OF
PEKING UNIVERSITY,
CHINA.

EMPEROR KUANG HSÜ, XXII. YEAR,

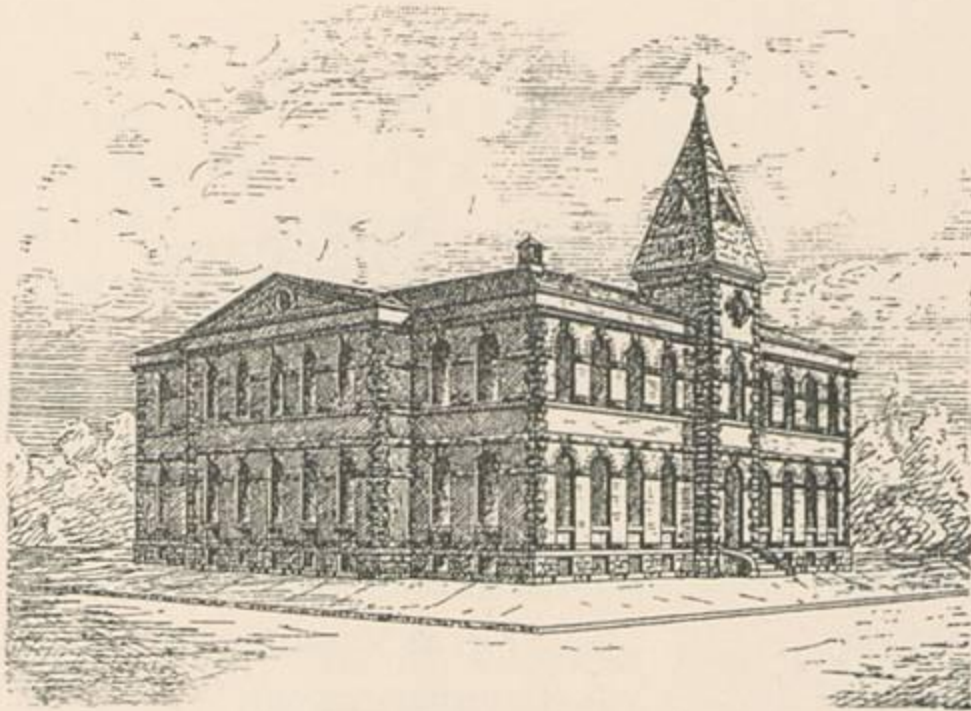

1896-97.

PRESS OF R. J. OLIPHANT,
OSWEGO, N. Y.

G

LEANDER W. PILCHER, D.D.,
First President of Peking University.

DESIGN OF COLLEGIATE BUILDING.

Peking University.

Organized in Peking, China,	October 11, 1888.
Incorporated in New York, U. S. A.,	June 25, 1890.
First Class graduated,	June 7, 1892.

“Men of remarkable ingenuity and extraordinary talents, such as astronomers, geographers, mathematicians, scientists, and manufacturers—those who have been examined, their capabilities tested and verified, not persons who are merely given to empty task—are to be recommended to us.”

EMPEROR KUANG HSÜ.

Peking Gazette, July 5, 1895.

University Calendar,

1896 = 97.

1896.

Feb. 6—Thursday,	Close of First Semester.
Feb. 24—Monday,	Opening of Second Semester.
May 25—Monday,	Examinations begin.
May 30—Saturday,	Annual Meeting of Board of Managers.
June 2—Tuesday,	Commencement.

Sept. 7—Monday,	Entrance Examinations.
Sept. 8—Tuesday,	College Year begins.
Dec. 25—Friday,	Christmas.

1897.

Jan. 1—Friday,	New Year.
Jan. 18—Monday,	Examinations begin.
Jan. 22—Friday,	Close of First Semester.
Feb. 2—Tuesday,	Chinese New Year.
Feb. 9—Tuesday,	Opening of Second Semester.
May 29—Saturday,	Annual Meeting of Board of Managers.
June 1—Tuesday,	Commencement.

Board of Trustees

IN NEW YORK, U. S. A.

President—BISHOP E. G. ANDREWS, D.D., LL.D.

Vice-President—REV. J. M. BUCKLEY, D.D., LL.D.

Secretary—REV. S. L. BALDWIN, D.D.

Treasurer—CHARLES H. TAFT, Esq., 78 William street, New York City, N. Y.

Finance Committee—JAMES H. TAFT, HENRY C. M. INGRAHAM, S. L. BALDWIN.

TERM EXPIRES IN 1896.

JAMES H. TAFT, Vice-President American Bible Society, Vice-President Methodist Episcopal Missionary Society, 78 William street, New York City.

MERCEIN THOMAS, Architect, Phoenix building, 16 Court street, Brooklyn, N. Y.

CHARLES H. TAFT, Merchant, 78 William street, New York City.

TERM EXPIRES IN 1897.

LEWIS S. PILCHER, M.D., Professor Clinical Surgery New York Poly-clinic, Editor "Annals of Surgery," Senior Surgeon Methodist General Hospital, 145 Gates avenue, Brooklyn, N. Y.

HENRY C. M. INGRAHAM, Attorney-at-law, Phoenix building, 16 Court street, Brooklyn, N. Y.

STEPHEN L. BALDWIN, D.D., Recording Secretary Methodist Episcopal Missionary Society, 150 Fifth avenue, New York City.

TERM EXPIRES IN 1898.

EDWARD G. ANDREWS, D.D., LL.D., Bishop of the Methodist Episcopal Church, corner Fifth avenue and 20th street, New York City.

JAMES M. BUCKLEY, D.D., LL.D., Editor *Christian Advocate*, corner Fifth avenue and 20th street, New York City.

JOHN M. REID, D.D., LL.D., Honorary Secretary Methodist Episcopal Missionary Society, 150 Fifth avenue, New York City.

Board of Managers

IN CHINA.

President (ex officio)—H. H. LOWRY, D D.

Vice-Presidents—HON. CHARLES DENBY, REV. JOHN WHERRY,
D.D., REV. GEORGE OWEN.

Secretary—HON. CHARLES DENBY, JR.

Treasurer—MARCUS L. TAFT, D.D.

TERM EXPIRES IN 1896.

HON. CHARLES DENBY, United States Envoy Extraordinary and Minister Plenipotentiary, Peking.

HENRY BLODGET, D.D., American Board Mission, Peking.

JOHN WHERRY, D.D., American Presbyterian Mission, Peking.

H. H. LOWRY, D.D., Superintendent Methodist Episcopal Mission, Peking.

JOSEPH EDKINS, D.D., Imperial Maritime Customs, Shanghai.

REV. GEORGE R. DAVIS, Methodist Episcopal Mission, Tientsin.

