SEED * TABLET.

THE QUANTITY OF SEED USUALLY SOWN TO AN ACRE.

Barley, broadcast.....	2 to 3 bush.	Mustard, broadcast.....	12 to 16 qts.
Beans, dwarf in drills.....	1½ bush.	Mangold Wurzel.....	8 lbs.
Beans, pole, in hills.....	8 to 10 qts.	Oats, broadcast.....	2 to 3 bush.
Beet, in drills.....	4 to 5 lbs.	Onion, in drills.....	5 to 6 lbs.
Broom Corn, in hills.....	4 to 6 qts.	Parsnip, in drills.....	4 to 5 lbs.
Buckwheat, broadcast.....	¾ bush.	Peas, Early, in drills.....	1 bush.
Carrot, in drills.....	2 to 3 lbs.	Peas, Marrowfat, in drills.....	1¼ bush.
Corn, in hills.....	6 qts.	Peas, broadcast.....	3 bush.
Corn, for soiling.....	3 bush.	Potato, cut tubers, in drills.....	8 bush.
Clover, Alsike.....	10 lbs.	Radish, in drills.....	6 to 8 lbs.
Clover, red, alone.....	15 lbs.	Radish, broadcast.....	10 lbs.
Clover, red, with Timothy and Red Top.....	10 lbs.	Rye, broadcast.....	1 bush.
Clover, white, alone.....	8 to 10 lbs.	Salsify, in drills.....	6 to 8 lbs.
Clover, white, with other seeds.....	4 lbs.	Sorghum.....	10 to 12 lbs.
Clover, Lucerne, alone.....	15 lbs.	Sainfoin, broadcast.....	1 to 3 bush.
Cucumber, in hills.....	2 lbs.	Spinach, in drills.....	12 to 15 lbs.
Celery, to transplant.....	½ lb.	Sage, in drills.....	8 to 10 lbs.
Cabbage, in beds to transplant.....	¼ lb.	Squash, (bush varieties), in hills.....	4 to 6 lbs.
Flax, broadcast.....	1 to 2 bush.	“ (running varieties), in hills.....	3 to 4 lbs.
Grass, Blue, alone.....	28 lbs.	Turnip, in drills.....	1 lb.
“ Hungarian.....	1 bush.	Turnip, broadcast.....	1 lb.
“ Lawn.....	3 to 4 bush.	Tomato, to transplant.....	¼ lb.
“ Orchard.....	28 lbs.	Vetches, broadcast.....	2 to 3 bush.
“ Red Top.....	28 lbs.	Wheat, broadcast.....	1½ to 2 bush.
“ Rye.....	1 bush.	Wheat, in drills.....	1 bush.
“ R. I. Bent.....	3 bush.	Clover, } together { 10 lbs. Clover.	
“ Timothy.....	¼ bush.	Timothy, } for { ¼ bu. Timothy.	
Hemp.....	1½ bush.	Red Top } one acre { 1 bu. Red Top.	
Millet.....	1 bush.		

Quantity of Seeds Required of a Given Number of Plants, Number of Hills or Length of Drills.

Asparagus.....	1 oz. to 50 ft. drill.	Pole Beans.....	1 qt. to 150 hills.
Beet.....	1 oz. to 50 ft. “	Corn.....	1 qt. to 200 “
Carrot.....	1 oz. to 150 ft. “	Cucumber.....	1 oz. to 50 “
Endive.....	1 oz. to 150 ft. “	Watermelon.....	1 oz. to 30 “
Okra.....	1 oz. to 40 ft. “	Muskmelon.....	1 oz. to 60 “
Onion.....	1 oz. to 100 ft. “	Pumpkin.....	1 oz. to 40 “
Onion sets, small.....	1 qt. to 20 ft. “	Early Squash.....	1 oz. to 50 “
Parsley.....	1 oz. to 150 ft. “	Marrow Squash.....	1 oz. to 16 “
Parsnip.....	1 oz. to 200 ft. “	Cabbage.....	1 oz. to 2000 plants.
Radish.....	1 oz. to 100 ft. “	Cauliflower.....	1 oz. to 2000 “
Salsify.....	1 oz. to 70 ft. “	Celery.....	1 oz. to 3000 “
Spinach.....	1 oz. to 100 ft. “	Egg Plant.....	1 oz. to 1000 “
Turnip.....	1 oz. to 150 ft. “	Lettuce.....	1 oz. to 3000 “
Peas.....	1 qt. to 100 ft. “	Pepper.....	1 oz. to 1000 “
Dwarf Beans.....	1 qt. to 100 ft. “	Tomato.....	1 oz. to 1500 “
Leek.....	1 oz. to 100 ft. “		

For the convenience of our customers who come to Baltimore by Steamer, or who have not the time to visit our Paca Street Store, we have established a **Branch House at No. 118 Light Street**, in charge of one of the firm, Mr. GEORGE W. HOBBS, who shall be glad to see you.

Have also secured the services of Mr. PETER SCULLY, who has been identified with the Seed trade during the last twenty-seven years. Mr. SCULLY was for a long time in the employ of the old firm of R. SINCLAIR & CO., and has since that time devoted himself to the Seed and Agricultural Implement business.

Shall be pleased to have you call and examine our line of goods.

We wish to say further that we are offering an entire new stock of Seeds, selected from none but reliable growers.

Full line of Agricultural Implements, Wagons, Buggies, Road Carts and Fertilizers, a description of which will be found on the following pages.

TO OUR PATRONS.

In reviewing our last year's business, we desire to state to our customers that the result has been most gratifying; the associations have been pleasant and the goods in return have been satisfactory.

Our Mr. JOHN M. GRIFFITH made his usual visit to our Seed farmers, both in the United States and Canada, in order to see the growing crops, and we feel assured that we are offering the best Seeds to be obtained.

Our MR. M. S. GRIFFITH also visited a number of leading Agricultural Implement Manufacturers, in order to secure some special agencies and at the same time to familiarize himself with the construction of our goods. Owing to the extremely low prices being quoted by some manufacturer and dealers, it is absolutely necessary that they make and handle correspondingly cheap goods; and since we have always claimed to sell the best of everything in our line, we propose to keep them up to that standard.

Our Fertilizer trade has been all that we could ask; and the greatly increased business is an evidence that our customers appreciate the quality of the goods.

We shall continue to offer a line of Carriages, Buggies and Road Carts, as low as any other first-class house in the trade.

Trusting that our past relations are a guarantee of future fair dealing, we remain,

Yours respectfully,

GRIFFITH, TURNER & CO.

PARTIES ORDERING BY MAIL, PLEASE OBSERVE THE FOLLOWING:

SEEDS, POSTAGE FREE.—Seeds in our 5 and 10 cent flat papers, ounces and $\frac{1}{4}$ lb. packages, will be mailed Free of Postage to the purchaser.

SEEDS BY MAIL on which the purchaser must pay the postage. Peas, Beans and Corn, 8 cts. per pint. Small Seeds in quantities over $\frac{1}{4}$ lb., 8 cts. per lb.

REMITTANCES. Remit by check, draft, postal money-order or postal note; or, if under One Dollar, in postage stamps.

NOTICE. The greatest care is taken to supply every article true to name and of the very best quality, at the same time it is understood that we do not warrant our seeds and that we are not in any respect responsible for any loss or damage arising from any failure thereof.

—♦—

☞ **On account of short crops in some varieties of Seeds, Prices are subject to change without notice.**

Asparagus. Sow the seed in the seed bed late in the Fall or in the early Spring, as soon as the ground can be worked, in drills one foot apart, covering the seed about one inch deep. Thin the plants to three inches in the row. The roots may be removed to the permanent bed when one or two years old.

Conover's Colossal.—The largest variety grown. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 45 cts.

Asparagus Roots.—In season.

Beans. DWARF, SNAP OR BUSH. Select light warm soil and plant, when danger from frost is passed, in the Spring, in drills two to two and a half feet apart, dropping the beans about two inches apart in the drills, and cover one inch deep. On account of short crop of Beans, all prices are subject to change without notice.

First in Market.—The earliest of all. Pt. 20 cts.; qt. 35 cts.

Early Yellow Six Weeks.—Very early. Pt. 10 cts.; qt. 20 cts.

Extra Early Red Valentine.—An early form of the old Red Speckled. Qt. 25 cts.

Red Speckled Valentine.—Round pod, tender and prolific. Qt. 20 cts.

White Valentine.—Seed white; very desirable. Pt. 15 cts.; qt. 25 cts.

Violet.—Improved round pod wax bean. Qt. 40 cts.

Landreth's Scarlet.—A sort come to stay. Qt. 35 cts.

Black Wax.—Yellow pod; early for a snap bean; superior. Pt. 15 cts.; qt. 25 cts.

White Wax.—White pod; among the second early varieties. Pt. 15 cts.; qt. 30 cts.

Improved Golden Wax.—Rich, tender, delicious, early. Pt. 15 cts.; qt. 25 cts.

