PREFACE

A glance at the records in this year's issue of Spalding's Athletic Almanac will convince the most skeptical of the pronounced superiority of the American amateur athlete. The important athletic records of the world are now held by the Americans, which is certainly a state of affairs that must be pleasing to American athletic followers. A decided change has come over the record books in the past twenty-five years in so far as we are concerned.

The Athletic Almanac for 1876 shows that there was not an important world's best on record held by an American athlete at that time, all such honors being credited to foreigners. When, many years ago, however, the American athlete started to make his records, our foreign cousins looked upon the same as suspicious, and many of the records made by L. E. Meyers and others were not taken seriously on the other side of the water.

However, when America started to send abroad for competition, its crack men, it was then that our English cousins admitted that our records were genuine. When the English team of athletes arrived here in 1895, accompanied by men who had studied athletics in England all their lives and were given a chance to see our records made, they went home convinced that the American records were a thing to be relied upon.

The very foundation of our athletic institutions should be the honest maintenance of its record books, for the simple reason that it is by our records that our athletic ability is compared the world over. Therefore we cannot be too exact or too careful when a claim for a record is made.

The Amateur Athletic Union has endeavored to, and is to-day, insisting that all records shall be honestly made, and where there is a shadow of doubt the record is denied.

Spalding's Athletic Almanac will stand first, last and all the time for honesty in records. We believe that the American athlete and the American athletic official will insist that our American records will stand scrutiny throughout the world, and the sooner American officials of doubtful integrity and pot-hunting athletes, who value only a record for the prominence they get out of it, are impressed with this idea, the better it will be for American sport and records.

SWIMMING.

World's amateur records and recognized authentic performances, embracing England, Scotland and America, compiled by J. H. Sterrett, Secretary National Swimming Association.

Note—Conditions under which amateur records are allowed. England, for all distances up to and inclusive of 500 yards in baths not less than 25 yards long, with push-off turns; above 500 yards, in open still water, over a course not less than 110 yards in length. This means that no performance with more than 3 turns for 100 yards, 5 turns for 150 yards, 8 turns for 220 yards, 11 turns for 300 yards, 17 turns for 440 yards, and 19 turns for 500 yards, in baths, nor more than 7 turns for 880 yards, 9 turns for 1000 yards, and 15 turns for one mile—the recognized championship distances—would be allowed by the A. S. A. as records, all other performances being put down as best on record for conditions that may exist other than championship requirements. In Australia, practically the same rule applies, while in the United States there are no specific conditions in the A. A. U. swimming rules as to length of course, number of turns, etc., but the recognized record authorities do not consider performances made in baths less than 20 yards in length as records, nor open water performances in other than still water or across stream, where no benefit is derived from a current.

SPALDING'S WORLD'S RECORD RUNNING SHOE

No. 2-0

Made of selected kangaroo leather and extremely light. Nothing finer could be produced at double our price of \$5.00 per pair.

M. W. LONG, the world's greatest runner, holder of the world's 440 yards record, the American, English and International champion, wears Spalding's shoes in all his races.

B. J. WEFERS, the holder of the world's record for 100 yards and 220 yards, made his records with a pair of Spalding's Record Shoes.

JOHN F. CREGAN, the American half-mile and Intercollegiate champion, and thousands of others attribute their success on the path to the fact that they had a well-fitting, light, serviceable shoe to wear.

Nearly every American, Intercollegiate and Interscholastic record has been made when the contestant wore Spalding shoes.

SPALDING'S BASKET BALL GOODS

WHAT TO WEAR FOR BASKET BALL

A basket ball uniform consists of a sleeveless worsted or cotton jersey, either plain color or striped as desired; a pair of canvas or flannel padded pants, and sometimes simply a pair of loose-fitting running pants, although padded pants are the most desirable; a pair of long worsted stockings, usually to match the jersey, and a pair of rubber sole shoes. A sweater is almost a necessary article for a basket ball player as there are no

end of uses to which this can be put. When not playing, it should invariably be worn, or between plays. We strongly recommend the use of our glove and wrist supporter, which, while being made especially for foot ball, is particularly adapted for basket ball players, combining a wrist and hand supporter. A jock strap or supporter is an absolutely necessary article. A complete illustrated list of articles will be found in our handsome catalogue of Fall and Winter Sports which can be had on application at any of our stores or will be sent free to any address.