WILLIAM N. PETHICK, Esq., Private Secretary to Viceroy Li Hung Chang, Peking.

REV. FREDERICK BROWN, Methodist Episcopal Mission, Tientsin.

TERM EXPIRES IN 1897.

J. N. JORDAN, Esq., Chinese Secretary British Legation, Peking.

W. A. P. MARTIN, D.D., LL.D., President Imperial T'ung Wên College, Peking.

REV. S. EVANS MEECH, London Mission, Peking.

MARCUS L. TAFT, D.D., Methodist Episcopal Mission, Peking.

REV. TIMOTHY RICHARD, Secretary.

REV. JOHN INNOCENT, Methodist New Connexion Mission, Tientsin.

REV. GILBERT REID, Missionary to the High Classes, Peking.

N. S. HOPKINS, M.D., Methodist Episcopal Mission, Tsun-hua.

TERM EXPIRES IN 1898.

SIR ROBERT HART, Bart., G.C.M.G., Inspector-General of Chinese Imperial Maritime Customs, Peking.

HON. CHARLES DENBY, JR., Secretary United States Legation, Peking.

REV. W. S. AMENT, American Board Mission, Peking.

REV. GEORGE OWEN, London Mission, Peking.

WILLIAM H. CURTISS, M.D., Methodist Episcopal Mission, Peking.

REV. J. R. HYKES, Agent American Bible Society, Shanghai.

E. COUSINS, Esq., Merchant, Jardine, Matheson & Co., Tientsin.

REV. J. H. PYKE, Methodist Episcopal Mission, Tientsin.

EXECUTIVE COMMITTEE.

M. L. TAFT.

W. S. AMENT.

G. R. DAVIS.

S. E. MEECH.

FREDERICK BROWN.

N. S. HOPKINS.

FINANCE COMMITTEE.

W. S. AMENT.

COMMITTEE ON GROUNDS AND BUILDINGS.

M. L. TAFT.

CHARLES DENBY, JR.

GEORGE OWEN.

JOHN WHERRY.

COMMITTEE ON LIBRARY AND MUSEUM.

J. N. JORDAN.

GEORGE OWEN.

JOHN WHERRY.

N. S. HOPKINS.

OFFICIAL VISITORS.

Appointed by the North China Conference of the Methodist Episcopal Church.

College of Liberal Arts—REV. W. F. WALKER, REV. CH'EN TA-YUNG.

Tientsin Intermediate School—REV. J. H. PYKE, REV. CHOU HSUEH-SHENG.

Tsun-hua Intermediate School—REV. W. T. HOBART, REV. SHANG CH'ING-YUN.

Lan Chou Intermediate School—REV. FREDERICK BROWN, REV. TE JUI.

T'ai An Intermediate School—REV. LI SHAO-WEN, Liu Chi-lun.

Members of the Faculties.

BISHOP C. C. McCABE, D.D.,
Chancellor.

H. H. LOWRY, D.D.,
President, and Professor of Astronomy and Practical Theology.

MARCUS L. TAFT, D.D.,
Dean of Wiley College of Theology and Professor of Historical Theology.

FRANK D. GAMEWELL, A.M.,
Professor of Chemistry and Physics.

HATTIE E. DAVIS,
Instructor in English. (Absent in United States.)

ISAAC T. HEADLAND, A.M., S.T.B.,
Professor of Mental and Moral Science and Exegetical Theology.

W. H. CURTISS, M.D.,
Professor of Physiology and Practice of Medicine.

EDWARD K. LOWRY, A.B.,
Director of Industrial Department.

HARRY E. KING, B.L., B.Pd.,
Professor of History.

MRS. EDNA HASKINS KING, A.B., B.Pd.,
Professor of English Language and Literature.

ALICE TERRELL,
Professor of Mathematics.

TS'AO YUNG-KUEI, M.D.,
Professor of Materia Medica, Gynecology and Obstetrics.

GEORGE D. N. LOWRY, A.M., M.D.,
Professor of Anatomy, Pathology and Histology.

ROBERT COLTMAN, JR., M.D.,
Dean of College of Medicine and Professor of Surgery.

N. S. HOPKINS, M.D.,
Lecturer on Eye and Ear.

LU WAN T'IEN (Government Graduate),
Lecturer in Chinese Classics.