Pink Eye Wax.—Pt. 25 cts.; qt. 40 cts.

White Cranberry.—Valuable when dry for winter use. Qt. 20 cts.

Royal Dwarf White Kidney.—Pt. 15 cts.; qt. 25 cts.

Dwarf Horticultural.—Very fine. Pt. 15 cts.; qt. 25 cts.

POLE OR RUNNING VARIETIES.

Set the poles three or four feet apart, and plant six to eight beans, with the eyes downward, around each pole, thinning to four healthy plants when they are up. They require the same soil and treatment as the dwarf varieties, with the exception that they crave stronger soil, and do best in a sheltered location.

Giant Wax, Red Seed.—Pods long, clear waxy yellow, succulent, tender, fine flavor. Pt. 25 cts.; qt. 40 cts.; $\frac{1}{4}$ bush. \$2.75.

Southern Prolific.—Suitable for table seventy days after germination. Pt. 20 cts.; qt. 40 cts.

Speckled Horticultural, or Cherry.—Very productive; used with or without pods. Pt. 15 cts.; qt. 30 cts.

Cherry.—Great favorite; used with or without pods. Pt. 15 cts.; qt. 25 cts.

Extra Large Lima.—As a shell bean surpasses all in quality. Qt. 40 cts.

Dreer's Improved Lima.—An excellent variety. Qt. 40 cts.

Extra Early Lima.—New variety. Qt. 40 cts.

Regular Lima.—Qt. 30 cts.

ENGLISH BEANS. Broad Windsor.—Matures in fifty days after germination. Pt. 20 cts.; qt. 35 cts.

LARGE LATE
FLAT DUTCH
MARKET GARDENERS

BLOOMSDALE
EARLY DWARF
FLAT DUTCH

Beet. Select a deep, rich, sandy loam, and manure with well decomposed compost. Sow in drills, fourteen to sixteen inches apart, and cover one inch deep. When the young plants appear, thin to four or five inches apart. For early use, sow as soon as the ground can be worked in the Spring; for Autumn use, about the middle of May; and for Winter use, from 10th to 20th of June, according to variety; the *Long* varieties requiring more time to mature than the *ROUND EARLY* kinds. The *Mangold Wurzles* are grown for stock, and as they grow larger require more room. They should be sown in drills two and a half feet apart, and the plants be thinned to twelve or fifteen inches in the row. One ounce of seed will sow about one hundred feet of row.

Very Early Forcing.—Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts.

Early Eclipse Red Turnip.—New, extra early. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

Early Egyptian.—This is a flat Beet, very early and deep red color. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

Bassano, or Extra Early Turnip.—Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

Early Blood Turnip.—In shape like a turnip, deep red color, and best for general use. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

Large Long Blood.—A large and desirable variety. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

White Sugar Beet.—A large growing sort and used for feeding stock. Pkt. 5 cts.; oz. 5 cts.; $\frac{1}{4}$ lb. 10 cts.; lb. 30 cts.

Long Red Mangold Wurzel.—A large, long variety, grows well out of ground; color, light red. Pkt. 5 cts.; oz. 5 cts.; $\frac{1}{4}$ lb. 10 cts.; lb. 30 cts.

Golden Tankard Mangold.—The best type of Mangold; small top, broad shoulders, smooth, rich skin, very solid fleshed, golden stemmed; heavy producer; the best. Pkt. 5 cts.; oz. 5 cts.; $\frac{1}{4}$ lb. 10 cts.; lb. 35 cts.

Brussels Sprouts.

A class of plants allied to the Cabbage family, producing great numbers of small heads for sprouts on the main stem of the plant, which are used in the manner of Cabbage. Plant in rich soil, in hills two feet apart each way.

Dwarf Improved.—Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 65 cts.

Broccoli.

The Broccoli are closely allied to the Cauliflower family. They require similar cultivation and treatment to Cauliflower.

Early Purple Cape.—Large compact. Pkt. 5 cts.; oz. 20 cts.

Large Early White.—Head, white, like Cauliflower; the best. Pkt. 10 cts.; oz. 35 cts.

Cabbage.

Cabbage will thrive on any good corn land, though the stronger the soil the better they will develop. New land is preferable. Plow deep and manure very liberally. The early sorts bear planting from eighteen inches to two feet apart in the rows, with the rows from two to two and a half feet apart. The larger varieties to be from two to four feet apart in the rows, with the rows from two and a half to four feet apart, the distance varying with the size.

King of Early.—Ten days earlier than any other Cabbage. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.

Landreth's Earliest.—An excellent early sort. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50.

Early York.—One of the earliest. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50.

Early Summer.—Flat head, the earliest summer variety. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.

Early Market.—Large early ripening variety. Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.75.

Select Very Early Jersey Wakefield.—Wonderfully fine. Used very extensively by market gardeners. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 70 cts.; lb. \$2.50.

Early Winningstadt.—Head large, cone shaped and solid. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.25.

Reedland Early Drumhead (FIRST EARLY).—To any one wanting a Cabbage of reliability, be he Market Gardener, Private Gardener, or amateur, we recommend the Reedland. Short stemmed, flat headed, large and very early for a flat headed sort. In all locations a favorite variety, and recommended by all experienced Cabbage growers. It will do for first, second and third early, intermediate and late. Indeed it suits all seasons, all conditions and all wants. Pkts. 5 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.10; lb. \$4.00.

Bloomsdale Early Dwarf Flat Dutch.—A variety which stands the sun and produces fine large heads. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50.

Market Gardener's Large Late Flat Dutch (very choice.)—We cannot praise this stock too highly, we unhesitatingly declare it to have no superior. We have never seen its equal. The head is broad, thick and flat, well covered in by leaves lapping across the centre, outside leaves feathered to the base of the leaf stem. *There is no risk in this stock.* Pkts. 5 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. 95 cts.; lb. \$3.50.

Large Late Flat Dutch.—Large and excellent for winter; very extensively grown. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.75.

Large Drumhead.—Solid heads, resembles Flat Dutch. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.75.

Drumhead Savoy.—An excellent variety of fine quality. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

(Continued on page 6.)

Carrots.

(For description, prices, etc., see page 6.)

Cauliflower.

(For description, prices, etc., see page 6.)

(CABBAGE.—continued.)

Green Globe or Curled Savoy.—A beautiful variety of fine flavor. Very hardy and is improved by frost. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 70 cts., lb. \$2.50.
Red Dutch.—Exclusively for pickling. Deep purple flat heads. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.75.

Cauliflower. The most delicate and delicious of all the Cabbage family and requiring the same culture and treatment; but being more delicate, the good culture and richness of the soil recommended for Cabbage are absolutely necessary for the Cauliflower. By sowing the early varieties in the Spring in a hot bed or cold frame, or even in an open border, they can be obtained in pretty good season.

Select Early Dwarf Erfart.—Long the standard of highest excellence. Pkt. 20 cts., oz. \$2.25.

Extra Searly Paris.—A most excellent early sort. Pkt. 10 cts., oz. 60 cts.

Nonpareil.—A standard early variety. Pkt. 10 cts., oz. 60 cts.

Early Snowball.—Compact, fine for frames and very reliable for field culture; one of the best for market, gardener or private use. Pkt. 25 cts., oz. \$3.00.

Carrot. Carrots thrive best in rather a light loam. The ground should be well manured with fine, well-rotted or composted manure and be thoroughly worked, quite deep. Plant in rows fourteen inches apart, and thin plants to five or six inches in the row. Plant from middle of April to middle of May.

Extra Early Forcing.—Ten days ahead of all others. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.00.

Extra Scarlet Horn.—Blunt rooted, early, good. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Orange Danvers, Half-Long.—A decided acquisition of the half-long type, broad-shouldered, cylindrical, admirable in color, fixed in habit, a wonderful producer. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Long Orange.—Deep orange color, long, smooth, fine. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 70 cts.

Half-Long (Coreless).—Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 80 cts.

Celery. Plant seed in hot bed or very early in open ground. Transplant four inches apart when three inches high, in rich soil, finely pulverized; water and protect until well rooted, then transplant into rows either on surface or in well manured trenches a foot in depth, half filled with well-rotted manure. Set the plants from eight to twelve inches apart. To blanch, draw earth around the plants, from time to time, taking care not to cover the tops of the centre shoots.

White Solid.—A large, standard sort, white and crisp. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.00.

Boston Market.—Short, compact and solid; a favorite of many. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts.

Golden Heart.—A showy sort, of excellent qualities; one of the best. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25.

Half Dwarf White.—Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

White Plume.—An early, handsome variety. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25.

Golden Self-Blanching.—Beautiful golden color; delicious flavor. Pkt. 10 cts., oz. 40 cts.

Celeraic, or Turnip Rooted.—A variety forming a large, solid root. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts.

Flavoring Celery (Seed).—For soup. Pkt. 5 cts., $\frac{1}{4}$ lb. 10 cts., $\frac{1}{2}$ lb. 15 cts., lb. 25 cts.

