commission's rules greatly contributes to the protection of customers, orderly and fair markets, and the stability and integrity of the market intermediaries registered with the Commission. The Commission expects SDs and MSPs to strictly comply with the CEA and the Commission's rules and to devote sufficient resources to ensuring such compliance. Thus, through its CCO rule, the Commission seeks to ensure firms have designated a qualified individual as CCO that reports directly to the board of directors or the senior officer of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually to the Commission and the board or senior officer on compliance of the firm.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as section 4s(k) of the CEA and Commission regulation 3.3.

- APRA prudential standard CPS 520—Fit and Proper ("CPS 520") requires the appointment of "responsible persons." CPS 520 states that responsible persons must be fit and proper, and that the ultimate responsibility for ensuring that an institution's responsible persons are fit and proper remains with the board of directors.
- ASIC Regulatory Guide 105 Licensing: Organisational competence requires AFSL licensees to appoint "responsible managers" who have direct responsibility for significant day-to-day decisions about the financial services provided, and for maintaining organizational competence of the entity. Such responsible managers must have the relevant skill and experience and be of good fame and character.
- ASIC Regulatory Guide 104 Licensing: Meeting the general obligations ("RG 104") also requires AFSL holders to allocate to a director or senior manager responsibility for overseeing the AFSL holder's compliance measures, and reporting to the governing body (including having ready access to the governing body).
- When ASIC assesses an application for an AFSL, ASIC requires applicants to describe whether their compliance arrangements are generally consistent with "Australian Standard 3806" ("AS

See 78 FR 45342 (stating Commission policy that "eligible entities may comply with a substituted compliance regime under certain circumstances, subject, however, to the Commission's retention of its examination authority") and 45344 n. 471 (stating that the "Commission may, as it deems appropriate and necessary, conduct an on-site examination of the applicant").

3806").[33] AS 3806 provides principles and guidance for designing, developing, implementing, maintaining and improving a flexible, responsive effective and measurable compliance program within an organization. Although this is a non-governmental standard, ASIC refers to AS 3806 in its regulatory guidance for AFSL licensees and asks AFSL holders to refer to the standards when complying with their regulatory obligations.

- AFSL licensees must comply with section 912A of the Corporations Act, which, among other obligations, requires that such entities: Do all things necessary to ensure that the financial services covered by the license are provided efficiently, honestly and fairly; have adequate arrangements in place for managing conflicts of interest that may arise wholly, or partially, in relation to activities undertaken by the licensee or a representative of the licensee in the provision of financial services as part of the financial services business of the licensee or the representative; comply with any conditions on the license; comply with the financial services laws; take reasonable steps to ensure that representatives comply with the financial services laws; maintain the competence to provide the financial services covered by the license; ensure that representatives are adequately trained and competent to provide those financial services; and if those financial services are provided to retail clients, have a dispute resolution system.
- AFSL licensees are also required under section 912D of the Corporations Act to report to ASIC any significant breach (or likely breach) of its regulatory obligations. ASIC Regulatory Guide 78 Breach reporting by AFS licensees expands on this obligation and requires AFSL holders to have a documented process for, amongst other things, rectifying breaches and ensuring that arrangements are in place to prevent the recurrence of the breach.
- ADIs are also required under APRA prudential standard APS 310 Audit and Related Matters ("APS 310") to provide APRA a high-level description of its risk management systems covering all major areas of risk and annually, within three months of its annual balance date, provide APRA with a declaration from its CEO endorsed by the board that attests that: they have established systems to monitor and manage those risk including, where appropriate, by setting and requiring adherence to a series of prudent limits, and by adequate and timely reporting processes; the risk management systems are operating effectively and are adequate with regard to the risks they are designed to control; and the descriptions of risk management systems provided to APRA are accurate and current.[34]

Commission Determination: The Commission finds that the provisions and requirements under the Australian regimes specified above are generally identical in intent to § 3.3 by seeking to ensure firms have designated a qualified individual as the compliance officer that reports directly to a sufficiently senior function of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually on compliance of the firm.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the CCO requirements of the provisions of Australian law and regulations specified above are comparable to and as comprehensive as § 3.3, with the exception of § 3.3(e) concerning preparing and signing an annual compliance report and § 3.3(f) concerning certifying and furnishing an annual compliance report to the Commission.

Notwithstanding that the Commission has not determined that the requirements of Australian law and regulations are comparable to and as comprehensive as §§ 3.3(e) and 3.3(f), any SD or MSP to which both § 3.3 and the Australian law and regulations specified above are applicable would generally be deemed to be in compliance with §§ 3.3(e) and (f) if that SD or MSP complies with the Australian law and regulations specified above, subject to preparing and signing an annual compliance report in accordance with § 3.3(e) and certifying and furnishing the Commission with an annual compliance report in accordance with § 3.3(f). The Commission notes that it generally expects registrants to submit required reports to the Commission in the English language.

B. Risk Management Duties (§§ 23.600—23.609)

Section 4s(j) of the CEA requires each SD and MSP to establish internal policies and procedures designed to, among other things, address risk management, monitor compliance with position limits, prevent conflicts of interest, and promote diligent supervision, as well as maintain business continuity and disaster recovery programs.[35] The Commission adopted regulations 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606 to implement the statute.[36] The Commission also adopted regulation 23.609, which requires certain risk management procedures for SDs or MSPs that are clearing members of a derivatives clearing organization ("DCO").[37] Collectively, these requirements help to establish a robust and comprehensive internal risk management program for SDs and MSPs with respect to their swaps activities,[38] which is critical to effective systemic risk management for the overall swaps market. In making its comparability determination with regard to these risk management duties, the Commission will consider each regulation individually.[39]

[33] AS 3806 is a standard published by "Standards Australia," a non-government standards organization. Australian Standards are not legal documents, but can be referenced in Australian legislation and become mandatory.

[34] Not relevant for the Commission's comparability determination herein, the applicant also referenced APRA draft prudential standard CPS 220 Risk Management ("Draft CPS 220"), which was released by APRA on May 9, 2013. This draft prudential standard, if finalized in a form similar to its draft form, will require each ADI (including SD ADIs) to have a designated compliance function that assists senior management in effectively managing compliance risks. It will also require that the compliance function be adequately staffed by appropriately trained and competent persons who have sufficient authority to perform their role effectively, and have a reporting line independent from business lines. APRA expects to finalize Draft CPS 220 prior to its implementation date of January 1, 2015.

[35] 7 U.S.C. 6s(j).

[36] *See* Final Swap Dealer and MSP Recordkeeping Rule, 77 FR 20128 (April 3, 2012) (relating to risk management program, monitoring of position limits, business continuity and disaster recovery, conflicts of interest policies and procedures, and general information availability, respectively).

[37] *See* Customer Documentation Rule, 77 FR 21278. Also, SDs must comply with Commission regulation 23.608, which prohibits SDs providing clearing services to customers from entering into agreements that would: (i) Disclose the identity of a customer's original executing counterparty; (ii) limit the number of counterparties a customer may trade with; (iii) impose counterparty-based position limits; (iv) impair a customer's access to execution of a trade on terms that have a reasonable relationship to the best terms available; or (v) prevent compliance with specified time frames for acceptance of trades into clearing.

[38] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under 17 CFR Part 23 are limited in scope to the swaps activities of SDs and MSPs.

[39] As stated above, this notice does not address § 23.608 (Restrictions on counterparty clearing relationships). The Commission declines to take up

Continued

1. Risk Management Program for SDs and MSPs (§ 23.600)

Commission Requirement: Implementing section 4s(j)(2) of the CEA, Commission regulation 23.600 generally requires that:

- Each SD or MSP must establish and enforce a risk management program consisting of a system of written risk management policies and procedures designed to monitor and manage the risks associated with the swap activities of the firm, including without limitation, market, credit, liquidity, foreign currency, legal, operational, and settlement risks, and furnish a copy of such policies and procedures to the CFTC upon application for registration and upon request;
- The SD or MSP must establish a risk management unit independent from the business trading unit;
- The risk management policies and procedures of the SD or MSP must be approved by the firm's governing body;
- Risk tolerance limits and exceptions therefrom must be reviewed and approved quarterly by senior management and annually by the governing body;
- The risk management program must have a system for detecting breaches of risk tolerance limits and alerting supervisors and senior management, as appropriate;
- The risk management program must account for risks posed by affiliates and be integrated at the consolidated entity level;
- The risk management unit must provide senior management and the governing body with quarterly risk exposure reports and upon detection of any material change in the risk exposure of the SD or MSP;
- Risk exposure reports must be furnished to the CFTC within five business days following provision to senior management;
- The risk management program must have a new product policy for assessing the risks of new products prior to engaging in such transactions;
- The risk management program must have policies and procedures providing for trading limits, monitoring of trading, processing of trades, and separation of personnel in the trading unit from personnel in the risk management unit; and
- The risk management program must be reviewed and tested at least annually and upon any material change in the business of the SD or MSP.

Regulatory Objective: Through the required system of risk management, the Commission seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. To this end, the Commission believes the risk management program of an SD or MSP must contain at least the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as section 4s(j)(2) of the CEA and Commission regulation 23.600.[40]

- The regulatory framework for ADIs under the Banking Act is based on the banking supervision principles published by the Basel Committee on Banking Supervision.[41] This prudential framework includes requirements (largely set out in detailed and separate prudential standards) regarding capital adequacy, credit risk, market risk, liquidity, credit quality, large exposures, associations with related entities, outsourcing, business continuity management, audit and related arrangements for prudential reporting, governance, and fit and proper management.
- In particular, APS 310 (discussed above) requires an ADI's board and management to ensure that the ADI meets prudential and statutory requirements and has management practices to limit risks to prudent levels. APS 310 mandates that the ADI's risk management practices must be detailed in descriptions of risk management systems that must be regularly reviewed and updated, at least annually, to take account of changing circumstances.
- APRA Prudential standard APS 116 Capital Adequacy: Market Risk ("APS 116") states that the board, or a board committee, of an ADI must ensure that the ADI has in place adequate systems to identify, measure and manage market risk, including identifying responsibilities, providing adequate separation of duties and avoiding conflicts of interest.
- For certain trading positions, APS 116 states that an ADI must have "clearly defined policies and procedures for the active management of positions such that: positions are managed on a trading desk; position limits are set and monitored for appropriateness; positions are marked-to-market daily and when marking-to-model the parameters are assessed on a daily basis; and positions are reported to senior management as an integral part of the institution's risk management process."
- If an ADI has received approval to apply an "internal model" for market risk, as opposed to the "standard method" of calculating capital requirements, APS 116 requires the ADI to have an independent risk control unit that is responsible for the design and implementation of the ADI's market risk management system. The risk control unit must produce and analyze daily reports on the output of the ADI's risk measurement model, including an evaluation of limit utilization. This risk control unit must be independent from business trading and other risk taking units and must report directly to senior management of the ADI.
- If an ADI has received approval to apply an "internal model" for market risk, APS 116 states that the board or a board committee and senior management of an ADI must be actively involved in the risk control process. Daily reports must be prepared by the independent risk control unit and must be reviewed by a level of management with sufficient seniority and authority to enforce reductions of positions.
- APS 116 states that an ADI must ensure that an independent review of the risk measurement system and

---

the request for a comparability determination with respect to this regulation due to the Commission's view that there are not laws or regulations applicable in Australia to compare with the prohibitions and requirements of § 23.608. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in Australia.

[40] Not relevant for the Commission's comparability determination herein, the applicant also referenced Draft CPS 220. Draft CPS 220 seeks to introduce additional requirements in respect of the risk management framework for ADIs. APRA expects to finalize CPS 220 prior to its implementation date of January 1, 2015. Under Draft CPS 220, an APRA-regulated institution must have policies and procedures that provide the board with a comprehensive institution-wide view of its material risks. Draft CPS 220 also requires the risk management function of an ADI be "operationally independent" and must be headed by a designated Chief Risk Officer ("CRO"). The CRO must be involved in, and have the authority to provide effective challenge to, activities and decisions that may materially affect the institution's risk profile.

[41] The Corporations Act requires AFSL holders to comply with risk management requirements, however, this requirement does not apply where an entity is regulated by APRA. *See* section 912A(1)(h).

overall risk management process is carried out initially (i.e., at the time when model approval is sought) and then regularly as part of the ADI's internal audit process.

Commission Determination: The Commission finds that the provisions of Australian law and regulations specified above are generally identical in intent to § 23.600 by requiring a system of risk management that seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. Specifically, the Commission finds that the Australian provisions specified above comprehensively require SDs and MSPs to establish risk management programs containing the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the risk management program requirements of the provisions of Australian law and regulations specified above, are comparable to and as comprehensive as § 23.600, with the exception of § 23.600(c)(2) concerning the requirement that each SD and MSP produce a quarterly risk exposure report and provide such report to its senior management, governing body, and the Commission.

Notwithstanding that the Commission has not determined that the requirements of Australian law and regulations are comparable to and as comprehensive as § 23.600(c)(2), any SD or MSP to which both § 23.600 and the Australian law and regulations specified above are applicable would generally be deemed to be in compliance with § 23.600(c)(2) if that SD or MSP complies with the Australian law and regulations specified above, subject to compliance with the requirement that it produce quarterly risk exposure reports and provide such reports to its senior management, governing body, and the Commission in accordance with § 23.600(c)(2). The Commission notes that it generally expects reports furnished to the Commission by registrants to be in the English language.

2. Monitoring of Position Limits (§ 23.601)

Commission Requirement: Implementing section 4s(j)(1) of the CEA, Commission regulation 23.601 requires each SD or MSP to establish and enforce written policies and procedures that are reasonably designed to monitor for, and prevent violations of, applicable position limits established by the Commission, a designated contract market ("DCM"), or a swap execution facility ("SEF").[42] The policies and procedures must include an early warning system and provide for escalation of violations to senior management (including the firm's governing body).

Regulatory Objective: Generally, position limits are implemented to ensure market integrity, fairness, orderliness, and accurate pricing in the commodity markets. Commission regulation 23.601 thus seeks to ensure that SDs and MSPs have established the necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by the Commission, a DCM, or a SEF. As part of its Risk Management Program, § 23.601 is intended to ensure that established position limits are not breached by the SD or MSP.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as section 4s(j)(1) of the CEA and Commission regulation 23.601.

- Section 912A(1)(ca) of the Corporations Act, which requires AFSL holders to take reasonable steps to ensure its representatives comply with the financial services laws, which would include regulatory position limits.
- APS 310 (discussed above) requires an ADI's board and management to ensure that the ADI meets prudential and statutory requirements and has management practices to limit risks to prudent levels.

In addition to the foregoing, the applicant also submitted various guidelines and required best practices concerning the setting of internal risk tolerance limits and monitoring for compliance with such internal limits. Although the Commission recognizes these as prudent risk management practices, the Commission does not believe that these provisions are comparable to § 23.601 because § 23.601 requires monitoring for compliance with external position limits set by the Commission, a DCM, or a SEF.

Commission Determination: The Commission finds that the Australian provisions specified above are generally identical in intent to § 23.601 by requiring SDs and MSPs to establish necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by applicable laws and regulations, including those of the Commission, a DCM, or a SEF. Specifically, the Commission finds that the provisions of Australian law and regulations specified above, while not specific to the issue of position limit compliance, nevertheless comprehensively require SDs and MSPs to monitor for regulatory compliance generally, which includes monitoring for compliance with position limits set pursuant to applicable law and the responsibility of senior management (including the board of directors) for such compliance.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the compliance monitoring requirements of Australian law and regulations, as specified above, are comparable to and as comprehensive as § 23.601. For the avoidance of doubt, the Commission notes that this determination may not be relied on to relieve an SD or MSP from its obligation to strictly comply with any applicable position limit established by the Commission, a DCM, or a SEF.

3. Diligent Supervision (§ 23.602)

Commission Requirement: Commission regulation 23.602 implements section 4s(h)(1)(B) of the CEA and requires each SD and MSP to establish a system to diligently supervise all activities relating to its business performed by its partners, members, officers, employees, and agents. The system must be reasonably designed to achieve compliance with the CEA and CFTC regulations. Commission regulation 23.602 requires that the supervisory system must specifically designate qualified persons with authority to carry out the supervisory responsibilities of the SD or MSP for all activities relating to its business as an SD or MSP.

Regulatory Objective: The Commission's diligent supervision rule seeks to ensure that SDs and MSPs

[42] The setting of position limits by the Commission, a DCM, or a SEF is subject to requirements under the CEA and Commission regulations other than § 23.601. The setting of position limits and compliance with such limits is not subject to the Commission's substituted compliance regime.

strictly comply with the CEA and the Commission's rules. To this end, through § 23.602, the Commission seeks to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as section 4s(h)(1)(B) of the CEA and Commission regulation 23.602.

- CPS 520 (discussed above) sets forth the fitness requirements for all APRA regulated institutions. These standards apply to all directors and senior managers of an ADI as well as other "responsible persons." The applicable key requirements of this prudential standard are: an ADI must have a Fit and Proper policy that meets certain standards; the fitness and propriety of a responsible person must generally be assessed prior to initial appointment and then re-assessed annually; and an ADI must take steps to ensure that a person is not appointed to, or does not continue to hold, a responsible person position for which they are not qualified.
- Section 912A(1)(ca) of the Corporations Act requires that an AFSL licensee take reasonable steps to ensure that its representatives comply with the financial services laws.
- RG 104 (discussed above) sets forth guidance for an AFSL licensee with respect to supervision. These regulatory guidelines require that an AFSL licensee have measures for monitoring and supervising their representatives to determine whether they are complying with the financial services laws. They also require that an AFSL licensee take measures to ensure that their representatives who provide financial services have, and maintain the necessary knowledge and skills, to competently provide those services.

Commission Determination: The Commission finds that the provisions of Australian law and regulations specified above are generally identical in intent to § 23.602 because such standards seek to ensure that SDs and MSPs strictly comply with applicable law, which would include the CEA and the Commission's regulations. Through the provisions specified above, Australian law and regulations seek to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with applicable law, which would include the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the internal supervision requirements of the provisions of Australian law and regulations, as specified above, are comparable to and as comprehensive as § 23.602.

4. Business Continuity and Disaster Recovery (§ 23.603)

Commission Requirement: To ensure the proper functioning of the swaps markets and the prevention of systemic risk more generally, Commission regulation 23.603 requires each SD and MSP, as part of its risk management program, to establish a business continuity and disaster recovery plan that includes procedures for, and the maintenance of, back-up facilities, systems, infrastructure, personnel, and other resources to achieve the timely recovery of data and documentation and to resume operations generally within the next business day after the disruption.

Regulatory Objective: Commission regulation 23.603 is intended to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, this requirement seeks to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan within one business day, if necessary.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as Commission regulation 23.603.

APRA prudential standard CPS 232 Business Continuity Management ("CPS 232") requires each ADI to implement a whole-of-business approach to business continuity management. Specifically, CPS 232 states that:

- A regulated institution must identify, assess, and manage potential business continuity risks to ensure that it is able to meet its financial and service obligations to its depositors, policyholders and other creditors;
- The board of a regulated institution must consider business continuity risks and controls as part of its overall risk management systems and approve a Business Continuity Management Policy;
- A regulated institution must develop and maintain a Business Continuity Plan that documents procedures and information which enable the regulated institution to manage business disruptions;
- A regulated institution must review the Business Continuity Plan annually and periodically arrange for its review by the internal audit function or an external expert; and
- A regulated institution must notify APRA in the event of certain disruptions.

Commission Determination: The Commission finds that the provisions of Australian law and regulations specified above are generally identical in intent to § 23.603 because such standards seek to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, the Commission finds that the provisions of Australian law and regulations specified above seek to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan in a timely manner.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the business continuity and disaster recovery requirements of the provisions of Australian law and regulations, as specified above, are comparable to and as comprehensive as § 23.603.

5. Conflicts of Interest (§ 23.605)

Commission Requirement: Section 4s(j)(5) of the CEA and Commission regulation 23.605(c) generally require each SD or MSP to establish structural and institutional safeguards to ensure that the activities of any person within the firm relating to research or analysis of the price or market for any commodity or swap are separated by appropriate informational partitions within the firm from the review, pressure, or oversight of persons whose involvement in pricing, trading, or clearing activities might potentially bias their judgment or supervision.

In addition, section 4s(j)(5) of the CEA and Commission regulation 23.605(d)(1) generally prohibits an SD or MSP from directly or indirectly interfering with or attempting to influence the decision of any clearing unit of any affiliated clearing member of a DCO to provide

clearing services and activities to a particular customer, including:

- Whether to offer clearing services to a particular customer;
- Whether to accept a particular customer for clearing derivatives;
- Whether to submit a customer's transaction to a particular DCO;
- Whether to set or adjust risk tolerance levels for a particular customer; or
- Whether to set a customer's fees based on criteria other than those generally available and applicable to other customers.

Commission regulation 23.605(d)(2) generally requires each SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of any affiliated clearing member of a DCO to reasonably ensure compliance with the Act and the prohibitions set forth in § 23.605(d)(1) outlined above.

The Commission observes that § 23.605(d) works in tandem with Commission regulation 1.71, which requires FCMs that are clearing members of a DCO and affiliated with an SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of the FCM to reasonably ensure compliance with the Act and the prohibitions set forth in § 1.71(d)(1), which are the same as the prohibitions set forth in § 23.605(d)(1) outlined above.

Finally, § 23.605(e) requires that each SD or MSP have policies and procedures that mandate the disclosure to counterparties of material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a swap execution facility or DCM or to clear a derivative through a DCO.

Regulatory Objective: Commission regulation 23.605(c) seeks to ensure that research provided to the general public by an SD or MSP is unbiased and free from the influence of the interests of an SD or MSP arising from the SD's or MSP's trading business.

In addition, the § 23.605(d) (working in tandem with § 1.71) seeks to ensure open access to the clearing of swaps by requiring that access to and the provision of clearing services provided by an affiliate of an SD or MSP are not influenced by the interests of an SD's or MSP's trading business.

Finally, § 23.605(e) seeks to ensure equal access to trading venues and clearinghouses, as well as orderly and fair markets, by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as Commission regulation 23.605(c).

- Section 912A(1)(aa) of the Corporations Act requires AFSL licensees to have adequate arrangements for the management of conflicts of interest that may arise wholly, or partially, in relation to activities undertaken by a licensee or a representative of the licensee in the provision of financial services.
- ASIC Regulatory Guide 181 Licensing: Managing conflicts of interest and ASIC Regulatory Guide 79 Research report providers: Improving the quality of investment research (specific to research reports provided in Australia), set out ASIC's expectations regarding how financial service licensees are to manage conflicts of interest that arise in relation to the financial services that they provide. The conflicts management obligation requires that all conflicts of interest be adequately managed, recognizing that many conflicts of interest can be managed by a combination of internal controls and disclosures. Where conflicts cannot be adequately managed through internal controls and/or disclosure, the ASIC guidelines require that an AFSL holder must avoid the conflict or refrain from providing the affected financial service.
- Section 941A of the Corporations Act requires AFSL licensees to provide a Financial Services Guide to retail clients if they provide a financial service to the client.
- Section 942B(2)(f) of the Corporations Act states that the Financial Services Guide must provide disclosures about relationships that may influence the provision of the financial service.[43]

The applicant has represented to the Commission that ASIC and APRA, in the process of their oversight and enforcement of the foregoing Australian law and regulations for ADIs and ASFL licensees, would require any SD or MSP subject to such law and regulations to resolve or mitigate conflicts of interests in the provision of clearing services by a clearing member of a DCO that is an affiliate of the SD or MSP, or the decision of a counterparty to execute a derivative on a SEF or DCM, or clear a derivative through a DCO, through appropriate information firewalls and disclosures.

Commission Determination: The Commission finds that the provisions of Australian law and regulations specified above with respect to conflicts of interest that may arise in producing or distributing research are generally identical in intent to § 23.605(c) because such standards seek to ensure that research provided to the general public by an SD is unbiased and free from the influence of the interests of an SD arising from the SD's trading business.

With respect to conflicts of interest that may arise in the provision of clearing services by an affiliate of an SD or MSP, the Commission further finds that although the general conflicts of interest prevention requirements under the Australian law and regulations specified above do not require with specificity that access to and the provision of clearing services provided by an affiliate of an SD or MSP not be improperly influenced by the interests of an SD's or MSP's trading business, such general requirements would require prevention and remediation of such improper influence when recognized or discovered. Thus such standards would ensure open access to clearing.

Finally, although not as specific as the requirements of § 23.605(e) (Undue influence on counterparties), the Commission finds that the general disclosure requirements of the Australian law and regulations specified above would ensure equal access to trading venues and clearinghouses by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the provisions of Australian law and regulations specified above in relation to conflicts of interest are comparable to and as comprehensive as § 23.605.

6. Availability of Information for Disclosure and Inspection (§ 23.606)

Commission Requirement: Commission regulation 23.606 implements sections 4s(j)(3) and (4) of the CEA, and requires each SD and MSP to disclose to the Commission, and an

[43] In addition to the foregoing, the applicant referenced Draft CPS 220. This draft prudential standard, if finalized in a form similar to its draft form, will require each ADI (including SD ADIs) to have policies and procedures for identifying, monitoring, and managing potential and actual conflicts of interest.

SD's or MSP's U.S. prudential regulator (if any) comprehensive information about its swap activities, and to establish and maintain reliable internal data capture, processing, storage, and other operational systems sufficient to capture, process, record, store, and produce all information necessary to satisfy its duties under the CEA and Commission regulations. Such systems must be designed to provide such information to the Commission and an SD's or MSP's U.S. prudential regulator within the time frames set forth in the CEA and Commission regulations and upon request.

Regulatory Objective: Commission regulation 23.606 seeks to ensure that each SD and MSP captures and maintains comprehensive information about their swap activities, and is able to retrieve and disclose such information to the Commission and its U.S. prudential regulator, if any, as necessary for compliance with the CEA and the Commission's regulations and for purposes of Commission oversight, as well as oversight by the SD's or MSP's U.S. prudential regulator, if any.

The Commission observes that it would be impossible to meet the regulatory objective of § 23.606 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.606 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as Commission regulation 23.606.

Section 912C of the Corporations Act and sections 29–33 of the ASIC Act enable ASIC to gather information from AFSL licensees, including:

- A statement containing specified information about the financial services provided by the AFSL holder or its representatives, or the financial services business carried on by the licensee;
- Inspection of books without charge;
- Issuance of a notice to a body corporate to produce books about the affairs of the body corporate;
- Issuance of a notice to a person who carries out a financial services business to produce books relating to, among other things, a dealing in financial products, or the character or financial position of the business;
- Issuance of a notice to produce books relating to the supply of financial services; and
- Issuance of a notice to produce documents in the person's possession that relate to the affairs of the body corporate.

In addition, Section 988A of the Corporations Act requires AFSL license holders to keep financial records that correctly record and explain the transactions and financial position of the financial services business carried out by the licensee.

Part 2.3 of the ASIC Derivative Transaction Rules (Reporting) 2013 places certain requirements on reporting entities (which includes the five SD ADIs as reporting entities from October 1, 2013). Specifically, Rule 2.3.1 requires reporting entities to keep records in relation to OTC derivatives transactions (including swaps) that enable the reporting entity to demonstrate it has complied with the Derivative Transaction Rules, and must keep the records for a period of at least five years from the date the record is made or amended. Reporting entities must also keep a record of all information that it is required to be reported under such rules.

Rule 2.3.2 further requires a reporting entity to, on request by ASIC, provide ASIC within a reasonable time with records or other information relating to compliance with or determining whether there has been compliance with the Rules.

Commission Determination: The Commission finds that the Australian law and regulations specified above are generally identical in intent to § 23.606 because such standards seek to ensure that each SD and MSP captures and stores comprehensive information about their swap activities, and are able to retrieve and disclose such information as necessary for compliance with applicable law and for purposes of regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the Australian law and regulations with respect to the availability of information for inspection and disclosure, as specified above, are comparable to, and as comprehensive as, § 23.606, with the exception of § 23.606(a)(2) concerning the requirement that an SD or MSP make information required by § 23.606(a)(1) available promptly upon request to Commission staff and the staff of an applicable U.S. prudential regulator. The applicant has not submitted any provision of law or regulations applicable in Australia upon which the Commission could make a finding that SDs and MSPs would be required to retrieve and disclose comprehensive information about their swap activities to the Commission or any U.S. prudential regulator as necessary for compliance with the CEA and Commission regulations, and for purposes of Commission oversight and the oversight of any U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of Australian law and regulations are comparable to and as comprehensive as § 23.606(a)(2), any SD or MSP to which both § 23.606 and the Australian law and regulations specified above are applicable would generally be deemed to be in compliance with § 23.606(a)(2) if that SD or MSP complies with the Australian law and regulations specified above, subject to compliance with the requirement that it produce information to Commission staff and the staff of an applicable U.S. prudential regulator in accordance with § 23.606(a)(2).

7. Clearing Member Risk Management (§ 23.609)

Commission Requirement: Commission regulation 23.609 generally requires each SD or MSP that is a clearing member of a DCO to:

- Establish risk-based limits based on position size, order size, margin requirements, or similar factors;
- Screen orders for compliance with the risk-based limits;
- Monitor for adherence to the risk-based limits intra-day and overnight;
- Conduct stress tests under extreme but plausible conditions of all positions at least once per week;
- Evaluate its ability to meet initial margin requirements at least once per week;
- Evaluate its ability to meet variation margin requirements in cash at least once per week;
- Evaluate its ability to liquidate positions it clears in an orderly manner, and estimate the cost of liquidation; and
- Test all lines of credit at least once per year.

Regulatory Objective: Through Commission regulation 23.609, the Commission seeks to ensure the financial integrity of the markets and the clearing system, to avoid systemic risk, and to protect customer funds. Effective risk management by SDs and MSPs that are clearing members is essential to achieving these objectives. A failure of risk management can cause

a clearing member to become insolvent and default to a DCO. Such default can disrupt the markets and the clearing system and harm customers.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as Commission regulation 23.609.

- The regulatory framework for ADIs under the Banking Act is based on the banking supervision principles published by the Basel Committee on Banking Supervision.[44] This prudential framework includes requirements (largely set out in detailed and separate prudential standards) regarding capital adequacy, credit risk, market risk, liquidity, credit quality, large exposures, associations with related entities, outsourcing, business continuity management, audit and related arrangements for prudential reporting, governance, and fit and proper management.
- In particular, APS 310 (discussed above) requires an ADI's board and management to ensure that the ADI meets prudential and statutory requirements and has management practices to limit risks to prudent levels. APS 310 mandates that the ADI's risk management practices must be detailed in descriptions of risk management systems that must be regularly reviewed and updated, at least annually, to take account of changing circumstances.
- APRA Prudential standard APS 116 Capital Adequacy: Market Risk ("APS 116") states that the board, or a board committee, of an ADI must ensure that the ADI has in place adequate systems to identify, measure and manage market risk, including identifying responsibilities, providing adequate separation of duties and avoiding conflicts of interest.
- For certain trading positions, APS 116 states that an ADI must have "clearly defined policies and procedures for the active management of positions such that: Positions are managed on a trading desk; position limits are set and monitored for appropriateness; positions are marked-to-market daily and when marking-to-model the parameters are assessed on a daily basis; and positions are reported to senior management as an integral part of the institution's risk management process.
- If an ADI has received approval to apply an "internal model" for market risk, as opposed to the "standard method" of calculating capital requirements, APS 116 requires the ADI to have an independent risk control unit that is responsible for the design and implementation of the ADI's market risk management system. The risk control unit must produce and analyze daily reports on the output of the ADI's risk measurement model, including an evaluation of limit utilization. This risk control unit must be independent from business trading and other risk taking units and must report directly to senior management of the ADI.
- If an ADI has received approval to apply an "internal model" for market risk, APS 116 states that the board or a board committee and senior management of an ADI must be actively involved in the risk control process. Daily reports must be prepared by the independent risk control unit and must be reviewed by a level of management with sufficient seniority and authority to enforce reductions of positions.
- APS 116 states that an ADI must ensure that an independent review of the risk measurement system and overall risk management process is carried out initially (i.e., at the time when model approval is sought) and then regularly as part of the ADI's internal audit process.

Further, on June 4, 2013, APRA issued a letter to all ADIs, including the Australian SDs outlining the framework for the application of risk management requirements to the Australian banks' membership of CCPs. Such a framework should include, at a minimum: application of appropriate systems and controls to monitor, on a continuing basis, the risk that membership of and conduct of business through a CCP or multiple CCPs may create and to manage such risk. This would include application of limits on potential risk exposures. These clearly articulated conditions together with APRA's prudential standards are designed to achieve a comparable regulatory outcome as Commission regulation 23.609.

Specifically, APRA has represented to the Commission that, in the process of its oversight and enforcement of the foregoing Australian law, regulations, and prudential standards, any SD or MSP subject to such standards that is a clearing member of a DCO would be expected to have established risk-based limits and a compliance and assessment framework for these limits consistent with the Commission's requirements for a clearing member and set out in the SD's or MSP's risk management policy framework. APRA would expect banks in Australia to adhere to their risk limit policies and any targeted review would examine the banks' risk management policy framework that captures these regulatory obligations.

Commission Determination: The Commission finds that the Australian law and regulations specified above are generally identical in intent to § 23.609 because such standards seek to ensure the financial integrity of the markets and the clearing system, to avoid systemic risk, and to protect customer funds.

The Commission notes that the Australian law and regulations specified above are not as specific as § 23.609 with respect to ensuring that SDs and MSPs that are clearing members of a DCO establish detailed procedures and limits for clearing member risk management purposes. Nevertheless, the Commission finds that the general requirements under the Australian law and regulations specified above, implemented in the context of clearing member risk management and pursuant to the representations of ASIC and APRA, meet the Commission's regulatory objective specified above.

Based on the foregoing and the representations above, the Commission hereby determines that the clearing member risk management requirements of the Australian law and regulations specified above are comparable to and as comprehensive as § 23.609.

C. Swap Data Recordkeeping (§§ 23.201 and 23.203)

Commission Requirement: Sections 4s(f)(1)(B) and 4s(g)(1) of the CEA, and Commission regulation 23.201 generally require SDs and MSPs to retain records of each transaction, each position held, general business records (including records related to complaints and sales and marketing materials), records related to governance, financial records, records of data reported to SDRs, and records of real-time reporting data along with a record of the date and time the SD or MSP made such reports. Transaction records must be kept in a form and manner identifiable and searchable by transaction and counterparty.

Commission regulation 23.203, requires SDs and MSPs to maintain records of a swap transaction until the termination, maturity, expiration, transfer, assignment, or novation date of the transaction, and for a period of five years after such date. Records must be "readily accessible" for the first 2 years of the 5 year retention period (consistent with § 1.31).

[44] The Corporations Act requires AFSL holders to comply with risk management requirements, however, this requirement does not apply where an entity is regulated by APRA. *See* section 912A(1)(h).

The Commission notes that the comparability determination below with respect to §§ 23.201 and 23.203 encompasses both swap data recordkeeping generally and swap data recordkeeping relating to complaints and marketing and sales materials in accordance with § 23.201(b)(3) and (4).[45]

Regulatory Objective: Through the Commission's regulations requiring SDs and MSPs to keep comprehensive records of their swap transactions and related data, the Commission seeks to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

The Commission's regulations require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

By requiring comprehensive records of swap data, the Commission seeks to ensure that SDs and MSPs employ effective risk management, and strictly comply with Commission regulations. Further, such records facilitate effective regulatory oversight.

The Commission observes that it would be impossible to meet the regulatory objective of §§ 23.201 and 23.203 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.203 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Australian Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Australia are in full force and effect in Australia, and comparable to and as comprehensive as sections 4s(f)(1)(B) and 4s(g)(1) of the CEA and §§ 23.201 and 23.203.

- Section 286 of the Corporations Act requires firms to keep financial records that correctly record and explain its transactions, financial position and performance for 7 years after the transactions are completed.
- Section 988A of the Corporations Act requires AFSL licensees to keep financial records that correctly record and explain the transactions and financial position of the licensee's financial services business.
- Section 988E of the Corporations Act specifies a list of categories of information to be shown in the records of an AFSL licensee, including records of all money received or paid by the licensee; acquisitions and disposals of financial products, the charges and credits arising from them, and the names of the person acquiring or disposing of each of those products; all income from commissions, interest and other sources and all payments of interest, commissions and other expenses; and records pertaining to the securities or managed investment products that are the property of the licensee or held by the licensee for other persons.
- Corporations regulation 7.8.11 further specifies categories of information to be shown in records, including all financial products dealt with by the AFSL licensee under instructions from another person; and records pertaining to property held by the licensee for another person.
- Corporations regulation 7.8.12 further specifies categories of information to be shown in records, including separate particulars of every transaction by the AFSL licensee, the date of such transactions, and copies of acknowledgments of the receipt of financial products or documents of title to financial products.

Part 2.3 of the ASIC Derivative Transaction Rules (Reporting) 2013 places certain requirements on reporting entities (which includes the five SD ADIs as reporting entities from October, 1 2013). Specifically, Rule 2.3.1 requires reporting entities to keep records in relation to OTC derivatives transactions (including swaps) that enable the reporting entity to demonstrate it has complied with the Derivative Transaction Rules, and must keep the records for a period of at least five years from the date the record is made or amended. Reporting entities must also keep a record of all information that it is required to be reported under such rules.

Rule 2.3.2 further requires a reporting entity to, on request by ASIC, provide ASIC within a reasonable time with records or other information relating to compliance with or determining whether there has been compliance with the Rules.

Commission Determination: The Commission finds that the provisions of Australian law and regulations specified above are generally identical in intent to §§ 23.201 and 23.203 because such provisions seek to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

In addition, the Commission finds that the provisions of Australian law and regulations specified above require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

Finally, the Commission finds that the provisions of Australian law and regulations specified above, by requiring comprehensive records of swap data, seek to ensure that SDs and MSPs employ effective risk management, seek to ensure that SDs and MSPs strictly comply with applicable regulatory requirements (including the CEA and Commission regulations), and that such records facilitate effective regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements of Australian law and regulation with respect to swap data recordkeeping, as specified above, are comparable to, and as comprehensive as, §§ 23.201 and 23.203, with the exception of § 23.203(b)(2) concerning the requirement that an SD or MSP make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator. The applicant has not submitted any provision of Australian law or regulation upon which the Commission could make a finding that SDs and MSPs would be required to make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of Australian law and regulations are comparable to and as comprehensive as § 23.203(b)(2), any SD or MSP to which both § 23.203 and the Australian law and regulations specified above are applicable would generally be deemed to be in compliance with § 23.203(b)(2) if that SD or MSP complies with the Australian law and regulations specified above, subject to compliance with the requirement that it make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator in accordance with § 23.203(b)(2).

[45] *See* the Guidance for a discussion of the availability of substituted compliance with respect to swap data recordkeeping, 78 FR 45332–33.

Issued in Washington, DC on December 20, 2013, by the Commission.

Melissa D. Jurgens,

Secretary of the Commission.

Appendices to Comparability Determination for Australia: Certain Entity-Level Requirements

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Chilton and Wetjen voted in the affirmative. Commissioner O'Malia voted in the negative.

Appendix 2—Statement of Chairman Gary Gensler and Commissioners Chilton and Wetjen

We support the Commission's approval of broad comparability determinations that will be used for substituted compliance purposes. For each of the six jurisdictions that has registered swap dealers, we carefully reviewed each regulatory provision of the foreign jurisdictions submitted to us and compared the provision's intended outcome to the Commission's own regulatory objectives. The resulting comparability determinations for entity-level requirements permit non-U.S. swap dealers to comply with regulations in their home jurisdiction as a substitute for compliance with the relevant Commission regulations.

These determinations reflect the Commission's commitment to coordinating our efforts to bring transparency to the swaps market and reduce its risks to the public. The comparability findings for the entity-level requirements are a testament to the comparability of these regulatory systems as we work together in building a strong international regulatory framework.

In addition, we are pleased that the Commission was able to find comparability with respect to swap-specific transaction-level requirements in the European Union and Japan.

The Commission attained this benchmark by working cooperatively with authorities in Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland to reach mutual agreement. The Commission looks forward to continuing to collaborate with both foreign authorities and market participants to build on this progress in the months and years ahead.

Appendix 3—Dissenting Statement of Commissioner Scott D. O'Malia

I respectfully dissent from the Commodity Futures Trading Commission's ("Commission") approval of the Notices of Comparability Determinations for Certain Requirements under the laws of Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland (collectively, "Notices"). While I support the narrow comparability determinations that the Commission has made, moving forward, the Commission must collaborate with foreign regulators to harmonize our respective regimes consistent with the G–20 reforms.

However, I cannot support the Notices because they: (1) Are based on the legally unsound cross-border guidance ("Guidance");[1] (2) are the result of a flawed substituted compliance process; and (3) fail to provide a clear path moving forward. If the Commission's objective for substituted compliance is to develop a narrow rule-by-rule approach that leaves unanswered major regulatory gaps between our regulatory framework and foreign jurisdictions, then I believe that the Commission has successfully achieved its goal today.

Determinations Based on Legally Unsound Guidance

As I previously stated in my dissent, the Guidance fails to articulate a valid statutory foundation for its overbroad scope and inconsistently applies the statute to different activities.[2] Section 2(i) of the Commodity Exchange Act ("CEA") states that the Commission does not have jurisdiction over foreign activities unless "those activities have a direct and significant connection with activities in, or effect on, commerce of the United States * * *"[3] However, the Commission never properly articulated how and when this limiting standard on the Commission's extraterritorial reach is met, which would trigger the application of Title VII of the Dodd-Frank Act[4] and any Commission regulations promulgated thereunder to swap activities that are outside of the United States. Given this statutorily unsound interpretation of the Commission's extraterritorial authority, the Commission often applies CEA section 2(i) inconsistently and arbitrarily to foreign activities.

Accordingly, because the Commission is relying on the legally deficient Guidance to make its substituted compliance determinations, and for the reasons discussed below, I cannot support the Notices. The Commission should have collaborated with foreign regulators to agree on and implement a workable regime of substituted compliance, and then should have made determinations pursuant to that regime.

Flawed Substituted Compliance Process

Substituted compliance should not be a case of picking a set of foreign rules identical to our rules, determining them to be "comparable," but then making no determination regarding rules that require extensive gap analysis to assess to what extent each jurisdiction is, or is not, comparable based on overall outcomes of the regulatory regimes. While I support the narrow comparability determinations that the Commission has made, I am concerned that in a rush to provide some relief, the Commission has made substituted compliance determinations that only afford narrow relief and fail to address major regulatory gaps between our domestic regulatory framework and foreign jurisdictions. I will address a few examples below.

First, earlier this year, the OTC Derivatives Regulators Group ("ODRG") agreed to a number of substantive understandings to improve the cross-border implementation of over-the-counter derivatives reforms.[5] The ODRG specifically agreed that a flexible, outcomes-based approach, based on a broad category-by-category basis, should form the basis of comparability determinations.[6]

However, instead of following this approach, the Commission has made its comparability determinations on a rule-by-rule basis. For example, in Japan's Comparability Determination for Transaction-Level Requirements, the Commission has made a positive comparability determination for some of the detailed requirements under the swap trading relationship documentation provisions, but not for other requirements.[7] This detailed approach clearly contravenes the ODRG's understanding.

Second, in several areas, the Commission has declined to consider a request for a comparability determination, and has also failed to provide an analysis regarding the extent to which the other jurisdiction is, or is not, comparable. For example, the Commission has declined to address or provide any clarity regarding the European Union's regulatory data reporting determination, even though the European Union's reporting regime is set to begin on February 12, 2014. Although the Commission has provided some limited relief with respect to regulatory data reporting, the lack of clarity creates unnecessary uncertainty, especially when the European Union's reporting regime is set to begin in less than two months.

Similarly, Japan receives no consideration for its mandatory clearing requirement, even though the Commission considers Japan's legal framework to be comparable to the U.S. framework. While the Commission has declined to provide even a partial comparability determination, at least in this instance the Commission has provided a reason: the differences in the scope of entities and products subject to the clearing requirement.[8] Such treatment creates uncertainty and is contrary to increased global harmonization efforts.

Third, in the Commission's rush to meet the artificial deadline of December 21, 2013, as established in the Exemptive Order Regarding Compliance with Certain Swap Regulations ("Exemptive Order"),[9] the

[6] *http://www.cftc.gov/ucm/groups/public/@newsroom/documents/file/odrgreport.pdf.* The ODRG agreed to six understandings. Understanding number 2 states that "[a] flexible, outcomes-based approach should form the basis of final assessments regarding equivalence or substituted compliance."

[7] The Commission made a positive comparability determination for Commission regulations 23.504(a)(2), (b)(1), (b)(2), (b)(3), (b)(4), (c), and (d), but not for Commission regulations 23.504(b)(5) and (b)(6).

[8] Yen-denominated interest rate swaps are subject to the mandatory clearing requirement in both the U.S. and Japan.

[9] Exemptive Order Regarding Compliance With Certain Swap Regulations, 78 FR 43785 (Jul. 22, 2013).

Regulations ("Exemptive Order"),[9] the Commission failed to complete an important piece of the cross-border regime, namely, supervisory memoranda of understanding ("MOUs") between the Commission and fellow regulators.

I have previously stated that these MOUs, if done right, can be a key part of the global harmonization effort because they provide mutually agreed-upon solutions for differences in regulatory regimes.[10] Accordingly, I stated that the Commission should be able to review MOUs alongside the respective comparability determinations and vote on them at the same time. Without these MOUs, our fellow regulators are left wondering whether and how any differences, such as direct access to books and records, will be resolved.

Finally, as I have consistently maintained, the substituted compliance process should allow other regulatory bodies to engage with the full Commission.[11] While I am pleased that the Notices are being voted on by the Commission, the full Commission only gained access to the comment letters from foreign regulators on the Commission's comparability determination draft proposals a few days ago. This is hardly a transparent process.

Unclear Path Forward

Looking forward to next steps, the Commission must provide answers to several outstanding questions regarding these comparability determinations. In doing so, the Commission must collaborate with foreign regulators to increase global harmonization.

First, there is uncertainty surrounding the timing and outcome of the MOUs. Critical questions regarding information sharing, cooperation, supervision, and enforcement will remain unanswered until the Commission and our fellow regulators execute these MOUs.

Second, the Commission has issued time-limited no-action relief for the swap data repository reporting requirements. These comparability determinations will be done as separate notices. However, the timing and process for these determinations remain uncertain.

Third, the Commission has failed to provide clarity on the process for addressing the comparability determinations that it declined to undertake at this time. The Notices only state that the Commission may address these requests in a separate notice at a later date given further developments in the law and regulations of other jurisdictions. To promote certainty in the financial markets, the Commission must provide a clear path forward for market participants and foreign regulators.

The following steps would be a better approach: (1) The Commission should extend the Exemptive Order to allow foreign regulators to further implement their regulatory regimes and coordinate with them to implement a harmonized substituted compliance process; (2) the Commission should implement a flexible, outcomes-based approach to the substituted compliance process and apply it similarly to all jurisdictions; and (3) the Commission should work closely with our fellow regulators to expeditiously implement MOUs that resolve regulatory differences and address regulatory oversight issues.

Conclusion

While I support the narrow comparability determinations that the Commission has made, it was my hope that the Commission would work with foreign regulators to implement a substituted compliance process that would increase the global harmonization effort. I am disappointed that the Commission has failed to implement such a process.

I do believe that in the longer term, the swaps regulations of the major jurisdictions will converge. At this time, however, the Commission's comparability determinations have done little to alleviate the burden of regulatory uncertainty and duplicative compliance with both U.S. and foreign regulations.

The G–20 process delineated and put in place the swaps market reforms in G–20 member nations. It is then no surprise that the Commission must learn to coordinate with foreign regulators to minimize confusion and disruption in bringing much needed clarity to the swaps market. For all these shortcomings, I respectfully dissent from the Commission's approval of the Notices.

COMMODITY FUTURES TRADING COMMISSION

Comparability Determination for the European Union: Certain Transaction-Level Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Comparability Determination for Certain Requirements under the European Market Infrastructure Regulation.

SUMMARY: The following is the analysis and determination of the Commodity Futures Trading Commission ("Commission") regarding certain parts of a joint request by the European Commission ("EC") and the European Securities and Markets Authority ("ESMA") that the Commission determine that laws and regulations applicable in the European Union ("EU") provide a sufficient basis for an affirmative finding of comparability with respect to the following regulatory obligations applicable to swap dealers ("SDs") and major swap participants ("MSPs") registered with the Commission: (i) swap trading relationship documentation; (ii) swap portfolio reconciliation and compression; (iii) trade confirmation; and (iv) daily trading records (collectively, the "Business Conduct Requirements").

DATES: *Effective Date:* This determination will become effective immediately upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary Barnett, Director, 202–418–5977, *gbarnett@cftc.gov,* Frank Fisanich, Chief Counsel, 202–418–5949, *ffisanich@cftc.gov,* and Ellie Jester, Special Counsel, 202–418–5874, *ajester@cftc.gov,* Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 26, 2013, the Commission published in the **Federal Register** its "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" ("Guidance").[1] In the Guidance, the Commission set forth its interpretation of the manner in which it believes that section 2(i) of the Commodity Exchange Act ("CEA") applies Title VII's swap provisions to activities outside the U.S. and informed the public of some of the policies that it expects to follow, generally speaking, in applying Title VII and certain Commission regulations in contexts covered by section 2(i). Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations promulgated thereunder.

In addition to the Guidance, on July 22, 2013, the Commission issued the

[1] 78 FR 45292 (July 26, 2013). The Commission originally published proposed and further proposed guidance on July 12, 2012 and January 7, 2013, respectively. *See* Cross-Border Application of Certain Swaps Provisions of the Commodity Exchange Act, 77 FR 41214 (July 12, 2012) and Further Proposed Guidance Regarding Compliance with Certain Swap Regulations,78 FR 909 (Jan. 7, 2013).

Exemptive Order Regarding Compliance with Certain Swap Regulations (the "Exemptive Order").[2] Among other things, the Exemptive Order provided time for the Commission to consider substituted compliance with respect to six jurisdictions where non-U.S. SDs are currently organized. In this regard, the Exemptive Order generally provided non-U.S. SDs and MSPs (and foreign branches of U.S. SDs and MSPs) in the six jurisdictions with conditional relief from certain requirements of Commission regulations (those referred to as "Transaction-Level Requirements" in the Guidance) until the earlier of December 21, 2013, or 30 days following the issuance of a substituted compliance determination.[3] However, the Commission provided only transitional relief from the real-time public reporting requirements under part 43 of the Commission's regulations until September 30, 2013, stating that "it would not be in the public interest to further delay reporting under part 43 . . . ."[4] Similarly, the Commission provided transitional relief only until October 10, 2013, from the clearing and swap processing requirements (as described in the Guidance), stating that, "[b]ecause SDs and MSPs have been committed to clearing their [credit default swaps] and interest rate swaps for many years, and indeed have been voluntarily clearing for many years, any further delay of the Commission's clearing requirement is unwarranted."[5] The Commission did not make any comparability determination with respect to clearing and swap processing prior to October 10, 2013, or real-time public reporting prior to September 30, 2013.

On May 7, 2013, the EC and ESMA (collectively, the "applicant") submitted a request that the Commission determine that laws and regulations applicable in the EU provide a sufficient basis for an affirmative finding of comparability with respect to certain Transaction-Level Requirements, including the Business Conduct Requirements.[6] The applicant provided Commission staff with an updated submission on August 6, 2013. On November 11, 2013, the application was further supplemented with corrections and additional materials. The following is the Commission's analysis and determination regarding the Business Conduct Requirements, as detailed below.

In addition to the Business Conduct Requirements described below, the applicant also requested a comparability determination with respect to law and regulations applicable in the EU governing (1) clearing and swap processing;[7] and (2) real-time public reporting. The Commission declines to take up the request for such comparability determination at this time due to the Commission's view that there are not laws or regulations applicable in the EU to compare with the requirements of the Commission's regulations on mandatory clearing and swap processing, and real-time public reporting. The Commission may address these requests in a separate notice at a later date in consequence of further developments in the law and regulations applicable in the EU.

II. Background

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act[8] ("Dodd-Frank Act" or "Dodd-Frank"), which, in Title VII, established a new regulatory framework for swaps.

Section 722(d) of the Dodd-Frank Act amended the CEA by adding section 2(i), which provides that the swap provisions of the CEA (including any CEA rules or regulations) apply to cross-border activities when certain conditions are met, namely, when such activities have a "direct and significant connection with activities in, or effect on, commerce of the United States" or when they contravene Commission rules or regulations as are necessary or appropriate to prevent evasion of the swap provisions of the CEA enacted under Title VII of the Dodd-Frank Act.[9]

In the three years since its enactment, the Commission has finalized 68 rules and orders to implement Title VII of the Dodd-Frank Act. The finalized rules include those promulgated under section 4s of the CEA, which address registration of SDs and MSPs and other substantive requirements applicable to SDs and MSPs. With few exceptions, the delayed compliance dates for the Commission's regulations implementing such section 4s requirements applicable to SDs and MSPs have passed and new SDs and MSPs are now required to be in full compliance with such regulations upon registration with the Commission.[10] Notably, the requirements under Title VII of the Dodd-Frank Act related to SDs and MSPs by their terms apply to all registered SDs and MSPs, irrespective of where they are located, albeit subject to the limitations of CEA section 2(i).

To provide guidance as to the Commission's views regarding the scope of the cross-border application of Title VII of the Dodd-Frank Act, the Commission set forth in the Guidance its interpretation of the manner in which it believes that Title VII's swap provisions apply to activities outside the U.S. pursuant to section 2(i) of the CEA. Among other matters, the Guidance generally describes the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission established a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations. With respect to the standards forming the basis for any determination of comparability ("comparability determination" or "comparability finding"), the Commission stated:

> In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the applicable requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant

[2] 78 FR 43785 (July 22, 2013).

[3] The Transaction-Level Requirements under the Exemptive Order consist of 17 CFR 37.12, 38.11, 23.202, 23.205, 23.400–451, 23.501, 23.502, 23.503, 23.504, 23.505, 23.506, 23.610, and parts 43 and 50 of the Commission's regulations.

[4] *See* id. at 43789.

[5] *See* id. at 43790.

[6] For purposes of this notice, the Business Conduct Requirements consist of 17 CFR 23.202, 23.501, 23.502, 23.503, and 23.504.

[7] According to the most recent Financial Stability Board Progress Report, the EU is scheduled to have a clearing requirement by Q3 2014. That report also states that the EU is scheduled to begin authorizing CCPs in Q4 2013, issue its first clearing determinations in Q1 2014, and adopt central clearing Regulatory Technical Standards (RTS) in Q2 2014 (OTC Derivatives Working Group, "OTC Derivatives Market Reforms: Sixth Progress Report on Implementation," Financial Stability Board, Sept. 2, 2013). Under EMIR, ESMA would determine which swaps would be subject to mandatory clearing according to provisions that are comparable to those set forth in Commission regulation 39.5(b). A clearing requirement would apply to financial entities, as well as to non-financial entities whose swap activity exceeds a certain threshold. ESMA's "Discussion Paper, The Clearing Obligation under EMIR" (July 2013) describes the standardized swaps that could be subject to a clearing requirement. Such swaps include the interest rate and credit default swaps covered by the Commission's clearing requirement (Commission regulation 50.4), other credit default swap indices, non-deliverable forwards that may be included in a Commission clearing requirement, and many other swaps including OTC equity index derivatives cleared only through European central counterparties, some of which are not Commission-registered derivatives clearing organizations.

[8] Public Law 111–203, 124 Stat. 1376 (2016).

[9] 7 U.S.C. 2(i).

[10] The compliance dates are summarized on the Compliance Dates page of the Commission's Web site. (*http://www.cftc.gov/LawRegulation/DoddFrankAct/ComplianceDates/index.htm.*)

factors, including but not limited to, the comprehensiveness of those requirement(s), the scope and objectives of the relevant regulatory requirement(s), the comprehensiveness of the foreign regulator's supervisory compliance program, as well as the home jurisdiction's authority to support and enforce its oversight of the registrant. In this context, comparable does not necessarily mean identical. Rather, the Commission would evaluate whether the home jurisdiction's regulatory requirement is comparable to and as comprehensive as the corresponding U.S. regulatory requirement(s).[11]

Upon a comparability finding, consistent with CEA section 2(i) and comity principles, the Commission's policy generally is that eligible entities may comply with a substituted compliance regime subject to any conditions the Commission places on its finding, and subject to the Commission's retention of its examination authority and its enforcement authority.[12]

In this regard, the Commission notes that a comparability determination cannot be premised on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction, but rather on whether information relevant to the Commission's oversight of an SD or MSP would be directly available to the Commission and any U.S. prudential regulator of the SD or MSP.[13] The Commission's direct access to the books and records required to be maintained by an SD or MSP registered with the Commission is a core requirement of the CEA[14] and the Commission's regulations,[15] and is a condition to registration.[16]

III. Regulation of SDs and MSPs in the EU

On May 7, 2013, the EC and ESMA submitted a request that the Commission assess the comparability of laws and regulations applicable in the EU with the requirements of the CEA and the Commission's regulations, and that a determination be made on the extent to which SDs and MSPs in the EU can rely on substituted compliance.[17] The applicant provided Commission staff with an updated submission on August 6, 2013. On November 11, 2013, the application was further supplemented with corrections and additional materials.

As represented to the Commission by the applicant, swap activities in the EU member states is governed primarily by the European Market Infrastructure Regulation ("EMIR").[18]

EMIR and the Regulatory Technical Standards ("RTS") are regulations with immediate, binding, and direct effect in all EU member states (*i.e.*, no transposition into domestic law is required). EMIR entered into force on August 16, 2012.

Commission Delegated Regulation (EU) No 149/2013 of December 19, 2012 supplementing Regulation (EU) No 648/2012 of the European Parliament and of the Council with regard to regulatory technical standards on indirect clearing arrangements, the clearing obligation, the public register, access to a trading venue, non-financial counterparties, and risk mitigation techniques for OTC derivatives contracts not cleared by a central counterparty ("CCP") ("OTC RTS") entered into force on March 15, 2013.

It is helpful to note certain terminology used in EMIR:

- *Financial counterparties ("FCs")*, Article 2(8) EMIR: all types of counterparties established in the EU—regardless of size or activity—that are financial in nature and authorized as such: credit institutions, insurers/reinsurers, pension funds, and hedge funds.
- *Non-financial counterparties ("NFCs")*, Article 2(9) EMIR: all types of counterparties established in the EU that do not meet the definition of an FC (*e.g.*, corporates, certain SPVs).
- *Non-financial counterparties above the clearing threshold ("NFCs+"), Non-financial counterparties below the clearing threshold ("NFCs-"):*
- The clearing thresholds are calculated at the group level and are as follows:

(a) EUR 1 billion in gross notional value for OTC credit derivative contracts;

(b) EUR 1 billion in gross notional value for OTC equity derivative contracts;

(c) EUR 3 billion in gross notional value for OTC interest rate derivative contracts;

(d) EUR 3 billion in gross notional value for OTC foreign exchange derivative contracts; and

(e) EUR 3 billion in gross notional value for OTC commodity derivative contracts and other OTC derivative contracts not provided for under points (a) to (d).

However, transactions objectively measurable as reducing risks directly relating to the commercial activity or treasury financing activity of the NFC or its group (*i.e.*, hedges) do not count towards the clearing threshold.[19] Under the hedging definition both portfolio and macro hedging are allowed.

Certain requirements of EMIR and the RTS are subject to delayed implementation. EMIR Article 11 and

[11] 78 FR 45342–45345.

[12] *See* the Guidance, 78 FR 45342–44.

[13] Under §§ 23.203 and 23.606, all records required by the CEA and the Commission's regulations to be maintained by a registered SD or MSP shall be maintained in accordance with Commission regulation 1.31 and shall be open for inspection by representatives of the Commission, the United States Department of Justice, or any applicable prudential regulator.

In its Final Exemptive Order Regarding Compliance with Certain Swap Regulations, 78 FR 858 (Jan. 7, 2013), the Commission noted that an applicant for registration as an SD or MSP must file a Form 7–R with the National Futures Association and that Form 7–R was being modified at that time to address existing blocking, privacy, or secrecy laws of foreign jurisdictions that applied to the books and records of SDs and MSPs acting in those jurisdictions. *See* id. at 871–72 n. 107. The modifications to Form 7–R were a temporary measure intended to allow SDs and MSPs to apply for registration in a timely manner in recognition of the existence of the blocking, privacy, and secrecy laws. In the Guidance, the Commission clarified that the change to Form 7–R impacts the registration application only and does not modify the Commission's authority under the CEA and its regulations to access records held by registered SDs and MSPs. Commission access to a registrant's books and records is a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto. The Commission has maintained an ongoing dialogue on a bilateral and multilateral basis with foreign regulators and with registrants to address books and records access issues and may consider appropriate measures where requested to do so.

[14] *See* e.g., sections 4s(f)(1)(C), 4s(j)(3) and (4) of the CEA.

[15] *See* e.g., §§ 23.203(b) and 23.606.

[16] *See* supra note 13.

[17] On July 11, 2013, the Commission staff issued a no-action letter related to EU rules on risk mitigation. *See* No-Action Relief for Registered Swap Dealers and Major Swap Participants from Certain Requirements under Subpart I of Part 23 of Commission Regulations in Connection with Uncleared Swaps Subject to Risk Mitigation Techniques under EMIR, CFTC Letter No. 13–45 (July, 11, 2013) ("Risk Mitigation Letter"). The Commission staff found that the Commission and the EU have essentially identical rules in important areas of risk mitigation for the largest counterparty swap market participants. Specifically, the Commission staff determined that under EMIR, the EU has adopted risk mitigation rules that are essentially identical to certain provisions of the Commission's business conduct standards for SDs and MSPs. In areas such as confirmation, portfolio reconciliation, portfolio compression, valuation, and dispute resolution, the Commission staff found that the respective regimes are essentially identical. The Commission staff determined that where a swap/OTC derivative is subject to concurrent jurisdiction under US and EU risk mitigation rules, compliance under EMIR will achieve compliance with the relevant Commission rules because they are essentially identical. The Commission's analysis of the subject submission is informed by the staff's finding in connection with the Risk Mitigation Letter but the Commission notes that the standards applied in that context are distinguishable from the "comparable and comprehensive" standards applied in the instant comparability determination.

[18] EMIR: Regulation (EU) No 648/2012 of the European Parliament and of the Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories. *http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2012:201:0001:0059:EN:PDF*

[19] *See* EMIR Article 10 and RTS Article 10.