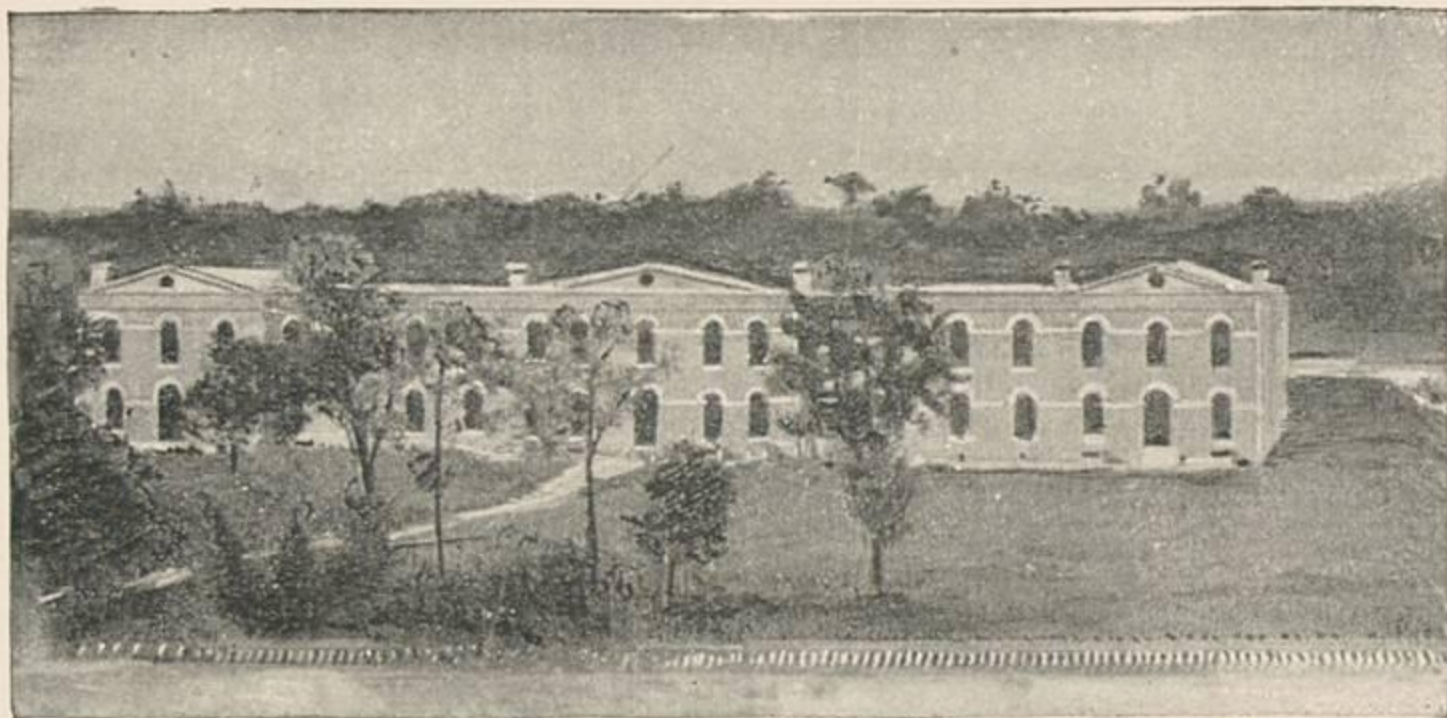

CHU PAO SHEN (Graduate of Presbyterian College, Teng Chou Fu),
Assistant Professor of Chemistry and Physics and
Instructor in Mathematics.

CHANG CHEN TE, A.B.,
Instructor in Chinese Classics in Preparatory Department.

CH'IN LUNG CHANG, A.B.,
Principal of Peking Intermediate School.

MA CHIA CH'I (Government Graduate),
Instructor in Chinese Classics.

ISAAC T. HEADLAND, A.M., S.T.B.,
Register, Librarian, and Curator of Museum.

DURBIN HALL, PEKING UNIVERSITY.

General Statement.

INCORPORATION AND BOARD OF TRUSTEES.

The PEKING UNIVERSITY, located in the City of Peking, China, was granted a certificate of incorporation on June 25, 1890, by the Legislature of the State of New York, in the United States of America, and is under the general control of a Board of Trustees residing in and near the City of New York.

The particular business of the Trustees is to raise funds for such educational institutions as may be comprised in the University; to make from time to time such investments and reinvestments thereof as may seem to be most judicious, and to collect and receive the income thereof, and to apply the same and such portions of the principal fund as may be deemed necessary or expedient for the highest interests of the several departments.

LOCAL MANAGEMENT.

The local management of the affairs of the University is entrusted to a Board of Managers, not exceeding twenty-four in number, elected from among residents in China, of whom at least one-fourth must reside in Peking and vicinity.

OBJECT.

The object of the University is "the establishment and maintenance of colleges or other educational institutions, which shall be founded and conducted upon strictly Christian and evangelical but not sectarian principles, and to aid the youth of the Chinese Empire and other countries in obtaining a literary, scientific, and professional education."

ORGANIZATION.

The University comprises the following departments: College of Liberal Arts, Wiley College of Theology, College

of Medicine, Preparatory School (with intermediate and primary departments), and the Industrial School.

DEGREES.

The degree of Bachelor of Arts is conferred on those who complete one of the prescribed courses in the College of Liberal Arts. The degree of Doctor of Medicine is conferred on those who complete the course prescribed by the College of Medicine.

RELIGIOUS INSTRUCTION.

The right of every man to exercise perfect freedom of conscience is recognized in all the religious instruction of the University. The teaching is practical but not sectarian. The aim is always the symmetrical development of the spiritual together with the intellectual and physical nature of the pupil.

The students are required to attend the daily morning chapel exercises. Evening prayers are conducted by the several departments in their respective assembly rooms. Other religious services consist of Sabbath morning preaching and afternoon Bible classes, also Thursday evening prayer-meetings. The College students hold a Sunday evening prayer-meeting, conducted by one of their own number, under the direction of the College, and such as hold membership in the church attend class-meeting services every Sabbath morning.

All of the New Testament and much of the Old are included in the course of study prescribed for the pupils of the Primary and Preparatory Schools, and weekly lectures on Scripture Exegesis are delivered before the students of the College classes, who also take Christian Evidences and Moral Science in the regular course.

ADVANTAGES FOR OUR CHRISTIAN GRADUATES IN CHINESE OFFICIAL SERVICE.

Nearly all Chinese officials are required to perform idolatrous worship, such as worshiping the tablet of Confucius in a temple, or they are dismissed from office. Our graduates may enter the Imperial Chinese Customs, and also the medical staff of Viceroy Li Hung Chang's army and navy, where they are exempted from all such heathen obligations.

EFFECTS OF THE LATE CHINO-JAPANESE WAR UPON
THE LITERATI.

Since the opening of the first semester of the year 1895-96, a grandson of the private tutor of the previous Emperor, TUNG CHIH; a nephew of the private tutor of the present Emperor, KUANG HSÜ; a son of HU I-FEN, the present Imperial Railway Commissioner, and fourteen literati, have matriculated in Peking University.

These choice graduates of China's hitherto haughty and hostile literary class represent not only the three regular grades of Chinese official students, HSIU TS'AI, CHÜ JEN, and CHIN SHIH, but also that acme of Chinese scholarship, the HANLIN, "the Forest of Pencils," a kind of Imperial Academy, whose scholars are examined by the Emperor in person.

Before the war no one would even have dreamed that the hand of God would send these brainy sons of "the land of Sinim" to a Christian institution to acquire Western learning. The urgently needed Collegiate building, for which the architect's plans were ready more than five years ago, ought to have been built before this, so as now to properly provide for this providential coming of these promising, influential "wise men of the East."

PREMISES.

During the winter of 1891-92 extensive premises formerly belonging to the Italian Legation, admirably located inside the walled city of Peking, were purchased. Other desirable adjacent property was afterwards bought, so that to-day the University owns a fine site, comprising about thirteen acres. Through the liberality of friends—native and foreign—living in the capital, the campus has been tastefully adorned with more than a hundred trees and shrubs.

In the acquisition of property for our educational work, three pieces of temple property have already been secured. One former temple has been transformed into a dining hall; another has been razed to the ground, while part of the buildings of a third has been demolished and part has served as a charity school for boys. A fourth unsightly temple property (Buddhistic) still remains, cutting off the southwest corner of the campus. This can probably be obtained for \$4,000, and should be purchased as soon as possible.

BUILDINGS.

Besides the Chinese buildings, employed temporarily as dining halls, industrial schools, and various other outbuildings, a fine dormitory, Durbin Hall—the first of a series of University buildings—was erected and occupied in 1892. It is substantially built of brick, is two stories high, with basement, and has a frontage of two hundred and eight feet. It has called forth the commendation of nearly all who have examined it, Bishop Mallalieu pronouncing it “the best built and most satisfactory edifice in all educational work in China.”

LIBRARY AND READING ROOM.

