A CATALOGUE OF NORTH AMERICAN DIPTERA

BY J. M. ALDRICH.

INTRODUCTION.

The present work is based upon Osten Sacken's Catalogue of North America Diptera, second edition, published in 1878.* All the references of that work are embodied in this, with only such changes as later studies seem to require.

Still, the great amount of work which has been done on North American Diptera within the quarter of a century has largely changed the face of the subject. Hence the reader will probably observe, especially at first, more of contrast than resemblance. The number of species has doubled; the number of references to previously known species has almost doubled; several families have been monographed or revised, with more or less change of nomenclature; along with this has gone the publication of a multitude of smaller papers, touching every family but one, and the larger part of the genera. Under these conditions it is inevitable that great changes should appear in the new catalogue. It is the more necessary that I should acknowledge my obligation, which is far greater than appears on the surface.

Faunal limits.—These, as in the former catalogue, include all of North America, in the widest sense, taking in Panama on the South and Greenland and the Aleutian Islands on the North. The West Indies are included, even down to Trinidad, adjoining Venezuela. There is no place to draw a line between the islands. The Bermudas and the Hawaiian Islands are not included.

Scope.—To give the most information consistent with the limits of space has been the object. All references to a species, if in any way descriptive or useful, have been inserted if found. The only known exceptions are in those species like the Hessian fly and house-fly, where the references are so numerous that a selection of the more important articles is necessary. Another exception is uniformly made of articles in non-scientific journals; these are only mentioned when of importance in tracing the history of a species.

* Smithsonian Miscellaneous Collections, Vol. xvi.

Articles on biology and anatomy have been especially sought for. However it may be in other orders, the vast economic importance of the Diptera will not allow us to study the cabinet specimen only.

In economic literature some of the minor references have been omitted, where no new facts appeared to be brought out. Every one knows that a considerable part of economic literature is of this class,—and it is properly so, being prepared for a public who do not read entomological journals. The omitted articles are generally very brief ones, and strictly “popular” in form.

There are some European writings on the biology of species occurring both in Europe and North America, which are not included. It was not deemed feasible to enter in detail into the European literature.

Method.—In form I have followed Osten Sacken quite closely. Few explanations will be needed. It is to be understood that the species is described with more or less fullness under each reference, unless an explanation is given indicating something else (as “oc.” for occurrence; “syn.” for synonymy; “notes,” etc.). Still, I am aware that there are some cases where I failed to note the limitation.

The locality is given with each reference. This is of importance in two ways. First, in furnishing the type locality, as closely as given by the describer; second, in case a certain reference proves to have been due to an erroneous identification, it enables the reader to deduct that one and leave the rest unaffected. Every entomologist who acquires any familiarity with the literature of a group comes to trust some writers much more fully than others. It is only by separating the localities in the bibliography that these allowances can be made, without looking up all the literature.

Synonymy and nomenclature.—Those synonyms which had been made out by Osten Sacken I have accepted *in toto*. More recently, a considerable number have been made out by the examination of types of Walker, Bigot, and others. These appear to be well-founded. In addition to these, a large number have been made out from descriptions, nearly every dipterist of the country having contributed something in this direction. I have generally quoted these, although we may expect that some will ultimately prove erroneous. In a few cases I have expressed doubt, or an adverse opinion. The authority for synonymy is generally given in brackets, unless expressed in the context.

In the selection of names, priority is accepted as the first test; it may, however, be overshadowed by uncertainty as to the application of the older name. I have found comparatively few cases of specific names that were hard to decide, but among genera there are many which may be argued about as well one way as the other. I began with the intention of being very conservative; but I have been drawn

along, inch by inch, until I am aware of having adopted most of the changes which I at first opposed. In this I have been influenced by the feeling that my catalogue must represent the actual condition of the classification, not merely my own views. Within a family or two, I would insist on the latter; otherwise it has seemed best to concede something to the opinions of others, only interposing a check when some too revolutionary change is attempted (as in altering the name of *Rhamphomyia*). I am far from believing that the changes of generic names now becoming common are in the interest of, or will attain, subsequent permanence. Such a hope is illusive. There will always be loop-holes which will allow further change. We are as near to permanence now as we ever shall be.

System.—The sequence of families is substantially that of Osten Sacken's later papers, influenced in minor points by Coquillett. Brauer's system, although finding some favor in Europe at present, appears less expressive of the relations. An abstract of the classification will be found at the end of the introduction.

Acknowledgments.—First of all, I am indebted to Baron Osten Sacken for his catalogue, the basis of my work. It is the best designed, most accurate, most informing work of the kind that I have ever seen, on any large order or group of animals. Hence it has been a great advantage to me to have such a guide to follow. While I do not claim any such command of the subject as was possessed by Osten Sacken, I am sure that my work has been benefited by the influence of his. I also acknowledge the receipt of frequent encouraging and inspiring letters from him during the progress of my work. He is not, however, responsible for any of the details of my classification.

To Professor S. W. Williston I am deeply indebted. His encouragement first induced me to undertake the preparation of this Catalogue. He gave me many unpublished notes, and looked over the manuscript of the *Asilidæ*. His published bibliographies I found indispensable. In this connection I will add that his disinterested labors in the cause during a long series of years, amid the arduous and exacting duties of his more immediate specialties, call for our admiration and our gratitude. These labors, considering also his success in adapting his writings to the needs of beginners in the science, entitle him to rank with Osten Sacken as one of the founders of North American dipterology.

Mr. D. W. Coquillett several times furnished me with information on obscure references, always responding promptly and courteously with just what I wanted.

Dr. L. O. Howard gave me a number of practical suggestions which influenced the form of my work somewhat; he also assisted me very materially in getting it printed, and was, as usual, continually giving me unexpected but gratefully appreciated lifts.

Professor J. H. Comstock extended courtesies when I was visiting Cornell. In his department I examined a considerable collection of Diptera determined by Osten Sacken and Williston, also some interesting literature. In the Cornell University library I found "Silliman's Journal."

Mr. Samuel Henshaw assisted me very kindly when I examined some families in the Loew-Osten Sacken collection at Harvard University.

Dr. Garry de N. Hough gave me some unpublished notes, and a large number of Diptera.

Mr. O. A. Johannsen, of Cornell University, revised the classification of the Chironomidæ for me, greatly improving my work on that family.

Mr. Hugo Kahl gave me unpublished notes of his own; he also gave me minute directions about some points to look up in the Loew-Osten Sacken collection, the outcome of which gave me a very high opinion of Mr. Kahl's acuteness in systematic work, and revealed some peculiar errors of Loew in describing two or three species.

To W. D. Hunter, C. W. Johnson, C. T. Brues, and Professors V. L. Kellogg and C. V. Piper, I am indebted for references to literature.

Mr. A. L. Melander gave me great assistance in the Empididæ. I have followed his advice quite uniformly in regard to nomenclature and synonymy in that family.

I have availed myself of Dr. Coloman Kertész's great work, "Catalogus Dipteriorum," of which two volumes have reached me, only to the extent of adopting the generic distribution of the Cecidomyidæ, and of picking up one species—*Culex penafielii* Will.—which I had not found before. My work was almost completed when the first volume of Kertész came out.

To all the gentlemen named, I extend my sincere thanks.

The catalogue closes January 1, 1904.

J. M. ALDRICH.

UNIVERSITY OF IDAHO,
January 27, 1904.

SYSTEM OF CLASSIFICATION ADOPTED.

Suborder PROBOSCIDEA.

Section ORTHORHAPHA.

Division *Nemocera*.

Superfamily 1.—*Nemocera Vera*:—Tipulidæ, Dixidæ, Psychodidæ, Chironomidæ, Culicidæ, Mycetophilidæ, Cecidomyidæ.

Superfamily 2.—*Nemocera Anomala*:—Bibionidæ, Simuliidæ, Blepharoceridæ, Rhyphidæ, Orphnephilidæ.

Division *Brachycera*.

Superfamily 3.—*Eremochæta*:—Stratiomyidæ, Tabanidæ, Acanthomeridæ, Leptidæ (inclusive of Xylophagidæ and Coenomyidæ).

Superfamily 4.—*Tromoptera*:—Nemestrinidæ, Cyrtidæ, Bombyliidæ, Therevidæ, Scenopinidæ.

Superfamily 5.—*Mydaidæ*:—Mydaidæ.

Superfamily 6.—*Energopoda*:—Apioceridæ, Asilidæ, Dolichopodidæ, Empididæ, Lonchopteridæ, Phoridæ.

Section CYCLORHAPHA.

Division *Athericera*.—Platypezidæ, Pipunculidæ, Syrphidæ, Conopidæ.

Division *Calyptrata*.—Estridæ, Tachinidæ, Dexiidæ, Sarcophagidæ, Muscidæ, Anthomyidæ.

Division *Acalyptrata*.—Scatophagidæ, Heteroneuridæ, Helomyzidæ, Borboridæ, Phycodromidæ, Sciomyzidæ, Sapromyzidæ, Lonchæidæ, Ortalidæ, Rhopalomeridæ, Trypetidæ, Micropezidæ, Sepsidæ, Psilidæ, Diopsidæ, Ephydridæ, Oscinidæ, Drosophilidæ, Geomyzidæ, Agromyzidæ.

Suborder EPROBOSCIDEA.

Hippoboscidæ, Nycteribiidæ.

BIBLIOGRAPHY.

Adams, C. F.

Dipterological Contributions. Kans. Univ. Sci. Bull., II, 21-47; June, 1903.
Contains 37 new species from North America, and 7 from S. Africa; also some tables of genera.

Six new species of Diptera from Kansas, appended to Snow's List. Kans. Univ. Sci. Bull., II, 221-223; Nov., 1903.

Aldrich, J. M.

A New Genus and Species of Tabanidæ. Psyche, VI, 236, figs.; March, 1892.
Goniops hippoboscoides, n. gen. and sp. (syn. of *chrysocoma* O. S.).

New Species of Phora. Canadian Entomologist, XXIV, 142-146, figs.; June, 1892.

Phora cimbicis, *luggeri*, *minuta*, and *setacea*; table of species.

Revision of the Genera Dolichopus and Hygroceleuthus. Kansas Univ. Quart., II, 1-26, 1 pl.; July, 1893.

Twenty-two new species; table of species, etc.

New Genera and Species of Psilopinæ. Kansas Univ. Quart., II, 47-50; July, 1893.

Three genera and four species; *Leptorhethum* is the only genus of Psilopinæ which I now retain as given in this article.

The Dolichopodid Genus Liancalus Loew. Psyche, VI, 569-571; Dec., 1893.
L. hydrophilus and *similis*; table of species.

Courtship Among the Flies. American Naturalist, XXVIII, 35-37; Jan., 1894.
Habits of some species of *Dolichopus*.

New Genera and Species of Dolichopodidæ. Kansas Univ. Quart., II, 151-157; Jan., 1894.

Two new genera and five new species; notes on other described western species.

The Tipulid Genera Bittacomorpha and Pedicia. Psyche, VII, 200-202, fig.; Feb., 1895.

Bittacomorpha occidentalis, n. sp.

The Dipterous Genera Tachytrechus and Macellocerus. Trans. Amer. Ent. Soc., XXIII, 81-84; March, 1896.

Tachytrechus floridensis; *Macellocerus olympiæ* and *auratus*.

On the Diptera of St. Vincent: Dolichopodidæ and Phoridae. Trans. Ent. Soc. London, 1896, pt. 3, pp. 309-345 and 435-439.

Many new species, tables in several genera, and notes on described species.

A Collection of Diptera from Indiana Caves. 21st Annual Report of the Department of Geology and Natural Resources of Indiana, 186-190; published May 6, 1897.

Odontopoda, n. gen.; *Mycctophilus umbraticus*, *Odontopoda sayi*, *Blepharoptera latens* and *specus*, *Limosina tenebrarum*; notes on other species.

Goniops and other Synonyms. Entom. News, XI, 531; Sept., 1900.

No new species.

Biologia Centrali-Americana: Diptera, 1, Suppl., 333-366, 1 pl.; Dec., 1901.

Dolichopodidæ: 47 new species; *Sarcionus* and *Phylarchus*, n. gen.

Dolichopodidæ of Grenada, W. I. Kans. Univ. Sci. Bull., 1, 75-94, 1 pl., March, 1902.

Fourteen new species; *Xanthina*, new genus.

Aldrich, J. M., and Turley, L. A.

A Balloon-making Fly. American Naturalist, xxxiii, 809-812, figs.; 1899.

The species here discussed was afterwards described as *Empis aroboticus* by Mr. Melander.

Austen, E. E.

Descriptions of New Species of Dipterous Insects of the Family Syrphidæ in the Collection of the British Museum, with Notes on Species Described by the late Francis Walker. Part 1. Bacchini and Brachyopini. Proc. Zool. Society of London, Jan. 17, 1893, pp. 132-164, 2 col. pl.

Ocyptamus iris and *Baccha sagittifera*, from Jamaica; many important notes on Walker's types and other species.

On the Specimens of the Genus *Cutiterebra* and Its Allies in the Collection of the British Museum, with descriptions of a new Genus and Three new Species. Annals and Magazine of Natural History, Ser. 6, Vol. xv, 377-396, 1 pl.; May, 1895.

Cutiterebra funebris (Trinidad), *approximata* Walk. (Vancouver); *Bogeria princeps*, n. gen. and sp., Mexico; other important notes.

Further Notes on *Cutiterebra*: On the Identity of Certain Species Described by the late Bracy Clark. Annals and Magazine of Natural History, Ser. 6, Vol. xvi, 147-155; August, 1895.

C. atrox, *detrudator* and *fontinella* of Clark.

Notes on Hippoboscidæ in the Collection of the British Museum. Annals and Magazine of Natural History. Ser. vii, Vol. xii, 255-266; Aug., 1903.

Important notes on species of Wulp and Walker; no new species.

Babb, Geo. F.

Notes on *Rhagoletis suavis*, with desc. of larva and puparium. Ent. News, xiii, 242, 1 pl.; Oct., 1902.

Die Phoridae. Abhandlungen der K. K. Zool.-Botan. Gesellschaft in Wien. I, Heft. 1, pp. 1-100, 5 plates; 1901.

Note.—These recent monographs of European Diptera are admirably executed, and are especially useful to the American student for genera. A considerable number of the species are common to Europe and North America.

Bellardi, Luigi.

Saggio di Ditterologia Messicana. Two parts and supplement, with five plates. Mem. della Reale Accad. delle Scienze di Torino, Ser. 2, Vol. xix, 201-277, 2 plates, 1859; xxi, 103-199, and Appendix, 200-225, with 3 plates, 1861-62. Also published separately with a different pagination.

Apelleia, n. g.; many new species. Osten Sacken gives the pages as they occur in the separate edition, which I follow.

Bergroth, Ewald.

Note on some South African Tipulidæ. Entom. Tidskrift, ix, 1888.

Contains a note on *Holorusia rubiginosa*. I am indebted to Professor V. L. Kellogg for this reference.

Ueber einige Nordamerikanische Tipuliden. Wiener Entom. Zeitung, vii, 193-201; June, 1888.

Eight new species, with notes on several others.

The same, Part II. Pp. 239, 240; Sept., 1888.

Pachyrhina excelsior, n. sp., and several notes.

Zwei neue Dipteren. Wiener Entomol. Zeitung, viii, 295-298; Nov., 1889.

One is from New Zealand, the other is *Dialysis disparilis*, from British Columbia; there is an additional note on the latter, Vol. xi, 162.

Buetenmüller, Wm.

Essay on the Destruction of the Mosquito and the House-fly. 180 pp., 2 plates; 1890.

Cecidomyia clavula, n. sp. Bull. American Museum of Natural History, iv, 1892, 269, pl. xv, f. 5.

Gall only.

Bigot, Jacques.

Diptera of Cuba. In "Historia física, política y natural de la Isla de Cuba," by Ramon de la Sagra, Paris, 1857, Vol. vii, with one plate. "Published in French and in Spanish; the French edition is quoted in the catalogue, the Spanish has a different pagination"—O. S. Not seen.

Twenty-five new species.

Dipterorum aliquot nova genera. Revue et Magazin de Zoologie, 1859. 305-315, pl. xl.

Hystrisiphona nigra, *Cryptineura hieroglyphica*.

Leptidi. Bulletin de la Société Zoologique de France, XII, 1-22, 1887.

21 N. A. species.

Muscidi. Bulletin de la Société Zoologique de France, XII, 581-617, 1887.

16 N. A. species.

Tabanidi. Mémoires de la Société Zoologique de France, v, 602-690, 1892.

26 N. A. species.

Notes on North American Diptera, with new genera and species, published in Bulletin de la Société entomologique de France, as follows:

Year.	Pages.	Subject.
1875	clxxiv (106)	Thevenimyia californica.
1877	xxvi (38)	Carlottæmyia mcrens.
1877	lxxiii (101)	Macroceromys.
1879	l, li (64)	Merapioidus villosus.
1879	86	Parasymmictus.
1879	164, 165	Notes on Arthropeas and Glutops.
1879	231, 232	Corrections to article in Annales, 1879, 183-234.
1880	5	Megalemyia argyropasta, Acanthomera rubriventris.
1880	62, 63	Phylomydas phyllocerus, Enoplempis mira, Megacittarus argenteus.
1882	4	Syrphidæ.
1882	19-21	Corrections; Lycastirrhyncha, etc.
1882	78, 79	Eurhinomallota metallica.
1882	112	Myelaphus melas, Enoplempis cinerea.
1883	35	Proboscimyia siphonina.
1884	xxix (34, 35)	Mikimyia furcifera.
1884	42	Cholomyia inæquipes.
1884	95	Ancylogaster armatus.
1884	xcvii	Euceratomyia Will., note.
1884	cxxxvi	Merapioidus; reply to Williston, Wien. Ent. Zeit., 1884, 282.
1885	clxvi (sep. 1)	Stictomyia longicornis, Dimorphomyia calliphoroides.
1885	sep. 1-7	Rhamphinina dubia, Rhynchodexia tenuipes, Siphoniomyia melas.
1886	clxvii, clxviii	Notes on Osten Sacken's Acanthomeridæ in Biologia.
1886	sep. 1-4	Rhabdopselaphus mus.
1887	lx	On Eclimus, Epibates and Thevenimyia.
1887	cxxi-cxxiii	Notes on Williston's Synopsis N. A. Syrphidæ.
1887	clxxii-clxxiv	(180-182) Diagnoses of Muscidæ, several species.
1888	xxiv et seq.	Psilopodinus, Spatichira, etc.
1888	cvi, cvii	Corrections.
1888	clxxxiii	Notes on Archilestes; Pseudarchilestes.
1892	xxxvi-xxxviii	Notes on Williston's synonymy in Biologia.

Note.—Bigot's main work, as will be seen from the tables above, is in the form of a long series of articles in the Annales Soc. ent. France (quoted herein merely as "Annales"), interspersed chronologically with fragments in the Bulletin of the same society. Owing to Bigot's peculiar, complicated and inconsistent system of numbering his contributions, it has been almost impossible for

me to find them all, but I believe I have succeeded. I have seen no correct collation. Sometimes his Roman numerals stop and remain the same for several papers, then again the numbering in "parts" becomes stationary while the other goes on, and in two cases two papers have both the same (XXXVII, part 29, and XLII, part 34).

In the Bulletin the confusion is worse confounded. This publication appears to have been for some time regularly published in two forms, one numbered in Arabic, and the other differently paged in Roman. I am unable to decipher all the peculiarities of this, but am obliged to refer partly to one, partly to the other, and occasionally to separates, as my copies run, or as I find indications in the references of others. I possess all the papers of the Annales series, and all but two small ones of the Bulletin series; but the accumulation was the work of ten years.

The work of Bigot should not be underestimated. He had a fine collection, and his types are now the property of Mr. G. H. Verrall. It is only a question of time until they will be elucidated; in fact, this has already been done for the Calyptratae (excl. of Anthomyiidae) by Brauer, and for the Pupipara by Speiser. As the descriptions stand, it is often impossible to determine the species from them alone. It is not unlikely that some of them have been assigned to synonymy too hastily.

Biologia Centrali-Americana.

For convenience of reference, I give a complete collation of the parts of this great work.

Volume I. Cecidomyiidae to Empididae. Pp. 1-216, 3 col. pl., by C. R. Osten Sacken.

Dates—pp. 1-24, July, 1886; 25-48, Aug., 1886; 49-72, Oct., 1886; 73-104 Nov., 1886; 105-128, Dec., 1886; 129-160, Jan., 1887; 161-176, Feb., 1887; 177-208, Mar., 1887; 209-216, April, 1887.

Volume I, Supplement. Pp. 217-378, 3 col. pl.

Mycetophilidae to Asilidae, pp. 217-332, by S. W. Williston.

Dates—pp. 217-248, Dec., 1900; 249-264, April, 1901; 265-272, May, 1901; 273-296, June, 1901; 297-328, Sept., 1901; 329-332, Dec., 1901.

Dolichopodidae, pp. 333 to 366, Dec., 1901, by J. M. Aldrich.

Empididae, pp. 366-376, Dec., 1901, by W. M. Wheeler and A. L. Melander.

List of Species Recorded since 1887, not enumerated in Suppl., 377, 378; Dec., 1901.

Volume II. Oestridae to Hippoboscidae. Pp. 1-432, 12 col. pl., by F. M. Van der Wulp.

Dates—pp. 1-40, April, 1888; 41-56, Jan., 1890; 57-88, Feb., 1890; 89-112, Mar., 1890; 113-144, May, 1890; 145-176, June, 1890; 177-200, Aug., 1890; 201-208, Nov., 1890; 209-224, April, 1891; 225-248, May, 1891; 249-264, July, 1891; 265-272, Dec., 1895; 273-280, Jan., 1896; 281-288, March, 1896; 289-304, May, 1896; 305-312, June, 1896; 313-320, Oct., 1896; 321-344, Dec., 1896; 345-360, Sept., 1897; 361-368, Nov., 1897; 369-376, Dec., 1897; 377-384, Oct., 1898; 385-392, Feb., 1899; 393-408, Sept., 1899; 409-416, Dec., 1899; 417-428, Feb., 1900; 429-432, Apr., 1903.

Volume II, Supplement. Pp. 433-486, 1 col. pl. Oestridae and Tachinidae, by F. M. Van der Wulp.

Dates—pp. 433-436, April, 1903; 437-486, May, 1903.

List of Species described since 1888, not enumerated in Vol. II., pp. 486-489, May, 1903.

Volume III. Syrphidæ, Conopidæ, Pipunculidæ and Platypezidæ. Pp. 1-89, 2 col. pl. By S. W. Williston.

Dates—pp. 1-56, Dec., 1891; 57-72, Feb., 1892; 73-89, May, 1892.

List of Species described since completion of volume, pp. 89-91, Aug., 1903.

Index to vols. I-III, pp. 93-127, Aug., 1903.

The last issue for each volume includes title-page, introduction, and explanation of plates, which do not interfere with the regular pagination of the text.

Bilimek, Dominik.

Fauna der Grotte Cacahuamilpa in Mexico. Verhandl. Zool.-Bot. Ges., 1867, p. 901.

Pholeomyia leucozona, n. g. and sp.

Bosc D'Antic, Louis A. G.

Ceroplatus carbonarius, from Carolina, described in Dictionnaire d'Histoire Naturelle, Paris, 1802-04, pub. by Détéville et Roret; the same is in Nouveau Dict. D'Hist. Nat., Paris, 1816-19.

Brauer, Friedrich,

Monographie der Oestriden. Wien, 1863, 292 pp., with 10 plates.

This classic monograph contains descriptions of all the Oestridæ at that time known from North America. Only one is new, *Cuterebra scutellaris*. Beschreibung neuer und ungenügend bekannter Phryganiden und Oestriden. Verhandlungen der Zool.-Bot. Ges. zu Wien, 1875, 75.

Hypoderma bonassi, on the American bison.

Die Zweiflügler des Kaiserlichen Museums zu Wien. In the Denkschriften der Mathematisch-Naturwissenschaftlichen Classe der Kaiserlichen Akademie der Wissenschaften.

I. In Band XLII, 1880.

1. Die Kaiserliche, Winthem'sche, Wiedmann'sche und Egger'sche Sammlung. Pp. 105-107.
2. Bemerkungen zur Systematik der Dipteren. Pp. 108-118.
3. Die Europäischen Arten der Gattung *Tabanus* L. s. str., etc. Pp. 119-210, six plates.

II. In Band XLIV, 1882.

1. Versuch einer Charakteristik der Gattung der Notacanthen (Ltr.), mit Rücksicht auf die . . . von J. R. Schiner aufgestellten neuen Gattungen. Pp. 59-89.
2. Vergleichende Untersuchungen der Flügelgeädern der Dipteren-Familien nach Adolph's Theorie. Pp. 90-97, two plates.
3. Charakteristik der mit *Scenopinus* verwandten Dipteren-Familien und Gattungen. Pp. 98-110.

III. In Band XLVII, 1883.

1. Systematische Studien auf Grundlage der Dipteren-Larven nebst einer Zusammenstellung von Beispielen aus der Literatur über dieselben und Beschreibung neuer Formen. Pp. 1-100, five plates.

The number on *Notacantha* contains *Cynipimorpha bilimeki* n. g. et sp. and *Myxosargus fasciatus* n. sp., from Mexico. The last number, on the dipterous larvæ, is a great work. The numbers on classification represent extensive research, and the system of Brauer seems to be widely accepted in Europe at present; but I agree with Osten Sacken that classification is not the field in which Brauer has done his best work.

See continuation of the series by Brauer and von Bergenstam

Systematische-zoologische Studien. Sitzungsberichte d. Kaiserl. Akad. d. Wissenschaften, xci, 237-414, 1 plate; 1885.

Asilus mydas and *Calobata ichneumonea*, n. sp. from Mexico.

Beiträge zur Kenntniss der Muscaria schizometopa. Sitzungsbericht. d. Kaiserl. Akad. der Wiss., Math.-Naturwiss. Classe, in three parts:

I. Band cvI, 329-382; July, 1897.

II. Band cvII, 493-546; June, 1898.

III. Band cvIII, 495-529; June, 1899.

These articles give a report on the types of Bigot's species in the families of the Calyptratae, except Anthomyiidae. Nearly all of Bigot's species in this group are elucidated. There are a few notes also on types of Macquart and Desvoidy.

Brauer, Friedrich, and Bergenstam, J. Edlen von.

Die Zweiflügler des Kaiserlichen Museums zu Wien. Denkschriften d. Kaiserl. Akademie der Wissenschaften, Math.-Naturwiss. Classe. There are seven numbers of this series, of which the first three are by Brauer alone, noticed above. The last four constitute the following series:

Vorarbeiten zu einer Monographie der Muscaria schizometopa (exclusiv Anthomyiidae).

IV. Band lvi, pp. 69-180, 11 plates; 1889.

V. Band lviii, pp. 305-446; 1891.

VI. Band lx, pp. 89-240; 1893.

VII. Band lxi, pp. 537-624; 1894.

Many new genera of Tachinidae, Muscidae, Dexiidae and Sarcophagidae. A few North American species. As I have indicated at the beginning of the catalogue of Tachinidae, this work is defective in its conception, in that the characters used for generic definition are often of less than specific value. Nevertheless it is indispensable to the student of these families. It is referred to as "Zweifl. d. Kaiserl. Mus."

Brodie, Wm.

Canadian Galls and their Occupants. Biological Review of Ontario, i, 1894:

I. Pp. 13-15. *Diplosis erigeroni*.

II. Pp. 44-46. *Diplosis helianthi*.

III. Pp. 73-75. *Diplosis thurstoni* and *helianthi-bulla* Walsh.

IV. Pp. 109-111. *Diplosis monardae*.

Brown, Barnum.

Two new Species of Asilids from New Mexico. Kans. Univ. Quarterly, vi, 103, 1897.

Burgess, Edward.

Description of *Oscinis trifolii* and malvæ, in Report Comr. of Agriculture for 1879, 201, 202.

These are referred to *Agromyza trifolii* and *jucunda* by Coquillett.

Two Interesting American Diptera. *Proc. Boston Soc. Nat. Hist.*, xix, 320-324, 1 plate; Feb. 27, 1878.

Glutops (n. g.) *singularis* and *Epibates osten-sackenii*, n. sp.

Cannon, W. A.

The Gall of the Monterey Pine. *American Naturalist*, xxv, Oct., 1900, 801-810, figs.

A botanical study of the gall of *Cecidomyia pini-radiatæ*.

Chagnon, G.

Études Préliminaires sur les Syrphides de la Province de Quebec. Chicotini, Quebec, 1901, 75 pp. Originally published in parts in "Le Naturaliste Canadien," 1901; I quote the separate edition.

No new species.

List of Canadian Diptera. *The Entomological Student*, Philadelphia. Vol. II, 5-8 and 13-15.

Mostly from Montreal and vicinity; no new species.

Chittenden, F. H.

Some Insects Injurious to the Violet, Rose, and other Ornamental Plants. *Bull.*, 27, n. ser., Division of Entomology, U. S. Department of Agriculture; 114 pp., figs.; 1901.

Life history of *Diplosis violicola* and *Sciara inconstans*.

Some Insects Injurious to Vegetable Crops. *Bulletin* 33, new series, Division of Entomology, Dept. of Agriculture, 1902. 117 pp., many figs.

Life history of *Psila rosæ*, *Scaptomysa (Drosophila) flavcola*, *adusta* and *graminum*, and *Phorbia fusciceps*.

A Brief Account of the Principal Insect enemies of the Sugar Beet. *Bull.* 43, Division of Entomology, 1903, 71 pp.

Contains life history of *Pegomyia vicina* and *Phorbia fusciceps*.

Clark, Bracy.

Observations on the Genus *Oestrus*. *Transactions of the Linnæan Society*, III, 1797.

Oestrus cuniculi, n. sp., from Ga.

An Essay on the Bots of Horses and other Animals. London, 1815. with two plates.

Cuterebra horripilum and *Cephenomyia phobifer* from N. A.

Addenda to Essay on Bots, 1848, with 1 plate.

Cuterebra atrox, from Mexico.

Of the Insect called Oistros by the Ancients, etc. Trans. Linn. Soc., xv, 402, 1826.

Cuterebra fontinella, from Ill.

Note.—Austen has published notes on some of Clark's species; see his papers.

Cockerell, T. D. A.

Notes on some Species of Gall-Gnats. The Entomologist, London, 1890, 278.

Cecidomyia alticola and *frater*.

Trypeta bigeloviae n. sp. Entomologist's Monthly Magazine, December, 1890, 224.

A Cecid bred from Coccidæ. The Entomologist, London, 1892, 280.

Diplosis coccidarum, from Jamaica.

Cecidomyia atriplicis n. sp. American Naturalist, 1895, 766.

New Species of Insects taken on a Trip from the Mesilla Valley to the Sacramento Mts., N. M. Jour. N. Y. Ent. Soc., vi, 201-207, 1898.

Asphondylia neomexicana n. sp.; occurrence of some Diptera, p. 205, footnote.

Diplosis atriplicicola; *Lasioptera willistonii*, *ephedrae*, and *tertia*; *Asphondylia prosopis*. Annals and Mag. Nat. Hist., 1898, 321-331.

Diplosis partheniicola n. sp. The Entomologist, London, July, 1900, 201.

Asphondylia mentzeliae n. sp. The Entomologist, London; Nov., 1900, 302.

A New Cecidomyiid on *Gutierrezia*. Canadian Entomologist, xxxiii, 23; Jan., 1901.

Asphondylia gutierrezia, New Mexico.

Some Gall-Insects. Canadian Entomologist, xxxiv, 183, 184, 1902.

Lasioptera carbonitens and *ephedricola*, from New Mexico.

Some Insects of the Hudsonian Zone in New Mexico. Psyche, 1902, 346, 347.

No new Diptera.

Comstock, John H.

Report upon Cotton Insects. Department of Agriculture for 1879.

Phora aletiae n. sp. (syn. of *nigriceps*), pp. 209-211. The same abridged in the Report of the Department of Agriculture for 1879, with the addition of *Tachina fraterna* n. sp. (syn. of *Frontina aletiae*), p. 303.

Report of the Department of Agriculture for 1879, pp. 245, 266, 271.

Contains note on *Diastata* sp. mining leaves of corn; *Diplosis catalpa* n. sp., "The Catalpa Pod Diplosis"; and a bibliography of parasitic Cecidomyiidae.

Report on Miscellaneous Insects, in the Report of the Comr. of Agriculture for 1881 and 1882 (pub. Jan., 1893), 135-154.

Life history of *Trypeta (Rhagoletis) pomonella*, *Drosophila ampelophila* and *amana*, and *Sciara (Cecidomyia) ocellaris* O. S.; the last doubtless an error in rearing, as the species can hardly be a *Sciara*.

Habits of *Gaurax araneæ* Coq.

Day, Loren T.

Notes on Sciomyzidæ, with Descriptions of New Species. Canadian Entomologist, xiii, 85-89; April, 1881.

Four new species.

The Species of *Odontomyia* Found in the United States. Proceedings of the Academy of Natural Sciences of Philadelphia, 1882, 74-88.

Nine new species.

DeGeer, Charles.

Mémoires pour servir à l'Histoire des Insectes. Stockholm, 1752-78. 7 vols.

Several American species are described in the 6th volume.

Robineau-Desvoidy, J. B.

Essai sur la Tribu des Culicidæ. Mémoires de la Société d'Histoire Naturelle de Paris, iii, 390-413, 1 pl. Paris, 1827.

Five new species from North America.

Essai sur les Myodaires. Mémoires des Savants étrangers de l'Académie des Sciences de Paris, vol. ii. Paris, 1830, 813 pp.

This massive work contains an original systematic arrangement of all the Calyptrate and part of the Acalyptrate Muscidæ. About eighty new North American species are described. Many of the genera, after being ignored for half a century, have of late been adopted and newly defined, especially in Tachinidæ. The work is intrinsically valuable, and for its time wonderful. The characters now used for separating the genera of Tachinidæ were mostly introduced in this volume. It is very rare and expensive.

Histoire Naturelle des Diptères des Environs de Paris. 2 vols. Paris, 1863. Vol. i, xvi and 1143 pp.; vol. ii, 920 pp.

This work was published after Desvoidy's death, and contains some defects due to imperfect editing of his materials. It is devoted almost wholly to European Tachinidæ, Dexidæ, Sarcophagidæ and Muscidæ. "Contains short descriptions of a few N. A. Diptera; no new ones."—O. S.

Note.—Osten Sacken, "Record of My Life Work in Entomology," 180-192, 1903, gives an interesting and lucid account of the two main works cited above.