RTS Articles 12 to 17 are subject to a phase-in period:

- *Timely Confirmation:* Staggered phase-in according to product type.
- *Portfolio Reconciliation, Compression, and Dispute Resolution:* Requirements operational for all market participants subject to them (different provisions apply to FC, NFC+ and NFC-) as of September 15, 2013.
- *Daily mark-to-market and mark-to-model:* Applies to FC and NFC+ as of March 15, 2013.

In addition, as represented to the Commission by the applicant, swap activities in the EU are also governed by a number of regulatory requirements other than EMIR.

Markets in Financial Instruments Directive ("MiFID"):[20] MiFID is a directive and in accordance with the Treaty on the Functioning of the European Union, all member states of the EU are legally bound to implement the provisions of MiFID by November 1, 2007, by transposing them into their national laws. MiFID applies in particular to investment firms, which comprise any legal person whose regular occupation or business is the provision of one or more investment services to third parties and/or the performance of one or more investment activities on a professional basis. Investment services and activities means any of the services and activities listed in Section A of Annex I of MiFID relating to any of the instruments listed in Section C of Annex I of MiFID. Section C of Annex 1 refers explicitly to swaps as well as "other derivative financial instruments."

Due to the requirement that each EU member state transpose MiFID into its national law, the comparability determinations in this notice are based on the representations of the applicant to the Commission that (i) each member state of the EU where an SD or MSP would seek to rely on substituted compliance on the basis of the comparability of the MiFID standards has completed the process of transposing MiFID into its national law;[21] (ii) such national laws have transposed MiFID without change in any aspect that is material for a comparability determination contained herein; and (iii) such transposed law is in full force and effect as of the time that any SD or MSP seeks to rely on a relevant comparability determination contained herein. The Commission notes that to the extent that any of the foregoing representations are incorrect, an affected comparability determination will not be valid.[22]

In addition to MiFID, the applicant noted that there are a number of proposed laws and regulations that, when implemented, would affect the regulation of SDs and MSPs in the EU.[23]

IV. Comparable and Comprehensiveness Standard

The Commission's comparability analysis will be based on a comparison of specific foreign requirements against the specific related CEA provisions and Commission regulations as categorized and described in the Guidance. As explained in the Guidance, within the framework of CEA section 2(i) and principles of international comity, the Commission may make a comparability determination on a requirement-by-requirement basis, rather than on the basis of the foreign regime as a whole.[24] In making its comparability determinations, the Commission may include conditions that take into account timing and other issues related to coordinating the implementation of reform efforts across jurisdictions.[25]

In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the corollary requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including, but not limited to:

- The comprehensiveness of those requirement(s),
- The scope and objectives of the relevant regulatory requirement(s),
- The comprehensiveness of the foreign regulator's supervisory compliance program, and
- The home jurisdiction's authority to support and enforce its oversight of the registrant.[26]

In making a comparability determination, the Commission takes an "outcome-based" approach. An "outcome-based" approach means that when evaluating whether a foreign jurisdiction's regulatory requirements are comparable to, and as comprehensive as, the corollary areas of the CEA and Commission regulations, the Commission ultimately focuses on regulatory outcomes (*i.e.*, the home jurisdiction's requirements do not have to be identical).[27] This approach recognizes that foreign regulatory systems differ and their approaches vary and may differ from how the Commission chose to address an issue, but that the foreign jurisdiction's regulatory requirements nonetheless achieve the regulatory outcome sought to be achieved by a certain provision of the CEA or Commission regulation.

In doing its comparability analysis, the Commission may determine that no comparability determination can be made[28] and that the non-U.S. SD or non-U.S. MSP, U.S. bank that is an SD or MSP with respect to its foreign branches, or non-registrant, to the extent

---

[20] Directive 2004/39/EC and the relevant implementing measures (Directive 2006/73/EC and Regulation 1287/2006). *http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32004L0039:EN:NOT*

[21] See the Web site of the European Commission for confirmation of the transposition of MiFID into the national law of each member state, available here: *http://ec.europa.eu/internal_market/securities/docs/transposition/table_en.pdf*. Note that the issue of partial implementation in the Netherlands was resolved in 2008, *http://ec.europa.eu/eu_law/eulaw/decisions/dec_08_05_06.htm*.The Commission notes that the EC has certified to the Commission that each member state in which a registered SD or MSP is organized has completed the transposition process (e.g., Ireland, UK, France, Spain, and Germany).

[22] Because the applicant's request and the Commission's determinations herein are based on the comparability of EU requirements applicable to entities subject to EMIR and MiFID, an SD or MSP that is not subject to the requirements of EMIR or MiFID upon which the Commission bases its determinations, may not be able to rely on the Commission's comparability determinations herein. The applicant has noted for the Commission that the concept of an MSP is not explicitly mirrored in EU legislation and so it cannot be confirmed that MSPs would always be covered by EMIR and MiFID. However, the applicant states that the definition of an "investment firm" under MiFID is considerably wider than that of an SD, and thus MSP's should, in most cases, be caught within the definition of "investment firm."

[23] The applicant provided information regarding MiFID II and the Markets in Financial Instruments Regulation ("MiFIR"), *http://ec.europa.eu/internal_market/securities/isd/mifid/index_en.htm*, stating that these two proposals are part of the legislative package for the review of MiFID, and that the legislative process may be concluded with the adoption of the final political agreement by the end of 2013. The applicant further stated that an additional 18 to 24 months will be needed to adopt implementing measures, with the overall package to be applied by the end of 2015.

[24] 78 FR 45343.

[25] 78 FR 45343.

[26] 78 FR 45343.

[27] 78 FR 45343. The Commission's substituted compliance program would generally be available for swap data repository reporting ("SDR Reporting"), as outlined in the Guidance, only if the Commission has direct access to all of the data elements that are reported to a foreign trade repository pursuant to the substituted compliance program. Thus, direct access to swap data is a threshold matter to be addressed in a comparability evaluation for SDR Reporting. Moreover, the Commission explains in the Guidance that, due to its technical nature, a comparability evaluation for SDR Reporting "will generally entail a detailed comparison and technical analysis." A more particularized analysis will generally be necessary to determine whether data stored in a foreign trade repository provides for effective Commission use, in furtherance of the regulatory purposes of the Dodd-Frank Act. *See* 78 FR 45345.

[28] A finding of comparability may not be possible for a number of reasons, including the fact that the foreign jurisdiction has not yet implemented or finalized particular requirements.

applicable under the Guidance, may be required to comply with the CEA and Commission regulations.

The starting point in the Commission's analysis is a consideration of the regulatory objectives of the foreign jurisdiction's regulation of swaps and swap market participants. As stated in the Guidance, jurisdictions may not have swap specific regulations in some areas, and instead have regulatory or supervisory regimes that achieve comparable and comprehensive regulation to the Dodd-Frank Act requirements, but on a more general, entity-wide, or prudential, basis.[29] In addition, portions of a foreign regulatory regime may have similar regulatory objectives, but the means by which these objectives are achieved with respect to swap market activities may not be clearly defined, or may not expressly include specific regulatory elements that the Commission concludes are critical to achieving the regulatory objectives or outcomes required under the CEA and the Commission's regulations. In these circumstances, the Commission will work with the regulators and registrants in these jurisdictions to consider alternative approaches that may result in a determination that substituted compliance applies.[30]

Finally, the Commission generally will rely on an applicant's description of the laws and regulations of the foreign jurisdiction in making its comparability determination. The Commission considers an application to be a representation by the applicant that the laws and regulations submitted are in full force and effect, that the description of such laws and regulations is accurate and complete, and that, unless otherwise noted, the scope of such laws and regulations encompasses the swaps activities[31] of SDs and MSPs[32] in the relevant jurisdictions.[33] Further, as stated in the Guidance, the Commission expects that an applicant would notify the Commission of any material changes to information submitted in support of a comparability determination (including, but not limited to, changes in the relevant supervisory or regulatory regime) as, depending on the nature of the change, the Commission's comparability determination may no longer be valid.[34]

The Guidance provided a detailed discussion of the Commission's policy regarding the availability of substituted compliance[35] for the Business Conduct Requirements.

V. Supervisory Arrangement

In the Guidance, the Commission stated that, in connection with a determination that substituted compliance is appropriate, it would expect to enter into an appropriate memorandum of understanding ("MOU") or similar arrangement[36] with the relevant foreign regulator(s). Although existing arrangements would indicate a foreign regulator's ability to cooperate and share information, "going forward, the Commission and relevant foreign supervisor(s) would need to establish supervisory MOUs or other arrangements that provide for information sharing and cooperation in the context of supervising [SDs] and MSPs."[37]

The Commission is in the process of developing its registration and supervision regime for provisionally-registered SDs and MSPs. This new initiative includes setting forth supervisory arrangements with authorities that have joint jurisdiction over SDs and MSPs that are registered with the Commission and subject to U.S. law. Given the developing nature of the Commission's regime and the fact that the Commission has not negotiated prior supervisory arrangements with certain authorities, the negotiation of supervisory arrangements presents a unique opportunity to develop close working relationships between and among authorities, as well as highlight any potential issues related to cooperation and information sharing.

Accordingly, the Commission is negotiating such a supervisory arrangement with each applicable foreign regulator of an SD or MSP. The Commission expects that the arrangement will establish expectations for ongoing cooperation, address direct access to information,[38] provide for

---

[29] 78 FR 45343.

[30] As explained in the Guidance, such "approaches used will vary depending on the circumstances relevant to each jurisdiction. One example would include coordinating with the foreign regulators in developing appropriate regulatory changes or new regulations, particularly where changes or new regulations already are being considered or proposed by the foreign regulators or legislative bodies. As another example, the Commission may, after consultation with the appropriate regulators and market participants, include in its substituted compliance determination a description of the means by which certain swaps market participants can achieve substituted compliance within the construct of the foreign regulatory regime. The identification of the means by which substituted compliance is achieved would be designed to address the regulatory objectives and outcomes of the relevant Dodd-Frank Act requirements in a manner that does not conflict with a foreign regulatory regime and reduces the likelihood of inconsistent regulatory obligations. For example, the Commission may specify that [SDs] and MSPs in the jurisdiction undertake certain recordkeeping and documentation for swap activities that otherwise is only addressed by the foreign regulatory regime with respect to financial activities generally. In addition, the substituted compliance determination may include provisions for summary compliance and risk reporting to the Commission to allow the Commission to monitor whether the regulatory outcomes are being achieved. By using these approaches, in the interest of comity, the Commission would seek to achieve its regulatory objectives with respect to the Commission's registrants that are operating in foreign jurisdictions in a manner that works in harmony with the regulatory interests of those jurisdictions." 78 FR 45343–44.

[31] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under Part 23 (17 CFR Part 23) are limited in scope to the swaps activities of SDs and MSPs.

[32] No SD or MSP that is not legally required to comply with a law or regulation determined to be comparable may voluntarily comply with such law or regulation in lieu of compliance with the CEA and the relevant Commission regulation. Each SD or MSP that seeks to rely on a comparability determination is solely responsible for determining whether it is legally required to comply with the laws and regulations found comparable. Currently, there are no MSPs organized outside the U.S. and the Commission therefore cautions any non-financial entity organized outside the U.S. and applying for registration as an MSP to carefully consider whether the laws and regulations determined to be comparable herein are applicable to such entity.

[33] The Commission has provided the relevant foreign regulator(s) with opportunities to review and correct the applicant's description of such laws and regulations on which the Commission will base its comparability determination. The Commission relies on the accuracy and completeness of such review and any corrections received in making its comparability determinations. A comparability determination based on an inaccurate description of foreign laws and regulations may not be valid.

[34] 78 FR 45345.

[35] See 78 FR 45348–50. The Commission notes that registrants and other market participants are responsible for determining whether substituted compliance is available pursuant to the Guidance based on the comparability determination contained herein (including any conditions or exceptions), and its particular status and circumstances.

[36] An MOU is one type of arrangement between or among regulators. Supervisory arrangements could include, as appropriate, cooperative arrangements that are memorialized and executed as addenda to existing MOUs or, for example, as independent bilateral arrangements, statements of intent, declarations, or letters.

[37] 78 FR 45344.

[38] Section 4s(j)(3) and (4) of the CEA and Commission regulation 23.606 require a registered SD or MSP to make all records required to be maintained in accordance with Commission regulation 1.31 available promptly upon request to, among others, representatives of the Commission. *See also* 7 U.S.C. 6s(f); 17 CFR 23.203. In the Guidance, the Commission states that it "reserves this right to access records held by registered [SDs] and MSPs, including those that are non-U.S. persons who may comply with the Dodd-Frank recordkeeping requirement through substituted compliance." 78 FR 45345 n. 472; *see also id.* at 45342 n. 461 (affirming the Commission's authority under the CEA and its regulations to access books and records held by registered SDs and MSPs as "a fundamental regulatory tool necessary to properly

notification upon the occurrence of specified events, memorialize understandings related to on-site visits,[39] and include protections related to the use and confidentiality of non-public information shared pursuant to the arrangement.

These arrangements will establish a roadmap for how authorities will consult, cooperate, and share information. As with any such arrangement, however, nothing in these arrangements will supersede domestic laws or resolve potential conflicts of law, such as the application of domestic secrecy or blocking laws to regulated entities.

VI. Comparability Determination and Analysis

The following section describes the requirements imposed by specific sections of the CEA and the Commission's regulations for the Business Conduct Requirements in the "risk mitigation and transparency" category that are the subject of this comparability determination and the Commission's regulatory objectives with respect to such requirements. Immediately following a description of the requirement(s) and regulatory objective(s) of the specific Business Conduct Requirements that the requestor submitted for a comparability determination, the Commission provides a description of the foreign jurisdiction's comparable laws, regulations, or rules and whether such laws, regulations, or rules meet the applicable regulatory objective.

The Commission's determinations in this regard and the discussion in this section are intended to inform the public of the Commission's views regarding whether the foreign jurisdiction's laws, regulations, or rules may be comparable to and as comprehensive as those requirements in the Dodd-Frank Act (and Commission regulations promulgated thereunder) and therefore, may form the basis of substituted compliance. In turn, the public (in the foreign jurisdiction, in the United States, and elsewhere) retains its ability to present facts and circumstances that would inform the determinations set forth in this release.

As was stated in the Guidance, the Commission understands the complex and dynamic nature of the global swap market and the need to take an adaptable approach to cross-border issues, particularly as it continues to work closely with foreign regulators to address potential conflicts with respect to each country's respective regulatory regime. In this regard, the Commission may review, modify, or expand the determinations herein in light of comments received and future developments.

A. Portfolio Reconciliation and Compression

CEA section 4s(i) directs the Commission to prescribe regulations for the timely and accurate processing and netting of all swaps entered into by SDs and MSPs. Accordingly, pursuant to CEA section 4s(i), the Commission adopted §§ 23.502 and 23.503, which require SDs and MSPs to perform portfolio reconciliation and compression, respectively, for all swaps.[40]

1. Portfolio Reconciliation (§ 23.502)

Commission Requirement: Regulation 23.502 provides standards for the timely and accurate confirmation, processing, and valuation of uncleared swaps by SDs and MSPs. The regulation requires SDs and MSPs to engage in portfolio reconciliation,[41] which is a post-execution processing and risk management technique that is designed to: (i) identify and resolve discrepancies between the counterparties with regard to the terms of a swap after execution and during the life of the swap; and (ii) identify and resolve discrepancies between the counterparties regarding the valuation of the swap.

Pursuant to Commission regulation 23.502, for swap portfolios with other SDs/MSPs, an SD/MSP must agree in writing on the terms of reconciling the terms and valuations of each uncleared swap in the portfolio (which may be performed bilaterally or by a qualified third party), and must perform the reconciliation no less frequently than:

- Each business day for portfolios of 500 or more swaps;
- Once each week for portfolios of more than 50 but fewer than 500 swaps; and
- Quarterly for portfolios of no more than 50 swaps.

Discrepancies in material terms must be resolved immediately; and SDs and MSPs must have policies and procedures to resolve discrepancies of 10% or greater in valuations as soon as possible but no later than five business days, provided that the SD or MSP has policies and procedures for identifying how it will comply with variation margin requirements pending resolution of a valuation dispute.

For swap portfolios with non-SDs/MSPs, an SD/MSP must establish policies and procedures for engaging in portfolio reconciliation that include:

- Agreement in writing on the terms for reconciling the terms and valuations of each uncleared swap in the portfolio (which may be performed bilaterally or by a qualified third party);
- Portfolio reconciliation frequencies of quarterly for portfolios of more than 100 swaps, and annually for portfolios of 100 or fewer swaps; and
- Discrepancies in material terms and valuations of more than 10% must be subject to procedures for resolving such discrepancies in a timely fashion.

An SD/MSP must report any valuation dispute exceeding $20,000,000 to the Commission and any applicable prudential regulator if not resolved within three business days (with respect to disputes between SDs/fMSPs) or five business days (with any other counterparty).

Regulatory Objective: The Commission's portfolio reconciliation rule is designed to ensure accurate confirmation of a swap's terms and to identify and resolve any discrepancies between counterparties regarding the valuation of the swap. Given that arriving at a daily valuation is one of the building blocks for the margin regulations and is essential for the mitigation of risk posed by swaps, the regulations are aimed at ensuring that valuation disputes are resolved in a timely manner. Disputes related to confirming the terms of a swap, as well as swap valuation disputes impacting margin payments, have long been recognized as a significant problem in the OTC derivatives market, and portfolio reconciliation is widely recognized as an effective means of identifying and resolving these disputes. By identifying and managing mismatches in key economic terms and valuation for individual transactions across an entire portfolio, the regulations are aimed at achieving a process in which overall risk can be

monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto").

[39] The Commission retains its examination authority, both during the application process as well as upon and after registration of an SD or MSP. *See* 78 FR 45342 (stating Commission policy that "eligible entities may comply with a substituted compliance regime under certain circumstances, subject, however, to the Commission's retention of its examination authority") and 45344 n. 471 (stating that the "Commission may, as it deems appropriate and necessary, conduct an on-site examination of the applicant").

[40] 7 U.S.C. 6s(i).

[41] The term "portfolio reconciliation" is defined in § 23.500(i) as any process by which the two parties to one or more swaps: (1) exchange the terms of all swaps in the swap portfolio between the counterparties; (2) exchange each counterparty's valuation of each swap in the swap portfolio between the counterparties as of the close of business on the immediately preceding business day; and (3) resolve any discrepancy in material terms and valuations.

identified and reduced. The frequency of reconciliation of material terms and valuations of each swap required by the regulations will ensure the risk-reducing benefits of reconciliation by presenting a consolidated view of counterparty exposure down to the transaction level. The frequency with which portfolio reconciliation must be performed is a key component of this regulation.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as section 4s(i) of the CEA and Commission regulation 23.502.

- OTC RTS Art. 13.1: FCs and NFCs must agree with each of their counterparties in writing or other equivalent electronic means on the terms on which portfolios of uncleared OTC derivative contracts shall be reconciled. Such agreement must be reached before entering into the OTC derivative contract.
- OTC RTS Art. 13.2: Portfolio reconciliation must be performed by the counterparties to the OTC derivative contracts with each other, or by a qualified third party duly mandated to this effect by a counterparty.
- The portfolio reconciliation must cover key trade terms that identify each particular OTC derivative contract and must include *at least* the valuation attributed to each contract in accordance with the mark-to-market/mark-to-model obligation.
- In order to identify at an early stage any discrepancy in a material term of the OTC derivative contract, including its valuation, the portfolio reconciliation must be performed within the following timeframes. For portfolios between or among FCs or NFCs+, each business day when the counterparties have 500 or more OTC derivative contracts outstanding with each other; once per week when the counterparties have between 51 and 499 OTC derivative contracts outstanding with each other at any time during the week; and once per quarter when the counterparties have 50 or less OTC derivative contracts outstanding with each other at any time during the quarter. For portfolios where at least one of the counterparties is an NFC-, once per quarter when the counterparties have more than 100 OTC derivative contracts outstanding with each other at any time during the quarter; and once per year when the counterparties have 100 or less OTC derivative contracts outstanding with each other.

Commission Determination: Pursuant to the foregoing standards under EMIR, FCs and NFCs must agree in writing with each of their OTC derivatives counterparties on the terms on which portfolios will be reconciled,[42] which corresponds to the requirement in Commission regulation 23.502(a) and (b) that SDs and MSPs agree in writing with each counterparty (financial and non-financial) on the terms for conducting portfolio reconciliation.

The EMIR standards require portfolio reconciliation covering key trade terms of each OTC derivative contract, including at least the valuation of each contract,[43] which corresponds to the requirements under Commission regulation 23.502 that discrepancies in material terms and valuations be resolved.

Frequency of reconciliation required under the EMIR standards for FCs and NFCs+ is daily when the number of outstanding OTC derivative contracts between counterparties is 500 or more, weekly when the number of outstanding OTC derivative contracts between counterparties is greater than 50 and less than 500, and quarterly when the number of OTC derivative contracts between counterparties is 50 or less,[44] which corresponds with the frequency required of SDs and MSPs outlined above with respect to portfolios with other SDs and MSPs. EMIR requires reconciliation with NFCs- less frequently; quarterly for portfolios of more than 100 transactions and annually otherwise[45]—which corresponds with the requirement of Commission regulation 23.502(b)(3).

The EMIR standards require FCs to report to the relevant competent authority any disputes between counterparties relating to an OTC derivative contract, its valuation or the exchange of collateral for an amount or a value higher than €15 million and outstanding for at least 15 business days,[46] while Commission regulation 23.502(c) has a similar reporting requirement for disputes of at least $20 million outstanding from three to five days, depending on counterparty type. The EMIR standards, similar to § 23.502(a)(5), require FCs and NFCs to have detailed procedures and processes for resolving disputes related to valuation.

Generally identical in intent to § 23.502, the EMIR portfolio reconciliation standards are designed to ensure that valuation disputes are recognized and resolved in a timely manner. This regular reconciliation will assist in identifying and resolving discrepancies, which in turn will aid the entities in their collateralization and risk management.

Based on the foregoing and the representations of the applicant, the Commission finds that the portfolio reconciliation requirements of the EMIR standards submitted by the applicant are comparable to and as comprehensive as the portfolio reconciliation requirements of Commission regulation 23.502.

2. Portfolio Compression (§ 23.503)

Commission Requirement: Portfolio compression is a post-trade processing and netting mechanism whereby substantially similar transactions among two or more counterparties are terminated and replaced with a smaller number of transactions of decreased notional value. Portfolio compression is intended to ensure timely and accurate processing and netting of swaps,[47] and is widely acknowledged as an effective risk mitigation tool.[48]

Pursuant to § 23.503, an SD/MSP must establish policies and procedures for terminating fully offsetting uncleared swaps, when appropriate; for periodically participating in bilateral and multilateral compression exercises for uncleared swaps with other SDs/MSPs, when appropriate; and for engaging in such exercises for uncleared swaps with non-SDs/MSPs upon request.

Regulatory Objective: The purpose of portfolio compression is to reduce the operational risk, cost, and inefficiency of maintaining unnecessary transactions on the counterparties' books.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as section 4s(i) of the CEA and Commission regulation 23.503:

[42] *See* Article 13 of the EMIR Regulatory Technical Standards. In addition, Article 13(2) permits the reconciliation to be performed by a third-party, which corresponds to Commission regulation 23.502(a)(2) and (b)(2).

[43] *See* Article 13(2) of the EMIR Regulatory Technical Standards.

[44] *See* Article 13(3)(a) of the EMIR Regulatory Technical Standards.

[45] *See* Article 13(3)(b) of the EMIR Regulatory Technical Standards.

[46] *See* Article 15(2) of the EMIR Regulatory Technical Standards.

[47] For example, the reduced transaction count may decrease operational risk as there are fewer trades to maintain, process, and settle.

[48] *See* Confirmation, Portfolio Reconciliation, Portfolio Compression, and Swap Trading Relationship Requirements for Swap Dealers and Major Swap Participants, 77 FR 55904, 55932 (Sept. 11, 2012).

• OTC RTS Art. 14: FCs and NFCs with 500 or more uncleared OTC derivative contracts outstanding with a counterparty must have procedures to regularly, and at least twice a year, analyse the possibility of conducting a portfolio compression exercise in order to reduce their counterparty credit risk and engage in such a portfolio compression exercise; and

• FCs and NFCs must ensure that they are able to provide a reasonable and valid explanation to the relevant competent authority for concluding that a portfolio compression exercise is not appropriate.

Commission Determination: The EMIR standards specified above require FCs and NFCs with 500 or more OTC uncleared derivative contracts outstanding with a counterparty to have procedures to regularly, and at least twice a year, analyze the possibility of conducting a portfolio compression exercise in order to reduce their counterparty credit risk and engage in such a portfolio compression exercise,[49] which corresponds to the requirement under § 23.503 that SDs and MSPs establish procedures for periodically engaging in compression exercises with their counterparties.

Under the EMIR standards, FCs and NFCs also must ensure that they are able to provide a reasonable and valid explanation to the relevant competent authority for concluding that a portfolio compression exercise is not appropriate.[50] This requirement corresponds directly to regulation 23.503 that SDs and MSPs engage in compression exercises with their counterparties "when appropriate," which would necessarily require such registrants to demonstrate to the Commission why a compression opportunity was not appropriate.

Generally identical in intent to § 23.503, the EMIR portfolio compression standards are designed to reduce the operational risk, cost, and inefficiency of maintaining unnecessary transactions on the counterparties' books.

Based on the foregoing and the representations of the applicant, the Commission finds that the EMIR portfolio compression standards submitted by the applicant are comparable to and as comprehensive as the portfolio compression requirements of Commission regulation 23.503.

[49] *See* Article 14 of the EMIR Regulatory Technical Standards.

[50] *See id.*

B. Trade Confirmation (§ 23.501)

Commission Requirement: Section 4s(i) of the CEA[51] requires that each SD and MSP comply with the Commission's regulations prescribing timely and accurate confirmation of swaps.

Subject to an implementation period, § 23.501 requires confirmation of swap transactions (which includes execution, termination, assignment, novation, exchange, transfer, amendment, conveyance, or extinguishing of rights or obligations of a swap) among SDs and MSPs by the end of the first business day following the day of execution.

Subject to an implementation period, with respect to swaps with non-SDs/MSPs, SDs and MSPs are required to establish policies and procedures reasonably designed to ensure confirmation with non-SDs and non-MSPs by the end of the first business day following the day of execution if the counterparty is a financial entity or the end of the second business day if the counterparty is a non-financial entity.

SDs and MSPs are also required to send an acknowledgement of a swap transaction to a counterparty that is not an SD/MSP by the end of the first business day following the day of execution, and are required to provide a draft confirmation to non-SDs/MSPs prior to execution of a swap, if requested.

The day of execution is determined by reference to the business days of the counterparties and whether the swap was executed after 4:00 p.m. in the place of at least one of the counterparties.

Commission regulation 23.501 does not apply to swaps executed on a swap execution facility ("SEF") or designated contract market ("DCM") if the SEF/DCM provides for confirmation of swap transactions at the same time as execution. It also does not apply to swap transactions that are submitted for clearing by a derivatives clearing organization ("DCO") within the time required for confirmation and the DCO provides confirmation at the same time the swap transaction is accepted for clearing.

Regulatory Objective: Timely and accurate confirmation of swaps—together with portfolio reconciliation and compression—are important post-trade processing mechanisms for reducing risks and improving operational efficiency. Through § 23.501, the Commission seeks to ensure that both parties to a trade are informed of and agree upon all terms of a swap transaction[52] in writing in a timely manner following execution, thereby promoting post-trade processing, netting, and valuation of the swap for risk management purposes. The correct calculation of cash flows, margin requirements, discharge of settlement obligations, and accurate measurement of counterparty credit exposure are all dependent on timely and accurate confirmation.[53]

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as section 4s(i) of the CEA and Commission regulation 23.501.

OTC RTS Art 12.1: Subject to an implementation period, FCs and NFCs+ must have in place procedures to ensure that uncleared OTC derivatives transactions between FCs and NFCs+ are confirmed, where available via electronic means, as soon as possible and at the latest by the end of the next business day following the date of execution.

OTC RTS Art. 12.2: Subject to an implementation period, FCs and NFCs+ must have in place procedures to ensure that non-centrally cleared OTC derivatives transactions with non- FCs/NFCs+ are confirmed, where available via electronic means, as soon as possible and at the latest by the end of the second business day following the date of execution.

OTC RTS Art. 12.3: For transactions concluded after 4:00 p.m. local time, or with a counterparty located in a different time zone which does not allow confirmation by the set deadline, the confirmation must take place as soon as possible and, at the latest, one business day following the deadline set out above.

OTC RTS Art. 12.4: FCs must establish the necessary procedure to report on a monthly basis to the relevant competent authority the number of unconfirmed OTC derivative transactions referred to in OTC RTS Art. 12.1—12.3 that have been outstanding for more than five business days.

[51] 7 U.S.C. 6s(i).

[52] Pursuant to § 23.500(l), "swap transaction" is defined to mean "any event that results in a new swap or in a change to the terms of a swap, including execution, termination, assignment, novation, exchange, transfer, amendment, conveyance, or extinguishing of rights or obligations of a swap."

[53] *See* Confirmation, Portfolio Reconciliation, Portfolio Compression, and Swap Trading Relationship Documentation Requirements for Swap Dealers and Major Swap Participants, 12 CFR Part 23, 77 FR 55904 at 55917 (September 11, 2012) (Final Rule).

Commission Determination: Pursuant to the EMIR standards specified above, and subject to a phase-in period, OTC derivative contracts entered into between FCs or NFCs+ must be confirmed as soon as possible and at the latest by the end of the next business day following the date of execution,[54] which corresponds to Commission regulation 23.501(a)(1) and (3)(i), requiring confirmation with other SDs, MSPs, and financial entities by the end of the first business day following the day of execution.

For OTC derivative contracts with all other NFCs, the EMIR standards require confirmation as soon as possible and, at the latest, by the end of the second business day following the date of execution.[55] This approach corresponds to the Commission regulation 23.501(a)(3)(ii), which requires written policies and procedures reasonably designed to ensure confirmation with non-SDs, non-MSPs, or non-financial entities by the end of the second business day following the day of execution.

As with Commission regulation 23.501(a)(5), which provides for a next business day adjustment for transactions executed after 4:00 p.m. or on a non-business day, the EMIR standards provide that transactions concluded after 4:00 p.m. local time, or with a counterparty located in a different time zone that does not allow confirmation by the set deadline, the confirmation must take place as soon as possible and, at the latest, one business day following the otherwise applicable deadline.

Generally identical in intent to § 23.501, the EMIR trade confirmation requirements are designed to ensure that both parties to a trade are informed of, and agree upon, all terms of a swap transaction in writing in a timely manner following execution, thereby promoting post-trade processing, netting, and valuation of the swap for risk management purposes.

Based on the foregoing and the representations of the applicant, the Commission finds that the trade confirmation requirements of the EMIR standards are comparable to and as comprehensive as the swap transaction confirmation requirements of Commission regulation 23.501.

C. Swap Trading Relationship Documentation (§ 23.504)

Commission Requirement: Section 4s(i) of the CEA requires each SD and MSP to conform to Commission standards for the timely and accurate confirmation, processing, netting, documentation, and valuation of swaps.[56] Pursuant to this requirement, the Commission adopted § 23.504.

Pursuant to § 23.504(a), SDs and MSPs must have policies and procedures reasonably designed to ensure that the SD or MSP enters into swap trading relationship documentation with each counterparty prior to executing any swap with such counterparty. Such requirement does not apply to cleared swaps.

Pursuant to § 23.504(b), SDs and MSPs must, at a minimum, document terms relating to:

- Payment obligations;
- Netting of payments;
- Events of default or other termination events;
- Netting of obligations upon termination;
- Transfer of rights/obligations;
- Governing law;
- Valuation—must be able to value swaps in a predictable and objective manner—complete and independently verifiable methodology for valuation;
- Dispute resolution procedures; and
- Credit support arrangements with initial/variation margin at least as high as set for SD/MSPs or prudential regulator (identifying haircuts and class of eligible assets).

Regulatory Objective: Through Commission regulation 23.504, the Commission seeks to reduce the legal, operational, counterparty credit, and market risk that can arise from undocumented swaps or undocumented terms of swaps. Inadequate documentation of swap transactions is more likely to result in collateral and legal disputes, thereby exposing counterparties to significant counterparty credit risk.

In particular, documenting agreements regarding valuation is critical because, as the Commission has noted, the ability to determine definitively the value of a swap at any given time lies at the center of many of the OTC derivatives market reforms contained in the Dodd-Frank Act and is a cornerstone of risk management. With respect to other SDs/MSPs and financial entities, or upon request of any other counterparty, the regulation requires agreement on the process (including alternatives and dispute resolution procedures) for determining the value of each swap for the duration of such swap for purposes of complying with the Commission's margin and risk management requirements, with such valuations based on objective criteria to the extent practicable.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as section 4s(i) of the CEA and Commission regulation 23.504.

MiFID requires counterparties to be classified as retail clients, professional clients,[57] and eligible counterparties,[58] and corresponding different conduct of business rules apply.[59] Investment firms have to correctly categorize clients and notify those clients of their classification; furthermore, investment firms should be able to demonstrate the correctness of the classification.

Firms have to conclude agreements with retail and professional clients setting out the respective rights and obligations and any other terms for the provision of the services.[60] Ex-ante information has to be provided to clients on the services provided, the risks, and the safeguarding of their assets.[61] Adequate ex-post reports also have to be provided.[62] Irrespective of the classification of clients, specific record-keeping obligations regulate the recording of client orders and transactions.[63]

With respect to dispute resolution, when concluding OTC derivative contracts with each other, FCs and NFCs must have agreed detailed procedures and processes in relation to: (a) the identification, recording, and monitoring of disputes relating to the recognition or valuation of the contract and to the exchange of collateral between counterparties, and (b) the resolution of disputes in a timely manner with a specific process for handling those disputes that are not resolved within five business days. Those procedures must at least record the length of time for which the dispute remains outstanding, the counterparty, and the amount which is disputed.[64]

Commission Determination: The EMIR standards specified above require OTC derivative contracts entered into between FCs or NFCs to be confirmed in

[54] *See* Article 12 of the EMIR Regulatory Technical Standards.

[55] *See id.*

[56] *See* 7 U.S.C. 6s(i).

[57] Annex II of MiFID.

[58] Article 24 MiFID.

[59] Article 19 MiFID and 28 to 34 of MiFID L2D.

[60] Article 19 (7) MiFID.

[61] Article 19 (3) MiFID and Articles 29–33 MiFID L2D.

[62] Article 19 (8) MiFID and Articles 40–43 of MiFID L2D.

[63] Article 51 MiFID L2D and Articles 7–8 and Annex I, table I of MiFID L2R.

[64] EMIR Art. 11 and OTC RTS Art 15.

writing,[65] which corresponds to the requirements of Commission regulation 23.504(b)(2).

Pursuant to EMIR Article 11, FCs and NFCs+ are required to value outstanding OTC derivatives contracts on a mark-to-market basis daily, or where market conditions determine otherwise, a "reliable and prudent marking to model" may be used.[66] This corresponds with Commission regulation 23.504(b)(4)(i), which requires SDs and MSPs to engage in daily valuation with other SDs and MSPs, and financial entities, but allows such procedures to be included in documentation with NFCs to the extent such counterparties request them.

Under the EMIR standards, when concluding OTC derivative contracts with each other, counterparties must have agreed detailed procedures and processes in relation to the identification, recording, and monitoring of disputes relating to the recognition or valuation of the contracts and to the exchange of collateral between counterparties and in relation to the resolution of disputes in a timely manner, including a specific process for handling disputes that are not resolved within five business days. These aspects of the EMIR standards correspond to the valuation documentation requirements under Commission regulation 23.504(b)(4), which also require use of market transactions for valuations to the extent practicable, or other objective criteria, and an agreement on detailed processes for valuation dispute resolution for purposes of complying with margin requirements.

Generally identical in intent to § 23.504(b)(2) and (4), the EMIR confirmation and valuation documentation requirements are designed to reduce the legal, operational, counterparty credit, and market risk that can arise from undocumented transactions or terms, reducing the risk of collateral and legal disputes, and exposure of counterparties to significant counterparty credit risk.

Based on the foregoing and the representations of the applicant, the Commission finds the confirmation and valuation documentation requirements of the EMIR standards specified above are comparable to and as comprehensive as the swap trading relationship documentation requirements of Commission regulations § 23.504(b)(2) and (4).

For the avoidance of doubt the Commission notes that the foregoing comparability determination only applies with regard to two provisions of § 23.504 (*i.e.*, § 23.504(b)(2) and (4)). No comparability finding is made regarding the other provisions of § 23.504, namely § 23.504(a)(2) and (c)(2), that SDs and MSPs establish policies and procedures, approved in writing by senior management of the SD or MSP, reasonably designed to ensure that they have entered into swap trading relationship documentation with each counterparty prior to or contemporaneously with entering into a swap transaction with such counterparty.[67]

Moreover, the foregoing comparability determination does not extend to the requirement that such documentation include terms addressing payment obligations, netting of payments, events of default or other termination events, calculation and netting of obligations upon termination, transfer of rights and obligations, governing law, dispute resolution, and credit support arrangements, as well as notice of the status of the counterparty under the orderly liquidation procedures of Title II of the Dodd-Frank Act, and the effect of clearing on swaps executed bilaterally.[68] Nor does this determination relieve an SD or MSP from the documentation audit and recordkeeping requirements under § 23.504(c) and (d).

D. Daily Trading Records (§ 23.202)

Commission Requirement: Section 4s(g)(1) of the CEA and Commission regulation 23.202 generally require that SDs and MSPs retain daily trading records for swaps and related cash and forward transactions, including:

- Documents on which transaction information is originally recorded;
- All information necessary to conduct a comprehensive and accurate trade reconstruction;
- Pre-execution trade information including records of all oral and written communications concerning quotes, solicitations, bids, offers, instructions, trading, and prices that lead to the execution of a swap or related cash and forward transactions, whether communicated by phone, fax, instant messaging, chat rooms, email, mobile device, or other digital or electronic media;
- Reliable timing date for the initiation of a trade;
- A record of the time, to the nearest minute using Coordinated Universal Time (UTC), of each quotation provided or received prior to trade execution;
- Execution trade information including the terms of each swap and related cash or forward transaction, terms regarding payment or settlement, initial and variation margin requirements, option premiums, and other cash flows;
- The trade ticket for each swap and related cash or forward transaction;
- The date and time of execution of each swap and related cash or forward transaction to the nearest minute using UTC;
- The identity of the counterparty and the date and title of the agreement to which each swap is subject, including any swap trading relationship documentation and credit support arrangements;
- The product name and identifier, the price at which the swap was executed, and the fees, commissions and other expenses applicable;
- Post-execution trade information including records of confirmation, termination, novation, amendment, assignment, netting, compression, reconciliation, valuation, margining, collateralization, and central clearing;
- The time of confirmation to the nearest minute using UTC;
- Ledgers of payments and interest received, moneys borrowed and loaned, daily swap valuations, and daily calculation of current and potential future exposure for each counterparty;
- Daily calculation of initial and variation margin requirements;
- Daily calculation of the value of collateral, including haircuts;
- Transfers of collateral, including substitutions, and the types of collateral transferred; and
- Credits and debits for each counterparty's account.

Daily trading records must be maintained in a form and manner identifiable and searchable by transaction and counterparty, and records of swaps must be maintained for the duration of the swap plus five years, and voice recordings for one year. Records must be "readily accessible" for the first two years of the five year retention period (consistent with § 1.31).

Regulatory Objective: Through § 23.202, the Commission seeks to ensure that an SD's or MSP's records include all information necessary to conduct a comprehensive and accurate trade reconstruction for each swap, which necessarily requires the records to be identifiable by transaction and

[65] *See* Article 12 of the EMIR Regulatory Technical Standards.

[66] *See* Article 11(2) of EMIR. *See also* Article 16 of the EMIR Regulatory Technical Standards (describing the market conditions that prevent marking-to-market) and Article 17 of the EMIR Regulatory Technical Standards (describing the criteria for using marking-to-model).

[67] *See* Commission regulation 23.504(a)(2), 17 CFR 23.504(c)(2).

[68] *See* § 23.504(b)(1), (3), (5), and (6).

counterparty. Complete and accurate trade reconstruction is critical for both regulatory oversight and investigations of illegal activity pursuant to the Commission's enforcement authority. The Commission believes that a comprehensive and accurate trade reconstruction requires records of pre-execution, execution, and post-execution trade information.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to- and as comprehensive as section 4s(g) of the CEA and Commission regulation 23.202.

MiFID Article 13.6 and MiFID L2D Articles 5.1.f and 51: Firms are required to maintain records of all services and transactions undertaken by the firm that are sufficient to enable regulator authorities to monitor compliance with MiFID and to ascertain whether the firm has complied with all obligations with respect to clients or potential clients.

Firms are required to keep detailed records in relation to every client order and decision to deal, and every client order executed or transmitted.

All required records must be retained in a medium available for future reference by the regulator, and in a form/manner that:

- Allows the regulator to access them readily and reconstitute each key stage of processing each transaction;
- Allows corrections or other amendments, and the contents of the records prior to such corrections or amendments, to be easily ascertained; and
- Ensures that records are not manipulated or altered.

MiFID Article 25(2): Firms must keep at the disposal of the regulator, for at least five years, the relevant data relating to all transactions in financial instruments which they have carried out, whether on their own account or on behalf of a client.

MiFID L2R Articles 9 to 16: Requires transaction reporting in order to provide the competent authorities with the necessary information to conduct proper market surveillance.

Investment firms are required to report details of all executed transactions in any financial instruments admitted to trading on a Regulated Market to the competent authority as quickly as possible and no later than the close of the following working day.

The content of the transaction report is specified in L2 measures (MiFID L2R Article 13).

The reporting obligation lies with investment firms. In a case where all the required information with respect to derivatives transactions has been transmitted to a TR that transmits this information onwards to the competent authority the obligation on the investment firm to report will be waived.

Commission Determination: The Commission finds that compliance with MiFID would enable the relevant competent authority to conduct a comprehensive and accurate trade reconstruction for each swap, which the Commission finds generally meets the regulatory objective of § 23.202. However, the request did not provide any basis on which the Commission could determine that MiFID or EMIR are comparable to and as comprehensive as § 23.202(a)(1) or regulation 23.202(b)(1), which require records of oral communications to be maintained for swap transactions and related cash and forward transactions, respectively, including telephone, voicemail, and mobile device recordings.[69]

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the daily trading records requirements of MiFID are comparable to and as comprehensive as § 23.202, excepting § 23.202(a)(1) and (b)(1). This determination is limited to the content of the recordkeeping requirements of § 23.202 (excepting subsections (a)(1) and (b)(1)) and does not extend to the requirement that the Commission and any U.S. prudential regulator of an SD or MSP have direct access to such records.[70]

[69] In the EU's request for a comparability determination proposed regulations concerning the recording of oral communications were submitted. These requirements are currently under negotiation. The Commission may reconsider the EU's request when and if the proposal is enacted.

[70] Unless the records required by MiFID are available to the Commission and any U.S. prudential regulator under the foreign legal regime, it would be impossible to meet the regulatory objective of § 23.202. As stated in the Guidance, the ability to rely on a substituted compliance regime is dependent on direct access to the books and records of a registrant. This is the case with respect to any Transaction-Level Requirement, and not only the daily trading records required by § 23.202. *See* 78 FR 45344–45.

Issued in Washington, DC, on December 20, 2013, by the Commission.

Christopher J. Kirkpatrick,

Deputy Secretary of the Commission.

Appendices to Comparability Determination for the European Union: Certain Transaction-Level Requirements

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Chilton and Wetjen voted in the affirmative. Commissioner O'Malia voted in the negative.

Appendix 2—Joint Statement of Chairman Gary Gensler and Commissioners Bart Chilton and Mark Wetjen

We support the Commission's approval of broad comparability determinations that will be used for substituted compliance purposes. For each of the six jurisdictions that has registered swap dealers, we carefully reviewed each regulatory provision of the foreign jurisdictions submitted to us and compared the provision's intended outcome to the Commission's own regulatory objectives. The resulting comparability determinations for entity-level requirements permit non-U.S. swap dealers to comply with regulations in their home jurisdiction as a substitute for compliance with the relevant Commission regulations.

These determinations reflect the Commission's commitment to coordinating our efforts to bring transparency to the swaps market and reduce its risks to the public. The comparability findings for the entity-level requirements are a testament to the comparability of these regulatory systems as we work together in building a strong international regulatory framework.

In addition, we are pleased that the Commission was able to find comparability with respect to swap-specific transaction-level requirements in the European Union and Japan.

The Commission attained this benchmark by working cooperatively with authorities in Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland to reach mutual agreement. The Commission looks forward to continuing to collaborate with both foreign authorities and market participants to build on this progress in the months and years ahead.

Appendix 3—Statement of Dissent by Commissioner Scott D. O'Malia

I respectfully dissent from the Commodity Futures Trading Commission's ("Commission") approval of the Notices of Comparability Determinations for Certain Requirements under the laws of Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland (collectively, "Notices"). While I support the narrow comparability determinations that the Commission has made, moving forward, the Commission must collaborate with foreign regulators to harmonize our respective regimes consistent with the G–20 reforms.

However, I cannot support the Notices because they: (1) are based on the legally unsound cross-border guidance ("Guidance");[1] (2) are the result of a flawed substituted compliance process; and (3) fail to provide a clear path moving forward. If the Commission's objective for substituted compliance is to develop a narrow rule-by-rule approach that leaves unanswered major regulatory gaps between our regulatory framework and foreign jurisdictions, then I believe that the Commission has successfully achieved its goal today.

Determinations Based on Legally Unsound Guidance

As I previously stated in my dissent, the Guidance fails to articulate a valid statutory foundation for its overbroad scope and inconsistently applies the statute to different activities.[2] Section 2(i) of the Commodity Exchange Act ("CEA") states that the Commission does not have jurisdiction over foreign activities unless "those activities have a direct and significant connection with activities in, or effect on, commerce of the United States . . ."[3] However, the Commission never properly articulated how and when this limiting standard on the Commission's extraterritorial reach is met, which would trigger the application of Title VII of the Dodd-Frank Act[4] and any Commission regulations promulgated thereunder to swap activities that are outside of the United States. Given this statutorily unsound interpretation of the Commission's extraterritorial authority, the Commission often applies CEA section 2(i) inconsistently and arbitrarily to foreign activities.

Accordingly, because the Commission is relying on the legally deficient Guidance to make its substituted compliance determinations, and for the reasons discussed below, I cannot support the Notices. The Commission should have collaborated with foreign regulators to agree on and implement a workable regime of substituted compliance, and then should have made determinations pursuant to that regime.

Flawed Substituted Compliance Process

Substituted compliance should not be a case of picking a set of foreign rules identical to our rules, determining them to be "comparable," but then making no determination regarding rules that require extensive gap analysis to assess to what extent each jurisdiction is, or is not, comparable based on overall outcomes of the regulatory regimes. While I support the narrow comparability determinations that the Commission has made, I am concerned that in a rush to provide some relief, the Commission has made substituted compliance determinations that only afford narrow relief and fail to address major regulatory gaps between our domestic regulatory framework and foreign jurisdictions. I will address a few examples below.

First, earlier this year, the OTC Derivatives Regulators Group ("ODRG") agreed to a number of substantive understandings to improve the cross-border implementation of over-the-counter derivatives reforms.[5] The ODRG specifically agreed that a flexible, outcomes-based approach, based on a broad category-by-category basis, should form the basis of comparability determinations.[6]

However, instead of following this approach, the Commission has made its comparability determinations on a rule-by-rule basis. For example, in Japan's Comparability Determination for Transaction-Level Requirements, the Commission has made a positive comparability determination for some of the detailed requirements under the swap trading relationship documentation provisions, but not for other requirements.[7] This detailed approach clearly contravenes the ODRG's understanding.

Second, in several areas, the Commission has declined to consider a request for a comparability determination, and has also failed to provide an analysis regarding the extent to which the other jurisdiction is, or is not, comparable. For example, the Commission has declined to address or provide any clarity regarding the European Union's regulatory data reporting determination, even though the European Union's reporting regime is set to begin on February 12, 2014. Although the Commission has provided some limited relief with respect to regulatory data reporting, the lack of clarity creates unnecessary uncertainty, especially when the European Union's reporting regime is set to begin in less than two months.

Similarly, Japan receives no consideration for its mandatory clearing requirement, even though the Commission considers Japan's legal framework to be comparable to the U.S. framework. While the Commission has declined to provide even a partial comparability determination, at least in this instance the Commission has provided a reason: the differences in the scope of entities and products subject to the clearing requirement.[8] Such treatment creates uncertainty and is contrary to increased global harmonization efforts.

Third, in the Commission's rush to meet the artificial deadline of December 21, 2013, as established in the Exemptive Order Regarding Compliance with Certain Swap Regulations ("Exemptive Order"),[9] the Commission failed to complete an important piece of the cross-border regime, namely, supervisory memoranda of understanding ("MOUs") between the Commission and fellow regulators.

I have previously stated that these MOUs, if done right, can be a key part of the global harmonization effort because they provide mutually agreed-upon solutions for differences in regulatory regimes.[10] Accordingly, I stated that the Commission should be able to review MOUs alongside the respective comparability determinations and vote on them at the same time. Without these MOUs, our fellow regulators are left wondering whether and how any differences, such as direct access to books and records, will be resolved.

Finally, as I have consistently maintained, the substituted compliance process should allow other regulatory bodies to engage with the *full* Commission.[11] While I am pleased that the Notices are being voted on by the Commission, the full Commission only gained access to the comment letters from foreign regulators on the Commission's comparability determination draft proposals a few days ago. This is hardly a transparent process.

Unclear Path Forward

Looking forward to next steps, the Commission must provide answers to

[1] Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations, 78 FR 45292 (Jul. 26, 2013).

[2] *http://www.cftc.gov/PressRoom/SpeechesTestimony/omaliastatement071213b.*

[3] CEA section 2(i); 7 U.S.C. 2(i).

[6] *http://www.cftc.gov/ucm/groups/public/@newsroom/documents/file/odrgreport.pdf.* The ODRG agreed to six understandings. Understanding number 2 states that "[a] flexible, outcomes-based approach should form the basis of final assessments regarding equivalence or substituted compliance."

[7] The Commission made a positive comparability determination for Commission regulations 23.504(a)(2), (b)(1), (b)(2), (b)(3), (b)(4), (c), and (d), but not for Commission regulations 23.504(b)(5) and (b)(6).

[8] Yen-denominated interest rate swaps are subject to the mandatory clearing requirement in both the U.S. and Japan.

[9] Exemptive Order Regarding Compliance With Certain Swap Regulations. 78 FR 43785 (Jul. 22, 2013).

[10] *http://www.cftc.gov/PressRoom/SpeechesTestimony/opaomalia-29.*

[11] *http://www.cftc.gov/PressRoom/SpeechesTestimony/omaliastatement071213b.*

several outstanding questions regarding these comparability determinations. In doing so, the Commission must collaborate with foreign regulators to increase global harmonization.

First, there is uncertainty surrounding the timing and outcome of the MOUs. Critical questions regarding information sharing, cooperation, supervision, and enforcement will remain unanswered until the Commission and our fellow regulators execute these MOUs.

Second, the Commission has issued time-limited no-action relief for the swap data repository reporting requirements. These comparability determinations will be done as separate notices. However, the timing and process for these determinations remain uncertain.

Third, the Commission has failed to provide clarity on the process for addressing the comparability determinations that it declined to undertake at this time. The Notices only state that the Commission may address these requests in a separate notice at a later date given further developments in the law and regulations of other jurisdictions. To promote certainty in the financial markets, the Commission must provide a clear path forward for market participants and foreign regulators.

The following steps would be a better approach: (1) the Commission should extend the Exemptive Order to allow foreign regulators to further implement their regulatory regimes and coordinate with them to implement a harmonized substituted compliance process; (2) the Commission should implement a flexible, outcomes-based approach to the substituted compliance process and apply it similarly to all jurisdictions; and (3) the Commission should work closely with our fellow regulators to expeditiously implement MOUs that resolve regulatory differences and address regulatory oversight issues.

Conclusion

While I support the narrow comparability determinations that the Commission has made, it was my hope that the Commission would work with foreign regulators to implement a substituted compliance process that would increase the global harmonization effort. I am disappointed that the Commission has failed to implement such a process.

I do believe that in the longer term, the swaps regulations of the major jurisdictions will converge. At this time, however, the Commission's comparability determinations have done little to alleviate the burden of regulatory uncertainty and duplicative compliance with both U.S. and foreign regulations.

The G–20 process delineated and put in place the swaps market reforms in G–20 member nations. It is then no surprise that the Commission must learn to coordinate with foreign regulators to minimize confusion and disruption in bringing much needed clarity to the swaps market. For all these shortcomings, I respectfully dissent from the Commission's approval of the Notices.

BILLING CODE 6351–01–P

COMMODITY FUTURES TRADING COMMISSION

Comparability Determination for Japan: Certain Transaction-Level Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Comparability Determination for Certain Requirements under the Japanese Laws and Regulations.

SUMMARY: The following is the analysis and determination of the Commodity Futures Trading Commission ("Commission") regarding certain parts of a request by the Bank of Tokyo-Mitsubishi UFJ, Ltd ("BTMU") that the Commission determine that laws and regulations applicable in the Japan provide a sufficient basis for an affirmative finding of comparability with respect to the following regulatory obligations applicable to swap dealers ("SDs") and major swap participants ("MSPs") registered with the Commission: (i) Swap trading relationship documentation and (ii) daily trading records (collectively, the "Business Conduct Requirements").

DATES:

Effective Date: This determination will become effective immediately upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary Barnett, Director, 202–418–5977; gbarnett@cftc.gov, Frank Fisanich, Chief Counsel, 202–418–5949, ffisanich@cftc.gov, and Jason Shafer, Special Counsel, 202–418–5097, jshafer@cftc.gov, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 26, 2013, the Commission published in the **Federal Register** its "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" ("Guidance").[1] In the Guidance, the Commission set forth its interpretation of the manner in which it believes that section 2(i) of the Commodity Exchange Act ("CEA") applies Title VII's swap provisions to activities outside the U.S. and informed the public of some of the policies that it expects to follow, generally speaking, in applying Title VII and certain Commission regulations in contexts covered by section 2(i). Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations promulgated thereunder.

In addition to the Guidance, on July 22, 2013, the Commission issued the Exemptive Order Regarding Compliance with Certain Swap Regulations (the "Exemptive Order").[2] Among other things, the Exemptive Order provided time for the Commission to consider substituted compliance with respect to six jurisdictions where non-U.S. SDs are currently organized. In this regard, the Exemptive Order generally provided non-U.S. SDs and MSPs (and foreign branches of U.S. SDs and MSPs) in the six jurisdictions with conditional relief from certain requirements of Commission regulations (those referred to as "Transaction-Level Requirements" in the Guidance) until the earlier of December 21, 2013, or 30 days following the issuance of a substituted compliance determination.[3] However, the Commission provided only transitional relief from the real-time public reporting requirements under part 43 of the Commission's regulations until

[1] 78 FR 45292 (July 26, 2013). The Commission originally published proposed and further proposed guidance on July 12, 2012 and January 7, 2013, respectively. *See* Cross-Border Application of Certain Swaps Provisions of the Commodity Exchange Act, 77 FR 41214 (July 12, 2012) and Further Proposed Guidance Regarding Compliance with Certain Swap Regulations,78 FR 909 (Jan. 7, 2013).

[2] 78 FR 43785 (July 22, 2013).

[3] The Transaction-Level Requirements under the Exemptive Order consist of 17 CFR 37.12, 38.11, 23.202, 23.205, 23.400–451, 23.501, 23.502, 23.503, 23.504, 23.505, 23.506, 23.610, and parts 43 and 50 of the Commission's regulations.

September 30, 2013, stating that "it would not be in the public interest to further delay reporting under part 43 . . . ." [4] Similarly, the Commission provided transitional relief only until October 10, 2013, from the clearing and swap processing requirements (as described in the Guidance), stating that, "[b]ecause SDs and MSPs have been committed to clearing their [credit default swaps] and interest rate swaps for many years, and indeed have been voluntarily clearing for many years, any further delay of the Commission's clearing requirement is unwarranted." [5] The Commission did not make any comparability determination with respect to clearing and swap processing prior to October 10, 2013, or real-time public reporting prior to September 30, 2013.

On September 20, 2013, BTMU submitted a request that the Commission determine that laws and regulations applicable in Japan provide a sufficient basis for an affirmative finding of comparability with respect to certain Transaction-Level Requirements, including the Business Conduct Requirements.[6] (BTMU is referred to herein as the "applicant"). On December 16, 2013, the application was further supplemented with corrections and additional materials. The following is the Commission's analysis and determination regarding the Business Conduct Requirements, as detailed below.

In addition to the Business Conduct Requirements described below, the applicant also requested a comparability determination with respect to law and regulations applicable in Japan governing trade execution, real-time public reporting, clearing, and swap processing.

With respect to trade execution and real-time reporting, the Commission has not made a comparability determination at this time due to the Commission's view that although a legislative framework for such requirements exists in Japan, detailed regulations with which to compare the requirements of the Commission's regulations on trade execution and real-time public reporting under such framework are still under consideration in Japan. The Commission may address these requests in a separate notice at a later date, taking into account further developments in the U.S. and Japan.

With respect to clearing and swap processing, this notice does not address § 50.2 (Treatment of swaps subject to a clearing requirement), § 50.4 (Classes of swaps required to be cleared), § 23.506 (Swap processing and clearing), or § 23.610 (Clearing member acceptance for clearing).

The mandatory clearing requirement in Japan, which is consistent with the G20 commitments [7] and objectives, was implemented in November 2012, ahead of other G20 jurisdictions. Japan's clearing requirement, at its initial stage, is applied to transactions between large domestic financial institutions registered under the Financial Instruments and Exchange Act, No. 25 of 1948 ("FIEA"), who are members of licensed clearing organizations [8], for (i) certain credit default swaps (i.e., those referencing iTraxx Japan—an investment-grade index CDS from 50 Japanese firms); and (ii) certain interest rate swaps (i.e., three month or six month Japanese yen LIBOR interest rate swaps). According to Japanese authorities, the scope of entities and products subject to the clearing requirement in Japan will be expanded over the next two years in a phased manner.

While the Commission considers that the legal framework in respect of clearing and swap processing in Japan is comparable to the U.S framework, it also recognizes that there are differences in the scope of entities and products between its clearing requirement under section 2(h)(1)(A) of the CEA and § 50.2 ("the CEA clearing requirement") and the Japanese FIEA clearing requirement, due to differences in market structures and conditions. Due to such differences, the Commission has not made a comparability determination with respect to §§ 50.2, 50.4, 23.506, or 23.610 at this time. The Commission may address these requests in a separate notice at a later date, taking into account further developments in the U.S. and Japan.

The Commission notes that its Division of Clearing and Risk has granted certain no-action relief from the CEA clearing requirement to qualified clearing participants of JSCC. Pursuant to such no-action relief, clearing participants of JSCC that are subject to Commission regulation 50.2, as well as parents and affiliates of such participants, may continue clearing yen-denominated interest rate swaps at JSCC instead of at a Commission-registered derivatives clearing organization ("DCO"). Further, JSCC is in the process of registering with the Commission as a DCO. Upon JSCC's registration, a Japanese SD could comply with both the CEA and FIEA clearing requirements by clearing relevant swaps at JSCC.

II. Background

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act [9] ("Dodd-Frank Act" or "Dodd-Frank"), which, in Title VII, established a new regulatory framework for swaps.

Section 722(d) of the Dodd-Frank Act amended the CEA by adding section 2(i), which provides that the swap provisions of the CEA (including any CEA rules or regulations) apply to cross-border activities when certain conditions are met, namely, when such activities have a "direct and significant connection with activities in, or effect on, commerce of the United States" or when they contravene Commission rules or regulations as are necessary or appropriate to prevent evasion of the swap provisions of the CEA enacted under Title VII of the Dodd-Frank Act.[10]

In the three years since its enactment, the Commission has finalized 68 rules and orders to implement Title VII of the Dodd-Frank Act. The finalized rules include those promulgated under section 4s of the CEA, which address registration of SDs and MSPs and other substantive requirements applicable to SDs and MSPs. With few exceptions, the delayed compliance dates for the Commission's regulations implementing such section 4s requirements applicable to SDs and MSPs have passed and new SDs and MSPs are now required to be in full compliance with such regulations upon registration with the Commission.[11] Notably, the requirements under Title VII of the Dodd-Frank Act related to SDs and MSPs by their terms apply to all registered SDs and MSPs, irrespective of where they are located, albeit subject to the limitations of CEA section 2(i).

To provide guidance as to the Commission's views regarding the scope

[5] *See* id. at 43790.

[6] For purposes of this notice, the Business Conduct Requirements consist of 17 CFR 23.202 and 23.504.

[7] In 2009, leaders of the Group of 20 ("G20")—whose membership includes Japan, the United States, and 18 other countries—agreed that: (i) OTC derivatives contracts should be reported to trade repositories; (ii) all standardized OTC derivatives contracts should be cleared through central counterparties and traded on exchanges or electronic trading platforms, where appropriate, by the end of 2012; and (iii) non-centrally cleared contracts should be subject to higher capital requirements.

[8] Japan Securities Clearing Corporation ("JSCC") is currently the only licensed clearing organization under the FIEA in Japan.

[9] Public Law 111–203, 124 Stat. 1376 (2010).

[10] 7 U.S.C. 2(i).