The library of the University contains over one thousand volumes in English, Chinese, and other languages, besides a considerable collection of unbound pamphlets. Some of these have been acquired by purchase, but the greater number are the gifts of friends of the institution. The catalogue comprises a good selection of standard historical works, both in English and Chinese, an unusually large collection of works treating of China, not a few popular scientific works, a goodly number of theological books, and others on miscellaneous topics in general literature.

There has been an addition of nearly four hundred volumes to the library during the past year. For a large part of this addition we are again indebted to the Rev. C. O. Kepler. Besides a large number of volumes of current literature, we have had many books of reference, including the *Encyclopædia Britannica*, reports from the Smithsonian Institute, the Department of Ethnology, the Weather Bureau and Geodetic Survey, of Washington, D. C., U. S. A., and the various publications of the Chinese Imperial Maritime Customs. The practical use made of the papers and periodicals in the library has been manifest in the information on current topics displayed in the essays and orations of the students in their literary societies. We are heartily in favor of giving our students a knowledge of what is going on in the world, hoping thus to awaken in themselves more intense feelings of patriotism.

The library of the Peking Y. M. C. A. is also kept in the same building, and is accessible to all readers.

The library of the Medical Department is kept in a room adjoining the hospital, and contains a well-selected assortment of standard works on subjects relating to the science of medicine.

SCIENTIFIC COLLECTIONS.

The geological collection contains a series of rocks, igneous and aqueous, selected for practical study, including a number of fine fossils gathered in America, as well as from Western and Northern China and from Mongolia.

The mineralogical cabinet contains a good assortment of ores from the Je-ho silver mines, and of copper from other parts of Mongolia; also a large assortment of copper ore from Lake Superior, a variety of iron ores from two hemispheres, and many other kinds of ores in smaller quantities. For lack of space in the museum, many of these specimens are put out of sight in cabinet drawers, but are always accessible for purposes of illustration during class-work.

There is also the nucleus of a collection in conchology, gathered from the China coast, a fine assortment of mussels and univalves from the United States, and a good collection of corals from Singapore. A beginning has been made in the departments of ethnology, zoology and botany, but much remains to be done in these lines to render the collection valuable to the student.

THE MUSEUM.

Our museum has been presented by the Smithsonian Institute at Washington, D. C., U. S. A., with a choice collection of valuable specimens of one hundred and twenty rocks and ores, one hundred and sixty-nine minerals, and thirty-three casts of prehistoric implements, all properly labeled. For all these gifts we are profoundly grateful.

It may be of interest to mention that a stone axe, similar in shape and construction to those found in North America, was found six feet below the surface of the ground in Tsunhua and presented to the University by the Rev. W. T. Hobart. The following are the dimensions of the axe: Length, $5\frac{1}{2}$ inches; breadth, $2\frac{1}{2}$ inches; thickness, $1\frac{3}{4}$ inches; weight, $17\frac{1}{2}$ ounces.

The museum has also been moved into temporary quarters in Durbin Hall.

LABORATORY OF CHEMISTRY AND PHYSICS.

The College is provided with a considerable amount of apparatus and other appliances for the study of general chemistry. These comprise the usual reagents, test tubes, blowpipes, crucibles, retorts, evaporating dishes, and iron, porcelain and glass mortars; also special apparatus for the preparation of oxygen and hydrogen on a large scale.

In the Department of Physics the apparatus is sufficient to illustrate all the principles treated of in ordinary textbooks. The laboratory contains special appliances for illustrating motion, force, and properties of matter and principles of hydrostatics; two air pumps—one by Griffin, of London, with attachments; two compound microscopes—one of high magnifying power, with microtome and various attachments for mounting specimens, manufactured by R. & J. Beck, of London; an acoustic telephone; a Bell telephone, with Blake's transmitter; a large biunial stereopticon, lighted with oxyhydrogen jets, with microscopic attachments for illustrating live objects, and an asphingescopic attachment for reflecting opaque objects, manufactured by Stewart, of London; the Edison improved phonograph; Crookes' radiometer; apparatus for electro-metallurgy; batteries—Groves, Bunsen, Smees, bichromate of potash, Leclanché, gravity, and dry; galvanometers; Ruhmkorff's induction coils; telegraph instruments, including key, sounder, relay, receiver and automatic winder, adapted for showing the complete operation of telegraph lines; a plate electrical machine, by Griffin, of London; a Toepler-Holtz machine, with attachments; a Wimshurst induction electrical machine, manufactured by the scientific department of Peking University; Geissler or Aurora tubes, etc.

Additions to the above are being constantly made. During the past year an electric plant, valued at over \$3,500 in gold, provided with a dynamo made by the Eastern Electric Co., of Brooklyn, N. Y., which dynamo has a capacity of 25 kilowatts and 475 sixteen-candle-power lamps, has been added to this department.

The University also owns a very fine stereopticon and several hundred views, illustrative of travel, anatomy, physiology, astronomy, microscopy, etc.

SOCIETIES.

The Peking University Epworth League has held on its course, and, besides many other works, has maintained three "Workers' Bible Classes," holding weekly meetings.

Three literary and debating societies meet every week during the college year. Members of the Faculty are present at every meeting of these societies, but the membership and management is limited to the students themselves.

United literary exercises are held about the middle of each semester. At such times guests are invited, and, aside from the usual programme, a college newspaper is read.

During the past year there has been a marked improvement in debate and literary composition. This is especially manifest in habits acquired of condensation and self-control.

PUBLIC LITERARY ENTERTAINMENTS.

At the close of the first semester, a public literary entertainment is given by the undergraduates in Asbury Chapel. On these occasions the music is often provided by the students themselves, one of their number accompanying on the piano or organ. The orations of the graduating class constitute the prominent feature of the commencement exercises, held in June.

PRIZES.

Four regular prizes are awarded each year for superiority in scholarship, viz. :

1. SIR ROBERT HART PRIZE—Awarded to that member of the Senior Collegiate class passing the best examination in Political Economy. The annual interest on a fund of 100 taels, donated by Sir Robert Hart, Bart., G.C.M.G., Inspector-General of the Imperial Chinese Maritime Customs, forms said prize.

2. CHAPLAIN McCABE PRIZE—Awarded to that member of the Senior Preparatory class passing the best examination in English, being the interest on 70 taels.

3. LAMBUTH PRIZE—Awarded to that member of the Senior Preparatory class who passes best in an exposition of the Chinese classics. It consists of the interest upon a fund of 70 taels, contributed by friends of Rev. Walter R. Lambuth, M.D.

4. SIA SEK-ONG PRIZE — Awarded to that member of the first Intermediate class who passes the best examination in the recitation of the Chinese classics. It is named in honor of that worthy delegate from Chinese Methodism to the General Conference held in New York, U. S. A., in 1888. It consists of the interest upon 70 taels, contributed by Chinese friends of the University.

