NURSERY STOCK

Hardy Plants from the Black Hills

GATES NURSERY

Rapid City, South Dakota

R. F. D. No. 2 - ONE MILE EAST OF RAPID CITY, SOUTH DAKOTA

Telephone 4F3 or 4F4

To Our Friends and Customers:

Again I wish to present you with one of our new catalogs. I believe that you will agree with me when I say it is an improvement over the one we had last year. There are several things that I wish to call your attention to:

First is the improvement of cover design which you no doubt have already noticed; second, we have added several new cuts to the catalog from

E. A. GATES Proprietor Gates Nursery

photographs taken in the nursery last summer; third, there has been added a number of new varieties to our lists, making it easier to select desirable kinds for your wants; fourth, we are offering many bargains and most stock at a greatly reduced price over last year. We believe that this will enable you to buy where otherwise you would not feel that you could spare the money. You will be enabled to take advantage of some of our offers and beautify your place by planting perennials, ornamentals and trees. can set out an orchard at a small cost. We do not claim to undersell other nurseries. We cannot produce stock as cheaply as nurseries that grow their stock in the south. Please keep this in mind whenever you buy nursery stock that it is not the first cost that counts so much, but the results

you get. Buy acclimated stock whenever possible from a home nursery. Remember our stock is thrifty, well rooted and acclimated. We invite you to

come and see for yourselves.

Another new feature of our catalog this year is the increased space devoted to commercial fertilizer. More and more people are using some form of commercial fertilizer, in their yards, gardens and around their shrubbery and trees. Try a little and see the results for yourselves. We believe that VERT is the best on the market and that is the reason we are handling it.

OUR GUARANTEE

When you purchase your nursery stock from us and give it the proper attention at planting time and afterward, we will guarantee for one year with free replacement. Proper proof should be furnished before asking replacement. We send out free planting instructions with each order.

Transportation

We prepay all transportation charges on cash orders where cash is sent in previous to time of delivery, except on balled and burlapped evergreen stock, which is generally shipped by freight, F. O. B., Rapid City. All C. O. D. orders are shipped F. O. B. Rapid City. If left to our judgment we will adopt the best method of transportation, which will depend upon size of package, weight, distance and contents, whether it will go by parcel post. express or freight.

Payment

May be made by check, money order, bank draft or cash with order. 25% down on C. O. D. orders, balance at time of delivery.

Inspection

Our nursery has been inspected by the State Nursery Inspector as required by State Law and found free from all injurious insects and dangerous plant diseases.

FREE! FREE! FREE!

With every cash order for nursery stock of \$5.00 or more we are giving away free this spring, one dozen gladiola bulbs. With every \$10.00 order or more you are entitled to two dozen gladiola bulbs or one of our beautiful 1932 Calendar and Thermometer combinations. Specify whether you desire the bulbs or calendar.

Landscape Service, Tree Surgery and Spraying

Due to the efforts of Otis Dill our Landscape man and Tree Surgeon, we did considerable more landscaping and tree work during the past year than we ever did before. If you are interested in any of this work please get in touch with us. I am sure that we can give you satisfaction. We will be only too glad to give you references where landscaping work has been done, and

you can write to these parties, or go and see for yourself. We will be glad to call upon you, at your request, and give you estimates as to costs. This information is given to you free.

Because of the demand in the last two or three years for spraying fruit trees and shrubs, we have purchased a good spray outfit and are now equipped to handle this kind of work. If insects and diseases are destroying your trees and bushes, get in touch with our nursery at once. We can, in most instances, tell you what is do-We can. ing the damage and how to control it. The kind of spray that we use or recommend will depend upon the kind of insect or disease that is doing the damage and upon the type of vegetation to be sprayed. Most damage done to apples is by the coddling moth larvae or worm and this can general-

OTIS DILL Landscape Architect and Tree Surgeon

ly be controlled by two sprays of arsenate of lead. The first spray is known as the calyx spray and should be applied when three-fourths or more of the petals from the blossoms have fallen off. The second spray should be applied two or three weeks later. These two sprays are all that is generally necessary, although sometimes a third spray is required where the insect is doing considerable damage. The curculio is the insect that does the most damage to plums. It is controlled by the same spray used with the coddling moth and can be applied at the same time. In combination with arsenate of lead we use lime-sulphur which controls scab or other fungus diseases which might be present. The elm leaf beetle is very prevalent in this territory and elms should be sprayed soon after the leaves come out in the spring and again in the summer when the young larvae begin to hatch. Plant lice or aphids are also very common and are controlled by means of contact sprays, Blackleaf 40 or kerosene emulsion. These are some of the more common insects and diseases, but there are a good many more that do considerable damage in Western South Dakota.