[11] The compliance dates are summarized on the Compliance Dates page of the Commission's Web site. (http://www.cftc.gov/LawRegulation/DoddFrankAct/ComplianceDates/index.htm.)

of the cross-border application of Title VII of the Dodd-Frank Act, the Commission set forth in the Guidance its interpretation of the manner in which it believes that Title VII's swap provisions apply to activities outside the U.S. pursuant to section 2(i) of the CEA. Among other matters, the Guidance generally describes the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission established a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations. With respect to the standards forming the basis for any determination of comparability ("comparability determination" or "comparability finding"), the Commission stated:

> In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the applicable requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including but not limited to, the comprehensiveness of those requirement(s), the scope and objectives of the relevant regulatory requirement(s), the comprehensiveness of the foreign regulator's supervisory compliance program, as well as the home jurisdiction's authority to support and enforce its oversight of the registrant. In this context, comparable does not necessarily mean identical. Rather, the Commission would evaluate whether the home jurisdiction's regulatory requirement is comparable to and as comprehensive as the corresponding U.S. regulatory requirement(s).[12]

Upon a comparability finding, consistent with CEA section 2(i) and comity principles, the Commission's policy generally is that eligible entities may comply with a substituted compliance regime, subject to any conditions the Commission places on its finding, and subject to the Commission's retention of its examination authority and its enforcement authority.[13]

In this regard, the Commission notes that a comparability determination cannot be premised on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction, but rather on whether information relevant to the Commission's oversight of an SD or MSP would be directly available to the Commission and any U.S. prudential regulator of the SD or MSP.[14] The Commission's direct access to the books and records required to be maintained by SD or MSP registered with the Commission is a core requirement of the CEA[15] and the Commission's regulations,[16] and is a condition to registration.[17]

III. Regulation of SDs and MSPs in Japan

As represented to the Commission by the applicant, swap activities in Japan may be governed by the Banking Act of Japan, No. 59 of 1981 ("Banking Act"), covering banks and bank holding companies, and the FIEA, covering, among others, Financial Instrument Business Operators ("FIBOs") and Registered Financial Institutions ("RFIs"). The Japanese Prime Minister delegated broad authority to implement these laws to the Japanese Financial Services Agency ("JFSA"). Pursuant to this authority, the JFSA has promulgated the Order for Enforcement,[18] Cabinet Office Ordinance,[19] Supervisory Guidelines[20] and Inspection Manuals.[21] The Securities and Exchange Surveillance Commission ("SESC") is within the JFSA and has promulgated, among other things, the Inspection Manual for FIBOs.

These requirements supplement the requirements of the Banking Act and FIEA with a more proscriptive direction as to the particular structural features or responsibilities that internal compliance functions must maintain.

In general, banks are subject to the Banking Act, relevant laws and regulations for banks, the Supervisory Guideline for banks, and the Inspection Manual for banks, while FIBOs are subject to the FIEA, relevant laws and regulations for FIBOs, Supervisory Guideline for FIBOs, and Inspection Manual for FIBOs.

Pursuant to Article 29 of the FIEA, any person that engages in trade activities that constitute "Financial Instruments Business"—which, among other things, includes over-the-counter transactions in derivatives ("OTC derivatives") or intermediary, brokerage (excluding brokerage for clearing of securities) or agency services therefor[22]—must register under the FIEA as a FIBO. Banks that conduct specified activities in the course of trade, including OTC derivatives, must register under the FIEA as RFIs pursuant to Article 33–2 of the FIEA. Banks registered as RFIs are required to comply with relevant laws and regulations for FIBOs regarding specified activities. Failure to comply with any relevant laws and regulations, Supervisory Guidelines or Inspection Manuals would subject the applicant to potential sanctions or corrective measures.

The applicant is a licensed bank in Japan that is also registered as an RFI under the supervision of the JFSA. In addition, the applicant is a member of several self-regulatory organizations, including the Japanese Securities

[12] 78 FR 45342–45345.

[13] See the Guidance, 78 FR 45342–44.

[14] Under §§ 23.203 and 23.606, all records required by the CEA and the Commission's regulations to be maintained by a registered SD or MSP shall be maintained in accordance with Commission regulation 1.31 and shall be open for inspection by representatives of the Commission, the United States Department of Justice, or any applicable prudential regulator.

In its Final Exemptive Order Regarding Compliance with Certain Swap Regulations, 78 FR 858 (Jan. 7, 2013), the Commission noted that an applicant for registration as a SD or MSP must file a Form 7–R with the National Futures Association and that Form 7–R was being modified at that time to address existing blocking, privacy, or secrecy laws of foreign jurisdictions that applied to the books and records of SDs and MSPs acting in those jurisdictions. *See* id. at 871–72 n. 107. The modifications to Form 7–R were a temporary measure intended to allow SDs and MSPs to apply for registration in a timely manner in recognition of the existence of the blocking, privacy, and secrecy laws. In the Guidance, the Commission clarified that the change to Form 7–R impacts the registration application only and does not modify the Commission's authority under the CEA and its regulations to access records held by registered SDs and MSPs. Commission access to a registrant's books and records is a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto. The Commission has maintained an ongoing dialogue on a bilateral and multilateral basis with foreign regulators and with registrants to address books and records access issues and may consider appropriate measures where requested to do so.

Dealers Association ("JSDA"). The JSDA is a "Financial Instruments Firms Association" authorized under FIEA by the Prime Minister of Japan.[23]

IV. Comparable and Comprehensiveness Standard

The Commission's comparability analysis will be based on a comparison of specific foreign requirements against the specific related CEA provisions and Commission regulations as categorized and described in the Guidance. As explained in the Guidance, within the framework of CEA section 2(i) and principles of international comity, the Commission may make a comparability determination on a requirement-by-requirement basis, rather than on the basis of the foreign regime as a whole.[24] In making its comparability determinations, the Commission may include conditions that take into account timing and other issues related to coordinating the implementation of reform efforts across jurisdictions.[25]

In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the corollary requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including, but not limited to:

- The comprehensiveness of those requirement(s),
- The scope and objectives of the relevant regulatory requirement(s),
- The comprehensiveness of the foreign regulator's supervisory compliance program, and
- The home jurisdiction's authority to support and enforce its oversight of the registrant.[26]

In making a comparability determination, the Commission takes an "outcome-based" approach. An "outcome-based" approach means that when evaluating whether a foreign jurisdiction's regulatory requirements are comparable to, and as comprehensive as, the corollary areas of the CEA and Commission regulations, the Commission ultimately focuses on regulatory outcomes (*i.e.*, the home jurisdiction's requirements do not have to be identical).[27] This approach recognizes that foreign regulatory systems differ and their approaches vary and may differ from how the Commission chose to address an issue, but that the foreign jurisdiction's regulatory requirements nonetheless achieve the regulatory outcome sought to be achieved by a certain provision of the CEA or Commission regulation.

In doing its comparability analysis the Commission may determine that no comparability determination can be made[28] and that the non-U.S. SD or non-U.S. MSP, U.S. bank that is a SD or MSP with respect to its foreign branches, or non-registrant, to the extent applicable under the Guidance, may be required to comply with the CEA and Commission regulations.

The starting point in the Commission's analysis is a consideration of the regulatory objectives of the foreign jurisdiction's regulation of swaps and swap market participants. As stated in the Guidance, jurisdictions may not have swap specific regulations in some areas, and instead have regulatory or supervisory regimes that achieve comparable and comprehensive regulation to the Dodd-Frank Act requirements, but on a more general, entity-wide, or prudential, basis.[29] In addition, portions of a foreign regulatory regime may have similar regulatory objectives, but the means by which these objectives are achieved with respect to swap market activities may not be clearly defined, or may not expressly include specific regulatory elements that the Commission concludes are critical to achieving the regulatory objectives or outcomes required under the CEA and the Commission's regulations. In these circumstances, the Commission will work with the regulators and registrants in these jurisdictions to consider alternative approaches that may result in a determination that substituted compliance applies.[30]

Finally, the Commission generally will rely on an applicant's description of the laws and regulations of the foreign jurisdiction in making its comparability determination. The Commission considers an application to be a representation by the applicant that the laws and regulations submitted are in full force and effect, that the description of such laws and regulations is accurate and complete, and that, unless otherwise noted, the scope of such laws and regulations encompasses the swaps activities[31] of SDs and MSPs[32] in the relevant jurisdictions.[33] Further, as stated in the Guidance, the Commission expects that an applicant would notify the Commission of any

---

[23] Because the applicant's request and the Commission's determinations herein are based on the comparability of Japanese requirements applicable to banks, FIBOs, and RFIs, an SD or MSP that is not a bank, FIBO, or RFI, or is otherwise not subject to the requirements applicable to banks, FIBOs, and RFIs upon which the Commission bases its determinations, may not be able to rely on the Commission's comparability determinations herein.

[24] 78 FR 45343.

[25] 78 FR 45343.

[26] 78 FR 45343.

[27] 78 FR 45343.

[28] A finding of comparability may not be possible for a number of reasons, including the fact that the foreign jurisdiction has not yet implemented or finalized particular requirements.

[29] 78 FR 45343.

[30] As explained in the Guidance, such "approaches used will vary depending on the circumstances relevant to each jurisdiction. One example would include coordinating with the foreign regulators in developing appropriate regulatory changes or new regulations, particularly where changes or new regulations already are being considered or proposed by the foreign regulators or legislative bodies. As another example, the Commission may, after consultation with the appropriate regulators and market participants, include in its substituted compliance determination a description of the means by which certain swaps market participants can achieve substituted compliance within the construct of the foreign regulatory regime. The identification of the means by which substituted compliance is achieved would be designed to address the regulatory objectives and outcomes of the relevant Dodd-Frank Act requirements in a manner that does not conflict with a foreign regulatory regime and reduces the likelihood of inconsistent regulatory obligations. For example, the Commission may specify that [SDs] and MSPs in the jurisdiction undertake certain recordkeeping and documentation for swap activities that otherwise is only addressed by the foreign regulatory regime with respect to financial activities generally. In addition, the substituted compliance determination may include provisions for summary compliance and risk reporting to the Commission to allow the Commission to monitor whether the regulatory outcomes are being achieved. By using these approaches, in the interest of comity, the Commission would seek to achieve its regulatory objectives with respect to the Commission's registrants that are operating in foreign jurisdictions in a manner that works in harmony with the regulatory interests of those jurisdictions." 78 FR 45343–44.

[31] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under Part 23 (17 CFR Part 23) are limited in scope to the swaps activities of SDs and MSPs.

[32] No SD or MSP that is not legally required to comply with a law or regulation determined to be comparable may voluntarily comply with such law or regulation in lieu of compliance with the CEA and the relevant Commission regulation. Each SD or MSP that seeks to rely on a comparability determination is solely responsible for determining whether it is legally required to comply with the laws and regulations found comparable. Currently, there are no MSPs organized outside the U.S. and the Commission therefore cautions any non-financial entity organized outside the U.S. and applying for registration as an MSP to carefully consider whether the laws and regulations determined to be comparable herein are applicable to such entity.

[33] The Commission has provided the relevant foreign regulator(s) with opportunities to review and correct the applicant's description of such laws and regulations on which the Commission will base its comparability determination. The Commission relies on the accuracy and completeness of such review and any corrections received in making its comparability determinations. A comparability determination based on an inaccurate description of foreign laws and regulations may not be valid.

material changes to information submitted in support of a comparability determination (including, but not limited to, changes in the relevant supervisory or regulatory regime) as, depending on the nature of the change, the Commission's comparability determination may no longer be valid.[34]

The Guidance provided a detailed discussion of the Commission's policy regarding the availability of substituted compliance[35] for the Business Conduct Requirements.

V. Supervisory Arrangement

In the Guidance, the Commission stated that, in connection with a determination that substituted compliance is appropriate, it would expect to enter into an appropriate memorandum of understanding ("MOU") or similar arrangement[36] with the relevant foreign regulator(s). Although existing arrangements would indicate a foreign regulator's ability to cooperate and share information, "going forward, the Commission and relevant foreign supervisor(s) would need to establish supervisory MOUs or other arrangements that provide for information sharing and cooperation in the context of supervising SDs and MSPs."[37]

The Commission is in the process of developing its registration and supervision regime for provisionally-registered SDs and MSPs. This new initiative includes setting forth supervisory arrangements with authorities that have joint jurisdiction over SDs and MSPs that are registered with the Commission and subject to U.S. law. Given the developing nature of the Commission's regime and the fact that the Commission has not negotiated prior supervisory arrangements with certain authorities, the negotiation of supervisory arrangements presents a unique opportunity to develop close working relationships between and among authorities, as well as highlight any potential issues related to cooperation and information sharing.

Accordingly, the Commission is negotiating such a supervisory arrangement with each applicable foreign regulator of an SD or MSP. The Commission expects that the arrangement will establish expectations for ongoing cooperation, address direct access to information,[38] provide for notification upon the occurrence of specified events, memorialize understandings related to on-site visits,[39] and include protections related to the use and confidentiality of non-public information shared pursuant to the arrangement.

These arrangements will establish a roadmap for how authorities will consult, cooperate, and share information. As with any such arrangement, however, nothing in these arrangements will supersede domestic laws or resolve potential conflicts of law, such as the application of domestic secrecy or blocking laws to regulated entities.

VI. Comparability Determination and Analysis

The following section describes the requirements imposed by specific sections of the CEA and the Commission's regulations for the Business Conduct Requirements in the "risk mitigation and transparency" category that are the subject of this comparability determination and the Commission's regulatory objectives with respect to such requirements. Immediately following a description of the requirement(s) and regulatory objective(s) of the specific Business Conduct Requirements that the applicant submitted for a comparability determination, the Commission provides a description of the foreign jurisdiction's comparable laws, regulations, or rules and whether such laws, regulations, or rules meet the applicable regulatory objective.

The Commission's determinations in this regard and the discussion in this section are intended to inform the public of the Commission's views regarding whether the foreign jurisdiction's laws, regulations, or rules may be comparable to and as comprehensive as those requirements in the Dodd-Frank Act (and Commission regulations promulgated thereunder) and therefore, may form the basis of substituted compliance. In turn, the public (in the foreign jurisdiction, in the United States, and elsewhere) retains its ability to present facts and circumstances that would inform the determinations set forth in this release.

As was stated in the Guidance, the Commission understands the complex and dynamic nature of the global swap market and the need to take an adaptable approach to cross-border issues, particularly as it continues to work closely with foreign regulators to address potential conflicts with respect to each country's respective regulatory regime. In this regard, the Commission may review, modify, or expand the determinations herein in light of comments received and future developments.

A. Swap Trading Relationship Documentation (§ 23.504)

Commission Requirement: Section 4s(i) of the CEA requires each SD and MSP to conform to Commission standards for the timely and accurate confirmation, processing, netting, documentation, and valuation of swaps.[40] Pursuant to this requirement, the Commission adopted § 23.504.

Pursuant to § 23.504(a), SDs and MSPs must have policies and procedures reasonably designed to ensure that the SD or MSP enters into swap trading relationship documentation with each counterparty prior to executing any swap with such counterparty. Such requirement does not apply to cleared swaps.

Pursuant to § 23.504(b), SDs and MSPs must, at a minimum, document terms relating to:

- Payment obligations;
- Netting of payments;
- Events of default or other termination events;
- Netting of obligations upon termination;
- Transfer of rights/obligations;

[34] 78 FR 45345.

[35] *See* 78 FR 45348–50. The Commission notes that registrants and other market participants are responsible for determining whether substituted compliance is available pursuant to the Guidance based on the comparability determination contained herein (including any conditions or exceptions), and its particular status and circumstances.

[36] An MOU is one type of arrangement between or among regulators. Supervisory arrangements could include, as appropriate, cooperative arrangements that are memorialized and executed as addenda to existing MOUs or, for example, as independent bilateral arrangements, statements of intent, declarations, or letters.

[37] 78 FR 45344.

[38] Section 4s(j)(3) and (4) of the CEA and Commission regulation 23.606 require a registered SD or MSP to make all records required to be maintained in accordance with Commission regulation 1.31 available promptly upon request to, among others, representatives of the Commission. *See also* 7 U.S.C. § 6s(f); 17 CFR 23.203. In the Guidance, the Commission states that it "reserves this right to access records held by registered [SDs] and MSPs, including those that are non-U.S. persons who may comply with the Dodd-Frank recordkeeping requirement through substituted compliance." 78 FR 45345 n. 472; *see also id.* at 45342 n. 461 (affirming the Commission's authority under the CEA and its regulations to access books and records held by registered SDs and MSPs as "a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto").

[39] The Commission retains its examination authority, both during the application process as well as upon and after registration of an SD or MSP. *See* 78 FR 45342 (stating Commission policy that "eligible entities may comply with a substituted compliance regime under certain circumstances, subject, however, to the Commission's retention of its examination authority") and 45344 n. 471 (stating that the "Commission may, as it deems appropriate and necessary, conduct an on-site examination of the applicant").

[40] *See* 7 U.S.C. § 6s(i).

- Governing law;
- Valuation—must be able to value swaps in a predictable and objective manner—complete and independently verifiable methodology for valuation;
- Dispute resolution procedures; and
- Credit support arrangements with initial/variation margin at least as high as set for SD/MSPs or prudential regulator (identifying haircuts and class of eligible assets).

Regulatory Objective: Through Commission regulation 23.504, the Commission seeks to reduce the legal, operational, counterparty credit, and market risk that can arise from undocumented swaps or undocumented terms of swaps. Inadequate documentation of swap transactions is more likely to result in collateral and legal disputes, thereby exposing counterparties to significant counterparty credit risk.

In particular, documenting agreements regarding valuation is critical because, as the Commission has noted, the ability to determine definitively the value of a swap at any given time lies at the center of many of the OTC derivatives market reforms contained in the Dodd-Frank Act and is a cornerstone of risk management. With respect to other SDs/MSPs and financial entities, or upon request of any other counterparty, the regulation requires agreement on the process (including alternatives and dispute resolution procedures) for determining the value of each swap for the duration of such swap for purposes of complying with the Commission's margin and risk management requirements, with such valuations based on objective criteria to the extent practicable.

Comparable Japanese Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as section 4s(i) of the CEA and Commission regulation 23.504.

Article 37–3 of the FIEA and Article 99 of the FIB Ordinance requires RFIs/FIBOs that intend to conclude a swap transaction to deliver to their customer documentation that outlines all relevant terms of the swap transaction. Such documentation must be delivered prior to execution in order to "ensure that the customer can make a decision on whether to conclude the contract with a full understanding on the content…of the contract." In addition to describing all relevant terms of the transactions, the pre-execution documentation must identify:

- How the obligations arising from the swap transactions will be performed;
- Settlement terms;
- Events on default or termination;
- The name or trade name of the designated dispute resolution organization (if any), or the details of the grievances settlement procedures and dispute resolution measures; and
- The types of and computation method of the amount of customer margins or other guarantee money which a customer is required to deposit regarding the swap transactions, the types of an prices applicable to properties, etc. which may be deposited as customer margins or other guarantee money and matters equivalent thereto, and how customer margins or other guarantee money will be deposited by or returned to the customer.

II–1–2.1(5)(i) and (ii) of the Inspection Manual for FIBOs requires RFIs/FIBOs to develop internal controls to verify compliance with these documentation requirements, including a system to verify that the written documents were issued before the agreements were concluded. Such internal controls must be approved by the RFI's/FIBO's board of directors. In addition, pursuant to IV(1) of the Checklist for Business Risk Management (Governance) of the Inspection Manual for banks, banks are required to develop an external audit system to review the effectiveness of these internal controls on at least an annual basis. II–1–1.4(1) of the Inspection Manual for FIBOs requires a RFI/FIBO's board of directors to establish an internal audit system to verify the appropriateness and effectiveness of these internal controls by setting up a highly independent internal audit division.

Commission Determination: The Japanese standards specified above require OTC derivative contracts entered into between RFIs/FIBOs and their customers to be confirmed in writing, which corresponds to the requirements of Commission regulation 23.504(b)(2).

Pursuant to the FIEA, RFIs and FIBOs are required to document the computation method of the customer margins or other guarantee money that the customer is required to deposit regarding the swap transactions. This corresponds with Commission regulation 23.504(b)(3) and (b)(4)(i), which requires SDs and MSPs to engage in daily valuation with other SDs and MSPs, and financial entities.

Under the Japanese standards, when concluding OTC derivative contracts with each other, counterparties must have agreed detailed procedures and processes in relation to: (a) identification, recording, and monitoring of disputes relating to the recognition or valuation of the contracts and to the exchange of collateral between counterparties, and (b) the resolution of disputes in a timely manner. These aspects of the Japanese standards correspond to the valuation documentation requirements under Commission regulation 23.504(b)(4), which also require use of market transactions for valuations to the extent practicable, or other objective criteria, and an agreement on detailed processes for valuation dispute resolution for purposes of complying with margin requirements.

Generally identical in intent to § 23.504(b)(2), (3), and (4), the Japanese confirmation and valuation documentation requirements are designed to reduce the legal, operational, counterparty credit, and market risk that can arise from undocumented transactions or terms, reducing the risk of collateral and legal disputes, and exposure of counterparties to significant counterparty credit risk.

Moreover, generally identical in intent to § 23.504(a)(2), (b)(1), (c), and (d), the Japanese standards require that SDs and MSPs establish policies and procedures, including audit procedures, approved in writing by senior management of the SD or MSP, reasonably designed to ensure that they have entered into swap trading relationship documentation in compliance with appropriate standards with each counterparty prior to or contemporaneously with entering into a swap transaction with such counterparty.

Based on the foregoing and the representations of the applicant, the Commission finds the confirmation and valuation documentation requirements of the Japanese standards specified above are comparable to and as comprehensive as the swap trading relationship documentation requirements of Commission regulations 23.504(a)(2), (b)(1), (2), (3), and (4), (c), and (d).

The foregoing comparability determination does not extend to the requirement that such documentation include notice of the status of the counterparty under the orderly liquidation procedures of Title II of the Dodd-Frank Act, and the effect of clearing on swaps executed bilaterally.[41]

[41] *See* § 23.504(b)(5) and (6).

B. Daily Trading Records (§ 23.202)

Commission Requirement: Section 4s(g)(1) of the CEA and Commission regulation 23.202 generally require that SDs and MSPs retain daily trading records for swaps and related cash and forward transactions, including:

- Documents on which transaction information is originally recorded;
- All information necessary to conduct a comprehensive and accurate trade reconstruction;
- Pre-execution trade information including records of all oral and written communications concerning quotes, solicitations, bids, offers, instructions, trading, and prices that lead to the execution of a swap or related cash and forward transactions, whether communicated by phone, fax, instant messaging, chat rooms, email, mobile device, or other digital or electronic media;
- Reliable timing date for the initiation of a trade;
- A record of the time, to the nearest minute using Coordinated Universal Time (UTC), of each quotation provided or received prior to trade execution;
- Execution trade information including the terms of each swap and related cash or forward transaction, terms regarding payment or settlement, initial and variation margin requirements, option premiums, and other cash flows;
- The trade ticket for each swap and related cash or forward transaction;
- The date and time of execution of each swap and related cash or forward transaction to the nearest minute using UTC;
- The identity of the counterparty and the date and title of the agreement to which each swap is subject, including any swap trading relationship documentation and credit support arrangements;
- The product name and identifier, the price at which the swap was executed, and the fees, commissions and other expenses applicable;
- Post-execution trade information including records of confirmation, termination, novation, amendment, assignment, netting, compression, reconciliation, valuation, margining, collateralization, and central clearing;
- The time of confirmation to the nearest minute using UTC;
- Ledgers of payments and interest received, moneys borrowed and loaned, daily swap valuations, and daily calculation of current and potential future exposure for each counterparty;
- Daily calculation of initial and variation margin requirements;
- Daily calculation of the value of collateral, including haircuts;
- Transfers of collateral, including substitutions, and the types of collateral transferred; and
- Credits and debits for each counterparty's account.

Daily trading records must be maintained in a form and manner identifiable and searchable by transaction and counterparty, and records of swaps must be maintained for the duration of the swap plus five years, and voice recordings for one year. Records must be "readily accessible" for the first two years of the five year retention period (consistent with § 1.31).

Regulatory Objective: Through § 23.202, the Commission seeks to ensure that an SD's or MSP's records include all information necessary to conduct a comprehensive and accurate trade reconstruction for each swap, which necessarily requires the records to be identifiable by transaction and counterparty. Complete and accurate trade reconstruction is critical for both regulatory oversight and investigations of illegal activity pursuant to the Commission's enforcement authority. The Commission believes that a comprehensive and accurate trade reconstruction requires records of pre-execution, execution, and post-execution trade information.

Comparable Japanese Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as section 4s(g) of the CEA and Commission regulation 23.202.

Article 156–64(1) and (2) of the FIEA, II–2–1 2.(1)(iv) of the FIBO Inspection Manual, and II.1.1(3)(iii) of the Checklist for Customer Protection Management, requires a RFI/FIBO to retain records for swaps and related cash and forward transactions, including:

- Documents prior to the conclusion of a contract that outline the terms of a swap transaction;
- 24-hour audio recordings of trading by dealers;
- Order tickets for each swap and related cash or forward transactions;
- The date and time the order was accepted and the date and time the order was filled, both of which must be recorded by time of day, of each swap and related cash or forward transaction;
- Product name (items to be listed in the books and documents may be entered using codes, brevity codes or any other symbols that have been standardized by the relevant RFI/FIBO);
- Price at which the swap was executed, and the fees, commissions and other expenses applicable;
- Documents upon conclusion of a contract that contain an outline of swap transactions, the name of the customer, as well as trading daily books and customer account ledgers that contain transaction histories;
- Ledgers of the customer fees, margin transaction payment interest, margin transactions receipt interest, security borrowing fee or security lending fee;
- Guarantee money on deposit, customer margin, trade margin or other matters regarding collateral property (the distinction between cash or security, etc. deposited as margin, date of receipt or date of return, issue name, volume or amount of money); and
- Debit or credit of money and balances of all accounts.

Pursuant to the OTC Derivative Ordinance, FIEA Enforcement Order, FIB Ordinance, and the Supervisory Guideline for FIBOs, records of swaps of RFIs/FIBOs must be in writing and maintained for a period from 5 to 10 years, depending on the specific record at issue. III–16(iv) of the Checklist for Market Risk Management of the Inspection Manual for banks assesses whether voice recordings are maintained for all traders on a 24-hour basis, recorded tapes are stored for a prescribed period of time, and retained "under the control of an organization segregated from the market and back-office divisions.".

III–2-(1)(viii) in Exhibit 1 of the Checklist for Operational Risk Management of the Inspection Manual for banks and II–2–1.2(1) of the Inspection Manual for FIBOs assesses whether documentary evidence such as transaction data are stored for a period specified by the internal rules and operational procedures, etc., but at least one year.

In addition, III–3–10–2(3) (iv) of Supervisory Guideline for banks specifically requires banks to have the personnel and systems to respond in a timely and appropriate manner to inspections and supervision provided by overseas regulatory authorities. In view of maintaining direct dialog and smooth communications with the relevant overseas regulatory authorities, this provision ensures the establishment of a reporting system which enables timely and appropriate reporting.

Similarly, IV–5–2(i) of Supervisory Guideline for FIBOs would ensure the availability of information to a regulator promptly upon request. Under this provision, the JFSA assesses whether a designated parent company of a FIBO

ensures group-wide compliance with the relevant laws, regulations and rules of each country in which it does business by establishing an appropriate control environment for legal compliance in accordance with the size of its overseas bases and the characteristics of its business operations.

The JFSA has informed the Commission that, in the process of its oversight and enforcement of the foregoing Japanese standards for FIBOs and RFIs, any SD or MSP would be subject to such standards and required to record pre-execution trade information, communicated by not only telephone but also other forms of communication comparable to those listed in § 23.202(a)(1) and (b)(1).

Commission Determination: The Commission finds that compliance with Japanese standards would enable the relevant competent authority to conduct a comprehensive and accurate trade reconstruction for each swap, which the Commission finds generally meets the regulatory objective of § 23.202.

In addition, the Commission finds that the Japanese standards specified above would ensure Commission access to the required books and records of SDs and MSPs by requiring personnel and systems necessary to respond in a timely and appropriate manner to inspections and supervision provided by overseas regulatory authorities.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the daily trading records requirements of Japan's standards are comparable to and as comprehensive as § 23.202.

Issued in Washington, DC on December 20, 2013, by the Commission.

Melissa D. Jurgens,

Secretary of the Commission.

Appendices to Comparability Determination for Japan: Certain Transaction-Level Requirements

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Chilton and Wetjen voted in the affirmative. Commissioner O'Malia voted in the negative.

Appendix 2—Statement of Chairman Gary Gensler and Commissioners Chilton and Wetjen

We support the Commission's approval of broad comparability determinations that will be used for substituted compliance purposes. For each of the six jurisdictions that has registered swap dealers, we carefully reviewed each regulatory provision of the foreign jurisdictions submitted to us and compared the provision's intended outcome to the Commission's own regulatory objectives. The resulting comparability determinations for entity-level requirements permit non-U.S. swap dealers to comply with regulations in their home jurisdiction as a substitute for compliance with the relevant Commission regulations.

These determinations reflect the Commission's commitment to coordinating our efforts to bring transparency to the swaps market and reduce its risks to the public. The comparability findings for the entity-level requirements are a testament to the comparability of these regulatory systems as we work together in building a strong international regulatory framework.

In addition, we are pleased that the Commission was able to find comparability with respect to swap-specific transaction-level requirements in the European Union and Japan.

The Commission attained this benchmark by working cooperatively with authorities in Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland to reach mutual agreement. The Commission looks forward to continuing to collaborate with both foreign authorities and market participants to build on this progress in the months and years ahead.

Appendix 3—Dissenting Statement of Commissioner Scott D. O'Malia

I respectfully dissent from the Commodity Futures Trading Commission's ("Commission") approval of the Notices of Comparability Determinations for Certain Requirements under the laws of Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland (collectively, "Notices"). While I support the narrow comparability determinations that the Commission has made, moving forward, the Commission must collaborate with foreign regulators to harmonize our respective regimes consistent with the G–20 reforms.

However, I cannot support the Notices because they: (1) Are based on the legally unsound cross-border guidance ("Guidance");[1] (2) are the result of a flawed substituted compliance process; and (3) fail to provide a clear path moving forward. If the Commission's objective for substituted compliance is to develop a narrow rule-by-rule approach that leaves unanswered major regulatory gaps between our regulatory framework and foreign jurisdictions, then I believe that the Commission has successfully achieved its goal today.

Determinations Based on Legally Unsound Guidance

As I previously stated in my dissent, the Guidance fails to articulate a valid statutory foundation for its overbroad scope and inconsistently applies the statute to different activities.[2] Section 2(i) of the Commodity Exchange Act ("CEA") states that the Commission does not have jurisdiction over foreign activities unless "those activities have a direct and significant connection with activities in, or effect on, commerce of the United States . . ."[3] However, the Commission never properly articulated how and when this limiting standard on the Commission's extraterritorial reach is met, which would trigger the application of Title VII of the Dodd-Frank Act[4] and any Commission regulations promulgated thereunder to swap activities that are outside of the United States. Given this statutorily unsound interpretation of the Commission's extraterritorial authority, the Commission often applies CEA section 2(i) inconsistently and arbitrarily to foreign activities.

Accordingly, because the Commission is relying on the legally deficient Guidance to make its substituted compliance determinations, and for the reasons discussed below, I cannot support the Notices. The Commission should have collaborated with foreign regulators to agree on and implement a workable regime of substituted compliance, and then should have made determinations pursuant to that regime.

Flawed Substituted Compliance Process

Substituted compliance should not be a case of picking a set of foreign rules identical to our rules, determining them to be "comparable," but then making no determination regarding rules that require extensive gap analysis to assess to what extent each jurisdiction is, or is not, comparable based on overall outcomes of the regulatory regimes. While I support the narrow comparability determinations that the Commission has made, I am concerned that in a rush to provide some relief, the Commission has made substituted compliance determinations that only afford narrow relief and fail to address major regulatory gaps between our domestic regulatory framework and foreign jurisdictions. I will address a few examples below.

First, earlier this year, the OTC Derivatives Regulators Group ("ODRG") agreed to a number of substantive understandings to improve the cross-border implementation of over-the-counter derivatives reforms.[5] The ODRG specifically agreed that a flexible, outcomes-based approach, based on a broad category-by-category basis, should

[2] *http://www.cftc.gov/PressRoom/SpeechesTestimony/omaliastatement071213b.*

[3] CEA section 2(i); 7 U.S.C. 2(i).

[4] Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376 (2010).

[5] *http://www.cftc.gov/PressRoom/PressReleases/pr6678–13.*

form the basis of comparability determinations.[6]

However, instead of following this approach, the Commission has made its comparability determinations on a rule-by-rule basis. For example, in Japan's Comparability Determination for Transaction-Level Requirements, the Commission has made a positive comparability determination for some of the detailed requirements under the swap trading relationship documentation provisions, but not for other requirements.[7] This detailed approach clearly contravenes the ODRG's understanding.

Second, in several areas, the Commission has declined to consider a request for a comparability determination, and has also failed to provide an analysis regarding the extent to which the other jurisdiction is, or is not, comparable. For example, the Commission has declined to address or provide any clarity regarding the European Union's regulatory data reporting determination, even though the European Union's reporting regime is set to begin on February 12, 2014. Although the Commission has provided some limited relief with respect to regulatory data reporting, the lack of clarity creates unnecessary uncertainty, especially when the European Union's reporting regime is set to begin in less than two months.

Similarly, Japan receives no consideration for its mandatory clearing requirement, even though the Commission considers Japan's legal framework to be comparable to the U.S. framework. While the Commission has declined to provide even a partial comparability determination, at least in this instance the Commission has provided a reason: the differences in the scope of entities and products subject to the clearing requirement.[8] Such treatment creates uncertainty and is contrary to increased global harmonization efforts.

Third, in the Commission's rush to meet the artificial deadline of December 21, 2013, as established in the Exemptive Order Regarding Compliance with Certain Swap Regulations ("Exemptive Order"),[9] the Commission failed to complete an important piece of the cross-border regime, namely, supervisory memoranda of understanding ("MOUs") between the Commission and fellow regulators.

I have previously stated that these MOUs, if done right, can be a key part of the global harmonization effort because they provide mutually agreed-upon solutions for differences in regulatory regimes.[10] Accordingly, I stated that the Commission should be able to review MOUs alongside the respective comparability determinations and vote on them at the same time. Without these MOUs, our fellow regulators are left wondering whether and how any differences, such as direct access to books and records, will be resolved.

Finally, as I have consistently maintained, the substituted compliance process should allow other regulatory bodies to engage with the full Commission.[11] While I am pleased that the Notices are being voted on by the Commission, the full Commission only gained access to the comment letters from foreign regulators on the Commission's comparability determination draft proposals a few days ago. This is hardly a transparent process.

Unclear Path Forward

Looking forward to next steps, the Commission must provide answers to several outstanding questions regarding these comparability determinations. In doing so, the Commission must collaborate with foreign regulators to increase global harmonization.

First, there is uncertainty surrounding the timing and outcome of the MOUs. Critical questions regarding information sharing, cooperation, supervision, and enforcement will remain unanswered until the Commission and our fellow regulators execute these MOUs.

Second, the Commission has issued time-limited no-action relief for the swap data repository reporting requirements. These comparability determinations will be done as separate notices. However, the timing and process for these determinations remain uncertain.

Third, the Commission has failed to provide clarity on the process for addressing the comparability determinations that it declined to undertake at this time. The Notices only state that the Commission may address these requests in a separate notice at a later date given further developments in the law and regulations of other jurisdictions. To promote certainty in the financial markets, the Commission must provide a clear path forward for market participants and foreign regulators.

The following steps would be a better approach: (1) The Commission should extend the Exemptive Order to allow foreign regulators to further implement their regulatory regimes and coordinate with them to implement a harmonized substituted compliance process; (2) the Commission should implement a flexible, outcomes-based approach to the substituted compliance process and apply it similarly to all jurisdictions; and (3) the Commission should work closely with our fellow regulators to expeditiously implement MOUs that resolve regulatory differences and address regulatory oversight issues.

Conclusion

While I support the narrow comparability determinations that the Commission has made, it was my hope that the Commission would work with foreign regulators to implement a substituted compliance process that would increase the global harmonization effort. I am disappointed that the Commission has failed to implement such a process.

I do believe that in the longer term, the swaps regulations of the major jurisdictions will converge. At this time, however, the Commission's comparability determinations have done little to alleviate the burden of regulatory uncertainty and duplicative compliance with both U.S. and foreign regulations.

The G–20 process delineated and put in place the swaps market reforms in G–20 member nations. It is then no surprise that the Commission must learn to coordinate with foreign regulators to minimize confusion and disruption in bringing much needed clarity to the swaps market. For all these shortcomings, I respectfully dissent from the Commission's approval of the Notices.

COMMODITY FUTURES TRADING COMMISSION

Comparability Determination for Switzerland: Certain Entity-Level Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Comparability Determination for Certain Requirements under Swiss Financial Market Regulation.

SUMMARY: The following is the analysis and determination of the Commodity Futures Trading Commission ("Commission") regarding certain parts of a request by UBS AG ("UBS") that the Commission determine that laws and regulations applicable in Switzerland provide a sufficient basis for an affirmative finding of comparability with respect to the following regulatory obligations applicable to swap dealers ("SDs") and major swap participants ("MSPs") registered with the Commission: (i) Chief compliance officer; (ii) risk management; and (iii) swap data recordkeeping (collectively, the "Internal Business Conduct Requirements").

DATES: *Effective Date:* This determination will become effective immediately upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary Barnett, Director, 202–418–5977, *gbarnett@cftc.gov*, Frank Fisanich, Chief Counsel, 202–418–5949, *ffisanich@cftc.gov*, and Scott Lee, Special Counsel, 202–418–5090, *slee@cftc.gov*, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 26, 2013, the Commission published in the **Federal Register** its "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" (the "Guidance").[1] In the Guidance, the Commission set forth its interpretation of the manner in which it believes that section 2(i) of the Commodity Exchange Act ("CEA") applies Title VII's swap provisions to activities outside the U.S. and informed the public of some of the policies that it expects to follow, generally speaking, in applying Title VII and certain Commission regulations in contexts covered by section 2(i). Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations promulgated thereunder.

In addition to the Guidance, on July 22, 2013, the Commission issued the Exemptive Order Regarding Compliance with Certain Swap Regulations (the "Exemptive Order").[2] Among other things, the Exemptive Order provided time for the Commission to consider substituted compliance with respect to six jurisdictions where non-U.S. SDs are currently organized. In this regard, the Exemptive Order generally provided non-U.S. SDs and MSPs in the six jurisdictions with conditional relief from certain requirements of Commission regulations (those referred to as "Entity-Level Requirements" in the Guidance) until the earlier of December 21, 2013, or 30 days following the issuance of a substituted compliance determination.[3]

On July 11, 2013, UBS ("applicant") submitted a request that the Commission determine that laws and regulations applicable in Switzerland provide a sufficient basis for an affirmative finding of comparability with respect to certain Entity-Level Requirements, including the Internal Business Conduct Requirements.[4] On November 13, 2013, the application was supplemented with corrections and additional materials. The following is the Commission's analysis and determination regarding the Internal Business Conduct Requirements, as detailed below.[5]

II. Background

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act[6] ("Dodd-Frank Act" or "Dodd-Frank"), which, in Title VII, established a new regulatory framework for swaps.

Section 722(d) of the Dodd-Frank Act amended the CEA by adding section 2(i), which provides that the swap provisions of the CEA (including any CEA rules or regulations) apply to cross-border activities when certain conditions are met, namely, when such activities have a "direct and significant connection with activities in, or effect on, commerce of the United States" or when they contravene Commission rules or regulations as are necessary or appropriate to prevent evasion of the swap provisions of the CEA enacted under Title VII of the Dodd-Frank Act.[7]

In the three years since its enactment, the Commission has finalized 68 rules and orders to implement Title VII of the Dodd-Frank Act. The finalized rules include those promulgated under section 4s of the CEA, which address registration of SDs and MSPs and other substantive requirements applicable to SDs and MSPs. With few exceptions, the delayed compliance dates for the Commission's regulations implementing such section 4s requirements applicable to SDs and MSPs have passed and new SDs and MSPs are now required to be in full compliance with such regulations upon registration with the Commission.[8] Notably, the requirements under Title VII of the Dodd-Frank Act related to SDs and MSPs by their terms apply to all registered SDs and MSPs, irrespective of where they are located, albeit subject to the limitations of CEA section 2(i).

To provide guidance as to the Commission's views regarding the scope of the cross-border application of Title VII of the Dodd-Frank Act, the Commission set forth in the Guidance its interpretation of the manner in which it believes that Title VII's swap provisions apply to activities outside the U.S. pursuant to section 2(i) of the CEA. Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations

[1] 78 FR 45292 (July 26, 2013). The Commission originally published proposed and further proposed guidance on July 12, 2012 and January 7, 2013, respectively. *See* Cross-Border Application of Certain Swaps Provisions of the Commodity Exchange Act, 77 FR 41214 (July 12, 2012) and Further Proposed Guidance Regarding Compliance with Certain Swap Regulations, 78 FR 909 (Jan. 7, 2013).

[2] 78 FR 43785 (July 22, 2013).

[3] The Entity-Level Requirements under the Exemptive Order consist of 17 CFR 1.31, 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, 23.606, 23.608, 23.609, and parts 45 and 46 of the Commission's regulations.

[4] For purposes of this notice, the Internal Business Conduct Requirements consist of 17 CFR 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606.

[5] This notice does not address SDR Reporting. The Commission may provide a comparability determination with respect to the SDR Reporting requirement in a separate notice.

[6] Public Law 111–203, 124 Stat. 1376 (2010).

[7] 7 U.S.C. 2(i).

[8] The compliance dates are summarized on the Compliance Dates page of the Commission's Web site available at: *http://www.cftc.gov/LawRegulation/DoddFrankAct/ComplianceDates/index.htm*.

applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations. With respect to the standards forming the basis for any determination of comparability ("comparability determination" or "comparability finding"), the Commission stated:

> In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the applicable requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including but not limited to, the comprehensiveness of those requirement(s), the scope and objectives of the relevant regulatory requirement(s), the comprehensiveness of the foreign regulator's supervisory compliance program, as well as the home jurisdiction's authority to support and enforce its oversight of the registrant. In this context, comparable does not necessarily mean identical. Rather, the Commission would evaluate whether the home jurisdiction's regulatory requirement is comparable to and as comprehensive as the corresponding U.S. regulatory requirement(s).[9]

Upon a comparability finding, consistent with CEA section 2(i) and comity principles, the Commission's policy generally is that eligible entities may comply with a substituted compliance regime, subject to any conditions the Commission places on its finding, and subject to the Commission's retention of its examination authority and its enforcement authority.[10]

In this regard, the Commission notes that a comparability determination cannot be premised on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction, but rather on whether information relevant to the Commission's oversight of an SD or MSP would be directly available to the Commission and any U.S. prudential regulator of the SD or MSP.[11] The Commission's direct access to the books and records required to be maintained by an SD or MSP registered with the Commission is a core requirement of the CEA[12] and the Commission's regulations,[13] and is a condition to registration.[14]

III. Regulation of SDs and MSPs in Switzerland

On July 11, 2013, UBS submitted a request that the Commission assess the comparability of laws and regulations applicable in Switzerland with the CEA and the Commission's regulations promulgated thereunder. On November 13, 2013, the application was supplemented with corrections and additional materials.

As represented to the Commission by the applicant, SDs in Switzerland are primarily regulated by the Swiss Financial Market Supervisory Authority ("FINMA"). FINMA protects creditors, investors, and policy holders, ensuring the smooth functioning of the financial markets and preserving the reputation of Swiss financial institutions. In its role as state supervisory authority, FINMA acts as an oversight authority of banks, insurance companies, exchanges, securities dealers, collective investment schemes, distributors, and insurance intermediaries. It issues operating licenses for companies in the supervised sectors. Through its supervisory activities, FINMA's role is to ensure that supervised institutions comply with the requisite laws, ordinances, directives and regulations, and continue at all times to fulfill the licensing requirements.[15]

IV. Comparable and Comprehensiveness Standard

The Commission's comparability analysis will be based on a comparison of specific foreign requirements against the specific related CEA provisions and Commission regulations as categorized and described in the Guidance. As explained in the Guidance, within the framework of CEA section 2(i) and principles of international comity, the Commission may make a comparability determination on a requirement-by-requirement basis, rather than on the basis of the foreign regime as a whole.[16] In making its comparability determinations, the Commission may include conditions that take into account timing and other issues related to coordinating the implementation of reform efforts across jurisdictions.[17]

In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the corollary requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including, but not limited to:

- The comprehensiveness of those requirement(s);
- The scope and objectives of the relevant regulatory requirement(s);
- The comprehensiveness of the foreign regulator's supervisory compliance program; and
- The home jurisdiction's authority to support and enforce its oversight of the registrant.[18]

In making a comparability determination, the Commission takes an "outcome-based" approach. An "outcome-based" approach means that when evaluating whether a foreign jurisdiction's regulatory requirements are comparable to, and as comprehensive as, the corollary areas of the CEA and Commission regulations, the Commission ultimately focuses on regulatory outcomes (*i.e.*, the home jurisdiction's requirements do not have to be identical).[19] This approach

---

[9] 78 FR 45342–45.

[10] *See* the Guidance, 78 FR 45342–44.

[11] Under §§ 23.203 and 23.606, all records required by the CEA and the Commission's regulations to be maintained by a registered SD or MSP shall be maintained in accordance with Commission regulation 1.31 and shall be open for inspection by representatives of the Commission, the United States Department of Justice, or any applicable prudential regulator.

In its Final Exemptive Order Regarding Compliance with Certain Swap Regulations, 78 FR 858 (Jan. 7, 2013), the Commission noted that an applicant for registration as an SD or MSP must file a Form 7–R with the National Futures Association and that Form 7–R was being modified at that time to address existing blocking, privacy, or secrecy laws of foreign jurisdictions that applied to the books and records of SDs and MSPs acting in those jurisdictions. *See id.* at 871–72 n. 107. The modifications to Form 7–R were a temporary measure intended to allow SDs and MSPs to apply for registration in a timely manner in recognition of the existence of the blocking, privacy, and secrecy laws. In the Guidance, the Commission clarified that the change to Form 7–R impacts the registration application only and does not modify the Commission's authority under the CEA and its regulations to access records held by registered SDs and MSPs. Commission access to a registrant's books and records is a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto. The Commission has maintained an ongoing dialogue on a bilateral and multilateral basis with foreign regulators and with registrants to address books and records access issues and may consider appropriate measures where requested to do so.

[12] *See, e.g.*, sections 4s(f)(1)(C), 4s(j)(3) and (4) of the CEA.

[13] *See, e.g.*, §§ 23.203(b) and 23.606.

[14] *Id.*

[15] Because the applicant's request and the Commission's determinations herein are based on the comparability of Swiss requirements applicable to FINMA supervised institutions, an SD or MSP that is not supervised by FINMA, or is otherwise not subject to the requirements applicable to FINMA supervised institutions upon which the Commission bases its determinations, may not be able to rely on the Commission's comparability determinations herein.

[16] 78 FR 45343.

[17] 78 FR 45343.

[18] 78 FR 45343.

[19] 78 FR 45343. The Commission's substituted compliance program would generally be available for swap data repository reporting ("SDR Reporting"), as outlined in the Guidance, only if the Commission has direct access to all of the data elements that are reported to a foreign trade repository pursuant to the substituted compliance

recognizes that foreign regulatory systems differ and their approaches vary and may differ from how the Commission chose to address an issue, but that the foreign jurisdiction's regulatory requirements nonetheless achieve the regulatory outcome sought to be achieved by a certain provision of the CEA or Commission regulation.

In doing its comparability analysis the Commission may determine that no comparability determination can be made [20] and that the non-U.S. SD or non-U.S. MSP, U.S. bank that is an SD or MSP with respect to its foreign branches, or non-registrant, to the extent applicable under the Guidance, may be required to comply with the CEA and Commission regulations.

The starting point in the Commission's analysis is a consideration of the regulatory objectives of the foreign jurisdiction's regulation of swaps and swap market participants. As stated in the Guidance, jurisdictions may not have swap specific regulations in some areas, and instead have regulatory or supervisory regimes that achieve comparable and comprehensive regulation to the Dodd-Frank Act requirements, but on a more general, entity-wide, or prudential, basis.[21] In addition, portions of a foreign regulatory regime may have similar regulatory objectives, but the means by which these objectives are achieved with respect to swaps market activities may not be clearly defined, or may not expressly include specific regulatory elements that the Commission concludes are critical to achieving the regulatory objectives or outcomes required under the CEA and the Commission's regulations. In these circumstances, the Commission will work with the regulators and registrants in these jurisdictions to consider alternative approaches that may result in a determination that substituted compliance applies.[22]

Finally, the Commission will generally rely on an applicant's description of the laws and regulations of the foreign jurisdiction in making its comparability determination. The Commission considers an application to be a representation by the applicant that the laws and regulations submitted are in full force and effect, that the description of such laws and regulations is accurate and complete, and that, unless otherwise noted, the scope of such laws and regulations encompasses the swaps activities [23] of SDs and MSPs[24] in the relevant jurisdictions.[25]

Further, as stated in the Guidance, the Commission expects that an applicant would notify the Commission of any material changes to information submitted in support of a comparability determination (including, but not limited to, changes in the relevant supervisory or regulatory regime) as, depending on the nature of the change, the Commission's comparability determination may no longer be valid.[26]

The Guidance provided a detailed discussion of the Commission's policy regarding the availability of substituted compliance [27] for the Internal Business Conduct Requirements.[28]

V. Supervisory Arrangement

In the Guidance, the Commission stated that, in connection with a determination that substituted compliance is appropriate, it would expect to enter into an appropriate memorandum of understanding ("MOU") or similar arrangement [29] with the relevant foreign regulator(s). Although existing arrangements would indicate a foreign regulator's ability to cooperate and share information, "going forward, the Commission and relevant foreign supervisor(s) would need to establish supervisory MOUs or other arrangements that provide for

program. Thus, direct access to swap data is a threshold matter to be addressed in a comparability evaluation for SDR Reporting. Moreover, the Commission explains in the Guidance that, due to its technical nature, a comparability evaluation for SDR Reporting "will generally entail a detailed comparison and technical analysis." A more particularized analysis will generally be necessary to determine whether data stored in a foreign trade repository provides for effective Commission use, in furtherance of the regulatory purposes of the Dodd-Frank Act. *See* 78 FR 45345.

[20] A finding of comparability may not be possible for a number of reasons, including the fact that the foreign jurisdiction has not yet implemented or finalized particular requirements.

[21] 78 FR 45343.

[22] As explained in the Guidance, such "approaches used will vary depending on the circumstances relevant to each jurisdiction. One example would include coordinating with the foreign regulators in developing appropriate regulatory changes or new regulations, particularly where changes or new regulations already are being considered or proposed by the foreign regulators or legislative bodies. As another example, the Commission may, after consultation with the appropriate regulators and market participants, include in its substituted compliance determination a description of the means by which certain swaps market participants can achieve substituted compliance within the construct of the foreign regulatory regime. The identification of the means by which substituted compliance is achieved would be designed to address the regulatory objectives and outcomes of the relevant Dodd-Frank Act requirements in a manner that does not conflict with a foreign regulatory regime and reduces the likelihood of inconsistent regulatory obligations. For example, the Commission may specify that SDs and MSPs in the jurisdiction undertake certain recordkeeping and documentation for swap activities that otherwise is only addressed by the foreign regulatory regime with respect to financial activities generally. In addition, the substituted compliance determination may include provisions for summary compliance and risk reporting to the Commission to allow the Commission to monitor whether the regulatory outcomes are being achieved. By using these approaches, in the interest of comity, the Commission would seek to achieve its regulatory objectives with respect to the Commission's registrants that are operating in foreign jurisdictions in a manner that works in harmony with the regulatory interests of those jurisdictions." 78 FR 45343–44.

[23] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under 17 CFR Part 23 are limited in scope to the swaps activities of SDs and MSPs.

[24] No SD or MSP that is not legally required to comply with a law or regulation determined to be comparable may voluntarily comply with such law or regulation in lieu of compliance with the CEA and the relevant Commission regulation. Each SD or MSP that seeks to rely on a comparability determination is responsible for determining whether it is subject to the laws and regulations found comparable. Currently, there are no MSPs organized outside the U.S. and the Commission therefore cautions any non-financial entity organized outside the U.S. and applying for registration as an MSP to carefully consider whether the laws and regulations determined to be comparable herein are applicable to such entity.

[25] The Commission has provided the relevant foreign regulator(s) with opportunities to review and correct the applicant's description of such laws and regulations on which the Commission will base its comparability determination. The Commission relies on the accuracy and completeness of such review and any corrections received in making its comparability determinations. A comparability determination based on an inaccurate description of foreign laws and regulations may not be valid.

[26] 78 FR 45345.

[27] *See* 78 FR 45348–50. The Commission notes that registrants and other market participants are responsible for determining whether substituted compliance is available pursuant to the Guidance based on the comparability determination contained herein (including any conditions or exceptions), and its particular status and circumstances.

[28] The applicant did not request a compatibility determination for § 23.608 (Restrictions on counterparty clearing relationships), therefore, this notice does not address § 23.608. Additionally, this notice does not address § 23.609 (Clearing member risk management). The Commission declines to take up the request for a comparability determination with respect to § 23.609 due to the Commission's view that there are not laws or regulations applicable in Switzerland to compare with the prohibitions and requirements of § 23.609. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in Switzerland.

This notice also does not address capital adequacy because the Commission has not yet finalized rules for SDs and MSPs in this area, nor SDR Reporting. The Commission may provide a comparability determination with respect to these requirements at a later date or in a separate notice.

[29] An MOU is one type of arrangement between or among regulators. Supervisory arrangements could include, as appropriate, cooperative arrangements that are memorialized and executed as addenda to existing MOUs or as, *e.g.*, independent bilateral arrangements, statements of intent, declarations, or letters.

information sharing and cooperation in the context of supervising [SDs] and MSPs." [30]

The Commission is in the process of developing its registration and supervision regime for provisionally-registered SDs and MSPs. This new initiative includes setting forth supervisory arrangements with authorities that have joint jurisdiction over SDs and MSPs that are registered with the Commission and subject to U.S. law. Given the developing nature of the Commission's regime and the fact that the Commission has not negotiated prior supervisory arrangements with certain authorities, the negotiation of supervisory arrangements presents a unique opportunity to develop close working relationships between and among authorities, as well as highlight any potential issues related to cooperation and information sharing.

Accordingly, the Commission is negotiating such a supervisory arrangement with each applicable foreign regulator of an SD or MSP. The Commission expects that the arrangement will establish expectations for ongoing cooperation, address direct access to information,[31] provide for notification upon the occurrence of specified events, memorialize understandings related to on-site visits,[32] and include protections related to the use and confidentiality of non-public information shared pursuant to the arrangement.

These arrangements will establish a roadmap for how authorities will consult, cooperate, and share information. As with any such arrangement, however, nothing in these arrangements will supersede domestic laws or resolve potential conflicts of law, such as the application of domestic secrecy or blocking laws to regulated entities.

[30] 78 FR 45344.

[31] Section 4s(j)(3) and (4) of the CEA and Commission regulation 23.606 require a registered SD or MSP to make all records required to be maintained in accordance with Commission regulation 1.31 available promptly upon request to, among others, representatives of the Commission. *See also* 7 U.S.C. § 6s(f); 17 CFR 23.203. In the Guidance, the Commission states that it "reserves this right to access records held by registered [SDs] and MSPs, including those that are non-U.S. persons who may comply with the Dodd-Frank recordkeeping requirement through substituted compliance." 78 FR 45345 n. 472; *see also id.* at 45342 n. 461 (affirming the Commission's authority under the CEA and its regulations to access books and records held by registered SDs and MSPs as "a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto").

[32] The Commission retains its examination authority, both during the application process as well as upon and after registration of an SD or MSP. *See* 78 FR 45342 (stating Commission policy that "eligible entities may comply with a substituted compliance regime under certain circumstances, subject, however, to the Commission's retention of its examination authority") and 45344 n. 471 (stating that the "Commission may, as it deems appropriate and necessary, conduct an on-site examination of the applicant").

VI. Comparability Determination and Analysis

The following section describes the requirements imposed by specific sections of the CEA and the Commission's regulations for the Internal Business Conduct Requirements that are the subject of this comparability determination, and the Commission's regulatory objectives with respect to such requirements. Immediately following a description of the requirement(s) and regulatory objective(s) of the specific Internal Business Conduct Requirements that the requestor submitted for a comparability determination, the Commission provides a description of the foreign jurisdiction's comparable laws, regulations, or rules and whether such laws, regulations, or rules meet the applicable regulatory objective.

The Commission's determinations in this regard and the discussion in this section are intended to inform the public of the Commission's views regarding whether the foreign jurisdiction's laws, regulations, or rules may be comparable and comprehensive as those requirements in the Dodd-Frank Act (and Commission regulations promulgated thereunder) and therefore, may form the basis of substituted compliance. In turn, the public (in the foreign jurisdiction, in the United States, and elsewhere) retains its ability to present facts and circumstances that would inform the determinations set forth in this notice.

As was stated in the Guidance, the Commission recognizes the complex and dynamic nature of the global swap market and the need to take an adaptable approach to cross-border issues, particularly as it continues to work closely with foreign regulators to address potential conflicts with respect to each country's respective regulatory regime. In this regard, the Commission may review, modify, or expand the determinations herein in light of comments received and future developments.

A. Chief Compliance Officer (§ 3.3)

Commission Requirement: Implementing section 4s(k) of the CEA, Commission regulation 3.3 generally sets forth the following requirements for SDs and MSPs:

- An SD or MSP must designate an individual as Chief Compliance Officer ("CCO");
- The CCO must have the responsibility and authority to develop the regulatory compliance policies and procedures of the SD or MSP;
- The CCO must report to the board of directors or the senior officer of the SD or MSP;
- Only the board of directors or a senior officer may remove the CCO;
- The CCO and the board of directors must meet at least once per year;
- The CCO must have the background and skills appropriate for the responsibilities of the position;
- The CCO must not be subject to disqualification from registration under sections 8a(2) or (3) of the CEA;
- Each SD and MSP must include a designation of a CCO in its registration application;
- The CCO must administer the regulatory compliance policies of the SD or MSP;
- The CCO must take reasonable steps to ensure compliance with the CEA and Commission regulations, and resolve conflicts of interest;
- The CCO must establish procedures for detecting and remediating non-compliance issues;
- The CCO must annually prepare and sign an "annual compliance report" containing: (i) A description of policies and procedures reasonably designed to ensure compliance; (ii) an assessment of the effectiveness of such policies and procedures; (iii) a description of material non-compliance issues and the action taken; (iv) recommendations of improvements in compliance policies; and (v) a certification by the CCO or CEO that, to the best of such officer's knowledge and belief, the annual report is accurate and complete under penalty of law; and
- The annual compliance report must be furnished to the CFTC within 90 days after the end of the fiscal year of the SD or MSP, simultaneously with its annual financial condition report.

Regulatory Objective: The Commission believes that compliance by SDs and MSPs with the CEA and the Commission's rules greatly contributes to the protection of customers, orderly and fair markets, and the stability and integrity of the market intermediaries registered with the Commission. The Commission expects SDs and MSPs to strictly comply with the CEA and the Commission's rules and to devote sufficient resources to ensuring such compliance. Thus, through its CCO rule, the Commission seeks to ensure firms have designated a qualified individual as CCO that reports directly to the board

of directors or the senior officer of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually to the Commission and the board or senior officer on compliance of the firm.

Comparable Swiss Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Switzerland are in full force and effect in Switzerland, and comparable to and as comprehensive as section 4s(k) of the CEA and Commission regulation 3.3.

The applicant represented that Swiss law and FINMA regulations require a regulated entity within FINMA's jurisdiction to appoint a senior management member to act in the capacity of a CCO, with responsibility for the oversight of all of the entity's regulated businesses, including its swaps business. The CCO is required by law to report, directly or indirectly, to senior management of the regulated entity with respect to any material compliance issues in any of the banking entity's businesses.

Under Swiss law, compliance entails the adherence to legal, regulatory and internal policies, as well as the observance of the customary standards and rules of professional conduct within the market. The risk of violations of provisions, standards, or rules of professional conduct and the corresponding legal and regulatory sanctions, financial losses, or damage to one's reputation are deemed to be compliance risks.

Accordingly, FINMA Circular 2008/24 of November 20, 2008, Supervision and Internal Control of Banks,[33] requires banks to take the necessary operational measures and precautions to ensure compliance. Pursuant to such Circular, banks:

- Must designate one member of senior management to act in the capacity of the CCO with responsibility for oversight of the compliance function;
- Must maintain a compliance function with unrestricted access to information and independence from profit-generating business activities;
- Must allocate adequate resources and authority to the compliance function;
- Must not permit compensation of employees of the compliance function to contain incentives that could lead to conflicts of interest;
- Must conduct an annual assessment (at minimum) of compliance risk and compliance policies, approved by management;
- Must timely report to management regarding material changes to compliance risks, serious violations, and remediation; and
- Must prepare an annual report assessing compliance risks and activities and furnish such report to the board of directors, internal auditors, and outside auditors.

Commission Determination: The Commission finds that the Swiss law and regulations specified above are generally identical in intent to § 3.3 by seeking to ensure firms have designated a qualified individual as the compliance officer that reports directly to a sufficiently senior function of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually on compliance of the firm.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the CCO requirements of Swiss law and regulations are comparable to and as comprehensive as § 3.3, with the exception of § 3.3(f) concerning certifying and furnishing an annual compliance report to the Commission.

Notwithstanding that the Commission has not determined that the requirements of the Swiss standards specified above are comparable to and as comprehensive as § 3.3(f), any SD or MSP to which both § 3.3 and the Swiss law and regulations specified above are applicable would generally be deemed to be in compliance with § 3.3 if that SD or MSP complies with the Swiss law and regulations specified above, subject to certifying and furnishing the Commission with the annual report required under Swiss law and regulations specified above in accordance with § 3.3(f). The Commission notes that it generally expects registrants to submit required reports to the Commission in the English language.

B. Risk Mandgement Duties (§§ 23.600—23.609)

Section 4s(j) of the CEA requires each SD and MSP to establish internal policies and procedures designed to, among other things, address risk management, monitor compliance with position limits, prevent conflicts of interest, and promote diligent supervision, as well as maintain business continuity and disaster recovery programs.[34] The Commission adopted regulations 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606 to implement the statute.[35] The Commission also adopted regulation 23:609, which requires certain risk management procedures for SDs or MSPs that are clearing members of a derivatives clearing organization ("DCO").[36] Collectively, these requirements help to establish a robust and comprehensive internal risk management program for SDs and MSPs with respect to their swaps activities,[37] which is critical to effective systemic risk management for the overall swaps market. In making its comparability determination with regard to these risk management duties, the Commission will consider each regulation individually.

1. Risk Management Program for SDs and MSPs (§ 23.600)

Commission Requirement: Implementing section 4s(j)(2) of the CEA, Commission regulation 23.600 generally requires that:

- Each SD or MSP must establish and enforce a risk management program consisting of a system of written risk management policies and procedures designed to monitor and manage the risks associated with the swap activities of the firm, including without limitation, market, credit, liquidity, foreign currency, legal, operational, and settlement risks, and furnish a copy of such policies and procedures to the

[33] Text of English translation by KPMG available at: *https://www.kpmg.com/CH/de/library/Legislative-Texts/Documents/pub_20081120-FINMA_Circ_08-24.pdf.*

[34] 7 U.S.C. 6s(j).

