8. POLICE RIGHT TO FINGERPRINT PRISONERS
(5 January 1949 - H.S. Eaton, J.B.C. Williams, J.F. Munroe)

This project was necessitated by a ruling of the Attorney-General's Office that police have no authority to fingerprint arrested persons if they are unwilling to be printed, that such is in violation

Declassified E.O. 12065 Section 3/402/ NNDG No. 775009

of the new Code of Criminal Procedure. A joint conference of NRP, Attorney-General's Office, Legal Section, SCAP, and PSD, on 11 January 1949, was held and AGO was impressed by the other conferees' opinion that fingerprinting for the purpose of identification of arrested persons is not illegal or unconstitutional. On 14 January, AGO reversed its previous opinion and agreed that police may fingerprint arrested persons for identification purposes whether prisoners submit or not. An order, in conformity with this opinion, has been issued by NRP to all police stations.

(November 1948 - W. G. Fritz)

a. Instructed MPD traffic officials in method of setting up dispatch system for motorcycle squads. Members of motorcycle squads were instructed in technique of stopping vehicles in the United States for inspection or arrest purposes; road positions when patroling along streets or highways; and reasons for periodic stops in high-accident areas. Expected date of completion: Indefinite.

b. Oriented MPD traffic officials in plan for new tactics against pedestrian and vehicle drivers due to slow court procedure which causes cases one to two months to be disposed of. Discussed traffic tickets being issued to pedestrians violating traffic regulations in moving traffic where pedestrians would appear the following day at police stations for a one-hour lecture on Traffic Safety. Discussed pedestrians in non-moving traffic where they would be stopped and their name and address written down. This in turn to be turned in by the policeman including time, place, and violation. The main police headquarters would then send a friendly letter to the person enlisting his cooperation in the future. An organization of "T" Men was also discussed with MPD traffic officials, which would be composed of civilians whose job it would be to write down the vehicle numbers of vehicles violating traffic regulations and sending this to the main police headquarters where a friendly letter would in turn be sent out enlisting the cooperation of the vehicle driver in the future. 16. RECENTLY ERECTED STOP SIGNS IN TOKYO CITY
(January 1949 - W. G. Fritz, H. S. Eaton)

Conference was held with PMO and MPD traffic officials to determine the reason and feasability of stop signs erected. From observations of this office it appears that stop signs have been erected indescriminately throughout Tokyo without taking into consideration statistics on accidents in those particular locations, and fact that the stop signs are not being observed, and there is no apparent enforcement on the part of the Military Police. Also written upon the signs is the word "stop" in Japanese, which according to investigation by this office is not binding upon the Japanese public and the Japanese police cannot enforce them. According to the Japanese Law the Japanese are not required to come to a full stop. There is also the matter of the sign not being legal because it is not constructed according to Japanese specifications. This matter cannot be enforced by the Japanese police until such time the Japanese National Road Control Law is changed. This is presently under consideration. Expected date of completion: 1 May, 1949

17. AMENDMENTS TO NATIONAL ROAD TRAFFIC CONTROL LAW
(January 1949 - W. G. Fritz)

In addition to amendments classifying emergency vehicles and

Declassified E.O. 12065 Section 3/402/ NNDG NO. 775009

stop signs amendments are also being considered by the NRP with regard to pedestrians walking facing traffic where sidewalks are not available; right turns for motor vehicles according to American method; new system of hand-signals where arms will be extended vertically over-head for the purpose of cautioning and stopping traffic. A new system of road signs is presently under consideration by the Construction Ministry, but there is some question as to whether they should adopt the American system of road signs or the International System. Expected date of completion: 1 May, 1949

18. RECRUITMENT OF QUALIFIED PERSONNEL FOR TOP JOBS IN NRP COMMUNICATIONS
(January 1949 - Lt. McCarthy)

7. NEW LOCATION FOR NRPNHQ IDENTIFICATION BUREAU
(8 October, 1948 - Joe B.C. Williams)

Project developed from approval by PSD of recommendations previously made as a result of survey of Japanese fingerprint system. Present location of NRP Identification Bureau in Tokyo unsafe and unsuitable for several reasons. Most suitable location is former Home Ministry building, where NRP National Headquarters is presently located with numerous other Japanese government agencies. The building is in custody of Personnel Ministry, which occupies entire first floor. Survey of this building to ascertain the names of other agencies presently housed there, and amount of space being occupied by them, has been completed. NRP has been directed to enter negotiations now with Personnel Ministry, through the Prime Minister, to secure adequate space in the building to properly protect its fingerprint files. It is anticipated this project will be completed by 31 December, 1948.

8. IMPROVED IDENTIFICATION EQUIPMENT
(8 October, 1948 - Joe B.C. Williams)

Need for improving and modernizing the identification equipment in the hands of Japanese police was seen in recent PSD survey of the system in effect in Japan. This project envisages the acquisition of new equipment from the United States, and other pieces through Japanese manufacture. PSD has ascertained that NRP is eligible to make dollar purchases in the United States through the SCAP-controlled Export-Import Revolving Fund, and survey is underway to determine what pieces of equipment shall be acquired in this manner. Japanese manufacturers are presently designing models of several other pieces of equipment for PSD approval. This project may continue for some time, depending on the acquisition of funds to finance the various purchases necessary by the NRP and probably will not be completed until new funds are acquired in the annual budget for 1949, i.e., about 1 May, 1949.

9. JAPANESE MANUFACTURE OF FINGERPRINT CARD-STOCK
(8 October, 1948 - Joe B.C. Williams)

Project was made necessary by SCAP restriction on the Japanese paper manufacturing industry which prevents it from manufacturing card-stock of sufficient thickness and stregth to permit use in a vertical filing system, previously recommended by PSD. NRP ascertained suitable stock can be manufactured if approval is given by ESS. Preliminary contact has been made by PSD with the Paper and Pulp Branch, Industrial Division, ESS, and the project outlined to that agency. Indications that approval will be given by ESS have been given, but ESS has requested that NRP submit a sample of the desired stock along with the manufacturer's specifications, before passing upon this matter. This project will be completed by 30 November 1948.

10. TRAINING OF NEW EMPLOYEES OF NRPNHQ IDENTIFICATION BUREAU
(8 October, 1948 - Joe B.C. Williams)

This is another project resulting from PSD approval of the Fingerprint Survey recommendations. Additional employees will be required by NRP to handle the stepped-up fingerprint program, and they will have to be trained speedily to perform classifications, searches, comparisons and filing procedure. NRP is presently preparing a training schedule for PSD approval. This project will be completed by 31 January 1949.

11. MUNICIPAL POLICE FINGERPRINT BUREAUS
(8 October, 1948 - Joe B.C. Williams)

At present no Japanese municipal police department has its own fingerprint bureau, depending upon the prefecture or National bureaus for services, which according to standard practice in America, should be performed in the municipal departments. The scope of work to be undertaken by the National and prefecture bureaus after 1 February 1949, will necessitate placing severe restrictions on the services they will perform for individual police stations. It is thus anticipated that municipal departments will have to establish their own bureaus. Survey is presently being made in cooperation with the NRP to select a suitable municipal police department to serve as a pilot in this program. When this city has been selected, PSD will advise and guide the municipality in establishing its identification procedures, and thereby perfect a pattern to guide other municipalities in establishing local bureaus. This project will probably require about six months for completion, and

will have to be trained speedily to perform classifications, searches, comparisons and filing procedure. NRP is presently preparing a training schedule for PSD approval. This project will be completed by 31 January 1949.