We spray at the rate of 15c per gallon of combination spray material. The spray will control all the common insects and diseases that might be present. If 25 or more gallons of spray material is used the charge will be 10c per gallon. Medium sized fruit trees cost about 50c each, and shade trees the same. Large shade trees usually cost about \$1.00 each sprayed. We do not spray any job less than \$1.00. We do not sell spray material but will be glad to give your directions for obtaining poisons, mixing, applying, etc.

We sell tree tanglefoot at 75c per pound with directions for application. Tree tanglefoot is banded about trees to prevent crawling insects from climbing up the trunks and depositing their eggs. It is also used for waterproofing cuts and wounds of trees. It can be used as a substitute for grafting wax and requires no special heating when applied. Directions sent with each pound can.

Fruit Trees

We have a great number of fruit trees this year and we are going to give our customers an opportunity to plant out an orchard at a small cost. Or we will plant it for you. We have planted several orchards in our vicinity during the past two or three years, with very good success. Write us a letter, telling us about how large an orchard you are considering planting and if your place is not too far away we will call upon you and make you a price for the trees and their planting. Now is the time to plant an orchard. If you will look around your neighborhood you will notice that the old orchards are pretty well "shot," mostly due to lack of care.

HARDY APPLES AND CRABS

We grow only those varieties that we think suitable for this territory. Good, hardy, thrifty, low headed trees.

Summer Varieties

- Yellow Transparent—Early variety, ripening to a yellow in August. Good eating, being tender and juicy when ripe. Markets well. Tree upright in growth.
- **Duchess**—Old standard hardy summer variety. Large apple streaked with red. Ripens the first of September.
- Anoka—One of Dr. Hansen's productions. Tree dwarfish in habit, producing apples very often the second year after planting. Fruit resembles Duchess in many ways.
- Red Bird or Crimson Beauty—Early apple of bright red color and very attractive. Good quality and flavor and fine for market purposes. Originated in Canada.

THE GATES FAMILY

Left to right, in foreground—Ed Gates, proprietor Gates Nursery; Clyde Gates, Charles Gates, on trieyele. In background—O. B. Gates, father, deceased; Mary F. Gates, Mrs. E. A. Gates, Olive Gates, Mrs. O. B. Gates, mother, holding David Gates, and Mary E. Gates at right.

Winter Varieties

- Wealthy—Standard apple for the northwest. Fruit medium in size, red striped, juicy. Bears annual heavy crops. Good marketing, cooking and eating apple.
- McIntosh Red—Fruit medium to small in size, beautiful crimson. High quality for marketing and home use. Keeps until mid-winter or later.

- North Western Greening—Fine apple for the market. Keeps until mid-winter. Fruit large, yellowish green. Tree medium hardiness.
- Hibernal—Tree very hardy with spreading habit of growth. Fruit large, yellowish red. Fine for cooking but too tart for eating unless real ripe.
- Red Delicious—Considered by many to be the best of apples. It can be grown in this climate but fruit tends to be small and immature due to shortness of season.
- Haroldson—A new apple from the Minnesota Experiment Station. Strong upright tree, bearing a fine red apple that will keep until string. Tree has proved very hardy with us.
- Lobo—This apple was originated in Ottawa, Canada. We believe that this is one of the best apples for this section. Being a cross with the McIntosh, it has the McIntosh quality and flavor.

Otis Dill and John Thomas Trimming Trees

Goldo—Another of Dr. Hansen's apples, that keeps well into the fall. It can be used as a substitute for the Grimes Golden which is not hardy in this climate.