[35] *See* Final Swap Dealer and MSP Recordkeeping Rule, 77 FR 20128 (April 3, 2012) (relating to risk management program, monitoring of position limits, business continuity and disaster recovery, conflicts of interest policies and procedures, and general information availability, respectively).

[36] *See* Customer Documentation Rule, 77 FR 21278 (April 9, 2012). Also, SDs must comply with Commission regulation 23.608, which prohibits SDs providing clearing services to customers from entering into agreements that would: (i) Disclose the identity of a customer's original executing counterparty; (ii) limit the number of counterparties a customer may trade with; (iii) impose counterparty-based position limits; (iv) impair a customer's access to execution of a trade on terms that have a reasonable relationship to the best terms available; or (v) prevent compliance with specified time frames for acceptance of trades into clearing.

[37] *See supra* note 20.

CFTC upon application for registration and upon request;

- The SD or MSP must establish a risk management unit independent from the business trading unit;
- The risk management policies and procedures of the SD or MSP must be approved by the firm's governing body;
- Risk tolerance limits and exceptions therefrom must be reviewed and approved quarterly by senior management and annually by the governing body;
- The risk management program must have a system for detecting breaches of risk tolerance limits and alerting supervisors and senior management, as appropriate;
- The risk management program must account for risks posed by affiliates and be integrated at the consolidated entity level;
- The risk management unit must provide senior management and the governing body with quarterly risk exposure reports and upon detection of any material change in the risk exposure of the SD or MSP;
- Risk exposure reports must be furnished to the CFTC within five business days following provision to senior management;
- The risk management program must have a new product policy for assessing the risks of new products prior to engaging in such transactions;
- The risk management program must have policies and procedures providing for trading limits, monitoring of trading, processing of trades, and separation of personnel in the trading unit from personnel in the risk management unit; and
- The risk management program must be reviewed and tested at least annually and upon any material change in the business of the SD or MSP.

Regulatory Objective: Through the required system of risk management, the Commission seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. To this end, the Commission believes the risk management program of an SD or MSP must contain at least the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Comparable Swiss Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Switzerland are in full force and effect in Switzerland, and comparable to and as comprehensive as section 4s(j)(2) of the CEA and Commission regulation 23.600.

Article 9 of the Swiss Banking Ordinance,[38] FINMA Circular 2008/24,[39] and Bank Liquidity Ordinance of the Swiss Federal Council, address specific forms of risk and detail requirements related to controls and management of those risks including, but not limited to: market risk, liquidity risk, operational and settlement risk, credit risk, reputational risk, and legal risk. Specifically, pursuant to such Swiss law and regulations, Swiss banks:

- Must have an internal audit function that annually assesses the effectiveness of risk management;
- Must segregate the risk management function from trading functions;
- Must make the board of directors responsible to regulate, establish, maintain, monitor, and regularly supervise an appropriate internal control function in conformity with the bank's risk profile;
- Must have internal documentation of the risk management function sufficient for an outside auditor to form a reliable opinion;
- Must keep internal auditors independent from management;
- Must have internal controls based on systematic risk analysis, and must ensure material risks are recorded, limited, and monitored, including risks posed by affiliates;
- Must establish an internal audit function that reports directly to the board or audit committee;
- Must have the board of directors regularly discuss with management its assessment of the adequacy and effectiveness of internal controls;
- Must maintain and regularly test internal control functions; and
- Must define the bank's capacity to assume liquidity risk (risk tolerance limits), monitor and manage intra-day liquidity risks, and monitor assets that are used to generate liquidity.

Commission Determination: The Commission finds that the Swiss law and regulations specified above are generally identical in intent to § 23.600 by requiring a system of risk management that seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. Specifically, the Commission finds that the Swiss law and regulations specified above comprehensively require SDs and MSPs to establish risk management programs containing the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the risk management program requirements of Swiss law and regulations, as specified above, are comparable to and as comprehensive as § 23.600. with the exception of § 23.600(c)(2) concerning the requirement that each SD and MSP produce a quarterly risk exposure report and provide such report to its senior management, governing body, and the Commission.

Notwithstanding that the Commission has not determined that the requirements of Swiss law and regulations are comparable to and as comprehensive as § 23.600(c)(2), any SD or MSP to which both § 23.600 and the Swiss law and regulations specified above are applicable would generally be deemed to be in compliance with § 23.600(c)(2) if that SD or MSP complies with Swiss law and regulations specified above, subject to compliance with the requirement that it produce quarterly risk exposure reports and provide such reports to its senior management, governing body, and the Commission in accordance with § 23.600(c)(2). The Commission notes that it generally expects reports furnished to the Commission by registrants to be in the English language.

2. Monitoring of Position Limits (§ 23.601)

Commission Requirement: Implementing section 4s(j)(1) of the CEA, Commission regulation 23.601 requires each SD or MSP to establish and enforce written policies and procedures that are reasonably designed

[38] Text of English translation by KPMG available at: *http://www.kpmg.com/CH/de/Library/Legislative-Texts/Documents/pub_20090101-BankO.pdf.*

[39] *See supra* note 31.

to monitor for, and prevent violations of, applicable position limits established by the Commission, a designated contract market ("DCM"), or a swap execution facility ("SEF").[40] The policies and procedures must include an early warning system and provide for escalation of violations to senior management (including the firm's governing body).

Regulatory Objective: Generally, position limits are implemented to ensure market integrity, fairness, orderliness, and accurate pricing in the commodity markets. Commission regulation 23.601 thus seeks to ensure that SDs and MSPs have established the necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by the Commission, a DCM, or a SEF. As part of its Risk Management Program, § 23.601 is intended to ensure that established position limits are not breached by the SD or MSP.

Comparable Swiss Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Switzerland are in full force and effect in Switzerland, and comparable to and as comprehensive as section 4s(j)(1) of the CEA and Commission regulation 23.601.

The applicant represented that Swiss law and regulations require banking entities under FINMA's supervision to comply with regulations in the jurisdictions in which they conduct business, which would include compliance with the position limit regimes imposed by the Commission, a DCM, or SEF, as applicable. Specifically, FINMA Circular 2008/24[41] requires banking entities whose compliance policies and procedures govern activities in multiple jurisdictions must ensure that such policies and procedures ensure compliance in each jurisdiction. Thus, activities of a Swiss banking entity that have an impact on United States territory must be in compliance with the Commission's position limit regime.

FINMA Newsletter 31 of December 13, 2011, Unauthorized Trading of Banks[42] and Swiss law address specific requirements relating to monitoring for and complying with applicable position limits. Pursuant to Swiss law and regulations, Swiss banks:

- Must manage for unauthorized trading and maintain oversight of trading activities and related risks, including compliance with applicable position limits; and
- Banking entities must devote adequate attention and management resources to identify, measure, and control compliance risks.

Commission Determination: The Commission finds that the Swiss law and regulations specified above are generally identical in intent to § 23.601 by requiring SDs and MSPs to establish necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by applicable laws and regulations, including those of the Commission, a DCM, or a SEF. Specifically, the Commission finds that the Swiss law and regulations specified above, comprehensively require SDs and MSPs to monitor for regulatory compliance with position limits set pursuant to applicable law and the responsibility of senior management (including the board of directors) for such compliance.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the compliance monitoring requirements of Swiss law and regulations, as specified above, are comparable to and as comprehensive as § 23.601. For the avoidance of doubt, the Commission notes that this determination may not be relied on to relieve an SD or MSP from its obligation to strictly comply with any applicable position limit established by the Commission, a DCM, or a SEF.

3. Diligent Supervision (§ 23.602)

Commission Requirement: Commission regulation 23.602 implements section 4s(h)(1)(B) of the CEA and requires each SD and MSP to establish a system to diligently supervise all activities relating to its business performed by its partners, members, officers, employees, and agents. The system must be reasonably designed to achieve compliance with the CEA and CFTC regulations. Commission regulation 23.602 requires that the supervisory system must specifically designate qualified persons with authority to carry out the supervisory responsibilities of the SD or MSP for all activities relating to its business as an SD or MSP.

Regulatory Objective: The Commission's diligent supervision rule seeks to ensure that SDs and MSPs strictly comply with the CEA and the Commission's rules. To this end, through § 23.602, the Commission seeks to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Comparable Swiss Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Switzerland are in full force and effect in Switzerland, and comparable to and as comprehensive as section 4s(h)(1)(B) of the CEA and Commission regulation 23.602.

- FINMA Circular 2008/24[43] requires segregation of duties and control activities. Management is required to ensure an appropriate segregation of duties and avoids assigning responsibilities which could lead to conflicting responsibilities or interests.
- Controlling activities are to be an integral part of all work processes, *e.g.*, process controls; results monitoring; and review of conduct of employees and organizational units where no quantitative results are observable.

As previously stated above, the applicant represents that Swiss law requires banking entities under FINMA's supervision to comply with regulations in the jurisdictions in which they conduct business, which would include compliance with the CEA and Commission regulations as applicable. Specifically, FINMA Circular 2008/24 requires banking entities whose compliance policies and procedures govern activities in multiple jurisdictions must ensure that such policies and procedures ensure compliance in each jurisdiction. Thus, activities of a Swiss banking entity that have an impact on United States territory must be in compliance with the CEA and Commission regulations.

Commission Determination: The Commission finds that the Swiss law and regulations specified above are generally identical in intent to § 23.602 because such standards seek to ensure that SDs and MSPs strictly comply with applicable law, which would include the CEA and the Commission's regulations. Through the Swiss laws and regulations specified above, Swiss laws and regulations seek to ensure that each SD and MSP not only establishes the

[40] The setting of position limits by the Commission, a DCM, or a SEF is subject to requirements under the CEA and Commission regulations other than § 23.601. The setting of position limits and compliance with such limits is not subject to the Commission's substituted compliance regime.

[42] Text of English Translation available at: *http://www.finma.ch/e/finma/publikationen/Documents/finma-mitteilung-31-2011-e.pdf.*

[43] *See supra* note 31.

necessary policies and procedures that would lead to compliance with applicable law, which would include the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the internal supervision requirements of Swiss law and regulations, as specified above, are comparable to and as comprehensive as § 23.602.

4. Business Continuity and Disaster Recovery (§ 23.603)

Commission Requirement: To ensure the proper functioning of the swaps markets and the prevention of systemic risk more generally, Commission regulation 23.603 requires each SD and MSP, as part of its risk management program, to establish a business continuity and disaster recovery plan that includes procedures for, and the maintenance of, back-up facilities, systems, infrastructure, personnel, and other resources to achieve the timely recovery of data and documentation and to resume operations generally within the next business day after the disruption.

Regulatory Objective: Commission regulation 23.603 is intended to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, this requirement seeks to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan within one business day, if necessary.

Comparable Swiss Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Switzerland are in full force and effect in Switzerland, and comparable to and as comprehensive as Commission regulation 23.603.

- Annex 1 of FINMA's Circular on Operational Risk[44] requires banks to have contingency or business continuity plans to ensure their ability to operate under exceptional circumstances and to limit consequences of severe business disruptions.
- FINMA Circular 2008/10 of November 20, 2008, Self-regulation as a minimum standard,[45] and sections 5.4.1 (Business Impact Analysis) and 5.4.2 (Business Continuity Strategy) of the Swiss Bankers' Association Recommendations for Business Continuity Management,[46] establish minimum business continuity management standards for banks and securities dealers in Switzerland.

Commission Determination: The Commission finds that the Swiss law and regulations specified above are generally identical in intent to § 23.603 because such standards seek to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, the Commission finds that the Swiss laws and regulations specified above seek to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan in a timely manner.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the business continuity and disaster recovery requirements of Swiss law and regulations, as specified above, are comparable to and as comprehensive as § 23.603.

5. Conflicts of Interest (§ 23.605)

Commission Requirement: Section 4s(j)(5) of the CEA and Commission regulation 23.605(c) generally require each SD or MSP to establish structural and institutional safeguards to ensure that the activities of any person within the firm relating to research or analysis of the price or market for any commodity or swap are separated by appropriate informational partitions within the firm from the review, pressure, or oversight of persons whose involvement in pricing, trading, or clearing activities might potentially bias their judgment or supervision.

In addition, section 4s(j)(5) of the CEA and Commission regulation 23.605(d)(1) generally prohibits an SD or MSP from directly or indirectly interfering with or attempting to influence the decision of any clearing unit of any affiliated clearing member of a DCO to provide clearing services and activities to a particular customer, including:

- Whether to offer clearing services to a particular customer;
- Whether to accept a particular customer for clearing derivatives;
- Whether to submit a customer's transaction to a particular DCO;
- Whether to set or adjust risk tolerance levels for a particular customer; or
- Whether to set a customer's fees based on criteria other than those generally available and applicable to other customers.

Commission regulation 23.605(d)(2) generally requires each SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of any affiliated clearing member of a DCO to reasonably ensure compliance with the Act and the prohibitions set forth in § 23.605(d)(1) outlined above.

The Commission observes that § 23.605(d) works in tandem with Commission regulation 1.71, which requires futures commission merchants ("FCMs") that are clearing members of a DCO and affiliated with an SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of the FCM to reasonably ensure compliance with the Act and the prohibitions set forth in § 1.71(d)(1), which are the same as the prohibitions set forth in § 23.605(d)(1) outlined above.

Finally, § 23.605(e) requires that each SD or MSP have policies and procedures that mandate the disclosure to counterparties of material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a swap execution facility or DCM or to clear a derivative through a DCO.

Regulatory Objective: Commission regulation 23.605(c) seeks to ensure that research provided to the general public by an SD or MSP is unbiased and free from the influence of the interests of an SD or MSP arising from the SD's or MSP's trading business.

In addition, the § 23.605(d) (working in tandem with § 1.71) seeks to ensure open access to the clearing of swaps by requiring that access to and the provision of clearing services provided by an affiliate of an SD or MSP are not influenced by the interests of an SD's or MSP's trading business.

Finally, § 23.605(e) seeks to ensure equal access to trading venues and clearinghouses, as well as orderly and fair markets, by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Comparable Swiss Law and Regulations: The applicant has represented to the Commission that the

[44] Text of English translation by KPMG available at: *http://www.kpmg.com/CH/en/Library/Legislative-Texts/Documents/pub-20130408-finma-circular-***8-21-en.pdf.*

[45] Text of English translation available at: *http://finma.ch/e/regulierung/Documents/finma-rs-2008-10-e.pdf.*

[46] Text of English translation available at: *http://shop.sba.ch/11107_e.pdf.*

following provisions of law and regulations applicable in Switzerland are in full force and effect in Switzerland, and comparable to and as comprehensive as Commission regulation 23.605(c).

The FINMA Circular on market conduct rules [47] and the FINMA Circular on Self-regulation recognize the Swiss Bankers' Association Directives on the Independence of Financial Research [48] as minimum standards. These circulars require information partitions where necessary to prevent conflicts of interest. In particular, they require the research unit to be independent from business trading units. Adherence to information partitions is to be monitored and is a designated compliance function, while the ultimate responsibility for handling confidential price-sensitive information and conflicts of interest lies with executive management.

More generally, imposing restrictions on particular customers would contradict the open access principles outlined in art. 33 of the Swiss National Bank Ordinance. In addition, under Swiss law, a bank must comply with the Swiss competition laws, including the Federal Act on Cartels and other Restraints on Competition. An activity that violates the provision of these laws is a violation of these laws regardless of where the putative activity took place.

The applicant has represented to the Commission that FINMA, in the process of its oversight and enforcement of the foregoing Swiss standards, would require any SD or MSP subject to such standards to resolve or mitigate conflicts of interests in the provision of clearing services by a clearing member of a DCO that is an affiliate of the SD or MSP, or the decision of a counterparty to execute a derivative on a SEF or DCM, or clear a derivative through a DCO, through appropriate information firewalls and disclosures.

Commission Determination: The Commission finds that the Swiss law and regulations specified above with respect to conflicts of interest that may arise in producing or distributing research are generally identical in intent to § 23.605(c) because such standards seek to ensure that research provided to the general public by an SD is unbiased and free from the influence of the interests of an SD arising from the SD's trading business.

With respect to conflicts of interest that may arise in the provision of clearing services by an affiliate of an SD or MSP, the Commission further finds that although the general conflicts of interest prevention requirements under the Swiss standards specified above do not require with specificity that access to and the provision of clearing services provided by an affiliate of an SD or MSP not be improperly influenced by the interests of an SD's or MSP's trading business, such general requirements would require prevention and remediation of such improper influence when recognized or discovered. Thus such standards would ensure open access to clearing.

Finally, although not as specific as the requirements of § 23.605(e) (Undue influence on counterparties), the Commission finds that the general disclosure requirements of the Swiss standards specified above would ensure equal access to trading venues and clearinghouses by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

6. Availability of Information for Disclosure and Inspection (§ 23.606)

Commission Requirement: Commission regulation 23.606 implements sections 4s(j)(3) and (4) of the CEA, and requires each SD and MSP to disclose to the Commission, and an SD's or MSP's U.S. prudential regulator (if any) comprehensive information about its swap activities, and to establish and maintain reliable internal data capture, processing, storage, and other operational systems sufficient to capture, process, record, store, and produce all information necessary to satisfy its duties under the CEA and Commission regulations. Such systems must be designed to provide such information to the Commission and an SD's or MSP's U.S. prudential regulator within the time frames set forth in the CEA and Commission regulations and upon request.

Regulatory Objective: Commission regulation 23.606 seeks to ensure that each SD and MSP captures and maintains comprehensive information about their swap activities, and is able to retrieve and disclose such information to the Commission and its U.S. prudential regulator, if any, as necessary for compliance with the CEA and the Commission's regulations and for purposes of Commission oversight, as well as oversight by the SD's or MSP's U.S. prudential regulator, if any.

The Commission observes that it would be impossible to meet the regulatory objective of § 23.606 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.606 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Swiss Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Switzerland are in full force and effect in Switzerland, and comparable to and as comprehensive as Commission regulation 23.606.

The Swiss Code of Obligations,[49] Ordinance of the Swiss Federal Council on Business Record Keeping,[50] Swiss Financial Markets Supervisory Authority Act,[51] Swiss National Banking Ordinance,[52] National Bank Act,[53] and FINMA Circulars impose comprehensive requirements with respect to data retention and storage, and the availability of such data to regulatory authorities. These requirements apply to all of a banking entity's business, including its swaps business.

Collectively, these Swiss laws and regulations require a firm to maintain swaps data and related books and records in a systematic, logical, and chronological format so that the data cannot be damaged, altered, or deleted. Further, a firm is required to maintain account records, accounting records, and business correspondence for ten years. These records must contain all

[47] Text of English translation available at: *http://www.finma.ch/e/regulierung/Documents/finma-rs-2008-38-e.pdf* (stating that analysis or research departments are to be organized independently and be segregated as separate areas of confidentiality).

[52] Text of English translation available at: *http://www.admin.ch/opc/en/classified-compilation/20040259/201307010000/951.131.pdf* (requiring banks to report OTC derivatives information biannually to the Bank of Internal Settlement).

[53] Text of English translation available at: *http://www.admin.ch/opc/en/classified-compilation/20021117/201203010000/951.11.pdf* (requiring the Swiss National Bank, pursuant to art. 14, to monitor financial market developments and requiring banks to provide statistical data about their activities to the Swiss National Bank).

necessary information to establish, review, and reconstruct the financial situation of the firm by FINMA, regulatory authorities, audit firms, and persons or companies legally authorized to review such records.

Commission Determination: The Commission finds that the Swiss law and regulations specified above are generally identical in intent to § 23.606 because such standards seek to ensure that each SD and MSP captures and stores comprehensive information about their swap activities, and are able to retrieve and disclose such information as necessary for compliance with applicable law and for purposes of regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements of Swiss law and regulations with respect to the availability of information for inspection and disclosure, as specified above, are comparable to, and as comprehensive as, § 23.606, with the exception of § 23.606(a)(2) concerning the requirement that an SD or MSP make information required by § 23.606(a)(1) available promptly upon request to Commission staff and the staff of an applicable prudential regulator. The applicant has not submitted any provision of law or regulations applicable in Switzerland, upon which the Commission could make a finding that SDs and MSPs would be required to retrieve and disclose comprehensive information about their swap activities to the Commission or any U.S. prudential regulator as necessary for compliance with the CEA and Commission regulations, and for purposes of Commission oversight and the oversight of any U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of Swiss law and regulations are comparable to and as comprehensive as § 23.606(a)(2), any SD or MSP to which both § 23.606 and the Swiss standards specified above are applicable would generally be deemed to be in compliance with § 23.606(a)(2) if that SD or MSP complies with the Swiss standards specified above, subject to compliance with the requirement that it produce information to Commission staff and the staff of an applicable U.S. prudential regulator in accordance with § 23.606(a)(2).

C. Swap Data Recordkeeping (§§ 23.201 and 23.203)

Commission Requirement: Sections 4s(f)(1)(B) and 4s(g)(1) of the CEA, and Commission regulation 23.201 generally require SDs and MSPs to retain records of each transaction, each position held, general business records (including records related to complaints and sales and marketing materials), records related to governance, financial records, records of data reported to swap data repositories ("SDRs"), and records of real-time reporting data along with a record of the date and time the SD or MSP made such reports. Transaction records must be kept in a form and manner identifiable and searchable by transaction and counterparty.

Commission regulation 23.203, requires SDs and MSPs to maintain records of a swap transaction until the termination, maturity, expiration, transfer, assignment, or novation date of the transaction, and for a period of five years after such date. Records must be "readily accessible" for the first 2 years of the 5 year retention period (consistent with § 1.31).

The Commission notes that the comparability determination below with respect to §§ 23.201 and 23.203 encompasses both swap data recordkeeping generally and swap data recordkeeping relating to complaints and marketing and sales materials in accordance with § 23.201(b)(3) and (4).[54]

Regulatory Objective: Through the Commission's regulations requiring SDs and MSPs to keep comprehensive records of their swap transactions and related data, the Commission seeks to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

The Commission's regulations require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

By requiring comprehensive records of swap data, the Commission seeks to ensure that SDs and MSPs employ effective risk management, and strictly comply with Commission regulations. Further, such records facilitate effective regulatory oversight.

The Commission observes that it would be impossible to meet the regulatory objective of §§ 23.201 and 23.203 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.203 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Swiss Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in Switzerland are in full force and effect Switzerland, and comparable to and as comprehensive as sections 4s(f)(1)(B) and 4s(g)(1) of the CEA and §§ 23.201 and 23.203.

Under Swiss law and FINMA Circulars, a banking entity is subject to extensive requirements regarding accounting records, which cover records of transactions in all areas of the bank's business, including its swaps business. Under the Swiss Code of Obligations,[55] for example:

- According to art. 957, a Swiss firm has to properly capture and maintain its books necessary to provide a fair view of its kind and size of business. Accounting records and business correspondence can be maintained in written or electronic format, provided the format ensures that the records adequately reflect business transactions;
- According to art. 962, accounts, accounting records, and business correspondence have to be retained for ten years;
- Pursuant to art. 713, all deliberations and decisions by the supervisory body have to be recorded in a protocol, signed by the Chairman and the secretary; and
- Pursuant to art. 747, the accounting records of a dissolved company are kept for ten years at a location designated by the liquidators or, if the liquidators cannot reach agreement, by the commercial registry.

Commission Determination: The Commission finds that the Swiss law and regulations specified above are generally identical in intent to §§ 23.201 and 23.202 because such standards seek to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

In addition, the Commission finds that the Swiss laws and regulations specified above require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

[54] *See* the Guidance for a discussion of the availability of substituted compliance with respect to swap data recordkeeping, 78 FR 45332–33.

[55] *See supra* note 51.

Finally, the Commission finds that Swiss laws and regulations specified above, by requiring comprehensive records of swap data, seek to ensure that SDs and MSPs employ effective risk management, seek to ensure that SDs and MSPs strictly comply with applicable regulatory requirements (including the CEA and Commission regulations), and that such records facilitate effective regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements of Swiss law and regulations with respect to the swap data recordkeeping, as specified above, are comparable to, and as comprehensive as, §§ 23.201 and 23.203, with the exception of § 23.203(b)(2) concerning the requirement that an SD or MSPs make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator. The applicant has not submitted any provision of law or regulations applicable in Switzerland, upon which the Commission could make a finding that SDs and MSPs would be required to make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of Swiss law and regulations are comparable to and as comprehensive as § 23.203(b)(2), any SD or MSP to which both § 23.203 and the Swiss law and regulations specified above are applicable would generally be deemed to be in compliance with § 23.203(b)(2) if that SD or MSP complies with the Swiss law and regulations specified above, subject to compliance with the requirement that it make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator in accordance with § 23.203(b)(2).

Issued in Washington, DC on December 20, 2013, by the Commission.

Christopher J. Kirkpatrick,

Deputy Secretary of the Commission.

Appendices to Comparability Determination for Switzerland: Certain Entity-Level Requirements

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Chilton and Wetjen voted in the affirmative. Commissioner O'Malia voted in the negative.

Appendix 2—Joint Statement of Chairman Gary Gensler and Commissioners Bart Chilton and Mark Wetjen

We support the Commission's approval of broad comparability determinations that will be used for substituted compliance purposes. For each of the six jurisdictions that has registered swap dealers, we carefully reviewed each regulatory provision of the foreign jurisdictions submitted to us and compared the provision's intended outcome to the Commission's own regulatory objectives. The resulting comparability determinations for entity-level requirements permit non-U.S. swap dealers to comply with regulations in their home jurisdiction as a substitute for compliance with the relevant Commission regulations.

These determinations reflect the Commission's commitment to coordinating our efforts to bring transparency to the swaps market and reduce its risks to the public. The comparability findings for the entity-level requirements are a testament to the comparability of these regulatory systems as we work together in building a strong international regulatory framework.

In addition, we are pleased that the Commission was able to find comparability with respect to swap-specific transaction-level requirements in the European Union and Japan.

The Commission attained this benchmark by working cooperatively with authorities in Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland to reach mutual agreement. The Commission looks forward to continuing to collaborate with both foreign authorities and market participants to build on this progress in the months and years ahead.

Appendix 3—Statement of Dissent by Commissioner Scott D. O'Malia

I respectfully dissent from the Commodity Futures Trading Commission's ("Commission") approval of the Notices of Comparability Determinations for Certain Requirements under the laws of Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland (collectively, "Notices"). While I support the narrow comparability determinations that the Commission has made, moving forward, the Commission must collaborate with foreign regulators to harmonize our respective regimes consistent with the G–20 reforms.

However, I cannot support the Notices because they: (1) Are based on the legally unsound cross-border guidance ("Guidance");[1] (2) are the result of a flawed substituted compliance process; and (3) fail to provide a clear path moving forward. If the Commission's objective for substituted compliance is to develop a narrow rule-by-rule approach that leaves unanswered major regulatory gaps between our regulatory framework and foreign jurisdictions, then I believe that the Commission has successfully achieved its goal today.

Determinations Based on Legally Unsound Guidance

As I previously stated in my dissent, the Guidance fails to articulate a valid statutory foundation for its overbroad scope and inconsistently applies the statute to different activities.[2] Section 2(i) of the Commodity Exchange Act ("CEA") states that the Commission does not have jurisdiction over foreign activities unless "those activities have a direct and significant connection with activities in, or effect on, commerce of the United States * * *."[3] However, the Commission never properly articulated how and when this limiting standard on the Commission's extraterritorial reach is met, which would trigger the application of Title VII of the Dodd-Frank Act[4] and any Commission regulations promulgated thereunder to swap activities that are outside of the United States. Given this statutorily unsound interpretation of the Commission's extraterritorial authority, the Commission often applies CEA section 2(i) inconsistently and arbitrarily to foreign activities.

Accordingly, because the Commission is relying on the legally deficient Guidance to make its substituted compliance determinations, and for the reasons discussed below, I cannot support the Notices. The Commission should have collaborated with foreign regulators to agree on and implement a workable regime of substituted compliance, and then should have made determinations pursuant to that regime.

Flawed Substituted Compliance Process

Substituted compliance should not be a case of picking a set of foreign rules identical to our rules, determining them to be "comparable," but then making no determination regarding rules that require extensive gap analysis to assess to what extent each jurisdiction is, or is not, comparable based on overall outcomes of the regulatory regimes. While I support the narrow comparability determinations that the Commission has made, I am concerned that in a rush to provide some relief, the Commission has made substituted compliance determinations that only afford narrow relief and fail to address major regulatory gaps between our domestic regulatory framework and foreign jurisdictions. I will address a few examples below.

First, earlier this year, the OTC Derivatives Regulators Group ("ODRG") agreed to a number of substantive understandings to improve the cross-border implementation of over-the-counter derivatives reforms.[5] The ODRG specifically agreed that a flexible, outcomes-based approach, based on a broad

[1] Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations, 78 FR 45292 (Jul. 26, 2013).

[2] *http://www.cftc.gov/PressRoom/SpeechesTestimony/omaliastatement071213b.*

[3] CEA section 2(i); 7 U.S.C. 2(i).

[4] Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376 (2010).

[5] *http://www.cftc.gov/PressRoom/PressReleases/pr6678-13.*

category-by-category basis, should form the basis of comparability determinations.[6]

However, instead of following this approach, the Commission has made its comparability determinations on a rule-by-rule basis. For example, in Japan's Comparability Determination for Transaction-Level Requirements, the Commission has made a positive comparability determination for some of the detailed requirements under the swap trading relationship documentation provisions, but not for other requirements.[7] This detailed approach clearly contravenes the ODRG's understanding.

Second, in several areas, the Commission has declined to consider a request for a comparability determination, and has also failed to provide an analysis regarding the extent to which the other jurisdiction is, or is not, comparable. For example, the Commission has declined to address or provide any clarity regarding the European Union's regulatory data reporting determination, even though the European Union's reporting regime is set to begin on February 12, 2014. Although the Commission has provided some limited relief with respect to regulatory data reporting, the lack of clarity creates unnecessary uncertainty, especially when the European Union's reporting regime is set to begin in less than two months.

Similarly, Japan receives no consideration for its mandatory clearing requirement, even though the Commission considers Japan's legal framework to be comparable to the U.S. framework. While the Commission has declined to provide even a partial comparability determination, at least in this instance the Commission has provided a reason: the differences in the scope of entities and products subject to the clearing requirement.[8] Such treatment creates uncertainty and is contrary to increased global harmonization efforts.

Third, in the Commission's rush to meet the artificial deadline of December 21, 2013, as established in the Exemptive Order Regarding Compliance with Certain Swap Regulations ("Exemptive Order"),[9] the Commission failed to complete an important piece of the cross-border regime, namely, supervisory memoranda of understanding ("MOUs") between the Commission and fellow regulators.

I have previously stated that these MOUs, if done right, can be a key part of the global harmonization effort because they provide mutually agreed-upon solutions for differences in regulatory regimes.[10] Accordingly, I stated that the Commission should be able to review MOUs alongside the respective comparability determinations and vote on them at the same time. Without these MOUs, our fellow regulators are left wondering whether and how any differences, such as direct access to books and records, will be resolved.

Finally, as I have consistently maintained, the substituted compliance process should allow other regulatory bodies to engage with the *full* Commission.[11] While I am pleased that the Notices are being voted on by the Commission, the full Commission only gained access to the comment letters from foreign regulators on the Commission's comparability determination draft proposals a few days ago. This is hardly a transparent process.

Unclear Path Forward

Looking forward to next steps, the Commission must provide answers to several outstanding questions regarding these comparability determinations. In doing so, the Commission must collaborate with foreign regulators to increase global harmonization.

First, there is uncertainty surrounding the timing and outcome of the MOUs. Critical questions regarding information sharing, cooperation, supervision, and enforcement will remain unanswered until the Commission and our fellow regulators execute these MOUs.

Second, the Commission has issued time-limited no-action relief for the swap data repository reporting requirements. These comparability determinations will be done as separate notices. However, the timing and process for these determinations remain uncertain.

Third, the Commission has failed to provide clarity on the process for addressing the comparability determinations that it declined to undertake at this time. The Notices only state that the Commission may address these requests in a separate notice at a later date given further developments in the law and regulations of other jurisdictions. To promote certainty in the financial markets, the Commission must provide a clear path forward for market participants and foreign regulators.

The following steps would be a better approach: (1) The Commission should extend the Exemptive Order to allow foreign regulators to further implement their regulatory regimes and coordinate with them to implement a harmonized substituted compliance process; (2) the Commission should implement a flexible, outcomes-based approach to the substituted compliance process and apply it similarly to all jurisdictions; and (3) the Commission should work closely with our fellow regulators to expeditiously implement MOUs that resolve regulatory differences and address regulatory oversight issues.

Conclusion

While I support the narrow comparability determinations that the Commission has made, it was my hope that the Commission would work with foreign regulators to implement a substituted compliance process that would increase the global harmonization effort. I am disappointed that the Commission has failed to implement such a process.

I do believe that in the longer term, the swaps regulations of the major jurisdictions will converge. At this time, however, the Commission's comparability determinations have done little to alleviate the burden of regulatory uncertainty and duplicative compliance with both U.S. and foreign regulations.

The G–20 process delineated and put in place the swaps market reforms in G–20 member nations. It is then no surprise that the Commission must learn to coordinate with foreign regulators to minimize confusion and disruption in bringing much needed clarity to the swaps market. For all these shortcomings, I respectfully dissent from the Commission's approval of the Notices.

COMMODITY FUTURES TRADING COMMISSION

Comparability Determination for Japan: Certain Entity-Level Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of comparability determination for certain requirements under the laws of Japan.

SUMMARY: The following is the analysis and determination of the Commodity Futures Trading Commission ("Commission") regarding certain parts of a joint request by the Bank of Tokyo-Mitsubishi UFJ, Ltd ("BTMU"), Goldman Sachs Japan Co., Ltd., Merrill Lynch Japan Securities Co., Ltd., and Morgan Stanley MUFG Securities Co., Ltd. that the Commission determine that laws and regulations applicable in Japan provide a sufficient basis for an affirmative finding of comparability with respect to the following regulatory obligations applicable to swap dealers ("SDs") and major swap participants ("MSPs") registered with the Commission: (i) Chief compliance officer; (ii) risk management; and (iii) swap data recordkeeping (collectively, the "Internal Business Conduct Requirements").

DATES: *Effective Date:* This determination will become effective immediately upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary Barnett, Director, 202 418–5977, *gbarnett@cftc.gov*, Frank Fisanich, Chief Counsel, 202–418–5949, ffisanich@cftc.gov, and Jason Shafer, Special Counsel, 202–418–5097, jshafer@cftc.gov, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 26, 2013, the Commission published in the **Federal Register** its "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" (the "Guidance").[1] In the Guidance, the Commission set forth its interpretation of the manner in which it believes that section 2(i) of the Commodity Exchange Act ("CEA") applies Title VII's swap provisions to activities outside the U.S. and informed the public of some of the policies that it expects to follow, generally speaking, in applying Title VII and certain Commission regulations in contexts covered by section 2(i). Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations promulgated thereunder.

In addition to the Guidance, on July 22, 2013, the Commission issued the Exemptive Order Regarding Compliance with Certain Swap Regulations (the "Exemptive Order").[2] Among other things, the Exemptive Order provided time for the Commission to consider substituted compliance with respect to six jurisdictions where non-U.S. SDs are currently organized. In this regard, the Exemptive Order generally provided non-U.S. SDs and MSPs in the six jurisdictions with conditional relief from certain requirements of Commission regulations (those referred to as "Entity-Level Requirements" in the Guidance) until the earlier of December 21, 2013, or 30 days following the issuance of a substituted compliance determination.[3]

On June 24, 2013, BTMU submitted a request that the Commission determine that laws and regulations applicable in Japan provide a sufficient basis for an affirmative finding of comparability with respect to certain Entity-Level Requirements, including the Internal Business Conduct Requirements.[4] BTMU provided Commission staff with a supplement on October 8, 2013. On October 29, 2013, the application was further supplemented with corrections and additional materials. On November 12, 2013, Goldman Sachs Japan Co., Ltd., Merrill Lynch Japan Securities Co., Ltd., and Morgan Stanley MUFG Securities Co., Ltd. requested that they be permitted to rely upon BTMU's submission as the basis for their request for a substituted compliance determination (BTMU, Goldman Sachs Japan Co., Ltd., Merrill Lynch Japan Securities Co., Ltd., and Morgan Stanley MUFG Securities Co., Ltd., are referred to herein as, collectively, the "applicants"). The following is the Commission's analysis and determination regarding the Internal Business Conduct Requirements, as detailed below.[5]

II. Background

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act[6] ("Dodd-Frank Act" or "Dodd-Frank"), which, in Title VII, established a new regulatory framework for swaps.

Section 722(d) of the Dodd-Frank Act amended the CEA by adding section 2(i), which provides that the swap provisions of the CEA (including any CEA rules or regulations) apply to cross-border activities when certain conditions are met, namely, when such activities have a "direct and significant connection with activities in, or effect on, commerce of the United States" or when they contravene Commission rules or regulations as are necessary or appropriate to prevent evasion of the swap provisions of the CEA enacted under Title VII of the Dodd-Frank Act.[7] In the three years since its enactment, the Commission has finalized 68 rules and orders to implement Title VII of the Dodd-Frank Act. The finalized rules include those promulgated under section 4s of the CEA, which address registration of SDs and MSPs and other substantive requirements applicable to SDs and MSPs. With few exceptions, the delayed compliance dates for the Commission's regulations implementing such section 4s requirements applicable to SDs and MSPs have passed and new SDs and MSPs are now required to be in full compliance with such regulations upon registration with the Commission.[8] Notably, the requirements under Title VII of the Dodd-Frank Act related to SDs and MSPs by their terms apply to all registered SDs and MSPs, irrespective of where they are located, albeit subject to the limitations of CEA section 2(i).

To provide guidance as to the Commission's views regarding the scope of the cross-border application of Title VII of the Dodd-Frank Act, the Commission set forth in the Guidance its interpretation of the manner in which it believes that Title VII's swap provisions apply to activities outside the U.S. pursuant to section 2(i) of the CEA. Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations. With respect to the standards forming the basis for any determination of comparability ("comparability determination" or "comparability finding"), the Commission stated:

> In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the

[1] 78 FR 45292 (July 26, 2013). The Commission originally published proposed and further proposed guidance on July 12, 2012 and January 7, 2013, respectively. *See* Cross-Border Application of Certain Swaps Provisions of the Commodity Exchange Act, 77 FR 41214 (July 12, 2012) and Further Proposed Guidance Regarding Compliance with Certain Swap Regulations, 78 FR 909 (Jan. 7, 2013).

[2] 78 FR 43785 (July 22, 2013).

[3] The Entity-Level Requirements under the Exemptive Order consist of 17 CFR 1.31, 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, 23.606, 23.608, 23.609, and parts 45 and 46 of the Commission's regulations.

[4] For purposes of this notice, the Internal Business Conduct Requirements consist of 17 CFR 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606. The applicants subsequently submitted a separate application for the applicable Transaction-Level Requirements on September 20, 2013. This notice addresses only the Entity-Level Requirements.

[5] This notice does not address swap data repository reporting ("SDR Reporting"). The Commission may provide a comparability determination with respect to the SDR Reporting requirement in a separate notice.

[6] Public Law 111–203, 124 Stat. 1376 (2010).

[7] 7 U.S.C. 2(i).

[8] The compliance dates are summarized on the Compliance Dates page of the Commission's Web site. (http://www.cftc.gov/LawRegulation/DoddFrankAct/ComplianceDates/index.htm.)

applicable requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including but not limited to, the comprehensiveness of those requirement(s), the scope and objectives of the relevant regulatory requirement(s), the comprehensiveness of the foreign regulator's supervisory compliance program, as well as the home jurisdiction's authority to support and enforce its oversight of the registrant. In this context, comparable does not necessarily mean identical. Rather, the Commission would evaluate whether the home jurisdiction's regulatory requirement is comparable to and as comprehensive as the corresponding U.S. regulatory requirement(s).[9]

Upon a comparability finding, consistent with CEA section 2(i) and comity principles, the Commission's policy generally is that eligible entities may comply with a substituted compliance regime, subject to any conditions the Commission places on its finding, and subject to the Commission's retention of its examination authority and its enforcement authority.[10]

In this regard, the Commission notes that a comparability determination cannot be premised on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction, but rather on whether information relevant to the Commission's oversight of an SD or MSP would be directly available to the Commission and any U.S. prudential regulator of the SD or MSP.[11] The Commission's direct access to the books and records required to be maintained by an SD or MSP registered with the Commission is a core requirement of the CEA[12] and the Commission's regulations,[13] and is a condition to registration.[14]

III. Regulation of SDs and MSPs in Japan

As represented to the Commission by the applicants, swap activities in Japan may be governed by the Banking Act of Japan, No. 59 of 1981 ("Banking Act"), covering banks and bank holding companies, and the Financial Instruments and Exchange Act, No. 25 of 1948 ("FIEA"), covering, among others, Financial Instrument Business Operators ("FIBOs") and Registered Financial Institutions ("RFIs"). The Japanese Prime Minister delegated broad authority to implement these laws to the Japanese Financial Services Agency ("JFSA"). Pursuant to this authority, the JFSA has promulgated the Order for Enforcement,[15] Cabinet Office Ordinance, [16] Supervisory Guidelines[17] and Inspection Manuals.[18] The Securities and Exchange Surveillance Commission ("SESC") is within the JFS and has promulgated, among other things, the Inspection Manual for FIBOs.

These requirements supplement the requirements of the Banking Act and FIEA with a more proscriptive direction as to the particular structural features or responsibilities that internal compliance functions must maintain.

In general, banks are subject to the Banking Act, relevant laws and regulations for banks, Supervisory Guidelines for banks, and Inspection Manual for banks, while FIBOs are subject to the FIEA, relevant laws and regulations for FIBOs, Supervisory Guidelines for FIBOs, and Inspection Manual for FIBOs.

Pursuant to Article 29 of the FIEA, any person that engages in trade activities that constitute "Financial Instruments Business"—which, among other things, includes over-the-counter transactions in derivatives ("OTC derivatives") or intermediary, brokerage (excluding brokerage for clearing of securities) or agency services therefor[19]—must register under the FIEA as a FIBO. Banks that conduct specified activities in the course of trade, including OTC derivatives must register under the FIEA as RFIs pursuant to Article 33–2 of the FIEA. Banks registered as RFIs are required to comply with relevant laws and regulations for FIBOs regarding specified activities. Failure to comply with any relevant laws and regulations, Supervisory Guidelines or Inspection Manuals would subject the applicant to potential sanctions or corrective measures.

The applicants are each registered in Japan as RFIs or FIBOs under the supervision of the JFSA. In addition, each applicant is a member of several self-regulatory organizations, including the Japanese Securities Dealers Association ("JSDA"). The JSDA is a "Financial Instruments Firms Association" authorized under FIEA by the Prime Minister of Japan.[20]

IV. Comparable and Comprehensiveness Standard

The Commission's comparability analysis will be based on a comparison of specific foreign requirements against the specific related CEA provisions and Commission regulations as categorized and described in the Guidance. As explained in the Guidance, within the framework of CEA section 2(i) and principles of international comity, the Commission may make a comparability determination on a requirement-by-requirement basis, rather than on the basis of the foreign regime as a whole.[21] In making its comparability determinations, the Commission may include conditions that take into account timing and other issues related

---

[9] 78 FR 45342–45.

[10] *See* the Guidance, 78 FR 45342–44.

[11] Under §§ 23.203 and 23.606, all records required by the CEA and the Commission's regulations to be maintained by a registered SD or MSP shall be maintained in accordance with Commission regulation 1.31 and shall be open for inspection by representatives of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

In its Final Exemptive Order Regarding Compliance with Certain Swap Regulations, 78 FR 858 (Jan. 7, 2013), the Commission noted that an applicant for registration as an SD or MSP must file a Form 7–R with the National Futures Association and that Form 7–R was being modified at that time to address existing blocking, privacy, or secrecy laws of foreign jurisdictions that applied to the books and records of SDs and MSPs acting in those jurisdictions. *See* id. at 871–72 n. 107. The modifications to Form 7–R were a temporary measure intended to allow SDs and MSPs to apply for registration in a timely manner in recognition of the existence of the blocking, privacy, and secrecy laws. In the Guidance, the Commission clarified that the change to Form 7–R impacts the registration application only and does not modify the Commission's authority under the CEA and its regulations to access records held by registered SDs and MSPs. Commission access to a registrant's books and records is a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto. The Commission has maintained an ongoing dialogue on a bilateral and multilateral basis with foreign regulators and with registrants to address books and records access issues and may consider appropriate measures where requested to do so.

[12] *See e.g.*, sections 4s(f)(1)(C), 4s(j)(3) and (4) of the CEA.

[13] *See e.g.*, §§ 23.203(b) and 23.606.

[14] *See supra* note 10.

[15] Order for Enforcement of the Banking Act and Order for Enforcement of the Financial Instruments and Exchange Act.

[16] Cabinet Office Ordinance on Financial Instruments Business ("FIB Ordinance") and Cabinet Office Ordinance on Regulation of OTC Derivatives Transaction.

[17] Comprehensive Guideline for Supervision of Major Banks, etc.("Supervisory Guideline for banks") and Comprehensive Guideline for Supervision of Financial Instruments Business Operators, etc.("Supervisory Guideline for FIBOs").

[18] Inspection Manual for Deposit Taking Institutions ("Inspection Manual for banks"), consisting of the Checklist for Business Management (Governance), Checklist for Legal Compliance, Checklist for Customer Protection Management, Checklist for Credit Risk Management, Checklist for Market Risk Management, Checklist for Liquidity Risk Management, Checklist for Operational Risk Management, etc.

[19] *See* Article 2(8)(iv) of the FIEA.

[20] Because the applicants' request and the Commissions determinations herein are based on the comparability of Japanese requirements applicable to banks, FIBOs, and RFIs, an SD or MSP that is not a bank, FIBO, or RFI, or is otherwise not subject to the requirements applicable to banks, FIBOs, and RFIs upon which the Commission bases its determinations, may not be able to rely on the Commission's comparability determinations herein.

[21] 78 FR 45343.

to coordinating the implementation of reform efforts across jurisdictions.[22]

In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the corollary requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including, but not limited to:

- The comprehensiveness of those requirement(s),
- The scope and objectives of the relevant regulatory requirement(s);
- The comprehensiveness of the foreign regulator's supervisory compliance program, and
- The home jurisdiction's authority to support and enforce its oversight of the registrant.[23]

In making a comparability determination, the Commission takes an "outcome-based" approach. An "outcome-based" approach means that when evaluating whether a foreign jurisdiction's regulatory requirements are comparable to, and as comprehensive as, the corollary areas of the CEA and Commission regulations, the Commission ultimately focuses on regulatory outcomes (*i.e.,* the home jurisdiction's requirements do not have to be identical).[24] This approach recognizes that foreign regulatory systems differ and their approaches vary and may differ from how the Commission chose to address an issue, but that the foreign jurisdiction's regulatory requirements nonetheless achieve the regulatory outcome sought to be achieved by a certain provision of the CEA or Commission regulation.

In doing its comparability analysis the Commission may determine that no comparability determination can be made[25] and that the non-U.S. SD or non-U.S. MSP, U.S. bank that is an SD or MSP with respect to its foreign branches, or non-registrant, to the extent applicable under the Guidance, may be required to comply with the CEA and Commission regulations.

The starting point in the Commission's analysis is a consideration of the regulatory objectives of the foreign jurisdiction's regulation of swaps and swap market participants. As stated in the Guidance, jurisdictions may not have swap specific regulations in some areas, and instead have regulatory or supervisory regimes that achieve comparable and comprehensive regulation to the Dodd-Frank Act requirements, but on a more general, entity-wide, or prudential, basis.[26] In addition, portions of a foreign regulatory regime may have similar regulatory objectives, but the means by which these objectives are achieved with respect to swaps market activities may not be clearly defined, or may not expressly include specific regulatory elements that the Commission concludes are critical to achieving the regulatory objectives or outcomes required under the CEA and the Commission's regulations. In these circumstances, the Commission will work with the regulators and registrants in these jurisdictions to consider alternative approaches that may result in a determination that substituted compliance applies.[27]

Finally, the Commission will generally rely on an applicant's description of the laws and regulations of the foreign jurisdiction in making its comparability determination. The Commission considers an application to be a representation by the applicant that the laws and regulations submitted are in full force and effect, that the description of such laws and regulations is accurate and complete, and that, unless otherwise noted, the scope of such laws and regulations encompasses the swaps activities[28] of SDs and MSPs[29] in the relevant jurisdictions.[30] Further, as stated in the Guidance, the Commission expects that an applicant would notify the Commission of any material changes to information submitted in support of a comparability determination (including, but not limited to, changes in the relevant supervisory or regulatory regime) as, depending on the nature of the change, the Commission's comparability determination may no longer be valid.[31]

The Guidance provided a detailed discussion of the Commission's policy regarding the availability of substituted

---

[22] 78 FR 45343.

[23] 78 FR 45343.

[24] 78 FR 45343. The Commission's substituted compliance program would generally be available for SDR Reporting, as outlined in the Guidance, only if the Commission has direct access to all of the data elements that are reported to a foreign trade repository pursuant to the substituted compliance program. Thus, direct access to swap data is a threshold matter to be addressed in a comparability evaluation for SDR Reporting. Moreover, the Commission explains in the Guidance that, due to its technical nature, a comparability evaluation for SDR Reporting "will generally entail a detailed comparison and technical analysis." A more particularized analysis will generally be necessary to determine whether data stored in a foreign trade repository provides for effective Commission use, in furtherance of the regulatory purposes of the Dodd-Frank Act. *See* 78 FR 45345.

[25] A finding of comparability may not be possible for a number of reasons, including the fact that the foreign jurisdiction has not yet implemented or finalized particular requirements.

[26] 78 FR 45343.

[27] As explained in the Guidance, such "approaches used will vary depending on the circumstances relevant to each jurisdiction. One example would include coordinating with the foreign regulators in developing appropriate regulatory changes or new regulations, particularly where changes or new regulations already are being considered or proposed by the foreign regulators or legislative bodies. As another example, the Commission may, after consultation with the appropriate regulators and market participants, include in its substituted compliance determination a description of the means by which certain swaps market participants can achieve substituted compliance within the construct of the foreign regulatory regime. The identification of the means by which substituted compliance is achieved would be designed to address the regulatory objectives and outcomes of the relevant Dodd-Frank Act requirements in a manner that does not conflict with a foreign regulatory regime and reduces the likelihood of inconsistent regulatory obligations. For example, the Commission may specify that [SDs] and MSPs in the jurisdiction undertake certain recordkeeping and documentation for swap activities that otherwise is only addressed by the foreign regulatory regime with respect to financial activities generally. In addition, the substituted compliance determination may include provisions for summary compliance and risk reporting to the Commission to allow the Commission to monitor whether the regulatory outcomes are being achieved. By using these approaches, in the interest of comity, the Commission would seek to achieve its regulatory objectives with respect to the Commission's registrants that are operating in foreign jurisdictions in a manner that works in harmony with the regulatory interests of those jurisdictions." 78 FR 45343–44.

[28] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under 17 CFR Part 23 are limited in scope to the swaps activities of SDs and MSPs.

[29] No SD or MSP that is not legally required to comply with a law or regulation determined to be comparable may voluntarily comply with such law or regulation in lieu of compliance with the CEA and the relevant Commission regulation. Each SD or MSP that seeks to rely on a comparability determination is responsible for determining whether it is subject to the laws and regulations found comparable. Currently, there are no MSPs organized outside the U.S. and the Commission therefore cautions any non-financial entity organized outside the U.S. and applying for registration as an MSP to carefully consider whether the laws and regulations determined to be comparable herein are applicable to such entity.

[30] The Commission has provided the relevant foreign regulator(s) with opportunities to review and correct the applicant's description of such laws and regulations on which the Commission will base its comparability determination. The Commission relies on the accuracy and completeness of such review and any corrections received in making its comparability determinations. A comparability determination based on an inaccurate description of foreign laws and regulations may not be valid.

[31] 78 FR 45345.

compliance[32] for the Internal Business Conduct Requirements.[33]

V. Supervisory Arrangement

In the Guidance, the Commission stated that, in connection with a determination that substituted compliance is appropriate, it would expect to enter into an appropriate memorandum of understanding ("MOU") or similar arrangement[34] with the relevant foreign regulator(s). Although existing arrangements would indicate a foreign regulator's ability to cooperate and share information, "going forward, the Commission and relevant foreign supervisor(s) would need to establish supervisory MOUs or other arrangements that provide for information sharing and cooperation in the context of supervising [SDs] and MSPs."[35]

The Commission is in the process of developing its registration and supervision regime for provisionally-registered SDs and MSPs. This new initiative includes setting forth supervisory arrangements with authorities that have joint jurisdiction over SDs and MSPs that are registered with the Commission and subject to U.S. law. Given the developing nature of the Commission's regime and the fact that the Commission has not negotiated prior supervisory arrangements with certain authorities, the negotiation of supervisory arrangements presents a unique opportunity to develop close working relationships between and among authorities, as well as highlight any potential issues related to cooperation and information sharing.

Accordingly, the Commission is negotiating such a supervisory arrangement with each applicable foreign regulator of an SD or MSP. The Commission expects that the arrangement will establish expectations for ongoing cooperation, address direct access to information,[36] provide for notification upon the occurrence of specified events, memorialize understandings related to on-site visits,[37] and include protections related to the use and confidentiality of non-public information shared pursuant to the arrangement.

These arrangements will establish a roadmap for how authorities will consult, cooperate, and share information. As with any such arrangement, however, nothing in these arrangements will supersede domestic laws or resolve potential conflicts of law, such as the application of domestic secrecy or blocking laws to regulated entities.

VI. Comparability Determination and Analysis

The following section describes the requirements imposed by specific sections of the CEA and the Commission's regulations for the Internal Business Conduct Requirements that are the subject of this comparability determination, and the Commission's regulatory objectives with respect to such requirements. Immediately following a description of the requirement(s) and regulatory objective(s) of the specific Internal Business Conduct Requirements that the applicants submitted for a comparability determination, the Commission provides a description of the foreign jurisdiction's comparable laws, regulations, or rules and whether such laws, regulations, or rules meet the applicable regulatory objective.

The Commission's determinations in this regard and the discussion in this section are intended to inform the public of the Commission's views regarding whether the foreign jurisdiction's laws, regulations, or rules may be comparable and comprehensive as those requirements in the Dodd-Frank Act (and Commission regulations promulgated thereunder) and therefore, may form the basis of substituted compliance. In turn, the public (in the foreign jurisdiction, in the United States, and elsewhere) retains its ability to present facts and circumstances that would inform the determinations set forth in this notice.

As was stated in the Guidance, the Commission recognizes the complex and dynamic nature of the global swap market and the need to take an adaptable approach to cross-border issues, particularly as it continues to work closely with foreign regulators to address potential conflicts with respect to each country's respective regulatory regime. In this regard, the Commission may review, modify, or expand the determinations herein in light of comments received and future developments.

A. Chief Compliance Officer (§ 3.3).

Commission Requirement: Implementing section 4s(k) of the CEA, Commission regulation 3.3 generally sets forth the following requirements for SDs and MSPs:

- An SD or MSP must designate an individual as Chief Compliance Officer ("CCO");
- The CCO must have the responsibility and authority to develop the regulatory compliance policies and procedures of the SD or MSP;
- The CCO must report to the board of directors or the senior officer of the SD or MSP;
- Only the board of directors or a senior officer may remove the CCO;
- The CCO and the board of directors must meet at least once per year;
- The CCO must have the background and skills appropriate for the responsibilities of the position;
- The CCO must not be subject to disqualification from registration under sections 8a(2) or (3) of the CEA;
- Each SD and MSP must include a designation of a CCO in its registration application;

[32] *See* 78 FR 45348–50. The Commission notes that registrants and other market participants are responsible for determining whether substituted compliance is available pursuant to the Guidance based on the comparability determination contained herein (including any conditions or exceptions), and its particular status and circumstances.

[33] This notice does not address § 23.608 (Restrictions on counterparty clearing relationships). The Commission declines to take up the request for a comparability determination with respect to this regulation due to the Commission's view that there are not laws or regulations applicable in Japan to compare with the prohibitions and requirements of § 23.608. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in Japan.

This notice also does not address capital adequacy because the Commission has not yet finalized rules for SDs and MSPs in this area, nor SDR Reporting. The Commission may provide a comparability determination with respect to these requirements at a later date or in a separate notice.

[34] An MOU is one type of arrangement between or among regulators. Supervisory arrangements could include, as appropriate, cooperative arrangements that are memorialized and executed as addenda to existing MOUs or, for example, as independent bilateral arrangements, statements of intent, declarations, or letters.

[35] 78 FR 45344.

[36] Section 4s(j)(3) and (4) of the CEA and Commission regulation 23.606 require a registered SD or MSP to make all records required to be maintained in accordance with Commission regulation 1.31 available promptly upon request to, among others, representatives of the Commission. *See also* 7 U.S.C. 6s(f); 17 CFR 23.203. In the Guidance, the Commission states that it "reserves this right to access records held by registered [SDs] and MSPs, including those that are non-U.S. persons who may comply with the Dodd-Frank recordkeeping requirement through substituted compliance." 78 FR 45345 n. 472; see *also id.* at 45342 n. 461 (affirming the Commission's authority under the CEA and its regulations to access books and records held by registered SDs and MSPs as "a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto").

[37] The Commission retains its examination authority, both during the application process as well as upon and after registration of an SD or MSP. *See* 78 FR 45342 (stating Commission policy that "eligible entities may comply with a substituted compliance regime under certain circumstances, subject, however, to the Commission's retention of its examination authority") and 45344 n. 471 (stating that the "Commission may, as it deems appropriate and necessary, conduct an on-site examination of the applicant").

• The CCO must administer the regulatory compliance policies of the SD or MSP;

• The CCO must take reasonable steps to ensure compliance with the CEA and Commission regulations, and resolve conflicts of interest;

• The CCO must establish procedures for detecting and remediating non-compliance issues;

• The CCO must annually prepare and sign an "annual compliance report" containing: (i) A description of policies and procedures reasonably designed to ensure compliance; (ii) an assessment of the effectiveness of such policies and procedures; (iii) a description of material non-compliance issues and the action taken; (iv) recommendations of improvements in compliance policies; and (v) a certification by the CCO or chief executive officer that, to the best of such officer's knowledge and belief, the annual report is accurate and complete under penalty of law; and

• The annual compliance report must be furnished to the CFTC within 90 days after the end of the fiscal year of the SD or MSP, simultaneously with its annual financial condition report.

Regulatory Objective: The Commission believes that compliance by SDs and MSPs with the CEA and the Commission's rules greatly contributes to the protection of customers, orderly and fair markets, and the stability and integrity of the market intermediaries registered with the Commission. The Commission expects SDs and MSPs to strictly comply with the CEA and the Commission's rules and to devote sufficient resources to ensuring such compliance. Thus, through its CCO rule, the Commission seeks to ensure firms have designated a qualified individual as CCO that reports directly to the board of directors or the senior officer of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually to the Commission and the board or senior officer on compliance of the firm.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as section 4s(k) of the CEA and Commission regulation 3.3.

The Banking Act, FIEA, Order for Enforcement, Cabinet Office Ordinance, Supervisory Guidelines and Inspection Manuals for banks and FIBOs, collectively, require each bank and FIBO to:

• Designate an individual to serve as a CCO in its registration application as a bank/FIBO;

• Provide the CCO with the responsibility and authority to develop the regulatory compliance policies and procedures of the bank/FIBO;

• Have the CCO report to the board of directors of the bank/FIBO;

• Ensure the CCO has the background and skills appropriate for the position;

• Ensure the CCO is not disqualified from registration;[38]

• Have the CCO administer the regulatory compliance policies of the bank/FIBO;

• Have the CCO take reasonable steps to ensure compliance and resolve conflicts of interest for the bank/FIBO;

• Have the CCO detect and remediate non-compliance issues for the bank/FIBO;

• Report regulatory compliance status to the board of directors as necessary and appropriate on behalf of the bank/FIBO; and

• Submit an annual business report to JFSA which contains compliance facts, preventative and corrective actions taken, and other issues regarding the firm's compliance framework.

Commission Determination: The Commission finds that the Japanese standards specified above are generally identical in intent to § 3.3 by seeking to ensure firms have designated a qualified individual as the compliance officer that reports directly to a sufficiently senior function of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually on compliance of the firm.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the CCO requirements of the Japanese standards specified above are comparable to and as comprehensive as § 3.3, with the exception of § 3.3(f) concerning certifying and furnishing an annual compliance report to the Commission.

Notwithstanding that the Commission has not determined that the requirements of Japan's laws and regulations are comparable to and as comprehensive as § 3.3(f), any SD or MSP to which both § 3.3 and the Japanese standards specified above are applicable would generally be deemed to be in compliance with § 3.3(f) if that SD or MSP complies with the Japanese standards specified above, subject to certifying and furnishing the Commission with the annual report required under the Japanese standards specified above in accordance with § 3.3(f). The Commission notes that it generally expects registrants to submit required reports to the Commission in the English language.

B. Risk Management Duties (§§ 23.600—23.609)

Section 4s(j) of the CEA requires each SD and MSP to establish internal policies and procedures designed to, among other things, address risk management, monitor compliance with position limits, prevent conflicts of interest, and promote diligent supervision, as well as maintain business continuity and disaster recovery programs.[39] The Commission adopted regulations 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606 to implement the statute.[40] The Commission also adopted regulation 23.609, which requires certain risk management procedures for SDs or MSPs that are clearing members of a derivatives clearing organization ("DCO").[41] Collectively, these requirements help to establish a robust and comprehensive internal risk management program for SDs and MSPs with respect to their swaps activities,[42]

[38] *See* Article 29–4 of FIEA and Article 15–4 of the Order for Enforcement of FIEA, Article 33–5(1)(iii) of FIEA; Article 33–3(1)(vii) of FIEA, Article 47(1)(i) of the FIB Ordinance, Article 33–3(2)(iv) of FIEA, Article 47(1)(i)(ii) of the FIB Ordinance, and Article 4(2)(ii) of Banking Act. Pursuant to Article 33–5(1)(iii) of FIEA and its relevant provisions, RFIs are required to have a personnel structure sufficient to conduct RFI business in an appropriate manner. Accordingly, if the CCO is subject to disqualification, registration for the RFI would be refused.

[39] 7 U.S.C. § 6s(j).