Besides those mentioned above, special prizes are occasionally given. One of \$10 has been given twice by Prof. S. M. Russell, of the Imperial T'ung-Wen College, to the students who have passed the best examinations in Loomis' Trigonometry in English. Another prize, extending through three years, has been offered for excellence in geography, and still others for excellence in athletic sports.

In every instance the competition has been very close, and several times it has been necessary to divide the prize among two and even three contestants. The distribution of prizes takes place in the presence of large congregations at the close of the semi-annual literary entertainments.

EXPENSES.

For pupils electing certain studies and living without the University grounds, there is a charge of \$10 per month, payable in advance.

Good board for native students can be procured for about 1½ to 2 taels a month, when a number of students club together.

Special rates are given to students who pursue the regular course of study and agree to remain until the course is completed, or until, in the judgment of the Faculty, they can remain no longer to advantage.

Facilities for bathing and washing are also provided, but each student furnishes his own clothes and bedding and does his own washing.

Many of the students in the Collegiate Department find employment a part of each day as teachers, copyists or servants, and are thus able to meet many of the expenses incident to school life, and some have earned sufficient in this way to cover the cost of board and tuition also.

Worthy students of insufficient means may receive assistance from the Scholarship Funds.

Professorships and Scholarships.

LEANDER W. PILCHER, D.D.,
First President of Peking University.

THE PILCHER PROFESSORSHIP.

The amount now raised for the Pilcher Professorship is \$3,500 in gold, and a prominent minister in the United States makes a liberal contribution, and desires others to unite with him to complete the endowment. We hope for the speedy and entire success of this effort. Thirty dollars in United States currency pays for one share.

The Pilcher Professorship was started in honor of the late L. W. Pilcher, D.D., the first President of Peking University, in the firm belief that the endowment of Professorships is essential to the proper establishment of successful university work. It is hoped that in course of time all the professors and instructors—foreign and native—will be supported by sufficient endowments securely invested. A list of desired endowments may be seen by referring to the inside of front cover of this Calendar.

SCHOLARSHIPS.

The Missionary Society of the Methodist Episcopal Church has from year to year granted liberal appropriations for the educational work of the Mission; and the Educational Society of the same Church is willing, under certain conditions, to

aid students who expect to enter the Christian ministry ; but the list of worthy candidates is in excess of the number for whom assistance from these sources can reasonably be asked.

A system of Scholarships—*Perpetual* and *Annual*—has therefore been established. The names of Scholarships are assigned by their donors. They are used to assist worthy pupils in obtaining an education such as would otherwise be beyond their means.

I.—PERPETUAL SCHOLARSHIPS.

The following Perpetual Scholarships at 420 taels are completed :

1. “*Summerfield Scholarship*” — Contributed by the Summerfield Methodist Episcopal Church, Brooklyn, N. Y.

2. “*Josephine Memorial Scholarship*” — Contributed by a gentleman of the Presbyterian Church in the United States, in memory of his deceased wife.

3. “*Lowry Scholarship*” — Contributed by Dr. Walter R. Lambuth and other friends in China.

4. “*Joseph Edkins Scholarship*” — Named after the distinguished sinologue and author, who contributed the first \$50 to the fund, and who has always been a staunch friend of the institution.

5. “*Bishop Goodsell Scholarship*,” started in honor of this genial Bishop during his visit to North China, is still incomplete, but we hope for its completion soon, so that it may yearly provide some worthy student with a sound Christian education.

II.—ANNUAL SCHOLARSHIPS.

Thirty dollars is sufficient to cover the board and tuition of one student for a year. Annual contributions of \$30 each are being made by the following friends :

Wyoming Seminary (two), Kingston, Pa., U. S. A.

Capt. James E. Pilcher, M.D., United States Army.

Mrs. Bishop Warren, Denver, Colo., U. S. A.

Mr. Iliff, Denver, Colo., U. S. A.

Dr. Dumm, Columbus, Ohio, U. S. A.

Rev. W. T. Hobart, M. E. Mission, Peking.

M. E. Sabbath School, Marblehead, Mass., U. S. A.

Epworth League, Union M. E. Church, St. Louis, Mo., U. S. A.

Dr. M. Ed. Headland, Butler, Pa., U. S. A.

Mrs. Cornelia A. Miller, Joliet, Ill., U. S. A.

William H. Curtiss, M.D., M. E. Mission, Peking.

Rev. W. F. Walker, D.D., M. E. Mission, Tientsin.

Rev. W. H. Rees, London Mission, Hsiao-chang.

Mrs. Jesse Durbin, Denver, Colo., U. S. A.

Mr. C. S. Addis, Hongkong and Shanghai Bank, Shanghai.

Miss Mansfield Thorborn, Leith, Scotland.

Rev. Frederick Brown, M. E. Mission, Tientsin.

Rev. George B. Crews, M.D., Denver, Colo., U. S. A.

Rev. W. R. Chase, Gambier, Ohio, U. S. A.

Miss Hattie E. Davis, M. E. Mission, Peking.

Mrs. Dilley, Rochester, N. Y., U. S. A.

Miss Ella J. Douglas, Bath, Me., U. S. A.

Mr. John Sankey, Mifflinsburg, Pa., U. S. A.

Chinese Sunday School, North Congregational Church, Haverhill, Mass., U. S. A.

Mr. S. W. Dickson, Berwick, Pa., U. S. A.

College Avenue Church, Greencastle, Ind., U. S. A.

Miss Clara L. Bullard, West Medway, Mass., U. S. A.

Miss Anna Johnson, Oak Park, Ill., U. S. A.

Mr. Wang Shen, Tientsin.

Mr. Wang Hsiang Ho, Tangshan.

Dr. Ts'ao Yung Kuei, Peking.

Christian Endeavor, Broadway M. E. Church, Indianapolis, Ind., U. S. A.

Miss Alice Terrell, Peking.

Miss Myrtin M. Haskins, Battle Creek, Mich., U. S. A.

Miss Carrie A. Haskins, Battle Creek, Mich., U. S. A.

Mr. Gabriel Hoyt, Brooklyn, N. Y., U. S. A.

And a dozen other Scholarships, composed of the joint contributions of many friends in the United States.

Besides the above, a bequest of \$200 from the Rev. James Mills has been received, to be applied toward the education of two young men for the ministry, and a "Reuben Robinson Memorial Fund" has been begun by the Rev. O. W. Willits, of Detroit, Mich., U. S. A.

The wide geographical range indicated by these addresses is an index of the interest in the University and in the Christian education of the youth of China cherished by an ever-increasing circle of friends.

