☰ README.md ✎

Tools and resources for open translation services

- based on [Marian-NMT](#)
- trained on [OPUS](#) data using [OPUS-MT-train](#)
- mainly [SentencePiece](#)-based segmentation
- mostly trained with guided alignment based on [eflomal](#) wordalignments
- [pre-trained downloadable translation models \(matrix view\)](#), CC-BY 4.0 license
- demo translation interface available from <https://opusmt.wmflabs.org/>

<https://helsinki-nlp.github.io/OPUS-CAT/>

OPUS-CAT

[Trados plugin](#) [Fine-tuning](#) [About](#)

OPUS-CAT MT Engine and CAT plugins

OPUS-CAT MT Engine is a Windows-based machine translation system built on the [Marian NMT framework](#). OPUS-CAT MT Engine makes it possible to use a large selection of advanced neural machine translation models natively on Windows computers. The primary purpose of OPUS-CAT Engine is to provide professional translators local, secure, and confidential neural machine translation in computer-assisted translation tools (CAT tools), which are usually Windows-based. To that end, there are plugins available for two of the most popular CAT tools, SDL Trados Studio and memoQ (OPUS-CAT can also be used in the Wordfast CAT tool as a custom provider). OPUS-CAT MT Engine provides pretrained MT models for a very wide selection of language pairs, courtesy of the OPUS MT project ([listing of OPUS MT models](#)).

Quickstart

Setting up:

```
git clone https://github.com/Helsinki-NLP/OPUS-MT-train.git
git submodule update --init --recursive --remote
make install
```

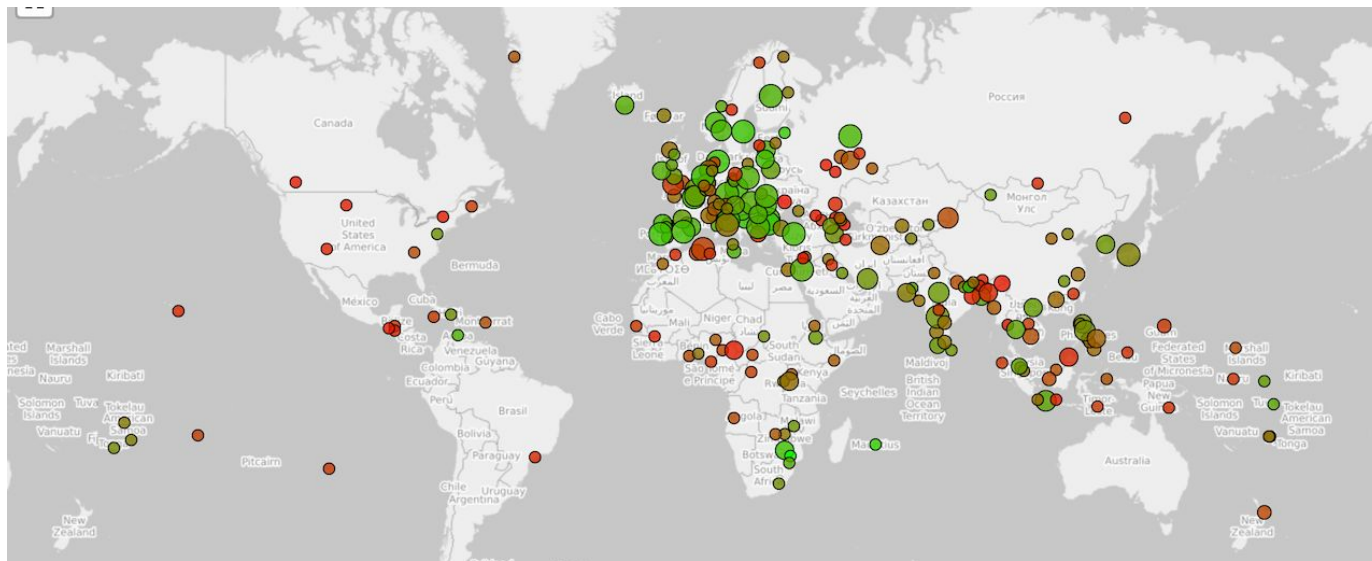

Training a multilingual NMT model (Finnish and Estonian to Danish, Swedish and English):

```
make SRCLANGS="fi et" TRGLANGS="da sv en" train
make SRCLANGS="fi et" TRGLANGS="da sv en" eval
make SRCLANGS="fi et" TRGLANGS="da sv en" release
```

OPUS-MT: Open NMT tools and models

Pre-trained models:

- <https://opus.npl.eu/Opus-MT/>
- <https://github.com/Helsinki-NLP/Tatoeba-Challenge>

Various ways to use OPUS-MT models

```
from transformers import pipeline
pipe = pipeline("translation", model="Helsinki-NLP/opus-mt-en-fi")
print(pipe('Please, translate this text.'))
```