Dimmock, Geo.

Anatomy of the Mouth-Parts and of the Sucking Apparatus of Some Diptera. Boston, 1881; 50 pp., 4 plates.

This is generally recognized as authoritative on the subject.

Doane, R. W.

A New Trypetid of Economic Importance. Entomological News, ix, 69-72, 1 pl.; March, 1898.

Rhagoletis ribicola.

Notes on Trypetidæ, with Descriptions of New Species. Journal of the New York Entomological Society, vii, 177-193, 2 plates; Sept., 1899.

Twenty new species; notes on many others.

Additional Notes on Trypetidæ. Journal of the New York Entomological Society, VIII, 47-48; March, 1900.

This is a defense of the preceding, Mr. Coquillett having erroneously relegated some of the species to synonymy.

New North American Tipulidæ. Journal of the New York Entomological Society, VIII, 182-198, 2 plates; Sept., 1900.

Polyangaus n. gen.; 44 new species of *brevipalpi*.

Descriptions of New Tipulidæ. Journal of the New York Entomological Society, IX, 97-127; Sept., 1901.

Fifty-four new species of *Tipula*.

Drury, Drew.

Illustrations of Natural History, wherein are exhibited upwards of two hundred and forty figures of Exotic Insects. London, 1770-82, 3 vols.

A new edition was published by Westwood in 1837, under the title, "Illustrations of Foreign Entomology."

"Eight N. American and West Indian species are figured."—O. S.

Dufour, Leon.

Révision et Monographie du Genre *Ceroplatus*. Annales des Sciences Naturelles, 2me ser., XI, 193 et seq., figs.; 1839.

Ceroplatus carbonarius, from Carolina.

Life history, remedies, etc.

Fitch, Asa.

An Essay upon the Wheat-fly and some Species Allied to it. Albany, 1845.

This is the first edition, which was published in the American Quarterly Journal of Agriculture and Science, vol. II, no. 2. It contains the descriptions of *Cecidomyia tritici* Kirby; *Cec. caliptera* n. sp.; *Cec. thoracica* n. sp.; *Cec. tergata* n. sp. A second edition appeared in 1846, in the Transactions of the N. Y. State Agricultural Society, vol. V. A new species, *Cec. cercalis*, is separated in this edition from *C. caliptera*, and full descriptions with figures of both are given.

The Hessian Fly. Albany, 1846 (second edition, 1847). With a plate.

Published originally in the American Journal of Agriculture and Science, vols. IV, V (1846). Reprinted with some additions in the Transactions of the N. Y. State Agricultural Society, vol. VI, pp. 316-376 (1846; in pamphlet form it bears the date of 1847).

Cecidomyia salicis n. sp., described in American Quarterly Journal of Agriculture and Science, vol. 1, p. 263.

Winter Insects of Eastern New York. In the American Journal of Agriculture and Science, vol. v, pp. 274-284. [Reprinted in Lintner's 2d N. Y. Rept., 235-244.]

N. sp.—*Culex hiemalis*, *Chironomus nivoriundus*, *Trichocera brumalis*.

Survey of Washington County, New York. In the 9th vol. of the Transactions of the N. Y. State Agricultural Society.

Several species occurring in that locality are mentioned in a popular way.

First and Second Report on the Noxious, Beneficial and other Insects of the State of New York. Made to the State Agricultural Society, pursuant to an appropriation for this purpose from the Legislature of the State. Albany; 1856. With 4 plates.

Before the publication of the Second Report, the first had been distributed under the title of First Report, etc.; 1855. This work contains 21 new American Diptera.

Third, fourth and fifth Reports on the Noxious, Beneficial and other Insects of the State of New York, made to the State Agricultural Society, pursuant to an annual appropriation for this purpose from the Legislature of the State. Albany; 1859. With four plates and many wood-cuts.

Cuterebra cmasculator n. sp. and several Cecidomyiæ.

Sixth, seventh, eighth and ninth Reports, etc., etc. Albany, 1865. With four plates and several wood-cuts.

Contains a new edition of the papers on *Cecid. tritici* and *destructor*.

All these reports appeared successively in the Transactions of the N. Y. State Agricultural Society, and were collected and issued afterwards as separate volumes: Volume 1, containing Reports 1 and 2; Vol. II, Reports 3-5; Vol. III, Reports 6-9. Each volume has a title-page, as given above, and a complete index of the contents. In the first and third volumes the pagination runs through the whole volume; in the second volume, a new pagination begins with every report, but at the same time, the species successively discussed are numbered and these numbers run through the whole volume. For this reason, in quoting the second volume, I had to give the number of the species referred to, while in quoting the other two volumes, I give the page.—Dr. Fitch's following Reports, which I have seen up to the 12th (1867), do not contain any new species of N. A. Diptera.

Note.—The above account of Fitch's writings is quoted bodily from Osten Sacken's Catalogue. It remains to add that the Reports were continued to 1872. Lintner, in his First N. Y. Report, 1882, pp. 291-325, gives a fuller account of the writings of Fitch. As I have copied all of Osten Sacken's references, I necessarily quote his editions, although the others were often earlier.

Trupanea apicivora (syn. *Promachus fitchii*) is inadvertently omitted above. It is described in the 9th Report.

Fletcher, James.

Reports of the Entomologist and Botanist, Central Experiment Farm, Canada Department of Agriculture.

A number of short references to the occurrence and habits of Diptera of economic importance are to be found in this series; the report for 1897 has a somewhat longer article on *Psila rosea*, "The Carrot Rust-Fly," 196-198, figs.

Recent Additions to the List of Injurious Insects of Canada. Transactions of the Royal Society of Canada, sec. series, 1899-1900; v, section IV, 209, 213, figs.

Glover, Townend.

Manuscript Notes from My Journal: or Illustrations of Insects Native and Foreign. Diptera or Two-Winged Flies. Washington, 1874, 4to, pp. iii, pl. I-XII and pl. A, pp. 120. Forty-five copies printed.

No new species: notes on the habits of some species.

Grænicher, S.

The Syrphidæ of Milwaukee Co., Wis. Bulletin of the Wisconsin Natural History Society, n. ser., 1, 3; July, 1900.

No new species (not seen).

Gray, G. R.

Diptera in E. Griffith's Animal Kingdom. London, 1824-33. 16 vols. Several N. A. species are figured in the 15th volume, 1832. "The descriptions by Gray are very incomplete."—O. S.

Grote, August R.

Description of Two New Species of North American Brachycerous Diptera. Proceedings of the Entomological Society of Philadelphia, vi, 445; 1866-67.
Sparnopolius coloradensis and *cumatilis*.

Guérin-Méneville, F. E.

"Note sur deux Insectes Parasites de la cochenille qui font un grand tort à cette culture en Amérique. (Read in the Academy of Sciences in Paris on the 13th of Nov., 1848. Conf. Guerin's Revue Zoologique, 1848, p. 350.)"—O. S.

Iconographie du Règne Animal de G. Cuvier, etc. Paris, 1829-44. The insects are in the seventh volume.

Leptis servillei, *Calobata ruficeps*, *Toxophora americana*, *Cuterebra americana* (the last may be South American).

Hagen, Hermann A.

A New Species of Simulium, with a Remarkable Nymph Case. Proceedings of the Boston Society of Natural History, xx, 305; 1879.

Simulium pictipes.

List of Anthomyidæ Examined by R. H. Meade, Esq., Bradford, England. Canadian Entomologist, xiii, 43-51; 1881.

List of Sarcophagidæ Examined by R. H. Meade, Esq., Bradford, England. Canadian Entomologist, xiii, 146-150; 1881.

The two preceding papers contain only some rather off-hand comments on the collections sent to England by Hagen; no new species.

Entomological Notes. Canadian Entomologist, xxx, 37; 1881 (*Cecidomyia* sp.).

On Simulium. Canadian Entomologist, xiii, 150, 151; 1881.

Trypeta cerasi Linné. Canadian Entomologist, xv, 159, 160; 1883.

Simulium Feeding upon Chrysalids. Ent. Monthly, Mag., xix; 1883, 254, 255.

On the Hessian Fly in Italy. Canadian Entomologist, xvii, 129-131; 1885.

Celopa frigida Fall. Canadian Entomologist, xvii, 140, note.

On *Cecidomyia liriodendri*, Canadian Entomologist, xviii, 159; 1886.

Haldeman, S. S.

Description of several new and interesting Animals. American Quarterly Journal of Agriculture and Science, vi, 193, 1847. Reprinted in the Proc. Boston Soc. Nat. Hist., January, 1859.

Cecidomyia robinia n. sp.

Harrington, W. Hague.

Occupants of the Galls of *Eurosta solidaginis* Fitch. Canadian Entomologist, xxvii, 197-198, 1895.

No new species.

Harris, Thaddeus W.

"Catalogue of the Insects of Massachusetts. In Prof. Hitchcock's Report on the Geology, Botany and Zoology of Massachusetts.

Professor Hitchcock's Report had two editions; in the first (1833), Dr. Harris mentioned only the generic names of the insects, adding the number of species belonging to each genus. In the second edition (1835), the specific names are also given; many of them are mere collection names, never having been published.

"A Treatise on some of the Insects of New England, which are injurious to Vegetation. Second edition. Boston, 1852.

The first edition of this work was published in 1841, under the title of A Report on the Insects of Massachusetts, Injurious to Vegetation. The second edition contains many additions.

"A Treatise on Some of the Insects Injurious to Vegetation. Third edition. Boston, 1862. With 8 plates and 278 wood-cuts.

Was published at the expense of the Commonwealth of Massachusetts and is provided with notes by different authors; these on the Diptera are by C. R. Osten Sacken. The quotations in the present volume are from this edition.

"Entomological Correspondence. Edited by Samuel Scudder. Boston, 1869.

Contains on pp. 335, 336, descriptions of *Musca harpyia* HARRIS (syn. *Musca domestica* L.) and *Musca familiaris* HARRIS (apparently the same as the European *Pollenia rudis*)." Quoted from O. S.

Harris, H. F.

The Eggs of *Psorophora ciliata*. Entomological News, xiv, 232, 233; 1903.

Hart, Chas. A.

On the Entomology of the Illinois River and Adjacent Waters. First Paper. Bulletin of the Illinois State Laboratory of Natural History, iv, Article vi, pp. 149-280, with 14 plates. The Diptera extend from p. 184 to p. 270, with 10 plates. Springfield, Ill., 1895.

Contains a large amount of valuable and interesting information about the aquatic dipterous larvæ, many species being described and figured. No new species.

Harvey, F. L.

The Currant Fly. Bulletin 35, Maine Experiment Station; May, 1897. 8 pp. and plate.

Epochra canadensis LOEW, habits, etc.

Report Entomologist and Botanist, in the Annual Report Maine Experiment Station, 1889, 148-256, 1 plate and 11 figs.

Full life history of *Trypeta (Rhagoletis) pomonella*.

Hausmann, J. F. L.

Entomologische Bemerkungen. Braunschweig, 1799.

Syphus trifasciatus n. sp. (syn. of *Milcsia ornata*). According to Hagen, Hausmann, who afterward became a professor in Göttingen, was only sixteen years old at the time of this publication.

Herrera, A. L.

El Gusano de la Fruta. Boletín de la Comisión de Parasitología Agrícola, I, No. 1. Mexico City, 1900.

A pamphlet of thirty pages on *Trypeta ludens*, the fruit-fly of the orange; figures and account of damage, etc.

Herrick, A.

Corethra appendiculata n. sp., in Minnesota Geol. and Nat. Hist. Survey, 1884, 10, pl. v. Larva only, and very vaguely described. (Data from Johannsen.)

Hine, J. S.

Sciara inconstans Fitch—Reared from Carnations. Entomological News, x, 201, 202, figs.; Sept., 1899.

Pangonia chrysocoma O. S. Entomological News, xi, 392; March, 1900.
Synonymy of *Goniops hippoboscoides*.

Two New Species of Tabanidæ. Canadian Entomologist, xxxii, 247; Aug., 1900.

Tabanus pruinus (afterward changed to *ohioensis*) and *thoracicus*.

Collecting Tabanidæ. Ohio Naturalist, ii, 167; Dec., 1901.

Habits of adults in several species.

Observations on Insects. Ohio Naturalist, ii, 169; Dec., 1901.

Notes on habits of *Agromyza setosa* Lw., *Bibio albipennis* and *Chrysopila ornata*.

New or Little-Known Diptera. Ohio Naturalist, ii, 228-230; March, 1902.

Pachygaster maculicornis and *Phorantha bridwelli*; notes on several other species.

The genus *Pedicia*, with one new Species. Ohio Naturalist, iii, 416, 417; April, 1903.

P. magnifica.

Some Diptera from Arizona. Canadian Entomologist, xxxv, 244-246; Sept., 1903.

Tabanus hyalinipennis, *Myiolepta aurinota*; notes on three described species.

Tabanidæ of Ohio. Ohio Academy of Sciences, Special Papers, No. 5, 1903.

Also published as University Bulletin No. 19, series 7, Ohio State University. 63 pp., 2 plates.

Chrysops brunneus and *sackeni*; all the Ohio species redescribed.

On the life history of *Tabanus vivax*. Ohio Naturalist, iv, Nov., 1903, 2 pp.

Holmgren, A. E.

Insekten fra Nordgrönland, samlade af Prof. A. E. Nordenskiöld år 1870. Kongl. Vetenskap. Förhandlingar, 1872, No. 6, pp. 97-105.

Nine new species; thirty-nine in all.

Holstein, G. W.

Notes on *Hypoderma lineata* in Texas. Entomological News, iv, 299, 300; Nov., 1893.

Hood, Lewis E.

The Leptidæ and Bombylidæ of the White Mts. Psyche, vi, 283, 284; July, 1892.

Occurrence of about twenty species, with notes; none new.

Hopkins, A. D.

Notes on the Habits of Certain Mycetophilids, with Description of *Epidapus scabiei* n. sp. Proceedings of the Entomological Society of Washington, iii, 149-159, figs.; 1895.

Forms of So-Called Potato Scab Caused by Insects. Special Bulletin 2, West Virginia Experiment Station, 97-111, 1895; many figs.

Potato scab produced by *Epidapus scabiei*.

The Hessian Fly in West Virginia. Bulletin 67, West Virginia Experiment Station, Aug., 1900; 14 pp., 2 plates and map.

Studies in the life history of *Mayetiola destructor*.

Hough, Garry deN.

Two New American Species of Cynomyia. Entomological News, ix, 105-111, figs.; May, 1898.

C. americana and *elongata*.

A Third American Species of Cynomyia. Entomological News, ix, 165, 166, figs.; Sept., 1898.

C. hirta.

The Muscidae Collected by Dr. A. Donaldson Smith in Somali Land. Proceedings of the Academy of Natural Sciences of Philadelphia, 1898, 165-167, figs.

An important discussion of chætotaxy; no new North American species.

Parasitic Influence on Melanoplus. By S. J. Hunter. Kansas University Quarterly, vii, 207-210, figs.; Oct., 1898.

Description of *Sarcophaga hunteri* n. sp., by Dr. Hough.

Some North American Genera of Calliphorinæ. Entomological News, x, 62-66; March, 1899.

Genera defined; no new species.

Some Muscinæ of North America. Biological Bulletin i, 19-33, figs.; 1899.

Muscina texana and *aurantiaca*; list of genera and species, etc.

Studies in Diptera Cyclorhapha. I. The Pipunculidæ of the United States. Proceedings of the Boston Society of Natural History, xxix, 77-86; July, 1899.

Pipunculus atlanticus, *similis* and *flavomaculata*.

Synopsis of the Calliphorinæ of the United States. Zoological Bulletin, ii, 283-290, figs.; 1899.

Chrysomyia whecleri, *Calliphora coloradensis* and *latifrons*, *Lucilia pilatei*.

South American Muscidae in the Collection of S. W. Williston. Kansas University Quarterly, ix, 203-232, 2 plates; July, 1900.

A few which occur also in Mexico and the United States are carefully redescribed.

Howard, Leland O.

Notes on a Simulium Common at Ithaca, N. Y. Insect Life, i, 99-101; Oct., 1888.

Life history; species not named, but probably *pictipes* HAGEN.

An Orthalid Fly Injuring Growing Cereals. Insect Life, vii, 352-354, figs.; March, 1895.

Chatopsis anca WIED.; life history.

The Beet-Leaf Pegomyia. Insect Life, vii, 379-381, figs.; July, 1895.

Pegomyia vicina LINTNER; life history.

Mosquitoes and Fleas. Circular No. 13, second series, Division of Entomology, Department of Agriculture; 6 pp. of general information; Feb. 1, 1896.

The Principal Household Insects of the United States. Bulletin 4, new series, Division of Entomology, Department of Agriculture, 130 pp.; 1896. By Howard and Marlatt; several articles on common household Diptera by Howard.

Further Notes on the House-fly. Bulletin No. 10, new series, Division of Entomology, Department of Agriculture, pp. 63-65; 1898.

Treatment of manure to kill the larvæ.

Notes on House-flies and Mosquitoes. Bulletin 17, new series, Division of Entomology, Department of Agriculture; pp. 55, 56; 1898.

How to distinguish the Different Mosquitoes of North America. Circular No. 40, second series, Division of Entomology, Department of Agriculture; 8 pp. The tables are by Coquillett.

Notes on the Mosquitoes of the United States. Bulletin 25, new series, Division of Entomology, Department of Agriculture, 70 pp.; 1900.

Remarks on *Psorophora ciliata*, with Notes on its Early Stages. Canadian Entomologist, xxxii, 353-357, figs.; Dec., 1900.

Life history, well illustrated.

A contribution to the Study of the Fauna of Human Excrement. Washington Academy of Sciences, II, 541-604, many illustrations; Dec. 28, 1900.

Life histories of many flies living in excrement; very valuable. Partially summarized in Bulletin 30, n. ser., Div. of Ent., 1901, 39-45.

Diptera Bred from Cow-Manure. Canadian Entomologist, xxxiii, 42-44; Feb., 1901.

A list of twenty species, none new.

Mosquitoes; how they live, how they carry Disease, etc. New York, 1901, with many illustrations.

Transformations, habits, etc.; table and list of species by Coquillett.

Hunter, W. D.

The Dipterous Enemies of Domestic Animals and Man. Nebraska State Board of Agriculture, 1895, 288-306.

Popular account; no new species.

A Contribution to the Knowledge of North American Syrphidæ. I. Canadian Entomologist, xxvii, 87-101; April, 1896.

Four new species; many little known species redescribed.

A New Species of *Tropidia*, and Note on the Generic Position of *Melanostoma rufipes* Will. Entomological News, vii, 215, 216; Sept., 1896.

T. nigricornis, changed on p. 308 to *montana*.

A Summary of the Members of the Genus *Chilosia* Meig. in North America, with Descriptions of New Species. Canadian Entomologist, xxviii, 227-233; Sept., 1896.

Ch. signatiseta, *cyanca* and *aldrichi*; table and list of species.

A Contribution to the Knowledge of North American Syrphidæ. II. Canadian Entomologist, xxix, 121-144, 1 plate; June, 1897.

Pyritis n. gen.; twelve new species.

Hunter, Samuel J.

Parasitic Influence on *Melanoplus*. Kansas University Quarterly, vii, 205-210; Oct., 1898.

Notes on *Sarcophaga cimbicis* TOWNSEND, and description by Dr. Hough of *Sarcophaga hunteri*.

Alfalfa, Grasshoppers, Bees. Bulletin of the Entomological Department of the University of Kansas, 1898; 152 pp.

The part on Diptera, pp. 32-37, is about the same as in the preceding.

Illiger, J. C. W.

Neue Insekten. Magazin für Insektenkunde, I, 206; 1802.

Midas fulvifrons n. sp., from Georgia.

Jaenicke, F.

Neue Exotische Dipteren. Abhandlungen der Senckenburgischen Gesellschaft, VI, 311-407, 2 plates; 1867. Also published separately, 100 pp., 4to, Frankfurt, 1867. The pagination of the latter is used by Osten Sacken and repeated here.

Many new exotic Diptera, of which thirty-four are from Mexico and the United States.

Johannsen, Oskar A.

Notes on Some Adirondack Diptera Collected by MacGillivray and Houghton. Entomological News, XIV, 14-17; Jan., 1903.

Sciophila pulchra n. sp.; notes on several other species.

Aquatic Nematoceros Diptera. In Bulletin 68, New York State Museum, 328-448, 19 plates; Aug., 1903.

A very valuable work, monographic in the Simuliidæ, and containing tables for determining larvæ, etc., in several families. *Pelorempis* (n. gen.) *americana*, *Corethra albipes*, *Thalassomyia obscura*, and *Dixa modesta* (the last a syn. of *D. clavula* WILL.—Ent. News, XIV, 302).

Johnson, Chas. W.

The Puparium of *Ceria signifera*. Entomological News, IV, 91; March, 1893.

List of Diptera of Jamaica, with Descriptions of New Species. Proceedings of the Academy of Natural Sciences of Philadelphia, 1894, 271-281.

About fifty species recognized; new are *Nemotelus flavicornis*, *Chrysopila jamaicensis*, *Calobata pleuritica*, and *Leptogaster longipes* (the last changed to *clavipes*, Ent. News, VIII, 120).

A Review of the Stratiomyiæ and Odontomyiæ of North America. Transactions of the American Entomological Society, XXII, 227-278, 2 plates; July, 1895.

Seven new species; the old ones are redescribed or former descriptions quoted.

Diptera of Florida. Proceedings of the Academy of Natural Sciences of Philadelphia, 1895, 303-340.

504 species recognized, six new; also several new, described by Coquillett.

Some Notes and Descriptions of New Leptidæ. Entomological News, VIII, 117-120, figs.; May, 1897.

Chrysopila griffithi, *Symphoromyia hirta*, new; other species redesc.

Notes and Descriptions of New Syrphidæ from Mt. St. Elias, Alaska. Entomological News, IX, 17, 18; Jan., 1898.

Syrphus bryantii and *Melanostoma glacialis*; notes on four others.

Catalogue of the Diptera of New Jersey. Supplement to 27th Annual Report of New Jersey State Board of Agriculture, 1899, pp. 615-699.

About 1200 species recorded from New Jersey, mostly with exact localities and many with dates; many species figured; no new ones. This was published as a part of John B. Smith's Catalogue of the Insects of New Jersey, and the occurrence of these species is cited by me as "N. J.—Smith Cat."

Notes and Descriptions of Seven New Species and One New Genus of Diptera. Entomological News, XI, 323-328; Jan., 1900.

Sepsisoma n. g.

New North American Ortalidæ. Canadian Entomologist, XXXII, 246, 247; Aug., 1900.

Pyrgota chagnoni, *Stenopterina bicolor*, *Rivellia floridana*.

Variation in the Venation of *Analopsis inconstans* O. S. Entomological News, XII, 305-307, figs.; Dec., 1901.

Remarks on *Tephronota ruficeps* and Description of a New Species. Entomological News, XIII, 143, 144, fig.; May, 1902.

Tephronota canadensis.

New North American Diptera. Canadian Entomologist, XXXIV, 240-242; Sept., 1902.

Macrocera immaculata, *Phthinia coquilletti*, *Psilocephala grandis*, and *Agromyza flaviventris*.

Some Notes, and Descriptions of Three New Leptidæ. Entomological News, XIV, 22-25, figs.; Jan., 1903.

Rhachicerus nitidus, *Xylomyia aterrima*, and *Symphoromyia cinerea*.

Diptera of Beulah, New Mexico. Transactions of the American Entomological Society XXIX, 101, 102, fig.; Feb., 1903.

Chilosia skinneri, *Cuterebra similis*, and *?Zonosema dubia*.

Two New Species of the Family Pipunculidæ. Entomological News, XIV, 107, 108; April, 1903.

Pipunculus pallipes and *Nephrocerus dacki*.

A New Genus and Four New Species of Asilidæ. Psyche, X, 111-114; June, 1903.

Ceraturgopsis n. gen.; four species of other genera.

Descriptions of Three New Diptera of the Genus Phthiria. Psyche, Oct.-Dec., 1903, 184, 185.

Ph. cyanoceps, *aldrichi* and *quinque-notata*.

Johnson, Willis G.

The Hessian Fly in Maryland. Bulletin 58, Maryland Agricultural Experiment Station, pp. 117-122, figs.; Sept., 1898. A general discussion of habits and remedies.

Kahl, Hugo I.

New Species of the Syrphid Genera *Mixogaster* Macq. and *Ceria* Fabr. Kansas University Quarterly, VI, 137-146; July, 1897.

Mixogaster breviventris and *Ceria willistoni*.

Karsch, F.

Die Spaltung der Dipteren-Gattung *Systropus* Wied. Zeitsch. d. Berliner Entomologischen Gesellschaft, 1881, 654-658.

Cephenus angulatus, *infuscatus* and *imbecillus* (I refer *Cephenus* to *Systropus*).

Keen, Eugene L.

Note on *Sphyracephala brevicornis*. Canadian Entomologist, xv, 200, 1883.

List of Syrphidæ taken in Fairmount Park, Philadelphia, in the Summer of 1884. Canadian Entomologist, xvi, 145-147, 1884.

List of Diptera taken in the Vicinity of Philadelphia, from 1882 to 1884, inclusive. Canadian Entomologist, xvii, 51-55, 1885.

Note.—I overlooked the existence of the last two papers until it was too late to use the data in my catalogue, which I very much regret.

Kellogg, Vernon L.

The Mouthparts of Nematocerous Diptera. Psyche, viii, 1899: (I) Jan., 303-306; (II) Mar., 327-330; (III) Apr., 346-348; (IV) May, 355-359; (V) June, 363-365.

Notes on *Blepharocera capitata*. Entomological News, xi, 305-318, figs.; Jan., 1900.

An Extraordinary New Maritime Fly. Biological Bulletin, i, 81-87, figs.; March, 1900.

Eretmoptera browni n. gen. and sp.

A New Blepharocerid. Psyche, ix, 39-41, figs.; April, 1900.

Liponeura doanci.

Food of Larvæ of *Simulium* and *Blepharocera*. Psyche, ix, 166; Feb., 1901.

An Aquatic Psychodid. Entomological News, xii, 46-49, figs.; Feb., 1901.

Pericoma californiensis KINCAID. (Described by Kincaid as *californica*.)

The Histoblasts (Imaginal Buds) of the Wings of the Giant Crane-Fly, *Holorusia rubiginosa*. Psyche, Sept., 1901, 248, figs.

The Development and Homologies of the Mouth-parts of Insects. American Naturalist; 1902; 683-706, figs. Discussion of homology in *Simulium* and *Bibiocephala*.

The Net-Winged Midges (Blepharoceridæ) of North America. Proceedings of the California Academy of Science, 3d series, iii, 187-224, 5 plates; Feb. 2, 1903. Also published as Contributions to Biology, xxx, Hopkins Seaside Laboratory of Leland Stanford Junior University.

A thorough revision of the family; life history of several species. New are *Blepharocera jordani* and *osten-sackeni*, and *Bibiocephala comstocki*.

The Rediscovery of *Philorus* (Blepharocera) Yosemite Osten Sacken. Psyche, Oct.-Dec., 1903, 186.

Kertész, Koloman.

Catalogus Tabanidarum Orbis Terrarum universi. A Museo Nat. Hungarico editus. Budapestini, 1900; 79 pp.

Catalogus Pipunculidarum usque ad Finem Anni 1900 Descriptarum. Természetrzaji Füzetek, xxv, 157-168; Apr. 15, 1901.

Catalogus Dipterorum hucusque Descriptorum. Museum Nationale Hungaricum. Budapestini; typis G. Wesselenyi.

Vol. I. 1902. Sciaridæ to Rhyphidæ.

Vol. II. 1902. Cecidomyiidæ to Cylindrotomidæ.

Note.—The above catalogues contain references to the North American species up to the following dates respectively: Jan. 1, 1899; Jan. 1, 1901; Jan. 1, 1900, and Jan. 1, 1901.

Kincaid, Trevor.

The Psychodidæ of Washington. Entomological News, VIII, 143-146; June, 1897.

Psychoda pacifica, elegans, olympia.

Psychodidæ of the Pacific Coast. Entomological News, X, 30-37, 1 plate; Feb., 1899.

Ten new species; table of genera.

Notes on American Psychodidæ. Entomological News, XII, 193-196, 1 plate; Sept., 1901.

Pericoma ocellaris var. *americana*, and *P. californica*.

Kirby, William.

Fauna Boreali-Americana; or the Zoology of the Northern Parts of British North America, by J. Richardson, assisted by W. Swainson and Will. Kirby. London; 1829-37; 4 vols. The fourth volume contains the Diptera, which are by Kirby, nine in number. The descriptions are reprinted in Canadian Entomologist, XIII, 164-169, 1881.

Kirkpatrick, J.

The Army Worm. Ohio Agricultural Report for 1861.

Exorista leucania and *osten sackenii*, parasites of the army worm; both are supposed to be synonyms of *Winthemia quadripustulata*.

Kowarz, Ferdinand.

Phytomyza chrysanthemi, in Lintner's 7th New York Report, 243; 1891.

Lamarck, J. B.

Histoire Naturelle des Animaux sans Vertèbres, etc., 1ere ed.; 7 vols. Paris, 1815-22. Also 2ieme ed. Ibid., 1835-45.

"The insects form the third volume of the first, and the fourth of the second edition. I have quoted the first edition. Some typical forms only of American insects are mentioned in this work, and no new species described."—O. S.

Latreille, P. A.

Histoire Naturelle, générale et particulière des Crustacés et des Insectes; 14 vols. Paris, 1802-04. (Diptera in vols. III and XIV; 1802 and 1804.)

Genera Crustaceorum et Insectorum, etc.; 4 vols. Paris; 1806-7-9.

Both of these works "contain the mention or description of some typical forms from North America, but no new species." They are also important for genera.

Leach, W. E.

On the Genera and Species of Eproboscideous Insects. In the Wernerian Transaction, II, Edinburgh, 1817.

Olfersia americana and *Ornithomyia erythrocephala* from N. A.

LeBaron, William.

Second Annual Report on the Noxious Insects of the State of Illinois, 1872.

Tachina (Exorista) phycita, which has been referred by Coquillett to *Exorista pyste* WALK.

Linné, Carl Von.

Systema Naturæ per Regna Tria Naturæ Secundum Classes, Ordines, Genera, etc., 10th edition, 1758.

Contains descriptions of sixteen species referred to America, some of which are South American.

Amœnitates Academicæ, etc., 7 vols., 1749-1769.

Contains *Asilus æstuans*, from Pennsylvania.

Lintner, J. A.

Reports of the New York State Entomologist. Articles on Diptera, chiefly biological and economic, almost always with bibliography, occur as follows: First Report (for 1882, issued 1883).

On Some Species of Anthomyiæ, 168-202, with figs.

Notice of Some Anthomyians Mining Beet Leaves. 203-211, figs.

Chortophila betarum and *Pegomyia vicina* n. sp.

Mallota posticata, 211-216, figs.

Drosophila ampelophila, 216-221, figs.

Meromyza americana, 221-227, figs.

Second Report, 1885.

The Emasculating Bot-fly, 45, 46.

Bibio albipennis, *Microdon globosus*, *Trypeta pomonella*, 110-125, figs.

Fourth Report, 1888.

Cecidomyia balsamicola n. sp., and Its Gall, 60-63, figs.

Lasioptera vitis O. S., 63-67, figs.

Chloropisca prolifica O. S. n. sp., and Its Winter Gathering in Dwellings, 67-72, fig.

Phytomyza lateralis FALL., 73-80, figs. The name is changed in 7th

Report to *Ph. chrysanthemi* n. sp. Kowarz.

Fifth Report, 1889.

Hæmatobia serrata DESV., 220-227, fig.

Sixth Report, 1889.

Hypodermia bovis DEG., 111-116, figs. The species is now considered to be *lineata* Vill.

Drosophila sp. (The Flour-paste Fly), 116, 117.

Seventh Report, 1891.

Helophilus latifrons LOEW, 228-234, figs.

Chloropisca prolifica O. S., 234-241, figs.

Phytomyza chrysanthemi KOWARZ n. sp., 242-246, figs.

Cecidomyia balsamicola, 307-310.

Cecidomyia sp., 308-310.

Eighth Report, 1893.

Diplosis pyrivora RILEY, 140-151, figs.

Exechia sp., a Fungus Gnat, 172.

The Cow-Horn Fly in New York, 192-197.

The Apple Maggot, 245-249.

Ninth Report, 1893.

Pollenia rudis, the Cluster Fly, 309-314, figs.

Tenth Report, 1895 (with index to all preceding).

Diplosis pyrivora RILEY, 386, 387, fig.

Notes on *Sciara*, 387-399, figs. and plate.

S. coprophila and *caldaria* n. sp.

Phora agaraci n. sp., 399, 406, plate and figs.

Eleventh Report, 1896.

The Birch-seed Midge, *Cecidomyia betulæ* Winn., 162-165, plate.

Diplosis cucumeris n. sp., 165-168, plate.

Diplosis setigera n. sp., 168-170, plate.

Anthomyia sp.? The Raspberry-Cane Maggot, 170-172. Afterward described as *Phorbia rubivora* Coq.

Twelfth Report, 1897.

Additional Notes on *Sciara*, by E. P. Felt, 223-228, plate.

Five n. sp.

Phora albidihalteris n. sp., by E. P. Felt, 228, 229.

Piophila casei LINN., 229-234, figs.

A Cecidomyid in Choke-cherries (undet.), 313, note.

Lochhead, William.

The Hessian Fly in Ontario. Bulletin 116, Ontario Agricultural College and Experiment Station, 1901; 16 pp., figs., etc.

Loew, Hermann.

Beschreibungen einiger neuen Tipularia terricola. Linnæa Entomologica, v, 385-406, 1851.

Aporosa rufescens and *virescens*. *Toxorhina fragilis*, from West Indies.

Bemerkungen über die Gattung Beris. Stett. Entomol. Zeit., VII, 1846, in four instalments.

Several North American species mentioned; no new ones.

Helophilus. Stett. Entomol. Zeit., VII, 1846, in three instalments.

Monograph of the genus; *H. glacialis* n. sp., from Labrador.

Chauna genus novum. Stett. Entomol. Zeit., VIII, 370; 1847.

Chauna variabilis, from Cuba.

Über Tetanocera stictica Fab. und ihre nächsten Verwandten. Stett. Ent. Zeit., VIII, 114-124; 1847.

T. flavescens, from Carolina.

Über Tetanocera ferruginea Meig., und die ihr verwandten Arten. Stett. Ent. Zeit., VIII, 194-202; 1847.