[40] *See* Final Swap Dealer and MSP Recordkeeping Rule, 77 FR 20128 (April 3, 2012) (relating to risk management program, monitoring of position limits, business continuity and disaster recovery, conflicts of interest policies and procedures, and general information availability, respectively).

[41] *See* Customer Documentation Rule, 77 FR 21278. Also, SDs must comply with Commission regulation 23.608, which prohibits SDs providing clearing services to customers from entering into agreements that would: (i) Disclose the identity of a customer's original executing counterparty; (ii) limit the number of counterparties a customer may trade with; (iii) impose counterparty-based position limits; (iv) impair a customer's access to execution of a trade on terms that have a reasonable relationship to the best terms available; or (v) prevent compliance with specified time frames for acceptance of trades into clearing.

[42] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a

Continued

which is critical to effective systemic risk management for the overall swaps market. In making its comparability determination with regard to these risk management duties, the Commission will consider each regulation individually.[43]

1. Risk Management Program for SDs and MSPs (§ 23.600)

Commission Requirement: Implementing section 4s(j)(2) of the CEA, Commission regulation 23.600 generally requires that:

- Each SD or MSP must establish and enforce a risk management program consisting of a system of written risk management policies and procedures designed to monitor and manage the risks associated with the swap activities of the firm, including without limitation, market, credit, liquidity, foreign currency, legal, operational, and settlement risks, and furnish a copy of such policies and procedures to the CFTC upon application for registration and upon request;
- The SD or MSP must establish a risk management unit independent from the business trading unit;
- The risk management policies and procedures of the SD or MSP must be approved by the firm's governing body;
- Risk tolerance limits and exceptions therefrom must be reviewed and approved quarterly by senior management and annually by the governing body;
- The risk management program must have a system for detecting breaches of risk tolerance limits and alerting supervisors and senior management, as appropriate;
- The risk management program must account for risks posed by affiliates and be integrated at the consolidated entity level;
- The risk management unit must provide senior management and the governing body with quarterly risk exposure reports and upon detection of any material change in the risk exposure of the SD or MSP;
- Risk exposure reports must be furnished to the CFTC within five business days following provision to senior management;
- The risk management program must have a new product policy for assessing the risks of new products prior to engaging in such transactions;
- The risk management program must have policies and procedures providing for trading limits, monitoring of trading, processing of trades, and separation of personnel in the trading unit from personnel in the risk management unit; and
- The risk management program must be reviewed and tested at least annually and upon any material change in the business of the SD or MSP.

Regulatory Objective: Through the required system of risk management, the Commission seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. To this end, the Commission believes the risk management program of an SD or MSP must contain at least the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as section 4s(j)(2) of the CEA and Commission regulation 23.600.

III–2–3–1–3(1) and III–3–7–1–2(1)(ii) of the Supervisory Guidelines and Inspection Manuals for banks and III–1(1)(ii) of the Supervisory Guideline for FIBOs generally require the board of directors of a bank/FIBO to establish a comprehensive risk management program aligned with the bank's/FIBO's strategic target. The risk management program required by the Supervisory Guidelines and Inspectional Manuals must be designed to monitor and manage risk, including without limitation, market (including foreign currency), credit, liquidity, legal, operational, and settlement risks.[44]

The review of a bank's/FIBO's overall risk management program must take into account how frequently the risk management division reports to the board of directors and whether reports are also filed on an as-needed basis. Pursuant to Article 19 of the Banking Act and Article 46–3 of the FIEA, a bank/FIBO must submit to the JFSA a business report referring to the risk management of derivative transactions annually within three months after the end of year period. In addition, pursuant to Article 24 of the Banking Act and Article 56–2 of the FIEA, JFSA requires a bank/FIBO to report to JFSA on a quarterly basis the data of derivative transactions such as the volume and profit and loss amounts within fifty days after the end of every quarter period.

Pursuant to the above Supervisory Guidelines and Inspection Manuals, a bank/FIBO must arrange for the approval of new products in a manner befitting the scale and nature of its business. III–1(1)(iv) of the Supervisory Guidelines for FIBOs and III–2–3–1–3(5)(6) of the Supervisory Guidelines for banks require JSFA to evaluate whether a bank's/FIBO's risk management program established a sufficient internal audit system. As part of this oversight, a bank/FIBO must receive an external audit by corporate auditors at least once a year.

Commission Determination: The Commission finds that the Japanese standards specified above are generally identical in intent to § 23.600 by requiring a system of risk management that seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. Specifically, the Commission finds that the Japanese standards specified above comprehensively require SDs and MSPs to establish risk management programs containing the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;

registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under 17 CFR Part 23 are limited in scope to the swaps activities of SDs and MSPs.

[43] As stated above, this notice does not address § 23.608 (Restrictions on counterparty clearing relationships). The Commission declines to take up the request for a comparability determination with respect to this regulation due to the Commission's view that there are not laws or regulations applicable in Japan to compare with the prohibitions and requirements of § 23.608. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in Japan.

[44] *See, e.g.* Supervisory Guideline: Checklist for Comprehensive Risk Management, Checklist for Business Management, Checklist for Legal Compliance, Checklist for Market Risk Management, Checklist for Credit Risk Management, Checklist for Liquidity Risk Management, and Checklist for Operational Risk Management.

• An independent risk management unit to administer a risk management program; and

• Periodic oversight of risk exposures by senior management and the governing body.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the risk management program requirements of Japan's laws and regulations, as specified above, are comparable to and as comprehensive as § 23.600, with the exception of § 23.600(c)(2) concerning the requirement that each SD and MSP produce a quarterly risk exposure report and provide such report to its senior management, governing body, and the Commission.

Notwithstanding that the Commission has not determined that the requirements of Japan's laws and regulations are comparable to and as comprehensive as § 23.600(c)(2), any SD or MSP to which both § 23.600 and the Japanese standards specified above are applicable would generally be deemed to be in compliance with § 23.600(c)(2) if that SD or MSP complies with the Japanese standards specified above, subject to compliance with the requirement that it produce quarterly risk exposure reports and provide such reports to its senior management, governing body, and the Commission in accordance with § 23.600(c)(2). The Commission notes that it generally expects reports furnished to the Commission by registrants to be in the English language.

2. Monitoring of Position Limits (§ 23.601)

Commission Requirement: Implementing section 4s(j)(1) of the CEA, Commission regulation 23.601 requires each SD or MSP to establish and enforce written policies and procedures that are reasonably designed to monitor for, and prevent violations of, applicable position limits established by the Commission, a designated contract market ("DCM"), or a swap execution facility ("SEF").[45] The policies and procedures must include an early warning system and provide for escalation of violations to senior management (including the firm's governing body).

Regulatory Objective: Generally, position limits are implemented to ensure market integrity, fairness, orderliness, and accurate pricing in the commodity markets. Commission regulation 23.601 thus seeks to ensure that SDs and MSPs have established the necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by the Commission, a DCM, or a SEF. As part of its Risk Management Program, § 23.601 is intended to ensure that established position limits are not breached by the SD or MSP.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as section 4s(j)(1) of the CEA and Commission regulation 23.601.

IV–2–3 of the Supervisory Guidelines for FIBOs and III–2–3–3–2(2)(vii) and (viii) of the Supervisory Guideline for banks of the Inspection Manuals generally require a bank/FIBO to establish internal position limits, risk limits, and loss limits for all financial products, including derivatives. The policies established by the bank/FIBO must provide a system to provide "alarm points" to the board of directors. Moreover, in accordance with Article 29–2 of the Business Rules of Japan Securities Clearing Corporation ("JSCC") with respect to listed products, JSCC can take an appropriate action against clearing participants (RFIs or FIBOs) if JSCC finds their position is excessive compared with their net assets. Therefore, clearing participants have to monitor their positions in relation to their net assets. CCP's Business Rules, which are subject to JFSA's approval, are legally binding requirements.

The applicants represent that the position limits set internally by banks and FIBOs may not exceed position limits set by applicable law, including position limits set by the Commission, SEFs, or DCMs.[46]

Commission Determination: The Commission finds that the Japanese standards specified above are generally identical in intent to § 23.601 by requiring SDs and MSPs to establish necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by applicable laws and regulations, including those of the Commission, a DCM, or a SEF. Specifically, the Commission finds that the Japanese standards specified above, while not specific to the issue of position limit compliance, nevertheless comprehensively require SDs and MSPs to monitor for regulatory compliance generally, which includes monitoring for compliance with position limits set pursuant to applicable law and the responsibility of senior management (including the board of directors) for such compliance.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the compliance monitoring requirements of the Japanese standards, as specified above, are comparable to and as comprehensive as § 23.601. For the avoidance of doubt, the Commission notes that this determination may not be relied on to relieve an SD or MSP from its obligation to strictly comply with any applicable position limit established by the Commission, a DCM, or a SEF.

3. Diligent Supervision (§ 23.602)

Commission Requirement: Commission regulation 23.602 implements section 4s(h)(1)(B) of the CEA and requires each SD and MSP to establish a system to diligently supervise all activities relating to its business performed by its partners, members, officers, employees, and agents. The system must be reasonably designed to achieve compliance with the CEA and CFTC regulations. Commission regulation 23.602 requires that the supervisory system must specifically designate qualified persons with authority to carry out the supervisory responsibilities of the SD or MSP for all activities relating to its business as an SD or MSP.

Regulatory Objective: The Commission's diligent supervision rule seeks to ensure that SDs and MSPs strictly comply with the CEA and the Commission's rules. To this end, through § 23.602, the Commission seeks to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as

[45] The setting of position limits by the Commission, a DCM, or a SEF is subject to requirements under the CEA and Commission regulations other than § 23.601. The setting of position limits and compliance with such limits is not subject to the Commission's substituted compliance regime.

[46] *See* III–3–10 of the Supervisory Guideline for banks and IV–5–2(i) of the Supervisory Guideline for FIBOs for rules regarding management of overseas business by banks and FIBOs.

section 4s(h)(1)(B) of the CEA and Commission regulation 23.602.

III–1–2–1–(2)(xi) and III–1–2–1–(2)(xiii) of the Supervisory Guideline for banks, the Checklist for Business Management (Governance) of the Bank Inspection Manual, III–1(1)(ii)C and IV–1–2–(1)(i) of the Supervisory Guideline for FIBOs, and II–1–1–3(3) and II–2–1 of the FIBO Inspection Manual generally require a bank/FIBO to ensure appropriate officers and employees are in place in order to properly conduct business, and to establish legal compliance and internal control systems.

Commission Determination: The Commission finds that the Japanese standards specified above are generally identical in intent to § 23.602 because such standards seek to ensure that SDs and MSPs strictly comply with applicable law, which would include the CEA and the Commission's regulations.[47]

Through the Supervisory Guidelines and Inspection Manuals, Japan's laws and regulations seek to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with applicable law, which would include the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the internal supervision requirements set forth in the Japanese standards, as specified above, are comparable to and as comprehensive as § 23.602.

4. Business Continuity and Disaster Recovery (§ 23.603)

Commission Requirement: To ensure the proper functioning of the swaps markets and the prevention of systemic risk more generally, Commission regulation 23.603 requires each SD and MSP, as part of its risk management program, to establish a business continuity and disaster recovery plan that includes procedures for, and the maintenance of, back-up facilities, systems, infrastructure, personnel, and other resources to achieve the timely recovery of data and documentation and to resume operations generally within the next business day after the disruption.

Regulatory Objective: Commission regulation 23.603 is intended to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, this requirement seeks to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan within one business day, if necessary.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as Commission regulation 23.603.

IV–3–1–6 of the Supervisory Guideline for FIBOs and sections III–6–1 and III–6–2(2)(i)(iii)–(v) of the Supervisory Guideline for banks require a bank/FIBO to establish a crisis management manual and a business continuity and disaster recovery plan that include procedures for, and the maintenance of, back-up facilities, systems, infrastructure, personnel, and other resources to achieve the timely recovery of data and documentation and to resume operations.

Pursuant to III–8–2–(2)–(v) of the Supervisory Guideline for banks, JFSA requires banks to resume operation within the day of the event, especially for important settlement functions. Pursuant to IV–3–1–6(2) of the Supervisory Guideline for FIBOs, JFSA checks whether a FIBO's business continuity plan ensures quick recovery from damage caused by acts of terrorism, large-scale disasters, etc., as well as continuance of the minimum necessary business operations and services for the maintenance of the functions of the financial system.

Commission Determination: The Commission finds that the Japanese standards specified above are generally identical in intent to § 23.603 because such standards seek to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, the Commission finds that the Japanese standards specified above seek to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan in a timely manner.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the business continuity and disaster recovery requirements of the Japanese standards, as specified above, are comparable to and as comprehensive as § 23.603.

5. Conflicts of Interest (§ 23.605)

Commission Requirement: Section 4s(j)(5) of the CEA and Commission regulation 23.605(c) generally require each SD or MSP to establish structural and institutional safeguards to ensure that the activities of any person within the firm relating to research or analysis of the price or market for any commodity or swap are separated by appropriate informational partitions within the firm from the review, pressure, or oversight of persons whose involvement in pricing, trading, or clearing activities might potentially bias their judgment or supervision.

In addition, section 4s(j)(5) of the CEA and Commission regulation 23.605(d)(1) generally prohibits an SD or MSP from directly or indirectly interfering with or attempting to influence the decision of any clearing unit of any affiliated clearing member of a derivatives clearing organization (DCO) to provide clearing services and activities to a particular customer, including:

- Whether to offer clearing services to a particular customer;
- Whether to accept a particular customer for clearing derivatives;
- Whether to submit a customer's transaction to a particular DCO;
- Whether to set or adjust risk tolerance levels for a particular customer; or
- Whether to set a customer's fees based on criteria other than those generally available and applicable to other customers.

Commission regulation 23.605(d)(2) generally requires each SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of any affiliated clearing member of a DCO to reasonably ensure compliance with the Act and the prohibitions set forth in § 23.605(d)(1) outlined above.

The Commission observes that § 23.605(d) works in tandem with Commission regulation 1.71, which requires FCMs that are clearing members of a DCO and affiliated with an SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of the FCM to reasonably ensure compliance with the Act and the prohibitions set forth in § 1.71(d)(1), which are the same as the prohibitions set forth in § 23.605(d)(1) outlined above.

Finally, § 23.605(e) requires that each SD or MSP have policies and procedures that mandate the disclosure

[47] *See* III–3–10 of the Supervisory Guideline for banks and IV–5–2(i) of the Supervisory Guideline for FIBOs for rules regarding management of overseas business by banks and FIBOs.

to counterparties of material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a swap execution facility or designated contract market (DCM) or to clear a derivative through a DCO.

Regulatory Objective: Commission regulation 23.605(c) seeks to ensure that research provided to the general public by an SD or MSP is unbiased and free from the influence of the interests of an SD or MSP arising from the SD's or MSP's trading business.

In addition, the § 23.605(d) (working in tandem with § 1.71) seeks to ensure open access to the clearing of swaps by requiring that access to and the provision of clearing services provided by an affiliate of an SD or MSP are not influenced by the interests of an SD's or MSP's trading business.

Finally, § 23.605(e) seeks to ensure equal access to trading venues and clearinghouses, as well as orderly and fair markets, by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as Commission regulation 23.605.

Regulations Concerning the Handling of Analysts Reports have been developed by the JSDA to require JSDA members to appropriately manage the content of any unpublished analyst report that is considered to have a material impact on investors (to include the presentation of any conflicts) and to establish an appropriate compensation system to ensure the independence of the opinions of analysts.

More generally, FIEA and the Financial Instruments Business Ordinance require a FIBO/RFI to conduct business "in good faith and fairly to customers." Specifically, I.2.(3)(iv) of the Checklist for Legal Compliance of the Bank Inspection Manual and II–1–2–1(4)(iii) of the FIBO Inspection Manual require each bank/FIBO to establish firewalls and take other measures to block the flow of information when necessary. Article 70–3(1)(ii)(d) of the Financial Instruments Business Ordinance and IV–1–3(3)(i)C of the Supervisory Guidelines for FIBOs require a FIBO/RFI to develop a control environment wherein it can choose or combine appropriate method(s), for example, notifying the customer of a conflict risk to establish a system for protection of customers.

The JFSA has informed the Commission that, in the process of its oversight and enforcement of the foregoing Japanese standards for FIBOs and RFIs, any SD or MSP would be subject to such standards and required to resolve or mitigate conflicts of interests in the provision of clearing services by a clearing member of a DCO that is an affiliate of the SD or MSP, or the decision of a counterparty to execute a derivative on a SEF or DCM, or clear a derivative through a DCO, through appropriate information firewalls and disclosures.

Commission Determination: The Commission finds that the Japanese standards specified above with respect to conflicts of interest that may arise in producing or distributing research are generally identical in intent to § 23.605(c) because such standards seek to ensure that research provided to the general public by an SD is unbiased and free from the influence of the interests of an SD arising from the SD's trading business.

With respect to conflicts of interest that may arise in the provision of clearing services by an affiliate of an SD or MSP, the Commission further finds that although the general conflicts of interest prevention requirements under the Japanese standards specified above do not require with specificity that access to and the provision of clearing services provided by an affiliate of an SD or MSP not be improperly influenced by the interests of an SD's or MSP's trading business, such general requirements would require prevention and remediation of such improper influence when recognized or discovered. Thus such standards would ensure open access to clearing.

Finally, although not as specific as the requirements of § 23.605(e) (Undue influence on counterparties), the Commission finds that the general disclosure requirements of the Japanese standards specified above would ensure equal access to trading venues and clearinghouses by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the requirements found in Japan's laws and regulations specified above in relation to conflicts of interest are comparable to and as comprehensive as § 23.605.

6. Availability of Information for Disclosure and Inspection (§ 23.606)

Commission Requirement: Commission regulation 23.606 implements sections 4s(j)(3) and (4) of the CEA, and requires each SD and MSP to disclose to the Commission, and an SD's or MSP's U.S. prudential regulator (if any) comprehensive information about its swap activities, and to establish and maintain reliable internal data capture, processing, storage, and other operational systems sufficient to capture, process, record, store, and produce all information necessary to satisfy its duties under the CEA and Commission regulations. Such systems must be designed to provide such information to the Commission and an SD's or MSP's U.S. prudential regulator within the time frames set forth in the CEA and Commission regulations and upon request.

Regulatory Objective: Commission regulation 23.606 seeks to ensure that each SD and MSP captures and maintains comprehensive information about their swap activities, and is able to retrieve and disclose such information to the Commission and its U.S. prudential regulator, if any, as necessary for compliance with the CEA and the Commission's regulations and for purposes of Commission oversight, as well as oversight by the SD's or MSP's U.S. prudential regulator, if any.

The Commission observes that it would be impossible to meet the regulatory objective of § 23.606 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.606 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as Commission regulation 23.606.

Under the JFSA annual supervisory policies for banks and FIBOs for program year 2013, a bank/FIBO is required to enhance their management information systems through various initiatives such as implementing BCBS "Principles for effective risk data

aggregation and risk reporting," which enable banks/FIBOs to meet the information requests of relevant regulators.

III–3–3(6) of Supervisory Guideline for FIBOs states that each FIBO must maintain electronic media storage systems that can accommodate internal audits and be responsive to client referrals and questions. Moreover, III.1.(6) of the Checklist for Market Risk Management of the Bank Inspection Manual requires that records be readily available for reconciliation with trade tickets, etc.

III–3–10–2(3) (iv) of Supervisory Guideline for banks specifically requires banks to have the personnel and systems to respond in a timely and appropriate manner to inspections and supervision provided by overseas regulatory authorities. In view of maintaining direct dialog and smooth communications with the relevant overseas regulatory authorities, this provision ensures the establishment of a reporting system which enables timely and appropriate reporting.

Similarly, IV–5–2(i) of Supervisory Guideline for FIBOs would ensure the availability of information to a regulator promptly upon request. Under this provision, the JFSA assesses whether a parent company of a FIBO ensures group-wide compliance with the relevant laws, regulations and rules of each country in which it does business by establishing an appropriate control environment for legal compliance in accordance with the size of its overseas bases and the characteristics of its business operations.

Commission Determination: The Commission finds that the Japanese standards specified above are generally identical in intent to § 23.606 because such standards seek to ensure that each SD and MSP captures and stores comprehensive information about their swap activities, and are able to retrieve and disclose such information as necessary for compliance with applicable law and for purposes of regulatory oversight.

In addition, the Commission finds that the Japanese standards specified above would ensure Commission access to the required books and records of SDs and MSPs by requiring personnel and systems necessary to respond in a timely and appropriate manner to inspections and supervision provided by overseas regulatory authorities.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the requirements of the Japanese standards with respect to the availability of information for inspection and disclosure, as specified above, are comparable to, and as comprehensive as, § 23.606.

7. Clearing Member Risk Management (§ 23.609)

Commission Requirement: Commission regulation 23.609 generally requires each SD or MSP that is a clearing member of a DCO to:

- Establish risk-based limits based on position size, order size, margin requirements, or similar factors;
- Screen orders for compliance with the risk-based limits;
- Monitor for adherence to the risk-based limits intra-day and overnight;
- Conduct stress tests under extreme but plausible conditions of all positions at least once per week;
- Evaluate its ability to meet initial margin requirements at least once per week;
- Evaluate its ability to meet variation margin requirements in cash at least once per week;
- Evaluate its ability to liquidate positions it clears in an orderly manner, and estimate the cost of liquidation; and
- Test all lines of credit at least once per year.

Regulatory Objective: Through Commission regulation § 23.609, the Commission seeks to ensure the financial integrity of the markets and the clearing system, to avoid systemic risk, and to protect customer funds. Effective risk management by SDs and MSPs that are clearing members is essential to achieving these objectives. A failure of risk management can cause a clearing member to become insolvent and default to a DCO. Such default can disrupt the markets and the clearing system and harm customers.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as Commission regulation 23.609.

III–2–3–2–1–2 (9) and (10)(i) of the Supervisory Guideline for banks and III.(8) and (9)(i) of the Checklist for Credit Risk Management of the Inspection Manual for banks generally require a bank to properly manage the credit risks of major counterparties to derivatives transactions, as well as the risks associated with the clearing of derivatives transactions with a central counterparty. More specifically, the Supervisory Guidelines for banks require a bank to properly manage the risks associated with cleared derivative transactions with central counterparties ("CCPs"), including the inherent risk of transactions with a CCP, the risk associated with material defects of regulations or supervisory schemes to which a CCP is subject, and the risk of loss of the bank's contribution to the default fund of a CCP.

IV–2–4 of the Supervisory Guideline for FIBOs and I–2-(4) of the Inspection Manual for FIBOs require FIBOs to properly manage counterparty risk. Counterparty risk is the risk of incurring losses due to a failure by a counterparty to fulfill its contractual obligations.

The JFSA evaluates a FIBO on whether it properly manages counterparty risk by developing a comprehensive control environment for risk management, properly recognizing and evaluating the risks, conducting internal screening when a new product or a new business is introduced and establishing a system of checks and balances based on the clear allocation of roles and responsibilities.

The JFSA strives to identify and keep track of the status of a FIBO's counterparty risk and its risk management through monthly offsite monitoring reports and hearings based thereon and, when necessary, requiring FIBOs to submit a report based on Article 56–2(1) of the FIEA and urge it to make improvement efforts.

The foregoing requirements apply to bank and FIBO risk management as clearing members.

In addition, if FIBOs/RFIs are clearing members of the JSCC, in accordance with the business rules of the JSCC, they are required to develop an appropriate structure for management of the risk of loss.

Finally, the JFSA has represented to the Commission that, in the process of its oversight and enforcement of the foregoing Japanese standards for banks, FIBOs, and RFIs, any SD or MSP subject to such standards that is a clearing member of a DCO would be required to comply with clearing member risk management requirements comparable to Commission regulation 23.609.

Commission Determination: The Commission finds that the Japanese standards specified above are generally identical in intent to § 23.609 because such standards seek to ensure the financial integrity of the markets and the clearing system, to avoid systemic risk, and to protect customer funds.

The Commission notes that the Japanese standards specified above are not as specific as § 23.609 with respect to ensuring that SDs and MSPs that are clearing members of a DCO establish detailed procedures and limits for clearing member risk management purposes. Nevertheless, the Commission finds that the general requirements

under the Japanese standards, implemented in the context of clearing member risk management and pursuant to the representations of the JFSA, meet the Commission's regulatory objective specified above.

Based on the foregoing and the representations above, the Commission hereby determines that the clearing member risk management requirements of the Japanese standards specified above are comparable to and as comprehensive as § 23.609.

C. Swap Data Recordkeeping (§§ 23.201 and 23.203)

Commission Requirement: Sections 4s(f)(1)(B) and 4s(g)(1) of the CEA, and Commission regulation 23.201 generally require SDs and MSPs to retain records of each transaction, each position held, general business records (including records related to complaints and sales and marketing materials), records related to governance, financial records, records of data reported to SDRs, and records of real-time reporting data along with a record of the date and time the SD or MSP made such reports. Transaction records must be kept in a form and manner identifiable and searchable by transaction and counterparty.

Commission regulation 23.203, requires SDs and MSPs to maintain records of a swap transaction until the termination, maturity, expiration, transfer, assignment, or novation date of the transaction, and for a period of five years after such date. Records must be "readily accessible" for the first 2 years of the 5 year retention period (consistent with § 1.31).

The Commission notes that the comparability determination below with respect to §§ 23.201 and 23.203 encompasses both swap data recordkeeping generally and swap data recordkeeping relating to complaints and marketing and sales materials in accordance with § 23.201(b)(3) and (4).[48]

Regulatory Objective: Through the Commission's regulations requiring SDs and MSPs to keep comprehensive records of their swap transactions and related data, the Commission seeks to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

The Commission's regulations require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

By requiring comprehensive records of swap data, the Commission seeks to ensure that SDs and MSPs employ effective risk management, and strictly comply with Commission regulations. Further, such records facilitate effective regulatory oversight.

The Commission observes that it would be impossible to meet the regulatory objective of §§ 23.201 and 23.203 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.203 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable Japanese Law and Regulations: The applicants have represented to the Commission that the following provisions of law and regulations applicable in Japan are in full force and effect in Japan, and comparable to and as comprehensive as sections 4s(f)(1)(B) and 4s(g)(1) of the CEA and §§ 23.201 and 23.203.

A FIBO/RFI is required by provisions set forth in the FIEA, the OTC Derivatives Ordinance, and the Financial Instruments Business Ordinance to retain all records related to swaps transactions.

Articles 371, 381, 394, 396, and 436 of the Company Act require governance records including minutes of board of directors and audit reports of auditors to be retained for ten years. Also, Article 432, 435, and 444 of the Company Act require financial records including financial statements, business reports, and annexed detailed statements to be retained for five years.

Articles 12–3 and 52–71 of the Banking Act and Articles 37–7 and 156–48 of the FIEA further require each bank/FIBO to prepare and maintain records as part of its "complaint processing procedures." Specific details regarding the storage of records detailing customer complaints are set forth in III–3–5–2–2(5)(ii) of the Supervisory Guideline for banks, II–2.1(3–4) and III–2.1(4) of the Checklist for Customer Protection Management of the Bank Inspection Manual, III–2–5 of the Supervisory Guideline for FIBOs, and II–1–2–1(7) of the FIBO Inspection Manual.

Article 37 of the FIEA and Article 72 of the Financial Instruments Business Ordinance require maintenance of records regarding marketing and sales materials.

III–3–3(6) of Supervisory Guideline for FIBOs states that each FIBO must maintain electronic media storage systems that can accommodate internal audits and be responsive to client referrals and questions. Moreover, III.1.(6) of the Checklist for Market Risk Management of the Bank Inspection Manual requires the records be readily available for reconciliation with trade tickets, etc.

FIEA and the Financial Instruments Business Ordinance generally require records to be kept for a minimum of five years, but certain records must be maintained from seven to ten years. III–1(vi) of the Checklist for Market Risk Management of the Bank Inspection Manual assesses whether voice recordings are maintained for all traders on a 24-hour basis and retained "under the control of an organization segregated from the market and back-office divisions."

III–3–10–2(3) (iv) of Supervisory Guideline for banks specifically requires banks to have the personnel and systems to respond in a timely and appropriate manner to inspections and supervision provided by overseas regulatory authorities. In view of maintaining direct dialog and smooth communications with the relevant overseas regulatory authorities, this provision ensures the establishment of a reporting system which enables timely and appropriate reporting.

Similarly, IV–5–2(i) of Supervisory Guideline for FIBOs would ensure the availability of information to a regulator promptly upon request. Under this provision, the JFSA assesses whether a parent company of a FIBO ensures group-wide compliance with the relevant laws, regulations and rules of each country in which it does business by establishing an appropriate control environment for legal compliance in accordance with the size of its overseas bases and the characteristics of its business operations.

Commission Determination: The Commission finds that the Japanese standards specified above are generally identical in intent to §§ 23.201 and 23.203 because such standards seek to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

In addition, the Commission finds that the Japanese standards specified above require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps

[48] *See* the Guidance for a discussion of the availability of substituted compliance with respect to swap data recordkeeping, 78 FR 45332–33.

business and to assess its swaps exposure.

Further, the Commission finds that the Japanese standards specified above, by requiring comprehensive records of swap data, seek to ensure that SDs and MSPs employ effective risk management, seek to ensure that SDs and MSPs strictly comply with applicable regulatory requirements (including the CEA and Commission regulations), and that such records facilitate effective regulatory oversight.

Finally, the Commission finds that the Japanese standards specified above would ensure Commission access to the required books and records of SDs and MSPs by requiring personnel and systems necessary to respond in a timely and appropriate manner to inspections and supervision provided by overseas regulatory authorities.

Based on the foregoing and the representations of the applicants, the Commission hereby determines that the Japanese requirements with respect to swap data recordkeeping, as specified above, are comparable to, and as comprehensive as, §§ 23.201 and 23.203.

Issued in Washington, DC on December 20, 2013, by the Commission.

Melissa D. Jurgens,

Secretary of the Commission.

Appendices to Comparability Determination for Japan: Certain Entity-Level Requirements

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Chilton and Wetjen voted in the affirmative. Commissioner O'Malia voted in the negative.

Appendix 2—Statement of Chairman Gary Gensler and Commissioners Chilton and Wetjen

We support the Commission's approval of broad comparability determinations that will be used for substituted compliance purposes. For each of the six jurisdictions that has registered swap dealers, we carefully reviewed each regulatory provision of the foreign jurisdictions submitted to us and compared the provision's intended outcome to the Commission's own regulatory objectives. The resulting comparability determinations for entity-level requirements permit non-U.S. swap dealers to comply with regulations in their home jurisdiction as a substitute for compliance with the relevant Commission regulations.

These determinations reflect the Commission's commitment to coordinating our efforts to bring transparency to the swaps market and reduce its risks to the public. The comparability findings for the entity-level requirements are a testament to the comparability of these regulatory systems as we work together in building a strong international regulatory framework.

In addition, we are pleased that the Commission was able to find comparability with respect to swap-specific transaction-level requirements in the European Union and Japan.

The Commission attained this benchmark by working cooperatively with authorities in Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland to reach mutual agreement. The Commission looks forward to continuing to collaborate with both foreign authorities and market participants to build on this progress in the months and years ahead.

Appendix 3—Dissenting Statement of Commissioner Scott D. O'Malia

I respectfully dissent from the Commodity Futures Trading Commission's ("Commission") approval of the Notices of Comparability Determinations for Certain Requirements under the laws of Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland (collectively, "Notices"). While I support the narrow comparability determinations that the Commission has made, moving forward, the Commission must collaborate with foreign regulators to harmonize our respective regimes consistent with the G–20 reforms.

However, I cannot support the Notices because they: (1) Are based on the legally unsound cross-border guidance ("Guidance");[1] (2) are the result of a flawed substituted compliance process; and (3) fail to provide a clear path moving forward. If the Commission's objective for substituted compliance is to develop a narrow rule-by-rule approach that leaves unanswered major regulatory gaps between our regulatory framework and foreign jurisdictions, then I believe that the Commission has successfully achieved its goal today.

Determinations Based on Legally Unsound Guidance

As I previously stated in my dissent, the Guidance fails to articulate a valid statutory foundation for its overbroad scope and inconsistently applies the statute to different activities.[2] Section 2(i) of the Commodity Exchange Act ("CEA") states that the Commission does not have jurisdiction over foreign activities unless "those activities have a direct and significant connection with activities in, or effect on, commerce of the United States * * *"[3] However, the Commission never properly articulated how and when this limiting standard on the Commission's extraterritorial reach is met, which would trigger the application of Title VII of the Dodd-Frank Act[4] and any Commission regulations promulgated thereunder to swap activities that are outside of the United States. Given this statutorily unsound interpretation of the Commission's extraterritorial authority, the Commission often applies CEA section 2(i) inconsistently and arbitrarily to foreign activities.

Accordingly, because the Commission is relying on the legally deficient Guidance to make its substituted compliance determinations, and for the reasons discussed below, I cannot support the Notices. The Commission should have collaborated with foreign regulators to agree on and implement a workable regime of substituted compliance, and then should have made determinations pursuant to that regime.

Flawed Substituted Compliance Process

Substituted compliance should not be a case of picking a set of foreign rules identical to our rules, determining them to be "comparable," but then making no determination regarding rules that require extensive gap analysis to assess to what extent each jurisdiction is, or is not, comparable based on overall outcomes of the regulatory regimes. While I support the narrow comparability determinations that the Commission has made, I am concerned that in a rush to provide some relief, the Commission has made substituted compliance determinations that only afford narrow relief and fail to address major regulatory gaps between our domestic regulatory framework and foreign jurisdictions. I will address a few examples below.

First, earlier this year, the OTC Derivatives Regulators Group ("ODRG") agreed to a number of substantive understandings to improve the cross-border implementation of over-the-counter derivatives reforms.[5] The ODRG specifically agreed that a flexible, outcomes-based approach, based on a broad category-by-category basis, should form the basis of comparability determinations.[6]

However, instead of following this approach, the Commission has made its comparability determinations on a rule-by-rule basis. For example, in Japan's Comparability Determination for Transaction-Level Requirements, the Commission has made a positive comparability determination for some of the detailed requirements under the swap trading relationship documentation provisions, but not for other requirements.[7] This detailed approach clearly contravenes the ODRG's understanding.

Second, in several areas, the Commission has declined to consider a request for a comparability determination, and has also failed to provide an analysis regarding the extent to which the other jurisdiction is, or

[3] CEA section 2(j); 7 U.S.C. 2(j).

[4] Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376 (2010).

[5] *http://www.cftc.gov/PressRoom/PressReleases/pr6678–13.*

[6] *http://www.cftc.gov/ucm/groups/public/@newsroom/documents/file/odrgreport.pdf.* The ODRG agreed to six understandings. Understanding number 2 states that "[a] flexible, outcomes-based approach should form the basis of final assessments regarding equivalence or substituted compliance."

[7] The Commission made a positive comparability determination for Commission regulations 23.504(a)(2), (b)(1), (b)(2), (b)(3), (b)(4), (c), and (d), but not for Commission regulations 23.504(b)(5) and (b)(6).

is not, comparable. For example, the Commission has declined to address or provide any clarity regarding the European Union's regulatory data reporting determination, even though the European Union's reporting regime is set to begin on February 12, 2014. Although the Commission has provided some limited relief with respect to regulatory data reporting, the lack of clarity creates unnecessary uncertainty, especially when the European Union's reporting regime is set to begin in less than two months.

Similarly, Japan receives no consideration for its mandatory clearing requirement, even though the Commission considers Japan's legal framework to be comparable to the U.S. framework. While the Commission has declined to provide even a partial comparability determination, at least in this instance the Commission has provided a reason: the differences in the scope of entities and products subject to the clearing requirement.[8] Such treatment creates uncertainty and is contrary to increased global harmonization efforts.

Third, in the Commission's rush to meet the artificial deadline of December 21, 2013, as established in the Exemptive Order Regarding Compliance with Certain Swap Regulations ("Exemptive Order"),[9] the Commission failed to complete an important piece of the cross-border regime, namely, supervisory memoranda of understanding ("MOUs") between the Commission and fellow regulators.

I have previously stated that these MOUs, if done right, can be a key part of the global harmonization effort because they provide mutually agreed-upon solutions for differences in regulatory regimes.[10] Accordingly, I stated that the Commission should be able to review MOUs alongside the respective comparability determinations and vote on them at the same time. Without these MOUs, our fellow regulators are left wondering whether and how any differences, such as direct access to books and records, will be resolved.

Finally, as I have consistently maintained, the substituted compliance process should allow other regulatory bodies to engage with the full Commission.[11] While I am pleased that the Notices are being voted on by the Commission, the full Commission only gained access to the comment letters from foreign regulators on the Commission's comparability determination draft proposals a few days ago. This is hardly a transparent process.

Unclear Path Forward

Looking forward to next steps, the Commission must provide answers to several outstanding questions regarding these comparability determinations. In doing so, the Commission must collaborate with foreign regulators to increase global harmonization.

First, there is uncertainty surrounding the timing and outcome of the MOUs. Critical questions regarding information sharing, cooperation, supervision, and enforcement will remain unanswered until the Commission and our fellow regulators execute these MOUs.

Second, the Commission has issued time-limited no-action relief for the swap data repository reporting requirements. These comparability determinations will be done as separate notices. However, the timing and process for these determinations remain uncertain.

Third, the Commission has failed to provide clarity on the process for addressing the comparability determinations that it declined to undertake at this time. The Notices only state that the Commission may address these requests in a separate notice at a later date given further developments in the law and regulations of other jurisdictions. To promote certainty in the financial markets, the Commission must provide a clear path forward for market participants and foreign regulators.

The following steps would be a better approach: (1) The Commission should extend the Exemptive Order to allow foreign regulators to further implement their regulatory regimes and coordinate with them to implement a harmonized substituted compliance process: (2) the Commission should implement a flexible, outcomes-based approach to the substituted compliance process and apply it similarly to all jurisdictions; and (3) the Commission should work closely with our fellow regulators to expeditiously implement MOUs that resolve regulatory differences and address regulatory oversight issues.

Conclusion

While I support the narrow comparability determinations that the Commission has made, it was my hope that the Commission would work with foreign regulators to implement a substituted compliance process that would increase the global harmonization effort. I am disappointed that the Commission has failed to implement such a process.

I do believe that in the longer term, the swaps regulations of the major jurisdictions will converge. At this time, however, the Commission's comparability determinations have done little to alleviate the burden of regulatory uncertainty and duplicative compliance with both U.S. and foreign regulations.

The G–20 process delineated and put in place the swaps market reforms in G–20 member nations. It is then no surprise that the Commission must learn to coordinate with foreign regulators to minimize confusion and disruption in bringing much needed clarity to the swaps market. For all these shortcomings, I respectfully dissent from the Commission's approval of the Notices.

COMMODITY FUTURES TRADING COMMISSION

Comparability Determination for the European Union: Certain Entity-Level Requirements

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Comparability Determination for Certain Requirements under the European Market Infrastructure Regulation.

SUMMARY: The following is the analysis and determination of the Commodity Futures Trading Commission ("Commission") regarding certain parts of a joint request by the European Commission ("EC") and the European Securities and Markets Authority ("ESMA") that the Commission determine that laws and regulations applicable in the European Union ("EU") provide a sufficient basis for an affirmative finding of comparability with respect to the following regulatory obligations applicable to swap dealers ("SDs") and major swap participants ("MSPs") registered with the Commission: (i) Chief compliance officer; (ii) risk management; and (iii) swap data recordkeeping; (collectively, the "Internal Business Conduct Requirements").

DATES: *Effective Date:* This determination will become effective immediately upon publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary Barnett, Director, 202–418–5977, *gbarnett@cftc.gov*, Frank Fisanich, Chief Counsel, 202–418–5949, *ffisanich@cftc.gov*, and Ellie Jester, Special Counsel, 202–418–5874, *ajester@cftc.gov*, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 26, 2013, the Commission published in the **Federal Register** its "Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations" (the "Guidance").[1] In the Guidance, the

[1] 78 FR 45292 (July 26, 2013). The Commission originally published proposed and further proposed guidance on July 12, 2012 and January 7, 2013, respectively. *See* Cross-Border Application of Certain Swaps Provisions of the Commodity Exchange Act, 77 FR 41214 (July 12, 2012) and Further Proposed Guidance Regarding Compliance with Certain Swap Regulations, 78 FR 909 (Jan. 7, 2013).

Commission set forth its interpretation of the manner in which it believes that section 2(i) of the Commodity Exchange Act ("CEA") applies Title VII's swap provisions to activities outside the U.S. and informed the public of some of the policies that it expects to follow, generally speaking, in applying Title VII and certain Commission regulations in contexts covered by section 2(i). Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations promulgated thereunder.

In addition to the Guidance, on July 22, 2013, the Commission issued the Exemptive Order Regarding Compliance with Certain Swap Regulations (the "Exemptive Order").[2] Among other things, the Exemptive Order provided time for the Commission to consider substituted compliance with respect to six jurisdictions where non-U.S. SDs are currently organized. In this regard, the Exemptive Order generally provided non-U.S. SDs and MSPs in the six jurisdictions with conditional relief from certain requirements of Commission regulations (those referred to as "Entity-Level Requirements" in the Guidance) until the earlier of December 21, 2013, or 30 days following the issuance of a substituted compliance determination.[3]

On May 7, 2013, the EC and ESMA (collectively, the "applicant") submitted a request that the Commission determine that laws and regulations applicable in the EU provide a sufficient basis for an affirmative finding of comparability with respect to certain Entity-Level Requirements, including the Internal Business Conduct Requirements.[4] The applicant provided Commission staff with an updated submission on August 6, 2013. On November 11, 2013, the application was further supplemented with corrections and additional materials. The following is the Commission's analysis and determination regarding the Internal Business Conduct Requirements, as detailed below.[5]

II. Background

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act[6] ("Dodd-Frank Act" or "Dodd-Frank"), which, in Title VII, established a new regulatory framework for swaps.

Section 722(d) of the Dodd-Frank Act amended the CEA by adding section 2(i), which provides that the swap provisions of the CEA (including any CEA rules or regulations) apply to cross-border activities when certain conditions are met, namely, when such activities have a "direct and significant connection with activities in, or effect on, commerce of the United States" or when they contravene Commission rules or regulations as are necessary or appropriate to prevent evasion of the swap provisions of the CEA enacted under Title VII of the Dodd-Frank Act.[7] In the three years since its enactment, the Commission has finalized 68 rules and orders to implement Title VII of the Dodd-Frank Act. The finalized rules include those promulgated under section 4s of the CEA, which address registration of SDs and MSPs and other substantive requirements applicable to SDs and MSPs. With few exceptions, the delayed compliance dates for the Commission's regulations implementing such section 4s requirements applicable to SDs and MSPs have passed and new SDs and MSPs are now required to be in full compliance with such regulations upon registration with the Commission.[8] Notably, the requirements under Title VII of the Dodd-Frank Act related to SDs and MSPs by their terms apply to all registered SDs and MSPs, irrespective of where they are located, albeit subject to the limitations of CEA section 2(i).

To provide guidance as to the Commission's views regarding the scope of the cross-border application of Title VII of the Dodd-Frank Act, the Commission set forth in the Guidance its interpretation of the manner in which it believes that Title VII's swap provisions apply to activities outside the U.S. pursuant to section 2(i) of the CEA. Among other matters, the Guidance generally described the policy and procedural framework under which the Commission would consider a substituted compliance program with respect to Commission regulations applicable to entities located outside the U.S. Specifically, the Commission addressed a recognition program where compliance with a comparable regulatory requirement of a foreign jurisdiction would serve as a reasonable substitute for compliance with the attendant requirements of the CEA and the Commission's regulations. With respect to the standards forming the basis for any determination of comparability ("comparability determination" or "comparability finding"), the Commission stated:

> In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the applicable requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including but not limited to, the comprehensiveness of those requirement(s), the scope and objectives of the relevant regulatory requirement(s), the comprehensiveness of the foreign regulator's supervisory compliance program, as well as the home jurisdiction's authority to support and enforce its oversight of the registrant. In this context, comparable does not necessarily mean identical. Rather, the Commission would evaluate whether the home jurisdiction's regulatory requirement is comparable to and as comprehensive as the corresponding U.S. regulatory requirement(s).[9]

Upon a comparability finding, consistent with CEA section 2(i) and comity principles, the Commission's policy generally is that eligible entities may comply with a substituted compliance regime, subject to any conditions the Commission places on its finding, and subject to the Commission's retention of its examination authority and its enforcement authority.[10]

In this regard, the Commission notes that a comparability determination cannot be premised on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction, but rather on whether information relevant to the Commission's oversight of an SD or MSP would be directly available to the Commission and any U.S. prudential regulator of the SD or MSP.[11] The

[2] 78 FR 43785 (July 22, 2013).

[3] The Entity-Level Requirements under the Exemptive Order consist of 17 CFR 1.31, 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, 23.606, 23.608, 23.609, and parts 45 and 46 of the Commission's regulations.

[4] For purposes of this notice, the Internal Business Conduct Requirements consist of 17 CFR 3.3, 23.201, 23.203, 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606.

[5] This notice does not address swap data repository reporting ("SDR Reporting"). The Commission may provide a comparability determination with respect to the SDR Reporting requirement in a separate notice.

[10] *See* the Guidance, 78 FR 45342–44.

[11] Under §§ 23.203 and 23.606, all records required by the CEA and the Commission's regulations to be maintained by a registered SD or

Commission's direct access to the books and records required to be maintained by an SD or MSP registered with the Commission is a core requirement of the CEA[12] and the Commission's regulations,[13] and is a condition to registration.[14]

III. Regulation of SDs and MSPs in the EU

On May 7, 2013, the EC and ESMA submitted a request that the Commission assess the comparability of laws and regulations applicable in the EU with the CEA and the Commission's regulations promulgated thereunder. The applicant provided Commission staff with an updated submission on August 6, 2013. On November 11, 2013, the application was further supplemented with corrections and additional materials.

As represented to the Commission by the applicant, swap activities in the EU member states is governed primarily by the European Market Infrastructure Regulation ("EMIR").[15]

EMIR and the Regulatory Technical Standards ("RTS") are regulations with immediate, binding, and direct effect in all EU member states (*i.e.*, no transposition into domestic law required). EMIR entered into force on August 16, 2012.

In addition, as represented to the Commission by the applicant, swap activities in the EU are also governed by a number of regulatory requirements other than EMIR.

Markets in Financial Instruments Directive ("MiFID"):[16] MiFID is a directive and in accordance with the Treaty on the Functioning of the European Union, all Member States of the EU are legally bound to implement the provisions of MiFID by November 1, 2007, by transposing them into their national laws. MiFID applies in particular to investment firms, which comprise any legal person whose regular occupation or business is the provision of one or more investment services to third parties and/or the performance of one or more investment activities on a professional basis. Investment services and activities means any of the services and activities listed in Section A of Annex I of MiFID relating to any of the instruments listed in Section C of Annex I of MiFID. Section C of Annex 1 refers explicitly to swaps as well as "other derivative financial instruments".

Capital Requirements Directive ("CRD"):[17] CRD is also a directive and in accordance with the Treaty on the Functioning of the European Union, all Member States of the EU are legally bound to implement the provisions of CRD by December 31, 2006, by transposing them into their national laws.[18]

Due to the requirement that each EU Member State transpose MiFID and CRD into its national law, the comparability determinations in this notice are based on the representations of the applicant to the Commission that (i) each Member State of the EU where an SD or MSP would seek to rely on substituted compliance on the basis of the comparability of the MiFID or CRD standards has completed the process of transposing MiFID and CRD into its national law;[19] (ii) such national laws have transposed MiFID and CRD without change in any aspect that is material for a comparability determination contained herein; and (iii) such transposed law is in full force and effect as of the time that any SD or MSP seeks to rely on a relevant comparability determination contained herein. The Commission notes that to the extent that any of the foregoing representations are incorrect, an affected comparability determination will not be valid.

In addition to MiFID and CRD, the applicant noted that there are a number of proposed laws and regulations that, when implemented, would affect the regulation of SDs and MSPs in the EU.[20]

IV. Comparable and Comprehensiveness Standard

The Commission's comparability analysis will be based on a comparison of specific foreign requirements against the specific related CEA provisions and Commission regulations as categorized and described in the Guidance. As explained in the Guidance, within the framework of CEA section 2(i) and principles of international comity, the Commission may make a comparability determination on a requirement-by-requirement basis, rather than on the basis of the foreign regime as a whole.[21] In making its comparability determinations, the Commission may include conditions that take into

---

MSP shall be maintained in accordance with Commission regulation 1.31 and shall be open for inspection by representatives of the Commission, the United States Department of Justice, or any applicable prudential regulator.

In its Final Exemptive Order Regarding Compliance with Certain Swap Regulations, 78 FR 858 (Jan. 7, 2013), the Commission noted that an applicant for registration as an SD or MSP must file a Form 7–R with the National Futures Association and that Form 7–R was being modified at that time to address existing blocking, privacy, or secrecy laws of foreign jurisdictions that applied to the books and records of SDs and MSPs acting in those jurisdictions. See id. at 871–72 n. 107. The modifications to Form 7–R were a temporary measure intended to allow SDs and MSPs to apply for registration in a timely manner in recognition of the existence of the blocking, privacy, and secrecy laws. In the Guidance, the Commission clarified that the change to Form 7–R impacts the registration application only and does not modify the Commission's authority under the CEA and its regulations to access records held by registered SDs and MSPs. Commission access to a registrant's books and records is a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto. The Commission has maintained an ongoing dialogue on a bilateral and multilateral basis with foreign regulators and with registrants to address books and records access issues and may consider appropriate measures where requested to do so.

[12] See e.g., sections 4s(f)(1)(C), 4s(j)(3) and (4) of the CEA.

[13] See e.g., §§ 23.203(b) and 23.606.

[14] See supra note 10.

[15] *EMIR:* Regulation (EU) No 648/2012 of the European Parliament and of the Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories. *http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2012:201:0001:0059:EN:PDF*

[16] Directive 2004/39/EC and the relevant implementing measures (Directive 2006/73/EC and Regulation 1287/2006). *http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32004L0039:EN:NOT*

[17] Directive 2006/48/EC of the European Parliament and of the Council of 14 June 2006 relating to the taking up and pursuit of the business of credit institutions.*http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CONSLEG:2006L0048;20100330:EN:PDF.*The current version of CRD will soon be replaced by CRD IV. CRD IV entered into force on June 28, 2013, and shall apply in most of its parts from January 1, 2014.

[18] Because the applicant's request and the Commission's determinations herein are based on the comparability of EU requirements applicable to entities subject to EMIR, MiFID, and CRD, an SD or MSP that is not subject to the requirements of EMIR, MiFID, or CRD upon which the Commission bases its determinations, may not be able to rely on the Commission's comparability determinations herein. The applicant has noted for the Commission that the concept of an MSP is not explicitly mirrored in EU legislation and so it cannot be confirmed that MSPs would always be covered by EMIR, MiFID, or CRD. However, the applicant states that the definition of an "investment firm" under MiFID is considerably wider than that of an SD, and thus MSP's should, in most cases, be caught within the definition of "investment firm."

[19] See the Web site of the European Commission for confirmation of the transposition of MiFID into the national law of each Member State, available here: *http://ec.europa.eu/internal_market/securities/docs/transposition/table_en.pdf.* Note that the issue of partial implementation in the Netherlands was resolved in 2008, *http://ec.europa.eu/eu_law/eulaw/decisions/dec_08_05_06.htm.* The Commission notes that the EC has certified to the Commission that each Member State in which a registered SD or MSP is organized has completed the transposition process (e.g., Ireland, UK, France, Spain, and Germany).

[20] The applicant provided information regarding MiFID II and the Markets in Financial Instruments Regulation ("MiFIR"), *http://ec.europa.eu/internal_market/securities/isd/mifid/index_en.htm,* stating that these two proposals are part of the legislative package for the review of MiFID, and that the legislative process may be concluded with the adoption of the final political agreement by the end of 2013. The applicant further stated that an additional 18 to 24 months will be needed to adopt implementing measures, with the overall package to be applied by the end of 2015.

[21] 78 FR 45343.

account timing and other issues related to coordinating the implementation of reform efforts across jurisdictions.[22]

In evaluating whether a particular category of foreign regulatory requirement(s) is comparable and comprehensive to the corollary requirement(s) under the CEA and Commission regulations, the Commission will take into consideration all relevant factors, including, but not limited to:

- The comprehensiveness of those requirement(s),
- The scope and objectives of the relevant regulatory requirement(s),
- The comprehensiveness of the foreign regulator's supervisory compliance program, and
- The home jurisdiction's authority to support and enforce its oversight of the registrant.[23]

In making a comparability determination, the Commission takes an "outcome-based" approach. An "outcome-based" approach means that when evaluating whether a foreign jurisdiction's regulatory requirements are comparable to, and as comprehensive as, the corollary areas of the CEA and Commission regulations, the Commission ultimately focuses on regulatory outcomes (*i.e.*, the home jurisdiction's requirements do not have to be identical).[24] This approach recognizes that foreign regulatory systems differ and their approaches vary and may differ from how the Commission chose to address an issue, but that the foreign jurisdiction's regulatory requirements nonetheless achieve the regulatory outcome sought to be achieved by a certain provision of the CEA or Commission regulation.

In doing its comparability analysis the Commission may determine that no comparability determination can be made[25] and that the non-U.S. SD or non-U.S. MSP, U.S. bank that is an SD or MSP with respect to its foreign branches, or non-registrant, to the extent applicable under the Guidance, may be required to comply with the CEA and Commission regulations.

The starting point in the Commission's analysis is a consideration of the regulatory objectives of the foreign jurisdiction's regulation of swaps and swap market participants. As stated in the Guidance, jurisdictions may not have swap specific regulations in some areas, and instead have regulatory or supervisory regimes that achieve comparable and comprehensive regulation to the Dodd-Frank Act requirements, but on a more general, entity-wide, or prudential, basis.[26] In addition, portions of a foreign regulatory regime may have similar regulatory objectives, but the means by which these objectives are achieved with respect to swaps market activities may not be clearly defined, or may not expressly include specific regulatory elements that the Commission concludes are critical to achieving the regulatory objectives or outcomes required under the CEA and the Commission's regulations. In these circumstances, the Commission will work with the regulators and registrants in these jurisdictions to consider alternative approaches that may result in a determination that substituted compliance applies.[27]

Finally, the Commission will generally rely on an applicant's description of the laws and regulations of the foreign jurisdiction in making its comparability determination. The Commission considers an application to be a representation by the applicant that the laws and regulations submitted are in full force and effect, that the description of such laws and regulations is accurate and complete, and that, unless otherwise noted, the scope of such laws and regulations encompasses the swaps activities[28] of SDs and MSPs[29] in the relevant jurisdictions.[30] Further, as stated in the Guidance, the Commission expects that an applicant would notify the Commission of any material changes to information submitted in support of a comparability determination (including, but not limited to, changes in the relevant supervisory or regulatory regime) as, depending on the nature of the change, the Commission's comparability determination may no longer be valid.[31]

The Guidance provided a detailed discussion of the Commission's policy regarding the availability of substituted

---

[22] 78 FR 45343.

[23] 78 FR 45343.

[24] 78 FR 45343. The Commission's substituted compliance program would generally be available for SDR Reporting, as outlined in the Guidance, only if the Commission has direct access to all of the data elements that are reported to a foreign trade repository pursuant to the substituted compliance program. Thus, direct access to swap data is a threshold matter to be addressed in a comparability evaluation for SDR Reporting. Moreover, the Commission explains in the Guidance that, due to its technical nature, a comparability evaluation for SDR Reporting "will generally entail a detailed comparison and technical analysis." A more particularized analysis will generally be necessary to determine whether data stored in a foreign trade repository provides for effective Commission use, in furtherance of the regulatory purposes of the Dodd-Frank Act. *See* 78 FR 45345.

[25] A finding of comparability may not be possible for a number of reasons, including the fact that the foreign jurisdiction has not yet implemented or finalized particular requirements.

[26] 78 FR 45343.

[27] As explained in the Guidance, such "approaches used will vary depending on the circumstances relevant to each jurisdiction. One example would include coordinating with the foreign regulators in developing appropriate regulatory changes or new regulations, particularly where changes or new regulations already are being considered or proposed by the foreign regulators or legislative bodies. As another example, the Commission may, after consultation with the appropriate regulators and market participants, include in its substituted compliance determination a description of the means by which certain swaps market participants can achieve substituted compliance within the construct of the foreign regulatory regime. The identification of the means by which substituted compliance is achieved would be designed to address the regulatory objectives and outcomes of the relevant Dodd-Frank Act requirements in a manner that does not conflict with a foreign regulatory regime and reduces the likelihood of inconsistent regulatory obligations. For example, the Commission may specify that [SDs] and MSPs in the jurisdiction undertake certain recordkeeping and documentation for swap activities that otherwise is only addressed by the foreign regulatory regime with respect to financial activities generally. In addition, the substituted compliance determination may include provisions for summary compliance and risk reporting to the Commission to allow the Commission to monitor whether the regulatory outcomes are being achieved. By using these approaches, in the interest of comity, the Commission would seek to achieve its regulatory objectives with respect to the Commission's registrants that are operating in foreign jurisdictions in a manner that works in harmony with the regulatory interests of those jurisdictions." 78 FR 45343–44.

[28] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under 17 CFR Part 23 are limited in scope to the swaps activities of SDs and MSPs.

[29] No SD or MSP that is not legally required to comply with a law or regulation determined to be comparable may voluntarily comply with such law or regulation in lieu of compliance with the CEA and the relevant Commission regulation. Each SD or MSP that seeks to rely on a comparability determination is responsible for determining whether it is subject to the laws and regulations found comparable. Currently, there are no MSPs organized outside the U.S. and the Commission therefore cautions any non-financial entity organized outside the U.S. and applying for registration as an MSP to carefully consider whether the laws and regulations determined to be comparable herein are applicable to such entity.

[30] The Commission has provided the relevant foreign regulator(s) with opportunities to review and correct the applicant's description of such laws and regulations on which the Commission will base its comparability determination. The Commission relies on the accuracy and completeness of such review and any corrections received in making its comparability determinations. A comparability determination based on an inaccurate description of foreign laws and regulations may not be valid.

[31] 78 FR 45345.

compliance [32] for the Internal Business Conduct Requirements.[33]

V. Supervisory Arrangement

In the Guidance, the Commission stated that, in connection with a determination that substituted compliance is appropriate, it would expect to enter into an appropriate memorandum of understanding ("MOU") or similar arrangement [34] with the relevant foreign regulator(s). Although existing arrangements would indicate a foreign regulator's ability to cooperate and share information, "going forward, the Commission and relevant foreign supervisor(s) would need to establish supervisory MOUs or other arrangements that provide for information sharing and cooperation in the context of supervising [SDs] and MSPs." [35]

The Commission is in the process of developing its registration and supervision regime for provisionally-registered SDs and MSPs. This new initiative includes setting forth supervisory arrangements with authorities that have joint jurisdiction over SDs and MSPs that are registered with the Commission and subject to U.S. law. Given the developing nature of the Commission's regime and the fact that the Commission has not negotiated prior supervisory arrangements with certain authorities, the negotiation of supervisory arrangements presents a unique opportunity to develop close working relationships between and among authorities, as well as highlight any potential issues related to cooperation and information sharing.

Accordingly, the Commission is negotiating such a supervisory arrangement with each applicable foreign regulator of an SD or MSP. The Commission expects that the arrangement will establish expectations for ongoing cooperation, address direct access to information,[36] provide for notification upon the occurrence of specified events, memorialize understandings related to on-site visits,[37] and include protections related to the use and confidentiality of non-public information shared pursuant to the arrangement.

These arrangements will establish a roadmap for how authorities will consult, cooperate, and share information. As with any such arrangement, however, nothing in these arrangements will supersede domestic laws or resolve potential conflicts of law, such as the application of domestic secrecy or blocking laws to regulated entities.

VI. Comparability Determination and Analysis

The following section describes the requirements imposed by specific sections of the CEA and the Commission's regulations for the Internal Business Conduct Requirements that are the subject of this comparability determination, and the Commission's regulatory objectives with respect to such requirements. Immediately following a description of the requirement(s) and regulatory objective(s) of the specific Internal Business Conduct Requirements that the requestor submitted for a comparability determination, the Commission provides a description of the foreign jurisdiction's comparable laws, regulations, or rules and whether such laws, regulations, or rules meet the applicable regulatory objective.

The Commission's determinations in this regard and the discussion in this section are intended to inform the public of the Commission's views regarding whether the foreign jurisdiction's laws, regulations, or rules may be comparable and comprehensive as those requirements in the Dodd-Frank Act (and Commission regulations promulgated thereunder) and therefore, may form the basis of substituted compliance. In turn, the public (in the foreign jurisdiction, in the United States, and elsewhere) retains its ability to present facts and circumstances that would inform the determinations set forth in this notice.

As was stated in the Guidance, the Commission recognizes the complex and dynamic nature of the global swap market and the need to take an adaptable approach to cross-border issues, particularly as it continues to work closely with foreign regulators to address potential conflicts with respect to each country's respective regulatory regime. In this regard, the Commission may review, modify, or expand the determinations herein in light of comments received and future developments.

A. Chief Compliance Officer (§ 3.3).

Commission Requirement: Implementing section 4s(k) of the CEA, Commission regulation 3.3 generally sets forth the following requirements for SDs and MSPs:

- An SD or MSP must designate an individual as Chief Compliance Officer ("CCO");
- The CCO must have the responsibility and authority to develop the regulatory compliance policies and procedures of the SD or MSP;
- The CCO must report to the board of directors or the senior officer of the SD or MSP;
- Only the board of directors or a senior officer may remove the CCO;
- The CCO and the board of directors must meet at least once per year;
- The CCO must have the background and skills appropriate for the responsibilities of the position;
- The CCO must not be subject to disqualification from registration under sections 8a(2) or (3) of the CEA;
- Each SD and MSP must include a designation of a CCO in its registration application;

[32] *See* 78 FR 45348–50. The Commission notes that registrants and other market participants are responsible for determining whether substituted compliance is available pursuant to the Guidance based on the comparability determination contained herein (including any conditions or exceptions), and its particular status and circumstances.

[33] This notice does not address § 23.608 (Restrictions on counterparty clearing relationships). The Commission declines to take up the request for a comparability determination with respect to this regulation due to the Commission's view that there are not laws or regulations applicable in the EU to compare with the prohibitions and requirements of § 23.608. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in the EU.

