OSAKA FINANCE OFFICE
(Osaka)

21 October 1949.

OFO No. 76

TO : Economics Division,
Osaka Civil Affairs Team

THROUGH: Kinki Liaison Office

SUBJECT: Application for Approval of Postponement of Packaging
Completion Date. (Re. Fuji Kensetsu K.K.)

1. In connection with the reparations packaging operations at the Osaka Arsenal, 32-32, the dismantling operation under the contract with the Fuji Kensetsu K.K. of the six (6) hydraulic accumulators, code Nos. 6994 thru 6999, under the allocation notice No. 4-65, has become quite difficult to complete in accordance with the schedule previously submitted to your Headquarters.

A. Four (4) Accumulators, Code Nos. 6994 thru 6997.

(1) The four (4) accumulators are located in a narrow place heavily damaged by the air-raid during the war and it is quite difficult as well as dangerous to carry out packaging operation on the items at the same time.

(2) The operation started on September 22 but, after two weeks, it was found out that the top fitting was unable to remove from the ram (see 1A-4 in the attached blue print No. 1) in spite of every possible ways adopted. The packaging plan was therefore changed to dismantle the ram and the top fitting as one unit by the instruction of the field inspector of the Eighth Army on October 10, and the operation started again.

B. Two (2) Accumulators, Code Nos. 6998 and 6999.

(1) As the two items are located in a brick building heavily damaged by the air-raid and considerably sagged which stands in a desolate area, it is almost impossible as well as dangerous to carry out the operation on these items at the same time just as the operation as stated in A(1).

(2) As the two items appeared to be the similar type of the accumulators, code Nos. 6992 and 6993 which were already completely packaged, the contractor started the operation on September 25 and tried to remove the weights after lowering the ram as in the case of the accumulators previously dismantled. However the structure of the accumulators was then found to be entirely different from the items previously dismantled. As there was no alternative except dismantling the upper and the lower rams as one unit, the operation plan was changed with the approval of the field inspector on October 10, and the operation was resumed.