THE SPALDING "CHAMPIONSHIP" HOCKEY STICK

The Spalding "Championship" Hockey Stick is made of the finest selected Canadian rock elm, and is exclusively used and endorsed by the Victoria team of Winnipeg, Champions of the World, and by the famous Shamrock team of Montreal, former champions. These sticks will not fray at the bottom where the sticks come in contact with the ice, and will retain their shape under all conditions. The very important matter of weight and balance has been carefully considered, and the "Spalding Stick" is much lighter, yet stronger, than any on the market. Forward and Defence Sticks on hand at all times.

SPALDING'S ATHLETIC SWEATERS

"HIGHEST QUALITY" SWEATERS are made of the very finest Australian lamb's wool, and are exceedingly soft and pleasant to wear. They are full fashioned to body and arms and without seams of any kind. The various grades in our "Highest Quality" Sweaters are identical in quality and finish, the difference in price being due entirely to variations in weight.

We call special attention to the "Intercollegiate" grade, which was originally made by special order for the Yale foot ball eleven and are now exclusively used by all Intercollegiate players. They are considerably heavier than the heaviest sweater ever knitted and cannot be furnished by any other maker, as we have exclusive control of this special weight.

- No. A. "Intercollegiate," special weight, \$6.00
- No. B. Heavy Weight, - - - - - 5.00
- No. C. Standard Weight, - - - - - 4.00

Colors: White, Navy Blue, Black and Maroon. Other colors to order at an advanced price. Prices on application. All made with 10-inch collars; sizes, 28 to 44.

STRIPED SWEATERS

Same quality as our No. B. Sizes, 32 to 42 Inches. Colors: Red and Black, Navy and Red, Orange and Black, Navy and White. Stripes 2 inches wide.

No. 88, Each, \$5.50.

Any other combination of colors to order only at an advanced price.

RIBBED SWEATERS

Following colors only: White, Maroon, Navy Blue and Black.

Our No. 9 Sweater is made of pure wool, full shaped to body and arms. It is guaranteed superior to any sweater of equal price. Guaranteed absolutely all wool. Sizes, 26 to 44.

No. 9. Medium weight, \$1.60

Our No. 11 is not all wool, but contains more of it than most sweaters usually sold as all wool sweaters at a high price. Colors: White, Black, Navy, and Maroon. Sizes, 32 to 44.

No. 11. Medium weight, in Black, Navy, and Maroon only. Each, \$1.25

SHAKER SWEATERS

We introduce this season a line of sweaters to fill a demand for as heavy a weight as our "Highest Quality" grade, but at a lower price, and after much experimenting, we are in a position to offer this line in the following colors only: Black, Navy Blue, Maroon or White, as follows:

- No. 1. Same weight as No. A, \$5.00
 - No. 2. Same weight as No. B, 4.00
 - No. 3. Same weight as No. C, 3.00

SANDOW'S LATEST PATENT SPRING-GRIP DUMB-BELL

EUGENE SANDOW

This appliance is very simple and may be described in a few words. It consists of a dumb-bell made in two halves separated about an inch from one another, the intervening space being occupied by two, three, four or five steel springs. When exercising the springs are compressed by gripping the bells and bringing the two halves close together, in which position they are kept until the "exercise" is over. The number of springs can be increased and, consequently, the power necessary to keep the two halves together can be varied to any extent. Force is equivalent to weight, consequently the necessity of buying a series of different weights is obviated by the use of stronger springs. The springs may be quickly taken out or put in.

It is not the weight of the bell that produces development, health and strength; it is the energy and will-power expended while using it.