Tet. plumosa, from Sitka.

Bemerkungen über die Familie der Asiliden. Programme der Realschule zu Meseritz, 1850; pp. 1-22.

Dasyopogon anthracinus, from Mexico.

Ceria and Conops. In the Series, Neue Beiträge zur Kenntniss der Dipteren, which were originally printed from year to year in the Program der Realschule zu Meseritz, and afterwards by Mittler, in Berlin. Beitrag 1, 1853, 38 pp.

Ceria pictula, *arietis*, and *signifera*; *Conops genualis*, *bulbirostris*, and *castanoptera*.

Neue Dipteren. Neue Beitr., II, 1854, 24 pp.

Pyrgota millepuncta (syn. of *P. valida* HARRIS).

Bombylus. Neue Beitr., III, 1855, 52 pp.

Monograph of the genus in Europe; no new N. A. species, but some synonymical references.

Dipterologische Notizen. Neue amerikanische Dolichopoden. Wiener Entomol. Monatschrift, I, 37, 1857.

Lyroneurus cærulescens and *Plagioneurus univittatus*.

Excursion nach dem Neusiedler See. Neue Beitr., IV, 1856, 58 pp.

"On p. 18 several European species also occurring in N. A. are mentioned, but a part of these statements is based on erroneous data about the locality. *Helophilus pendulus*, *versicolor*, *floreus*, and *Chrysotoxum bi-cinctum* have never, as yet, been found in N. America."—O. S.

Zur Kenntniss der Europäischen Tabanus-Arten. Verhandlungen der Zool.-Bot. Gesellsch. zu Wien, 1858, 573-612.

Tabanus septentrionalis, from Labrador.

Über einige Fliegengattungen. Berlin Entomol. Zeitschr., II, 101-122, 1 plate; 1858.

Plecia longipes, from New Orleans.

Die nordamerikanische Arten der Gattungen Tetanocera and Sepedon. Wiener Entomol. Monatschr., III, 289-300, 1859.

Several species, afterward embodied in Monograph I.

Diptera americana ab Osten-Sackenio collecta, decas prima. Wiener Entomol. Monatschr., IV, 79-84, 1860.

Ten new species; all reproduced in later publications, except *Clinocera maculata* and *conjuncta*.

Diptera aliquot in insula Cuba collecta. Wiener Entomol. Monatschrift, V, 33-43, 1861.

Twenty new species.

Die nordamerikanischen Dolichopoden. Neue Beitr., VIII, 1861, 100 pp.

An extensive work, afterward embodied in Monograph II.

Die amerikanischen Ulidina. Berl. Entomol. Zeitschr., XI, 283-326, 1 plate; 1867.

Several new genera and species, which were all later embodied in Monograph III.

Monographs of the Diptera of North America, vols. I, II, III, with 11 plates. Washington, Smithsonian Miscellaneous Collections.

Vol. I, 1862.—General introduction, Trypetidæ, Sciomyzidæ, Ephydridæ, and Cecidomyidæ (the last by Osten Sacken.)

Vol. II, 1864.—Dolichopodidæ.

Vol. III, 1872.—Ortalidæ and additions to Trypetidæ.

Diptera americana septentrionalis indigena. In the Berliner Entomol. Zeitsch. Centuria I, 1861; II in 1862; III and IV in 1863; V in 1864; VI in 1865; VII in 1866; VIII and IX in 1869; X in 1872. Also published separately, in two volumes.

One thousand North American Diptera! Referred to in the present work as "Loew, Cent."

Diptera Common to Europe and America. Silliman's American Journal of Science and Arts, XXXVII, 317; May, 1864. This list is appended to a translation of Loew's lecture on "The Diptera of the Amber Fauna." Eighty-five species are mentioned as common to the two continents, most of them not previously reported from North America. The work is referred to herein as "Silliman's Jour."

Bemerkungen über die von Hn. Van der Wulp in der Zeitsch. d. Niederländ. Entomol. Ges. für 1867 publicirten N. A. Dipteren. Zeitsch. f. Ges. Naturwissenschaften, XXXVI, 113-120, 1870.

Remarks about the synonymy and generic position of the species in Van der Wulp's article.

Über die Arten der Gattung Sphyracephala Say. Zeitsch. f. Ges. Naturwiss., XLII, 101, 1873.

Remarks on *Sphyracephala brevicornis*.

Neue nordamerikanische Dasygogonina. Berliner Entomologische Zeitschr., XVIII, 353-377, 1874.

Fourteen new species.

Neue nordamerikanische Dipteren. Berliner Entom. Zeitsch., xviii, 378-384.
Six new species.

Beschreibungen neuer amerikanischen Dipteren. Zeitsch. f. Ges. Naturwiss.,
xlvi, 317-340, 1876.
Seventeen new species.

Revision der Blepharoceridæ. Schles. Zeitschr. f. Entomol., Neue Folge, vi,
Breslau, 1877.

The description of *Bibliocephala grandis* is reproduced here, in German.

Neue nordamerikanischen Ephydrinen. Zeitsch. f. Gesamten Naturwiss.,
l, 192-203; March and April, 1878.

Fourteen new species.

Table of North American Species of Pachyrhina. Verh. Zool.-Bot. Ges.,
1879, 513-516.

No new species.

Note.—There are many other important papers of Loew, which should be
consulted. He rarely wrote anything unimportant. The above, however,
are all in which the North American fauna is directly referred to.

Long, Wm. H., Jr.

New Species of Ceratopogon. Biological Bulletin, iii, May and June, 1902.
C. brumalis, stenammatidis, texanus, whecleri.

Lugger, Otto.

Parasites of Man and the Domesticated Animals, in Second Report of the
State Entomologist of Minnesota, 1896 (published 1897).

Pages 145-182 and 209-230 are devoted to Diptera; *Simulium minutum*,
irritatum and *tribulatum* are named and figured, but not described.

Lundbeck, Will.

Entom. Unters. i Vest-Groenl. Medd. om Groenl., Heft vii, 1893.

A brief article, not seen by me; appears to be superseded by the following.

Diptera Groenlandica. I. Videnskabelige Meddelelser Naturhistoriske Forening
i Kjøbenhavn, 1898, 236-314, 2 plates. II. Ibid., 1900, 281-316, figs.

A number of new species; the old faunal lists of Staeger, Holmgren,
and Schiödte are carefully reviewed, and the species elucidated.

Lynch Arribalzaga, Felix.

Dipterologia Argentina. Culicidæ. Revista del Museo de la Plata, i, 345-413,
with five plates (two colored); 1891.

Dipterologia Argentina. Syrphidæ. Anales de la Sociedad científica Argentina,
xxxii, xxiii, and xxxiv, in instalments; 1891-1893.

Dipterologia Argentina. Mycetophilidæ. Boletín de la Academia Nacional
de Ciencias, xii, 377-436 and 471-483; 1892.

El Genero Sapromyza en America, Anales de la Sociedad científica Argentina,
xxxiv, 253-301; 1893.

Important on account of the large number of tropical species, many of
which are found also in Mexico and Central America, or in the West
Indies.

McGillivray, A. D. and Houghton, C. O.

A List of Insects taken in the Adirondacks, N. Y. Diptera in Entomological
News, xiv, 12, 13; Jan., 1903.

About ninety species, determined by Johannsen. The exact locality is
Axton, N. Y.

Macquart, Jean.

Histoire Naturelle des Diptères. 2 vols., with 24 col. pl. Paris, 1834, 1835.
Forms part of the Suites à Buffon, published by Roret.

The species are mostly European; there are a few scattered throughout from North America.

Diptères Nouveaux ou peu Connus. Two volumes in five parts, and five supplements in six parts. Mémoires de la Société des Sciences et des Arts de Lille.

Vol. I,	part 1	1838	pp. 9-225	25 plates.
I,	" 2	1838	121-323	14 "
II,	" 1	1841	282-414	21 "
II,	" 2	1842	63-200	22 "
II,	" 3	1843	162-460	36 "
Suppl. I,		1845	133-364	20 "
II,		1847	21-120	6 "
III,		1847	161-240	7 "
IV,	part 1	1850	309-479	14 "
IV,	" 2	1851	134-294	14 "
V,		1855	25-156	7 "

This set contains an immense amount of material from North America, especially the larger flies of the southern regions. I give the dates of actual publication according to Hagen, although I observe that they do not agree exactly with Osten Sacken, nor with those penciled on my own set. The nominal date of publication was one year earlier, except with the first, second and eighth numbers. The work was also published separately, with different pagination, and this was used by Osten Sacken in his Catalogue; it is therefore continued by me. The parts without exception are indexed, so that any difficulty about the pages will readily be overcome.

Notice sur une nouveau Genre de la Famille des Pupipares, etc. Annales Soc. ent. de France, 1852, 331-333, pl. iv, f. 4.

Megistopoda pilatei, from Mexico and Cuba.

Notice sur une nouvelle Espèce d'Aricie. Annales Soc. ent. de France, 1853, 675, pl. xx, f. 2.

Aricia pici, from San Domingo.

Marlatt, C. L.

Report of a Trip to Investigate Buffalo Gnats. Insect Life, II, 7-11; July, 1889.

Notes on breeding habits of *Simulium meridionale*.

The Xanthium Trypeta. Insect Life, III, 312, 313, figs.; April, 1891.

Life history of *Euaesta aequalis*.

The Ox Warble. Circular No. 25, sec. ser., Div. of Entomology; July, 1897. 10 pp., figs.

Hypoderma lineata VILL.

The Principal Insect Enemies of Growing Wheat. Farmers' Bulletin No. 132, Division of Entomology, Dept. of Agriculture. 40 pp., 1901, figs.

Life history of *Mayetiola destructor*, *Contarinia tritici*, and *Meromyza americana*.

Marten, John.

New Tabanidæ. Canadian Entomologist, xv, 110-112; June, 1883.

Tabanus allynii, *tetricus*, *frenchii*, *susurrus*.

Description of *Asphondylia helianthi-globulus*. *Psyche*, Sept.-Oct., 1888, 102.

Description of a New Species of Gall-making Diptera. *Bulletin of the Ohio Experiment Station, Technical series, 1, No. 3, 155, 156, 1893.*
Lasioptera muhlenbergiæ.

Matas, Dr. R.

A Man-Infesting Bot. New Orleans, 1887; privately printed. Reviewed in *Ins. Life, 1, 76-80, figs.*
An undetermined species, supposed to be a *Dermatobia*.

Meade, R. H.

List of North American Anthomyidæ. *Canadian Entomologist, XIII, 43-51, 1881.*

No new species; several European recognized, with more or less doubt.

List of North American Sarcophagidæ. *Canadian Entomologist, XIII, 146-150, 1881.*

Notes on a number of species; none new.

Meigen, J. W.

Systematische Beschreibung der bekannten europäischen zweiflügeligen Insekten. 7 vols., Achen and Hamm, 1818-1838.

The work contains only European species, but many are common to both continents.

Melander, Axel L.

A Decade of Dolichopodidæ. *Canadian Entomologist, XXXII, 134-144, figs.; May, 1900.*

Ten new species.

Gynandromorphism in a New Species of *Hilara*. *Psyche, IX, 213-215, figs.; June, 1901.*

Hilara wheeleri.

Notes on the Acroceridæ. *Entomological News, XIII, 178-181, fig.; June, 1902.*

Notes on twelve species; *Opsebius agalenæ* n. sp., but according to Adams this is a synonym of *Op. pterodontinus* O. S.

Monograph of the North American Empididæ. Part I. *Transactions of the American Entomological Society, XXVIII, 195-367, five plates; July-Oct., 1902.*

Many new species and several genera. Includes all the family except the genus *Rhamphomyia* "in its wide sense."

An Interesting New *Chrysotus*. *Entomological News, XIV, 72, fig.; March, 1903.*

C. phyltrum.

A Review of the North American Species of *Nemotelus*. *Psyche, 1903, Oct.-Dec., pp. 171-183, 1 plate.*

arator, bruesii, trinotatus, wheeleri and *bellulus*, new.

See also Wheeler and Melander.

Melander, A. L. and Brues, C. T.

New Species of *Hygroceleuthus* and *Dolichopus*. *Biological Bulletin, 1, 123-148, many figures; 1900.*

Fifteen new species; several others redescribed.

Guests and Parasites of the Burrowing Bee *Halictus*. *Biological Bulletin, v, 1-27, figs.; June, 1903.*

Ceratopogon hollensis; *Phora cata, rostrata* and *halictorum*; *Stethopathus occidentalis*.

Mik, Josef.

Ueber die dipterologischen Referate in den Jahrgängen 1882 bis inclusive 1890 der Wiener Entomologischen Zeitung. Wien. Entomol. Zeitung, ix, 281-308; Dec., 1890.

A résumé of the more important dipterological matters commented upon, corrected, etc., in the first nine years of the journal.

Ein Beitrag zur "Bibliotheca Entomologica." Wiener Entomologische Zeitung, x, 65-96; April, 1891.

A digest of the author's thirty years of published work in entomology, mainly in the Diptera.

Tipula besselsi n. sp.

Western Diptera. Descriptions of New Genera and Species of Diptera from the Region West of the Mississippi, and especially from California. Bulletin of the U. S. Geological and Geographical Survey of the Territories, iii, No. 2; April, 1877; pp. 189-354.

One hundred and thirty-six new species and several new genera.

Catalogue of the Described Diptera of North America (second edition). Smithsonian Miscellaneous Collections. Pp. xlvi and 276. Washington, 1878.

Two new genera and five new species are described in the notes, and a number of species redescribed. The work contains much more than an ordinary catalogue of so many species. It is in fact a mine of information on the order and its classification.

Bemerkungen über *Blepharoceriden*; ein Nachtrag zur "Revision" dieser Familie von Professor Dr. Loew. Deutsche Ent. Zeitsch., xxii, 405-416, 1878.

A review of the structural characters of the family; no new species.

An Essay of Comparative Chaetotaxy, or the Arrangement of Characteristic Bristles of Diptera. Originally printed in Mittheil. d. Münchener Entomol. Vereins, v, 121-138, 1881; revised and republished in Trans. Entom. Society of London, 1884, pt. iv, pp. 497-517.

An attempt to locate and name the principal characteristic bristles (macrochaetae) of Diptera, as a means of classification; very important. No new species.

On Professor Brauer's Paper, "Versuch einer Charakteristik der Gattungen der Notacanthen." Berl. Entom. Zeitsch., xxvi, 363-380, 1882.

Many notes on genera; no new species.

On the Genus Apiocera. Berl. Entom. Zeitsch., xxvii, 287-294, 1883; correction, xxx, 139, 1886; Second Notice on Apiocerina, xxxvi, 311-316, 1891.

No new species.

Synonymica Concerning Exotic Dipterology. II. Berl. Entom. Zeitsch., xxvii, 295-298, 1883.

Dialysis WALKER, and other genera mentioned.

A Singular North American Fly. Berl. Entom. Zeitsch., xxvii, 299-300, 1883.

Opsebius pterodontinus n. sp.

Studies on Tipulidæ. Part I. Review of the Published Genera of the Tipulidæ longipalpi. Berl. Entom. Zeitsch., xxx, 153-188, 1886.

Brachypremna n. gen., from Texas.

Studies on Tipulidæ. Part II. Review of the Published Genera of the Tipulidæ brevipalpi. Berl. Entom. Zeitsch., xxxi, 163-242, 1887.

Rhamphidia albitarsis n. sp., from Porto Rico.

Biologia Centrali-Americana. Vol. I. Cecidomyidæ-Empidæ. 216 pp., 3 col. plates. 128 pp. in 1886, the remainder in 1887.

Many new species, and a few genera.

On Mr. Portschesky's publications on the larvæ of Muscidæ, including a detailed abstract of his last paper, "Comparative biology of the necrophagous and coprophagous larvæ." Berl. Entom. Zeitsch., xxxi, 17-28, 1887.

Although Portschesky's work does not come within our faunal limits, relating to southern Russia, the subject is very interesting, and I cannot refrain from mentioning the paper. It forms a useful complement to Howard's paper on Diptera of excrement.

Some North American Tachinæ. Canadian Entomologist, xix, 161-166; Sept., 1887.

Five new species.

Chloropisca prolifica n. sp. Lintner's 4th New York Report, 60, 61, 1888.

See *Chlorops variceps*.

Suggestions Toward a Better Grouping of Certain Families of the Order Diptera. Entomologist's Monthly Mag., second series, II, 35-39, 1891.

Synopsis of the Described Genera and Species of the Blepharoceridæ. Berl. Entom. Zeitsch., xxxvi, 407-411, 1891.

Analytical tables of the genera and species, with references; no new species.

On the Characters of the Three Divisions of Diptera: Nemocera vera, Nemocera anomala, and Eremochæta. Berl. Entom. Zeitsch., xxxvii, 417-466, 1892.

- Explanatory Notice of my Views on the Sub-orders of Diptera. Entomologist's Monthly Magazine, second series, IV, 149, 150, 1893.
- On the So-called Bugonia of the Ancients, and Its Relation to *Eristalis tenax*. Bull. Soc. Ent. Italiani, XXV, 186-217; 1893.
- On the Oxen-born Bees of the Ancients (Bugonia), and their Relation to *Eristalis tenax*. Heidelberg, J. Hoerning, 1894, pp. xiv and 80.
This is a reprint and enlargement of the preceding. There is an additional article, pub. by J. Hoerning, 1895, 23 pp.
- On the Atavic Index-Characters. Berl. Entom. Zeitsch., XXXIX, 69-76, 1894.
- Western Pediciæ, Bittacomorphæ and Trichocera. Psyche, VII, 229-231; April, 1895.
Notes on several species from the Western States; none new.
- Eristalis tenax* in Chinese and Japanese Literature. Berl. Ent. Zeitsch., XL, 142-147, 1895.
- Contributions to the Study of the Liponeuridæ. Berl. Ent. Zeitsch., XL, 148-160, 1895.
Blepharoceridæ; a study of generic characters, etc. A supplement to this paper is published in vol. XL, 351-355, 1895.
- Preliminary Notice of a Subdivision of the Suborder Orthorhapha Brachycera on Chætotactic Principles. Berl. Entom. Zeitsch., XLI, 365-373, 1896.
I have adopted for my catalogue almost the arrangement of this paper.
- Identification of Two Genera of Nemestrinidæ published by Bigot. Berl. Entom. Zeitsch., XLII, 145-149, 1897.
Dicrotrypana BIG., and *Parasymnictus* BIG.
- Amalopsis* Haliday (O. S.) versus *Tricyphona* Bergroth (not Zett.). Berl. Entom. Zeitsch., XLII, 150-154; 1897.
- On the Synonymy of *Anopheles maculipennis* Meigen. Entomol. Monthly Mag., sec. ser., XI, 281, 282; Dec., 1900.
Maculipennis vindicated as against *claviger* FAB.
- On the New Nomenclature of the Cecidomyidæ. Entomol. Monthly Mag., sec. ser., XII, 40-43, 1901.
Opposing the abandonment of the old genus *Cecidomyia*, as finally developed by Meigen and Latreille. For reasons explained at the beginning of the family, I have adopted the "new nomenclature."
- The Position of *Phora* in the System of Diptera. Entomol. Monthly Mag., XIII, 204, 205, 1902.
- On a Distinctive Character of the Imagos of the Suborders of Diptera. Ent. Monthly Mag., XIII, 228, 1902.
- Record of My Life Work in Entomology. Parts I and II. Cambridge, Mass.; Oct., 1903, 204 pp. Part III, Heidelberg, 1904, pp. 205-240, with portrait.
Baron Osten Sacken's autobiographical volume contains so much information about the earlier work on North American Diptera, and the development of dipterological science in general, that every student of the order will find it extremely interesting and valuable. His rare and noble devotion to science throughout a long career should be an inspiring example.

Packard, Alpheus S.

- On Insects Inhabiting Salt Water. Proceedings of the Essex Institute, VI, 41; March, 1869.

Ephydra halophila and *Chironomus helophilus* n. spp.

On Insects Inhabiting Salt Water. No. 2. American Journal of Science and Arts, 3d series, 1, 100, 1872.

Ephydra gracilis and *californica*, described from larvæ; adults unknown.

Report upon the Invertebrate Animals of Vineyard Sound, etc. Washington, 1874.

Several larvæ of Diptera; *Chironomus halophilus* n. sp.

On the Transformations of the common House-fly. Boston Society of Natural History, xvi, 136-150, 1 plate; 1874.

Insects affecting the Cranberry, with Remarks on other Injurious Insects. Report U. S. Geol. Survey for 1876 (pub. 1878), 527.

Diplosis pini-rigida n. sp., on *Pinus rigida*.

The Hessian Fly. Bull. No. 4, U. S. Entomological Commission, 1880. 43 pp., figs.

Bot-Fly Larvæ in a Turtle's Neck. American Naturalist, xvi, 598, fig.; July, 1882. Not determined; perhaps not an Oestrid.

Larvæ of a Fly in a Hot Spring in Colorado. American Naturalist, xvi, 599, 600; July, 1882.

Stratiomyia sp.; larvæ in water at 157 degrees Fahrenheit.

The Hessian Fly. In the Third Report of the U. S. Entomological Commission, 1883, 198-248, figs., etc.

Forest Insects. Being the Fifth Report of the United State Entomological Commission. Washington, 1890, 955 pp., with many plates and figures.

No new species of Diptera; life history of many species briefly given.

The Entomological Writings of Alpheus S. Packard. A bibliography by Samuel Henshaw. Division of Entomology, 1887, 49 pp.

Palisot de Beauvois, A. M. F. J.

Insectes recueillis en Afrique et en Amérique, etc. Paris, 1805-21; with plates.

Several Tabani, one Chrysops, and one Syrphid are described and figured.

Pergande, Theodore.

The Ant-Decapitating Fly. Proceedings of the Entomological Society of Washington, iv, 498; July 2, 1901.

Life history of the species; described by Coquillett in same article as *Apocephalus pergandei* n. gen. et sp.

Pettit, Rufus H.

Bulletin 175, Michigan Exper. Station; July, 1899; pp. 356-361, notes on Hessian Fly and on the Beet-Leaf Miner, *Pegomyia vicina*.

Bulletin 186, Michigan Exper. Station, and also Annual Report of same for 1901, contains a list of Diptera collected in Northern Michigan, and an article with good figure on the Potato-Beetle Tachinid, *Phorocera doryphora*.

A Leaf-mining Chironomus sp. in Water-lilies. Mich. Acad. Science, 1900, p. 110, with plate. Habits of an undetermined species. Compare *Cricotopus sylvestris*.

Perty, Maximilian.

Delectus Animalium articulorum quae in Itinere per Brasiliam Annis 1817-1820, etc., collegerunt Dr. Spix et Dr. Martius. Monachii, 1830-34. 4to, with 40 plates.

Several species described here occur also in Cuba and Mexico.

Poey, Felipe.

Memorias sobre la Historia Natural de la Isla de Cuba. Tomo i. Habana, 1851-54.

Occaeta furens n. gen. et sp.

Reiche, L.

Description du cinque espèces nouvelles d'Insectes, provenant de l'Expédition aux Mers arctiques. Annales Soc. Ent. France, Bulletin, p. ix, 1857.

Anthomyia impudica (is a *Cordylura*—O. S.).

Riley, Charles V.

First Report of the State Entomologist of Missouri. Jefferson City, 1869.

Life history and description of *Anthomyia zeas* n. sp. (syn. of *Phorbia fusciceps*), *Lydella doryphoræ* n. sp. (see *Phorocera*), *Pipiza radicum* n. sp. (probably syn. of *P. femoralis*); also *Meromyza americana*, *Oestrus ovis*, and *Trupanca apivora* FITCH (*Promachus fitchii* WILL.).

The Cecropia Moth. American Entomologist, II, 97-102; Feb., 1870.

Exorista cecropiæ n. sp. (syn. of *Winthemia quadripustulata*).

Second Missouri Report, 1870.

Life history and description of *Asilus missouriensis* n. sp. (*Proctacanthus milberti*), *Exorista flavicauda* n. sp. (*Belvosia unifasciata*), and of *Tabanus atratus*.

Fourth Missouri Report, 1872.

Tachina anonyma n. sp. (*Frontina frenchii*), and *T. phycitæ* LEBARON (*Exorista pyste*).

Fifth Missouri Report, 1873.

Descriptions of several galls of Cecidomyidæ on grape.

Descriptions and Natural History of two Insects which brave the Dangers of *Sarracenia variolaris*. Trans. Acad. Nat. Sci. St. Louis, III, 235-240; 1875.

Sarcophaga sarraceniæ n. sp.

The Clover-Seed Midge. Report of the Commissioner of Agriculture for 1878 (pub. Oct., 1879), 248-250.

Cecidomyia leguminicola LINTNER, life history.

Parasites of the Cotton Worm. Canad. Entomol., XI, 161-162, 1879.

Tachina aleticæ n. sp. (see *Frontina aleticæ*).

Natural Enemies of the Locust. Second Report of the U. S. Entomological Commission, 1880 (pub. 1881), 259-270.

Life history of *Systæchus oreas* and *Triodites mus*, reared from locust eggs; some other Diptera mentioned.

Dipterous Enemies of *Phylloxera vastatrix*. Canadian Entomologist, xv, 39; Feb., 1883.

Mentions *Leucopis phylloxeræ* MS., which was never described.

Occurrence of a *Stratiomyia* larvæ in Sea-water. American Naturalist, xvii, 1287; Dec., 1883.

Not determined.

Report of the Entomologist. In the Report of the Commissioner of Agriculture for 1884 (pub. Jan. 31, 1885).

Contains articles on *Oscinis brassicæ* n. sp. (*Agromyza trifolii*), *Anthomyia* (*Phorbia*) *brassicæ*, and *Simulium* sp.

Natural Enemies of the Cotton-Worm. Fourth Report U. S. Entom. Com., 87-119; Feb. 3, 1886.

Phora aleticæ n. sp. (*nigriceps*).

The Pear Midge, *Diplosis pyrivora* n. sp. Report Comr. of Agriculture for 1885 (pub. 1886), 283-288. Life history, etc.

The Southern Buffalo-Gnat. Report Comr. of Agriculture for 1886 (pub. 1887), 492-517.

Simulium meridionale and *pecuarum* n. sp. (the latter a syn. of *invenustum*), with life histories.

Beschreibung einer den Birnen schädlichen Gall-Mücke (*Diplosis nigra* Meigen?). Wiener Entomol. Zeitung, vi, 201-206, figs.; Sept., 1887.

Diplosis pyrivora n. sp. proposed if distinct; it had already been so named by Riley more than a year before.

The Morelos Orange Fruit-Worm. Insect Life, I, 45-47, fig.; Aug., 1888.

Life history of *Trypeta (Auastrapha) ludens* LOEW.

The Ox Bot in the United States. Insect Life, iv, 302-317, figs.; June, 1892.

Hypoderma lineata VILL., life history.

Bibliography of the more important Contributions to American Economic Entomology of Charles Valentine Riley. By Samuel Henshaw. Division of Entomology, 1889, 379 pp.

Riley, Charles V. and Howard, Leland O.

The Corn-Feeding Syrphus Fly (*Mesogramma polita* Say). Insect Life, I, 5-8, figs.; July, 1888.

Life history of *Mesogramma polita* SAY.

On the Emasculating Bot-Fly. Insect Life, I, 214-216, fig.; Jan., 1889.

Cuterebra emasculator FITCH.

Hermetia mucens Infesting Bee-hives. Insect Life, I, 353; May, 1889.

Life history of *Hamatobia serrata* DESV.

The Bot-Fly of the Ox. Insect Life, II, 156-159, figs.; Nov., 1889.

The Ox Warble. Insect Life, II, 172-177, figs.; Dec., 1889.

Both on *Hypoderma lineata* VILL.

Anthrax Parasitic on Cut-Worms. Insect Life, II, 353, 354; May and June, 1890.

No new species.

A Peach Pest in Bermuda (*Ceratitis capitata* Wied.). Insect Life, III, 5-8, figs.; Aug., 1890. Additional notes, pp. 80, 81.

Bermuda is not within the range of this catalogue, but the species may easily be introduced into our fauna.

Robertson, Chas.

Some New Diptera. Canadian Entomologist, xxxiii, 284-286; Oct., 1901.

Eight new species.

Roeder, Victor von.

Dipterologische Notizen. Berliner Entomol. Zeitsch., xxv, 210-216, 1881.

Eurycephala myopæformis n. g. and sp., from Cal.

Dipteren von der Insel Porto Rico, etc. Stettiner Entomol. Zeit., 1885, 337-349.

Eleven n. sp.; about eighty described species listed, many of which are redescribed.

Ueber die nordamerikanischen Lomatina, etc. Wiener Entomol. Zeitung, v, 263; Oct., 1886.

Notes on several species of the group from N. A.; none new.

Ueber die Gattungen *Doryclus* Jæn. und *Megapoda* Macq. Berliner Entomol. Zeitschr., xxxi, 76-78, 1887.

Asyndulum montanum n. sp. Wiener Entomol. Zeitung, vi, 116; May, 1887.
From New Hampshire.

Ueber *Myopa clausa* Loew. Wiener Entomol. Zeitung, viii, 5, 1889.

Zwei neue nordamerikanische Dipteren. Wiener Entomol. Zeitung, ix, 230;
Oct., 1890.

Bittacomorpha sackenii and *Agathon elegantulus*, from Nevada; the latter a new genus, regarded by Kellogg as a synonym of *Bibiocephala*.

Ueber die Dipteren-Gattung *Stylogaster* Macq. Wiener Entomol. Zeitung, xi, 286; Nov., 1892.

Ueber *Trypeta amabilis* Loew. Wiener Entomol. Zeitung, xiii, 97; March, 1894.

Redesc. and figured; see *Hexacheta amabilis*.

Ueber *Mydas fulvipes* Walsh. Wiener Entomol. Zeitung, xiii, 169, 170, 1894.

Rondani, Camillo.

Diptera exotica, revisa et notata, novis nonnullis descriptis. Archivio Canestrini, iii, 1863.

Scatina estotilandica n. sp. from Labrador.

Osservazioni sopra alcune specie di esapodi ditteri del Museo Torinese. Nuovi Annali di Bologna, ser. 3, ii, 165-197, 1850.

Tabanus cheliopterus n. sp., from Carolina.

Hippoboscita exotica non vel minus cognita. Annali del Museo Civico di Storia Naturale di Genova, xii, 150-169, 1878.

Six new species of Hippoboscidae from Mexico.

Ruebsaamen, Ewald H.

Sciara striata n. sp. Berliner Entomol. Zeitschr., 1894, 37.
From Mexico.

Zoolog. Ergebnisse der . . . Grönland expedition. Grönlandische Mycetophiliden, Sciariden, Cecidomyiden, Psylliden, etc. In Bibliotheca Zoologica, xx, 103-119, 2 plates; 1898.

Six new species of *Sciara* from Greenland.

Saint Fargeau et Serville.

Encyclopédie Méthodique, vol. x. Paris, 1825.

A number of North American Diptera are mentioned; none new.

Say, Thomas.

Diopsis brevicornis n. sp. Journal of the Academy of Natural Sciences of Philadelphia, i, 23, 1817.

Some Account of the Insect known as the Hessian Fly, etc. Jour. Acad. Nat. Sci. Phil., i, 45-48 and 63, 64; 1817. *Cecidomyia destructor* first described.

Description of Dipterous Insects of the United States. Journal of the Academy of Natural Sciences in Philadelphia, iii, 9-54 and 73-104; 1823.

Description of North American Dipterous Insects. Journal Academy of Natural Sciences in Philadelphia, vi, 149-178 and 183-188; 1829-30.

Keating's Narrative of an Expedition to the Source of St. Peter's River, etc., under the Command of S. H. Long. 2 vols.; Philadelphia, 1824. Insects described by Say in the Appendix to the second volume, Diptera, pp. 357-378. Cited as "Long's Exped."

Description of new species of North American Insects found in Louisiana by Jos. Barabino. New Harmony, Ind., March, 1831 (not in the Complete Works; see Scudder, in Psyche, Jan., 1899, where the description of the single new species is quoted).

New Species of North American Insects found by Jos. Barabino in Louisiana. New Harmony, Ind., 1832.

American Entomology. 3 vols., with plates. Philadelphia, 1824-25-28.

The Complete Writings of Thomas Say on the Entomology of North America, with a Memoir of the Author by George Ord. Edited by John L. Leconte. New York; 1859; 2 vols., 8 vo; 1200 pp., with 36 plates.

There is also a French translation of Say's works, in vol. v of Annales Soc. Ent. de France, 1837.

There are about 250 new species of North American Diptera in Say's writings.

Say sent many of his species of Diptera to Wiedemann, who redescribed them in his Aussereropäische Zweifl. Ins. In many cases the latter description is more characteristic than Say's.

Shimer, Henry.

Description of a New Species of Cecidomyia. Transactions of the American Entomological Society, I, 281, 1868.

Cecidomyia aceris, n. sp.

A Summer's Study of Hickory-galls, with Descriptions of Supposed New Insects Bred from them. Transactions of the American Entomological Society, II, 386, 1869.

Cecidomyia cossæ, n. sp.

Additional Notes on the Striped Squash-Beetle (*Diabrotica vittata*). American Naturalist, v, 217, 1871.

Melanosphora diabrotica, n. sp., here placed in *Celatoria*.

Schiner, J. R.

Fauna Austriaca. Diptera. Vienna, 2 vols., 1862-64.

Incomparably the best encyclopædic work on Diptera that was ever published. While it is intended to include only Austrian forms, many of the species occur in North America, and most of the genera.

Neue oder wenig bekannte Asiliden des kaiserl. Hofcabinet in Wien. Verhandlungen der zoologischen-botanischen Gesellschaft zu Wien, xvii, 355-412, 1867.

Five new N. A. species.

Reise der Oesterr. Fregatte Novara um die Erde in den Jahren 1857-59. Zoologischer Theil. Diptera. Wien, 1868, 1 vol. 4to, with 4 plates.

Many South American species which also occur in North America are described; also some new genera occurring in North America.

Schnabl, Johann.

Limnospila nov. gen. Anthomyidarum. Wiener Ent. Zeitung, XXI, III, 1902.

Type, *Canosia albifrons*, which occurs in North America.

Schwarz, E. A.

The Insect Fauna of the Great Salt Lake, Utah. Canadian Entomologist, xxiii, 235-241, 1891.

Extended notes on the larva of *Ephydra gracilis* PACK.

The Hippelates Plague in Florida. *Insect Life*, VII, 374-379, figs.; July, 1895.
Notes on *H. flavipes* and *plebeius*, annoying people in Florida.

Scudder, Samuel H.

