REPORT ON PURCHASES OF  
NIPPON SPINDLE SEIZOSHO  
(JAPAN SPINDLE COMPANY)

The factory of the Japan Spindle Company is located at Shioe, Amagaski, Hyogo-kon, Japan. In April, 1941, this company merged with the Japan Internal Combustion Engine Company, (Nippon Nainenki) and whereas it had previously manufactured textile machine parts, it switched to making hard steel alluminum alloy. See Report on Nippon Nainenki by Bette Schor of F.E.A. (Department of Justice Report #N.Y. 255).

The above information was taken from "Diayamonda" of September 1, 1941, page 93, as quoted in the notes of John Williams of O.E.W. from which "A Directory of Certain Industrial Companies", August, 1943, was prepared.

Following are orders and inquiries which have been derived from the files of the four major Japanese trading companies, which are located at a warehouse of the Custodian of Alien Property, 27 Cliff Street, New York City.

Machinery and supplies were shipped in the total amount of \$124,460.14. These are listed on the following pages.