<http://hf.co/helsinki-nlp>

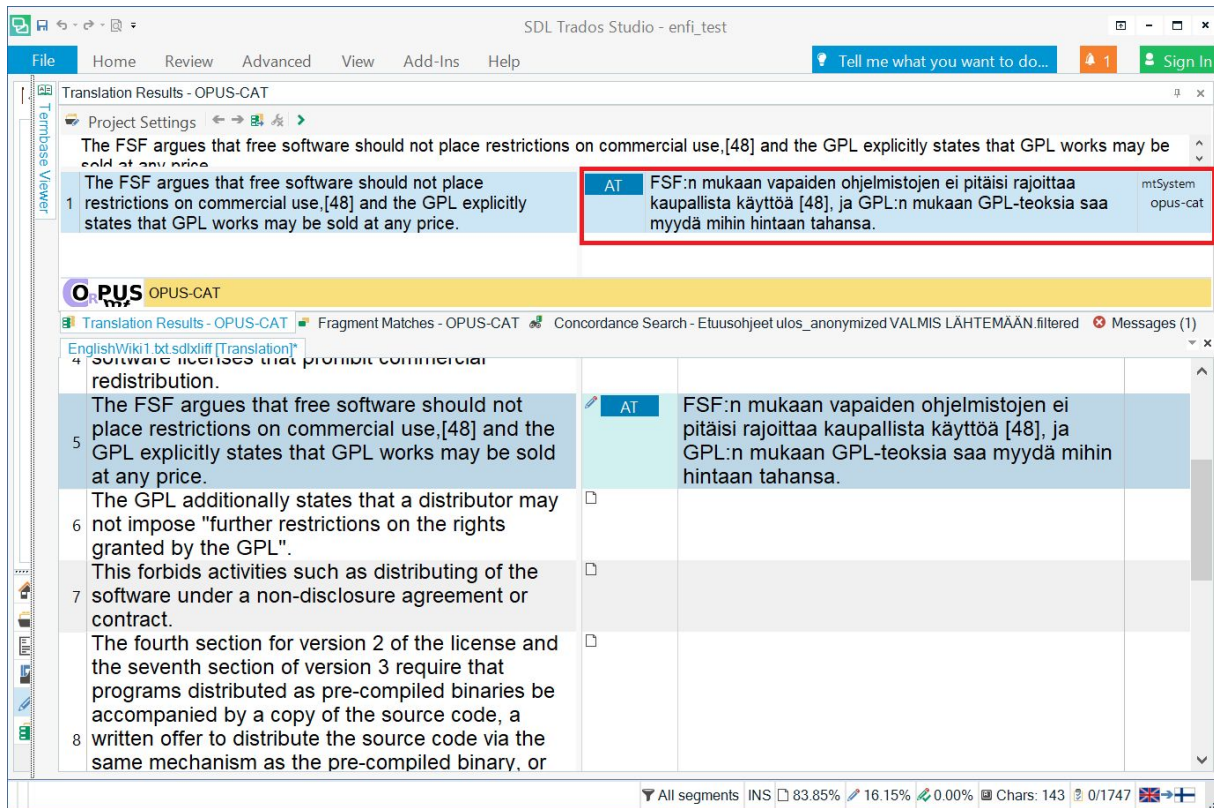

```
from elg import Service
service = Service.from_id(4863)
result = service(request_input="translate this!", request_type="text")
```

```
docker run -p 8888:8888 helsinkinlp/opus-mt-elg-fin-eng:1.0
curl -X POST -H "Content-Type: application/json" -d
'{"content":"Translate this!"}' "localhost:8888/elg/translate/en/fin"
```

OPUS-CAT: Local translation engines on your desktop

Plugins for:

- Trados Studio
- memoQ
- OmegaT

Local MT engine

- Data security
- Low latency
- Off-line mode

Extensible and open

- All of OPUS-MT
- No costs

OPUS-CAT: Customized machine translation

OPUS-MT-app - based on translateLocally

The screenshot shows a window titled "translateLocally" with a search bar containing "Ukrainian-English tiny". Below the search bar, there are two columns of text. The left column contains the original Ukrainian text, and the right column contains the translated English text. The translation speed is displayed at the bottom of the window.

Ukrainian-English tiny

Київ — столиця та найбільше місто України, одне з найбільших і найстаріших міст Європи. Розташований у середній течії Дніпра, у північній Наддніпрянщині. Політичний, соціально-економічний, транспортний, освітньо-науковий, історичний, культурний та духовний центр України. У системі адміністративно-територіального устрою України Київ має спеціальний статус, визначений Конституцією, і не входить до складу жодної області, хоча і є адміністративним центром Київської області.[8] Місце розташування центральних органів влади України, іноземних місій, штаб-квартир більшості підприємств і громадських об'єднань, що працюють в Україні.

Kyiv is the capital and largest city of Ukraine, one of the largest and oldest cities in Europe. Located in the middle reaches of the Dnieper, in the northern Dnieper region. Political, socio-economic, transport, educational and scientific, historical, cultural and spiritual center of Ukraine. In the system of administrative and territorial structure of Ukraine, Kiev has a special status defined by the Constitution and is not part of any region, although it is the administrative center of the Kyiv region.[8] The location of the central authorities of Ukraine, foreign missions, headquarters of most enterprises and public associations operating in Ukraine.

Translation speed: 136 words per second.

OPUS-MT and Ukrainian LT

Improved MT models for Ukrainian

- Data augmentation
- Multilingual models and pivot-based models
- Various model sizes and extensive training

Releases and integration

- Downloads as Marian-NMT, pytorch / HF-transformers, docker
- Web interfaces, in-browser MT, ELG API
- Telegram translation bot