Description of *Tachina theclarum*, in an article by Osten Sacken, Canadian Entomologist, XIX, 166; Sept., 1887.

The species is referred by Coquillett to *Exorista confinis* FALL.

An Unknown Tract on American Insects by Thomas Say. *Psyche*, Jan., 1899, 306-308.

Contains reprint of *Trypeta trifasciata* SAY.

Note.—Mr. Scudder's work on fossil Diptera is not listed, not being within the scope of the present catalogue.

Schiödte, J. G.

Naturhistoriske Tillæg til Rink: "Grönland geographisk og statistisk beskrevet," 1857; a German translation of the "Tillæg" or appendix was printed in *Berliner Entomolog. Zeitschr.*, 1859, 134-157.

No new species; some synonymy, and a list of described Diptera from Greenland.

Sirrine, F. A.

The Spinach-leaf Maggot or Miner. *Bull.* 99, N. Y. Experiment Station; Jan., 1896; pp. 21-31, figs. Also in Annual Report N. Y. Exp. Sta. for 1895 (pub. 1896), 625-633, 1 plate.

Life history of *Pegomyia vicina* LINT.

A Little-known Asparagus Pest (*Agromyza simplex* Lw.). *Bull.* 189, N. Y. Exp. Sta.; 1900.

Skinner, Henry.

Diptera of Beulah, New Mexico. *Trans. Amer. Entom. Society*, XXIX, 104-106; Feb., 1903.

About 135 species listed. The new ones described by Coquillett and Johnson, *q. v.*

Slingerland, Mark Vernon.

The Cabbage Root Maggot, with Notes on the Onion Maggot and Allied Insects. *Bull.* 78, Cornell University Exp. Station; Nov., 1894, pp. 481-577, 18 figs.

Life history of *Phorbia brassica* BOUCHÉ, and notes on other species. An admirably thorough piece of work.

The Current-Stem Girdler and the Raspberry-Cane Maggot. *Bull.* 126, Cornell University Exp. Sta.; Feb., 1897, pp. 39-60, figs.

The Raspberry-Cane Maggot is described and its habits given, with bibliography, but the species is not determined. It is mentioned as *Phorbia* sp. See next article.

The Raspberry-Cane Maggot. *Canadian Entomologist*, XXIX, 162, 163; July, 1897.

Life history; described in the article as *Phorbia rubivora* by Coquillett.

A New Cherry Pest. *Bull.* 172, Cornell University Exp. Sta., Sept., 1899; 19 pp., 15 figs.

Supposed to be *Rhagoletis cingulata* LOEW; the determination is confirmed from bred specimens in *Canad. Ent.*, XXXIV, 28, 1902.

Slosson, Annie Trumbull.

List of Diptera from the White Mountains, New Hampshire. In *Entomological News*, as follows: Vol. V, 6; VI, 6, 7 and 319, 320; VII, 263, 264; VIII, 239, 240; IX, 252; XI, 320, 321; XIII, 7, 8 and 319, 320.

In all several hundred species, none described as new, but some European species and genera not hitherto reported from the United States. The determinations are almost all by Coquillett.

Mount Washington Again. Entomological News, v, 271-274, 1894.

Collecting notes; several Diptera mentioned.

Singular habit of a Cecidomyid. Entomological News, vii, 238, 1896.

An undetermined species riding on the wing of a flying Chrysopa.

Hunting Empids. Entomological News, xiv, 265-268, 1903.

Collecting notes; habits of several species.

Smith, John B.

Note on Habits of *Volucella fasciata*. Canadian Entomologist, xxiii, 242, 243, 1891.

The Horn Fly. Special Bulletin No. 62, New Jersey Experiment Station, Nov., 1889; 40 pp., 9 figs.

Life history of *Hæmatobia serrata* DESV.

The Insects Injuriously affecting Cranberries. Special Bulletin K, N. J. Exp. Sta., Feb., 1890; 43 pp., 26 figs.

Cecidomyia vaccinii, n. sp.; the name was changed by Johnson to *oxycoccana*, on account of preoccupation.

A Contribution towards the Knowledge of the Mouth Parts of Diptera. Trans. Amer. Entom. Society, xxii, 319-339, 1890.

Notes on the Structure and History of *Hæmatobia serrata* Desv. Psyche, v, 343-347, figs., 1890.

An Essay on the Development of the Mouth Parts of Certain Insects. Transactions of the American Philosophical Society, xix, 175-198, 3 plates; 1896.

Treats of mouth parts of Diptera especially.

Life History of *Aedes smithii*. Jour. N. Y. Ent. Society, x, 10-15; Mar. 1902.

Notes on the early Stages of *Corethra brakeleyi*. Canadian Entomologist, xxxiv, 139; June, 1902.

The Salt-Marsh Mosquito. Special Bulletin T, N. J. Exp. Sta., 1902; 10 pp., figs.

Life history of *Culex sollicitans* WALK.

Notes on the Early Stages of *Culex canadensis* Theob. Entomological News, xiii, 267-273; Nov., 1902.

Characters of some Mosquito Larvæ. Entomological News, xiii, 299-303, 1 pl.; Dec., 1902.

Report of the Entomological Department of the N. J. Exp. Sta. for 1902.

A Report on Mosquito Investigations, pp. 511-556, mostly on the Salt-Marsh Mosquito, *Culex sollicitans* Walk. Also has an article on Mosquitoes and malaria, by Herbert Parlin Johnson.

Notes on *Culex serratus* Theob. Entomological News, xiv, 309-311, 1 pl.; Dec., 1903.

Snodgrass, R. E.

The Inverted Hypopygium of *Dasyllis* and *Laphria*. Psyche, x, 399, 400, 1902. Purely morphological.

The Terminal Abdominal Segments of Female Tipulidæ. Jour. N. Y. Ent. Soc., xi, 177-188, 2 pl.; December, 1903.

Characters of several previously-known species described.

Snow, F. H.

Musca domestica L. versus *Vespa occidentalis* Cress. *Psyche*, III, 340; May, 1882.

Notes on the distribution of *Musca domestica*.

A Preliminary List of the Diptera of Kansas. *Kans. Univ. Sci. Bull.*, II, 211-223; Nov., 1903.

392 species listed; 6 new species are described by Adams. Unfortunately this reached me so late that I could add only the new species to the catalogue.

Snow, William A.

The Moose-fly—A New *Hæmatobia*. *Canadian Entomologist*, XXIII, 87-89, 1891.

Hæmatobia alcis, n. sp., from Northern Minnesota.

Notes and Descriptions of Syrphidæ. *Kans. Univ. Quarterly*, I, 33-40, 1 pl., 1892.

Four new species; many others mentioned.

Descriptions of North American Trypetidæ. *Kans. Univ. Quarterly*, II, 159-174, 2 plates, 1894.

Fourteen new species; *Xenochata* and *Polymorphomyia* n. gen.

American Platypezidæ. *Kans. Univ. Quart.*, III, 143-152, 1 pl., 1894.

American Platypezidæ. II. *Op cit.*, III, 205-207; 1895.

In these papers eleven new species are described; there are also tables of genera and species.

Cnephalia and its Allies. *Kans. Univ. Quarterly*, III, 177-186, 1895.

A study of the genera in the neighborhood of *Gonia* and *Spallanzinia*; *Cnephalia pausa* and *finitima*, n. sp.

A New Species of Pelecocera. *Kans. Univ. Quarterly*, III, 187, 1895.

P. willistonii, from New Mexico.

Diptera of Colorado and New Mexico. *Kans. Univ. Quarterly*, III, 225-247, 1895.

Confined to Syrphidæ. 13 n. spp.; notes on many other western species.

Supplementary List of North American Syrphidæ. *Kans. Univ. Quarterly*, III, 249-262, 1895.

List of species from 1878, with some changes in nomenclature.

On *Toxotrypana* of Gerstaecker. *Kans. Univ. Quart.*, IV, 117-119, fig., 1895.

A List of Asilidæ, Supplementary to Osten Sacken's Catalogue, etc. *Kans. Univ. Quarterly*, IV, 173-190, 1896.

Considerable changes in synonymy, especially of the tropical species.

Snow, W. A. and Mills, Helen.

The Destructive Diplosis of the Monterey Pine. *Entomological News*, XI, 490-494, 1 plate; June, 1900.

Diplosis pini-radiata n. sp.

Snyder, Mrs. A. J.

Trypeta solidaginis. *Canadian Entomologist*, XXX, 99, 100; Apr., 1898.

Description of the emergence of the adult.

Speiser, Paul.

Ueber die Nycteribiiden. *Wiegmann's Archiv. für Naturgeschichte*, LXVII, 11-78, 1 plate; 1901.

Important for the classification; no new North American species.

Besprechung einiger Gattungen und Arten der Diptera pupipara. Termész. Füzetek, xxv, 1902, 327-338.

Ornithomyia erythrocephala LEACH is made the type of a new genus, *Ornithoctona*; *Ornithoica confluenta* SAY redesc.

Studien über Diptera Pupipara. Zeitschr. f. Syst. Hym. und Dipterologie, III, 145-180, 1903.

A very thorough work, referring to several North American species; *Lynchia pusilla* n. sp., from Cuba. Bigot's types in the family are elucidated, from examination.

Staeger, C.

Groenland's Anliater. In Kröyer's Naturhist. Tidskrift, new ser., I, 346-369, 1845.

Eight new species; fifty-five species mentioned in all.

Stedman, J. M.

Thirty-fourth Report Board of Agriculture of Missouri, 1902.

Contains articles on Hessian Fly (p. 76) and Wheat Bulb-Worm (p. 85); no new species.

Stein, P.

Die Anthomyiden-Gruppe Homalomyia. Berliner Entom. Zeitsch., XL, 1-146, 1895.

Several North American species also occurring in Europe are redesc.

Nordamerikanischen Anthomyiden. Berliner Entom. Zeitschr., XLII, 161-288, 1897.

Many new species, several new genera; the foundation of our knowledge of the North American fauna in this family.

Die Walker'schen Aussereuropäischen Anthomyiden in der Sammlung des British Museums zu London. Zeitschr. f. Syst. Hym. und Dipterologie, 1901, 185-221.

A reexamination of Walker's types, with descriptions of many. Three labeled but unpublished species of Walker are described—*Hydrotaea succedens*, *Hylemyia relata* and *Pegomyia debilis*, from North America. These of course are credited to Stein, not Walker.

Die Zetterstedt'schen, Holmgren'schen und Boheman'schen Anthomyidentypen des Stockholmer Museums. Wiener Entom. Zeitung, XXI, 29-66, 1902.

Holmgren's Greenland species are elucidated.

Summa, H.

The Pseudo-parasitism of Diptera in Man, or Myiasis. St. Louis Med. & Surg. Journal; April, May and June, 1889; sep., 16 pp., 5 figs.

Swederus, Samuel.

Et Nytt Genus och Femtio Nya Species af Insecter. In the Vetenskap. Acad. Nya Handl., 1787, p. 181 and 276.

"Two North American species: *Musca tomentosa*, which is probably *Brachypalpus verbosus*, and *Musca (Syrphus) monoculus*; I cannot make out the synonymy of the latter."—O. S.

Theobald, Fred. V.

A Monograph of the Culicidae of the World. London, British Museum. Vols. I and II and vol. of col. plates, 1901; Vol. III, 1903.

All the North American species known at the time of preparation are redescribed in this great work; there are also numerous new species, espe-

cially from along the southern limits of our field. In the 3d volume many new genera are introduced. The classification of Theobald is closely followed herein.

Description of a New N. A. Culex. Canadian Entomologist, xxxv, 211-213, 1903.

C. Kelloggii, which is a synonym of *C. tarsalis* Coq.

Notes on Culicidæ and their Larvæ from Pecos, N. M., and Description of a New Grabhamia. Canadian Entomologist, xxxv, 311-316, 1903.

G. vittata.

Thomson, C. G.

Kongliga Svenska Fregatten Eugénies Resa Omkring Jorden. Diptera. Stockholm, 1868; 1 vol., 4to.

Forty-nine new species from California and Panama.

Thunberg, Carl P.

Description of Pantophthalmus tabaninus, in Acta Soc. Gotheburg, 1819, pars III, 7, pl. VII, f. 2. So quoted by Wiedemann, who reproduces the description in Auss. Zweifl., I, 110. The paper is not mentioned by Hagen in his Bibliotheca.

Townsend, C. H. Tyler.

Notes on Some Interesting Flies from the Vicinity of Washington. Proc. Ent. Society of Washington, 1, 254, 255, 1890.

Notes on six species; none new.

On the Fall Occurrence of Bibio and Dilophus. Proc. Ent. Soc. Wash., 1, 260-263, 1890.

Notes; no new species.

A Remarkable New Hippoboscid from Mexico. Entomological News, II, 105, 106; June, 1891, and note III, 177, 178, 1892.

Trichobius dugesii n. sp.

Two New Tachinidæ. Psyche, VI, 83-85; May, 1891.

Tachina clisiocampa (syn. of *mella*) and *Phorocera promiscua* (syn. of *Frontina frenchii*).

Description of a Muscid Bred from Swine Dung, with Notes on Two Muscid Genera. Canadian Entomologist, xxIII, 152-155; July, 1891.

Cleigastra suisterci n. sp. (syn. of *Scatophaga furcata* SAY).

A New Simulium from Southern New Mexico. Psyche, VI, 106, 107; July, 1891.

S. occidentale (syn. of *meridionale*).

A Tachinid Bred from a Chrysalis. Canadian Entomologist, xxIII, 206, 207; Oct., 1891.

Meigenia websteri n. sp. (syn. of *Frontina frenchii*).

An Exorista Parasitic on Lagoa opercularis. Entomological News, II, 159, 160; Oct., 1891.

Exorista lagoæ n. sp., from Mexico.

A Parasite of the Fall Web-worm. Psyche, VI, 176, 177; Nov., 1891.

Meigenia hyphantriæ n. sp.; afterwards referred to *Hyphantrophaga* n. gen. as type.

A Tachinid Parasite of Chrysophanus dione. Entomological News, II, 197-199; Dec., 1891.

Exorista chrysophani n. sp. (syn. of *E. confinis*).

A Tachinid Parasite of the Oak Unicorn Prominent (*Schizura unicornis*).
Psyche, vi, 187, 188; Dec., 1891.

Masicera schizuræ n. sp. (syn. of *Frontina frenchii*).

Note on the Genera *Triptotricha* and *Agnotomyia*. Proc. Ent. Soc. Wash.,
ii, 117, 118, 1891.

No new species. "

The North American Genera of Calyptrate Muscidae.

I. Proc. Ent. Soc. Wash., ii, 89-100; 1891.

II. Trans. Amer. Ent. Soc., xix, 133-144; 1892.

III. Trans. Amer. Ent. Soc., xix, 273-278; 1892.

IV. Trans. Amer. Ent. Soc., xix, 279-284; 1892.

V. Trans. Amer. Ent. Soc., xix, 290-294; 1892.

Tables of genera, with notes and references; no new species.

Notes on North American Tachinidæ, with Descriptions of New Species.

I. Proc. Ent. Soc. Wash., ii, 134-146; 1891.

II. Trans. Amer. Ent. Soc., xviii, 249-382; 1891.

III. Trans. Amer. Ent. Soc., xix, 88-132; 1892.

IV. Entomological News, iii, 80, 81 and 129, 130; 1892.

V. Canadian Entomologist, xxiv, 64-70 and 77-82; 1892.

VI. Canadian Entomologist, xxiv, 165-172; 1892.

VII. Trans. Amer. Ent. Soc., xix, 284-289; 1892.

Many new genera and species.

Description of a Sarcophagid Bred from *Helix*. Psyche, vi, 220, 221; Feb.,
1892.

Sarc. heliciis n. sp.

A Tachinid Bred from *Protoparce jamaicensis* Butler in Jamaica. Jour.
Inst. of Jamaica, i, No. 2, p. 70; Feb., 1892.

Masicera protoparcis n. sp. (syn. of *Sturmia distincta*).

A New Genus of Tachinidæ. Psyche, vi, 247; Apr., 1892.

Hyphantrophaga n. gen.; type *hyphantriæ* TOWNSEND.

A Tachinid Parasite of *Eucaterva variaria* Grote, and Other Notes. Psyche,
vi, 258, 259; Apr., 1892.

Hyphantrophaga hyphantriæ TOWNS.; no new species.

A Sarcophagid Parasite of *Cimbex americana*. Canadian Entomologist,
xxiv, 126, 127; May, 1892.

Sarcophaga cimbicis, n. sp.

New Jamaica Tachinidæ. I. Entomological News, iii, 146, 147; June, 1892.

Pseudohystricia exilis, n. sp.

The North American Genera of Nemocerous Diptera. Trans. Amer. Ent.
Soc., xix, 144-160; June, 1892.

Tables of genera, with notes and references; no new species.

An *Aporia* Bred from *Limacodes* sp. Psyche, vi, 275, 276; June, 1892.

Aporia limacodis, n. sp. (syn. of *Macquartia pristis*).

Descriptions of Oestrid Larvæ taken from the Jack-rabbit and the Cotton-
tail. Psyche, vi, 298-300; June, 1892.

Two species of larvæ, one identified (1893, 541 and 1897, 8, 9) as *Cute-
rebra fontinella* CLARK, and later as a new species, *C. lepusculi*; the other
was described as *Dermatobia* sp., and afterward referred to *Bogeria*. See
also Ins. Life, v, 137.

- Introduction to Brauer and von Bergenstamm's Vorarbeiten, etc. *Psyche*, vi, 313-316 and 329-332; 1892.
 A translation of the introduction mentioned. Contains some interesting generalizations; no species mentioned.
- On the So-Called Throat Bot. *Entomological News*, III, 227; Nov., 1892.
 Notes on *Gastrophilus nasalis* LINN.
- Preliminary Grouping of Sapromyza, with one New Species. *Canadian Entomologist*, xxiv, 301-304; Dec., 1892.
S. ocellaris, n. sp. (syn. of *vulgaris* FITCH).
- A Dexiid Parasite of a Longicorn Beetle. *Journal of the Institute of Jamaica*, I, pt. 3, 1892.
Sarcodexia sternodontis n. gen. and sp., from Jamaica.
- A Scorpion Parasite. *Jour. Inst. of Jamaica*, I; Dec., 1892.
 Same species as preceding.
- A General Summary of the Known Larval Food-habits of the Acalyprate Muscidae. *Canadian Entomologist*, xxv, 10-16; Jan., 1893.
 A useful compilation; no new species.
- An Interesting Blood-sucking Gnat. *Psyche*, vi, 369-371; Jan., 1893.
Tersesthes torrens n. gen. and sp., from New Mexico.
- The Pupa of *Argyramœba œdipus*. *American Naturalist*, Jan., 1893, p. 60.
- A Trypetid Bred from Galls of *Bigelovia*. *Canadian Entomologist*, xxv, 48; Feb., 1893.
Eurosta bigeloviae n. sp.; on p. 112 Cockerell calls attention to the fact that the species had already been described by himself as *Trypeta bigeloviae*.
- On the Geographic Range and Distribution of the Genus *Trichopoda*. *Entomological News*, iv, 69-71; March, 1893.
 No new species.
- Description of a new and Interesting Phasiid-like Genus of Tachinidæ, s. str. *Psyche*, vi, 429, 430; April, 1893.
Hyalomyodes wecdii n. gen. and sp. (syn. of *H. triangulifera* Lw.).
- The Puparium of *Blepharipeza*. *American Naturalist*, April, 1893, 402.
- A New Trypetid from Chacaltianguis, Mex., with note on *Trypeta amabilis* Loew. *Zoe*, iv, 13-16; Apr., 1893.
Euaresta latipennis n. sp.
- On a Species of *Simulium* from the Grand Canyon of the Colorado. *Trans. Amer. Ent. Soc.*, xx, 45-48. figs.; Apr., 1893.
 Larva and pupa of *Simulium* sp., not determined.

- Description of the Pupa of *Toxophora virgata* O. S. *Psyche*, vi, 455-457; May, 1893.
- Note on *Atropharista jurinoides*. *Psyche*, vi, 461; May, 1893.
- A Nycteribid from a New Mexican Bat. *Journal of the New York Entomological Society*, I, 79, 80; June, 1893.
Nycteribia antrozoi n. sp.
- Hosts of North American Tachinidæ, etc. Paper I. *Psyche*, vi, 466-468; June, 1893.

Breeding records of 27 species, reared by Professor S. A. Forbes; *Sarcophaga leucaniæ* n. sp. "if found to be undescribed."

Comments on Mr. Van der Wulp's Recent Diagnoses of New Species of Mexican Muscidae. Canadian Entomologist, xxv, 164-168; July, 1893.

An attempt to interpret Van der Wulp's too brief diagnoses, without the material to throw any particular light on them; an altogether superfluous piece of meddling. The changes of generic names are both uncalled for.

A Cabbage-like Cecidomyidous Gall on *Bigelovia*. Psyche, vi, 490; July, 1893. *Cecidomyia bigeloviae-brassicoides* n. sp.; gall only.

Further Notes on the Cotton-tail Bot. Insect Life, v, 317-320; July, 1893.

Cuterebra fontinella CLARK redescribed. This afterward proved to be a new species and was named *C. lepusculi* in Psyche, Jan., 1897, 8, 9.

Notes on Some Jamaican Muscidae. Journal of the Institute of Jamaica, I, No. 7; Aug., 1893.

No new species.

Dipterous Parasites in Their Relation to Economic Entomology. Insect Life, vi, 201-204; Dec., 1893.

No new species.

Notes on some Cecidomyidæ of the Vicinity of Washington, D. C. Proc. Ent. Soc. Wash., II, No. 4, pp. 388-390; 1893.

Three species mentioned; none new.

Notes on Certain Cecidomyidous Galls on *Cornus*. Proc. Ent. Soc. Wash., II, 390, 1893.

Describes the gall of the species afterward named *Cecidomyia clavula* by Beutenmüller.

Occurrence of *Oecacta furens* Poey in Jamaica. Jour. Inst. Jamaica, I, 381, 1893.

A Tachinid Reared from the Cells of a Mud-dauber Wasp. Bulletin Ohio Exp. Station, Technical series I, 165, 166; 1893.

Sarcomacronychia trypoxylonis n. sp., from Ohio (syn. of *Pachyophthalmus floridensis* TOWNS.).

A very Remarkable and Anomalous Syrphid, with Peculiarly Developed Hind Tarsi. Canadian Entomologist, xxvi, 50-52, figs.; Feb., 1894.

Calotarsa ornatipes n. gen. and spec. It belongs to the Platypezidae, and the genus is but little different from *Platypeza*. Townsend published another note on same, p. 102.

New Santo Domingo Tachinidæ. Jour. New York Entomological Society, II, 78, 79; June, 1894.

Trichopoda subciliipes n. sp. and *Ocypterosiphon willistoni* n. gen. and species; the latter is a syn. of *Besikia ælops*, according to Coquillett.

A Cone-like Cecidomyid Gall on *Bigelovia*. Psyche, VII, 176; Dec., 1894.

Cecidomyia bigeloviae-strobiloides n. sp.; gall only.

On the Horse-Flies of New Mexico and Arizona. Kansas Academy of Science, 1894, 133-135.

Diachlorus guttatus n. sp., afterward referred to *Tabanus*.

Note on a Peculiar Acalyptrate Muscid found near Turkey Tanks, Ariz. Kansas Acad. of Science, 1894, 135, 136.

Micropeza turcana n. sp.

Contributions to the Dipterology of North America.

I. Syrphidæ. Trans. Amer. Ent. Soc., xxii, 33-55; March, 1895.

Mentions 75 species of Syrphidæ, 8 new.

II. Tabanidæ, Conopidæ, Tachinidæ, etc. Ibid., 55-80.

Notes on many species of these families, 9 new.

Notes on The Diptera of Baja California. Proc. Cal. Acad. Acad. Sci., ser. 2, vol. iv, 593-620; Apr., 1895.

Occurrence and notes on many species; 14 new.

Note.—Baja California is Lower California, and is so cited in the catalogue. It is in Mexico.

On the Cabbage-shaped Gall of *Cecidomyia salicis-brassicoides*, and its Occupants. Canadian Entomologist, xxvii, 205-207; Aug., 1895.

Description of gall and its larva, etc.

On the Correlation of Habits in Nemocerous and Brachycerous Diptera between Aquatic Larvæ and Blood-sucking Adult Females. Jour. N. Y. Ent. Soc., iii, 134-136; Sept., 1895.

No new species.

On the Bio-geography of Mexico, Texas, New Mexico and Arizona. Texas Acad. Science, Dec., 1895, pp. 77-96 and June, 1897, pp. 33-86.

The second part contains some local lists of Diptera; all or nearly all are printed in other papers.

Notes on the Species of Exorista of Temperate North America. Psyche, vii, 329-331; Jan., 1896.

E. nigripalpis n. sp.

On a Collection of Diptera from the Lowlands of Rio Nautla in the State of Vera Cruz. Annals and Mag. of Nat. Hist., ser. 6, vol. xix, 15-34, and xx, 20-33 and 272-291; January, July and September, 1897.

16 new species; a few varieties named; notes on a number of species.

Diptera from the Sacramento and White Mountains in Southern New Mexico. Annals and Mag. of Nat. Hist., ser. 6, vol. xix; Feb., 1897.

Pipiza occidentalis, *Milesia bella*, *Echinomyia victoria* and *neglecta*, new; the last two are assigned by Coquillett to *Archytas lateralis* and *Peleteria tessellata*.

Diptera from Yucatan and Campeche. I. Canadian Entomologist, xxix, 197-199; Aug., 1897.

Tabanus campechianus and *yucatanus* n. spp.; notes on others.

Diptera from the Lower Rio Grande or Tamaulipan Region of Texas. Journal of the New York Entomological Society, v, 171-190; Dec., 1897.

Simulium tamaulipense, *Baccha tropicalis*, *Zodion albonotatum* n. spp.; notes on others.

Part II of same, vi, 50-52; 1898; contains one new sp., *Volucella tamaulipana*, with notes on other species.

Description of the Bot-fly of the Cotton-tail Rabbit in New Mexico. Psyche, viii, 8, 9; Jan., 1897.

Cuterebra lepusculi n. sp.

Diptera from the Head Waters of the Gila River. I. Psyche, viii, 38-41; Mar., 1897.

Chrysops ceras and *facialis*, *Myobia gilensis* n. spp., and a few notes.

II. Ibid., pp. 92-94; July, 1897.

Tabanus gilanus and *intensis* n. spp.; notes on three species.

Some characteristic maritime Diptera from the South End of Padre Island and the adjacent Texas Coast. I. Entomological News, IX, 167-169; Sept., 1898.

Tabanus maritimus and *Lipochata texensis* (syn. of *slossonæ*) n. spp.

Diptera from the Organ Mountains of Southern New Mexico.

I. Psyche, VIII, 126-128; Oct., 1897.

Notes on four species, none new.

II. Psyche, VIII, 267-269; Oct., 1898.

Notes on seven species; *Gadiopsis monticola*, new.

Diptera from the White Sands on the Tularosa Plains of Southern New Mexico. I. Psyche, VIII, 138-140; Nov., 1897.

A few notes on variations of species, etc.; no new species.

Diptera from the Mesilla Valley of the Rio Grande in New Mexico.

I. Psyche, VIII, 147-150; Dec., 1897.

Notes on a dozen species, none new.

II. Ibid., 211, 212; May, 1898.

Notes on three or four species, none new.

New and Little-known Diptera from the Organ Mountains and Vicinity in New Mexico. Transactions of the American Entomological Society, XXVII, 159-164; 1901.

Four new species; notes on a number of old ones.

A Bot-like Parasite of a Bird. Journal Institute of Jamaica.

Not seen; I am unable to complete the reference.

Van der Wulp, Frederick M.

Eenige noordamerikaansche Diptera. Tijdschrift voor Entomologie, x, 125-164, 3 pl.; 1867 (Also cited as vol. II, sec. series; Osten uses this form, and I have followed him, but in later work Van der Wulp cites it as vol. X).

30 new N. A. spp., 18 European species recognized, and 24 described N. A. spp. identified, all from Wisconsin.

Nog iets over Noordamerikaansche Diptera. Tijdschrift v. Ent., XII (or IV, sec. ser.), 80-86; 1869.

Five new N. A. species.

Opmerkingen omtrent Uitlandische Asiliden. Tijdschrift v. Ent., XIII (or V, sec. ser.), sep. 11 pp., 1 pl.; 1870.

Stenopogon ochraceus n. sp., from North America.

Amerikaansche Diptera.

No. 1. Tijdsch. v. Ent., XXIX, 141-168, 1 col. plate; 1881.

No. 2. Tijdsch. v. Ent., XXV, 77-136, 2 col. plates; 1883.

No. 3. Tijdsch. v. Ent., XXVI, 1-60, 2 col. plates; 1883.

These contain 14 new species from North America, with notes on about 127 other species.

Notes from the Leyden Museum. IV, 73-93, 1882.

Anthrax mclasma and *Jurinia nitida* n. spp., the former redesc. in Amer. Dipt., No. 2.

Chrysops geminata Wied. and Macq. Wiener Ent. Zeitung, III, 139-141, 1884.

Chrysops crassicornis n. sp., from Guanaxuato, Mex.

Quelques Diptères Exotiques. Comptes Rendus de la Soc. Ent. Belgique, XXVII, p. cexci, 1884.

Hystricia cyanciventris n. sp., from Guanaxuato, Mex.

Nalezing over Amerikaansche Diptera. Tijdsch. v. Ent., xxvii, 1884; sep. 3 pp.

Notes on four described species from New England.

Langwerpige Dexinen-Formen. Tijdsch. v. Ent., xxviii, 189-200, 1 col. plate; 1885.

Euantha and *Leptoda* n. gen.; the species were previously described.

Sarcophagula, een nieuw Geslacht der Sarcophaginae. Tijdsch. v. Ent., xxx, 173, 174, 1887.

No new species.

Biologia Centrali-Americana. Diptera. vol. ii. Pp. 1-489, 13 col. plates, title-page, introduction, and index of plate-figures. London; April, 1888, to May, 1903. The date is printed at the bottom of every eighth page.

Many new genera and species.

Eenige Uitlandische Diptera. Tijdschr. v. Ent., xxxiv, 193-218, 1891.

Volucella testacea n. sp., from Curaçao.

Diagnoses of New Mexican Muscidae. Tijdsch. v. Ent., xxxv, 183-195, 1892.

Four genera and about 60 species new; all described in full in subsequent parts of Biologia.

Vanhoffen, E.

Fauna und Flora Grönlands. Grönlands-Expedition der Gesell. für Erdkunde zu Berlin, 1891-93, unter Leitung v. Erich v. Drygalski. Vol. II, 1, 1897.

Contains a list of Greenland Diptera, compiled, pp. 156, 157. This is reproduced by Lundbeck, Dipt. Groenl., II, 314, correcting nomenclature.

Verrall, G. H.

British Flies. Vol. VIII: Platypozidae, Pipunculidae and Syrphidae. London, Gurney and Jackson, 1901. With catalogue and bibliography in appendix. Pp. 691 and 121; many figures in the text.

This fine work contains descriptions of many genera and a considerable number of species, common to Great Britain and North America.

Walker, Francis.

List of the Specimens of Dipterous Insects in the Collection of the British Museum. Four parts and three supplements. London; 1848-55. The dates are as follows: Part I, 1848; II, III, and IV, 1849; Suppl. I, II, 1854; III, 1855.

Many new species.

Note.—In the Osten Sacken catalogue occur many species of Walker with the locality "Huds. B. Terr." These are cited by Walker as "St. Martin's Falls, Albany River, Hudson Bay." I requested Dr. Jas. Fletcher to find this locality for me on the modern maps; he found it now named Martin's Falls, and located in longitude 86.30, latitude 51.30,—in other words, about 200 miles north of the northern arch of Lake Superior.

Insecta Saundersiana. Diptera. Five Parts, with eight plates by Westwood. London, 1850-56. Dates as follows: Part I in 1850, II, in 1851, III and IV in 1852, and V in 1856.

Many species and a few genera.

Characters of Undescribed Diptera in the Collection of Wm. Saunders. Transactions of the Entomological Society [of London], new series, IV, 1857, pp. 119-158 and 190-235; V, 1858, 268-334.

Many new species, mostly described in a very brief and unsatisfactory manner.

On Some Insects of Nova Scotia and Canada. Canadian Entomologist, III, 141; Oct., 1871.

A short list of Diptera occurring in Nova Scotia; no new species.

In the appendix to "The Naturalist in Vancouver Island and British Columbia," by J. K. Lord (London, 1866, 2 vols.), Walker described four new species of Diptera from those regions—*Culex pinguis*, *Laphria columbica*, *Cuterebra approximata* and *Eurygaster septentrionalis*.

Note.—Walker's descriptions are notoriously bad. Osten Sacken, Catalogue, 1878, preface, p. xvi, has enlarged a little upon this subject. It was the policy of Osten Sacken and Loew not to adopt Walker's names unless, as is very rarely the case, the description contains some positive mark of identification. In their view, it was preferable to describe as a new species in doubtful cases. Some recent American workers have followed a different principle, and recognized Walker's species on mere preponderance of evidence; this I take it is especially true of Mr. Coquillett. It is desirable that each student of the order examine the descriptions for himself, and form his own conclusions as to the recognizability of any particular one. Furthermore, it is very desirable, in case that one of these specific names be resurrected, that the species be redescribed at the same time; otherwise in most cases other entomologists will be completely in the dark as to the species referred to, and confusion will be increased. This pending a fuller knowledge of the type, which must some time be arrived at.

Walsh, Benjamin D.

Insects Injurious to Vegetation in Illinois. Rock Island, 1861 (pamphlet).

Exorista (Senometopia) militaris n. sp. (syn. of *Winthemia quadripustulata*).

On certain Remarkable or Exceptional Larvæ, etc. Boston Society of Nat. Hist., ix, 286-308, 1864.

Biologia Centrali-Americana. Diptera, vol. 1. Family Empidæ, pp. 366-376; Dec., 1901.

Eighteen new species.

Whitney, C. P.

New Species of Tabanidæ. Canadian Entomologist, XI, 35-38, 1879.

Six species; see also note by Burgess, same volume, p. 80.

Wiedemann, C. R. W.

Diptera Exotica. Vol. 1, Kilia, 1821.

This is a Latin work; on the completion of this first volume, it was decided to change to German, and all of this part is incorporated, in German, in his principal work, "Aussereuropäische Zweifl. Insekten."

Analecta Entomologica. Kilia, 1824.

Not seen. Contains 154 Diptera in all, comparatively few from North America.