This notice also does not address capital adequacy because the Commission has not yet finalized rules for SDs and MSPs in this area, nor SDR Reporting. The Commission may provide a comparability determination with respect to these requirements at a later date or in a separate notice.

[34] An MOU is one type of arrangement between or among regulators. Supervisory arrangements could include, as appropriate, cooperative arrangements that are memorialized and executed as addenda to existing MOUs or, for example, as independent bilateral arrangements, statements of intent, declarations, or letters.

[35] 78 FR 45344.

[36] Section 4s(j)(3) and (4) of the CEA and Commission regulation 23.606 require a registered SD or MSP to make all records required to be maintained in accordance with Commission regulation 1.31 available promptly upon request to, among others, representatives of the Commission. *See also* 7 U.S.C. 6s(f); 17 CFR 23.203. In the Guidance, the Commission states that it "reserves this right to access records held by registered [SDs] and MSPs, including those that are non-U.S. persons who may comply with the Dodd-Frank recordkeeping requirement through substituted compliance." 78 FR 45345 n. 472; *see also id.* at 45342 n. 461 (affirming the Commission's authority under the CEA and its regulations to access books and records held by registered SDs and MSPs as "a fundamental regulatory tool necessary to properly monitor and examine each registrant's compliance with the CEA and the regulations adopted pursuant thereto").

[37] The Commission retains its examination authority, both during the application process as well as upon and after registration of an SD or MSP. *See* 78 FR 45342 (stating Commission policy that "eligible entities may comply with a substituted compliance regime under certain circumstances, subject, however, to the Commission's retention of its examination authority") and 45344 n. 471 (stating that the "Commission may, as it deems appropriate and necessary, conduct an on-site examination of the applicant").

- The CCO must administer the regulatory compliance policies of the SD or MSP;
- The CCO must take reasonable steps to ensure compliance with the CEA and Commission regulations, and resolve conflicts of interest;
- The CCO must establish procedures for detecting and remediating non-compliance issues;
- The CCO must annually prepare and sign an "annual compliance report" containing: (i) A description of policies and procedures reasonably designed to ensure compliance; (ii) an assessment of the effectiveness of such policies and procedures; (iii) a description of material non-compliance issues and the action taken; (iv) recommendations of improvements in compliance policies; and (v) a certification by the CCO or chief executive officer that, to the best of such officer's knowledge and belief, the annual report is accurate and complete under penalty of law; and
- The annual compliance report must be furnished to the CFTC within 90 days after the end of the fiscal year of the SD or MSP, simultaneously with its annual financial condition report.

Regulatory Objective: The Commission believes that compliance by SDs and MSPs with the CEA and the Commission's rules greatly contributes to the protection of customers, orderly and fair markets, and the stability and integrity of the market intermediaries registered with the Commission. The Commission expects SDs and MSPs to strictly comply with the CEA and the Commission's rules and to devote sufficient resources to ensuring such compliance. Thus, through its CCO rule, the Commission seeks to ensure firms have designated a qualified individual as CCO that reports directly to the board of directors or the senior officer of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually to the Commission and the board or senior officer on compliance of the firm.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as section 4s(k) of the CEA and Commission regulation 3.3.

MiFID Articles 13(2), 13(3) and 18 set forth the general obligation for investment firms (which would include SDs) to establish adequate policies and procedures to ensure compliance with requirements and to identify and properly manage conflicts of interests.

MiFID implementing measure (Commission Directive "MiFID L2D") Articles 5, 6, 9, 21 to 23 clarify, along with ESMA guidelines, the application of some aspects of the MiFID articles, to ensure common, uniform, and consistent application of MiFID and the MiFID L2D across the EU. The main principles are the following:

- Investment firms must appoint a person as compliance officer ("CO") responsible for the compliance function ("CF");
- The CO must have sufficiently broad knowledge/experience and high level of expertise to assume responsibility for the CF and ensure it is effective;
- Written reports must be sent to senior management (which includes boards of directors) on a regular basis (at least annually as well as on an ad-hoc basis when significant compliance matters are discovered);
- The CO must only be appointed and replaced by senior management or supervisory function;
- The CO, but also compliance staff, must have specific knowledge, skills and expertise relevant to the tasks and to the business of the firm;
- Supervisors must ensure compliance with above requirements in the authorization process of investment firms and during on-going supervision;
- CF, under the responsibility of the CO, must monitor and assess the adequacy and effectiveness of measures and procedures to ensure compliance with regulatory obligations and to address any deficiencies, including the obligation to identify and manage conflicts of interests and maintain effective conflicts of interest policies;
- Written report to address, at least annually: The description of implementation and effectiveness of the overall control environment; the summary of major findings of the review of policies and procedures; the summary of inspections and reviews carried out; the risk identified; and the advice on any necessary remedial action;
- The CF must be involved in all material non-routine correspondence with supervisors;
- The CF must be involved in all significant modifications of the organization of the investment firm;
- The CF must be independent;
- Senior management retains ultimate responsibility to ensure firms' compliance with obligations; and
- Investment firms must arrange for all records necessary to enable supervisors to monitor compliance with requirements.

Commission Determination: The Commission finds that the MiFID standards specified above are generally identical in intent to § 3.3 by seeking to ensure firms have designated a qualified individual as the compliance officer that reports directly to a sufficiently senior function of the firm and that has the independence, responsibility, and authority to develop and administer compliance policies and procedures reasonably designed to ensure compliance with the CEA and Commission regulations, resolve conflicts of interest, remediate noncompliance issues, and report annually on compliance of the firm.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the CCO requirements of MiFID are comparable to and as comprehensive as § 3.3, with the exception of § 3.3(f) concerning certifying and furnishing an annual compliance report to the Commission.

Notwithstanding that the Commission has not determined that the requirements of MiFID are comparable to and as comprehensive as § 3.3(f), any SD or MSP to which both § 3.3 and the MiFID standards specified above are applicable would generally be deemed to be in compliance with § 3.3(f) if that SD or MSP complies with the MiFID standards specified above, subject to certifying and furnishing the Commission with the annual report required under the MiFID standards specified above in accordance with § 3.3(f). The Commission notes that it generally expects registrants to submit required reports to the Commission in the English language.

B. Risk Management Duties (§§ 23.600–23.609)

Section 4s(j) of the CEA requires each SD and MSP to establish internal policies and procedures designed to, among other things, address risk management, monitor compliance with position limits, prevent conflicts of interest, and promote diligent supervision, as well as maintain business continuity and disaster recovery programs.[38] The Commission adopted regulations 23.600, 23.601, 23.602, 23.603, 23.605, and 23.606 to implement the statute.[39] The

[38] 7 U.S.C. 6s(j).

[39] *See* Final Swap Dealer and MSP Recordkeeping Rule, 77 FR 20128 (April 3, 2012) (relating to risk management program, monitoring of position

Commission also adopted regulation 23.609, which requires certain risk management procedures for SDs or MSPs that are clearing members of a derivatives clearing organization ("DCO").[40] Collectively, these requirements help to establish a robust and comprehensive internal risk management program for SDs and MSPs with respect to their swaps activities,[41] which is critical to effective systemic risk management for the overall swaps market. In making its comparability determination with regard to these risk management duties, the Commission will consider each regulation individually.[42]

1. Risk Management Program for SDs and MSPs (§ 23.600)

Commission Requirement: Implementing section 4s(j)(2) of the CEA, Commission regulation 23.600 generally requires that:

- Each SD or MSP must establish and enforce a risk management program consisting of a system of written risk management policies and procedures designed to monitor and manage the risks associated with the swap activities of the firm, including without limitation, market, credit, liquidity, foreign currency, legal, operational, and settlement risks, and furnish a copy of such policies and procedures to the CFTC upon application for registration and upon request;
- The SD or MSP must establish a risk management unit independent from the business trading unit;
- The risk management policies and procedures of the SD or MSP must be approved by the firm's governing body;
- Risk tolerance limits and exceptions therefrom must be reviewed and approved quarterly by senior management and annually by the governing body;
- The risk management program must have a system for detecting breaches of risk tolerance limits and alerting supervisors and senior management, as appropriate;
- The risk management program must account for risks posed by affiliates and be integrated at the consolidated entity level;
- The risk management unit must provide senior management and the governing body with quarterly risk exposure reports and upon detection of any material change in the risk exposure of the SD or MSP;
- Risk exposure reports must be furnished to the CFTC within five business days following provision to senior management;
- The risk management program must have a new product policy for assessing the risks of new products prior to engaging in such transactions;
- The risk management program must have policies and procedures providing for trading limits, monitoring of trading, processing of trades, and separation of personnel in the trading unit from personnel in the risk management unit; and
- The risk management program must be reviewed and tested at least annually and upon any material change in the business of the SD or MSP.

Regulatory Objective: Through the required system of risk management, the Commission seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. To this end, the Commission believes the risk management program of an SD or MSP must contain at least the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as section 4s(j)(2) of the CEA and Commission regulation 23.600.

- Under MiFID Article 13(5) & MiFID L2D Article 5, investment firms must have effective procedures for risk assessment, effective control, and safeguard arrangements for information processing systems, sound administrative and accounting procedures, and internal control mechanisms.
- Under MiFID L2D Article 6, investment firms (including SDs) must, subject to a proportionality principle dependent on the size and nature of a firm's business, establish and maintain an independent risk management function that is responsible for the implementation of risk management policies and procedures and that provides reports and advice to senior management regarding risk management.
- MiFID L2D Article 9: Senior management (which includes boards of directors) must take responsibility for firms' compliance with regulatory obligations including risk management.
- MiFID L2D Article 9: Senior management must receive on a frequent basis, and at least annually, written reports on risk management issues, including any appropriate action taken in the event of deficiencies;
- MiFID L2D Article 7: Investment firms must identify the risks relating to the firms' activities, processes and systems, and set the level of risk tolerated by the firm in appropriate instances; must adopt effective arrangements, processes, and mechanisms to manage the risks relating to the firm's activities, processes and systems, in light of the established level of risk tolerance; must monitor the adequacy and effectiveness of its risk management policies and procedures, the level of compliance with arrangements, processes and mechanisms for risk management; and must monitor the adequacy and effectiveness of measures taken to address any deficiencies. The risk management strategy should address credit and counterparty risk; residual risk; market risk; interest rate risk; operational risk; liquidity risk; securitization risk; concentration risk; and risk of excessive leverage.
- Directive 2002/87/EC Article 9: In the case of financial conglomerates, risk management processes must include

---

limits, business continuity and disaster recovery, conflicts of interest policies and procedures, and general information availability, respectively).

[40] *See* Customer Documentation Rule, 77 FR 21278. Also, SDs must comply with Commission regulation 23.608, which prohibits SD providing clearing services to customers from entering into agreements that would: (i) Disclose the identity of a customer's original executing counterparty; (ii) limit the number of counterparties a customer may trade with; (iii) impose counterparty-based position limits; (iv) impair a customer's access to execution of a trade on terms that have a reasonable relationship to the best terms available; or (v) prevent compliance with specified time frames for acceptance of trades into clearing.

[41] "Swaps activities" is defined in Commission regulation 23.600(a)(7) to mean, "with respect to a registrant, such registrant's activities related to swaps and any product used to hedge such swaps, including, but not limited to, futures, options, other swaps or security-based swaps, debt or equity securities, foreign currency, physical commodities, and other derivatives." The Commission's regulations under 17 CFR Part 23 are limited in scope to the swaps activities of SDs and MSPs.

[42] As stated above, this notice does not address § 23.608 (Restrictions on counterparty clearing relationships). The Commission declines to take up the request for a comparability determination with respect to this regulation due to the Commission's view that there are not laws or regulations applicable in the EU to compare with the prohibitions and requirements of § 23.608. The Commission may provide a comparability determination with respect to this regulation at a later date in consequence of further developments in the law and regulations applicable in the EU.

approval and periodical review of the strategies and policies by governing bodies with respect to all the risks assumed; adequate capital adequacy policies to anticipate impacts on risk profiles and capital requirements; risk monitoring and controls at the level of the conglomerates.

- ESMA Guidelines on compliance function requirements (ESMA/2012/388) specify that the assessment of compliance risk should involve the compliance function, including in the case of new business lines or new financial products. Identified risks should be reviewed on a regular basis as well as ad-hoc when necessary to ensure that any emerging risks are taken into consideration. A monitoring program covering all areas of the investment firm's activities should ensure that compliance risk is comprehensively monitored. Specific measures ensure the effectiveness, the permanence and the independence of the compliance function.
- MiFID L2D Articles 21 to 23: Requirements on conflicts of interests include the obligation to adopt measures to ensure the appropriate level of independence to any person working in the firm. This includes measures preventing or controlling the exchange of information, separating the supervision of relevant persons, preventing or limiting the possibility for a person to exercise inappropriate influence over others. Furthermore, firms must ensure that performance of multiple functions does not prevent persons from acting soundly, honestly, and professionally.
- MiFID Article 50: Supervisors can access documents for the discharge of their supervisory duties.
- CRD Annex V: Credit institutions and investment firms must have in place risk management procedures that cover credit, operational, counterparty, market, concentration, securitization, liquidity and interest rate risk.
- CRD Article 22: Credit institution's conformity with regulation is the responsibility of the institution's management body and is subject to ongoing supervisory review.[43]

Commission Determination: The Commission finds that the MiFID, ESMA, and CRD standards specified above are generally identical in intent to § 23.600 by requiring a system of risk management that seeks to ensure that firms are adequately managing the risks of their swaps activities to prevent failure of the SD or MSP, which could result in losses to counterparties doing business with the SD or MSP, and systemic risk more generally. Specifically, the Commission finds that the MiFID, ESMA, and CRD standards specified above comprehensively require SDs and MSPs to establish risk management programs containing the following critical elements:

- Identification of risk categories;
- Establishment of risk tolerance limits for each category of risk and approval of such limits by senior management and the governing body;
- An independent risk management unit to administer a risk management program; and
- Periodic oversight of risk exposures by senior management and the governing body.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the risk management program requirements of MiFID, ESMA, and CRD, as specified above, are comparable to and as comprehensive as § 23.600, with the exception of § 23.600(c)(2) concerning the requirement that each SD and MSP produce a quarterly risk exposure report and provide such report to its senior management, governing body, and the Commission.

Notwithstanding that the Commission has not determined that the requirements of MiFID, ESMA, and CRD are comparable to and as comprehensive as § 23.600(c)(2), any SD or MSP to which both § 23.600 and the MiFID, ESMA, and CRD standards specified above are applicable would generally be deemed to be in compliance with § 23.600(c)(2) if that SD or MSP complies with the MiFID, ESMA, and CRD standards specified above, subject to compliance with the requirement that it produce quarterly risk exposure reports and provide such reports to its senior management, governing body, and the Commission in accordance with § 23.600(c)(2). The Commission notes that it generally expects reports furnished to the Commission by registrants to be in the English language.

2. Monitoring of Position Limits (§ 23.601)

Commission Requirement: Implementing section 4s(j)(1) of the CEA, Commission regulation 23.601 requires each SD or MSP to establish and enforce written policies and procedures that are reasonably designed to monitor for, and prevent violations of, applicable position limits established by the Commission, a designated contract market ("DCM"), or a swap execution facility ("SEF").[44] The policies and procedures must include an early warning system and provide for escalation of violations to senior management (including the firm's governing body).

Regulatory Objective: Generally, position limits are implemented to ensure market integrity, fairness, orderliness, and accurate pricing in the commodity markets. Commission regulation 23.601 thus seeks to ensure that SDs and MSPs have established the necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by the Commission, a DCM, or a SEF. As part of its Risk Management Program, § 23.601 is intended to ensure that established position limits are not breached by the SD or MSP.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as section 4s(j)(1) of the CEA and Commission regulation 23.601.

The applicant requests that the Commission look to the general risk management function requirements outlined in subsection VI(B)(1) (Risk Management Program) above and the general compliance function requirements outlined in subsection VI(A) (Chief Compliance Officer) above for comparable EU law and regulations that would require an SD or MSP to monitor for and comply with applicable position limits. For example:

- MiFID L2D: A firm's compliance function, under the responsibility of the compliance officer, must monitor and assess the adequacy and effectiveness of measures and procedures to ensure compliance with regulatory obligations and to address any deficiencies,

[43] The current version of CRD will soon be replaced by CRD IV. CRD IV entered into force on June 28, 2013, and shall apply in most of its parts from January 1, 2014. The new reference is Article 74 and there will be additional detailed technical rules specifying the arrangements, processes and mechanisms that must be adopted to fulfill this requirement. Article 88 of Directive 2013/36/EU specifies that " the management body defines, oversees and is accountable for the implementation of the governance arrangements that ensure effective and prudent management of an institution." Article 76 specifies tasks assigned to the management body as regards risk management. *http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=:Oj:L:2013:176:0338:0436:EN:PDF.*

[44] The setting of position limits by the Commission, a DCM, or a SEF is subject to requirements under the CEA and Commission regulations other than § 23.601. The setting of position limits and compliance with such limits is not subject to the Commission's substituted compliance regime.

including obligations to identify and manage conflicts of interests and maintain effective conflicts of interest policies; and

- MiFID L2D Article 9: Senior management (which includes boards of directors) must take responsibility for firms' compliance with regulatory obligations including risk management.

The applicant states that the foregoing MiFID standards to monitor the effectiveness of procedures to ensure compliance with regulatory obligations includes regulatory obligations of an SD or MSP, that is subject to such MiFID standards, to comply with applicable standards under the CEA, Commission regulations, and position limits set by the Commission, a DCM, or a SEF.

Commission Determination: The Commission finds that the MiFID standards specified above are generally identical in intent to § 23.601 by requiring SDs and MSPs to establish necessary policies and procedures to monitor the trading of the firm to prevent violations of applicable position limits established by applicable laws and regulations, including those of the Commission, a DCM, or a SEF. Specifically, the Commission finds that the MiFID standards specified above, while not specific to the issue of position limit compliance, nevertheless comprehensively require SDs and MSPs to monitor for regulatory compliance generally, which includes monitoring for compliance with position limits set pursuant to applicable law and the responsibility of senior management (including the board of directors) for such compliance.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the compliance monitoring requirements of MiFID, as specified above, are comparable to and as comprehensive as § 23.601. For the avoidance of doubt, the Commission notes that this determination may not be relied on to relieve an SD or MSP from its obligation to strictly comply with any applicable position limit established by the Commission, a DCM, or a SEF.

3. Diligent Supervision (§ 23.602)

Commission Requirement: Commission regulation 23.602 implements section 4s(h)(1)(B) of the CEA and requires each SD and MSP to establish a system to diligently supervise all activities relating to its business performed by its partners, members, officers, employees, and agents. The system must be reasonably designed to achieve compliance with the CEA and CFTC regulations. Commission regulation 23.602 requires that the supervisory system must specifically designate qualified persons with authority to carry out the supervisory responsibilities of the SD or MSP for all activities relating to its business as an SD or MSP.

Regulatory Objective: The Commission's diligent supervision rule seeks to ensure that SDs and MSPs strictly comply with the CEA and the Commission's rules. To this end, through § 23.602, the Commission seeks to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as section 4s(h)(1)(B) of the CEA and Commission regulation 23.602.

Under MiFID Article 13, MiFID L2D Articles 5, 6, 11, and 12, and ESMA/2012/388, firms must establish policies and procedures sufficient to ensure compliance of the firm, as well as its managers, employees and agents, with all of their compliance obligations as well as rules on personal transactions by these persons. The applicant represents to the Commission that the compliance obligations of firms that are subject to MiFID would cover those of an SD or MSP under the CEA and the Commission's regulations.

Under MiFID Article 9, directors are subject to fit and proper criteria. Under MiFID Article 13, firms must establish and maintain decision-making processes and an organizational structure specifying reporting lines and allocate functions and responsibilities; personnel must have skills, knowledge and expertise necessary for the discharge of their responsibilities; and internal control mechanisms must be maintained to secure compliance as well as internal reporting and communication of information at all relevant levels of the firm.

Commission Determination: The Commission finds that the MiFID standards specified above are generally identical in intent to § 23.602 because such standards seek to ensure that SDs and MSPs strictly comply with applicable law, which would include the CEA and the Commission's regulations. Through the MiFID standards specified above, EU laws and regulations seek to ensure that each SD and MSP not only establishes the necessary policies and procedures that would lead to compliance with applicable law, which would include the CEA and Commission regulations, but also establishes an effective system of internal oversight and enforcement of such policies and procedures to ensure that such policies and procedures are diligently followed.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the internal supervision requirements of MiFID, as specified above, are comparable to and as comprehensive as § 23.602.

4. Business Continuity and Disaster Recovery (§ 23.603)

Commission Requirement: To ensure the proper functioning of the swaps markets and the prevention of systemic risk more generally, Commission regulation 23.603 requires each SD and MSP, as part of its risk management program, to establish a business continuity and disaster recovery plan that includes procedures for, and the maintenance of, back-up facilities, systems, infrastructure, personnel, and other resources to achieve the timely recovery of data and documentation and to resume operations generally within the next business day after the disruption.

Regulatory Objective: Commission regulation 23.603 is intended to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, this requirement seeks to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan within one business day, if necessary.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as Commission regulation 23.603.

- Under MiFID L2D Article 5(3), firms must establish, implement, and maintain an adequate business continuity policy aimed at insuring the preservation of essential data and functions, the maintenance of services, and the timely recovery of such data and functions and timely resumption of services.
- Under MiFID Article 13(4), firms must take reasonable steps to ensure continuity and regularity in the

performance of investment services and activities, including employing appropriate systems, resources, and procedures to accomplish this requirement.

Commission Determination: The Commission finds that the MiFID standards specified above are generally identical in intent to § 23.603 because such standards seek to ensure that any market disruption affecting SDs and MSPs, whether caused by natural disaster or otherwise, is minimized in length and severity. To that end, the Commission finds that the MiFID standards specified above seek to ensure that entities adequately plan for disruptions and devote sufficient resources capable of carrying out an appropriate plan in a timely manner.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the business continuity and disaster recovery requirements of MiFID, as specified above, are comparable to and as comprehensive as § 23.603.

5. Conflicts of Interest (§ 23.605)

Commission Requirement: Section 4s(j)(5) of the CEA and Commission regulation 23.605(c) generally require each SD or MSP to establish structural and institutional safeguards to ensure that the activities of any person within the firm relating to research or analysis of the price or market for any commodity or swap are separated by appropriate informational partitions within the firm from the review, pressure, or oversight of persons whose involvement in pricing, trading, or clearing activities might potentially bias their judgment or supervision.

In addition, section 4s(j)(5) of the CEA and Commission regulation 23.605(d)(1) generally prohibits an SD or MSP from directly or indirectly interfering with or attempting to influence the decision of any clearing unit of any affiliated clearing member of a DCO to provide clearing services and activities to a particular customer, including:

- Whether to offer clearing services to a particular customer;
- Whether to accept a particular customer for clearing derivatives;
- Whether to submit a customer's transaction to a particular DCO;
- Whether to set or adjust risk tolerance levels for a particular customer; or
- Whether to set a customer's fees based on criteria other than those generally available and applicable to other customers.

Commission regulation 23.605(d)(2) generally requires each SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of any affiliated clearing member of a DCO to reasonably ensure compliance with the Act and the prohibitions set forth in § 23.605(d)(1) outlined above.

The Commission observes that § 23.605(d) works in tandem with Commission regulation 1.71, which requires futures commission merchants ("FCMs") that are clearing members of a DCO and affiliated with an SD or MSP to create and maintain an appropriate informational partition between business trading units of the SD or MSP and clearing units of the FCM to reasonably ensure compliance with the Act and the prohibitions set forth in § 1.71(d)(1), which are the same as the prohibitions set forth in § 23.605(d)(1) outlined above.

Finally, § 23.605(e) requires that each SD or MSP have policies and procedures that mandate the disclosure to counterparties of material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM or to clear a derivative through a DCO.

Regulatory Objective: Commission regulation 23.605(c) seeks to ensure that research provided to the general public by an SD or MSP is unbiased and free from the influence of the interests of an SD or MSP arising from the SD's or MSP's trading business.

In addition, § 23.605(d) (working in tandem with § 1.71) seeks to ensure open access to the clearing of swaps by requiring that access to and the provision of clearing services provided by an affiliate of an SD or MSP are not influenced by the interests of an SD's or MSP's trading business.

Finally, § 23.605(e) seeks to ensure equal access to trading venues and clearinghouses, as well as orderly and fair markets, by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as Commission regulation 23.605(c).

- MiFID Articles 13(3) and 18 require that SDs maintain and operate effective organizational and administrative arrangements with a view to preventing conflicts of interest from adversely affecting the interests of its clients.
- Under MiFID L2D Articles 21 to 23, SDs are obligated to adopt measures to ensure the appropriate level of independence of any person working in the firm. This includes measures preventing or controlling the exchange of information, separating the supervision of relevant persons, and preventing or limiting the possibility for a person to exercise inappropriate influence over others. Furthermore, firms must ensure that performance of multiple functions does not prevent persons from acting soundly, honestly, and professionally.
- Under MiFID L2D Articles 24 to 25, SDs must maintain and operate effective organizational and administrative arrangements and take all reasonable steps designed to prevent conflicts of interest from adversely affecting the interests of its clients.
- Under MiFID Articles 18 and MiFID L2D Article 22, SDs must develop a written conflicts of interest policy appropriate to the size and organization of the firm that identifies circumstances that might give rise to conflicts entailing a material risk of damage to the interests of one or more clients and specify procedures to be followed to manage such conflicts. The general conflicts policy has to be disclosed to clients. Disclosure is also needed when organizational arrangements to manage conflicts are not sufficient to ensure, with reasonable confidence, that the risk of damage to client interests will be prevented.
- Under MiFID L2D Article 25, an SD that prepares or disseminates research recommendations must take reasonable care to ensure that research recommendations are fairly presented and must disclose its interests or indicate conflicts of interest concerning relevant investments.
- Under MiFID L2D Article 25, in addition to the conflicts of interest requirements set out above, steps must be taken to ensure that restrictions are in place to avoid conflicts with respect to research personnel (*e.g.*, financial analysts), including restrictions on personal account dealing and inducements.
- Under MiFID L2D Article 24, research recommendations must also include a disclosure of interests or indicate conflicts of interests concerning the relevant investments.

The applicant states that the foregoing MiFID standards would require any SD or MSP that is subject to such MiFID standards to resolve or mitigate conflicts of interests in the provision of clearing services by a clearing member that is linked to that SD or MSP, or conflicts of interests in the execution of a derivative

by a client on a particular execution venue, including an eligible SEF or DCM, or conflicts of interests in the clearing of a derivative through a CCP, including an eligible DCO, through measures including appropriate information firewalls and disclosures.

Commission Determination: The Commission finds that the MiFID standards specified above with respect to conflicts of interest that may arise in producing or distributing research are generally identical in intent to § 23.605(c) because such standards seek to ensure that research provided to the general public by an SD is unbiased and free from the influence of the interests of an SD arising from the SD's trading business.

With respect to conflicts of interest that may arise in the provision of clearing services by an affiliate of an SD or MSP, the Commission further finds that although the general conflicts of interest prevention requirements under the MiFID standards specified above do not require with specificity that access to and the provision of clearing services provided by an affiliate of an SD or MSP not be improperly influenced by the interests of an SD's or MSP's trading business, such general requirements would require prevention and remediation of such improper influence when recognized or discovered. Thus such standards would ensure open access to clearing.

Finally, although not as specific as the requirements of § 23.605(e) (Undue influence on counterparties), the Commission finds that the general disclosure requirements of the MiFID standards specified above would ensure equal access to trading venues and clearinghouses by requiring that each SD and MSP disclose to counterparties any material incentives or conflicts of interest regarding the decision of a counterparty to execute a derivative on a SEF or DCM, or to clear a derivative through a DCO.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements found in the MiFID standards specified above in relation to conflicts of interest are comparable to and as comprehensive as § 23.605.

6. Availability of Information for Disclosure and Inspection (§ 23.606)

Commission Requirement: Commission regulation 23.606 implements sections 4s(j)(3) and (4) of the CEA, and requires each SD and MSP to disclose to the Commission, and an SD's or MSP's U.S. prudential regulator (if any) comprehensive information about its swap activities, and to establish and maintain reliable internal data capture, processing, storage, and other operational systems sufficient to capture, process, record, store, and produce all information necessary to satisfy its duties under the CEA and Commission regulations. Such systems must be designed to provide such information to the Commission and an SD's or MSP's U.S. prudential regulator within the time frames set forth in the CEA and Commission regulations and upon request.

Regulatory Objective: Commission regulation 23.606 seeks to ensure that each SD and MSP captures and maintains comprehensive information about their swap activities, and is able to retrieve and disclose such information to the Commission and its U.S. prudential regulator, if any, as necessary for compliance with the CEA and the Commission's regulations and for purposes of Commission oversight, as well as oversight by the SD's or MSP's U.S. prudential regulator, if any.

The Commission observes that it would be impossible to meet the regulatory objective of § 23.606 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.606 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as Commission regulation 23.606.

Under MiFID Article 13(6) & 25(2) & 50, investment firms are required to maintain adequate and orderly records of their business and internal organization. Firms must maintain at the disposal of the regulator, for at least five years, the relevant data relating to their transactions in financial instruments. Among other things, supervisors have the authority to access any document in any form whatsoever and to receive a copy of it, to demand information from any person, and to carry out on-site inspections.

Commission Determination: The Commission finds that the MiFID standards specified above are generally identical in intent to § 23.606 because such standards seek to ensure that each SD and MSP captures and stores comprehensive information about their swap activities, and are able to retrieve and disclose such information as necessary for compliance with applicable law and for purposes of regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements of MiFID with respect to the availability of information for inspection and disclosure, as specified above, are comparable to, and as comprehensive as, § 23.606, with the exception of § 23.606(a)(2) concerning the requirement that an SD or MSP make information required by § 23.606(a)(1) available promptly upon request to Commission staff and the staff of an applicable prudential regulator. The applicant has not submitted any provision of law or regulations applicable in the EU upon which the Commission could make a finding that SDs and MSPs would be required to retrieve and disclose comprehensive information about their swap activities to the Commission or any U.S. prudential regulator as necessary for compliance with the CEA and Commission regulations, and for purposes of Commission oversight and the oversight of any U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the requirements of MiFID are comparable to and as comprehensive as § 23.606(a)(2), any SD or MSP to which both § 23.606 and the MiFID standards specified above are applicable would generally be deemed to be in compliance with § 23.606(a)(2) if that SD or MSP complies with the MiFID standards specified above, subject to compliance with the requirement that it produce information to Commission staff and the staff of an applicable U.S. prudential regulator in accordance with § 23.606(a)(2).

7. Clearing Member Risk Management (§ 23.609)

Commission Requirement: Commission regulation 23.609 generally requires each SD or MSP that is a clearing member of a DCO to:

- Establish risk-based limits based on position size, order size, margin requirements, or similar factors;
- Screen orders for compliance with the risk-based limits;
- Monitor for adherence to the risk-based limits intra-day and overnight;
- Conduct stress tests under extreme but plausible conditions of all positions at least once per week;

- Evaluate its ability to meet initial margin requirements at least once per week;
- Evaluate its ability to meet variation margin requirements in cash at least once per week;
- Evaluate its ability to liquidate positions it clears in an orderly manner, and estimate the cost of liquidation; and
- Test all lines of credit at least once per year.

Regulatory Objective: Through Commission regulation 23.609, the Commission seeks to ensure the financial integrity of the markets and the clearing system, to avoid systemic risk, and to protect customer funds. Effective risk management by SDs and MSPs that are clearing members is essential to achieving these objectives. A failure of risk management can cause a clearing member to become insolvent and default to a DCO. Such default can disrupt the markets and the clearing system and harm customers.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as Commission regulation 23.609.

- Under MiFID Article 13(5) & MiFID L2D Article 5, investment firms must have effective procedures for risk assessment, effective control, and safeguard arrangements for information processing systems, sound administrative and accounting procedures, and internal control mechanisms.
- Under MiFID L2D Article 6, investment firms must, subject to a proportionality principle dependent on the size and nature of a firm's business, establish and maintain an independent risk management function that is responsible for the implementation of risk management policies and procedures and that provides reports and advice to senior management regarding risk management.
- MiFID L2D Article 9: Senior management (which includes boards of directors) must take responsibility for firms' compliance with regulatory obligations including risk management.
- MiFID L2D Article 9: Senior management must receive on a frequent basis, and at least annually, written reports on risk management issues, including any appropriate action taken in the event of deficiencies;
- MiFID L2D Article 7: Investment firms must identify the risks relating to the firms' activities, processes and systems, and set the level of risk tolerated by the firm in appropriate instances; must adopt effective arrangements, processes, and mechanisms to manage the risks relating to the firm's activities, processes and systems, in light of the established level of risk tolerance; must monitor the adequacy and effectiveness of its risk management policies and procedures, the level of compliance with arrangements, processes and mechanisms for risk management; and must monitor the adequacy and effectiveness of measures taken to address any deficiencies. The risk management strategy should address credit and counterparty risk; residual risk; market risk; interest rate risk; operational risk; liquidity risk; securitization risk; concentration risk; and risk of excessive leverage.
- Directive 2002/87/EC Article 9: In the case of financial conglomerates, risk management processes must include approval and periodical review of the strategies and policies by governing bodies with respect to all the risks assumed; adequate capital adequacy policies to anticipate impacts on risk profiles and capital requirements; risk monitoring and controls at the level of the conglomerates.
- ESMA Guidelines on compliance function requirements (ESMA/2012/388) specify that the assessment of compliance risk should involve the compliance function, including in the case of new business lines or new financial products. Identified risks should be reviewed on a regular basis as well as ad-hoc when necessary to ensure that any emerging risks are taken into consideration. A monitoring program covering all areas of the investment firm's activities should ensure that compliance risk is comprehensively monitored. Specific measures ensure the effectiveness, the permanence and the independence of the compliance function.
- MiFID L2D Articles 21 to 23: Requirements on conflicts of interests include the obligation to adopt measures to ensure the appropriate level of independence to any person working in the firm. This includes measures preventing or controlling the exchange of information, separating the supervision of relevant persons, preventing or limiting the possibility for a person to exercise inappropriate influence over others. Furthermore, firms must ensure that performance of multiple functions does not prevent persons from acting soundly, honestly, and professionally.
- MiFID Article 50: Supervisors can access documents for the discharge of their supervisory duties.
- CRD Annex V: Credit institutions and investment firms must have in place risk management procedures that cover credit, operational, counterparty, market, concentration, securitization, liquidity and interest rate risk.
- CRD Article 22: Credit institution's conformity with regulation is the responsibility of the institution's management body and is subject to ongoing supervisory review.[45]

Specifically, the applicants state that any SD or MSP subject to MiFID and CRD that is a clearing member of a CCP, including an eligible DCO, would be required under the foregoing EU law and regulations to:

- Establish risk-based limits based on position size, order size, margin requirements, or similar factors;
- Screen orders for compliance with the risk-based limits;
- Monitor for adherence to the risk-based limits intra-day and overnight;
- Conduct stress tests under extreme but plausible conditions of all positions at least once per week;
- Evaluate its ability to meet initial margin requirements at least once per week;
- Evaluate its ability to meet variation margin requirements in cash at least once per week;
- Evaluate its ability to liquidate positions it clears in an orderly manner, and estimate the cost of liquidation; and
- Test all lines of credit at least once per year.

Commission Determination: The Commission finds that the MiFID, ESMA, and CRD standards specified above are generally identical in intent to § 23.609 because such standards seek to ensure the financial integrity of the markets and the clearing system, to avoid systemic risk, and to protect customer funds.

The Commission notes that the MiFID, ESMA, and CRD standards specified above are not as specific as § 23.609 with respect to ensuring that SDs and MSPs that are clearing members of a DCO establish detailed procedures and limits for clearing member risk management purposes.

[45] The current version of CRD will soon be replaced by CRD IV. CRD IV entered into force on June 28, 2013, and shall apply in most of its parts from January 1, 2014. The new reference is Article 74 and there will be additional detailed technical rules specifying the arrangements, processes and mechanisms that must be adopted to fulfill this requirement. Article 88 of Directive 2013/36/EU specifies that " the management body defines, oversees and is accountable for the implementation of the governance arrangements that ensure effective and prudent management of an institution." Article 76 specifies tasks assigned to the management body as regards risk management. *http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2013:176:0338:0436:EN:PDF.*

Nevertheless, the Commission finds that the general requirements under the MiFID, ESMA, and CRD standards specified above, implemented in the context of clearing member risk management and pursuant to the statements of the applicants, meet the Commission's regulatory objective specified above.

Based on the foregoing and the statements of the applicants above, the Commission hereby determines that the clearing member risk management requirements of the MiFID, ESMA, and CRD standards specified above are comparable to and as comprehensive as § 23.609.

C. Swap Data Recordkeeping (§§ 23.201 and 23.203)

Commission Requirement: Sections 4s(f)(1)(B) and 4s(g)(1) of the CEA, and Commission regulation 23.201 generally require SDs and MSPs to retain records of each transaction, each position held, general business records (including records related to complaints and sales and marketing materials), records related to governance, financial records, records of data reported to SDRs, and records of real-time reporting data along with a record of the date and time the SD or MSP made such reports. Transaction records must be kept in a form and manner identifiable and searchable by transaction and counterparty.

Commission regulation 23.203, requires SDs and MSPs to maintain records of a swap transaction until the termination, maturity, expiration, transfer, assignment, or novation date of the transaction, and for a period of five years after such date. Records must be "readily accessible" for the first two years of the five year retention period (consistent with § 1.31).

The Commission notes that the comparability determination below with respect to §§ 23.201 and 23.203 encompasses both swap data recordkeeping generally and swap data recordkeeping relating to complaints and marketing and sales materials in accordance with § 23.201(b)(3) and (4).[46]

Regulatory Objective: Through the Commission's regulations requiring SDs and MSPs to keep comprehensive records of their swap transactions and related data, the Commission seeks to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

The Commission's regulations require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

By requiring comprehensive records of swap data, the Commission seeks to ensure that SDs and MSPs employ effective risk management, and strictly comply with Commission regulations. Further, such records facilitate effective regulatory oversight.

The Commission observes that it would be impossible to meet the regulatory objective of §§ 23.201 and 23.203 unless the required information is available to the Commission and any U.S. prudential regulator under the foreign legal regime. Thus, a comparability determination with respect to the information access provisions of § 23.203 would be premised on whether the relevant information would be available to the Commission and any U.S. prudential regulator of the SD or MSP, not on whether an SD or MSP must disclose comprehensive information to its regulator in its home jurisdiction.

Comparable EU Law and Regulations: The applicant has represented to the Commission that the following provisions of law and regulations applicable in the EU are in full force and effect in the EU, and comparable to and as comprehensive as sections 4s(f)(1)(B) and 4s(g)(1) of the CEA and §§ 23.201 and 23.203.

- MiFID Article 13(6): Firms are required to maintain records of all services and transactions undertaken by the firm that are sufficient to enable regulatory authorities to monitor compliance with MiFID and to ascertain whether the firm has complied with all obligations with respect to clients or potential clients.
- MiFID L2R Article 7: Firms are required to keep detailed records in relation to every client order and decision to deal, and every client order executed or transmitted.
- MiFID L2D Article 51: All required records must be retained in a medium available for future reference by the regulator, and in a form/manner that:
  - o Allows the regulator to access them readily and reconstitute each key stage of processing each transaction;
  - o Allows corrections or other amendments, and the contents of the records prior to such corrections or amendments, to be easily ascertained; and
  - o Ensures that records are not manipulated or altered.
- MiFID Article 25(2): Firms must keep at the disposal of the regulator, for at least five years, the relevant data relating to all transactions in financial instruments which they have carried out, whether on their own account or on behalf of a client.
- CESR (now ESMA) developed recommendations on the list of minimum records to be kept by firms in accordance with MiFID L2D and the point in time at which the record should be created. It includes marketing communications, client information, internal procedures, complaints records, complaints handling, etc.

Commission Determination: The Commission finds that the MiFID and ESMA standards specified above are generally identical in intent to §§ 23.201 and 23.203 because such standards seek to ensure the effectiveness of the internal controls of SDs and MSPs, and transparency in the swaps market for regulators and market participants.

In addition, the Commission finds that the MiFID and ESMA standards specified above require SDs and MSPs to keep swap data in a level of detail sufficient to enable regulatory authorities to understand an SD's or MSP's swaps business and to assess its swaps exposure.

Finally, the Commission finds that the MiFID and ESMA standards specified above, by requiring comprehensive records of swap data, seek to ensure that SDs and MSPs employ effective risk management, seek to ensure that SDs and MSPs strictly comply with applicable regulatory requirements (including the CEA and Commission regulations), and that such records facilitate effective regulatory oversight.

Based on the foregoing and the representations of the applicant, the Commission hereby determines that the requirements of MiFID and ESMA with respect to swap data recordkeeping, as specified above, are comparable to, and as comprehensive as, §§ 23.201 and 23.203, with the exception of § 23.203(b)(2) concerning the requirement that an SD or MSPs make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator. The applicant has not submitted any provision of law or regulations applicable in the EU upon which the Commission could make a finding that SDs and MSPs would be required to make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator.

Notwithstanding that the Commission has not determined that the

[46] *See* the Guidance for a discussion of the availability of substituted compliance with respect to swap data recordkeeping, 78 FR 45332–33.

requirements of MiFID and ESMA are comparable to and as comprehensive as § 23.203(b)(2), any SD or MSP to which both § 23.203 and the MiFID and ESMA standards specified above are applicable would generally be deemed to be in compliance with § 23.203(b)(2) if that SD or MSP complies with the MiFID and ESMA standards specified above, subject to compliance with the requirement that it make records required by § 23.201 open to inspection by any representative of the Commission, the United States Department of Justice, or any applicable U.S. prudential regulator in accordance with § 23.203(b)(2).

Issued in Washington, DC on December 20, 2013, by the Commission.

Christopher J. Kirkpatrick,

Deputy Secretary of the Commission.

Appendices to Comparability Determination for the European Union: Certain Entity-Level Requirements

Appendix 1—Commission Voting Summary

On this matter, Chairman Gensler and Commissioners Chilton and Wetjen voted in the affirmative. Commissioner O'Malia voted in the negative.

Appendix 2—Joint Statement of Chairman Gary Gensler and Commissioners Bart Chilton and Mark Wetjen

We support the Commission's approval of broad comparability determinations that will be used for substituted compliance purposes. For each of the six jurisdictions that has registered swap dealers, we carefully reviewed each regulatory provision of the foreign jurisdictions submitted to us and compared the provision's intended outcome to the Commission's own regulatory objectives. The resulting comparability determinations for entity-level requirements permit non-U.S. swap dealers to comply with regulations in their home jurisdiction as a substitute for compliance with the relevant Commission regulations.

These determinations reflect the Commission's commitment to coordinating our efforts to bring transparency to the swaps market and reduce its risks to the public. The comparability findings for the entity-level requirements are a testament to the comparability of these regulatory systems as we work together in building a strong international regulatory framework.

In addition, we are pleased that the Commission was able to find comparability with respect to swap-specific transaction-level requirements in the European Union and Japan.

The Commission attained this benchmark by working cooperatively with authorities in Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland to reach mutual agreement. The Commission looks forward to continuing to collaborate with both foreign authorities and market participants to build on this progress in the months and years ahead.

Appendix 3—Statement of Dissent by Commissioner Scott D. O'Malia

I respectfully dissent from the Commodity Futures Trading Commission's ("Commission") approval of the Notices of Comparability Determinations for Certain Requirements under the laws of Australia, Canada, the European Union, Hong Kong, Japan, and Switzerland (collectively, "Notices"). While I support the narrow comparability determinations that the Commission has made, moving forward, the Commission must collaborate with foreign regulators to harmonize our respective regimes consistent with the G–20 reforms.

However, I cannot support the Notices because they: (1) Are based on the legally unsound cross-border guidance ("Guidance");[1] (2) are the result of a flawed substituted compliance process; and (3) fail to provide a clear path moving forward. If the Commission's objective for substituted compliance is to develop a narrow rule-by-rule approach that leaves unanswered major regulatory gaps between our regulatory framework and foreign jurisdictions, then I believe that the Commission has successfully achieved its goal today.

Determinations Based on Legally Unsound Guidance

As I previously stated in my dissent, the Guidance fails to articulate a valid statutory foundation for its overbroad scope and inconsistently applies the statute to different activities.[2] Section 2(i) of the Commodity Exchange Act ("CEA") states that the Commission does not have jurisdiction over foreign activities unless "those activities have a direct and significant connection with activities in, or effect on, commerce of the United States * * *"[3] However, the Commission never properly articulated how and when this limiting standard on the Commission's extraterritorial reach is met, which would trigger the application of Title VII of the Dodd-Frank Act[4] and any Commission regulations promulgated thereunder to swap activities that are outside of the United States. Given this statutorily unsound interpretation of the Commission's extraterritorial authority, the Commission often applies CEA section 2(i) inconsistently and arbitrarily to foreign activities.

Accordingly, because the Commission is relying on the legally deficient Guidance to make its substituted compliance determinations, and for the reasons discussed below, I cannot support the Notices. The Commission should have collaborated with foreign regulators to agree on and implement a workable regime of substituted compliance, and then should have made determinations pursuant to that regime.

Flawed Substituted Compliance Process

Substituted compliance should not be a case of picking a set of foreign rules identical to our rules, determining them to be "comparable," but then making no determination regarding rules that require extensive gap analysis to assess to what extent each jurisdiction is, or is not, comparable based on overall outcomes of the regulatory regimes. While I support the narrow comparability determinations that the Commission has made, I am concerned that in a rush to provide some relief, the Commission has made substituted compliance determinations that only afford narrow relief and fail to address major regulatory gaps between our domestic regulatory framework and foreign jurisdictions. I will address a few examples below.

First, earlier this year, the OTC Derivatives Regulators Group ("ODRG") agreed to a number of substantive understandings to improve the cross-border implementation of over-the-counter derivatives reforms.[5] The ODRG specifically agreed that a flexible, outcomes-based approach, based on a broad category-by-category basis, should form the basis of comparability determinations.[6]

However, instead of following this approach, the Commission has made its comparability determinations on a rule-by-rule basis. For example, in Japan's Comparability Determination for Transaction-Level Requirements, the Commission has made a positive comparability determination for some of the detailed requirements under the swap trading relationship documentation provisions, but not for other requirements.[7] This detailed approach clearly contravenes the ODRG's understanding.

Second, in several areas, the Commission has declined to consider a request for a comparability determination, and has also failed to provide an analysis regarding the extent to which the other jurisdiction is, or is not, comparable. For example, the Commission has declined to address or provide any clarity regarding the European Union's regulatory data reporting determination, even though the European Union's reporting regime is set to begin on February 12, 2014. Although the Commission has provided some limited relief with respect to regulatory data reporting, the lack of clarity creates unnecessary uncertainty, especially when the European Union's reporting regime is set to begin in less than two months.

Similarly, Japan receives no consideration for its mandatory clearing requirement, even though the Commission considers Japan's

[5] *http://www.cftc.gov/PressRoom/PressReleases/pr6678-13.*

[6] *http://www.cftc.gov/ucm/groups/public/@newsroom/documents/file/odrgreport.pdf.* The ODRG agreed to six understandings. Understanding number 2 states that "[a] flexible, outcomes-based approach should form the basis of final assessments regarding equivalence or substituted compliance."

[7] The Commission made a positive comparability determination for Commission regulations 23.504(a)(2), (b)(1), (b)(2), (b)(3), (b)(4), (c), and (d), but not for Commission regulations 23.504(b)(5) and (b)(6).

legal framework to be comparable to the U.S. framework. While the Commission has declined to provide even a partial comparability determination, at least in this instance the Commission has provided a reason: the differences in the scope of entities and products subject to the clearing requirement.[8] Such treatment creates uncertainty and is contrary to increased global harmonization efforts.

Third, in the Commission's rush to meet the artificial deadline of December 21, 2013, as established in the Exemptive Order Regarding Compliance with Certain Swap Regulations ("Exemptive Order"),[9] the Commission failed to complete an important piece of the cross-border regime, namely, supervisory memoranda of understanding ("MOUs") between the Commission and fellow regulators.

I have previously stated that these MOUs, if done right, can be a key part of the global harmonization effort because they provide mutually agreed-upon solutions for differences in regulatory regimes.[10] Accordingly, I stated that the Commission should be able to review MOUs alongside the respective comparability determinations and vote on them at the same time. Without these MOUs, our fellow regulators are left wondering whether and how any differences, such as direct access to books and records, will be resolved.

Finally, as I have consistently maintained, the substituted compliance process should allow other regulatory bodies to engage with the full Commission.[11] While I am pleased that the Notices are being voted on by the Commission, the full Commission only gained access to the comment letters from foreign regulators on the Commission's comparability determination draft proposals a few days ago. This is hardly a transparent process.

Unclear Path Forward

Looking forward to next steps, the Commission must provide answers to several outstanding questions regarding these comparability determinations. In doing so, the Commission must collaborate with foreign regulators to increase global harmonization.

First, there is uncertainty surrounding the timing and outcome of the MOUs. Critical questions regarding information sharing, cooperation, supervision, and enforcement will remain unanswered until the Commission and our fellow regulators execute these MOUs.

Second, the Commission has issued time-limited no-action relief for the swap data repository reporting requirements. These comparability determinations will be done as separate notices. However, the timing and process for these determinations remain uncertain.

Third, the Commission has failed to provide clarity on the process for addressing the comparability determinations that it declined to undertake at this time. The Notices only state that the Commission may address these requests in a separate notice at a later date given further developments in the law and regulations of other jurisdictions. To promote certainty in the financial markets, the Commission must provide a clear path forward for market participants and foreign regulators.

The following steps would be a better approach: (1) The Commission should extend the Exemptive Order to allow foreign regulators to further implement their regulatory regimes and coordinate with them to implement a harmonized substituted compliance process; (2) the Commission should implement a flexible, outcomes-based approach to the substituted compliance process and apply it similarly to all jurisdictions; and (3) the Commission should work closely with our fellow regulators to expeditiously implement MOUs that resolve regulatory differences and address regulatory oversight issues.

Conclusion

While I support the narrow comparability determinations that the Commission has made, it was my hope that the Commission would work with foreign regulators to implement a substituted compliance process that would increase the global harmonization effort. I am disappointed that the Commission has failed to implement such a process.

I do believe that in the longer term, the swaps regulations of the major jurisdictions will converge. At this time, however, the Commission's comparability determinations have done little to alleviate the burden of regulatory uncertainty and duplicative compliance with both U.S. and foreign regulations.

The G–20 process delineated and put in place the swaps market reforms in G–20 member nations. It is then no surprise that the Commission must learn to coordinate with foreign regulators to minimize confusion and disruption in bringing much needed clarity to the swaps market. For all these shortcomings, I respectfully dissent from the Commission's approval of the Notices.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Proposed Information Collection; Comment Request

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (CNCS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. Sec. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirement on respondents can be properly assessed.

Currently, CNCS is soliciting comments concerning its new AmeriCorps VISTA Sponsor Recruitment Practices Survey. AmeriCorps VISTA sponsor organizations will provide information about their approach to VISTA member recruitment in order for CNCS to design recruitment strategies and materials for the VISTA program. Completion of this information collection is not required to be considered for or to obtain grant funding support.

Copies of the information collection request can be obtained by contacting the office listed in the Addresses section of this notice.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by February 25, 2014.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) By mail sent to: Corporation for National and Community Service, AmeriCorps VISTA; Elizabeth Matthews, Outreach Specialist, 9110B; 1201 New York Avenue NW., Washington, DC 20525.

(2) By hand delivery or by courier to the CNCS mailroom at Room 8100 at the mail address given in paragraph (1) above, between 9:00 a.m. and 4:00 p.m. Eastern Time, Monday through Friday, except Federal holidays.

(3) Electronically through *www.regulations.gov.*

Individuals who use a telecommunications device for the deaf (TTY–TDD) may call 1–800–833–3722 between 8:00 a.m. and 8:00 p.m. Eastern Time, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Elizabeth Matthews, (202–606–6774) or by email at *ematthews@cns.gov.*

SUPPLEMENTARY INFORMATION: CNCS is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of CNCS, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are expected to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submissions of responses).

Background

AmeriCorps VISTA sponsor organizations will provide information about their approach to VISTA member recruitment in order for CNCS to design recruitment strategies and materials for the VISTA program. The information will be collected through the tool, SurveyGizmo, which will be delivered electronically through an email.

Current Action

This is a new information collection request. CNCS would like to submit AmeriCorps VISTA Sponsor Recruitment Practices Survey. AmeriCorps VISTA sponsor organizations will provide information about their approach to VISTA member recruitment in order for CNCS to design recruitment strategies and materials for the VISTA program. Completion of this information collection is not required to be considered for or to obtain grant funding support.

The information collection will otherwise be used in the same manner as the existing application. CNCS also seeks to continue using the current application until the revised application is approved by OMB.

Type of Review: New.

Agency: Corporation for National and Community Service.

Title: AmeriCorps VISTA Sponsor Recruitment Practices Survey.

OMB Number: None.

Agency Number: None.

Affected Public: AmeriCorps VISTA sponsor organizations. Sponsor organizations direct the VISTA project, supervise the AmeriCorps VISTA members, and provide necessary administrative support to complete the goals and objectives of the project.

Total Respondents: 1,800.

Frequency: Once per respondent.

Average Time Per Response: Averages 10 minutes.

Estimated Total Burden Hours: 18,000 hours.

Total Burden Cost (capital/startup): None.

Total Burden Cost (operating/maintenance): None.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: December 19, 2013.

Mary Strasser,

Director, AmeriCorps VISTA.

BILLING CODE 6050–28–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2013–OS–0233]

Proposed Collection; Comment Request

AGENCY: Office of the Secretary of Defense, DoD.

ACTION: Notice and request for comments.

SUMMARY: In compliance with Section 3506(c)(2)(A) of the *Paperwork Reduction Act of 1995*, and as part of an effort to streamline the process to seek feedback from the public on service delivery, the Department of Defense announces a proposed generic information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 25, 2014.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the Information Management Division, ATTN: Public Collections Team, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Office of the Secretary of Defense Generic Clearance; OMB Control Number 0704–TBD.

Needs and Uses: The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

Affected Public: Individuals or Households; Business or Other For-Profit; Not-For-Profit Institutions; Farms; Federal Government; State, Local, or Tribal Government.

Number of Respondents: 175,000.

Average Annual Burden

Average Expected Annual Number of Activities: 10.
Average Number of Respondents per Activity: 5,833.
Annual Responses: 58,330.
Responses per Respondent: 1.
Average Time per Response: 15 minutes.
Annual Burden Hours: 14,583.

Three Year Burden

Average Expected Number of Activities: 30.
Total Respondents: 175,000.
Total Responses: 175,000.
Responses per Respondent: 1.
Average Time per Response: 15 minutes.
Total Burden Hours: 43,750.
Frequency: On occasion.

Dated: December 20, 2013.

Aaron Siegel,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

[FR Doc. 2013–30926 Filed 12–26–13; 8:45 am]

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2013–OS–0157]

Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATES: Consideration will be given to all comments received by January 27, 2014.

FOR FURTHER INFORMATION CONTACT: Fred Licari, 571–372–0493.

SUPPLEMENTARY INFORMATION:

Title, Associated Form and OMB Number: Veterans' Community Reintegration Focus Groups; OMB Control Number: 0704–TBD.
Type of Request: New.
Number of Respondents: 150.
Responses per Respondent: 1.
Annual Responses: 150.
Average Burden per Response: 120 minutes.
Annual Burden Hours: 300.
Needs and Uses: The information collection requirement is necessary to help the Transition to Veterans Program Office identify the particular challenges and issues veterans face in reintegrating with their communities. These focus groups are necessary since there is no single, existing dataset that captures veterans' community reintegration, beyond measuring employment or education. Our findings will help inform the development and implementation of their new transition program, Transition GPS (Goals, Plans, Success).
Affected Public: Individuals or households.
Frequency: On occasion.
Respondent's Obligation: Voluntary.
OMB Desk Officer: Ms. Jasmeet Seehra.

Written comments and recommendations on the proposed information collection should be sent to Ms. Jasmeet Seehra at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

You may also submit comments, identified by docket number and title, by the following method:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Ms. Patricia Toppings.

Written requests for copies of the information collection proposal should be sent to Ms. Toppings at WHS/ESD Information Management Division, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

Dated: December 20, 2013.

36(b)(1) Arms Sales Notification

AGENCY: Department of Defense, Defense Security Cooperation Agency.

ACTION: Notice.

SUMMARY: The Department of Defense is publishing the unclassified text of a section 36(b)(1) arms sales notification. This is published to fulfill the requirements of section 155 of Public Law 104–164 dated July 21, 1996.

FOR FURTHER INFORMATION CONTACT: Ms. B. English, DSCA/DBO/CFM, (703) 601–3740.

The following is a copy of a letter to the Speaker of the House of Representatives, Transmittals 13–68 with attached transmittal and policy justification.

Dated: December 23, 2013.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEFENSE SECURITY COOPERATION AGENCY
201 12TH STREET SOUTH, STE 203
ARLINGTON, VA 22202-5408

The Honorable John A. Boehner
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

DEC 18 2013

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 13-68, concerning the Department of the Air Force's proposed Letter(s) of Offer and Acceptance to Norway for defense articles and services estimated to cost $107 million. After this letter is delivered to your office, we plan to issue a press statement to notify the public of this proposed sale.

Sincerely,

For J. W. Rixey
Vice Admiral, USN
Director

Enclosures:
1. Transmittal
2. Policy Justification

Transmittal No. 13–68

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Norway

(ii) *Total Estimated Value:*

Major Defense Equipment*	$ 0 million
Other (includes SME)	$107 million
TOTAL	$107 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:* C–130J technical, engineering and software support; software updates and patches; familiarization training for Portable Flight Planning System (PFPS) and Joint Mission Planning System (JMPS); spare and repair parts; U.S. Government and contractor technical support services; and other related elements of logistics and program support.

(iv) *Military Department:* Air Force (QAT, Amendment 01)

(v) *Prior Related Cases, if any:* FMS Case QAT-$98M

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* N/A

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services*

Proposed to be Sold: N/A

(viii) *Date Report Delivered to Congress:* 18 December 2013

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Norway—Technical, Engineering, and Software Support for C–130J

The Government of Norway has requested a possible sale of C–130J technical, engineering and software support; software updates and patches; familiarization training for the Portable Flight Planning System (PFPS) and Joint Mission Planning System (JMPS); spare and repair parts; U.S. Government and contractor technical support services; and other related elements of logistics and program support. The estimated cost is $107 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally. Norway intends to use this technical, engineering, and software support to provide successful operation of the PFPS and JMPS. This program will increase Norway's ability to contribute to future NATO, operations and supports U.S. national security interests. This support will continue to strengthen a critical, long-term strategic military partnership.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be Lockheed Martin Corporation, DBA Lockheed Martin Aeronautics in Marietta, Georgia; Rolls Royce Corporation in Indianapolis, Indiana; and GE Aviation Systems LLC, DBA Dowty Propellers in Sterling, Virginia. There are no known offset agreements associated with the proposed sale.

Implementation of this proposed sale will not require the assignment of additional U.S. Government or contract representatives to Norway.

There will be no adverse impact on the U.S. defense readiness as a result of this proposed sale.

[Transmittal Nos. 13–70]

36(b)(1) Arms Sales Notification

AGENCY: Department of Defense, Defense Security Cooperation Agency.

ACTION: Notice.

SUMMARY: The Department of Defense is publishing the unclassified text of a section 36(b)(1) arms sales notification. This is published to fulfill the requirements of section 155 of Public Law 104–164 dated July 21, 1996.

FOR FURTHER INFORMATION CONTACT: Ms. B. English, DSCA/DBO/CFM, (703) 601–3740.

The following is a copy of a letter to the Speaker of the House of Representatives, Transmittals 13–70 with attached transmittal and policy justification.

Dated: December 23, 2013.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEFENSE SECURITY COOPERATION AGENCY
201 12TH STREET SOUTH, STE 203
ARLINGTON, VA 22202-5408

The Honorable John A. Boehner
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

DEC 19 2013

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 13-70, concerning the Department of the Air Force's proposed Letter(s) of Offer and Acceptance to Pakistan for defense articles and services estimated to cost $100 million. After this letter is delivered to your office, we plan to issue a press statement to notify the public of this proposed sale.

Sincerely,

J. W. Rixey
Vice Admiral, USN
Director

Enclosures:
1. Transmittal
2. Policy Justification

Transmittal No. 13–70

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Pakistan

(ii) *Total Estimated Value:*

Major Defense Equipment§ *.	$ 0 million
Other	$100 million
TOTAL	$100 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:* to provide technical support services, and other related logistics support to assist in the oversight of operations in support of the Pakistan Peace Drive F–16 program.

(iv) *Military Department:* Air Force (GAF)

(v) *Prior Related Cases, if any:* FMS Case GAC—$82M—12Mar10

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* None

(viii) *Date Report Delivered to Congress:* 19 December 2013

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Pakistan—Technical Support Team (TST)

The Government of Pakistan has requested a possible sale to provide technical support services at Shahbaz and Mushaf Air Bases to assist in the oversight of operations in support of the Pakistan Peace Drive F–16 program. Also included: U.S. Government and contractor technical and logistics support services, and other related elements of logistics support. The estimated cost is $100 million.

This proposed sale will support continuation of the Peace Drive program, which contributes to the foreign policy and national security of the United States by helping to improve the security of a country that has been and continues to be a partner in overseas contingency operations. Pakistan is vital to U.S. foreign policy and national security goals in South Asia.

The proposed sale of this support will not alter the basic military balance in the region.

Implementation of this proposed sale will require the assignment of two U.S. Government and 40 contractor representatives to Pakistan for a period of approximately five years to assist in the oversight of operations as part of the Peace Drive F–16 Program.

The principal contractor is not known at this time and will be determined during contract negotiations. There are no known offset agreements proposed in connection with this potential sale.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

[Docket ID: DoD–2013–OS–0232]

Notice of Availability (NOA) of an Environmental Assessment (EA) for the Temporary Storage of Wheeled Tactical Vehicles at Defense Supply Center Richmond, Virginia

AGENCY: Defense Logistics Agency, DoD.

ACTION: Notice of Availability (NOA) of an Environmental Assessment (EA) for the Temporary Storage of Wheeled Tactical Vehicles at Defense Supply Center Richmond, Virginia.

