(o) RESULTS: (For all hits claimed on ship targets and for land targets of special interest, draw diagram, top or side view or both, as appropriate, showing type and location of hits. For all targets give location and effect of hits, and identify by numbers above. Use additional sheets if necessary).

Target #1. Pilots were unable to determine damage from mornak rocket attack on caves (possible gum positions) but at least 11 rockets hit the designated area.

Target #2. Two 500-pound bombs landed in the intersection of two roads, making them unuseable managed temporarily. Four others landed alongside the roads, where gun positions and trenches had been reported, presumably causing damage.

The fourth and last flight by VC-91 pilots on 13 May in Support of ground troops on Okinawa took off from the MAKIN ISLAND at 1515. The three planes joined up with 13 others from the Carrier Group for the trip to the island. There they were split into two teams, the MAKIN and four SARGENT BAY planes being assigned to one with an Air Coordinator from the NATOMA BAY, to support the Marines.

Their first target was caves in TA 7569 "0", described as possible gun positions, not far from our front lines. Half or more of the 22 rockets were seen to hit close to caves, while the rest exploded in the general area; however, definite damage could not be determined. The planes attacked in column, firing two rockets per run at 1000 yards slant range and 25 degrees.

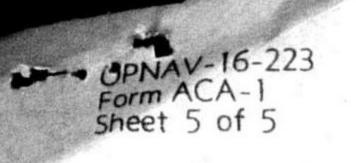

For a second target the planes were sent to TA 7669 DF to bomb roads and trench and gun positions reported alongside the roads. Because the Coordinator had to return to direct the other group and time was short, only one bombing run was made, in the usual NAMA column formation, both 500-pound bombs being salvoed. The VT pushed over from 5000 feet into 40-degree glides, releasing at 1500 feet.

Again specific targets (such as gun positions) could not be seen, but presumably serious damage was caused by the bombing. Four bombs H landed close to the roadway, while two hit an intersection. Lt.(jg) Smith received "Congratulations" from the Coordinator for that drop, which knocked the roads out of commission, temporarily at least. MK Weather was favorable for bombing.

A few rounds of 40 mm AA burst some 200 yards astern of the planes during a retirement run over Shuri at the first target area.

Pilots participating were:

Lt. (jg) D. K. Butler Lt. (jg) A. L. Smith Ens. D. F. Griesinger