Aussereuropäische Zweiflügelige Insekten. 2 vols., with 12 plates; Hamm, 1828 and 1830.

This great work contains very many North American Diptera. One of its objects was to elucidate the species of Fabricius, and nearly all the Diptera of that entomologist are redescribed; the original descriptions are also quoted in full. Another valuable feature is the redescription of a large number of Say's species, from material set on by Say himself, presumably typical in most cases. Wiedemann changed some of the specific names of

these; where there seemed to be no valid reason for the alteration, I have followed Say in nomenclature. In most cases of redescription, I omit the locality, as it is the same as in Say's description.

Achias, Dipterorum Genus a Fabricio conditum. Kiliae, 1830; 16 pp., 1 plate.
Sphyracephala (Achias) brevicornis SAY, redesc. and figured.

Monographia Generis Midarum. Nova Acta Academiae Naturae Curiosorum, xv, 19-56, 3 col. plates; 1831.

Four new species from North America.

Notes on *Dichocera* and others.
- A New Genus of Hippoboscidæ. Entomological News, VII, 184, 185; June, 1896.
Brachypteromyia femorata n. g. and sp., from Wyoming; in a note at end, 12 genera not previously reported from North America are mentioned.
- Manual of North American Diptera. Second edition, rewritten and enlarged. New Haven, Conn., 1896; James T. Hathaway. Pp. liv. and 167.

Anatomy of Diptera, bibliography, table of families, definition of each family, and table of North American genera for each family except Tachinidae and Dexiidae. A few generic names are altered, or new ones proposed, on account of preoccupation. I have omitted all references to this work, except where names are changed, because I assume that all workers with Diptera are familiar with it. To the beginner it is indispensable, and to the advanced worker a great convenience.

On the Diptera of St. Vincent. Transactions of the Entomological Society of London, 1896, pt. 3, pp. 253-446, 7 plates.

Many new genera and species from this island, which is far south in the Lesser Antilles.

Diptera Brasiliæna. iv. Kans. Univ. Quarterly, vi, 1-12; Jan., 1897.

Notes on *Lipocheta*; some new genera and species from Grenada, W. I.

On the Genus *Thlipsogaster* Rond. Psyche, March, 1899, 331, 332.

The American species are not of this genus.

Notes and Descriptions of Mydæidæ. Kansas Acad. Science, 1897, 53-58.

Mydas quadrilineatus and *Ecthypus townsendi*, new North American species; a few South American species.

Note.—An admirable feature of Williston's work, which does not show fairly in the above list, is the attention he has given to identifying and redescribing the species of other writers. In all his longer papers this is a prominent part, frequently occupying as much space as the new descriptions, and requiring more time than they in preparation.

Woodworth, Chas. W.

Gonia senilis Will., Psyche, v, 43, 1889.

Zetterstedt, J. W.

Diptera Scandinaviæ, disposita et descripta. Lundæ, 1842-1860.

While this work treats only of Scandinavian species, there are many which are circum-polar. Zetterstedt's earlier work, *Insecta Lapponica*, is mostly reproduced in this.

STENOXENUS.

- COQUILLET, *Ent. News*, x, 60, 1899.
- johnsoni** COQUILLET, loc. cit., fig.—Delaware Water Gap, N. J.
Note.—Mr. Coquillett has founded a new family upon this species, which he calls Stenoxenidae. As but a single female specimen with the antennæ broken off has as yet come to light, and it is admittedly related to *Ceratopogon*, it would seem decidedly premature to recognize this family.

TERSESTHES.

- TOWNSEND, *Psyche*, Jan., 1893, 371.
- torrens** TOWNSEND, loc. cit., plate.—Socorro Co., N. M.; the females suck blood.

ERETMOPTERA.

KELLOGG, Biol. Bull., 1, 82, 1900.

browni KELLOGG, loc. cit., figs.—Monterey, Cal.

Note.—The family name Eretmopteridæ was proposed for this species by Professor Kellogg, but he has since informed me that the larval stages are essentially the same as in Chironomidæ, a family which already includes at least one genus with rudimentary wings; and I have his sanction in placing the species here.

CULICIDÆ.

The discovery that mosquitoes convey malaria, yellow fever, filariasis, and possibly still other diseases, from one human being to another, deserves to rank with the greatest achievements of science. The immediate result, very naturally, has been an immense increase of interest in this family of Diptera, so that new

work is at present being published very rapidly. Theobald's Monograph, noticed below, gives a bibliography up to Feb., 1903, including early articles on the relation of mosquitoes to malaria. I enumerate a few important publications.

On Malaria, etc.

- Riley, Amer. Nat., xvii, 549, May, 1883, mentions the theory of Dr. A. Kink, Columbia University, that mosquitoes cause malaria.
 Nuttall, Dr. Geo. H., Johns Hopkins Hospital Reports, viii.
 Finlay, Chas. J., M.D., Psyche, July, 1899.
 Berkeley, Dr. W. N., N. Y. Medical Record, Dec. 23, 1899.
 Woldert, Dr. Albert, Jour. Amer. Medical Assn., Feb. 10, 1900.
 Bums, Dr. Wm. B., Memphis Medical Monthly, March, 1900.
 Ross, Major Ronald, Nature, March 29, 1900.
 Manson, Dr. Patrick, Popular Science Monthly, July, 1900.
 Celli, "Malaria According to the New Researches," trans. by Eyre. Longmans, Green and Co. London, 1900.
 Howard, "Mosquitoes." McClure, Phillips & Co. New York, 1901.
 Howard, Yearbook of Dept. of Agriculture, 1901, 177-192; Farmers' Bulletin 155, Dept. of Agriculture.

On Classification.

- F. Lynch Arribalzaga, Revista Mus. de la Plata, i, 345-417, 4 pl., 1891; the Argentine species.
 Ficalbi, Bull. Soc. Ent. Ital., 1892-1896, a series of articles revising the European species; he published another general work in vol. xxxi, 1899.
 Lintner, 12th N. Y. Rept., 319-335, 1897, popular account.
 Coquillett, Circular No. 40, n. ser., Div. of Ent.—a brief synopsis of the species known in the United States; published in a second edition, with a slight addition; also published in Bull. 25, n. ser., Div. of Ent.
 Herrick, Bull. 74, Miss. Ex. Sta.
 Garman, Bull. 96, Ky. Ex. Sta.
 Luggler, 2d Rept. Ent. Minn., 182-195, with good figs.
 Giles, Handb. of Gnats. John Bale Sons and Danielsson, Limited. London, 1900.

A second edition, entirely rewritten, was published in 1902; in its new form, the systematic part is mainly an abridgement of the following.

- Theobald, A Monograph of the Culicidæ. Printed by the British Museum, 1901-3. Three volumes, with many figures and maps, and a fourth volume of plates, mostly colored. Contains a vast amount of information on distribution, habits in larval and mature stages, etc. The systematic part is based on the collections in the British Museum.
 Johannsen, Bull. 68, N. Y. State Mus., 388-429, 1903, tables of genera of larvæ, pupæ and adults, etc.

On Larvæ.

- Dyar, Proc. Ent. Soc. Wash., v, 51 and 145, 1902 and 1903, analytical tables of the known larvæ from the United States.
 Kellogg, Ent. News, x, 102, length of larval period.
 Smith, Ent. News, xiii, 198, notes on hibernating stage in various species.
 Morgan and Dupree, Bull. 40, n. ser., Div. of Ent., 88, notes on hibernation and development of several species.

See also recent smaller papers by Coquillett, Smith and Dyar, as mentioned under the various species.

Note.—The nomenclature adopted is generally that of Theobald.

ANOPHELES.

- MEIGEN, Syst. Besch., i, 10, 1818.
 DESVOIDY, Mem. Soc. Hist. Nat. Paris, III, 410, 1827.

CECIDOMYIDÆ.

There are peculiar difficulties in the task of properly representing this family in the present Catalogue. On account of the fact that many species make galls on plants, we encounter here a mixture of botanical and zoological science, which has tended to separate the study of the Cecidomyidæ from that of the other Diptera. Only those who have made a special study of the family are at all informed about it. Unfortunately, not one of the present generation of American entomologists has given this special attention.

To make matters ten-fold worse, the European specialists in Cecidomyidæ

have come to a practical unanimity in accepting certain principles of nomenclature which radically change the generic names used by Osten Sacken, who followed Loew. The change hinges on the application of the name *Cecidomyia* (disregarding for the time being the new genera which have naturally come into existence), and will be found fully discussed in the following papers:

KARSCH, Revision der Gallmücken, Münster, 1878, 10-20.

OSTEN SACKEN, Catalogue, 215, note 1, 1878.

RÜBSAAMEN, Berl. Ent. Zeitsch., XXXVII, 324-327, 1892.

KIEFFER, Annales Soc. Ent. France, 1900, 436.

OSTEN SACKEN, Ent. Mo. Mag., 1901, 40-43.

The practical effect of the changes adopted by Karsch, Rübsaamen and Kieffer is to apply the name *Cecidomyia* to the *Diplosis* of Osten Sacken's Catalogue, and to divide up his *Cecidomyia* between *Rhabdophaga* and *Dasyneura*. As nearly all the species in the family were referred to *Cecidomyia* and *Diplosis* in Osten Sacken's Catalogue, the adoption of the changed nomenclature will leave few members of the family in the same genera to which Osten Sacken referred them.

Realizing the immense practical disadvantage of such an overturning of names, I should have been well content to let the problems of nomenclature lie in abeyance; but they have been already threshed out in Europe, and the conclusions reached and put in use there cannot be ignored.

After much consideration, I can find no better course to follow than to adopt the generic distribution of Kertész, in his *Catalogus Dipteriorum*, vol. II. Not having much knowledge of the family myself, and not being able to consult an American authority on it, I have carried out this plan. I take occasion to remark, however, that Osten Sacken thoroughly disapproves of the changes, and has given, in the last reference above, his reasons for his views.

Some of the species still included under *Cecidomyia* doubtless belong to other established genera, but are not yet sufficiently described to allow of a positive reference; in fact, many of the species need further study, and at best the present scheme must be considerably modified by more thorough investigation. No family of the Diptera offers greater inducements to a worker who will patiently carry on the biological and systematic study of it conjointly.

The status of those names which have been applied to larvæ and galls only, or to pupæ, larvæ and galls, or even to galls alone, need not be settled at the present time. I have placed all such names in a division by themselves. My opinion is that when the adult is at last described, the same old specific name should be used, unless impracticable, but that thenceforth the description of the adult should be regarded as the real description of the species. Meanwhile, it is very convenient, and thoroughly in accord with the objects of nomenclature, that the provisional name should stand.

A few species described since Kertész have been added, in harmony with his general distribution.

Cross-references have not been thought necessary, considering the small size of the family.

The European literature is voluminous; Kieffer gives over 800 references. His *Monographie des Cécidomyides d'Europe et d'Algérie*, in *Annales Soc. Ent. France*, 1900, 181-472, 30 plates, is indispensable to any student of the family. I add here only a few references.

COMSTOCK, Dept. Agric. Rept., 1880, 270, 271, list of references on parasitic and inquilinous species.

BRÄUER, Zweifl. d. Kaiserl. Mus., III, 1883, 20 and 53, references to descriptions of larvæ.

MIK, Wien. Ent. Zeit., xvi, 284-289, on mounting and describing specimens.

OSTEN SACKEN, Western Dipt., 192, 1877, describes several galls without naming them.

MRS. SLOSSON, Ent. News, vii, 238, a species attaching itself to wing of a lace-wing fly to be carried about.

SMITH, Dept. Agric. Rept., 1884, 396-398, a species infesting pears in Conn.

RILEY and HOWARD, Ins. Life, iii, 294, note on a species destroying buds of roses grown under glass—see *Neocerata rhodophaga*.

TRICHOPTEROMYIA.

WILLISTON, Trans. Ent. Soc. Lond., 1896, 255.

modesta WILLISTON, loc. cit., pl. viii, f. 6.—St. Vincent, W. I.

N. J.—Smith Cat.
- willistonii** COCKERELL, Ann. and Mag. Nat. Hist., ser. VII, vol. II, 327.—N. M.; bred from *Atriplex canescens*.

RHABDOPHAGA.

- WESTWOOD, Gardener's Chronicle, 1847, 588.
H. LOEW, Dipt. Beitr., IV, 21, 1850 (*Cecidomyia* MEIG., in part).
RONDANI, Atti Soc. Sc. Nat. Milano, II, 286, 1860 (id.).
RÜBSAAMEN, Berl. Ent. Zeitsch., XXXVII, 346 (*Dichelomyia*, in part).
KIEFFER, Bull. Soc. Ent. France, 1896, 189 (*Berticaria*).
- batatas** WALSH, Proc. Ent. Soc. Phil., III, 601; VI, 225 (both *Cecidomyia salicis-batatas*).—Rock Id., Ill.; makes a potato-like, polythalamous gall on *Salix humilis* and other species.
BERGENSTAMM and LOEW, Synopsis, 71, note.
N. J.—Smith Cat.
- brassicoides** WALSH, Proc. Ent. Soc. Phil., III, 577; Amer. Entomologist, 1, 105, f. 84 (both *Cecidomyia salicis-brassicoides*).—Rock Id., Ill.; makes a cabbage-like gall on *Salix longifolia*.
PACKARD, Guide to the Study of Insects, 377, f. 282 (id.).—Ill., etc.
TOWNSEND, Canad. Ent., XXVII, 205, oc. in Arizona; parasites, etc. (id.).
N. J.—Smith Cat.
- cornu** WALSH, Proc. Ent. Soc. Phil., III, 590, gall and larva (*Cecidomyia salicis-cornu*); VI, 224, adult (id.).—Rock Id., Ill.; gall a deformed, hornlike lateral bud of *Salix humilis*.
- gnaphaloides** WALSH, Proc. Ent. Soc. Phil., III, 583, all stages (*Cecidomyia salicis-gnaphaloides*).—Rock Id., Ill.; gall a rather open cone on *Salix humilis*.
Additional notes, op. cit., VI, 223.
- rhodoides** WALSH, Proc. Ent. Soc. Phil., III, 586, all stages (*Cecidomyia salicis-rhodoides*).—Rock Id., Ill.; rose-like single gall on tip of twig of *Salix humilis*.
Additional note, VI, 224.
- salicis** SCHRANK, Fauna Boica, III, 69, 1803 (*Tipula*).—Europe.
LOEW, Dipt. Beitr., IV, 37 (*Cecidomyia*).
WINNERTZ, Linnæa Ent., VIII, 215 (id.).
SCHINER, Fauna Austr., II, 370 (id.).
RÜBSAAMEN, Berl. Ent. Zeitsch., XXXVII, 347, pl. VIII, XII, XV, and XVIII (*Dichelomyia*).
FELT, 17th N. Y. Rept., 1902, 750, figs. and pl. II, oc. in N. Y.; "produces many-celled galls in the stems of small willows."

siliqua WALSH, Proc. Ent. Soc. Phil., III, 591; VI, 224 (both *Cecidomyia salicis-siliqua*).—Rock Id., Ill.; makes a pod-like gall on *Salix humilis*, *cordata*, and *discolor*.

BAKER, Ent. News, VI, 173, oc. at Fort Collins, Col., on *S. amygdaloides*.

strobiliscus WALSH, Proc. Ent. Soc. Phil., III, 582, gall only; VI, 223 (both *Cecidomyia salicis-strobiliscus*).—Winnebago Co., Ill.; a pine-cone-like gall on *Salix rostrata*.

✓ **strobiloides** WALSH, Proc. Ent. Soc. Phil., III, 580, all stages (*Cecidomyia salicis-strobiloides*).—Rock Id., Ill.; makes a pine-cone-like gall on *Salix rostrata*.

OSTEN SACKEN, Mon. N. A. Dipt., I, 203, gall (id.).

RILEY and WALSH, Amer. Entomologist, I, 105, f. 82 (id.).

BERGENSTAMM and LÖW, Synopsis, 71, suggest that *rhodoides*, *gnaphaloides*, *strobiliscus* and *coryloides* may all be the same as this; quoted by Osten Sacken, Cat., 215.

PETTIT, Bull. 186, Mich. Ex. Sta., oc. at Chatham, Northern Mich. (id.).

N. J.—Smith Cat.

DASYNEURA.

RONDANI, Nuovi Annal. Sc. Nat. Bologna, ser. 2, VI, 12, 1846; op. cit., 371, note (*Perrisia*).

LOEW, Dipt. Beitr., IV, 21, 1850 (*Cecidomyia* MEIG., in part).

RÜBSAAMEN, Berl. Ent. Zeitsch., XXXVII, 346, 1892 (*Dichelomyia*, in part).

grossulariæ FITCH, Trans. N. Y. State Agl. Soc., 1854, 880; 1st N. Y. Rept., 176; 2d Rept., 150; 3d Rept., 437 (all *Cecidomyia*).—N. Y.; larvæ in gooseberries

hirtipes OSTEN SACKEN, Mon. N. A. Dipt., I, 195 (*Cecidomyia*).—D. C., on *Solidago*.

leguminicola LINTNER, Canad. Ent., 1879, 44 and 121; Amer. Nat., 1879, 190 (*trifolii*); Rept. Ent. Soc. Ont., 1879, 128; 5th N. Y. Rept., 262; 13th Rept., 359 (all *Cecidomyia*).—N. Y.; larvæ in clover heads, destroying the seed; "The Clover-seed Midge."

COMSTOCK, Rept. Dept. Agric., 1879, 193 (id.).

SAUNDERS, Rept. Ent. Soc. Ont., 1881, 38, fig. (id.).

 RÜBSAAMEN, Berl. Ent. Zeitsch., XXXVII, 377, pl. VII and XII.

MAYETIOLA.

KIEFFER, Miscellanea Entomologica, Jan., 1896; Wien. Ent. Zeit., xv, 89, 1896.

Note.—The only North American representative is the well-known "Hessian Fly," so-called from the supposition that it was introduced from Europe along with the Hessian soldiers in the Revolution. It has uniformly been referred to the genus *Cecidomyia* in the past by American writers. The larva injures young wheat plants; it is found between the stalk and the sheathing portion of one of the lower leaves.

The literature is very voluminous. Kertész, in his Catalogue, II, 76, gives three pages of references; Osborn, in Bull. 16, mentioned below, gives a far more lengthy list. I give a few of the early references, paying more attention to the newer publications, since the time of Osborn's paper. From the first, the articles are biological and economic in their scope. The European references are omitted here.

- destructor SAY, Jour. Acad. Sci. Phil., 1, 45, pl. III, f. 1-3; Compl. Works, I, 4—Eastern U. S.
 FITCH, Amer. Quart. Jour. Ag. and Sci., IV, 244-264, 1846; v, 1-27, 1847; revised and republished, Trans. N. Y. State Ag. Soc., 1846, 316-373, 1 pl.; 3d N. Y. Rept., 133-144; 7th Rept., 819-830, pl. III, f. 2, 3; 8th Rept., 685, note.
 PACKARD, Bull. 4, U. S. Ent. Comm.; full life hist. and figs.; the same with additions, 3d Rept. U. S. Ent. Comm., 198-248, pl. IV, v; also in the appendix to the third Report is a transl. of an article by Löw and Wagner.
 FORBES, Ill. Rept., 1885, 14; 1886, 21-34; 1890, 54-63.—Ill. and Mississippi Valley generally.

- RÜBSAAMEN, Berl. Ent. Zeitsch., XXXVII, 324, 1892.
- aceris** SHIMER, Trans. Amer. Ent. Soc., I, 281.—Ill.; larva on surface of leaves of *Acer dasycarpum*.
- albovittata** WALSH, Proc. Ent. Soc. Phil., III, 620; VI, 227.—Rock Id., Ill.; inquilinous in galls of *strobiloides*, *strobiliscus*, *brassicoides* and *rhodoides*.
- alticola** COCKERELL, The Entomologist, 1890, 281.—Col.
BAKER, Ent. News, VI, 173, oc. at Ft. Collins, Col., affecting *Artemisia dracunculoides*.
- amyotii** FITCH, 3d N. Y. Rept., 31.—N. Y.
- ananassi** RILEY, Amer. Ent., II, 244, 273, f. 153 (gall) (*cupressi-ananassi*).—Temn., on *Taxodium distichum*.
- annulipes** WALSH, Proc. Ent. Soc. Phil., III, 629 (*Diplosis*).—Rock Id., Ill.; inquilinous in galls of *strobiloides*.
- antennariæ** WHEELER, Proc. Wis. Nat. Hist. Soc., Apr., 1899, 209-212, all stages.—Wis.; galls in terminal buds of *Antennaria plantaginifolia*.
- anthophila** OSTEN SACKEN, Trans. Amer. Ent. Soc., II, 302.—N. Y.; larvæ on *Solidago*.
- atricornis** WALSH, Proc. Ent. Soc. Phil., III, 628 (*Diplosis*).—Rock Id., Ill.; inquilinous in galls of *strobiloides*.
- atriplicicola** COCKERELL, Ann. Mag. Nat. Hist., ser. 7, II, 236 (*Diplosis*).—N. M., on *Atriplex*.
- atricularis** WALSH, Proc. Ent. Soc. Phil., III, 626; VI, 227 (*Diplosis*).—Rock Id., Ill.; bred from galls of *strobiliscus* and from a Cynipid gall.
- bigeloviæ** COCKERELL, West Amer. Scientist, VI, 106; Ent. Mo. Mag., 1890, 324.—Col.; bred from gall of *Eurosta bigeloviæ*—from some knowledge of the various gall-insects of Bigelovia, I think this may be an error, and that it is much more likely to be one of the species with an independent gall.
- bullæ** WALSH, Proc. Ent. Soc. Phil., VI, 228 (*Diplosis helianthi-bullæ*).—Rock Id., Ill.; makes a globular gall on leaves of *Helianthus*.
BRODIE, Biol. Rev. of Ont., I, 1894, 74, oc. in Ont.
- caryæ** OSTEN SACKEN, Mon. N. A. Dipt., I, 191 (*Diplosis*).—D. C.; forms galls on leaves of hickory.
- catalpæ** COMSTOCK, Rept. Dept. Agric., 1880, 266 (*Diplosis*).—D. C.; larvæ in pods of Catalpa. They have the power of jumping.
- caulicola** COQUILLET, Ins. Life, VII, 401 (*Diplosis*).—N. H.; larvæ in stems of garden poppy, *P. nudicaule*.
- chrysopsidis** LOEW, Mon. N. A. Dipt., I, 203, pl. i, f. 1.—D. C.; on *Chrysopsis mariana*.
? TOWNSEND, Proc. Ent. Soc. Wash., II, 389, notes on gall, perhaps not the same.
- coccidarum** COCKERELL, The Entomologist, 1892, 181; Proc. Acad. Nat. Sci. Phil., 1894, 419 (both *Diplosis*).—Jamaica.
COQUILLET, Proc. U. S. N. M., XXII, 249, oc. in Porto Rico; "Bred from larvæ associated with *Dactylopius citri* . . . and bred from *Lecanium hemisphericum*."
- cornuta** WALSH, Proc. Ent. Soc. Phil., III, 625,—gall, pupa, imago.—Rock Id., Ill., on *Salix longifolia*.
- coossæ** SHIMER, Trans. Amer. Ent. Soc., II, 395.—Ill.; on hickory.
- frater** COCKERELL, The Entomologist, 1890, 280.—Colo.

- gleditchiæ** OSTEN SACKEN, Proc. Ent. Soc. Phil., vi, 219.—R. I., on *Gleditchia triacanthos*. N. J.—Smith Cat.
- graminis** FITCH, 6th N. Y. Rept., 832, pl. II, f. 2, name changed and redesc.; Essay on the Wheat-fly (*cerealis*, preoc.).—N. Y.
- ? **grassator** FYLES, Canad. Ent., xiv, 237, fig.; Rept. Ent. Soc. Ont., 1883, 30 (both ? *Diplosis*).—Ontario.
- inimica** FITCH, 6th N. Y. Rept., 830-832.—N. Y.; in wheat heads with tritici.
- maccus** LOEW, Mon. N. A. Dipt., i, 187, pl. I, f. 11, 12 (*Diplosis*).—D. C.
- negundinis** GILLETTE, Psyche, 1890, 392, figs.—Iowa; larvæ produce galls in terminal buds of *Acer negundo*.
- orbitalis** WALSH, Proc. Ent. Soc. Phil., III, 623; vi, 227.—Rock Id., Ill.; inquilinous in galls of *batatas*, *strobiloides* and *brassicoides*; also in those of *Euura salicis-ovum*, a sawfly.
- oxycoccana** JOHNSON, Ent. News, x, 80, 1899, change of name; Ent. News, xi, 324, quotes orig. desc.; "infests the terminal buds of cranberry and loosestrife (*Lysimachia terrestris*)."—N. J.
SMITH, Special Bull. K, N. J. Ex. Sta., 31-37, figs., 1890 (*vaccinii*, preoc.).—N. J.
- parthenicola** COCKERELL, The Entomologist, July, 1900, 201 (*Diplosis*).—N. M.
- pictipes** WILLISTON, Trans. Ent. Soc. Lond., 1896, 253 (*Diplosis*).—St. Vincent, W. I.
- pilulæ** WALSH, Amer. Ent., II, 29, gall only (*quercus-pilulæ*).—Ill., on laurel-leaved oak.
PACKARD, 5th Rept. U. S. Ent. Comm., 206, 207, fig. of gall, and notes on adult.
- radiatæ** SNOW, Ent. News, xi, 489, figs. (*Diplosis*).—Palo Alto, Cal.; larva in young shoots of *Pinus radiata* and other *Pinus*.
CANNON, Amer. Nat. Oct., 1900, 801-810, figs.,—a botanical study of the gall.
- resinicola** OSTEN SACKEN, Trans. Amer. Ent. Soc., III, 345 (*Diplosis*).—N. Y.; in the resin of *Pinus inops*. The description is reprinted in Ent. Nachrichten, 1896, 343-345.
SANBORN, Proc. Bost. Soc. Nat. Hist., XII, 93, larva only.
COMSTOCK, Rept. Dept. Agric., 1879, 256, pl. VI, f. 5, life history; larva in resin of *Pinus inops*, *rigida* and *tada*.
PACKARD, 5th Rept. U. S. Ent. Comm., 797, figs., quotes Comstock.
TOWNSEND, Proc. Ent. Soc. Wash., II, 389, notes on relation to *Retinia comstockiana*, a twig-borer of *P. inops*.
PACKARD, Rept. U. S. Geol. Surv. of the Terr., x, 1876, 527 (*Diplosis pini-rigidæ*); 5th Rept. U. S. Ent. Comm., 798-800, fig.; larvæ make galls in needles of *P. rigida*. [Syn. taken from Kertész, Catalogue.]
MIK, Wien. Ent. Zeit., XVI, 290-292 (id.).
ECKEL, Ent. News, XIV, 279-284, pl., habits, etc. (*Diplosis*).
- robiniaë** HALDEMAN, Amer. Jour. Agr. and Sci., VI, 193, figs.; reprinted in Proc. Boston Soc. Nat. Hist., VI, 401.
HARRIS, Ins. Inj. to Veget., 3d edit., 567.
FITCH, 2d N. Y. Rept., 332.
On leaves of locust, *Robinia pseudacacia*, in Atlantic States.
- sorghicola** COQUILLET, Bull. 18, n. ser., 82 (*Diplosis*).—Ala., Tex.; larvæ in seeds of sorghum.
- togata** FITCH, Amer. Quart. Jour. Agr. and Sci., II, 233-264, 1845.
- thoracica** FITCH, Essay on the Wheat-fly, f. 5, 6.—N. Y.
OSTEN SACKEN, Cat., 5, note on genus.

thurstoni BRODIE, Biol. Rev. of Ontario, I, 1894, 73-75.—Toronto; gall in stem of *Helianthus divaricata*.

CLINODIPLOSIS.

KIEFFER, Feuille jeune Natural., xxiv, 121, 1894.

rosivora COQUILLET, Bull. 22, n. ser., Div. of Ent., 46 (*Diplosis*).—East. U. S.; infests buds of roses grown under glass.

LESTODIPLOSIS.

KIEFFER, Bull. Soc. Ent. France, LXIII, 28, 1894; Feuille jeun. Natural., xxiv, 84, 1894 (the latter as *Coprodiplosis*).

caliptera FITCH, Essay on the Wheat-fly (first edition in Amer. Quart. Jour. Agric. and Sci., II, No. 2, 1845, pl. v, f. 2; second edit. in Trans. N. Y. State Agl. Soc., 1846, vol. v. Mentioned as *Cecidomyia* in both. *Cercalis* is separated in the second only.) Also in 3d N. Y. Rept., 90, pl. II, f. 18 (id.).—N. Y.; affects wheat like *tritici*.

decemmaculata WALSH, Proc. Ent. Soc. Phil., III, 631 (*Diplosis*).—Rock Id., Ill.; inquilinous in galls of *strobiloides*.

septemmaculata WALSH, Proc. Ent. Soc. Phil., III, 630; VI, 228 (both *Diplosis*).—Rock Id., Ill.; inquilinous in galls of *brassicoides*, bred from black knot on plum, and "from the coccidian gall *vitifolia* Fitch."

? SAY, Long's Exped., App., 357 (*ornata*); Compl. Works, I, 242 (id.).—Pa. [Walsh, with a doubt.]

? WIEDEMANN, Auss. Zw., I, 22 (id.).

ASYNAPTA.

LOEW, Dipt. Beitr., IV, 39, 1850.

OSTEN SACKEN, Mon. N. A. Dipt., I, 177, 1862.

RÜBSAAMEN, Berl. Ent. Zeitsch., xxxvii, 400, 1892.

KIEFFER, Annales Soc. Ent. France, 1900, 446.

antennariæ WHEELER, Proc. Wis. Nat. Hist. Soc., Apr., 1889, 212-216, all stages and habits; galls in terminal buds of *Antennaria plantaginifolia*; courtship mentioned.—Wis.

CECIDOMYIDÆ OF WHICH THE ADULT IS UNDESCRIBED.

These have all been referred to as belonging to the genus *Cecidomyia*, except as noted.

agrostis OSTEN SACKEN, Mon. N. A. Dipt., I, 204.—N. Y.

FITCH, The Hessian Fly, 2d edit., 38, original mention as "imbricated gall on *Agrostis laterifolia*."

balsamicola LINTNER, 4th N. Y. Rept., 60-63, figs.—N. Y.; larvæ make swellings in base of leaves of balsam fir, *Abies balsamea*.

LINTNER, 7th N. Y. Rept., 307, oc. in *Abies fraseri* in N. C.

coryloides WALSH, Proc. Ent. Soc. Phil., III, 588; VI, 224 (*salicis-coryloides*).—Rock Id., Ill., on *Salix discolor*.

BERGENSTAMM und LOEW, Synopsis Cecid., 71, quoted by O. S., Cat., 215.

coryloides WALSH, Proc. Ent. Soc. Phil., III, 588; VI, 224 (*vitis-coryloides*).—Ill.; galls on wild grapes—*Vitis cordifolia* and *riparia*.

WALSH and RILEY, Amer. Ent., I, 107, fig. of gall.

RILEY, 5th Mo. Rept., 116, same fig. and note.

PACKARD, Guide to Study of Ins., 376, fig.

- bedeguar** WALSH, *Canad. Ent.*, 1, 79; *Proc. Ent. Soc. Phil.*, vi, 266 (*cratagi-bedeguar*).—Ill.; on *Cratægus tomentosa*, the thorn-apple.
- brachyteroides** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 198.—D. C.; on *Pinus inops*.
- brassicoides** TOWNSEND, *Psyche*, 1893, 490 (*bigelovia-brassicoides*).—N. M., on *Bigelovia gravecolens*.
- carbonifera** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 195.—D. C., on leaves of *Solidago*. N. J.—Smith Cat.
- caryæcola** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 192.—D. C., on *Carya*. N. J.—Smith Cat.
- citrina** OSTEN SACKEN, *Trans. Amer. Ent. Soc.*, III, 53.—N. Y., on *Tilia americana*.
- clavula** BEUTENMÜLLER, *Bull. Amer. Mus. Nat. Hist.*, IV, 1892, 269, pl. xv, f. 5.—N. Y., on *Cornus* sp. N. J.—Smith Cat.
- TOWNSEND, *Proc. Ent. Soc. Wash.*, II, 390, gall.—Va.
- culmicola** MORRIS (Miss), *Proc. Acad. Nat. Sci. Phil.*, IV, 194.—Pa.; in wheat stalks.
- HARRIS, *Ins. Inj. to Veget.*, 582.
- cynipsea** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 193.—D. C., on *Carya*.
- deserta** PATTON, *Canad. Ent.*, XXIX, 247 (*Cecidomyia-celtis-deserta*).—Conn.
- erigerontis** BRODIE, *Biol. Rev. of Ont.*, 1, 1894, 13-15 (*Diplosis*—gen. ref. taken from adult).—Toronto, Can.; on *Erigeron canadense*.
- erubescens** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 193.—D. C.; on *Quercus*.
- farinosa** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 204.—D. C.; on leaves of blackberry, *Rubus*.
- BRODIE, *Biol. Rev. of Ont.*, 1, 1894, 110, oc. at Toronto (*Diplosis*). N. J.—Smith Cat. (*Lasioptera*).
- glutinosa** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 193.—D. C.; on *Carya*.
- hageni**, n. sp.: I apply this term to the gall described, but not named, by Hagen, *Canad. Ent.*, 1881, 37, on *Aristolochia siphon*.
- helianthi** BRODIE, *Biol. Rev. of Ont.*, 1, 1894, 44-46.—Toronto, Can.; in axils of leaves of *Helianthus decapetalus* and *divaricatus*.
- holotricha** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 193; *Cat.*, 216, note.—D. C., on *Carya*. N. J.—Smith Cat.
- hordoides** WALSH, *Proc. Ent. Soc. Phil.*, III, 599 (*salicis-hordoides*).—Rock Id., Ill.; on *Salix humilis*.
- impatiens** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 204; *Amer. Ent.*, II, 63, fig. of gall.—D. C.; deforms flowers of *Impatiens*. N. J.—Smith Cat.
- inopis** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 196 (*pini-inopis*).—D. C.; forms a resinous cocoon on *Pinus virginiana* (*inopis*). N. J.—Smith Cat. (*Diplosis*).
- liriodendri** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 204.—D. C.; on leaves of *Liriodendron*.
- HAGEN, *Canad. Ent.*, XVIII, 159, note on pædogensis. N. J.—Smith Cat.
- monardæ** BRODIE, *Biol. Rev. of Ont.*, 1, 1894, 109-111 (*Diplosis monardi*, or perhaps a *Lasioptera*).—Toronto, Canada; gall on *Monarda fistulosa*.
- majalis** OSTEN SACKEN, *Trans. Amer. Ent. Soc.*, III, 53 (*quercus-majalis*); *Mon. N. A. Dipt.*, 1, 204 (id.).—D. C.
- PACKARD, 5th Rept. U. S. Ent. Comm., 207 (id.), gall and larva; on pin-oak, *Quercus palustris*.
- niveipila** OSTEN SACKEN, *Mon. N. A. Dipt.*, 1, 199, gall.—D. C.; on oak of several species. N. J.—Smith Cat.

