SPRING 1926

INTRODUCTION

In presenting our catalogue for spring 1926 to the trade we take the opportunity of repeating that we grow only hardy perennials and confine ourselves to a wholesale business. By having no small retail orders with prior claims for attention, we are enabled to fill all orders promptly, usually within twenty four hours of receipt. It will assist us to continue this prompt service if orders are sent in early with a date specified for shipment.

A perusal of our catalogue will show that while we grow most of the popular favorites we have many plants that are unusual and different. With few exceptions the stocks offered are large, and we are confident of being able to take care of all orders entrusted to us. Our descriptions have been taken from plants when in flower and no pains have been spared to make them accurate and dependable.

TERMS

Accounts are due in thirty days.

Orders from unknown correspondents, unaccompanied by cash or references will not be filled. If plants are required in a hurry, we suggest that cash and references be sent with first order. This will be promptly forwarded, and we will at once take up the question of shipping future orders on open account.

Prices in this catalogue include packing.

HARDY PERENNIALS

Per Doz.—Per 100

ACHILLEA

flipendulina. A strong growing plant with fern-like foliage, bearing large, flat heads of yellow flowers. 4 ft. July-August.	\$2.00	\$12.00
Ptarmica Boule de Neige. This and the following variety are among the most valuable of hardy plants for cutting. If they are cut hard back after the first flowers are past a second crop will be produced in early fall. Sprays of small double white flowers. 12 to 18 inches. June-September.	1.50	10.00

ASTER. (*Michaelmas Daisy, Starwort*). As a plant of general usefulness the aster stands unrivaled. The great variety in color, size of flower, time of flowering and height, combined with simple cultural requirements make it one of the most desirable of hardy plants. Many of the varieties are excellent for cutting. The finest flowers and strongest spikes are obtained if the plants are divided annually.

NEW VARIETIES

Chasity. Graceful arching sprays of white flowers. 3 ft. September.	2.00	12.00
Bluebeard. Very large, heliotrope flowers on strong, erect stems. 4 ft. September and October.	2.00	12.00

latisquama. Not so strong growing as the last. Pink flowers. 5-6 ft. September.	1.25	8.00
“ nana. A somewhat uncommon plant deserving wider recognition. It forms a compact bush, 3 ft. in height, and in September is smothered with dainty pink flowers.	2.00	12.00
CAMPANULA (Bellflower) One of the most beautiful and important families of hardy plants. Having a very wide geographical distribution, its members are extremely varied in character and are adapted for rock garden, border and woodland.		
alliarifolia. Handsome heart shaped leaves and creamy white, pendulous flowers. 2½ ft. June.	1.50	10.00
bononiensis. Small blue flowers profusely borne on numerous slender, graceful stems. 2½ ft. June.	1.50	10.00
carpatia. This is one of the few dwarf plants that flower during late summer, and on that account is particularly desirable for the front of a border or rock garden. It produces branching stems bearing upright, cup-shaped blue flowers, 1½ inches or more in diameter. 1 ft. July-August. We would point out that our stock of this and the following variety have been propagated by cuttings from one plant each of their respective colors, selected from a large number of seedlings. This ensures uniformity of shade of color, shade of flower and habit of growth.	1.50	10.00
“ alba. A white variety of the preceding.	1.50	10.00
glomerata. Clusters of tubular, violet-purple flowers, borne on strong upright stems. 1½ ft. July.	1.50	10.00

	Per Doz.—Per 100

pedata. (Bird's Foot Violet) Tufts of finely divided leaves and lilac blue flowers. 6 inches. April-May.	1.50	10.00
Jersey Gem. One of the best hardy plants of recent introduction, and one that cannot be too highly praised; it possesses every good quality that a plant should, and as far as we know, no bad ones. It blooms freely and continuously from spring until frost, and the flowers, royal purple in color, are not affected by the sun. Its foliage is a rich, healthy green, and its habit of growth is neat and compact. In the garden it can be used for edging or massing in beds and borders, and would not be inappropriate on the rock garden. Its flowers are valuable for cutting and are in good demand and we suggest that it would be a good subject for gentle forcing.	2.50	15.00