SUMMARY: The Defense Logistics Agency (DLA) announces the availability of an environmental assessment (EA) for the potential environmental impacts associated with the proposed action to temporarily store wheeled tactical vehicles at Defense Supply Center Richmond, Virginia. The EA has been prepared as required under the National Environmental Policy Act (NEPA) (1969). In addition, the EA complies with DLA Regulation 1000.22. DLA has determined that the proposed action would not have a significant impact on the human environment within the context of NEPA. Therefore, the preparation of an environmental impact statement is not required.

DATES: The public comment period will end 30 days after publication of this NOA in the **Federal Register**. Comments received by the end of the 30-day period will be considered when preparing the final version of the document. The EA is available electronically at *http://www.dla.mil/Documents/WTV_DEA_12022013.pdf.*

ADDRESSES: You may submit comments to one of the following:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, 2nd floor, Suite 02G09, Alexandria, VA 22350–3100.

FOR FURTHER INFORMATION CONTACT: Ann Engelberger at (703) 767–0705 during normal business hours Monday through Friday, from 8:00 a.m. to 4:30 p.m. (EST) or by email: *Ann.Engelberger@dla.mil.*

Dated: December 20, 2013.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Meeting of the National Commission on the Structure of the Air Force

AGENCY: Director of Administration and Management, DoD.

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Department of Defense is publishing this notice to announce a closed Federal advisory committee meeting of the National Commission on the Structure of the Air Force ("the Commission").

DATES: *Date of Closed Meeting:* Wednesday, January 8, 2014, from 10:00 a.m. to 5:00 p.m.

ADDRESSES: 2521 South Clark Street, Suite 525, Arlington, VA 22202 and, as necessary, a secure video teleconferencing line.

FOR FURTHER INFORMATION CONTACT: Mrs. Marcia Moore, Designated Federal Officer, National Commission on the Structure of the Air Force, 1950 Defense Pentagon, Room 3A874, Washington, DC 20301–1950. Email: *marcia.l.moore12.civ@mail.mil.* Desk (703) 545–9113. Facsimile (703) 692–5625.

SUPPLEMENTARY INFORMATION:

Purpose of Meeting: The meeting on January 8, 2014 is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150. The Commission will address, correct, and approve the content of the classified annex to their unclassified report. The purpose of the classified annex is to allow individuals access to the classified analyses that contributed to and support the Commission's recommendations, as granted by the Congress and the President of the United States.

Agenda: The agenda and classified annex will cover the following topics:

— The changing mix of active and reserve component force structures.

— Whether the contribution of the reserve component to operational plans has increased since 1980.

— Specific reserve component contributions to Operation Iraqi Freedom and Operation Enduring Freedom.

— The increase of reserve component structure for classified mission areas.

— Descriptions of emerging, future capabilities.

— Integrated Security Construct scenarios and the environment that shapes the requirements and subsequent resource allocation decisions.

— Representative force-mix models using actual data from Integrated Security Construct scenarios, whereby variables, such as numbers of aircraft, deploy to dwell and mob to dwell ratios, and budget targets are manipulated.

— Various strategic-basing scenarios, some of which may have classified implications.

— Projected challenges to the U.S. Air Force's ability to meet the demands of multiple scenarios.

— Classified documents that address financial, personnel, organizational and other factors for the Commission's recommendations, including the Strategic Choices and Management Review, Program Objective

Memorandums, Defense Planning Guidance.

— Other classified analyses as required.

Meeting Accessibility: In accordance with section 10(d) of the FACA, 5 U.S.C. 552b, and 41 CFR 102–3.155, the DoD determined that the Wednesday, January 8, 2014 meeting will be closed to the public in its entirety. Specifically, the Director of Administration and Management, with the coordination of the DoD FACA Attorney, has determined in writing that this meeting will be closed to the public because classified information and matters covered by 5 U.S.C. 552b(c)(1) will be discussed.

Written Comments: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the FACA, the public or interested organizations may submit written comments to the Commission in response to the stated agenda of the closed meeting or the Commission's mission. The Designated Federal Officer (DFO) will review all submitted written statements before forwarding to the Commission. Written comments should be submitted to Mrs. Marcia Moore, DFO, via facsimile or electronic mail, the preferred modes of submission. Each page of the comment must include the author's name, title or affiliation, address, and daytime phone number. All contact information may be found in the **FOR FURTHER INFORMATION CONTACT** section. While written comments are forwarded to the Commissioners upon receipt, note that all written comments on the Commission's charge, as described in the "Background" section, must be received by 5:00 p.m. on January 7, 2014 to be considered by the Commissioners. This deadline for emailed and faxed comments has been extended from December 13, 2013. The postmark deadline to mail comments was November 8, 2013.

Due to difficulties finalizing the meeting agenda for the scheduled meeting of January 8, 2014, of the National Commission on the Structure of the Air Force the requirements of 41 CFR 102–3.150(a) were not met. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

Background

The National Commission on the Structure of the Air Force was established by the National Defense Authorization Act for Fiscal Year 2013 (Pub. L. 112–239). The Department of Defense sponsor for the Commission is the Director of Administration and Management, Mr. Michael L. Rhodes. The Commission is tasked to submit a report, containing a comprehensive study and recommendations, by February 1, 2014 to the President of the United States and the Congressional defense committees. The report will contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for such legislation and administrative actions it may consider appropriate in light of the results of the study. The comprehensive study of the structure of the U.S. Air Force will determine whether, and how, the structure should be modified to best fulfill current and anticipated mission requirements for the U.S. Air Force in a manner consistent with available resources.

The evaluation factors under consideration by the Commission are for a U.S. Air Force structure that—(a) meets current and anticipated requirements of the combatant commands; (b) achieves an appropriate balance between the regular and reserve components of the Air Force, taking advantage of the unique strengths and capabilities of each; (c) ensures that the regular and reserve components of the Air Force have the capacity needed to support current and anticipated homeland defense and disaster assistance missions in the United States; (d) provides for sufficient numbers of regular members of the Air Force to provide a base of trained personnel from which the personnel of the reserve components of the Air Force could be recruited; (e) maintains a peacetime rotation force to support operational tempo goals of 1:2 for regular members of the Air Forces and 1:5 for members of the reserve components of the Air Force; and (f) maximizes and appropriately balances affordability, efficiency, effectiveness, capability, and readiness.

Dated: December 23, 2013.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF DEFENSE

Office of the Secretary

Meeting of the National Commission on the Structure of the Air Force

AGENCY: Director of Administration and Management, DoD.

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Department of Defense (DoD) announces that the following Federal advisory committee meeting of the National Commission on the Structure of the Air Force ("the Commission") will take place.

DATES: *Date of Open Meeting, including Hearing:* Thursday, January 9, 2014, from 11:30 a.m. to 5:00 p.m. Registration will begin at 11:00 a.m. Please also see instructions to register for oral public comments in advance.

ADDRESSES: 2521 South Clark Street Suite 200, Crystal City, VA 22202.

FOR FURTHER INFORMATION CONTACT: Mrs. Marcia Moore, Designated Federal Officer, National Commission on the Structure of the Air Force, 1950 Defense Pentagon, Room 3A874, Washington, DC 20301–1950. Email: *dfoafstrucomm@osd.mil.* Desk (703) 545–9113. Facsimile (703) 692–5625.

SUPPLEMENTARY INFORMATION: Due to difficulties finalizing the meeting agenda for the scheduled meeting of January 9, 2014, of the National Commission on the Structure of the Air Force the requirements of 41 CFR 102–3.150(a) were not met. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150.

Purpose of Meeting: The members of the Commission will hear testimony from Deborah Lee James, Secretary of the U.S. Air Force and oral comments from the public.

Agenda: Deborah Lee James, Secretary of the U.S. Air Force will testify from 11:30 a.m.—1:00 p.m. The public is invited to give oral comments to the Commission on the following topics that have been addressed in the Commission's draft report. The Chairman will introduce each topic and subtopic. Individual members of the public will then comment on the topic.

1:00 p.m.—The Uncertain Future Strategic Environment

1. The role of airpower in the post-Afghanistan national security situations likely to be encountered by the Air Force capabilities and Airmen and the implications for the structure of the Air Force.

2. Emerging demands on Air Force capabilities such as, intelligence, surveillance and reconnaissance, remotely piloted aircraft, space, cyberspace, special operations, and building partnership capacity. Further, implications for the structure of the Air Force from the growing threat involving simultaneous attacks on the Homeland.

3. Implications of rising demands and expectations for missions such as Homeland Defense, Homeland Security, and Defense Support to Civil Authorities.

4. Continuing growth of demand on traditional Air Force core functions including: Air Superiority, Air Mobility, Global Precision Attack, Nuclear Deterrence Operations, Command and Control, Personnel Recovery, Agile Combat Support, Training and Education, and other specific mission sets such as security forces, civil engineering and science and technology.

1:40 p.m.—The Inexorable Resource Trend

1. Projections and assumptions about future resource levels that will be available to organize, train and equip the Air Force; how the Budget Control Act and Sequestration legislation will affect Total Obligational Authority and associated planning, programming and budgeting flexibility.

2. Impact of strategic choices on Air Force capabilities and force structure options derived from the selection of national priorities among modernization, technology, recapitalization, readiness, capacity and force structure; various approaches on how to calculate and apply cost methods and data to questions of force structure.

2:30 p.m.—Enduring Roles of the Components

1. Address the root causes of legislative and bureaucratic development of the force structure issues that led to the creation of the Commission in 2013; how these issues are rooted in the American militia heritage and the arc of Air Force history since 1947.

2. Accounting for the socio-cultural dimensions of force structure issues ranging from the fundamental relationship of the American people to their military and to sub-cultures within the Air Force.

3:10 p.m.—Shaping and Sizing the Force

1. How to institutionalize the shift in the fundamental role of the reserve components from a strategic reserve to an operational reserve with associated expectations.

2. Force mix options to assess in terms of relative weight of force structure in each of the components.

3. Whether to recommend the Department of Defense invert the force sizing planning paradigm from sizing to meet the expected wartime surge to an approach that begins with the steady state requirement then resource the components to provide the nation with a meaningful surge capacity for the strategy.

4. Considerations for measuring and assessing active, reserve, and Air National Guard effectiveness, including both cost-effectiveness and mission effectiveness.

3:50 p.m.—Managing the Force

Weigh alternative approaches to how the nation should direct, control and guide the active, reserve, and Air National Guard to include:

1. Whether, and if so how, to simplify Title 10, Title 32 and other governing legislative authorities;

2. How to re-balance the current mix of Active, Reserve and Air National Guard components into and across any and all mission function;

3. Whether, and if so how, to reorganize the Air Force Active, Reserve and Air National Guard into less than 3 components;

4. Can the Air Force move to a periodic readiness schedule without creating a "hollow force";

5. Does component "ownership" of aircraft matter anymore and how can the Associate Unit paradigm be adapted to the future;

6. Approaching future force integration of new systems capabilities by means of a Concurrent Proportional resourcing method across the components to replace today's priority of equipping the Active Component first;

7. Accelerating the adoption of a "Continuum of Service" model to facilitate the ability of Airmen to move from any component into another at multiple points in their career path without prejudice:

a. Enhancing the total force through equalized opportunities across the components for professional and technical education and shared experiences;

b. Recognizing in promotion and selection processes differing but equivalent ends, ways, and means of professional development.

8. Fundamental shift in policy goals for "Deploy-to-Dwell," "Mobilization-to-Dwell," and associated metrics for the post-Afghanistan period, as well as how deployment credit will be accounted;

9. Reconsider the nation's needs for Overseas Basing and the capacity of CONUS infrastructure afforded by investments in Reserve and Guard basing capacities available to the Total Force.

Meeting Accessibility: The building is fully handicap accessible. Visitors must show a picture I.D. and complete a security screening. Public parking is available within walking distance. Media and other organizations who wish to use video or camera technology during the meeting must obtain permission prior to the meeting.

Written Comments: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the FACA, the public or interested organizations may submit written comments to the Commission in response to the stated agenda of the open meeting or the Commission's mission. The Designated Federal Officer (DFO) will review all submitted written statements. Written comments should be submitted to Mrs. Marcia Moore, DFO, via facsimile or electronic mail, the preferred modes of submission. Each page of the comment must include the author's name, title or affiliation, address, and daytime phone number. All contact information may be found in the **FOR FURTHER INFORMATION CONTACT** section. While written comments are forwarded to the Commissioners upon receipt, note that all written comments on the Commission's charge, as described in the Background section, must be received by 5:00 p.m. on January 6, 2014 to be considered by the Commissioners for the final report. This deadline for emailed and faxed comments has been extended from December 13, 2013. The postmark deadline to mail comments was November 8, 2013.

Oral Comments: Individuals who wish to make an oral comment during the meeting on January 9, 2014, on the specific topics described in this notice, are strongly encouraged to pre-register for the meeting by 5:00 p.m. on January 6, 2014. Walk-in registrations will be accepted by 11:30 a.m. on January 9, 2014. Oral commenters will be allotted no less than 5 minutes each for their presentations. The actual time allotment will be given on the day of the meeting. Registration for oral comments must include a summary of points to be made and the topic to be addressed on at least one of the following, as described in this notice:

1. The Uncertain Future Strategic Environment
2. The Inexorable Resource Trend

3. Enduring Roles of the Components
4. Shaping and Sizing the Force
5. Managing the Force

Registration: Individuals who wish to attend the public hearing and meeting on Thursday, January 9, 2014 are encouraged to register for the event in advance with the Designated Federal Officer, using the electronic mail and facsimile contact information found in the **FOR FURTHER INFORMATION CONTACT** section. The communication should include the registrant's full name, title, affiliation or employer, email address, and daytime phone number. If applicable, include written comments and/or a request to speak on one of the topics and a summary of your comments. Registrations and written comments must be typed.

Background: The National Commission on the Structure of the Air Force was established by the National Defense Authorization Act for Fiscal Year 2013 (Pub. L. 112–239). The Department of Defense sponsor for the Commission is the Director of Administration and Management, Office of the Secretary of Defense. The Commission is tasked to submit a report, containing a comprehensive study and recommendations, by February 1, 2014 to the President of the United States and the Congressional defense committees. The report will contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for such legislation and administrative actions it may consider appropriate in light of the results of the study. The comprehensive study of the structure of the U.S. Air Force will determine whether, and how, the structure should be modified to best fulfill current and anticipated mission requirements for the U.S. Air Force in a manner consistent with available resources.

DEPARTMENT OF DEFENSE

Department of the Air Force

[Docket ID: USAF–2013–0039]

Proposed Collection; Comment Request

AGENCY: United States Air Force, DoD.

ACTION: Notice and request for comments.

SUMMARY: In compliance with Section 3506(c)(2)(A) of the *Paperwork Reduction Act of 1995*, and as part of an effort to streamline the process to seek feedback from the public on service delivery, the Department of Defense announces a proposed generic information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 25, 2014.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the Information Management Division, ATTN: Public Collections Team, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: United States Air Force Generic Clearance; OMB Control Number 0701–TBD.

Needs and Uses: The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

Affected Public: Individuals or Households; Business or Other For-Profit; Not-For-Profit Institutions; Farms; Federal Government; State, Local, or Tribal Government.

Number Of Respondents: 50,000.

Average Annual Burden

Average Expected Annual Number of Activities: 4.

Average Number of Respondents per Activity: 4,167.

Annual Responses: 16,668.

Responses per Respondent: 1.

Average Time per Response: 15 minutes.

Annual Burden Hours: 4,167.

Three Year Burden

Average Expected Number of Activities: 12.

Total Respondents: 50,000.

Total Responses: 50,000.

Responses per Respondent: 1.

Average Time per Response: 15 minutes.

Total Burden Hours: 12,500.

Frequency: On occasion.

Dated: December 20, 2013.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2013–30925 Filed 12–26–13; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID: USA–2013–0033]

Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATES: Consideration will be given to all comments received by January 27, 2014.

FOR FURTHER INFORMATION CONTACT: Fred Licari, 571–372–0493.

SUPPLEMENTARY INFORMATION:

Title, Associated Form and OMB Number: Supplier Self-Services (SUS); OMB Control Number 0702–TBD.

Type of Request: New Collection

Number of Respondents: 1867

Responses per Respondent: 12

Annual Responses: 22,404

Average Burden per Response: 6 minutes

Annual Burden Hours: 2240

Needs and Uses: The information collection requirement via SUS is necessary to reduce the amount and complexity of required input by vendors that manually enter invoice data into Wide Area Workflow (WAWF) (not those utilizing Electronic Data Interchange (EDI). By pre-populating fields with accurate and up-to-date contract information, vendors are required to input significantly less data. Additionally, SUS simultaneously performs a front-end validation of submitted data, thus ensuring less manual intervention and fewer interest penalties incurred by the government.

Affected Public: Businesses (Federal Vendors)

Frequency: On occasion.

Respondent's Obligation: Required to Obtain or Retain Benefits

OMB Desk Officer: Ms. Jasmeet Seehra.

Written comments and recommendations on the proposed information collection should be sent to Ms. Jasmeet Seehra at the Office of Management and Budget, Desk Officer

for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

You may also submit comments, identified by docket number and title, by the following method:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Ms. Patricia Toppings.

Written requests for copies of the information collection proposal should be sent to Ms. Toppings at WHS/ESD Information Management Division, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

Dated: December 23, 2013.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID: USA–2013–0047]

Proposed Collection; Comment Request

AGENCY: United States Army, DoD.

ACTION: Notice and request for comments.

SUMMARY: In compliance with Section 3506(c)(2)(A) of the *Paperwork Reduction Act of 1995*, and as part of an effort to streamline the process to seek feedback from the public on service delivery, the Department of Defense announces a proposed generic information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 25, 2014.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

• *Mail:* Federal Docket Management System Office, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the Information Management Division, ATTN: Public Collections Team, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350–3100.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: United States Army Generic Clearance; OMB Control Number 0702–TBD.

Needs and Uses: The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

Affected Public: Individuals or households; business or other for-profit; not-for-profit institutions; farms; Federal Government; State, Local, or Tribal Government.

Number of Respondents: 100,000.

Average Annual Burden

Average Expected Annual Number of Activities: 10.

Average Number of Respondents per Activity: 3,332.

Annual Responses: 33,320.

Responses per Respondent: 1.

Average Time per Response: 15 minutes.

Annual Burden Hours: 8,330 Hours.

Three Year Burden

Average Expected Number of Activities: 30.

Total Respondents: 100,000.

Total Responses: 100,000.

Responses per Respondent: 1.

Average Time per Response: 15 minutes.

Total Burden Hours: 25,000 Hours.

Frequency: On occasion.

Dated: December 20, 2013.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare a Supplemental Environmental Impact Statement for the Route 460 Location Study From Prince George County to the City of Suffolk, VA

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of Intent.

SUMMARY: The Federal Highway Administration (FHWA) and the United States Army Corps of Engineers (USACE), Norfolk District, as joint lead federal agencies, and in cooperation with the Virginia Department of Transportation (VDOT), will prepare a Supplemental Environmental Impact

Statement (SEIS) for the Route 460 Location Study Final Environmental Impact Statement (FEIS). The purpose of this SEIS is to evaluate new information regarding the aquatic resource impacts and alternatives described in the June 2008 FEIS and the September 2008 Record of Decision (ROD). In addition, FHWA is evaluating proposed changes to the termini of the selected alternative and the proposed interchange at Route 620, and proposed changes to the selected alignment to avoid and minimize aquatic resource impacts.

The USACE is preparing the document to produce a supplemented FEIS that fully evaluates the new information and to gather information that informs and supports the USACE's evaluation of the Department of the Army Individual Permit (IP) application submitted by U.S. Route 460 Mobility Partners (the Applicant) for the discharge of fill material into waters of the United States in conjunction with the construction of the Route 460 Corridor Improvements Project (Project). The USACE was a cooperating agency in the preparation of the June 2008 FEIS and will adopt that document as appropriate.

DATES: Submit comments on or before January 27, 2014.

ADDRESSES: Alice Allen-Grimes, U.S. Army Corps of Engineers, Regulatory Branch, 803 Front Street, Norfolk, VA 23510 or Ed Sundra, Division Administrator, Federal Highway Administration, 400 North 8th Street, Suite 750, Richmond, VA 23219.

FOR FURTHER INFORMATION CONTACT: Alice Allen-Grimes, email: *alice.w.allen-arimes@usace.army.mil;* (757) 201–7219. Ed Sundra, email: *ed.sundra@dot.gov;* (804) 775–3357.

SUPPLEMENTARY INFORMATION:

1. Description of the Proposed Action and Background: U.S. Route 460 Mobility Partners proposes to construct a limited access principle arterial tolled facility on new location for approximately 55 miles which would be located to the south and roughly parallel to the existing Route 460 corridor between Interstate 295 in Prince George County and Route 58 in the City of Suffolk, Virginia. The typical section consists of a four-lane, divided highway with two 12-foot lanes in each direction, a 40-foot median, and paved shoulders. Seven interchanges are proposed along the project at the secondary roads. The Applicant has entered into a design-build contract with VDOT to design and construct the Project. Upon determining that the submitted permit application is complete, the USACE will issue a public notice and continue processing the permit application.

An FEIS for the Route 460 Location Study was approved by FHWA in June 2008 and a ROD was issued by FHWA in September 2008. U.S. Route 460 Mobility Partners has entered into a contract with VDOT to obtain permits and construct the Preferred Alternative identified in the 2008 FEIS/ROD. In November 2012, based upon the information before them at the time, FHWA completed a National Environmental Policy Act (NEPA) Re-evaluation of the FEIS concluding that an SEIS was not needed. Based on new information bearing on the environmental impacts, including the aquatic impacts, it was later decided that an SEIS is required.

This SEIS will review information from the Route 460 Location Study FEIS/ROD, incorporate new information, update the alternatives and impacts analyses, and assess impacts not previously evaluated in the FEIS/ROD. To streamline federal processes, the SEIS will also include the USACE's NEPA evaluation.

2. Alternatives: Alternatives to be considered for the proposed project are the No-Build Alternative, the FHWA/VDOT preferred alternative (Preferred Alternative from the 2008 FEIS/ROD) and the FHWA/VDOT preferred alternative revised to include one or more of the following proposed changes: changes to the termini, the proposed interchange at Route 620, and alignment shifts to avoid and minimize impacts.

Additionally, so that the USACE may fulfill its required alternatives analysis responsibilities, consideration will also be given to the alternative from the DEIS to improve the existing Route 460 corridor (CBA–2), an alternative to provide a limited access tolled facility along the existing Route 460 corridor (CBA–2 Tolled), and potentially, other alternatives identified during the SEIS process.

The SEIS will also document the alternatives previously eliminated from consideration by FHWA. Actions available to the USACE for the proposed project are to issue the IP, issue the IP with special conditions, or deny the IP.

3. Scoping and Public Review Process: Throughout the development of the project, a variety of scoping and public involvement opportunities were provided to alert the public about the project, provide information and updates, and solicit feedback. These opportunities included but were not limited to a series of public hearings in the corridor when the DEIS was issued in 2005 and a series of public meetings in 2007 under Virginia's PPTA to evaluate conceptual proposals received from the private sector in response to the solicitation of proposals. Most recently, VDOT hosted public meetings in 2012 to update the public on the project and respond to public input.

To ensure that a full range of issues related to the Project are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and suggestions concerning the range of issues to be evaluated under the SEIS should be submitted to FHWA and the Corps at (see **ADDRESSES**) within 30 days of the issuance of this notice to ensure timely consideration.

Based on the extensive public involvement to date on the proposed Project, no public input on the scope of the SEIS will be requested beyond the solicitation by this notice for comments on the range of issues to be evaluated. No formal scoping meetings will be held.

Notification of the availability of the draft SEIS for public and agency review will be made in the **Federal Register** and using other methods to be jointly determined by FHWA, USACE and VDOT. Those methods will identify where interested parties can go to review a copy of the draft SEIS.

For the draft SEIS, public meetings will be held and a minimum 45-day comment period will be provided. The public meetings will be conducted by VDOT and announced a minimum of 15 days in advance of the meetings. VDOT will provide information for the public meetings, including date, time and location through a variety of means including their Web site (*http://www.virginiadot.org/default_noflash.asp*) and by newspaper advertisement. In addition to the draft SEIS public involvement opportunities, the USACE will issue a public notice for a minimum 30-day comment period following receipt of a complete application.

4. Issues: Based on coordination between FHWA, USACE, and VDOT, the issues to be analyzed in the SEIS will include, but are not limited to, alternatives based on the updated effects to aquatic resources including wetland and stream impacts, threatened and endangered species, relocations, cultural resources, and cost.

5. Additional Review and Consultation: The SEIS will comply with other federal and state requirements including, but not limited to, the state water quality certification under Section 401 of the CWA; protection of water quality under the Virginia/National Pollutant Discharge Elimination System; consideration of

minority and low income populations under Executive Order 12898; protection of endangered and threatened species under Section 7 of the Endangered Species Act; and protection of cultural resources under Section 106 of the National Historic Preservation Act.

6. Availability of the Draft SEIS: The Draft SEIS is expected to be published and circulated during the Spring of 2014, and a public meeting will be held by VDOT after the publication of the Draft SEIS.

Dated: December 13, 2013.

Paul B. Olsen,

Colonel, U.S. Army, Commanding.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2013–ICCD–0160]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Application for Grants Under the Alaska Native and Native Hawaiian-Serving Institutions Program

AGENCY: Department of Education (ED), Office of Postsecondary Education (OPE).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing a reinstatement with change of a previously approved information collection.

DATES: Interested persons are invited to submit comments on or before January 27, 2014.

ADDRESSES: Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting Docket ID number ED–2013–ICCD–0160 or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments

submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E103, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For questions related to collection activities or burden, please call Kate Mullan, 202–401–0563 or electronically mail *ICDocketMgr@ed.gov*. Please do not send comments here. We will ONLY accept comments in this mailbox when the *regulations.gov* site is not available to the public for any reason.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Application for Grants Under the Alaska Native and Native Hawaiian-Serving Institutions Program.

OMB Control Number: 1840–0810.

Type of Review: A reinstatement with change of a previously approved information collection.

Respondents/Affected Public: Private Sector, State, Local, or Tribal Governments.

Total Estimated Number of Annual Responses: 46.

Total Estimated Number of Annual Burden Hours: 1,840.

Abstract: The overall purpose of this program is to provide grants to eligible Alaska Native and Native Hawaiian-Serving institutions of higher education to enable them to improve their academic quality, institutional management, and fiscal stability in order to increase their self-sufficiency and strengthen their capacity to make a substantial contribution to higher education resources of the nation. It is required that we collect this data in order to hold a program competition and award funds for program recipients.

Dated: December 23, 2013.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management.

[FR Doc. 2013–31014 Filed 12–26–13; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2013–ICCD–0131]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and approval; Comment Request; Student Assistance General Provisions

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before January 27, 2014.

ADDRESSES: Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting Docket ID number ED–2013–ICCD–0131 or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW, LBJ, Room 2E103, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For questions related to collection activities or burden, please call Kate Mullan, 202–401–0563 or electronically mail *ICDocketMgr@ed.gov*. Please do not send comments here. We will ONLY accept comments in this mailbox when the regulations.gov site is not available to the public for any reason.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Student Assistance General Provisions.

OMB Control Number: 1845–0022.

Type of Review: Revision of an existing collection of information.

Respondents/Affected Public: State, Local, or Tribal Governments, Private Sector, Individuals or households.

Total Estimated Number of Annual Responses: 1,321,918.

Total Estimated Number of Annual Burden Hours: 2,138,320.

Abstract: The Department of Education is requesting a revision of the current burden hours in 1845–0022. Sections of the regulations in 34 CFR part 668-Student Assistance General Provisions establish the standards to participate in the student financial aid assistance programs authorized by Title IV of the Higher Education Act of 1965, as amended. Other sections of the regulations also establish required information that must be provided to students, the financial responsibility requirements of the institution, and the cohort default rates that apply to institutions. These regulations help to assure the Secretary that the integrity of the programs is protected from fraud

and misuse of program funds. ED is administratively transferring a small amount of burden from sections 34 CFR 668.23 and 668.24 that previously were included in OMB Collection Number 1845–0038 to correct an error that was made in the transfer of this information collection from the Office of Postsecondary Education (1840) to Federal Student Aid (1845). There have been no changes to the statutory or regulatory language since the prior information collection filing.

Dated: December 23, 2013.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Paducah

AGENCY: Department of Energy (DOE).

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Paducah. The Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register.**

DATES: Thursday, January 16, 2014, 6:00 p.m.

ADDRESSES: Barkley Centre, 111 Memorial Drive, Paducah, Kentucky 42001.

FOR FURTHER INFORMATION CONTACT: Rachel Blumenfeld, Deputy Designated Federal Officer, Department of Energy Paducah Site Office, Post Office Box 1410, MS–103, Paducah, Kentucky 42001, (270) 441–6806.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE–EM and site management in the areas of environmental restoration, waste management and related activities.

Tentative Agenda:

- Call to Order, Introductions, Review of Agenda
- Administrative Issues
- Public Comments (15 minutes)
- Adjourn

Breaks Taken As Appropriate

Public Participation: The EM SSAB, Paducah, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Rachel Blumenfeld as soon as possible in advance of the meeting at the telephone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Rachel Blumenfeld at the telephone number listed above. Requests must be received as soon as possible prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments. The EM SSAB, Paducah, will hear public comments pertaining to its scope (clean-up standards and environmental restoration; waste management and disposition; stabilization and disposition of non-stockpile nuclear materials; excess facilities; future land use and long-term stewardship; risk assessment and management; and clean-up science and technology activities). Comments outside of the scope may be submitted via written statement as directed above.

Minutes: Minutes will be available by writing or calling Rachel Blumenfeld at the address and phone number listed above. Minutes will also be available at the following Web site: *http://www.pgdpcab.energy.gov/2013Meetings.html.*

Issued at Washington, DC, on December 20, 2013.

LaTanya R. Butler,

Deputy Committee Management Officer.

Access by EPA Contractors to Information Claimed as Confidential Business Information (CBI) Submitted under Title II of the Clean Air Act and Related to Code of Federal Regulation Parts and Subparts

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA's Office of Transportation and Air Quality (OTAQ) plans to authorize various contractors to access information which will be submitted to EPA under Title II of the Clean Air Act that may be claimed as, or may be determined to be, confidential business information (CBI). Access to this information will begin on January 6, 2014.

DATES: EPA will accept comments on this Notice through January 2, 2014.

FOR FURTHER INFORMATION CONTACT: Jaimee Dong, Environmental Protection Agency, 1200 Pennsylvania Avenue NW., MC 6405J; telephone number: 202–343–9672; fax number: 202–343–2802; email address: *dong.jaimee@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Does this notice apply to me?

This action is directed to the general public. However, this action may be of particular interest to parties who submit or have previously submitted information to EPA regarding the following programs: Fuel and fuel additive registration (40 CFR part 79); and various fuels programs including reformulated gasoline, anti-dumping, gasoline sulfur, ultra low sulfur diesel, benzene content, and the renewable fuel standard (40 CFR part 80). This action may also be of particular interest to parties such as suppliers of coal-based liquid fuels and suppliers of petroleum products, as described in 40 CFR part 98 subparts LL and MM, respectively. (40 CFR part 98, subpart A contains general provisions related to registration and reporting.) Parties who may be interested in this notice include refiners, importers, and exporters of these products.

This **Federal Register** notice may be of particular relevance to parties that have submitted data under the above-listed programs. Since other parties may also be interested, the Agency has not attempted to describe all the specific parties that may be affected by this action. If you have further questions regarding the applicability of this action to a particular party, please contact the person listed in **FOR FURTHER INFORMATION CONTACT.**

II. How can I get copies of this document and other related information?

A. Electronically

EPA has established a public docket for this **Federal Register** notice under Docket EPA–HQ–OAR–2013–0790.

All documents in the docket are identified in the docket index available at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, such as confidential business information (CBI) or other information for which disclosure is restricted by statute. Certain materials, such as copyrighted material, will only be available in hard copy at the EPA Docket Center.

B. EPA Docket Center

Materials listed under Docket EPA–HQ–OAR–2013–0790 will be available either electronically through *http://www.regulations.gov* or in hard copy at the Air and Radiation Docket and Information Center, EPA/DC, EPA West, Room 3334, 1301 Constitution Avenue NW., Washington, DC 20460. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566–1744, and the telephone number for the Air Docket is (202) 566–1742.

III. Description of Programs and Potential Disclosure of Information Claimed as Confidential Business Information (CBI) to Contractors

EPA's Office of Transportation and Air Quality (OTAQ) has responsibility for protecting public health and the environment by regulating air pollution from motor vehicles, engines, and the fuels used to operate them, and by encouraging travel choices that minimize emissions. In order to implement various Clean Air Act programs, and to permit regulated entities flexibility in meeting regulatory requirements (e.g., compliance on average), we collect compliance reports and other information from them. Occasionally, the information submitted is claimed to be confidential business information (CBI). Information submitted under such a claim is handled in accordance with EPA's regulations at 40 CFR part 2, subpart B and in accordance with EPA procedures, including comprehensive system security plans (SSPs) that are consistent with those regulations. When EPA has determined that disclosure of information claimed as CBI to contractors is necessary, the corresponding contract must address the appropriate use and handling of the information by the contractor and the contractor must require its personnel who require access to information claimed as CBI to sign written non-disclosure agreements before they are granted access to data.

In accordance with 40 CFR 2.301(h), we have determined that the contractors, subcontractors, and grantees (collectively referred to as "contractors") listed below, in addition to those listed in a previous **Federal Register** Notice (77 FR 217, November 8, 2012, pp. 66977–66978), require access to CBI submitted to us under the Clean Air Act and in connection with the Mandatory Greenhouse Gas (GHG) Reporting Rule [40 CFR part 98, subparts A (general registration and reporting provisions) LL, and MM], as well as various OTAQ programs related to fuels, vehicles, and engines (40 CFR parts 79 and 80) and we are providing notice and an opportunity to comment. OTAQ collects this data in order to monitor compliance with Clean Air Act programs and, in many cases, to permit regulated parties flexibility in meeting regulatory requirements. For example, data that may contain CBI is collected in order to register fuels and fuel additives prior to introduction into commerce and to certify engines. Certain programs are designed to permit regulated parties an opportunity to comply on average, or to engage in transactions using various types of credits. For example, OTAQ collects information about batches of gasoline that refiners produce in order to ensure compliance with reformulated gasoline standards. We are issuing this **Federal Register** notice to inform all affected submitters of information that we plan to grant access to material that may be claimed as CBI to the contractors identified below on a need-to-know basis.

Under Contract Number EP–C–11–007, SRA International, Inc., 4300 Fair Lakes Court, Fairfax, VA 22033, and its subcontractor, Ecco Select, 1301 Oak St #400, Kansas City, MO 64106, provide report processing, program support, technical support, and information technology services that involve access to information claimed as CBI related to 40 CFR part 79, 40 CFR part 80, and 40 CFR part 98 subparts A, LL, and MM. Access to data, including information claimed as CBI, will commence on January 6, 2014 and will continue until December 31, 2015.

If the contract is extended, this access will continue for the remainder of the contract without further notice.

Parties who wish further information about this **Federal Register** notice or about OTAQ's disclosure of information claimed as CBI to contactors may contact the person listed under **FOR FURTHER INFORMATION CONTACT.**

List of Subjects

Environmental protection; confidential business information.

Dated: December 16, 2013.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2007–1158; FRL–9904–81–OAR]

Proposed Information Collection Request; Comment Request; Alternative Affirmative Defense Requirements for Ultra-Low Sulfur Diesel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency is planning to submit an information collection request (ICR), "Alternative Affirmative Defense Requirements for Ultra-low Sulfur Diesel" (EPA ICR No.2364.04, OMB Control No. 2060–0639 to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through March 31, 2014. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before February 25, 2014.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OAR–2007–1158, online using *www.regulations.gov* (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Geanetta Heard, Fuels Compliance Center, 6406J, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: 202–343–9017; fax number: 202–565–2085; email address: *heard.geanetta@epa.gov*.

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets*.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: With this ICR renewal, EPA is seeking permission to continue recordkeeping and reporting requirements under the ultra-low sulfur diesel (ULSD) fuel regulations. Where a violation of the 15 ppm sulfur standard is identified at a retail outlet, the retailer responsible for dispensing the noncompliant fuel is deemed liable, as well as the refiner(s), importer(s) and distributor(s) of such fuel. The highway diesel regulations further provide, however, that any person deemed liable can rebut this presumption by establishing an affirmative defense that includes, among other things, showing that it conducted a quality assurance sampling and testing program as prescribed by the regulations. This ICR covers burdens and costs associated with provisions that allow refiners and importers of ULSD an alternative means of meeting the affirmative defense requirements in the ULSD regulations by participating in a nationwide diesel fuel sampling and testing program. The reporting burden covered by this ICR renewal relates to reports that refiners, importers and distributors, have to submit in the event they have a non-complying sulfur test result.

Form Numbers: None.

Respondents/affected entities: 5.

Respondent's obligation to respond: mandatory.

Estimated number of respondents: 5 (total).

Frequency of response: On occasion.

Total estimated burden: 80 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $9,200 (per year), includes no annualized capital or operation & maintenance costs.

Changes in Estimates: There is no increase of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The respondent universe and responses decreased in this collection due to a higher than expected compliance rate. There was in increase in cost to the industry per response of $704 due to more accurate numbers used to calculate the industry burden and to account for inflation. There was a decrease in cost to the industry overall of $13,520 due to the reduction of expected responses from 20 to five.

Dated: December 20, 2013.

Byron Bunker,

Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OW–2013–0652; FRL–9904–85–OW]

Extension of Comment Period for the Alaska Seafood Processing Effluent Limitation Guidelines Notice of Data Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of data availability; Extension of comment period.

SUMMARY: The Environmental Protection Agency (EPA) is extending the comment period for the Alaska Seafood Processing Effluent Limitation Guidelines Notice of Data Availability. EPA is extending the comment period in response to stakeholder requests for an extension.

DATES: Comments must be received on or before March 7, 2014. The comment period was originally scheduled to end on January 6, 2014.

ADDRESSES: Submit your comments, identified by Docket identification (ID) No. EPA–HQ–OW–2013–0652, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the online instructions for submitting comments.
- *Email: ow-docket@epa.gov*.
- *Mail:* Water Docket, U.S. Environmental Protection Agency, Mail code: 4203M, 1200 Pennsylvania Ave. NW., Washington, DC 20460. Attention Docket ID No. EPA–HQ–OW–2013–0652. Please include three copies.
- *Hand Delivery:* Water Docket, EPA Docket Center, William Jefferson Clinton Building West Room 3334, 1301 Constitution Ave. NW., Washington, DC, Attention Docket ID No. EPA–HQ–OW–2013–0652. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information by calling 202–566–2426.
- *Instructions:* Direct your comments to Docket ID No. EPA–HQ–OW–2013–0652. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The *http://www.regulations.gov* Web site is an "anonymous access" system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *www.regulations.gov* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, the EPA recommends that you include your name and other

contact information in the body of your comment and with any disc you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about the EPA's public docket visit the Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available (e.g., CBI or other information whose disclosure is restricted by statute). Certain other materials, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Office of Water Docket Center, EPA/DC, William Jefferson Clinton Building West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744; the telephone number for the Office of Water Docket Center is (202) 566–2426.

FOR FURTHER INFORMATION CONTACT: Lindsay Guzzo, Office of Water and Watersheds, NPDES Permit Unit (OWW–130), 1200 Sixth Avenue, Suite 900, Seattle, WA 98101; (206) 553–0268, *guzzo.lindsay@epa.gov*, or Meghan Hessenauer, Engineering and Analysis Division (4303T), U.S. EPA, 1200 Pennsylvania Ave. NW., Washington, DC 20460; (202) 566–1040; *hessenauer.meghan@epa.gov.*

SUPPLEMENTARY INFORMATION: On November 7, 2013 the Environmental Protection Agency (EPA) published the Alaska Seafood Processing Effluent Limitations Guidelines Notice of Data Availability in the **Federal Register** (78 FR 66916). In the notice EPA made available for public review and comment additional data and information gathered recently by the EPA from seafood processing facilities in Alaska and other publicly available sources. These data relate to the applicability of and discharge requirements for the Alaskan seafood subcategories of the Canned and Preserved Seafood Processing effluent limitations guidelines. In the notice EPA provided preliminary results of analyses of the updated data and preliminary indications of how these results may be reflected in EPA's final response to petitions submitted in 1980 by certain members of the Alaskan seafood processing industry, and in amended effluent limitations guidelines applicable to certain Alaskan seafood processing discharges which EPA is considering whether to promulgate in final form (CFR part 408).

Dated: December 19, 2013.

Nancy K. Stoner,

Acting Assistant Administrator, Office of Water.

EXPORT-IMPORT BANK OF THE UNITED STATES

[Public Notice: 2013–0060]

Application for Final Commitment for a Long-Term Loan or Financial Guarantee in Excess of $100 Million: AP088412XX, AP088412XA and AP088412XB

AGENCY: Export-Import Bank of the United States.

ACTION: Notice.

SUMMARY: This Notice is to inform the public, in accordance with Section 3(c)(10) of the Charter of the Export-Import Bank of the United States ("Ex-Im Bank"), that Ex-Im Bank has received an application for final commitment for a long-term loan or financial guarantee in excess of $100 million (as calculated in accordance with Section 3(c)(10) of the Charter). Comments received within the comment period specified below will be presented to the Ex-Im Bank Board of Directors prior to final action on this Transaction.

DATES: Comments must be received on or before January 21, 2014 to be assured of consideration before final consideration of the transaction by the Board of Directors of Ex-Im Bank.

ADDRESSES: Comments may be submitted through Regulations.gov at

WWW.REGULATIONS.GOV. To submit a comment, enter EIB–2013–0060 under the heading "Enter Keyword or ID" and select Search. Follow the instructions provided at the Submit a Comment screen. Please include your name, company name (if any) and EIB–2013–0060 on any attached document.

Reference: AP088412XX, AP088412XA and AP088412XB

Purpose and Use:

Brief description of the purpose of the transaction:

To support the export of U.S.-manufactured aircraft and engines.

Brief non-proprietary description of the anticipated use of the items being exported:

To provide commercial passenger air transportation services globally.

To the extent that Ex-Im Bank is reasonably aware, the item(s) being exported are not expected to produce exports or provide services in competition with the exportation of goods or provision of services by a United States industry.

Parties:

Principal Supplier: Boeing and General Electric
Obligor: Kenya Airways
Guarantor(s): N/A

Description Of Items Being Exported: Boeing 787 and 777 aircraft and General Electric spare engines.

Information On Decision: Information on the final decision for this transaction will be available in the "Summary Minutes of Meetings of Board of Directors" on *http://exim.gov/newsandevents/boardmeetings/board/*

Confidential Information: Please note that this notice does not include confidential or proprietary business information; information which, if disclosed, would violate the Trade Secrets Act; or information which would jeopardize jobs in the United States by supplying information that competitors could use to compete with companies in the United States.

Cristopolis Dieguez,

Program Specialist, Office of the General Counsel.

BILLING CODE 6690–01–P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments on the agreements to the Secretary, Federal Maritime Commission, Washington, DC 20573, within ten days of the date this notice appears in the **Federal Register**. Copies of the agreements are available through the Commission's Web site (*www.fmc.gov*) or by contacting the Office of Agreements at (202) 523–5793 or *tradeanalysis@fmc.gov*.

Agreement No.: 012032–009.

Title: CMA CGM/MSC/Maersk Line North and Central China-US Pacific Coast Three-Loop Space Charter, Sailing and Cooperative Working Agreement.

Parties: A.P. Moller-Maersk A/S, CMA CGM S.A., and Mediterranean Shipping Company S.A.

Filing Party: Wayne R. Rohde, Esq.; Cozen O'Connor; 1627 I Street NW., Suite 1100, Washington, DC 20006.

Synopsis: The Amendment provides for some additional slot sale arrangements among the parties and reflects the impact of these new arrangements on the overall slots allocations. The amendment also adds new language authorizing Maersk Line to charter space to CMA CGM on its TP6 service.

Agreement No.: 012238.

Title: HLAG/Maersk Line Gulf-Central America Slot Charter Agreement.

Parties: Hapag-Lloyd AG and A.P. Moller-Maersk A/S trading under the name Maersk Line.

Filing Party: Joshua P. Stein; Cozen O'Connor; 1627 I Street NW., Suite 1100, Washington, DC 20006.

Synopsis: The agreement authorizes HLAG to charter space to Maersk Line in the trade between Houston, TX and San Juan, PR, on the one hand, and ports in Mexico, the Dominican Republic, Colombia, Panama, Costa Rica, Guatemala, and Honduras on the other hand.

Agreement No.: 012239.

Title: LGL/SC Line Cooperative Working Agreement.

Parties: Liberty Global Logistics LLC and SC Line.

Filing Party: Brooke F. Shapiro; Winston & Strawn LLP; 200 Park Avenue, New York, NY 10166.

Synopsis: The agreement authorizes LGL and SC Line to discuss areas of potential cooperation and possibly engage in the purchasing of space on vessels operated by one another in the trade from the U.S. East and Gulf Coasts to ports in the Caribbean, South America, Central America, Mediterranean, and Middle East.

Agreement No.: 201212–001.

Title: Marine Terminal Lease and Operating Agreement Between Broward County and King Ocean Services Limited (Cayman Islands) Incorporated.

Parties: Broward County and King Ocean Services Limited (Cayman Islands) Incorporated.

Filing Party: Candace J. Running; Broward County Board of County Commissioners; Office of the County Attorney; 1850 Eller Drive, Suite 502, Fort Lauderdale, FL 33316.

Synopsis: The amendment updates the rent rate under the agreement.

Dated: December 20, 2013.

By Order of the Federal Maritime Commission.

Karen V. Gregory,

Secretary.

BILLING CODE 6730–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Savings and Loan Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Home Owners' Loan Act (12 U.S.C. 1461 *et seq.*) (HOLA), Regulation LL (12 CFR Part 238), and Regulation MM (12 CFR Part 239), and all other applicable statutes and regulations to become a savings and loan holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a savings association and nonbanking companies owned by the savings and loan holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the HOLA (12 U.S.C. 1467a(e)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 10(c)(4)(B) of the HOLA (12 U.S.C. 1467a(c)(4)(B)). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 4, 2014.

A. Federal Reserve Bank of Dallas (E. Ann Worthy, Vice President) 2200 North Pearl Street, Dallas, Texas 75201–2272:

1. *AF Mutual Holding Company and Alamogordo Financial Corp.*, both in Alamogordo, New Mexico; to acquire Bank 1440, Phoenix, Arizona. Alamogordo Financial Corp., will conduct a minority stock issuance.

Board of Governors of the Federal Reserve System, December 23, 2013.

Margaret McCloskey Shanks,

Deputy Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

[Document Identifier: HHS–OS–20694–30D]

Agency Information Collection Activities; Submission to OMB for Review and Approval; Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, has submitted an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB) for review and approval. The ICR is for renewal of the approved information collection assigned OMB control number 0990–0162 scheduled to expire on January 31, 2014 Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public on this ICR during the review and approval period.

DATES: Comments on the ICR must be received on or before January 27, 2014.

ADDRESSES: Submit your comments to *OIRA_submission@omb.eop.gov* or via facsimile to (202) 395–5806.

FOR FURTHER INFORMATION CONTACT: Information Collection Clearance staff, *Information.CollectionClearance@hhs.gov* or (202) 690–6162.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the OMB control number 0990–0162 and document identifier HHS–OS–20694–30–D for reference.

Information Collection Request Title: State Medicaid Fraud Control Units' Reports.

OMB No.: 0990–0162.

Abstract: Office of Inspector General (OIG) is requesting an extension by Office of Management and Budget (OMB) approval for the collection of information to comply with the requirements in Title 19 of the Social Security Act at 1903(q), 42 CFR 1007.15, and 42 CFR § 1007.17, in accordance with the Paperwork Reduction Act. The information collected consists of fifty separate annual reports and fifty separate application requests for certification/recertification of State Medicaid Fraud Control Units (MFCU). The collection is required by the statute and submitted yearly to OIG by the fifty MFCUs. OIG uses the information collected to determine the MFCUs' compliance with Federal requirements and eligibility for continued Federal financial participation (FFP) under the Federal MFCU grant program.

Need and Proposed Use of the Information: Public Law 95–142, the Medicare-Medicaid Anti-Fraud and Abuse Amendments, was enacted in 1977 to strengthen the capabilities of Federal and State governments to combat and eliminate fraud and abuse

in Medicaid, through the establishment of the MFCUs. This law amended section 1903 of the Social Security Act to establish operating requirements for MFCUs and provide FFP to State governments for the cost of establishing MFCUs, training State personnel, and keeping the MFCUs operational.

Under section 1903(q)(7), each MFCU must annually submit to the Secretary of Health and Human Services (Secretary) an application and annual report containing information that the Secretary determines is necessary to certify the MFCU as meeting the requirements for FFP. FFP is available only for activities directly related to the investigation and prosecution of health care providers suspected of committing Medicaid fraud. The MFCUs also review complaints of alleged abuse or neglect of patients and the misuse of patients' personal funds in health care facilities. OIG reviews the information collected to ensure that Federal matching funds are expended by MFCUs only for allowable costs. In addition, OIG analyzes each MFCU's submission to determine whether there is a need for OIG technical assistance and to establish priorities for onsite reviews to further monitor program activities.

Likely Respondents: 50.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions, to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information, to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information, and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Respondent	Form	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
MFCU	Annual Report	50	1	88	4,400
MFCU, estimating a "medium" [1] level of State participation in data mining activities.	Annual Report, data mining reporting only.	13	1	1	13
MFCU	Recertification Application	50	1	5	250
Total		50	2	94	4,663

[1] For medium participation, we estimate 25 percent of the 50 MFCUs participating, or 13 Units.

Darius Taylor,

Deputy, Information Collection Clearance Officer.

BILLING CODE 4152–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Privacy Act of 1974; System of Records Notice

AGENCY: National Disaster Medical System (NDMS), Office of Emergency Management (OEM), Office of the Assistant Secretary for Preparedness and Response (ASPR), Department of Health and Human Services (HHS).

ACTION: Notice to revise an existing system of records.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, as amended (5 U.S.C. 552a), HHS is altering an existing system of records, "National Disaster Medical System (NDMS) Patient Treatment and Tracking," system number 09–90–0040. The system of records was originally published June 26, 2007 (see 72 FR 35052) and previously revised March 27, 2008 (see 73 FR 16307). The alterations include: (1) Changing the system name to "National Disaster Medical System (NDMS) Disaster Medical Information Suite (DMIS);" (2) revising the categories of individuals to reflect that patients may include disaster workers and others who are provided medical countermeasures; (3) dividing the records into three categories (patient treatment, patient tracking, and veterinarian treatment) instead of two (patient treatment and veterinarian treatment); (4) adding, as a purpose for which information from this system is used, that the system provides HHS' NDMS claims processing system with records needed to reimburse NDMS providers for their services; (5) revising the first routine use to include these additional disclosure recipients: state and city governmental agencies, Non-Governmental Organizations (NGOs; e.g., American Red Cross), and hospitals that provide care to NDMS patients; and (6) adding one new routine use, pertaining to security breach response.

DATES: *Effective Dates:* Effective 30 days after publication. Written comments should be submitted on or before the effective date. HHS/ASPR/OEM/NDMS may publish an amended System of Records Notice (SORN) in light of any comments received.

ADDRESSES: The public should address written comments to: NDMS Director, National Disaster Medical System, 200 C Street SW., Washington, DC 20024. To review comments in person, please contact the Director NDMS, 200 C Street SW., Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: CDR Sumner Bossler, NDMS Disaster Medical Information Suite (DMIS), IT Program Manager, ASPR/OEM/NDMS, 200 C Street SW., C1L07, Washington, DC 20024. *sumner.bossler@hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. National Disaster Medical System (NDMS) Disaster Medical Information Suite (DMIS)

This system was established pursuant to Section 2812 of the Public Health Service (PHS) Act (42 U.S.C. 300hh–11), as amended, and resides in HHS/ASPR/OEM. Under section 2801 of the PHS Act, the HHS Secretary leads all Federal public health and medical response to public health emergencies and incidents covered by the National Response Framework, or any successor plan. The Secretary delegates to ASPR the leadership role for all health and medical services support functions in a health emergency or public health event, including National Special Security Events. In such events, ASPR

may deploy this system, Field Medical Station assets, and other HHS employees under the control of the Secretary and provide operational oversight over officers of the U.S. Public Health Service Commissioned Corps and other Federal public health and medical personnel. Under the National Response Framework, HHS is the lead agency for Emergency Support Function 8, *Public Health and Medical*. HHS uses this system to collect medical records and share them with the other Federal agencies and departments that share ESF 8 responsibilities with HHS. The ESF 8 agencies have shared statutory authority to collect and use medical information as needed to coordinate the following three key functions with Federal, state, local and private partners, to augment public health and medical activities of State and local governments in disaster or public health emergency situations:

- *Medical response*—this function involves activation and deployment of Federal response teams comprised of medical and logistical personnel, to assess the health and medical needs of disaster victims and to provide physical and mental health care during a public health emergency, including National Special Security Events.
- *Patient evacuation*—this function involves establishment of communications, transportation, patient tracking, and a medical regulating system to evacuate and move patients from a staging center near a disaster site to patient reception sites known as Federal Coordinating Centers (FCCs). The Department of Defense (DOD) and Veterans Administration (VA) have the prime responsibility for activating and managing the FCCs. In turn, upon receiving the patients, the FCCs have the authority to arrange for necessary referrals and admissions of evacuated patients.

The information collected by the NDMS–DMIS system and the purposes for which the information is used and disclosed by HHS are described in more detail in the revised SORN that follows below. Because some of the revisions constitute significant changes, HHS provided adequate advance notice of the altered SORN to the Office of Management and Budget (OMB) and Congress as required by the Privacy Act at 5 U.S.C. 552a(r).

II. The Privacy Act

The Privacy Act (5 U.S.C. 552a) governs the means by which the U.S. Government collects, maintains, and uses information about individuals in a system of records. A "system of records" is a group of any records under the control of a Federal agency from which information about an individual is retrieved by the individual's name or other personal identifier. The Privacy Act requires each agency to publish in the **Federal Register** a system of records notice (SORN) identifying and describing each system of records the agency maintains, including the purposes for which the agency uses information about individuals in the system, the routine uses for which the agency discloses such information outside the agency, and how individual record subjects can exercise their rights under the Privacy Act (e.g., to determine if the system contains information about them).

SYSTEM NUMBER:

09–90–0040

SYSTEM NAME:

National Disaster Medical System (NDMS) Disaster Medical Information Suite (DMIS).

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Paper records are stored at NDMS headquarters, 200 C. Street SW., Washington, DC 20024. The electronic database and server where information is entered and stored is maintained at the MAHC data center in Reston, Virginia.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Records in this system pertain to:

- patients who are treated and evacuated by Federal public health and medical personnel, including NDMS and PHS teams, that are activated to respond to an emergency or other situation; and
- owners of animals that are treated and evacuated by NDMS and PHS teams.

Patients may include disaster workers/responders and others who are provided medical countermeasures; however, this SORN excludes patient treatment records for federal employee-workers to the extent such records are covered under the Office of Personnel Management (OPM) SORN titled "Employee Medical File System Records" (OPM/GOVT–10). Patient records may include information about patients' family members and non-medical attendants, but only the patients—not their family members and non-medical attendants—are considered record subjects.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system includes the following categories of records containing personally identifiable information about patients or owners of animals:

CATEGORY A:

Completed Patient Treatment Record that includes

1. Team/personnel identification record, for patients who are disaster workers/responders on NDMS teams or other Federal public health and medical teams.
2. Patient treatment record.
   a. Chart Number.
   b. Time and Date Patient seeks treatment.
   c. Triage Category and health status.
   d. Location where Patient is seen and transferred.
   e. Patient Identification: Name, Address, City, State, Zip, Date of Birth, Phone Number, Employment, Weight, Next of Kin.
   f. Complaints/Symptoms.
   g. Patient Acuity, health status, Vital Signs/Treatment Recommended and/or Prescribed, laboratory tests
   h. Reported Medications and allergies
   i. History of present illness and reported past medical history
   j. Digital Images of patient and non-medical attendant for Identification
   k. Digital images, audio or video used for medical assessment
   l. Discharge—Time, Date, Disposition, Recommendations.
3. Patient Authorization—Requires Patient Signature in Front of Witness and Witness Verification through Signature.
4. Any potential attachments such as X-rays and laboratory reports showing test results.

CATEGORY B:

Completed Patient Tracking Record that includes

1. Patient Tracking Record.
   a. Patient Identification: Name, gender, and Address, City, State, Zip, Date of Birth, Phone Number, Employment, Weight, Next of Kin, unique ID.
   b. Attendant Identification: Name, gender, Address, City, State, Zip, Date of Birth, Phone Number, Next of Kin, email address, unique ID
   c. Triage Category and health status.
   d. Location where Patient is seen and transferred.
   e. Patient Acuity, health status
   f. Digital Images of patient and non-medical attendant for Identification
   g. Discharge: Time, Date, Disposition

CATEGORY C:

Veterinarian Treatment Records on animals

1. Privacy Act Data such as the name, address and telephone contact

information of owners of animals will be maintained to be associated with the animal patient. However, animal treatment records themselves are not subject to the Privacy Act protections.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The PHS Act, primarily section 2812 (42 U.S.C. 300hh–11); Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.); and Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

PURPOSE(S):

NDMS staff and other relevant HHS personnel use personally identifiable information from this system, on a need to know basis, for the following purposes:

- To document medical treatment rendered to patients, e.g., for use if questions of liability arise about the treatment or the subsequent condition of the patient while under the care of NDMS.
- To conduct medical quality assurance reviews and establish a quality improvement process (QIP), by reviewing medical treatment on a specific deployment, spotting best practices and developing process improvements for future deployments.
- For research projects related to the prevention of disease or disability as a result of a disaster and for situational awareness required for ASPR operations during disasters.
- To provide HHS' NDMS claims processing system with records needed to reimburse NDMS providers for their services.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a (b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed to parties outside HHS as follows:

1. To Federal agencies that are ESF 8 partners, including but not limited to DHS, DoD, and the VA, or that participate in National Special Security Events; state and city governmental agencies; Non-Governmental Organizations such as the American Red Cross; and hospitals providing care to NDMS patients; which share responsibility with HHS for the medical treatment and movement of patients (including responders), decedents, and animals, for the purpose of discharging those responsibilities, including ensuring that patients treated receive the maximum level of health care possible. The medical and demographic information collected during the treatment of a patient is shared with relevant partners to ensure that patients treated through NDMS–DMIS receive the appropriate level of health care. The health information disclosed among the partners is limited to what is needed for continuity of health care operations.

2. To a member of Congress or a Congressional staff member in response to an inquiry from the Congressional office made at the written request of the constituent about whom the record is maintained.

3. To the Department of Justice (DOJ), a court, or an adjudicatory body when the following situations arise:

a. The agency or any component thereof, or

b. Any employee of the agency whether in his/her official or individual capacity, where DOJ has agreed to represent the employee, or

c. The United States government, is a party to litigation or has an interest in such litigation and, after careful review, the agency deems that the records requested are relevant and necessary to the litigation and that the use of such records by DOJ, the court or the adjudicatory body is compliant with the purposes for which the agency collected the records.

4. To contractors, consultants, grantees, or volunteers that have been engaged by HHS to assist in the performance of a service related to this collection and who have a need to have access to the records in order to perform the activity.

5. To assist another federal or state agency, or its fiscal agent:

a. To establish the benefit entitlement of the patient.

b. To establish the relationship between the existing state benefit and the benefit funded in whole or part with federal funds, such as the one associated with the NDMS definitive care.

c. To collaborate with the state and state agencies on behalf of family members regarding the current location and placement of their evacuated family member or patient population.

6. To family members of a patient, to provide them with information about the location or the status of the patient. Disclosure of a patient's location or status is not permitted when there is a reasonable belief that disclosing such information could endanger the life, safety, health, or well-being of the patient.

7. To appropriate Federal agencies and Department contractors that have a need to know the information for the purpose of assisting HHS's efforts to respond to a suspected or confirmed breach of the security or confidentiality of information maintained in this system of records, provided the information disclosed is relevant and necessary for that assistance.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM—

STORAGE:

Records are stored in paper files kept at NDMS headquarters and in an electronic database housed in Reston, Virginia.

RETRIEVABILITY:

Records are organized by event, location, and date of treatment. Data are retrieved by name and other demographic information provided by the patient (or for veterinary records, by animal owner), as well as by location of treatment, diagnosis, and other data fields within the database.

SAFEGUARDS:

Information in this system is safeguarded in accordance with applicable laws, rules and policies, including the HHS Information Technology Security Program Handbook, all pertinent National Institutes of Standards and Technology publications and OMB Circular A–130, Management of Federal Resources. Records are protected from unauthorized access through appropriate administrative, physical, and technical safeguards. These safeguards include restricting access to authorized personnel who have need-to-know, using physical locks in the office environment, and the process of authentication using user IDs and passwords function as identification protection features. HHS file areas are locked after normal duty hours and the facilities are protected from the outside by security personnel. Personnel with authorized access to the system have been trained in the Privacy Act and information security requirements for both paper copies and electronically stored information.

RETENTION AND DISPOSAL:

Records are retained in accordance with records disposition schedule N1–468–07–1, approved by the National Archives and Records Administration (NARA) for the Office of Public Health and Emergency Preparedness (OPHEP); the Pandemic and All Hazards Preparedness Act (Pub. L. 109–417) established the ASPR to serve in a similar capacity as OPHEP for medical disaster response. Schedule N1–486–08–1 covers Patient Care Forms or other Medical Records regulated under the Health Insurance Portability and

Accountability Act (HIPAA), created by the Federal Medical Station(s) or by any component of HHS/ASPR during a response to an event while caring for victims of that event, and provides the following disposition authority:

Cutoff is at the end of the response activity by the Federal Medical Station(s) for a particular event. Retire to the Washington National Records Center 2 years after cutoff. Destroy 75 years after cutoff.

Cutoff refers to breaking, or ending files at regular intervals, usually at the close of a fiscal or calendar year, to permit their disposal or transfer in complete blocks and, in this case, cutoff is at the end of the response activity. The cutoff date marks the beginning of the records retention period. Veterinarian treatment records pertaining to animals and their owners are not included in the above schedule, and cannot be destroyed until NARA approves a disposition schedule for them.

SYSTEM MANAGER AND ADDRESS:

NDMS Director, 200 C. Street SW., Washington, DC 20024.