- cont'd -

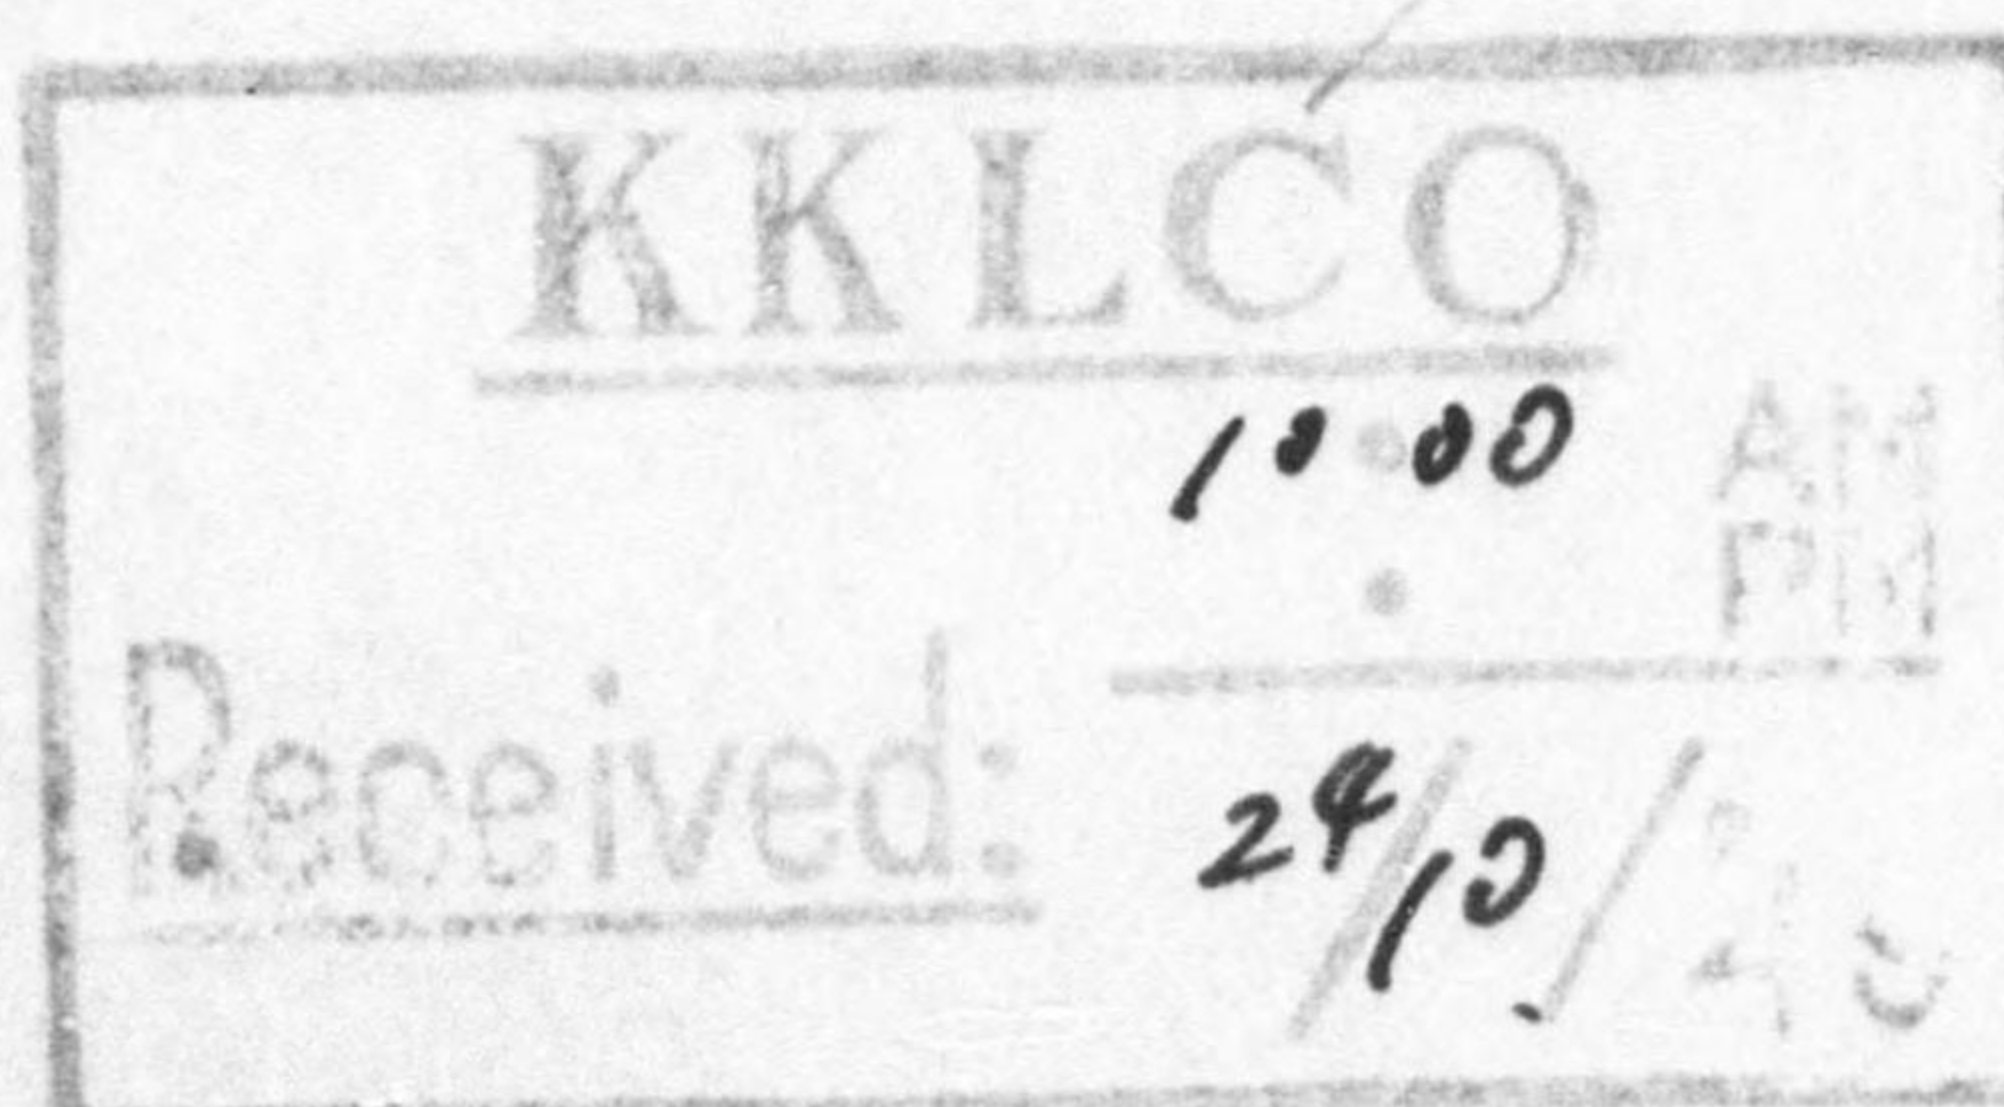

2. Due to the heavy air-raid during the war all technical data for the above items were lost. Therefore the dismantling operation has been carried out during these rainy days with the data supplied by the manufacturers of the items. In spite of these efforts on the part of the contractor and this Office the dismantling and packaging operation is difficult for completion by the fixed date.

3. This Office therefore humbly beg your Headquarters' generous approval for the postponement of the completion date from October 25 to November 15.
