PREFACE

IN the compilation of this work the endeavour has been to produce in a compact volume that may be conveniently used by students, travellers, and business men, a complete and accurate vocabulary of the Spanish language.

With this end in view, and for the purpose of including all the modern words with which the language has been enriched through a general advancement in human knowledge and activity, the thirteenth edition (1899) of the Dictionary of the Royal Spanish Academy—which is the latest and highest authority in Spanish lexicography—has been adopted as a ground-work, and every word, every acceptance, every idiom contained in that dictionary, with the exception of those that have become archaic is defined in this volume.

Furthermore, many words and acceptations have been added which, while not purely Castilian, are in general use in Spanish American countries and in the Philippine Islands, and also a great number of technical terms that are frequently used in commercial intercourse between Spanish- and English-speaking countries. Indeed, this rapidly increasing intercourse, and the ties that now bind to the United States several million people whose vernacular is the Spanish language, have been kept steadily in view during the preparation of the work, which is intended to be as helpful to the American or English student of Spanish as to the great number of Spaniards who are now studying English.

To accomplish this purpose, a radical departure has been made from the practice adopted in many dictionaries of giving long explanations in English of the meaning of a Spanish word, instead of supplying the student with the English equivalents. A bilingual dictionary, like a good rule, should work both ways, and to do this it should give equivalents rather than definitions.

umberless examples might be cited here to show the laborious task implied in the search for correct equivalents, especially, regards technical terms, many of which are either omitted or erroneously translated in other dictionaries.

All the dictionaries of the Spanish and English languages, and especially those by Velázquez, Gray and Iribas, Lopes and Bensley, Ponce de León, Bustamante, Tolhausen, Wellesley and Chironés, have been frequently consulted and compared in the course of compilation, and acknowledgment is hereby made for valuable suggestions found in them.

Many new features, however, and thousands of words and acceptations not found in any similar work, have been introduced here, as any one may verify by careful comparison of a single page of this book with the corresponding page in any other dictionary. As illustrative examples of the exhaustiveness of this compilation, the reader is referred to such words as *á, de, con, por, que, le, se, nos, ese, uno; dar, hacer, coger, estar, correr, echar, ser, salir, seguir, poner, tirar, ver, venir; llave, melio, fuerza, ropa, tiro, título, viga, vida.*

One special feature will no doubt commend itself to students as a help toward the proper use of irregular verbs. The fundamental tenses of such verbs, from which other modes are formed, are given with each infinitive, as well as the literal mutations that some regular verbs undergo in some tenses.

In order to save space for more important matter, the pronunciation usually given for each word has been dispensed with, except in a few cases where some difficult word occurs; but as the Spanish pronunciation is simple, the few rules given in the following pages, explanatory of a comprehensive key, placed at the foot of each page, should enable the student to pronounce any word correctly.

RULES FOR SPANISH PRONUNCIATION

VOWELS

THE Spanish vowels are **a**, **e**, **i**, **o**, **u**, and occasionally **y**. Each vowel has one invariable sound.

The sound of **a** is full, open, as in *far*, *father*, *farm*, *alarm*.

The sound of **e** is an intermediate sound between long **a** in *mate* and short **e** in *met*, as in *eh!* *weight*.

The sound of **i** is the same as in *police*, *machine*.

The sound of **o** is as in *for*, *order*, *lord*, *form*.

The sound of **u** is the same as short **oo** in *wool*, or **u** in *bull*, *pull*, *push*.

All vowels should be clearly and distinctly sounded in all cases, except **u** in the syllables *gue*, *gui*, *que*, *qui*, when it is usually silent. When sounded in *gue*, *gui*, it is marked with a dieresis, thus: *güe*, *güi*.

CONSONANTS

B, **b**, has a softer sound than in English, produced by joining the lips, without pressure.

C, **c**, before **a**, **o**, **u**, or before another consonant, has the sound of the English **k**, as in *carro* (car), *costo* (cost), *cubo* (cube), *clase* (class), *crema* (cream), *acto* (act).

C, **c**, before **e**, **i**, has the sound of **th** in *theft*, *thin*, as in *Cicerón* (Cicero), pronounced *thie-thay-ron'*.

Ch, **ch**, like the English **ch** in *cheese*, *riches*. It never has the sound of **k**, nor of **ch** in *machine*.

D, **d**, is softer than in English. It is sounded by touching the edge of the upper teeth with the tip of the tongue, and the sound resembles that of **th** in *this*, *that*.

F, **f**, the same as in English.

G, **g**, before **a**, **o**, **u**, or before a consonant, has the sound of English **g**, as in *gas* (gas), *goma* (gum), *guano* (guano), *gloria* (glory), *gracia* (grace), *ignorante* (ignorant), etc.

Before **e**, **i**, it has a harsh aspirate sound, as that of English **h** in *hey*, *he*; as *geología* (geology), pronounced hey-o-lo-he'-a.

H, **h**, is always silent.

J, **j**, has the harsh aspirate sound of English **h** in *hat*, *hot*, *hood*: same as Spanish **g** before **e**, **i**.

K, **k**, as in English.

L, **l**, as in English.

Ll, **ll**, is a Spanish digraph, and sounds always like the English **ll** in *million*, *brilliant*.

M, **m**, as in English.

N, **n**, as in English.

N, **ñ**, like **ny** in *canyon*, *ronyon*.

P, **p**, as in English.

Q, **q**, as in English.

R, **r**, between two vowels has the sound of English **r** in *caramel*. When it begins a word, or is preceded by **l**, **n**, **s**, or when doubled, **rr**, it has a rolling or trilling sound, produced by vibrating the tip of the tongue by a strong expulsion of breath.

S, **s**, has the sound of English **s** in *sassafras*, and no other.

T, **t**, differs from the English sound of **t** in that it is sounded by placing the tip of the tongue between the teeth.

V, **v**, as in English.

X, **x**, sounds as **ks** or **gs**, never as **sh**. In some old Spanish words it is pronounced as Spanish **j** (aspirate **h**), as *Mexico*, pronounced May'-he-co.

Y, **y**, when a consonant, sounds as in the English word *year*, *young*. When it stands alone as a conjunction (meaning *and*), or is at the end of a word, it is a vowel, and has the sound of Spanish **i** (English long **e**).

Z, **z**, has the sound of **th** in *thick*, *thatch*, *thought*: same as Spanish **c** before **e**, **i**.

THE KEY TO PRONUNCIATION

In a line at the foot of each page will be found a key giving the sounds of letters in Spanish that differ most from the equivalent English letters. Those who make themselves thoroughly conversant with the simple rules given above will find little difficulty in pronouncing Spanish words. When a word occurs that is not covered by the Key, the pronunciation is given in brackets.

RULES FOR SPANISH ACCENTUATION

1. Place the inflection on every vowel that has the graphic accent; e. g., cántara, cantar^á, baúl, corazón, alegría, esdrújulo, págaselo, castíguésemele.

2. On words not accented, ending with a vowel, or with an *n* or *s*, place the inflection on the penultimate syllable; e. g., cantara, cataclismo, ordinario, caramelos, contradicen (accent thus: canta'ra, cataclis'mo, ordina'rio, carame'los, contradi'cen).

3. On words not accented, ending with a consonant (except *n* or *s*), place the inflection on the last syllable; e. g., principal, contemplad, conocer, albornoz, occiput (accent thus: principal', contemplad', conocer', albornoz', occiput').

IRREGULAR VERBS

The fundamental modes of irregular verbs are given with each infinitive, and likewise the mutations of letters occurring in some regular verbs—a feature not heretofore presented in any dictionary of the Spanish language.