NOTIFICATION PROCEDURE:

Individuals seeking to know if this system contains records about them must submit a written request to the System Manager at the above mailing address, clearly marked as a "Privacy Act Request" on the envelope and letter (see, generally, HHS Privacy Act regulations found at 45 CFR Part 5b). Requests pertaining to patients should include the full name of the patient, appropriate verification of identity, current address of the patient, and the name of the requester, appropriate verification of identity, current address of the requester, and the nature of the record sought, as required by HHS Privacy Act regulations at 45 CFR 5b.5. Requests pertaining to owners of animals should include the full name of the owner and the animal, appropriate verification of identity, current address of the requester, and the nature of the record sought, as required by HHS Privacy Act regulations at 45 CFR 5b.5

RECORD ACCESS PROCEDURES:

Same as the notification procedure above.

CONTESTING RECORD PROCEDURES:

Same as the notification procedure above; the request should also clearly and concisely describe the information contested, the reasons for contesting it, and the proposed amendment sought, pursuant to HHS Privacy Act regulations at 45 CFR 5b.7.

RECORD SOURCE CATEGORIES:

Information in patient treatment and tracking records is obtained directly from the patients and from medical or clinical personnel treating or evacuating the patients or accessing their personal health records (PHR). In the case of minors or other patients who are unable to explain symptoms, information may be obtained from a parent or guardian, or other family members or individuals attending. Information in veterinarian treatment records about owners of animals is obtained from NDMS veterinary personnel and/or the owners or caretakers of the animals.

SYSTEM EXEMPTED FROM CERTAIN PROVISION OF THE PRIVACY ACT:

None.

Dated: December 6, 2013.

Nicole Lurie,

Assistant Secretary for Preparedness and Response.

BILLING CODE 4150–37–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention (CDC)

[CDC–2013–0025, Docket Number NIOSH–266]

Criteria for a Recommended Standard; Occupational Exposure to Heat and Hot Environments; Draft Criteria Document Availability

AGENCY: National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of draft document for public comment and public meeting.

SUMMARY: The National Institute for Occupational Safety and Health of the Centers for Disease Control and Prevention announces the availability of a draft Criteria Document entitled Criteria for a Recommended Standard: Occupational Exposure to Heat and Hot Environments for public comment. To view the notice and related materials, visit *http://www.regulations.gov* and enter CDC–2013–0025 in the search field and click "Search." Comments may be provided to the NIOSH docket, as well as given orally at the meeting.

DATES: *Public comment period:* Comments must be received by February 25, 2014.

Public Meeting Time and Date: February 13, 2014, 9 a.m.–4 p.m., Eastern Time. Please note that public comments may end before the time indicated, following the last call for comments. Members of the public who wish to provide public comments should plan to attend the meeting at the start time listed.

Place: Robert A. Taft Laboratories, 4676 Columbia Pkwy., Cincinnati, OH 45226. Room: Taft Auditorium.

Status: The meeting is open to the public, limited only by the space available. The meeting space accommodates approximately 100 people. In addition, there will be an audio teleconference line for those who cannot attend in-person. There is no registration fee to attend this public meeting. However, those wishing to attend are encouraged to register by February 5, 2014 with the NIOSH Docket Office at 513/533–8611 or email *nioshdocket@cdc.gov,*

Security Considerations: Due to mandatory security clearance procedures at the Robert A. Taft Laboratories, in-person attendees must present valid government-issued picture identification to security personnel upon entering the building and go through an airport-type security check.

Non-U.S. Citizens: Because of CDC Security Regulations, any non-U.S. citizen wishing to attend this meeting must provide the following information in writing to the NIOSH Docket Officer at the address below no later than January 13, 2014 to allow time for mandatory CDC facility security clearance procedures to be completed.

1. Name:
2. Gender:
3. Date of Birth:
4. Place of Birth (city, province, state, country):
5. Citizenship:
6. Passport Number:
7. Date of Passport Issue:
8. Date of Passport Expiration:
9. Type of Visa:
10. U.S. Naturalization Number (if a naturalized citizen):
11. U.S. Naturalization Date (if a naturalized citizen):
12. Visitor's Organization:
13. Organization Address:
14. Organization Telephone Number:
15. Visitor's Position/Title within the Organization:

This information will be transmitted to the CDC Security Office for approval. Visitors will be notified as soon as approval has been obtained. Non-U.S. citizens are encouraged to participate in the audio conferencing due to the extra clearance involved with in-person attendance.

Attendee and Speaker Registration: Attendees are encouraged to sign up by

February 5, 2014 with the NIOSH Docket Office. Individuals wishing to speak during the meeting may sign up when registering with the NIOSH Docket Office no later than February 5, 2014, at 513/533–8611 or by email at *nioshdocket@cdc.gov*. Those who have not signed up to present in advance may be allowed to present at the meeting if time allows.

Persons wanting to provide oral comments will be permitted up to 20 minutes. If additional time becomes available, presenters will be notified. Oral comments given at the meeting must also be submitted to the docket in writing in order to be considered by the Agency.

Priority for attendance will be given to those providing oral comments. Other requests to attend the meeting will then be accommodated on a first-come basis. Unreserved walk-in attendees will not be admitted due to security clearance requirements.

Purpose of the Meeting: To discuss and obtain comments on the draft document, "Criteria for a Recommended Standard: Occupational Exposure to Heat and Hot Environments". Special emphasis will be placed on discussion of the following:

Overall Questions

(1) Is worker acclimatization clearly explained and presented?

(2) Are there any additional recommendations that should be made?

(3) Is there any additional information on hydration that should be considered?

(4) Are there any additional risk factors for heat-related illnesses that should be discussed?

(5) Are there any additional examples of auxiliary body cooling and protective clothing that should be included?

(6) Are there any additional research needs that should be mentioned?

(7) Are there any additional references that should be included?

Written comments will be accepted at the meeting. Written comments may also be submitted by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* NIOSH Docket Office, Robert A. Taft Laboratories, 4676 Columbia Parkway, MS C–34, Cincinnati, Ohio 45226.

All material submitted to the Agency should reference the agency name and docket number (CDC–2013–0025; NIOSH–266). All electronic comments should be formatted as Microsoft Word. Please make reference to CDC–2013–0025 and Docket Number NIOSH–266.

All information received in response to this notice will be available for public examination and copying at the NIOSH Docket Office, Room 109, 4676 Columbia Parkway, Cincinnati, Ohio, 45226.

Background: Workers who are exposed to extreme heat or work in hot environments may be at risk of heat stress. Exposure to extreme heat can result in occupational illnesses and injuries. Heat stress can result in heat-related illnesses such as heat stroke, heat exhaustion, heat cramps, or heat rashes. Heat can also increase the risk of injuries in workers as it may result in sweaty palms, fogged-up safety glasses, and dizziness. Burns may also occur as a result of accidental contact with hot surfaces or steam. Workers at risk of heat stress include outdoor workers and workers in hot environments such as firefighters, bakery workers, farmers, construction workers, miners, boiler room workers, factory workers, and others.

In 1986, NIOSH published a Criteria Document on hot environments [DHHS (NIOSH) Publication No. 86–113] *http://www.cdc.gov/niosh/docs/86-113/86-113.pdf* which identified many of the effects of heat, provided information on appropriate measuring techniques, and made recommendations for occupational standards, prevention and control. In recent years, including during the oil spill response of 2010, questions were raised regarding whether this document needed to be updated with additional research and findings. Recent literature was reviewed to determine areas that needed updating and revision.

FOR FURTHER INFORMATION CONTACT: Brenda Jacklitsch, Phone: (513) 533–8369, Email: *GWE6@CDC.GOV*, NIOSH, MS–C32, Robert A. Taft Laboratories, 4676 Columbia Parkway, Cincinnati, OH 45226.

Dated: December 20, 2013.

John Howard,

Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Subcommittee on Procedures Review, Advisory Board on Radiation and Worker Health (ABRWH), National Institute for Occupational Safety and Health (NIOSH)

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following meeting for the aforementioned subcommittee:

Time and Date: 11:00 a.m.–5:00 p.m. Eastern Time, February 13, 2014.

Place: Audio Conference Call via FTS Conferencing. The USA toll-free, dial-in number is 1–866–659–0537 and the pass code is 9933701.

Status: Open to the public, without a verbal public comment period. The public is welcome to submit written comments in advance of the meeting, to the contact person below. Written comments received in advance of the meeting will be included in the official record of the meeting. The public is also welcome to listen to the meeting by joining the teleconference at the USA toll-

free, dial-in number, 1–866–659–0537 and the passcode is 9933701.

Background: The ABRWH was established under the Energy Employees Occupational Illness Compensation Program Act of 2000 to advise the President on a variety of policy and technical functions required to implement and effectively manage the compensation program. Key functions of the ABRWH include providing advice on the development of probability of causation guidelines that have been promulgated by the Department of Health and Human Services (HHS) as a final rule; advice on methods of dose reconstruction which have also been promulgated by HHS as a final rule; advice on the scientific validity and quality of dose estimation and reconstruction efforts being performed for purposes of the compensation program; and advice on petitions to add classes of workers to the Special Exposure Cohort (SEC).

In December 2000, the President delegated responsibility for funding, staffing, and operating the ABRWH to HHS, which subsequently delegated this authority to CDC. The charter was issued on August 3, 2001, renewed at appropriate intervals, and will expire on August 3, 2015.

Purpose: The ABRWH is charged with (a) providing advice to the Secretary, HHS, on the development of guidelines under Executive Order 13179; (b) providing advice to the Secretary, HHS, on the scientific validity and quality of dose reconstruction efforts performed for this program; and (c) upon request by the Secretary, HHS, advising the Secretary on whether there is a class of employees at any Department of Energy facility who were exposed to radiation but for whom it is not feasible to estimate their radiation dose, and on whether there is a reasonable likelihood that such radiation doses may have endangered the health of members of this class. The Subcommittee on Procedures Review was established to aid the ABRWH in carrying out its duty to advise the Secretary, HHS, on dose reconstructions. The Subcommittee on Procedures Review is responsible for overseeing, tracking, and participating in the reviews of all procedures used in the dose reconstruction process by the NIOSH Division of Compensation Analysis and Support (DCAS) and its dose reconstruction contractor (Oak Ridge Associated Universities—ORAU).

Matters To Be Discussed: The agenda for the Subcommittee meeting includes discussion of the following ORAU and DCAS procedures: ORAU Team Technical Information Bulletin (OTIB) 0034 ("Internal Dose Coworker Data for X–10"), OTIB 0054 ("Fission and Activation Product Assignment for Internal Dose-Related Gross Beta and Gross Gamma Analyses"), OTIB 0083 (Dissolution Models for Insoluble Plutonium 238"), Program Evaluation Report (PER) 011 ("K–25 TBD and TIB Revisions"), PER 014 ("Construction Trades Workers"), PER 020 ("Blockson TBD Revision"), PER 25 ("Huntington Pilot Plant TBD Revision"), PER 031 ("Y–12 TBD Revisions"), PER 033 ("Reduction Pilot Plant TBD Revision"), PER 038 ("Hooker Electrochemical TBD Revisions"); Update on Review of ORAU Team Report 0053 ("Stratified Co-Worker Sets); estimating radiation doses associated with localized skin exposures to uranium at Atomic Weapons Employer facilities; and a continuation of the comment-resolution process for other dose reconstruction procedures under review by the Subcommittee.

The agenda is subject to change as priorities dictate.

Contact Person for More Information: Theodore Katz, Designated Federal Officer, NIOSH, CDC, 1600 Clifton Road, Mailstop E–20, Atlanta, Georgia 30333, Telephone (513) 533–6800, Toll Free 1 (800) CDC–INFO, Email *dcas@cdc.gov*.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Centers for Disease Control and Prevention

Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP): Initial Review

The meeting announced below concerns The Cooperative Re-Engagement Controlled Trial (CoRECT), Funding Opportunity Announcement (FOA) PS14–001, initial review.

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the aforementioned meeting:

Time and Date: 12:00 p.m.–5:00 p.m., March 7, 2014 (Closed).

Place: Teleconference.

Status: The meeting will be closed to the public in accordance with provisions set forth in Section 552b(c)(4) and (6), Title 5 U.S.C., and the Determination of the Director, Management Analysis and Services Office, CDC, pursuant to Public Law 92–463.

Matters To Be Discussed: The meeting will include the initial review, discussion, and evaluation of applications received in response to "The Cooperative Re-Engagement Controlled Trial (CoRECT), FOA PS14–001".

Contact Person for More Information: Gregory Anderson, M.S., M.P.H., Scientific Review Officer, CDC, 1600 Clifton Road NE., Mailstop E60, Atlanta, Georgia 30333, Telephone: (404) 718–8833.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Subcommittee for Dose Reconstruction Reviews (SDRR), Advisory Board on Radiation and Worker Health (ABRWH or the Advisory Board), National Institute for Occupational Safety and Health (NIOSH)

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC), announces the following meeting for the aforementioned subcommittee:

Time and Date: 10:00 a.m.–5:00 p.m. Eastern Time, February 6, 2014.

Place: Audio Conference Call via FTS Conferencing.

Status: Open to the public, without a verbal public comment period. The public is welcome to submit written comments in advance of the meeting, to the contact person below. Written comments received in advance of the meeting will be included in the official record of the meeting. The public is also welcome to listen to the meeting by joining the teleconference at the USA toll-free, dial-in number, 1–866–659–0537 and the passcode is 9933701.

Background: The Advisory Board was established under the Energy Employees Occupational Illness Compensation Program Act of 2000 to advise the President on a variety of policy and technical functions required to implement and effectively manage the new compensation program. Key functions of the Advisory Board include providing advice on the development of probability of causation guidelines that have been promulgated by the Department of Health and Human Services (HHS) as a final rule; advice on methods of dose reconstruction, which have also been promulgated by HHS as a final rule; advice on the scientific validity and quality of dose estimation and reconstruction efforts being performed for purposes of the compensation program; and advice on petitions to add classes of workers to the Special Exposure Cohort (SEC).

In December 2000, the President delegated responsibility for funding, staffing, and operating the Advisory Board to HHS, which subsequently delegated this authority to CDC.

NIOSH implements this responsibility for CDC. The charter was issued on August 3, 2001, renewed at appropriate intervals, and will expire on August 3, 2015.

Purpose: The Advisory Board is charged with (a) providing advice to the Secretary, HHS, on the development of guidelines under Executive Order 13179; (b) providing advice to the Secretary, HHS, on the scientific validity and quality of dose reconstruction efforts performed for this program; and (c) upon request by the Secretary, HHS, advise the Secretary on whether there is a class of employees at any Department of Energy (DOE) facility who were exposed to radiation but for whom it is not feasible to estimate their radiation dose, and on whether there is reasonable likelihood that such radiation doses may have endangered the health of members of this class. The Subcommittee for Dose Reconstruction Reviews was established to aid the Advisory Board in carrying out its duty to advise the Secretary, HHS, on dose reconstruction.

Matters To Be Discussed: The agenda for the Subcommittee meeting includes the following dose reconstruction program quality management and assurance activities: Discussion of current findings from NIOSH internal dose reconstruction blind reviews; discussion of dose reconstruction cases under review (set 9, and cases involving Portsmouth, Hanford, Oak Ridge National Laboratory, Y–12, K–25, and other DOE and Atomic Weapons Employer sites from sets 10–13); and preparation of the Advisory Board's next report to the Secretary, HHS, summarizing the results of completed dose reconstruction reviews.

The agenda is subject to change as priorities dictate.

Contact Person For More Information: Theodore Katz, Designated Federal Officer, NIOSH, CDC, 1600 Clifton Road, Mailstop E–20, Atlanta, Georgia 30333, Telephone (513) 533–6800, Toll Free 1 (800) CDC–INFO, Email ocas@cdc.gov.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Board of Scientific Counselors, National Center for Health Statistics

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC), National Center for Health Statistics (NCHS) announces the following meeting of the aforementioned committee:

Times and Dates: 11:00 a.m.–5:30 p.m., January 27, 2014; 8:30 a.m.–1:00 p.m., January 28, 2014.

Place: NCHS Headquarters, 3311 Toledo Road, Hyattsville, Maryland 20782.

Status: This meeting is open to the public; however, visitors must be processed in accordance with established federal policies and procedures. For foreign nationals or non-US citizens, pre-approval is required (please contact Gwen Mustaf, 301–458–4500, *glm4@cdc.gov* or Virginia Cain, *vcain@cdc.gov* at least 10 days in advance for requirements). All visitors are required to present a valid form of picture identification issued by a state, federal or international government. As required by the Federal Property Management Regulations, Title 41, Code of Federal Regulation, Subpart 101–20.301, all persons entering in or on Federal controlled property and their packages, briefcases, and other containers in their immediate possession are subject to being x-rayed and inspected. Federal law prohibits the knowing possession or the causing to be present of firearms, explosives and other dangerous weapons and illegal substances. The meeting room accommodates approximately 100 people.

Purpose: This committee is charged with providing advice and making recommendations to the Secretary, Department of Health and Human Services; the Director, CDC; and the Director, NCHS, regarding the scientific and technical program goals and objectives, strategies, and priorities of NCHS.

Matters To Be Discussed: The agenda will include welcome remarks and update by the Director, NCHS; discussion of vital statistics; future program reviews; National Health Interview Survey 2017 redesign, long-term care report.

Requests to make oral presentations should be submitted in writing to the contact person listed below. All requests must contain the name, address, telephone number, and organizational affiliation of the presenter.

Written comments should not exceed five single-spaced typed pages in length and must be received by January 13, 2014.

The agenda items are subject to change as priorities dictate.

Contact Person For More Information: Virginia S. Cain, Ph.D., Director of Extramural Research, NCHS/CDC, 3311 Toledo Road, Room 7208, Hyattsville, Maryland 20782, telephone (301) 458–4500, fax (301) 458–4020

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Management Analysis and Services Office, Centers for Disease Control and Prevention.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Request for Nominations of Candidates To Serve on the Interagency Committee on Smoking and Health, Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS)

The CDC is soliciting nominations for possible membership on the Interagency Committee on Smoking and Health (ICSH), Office on Smoking and Health (OSH).

The ICSH consists of five experts in the field related to smoking and health appointed by the Secretary from physicians and scientists who represent private entities involved in informing the public about the health effects of smoking. The members are selected by the Secretary, HHS. The committee provides advice and guidance to the Secretary, HHS, and the Director, CDC regarding (a) coordination of all research and education programs and other activities within the Department and with other Federal, State, local and private agencies and (b) establishment and maintenance of liaison with appropriate private entities, federal agencies, and State and local public health agencies with respect to smoking and health activities.

Nominations are being sought for individuals who have expertise and qualifications necessary to contribute to the accomplishment of the committee's objectives. More information is available on the ICSH, OSH Web site: *http://www.cdc.gov/tobacco/ICSH/index.htm.*

Nominees will be selected based on expertise in the field of tobacco control and multi-disciplinary expertise in public health. Additionally, desirable qualifications include: (1) Knowledge of emerging tobacco control policies and experience in analyzing, evaluating, and interpreting Federal, State and/or local health or regulatory policy; or (2) knowledge of emerging tobacco products and the evolving environment of tobacco control and expertise in developing or contributing to the development of policies and/or programs; or (3) familiarity of rapid and emerging surveillance systems that will allow for the timely evaluation of tobacco product regulation and/or the impact of tobacco control interventions.

Federal employees will not be considered for membership. Members may be invited to serve for terms of up to four years. The U.S. Department of Health and Human Services policy stipulates that committee membership shall be balanced in terms of professional training and background, points of view represented, and the committee's function. In addition to an extensive range of expertise, consideration is given to a broad representation of geographic areas within the U.S., with diverse representation of both genders, ethnic and racial minorities, and persons with disabilities. Nominees must be U.S. citizens, and cannot be full-time employees of the U.S. Government.

Candidates should submit the following items:

- Current *curriculum vitae,* including complete contact information (name, affiliation, mailing address, telephone number, email address)
- A letter of recommendation from person(s) not employed by the U.S. Department of Health and Human Services
- A statement indicating the nominee's willingness to serve as a potential member of the Committee.

Nominations should be submitted electronically or in writing, and must be postmarked by January 17, 2014 and sent to: Ms. Monica Swann, NCCDPHP, CDC, 395 E Street SW., Room 9167, MS P06, Washington, DC 20024. (Email address: *zqe0@cdc.gov*). Telephone and facsimile submissions cannot be accepted.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10215]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by *February 25, 2014:*

ADDRESSES: When commenting, please reference the document identifier or OMB control number (OCN). To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for "Comment or Submission" or "More Search Options" to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number _____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10215 Medicaid Payment for Prescription Drugs—Physicians and Hospital Outpatient Departments Collecting and Submitting Drug Identifying Information to State Medicaid Programs

Under the Paperwork Reduction Act (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collections

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicaid Payment for Prescription Drugs—Physicians and Hospital Outpatient Departments Collecting and Submitting Drug Identifying Information to State Medicaid Programs; *Use:* In accordance with the Deficit Act of 2005, states are required to provide for the collection and submission of utilization data for certain physician-administered drugs in order to receive federal financial participation for these drugs. Physicians, serving as respondents to states, submit National Drug Code numbers and utilization information for "J" code physician-administered drugs so that the states will have sufficient information to collect drug rebate dollars; *Form Number:* CMS–10215 (OCN: 0938–1026); *Frequency:* Weekly; *Affected Public:* Private sector—business or other for-profits and not-for-profit institutions; *Number of Respondents:* 20,000; *Total Annual Responses:* 3,910,000; *Total Annual Hours:* 16,227. (For policy questions regarding this collection contact Bernadette Leeds at 410–786–9463).

Dated: December 23, 2013.

Martique Jones,

Deputy Director, Regulations Development Group, Office of Strategic Operations and Regulatory Affairs.

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10379 Rate Increase Disclosure and Review Reporting Requirements

CMS–724 Medicare/Medicaid Psychiatric Hospital Survey Data

Under the Paperwork Reduction Act (PRA)(44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of

information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collections

1. *Type of Information Collection Request:* Reinstatement with change of a previously approved information collection; *Title of Information Collection:* Rate Increase Disclosure and Review Reporting Requirements; *Use:* Section 1003 of the Affordable Care Act adds a new section 2794 of the PHS Act which directs the Secretary of the Department of Health and Human Services (the Secretary), in conjunction with the states, to establish a process for the annual review of "unreasonable increases in premiums for health insurance coverage." The statute provides that health insurance issuers must submit to the Secretary and the applicable state justifications for unreasonable premium increases prior to the implementation of the increases. Section 2794 also specifies that beginning with plan years beginning in 2014, the Secretary, in conjunction with the states, shall monitor premium increases of health insurance coverage offered through an Exchange and outside of an Exchange.

Section 2794 directs the Secretary to ensure the public disclosure of information and justification relating to unreasonable rate increases. The regulation therefore develops a process to ensure the public disclosure of all such information and justification. Section 2794 requires that health insurance issuers submit justification for an unreasonable rate increase to both us and the relevant state prior to its implementation. Additionally, section 2794 requires that rate increases effective in 2014 (submitted for review in 2013) be monitored by the Secretary, in conjunction with the states. To those ends the regulation establishes various reporting requirements for health insurance issuers, including a Preliminary Justification for a proposed rate increase, a Final Justification for any rate increase determined by a state or CMS to be unreasonable, and a notification requirement for unreasonable rate increases which the issuer will not implement.

On November 14, 2013, we issued a letter to State Insurance Commissioners outlining transitional policy for non-grandfathered coverage in the small group and individual health insurance markets. If permitted by applicable State authorities, health insurance issuers may choose to continue coverage that would otherwise be terminated or cancelled, and affected individuals and small businesses may choose to re-enroll in such coverage. Under this transitional policy, non-grandfathered health insurance coverage in the individual or small group market that is renewed for a policy year starting between January 1, 2014, and October 1, 2014, will not be considered to be out of compliance with certain market reforms if certain specific conditions are met. These transitional plans continue to be subject to the requirements of section 2794, but are not subject to 2701 (market rating rules), 2702 (guaranteed availability), 2704 (prohibition on health status rating), 2705 (prohibition on health status discrimination) and 2707 (requirements of essential health benefits) and the because the single risk pool (1311(e)) is dependent on all of the aforementioned sections (2701, 2702, 2704, 2705 and 2707), the transitional plans are also exempt from the single risk pool The Unified Rate Review Template and system are exclusively designed for use with the single risk pool plan, and any attempt to include non-single risk pool plans in the Unified Rate Review template or system will create errors, inaccuracies and limitations on submissions that would prevent the effectiveness of reviews of both sets of non-grandfathered plans (single risk pool and transitional). For these many reasons, we are requiring issuers with transitional plans that experience rate increases subject to review to use the Rate Review Justification system and templates which were required and utilized prior to April 1, 2013. *Form Number:* CMS–10379 (OCN: 0938–1141); *Frequency:* Annual; *Affected Public:* Private Sector, State Governments; *Number of Respondents:* 81; *Number of Responses:* 359; *Total Annual Hours:* 1,880. (For policy questions regarding this collection, contact Doug Pennington at 410–786–1553.)

2. *Type of Information Collection Request:* Reinstatement without change of a previously approved collection; *Title of Information Collection:* Medicare/Medicaid Psychiatric Hospital Survey Data; *Use:* The CMS–724 form is used to collect data that is not collected elsewhere and assists us in program planning and evaluation and in maintaining an accurate database on providers participating in the psychiatric hospital program. *Form Number:* CMS–724 (OCN: 0938–0378); *Frequency:* Annually; *Affected Public:* Private Sector: Business or other for-profits and Not-for-profit institutions; *Number of Respondents:* 500; Total *Annual Responses:* 150; *Total Annual Hours:* 75. (For policy questions regarding this collection contact Donald Howard at 410–786–6764.)

Dated: December 23, 2013.

[Document Identifier: CMS–10500 and CMS–10515]

Agency information Collection Activities: Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by *January 27, 2014.*

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of

Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395–5806 *OR* Email: *OIRA_submission@omb.eop.gov.*

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at *http://www.cms.hhs.gov/PaperworkReductionActof1995.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* New collection (Request for a new control number); *Title of Information Collection:* Outpatient and Ambulatory Surgery Experience of Care Survey; *Use:* We will use the information collected through the field test to inform the development of a larger national survey effort, including development of the final survey instrument and data collection procedures. Looking toward the survey development specifically, the data collected in this survey effort will be used to conduct a rigorous psychometric analysis of the survey content. The goal of such an analysis is to assess the measurement properties of the proposed instrument and sub-domain composites created from item subsets, to assure the information reported from any future administrations of the survey is well-defined. Such careful definition will prevent data distortion or misinformation if they are publicly reported. Data collection procedures will also be fine-tuned during this field test. The 30-day PRA package has been revised since the publication of the 60-day **Federal Register** notice on October 4, 2013 (78 FR 61848). (*Form Number:* CMS–10500 (OCN: 0938-New); *Frequency:* Once; *Affected Public:* Individuals and households; *Number of Respondents:* 2,304; *Total Annual Responses:* 2,304; *Total Annual Hours:* 384. (For policy questions regarding this collection contact Caren Ginsberg at 410–786–0713.)

2. *Type of Information Collection Request:* New collection (request for a new OMB control number); *Title of Information Collection:* Payment Collections Operations Contingency Plan; *Use:* Under sections 1401, 1411, and 1412 of the Affordable Care Act and 45 CFR part 155 subpart D, an Exchange makes an advance determination of tax credit eligibility for individuals who enroll in QHP coverage through the Exchange and seek financial assistance. Using information available at the time of enrollment, the Exchange determines whether the individual meets the income and other requirements for advance payments and the amount of the advance payments that can be used to pay premiums. Advance payments are made periodically under section 1412 of the Affordable Care Act to the issuer of the QHP in which the individual enrolls. Section 1402 of the Affordable Care Act provides for the reduction of cost sharing for certain individuals enrolled in a QHP through an Exchange, and section 1412 of the Affordable Care Act provides for the advance payment of these reductions to issuers. The statute directs issuers to reduce cost sharing for essential health benefits for individuals with household incomes between 100 and 400 percent of the Federal poverty level (FPL) who are enrolled in a silver level QHP through an individual market Exchange and are eligible for advance payments of the premium tax credit. The data collection will be used by HHS to make payments or collect charges from issuers under the following programs: advance payments of the premium tax credit, advanced cost-sharing reductions, and Marketplace user fees. The template will be used to make payments in January 2014 and for a number of months thereafter, as may be required based on HHS's operational progress. *Form Number:* CMS–10515 (OCN 0938–NEW). *Frequency:* Monthly. *Affected Public:* Private sector—Business or other for-profit and Not-for-profit institutions; *Number of Respondents:* 575. *Total Annual Responses:* 7,475. *Total Annual Hours:* 51,175. (For policy questions regarding this collection contact Jaya Ghildiyal at 301–492–5149.)

Dated: December 23, 2013.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10510]

Emergency Clearance: Public Information Collection Requirements Submitted to the Office of Management and Budget (OMB); Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice; correction.

SUMMARY: This document corrects a date in the December 23, 2013, **Federal Register** notice (document identifier: CMS–10510) entitled "Basic Health Program Report for Health Insurance Exchange Premium."

FOR FURTHER INFORMATION CONTACT: Jessica Schubel at 410–786–3032.

SUPPLEMENTARY INFORMATION:

I. Background

On December 23, 2013 (78 FR 77469), we published an emergency Paperwork Reduction Act (PRA) notice for the information collection request entitled "Basic Health Program Report for Health Insurance Exchange Premium."

While the date requested for OMB approval (January 6, 2014) is correct in the associated PRA package, the date in the December 23, 2013, **Federal Register** notice incorrectly reads "December 23, 2013." This notice corrects that error as follows.

II. Correction

In the **Federal Register** of December 23, 2013, in FR Doc. 2013–30434, on page 77469, in the third column, in the third paragraph, correct the first sentence to read:

We are requesting OMB review and approval of this collection by January 6, 2014, with a 180-day approval period.

Dated: December 23, 2013.

Martique Jones,

Deputy Director, Regulations Development Group, Office of Strategic Operations and Regulatory Affairs.

Food and Drug Administration

[Docket No. FDA–2011–N–0179]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Prior Notice of Imported Food Under the Public Health Security and Bioterrorism Preparedness and Response Act of 2002

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Fax written comments on the collection of information by January 27, 2014.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202–395–7285, or emailed to *oira_submission@omb.eop.gov*. All comments should be identified with the OMB control number 0910–0520. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, 1350 Piccard Dr., PI50–400B, Rockville, MD 20850, *PRAStaff@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance. Prior Notice of Imported Food Under the Public Health Security and Bioterrorism Preparedness and Response Act of 2002—21 CFR 1.278 to 1.285 (OMB Control Number 0910–0520)—Revision.

The Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (the Bioterrorism Act) added section 801(m) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 381(m)), which requires that we receive prior notice for food, including food for animals, that is imported or offered for import into the United States. Sections 1.278 to 1.282 of our regulations (21 CFR 1.278 to 1.282) set forth the requirements for submitting prior notice; §§ 1.283(d) and 1.285(j) (21 CFR 1.283(d) and 1.285(j)) set forth the procedure for requesting our review after we have refused admission of an article of food under section 801(m)(1) of the FD&C Act or placed an article of food under hold under section 801(l) of the FD&C Act; and § 1.285(i) (21 CFR 1.285(i)) sets forth the procedure for post-hold submissions.

Section 304 of the FDA Food Safety Modernization Act (FSMA) (Pub. L. 111–353) amended section 801(m) of the FD&C Act to require a person submitting prior notice of imported food, including food for animals, to report, in addition to other information already required, "any country to which the article has been refused entry." In the **Federal Register** of May 5, 2011 (76 FR 25542), we issued an interim final rule (IFR) entitled "Information Required in Prior Notice of Imported Food" (2011 IFR) that implemented section 304 of FSMA and requested public comments. OMB approved the collection of information requirements of the 2011 IFR under OMB control number 0910–0683. On May 30, 2013 (78 FR 32359), we published a final rule that adopts, without change, the regulatory requirements established in the 2011 IFR, specifically that a person submitting prior notice of imported food, including food for animals, must report the name of any country that has refused entry of that product. In this request for extension of OMB approval under the PRA, we are combining the burden hours associated with OMB control number 0910–0683 (collection entitled "Information Required in Prior Notice of Imported Food") with the burden hours approved under OMB control number 0910–0520 (collection entitled "Prior Notice of Imported Food Under the Public Health Security and Bioterrorism Preparedness and Response Act of 2002").

Advance notice of imported food allows us, with the support of the U.S. Customs and Border Protection (CBP), to target import inspections more effectively and help protect the nation's food supply against terrorist acts and other public health emergencies. By requiring that a prior notice contain additional information that indicates prior refusals by any country and also identifies the country or countries, we may better identify imported food shipments that may pose safety and security risks to U.S. consumers. This additional knowledge can further help us to make better informed decisions in managing the potential risks of imported food shipments into the United States.

Any person with knowledge of the required information may submit prior notice for an article of food. Thus, the respondents to this information collection may include importers, owners, ultimate consignees, shippers, and carriers.

Our regulations require that prior notice of imported food be submitted electronically using CBP's Automated Broker Interface of the Automated Commercial System (ABI/ACS) (§ 1.280(a)(1)) or the FDA Prior Notice System Interface (PNSI) (Form FDA 3540) (§ 1.280(a)(2)). PNSI is an electronic submission system available on the FDA Industry Systems page at *http://www.access.fda.gov/*. Information we collect in the prior notice submission includes: The submitter and transmitter (if different from the submitter); entry type and CBP identifier; the article of food including complete FDA product code; the manufacturer, for an article of food no longer in its natural state; the grower, if known, for an article of food that is in its natural state; the FDA Country of Production; the name of any country that has refused entry of the article of food; the shipper, except for food imported by international mail; the country from which the article of food is shipped or, if the food is imported by international mail, the anticipated date of mailing and country from which the food is mailed; the anticipated arrival information or, if the food is imported by international mail, the U.S. recipient; the importer, owner, and ultimate consignee, except for food imported by international mail or transshipped through the United States; the carrier and mode of transportation, except for food imported by international mail; and planned shipment information, except for food imported by international mail (§ 1.281).

Much of the information collected for prior notice is identical to the information collected for our importer's entry notice, which has been approved under OMB control number 0910–0046. The information in an importer's entry notice is collected electronically via CBP's ABI/ACS at the same time the respondent files an entry for import with CBP. To avoid double-counting the burden hours already counted in the importer's entry notice information collection, the burden hour analysis in

table 1 of this document reflects our estimate of the reduced burden for prior notice submitted through ABI/ACS in the column labeled "Hours per Response."

In addition to submitting a prior notice, a submitter should cancel a prior notice and must resubmit the information to us if information changes after we have confirmed a prior notice submission for review (e.g., if the identity of the manufacturer changes) (§ 1.282). However, changes in the estimated quantity, anticipated arrival information, or planned shipment information do not require resubmission of prior notice after we have confirmed a prior notice submission for review (§ 1.282(a)(1)(i) to 1.282(a)(1)(iii)). In the event that we refuse admission to an article of food under section 801(m)(1) or we place it under hold under section 801(l) of the (FD&C Act), §§ 1.283(d) and 1.285(j) set forth the procedure for requesting our review and the information required in a request for review. In the event that we place an article of food under hold under section 801(l) of the (FD&C Act), § 1.285(i) sets forth the procedure for, and the information to be included in, a post-hold submission.

In the **Federal Register** of November 1, 2013 (78 FR 65670) FDA published a 60-day notice requesting public comment on the proposed collection of information; no comments were received.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR Section No.	FDA Form No.	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Prior Notice Submissions						
Prior Notice Submitted Through ABI/ACS						
1.280–1.281	None	15,000	608	9,120,000	0.167	1,523,040 [2]
Prior Notice Submitted Through PNSI						
1.280–1.281	FDA 3540 [3]	26,667	58	1,546,686	0.384	593,927
New Prior Notice Submissions Subtotal						2,116,967
Prior Notice Cancellations						
Prior Notice Cancelled Through ABI/ACS						
1.282	FDA 3540	4,098	1	4,098	0.25	1,025
Prior Notice Cancelled Through PNSI						
1.282, 1.283(a)(5).	FDA 3540	33,096	1	33,096	0.25	8,274
Prior Notice Cancellations Subtotal						9,299
Prior Notice Requests for Review and Post-Hold Submissions						
1.283(d), 1.285(j).	None	1	1	1	8	8
1.285(i)	None	1	1	1	1	1
Prior Notice Requests for Review and Post-hold Submissions Subtotal						9
Total Hours Annually						2,126,275

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

[2] To avoid double-counting, an estimated 396,416 burden hours already accounted for in the Importer's Entry Notice information collection approved under OMB Control No. 0910–0046 are not included in this total.

[3] The term "Form FDA 3540" refers to the electronic submission system known as the Prior Notice System Interface (PNSI), which is available at *http://www.access.fda.gov.*

This estimate is based on our experience and the average number of prior notice submissions, cancellations, and requests for review received in the past 3 years.

As previously discussed, on May 30, 2013, we published a final rule that adopts, without change, the regulatory requirements established in the 2011 IFR, specifically that a person submitting prior notice of imported food, including food for animals, must report the name of any country that has refused entry of that product. We estimate that it would take on average about one additional minute (0.016 hours) per entry for each respondent to submit prior notice with this additional piece of information. Accordingly, we have increased our estimate of the hours per response for prior notices received through ABI/ACS from 9 minutes, or 0.15 hours, per notice, to 10 minutes, or 0.167 hours, per notice. We have also increased our estimate of the hours per response for prior notices received through PNSI from 22 minutes, or 0.366 hours (rounded to 0.37 hours), per notice, to 23 minutes, or 0.384 hours, per notice.

We received 8,570,504 prior notices through ABI/ACS during 2010; 9,054,187 during 2011; and 9,716,147 during 2012. Based on this experience, we estimate that approximately 15,000 users of ABI/ACS will submit an average of 608 prior notices annually, for a total of 9,120,000 prior notices received annually through ABI/ACS. FDA estimates the reporting burden for a prior notice submitted through ABI/

ACS to be 10 minutes, or 0.167 hours, per notice, for a total burden of 1,523,040 hours. This estimate takes into consideration the burden hours already counted in the information collection approval for our importer's entry notice, as previously discussed in this document.

We received 1,566,029 prior notices through PNSI during 2010; 1,498,609 during 2011; and 1,524,901 during 2012. Based on this experience, we estimate that approximately 26,667 registered users of PNSI will submit an average of 58 prior notices annually, for a total of 1,546,686 prior notices received annually. We estimate the reporting burden for a prior notice submitted through PNSI to be 23 minutes, or 0.384 hours, per notice, for a total burden of 593,927 hours.

We received 4,488 cancellations of prior notices through ABI/ACS during 2010; 3,993 during 2011; and 3,812 during 2012. Based on this experience, we estimate that approximately 4,098 users of ABI/ACS will submit an average of 1 cancellation annually, for a total of 4,098 cancellations received annually through ABI/ACS. We estimate the reporting burden for a cancellation submitted through ABI/ACS to be 15 minutes, or 0.25 hours, per cancellation, for a total burden of 1,024.5 hours, rounded to 1,025 hours.

We received 33,353 cancellations of prior notices through PNSI during 2010; 33,343 during 2011; and 32,592 during 2012. Based on this experience, we estimate that approximately 33,096 registered users of PNSI will submit an average of 1 cancellation annually, for a total of 33,096 cancellations received annually. We estimate the reporting burden for a cancellation submitted through PNSI to be 15 minutes, or 0.25 hours, per cancellation, for a total burden of 8,274 hours.

We have not received any requests for review under §§ 1.283(d) or 1.285(j) in the last 3 years (2010, 2011, and 2012); therefore, we estimate that one or fewer requests for review will be submitted annually. We estimate that it will take a requestor about 8 hours to prepare the factual and legal information necessary to prepare a request for review. Thus, we have estimated a total reporting burden of 8 hours.

We have not received any post-hold submissions under § 1.285(i) in the last 3 years (2010, 2011, and 2012); therefore, we estimate that one or fewer post-hold submissions will be submitted annually. We estimate that it will take about 1 hour to prepare the written notification described in § 1.285(i)(2)(i). Thus, we have estimated a total reporting burden of 1 hour.

Dated: December 18, 2013.

Leslie Kux,

Assistant Commissioner for Policy.

BILLING CODE 4160–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–N–1147]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Preparing a Claim of Categorical Exclusion or an Environmental Assessment for Submission to the Center for Food Safety and Applied Nutrition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Fax written comments on the collection of information by January 27, 2014.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202–395–7285, or emailed to *oira_submission@omb.eop.gov*. All comments should be identified with the OMB control number 0910–0541. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, 1350 Piccard Dr., PI50–400B, Rockville, MD 20850, *PRAStaff@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Preparing a Claim of Categorical Exclusion or an Environmental Assessment for Submission to the Center for Food Safety and Applied Nutrition (OMB Control Number 0910–0541)—Extension

As an integral part of its decisionmaking process, we are obligated under the National Environmental Policy Act of 1969 (NEPA) to consider the environmental impact of our actions, including allowing notifications for food contact substances to become effective and approving food additive petitions, color additive petitions, GRAS affirmation petitions, requests for exemption from regulation as a food additive, and actions on certain food labeling citizen petitions, nutrient content claims petitions, and health claims petitions. In 1997, we amended our regulations in part 25 (21 CFR part 25) to provide for categorical exclusions for additional classes of actions that do not individually or cumulatively have a significant effect on the human environment (62 FR 40570, July 29, 1997). As a result of that rulemaking, we no longer routinely require submission of information about the manufacturing and production of our regulated articles. We also have eliminated the previously required Environmental Assessment (EA) and abbreviated EA formats from the amended regulations. Instead, we have provided guidance that contains sample formats to help the industry submit a claim of categorical exclusion or an EA to the Center for Food Safety and Applied Nutrition (CFSAN). The guidance document entitled "Preparing a Claim of Categorical Exclusion or an Environmental Assessment for Submission to the Center for Food Safety and Applied Nutrition" identifies, interprets, and clarifies existing requirements imposed by statute and regulation, consistent with the Council on Environmental Quality regulations (40 CFR 1507.3). It consists of recommendations that do not themselves create requirements; rather, they are explanatory guidance for our own procedures in order to ensure full compliance with the purposes and provisions of NEPA.

The guidance provides information to assist in the preparation of claims of categorical exclusion and EAs for submission to CFSAN. The following questions are covered in this guidance: (1) What types of industry-initiated actions are subject to a claim of categorical exclusion, (2) what must a claim of categorical exclusion include by regulation, (3) what is an EA, (4) when is an EA required by regulation and what format should be used, (5) what are extraordinary circumstances, and (6) what suggestions does CFSAN have for preparing an EA? CFSAN encourages the industry to use the EA formats described in the guidance because standardized documentation submitted by industry increases the

efficiency of the review process. Although alternative approaches may be used, if these approaches satisfy the requirements of the applicable statutes and regulations. We are requesting the extension of OMB approval for the information collection provisions in the guidance.

Description of Respondents: The likely respondents include businesses engaged in the manufacture or sale of food, food ingredients, and substances used in materials that come into contact with food.

In the **Federal Register** of October 28, 2013 (78 FR 64218), FDA published a 60-day notice requesting public comment on the proposed collection of information. One comment was received. However, the comment was beyond the scope of the collection of information's four topics that are being solicited. Therefore, it will not be discussed in this document.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR Part 25; Environmental impact considerations	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
§ 25.32(i)	42	1	42	1	42
§ 25.32(o)	1	1	1	1	1
§ 25.32(q)	2	1	2	1	2
Total					45

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

The above estimates for respondents and numbers of responses are based on the annualized numbers of petitions and notifications qualifying for § 25.32(i) and (q) that the Agency has received in the past 3 years. Please note that in the past 3 years, there have been no submissions that requested an action that would have been subject to the categorical exclusion in § 25.32(o). To avoid counting this burden as zero, we have estimated the burden for this categorical exclusion at one respondent making one submission a year for a total of one annual submission.

To calculate the estimate for the hours per response values, we assumed that the information requested for each of these three categorical exclusions in this guidance is readily available to the submitter. For the information requested for the exclusion in § 25.32(i), we expect that submitter will need to gather information from appropriate persons in the submitter's company and prepare this information for attachment to the claim for categorical exclusion. We believe that this effort should take no longer than 1 hour per submission. For the information requested for the exclusions in § 25.32(o) and (q), the submitters will almost always merely need to copy existing documentation and attach it to the claim for categorical exclusion. We believe that collecting this information should also take no longer than 1 hour per submission.

Dated: December 20, 2013.

Leslie Kux,

Assistant Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–N–1558]

Agency Information Collection Activities; Proposed Collection; Comment Request; Guidance for Industry and Food and Drug Administration Staff; Section 905(j) Reports: Demonstrating Substantial Equivalence for Tobacco Products

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information request regarding the guidance for industry and FDA staff entitled "Section 905(j) Reports: Demonstrating Substantial Equivalence for Tobacco Products."

DATES: Submit either electronic or written comments on the collection of information by February 25, 2014.

ADDRESSES: Submit electronic comments on the collection of information to *http://www.regulations.gov.* Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, 1350 Piccard Dr., PI50–400B, Rockville, MD 20850, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the

validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Information Request Regarding Guidance for Industry and FDA Staff on Section 905(j) Reports: Demonstrating Substantial Equivalence for Tobacco Products (OMB Control Number 0910–0673—Extension)

On June 22, 2009, the President signed the Family Smoking Prevention and Tobacco Control Act (the Tobacco Control Act) (Pub. L. 111–31) into law. The Tobacco Control Act amended the Federal Food, Drug, and Cosmetic Act (FD&C Act) by adding a new chapter granting FDA authority to regulate the manufacture, marketing, and distribution of tobacco products to protect the public health generally and to reduce tobacco use by minors. Section 905(j) of the FD&C Act (21 U.S.C. 387e(j)) authorizes FDA to establish the form for the submission of information related to substantial equivalence. In a Level 1 guidance document issued under the Good Guidances Practices regulation (21 CFR 10.115), FDA provides recommendations intended to assist persons submitting reports under section 905(j) of the FD&C Act and explains, among other things, FDA's interpretation of the statutory sections related to substantial equivalence.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

FD&C act sections	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
905(j)(1)(A)(i) and 910(a)	1,000	1	1,000	360	360,000

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

FDA has based these estimates on information it now has available from interactions with the industry, information related to other regulated products, and FDA's expectations regarding the tobacco industry's use of the section 905(j) pathway to market their products. Table 1 describes the annual reporting burden as a result of the implementation of the substantial equivalence requirements of sections 905(j) and 910(a) of the FD&C Act (21 U.S.C. 387j(a)). FDA estimates that it will receive 1,000 section 905(j) reports each year and that it will take a manufacturer approximately 360 hours to prepare a report of substantial equivalence for a new tobacco product. Therefore, FDA estimates the burden for submission of substantial equivalence information will be 360,000 hours.

Dated: December 19, 2013.

Leslie Kux,

Assistant Commissioner for Policy.

BILLING CODE 4160–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Notice of Publication of a Draft of the Revised Guidebook for the National Practitioner Data Bank

AGENCY: Health Resources and Services Administration (HRSA), HHS.

ACTION: Notice of Publication of a Draft of the Revised Guidebook for the National Practitioner Data Bank.

SUMMARY: The National Practitioner Data Bank (NPDB) announces the release of a draft of the revised user Guidebook. The public is able to request a copy of the draft of the revised Guidebook and submit comments to the NPDB by the deadline below. The revised Guidebook includes expanded and improved reporting and querying examples; useful tables explaining Data Bank policies; and live links to statutes, regulations, and the Web site.

The NPDB is a confidential information clearinghouse created by Congress intended to facilitate a comprehensive review of the professional credentials of health care practitioners, health care entities, providers, and suppliers. The Guidebook is a policy manual that serves as an essential reference for Data Bank users to clarify legislative and regulatory requirements through the use of reporting and querying examples, explanations, definitions, and frequently asked questions (FAQs). The new Guidebook incorporates legislative and regulatory changes adopted since its last edition, including the merger of the NPDB with the Healthcare Integrity and Protection Data Bank. Once the comments have been reviewed, a final version of the revised Guidebook will be made available and will replace previous Guidebooks. For information on how to request a PDF copy of the draft Guidebook and instructions on how to submit comments, visit the NPDB Web site at: *http://www.npdb.hrsa.gov/news/news.jsp.*

DATES: Comments may be submitted through January 10, 2014. The comment period may be extended if needed. Information on any extensions of the review period will be posted on the Web site here: *http://www.npdb.hrsa.gov/news/news.jsp.*

FOR FURTHER INFORMATION CONTACT: Ernia P. Hughes, MBA, Acting Director of the Division of Practitioner Data Banks at: *NPDBPolicy@hrsa.gov* or 301–443–2300.

SUPPLEMENTARY INFORMATION: When submitting remarks, the NPDB requests that commenters:

- Reference the page number(s) each comment addresses; and
- Ensure comments are specific and relate to the clarity of the NPDB Guidebook's content, as regulatory or statutory concerns are beyond the scope of this comment process. Comments should be limited to content-based feedback that seeks to improve the examples and FAQs, clarify definitions, and eliminate ambiguity in the text. Comments that are not specific to content clarity and found beyond the scope of this review will not be addressed in this process.

Dated: December 19, 2013.

Mary K. Wakefield,

Administrator.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Ryan White HIV/AIDS Program Part C Early Intervention Services Grant Under the Ryan White HIV/AIDS Program

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice of Ryan White HIV/AIDS Program Part C Early Intervention Services One-Time Noncompetitive Award To Ensure Continued HIV Primary Medical Care.

SUMMARY: To prevent a lapse in comprehensive primary care services for persons living with HIV/AIDS, HRSA will provide a one-time noncompetitive Ryan White HIV/AIDS Program Part C award to Our Lady of the Lake Regional Medical Center, Inc. (OLOL), Baton Rouge, Louisiana.

SUPPLEMENTARY INFORMATION: The amount of the award to ensure ongoing HIV medical services is $348,111.

Authority: Section 2651 of the Public Health Service (PHS) Act, 42 U.S.C. 300ff–51. CFDA Number: 93.918.

Project period: The period of support for this award is 13 months, explained below in further detail.

Justification for the Exception to Competition: The Louisiana State University Health Sciences Center—Earl K. Long Medical Center (Grant Number: H76HA00591) announced the relinquishment of their Part C grant effective April 15, 2013. To prevent a lapse in HIV medical care, grant funds of $348,111 are to be awarded to OLOL to provide interim HIV medical care. The $348,111 represents the balance of the fiscal year 2013 award to cover HIV primary medical care services until April 30, 2014. The service area will be competed under HRSA–14–059 with a program start date of May 1, 2014.

FOR FURTHER INFORMATION CONTACT: John Fanning, Senior Policy Advisor, Division of Community HIV/AIDS Programs/HAB, HRSA, 5600 Fishers Lane, Rockville, MD 20857, by email at *jfanning@hrsa.gov*, or by phone at (301) 443–8367.

Dated: December 23, 2013.

Mary K. Wakefield,

Administrator.

[FR Doc. 2013–31120 Filed 12–26–13; 8:45 am]

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Indian Health Professions Preparatory, Indian Health Professions Pre-graduate and Indian Health Professions Scholarship Programs

Announcement Type: Initial.

CFDA Numbers: 93.971, 93.123, AND 93.972

Key Dates

Application Deadline: February 28, 2014, for continuing students.

Application Deadline: March 28, 2014, for new students.

Application Review: May 5–16, 2014.

Continuation Award Notification Deadline: June 6, 2014.

New Award Notification Deadline: July 3, 2014.

Award Start Date: August 1, 2014.

Acceptance/Decline of Awards Deadline: August 1, 2014.

I. Funding Opportunity Description

The Indian Health Service (IHS) is committed to encouraging American Indians and Alaska Natives to enter the health professions and to assuring the availability of Indian health professionals to serve Indians. The IHS is committed to the recruitment of students for the following programs:

- The Indian Health Professions Preparatory Scholarship authorized by Section 103 of the Indian Health Care Improvement Act, Public Law 94–437 (1976), as amended (IHCIA), codified at 25 U.S.C. 1613(b)(1).
- The Indian Health Professions Pre-graduate Scholarship authorized by Section 103 of the IHCIA, codified at 25 U.S.C. 1613(b)(2).
- The Indian Health Professions Scholarship authorized by Section 104 of the IHCIA, codified at 25 U.S.C. 1613a.

Full-time and part-time scholarships will be funded for each of the three scholarship programs.

The scholarship award selections and funding are subject to availability of funds appropriated for the Scholarship Program.

II. Award Information

Type of Award

Scholarship.

Estimated Funds Available

An estimated $13.2 million will be available for Fiscal Year (FY) 2014 awards. The IHS Scholarship Program (IHSSP) anticipates, but cannot guarantee, due to possible funding changes, student scholarship selections from any or all of the following disciplines in the Preparatory, Pre-graduate or Health Professions Scholarship Programs for the Scholarship Period 2014–2015. Due to the rising cost of education and the decreasing number of scholars who can be funded by the IHSSP, the IHSSP has changed the funding policy for Preparatory and Pre-graduate scholarship awards and reallocated a greater percentage of its funding in an effort to increase the number of Health Professions scholarships, and inherently the number of service-obligated scholars, to better meet the health care needs of the IHS and its Tribal and Urban Indian health care system partners.

Anticipated Number of Awards

Approximately 45 awards will be made under the Health Professions Preparatory and Pre-graduate Scholarship Programs for Indians. The awards are for ten months in duration, with an additional two months for approved summer school requests, and will cover both tuition and fees and Other Related Costs (ORC). The average award to a full-time student is approximately $34,490.60. An estimated 276 awards will be made under the Indian Health Professions Scholarship Program. The awards are for 12 months in duration and will cover both tuition and fees and ORC. The average award to a full-time student is approximately $42,432.70. In FY 2014, an estimated $11,700,000 is available for Health Professions awards, and an estimated $1,500,000 is available for Preparatory and Pre-graduate awards.

Project Period

The project period for the IHS Health Professions Preparatory Scholarship support, tuition, fees and ORC is limited to two years for full-time students and the part-time equivalent of two years, not to exceed four years for part-time students. The project period for the Health Professions Pre-graduate Scholarship support, tuition, fees and ORC is limited to four years for full-time students and the part-time equivalent of four years, not to exceed eight years for part-time students. The IHS Indian Health Professions Scholarship provides support for tuition, fees, and ORC and is limited to four years for full-time students and the part-time equivalent of four years, not to exceed eight years for part-time students.

III. Eligibility Information

This is a limited competition announcement. New and Continuation

scholarship awards are limited to "Indians" as defined at 25 U.S.C. Section 1603(13). **Note:** The definition of "Indians" for Section 103 Preparatory and Pre-graduate scholarships is broader than the definition of "Indians" for the Section 104 Health Professions scholarship, as specified below. Continuation awards are non-competitive.

1. Eligibility

The Health Professions Preparatory Scholarship awards are made to American Indians. (Federally recognized Tribal members, including those from Tribes terminated since 1940, first and second degree descendants of Federally recognized Tribal members. State recognized Tribal members and first and second degree descendants of State recognized Tribal members), or Eskimo, Aleut and other Alaska Natives who:

- Have successfully completed high school education or high school equivalency; and
- Have been accepted for enrollment in a compensatory, pre-professional general education course or curriculum

The Health Pre-graduate Scholarship awards are made to American Indians (Federally recognized Tribal members, including those from Tribes terminated since 1940, first and second degree descendants of Tribal members, and State recognized Tribal members, first and second degree descendants of Tribal members), or Eskimo, Aleut and other Alaska Natives who:

- Have successfully completed high school education or high school equivalency; and
- Have been accepted for enrollment or are enrolled in an accredited pre-graduate program leading to a baccalaureate degree in pre-medicine, pre-dentistry, pre-optometry or pre-podiatry.

The Indian Health Professions Scholarship may be awarded only to an individual who is a member of a Federally recognized Indian Tribe, Eskimo, Aleut or other Alaska Native as provided by Section 1603(13) of the IHCIA. Membership in a Tribe recognized only by a State does not meet this statutory requirement. To receive an Indian Health Professions Scholarship, an otherwise eligible individual must be enrolled in an appropriately accredited school and pursuing a course of study in a health profession as defined by Section 1603(10) of the IHCIA.

2. Cost Sharing/Matching

The Scholarship Program does not require matching funds or cost sharing to participate in the competitive grant process.

3. Benefits from State, Local, Tribal and Other Federal Sources

Awardees of the Health Professions Preparatory scholarship, Health Professions Pre- Graduate scholarship, or Health Professions scholarship, who accept outside funding from other scholarship, grant and fee waiver programs, will have these monies applied to their student account tuition and fees charges at the college or university they are attending, before the IHS Scholarship Program will pay any of the remaining balance, unless said outside scholarship, grant or fee waiver award letter specifically excludes use for tuition and fees. These outside funding sources must be reported on the student's invoicing documents submitted by the college or university they are attending. Student loans and Veterans Administration (VA)/GI Bill Benefits accepted by Health Professions scholarship recipients will have no effect on the IHSSP payment made to their college or university.

IV. Application Submission Information

1. Electronic Application System and Application Handbook Instructions and Forms

Applicants must go online to *www.ihs.gov/scholarship* to apply for an IHS scholarship and access the Application Handbook instructions and forms for submitting a properly completed application for review and funding consideration. Applicants are strongly encouraged to seek consultation from their Area Scholarship Coordinator (ASC) in preparing their scholarship application for award consideration. ASC's are listed on the IHS Web site at: *http://www.scholarship.ihs.gov/area_coordinators.cfm.*

This information is listed below. Please review the following list to identify the appropriate IHS Area Scholarship Coordinator for your State.

IHS area office and states/locality served	Scholarship coordinator address

Arizona	Ms. Trudy Begay, (See Phoenix Area).
Texas.	

2. Content and Form Submission

Each applicant will be responsible for entering their basic applicant account information online, in addition to submitting a completed, original signature hard copy and one copy set of application documents, in accordance with the IHS Scholarship Program Application Handbook instructions, to the: IHS Scholarship Program Branch Office, 801 Thompson Avenue, TMP 450A, Rockville, MD 20852. Applicants must initiate an application through the on-line portal or their applications will be considered incomplete. For more information on how to use the on-line portal, go to *www.ihs.gov/scholarship*. The portal will be open on December 1, 2013. The application will be considered complete if the following documents (original and one copy) are included:

- Completed and signed online Application Checklist.
- Completed, printed, and signed IHSSP online application form for new or continuation student.
- Current Letter of Acceptance from College/University or Proof of Application to a College/University or Health Professions Program.
- One set of Official transcripts for all colleges/universities attended (or high school transcripts or Certificate of

Completion of Home School Program or General Education Diploma (G.E.D.) for applicants who have not taken college courses).

• Cumulative Grade Point Average (GPA): Calculated by the applicant.

• Applicant's Documents for Indian Eligibility.

A. If you are a member of a Federally recognized Tribe or Alaska Native (recognized by the Secretary of the Interior), provide evidence of membership such as:

(1) Certification of Tribal enrollment by the Secretary of the Interior, acting through the Bureau of Indian Affairs (BIA) Certification: Form 4432—Category A or D, whichever is applicable); or

(2) In the absence of BIA certification, documentation that you meet requirements of Tribal membership as prescribed by the charter, articles of incorporation or other legal instrument of the Tribe and have been officially designated as a Tribal member as evidenced by an accompanying document signed by an authorized Tribal official, i.e., Tribal enrollment card showing enrollment number; or

(3) Other evidence of Tribal membership satisfactory to the Secretary of the Interior.

Note: If you meet the criteria of B or C, you are eligible only for the Preparatory or Pre-graduate Scholarships.

B. For Preparatory or Pre-graduate Scholarships, only: If you are a member of a Tribe terminated since 1940 or a State recognized Tribe and first or second degree descendant, provide official documentation that you meet the requirements of Tribal membership as prescribed by the charter, articles of incorporation or other legal instrument of the Tribe and have been officially designated as a Tribal member as evidenced by an accompanying document signed by an authorized Tribal official; or other evidence, satisfactory to the Secretary of the Interior, that you are a member of the Tribe. In addition, if the terminated or state recognized Tribe of which you are a member is not on a list of such Tribes published by the Secretary of the Interior in the Federal Register, you must submit an official signed document that the Tribe has been terminated since 1940 or is recognized by the state in which the Tribe is located in accordance with the law of that state.

C. For Preparatory or Pre-graduate Scholarships, only: If you are not a Tribal member, but are a natural child or grandchild of a Tribal member you must submit: (1) evidence of that fact, e.g., your birth certificate and/or your parent's/grandparent's birth/death certificate showing the name of the Tribal member; and (2) evidence of your parent's or grandparent's Tribal membership in accordance with paragraphs A and B. The relationship to the Tribal member must be clearly documented. Failure to submit the required documentation will result in the application not being accepted for review.

• Two Faculty/Employer Evaluations with original signature.

• Online Narratives—Reasons for Requesting the Scholarship.

• Delinquent Debt Form.

• Course Curriculum Verification with original signature.

• Curriculum for Major.

3. Submission Dates

Application Receipt Date: The online Continuation Application submission deadline for *Continuation* applicants is Friday, February 28, 2014. Required application support documents will be accepted through Friday, March 28, 2014.

Application Receipt Date: New applicants must print and sign their online application and Checklist and submit it with their supporting documents by the postal deadline of Friday, March 28, 2014. No supporting documents will be accepted after this date, except final Letters of Acceptance, which must be submitted no later than Friday, May 30, 2014.

Applications and supporting documents (original and one copy) shall be considered as meeting the deadline if they are received by the IHSSP Branch Office, postmarked on or before the deadline date. Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks will not be acceptable as proof of timely mailing and will not be considered for funding.

New and Continuation applicants may check the status of their application receipt and processing by logging into their online account at www.ihs.gov/scholarship. Applications received with postmarks after the announced deadline date will not be considered for funding.

4. Intergovernmental Review

Executive Order 12372 requiring intergovernmental review is not applicable to this program.

5. Funding Restrictions

No more than 5% of available funds will be used for part-time scholarships this fiscal year. Students are considered part-time if they are enrolled for a minimum of six hours of instruction and are not considered in full-time status by their college/university. Documentation must be received from part-time applicants that their school and course curriculum allows less than full-time status. Both part-time and full-time scholarship awards will be made in accordance with 42 CFR Subpart J, Subdivisions J–3, J–4, and J–8 and this information will be published in all IHSSP Application and Student Handbooks as they pertain to the IHSSP.

6. Other Submissions Requirements

New and Continuation applicants are responsible for using the online application system. See section 3. Submission Dates for application deadlines.

V. Application Review Information

1. Criteria
