The first part of the book is devoted to a description of the
 various species of plants which are found in the
 country. The author has been very particular in
 his descriptions, and has given many interesting
 details of their habits and properties. He has
 also given a list of the names of the plants in
 the different languages which are used in the
 country. This part of the book is very valuable
 to the naturalist, and is well worth a perusal.
 The second part of the book is devoted to a
 description of the various species of animals
 which are found in the country. The author has
 been very particular in his descriptions, and
 has given many interesting details of their
 habits and properties. He has also given a
 list of the names of the animals in the
 different languages which are used in the
 country. This part of the book is very
 valuable to the naturalist, and is well worth
 a perusal.