- nodulus** WALSH, Proc. Ent. Soc. Phil., III, 599 (*salicis-nodulus*).—Rock Id., III.; gall on *Salix longifolia*.
- nucicola** OSTEN SACKEN, Trans. Amer. Ent. Soc., III, 53.—N. Y.; in the husks of nuts of *Hicoria*.
- ocellaris** OSTEN SACKEN, Mon. N. A. Dipt., I, 199.—D. C.; larva in depression on under side of leaf of *Acer rubrum*.
Note.—Comstock, Rept. Dept. Agric., 1881-2, 202, pl. XVII, describes the adult as a *Sciara*. But Mik, in Verh. Zool.-bot. Ges., 1883, 190-192, considers this an error of rearing, the *Sciara* coming from the earth in the breeding cage. The same view is held by Brauer, Zweifl. d. Kaiserl. Mus., III, 46, and by Osten Sacken, 2d edit. of his Characters of Larvæ of Mycetophilidæ, Heidelberg, 1886, postscript, p. 27.
 N. J.—Smith Cat.; Mich.—J. M. A.
- pellex** OSTEN SACKEN, Mon. N. A. Dipt., I, 199.—D. C.; galls on leaves of *Fraxinus americana*. N. J.—Smith Cat.
- persicoides** OSTEN SACKEN, Mon. N. A. Dipt., I, 193; Cat., 216, note.—D. C.; on *Hicoria*. N. J.—Smith Cat.
- poculum** OSTEN SACKEN, Mon. N. A. Dipt., I, 201; Cat., 216, note (probably inquiline in the gall of a Cynipid of *Quercus*).—D. C.
 FITCH, 2d N. Y. Rept., No. 40, "Oak Spangles."
 N. J.—Smith Cat.
- pomum** WALSH and RILEY, Amer. Ent., I, 106, f. 85, gall (*vitis-pomum*).—Ill.; on *Vitis cordifolia*.
 RILEY, 5th Mo. Rept., 114-116, figs. and notes.
 N. J.—Smith Cat.
- pudibunda** OSTEN SACKEN, Mon. N. A. Dipt., I, 202.—D. C.; on leaves of *Carpinus caroliniana*.
- racemicola** OSTEN SACKEN, Mon. N. A. Dipt., I, 196.—D. C.; larvæ among racemes of *Solidago*.
- rigidæ** OSTEN SACKEN, Mon. N. A. Dipt., I, 189, gall desc. and name changed.
 FITCH, Amer. Quart. Jour. Agric. and Sci., I, 263 (*salicis*, preoc).—N. Y.; makes a swelling at the tip of twig of *Salix rigida* and *lucida*.
 WALSH, Proc. Ent. Soc. Phil., III, 595, abstr. of Fitch.
 N. J.—Smith Cat.
- salicifoliæ** OSTEN SACKEN, Proc. Ent. Soc. Phil., VI, 220.—Canada; on *Spiræa salicifolia*.
- salicum** COCKERELL—the gall so mentioned is that of a sawfly of the genus *Pontania*, with "little or no doubt";—Ckll. *in litt*.
- sanguinolenta** OSTEN SACKEN, Mon. N. A. Dipt., I, 192.—D. C.; on *Hicoria*.
 N. J.—Smith Cat.
- serotinæ** OSTEN SACKEN, Trans. Amer. Ent. Soc., III, 346.—N. Y.; on *Prunus serotina*. N. J.—Smith Cat.

TOWNSEND, Trans. Amer. Ent. Soc., XXII, 55, oc. at Las Cruces, N. M., and notes.

N. J.—Smith Cat.; White Mts., N. H.—Slosson.

Note.—Loew's description of the female should be ignored. I examined the types at the request of Mr. Kahl, and as he expected, found one female of a *Pachygaster*, and both the male and female of a species belonging to a different genus, the eyes of the male being separated. These are all referred to in one way or another under the description of the female, which consequently becomes useless to science.

ACANTHOMERIDÆ.

See an important discussion of this family by Osten Sacken, Biologia, Dipt., I, 63-66. Also Bigot, Annales Soc. ent. de France, 1882, 452, synopsis of genera and species.

ACANTHOMERA.

- WIEDEMANN, Dipt. Exot., 60, 1821; Auss. Zw., I, 107, 1828.
 THUNBERG, Acta Gothob., III, 1819 (*Pantophthalmus*).
 MACQUART, Hist. Nat. Dipt., I, 217, 1834.
 BIGOT, Bull. Soc. ent. de France, 1880, no. 1, p. 5; Annales, 1882, 455 (*Megalemyia*, in part). [O. S.]

- argyropasta* BIGOT, Bull. Soc. ent. de France, 1880, no. 1, p. 5; Annales, 1882, 455 (*Megalemyia*).—Panama.
- OSTEN SACKEN, Biologia, Dipt. 1, 64, says this is the male of *Acanthomera seticornis*, but as Bigot, in Bull. Soc. ent. France, 1886, CLXVIII, still maintains both the species and the genus *Megalemyia*, I allow the former to stand.
- bellardii* BIGOT, described by Bellardi, Saggio, App., 16, f. 11, from Mexico, seems never to have been published by Bigot.
- bigoti* BELLARDI, Saggio, App., 16, f. 10.—Oaxaca, Mex.
- championi* OSTEN SACKEN, Biologia, Dipt., 1, 67, pl. III, f. 16.—Nicaragua and Panama.
- BELLARDI, Saggio, 1, 76 (*picta* WIEDEMANN).—Mexico. [O. S.]
- TOWNSEND, Proc. Cal. Acad. Sci., IV, 595.—Costa Rica.
- crassipalpis* MACQUART, Dipt. Exot., Suppl. II, 27, pl. 1, f. 3.—Guatemala.
- picta* WIEDEMANN, is not known from North America; for Bellardi's reference see *A. championi*.
- rubriventris* BIGOT, Bull. Soc. ent. de France, no. 1, p. 5; Annales, 1882, 456.—Guatemala.
- seticornis* WIEDEMANN, Auss. Zw., 1, 108.—Brazil.
- MACQUART, Dipt. Exot., 1, 1, 168, pl. XX, f. 1; Suppl. II, 27.—Brazil; Guatemala; may be the male of *crassipalpis*. See also *argyropasta*.
- tabaninus* THUNBERG, Acta Soc. Gothob., III, 1819, III, pl. VII, f. 2 (*Pantophthalmus*).—West Indies.
- WIEDEMANN, Auss. Zw., 1, 110, quotes orig. desc.

RHAPHIORHYNCHUS.

- WIEDEMANN, Dipt. Exot., 59, 1821; Auss. Zw., 1, 105, 1828.
- planiventris* WIEDEMANN, Dipt. Exot., 60; Auss. Zw., 1, 106, pl. 1, f. 4; II, 622.—Surinam, Guiana.
- MACQUART, Dipt. Exot., 1, 1, 170, pl. XX, f. 3; Suppl. II, 27, pl. 1, f. 3 (*Ac. crassipalpis*, in the latter place).—Brazil and Guatemala. [O. S.]
- BELLARDI, Saggio, App., 16, f. 10 (*Ac. bigoti*).—Oaxaca, Mex. [O. S.]
- BIGOT, Annales, 1882, 458 (*crassipalpis* MACQ.).
- OSTEN SACKEN, Biologia, Dipt., 1, 66.—Panama.

Note to the Family Acanthomeridae.—There exists no reason known to me for maintaining the name *Acanthomera* against the apparently prior name *Pantophthalmus*, the adoption of which would involve a change of the family name to correspond. But I have not access to Thunberg's work, and it seems a very good rule to give the benefit of the doubt to current names.

LEPTIDÆ.

(Inclusive of Xylophagidæ and Cœnomyidæ.)

- BIGOT, Bull. Soc. Zool. France, XII, 4, 1887, table of genera of the world, restricted sense.

DOLICHOPODIDÆ.

LOEW, Mon. N. A. Dipt., vol. II, 1864 (in Smithsonian Miscellaneous Collections, No. 171), is a monograph which is still useful, although it must be studied in connection with the later works. The earlier descriptions are quoted and discussed in this monograph.

BIGOT, Annales, 1890, 261, article with table of genera of the world.

Note.—The arrangement in subfamilies, much of the synonymy, and some notes, are the result of my own study of the family, which has been a favorite with me for fourteen years.

AGONOSOMINÆ.

PSILOPODINUS.

BIGOT, Annales Soc. Ent. France, 1890, 269.

? BIGOT, Annales Soc. ent. France, 1859, 215 (*Oariostylus*, *Megistostylus*, *Mesoblepharius*, *Condylostylus*, *Eurostomcrus*, *Dasypsilopus*, *Heteropsilopus*, *Acdipsilopus*).

LOEW, Mon. N. A. Dipt., II, 229 (*Psilopus*), 1864.

 Porto Rico—Roeder; Jamaica—Johnson; Grenada—Aldrich.
- lepidus** WALKER, Dipt. Saund., 207.—Mex. (Unrecognizable.)
- longicornis** FABRICIUS, Syst. Ent., 783; Ent. Syst., IV, 341 (both *Musca*); Syst. Antl., 269 (*Dolichopus*).—W. I.
 WIEDEMANN, Auss. Zw., II, 220.—W. I.
 LOEW, Mon. N. A. Dipt., II, 231, 289, 294, notes and orig. desc.
 COQUILLET, Proc. U. S. N. M., XXII, 252, oc. in Porto Rico. (Probably refers to *comatus*, which may be the original species.)
- longiseta** COQUILLET, Jour. N. Y. Ent. Soc., X, 141.—San Rafael, Vera Cruz, Mex.
- macula** WIEDEMANN, Auss. Zw., II, 219.—Caribee Ids.
 LOEW, Mon. N. A. Dipt., II, 292, quotes orig. desc.
 (Near *sipho*, but cannot be recognized with certainty.)
- melampus** LOEW, Berl. Ent. Zeitsch., VI, 215; Mon. N. A. Dipt., II, 253.—Mexico.
 SCHINER, Novara, 212.—S. A.
 ? WALKER, List, III, 649 (*inficitus*).—Mex. [J. M. A.]
 ALDRICH, Biologia, Dipt., 1, 354, oc. in Mexico, several places.
 Beulah, N. M.—Skinner (*melanopus*).
- mundus** WIEDEMANN, Auss. Zw., II, 227.—Savannah, Ga.
 LOEW, Neue Beitr., VIII, 80; Mon. N. A. Dipt., II, 240, 260 (*ciliatus*, but with probable synonymy).—Fla.
 CASTLE and LAURENT, Ent. News., VII, 303, oc. at Enterprise, Fla. (*ciliatus*).
 Fla., several places—Johnson.
- nigrofemoratus** WALKER, List, III, 650.—Nova Scotia. (Unrecognizable.)
- nobilissimus** ALDRICH, Biologia, Dipt., 1, 360, pl. VI, f. 23.—Guerrero, Morelos, etc., Mex.
- patibulatus** SAY, Jour. Acad. Sci. Phil., III, 87 and VI, 168; Compl. Works, II, 76 and 361 (*Dolichopus*).—E. Fla.; the second reference mentions the species as occurring in Mexico, but this is probably *melampus*.
 WALKER, List, III, 648 (*amatus*).—Trenton Falls, N. Y.
 LOEW, Neue Beitr., VIII, 85; Mon. N. A. Dipt., II, 251.—“Chicago, Nebr., etc.”
 N. J.—Smith Cat.; Montreal—Chagnon.
- pennifer** ALDRICH, Biologia, Dipt., 1, 363.—Teapa, Mex.
- peractus** WALKER, Trans. Ent. Soc., V, 286.—Mex. (Unrecognizable.)
- permodicus** WALKER, Trans. Ent. Soc., V, 287.—Mex. (Unrecognizable.)
- pilosus** LOEW, Neue Beitr., VIII, 86; Mon. N. A. Dipt., II, 256.—Cuba.
 ROEDER, Stett. Ent. Zeit., 1885, 340, oc. in Porto Rico, and notes.
- portoricensis** MACQUART, Hist. Nat. Dipt., I, 450; Dipt. Exot., II, 2, 121; Suppl. I, 120, pl. XI, f. 17.—Porto Rico.
- præstans** ALDRICH, Biologia, Dipt., 1, 355.—Teapa, Mex.

- purpuratus** ALDRICH, *Biologia*, Dipt., I, 358.—Morelos and Guerrero, Mex.
- purpureus** ALDRICH, *Biologia*, Dipt., I, 362.—Vera Cruz, Guerrero and Tabasco, Mex.
- radians** MACQUART, *Hist. Nat. Dipt.*, I, 450; *Dipt. Exot.*, II, 2, 121.—N. A. (Near *comatus*, but cannot be recognized.)
- LOEW, *Mon. N. A. Dipt.*, II, 240, 298, not recognized.
- scaber** LOEW, *Neue Beitr.*, VIII, 85; *Mon. N. A. Dipt.*, II, 250.—Pa.
N. J.—Smith Cat.
- scobinator** LOEW, *Neue Beitr.*, VIII, 91; *Mon. N. A. Dipt.*, II, 268.—N. Y., Ill.
N. J.—Smith Cat.; Axton, N. Y.—M. & H.
- similis** ALDRICH, *Biologia*, Dipt., I, 359.—Guerrero, Yucatan, etc., Mex.; Brazil.
- sipho** SAY, *Jour. Acad. Sci. Phil.*, III, 85; *Compl. Works*, II, 75 (*Dolichopus*).
U. S.
- WIEDEMANN, *Auss. Zw.*, II, 218.—Pa.
- WALKER, *List*, III, 646 (*gemmifer*).—Trenton Falls, N. Y. [Lw.]
- LOEW, *Neue Beitr.*, VIII, 83; *Mon. N. A. Dipt.*, II, 248.—Pa., Ga., Va., Ill.
Common throughout the eastern and middle part of the United States;
Montreal—Chagnon.
- Note*.—There is a reference to *sipho* by Macquart, in *Dipt. Exot.*, II, 2, 179, with fig. 1, pl. XXI; Loew, *Mon.*, 241, says it refers to *jucundus*, while Schiner, *Novara*, 210, says it means *dux* WIED.
- solidus** WALKER, *Trans. Ent. Soc.*, v, 286.—Mex. (Unrecognizable.)
- suavium** WALKER, *List*, III, 648.—Jamaica. Porto Rico—Roeder.
- tibialis** WIEDEMANN, *Auss. Zw.*, II, 222.—Antigua.
- tonsus** ALDRICH, *Biologia*, Dipt., I, 364.—Frontera, Mex.
- triseriatus** ALDRICH, *Biologia*, Dipt., I, 356.—Cuernavaca and Teapa, Mex.
- ungulivena** WALKER, *Trans. Ent. Soc.*, IV, 249.—U. S. (Unrecognizable.)
- virgo** WIEDEMANN, *Auss. Zw.*, II, 224.—N. Y.
SCHINER, *Novara*, 215. oc. in S. A.
LOEW, *Mon. N. A. Dipt.*, II, 240, 295.

AGONOSOMA.

- GUÉRIN-MÉNEVILLE, *Voyage . . . sur la Corvette. Zoologie*, Tome II, partie 2me, p. 293. Paris, 1838 (title-page gives date 1830). On the plates the genus is called *Chrysosoma*.
- FALLÉN, *Dolichopodes*, 23, 1823 (*Leptopus*, preoc.).
- MEIGEN, *Syst. Besch.*, IV, 35, 1824 (*Psilopus*, preoc.).
- ZELLER, *Isis* 1842, 831, changes *Psilopus* to *Sciapus*.
- ? BIGOT, *Annales Soc. ent. France*, 1859, 215 (*Margaritostylus*, in part).
- RONDANI, *Dipt. Ital. Prodromus*, IV, 11, 1861, changes *Psilopus* to *Psilopodius*.
- SCHINER, *Fauna Austr.*, I, 180, 1862 (*Psilopus* MEIG.).
- LOEW, *Mon. N. A. Dipt.*, II, 229 (id.), 1864.
- ALDRICH, *Kans. Univ. Quart.*, II, 47, 1893 (*Gnamptopsilopus*); *Biologia*, Dipt., I, 364, 1901, table of species (id.); *Canad. Ent.*, 1904, 246, nomenclature.
- COQUILLET, *Jour. N. Y. Ent. Soc.*, X, 140, 1902, syn. of *Gnamptopsilopus*.
- BEZZI, *Zeitsch. f. Syst. Hym. u. Dipterologie*, 1902, 191, adopts *Sciapus*.
- bicolor** LOEW, see *unifasciatus*.
- castum** LOEW, *Cent.*, VI, 84 (*Psilopus*).—Cuba.
- ciliipennis** ALDRICH, *Biologia*, Dipt., I, 366, pl. VI, f. 24 (*Gnamptopsilopus*).—Omiteme, Mex.

- delicatum** WALKER, List, III, 645 (*Psilopus*).—N. Y. (Unrecognizable.)
- dimidiatum** LOEW, Berl. Ent. Zeitsch., VI, 216; Mon. N. A. Dipt., II, 246 (both *Psilopus*).—Mex.
- ALDRICH, Biologia, Dipt., I, 365 (*Gnamptopsilopus*).—Morelos, Mex. Porto Rico, Roeder; South Amer.—Schiner, Novara, 212.
- dorsale** LOEW, Cent., VI, 85 (*Psilopus*).—Cuba.
- filipes** LOEW, Neue Beitr., VIII, 99; Mon. N. A. Dipt., II, 286, pl. VII, f. 44 (*Psilopus*).—Middle States.
- flavicornis** ALDRICH, Dipt. St. Vincent, 342 (*Gnamptopsilopus*).—St. Vincent, W. I.; also from Grenada.
- flavidum** ALDRICH, Dipt. St. Vincent, 341, pl. XII, f. 109 (*Gnamptopsilopus*).—St. Vincent, W. I.; also from Grenada.
- infumatum** ALDRICH, Biologia, Dipt., I, 365 (*Gnamptopsilopus*).—Guerrero, Mex.
- mexicanum** ALDRICH, Biologia, Dipt., I, 365 (*Gnamptopsilopus*).—Vera Cruz and Tabasco, Mex.
- pallens** WIEDEMANN, AUSS. ZW., II, 219 (*Psilopus*).—N. Y.
- LOEW, Neue Beitr., V, 4 (*Psilopus albonotatus*, from Isle to Rhodes); VIII, 97 (*Psilopus pallens*); Mon. N. A. Dipt., II, 275 (id.).—N. Y.
- OSTEN SACKEN, Cat., 243, oc. and syn.—Spain, N. Y., R. I. N. J.—Smith Cat.
- psittacinum** LOEW, Neue Beitr., VIII, 96; Mon. N. A. Dipt., II, 281 (*Psilopus*).—Fla.
- N. J.—Smith Cat.; Porto Rico—Roeder; St. Augustine and L. Worth, Fla.—Johnson.
- scintillans** LOEW, Neue Beitr., VIII, 94; Mon. N. A. Dipt., II, 273 (both *Psilopus*).—Middle States. N. J.—Smith Cat.
- tener** LOEW, Cent., II, 71; Mon. N. A. Dipt., II, 284 (both *Psilopus*).—Pa. N. J.—Smith Cat.
- unifasciatum** SAY, Jour. Acad. Sci. Phil., III, 85; Compl. Works, II, 75 (*Dolichopus*).—Pa.
- WIEDEMANN, AUSS. ZW., II, 219 (*Psilopus sayi*).
- LOEW, Neue Beitr., VIII, 96; Mon. N. A. Dipt., II, 280 (both *Psilopus bicolor*).—Middle States. Loew also quotes the earlier descriptions, pp. 332, 289, 293.
- GIGLIO-TOS, Annales Soc. Ent. France, 1895, 359, suspects that *Psilopus leptogaster* THOMPSON, Eugen. Resa, 510, is the same as *bicolor*.
- variegatum** LOEW, Neue Beitr., VIII, 95; Mon. N. A. Dipt., II, 278 (both *Psilopus*).—Fla. Cuba. N. J.—Smith Cat.; Fla., several places—Johnson.

MESORHAGA.

- SCHINER, Novara, 217, 1868.
- ALDRICH, Kans. Univ. Quart., II, 48, 1893 (*Aptorthus*); Ent. News, XI, 531, syn.
- albiciliata** ALDRICH, Kans. Univ. Quart., II, 48 (*Aptorthus*).—Westville, N. J.; Mich. N. J.—Smith Cat.
- borealis** ALDRICH, Kans. Univ. Quart., II, 49 (*Aptorthus*).—St. Paul, Minn.
- nigripes** ALDRICH, Kans. Univ. Quart., II, 49 (*Aptorthus*).—Cal.
- townsendii** ALDRICH, Kans. Univ. Quart., II, 50 (*Aptorthus*).—Aztec., Ariz.; Atlantic City, N. J.

LEPTORHETHUM.

- ALDRICH, Kans. Univ. Quart., II, 50, 1893.
- angustatum** ALDRICH, Kans. Univ. Quart., II, 50; Dipt. St. Vincent, 345, pl. XII, f. 108.—St. Vincent, W. I.

DIAPHORINÆ.

DIAPHORUS.

- MEIGEN, Syst. Besch., iv, 32, 1824.
 SCHINER, Fauna Austr., i, 186, 1864.
 LOEW, Wien. Ent. Monatsch., i, 37, 1857 (*Lyroneurus*, in part); Mon. N. A. Dipt., ii, 156 and 169, 1864 (*Diaphorus* and *Lyroneurus*).
 ALDRICH, Dipt. St. Vincent, 321, note, 1896; Kans. Univ. Sci. Bull., i, 1902, 85, table of species.
- amœnus* ALDRICH, Kans. Univ. Sci. Bull., i, 86.—Grenada, W. I.
approximatus ALDRICH, see *spectabilis*.
cærulescens LOEW, Wien. Ent. Monatsch., i, 39; Neue Beitr., viii, 60; Mon. N. A. Dipt., ii, 170 (all *Lyroneurus*).—Mex.
contiguus ALDRICH, Dipt. St. Vincent, 323.—St. Vincent, W. I.; also in Grenada.
deceptivus ALDRICH, Biologia, Dipt., i, 346.—Guerrero and Vera Cruz, Mex.
dimidiatus ALDRICH, Dipt. St. Vincent, 322.—St. Vincent, W. I. Also in Grenada.
dubius ALDRICH, Dipt. St. Vincent, 324.—St. Vincent, W. I.; also in Grenada.
flavipes ALDRICH, Dipt. St. Vincent, 323.—St. Vincent, W. I. Also occurs in Grenada.
interruptus LOEW, see *Asyndetus*.
lamellatus LOEW, Mon. N. A. Dipt., ii, 165.—Middle States.
leucostoma LOEW, Neue Beitr., viii, 58; Mon. N. A. Dipt., ii, 166.—D. C., Md.
 HOWARD, Proc. Wash. Acad. Sci., ii, 561, reared a specimen from human excrement. N. J.—Smith Cat.; Charlotte Harbor, Fla.—Johnson.
mundus LOEW, Neue Beitr., viii, 57; Mon. N. A. Dipt., ii, 161.—Pa.

sarotes LOEW, Cent., VII, 81.—Ill. Wis.—M. and B.

Note.—Looking at the single male type, I decided it to be the same as *longipennis*; on looking at my specimens after reaching home, I see that there is an easy mark of distinction in the fore feet, *sarotes* having the third joint much larger, broader and whiter. This illustrates what may be done by examining types.

LOEW, Isis, 1840 (*mclanopleura*).

SCHINER, Fauna Austr., I, 81, syn. and desc.

OSTEN SACKEN, Cat., 100, oc. at Sitka—"Loew in litt."

WALKER, List, III, 488 (*peregrinator*).—Trenton Falls, N. Y. [Mel.]

COQUILLET, Proc. Wash. Acad. Sci., II, 421, oc. in Sitka.

MELANDER, Mon. Empid., I, 259, f. 66, 67.—Wis., Wyo., Vancouver Id.

MEGACYTTARUS.

BIGOT, Bull. Soc. Ent. France, 1880, 47.

COQUILLET, Revis. Empid., 388, 1895, makes a synonym of *Rhamphomyia*.

MELANDER, Mon. Empid., I, 350, 1902.

argenteus BIGOT, loc. cit.—Col.

COQUILLET, Revis. Empid., 388, regards as the female of *Rhamphomyia limbata* LW.

MELANDER, Mon. Empid., I, 350, translates pt. desc.; accepts provisionally.

BRACHYSTOMA.

MEIGEN, Syst. Besch., III, 12, 1822.

SCHINER, Fauna Austr., I, 117, 1862.

MELANDER, Mon. Empid., I, 259, 1902, def. and table of species.

binummus LOEW, see *Blepharoprocta*.

occidentalis MELANDER, Mon. Empid., I, 260, f. 89.—Wash., Idaho.

robertsonii COQUILLET, Revis. Empid., 393.—Ill.

MELANDER, Mon. Empid., I, 260.—Tenn., Ohio.

serrulata LOEW, see *Blepharoprocta*.

BLEPHAROPROCTA.

LOEW, Cent., II, 17, 1862.

MELANDER, Mon. Empid., I, 261, 1902, def. and table of species.

binummus LOEW, Cent., II, 16 (*Brachystoma*).—D. C.

MELANDER, Mon. Empid., I, 261, f. 91, 92.

nigrimanus LOEW, Cent., II, 17.—Ill.

MELANDER, Mon. Empid., I, 261.

serrulata LOEW, Cent., I, 23 (*Brachystoma*).—Ga.

MELANDER, Mon. Empid., I, 262, f. 90.

Ga. and Ohio—O. S.

EMPIMORPHA.

COQUILLET, Revis. Empid., 396, 1895, def. and table of species.

MELANDER, Mon. Empid., 283, note; 329, def. and table of species, 1902.

Doubtfully distinct from *Empis*—Melander.

barbata LOEW, Cent., II, 19 (*Empis*).—Cal.

COQUILLET, Revis. Empid., 396, refers to this genus.

MELANDER, Mon. Empid., I, 329, f. 106.—Cal.

comantis COQUILLET, Revis. Empid., 396.—N. Cal.

MELANDER, Mon. Empid., I, 330, 353, female, etc.—Cal.

geneatis MELANDER, Mon. Empid., I, 329, f. 105.—Cal.

PACHYMERIA.

STEPHENS, Syst. Catal., 1829.

MACQUART, Hist. Nat. Dipt., I, 333 (*Pachymerina*); II, 657, adopts earlier name, 1834.

LOEW, Wien. Ent. Monatsch., VIII, 12.

SCHINER, Fauna Austr., I, 110, 1862.

MELANDER, Mon. Empid., I, 330, 1902, def. and table of species.

brevis LOEW, Cent., II, 22.—D. C.

MELANDER, Mon. Empid., I, 330.

pubica LOEW, Cent., I, 35; Wien. Ent. Monatsch., VIII, 12 ("The *P. tumida* quoted there as a synonym of *P. pubica* does not exist"—O. S.).—D. C.

MELANDER, Mon. Empid., I, 331.

EMPIS.

LINNÉ, Fauna Suecica, 2d edition, p. 466, 1761.

MEIGEN, Syst. Besch., III, 15, 1822.

SCHINER, Fauna Austr., I, 102, 1862.

BIGOT, Bull. Soc. Ent. France, 1880, 47 (*Enoplempis*).

COQUILLET, Revis. Empid., 392-400, 1895, table of species; syn.

WHEELER and MELANDER, Biologia, Dipt., I, 366, 1902, table of Mexican species.

MELANDER, Mon. Empid., I, 282, 1902, full discussion and table of species.

abcirus WALKER, List, III, 494.—Ga.

MELANDER, Mon. Empid., I, 299, quotes Walker.

æripes MELANDER, Mon. Empid., I, 328, f. 141.—Idaho.

ærobotica MELANDER, Mon. Empid., I, 323.—Cal. and Moscow, Idaho.

ALDRICH and TURLEY, Amer. Nat., XXXIII, 809, habits—"A Balloon-making Fly."—Moscow, Idaho; determined as "*Empis* near *poplitea* Lw."

agasthus WALKER, List, III, 496.—Martin Falls, Canada.

COQUILLET, Revis. Empid., 397, quotes from Walker.

aldrichi MELANDER, Mon. Empid., I, 309, f. 110.—Moscow, Ida., and Mt. Hood, Ore.

amystis WALKER, List, III, 493.—N. Y.

PHORIDÆ.

BECKER, Die Phoriden, in Abhandlungen d. K. K. Zool.-Bot. Ges., I, 1-100, 5 plates, 1901, is an admirable monograph of the European members of the family.

BRUES, Monograph of the N. A. Phoridæ, in Trans. Amer. Ent. Soc., xxix, 331-404, 5 plates, describes the genera of the world and all the N. A. species, with a new generic arrangement. It is dated 1903, but really appeared in January, 1904. This would exclude it from the present catalogue, which closes with Jan. 1, 1904, but I deem it necessary to make an exception here, in order to avoid having this part of the work out of date on publication. There are full tables of genera and species, etc.; it is a very valuable work.

OSTEN SACKEN, Ent. Mo. Mag., sec. ser., XIII, 204, 1902, discusses the position of this family.

PHORA.

LATREILLE, Précis. car. gén. Ins., 1796; Hist. nat. Crust. et Ins., III, 464, 1802, and XIV, 394, 1804. In 1802 he gives *Musca aterrima* as type.

MEIGEN, Syst. Besch., VI, 210, 1830, inclusive of *Trincura*.

SCHINER, Fauna Austr., II, 335, 1864.

ALDRICH, Canad. Ent., XXIV, 142, 1892.

COQUILLET, Canad. Ent., XXVII, 104, 1895.

LINTNER, 10th N. Y. Rept., 404, 1895, literature of *Phora*.

WICKHAM, Canad. Ent., XXVI, 41, rearing of *Phora* sp. from pupa of *Tropisternus glaber*.

BRUES, Mon. Phoridæ, 339, 1904, def. and table of species, in restricted sense.

cimbicis ALDRICH, Canad. Ent., XXIV, 143, fig.—Brookings, S. D.; reared from cocoons of *Cimbex americana*.

BRUES, Mon. Phoridæ, 348, f. 15.—Mass.; Toronto, Can.

comstocki ALDRICH in Brues, Mon. Phoridæ, 346, f. 12.—Ithaca, N. Y.

cornuta BIGOT, in Sagra's Cuba, 827.—Cuba.

divaricata ALDRICH, Trans. Ent. Soc. Lond., 1896, 437.—St. Vincent, W. I.

BRUES, Mon. Phoridæ, 349, types redesc.; oc. in Granada, W. I.

var. *perplexa* BRUES, Mon. Phoridæ, 350.—Ga., Fla. This is the *Phora incisuralis* of Coquillett, Canad. Ent., XXVII, 104. [Brues.]

PLATYCHEMA.

ZETTERSTEDT, Dipt. Scand., I, 332, 1842.

SCHINER, Fauna Austr., I, 242, 1862.

VERRALL, British Flies, VIII, 19, 1901.

? *imperfecta* LOEW (Cent., VI, 82.—D. C.). On examining the type, at Mr. Kahl's request, I found it to be a small Empid.

The genus occurs in the United States, however, for Mr. Kahl had a species, captured at Lawrence, Kans.

PIPUNCULIDÆ.

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 77-86, 1899, paper containing table of genera.

BECKER, Berl. Ent. Zeitsch., XLII, 25-100, 1897, has a revision of the European members of the family.

VERRALL, British Flies, VIII, 1901, contains a monograph of the British species.

CHALARUS.

WALKER, Entomologist's Magazine, II, 269, 1834.

MACQUART, Hist. Nat. Dipt., II, 12, 1835 (*Ateleneura*).

SCHINER, Fauna Austr., I, 244, 1862.

BECKER, Berl. Ent. Zeitsch., XLII, 96, 1897.

VERRALL, British Flies, VIII, 67, 1901.

spurius FALLÉN, Syrph., 16 (*Cephalops*).—N. Europe.

MEIGEN, Syst. Besch., IV, 24 (*Pipunculus*).

MACQUART, Hist. Nat. Dipt., II, 12 (*Ateleneura nigripes*).

SCHINER, Fauna Austr., I, 245.

BECKER, Berl. Ent. Zeitsch., XLII, 96, bibliography, etc.

GIARD, Compt. Rend. Acad. Sci. Paris, CIX, records rearing the species from *Typhlocyba rosa*, a leaf-hopper.

VERRALL, British Flies, VIII, 68.

N. J.—Smith Cat.; White Mts., N. H.—Slosson. Mr. Kahl has compared American with European specimens, and confirms the identity. We also have an undescribed species.

NEPHROCERUS.

ZETTERSTEDT, Ins. Lapp., 578, 1840; Dipt. Scand., III, 946, 1844.

BECKER, Berl. Ent. Zeitsch., XLII, 47, 1897.

VERRALL, British Flies, VIII, 77, 1901.

dæcki JOHNSON, Ent. News, XIV, 107.—Long Id., N. Y.

Mr. Coquillett determined an undescribed species from the White Mts. for Mrs. Slosson's list; Mr. Kahl also has reported the genus to me from Kansas.

PIPUNCULUS.

LATREILLE, Hist. Nat. Crust. et Ins., III, 463, 1802; XIV, 393, 1804.

FALLÉN, Syrphici, 14, 1816 (*Cephalops*).

MACQUART, Hist. Nat. Dipt., II, 9, 1835.

ZETTERSTEDT, Dipt. Scand., III, 949, 1844.

SCHINER, Fauna Austr., I, 245, 1862.

BECKER, Berl. Ent. Zeitsch., XLII, 35, 1897.

VERRALL, Brit. Flies, VIII, 79, 1901.

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 77 et seq., table of species.

WILLISTON, Biologia, Dipt., III, 86, table of Mex. species, 1892.