College of Liberal Arts.

FACULTY.

H. H. LOWRY, D.D., *President*, Professor of Astronomy.

FRANK D. GAMEWELL, A.M., Professor of Chemistry and Physics.

ISAAC T. HEADLAND, A.M., S.T.B., Professor of Mental and Moral Philosophy.

H. E. KING, B.L., B.Pd., Professor of History.

MRS. EDNA H. KING, A. B., B. Pd., Professor of English Language and Literature.

ALICE TERRELL, Professor of Mathematics.

CHU PAO SHEN, Assistant Professor of Chemistry and Physics, and Instructor in Mathematics.

LU WAN T' IEN, Lecturer in Chinese Classics.

In the class of '92 there were five graduates. All of them could speak English, and as a consequence had positions as interpreters and clerks open to them. One of them accepted a position in the Chinese Imperial Customs at a salary of about \$15 in gold per month, with \$20 for the second year and \$25 for the third. But from that salary he at once began the support of another student in college.

All the others have entered the work of the Church, although some of them could have had the same kind of a position, and although in the Church their salary is not more than one-third of the other, without any prospect of a rapid rise.

GENERAL STATEMENT.

The College of Liberal Arts offers two courses of study, each requiring four years' work—an English course and a Chinese course.

The Preparatory Department meets the requirements for admission to the Freshman class in the College of Liberal Arts.

ENGLISH COURSE.—Five years of preparation in English is necessary for admission to this course. It is also desired that the student shall have completed the study of the Chinese classics. For such as have not done so, instruction is given in selected portions of the Li-chi, the Tso-chuan, and the I-ching, together with weekly exercises in Wen-chang. Higher mathematics, chemistry, physics, natural history, politics, and philosophy are taught in English, except in special cases where, in the judgment of the Faculty, it may seem best to use the vernacular as the medium of instruction.

CHINESE COURSE.—In this course all the instruction is in Chinese. Special attention is given to the exposition of the classics and to practice in literary composition. Chemistry, physics, geology, botany, astronomy, etc., are taught by means of elementary text-books prepared in Chinese; also history, philosophy, political economy, and international law.

SPECIAL COURSES.—Students who do not desire to complete either of the above courses may receive instruction in such studies as they may select, provided they prove themselves, upon examination, qualified to pursue them with advantage. It should, however, be understood that this provision is intended for the benefit, not of those students who are incompetent to take one of the regular courses, but of those who have already obtained a preliminary education so thorough as to enable them to pursue with advantage extended courses of study in particular departments. Such special students will be expected to attend all exercises assigned them, and will be subject to all the general rules of the College.

COURSES OF STUDY.

ENGLISH COURSE.

FRESHMAN YEAR—FIRST SEMESTER.

Classics—Shu-ching, Books I. and II. explained.

Natural Science—Geology.

Mathematics—Trigonometry.

History—Sheffield's Universal History, Books II. and III.

English—Rhetoric and Composition, with Select Readings.

SECOND SEMESTER.

Classics—Shu-ching, Book III. explained.

Natural Science—Botany.

Mathematics—Surveying and Navigation.

History—Sheffield's Universal History, Books IV. and V.

English—Rhetoric and Composition, with Select Readings.

SOPHOMORE YEAR—FIRST SEMESTER.

Required Work:

Classics—Shu-ching, Book IV. explained.

Natural Science—Physics; Motion and Force; Hydrostatics; Pneumatics and Acoustics; Laboratory Practice.

History of China.

English—History of English Literature; Select Readings from prominent authors; Composition.

Elective Studies:*

Mathematics—Analytical Geometry, or Higher Algebra.

History—Political and Constitutional History of England.

SECOND SEMESTER.

Required Work:

Classics—Li-chi, Books I. and II. explained.

Natural Science—Physics; Optics, Heat and Electricity; Laboratory Practice, with special attention to electrical measurements.

*During the Sophomore, Junior and Senior years the students must take, in addition to the "Required Work," one of the subjects offered under "Elective Studies." One hour per week in the study of the English Bible will be required through the entire College course.

History of China.

English—History of English Literature; Select Readings from prominent authors; Composition.

Elective Studies:

Mathematics—Analytical Geometry, or Higher Algebra.

History—Political and Constitutional History of England.

JUNIOR YEAR—FIRST SEMESTER.

Required Work:

Classics—Li-chi, Books III. and IV. explained.

Natural Science—Inorganic Chemistry; Laboratory Practice.

English—American Literature; Select Readings from prominent authors.

Elective Studies:

Mathematics—Calculus.

Natural Science—Physical Laboratory Practice.

History—Political and Constitutional History of the United States.

SECOND SEMESTER.

Required Work:

Classics—I-ching explained.

Natural Science—Organic Chemistry; Laboratory Practice.

English—American Literature; Select Readings from prominent authors.

Elective Studies:

Mathematics—Calculus.

Natural Science—Physical Laboratory Practice.

History—Political and Constitutional History of the United States.

SENIOR YEAR—FIRST SEMESTER.

Required Work:

Mental Philosophy.

Natural Science—Astronomy.

Christian Evidences.

Elective Studies:

Natural Science—Chemical Laboratory Practice.

Political Economy.

English—Study of English Masterpieces.

History—History of Europe during the Middle Ages and the Period of the Reformation—Text-books and lectures.

SECOND SEMESTER.

Required Work:

Moral Philosophy.
Natural Science—Astronomy.
Christian Evidences.

Elective Studies:

Natural Science—Chemical Laboratory Practice.
International Law.
English—Study of English Masterpieces.
History—History of Europe since the Seventeenth Century—Text-books, lectures, and collateral reading.

CHINESE COURSE.

This course, with the following exceptions, is identical with the English course:

1. Original Composition in Chinese takes the place of the English offered in the English course.
2. History, offered as elective in the English course, will not be given in the Chinese course.

Preparatory Department.

The Preparatory Department occupies the large school building belonging to the Missionary Society of the Methodist Episcopal Church. The main building contains two large assembly rooms furnished with foreign desks, used respectively by the Preparatory and Intermediate schools.

It is the purpose of this department to fit students for entrance in the College of Liberal Arts. Having entered the school, each pupil comes under the direct influence of the resident teachers. Regular hours for study, sleep and play are strictly kept. Permits to leave the grounds are rarely given, and then only for special reasons.

The Preparatory Department offers two courses of study, each requiring three years' work—an English course and a Chinese course.

Students applying for admission to this department must be at least sixteen years of age.

ENGLISH COURSE.—Entrance to the English course requires students to have passed the following studies :

Chinese—Three Character Classic ; Thousand Character Essay ; Hundred Surnames ; Great Learning ; Doctrine of Mean ; Analects ; Mencius ; Kao tzu ; Book of Poetry ; Book of History ; Li-chi ; with the writing of characters, poetry, literary essays, etc.