Crab Apples

- Whitney—Ripens in August. Red-striped, tender and juicy. Good for pick-ling, cooking and eating.
- Transcendent—Fruit ripens in September. Fine for pickling and canning. Fruit medium in size, bright red.
- Dolgo—Originated at South Dakota Experiment Station. Tree hardy, vigorous, upright grower. Fruit medium to small, rich in flavor, bright red in color. Fine for pickling or jelly.
- Red Flesh Crab—A red flowering, red-leaved and red fruited crab to the core. Fruit medium to small. Originated by Dr. Hansen.

Special Apple and Crab Collection

Bargain list consists of six hardy outstanding varieties of apples and crabs suitable for the northwest, 3 to 5-foot size.

Whitney, Wealthy, Harldson, McIntosh, Anoka, Yellow Transparent

Value \$3.00; Special Price \$2.35 Prepaid

PEAR TREES

We are offering four varieties of pears this year which we believe are worthy and suitable for planting. Whenever you send in an order for fruit trees better include an order for two or three pear trees.

- Mendell—Introduced by Mr. Pfaender, Jr. Tree large, thrifty and seems practically blight proof. Fruit above medium in size, sweet, juicy and of good flavor. Golden yellow when ripe.
- Minnesota No. 1—Tree rapid grower and hardy. Fruit large and of very fine quality for market and home use.
- Patten—Of Iowa origin. A very large, high quality fruit. One of the best for market and home use. Tree of medium hardiness.
- Tait No. 1—Slow growing, stocky, hardy tree. Fruit medium in size, of good quality, early maturing and free from grit. Originated in Canada.

PLUMS AND PLUM HYBRIDS

The varieties listed below are those that we consider best for our part of the country. They are far superior to any wild plum both as to size and qulaity and therefore find a ready market

William Coursen and E. A. Gates Budding Plum Trees

- qulaity and therefore find a ready market and bring a good price. Usually start bearing the next year after planting.
- Red Wing—A production from the Minnesota Fruit Breeding Farm. Fruit large large flat, yellow, overlaid with red. Skin tender. Pit small and of the freestone type.
- Underwood—Another of the Minnesota plums. Equals in flavor any variety of the Japanese plums. Fruit large, dark red and sweet.
- Waneta—One of Hansen's best plums. Fruit very large on young trees but on the older trees tends to become small on account of overbearing. A fine marketing and canning plum.
- Hanska—From the South Dakota Experiment Station. Fruit large, reddish yellow. Apricot shape and flavor. Aromatic. Very good eating and marketing plum. Tree upright, hardy and vigorous.
- Kaga—Fruit and tree similar to the Hanska except tree tends to bear a little younger and branches are perhaps a little finer.
- DeSota—A native plum from Wisconsin. Very hardy variety, extremely productive and profitable. Tends to overbear. Skin yellow, overlaid with red. Flesh rich, solid and sweet.
- Tecompsah—One of Hansen's hybrid plums. It is one of the best plums, because of its dark red color, earliness and size, which makes it valuable for marketing purposes. High quality plum.
- Wastesa—Originated at the South Dakota Experiment Station. Tree heavy bearer of large, flat, yellow fruit overlaid with red. Very hardy variety.
- Opata—Hansen plum sandcherry hybrid, budded on sandcherry. Fruit, medium, purplish green, growing in clusters, early maturing and an annual bearer. Tree dwarfish and spreading. Good canning and eating.
- Sapa—Similar to Opata except flesh dark red instead of green. Not as heavy a bearer as Opata or quite as hardy. Budded on sandcherry and can be grown quite successfully upon shale and gumbo soils.

Compass Cherry—Originated in Minnesota many years ago and is still a favorite with many. Very hardy and prolific tree. Fruit good for preserving and canning.

| Prices for plums: | Each | Doz. |
|--|------|---------|
| 4 to 6 feet, choice of any assortment | | \$ 8.00 |
| 3 to 5 feet, choice of any assortment | | 5.00 |
| 2 to 3 feet, mostly whips, choice of varieties | | 2.50 |
| Extra select trees, 5 to 6 feet | 1.00 | 10.00 |

Special Bargain for Best Plum Varieties

One each of the following hardy varieties:
Hanska, Opata, Underwood, Red Wing, Waneta and Compass Cherry
Value \$3.00; Special price \$2.35 prepaid.