Corn Salad. A favorite salad plant in Europe and very hardy. Sown in August, and protected with leaves during the Winter, it can be gathered in the Spring very early. Sown in April, it is soon in use. The leaves are sometimes boiled and served as Spinach. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Corn--for Table Use.

On account of short crop of Corn, all prices are subject to change without notice.

Extra Early Baltimore.—The earliest of all. Pt. 15 cts., qt. 25 cts., $\frac{1}{4}$ bush. \$1.00, bush. \$3.50.

Extra Early Adams.—Pt. 10 cts., qt. 20 cts., $\frac{1}{4}$ bush. 90 cts., bush. \$3.00.

Adams Early.—A favorite in the South. Pt. 10 cts., qt. 20 cts., $\frac{1}{4}$ bush. 75 cts., bush. \$2.50.

Early Minnesota Sugar.—One of the first early among sugar corn. Pt. 10 cts., qt. 15 cts.

Crosby.—Pt. 10 cts., qt. 15 cts., $\frac{1}{4}$ bush. 85 cts., bush. \$3.00.

Cory Sweet White.—Earliest sweet corn known; of superior merit. Pt. 10 cts., qt. 20 cts., $\frac{1}{4}$ bush. \$1.10.

Stowell's Evergreen Sweet.—Excellent; keeps green till cold weather; ears large; one of the best. Pt. 10 cts., qt. 20 cts.

Mammoth Sweet.—The largest variety grown. Pt. 10 cts., qt. 20 cts.

Egyptian.—Ears long, sweet and tender. Pt. 10 cts., qt. 20 cts.

Landreth.—Remarkably productive, three ears on a stalk; good, try it. Pt. 10 cts., qt. 20 cts.

Black Mexican Sugar.—The Black Corn is especially rich in sugary qualities. Pt. 15 cts., qt. 20 cts.

Special Prices to Cannery, Truckers, Gardeners and Farmers buying in large quantities.

EXTRA EARLY
ADAMS

MINNESOTA

CROSBY

LANDRETH'S
SUGAR

EVERGREEN

EARLY MARMOH

ADAMS

FIELD VARIETIES.

Maryland White Dent.—Good for meal. Qt. 10 cts., $\frac{1}{4}$ bush. 50 cts., bush. \$1.50.

Improved Maryland Early Yellow Dent.—Stalks medium height; ears large; will produce more than any other corn. Qt. 10 cts., $\frac{1}{4}$ bush. 50 cts., bush. \$1.50.

These varieties have taken first premium over all other Field Corn wherever exhibited.

ADVANTAGES OVER ALL OTHER VARIETIES OF FIELD CORN.

1. Comes early, strong and vigorous.
2. The fodder grows from seven to ten feet, which does not exhaust the soil.
3. It will stand the drouth better than a large stalk.
4. When dry, fifty-six years will make one bushel of shelled corn.
5. The grains are unusually deep.
6. This corn will yield five to ten bushels per acre more than any other corn generally planted.
7. Yields as good on thin land as any other corn.
8. One bushel will plant five acres and make twenty-five bushels more than any other corn generally planted.

Cress. **PEPPER GRASS.** Used as a small salad. Sow very thickly in shallow drills, on a smooth surface, at short intervals throughout the season.

Curled.—Pkt. 5 cts., oz. 10 cts.

Broad-Leaved.—Pkt. 5 cts., oz. 10 cts.

Water.—Pkt. 5 cts., oz. 40 cts.

Cucumber. The vines require a warm location. Plant after the ground has become warm, in hills four feet apart for the smaller varieties, and five feet for the larger sorts. Manure with ashes, guano or some well rotted composts, working the manure just under the surface. Sprinkle the vines with plaster or air-slacked lime to protect from bugs.

White-Spined.—Great bearer, excellent for early forcing, or for out-door cultivation. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Early Frame.—Early, short prolific. Quality of fruit good. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Long Green.—Superior. For pickles and for market. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Jersey Pickle.—Said to green better than any other variety. Pkt. 5 c., oz. 10 c., $\frac{1}{4}$ lb. 25 c., lb. 75 c.

Gherkin.—Burr Cucumber; used for pickles only. Pkt. 5 cts., oz. 20 cts.

Egg Plant. Plant the seed in March in a hot bed, or for family use, in flower pots, in a warm window. Transplant in open ground after weather has become warm and settled in rows two feet apart each way. They require a rich soil and as favorable location for warmth as the garden will afford.

Large Round Purple.—Unsurpassed, purple color and rich flavor; almost thornless. Pkt. 10 cts., oz. 50 cts., $\frac{1}{4}$ lb. \$1.40, lb. \$5.00.

New York Improved.—This is a form of the old Large Round Purple; large, solid, weighty and showy. Pkt. 10 cts., oz. 50 cts., $\frac{1}{4}$ lb. \$1.40, lb. \$5.00.

Endive. For early use sow as soon as the ground can be worked in the spring, in drills fifteen inches apart, and thin plants to six or eight inches in the row. To blanch the leaves gather them carefully together when perfectly dry and tie with matting or soft fibrous material. Another method is to invert flower pots over the plant. The leaves are very highly esteemed for use as salads.

Green Curled.—Very popular. Pkt. 5 cts., oz. 15 cts.

Kale, or Borecole. Plant in hills, two by three feet apart; select deep, rich soil, and cultivate as Cabbage. Very spreading, nicely cur. ed. Very hardy. Frost improves it. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.50.

Dwarf German Greens, or Sprouts.—This variety sow in September, broadcast, and gather in early spring, like Spinach. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts.

Kohl Rabi.

White Vienna.—Bulb light green; flesh white; very rapid in growth, early in maturity, fine in texture and symmetrical in form. Superior. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts.

Leek. Select good Onion soil, manure liberally, and plant in April, in drills six to eight inches deep and eighteen inches apart, and thin to nine inches apart, in the drill. Gradually draw the earth around the plants until the drills are filled level with the surface. Draw for use in October. To be used in soups, or boiled as Asparagus.

Large Flag.—A large and strong plant; hardy. Pkt. 5 cts., oz. 15 cts.

Special Prices to Cannerymen, Truckers, Gardeners and Farmers buying in large quantities.

Lettuce.

Lettuce covers a rich and rather moist soil. The rows should be about twelve inches apart, and the plants thinned to ten or twelve inches apart for the leading varieties. The more rapid the growth the better the quality. Some varieties are peculiarly adapted for early culture, others for summer growth.

Early Forcing.—The best for hot beds or frames. Pkt. 5 cts., oz. 30 cts., $\frac{1}{4}$ lb. 85 cts.

Early Curled Simpson.—Very early, excellent for salads. Form a compact mass of leaves. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.15.

Bloomdale Butter.—Black seed, fine for frames and out-door planting. Pkt. 5 cts., oz. 20 cts.

Large White Cabbage.—Large compact head, very fine, slow to shoot to seed. Pkt. 5 cts., oz. 15 cts.

Tennis Ball.—A favorite forcing variety. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts.

Oak Leaf.—A good, tender, hardy Lettuce. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.25.

Boston Market.—A celebrated variety in New England. Of good heading habit, small, early and compact; quite desirable. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.25.

Hanson.—A variation of the India, forming a half closed head. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts.

Melon.

Select warm and light soil—a poor light soil is better than a cold and rich one. Thoroughly work the soil, manure with guano, phosphate or a rich compost, having the hills six feet apart for the musk varieties, and eight or nine for Watermelons.

CANTELOUPE MELON.

Baltimore Market.—Large, thick, green sweet flesh. Pkt. 5 cts., oz. 15 cts.

Extra Early Hackensack.—Netted, green, flesh and excellent. Very showy, market variety. Pkt. 5 cts., oz. 10 cts.

Nutmeg.—Is one of the best old varieties. Pkt. 5 cts., oz. 10 cts.

Emerald Gem.—Meat salmon color, exceedingly sweet and delicious. Pkt. 5 cts., oz. 10 cts.

WATERMELON.

Kolb's Gem.—Very fine. A good shipper. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Boss Melon.—A new Watermelon of rare quality. Skin dark green. Pkt. 5 cts., oz. 10 cts.

Icing, or Ice Kind.—One of the best. Very solid, with thin rind. Pkt. 5 cts., oz. 10 cts.

Mountain Sweet.—Early, solid, sweet and delicious. Pkt. 5 cts., oz. 10 cts.

Citron.—Used in preserving. Pkt. 5 cts., oz. 10 cts.

Nasturtium.

Plant in May, in rows, the climbing varieties to cover some arbor or fence, or climb, or twine around the house. The leaves are used for salad, and the seeds, when soft enough to be easily penetrated by the nail, for pickles.

Tall.—An ornamental climber. Pkt. 5 cts., oz. 10 cts.

Okra, or Gumbo.

Select warm and rich soil and plant when the ground becomes warm, in rows two feet apart, thinning plants a foot apart in the row. The pods are used to thicken soup, being gathered when young.

Tall.—White, small and round; pods smooth. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Prolific.—Very prolific in pods. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Onions.