Christian Catechism—Life of Christ ; Stories from Old Testament ; Acts of the Apostles.

Mathematics—Mental Arithmetic ; Written Arithmetic (three years).

Geography—Pilcher's Elementary Geography ; Chopin's Geography.

Physiology—Gamewell's.

English—Drill in Phonics ; Harper's First and Second Readers, with supplementary reading ; Tenney's English Lessons completed ; Conversation and Composition ; Penmanship (two years' work).

CHINESE COURSE.—Candidates for admission to the Freshman class in the Chinese course will be examined in the same studies as those wishing to enter the English course, with the exception that the Odes and the Shu-ching will be required in full as a substitute for the study of English. More, also, will be required in Ku-wen, T'ang-shih, Shih-wen, etc. Examinations are held at the close of each semester of the college year, and none but such students as receive seventy-five marks out of a possible one hundred are allowed to advance with the class. If, however, the student fails in one study only, he may be permitted to continue in his class, provided he shall pass an examination in that study at the beginning of the following year.

The satisfactory completion of one of these courses entitles the student to entrance into the Freshman class of the College of Liberal Arts.

COURSES OF STUDY.

ENGLISH COURSE.

JUNIOR YEAR—FIRST SEMESTER.

Classics—Li-chi, Book III. repeated; Analects, Part I. explained; Poetry.

English—Third Reader; Composition; Elementary Grammar; Penmanship.

Mathematics—Algebra.

Scriptures—Genesis and Exodus (once a week).

Wen Chang.

SECOND SEMESTER.

Classics—Li-chi, Book IV.; Analects, Part II. explained; Poetry.

English—Third Reader completed, with supplementary reading; Composition; Elementary Grammar; Penmanship.

Mathematics—Algebra.

Scriptures—Gospels (once a week).

Wen Chang.

MIDDLE YEAR—FIRST SEMESTER.

Classics—Tso-chuan; Mencius, Part I. explained; Poetry.

English—Fourth Reader (five hours per week); Composition, Grammar, and Penmanship (five hours per week).

Scriptures—Joshua and Judges (once a week).

Wen Chang.

SECOND SEMESTER.

Classics—Tso-chuan; Mencius, Part II. explained; Poetry.

English—Fourth Reader completed, with supplementary reading (five hours per week); Composition, Grammar, and Penmanship (five hours per week).

Scriptures—Acts and Hebrews (once a week).

Wen Chang.

SENIOR YEAR—FIRST SEMESTER.

Classics—Tso-chuan explained; Kao tzu; Poetry.

English—Higher Grammar and Composition.

Mathematics—Plane Geometry.

Physical Geography.

Scriptures—Samuel and Kings (once a week).

Wen Chang.

SECOND SEMESTER.

Classics — Tso-chuan explained; Poetry.

English — Higher Grammar completed; Composition.

Mathematics — Solid Geometry.

History — Sheffield's Universal History, Book I.

Scriptures — Epistles (once a week).

Wen Chang.

Intermediate Schools.

Schools of intermediate grade are established in Peking, Tientsin, Tsun-hua, and T'ai-an (in Shantung), as feeders to the Preparatory Department of the University. These in turn are fed by promotion from primary schools established in various country towns and villages adjacent to these four centers.

Entrance to the intermediate schools is conditioned on the pupil being not less than twelve years of age, and on his having first completed, in a satisfactory manner, the Church Catechism and the Gospel of Matthew, also the Chinese Trimerical Classic, the Hundred Surnames, and the first volume of the Analects. The course of study covers four years, and is designed to prepare the pupil for entrance to the Preparatory Department of the College; but students planning to pursue their studies no farther are still able to acquire a good business knowledge of their own language, mental and elementary arithmetic, the outlines of geography, and the complete story of the Gospels, together with most of the Old Testament narratives.

A Kindergarten is under the supervision of Miss H. E. Davis, and promises to be a valuable agency to both our educational and evangelistic work.

Industrial School.

The object of this school is to give opportunity to learn a useful trade to worthy students who cannot take the regular literary course. It is divided into the three departments of (1) cabinet-making, (2) machine shop, and (3) printing-press, each in charge of a competent foreman.

The cabinet shop was the first established, and is now self-supporting. The receipts for the past year were 925.74 taels, and the expenditures 789.40 taels, leaving a balance of profit of 136.34 taels, besides the material on hand. Four students have completed their apprenticeship and are now occupying good positions in their trade. Six are still under instruction, and several applications have been made for students to enter at the Chinese New Year.

There are only two apprentices in the machine shop, and it is necessary to employ two additional workmen. The foreman will hereafter have to give much of his time to work in connection with the electric plant recently received.

The printing-press is greatly hindered in its work and usefulness for want of enlarged premises and an additional press, as well as a font of English type. Several profitable jobs had to be declined because of the great amount of work already on hand and the limited capacity of our press. We are now printing an edition of the late Dr. Pilcher's translation of Steele's Astronomy, for which there is a large demand. It will require some months to complete this work.

The usefulness of the press to both the educational and evangelistic work cannot be too highly estimated. With a gift of \$5,000 we could greatly increase the power of this agency for good.

Wiley College of Theology.

FACULTY.

H. H. LOWRY, D.D., *President*, and Professor of Practical Theology.

MARCUS L. TAFT, D.D., *Dean*, and Professor of Systematic Historical Theology.

ISAAC T. HEADLAND, M.A., S.T.D., Professor of Exegetical Theology.

COURSES OF STUDY.

The purpose of this department is to give an opportunity for candidates to prepare themselves for the Christian ministry. For such there will be offered the option of two courses of study—the English and the Vernacular.

1. The ENGLISH COURSE will be open to graduates of colleges, for whom it is especially arranged. The instruction in this course, though a part may be in Chinese, will for the most part be given in English.

2. The VERNACULAR COURSE is designed for students who have had no training in English. The candidates for admission must be able to pass a satisfactory examination in the following studies: Harmony of the Gospels and the Acts; General Introduction to the Epistles and Revelation; the Old Testament Narratives; General Introduction to the Psalms and Prophetical Books; Chinese Classics—the Four Books and Odes, with Commentary; Arithmetic, Political and Physical Geography; Universal History, Physiology, Elementary Physics, Chemistry, and Astronomy.

The classes in the College of Liberal Arts are open to students preparing to pursue this course. They also will have the privileges of the general library for reference and collateral reading.

ADMISSION OF STUDENTS.