CHERRY AND CHERRY HYBRIDS

- Oka—This is a seedling of the Champa Sandcherry, introduced in 1924 by Dr. N. E. Hansen. No doubt the outstanding Cherry Hybrid of recent years. Fruit dark, purplish red, black red fleshed, hangs well to tree, fine flavored and a good canner. Tree dwarfish and bushy.
- Zumbra—Originated in Minnesota. It is a cross between the Pin Cherry and wild Sand Cherry of South Dakota. Tree quite hardy, spreading in habit. Fruit dark purplish red, fine for canning. Flesh green with free stone.
- Nicollet—A new hybrid from the Minnesota Experiment Station. Fruit ripens later than the common pie cherry. Large sweet orange red cherry, very fine for pies and sauce. Tree upright, hardy and thrifty.

| Prices for Oka, Zumbra and Nicollet Cherry: | Each | Doz. |
|---|------|---------|
| 3 to 4 feet\$ | .80 | \$ 8.00 |
| 2 to 3 feet | .50 | 5.00 |

- Early Richmond—The earliest of the sour pie cherries. Fruit dark red, medium in size. Tree vigorous and bears young. Does best on upland or sandy soil which is well drained.
- Montmorency—Similar to Early Richmond except comes into bearing ten days later. Fruit large, red, fine for canning and pies.

| Prices for E. Richmond and Montmorency: | Each | Doz. |
|---|--------|---------|
| 4 to 5 feet, any assortment | \$.80 | \$ 8.00 |
| 3 to 4 feet, any assortment | 50 | 5.00 |

Special Offer on Cherries

One each of the varieties listed above:
Oka, Zumbra, Nicollet, Early Richmond and Montmorency in the smaller sizes, for \$1.90 prepaid. Regular price \$2.50.

TREE PROTECTORS

A good many trees are lost in South Dakota because of rabbits girdling young trees and because of sun-scald in the winter time. We have a wood veneer protector that will prevent loss from both these sources. They can be soaked in water a few minutes and then tied or wired about the base of the young tree.

Price 10c each: \$1.00 dozen.

Small Fruits

SAND CHERRY

Native of this territory. Does exceptionally well under cultivation. Fruit dark purplish, fine for jelly and preserves and makes excellent pies. Tree dwarf and spreading.

| Each | Doz. |
|--|---------|
| 2-year transplanted stock, 2 to 3 feet\$.25 | \$2 .50 |
| 1 year seedlings | 1.00 |

GRAPES

Beta—Medium sized black grape. A very hardy rapid grower and heavy producer. Fruit fine for jellies, grape juice and preserves. When fruit is left on vine until after frost, it is very fine eating. Used quite extensively as screens on porches and trellises.

Lucile—This variety is next to Beta in hardiness. It is a very heavy producer of large red grapes of the best quality.

| Prices: | Each | Doz. |
|--------------------------|--------|---------|
| Two and three-year vines | \$.35 | \$ 3.50 |
| One-year vines | | 2.00 |

CURRANTS

Currants are one of the easiest small fruits grown. For best results they should be spaced about six feet away and given plenty of cultivation. They will bear annual crops of fruit that is unsurpassed for jellies.

Cherry—A strong vigorous plant. Fruit large, red, growing in short clusters, rather acid.

Perfection—Fruit borne in long clusters. Berries nearly as large as Early Richmond Cherries. Fine quality and flavor.

Berry Pickers and Field Men

White Grape—Berries hang in large white clusters. Excellent quality and quality and therefore find a ready market and bring a good price. Usually start bearing the next year after planting.

| Prices: | Each | Doz. |
|------------------------------|---------|---------|
| 2 and 3 year, any assortment | .\$.30 | \$ 3.00 |
| 1 year, any assortment | 20 | 1.75 |

GOOSEBERRY BUSHES

Gooseberries and currants are grown in the same manner. There is no other fruit that will bear as heavy for a given area than gooseberries. The fruit makes excellent pies and is fine for canning.

Carrie—Unequalled for flavor, productiveness and vigorous growth. Has very few thorns to interfere with picking. New and valuable variety for the northwest.

Houghton—Standard variety for this country. Bears a medium sized fruit and an abundant crop. Bushes hardy and thrifty.

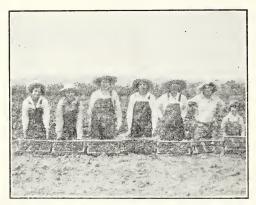

Josselyn—Bears unusually large berries of the finest quality for market and home use. Bush thorny, upright and hardy.