The Onion must have a clean and very rich soil, or it will not do well enough to pay for the trouble. Use well rotted manure freely, and be sure to get the seeds or sets in as early as possible in the spring, no matter if it is ever so cold and unpleasant; and keep the soil mellow and clear of weeds, and if seed is good, you will have a large crop of Onions. On no other condition can you hope for success. Disturb the roots of the Onion as little as possible, either in thinning or hoeing, and never hoe earth towards them to cover, or hill, as we do most other things.

Extra Early Red.—Onions of fit size for table use may be raised from the black seed the first season. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

Silver Skinned.—White, mild flavored, not a good keeper. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts., lb. \$2.50.

Large Red Wethersfield.—Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.25.

Southport.—White Globe. A large, showy variety. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25.

Large Yellow Strasburg.—Very fine. A good keeper. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.50.

Danver's Yellow.—Oval shape, straw color. Good. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.40.

Onion Sets.—From these most of early Onions are raised. (Market prices.)

Parsley.

Select rich soil; sow the seed in drills one foot apart, covering half an inch deep. As the seed is usually from fifteen to twenty-five days in vegetating, it will be necessary to sow early. Thin plants to four inches apart when two inches high. The beauty of the plant may be increased by several successive transplantings. It is used principally for flavoring soups, etc., and for garnishing in its natural state.

Fern Leaved.—Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Double Curled.—Fine. Beautifully curled. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts.

Moss Curled.—A very select, crimped variety. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. 90 cts.

Parsnips. The Parsnip flourishes best and gives the longest, largest, smoothest roots in a very deep, rich soil—one that has been made rich from manure the previous year. Manure, especially if fresh, makes the roots somewhat ill-shaped. Sow as early in the spring as the ground can be made ready, pretty thickly, in drills from twelve to eighteen inches apart, and about an inch deep. Thin the plants to five or six inches apart.

Sugar or Hollow Crowned.—The Hollow Crowns are considered superior in quality to the other varieties. Smooth, tender and early. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 50 cts.

Peas. The dwarf varieties should be liberally manured; the tall sort will run too much to vine if liberally manured, it being better to depend on the richness of the land that was previously in good condition. Have the dwarf, that grow not over fifteen inches high, in rows two feet apart; those varieties attaining the height of from two to three feet, in rows three feet apart, and the rows of the tallest sort, four feet apart. Bush the tall kinds when six inches high, or poles, set every six or eight feet, with single shoe thread passed from one to the other every four inches in height, answer finely.

VERY DWARF.

The very low varieties require no sticking.

American Wonder.—The earliest wrinkled pea. Very productive and sweet. Pt. 15 cts., qt. 25 cts., $\frac{1}{4}$ bush. \$1.50, bush. \$5.00.

Premium Gem—An improvement upon the Little Gem. Very luscious in flavor; try it. Qt. 20 cts., $\frac{1}{4}$ bush. \$1.20, bush. \$4.00.

DWARF. Grow about two feet high.

First Early Pea.—Earliest of all, and most profitable market pea. Because most uniform in maturity. Pt. 15 cts., qt. 25 cts., $\frac{1}{4}$ bush. \$1.25, bush. \$3.50.

Landreth's Extra Early.—This is a very early variety, used largely by market gardeners. Pt. 15 cts., qt. 25 cts., $\frac{1}{4}$ bush. \$1.25, bush. \$3.50.

Gardeners' Favorite.—A wrinkled variety named and introduced by ourselves; most delicious flavor; prolific bearer; give it a trial. Pt. 15 cts., qt. 25 cts., $\frac{1}{4}$ bush. \$1.00, bush. \$4.00.

Stratagem.—A large, wrinkled, blue pea of excellent quality; very long, large well filled pods; one of the best. Pt. 20 cts., qt. 30 cts., $\frac{1}{4}$ bush. \$1.50, bush. \$5.50.

First and Best.—One of the early varieties. Qt. 20 cts.

Rural New Yorker.—In maturity it is among the first early. Qt. 20 cts., $\frac{1}{4}$ bush. 75 cts., bush. \$3.

Early Kent, Early May, Daniel O'Rourke, &c.—Qt. 20 cts., $\frac{1}{4}$ bush. 65 cts., bush. \$2.50.

Yorkshire Hero.—A wrinkled variety; productive and of a very superior flavor. Qt. 20 cts., $\frac{1}{4}$ bush. \$1.00, bush. \$3.50.

Advancer.—A green wrinkled variety; good, try it. Qt. 20 cts., $\frac{1}{4}$ bush. \$1.00, bush. \$3.50.

Improved Dwarf White Marrowfat.—Standard market variety. Pt. 10 cts., qt. 15 cts.

TALL VARIETIES.

Champion of England.—An old favorite; rich flavored and very productive. Pt. 10 cts., qt. 20 cts., $\frac{1}{4}$ bush. \$1.00, bush. \$3.00.

Black-Eyed Marrowfat.—Large pod; prolific. Pt. 10 cts., qt. 15 cts.

Telephone.—Large wrinkled seeds. Pods large and well filled. Qt. 25 cts., $\frac{1}{4}$ bus. \$1.50, bus. \$5.50.

Sugar.—(Edible pods.) Cooked in the pods same as Snap Bean. Pt. 25 cts., qt. 40 cts.

Pepper. Capsicum or Pepper is cultivated mainly for Pickles. It is used as a seasoning in many ways, and sometimes medicinally. Sow the seed early in a hot-bed, if possible, if not, select a warm place in the garden for a seed bed, and soon as the soil is warm. Transplant when three or four inches high.

Cayenne.—Small, long and tapering; very hot; best for seasoning pickles. Pkt. 5 cts., oz. 25 cts.

Large Sweet Mountain.—Very large and excellent for Mangoes. Pkt. 5 cts., oz. 25 cts.

Bull Nose or Bell.—Good for pickling; very hot. Pkt. 5 cts., oz. 25 cts.

Golden Bell.—Similar to Sweet Spanish, except the color, which is golden. A new introduction. Pkt. 5 cts., oz. 30 cts., $\frac{1}{4}$ lb. 75 cts., lb. \$2.75.

Pumpkin. The Pumpkin is now very little used, except for agricultural purposes, the finer variety of Squashes having taken its place in the kitchen. The following are the best.

Sweet Potato.—Fine flavor, a desirable table sort. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Large Cheese.—Skin reddish orange, flesh thick; fine and sweet. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 50 cts.

Cashaw.—Solid flesh, fine and sweet; keeps well. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Connecticut Field.—Good for stock. Pt. 15 cts., qt. 25 cts., $\frac{1}{4}$ bush. \$1.25, bush. \$3.50.

Radish. The Radish must make a rapid growth to be fit for use; it will then be crisp and tender and of mild flavor. If it grows slowly, it will be hard, fibrous and disagreeably pungent.

Short-Topped Earliest White Turnip.—For forcing. Pkt. 5 cts., oz. 10 cts.

Early Red Turnip.—Turnip-shaped, skin red, for forcing. Pkt. 5 cts., oz. 10 cts.

White Tip Scarlet Turnip.—Red skin, fine flavor. Pkt. 5 cts., oz. 10 cts.

French Breakfast.—Of oval form, color scarlet, white tipped. Pkt. 5 cts., oz. 10 cts.

Long Scarlet.—Short top, deep scarlet roots, crisp, fine. Pkt. 5 cts., oz. 10 cts.

White Summer Turnip.—Fine for Summer use. Pkt. 5 cts., oz. 10 cts.

White Olive.—Quite salable in market. Pkt. 5 cts., oz. 10 cts.

Scarlet Olive Shaped.—Pkt. 5 cts., oz. 10 cts.

Yellow Turnip.—Very desirable for market. Pkt. 5 cts., oz. 10 cts.

Chartier.—Good, new variety. Pkt. 5 cts., oz. 10 cts.

Black Spanish.—Best late variety; black; keeps through the winter. Pkt. 5 cts., oz. 10 cts.

Large White Spanish Winter.—Fine keeping quality. Pkt. 5 cts., oz. 10 cts.

Chinese Rose Winter.—Remarkably fine for winter use. Pkt. 5 cts., oz. 10 cts.

Salsify, or Vegetable Oyster. Sow in early spring, on light, rich soil, in drills, fourteen inches apart, and thin the plants to three inches in the row. The roots will be ready for use in October, and will sustain no injury by being left in the ground during the winter. When cooked the flavor somewhat resembles the oyster, and is a good substitute for it.

White French.—Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.25.

Sandwich Island Mammoth.—Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 45 cts., lb. \$1.50.

Spinach. For summer use sow early in spring, in drills eight inches to one foot apart, covering the seed one inch deep. Select rich soil and manure liberally. A succession may be obtained by sowing at intervals of two weeks through the season. For very early spring use, sow in August, and protect the plants through the winter by a thick covering of clean straw or some similar light covering. Spinach is used principally as greens for boiling, and is very highly esteemed for this purpose.