BECKER, loc. cit., 28, gives references to observations on the larvæ;—they parasitize leaf-hoppers.

aculeatus WILLISTON, see *willistonii*.

albofasciatus HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 85.—Opelousas, La. N. J.—Smith Cat.

aridus WILLISTON, see *subvirescens*.

atlanticus HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 80.—New Bedford, Mass.; Montgomery Co., Pa. N. J.—Smith Cat.; Montreal—Chagnon.

cingulatus LOEW, Cent., VI, 73.—D. C.

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 81, type redesc.

White Mts., N. H.—Slosson.

elegantulus WILLISTON, Biologia, Dipt., III, 87.—Guerrero, Mex.

fasciatus LOEW, Cent., X, 59.—Texas.

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 78, type redesc.

KERTÉSZ, Wien. Ent. Zeitung, XIX, 270, would change name to *locwi*, because there was once a *fasciatus* described, which turned out to be a synonym. I should strongly object to admitting the principle.

flavicornis WILLISTON, Biologia, Dipt., III, 88.—Guerrero, Mex.

GIGLIO-TOS, Ditt. del Mess., II, 71, note on male.—Tuxpango, Mex.

flavitaris WILLISTON, Biologia, Dipt., III, 87.—Guerrero, Mex.

flavomaculatus HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 84.—Horse Neck Beach, Mass.

fuscitarsis ADAMS, Kans. Univ. Sci. Bull., II, 36.—Atherton, Mo.

fuscus LOEW, Cent., VI, 71.—Md.

? WALKER, List, III, 639 (*reipublicæ*).—N. Y. [Hough, with query.]

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 82, type redesc.

White Mts., N. H.—Slosson; Axton, N. Y.—M. and H.

See *nitidiventris*.

houghi of Smith's Cat. is a manuscript name;—Ent. News, XII, 96 and XIV, 107.

houghi of KERTÉSZ, see *lateralis*.

lateralis WALKER, Dipt. Saund., 216.—N. A.

COQUILLET, Proc. Acad. Nat. Sci. Phil., 1895, 331, refers to *Prothecus*.

KERTÉSZ, Wien. Ent. Zeitung, 1900, 244, refers to *Pipunculus*, and changes name to *houghi* on account of preoccupation.

VERRALL, Brit. Flies, VIII, 120, shows that there was no preoccupation, as Meigen's *lateralis* is a synonym of *maculatus* WALKER.

St. Augustine, Fla.—Johnson.

nigricornis ADAMS, Kans. Univ. Sci. Bull., II, 36.—Atherton, Mo.

nigripes LOEW, Cent., VI, 75.—Pa.

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 79, type redesc.

N. J.—Smith Cat.; White Mts., N. H.—Slosson.

nitidiventris LOEW, Cent., VI, 72.—D. C.

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 82, type redesc.; may be the female of *fuscus*.

White Mts., N. H.—Slosson; Montreal—Chagnon.

opacus WILLISTON, see *Verrallia*.

pallipes JOHNSON, Ent. News, XIV, 107.—Wildwood, N. J.

politus WILLISTON, Trans. Ent. Soc. London, 1896, 351, pl. XI, f. 88.—St. Vincent, W. I.

similis HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 83.—Tifton, Ga.; Ala.

N. J.—Smith Cat.

subopacus LOEW, Cent., VI, 74.—D. C.

WILLISTON, *Biologia*, Dipt., III, 88, oc. and note.—Guerrero, Mex.

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 79, type redesc.

Montreal—Chagnon.

subvirescens LOEW, Cent., x, 58.—Texas.

? WALKER, Trans. Ent. Soc., IV, 150 (*translatus*).—U. S. [Hough, with a ?]

WILLISTON, Dipt. of Death Val. Exped., 255 (*aridus*).—Argus Mt., Cal. [Hgh.]

HOUGH, Boston Soc. Nat. Hist., XXIX, 84.—New Bedford, Mass.; Tifton, Ga.; Opelousas, La.

Montreal—Chagnon.

willistonii KERTESZ, Wien. Ent. Zeit., XIX, 1900, 244, change of name.

WILLISTON, *Biologia*, Dipt., III, 88 (*aculcatus*, preoc.); Trans. Ent. Soc.

London, 1896, 351 (id.).—Tabasco, Mex.; St. Vincent, W. I.

xanthopodus WILLISTON, *Biologia*, Dipt., III, 87.—Guerrero, Mex.

VERRALLIA.

MIK, Wien. Ent. Zeit., XVIII, 137, 1899.

BECKER, Berl. Ent. Zeitsch., XLII, 1897, 93 (*Prothecus* ROND.).

Note.—According to Mik, loc. cit., Rondani made an error of identification, and the species he named as the type is not *auctus*, but has an acuminate third antennal joint. This antennal character is mentioned in the definition, hence *Prothecus* could not be used for the present group, in which the lack of a point on the third antennal joint is one of the principal characteristics.

opaca WILLISTON, Trans. Amer. Ent. Soc., XIII, 295 (*Pipunculus*).—Wash.

HOUGH, Proc. Boston Soc. Nat. Hist., XXIX, 77, refers to *Prothecus*, in Becker's sense.

KERTÉSZ, Wien. Ent. Zeitung, XIX, 244, refers to *Verrallia*.

SYRPHIDÆ.

WILLISTON, Synop. N. A. Syrphidæ. Bulletin of The United States National Museum, No. 31. Washington, 1886, xxx and 335 pages, with 12 plates. The largest and most complete family monograph yet published on North American Diptera.

VERRALL, British Flies. Syrphidæ, etc. Gurney and Jackson, London, 1901. 690 pages, portrait and many excellent text figures. Includes also in an appendix of 121 pages a full catalogue and bibliography of the British representatives of the three families described, which are the Platypezidæ, Pipunculidæ and Syrphidæ. This massive volume is an encyclopedia on the three families indispensable to the advanced worker. Many of the British species and most of the genera occur also in America.

CHAGNON, G., Études Préliminaires sur les Syrphides de la Province de Québec. Chicotini, Québec, 1901, 75 pages. Originally published in parts in "Le Naturaliste Canadien," 1901. I quote the separate edition. It is a convenient and useful compilation on the commoner species of that region.

OSTEN SACKEN, West. Dipt., 325, 1877; Cat., 1878, 244 (both *Catabomba*).

BIGOT, Bull. Soc. Ent. France, 1882, No. 2, p. 20, syn.

WILLISTON, Synop. N. A. Syrph., 62, 1886 (*Catabomba*).

VERRALL, Brit. Flies, VIII, 333, 1901 (id.).

Notc.—I dissent from the conclusions of Osten Sacken and Verrall in adopting Rondani's name here. In the first reference above, Rondani says, "Spec: typ: *Musca pyrastris* LIN." and mentions no other species. Hence the proper procedure, in case the genus is illy conceived, is to revise its definition, rather than to make its type *the type* of another genus. I here use *Lasiophthicus* as if this had been done, exactly in the sense of *Catabomba*.

pyrastris LINNÉ, Syst. Nat., 10th ed., 594 (*Musca*); Fauna Suec., 2d ed., 448 (id.).—Europe.

FABRICIUS, Spec. Ins., II, 432 (*Syrphus*); Ent. Syst., IV, 305, 306 (*Syrphus pyrastris* and *transfuga*); Syst. Antl., 249, 250 (*Scæva pyrastris* and *transfuga*).—Europe.

DERMATOBIA.

BRAUER, Verh. Zool.-Bot. Ges., 1860; Mon. Cestrident., 251, 1863.

No North American species have been described. The following papers relate to this genus:

SAY, "On the South American species of *Cestrus*, which inhabits the Human Body," Jour. Acad. Sci. Phil., II, 354, 1822; Compl. Works, II, 32.

RUDOLPH MATAS, M.D., paper by, on species infesting man in New Orleans; reprinted, with figs., in Insect Life, I, 76.

OSBORN, Insect Life, I, 226, quotes another account from Miss.

TOWNSEND, Psyche, Aug., 1892, 299, describes a larva from *Lepus calotis*; afterward refers it to *Bogeria*, q. v.

TACHINIDÆ.

Note.—The classification adopted follows closely that of Coquillett. Revision of the Tachinidæ, Bulletin of Division of Entomology, Technical series, No. 7, 1897. This work seems to embody a far clearer and more consistent idea of the genera than any other general work on the American species of the family. It includes, however, only the fauna of the United States, and that no farther than seen by the author. This has necessitated my adding a large number of

genera and species, which I have endeavored to distribute in accordance with the classification in the work mentioned. I cannot hope to have made a perfect success of this, considering the difficulty of the family.

The work of Brauer and Bergenstamm, *Vorarbeiten zu einer Monographie der Muscaria schizometopa*, forming parts iv, v and vi of the series called *Zweiflügler des Kaiserlichen Museums zu Wien*, is an elaborate and extensive work, characterized by a minute subdivision of the group into numerous so-called families, sections, super-genera, and genera. Although it shows an immense amount of patient and faithful study, it is vitiated by a failure to grasp the natural divisions between groups of the same category. Hence it must be used with caution, and much experience is necessary before one can judge of its authoritativeness in a particular case. The table contains many illusory characters, and the usefulness of the work is further marred by a succession of addenda, modifying the system in numerous parts, and making it still more difficult to follow.

The work of Townsend shows itself to have been powerfully influenced by the one just mentioned; hence there is a serious confusion of genera, and in some instances the same species is described several times under different genera, or in the same genus. The worst instance of this will be found under *Myiophasia anca*. This was not the result of carelessness but of a too narrow splitting up of genera and species, in the attempt to follow Brauer and Bergenstamm. The specific descriptions of Townsend are conscientious and faithful, and among the most recognizable of any in the family.

The extensive article by Van der Wulp on the Mexican and Central American fauna, published in vol. II of the *Diptera in Biologia Centrali-americana*, goes to the other extreme in the matter of genera, and the large genera in it are without exception heterogeneous collections, which can at present hardly be placed consistently in the system here adopted.

The descriptions by Bigot are in every way objectionable, almost always referred to the wrong genus, and seldom containing the essential data. Most fortunately, the types of nearly all the species have been examined by Brauer, who has elucidated them in accordance with his system in three articles in *Sitzungsberichten der Kaiserlichen Akademie der Wissenschaften (Mathematischen-Naturwissenschaftlichen Classe, Bd. cvI, cvII and cvIII)*. This makes it possible to arrange them fairly well in the present work.

The following tables of genera may be consulted:

TOWNSEND, *Proc. Ent. Soc. Wash.*, II, 92, 96; *Trans. Amer. Ent. Soc.*, XIX, 134.

VAN DER WULP, *Biologia, Dipt.*, II, 5 and 41.

COQUILLET, *Revision Tach.*, 30; this is most important.

The synonymy adopted by Coquillett in his *Revision* has been followed rather closely for the species included in that work, without giving credit in the references.

To facilitate reference through the index, I mention the following cases where the genus might not otherwise be found:

Argyrophylax rostrata COQ. has been placed in *Siphosturmia*.

Ceromasia ROND. is a synonym of *Masicera*; but only *chrysocephala* and *zonata* of Bigot have been placed there. His *abbreviata*, *pictigaster*, *quadrivittata* and *spiniceps* will be found in *Hypostena*, while his *castanifrons* has been referred to *Prospheysa*.

Chætolyga is a synonym of *Winthemia*; but the species of Bigot will be found under *Exorista*, *Hypostena*, *Phorocera* and *Winthemia*.

Dimorphomyia calliphoroides BIGOT, Bull. Soc. Ent. France, 1885, has been found on examination of the type to consist of the head of a Syrphid glued to the body of a Muscid. See BRAUER, Sitzungsbericht Kaiserl. Akad., CVII, 14. We may say at least that it was admirably named!

Eggonia VAN DER WULP, mentioned by Brauer and Bergenstamm, Zweifl. Kaiserl. Mus., VI, 104, lacks a specific name for the type, and must have been a manuscript name on some of Van der Wulp's material.

Eurigaster MACQ. is a synonym of *Exorista*, but *E. septentrionalis* WALKER will be found under *Euphorocera claripennis*.

Fabricia DESV. is a synonym of *Echinomyia*, but Bigot's *F. infumata* will be found under *Archytas bicolor*.

Loewia EGGER; the species of Townsend all fall under *Myiophasia aenca*.

Lophosia setigena THOMSON has been placed under *Clansicella*.

Lydella doryphoræ RILEY will be found under *Phorocera*, although the genus is a synonym of *Exorista*.

Melanosphora diabroticæ SHIMER is a *Celatoria*.

Micropalpus is a synonym of *Linnæmyia*, but some of the species are placed under *Epalpus* and *Cuphocera*.

Oplica albifacies BIGOT is referred to *Pseudodexia* by Brauer, and *O. nigri-facies* to *Medina*.

Pachychæta jarowchewskyi PORTSCHINSKY, from Russian America, is listed by B. and B. among the material in the Vienna Museum; but I have found no other reference to it.

Phasia atripennis SAY is referred to *Xanthomelana*, and *jugatoria* to *Trichopoda pennipes*.

Podotachina americana B. B. is referred to *Tachina mella*, and *P. vibrissata* B. B. to *Euphorocera claripennis*.

Pseudogermaria georgiæ B. B. is referred to *Distichona*.

Ptilocera americana MACQ. is referred to *Phyto*.

Pyrrosia ochracea BIGOT is referred to *Æstrophasia*.

Siphoniomyia melas BIGOT is referred to *Trichophora analis*.

Thysanomyia inermis BIGOT, mentioned by Johnson, Dipt. of Florida, may be *Blepharipeza inermis*, but I am not certain.

The species of *Tryphera* described by Townsend all go in *Polidca*.

Viviana citrina BIGOT will be found under *Chatona longiseta*; *georgiæ* in *Biomyia*; and *rufopygata* in *Leskia*.

Wahlbergia is a synonym of *Besseria*, but Townsend's *atripennis* is a *Xanthomelana*.

Xysta didyma LOEW is a *Clytiomyia*.

CISTOGASTER.

LATREILLE, in Cuvier's Règne Anim., v, 1829.

WILLISTON, Trans. Amer. Ent. Soc., XIII, 302-3 (*bifasciata* and *bicincta*).—Wash. to San Domingo.

VAN DER WULP, Tijdschr. v. Ent., XXVI, 23; Biologia, Dipt., II, 30, pl. II, f. 8.—Guatemala.

RILEY, 5th Mo. Rept., 140, desc. and fig.; bred from *Anisota rubicunda*.—Mo.

RILEY, 4th Rept. U. S. Ent. Comm., App., 110, desc. of larva.

TOWNSEND, Trans. Amer. Ent. Soc., XIX, 89, pt. desc. (*bicincta*); Psyche, 1897, 128, oc. in N. M., etc.

COQUILLET, Revis. Tachin., 84.—Mass. to S. Cal. and Mex.: bred from *Citheronia regalis* FABR., *Dryocampa rubicunda* FABR., and *Hemileuca* sp.

N. J.—Smith Cat.; bred from *Eacles imperialis*. Porto Rico—Roeder.

ferruginosa TOWNSEND, Trans. Amer. Ent. Soc., XXII, 71.—Jamaica.

leucophrys WIEDEMANN, see *Blepharipeza*.

leucopyga VAN DER WULP, Notes from the Leyden Mus., IV, 84; Tijdsch. v. Ent., XXVI, 27; Biologia, Dipt., II, 470, oc.—Brazil; Brazil; N. Yucatan.

luteola COQUILLET, Proc. U. S. N. M., XXII, 253.—Vieques Id., near Porto Rico.
slossonæ COQUILLET, Proc. Acad. Nat. Sci. Phil., 1895, 312; Revis. Tachin., 84.
 —Charlotte Harbor. Fla.

unifasciata DESVOIDY, Myodaires, 105 (*Latreillia*).

RILEY, 2d Mo. Rept., 51 (*Exorista flavicauda*); quoted in General Index to Mo. Repts., 88.—Mo.; bred from *Leucania unipuncta*.

COQUILLET, Revis. Tachin., 84.—N. Y., Ill., Ga., Miss., Mo.; bred from same.

N. J.—Smith Cat.

vanderwulpi WILLISTON, Trans. Amer. Ent. Soc., XIII, 303.—San Domingo.

weyenberghiana VAN DER WULP, Tijdsch. v. Ent., XXVI, 26, pl. 1, f. 16; Biologia, Dipt., II, 470, oc.—Argentina, bred from *Saturnia argentina*; Mexico, several places, bred from *Automeris cecrops*.

MELANOPHRYS.

WILLISTON, Trans. Amer. Ent. Soc., XIII, 305, 1886.

TOWNSEND, Trans. Amer. Ent. Soc., XIX, 92, 1892 (*Atropharista*).

BRAUER and BERGENSTAMM, Zweifl. d. Kaiserl. Mus., VI, 169, 1893.

COQUILLET, Revis. Tachin., 85, 1897, notes.

insolita WALKER, Dipt. Saund., 277 (*Tachina*).—U. S.

TOWNSEND, Trans. Amer. Ent. Soc., XIX, 92 (*Atropharista jurinoides*).—Brookings, S. D.

WILLISTON, Kans. Univ. Quart., III, 172; Psyche, 1893, 409 and 492, notes.

TOWNSEND, Psyche, 1893, 461, notes.

COQUILLET, Revis. Tachin., 85.—Grimsby, Canada; N. H., N. Ill., Col.

Axton, N. Y.—M. and H.

flavipennis WILLISTON, Trans. Amer. Ent. Soc., XIII, 306.—Wyo., Cal.

COQUILLET, Revis. Tachin., 85.—S. Cal., Idaho.

APHRIA.

DESVOIDY, Myodaires, 89, 1830.

MEIGEN, Syst. Besch., VII, 266, 1838 (*Olivieria*).

MACQUART, Annales Soc. Ent. France, 1848, 87 (*Rhynchosia*, to replace *Olivieria*, preoc.).

SCHINER, Fauna Austr., I, 432, 1862.

BRAUER and BERGENSTAMM, Zweifl. d. Kaiserl. Mus., IV, 134, 1889; VI, 138 and 214, 1893.

COQUILLET, Revis. Tachin., 85, 1897, notes.

ocypterata TOWNSEND, Trans. Amer. Ent. Soc., XVIII, 361.—Brookings, S. D., and Minn.

COQUILLET, Revis. Tachin., 85.—Toronto, Can., to Ga.; Wash. to S. Cal.; bred from *Carnadeus messoria*.

MASISTYLUM.

BRAUER and BERGENSTAMM, Zweifl. d. Kaiserl. Mus., VI, 138, 1893.

macropogon BIGOT, Annales, 1888, 259 (*Brachycoma*).—Cal.

BRAUER, Sitzungsbericht d. K. Akad., CVI, 21, type redesc. and referred here.

OCYPTERA.

LATREILLE, Hist. Nat. Crust. et Ins., XIV, 378, 1804.

DESVOIDY, Myodaires, 231, 1830 (*Parthenia*).

SCHINER, Fauna Austr., I, 412, 1862.

BRAUER and BERGENSTAMM, Zwoifl. d. Kaiserl. Mus., VI, 143, 1893.

COQUILLET, Revis. Tachin., 86, 1897, notes.

VAN DER WULP, Biologia, Dipt., II, 449, 1903, table of species.

Note.—The synonymy of this genus is very uncertain, particularly as to *carolina* and *dosiades*. Townsend has dissented from Coquillett's conclusions, which are presented below. Brauer, Sitzungsbericht d. K. Akad., CVII, 1, confirms the generic position of Bigot's species, without expressing any opinion as to the synonymy.

arcuata SAY, see *Xanthomclana*.

argentea TOWNSEND, Proc. Ent. Soc. Wash., II, 144.—D. C. and Iowa.

COQUILLET, Revis. Tachin., 86.—N. J., Pa., N. Va., Mo.

atra ROEDER, Stett. Ent. Zeit., 1885, 344.—Porto Rico. See *dosiades*.

VAN DER WULP, Biologia, Dipt., II, 450, oc.—N. Yucatan.

carolinæ DESVOIDY, Myodaires, 232 (*Parthenia*).—Carolina.

WALKER, List, IV, 694 (*dotades* and *epytus*); 696 (*euchenor*).—Jamaica; Ga.; Mass. and Newfoundland.

BIGOT, Annales, 1878, 42-44 (*californica*, *fumipennis* and *binotata*).—Cal.; Cal.; Baltimore.

TOWNSEND, Psyche, 1893, 466; Jour. N. Y. Ent. Soc., V, 176; Psyche, 1897, 149; loc. cit., 1898, 212;—notes on syn. and oc.; bred by Forbes from an *Aceridiid* and ?*Lucania unipuncta* HAW.

Province of Quebec—Fyles.

dosiades WALKER, List, IV, 695.—Nova Scotia.

BIGOT, Annales, 1878, 46, 47 (*soror* and *simplex*).—Both Mexico.

GIGLIO-TOS, Ditt. del Mess., III, 3, includes *binotata*, *atra*, and ?*euchenor* as synonyms.—Orizaba, Mex.

COQUILLET, Revis. Tachin., 86.—N. H. to Ga.; S. D. to Nev.

VAN DER WULP, Biologia, Dipt., II, 4 (*soror*) and 450, oc. in Mexico, many places.

Montreal—Chagnon.

liturata OLIVIER, see *Euantha*.

minor ROEDER, Stett. Ent. Zeit., 1885, 344.—Porto Rico.

Guerrero, Mex.—Van der Wulp.

signatipennis VAN DER WULP, Tijdschr. v. Ent., XXXV, 187; Biologia, Dipt., II, 450, pl. XIII, f. II.—Guerrero, Mex.

STEVENIA.

DESVOIDY, Myodaires, 221, 1830; Dipt. Env. Paris, II, 377, 1863.

RONDANI, Dipt. Ital. Prod., I, 80, 1856.

VAN DER WULP, Biologia, Dipt., II, 455, 1903, note.

Note.—Bigot's species probably do not belong to this genus.

flavocalyptrata BIGOT, Annales, 1888, 255.—Mex.

pallidiventris BIGOT, Annales, 1888, 254.—Mex.

pictipes BIGOT, see *Xanthomclana arcuata*.

LINNÆMYIA.

DESVOIDY, Myodaires, 52-57 (*Linnæmyia*, *Bonnettia*, *Bonnellia*, *Marshamia*), 1830.

MACQUART, Hist. Nat. Dipt., II, 80, 1835 (*Micropalpus*).

SCHINER, Fauna Austr., I, 427, 1862 (*Micropalpus*).

COQUILLET, Revis. Tachin., 86, 1897, notes.

Note.—Several of the species described as *Micropalpus* will be found under *Epalpus*.

- angustifrons** VAN DER WULP, Tijdschr. v. Ent., xxxv, 193 (*Micropalpus*); Biologia, Dipt., II, 475 (id.).—Tabasco, Mex.
- comta** FALLÉN, Kongl. svenska Vetenskap. Akad. Handl., xxxi, 1810 (*Tachina*); Muscides, 24, 1820 (id.).—Europe.
- MEIGEN, Syst. Besch., IV, 259 (*Tachina fulgens*); VII, 217, refers to *Micropalpus*.
- DESVOIDY, Myodaires, 53-58 (*heraclei, analis, distincta, astivalis, borealis, Marshamia analis* and *nigripes*).—Europe, Philadelphia and Carolina.
- MACQUART, Hist. Nat. Dipt., II, 84 (*Micropalpus piccus*).—Carolina.
- ZETTERSTEDT, Dipt. Scand., III, 1094 (*Tachina*).
- RONDANI, Dipt. Ital. Prod., III, 70 (*Micropalpus*).
- SCHINER, Fauna Austr., I, 428 (*Mic. fulgens*; his *comtus*, p. 429, is a different species).
- GIGLIO-TOS, Ditt. del Mess., III, II, notes (*Mic. fulgens* and *comtus*).—Mexico, several places.
- VAN DER WULP, Biologia, Dipt., II, 474 (*M. fulgens*), oc.—Guerrero, Mex.
- COQUILLET, Revis. Tachin., 87, syn., etc.—London, Ont.; U. S. generally; bred from *Agrotis ypsilon* ROTT. and *Carnedes messoria* HARR.
- nigrifrons** BIGOT, Annales, 1888, 263 (*Micropalpus*).—Mex.
- picta** MEIGEN, Syst. Besch., IV, 261 (*Tachina*); VII, 217, gen. ref.—Europe.
- SCHINER, Fauna Austr., I, 429.
- COQUILLET, Revis. Tachin., 87; Proc. Wash. Acad. Sci., II, 438, oc. in Alaska.—N. H.; Mass.
- Beulah, N. M.—Skinner.

NEMORÆA.

- DESVOIDY, Myodaires, 71, 1830.
- SCHINER, Fauna Austr., I, 447, 1862.
- VAN DER WULP, Biologia, Dipt., II, 47, note, and table of Mexican species, 1890.
- BRAUER and BERGENSTAMM, Zweifl. d. Kaiserl. Mus., IV, 116, 1889; VI, 171, 183, 1893.
- BRAUER, Sitzungsbericht d. K. Akad., CVII, 5.
- clesides** WALKER, see *Phyto*.
- forreri** VAN DER WULP, Biologia, Dipt., II, 49, pl. II, f. 21.—Durango, Guerrero, Tepic and Vera Cruz, Mex.
- GIGLIO-TOS, Ditt. del Mess., III, 13 (*Microtrichomma*).—Guerrero, Mex., and Mexico City.
- Note*.—Giglio-Tos, in Boll. R. Univ. Torino, VIII, No. 158, 1, has proposed a new genus, *Microtrichomma*, for Van der Wulp's *Nemoræa intermedia, forreri*, and *smithi*; but Brauer and Bergenstamm, Zweifl. d. Kaiserl. Mus., VI, 183, mention these, with *obscurella*, as belonging to their genus *Arthrochata*. Not being able to clear up the situation, I content myself with calling attention to it.
- intermedia** VAN DER WULP, Biologia, Dipt., II, 50.—Guerrero and City of Mexico.
- GIGLIO-TOS, Ditt. del Mess., III, 13.
- intrita** WALKER, Trans. Ent. Soc., n. ser., v, 297.—Mex.
- labis** COQUILLET, Jour. N. Y. Ent. Soc., III, 104; Revis. Tachin., 87.—Wash.
- leucaniæ** KIRKPATRICK, see *Winthemia quadripustulata*.
- masuria** WALKER, see *Eutrixa*.
- minor** MACQUART, see *Panzeria radicum*.
- notata** BIGOT, Annales, 1888, 82 (*Echinomyia*).—Mex.
- BRAUER, Sitzungsbericht d. K. Akad., CVII, 5, refers to *Arthrochata*.

DEXIIDÆ.

- BIGOT, Revue d'Entomol., 1885, 266, table of all genera.
 VAN DER WULP, Biologia, Dipt., II, 211, table of Mexican genera, 1891.
 BRAUER and BERGENSTAMM, Zweifl. d. Kaiserl. Mus., V, 1891.
 TOWNSEND, Trans. Amer. Ent. Soc., XIX, 1892, 273, table of N. A. genera.
 VAN DER WULP, Tijdschr. v. Ent., XXVIII, 189, 1885, has a table of the long-legged genera, referring especially to those of Tropical America.

Note.—Brauer and Bergenstamm published an extensive work in the same year as Van der Wulp, 1891. I am unable to settle the question of actual priority; but as Van der Wulp allowed Brauer and Bergenstamm to use his types as a matter of courtesy, and they attributed his genera to him, it would seem unwise to disturb this arrangement.

The ideas of the authors named above differ widely as to the limits and validity of genera; frequently they are hopelessly contradictory. The work of Brauer and Bergenstamm is obviously of a preliminary character, undergoing material change with each succeeding instalment, which makes it undesirable to follow it for sequence of genera.

The differences between Tachinidæ and Dexiidæ are evanescent, and the prospect is that the families will ultimately be combined, or new family characters established. In the present work, most of the doubtful genera, if not in fact all of them, will be found in the Tachinidæ.

The following notes may be grouped together, for convenience of reference:

Illigera ælops WALKER is a *Beskia*.

Illigera corythus WALKER is *Xanthomclana atripennis*.

Illigera helymus WALKER is a *Mctachata*.

Megerlea rufocaudata BIGOT goes in *Sarcophilodes*.

Oplisa albifacies BIGOT is a *Pseudodexia*.

Oplisa nigrifacies BIGOT; according to Brauer, Sitzungsbericht d. K. Akad., CVI, 32, the types include four species, referable to three genera.

Phorostoma appendiculata BIGOT is a *Myiomima*.

Phorostoma melanogaster BIGOT is *Sardiocera valida*.

Ptilodegeeria B. and B.; for the type species, see *Hypostena obumbrata* V. d. W.

Pyrrosia ochracea BIGOT is an *Æstrophasia*.

Sericocera pictipennis MACQ. is *Euantha dives*.

Tromodesia hæmorrhoidalis BIGOT is *Leptoda atrifrons*.

MACQUART, Hist. Nat. Dipt., II, 250 (*Ochromyia*).—Jamaica.

Porto Rico—Roeder (*Ormia*).

I refer here on the strength of Macq., Dipt. Exot., II, 3, 132.

rectinervis BIGOT, Bull. Soc. Ent. France, 1887, clxxiii (*Somomyia*).—Rocky Mts.

BRÄUER, Sitzungsbericht d. K. Akad., cviii, 521, gen. ref., from type.

? *rutilans* FABRICIUS, Spec. Ins., II, 436 (*Musca*).—The locality given by Fabricius is "in *America insulis*"—that is, the West Indies; but Wiedemann mentions South America. Probably extra-limital.

secors WALKER, see *Mesembrinella*.

semiatra SCHINER, Novara, 308.—Colombia.

ROEDER, Stett. Ent. Zeit., 1886, 269.—Mexico.

GIGLIO-TOS, Ditt. del Mess., IV, 1.—Mex.

VAN DER WULP, Biologia, Dipt., II, 295, pl. VII, f. 14.—Guerrero and Durango, Mexico; Costa Rica.

splendida MACQUART, Dipt. Exot., Suppl., I, 196.—Texas.

? *stygia* FABRICIUS, Spec. Ins., II, 438, etc.

OSTEN SACKEN, Cat., note 276, shows that this is probably from New Zealand.

viridescens DESVOIDY, Myodaires, 537.—Carolina.

MEIGEN, Syst. Besch., VII, 301 (*Musca violacea*).—Europe.

MACQUART, Dipt. Exot., Suppl., IV, 244 (*terra-novæ*).—Newfoundland.

HOUGH, Zool. Bull., II, 286, syn. and notes.

N. J.—Smith Cat.; Alaska—Coquillett; Axton, N. Y.—M. and H.

vomitaria LINNÉ, Fauna Suec., 2d edit., 452 (*Musca*).—Sweden; "habitat in cadaveribus et in carnibus calori expositis." The common blow-fly.

FABRICIUS, Syst. Antl., 285 (*M. carnivora*).—Germany and probably Philadelphia.

DEGEER, Mém. Hist. Nat. Ins., VI, 29 (*M. carnaria carulca*).

FALLÉN, Muscides, 47 (*Musca*).

MEIGEN, Syst. Besch., V, 60, desc. and habits.

MACQUART, Hist. Nat. Dipt., II, 262 (*fulvibarbis*).

SCHINER, Fauna Austr., I, 584.

ESCHHOLZ, Entomographien, I, 113 (*Musca obscæna*). [Hgh.]

FITCH, Trans. N. Y. Agl. Soc., 1849, IX, 802, pop. acct.

OSTEN SACKEN, Berl. Ent. Zeitsch., 1887, XXXI, 17, abstract of an important Russian paper on the habits by Portschinsky.

HUGO SUMMA, M.D., St. Louis Med. and Surg. Journal, 1889, May, records nasal myiasis due to this species; abstract by Townsend, Ins. Life, III, 39.

LUGGER, 2d Minn. Rept., 1896, 162, pl. XII, f. 135.

N. J.—Smith Cat.; Beulah, N. M.—Skinner; White Mts., N. H.—Slosson; Montreal—Chagnon; Alaska—Coquillett.

xanthorhina BIGOT, see *Mesembrinella*.

LUCILIA.

DESVOIDY, Myodaires, 452, 1830.

SCHINER, Fauna Austr., I, 589, 1862.

HOUGH, Ent. News, X, 66, 1899; Zool. Bull., II, 287, table of species, 1899.

BRÄUER and BERGENSTAMM, Zweifl. d. Kaiserl. Mus., IV, 157, 1889; VI, 180, 1893; also as *Paralucilia*, V, 391, 1891; VI, 180, 1893.

For a supposed species of *Lucilia* infesting the turtle, see RILEY and HOWARD, Insect Life, V, 269; also TRUE, Science, IV, 511, and PACKARD, Amer. Naturalist, XVI, 598.

argentifera BIGOT, see *Pseudopyrellia cornicina*.

brunnicornis MACQUART, see *sericata*.

brunnicosa DESVOIDY, see *sylvarum*.

cæruleiviridis MACQUART, see *sericata*.

✓ *cæsar* LINNÉ, Fauna Suec., 451 (*Musca*).—Sweden; "habitat ubique in cadaveribus, carnibus et putridis." A common and widespread carrion fly.

FABRICIUS, Syst. Antl., 289 (id.).

MEIGEN, Syst. Besch., V, 51 (id.).

DESVOIDY, Myodaires, 452, 453 (*cæsar* and *lepida*).—Philadelphia; France and Nova Scotia.

MACQUART, Dipt. Exot., II, 2, 299, pl. XVIII, f. 5 (*parensis*); Suppl. III, 57 (*fraterna* and *consobrina*).—Para.; N. A.; N. A.

FITCH, Trans. N. Y. State Agr. Soc., 1849, 801, popular account of "sheep maggots."

WALKER, List, IV, 879, oc. in Mass. and Martin Falls, Canada.

SCHINER, Fauna Austr., I, 589.

RONDANI, Esame Ditt. Brazil, sep. 17 (*Lucilia princeps*).—Brazil.

OSTEN SACKEN, Berl. Ent. Zeitsch., XXXI, 1887, 20, abstract of Portchinsky's Russian work on habits of larvæ, etc.—valuable.

VAN DER WULP, Tijdschr. v. Ent., XXVI, 38; Biologia, Dipt., II, 297, bibliog., etc.—Durango, Mex.; Costa Rica.

TOWNSEND, Psyche, June, 1893, records supposed rearing from *Leucania unipuncta*.

GIGLIO-TOS, Ditt. del Mess., IV, 2, bibliog. and notes.—Orizaba, etc., Mex.

MOTTER, Jour. N. Y. Ent. Soc., VI, 223, oc. in human graves.

HOUGH, Zool. Bull., II, 288, notes and synonymy; Kans. Univ. Quart., IX, 203, oc. in S. A. and syn.

HOWARD, Proc. Wash. Acad. Sci., II, 563, figs. and habits; reared from human excrement.