Prices same as for currant bushes.

Special offer for two each of the three varieties of Currants and two each of the three varieties Gooseberries for \$3.00. Regular price would be \$3.60 for 2 and 3-year old bushes.

RASPBERRY AND DEWBERRY PLANTS

Where these are grown in the open it is best to give some winter pro-

Marie Allen, Merle Roth, Virginia Tucker, Ar line Charlton, Loretta Minton. Elsie Thomas. Mary Gates-Berry Pickers

bears abundantly the first year planted.

Lucretia Dewberry-Low growing trailing blackberry. Fruit large, sweet, r pening before raspberries. Fine for the table, marketing and canning. Because of its trailing habit, it is easy to cover for winter protection.

Chief Raspberry-Minnesota No. 223. Fruit large crimson, ribens ten days earlier than Latham. Considered to be superior in quality to Latham. A fine berry for early market.

Price for Chief: 20c each; \$1.50 dozen.

Price for Raspberries and Dewberries, except Chief: 75c dozen; \$5.00 per 100.

STRAWBERRY PLANTS

We send out only thrifty one-year old plants. Everyone should have a patch of strawberries in their garden. They thrive in most any kind of soil and by keeping them cultivated and watered you will have very little difficulty in growing nice berries. Plants are generally shipped by Parcel Post.

Progressive Everbearing-A heavy yielder, bearing heavily the first year and will keep bearing until the first heavy freeze.

Mrs. Gates Picking Everbearing Strawberries

tection. This can be done by pulling the canes over and throwing 2 or 3 inches of dirt on them or throw about 18 inches of clean straw in among the canes. Our planting book which we send out with each order gives complete instructions for planting and care of raspberries, as well as other kinds of small fruit.

Latham-Minnesota No. 1. The best of the red commercial varieties of raspberries. The fruit is very large, of good flavor, and stands up well under shipment.

Ohta-The best of Dr. Hansen's raspberries. Red fruit of good quality. Usually Mastadon Everbearing — The new everbearing strawberry that has become very popular. Plant large, thrifty and quite hardy. Berries of unusual size which makes a valuable commercial sort.

Beri Supreme—A new everbearing strawberry recently introduced from Salt Lake City. Berries are far superior to other everbearing sorts because of its rich flavor and good shipping qualities.

Senator Dunlap—Old standard one-crop berry. Perfect flavoring. Medium early. Succeeds anywhere

E. A. Gates Cultivating Strawberry Plants with Garden Tractor

early. Succeeds anywhere. Very thrifty and heavy producer.

Premier—Earliest of the June bearing sorts. Plants not quite as thrifty or as hardy as the Sen. Dunlap. Berries roundish, firm and fine quality.

Jumbo—Similar to Sen. Dunlap, except bears a little earlier and berries run a little smaller. Plants more thrifty. A very good variety for this part of the country.

Black Hills Wonder—A new June bearing sort of our own introduction. This is an extremely large, high quality, crimson berry which ripens two weeks later than Sen. Dunlap. This plant is hardy, thrifty, producing runners two feet long between plants. Produces largest berry that we have ever grown. Fine berry for market.

| Progressive Everbearing\$2.00 per 100; \$15.00 per | 1000 |
|--|-------|
| Mastadon Everbearing 3.00 per 100; 20.00 per | 1000 |

ASPARAGUS PLANTS

Washington Rust Proof—One of the earliest sorts. Purple tipped variety that is considered resistant to rust. Heavy yielder of large stocks.

1 year plants, 25 plants 50c; \$1.50 per 100

2 year plants, 25 plants 75c; \$2.50 per 100

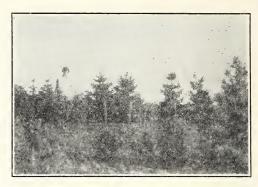

VICTORIA RHUBARB

One of the best and largest of the seeded varieties. A heavy bearer, tender and juicy.

Large roots, \$1.00 dozen

Evergreen Trees

There is no other tree as attractive as an evergreen, because they retain their leaves throughout the year and give color in the winter months when all other vegetation is bare. They are used for ornamental purposes, backgrounds and for windbreaks. All evergreen stock BALLED AND BURLAPPED unless otherwise indicated. You pay transportation on Balled and Burlapped stock.

