Language panel overflow

Browser window

Language panel

Security distance
155px margin at the bottom to allow
the panel to grow

A — When there is not enough room to display the complete panel,
scroll to adjust the top of the panel to the top of the window.

B — When there is enough room to show the panel with the
security distance, the panel is show without any scrolling.

C — When the panel overflows or there
isnot enough room for the security
distance.

align the panel vertically if the
room below is greater than
the security distance.

align the panel with the top of
the window if it cannot be
centered by preserving the
security distance below.
