INTELLIGENCE: UNDERGROUND CONSTRUCTION OF ALLEGED 'ATOMIC BOMB' BEING PLANNED

Dated :

20 Sep 48

Writer states:

Language :

Japanese

"Though I would like to get your opinion and make arrangements, I shall not be able to travel until sometime in November. The thing I am very excited about now is applied chemistry. I am unable to give you an explanation of it only by means of a diagram. If there is any chance for success, I shall make underground arrangements to obtain capital, tools, machines and chemicals. This may sound like counting chickens before they are hatched, but I do have confidence in chemistry."

Disposition :

Detained

Relevant Records :

Examiner's note: The above-mentioned diagram a 1 1/8 X 2 7/8" photograph, was sealed onto and folded into unwritten reverse side of the one-page letter. The diagram shows a cross-section view of an atomic missile with the following data: Uranium, No. 2 Uranium Uran 2.5 grams. Pressure device: length, 2 meters and 5 cm.; diameter, 6 cm.; weight, 3,200 grams (Ex: approximately 7.04 lbs.); and cost, \$406,000,000. Diagram bears numbers 1-32 with arrows; however, these numbers are not explained in either the letter or the diagram.

INTRODUCTION - INFORMATION CONTAINED IN THIS REPORT IS UNCLASSIFIED EXCEPT WHERE SHOWN OTHERWISE

Subject letter has been photographed and filed in the file.

The above-mentioned diagram is a 1.5 x 1.5 inch diagram which was scanned once and placed into reverse side of the case file. The diagram shows a cross-section view of an object similar with the following data: Diameter, 1.5 inches (38 mm); Length, 1.5 inches (38 mm); Weight, 1.500 grams (1.500 grams); and color, black. Diagrams shown numbers 1-3 with arrows however, these numbers are not explained in either the letter or the diagram.

Although I would like to see your copies and make arrangements I shall not be able to travel until sometime in November. The letter I am very excited about is not an official document. It is a very interesting explanation of it only by means of a diagram. It shows in my opinion for success, I shall make arrangements to obtain details, books, photos and materials. This may sound like something others believe they are hidden, but I do have confidence in myself.

SUBJECT: Uranium Deposits in South Korea

TO: Assistant Chief of Staff, G-2
GHQ, Far East Command
APO 500

1. Over a period of several months reports have been received that there are about fourteen (14) mines in South Korea which contain deposits of uranium. Of these, eleven (11) are in the province of CHUNG CHONG NAMDO. Some analyses of the ore has been made but the results are obscure.

2. The Military Governor states that he is not sufficiently sure of the discretion of his mining experts to have them go into the situation in any great detail.

3. Request that you send to this command a mining expert to make a survey and report on uranium in South Korea. It is further requested that the expert be directed to report to me and that his arrival be not before 13 May 1948.