Round Leaved.—The popular summer variety. Pkt. 5 cts., oz. 5 cts., $\frac{1}{4}$ lb. 10 cts., lb. 20 cts.

Bloomsdale Spinach.—(Extra curled.) An improvement upon the Curled Savoy Leaved. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 30 cts.

Long Standing.—Best for spring sowing; slow to seed. Pkt. 5 cts., $\frac{1}{4}$ lb. 10 cts., lb. 20 cts.

Squash. The Squashes are all quite tender, and therefore, no progress can be made in starting them until the weather becomes somewhat warm and settled. Treat-ment the same as for Melons.

Early White Bush Scalloped.—A desirable and marketable sort. Pkt. 5 cts., oz. 10 cts.

Summer Crook Neck Early.—Fine flavor, a desirable table sort. Pkt. 5 cts., oz. 10 cts.

Winter Crook Neck.—Flesh red, fine flavor, largely grown for winter use. Pkt. 5 cts., oz. 10 cts.

Boston Marrow.—For autumn use. Fine for pies or baking. Pkt. 5 cts., oz. 10 cts.

Hubbard.—Fine and desirable for winter use. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 70 cts.

Tomato. Sow the seed in March or April in the hot-bed or in pots, in a sunny exposure in the house. If it is desired to make very healthy, stocky plants, they may be transplanted or repotted when about two or three inches high, to dwarf and give them more room. When five or six inches high, if the ground has become warm transplant them to the open ground on a rainy or cloudy day, if possible; if not, the young plants should be liberally watered and shaded from the hot sun. The richer the soil, the more handsome and plentiful the fruit will be; but if it is desirable to have the fruit ripen as early as possible, select rather light, poor soil and a sunny location. Set the plants four feet apart each way.

Acme.—Of superlative merit, size medium; shape, slightly oval, smooth as an apple. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.00.

Paragon.—Here we have a variety—the perfection of a Tomato—large, solid and smooth as an apple, and deep red. *It is superb. No praise can be too high.* Pkt. 5 and 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

Trophy.—Large red variety. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.00.

Queen.—Fruit somewhat resembles Paragon in appearance. Favorite among canners. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.00.

Becky.—(New.) Very fine; try it. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.00.

Favorite.—This is a large perfect-shaped Tomato. One of the best. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.00.

(Continued on page 14.)

TOMATO.—(continued.)

- Mikado.**—Color purplish red like that of the Aeme. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.00.
- Dwarf Champion.**—Entirely distinct from any other variety; plant grows stiff and upright; can be planted three feet apart; extra early. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts.
- Early Jersey.**—Good early variety. Pkt. 5 cts., oz. 35 cts.
- Peach Tomato.**—Second early; resembling peach in appearance. Pkt. 5 cts., oz. 30 cts.
- Perfection.**—A superb Tomato. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.
- Golden Queen.**—A bright yellow large, solid; ripening well up to the stem; a good keeper, and, all things considered, the best Yellow Tomato ever introduced. Of enormous productiveness. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 65 cts., lb. \$2.25.
- Pear Shaped Yellow.**—Sometimes known as the Yellow-Egg or Plum; used for preserves and pickles, of extraordinary productiveness. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 70 cts.
- Grape, Cherry, or Currant.**—Fruit borne in cluster, size of fruit half-inch in diameter, desirable for pickles or preserves. Ornamental. Pkt. 5 and 10 cts., oz. 25 cts.

Turnip.

For early use, sow the small sorts as soon as the ground can be worked in the spring, in drills fourteen inches apart—the Rutabagas thirty inches. As the seed is very fine, it should be covered but slightly, excepting in very dry weather. Select light and, if possible, new soil, and manure with plaster and ashes or phosphates. Should the young plant be troubled with insects, a sprinkling of the same will be found beneficial. For fall and winter use, the early kinds should be sown from the middle of July to the middle of August, and the Rutabagas from middle of June to first of July, using from one to one and a half pounds of seed to the acre.

- Early Red Top.**—(Flat.) Fine, sweet, mild, rapid grower; very early and popular. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., $\frac{1}{2}$ lb. 20 cts., lb. 35 cts.
- Early White Top.**—Differs from Red Top only in color. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 35 cts.,
- Large Early Red-Top Globe.**—A variety of recent introduction, of large size, rapid growth, unusually attractive and approved and admired by all who have seen it. A very much heavier producer than either of the preceding, and quite as early as the Flat Red-Top. We confidently recommend it as an acquisition. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40 cts.
- Early White Egg.**—A new variety of rapid growth; egg shaped and white, as its name indicates. A sort destined to be in great demand. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40 cts.
- Yellow Aberdeen, or Scotch Yellow.**—This is a highly approved CATTLE TURNIP, attaining a large size. It is solid, nutritious, a good keeper and in every respect reliable. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40 cts.
- Amber Globe.**—Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40 cts.

Rutabaga, or Swede Turnip.

- Improved Purple Top Rutabaga.**—A standard field variety for stock, and fine for family use. Yellow fleshed. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., $\frac{1}{2}$ lb. 25 cts., lb. 40 cts.

Sweet and Pot Herbs.

A little collection of Sweet Herbs is a treasure to the cook and nurse. A small place in the garden will give all the herbs needed in any family. Cut when in flower; dry in the shade.

- Sage.**—American. Pkt. 5 cts.; oz. 20 cts. **Thyme.**—Broad Leaved English. Pkt. 5 cts.
- Summer Savory.**—Pkt. 5 cts. **Sweet Basil.**—Pkt. 5 cts. **Caraway.**—Pkt. 5 cts.
- Sweet Marjoram.**—Pkt. 5 cts.; oz. 20 cts. **Coriander.**—Pkt. 5 cts. **Chervil.**—Pkt. 5 cts.

Grass and Clover Seed.

Red Clover. White Clover. Perennial Rye Grass. Hungarian Grass. Timothy and Red Top. Common Millet. German Millet. Lucerne Clover. Orchard Grass. Lawn Grass. Prices quoted on application.

OUR SPECIAL Lawn Grass.

A first-class mixture prepared by ourselves and containing nothing but choice seeds; extensively used on lawns in this vicinity, with the most satisfactory results. Qt. 25 cts., $\frac{1}{4}$ bush. \$1.25, bush. \$5.00.

We also have a cheaper grade of lawn grass which does not contain some of the high priced varieties to be found in the above special mixture, however this article makes a beautiful sod. Qt. 20 cts., $\frac{1}{4}$ bush. \$1 00, bush. \$3.00.

Hammond's Slug Shot.

The great merit of this insecticide lies in its non-poisonous properties; no danger need be apprehended by the person applying it, nor will it injure animals should they eat it, unless in large quantities. It does not render injurious the vegetables or fruits on which it is applied, and yet it is probably the best insect destroyer that has ever been offered. It is particularly useful for the prevention and destruction of potato bugs and all worms and insects that infest our gardens. It comes all ready to be applied; there is no mixing with plaster or flour, no dissolving in water; it is simply dusted lightly on so that it reaches all parts of the plant. It will be necessary, however, to apply it occasionally, for it does not kill the eggs or prevent them from hatching. The best time to apply it is early in the morning, particularly for potato bugs, as they do not feed during the night. The quantity of Hammond's Slug Shot needed for the acre varies according to the number and size of the plants, from ten to forty pounds. For further information send for little book on Slug Shot. Prices: 10 lb. packages for 50 cts., 5 lb. packages for 25 cts. Special prices on large quantities in bulk.

PARIS GREEN, in any Quantity, at Lowest Prices.

ERB'S HORSE AND CATTLE POWDERS,

RUST EGG PRODUCER,

HAVEN'S ROOP PILLS,

HAVEN'S CLIMAX CONDITION POWDERS, for Cattle and Poultry.

❖ FERTILIZERS ❖

ANIMAL BONE PHOSPHATE.

The old reliable; a favorite with Truckers as well as Grain Farmers.

Where quick and permanent action is required it stands as one of the most popular brands in use. A complete Fertilizer, combining all of the necessary elements of Plant Food.

As a Truck Fertilizer it has but few equals, and we refer to the following well-known Farmers and dealers:

J. M. GILLESPIE, Rossville, Baltimore Co., Md.
 ROBT. W. CHARD, Armiger, Anne Arundel Co., Md.
 O. S. PUMPHREY, Marley, Anne Arundel Co., Md.
 WILSON SANITARIUM, Mt. Wilson, Balto. Co., Md.

And many others.

Price, - - \$32.00 per Ton.

ALKALINE PLANT FOOD.

Prepared especially for Corn, Oats, Potatoes, and Summer crops generally. As a Potato Fertilizer this article has a reputation of many years' standing, and our greatly increased sales each year justify us in making the claims that we do for it. We use nothing but first-class materials and give you in the "PLANT FOOD" just what the Potato and other Summer crops require; as its name implies it is a reliable plant food. The results obtained from the above on Celery alone are worthy of mention, and we have never seen it used for that plant without the most flattering results.

Price, - - \$28.00 per Ton.

