\* NOTE.—The largest lamp which will pass through top opening is specified in all cases. Smaller lamps may be used and very satisfactory illumination secured. Write for discounts.

5501

PRESENT DAY INSTALLATION OF CAMIA BALLS

Fixtures of a similar type may be had from any fixture manufacturer. We do not sell them.

As an attractive means of illumination a sphere is the peer of any shape.

The CAMIA SPHERE is of a translucent glass. Its absorption by comparison is low, and the fact that the filament of a tungsten lamp is not visible tends to produce a ball of light of uniform intensity.

Being a single-piece sphere, there is no metal band to produce a shadow.

Great care has been taken in its manufacture and, as a sample of the glassmaker's art, it is as nearly a perfect piece of glass as can be produced.

It merits your consideration.