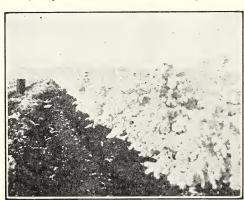

View Showing Mrs. Gates and Some of Our Black Hills Spruce.

Black Hills Spruce—(Picea Canadensis Albertania). Native spruce of our own Black Hills area. One of the best evergreens for ornamental and windbreak planting because of its dense habits of growth and extreme hardiness. Prices: Balled and burlapped, nursery grown, transplanted stock—

No. 1 Spruce—\$1.00 per foot, above one foot up to five feet. Price range would be \$1.00 to \$5.00 each. 10% off where ten or more trees are ordered.

No. 2 Spruce—60c per foot, above one foot up to five feet. Price range would be 60c to \$3.00 each. 10% off where ten or more trees are ordered. No. 2 trees are those that are not very dense or that may be a little one-sided. (They are fine for shelter-belt purposes).

Some of our Black Hills Spruce Covered with Frost

Extra Select Spruce — \$1.50 per foot and runs in size from two to four feet in height. The price would range from \$3.00 to \$6.00 each. These trees are extra nice, symmetrical or bluish in color.

8-12 inch Spruce—Good stock transplanted, but not balled and burlapped.

Price: 35c each; \$3.50 doz.; \$25.00 per 100. Prepaid.

Collected Spruce—Fine for lining-out for windbreaks. Shipped after the first of May. (Not guaranteed to grow; take your own chances).

 12-18 inches
 \$10.00 per 100—Not sold in less than 50. Prepaid.

 8-12 inches
 7.00 per 100—Not sold in less than 50. Prepaid.

 4-8 inches
 5.00 per 100—Not sold in less than 50. Prepaid.

Red Cedar—(Juniperous Virginia) One of our leading junipers for landscape work. A beautiful tall growing specimen; can be clipped and kept any height. Prices balled and burlapped:

4 to 5 ft., \$7.00 each; 3 to 4 ft., \$5.00 each; 2 to 3 ft., \$3.00 each 18-24 inches, \$2.00 each

Silver Cedar—(Juniperous scopulorum). This is another native evergreen for this region. They are beautiful and can be clipped and used for foundation planting or they can be used as specimen trees or windbreaks. They naturally grow in rocky dry soil and consequently will stand the dryest weather. Prices balled and burlapped:

4 to 5 ft., \$8.00 each; 3 to 4 ft., \$6.50 each; 2 to 3 ft., \$4.00 each 18-24 inches, \$2.50 each; 12-18 inches, \$1.00 each

Bull Pine—(Pinus Ponderosa) One of the best of native evergreens. Very valuable because of its rapid growth and hardiness. Cannot be beaten for windbreaks, groves, or as background for dwellings. Prices balled and burlapped:

4 to 5 ft., \$4.00 each; 3 to 4 ft., \$3.00 each; 2 to 3 ft., \$2.00 each 18-24 inches, \$1.00 each

Pfitzer juniper—(Juniperous Pfitzeriana) Broad spreading habit, gray-green foliage. Very free from diseases, succeds over a wide territory. Best of round, spreading varieties. Fine for foundation plantings. Prices balled and burlapped:

2 to $2\frac{1}{2}$ ft. spread, \$6.00; 18 to 24 in. spread, \$4.00

Prostrate Juniper—(Juniperous communis depressa) A fine native, dwarfish spreading evergreen. Greenish to red with silvery appearance underneath the branches. Very valuable for lawn and foundation planting as it will grow in any kind of soil and under the dryest climatic conditions. Prices balled and burlapped:

2 to 21/2 ft. spread or more, \$5.00 each; 18 to 24 in. spread, \$3.00 each

Colorado Blue Spruce—(Picea Pungens glauca) Most popular evergreen novelty for the northwest states on account of its silvery blue appearance. Prices balled and burlapped:

12 to 15 inches, \$2.00 each; 15 to 18 inches, \$3.00 each

We are glad to order larger specimens for our patrons

Mugho Pine—(Pinus Mughus) This is an excellent dwarf pine, being globular shaped and erect branched. It is very attractive, especially in the spring when the new growth, which seems like miniature candles, completely cover the tree. Prices balled and burlapped:

18 to 24 inches, \$5.00 each; 12 to 15 inches, \$2.00 each

Oregon Grape—(Western Mahonia) Broad-leaf type evergreen shrub. One type of the holly plant. Prices balled and burlapped:
15 to 18 inches, \$3.00 each; 9 to 12 inches, \$2.00 each

Balled and Burlapped Stock Not Prepaid

Evergreen Collection

1 Black Hills spruce, 12-18 inches

1 Silver Cedar, 12 to 18 inches

1 Bull Pine, 18 to 24 inches

All transplanted stock, balled and burlapped for \$2.25.

Not prepaid, but guaranteed to grow

Shade Trees

PLANT A TREE FOR WASHINGTON

Join in the nation-wide movement to "plant a tree for Washington" in commemoration of the Bi-Centennial Celebration of the birth of George Washington this year.

We are ready to supply you with the finest, sturdiest varieties in good

size and of a quality which assures the successful growth of your "Washington Tree."

School children everywhere are planning on celebrating this event, either by planting their tree in the school yard or at home. We are making special offers to groups of school children. School Superintendents and teachers should write to us, giving us the number of trees they want and the amount of money they have to invest.

American White Elm—The king of shade trees. Attractive wide spreading branches. A long lived tree.

Reiford Charlton with a load of Shipping Orders

Green Ash—A slow growing but symmetrical and extremely hardy tree. Will stand considerable drought. Native of this region.

Soft or Silver-Leaved Maple—A fast growing shade tree that makes a suitable tree for parkings.

Honey Locust—A very fine tree, rapid grower, delicate foliage. Very fragrant flowers, followed by bean like pods. Thorny. Much more hardy than the Black Locust.

| Prices on Elm, Ash, Maple and Locust trees: | Each | Doz. | 100 |
|---|--------|---------|---------|
| $1\frac{1}{2}$ to 2 inch caliper | \$5.00 | | |
| 8 to 10 ft. high | 2.00 | \$20.00 | |
| 6 to 8 ft, high | | 12.00 | |
| 4 to 6 ft. high | | 6.00 | |

| 4 to 6 ft. tree | .25 2.50 |
| | Per 100 |
| 2-4 ft., transplanted | 10.00 |
| 12-inch seedlings | |

Black Walnut—Hardwood tree that grows well in this climate where the soil is not too heavy. Tree ornamental and will grow a fine crop of nuts in a few years. Produces the most valuable wood grown in the United States today. Prices:

2-year tree, 1 to 2 feet, 25c each; \$2.50 dozen Seedlings, 6 to 12 inch, 10c each; \$8.00 per 100

- Mountain Ash—Upright growing, ornamental lawn tree. Its delicate summer foliage and red fruit clusters in the fall makes this a fine specimen tree. Prices: 8 to 10 ft., \$3.00 each; 6 to 8 ft., \$2.00 each; 5 to 6 ft., \$1.00 each.
- **Hackberry**—Similar in appearance to the American Elm. Wide spreading branches, not subject to wind injury.

Prices: 5 to 6 ft., \$1.00 each; \$10 per dozen

Russian Olive—A fine tree for windbreaks or hedges. Silvery green leaves make it very attractive, as well as the berries which hang on in the fall.

| Prices: | Each | Doz. |
|--------------------------|---------|---------|
| 5 to 6 ft., trimmed | .\$.80 | \$ 8.00 |
| | | Per 100 |
| 3 to 4 ft., transplanted | • | 18.00 |
| 1 to 2 ft., transplanted | | 9.00 |
| 9 to 12-inch seedlings | - | 5.00 |

- Paper Birch—Native of the Black Hills. Very attractive tree where planted on the lawn in groups. After tree is a few years old bark becomes white and papery. Prices:
 - 8 to 10 ft. high, \$3.00 each; 6 to 8 ft., \$2.00 each; 5 to 6 ft., \$1.00 each
- Cut-leaved Weeping Birch—Tall slender, vigorous growth, graceful drooping habit, silvery white bark, and decidedly cut foliage, presents characteristics rarely met in a single tree. Prices:

8 to 10 ft. tree, \$5.00 each; 5 to 6 ft., \$3.00 each

Bectals Flowering Crab—A very attractive lawn tree because of its double pink flowers in the spring. Bushy and dwarf in habit. Prices:

3 to 4 ft., \$1.00 each; 2 to 3 ft., 60c each

- Caragania or Siberian Pea Tree—This is one of the first trees to leave out in the spring. It has light green foliage and yellow bloom. A fine tree for windbreaks or hedging. Extremely hardy. Prices: See Cargania under hedges.
- Golden Willow—Golden bark, green leaves. Because of its tendency to grow in bush form and its rapid growth, it makes a desirable windbreak.