MORGAN, Bull. 30, n. ser., Div. of Ent., 25, 1901, reared from *Melanoplus differentialis*.—Miss.

Common everywhere in North America, within the inhabited limits.

Note.—The species in RILEY, Rept. U. S. Entomol., 1890, 249, should have been *Pseudopyrellia cornicina*.

callipes BIGOT, see *Chrysomyia*.

carolinensis DESVOIDY, see *Pseudopyrellia cornicina*.

cluvia WALKER, see *ruficornis*.

compar DESVOIDY, see *Pseudopyrellia cornicina*.

cornicina FABRICIUS, see *Pseudopyrellia*.

flavigena BIGOT, see *Chrysomyia*.

fulvifacies DESVOIDY, see *Phormia regina*.

fulvinota BIGOT, Annales, 1877, 251.—Mex.

BRÄUER, Sitzungsbericht d. K. Akad., CVIII, 524, refers type to *Paralucilia*.

heræa WALKER, see *Pseudopyrellia cornicina*.

insularis WALKER, see *ruficornis*.

iridicolor BIGOT, Bull. Soc. Ent. France, 1887, 599 (*Somomyia*).—Cuba.

macellaria FABRICIUS, see *Chrysomyia*.

meridensis MACQUART, see *Pyrellia*.

violacea MACQUART, Dipt. Exot., Suppl. ii, 83.—Mexico.

BRAUER, Sitzungsber. d. K. Akad., cviii, 522, refers to *Paralucilia*.

PHORMIA.

DESVOIDY, Myodaires, 465, 1830.

HOUGH, Ent. News, x, 66, 1899, defined.

✓**regina** MEIGEN, Syst. Besch., v, 58 (*Musca*).—Europe.

DESVOIDY, Myodaires, 466 (*philadelphica*); 467 (*fulvifacies*).—Philadelphia.

MACQUART, Dipt. Exot., Suppl. iv, 251, pl. xxiii, f. 1 (*Lucilia terræ-novæ*).—Newfoundland.

? WALKER, List, iv, 892 (*mollis*).—Martin Falls, Canada.

SCHINER, Fauna Austr., 1, 589 (*Lucilia*).

JENNICKE, Neue Exot. Dipt., 67 (*Lucilia rufipalpis*).—Ill.

THOMSON, Eugen. Resa, 544 (*Lucilia stigmatalis*).—Cal.

HOUGH, Zool. Bull., ii, 288, preceding synonymy; he also adds Bigot's *Somomyia rectinervis. rufigena*, and *rupicola*, but Brauer's examination of the types does not seem to bear this out (Sitzungsber. d. Kaiserl. Akad., cviii, 521, et seq.).

N. J.—Smith Cat.; Montreal—Chagnon; Beulah, N. M.—Skinner.

terræ-novæ DESVOIDY, Myodaires, 467.—Newfoundland.

ZETTERSTEDT, Ins. Lapp., 657 (*Musca grænlandica*); Dipt. Scand., iv, 1330 (id.).—Greenland.

ST. EGGER, Grœnl. Antl., 363 (*Calliphora grænlandica* ZETT.).—Greenland.

GERSTÆCKER, Die Zweite Nordpohlfahrt, etc. (id.).

HOLMGREN, Ins. Nordgrœnl., 101 (id.).

RONDANI, Dipt. Ital. Prod., v, 196 (*Pollenia grænlandica*).

HOUGH, Zool. Bull., ii, 289, syn. and desc.—N. A., common.

HOWARD, Proc. Wash. Acad. Sci., ii, 568, fig. and note on habits.

RIEDEL, Allgem. Zeitsch. f. Ent., vi, 152, oc. in Pomerania, common the whole season (*Calliphora grænlandica*).

HENDEL, Wien. Ent. Zeit., xx, 30, doubtfully refers to *Avihospita*,—that is, to *Protocalliphora*.

N. J.—Smith Cat.; Alaska—Coquillett.

PROTOCOLLIPHORA.

HOUGH, Ent. News, x, 66, 1899.

HENDEL, Wien. Ent. Zeit., xx, 29, 1901 (*Avihospita*); syn. by Aldrich, op. cit., 68.

- azurea** FALLÉN, Acta Holmiæ, 1816, 245; Dipt. Suec., Muscides, 46 (both *Musca*).—Europe.
 MEIGEN, Syst. Besch., v, 63 (id.).
 DUFOUR, Annales Soc. Ent. France, 1845, III, pl. 3, reared from larvæ on nestlings of sparrow.
 ROSSI, Verzeichniss d. Zweifl. Ins. Cæsterr., Wien, 1848, mentions Schef-fer rearing the species from larvæ on young larks.
 SCHINER, Fauna Austr., I, 585 (*Calliphora*).
 RONDANI, Dipt. Ital. Prod., v, 197 (*Pollenia*).
 HOUGH, Zool. Bull., II, 289, fig.; very rare in N. A.
 HENDEL, Wien. Ent. Zeit., XX, 29, references to parasitism of the species on young birds (*Avihospita*, n. gen.).
- chrysorrhœa** MEIGEN, Syst. Besch., v, 60 (*Musca*).—Europe.
 SCHINER, Fauna Austr., I, 585 (*Calliphora*).
 HOUGH, Zool. Bull., II, 289, very rare in N. A.
 HENDEL, Wien. Ent. Zeit., XX, 29, thinks Meigen's desc. indicates a different species from Schiner's (*Avihospita*).
 BRAUER and BERENSTAMM, Zweifl. d. Kaiserl. Mus., VI, 546, reared from young of swallow.

SOMOMYIA.

- RONDANI, Dipt. Ital. Prod., IV, 9, 1861, change of name; op. cit., I, 90, 1856 (*Mya*, preoc.).
Note.—This genus, as founded, and as used by Bigot, seems to have had no definite meaning.
- flavigena** BIGOT, see *Chrysomyia*.
iridicolor BIGOT, see *Lucilia*.
rectinervis BIGOT, see *Calliphora*.
rufigena BIGOT, Bull. Soc. Ent. France, 1887, clxxiii.—Rocky Mts.
 BRAUER, Sitzungsber. d. K. Akad., CVIII, 521, says the type will form a new genus; oc in Ga.
rupicola BIGOT, Bull. Soc. Zool. France, XII, 603.—Rocky Mts.
 HOUGH, Zool. Bull., II, 289, makes a syn. of *Phormia regina*, but I think this is doubtful.
semiviolacea BIGOT, see *Lucilia*.
soulouquina BIGOT, see *Lucilia*.
sylphida BIGOT, see *Lucilia*.
xanthorhina BIGOT, see *Calliphora*.

alcis SNOW, Canad. Ent., XXIII, 88; 2d Rept. Ent. Soc. Ontario, 96.—N. Minn.;
 the adults attack the moose, in the dung of which the larvæ live.
serrata DESVOIDY, Myodaires, 389; Dipt. Env. Paris, II, 611 (the latter as *Pri-*
ophora).—S. France.
 MACQUART, Hist. Nat. Dipt., II, 244.
 RONDANI, Dipt. Ital. Prod., V, 230 (*Lyperosia*).
 WILLISTON, Entom. Americana, V, 180 (*cornicola*).—Va.
 LINTNER, Country Gentleman, Sept. 20, 1888, an unknown fly occurring on
 horns of cattle; Oct. 11, specimens received and sent to Osten Sacken;
 Nov. 29, determined as *H. serrata*, on authority of Kowarz.
 LINTNER, 5th N. Y. Rept., 1889, 220-227, bibliog., habits, figs.; "The Horn
 Fly."—N. Y.
 RILEY and HOWARD, Ins. Life, II, 60 (*cornicola*); 93, full biology, syn., etc.
Note.—It appears from the article just mentioned that this European
 species was first observed in New Jersey and Maryland, on cattle, in the
 summer and fall of 1887, although the first reference in print was by
 Lintner, supra, in 1888. Williston saw it from Pennsylvania in 1887 also.
 The subsequent spread of the fly was traced by frequent references in
 Insect Life, in the second and following volumes; the references may be
 found in the general index of the periodical. Other references which I
 have collected are mostly to brief notes; the principal ones I list.
 WILLISTON, Amer. Nat., 1889, sep., 7 pp. and pl.
 SMITH, Bull. 62, N. J. Expt. Sta.; Psyche, V, 343, figs., 1890.
 LUGGER, 2d Rept. Ent. Minn., 1896, 162-166, pl. XII, f. 136.
 RILEY, Dept. Agr. Rept., 1889, 345-348, pl. IV, V; life hist., etc.; 1891, 239,
 notes on spread; 1892, 159, same.
 FLETCHER, Bull. 14, Cent. Exp. Farm, Ottawa, Canada; Trans. Royal Soc.
 Canada, Sec. ser., V, 229, notes decrease.
 HERRICK, Bull. 53, Miss. Ex. Sta., 1900.
 WASHBURN, Bull. 77, Minn. Ex. Sta., 31, fig.

HOUGH, Biol. Bull., 1, 22, figs.; comparison with *alcis*.

Generally distributed throughout the United States and Eastern Canada; it reached Idaho in 1901; the larvæ are found in fresh cow-dung.

HEMICHLORA.

MIK, Wied. Ent. Zeit., XIV, 136, change of name.

WILLISTON, Psyche, 1895, 184 (*Rhopalomyia*, preoc.).

The genus is reported from North America by Williston, Ent. News, VII, 185. The described species are South American.

TRYPETIDÆ.

LOEW, Mon. N. A. Dipt., III, 327, 1873, table of genera.

COQUILLETT, Jour. N. Y. Ent. Soc., VII, 267, 1899, table of genera.

Note.—The order followed is essentially that of the table in Williston's Manual, although Coquillett has pointed out some seeming defects in the relation of genera therein. The genera of this family are closely interwoven, and mostly based on plastic characters; hence a slight difference in the emphasis placed on one set of characters has the effect of throwing a large number of species into other genera than they previously occupied. This change of emphasis Mr. Coquillett seems to have adopted, as compared with Loew, who established most of the genera; but as he has not published anything to justify his new generic references in most cases, I have been slow to accept them. The synonymy of species by Mr. Coquillett in Jour. N. Y. Ent. Soc., VII, 259-268, seems to me to do a great injustice to Mr. Doane, whose species were very carefully and accurately worked out. From an examination of Doane's material, I am satisfied that Coquillett was wrong in all, or nearly all, of the assertions he made regarding the synonymy of Doane's species; this was shown in a rejoinder published by Doane, op. cit., VIII, 47.

ANASTREPHA.

SCHINER, Novara, 263, 1868.

LOEW, Mon. N. A. Dipt., III, 227, 1873 (*Acrotoxa*).

OSTEN SACKEN, Cat., 260, 1878, makes the *Leptoxys* of Macquart, Dipt.

Exot., II, 452, 1835, the same as this; it was amended by Macquart, Dipt. Exot., Suppl., II, 2, 216, 1841, to *Leptoxys*, which is apparently preoccupied. This raises a peculiar question of nomenclature. Coquillett, Jour. N. Y. Ent. Soc., VII, 259, 1899, asserts that *Leptoxys* is not the same genus. I deem it safest to make no change under these con-

- ditions. The same question, with the synonymy of *Acrotora*, is discussed by Van der Wulp, *Biologia, Dipt.*, II, 404, 1899.

DROSOPHILA.

- FALLÉN, Geomyzides, 4, 1823.
 MEIGEN, Syst. Besch., VI, 81, 1830.
 SCHINER, Fauna Austr., II, 275, 1864.
 WILLISTON, Trans. Ent. Soc. Lond., 1896, 406, table of 23 St. Vincent species.
Note.—The genus *Scaptomyza* (HARDY, Proc. Berwickshire Nat. Club, 349, 1849) is accepted by Mr. Coquillett; it would include a considerable number of the species of *Drosophila*. See Schiner, Fauna Austr., II, 276, and Coquillett, Proc. Wash. Acad. Sci., II, 462.
Note 2.—The apple burrowing habit attributed to *Drosophila* sp. in Amer. Nat., II, 641, does not seem to be sufficiently corroborated. More likely the actual burrower was *Trypeta pomonella*, and *Drosophila* lived in the cavities.
adusta LOEW, Cent., II, 98.—D. C. N. J.—Smith Cat.
 CHITTENDEN, Bull. 33, n. ser., 76, mining leaves of cabbage, etc. (*Scaptomyza*).—Maine to Fla. and Ill.
albipes WALKER, Dipt. Saund., 410.—U. S.

APPENDIX.

Literature of North American Diptera for the year 1904, with enumeration of new species, genera, etc.

Adams, C. F.

Notes and Descriptions of New North American Diptera. Kans. Univ. Sci. Bull., II, 433-455; June, 1904.

New: *Simulium notatum*, *Mydas abdominalis*, *Xylophagus nitidus*, *Chrysopila lucifera*, *bella* and *flavibarbis*, *Symphoromyia flavipalpis*, *Leptis pleuralis* and *palpalis*, *Psilocephala occipitalis* and *lateralis*, *Thereva anomala*, *Scenopinus mirabilis* and *elccta*, *Nausigaster scutellaris*, *Sphyrimorpha snowi*, *Conops gracilis*, *Tetanocera inopa*, *Icterica fasciata*, *Urellia flava*, *conjuncta* and *occidentalis*, *Elachiptera bilineata*, *Hippelates splendens*, *Limosina exigua*, *occidentalis* and *sordipes*.

Tables of Species: *Xylophagus*, *Chrysopila*, *Leptis*, *Icterica*, *Urellia* and *Limosina*.

On the North American Species of Siphonella. Psyche, XI, 103, 104; Oct., 1904.

New: *S. parva* and *nigra*.

European species from this realm: *S. trilincata* MEIG.

Descriptions of New Oscinidæ. Ent. News, xv, 303, 304; Nov., 1904.

New: *Chlorops pulla*, *lasciva*, *rubrivittata*, *annulata* and *certima*.

Aldrich, J. M.

New Species of Phoridae in Brues's Monograph. Trans. Amer. Ent. Soc., XXIX, 331-400. Pub. Jan., 1904. Four species, included in the body of the Catalogue.

The Genus *Psilopus* of Authors. Canad. Ent., XXXVI, 246, 247; Aug., 1904.

Bibliography and synonymy of *Psilopodinus* and *Agonosoma*; no new species.

A Contribution to the Study of North American Dolichopodidae. Trans. Amer. Ent. Soc., XXX, 269-286; 1904.

New: *Pelastoneurus scutatus*, *parvus*, *falcatus* and *proximus*, *Paraclius vicinus*, *Psilopodinus pilicornis*, *crinitus*, *viridicoxa* and *flavipes*, *Agonosoma rotundiceps* and *costale*; also two Brazilian species. Table of genera and tables of species in several genera.

Back, E. A.

New Species of North American Asilidae. Canad. Ent., XXXVI, 289-293; Oct., 1904.

New: *Dasyllis cinerea* and *fernaldi*, *Saropogon rufus* and *albifrons*, *Ospriocerus albifasciatus*, *Anisopogon johnsoni*.

Baker, C. F.

Invertebrata Pacifica, I, 17-40; Feb. 10, 1904. Printed by the Author, Claremont, Cal.

A long faunal list of Diptera from California and Nevada. The new species are described by Coquillett, q. v. The following European are new to North America: *Lonchoptera lacustris* MEIG., *Psilopa comta* MEIG., *Mosillus aeneus* FALL.

Note.—The *Limnophora borealis* STEIN is a clerical error; there is no such species—Coquillett in litt.

Banks, Nathan.

The "Yellow Fly" of the Dismal Swamp. Ent. News, xv, 290, 291; Nov., 1904.

Identified as *Diachlorus ferrugatus* FAER.

Bezzi, Mario.

Verzeichniss der bis jetzt bekannten Arten der Dipteren-Gattung *Drapetis* Meig. Wien. Ent. Zeit., xxiii, 143-146, 1904.

Includes the North American species; none new.

Brimley, C. S. and Sherman, Franklin.

List of the Tabanidæ of North Carolina. Ent. News, xv, 270-275.

No new species.

Erues, C. T.

Monograph of N. A. Phoridae. This is included in the body of the Catalogue; see the family, p. 334.

Notes on *Trichobius* and the Systematic Position of the Streblidæ. Bull. Amer. Mus. Nat. Hist., xx, Art. viii.

No new species.

Card, F. W. and Stene, A. E.

Article on the Apple Maggot (*Rhagoletis pomonella*) in 17th Rept. of R. I. Expt. Station, 1904, 191-201. Purely economic.

Chagnon, G.

Additions to the Syrphidæ of the Province of Quebec. 34th Ann. Rept. Ent. Soc. of Ontario, 1904, 48, 49.

Eight species mentioned; none new.

Chittenden, F. H.

The Cherry Fruit Fly. Bulletin No. 44, Div. of Ent., 70-75, 1904.

Review of the habits, etc., of *Rhagoletis cingulata* Lw.

Cockerell, T. D. A.

Three New Cecidomyiid Flies. Canad. Ent., xxxvi, 155, 156; June, 1904.

New: *Diplosis coloradella*, *Rhabdophaga portera*, *Cecidomyia peroculta*.

Cook, Melville T.

Galls and the Insects Producing Them. Ohio Naturalist, 1904.

A series of articles from a botanical standpoint chiefly; several Dipterous galls described; no new species.

Coquillett, D. W.

Several New Diptera from North America. Canad. Ent., xxxvi, 10-12; Jan., 1904.

New: *Culex dupreii*, *Janthinosoma (Conchyliaestes) varipes*, *Mctriocnemus knabi*, *Cuterebra grisea*, *Bischofia varia* (the last a genus of Scio-myzidæ heretofore known from Europe).

Notes on *Culex nigrutilus*. Ent. News, xv, 73, 74; Feb., 1904.

The American species formerly called *nigrutilus* is distinct, and the name *salinarius* is proposed for it. *Nigrutilus* is not North American.

Invertebrata Pacifica. Reports on the Californian and Nevada Diptera. 1

(See notice under C. F. Baker.) Mr. Coquillett described the new species as follows: *Mycetophila trifasciata* and *fasciata*, *Neocmpheria pullata*, *Sciophila calcarata*, *Dilophus occipitalis*, *Leptis flavonigra*, *Pheneus opacus*, *Tabanus opacus*, *Thereva flavicauda*, *Acrocera bakeri*, *Rhamphomyia curvipes*, *Chilosia plumosa*, *Zagonia* (n. gen. Geomyzidæ) *flava*, *Hippelates microcentrus*, *Chyliza robusta*, *Meliceria occidentalis*, *Spilo-*

grapha inæqualis, *Tephritis palpalis*, *Euaeresta adspersa*, *Sapromyza cæsia* and *unicittata*, *Eccoptomera* (Europ. gen. Helomyzidæ) *simplex*, *Cænosiæ argentea* and *majuscula*, *Lispa polita*, *Phaonia fimbriata*, *Admontia scitigera*, *Biomyia mutabilis*, *Scleropogon jubatus*, *Leptomomydas hirtus* and *concinuus*.

Diptera from Southern Texas, with Descriptions of New Species. Jour. N. Y. Ent. Soc., xii, 31-35; March, 1904.

Eight described species listed; the following new: *Cyphomyia schæfferi*, *Phthiria unimaculata*, *Holopogon latus*, *Stenopogon tenebrosus*, *pumilus* and *nitens*, *Erax tuberculata*, *Anastrepha pallens*, *Scpsis pleuralis*.

New Diptera from Central America. Proc. Ent. Soc. Wash., vi, 90-98; May, 1904.

New: *Ceratopogon terminalis*, *Sciara trifasciata*, *Dilophus fumosus* and *rhynclops*, *Psiloccephala pruinoso*, *Conops pallifrons*, *Paradidyma orbitalis*, *Hypostena gracilis*, *Chatoclusia* (n. gen. Heteroneuridæ) *bakeri*, *Sapromyza varia*, *albipes* and *triscariata*, *Euxesta juncta* and *fencstrata*, *Ictericæ apicalis*, *Notiphila frontalis*, *Scutops* (n. gen. Geomyzidæ) *fascipennis*, *Chlorops capillata*.

New North American Diptera. Proc. Ent. Soc. Wash., vi, 166-192; July, 1904.

New: *Ceratopogon medius*, *Tæniorhynchus nigricans* and *signipennis*, *Culex nivitarsis* and *pullatus*, *Eugnoriste brevisrostris*, *Acnemia varipennis*, *Phronia tenebrosa*, *Calosia* (Europ. gen. Mycetophilidæ) *pygophora*, *Platyura pullata*, *Bibiodes* (n. gen. Bibionidæ) *halteralis*, *Symphoromyia securifera*, *Phthiria melanoscutea*, *fulvida*, *marginata*, *vittiventris*, *nubeculosa*, *inornata*, *badia*, *picturata*, *flavcola*, *amplicella* and *bicolor*, *Acreotrichus atratus*, *Psiloccephala aurantiaca*, *Leptogaster virgatus* and *hirtipes*, *Ablautus flavipes* and *rubens*, *Stenopogon nigrifulus*, *Laphystia flavipes*, *limatula* and *opaca*, *Diectrodes* (n. gen. Asilidæ) *flavipes*, *Metapogon* (n. gen. Asilidæ) *gikvipes* and *punctipennis*, *Cyrtopogon nigricolor*, *tibialis*, *maculosus* and *varipennis*, *Saropogon luteus*, *hyalinus* and *semiustus*, *Psilopodinus* (*Sciapus*) *pruinosis*, *Distichona auriceps*, *Sarcophaga amblycorypha*, *Pegomyia bucculenta*, *Nerius longicornis*, *Lauxania signatifrons*, *Sapromyza pcticornis*, *Drosophila ordinaria*, *Sinophthalmus* (n. gen. Geomyzidæ) *pictus*, *Agromyza tæniola*.

The Genera of the Dipterous Family Empididæ (addenda). Proc. Ent. Soc. Wash., vi, 51.

No new species.

Notes on the Syrphid Fly *Pipiza radicum* Walsh and Riley. Proc. Ent. Soc. Wash., vi, 200.

Czerny, P. Leander.

Revision der Helomyziden. I. Wien. Ent. Zeit., xxiii, 199-244, 1904. II. Op. cit., 263-286, 1 pl.; Dec. 31, 1904.

Quotes descriptions of North American species; records *Helomyza nemorum* MEIG., a European species, from Colorado. The work is still incomplete.

Dyar, H. G.

The Life History of *Culex cantans* Meig. Jour. N. Y. Ent. Soc., xii, 36-38, 1904.

The Life History of *Culex varipalpus* Coq. Jour. N. Y. Ent. Soc., xii, 90-99, 1904.

Larva of *Culex punctor* Kirby, with Notes on an Allied Form. Jour. N. Y. Ent. Soc., xii, 169-171, 1904.

New: *Culex trichurus*.

Brief Notes on Mosquito Larvæ. Jour. N. Y. Ent. Soc., xii, 172-174, 1904.

No new species.

Notes on the Mosquitoes of British Columbia. Proc. Ent. Soc. Wash., vi, 37-41, 1904.

Notes on biology of 17 species; none new.

Dyar, H. G. and Knab, Frederick.

Diverse Mosquito Larvæ that produce Similar Adults. Proc. Ent. Soc. Wash., vi, 143, 144, 1904.

No new species.

Emerton, J. H.

A Dipterous Parasite of the Box Turtle. Psyche, xi, 34; Apr., 1904.

Brief note on *Sarcophaga* sp.

Felt, E. P. and Young, D. B.

Importance of Isolated Rearings of Culicid Larvæ. Science, xx, 312, 313; 1904.

New, briefly diagnosed: *Culex fitchii*, *lazarensis*, *cinereoborealis*, *abserratus*.

Felt, E. P.

Mosquitoes or Culicidæ of New York State. Bull. 79, N. Y. State Museum. Albany, 1904; pp. 241-400, 57 plates and many text figures.

New genera: *Culicada*, *Culicelsa*, *Ecculex*, *Culicella*, *Culiscta*, *Protoculex*.

New species: *Culicada onondagensis*, *Culiscta absobrinus* and *magnipennis*, *Corethra karnercensis* and *linnceri*, *Sayomyia rotundifolia* and *hudsoni*, *Culex abfitchii*.

Fletcher, Jas.

Notes of Captures. Diptera. 34th Ann. Rept. Ent. Soc. Ontario, 1904, pp. 98, 99.

Fifty-five species listed from Canada, none new.

French, G. H.

Gastrophilus epilepsalis Larvæ and Epilepsy. Canad. Ent., xxxvi, 83, 84; March, 1904.

Reasserts his theory.

Girault, A. Arsène.

Tanypus dyari: Pupa and Adult Exclusion. Psyche, xi, 81, 82; Aug., 1904.

Grossbeck, John A.

Description of a new *Culex*. Canad. Ent., xxxvi, 332; Nov., 1904.

Culex siphonalis.

Descriptions of Two New Species of *Culex*. Ent. News, xv, 332, 333; Dec., 1904.

Culex prctans and *inconspicuus*.

Herrick, Glenn W.

Notes on the Life History of *Grabhamia jamaicensis*. Ent. News, xv, 81-84, 1 pl.; Mar., 1904.

Hine, Jas. S.

New Species of Tabanidæ. Canad. Ent., xxxvi, 55, 56; Feb., 1904.

New: *Chrysops fulvostigma* and *brimleyi*.

On Diptera of the Family Ephydridæ. Ohio Naturalist, Feb., 1904.

New: *Psilopa fulvipennis*, *Cænia virida*.

European species identified from U. S.: *Cænia fumosa* STEN.

Tables of species of *Dichata* and *Cænia*.

The Diptera of British Columbia. *Canad. Ent.*, xxxvi, 85-92; Apr., 1904.

Extensive list of described species.

New: *Euparyphus obliquus*, *Anthrax harveyi*.

European reported: *Pyrellia ænea* ZETT.

Insects Injurious to Stock in the Vicinity of the Gulf Biologic Station.

In Bull. No. 44, Div. of Ent., 57-60, 1904.

A few Tabanidæ mentioned; no new species.

Tabanidæ of the Western United States and Canada. *Ohio Naturalist*, v, 217-249; Dec., 1904.

Keys to genera and species. New species: *Chrysops coquilletti*, *Snowicillus* (n. gen.) *atratus*, *Tabanus flavidus*, *laticeps*, *laticornis*, *osburni*, *productus*; some new synonymy.

Johnson, C. W.

Some Notes and Descriptions of Four New Diptera. *Psyche*, xi, 15-20; Feb., 1904.

New: *Tabanus whitneyi*, *Oncodes albiventris*, *Argyra aldrichi*, *Alophora magnapennis*.

Tabanus politus changed to *hinei*, on account of preoccupation.

Several important notes.

When to Collect Tabanidæ. *Psyche*, xi, 35; Apr., 1904.

List of species collected at Riverton, N. J.; some other notes; no new species.

Some of the Diptera to be collected during April and May. *Psyche*, xi, 37, 38; Apr., 1904.

General notes; no new species.

A Supplementary List of the Diptera of New Jersey. *Ent. News*, xv, 157-163; May, 1904.

Supplementary to the Smith Catalogue; no new species.

Knab, Frederick.

The Epistomal Appendages of Mosquito Larvæ. *Jour. N. Y. Ent. Soc.*, xii, 175-177, 1904.

Ludlow, C. S.

Mosquito Notes. *Canad. Ent.*, xxxvi, 233-236; Aug., 1904.

New: *Grabhamia de-Niedmannii*.

McCracken, Isabel.

Anopheles of California, with Description of a New Species. *Ent. News*, xv, 9-14, 1 pl.; Jan., 1904.

New: *Anopheles franciscanus*.

Melander, A. L.

Notes on Stratiomyidæ. *Canad. Ent.*, xxxvi, 14-24 and 53, 54; Jan. and Feb., 1904.

New: *Sargus texanus*. Several tables of species, and other matter.

Additional Notes on Nematelus. *Psyche*, xi, 33, 34; Apr., 1904.

No new species.

Osburn, R. C.

The Diptera of British Columbia: The Syrphidæ. *Canad. Ent.*, xxxvi, 213-220 and 257-262; Aug. and Sept., 1904.

List of 78 species; none new.

Slingerland, M. V. and Johnson, Fred.

A New Grape Enemy; the Grape Blossom-Bud Gnat. Bull. 224, Cornell Expt. Station, p. 71; Nov., 1904.

An undetermined Cecidomyid; habits described.

Smith, John B.

Report on the Mosquito Investigation. Annual Report N. J. Expt. Station for 1903, published 1904. pp. 645-659.

No new species.

Notes on the Life History of *Culex dupreei* Coq. Ent. News, xv, 49-51, 1 pl.; Feb., 1904.

No new species.

Notes on Some Mosquito Larvæ found in New Jersey. Ent. News, xv, 145-152, 1 pl.; May, 1904.

No new species.

The Common Mosquitoes of New Jersey. Bull. No. 171, N. J. Expt. Station, 1904; 40 pp., 12 plates and some text figures.

Valuable for biology; no new species.

Snodgrass, Robt. E.

The Terminal Abdominal Segments of Female Tipulidæ. Jour. N. Y. Ent. Soc., xi, 177-188, 2 pl.; Dec., 1903.

The Hypopygium of the Tipulidæ. Trans. Amer. Ent. Soc., xxx, 179-236, 11 pl.; Aug., 1904.

The Hypopygium of the Dolichopodidæ. Proc. Cal. Acad. Sci., 3d ser., III, No. 10, pp. 273-288, 4 pl.; Sept., 1904.

The three preceding papers are purely anatomical, but not less valuable for classification, as a large number of genera are compared in each group.

Snow, F. H.

Lists of Coleoptera, Lepidoptera, Diptera and Hemiptera collected in Arizona by the Entomological Expeditions of the University of Kansas in 1902 and 1903. Kans. Univ. Sci. Bull., May, 1904, Vol. II. Diptera on pp. 341-346; 201 species, none new.

Speiser, P.

Typenuntersuchungen an Hippobosciden. Zeitsch. f. syst. Hym. und Dipterologie, iv, 82-89; March, 1904.

Type of *Olfersia sulcifrons* THOMSON is referred to *Pseudolfersia*.

Zur Nomenclatur Blutsaugender Dipteren Amerikas. Insekten-Börse, 1904, 148, brief notice.

On account of preoccupation, *Simulium cinereum* BELLARDI is changed to *tephrodes*, and *Culex affinis* ADAMS to *pæus*.

Stein, P.

Die Amerikanischen Anthomyiden des Königlichen Museums für Naturkunde zu Berlin und des Ungarischen National Museums zu Budapest. Annales Musei Nationalis Hungarici, II, 414-495, 1904.

Mostly South American. New from N. A.: *Aricia pulvillata*, *Trichopticus spiniger*, *Hylemyia spinilamellata* and *canosiaformis*, *Canosia compressa*.

European from N. A.: *Aricia serva* MEIG., *Spilogaster obscuripes* ZETT., *Spilogaster anceps* ZETT., *Homalomyia ornata* MEIG.

South American from N. A.: *Spilogaster gemina* WIED., *Limnophora sava* WIED.

Washburn, F. L.

Eighth Report of the State Entomologist of Minnesota, for the year 1903 (pub. Jan., 1904). 184 pp., with plates, etc.

Article on Hessian fly, pp. 1-11.

Ninth Report of the State Entomologist of Minnesota, for the year 1904 (pub. Dec., 1904). 197 pp., with col. plate, etc.

P. 185, notes on mostly undetermined Cecidomyid gall-makers on bass-wood, soft maple and box elder; p. 188, fumigation for *Diplosis violicola* Coq.

Webster, F. M.

Studies of the Habits and Development of *Neocarata rhodophaga* Coq. Bull. Ill. State Lab. Nat. Hist., VIII, 15-25, 1 col. pl.; Feb., 1904.

Wood, Clarence M.

Experiments in destroying Black Flies. Bull. 112, N. H. Expt. Station; May, 1904.

The species is *Simulium venustum* SAY.

Weeks, Henry Clay.

First Anti-Mosquito Convention. Brooklyn, 1904. 84 pp.

Several general papers.

Bulletin No. 1, National Mosquito Extermination Society. Nov., 1904. 25 pp. and supplements.

Whitney, C. P.

Descriptions of Some New Species of Tabanidæ. Canad. Ent., XXXVI, 205-207; July, 1904.

New: *Chrysops lupus* and *pikci*, *Tabanus benedictus* and *typhus*.

ADDITIONS AND CORRECTIONS.

The following papers are to be added to the bibliography:

Coquillett, D. W.

Papers from the Hopkins-Stanford Galapagos Expedition, 1898-1899.
Diptera. Wash. Acad. Sci., III, 371-379; Nov. 7, 1901.

Contains a small list of Diptera; one of the new species, *Canace snodgrassi*, was afterward reported from N. A., and will be found in the catalogue.

Marten, John.

New Tabanidæ. Canadian Entomologist, XIV, 210-212; Nov., 1882.

Contains the following four species (synonymy by Hine): *Tabanus californicus* (syn. of *cpistates*), *T. hæmophorus* (syn. of *sonomensis*), *T. captonis* (of which *comastes* is a syn.), and *T. centron* (from Col.: the second form of *rhombicus*, in Osten Sacken's Western Diptera, 218).

Piper, C. V., and Doane, R. E.

Insects injurious to Currants and Gooseberries. Bull. 36, Wash. Ex. Sta.; May, 1898.

Biology of *Rhagoletis ribicola* and *Epochra canadensis*; the entries are included in the catalogue.

Ricardo, Miss.

Several articles on Bigot's and Walker's types of Tabanidæ, in Annals and Mag. of Nat. History, ser. 7, VIII.

Not seen; no new species.

Corrections:

Page 6, omit Lonchæidæ from the list of families, as it was finally united with Sapromyzidæ.

Page 8, third line from bottom, for *opposia* read *opposita*.

Page 115, third line from top, for *Chiconomus* read *Chironomus*.

Pages 134 and 136, for *Ædes* and *Ædeomyia* read *Aëdes* and *Aëdeomyia*.

Page 264, *Deromyia cuantlensis* should be *cuautlensis*, and the locality Cuantla, Mex., wherever occurring, should be changed to Cuautla; see Townsend, Annals and Mag. Nat. Hist., ser. 6, XX, 279.

Page 287, *Agonosoma tener* should be *tenerum*.

Page 319, add the following species under *Lcptopecta*:

disparilis MELANDER, Monogr. Empid., 258, f. 69.—Cal., Ida.

Page 321, for *Empis ærobaticus* read *Empis ærobaticus*.

Page 664, line 6, *Limnophora sacra* had already been reported by Van der Wulp under the genus *Leucomelina*.