The Sandow Spring Dumb-Bell compels the use of energy and will-power, which can be regulated from weak to strong by arranging the springs. These dumb-bells are specially prepared and adapted for both young and old. Complete with chart of exercises drawn up by Sandow after much experience and consideration, and with full instructions for use.

I, myself, use the Spring-Grip Dumb-bells daily and consider them superior to any one device for home physical culture.

THE most delightfully exhilarating indoor exercise is unquestionably that of vigorously punching a light, air-inflated bag against a reliable, responsive disc. It has, unfortunately, been deterred from occupying its proper place as a home exercise by its unwieldy size, weight and general unsuitability of the ordinary gymnasium disc and its many useless substitutes.

Our Moline Platform is adjustable in height, readily attached to any wall, and the side bracket so arranged that it touches three rows of studding.

Neat in design and handsomely finished, it in no way detracts from the appearance of the room, does not obstruct the light, and overcomes many other objectionable features of the old style disc usually costing double the price.

The new and exclusive feature in this platform offers a wide range of clever combinations and scientific work. Each platform is supplied with everything necessary for attaching to wall, and crated ready for shipment.

ROWING MACHINES

KERNS' ROWING MACHINE

No. 21. ROWING

BY
E. J. GIANNINI
N. Y. A. C.

A complete
manual, with
illustrations
and advice to
beginners.

Price, 10c.

THE ideal boat for gymnasium, home and training purposes, and is used by the leading athletic clubs, colleges and prominent oarsmen of the world. It is pronounced by experienced oarsmen to be the most perfect machine ever produced. The cut herewith presented will give a general idea of the form in which the machines are built. They are fitted with the Kerns' Patent Roller Seat and Shoes, the shoes having a three-inch adjustment, to suit a tall or short person. By a thumb-nut a belt can be tightened to any desired degree, and more or less friction can be thrown into the running parts, so that the resistance during the stroke is the same as that which exists when forcing a shell-boat through the water. As the machines are intended for general use, the pull can be regulated at will by turning one screw, so that the weaker sex can use the machine with very little resistance; while on the other hand, the resistance can be so increased that the strongest athlete can have the desired resistance.

The oars are pivoted in such a way that the operator can handle and turn them the same as he would during the return and feathering motion. Every machine is warranted.

No. 600. Kerns' Patent Single Scull Rowing Machine. Each, \$25.00

THE LAFLIN FRICTION ROWING MACHINE

The means used to produce a resistance is a simple friction clutch, which takes instant hold at the commencement of the stroke and holds the pressure till its completion, but instantly releases it precisely as in a boat. It is quickly taken apart without loosening any bolts or screws. Each machine is adjustable to any amount of friction.

WE have a well equipped Information Bureau, which is at the disposal of all the readers of Spalding's Athletic Library. We are prepared to answer all questions and give information concerning sports and pastimes. If there is anything you want to know, write us: how to build an athletic track, how to build a gymnasium, how to build a bowling alley, how to conduct a field meeting, how to organize an athletic club. If you want a trainer for any branch of sport, write us; or if a trainer wants a position, let him file his name with us. If you want to lay out a golf course, we can put you in touch with the parties who can do it. If you want a Golf Instructor, we can find you one. It is immaterial on what sport the information is desired, we can inform you.

Foster's Patent Safety Hurdle

Used exclusively in all the hurdle events in the Stadium of the Pan-American Exposition, 1901.

The frame is 2 feet 6 inches high, with a horizontal rod passing through it 2 feet above the ground. The hurdle is a wooden gate 2 feet high, swinging on this rod at a point 6 inches from one of the sides and 18 inches from the other. With the short side up, it measures 2 feet 6 inches from the ground, and with the long side up, 3 feet 6 inches. The hurdle can be changed from one height to the other in a few seconds, and is held firmly in either position by a thumb-screw on the rod. It would be hard to conceive any device more simple or more easily handled than this. The invention fills a long-felt want, and has met with the approval of the best-known physical directors and trainers of the country.