Prices: 3 to 4 feet, \$9.00 per 100.

WIND BREAKS OR SHELTER BELTS

Farmers who are interested in planting a shelter belt or windbreak should write to the U. S. Department of Agriculture, Washington, D. C., and ask for Farmers Bulletin No. 1603. It will be mailed free. We would like to give you some suggestions in this catalog, but it would require too much space. With few exceptions there are no reasons why there shouldn't be some kind of trees on every farm in the northwest for protection from snow and wind. Perhaps it takes a little more time in this dry west river country to establish and maintain a windbreak than in some other parts of the west.

about the farmstead? If you will write us we will be glad to give you sugBut stop and think. Is there anything else that you can do to increase the valuation of your land more than to plant some trees and have them growing gestions for the successful planting of a windbreak; distance apart, varieties of trees, preparation of soil, planting and cultivation protection after planting. Or if you are not too far away one of our representatives will call upon you and help you work out a plan if you desire.

Special Windbreak Assortment

100 Cargania for outside, 100 Russian Olive, 50 Chinese Elm next to inside and 50 Black Hills Pine on inside of windbreak. Regular price \$13.00. Special to you \$10.40 prepaid, and guaranteed.

ARE YOUR TREES AND SHRUBS HUNGRY?

Of course, you know that trees, shrubs, evergreens and other plants require moisture. But have you considered their need of food too? Often they fail to grow and develop as expected because of a lack of

nourishment; that is, a shortage of available plant food in the soil.

The needed plant foods can best be supplied in the form of ARMOUR'S SPECIAL TREE FOOD. This special food for trees is a high analysis, all mineral mixture, supplying a complete ration of nitrogen, phosphoric acid and potash. It is made especially to feed trees, shrubs and evergreens. It is clean, practically odorless, and easy to apply.

When to Apply Fertilizer

Spring and summer are recognized as the best seasons of the year to fertilize trees, shrubs, and evergreens. Late summer and early fall feeding may cause soft growth which is more or less subject to winter damage.

Planting Young Trees

In planting young trees mix 2 to 5 pounds of Armour's special tree food thoroughly with the fill-in soil. For small fruit or shade trees, 2 pounds are sufficient. For larger trees use more in proportion to size. Continue these treatments yearly, in increasing proportions for the first several years of growth.

Established Trees

In fertilizing mature trees, use about 1 pound of Armour's special tree food per foot of height of the tree or about 2 pounds per inch of thickness of the trunk. For most effective application, drive holes 12 to 18 inches deep, spaced 15 to 18 inches apart, under the outer branches where the greatest number of feeding roots are located. Pour ½ to ½ pound of fertilizer in each hole, filling the hole with top soil and replacing the sod. If water is available let hose run until soil is thoroughly soaked to a considerable depth.

Armour's special tree food is packed in 100-lb. paper lined bags.

Price per 10-lb. bag: \$1.00; 100 lbs., \$7.00

LAWNS AND GARDENS NEED PLANT FOOD

Beauty in plant life is an indication of a healthy condition. Plants are like animals in that they must have adequate nourishment if they are to de-

velop properly. Fine lawns, pretty flowers, attractive shrubbery—these can be developed by intelligent care and proper feeding with the necessary plant food elements.

ARMOUR'S VERT is a complete, balanced food especially prepared for lawns, gardens, flowers, shrubs, etc. It is composed of the plant foods most needed to produce sturdy plants—plants that are larger, healthier, more luxuriant.

Use VERT to improve your old lawn; to start off a new lawn; to grow larger, prettier flowers; to develop shrubs and small trees; to grow more and better vegetables. There are many uses for VERT around the home grounds. Order a supply and keep it on hand for application as needed.