SOFT GROUND BONE.

Made from soft stock; becomes soluble in a short time; acts quickly with the best results; the cheapest Bone made. If you believe in Bone, try this brand, it will pay you. Ever increasing sales and popularity.

Price, - - \$30.00 per Ton.

No. 1 DISSOLVED BONE.

Sales for 1890 far ahead of any previous year. Made from Soft Bone, dissolved. Contains some blood and meat; try it and you will always use it.

Price, - - \$28.00 per Ton.

PURE DISSOLVED ANIMAL BONE.

Made from strictly pure Animal Bone.

Price, - - \$30.00 per Ton.

AMMONIATED BONE PHOSPHATE.

A high grade Ammoniated goods; used extensively for wheat and grass.

Price, - - \$28.00 per Ton.

BUTCHER'S BONE PHOSPHATE.

Made largely from Bone, Meat and Blood. Used on both Spring and Fall crops. One of the cheapest articles on the market for the money, as it is rich in Ammonia, Potash and Phosphoric Acid.

Price, - - \$25.00 per Ton.

AMMOINATED SOLUBLE BONE.

Prepared especially for farmers who want an Ammoniated goods but who do not desire much Ammonia.

Price, - - \$24.00 per Ton.

SOLUBLE BONE PHOSPHATE.

In fine mechanical condition; a good Fertilizer for the money.

Price, - - \$21.00 per Ton.

HIGH GRADE ACID PHOSPHATE, or Dissolved S. C. Rock.

Finely ground, dissolved and in good condition.

Hose Reel.

Hand Pruning Shears.

These are hand-forged, solid steel. Cut with ease. Several sizes are made. One is nickel-plated, weighs only 3 ozs., and is small enough for vest pocket. Very convenient for ladies' use.

Excelsior Portable Hand Force Pump.

To place in bucket or tub
The lightest and neatest thing of the kind we have seen; throws water 40 feet
Change from stream to spray instantly.

Price, complete, \$4.50.

Large Assortment.

Lowest Prices.

Philadelphia Hand Horse Lawn Mowers

Philadelphia Hand Mower.

Simple in construction; durable and light running—therefore cheap. Full stock of machines and repairs always on hand. This is a favorite and always pleases the buyer.

Philadelphia Horse Mower.

In use at Druid Hill Park, at many other Parks and Squares and on a large number of lawns in this vicinity. A first-class machine in every respect,—always on hand at lowest prices.

We make a Specialty of Repairing Lawn Mowers, for which purpose we employ efficient mechanics, and in this way become thoroughly acquainted with the construction of all machines on the market.

When you buy a Lawn Mower, be sure to select one which has merit, and for which you can get repairs. The Philadelphia is just such a machine. Write for Special Circular and Prices.

Continental High Wheel Mower.

Continental High Wheel Mower.

A distinct type of machine in popular favor.

Owing to the demand for a High Wheel Mower for uneven lawns we have secured what we consider the best machine of the kind made. Every customer more than satisfied with the Continental.

In use at Patterson Park, and on the lawns of Messrs. Robert Garrett, William H. Whitridge, R. B. Smith, German H. Hunt, Edw. A. Griffith, at Church Home, the Woman's College of Baltimore City and very many others.

Splendidly built. A full stock of machines and repairs always on hand. Write for Special Circular and Prices.

Pennsylvania Horse Mower.

The Pennsylvania is a complete Mower, well-made, easily repaired, and one which can be recommended to purchasers. One of the best. Write for Circular and Prices.

THE No. 40,

Full Chilled, Sloping Landside, Both Right and Left Hand.

Here we present a Cut of the World Famous No. 40 Series, embracing the Numbers 10-0, 13, 19, 20, E and 40 Plows.

These patterns are better known, have reached a larger sale, have proved more popular, and given better satisfaction than any plows on the face of the globe. They are durable, easily handled, easy running, perfect in their work, economical in repairs, and have done more to advance the science of farming than any other agency ever employed. They are made only of Oliver's celebrated chilled metal, are made both right and left hand, and every plow has the name "Oliver" on beam, handles, and wearing parts. They are the best general purpose plows in the world, have had the longest run, and their reputation has been maintained from first to last. They are fitted with the new share and reversible slip point shown on the next page, and also with the regular share so well known and so often counterfeited. They will continue to hold their places in public favor in spite of all the opposition brought against them; and the farmer who wants the best plow made will make no mistake in buying the "Oliver." In buying shares and other extra wearing parts, be sure that the name "Oliver" is cast on them. All others are imitations and not to be depended on in any respect.

OLIVER'S PATENT SLIP NOSE SHARE.

Special attention is directed to the new Share in the cut above shown. It is called "Oliver's Patent Slip Nose Share," and represents the grandest improvement in the way of a saving device ever offered to the tillers of the soil. It is a well known fact that the Nose of any share wears off more rapidly than any other portions, and is more liable to breakage in rough or stony ground. In the new Slip Nose Share these annoyances are overcome, for the point can be removed, reversed or replaced readily, and a new share is practically the result. Both the Share and the Slip Point are made heavy where they join, and being fastened with a nail, key or even piece of wood, the arrangement is so simple that any one can easily make the changes.

This new Share is adapted to use on all the No. 40 series, which embraces the 10-O, 13, 19, 20, E and 40 plows. In fact, all Oliver chilled plows, outside the "Combination" series, will be so fitted, and will have this advantage when Cast Shares are used.

Users of our plows will appreciate the fact that this Share and Point can be used on their old plows, which have done such good service, and they will not have to buy a new plow to get their benefits. We offer this device as a practical, sensible and economical invention, and one that will give thorough satisfaction upon trial and use.

NEW PERFECT INDEX

— THE —
New Model Seed Drill

GUARANTEED TO BE

The Most Perfect Drill

IN AMERICA.

Thoroughly tested and fully endorsed by all the Leading Seedsmen of the country.

Each year emphasises the fact that it is still at the head of the line.

DOUBLE WHEEL ATTACHMENT.

The GEM WHEEL HOE.

An Old Tool, but Nothing Beats it Yet.

**Weighs Only
Twenty-Two
Pounds.**

The "JEWEL" Double Wheel Hoe and Cultivator Combined.

All malleable iron and steel, with the exception of wheels and handles. Adjustable in every way.

THE "IRON AGE" HORSE HOE.

SHOWN WITH WHEEL AND CULTIVATOR COMBINATION, ALSO WITH LEVER ADJUSTER.

One of the most satisfactory implements, for a reasonable price, ever made on this continent. Probably no tool has been so widely imitated as the "IRON AGE" Cultivator, the original of this style of implement, and we are quite sure no other tool has kept so far ahead of its imitators. *All Steel frames. New shape side bars, giving facility to use tool either with five or seven teeth—a grand, good thing. Sold with or without Lever Adjuster.*

"Iron Age" Combined Harrow and Cultivator.

STEEL TEETH, DIAMOND SHAPE.

A comparatively new implement, but one every way worthy of purchase by all wide-awake farmers. They cannot afford to do without it. Four positions of teeth, doing good work in all crops.

❧ BATEMAN'S ❧

COMBINATION OF

Barrel Truck, Hand Cart, Sprinkler and Barrel Force Pump.

When we consider the almost innumerable uses to which the Combined Truck and Hand-cart can be applied, its "handiness" and the immense amount of time and hard labor saved by its use, it is not a matter of surprise that it is steadily growing into favor. It is one of those articles that causes the user to wonder how he ever did without it, as it really becomes indispensable when once used.

The Barrel is raised from the ground, carried to the place desired and *instantly detached*, all *without handling*. The weight being balanced over the axle, no lifting or down pressure is needed in transportation.

Other barrels for various purposes can be used as needed, extra trunnions being furnished, if desired, which can be readily attached to any oil or spirit barrel, thus increasing indefinitely the value of the Truck.

We have wheels of $1\frac{1}{2}$, $2\frac{1}{2}$ and 4 inches tread, *but always send Truck with Wheels $1\frac{1}{2}$ inches, unless otherwise specified.*

We also supply a Box, with trunnions and spring catch, making a very superior *dumping* Hand-cart. No castings to break; all irons of the best wrought. Very stiff, compact, handsome and low in price. Furnished with or without Barrel or Box, as ordered. A first-class force pump, entirely of brass, furnished as an attachment. Just the thing for washing windows and carriages and for spraying trees.

BEST SMOOTHING HARROW MADE.

Owing to the greatly increased demand for smoothing harrows, we have contracted for the best line of goods of the kind on the market. Every Evans Harrow we have ever sold has given perfect satisfaction.

EVANS ADJUSTABLE STEEL FRAME HARROW.