A candidate belonging to the Methodist Episcopal Church must present a local preacher's license or a properly certified recommendation from his Quarterly Conference, certifying that he is regarded as a proper person to study for the Christian ministry. The form of recommendation authorized by the General Conference of the Methodist Episcopal Church is as follows :

" We, the members of the Quarterly Conference of.....
 hereby express our judgment that
 is called of God to the work of the
 ministry, and we recommend him to the care and instruction of the
 Wiley College of Theology of the Peking University."

Applicants from other churches will need to bring such certificates as are usually given by the denominations to which they belong.

 COURSE OF STUDY.

The course of study, as outlined below, will be subject to variations as time and circumstances may require.

JUNIOR YEAR.

Exegetical — The Pentateuch and the Four Gospels.

Historical — Bible History; Introduction to the Scriptures.

Systematic — Theology Proper; Theological Encyclopædia and Methodology; Evidences of Christianity; Canon of Scriptures; Buddhism, especially Chinese Buddhism.

Practical — Evangelistic Work, with Biographical Sketches.

MIDDLE YEAR.

Exegetical — Historical Books of the Old Testament; Acts and Romans.

Historical — Church History, from Apostolic Times to the Reformation; Christianity in its Beginnings and Conflict with Heathenism.

Systematic — Christology and Anthropology (Life of Christ); Taoism.

Practical — Homiletics; Pastor and his Office; Public Worship; Sermonizing; Sunday-schools.

SENIOR YEAR.

Exegetical — Poetical and Prophetical Books of the Old Testament and I. Corinthians to Revelation.

Historical — Church History, from the Reformation (1517) to the present time.

Systematic — Soteriology and Eschatology (Office of the Holy Spirit); Apologetics (continued); Confucianism.

Practical — Discipline of the Methodist Episcopal Church; Lectures on Missions (self-support), on Organized Resistance to the Opium Habit and Intemperance, and on Revivals.

Throughout the course there will be exercises in elocution and vocal music.

Special classes, when desired, may be formed for the study of Greek and Hebrew.

Each student will be expected to preach at least once a week to heathen audiences, and occasionally to Christian congregations.

College of Medicine.

FACULTY.

H. H. LOWRY, A.M., D.D., *President.*

ROBERT COLTMAN, JR., M.D., *Dean*, and Professor of Surgery.

W. H. CURTISS, M.D., Professor of Physiology and Practice of Medicine.

G. D. N. LOWRY, A.M., M.D., Professor of Anatomy, Pathology and Histology.

T'SAO YUNG KUEI, M.D., Professor of Materia Medica, Gynecology and Obstetrics.

N. S. HOPKINS, M.D., Lecturer on Eye and Ear.

F. D. GAMEWELL, A.M., Professor of Chemistry and Physics.

Those interested in the welfare of this department feel that at last it is on a sound footing. With a faculty of five in the field giving regular instruction, and others to draw from as lecturers, good work can be and is being accomplished.

The work in the medical school has thus far been carried on in English. Some who had studied with us when English was a medium, but left before completing the course, are filling good places as hospital assistants. One graduate is a member of the present faculty.

During the past year an announcement was made that the instruction would hereafter be conducted in Chinese. The result of this announcement was a class of nine students.

In so far as good text-books have been prepared, they are used. Where text-books are wanting, the instruction is given in lectures.

The students are expected to attend the clinics of the dispensary, and assist in operations and in nursing the sick in the hospital, as an assistance in their instruction.

Although dissection is impossible in China, this is partly counterbalanced by the possession of a good skeleton and a fine manikin, a recent gift from a friend in the United States, and other artificial apparatus.

REQUIREMENTS FOR ADMISSION.

The requirements for admission to this department is the ability to explain the "Four Books" of the Chinese Classics, and to write the character.

FEEES.

The following fees are required in the medical course :

First year,	\$50.00 Mexican.
Second year,	40.00 "
Third year,	30.00 "

Candidates for the degree of Doctor of Medicine must have a good moral character and pass satisfactory examinations in the course of study.

DEMAND FOR CHRISTIAN PRACTITIONERS.

The success of medical missions as an evangelizing agency is everywhere conceded. The Christian practitioner has penetrated every province of this vast empire, and reached all classes by his skill in relieving suffering. He has opened doors otherwise closed to the influence of Christian activity, and has been directly instrumental in the salvation of many precious souls. The demands of the work and the signs of the times both indicate the benefit and necessity of the foreign physician associating with himself a strong corps of Christian native assistants, thoroughly trained in Western medical science. The importance of this work is especially manifest in view of the fact that of all the professions none stands higher in the esteem of the Chinese nor commands a wider influence than does that of medicine.

Of course, all who graduate will not go into mission service, but rather go out among their own people, to spread abroad the truths of sanitation and health, something they stand so sadly in need of, and to overcome many errors and superstitions and to relieve suffering based on these errors and superstitions. Therefore, while not missionaries, they can be a great help to their people.

COURSE OF STUDY.

FIRST YEAR.

Anatomy — Osteology, Ligaments.

Materia Medica and Pharmacy.

Chemistry — Inorganic.

Physiology.

Clinical Medicine.

Clinical Surgery.

SECOND YEAR.

Anatomy — Muscular and Arterial System.

Materia Medica.

Chemistry — Organic and Toxicology.

Physiology and Legal Medicine.

Clinical Medicine and Practice.

Clinical Surgery and Practice.

THIRD YEAR.

Anatomy — Nervous, Lymphatic, and Venous Systems.

Urinalysis.

Obstetrics and Gynecology.

Practice of Medicine and Clinical Medicine.

Practice of Surgery and Clinical Surgery.

Microscopy.

List of Graduates.

CLASS OF 1892.

- Ch'en Heng-te, A.B., Minister in M. E. Church, Peking.
Ch'in Lung-chang, A.B., Principal of Intermediate School,
Peking.
Liu Ma K'e, A.B., Minister in M. E. Church, Peking, South-
ern City.
Ts'ui Wan Fu, A. B., Minister in M. E. Church, P'ing-an
Ch'eng Tzu.
Wang Shen, A.B., Chinese Imperial Customs, Tientsin.
-

CLASS OF 1893.

- Li Te-jen, A.B., Teacher of Intermediate School, Tientsin.
-

CLASS OF 1894.

- Chang Chen Te, A. B., Professor in Peking University,
Peking.
Sung Shih-min, A.B., Chinese Imperial Railroad, T'ang Shan.
-

CLASS OF 1895.

- Ch'en Wei-ping, A.B., Minister in M. E. Church, Yen Ch'ing
Chou.
Lo Ch'i Ming, A.B., Chinese Imperial Customs, Tientsin.
Yang Ch'ang-fa, A.B., Minister in M. E. Church, Mi Yun
Hsien.