The above cut represents our New Lever Harrow. It can be used as a straight tooth pulverizing Harrow, or a slanting tooth smoothing Harrow. By means of the lever the teeth can be set straight or to any desired slant. The beams are made of iron tubes and the teeth pass through the same and are threaded and held firmly in place by a tap. If stalks or trash accumulate on the teeth, when used as a straight tooth Harrow, the teeth can be changed in a moment by means of a lever, to a slanting position for cleaning off the trash. As a smoothing Harrow it never clogs, all rubbish being cut in two, or passing down and off the ends of the teeth and is completely buried; and for cultivating young corn in its early stage, it is unequalled. It thoroughly pulverizes the soil and destroys the weeds, while the young corn remains uninjured. Specially adapted to cultivating wheat in the spring. Price \$20.00.

THE EVANS TRIPLE HARROW.

SIMPLE, PRACTICAL, COMPLETE.

Has Runners ready for the road without unhitching the team. Convenient to move from place to place about the farm. Any boy can handle it. Saves labor and time.

DESCRIPTION.—It has a *Lever Attachment*, by aid of which each section can be raised clear of the ground, and cleaned of stalks or trash, or passed over stones or stumps without stopping the team, and is so easily handled a boy can operate it. Price \$17.00.

CLARK'S CUTAWAY HARROW.

One of the Greatest Inventions of the Age. A Triumph of Mechanical Genius.

The most complete disk harrow made; will run 25 per cent. lighter than the solid disk and do very much better work; will not ridge the ground; impossible to clog; cuts the weeds and trash at the same time mixing them with the soil. Besides these advantages, the Cutaway is provided with the new mechanical movement of ball and socket joint, where the wings of the harrow connect at an angle under the end of the pole. This little part is by itself one of the triumphs of mechanical genius. A connection of this kind allows the axles to revolve at distinct angles, and besides cutting and slicing, the implement tears and twists the sod and mixes the soil, putting that which is on the top under, and bringing up the lower earth so far as it reaches. This can be regulated by weighting the drag. With all this motion, there is but little of the side displacement of soil that is so objectionable and damaging a feature of old disk harrows. Considering these movements, one cannot fail to reason what a perfect seeder it must prove. 12 Disk, 16 inches, Price \$30.00.

Send for List of Farmers and Gardeners who use and recommend the Cutaway. Among very many others we call your attention to the following:

BALTIMORE MANUAL LABOR SCHOOL FARM, Aug. 23, 1889.

MESS. GRIFFITH, TURNER & CO.

Gentlemen:—We are delighted with the Clark's Cutaway Harrow. It is decidedly the best pulverizer we have ever seen. We can do more pulverizing with it, especially in heavy clayed soil, in one day than we can do in two with any other harrows that we have ever tried or seen work. It does not bring up anything that has been plowed under, but cuts up and mixes manure, etc., with the soil.

Respectfully,

E. STABLER.

MESS. GRIFFITH, TURNER & CO.

The Cutaway Harrow gotten of you has given perfect satisfaction, and consider it the implement for much work which cannot be performed satisfactorily with any other form of surface pulverizer I have seen. In short, it will do well what any other harrow will do and much that no other will.

Very Respectfully,

J. H. GOODRIDGE, Mgr. for J. H. RIEMAN.

The BUFFALO PITTS SPRING TOOTH HARROW.

FRAME ELEVATED THROUGHOUT ITS ENTIRE LENGTH, MAKING IT

THE LIGHTEST DRAUGHT SPRING TOOTH HARROW IN THE WORLD!

NEW PATENT FRICTIONAL PIVOTING TOOTH HOLDER, allowing the adjustment of the entire length of the tooth by only loosening one nut, at the same time providing flat runners whereby the harrow frame is held elevated throughout its entire length.
NO TEETH TRAILING. By a new patent hitch, where, by placing stay chains from point of harrow to ends of whiffletree bar, we obviate the usual swinging of harrow from side to side, thus preventing the teeth from following each other and also controlling the point of harrow in preventing its pitching forward and downward, and making harrow run level on any soil, while each tooth is made to do its share of work, greatly increasing the effectiveness of the harrow, by a very simple device.

"MALTA" Shovel Plows.

Best made. Have none but the genuine. Beware of imitations.

Malta Walking and Riding Cultivators.

Its numerous adjustments combined with neatness, strength and durability, make it the favorite. One of the most useful implements in use. The Malta has been sold in this section for years, and has proven itself worthy of the reputation it enjoys throughout the country. MALTA RIDER, \$30.00. MALTA WALKER, \$25.00.

Evans Check Rower, 18.00

→ CAHOON'S PATENT BROADCAST SEED SOWER ←

— FOR SOWING —

Wheat, Oats, Hemp, Barley, Rye, Buckwheat, Grass, Seed, Rice, &c.

SOWS FROM

4 to 8

ACRES PER

HOUR,

At an ordinary walking gait, throwing Wheat about 40 feet wide.

SPECIAL GATE for GRASS SEED.

WARRANTED

TO GIVE

PERFECT

SATISFACTION,

And save their cost in less time than any other implement yet offered.

STRONGLY BUILT!
LAST FOR YEARS!

The acknowledged superiority of these machines over all others has already placed them in the front rank of labor saving implements. A saving of four-fifths of the Labor and one-third of the Seed is effected by their use, and a person entirely unused to sowing by hand can use this machine with perfect success.

The Breadth of the Cast will be according to the Weight of the Seed. The Heavier the Seed the greater the Distance to which it is thrown. The passages ordinarily should be as follows:

Wheat & Rye, from 30 to 36 ft.	Oats, - - from 21 to 25 ft.
Barley, - " 27 " 33 "	Clover, Millet & Hung. Seed, " 20 " 24 "
Hemp, - " 27 " 30 "	Timothy, - " 15 " 18 "

ABOUT SOWING IN THE WIND.

Anyone familiar with the use of the machine, can sow satisfactorily in a much stronger wind than will admit of sowing well by hand; but as the ordinary work of a day can easily be done with the Sower in two or three hours, that time may be chosen early in the morning or late in the afternoon—when it is usually calm, or nearly so.

PRICE, \$4.00.

Thompson's Clover and Grass Seeder.

One of the best articles illustrated in this Catalogue. Sows 12 or 14 feet wide, any amount desired per acre. Can be used in wet, dry or windy weather. Will sow 20 to 25 acres per day, and does its work accurately. Read what Messrs. James Oliver and J. I. Case, the noted manufacturers, say about it:

OFFICE OF OLIVER CHILLED PLOW WORKS, SOUTH BEND, IND., Dec. 11, 1886.

O. E. THOMPSON,

Dear Sir:—The Seeder purchased of you has had my personal examination, and I am pleased to say that I regard it as being most complete in every respect. The reputation it enjoys is fully merited; and were I to need another I would not hesitate to buy yours. In fact I would have nothing else. Wishing you all possible success in its manufacture, I remain,

Yours truly, JAMES OLIVER.

J. I. CASE THRESHING MACHINE CO., RACINE, WIS., Aug. 19, 1887.

O. E. THOMPSON,

Dear Sir:—The Thompson Clover and Grass Seed Sower you sold me works to my entire satisfaction. No man farming 40 acres can afford to be without one. Mine is loaned half the time to my neighbors. I may have to get another so as to keep one for my own use.

Yours, etc., J. I. CASE.

ALL KINDS OF MACHINERY REPAIRED.

THE FARMER'S FRIEND.

The Staver Buckeye Feed Mill and Power Combined.

For grinding corn and cob or shelled grain. Can also be used as a separate two horse power for running other machinery. The combination of a **Feed Mill and a Horse Power in one Machine** makes a great reduction in the cost, and furnishes a light running machine which meets with general favor. There are nearly fifteen thousand of these combined mills now in use, and the demand grows every year, proving that it is what the farmer needs.

The **STAVAR BUCKEYE** is a rapid grinder yet light running, and just right for two horses.

The **Sweep** is so constructed as to utilize End Pressure and apply it to turning the Master Wheel, making a saving of 20 per cent. in draft. It can be attached quickly, without using wrench or bolts.

Among list of farmers and dealers who use and handle these mills, we refer you to :

White Hall, Balto. Co., Md.—This is to certify that we ground at the rate of twenty (20) bushels an hour corn and oats, mixed half and half on a Staver Buckeye Mill with two horses weighing nine hundred pounds each.

DOCTOR BAILEY

Ensilage and Dry Forage Cutters.

The Dr. Bailey Ensilage Cutters have many advantages possessed by no other Ensilage machine or cutter. Strength, durability, simplicity and rapidity of work are among the qualifications. They are giving entire satisfaction, and the ever increasing demand shows their great popularity. We herewith illustrate and describe in part only the advantages which can be claimed by no other cutter made.

There are six sizes. The size with 10-inch knives (illustrated on a following page) is for hand use; the 12-inch machine is for use by hand or horse power, the fourteen inch machine is for one-horse power, while with a one-horse power the 16-inch machine (illustrated above) will cut much more than any cutter having convex knives.

Upon a careful test at "Winning Farm," the Doctor Bailey 20-inch machine cut green corn fodder at the rate of seven tons per hour, 3-8 of an inch long, and at the rate of 15 tons per hour, 3-4 of an inch long.

The 12, 14, 16 and 20-inch machines cut ten different lengths— $\frac{3}{8}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{7}{8}$, 1, $1\frac{1}{4}$, $1\frac{1}{2}$, $1\frac{3}{4}$, 2 and $2\frac{1}{2}$ inches. The 10-inch machine cuts four different lengths— $\frac{3}{8}$, 1, $1\frac{1}{2}$, and $2\frac{3}{8}$ inches.

And many others,

Celebrated Ross Cutters and Carriers.

The above Cut shows the Power Cutter.

Some of the characteristics of this popular machine are, first:—The Upward Cut, whereby the knife shaft rests naturally on its bearings, and thus avoids that jarring of other machines, as the Downward Cut lifts the shaft out of the box.

By the Upward Cut the edges of the knives and the cutting plate are both in full view, so that after sharpening and grinding the knives can be adjusted accurately and easily, whereas with the Downward Cut, the edges of the knives and cutting plate are obscured by the back edge and curve of the knife.

By a perfect arrangement the feeding rollers can open either parallel or obliquely, and at the same time retain all parts in perfect position; and by opening obliquely will feed heavily on one side and less on the other; they are self-feeding and cannot clog or stop.

By a peculiar device the fly wheel is fastened securely by a key and screw, but so arranged that by loosening the set screw, it is quickly and easily removed without touching the key.

The length of cut can be quickly and easily changed, every piece being plainly marked, so that mistakes are impossible.

THE No. 9 A, HAND-POWER CUTTER

ROSS No 9.

This is the famous hand-power Cutter of the Ross principle; it is very heavy, strong and durable, simple in construction, does not get out of order, and the knives retain their edge after long periods of continuous usage. It has the Upward Cut, self-feeding rocking rollers and chilled cutting plates; is suitable for every purpose, in the city or on the farm, and cuts every kind of material with ease and in a most perfect manner.

ALL KINDS OF MACHINERY REPAIRED.

THE AMERICAN ROUND WASHER,

IS THE BEST WASHER MADE.

Actual trial has proven beyond a doubt that it will
WASH CLEANER, QUICKER,
WITH MORE EASE
AND LESS INJURY

To the clothes than any machine now in use.

PRICE, \$8.00.

We claim that the American Round Washing Machine is the best washer made, and the price is within the reach of all who use a washing machine. We, therefore, invite the attention of dealers, and the public at large to our American Round Washer. We are aware that there is a great deal of prejudice and opposition to our cause, from the fact that so many washers have proven worthless. Our machine is novel in its construction, being a truncated cone form, with the larger dimensions down. This is to prevent the clothes from packing, giving the water free access through the fabric, and washes in less time and with less work than the square box. This, a thorough investigation has proven beyond a doubt. Also, that a tub made of clean pine, with heavy iron hoops, is far superior to a box, and will last much longer. Not so liable to leak. We use only thoroughly seasoned timber in our machines.

Our prices are lower than for any other washer made, with the same amount of labor to make it. It has come to stay. We have found that many washing machines now manufactured are so constructed that wringers cannot be used on them; or, if so, only a certain kind. On the American Round Washer you can use any kind of a Wringer. See cut. Please call at our place of business and get an American Round Washing Machine, give it a fair trial, following directions which are on each machine, and if you do not think it worth more than it costs, return it and get your money.

THE BLUFFTON CLOTHES-BAR.

The Best Folding Ironing-Board in Use.

57 feet of Hanging Room. Price, \$1.00.

Price, \$2.50.

SUPERIOR WRINGERS

Always in stock.

The Howard Patent Adjustable Bolster Spring.

IMPROVED PATENT, OCT. 19, 1888.

25,000 sets in use. Their success established throughout the United States. Examine the cuts and note the principle of its construction. The center springs, for heavy use, are the old reliable elliptic, oil tempered steel, which prevents any strain upon the bolster stakes. They are complete as sold and require no alteration of the wagon in applying them to bolsters. Give them a trial, they will prove to be the best investment you ever made. Springs warranted to carry their full capacity.

Shows Center Spring in position for Light Load.

Dutton Mower Knife Grinder.

The Wheel is made of Corundum and is hollow. Fill the Wheel with water before using. When in motion the water is forced out through the wheel, which is porous. This keeps the knife cool. No gumming; no loss of temper, either on the part of the knife or its owner. Price, \$6.00.

BODY CART, No. A 2.

Is one of the handsomest vehicles of its kind ever put on the market, and is bound to sell on sight.

Has compartment under the seat for parcel stowage, and has a *handsome, roomy body and wood dash with line rail*. The body and dash are finished in the natural wood or painted black, and in contrast with the finished gear make a very handsome job. We furnish a cushion with this job. A very stylish and finely finished cart. Built for two passengers.

Price, A 2,	- - - - -	\$30.00.
A	- - - - -	25.00.
B 2,	- - - - -	25.00.
B solid foot rest,	- - - - -	21.00.
B slat foot rest,	- - - - -	20.00.

FARM CARTS.

MADE OF VERY BEST MATERIALS.

In use at Steelton Steel Works, Sparrow's Point, and by many farmers and contractors. Prices of different sizes and styles on application.

BREWSTER SIDE-BAR.

SIDE-BAR CANOPY SURREY.

One and Two Horse Union Ry. Horse Powers.

PRICES.

ONE-HORSE, - \$125.00

TWO-HORSE, - 160.00

The wood frame work is constructed similar to most of the tread or endless chain powers in use but more durable in all its parts, and the arrangement of the running gear is very much better. The band wheel is readily changed from one side of the machine to the other.

Their advantages over other horse powers give satisfactory results as follows :

1st. It is the most durable of any horse power made. 2nd. It requires the least elevation of any to obtain a given amount of speed. 3rd. These Powers are wider and longer than any other, giving ample room for the horses to walk with ease and safety. 4th. The wheels are larger in diameter and less in number than employed in any other horse power, with the result of more power and less friction. 5th. The platform chain moves with a perfectly smooth and free motion. 6th. All the pivots, boxes, wheels and axles are chill hardened and smooth, thus causing little friction and adding greatly to the durability. 7th. The power is applied both at the top and bottom of driving gear ; by this means the weight and power of the horse acts directly to propel the machine with great force. 8th. There is no strain on the chain in passing the end tracks. 9th. There are no cross rods between the treads to get bent out of place and add to the weight of the moving platform.

In short, these are by far the most satisfactory machines for the purpose in the market, and they have received first premiums at all the fairs where they have been exhibited.

SUPERIOR GRAIN DRILLS,

THE BEST PLAIN AND FERTILIZER DRILLS IN THE WORLD.

Made by the SUPERIOR DRILL CO., Springfield, Ohio.

THE BEST

Spring Hoes.
Hoe Pressure Attachment.
Grass Seed Sower.
Hoe Shifter.

Will sow Wheat, Rye, Oats, Corn, Beans, Peas, Buckwheat, Flaxseed and all kinds of Grass Seed better than any other Drill.

Have Force-Feed Distributors for sowing Grain, Fertilizer and Grass Seed.

Of Best Quality and Finish.

THE BROWN WAGON.

REASONS FOR ITS SUPERIORITY:

Oil Boiled Fellows—shutting out all moisture, preventing rot and keeping tires tight.

Stay Chains, with springs to control the wheels, and destroys largely the switching of the tongue.

When either holding the wagon down grade, or backing a loaded wagon, the Tongue Chains are unyielding, stiff and damaging to both team and harness. While the Tongue Chains are too rigid, ENDWISE, they lack CONTROL from the side jerking of the tongue. This side jerking allows the tongue to whip the horses' legs, and the travel of the wagon is hindered by the unsteady motion of the tongue.

A SUCCESSFUL REMEDY.

To overcome the above objections in Tongue Chains, as commonly used, we have applied Coil Springs to ease the DRAFT on the team's neck, when the chains are forced to control the tongue or HOLD BACK.

We also add a BRANCH CHAIN to each Tongue Chain. The BRANCH CHAIN is to destroy, as far as possible, the side jerking, and to protect the horses from the WHIPPING motion of the tongue. The COIL SPRINGS yield to either the pull of the CHAIN, or BRANCH, saving the team at all times from the sudden jerking of the tongue; protecting both horses and harness. The BRANCH CHAINS have the tendency to prevent side motion of the tongue—same as neck yoke, but less cramping for the horses—while the Coil Springs supply the place of the vibrating of the neck yoke to ease the team's necks. Only wagon with Yielding Tongue Chains with CHECK BRANCHES.

SKEIN AND AXLE DIFFERENT FROM ALL OTHERS.

Our Extension Shoe Skein is one of the greatest improvements on wagons during the last fifty years; as it protects the axle as well as the skein, allowing the axle to be made of less material. The shoe of the skein supports the axle where it has the greatest load to bear, and is superior to the Steel Skein, as it allows a greater quantity of the axle to enter the shoe of the skein.

The Skein is so chilled on its face, and will wear longer than a steel skein. The steel skein has no temper in it, and is as soft as iron as it is required to be welded to make it.
