NORWICH UNION FIRE INSURANCE SOCIETY.
Instituted 1891.

The raises of this Society are the same as other offices, whilst periodical returns have been made to this partles insured amounting to £893,490.

This office is distinguished by its liberality and promptness in the settlement of claims, £2,379,334 having been paid to insurers for losses by fire.

In proof of the public confidence in the principles and conduct of this establishment, it will suffice to state that the total business now exceeds £80,000,000.

No charge is made for policies. Duty repealed.

to total business now exceeds £80,000,000.

No charge is made for policies. Duty repealed.

Offices, 50 Fleet street, E.C.; and Surrey street,

Morwich.

IMPERIAL LIFE INSURANCE COMPANY.
Chief Office—No. 16 Pall Mail, London, Branch Office—No. 16 Pall Mail, London.
Instituted 1820.
The outstanding sums assured by this Company, with the Benuses accrued thereon, amount to about 22,800,00° and the Assets, consisting entirely of investments in First-class Securities, amount to upwards of £850,00°.
The Assurance Reserve Fund alone is equal to more than nine times the Promiss.

of £950,000. The Assurance Reserve Fund alone is equal to more than nine times the Fremium Income.

It will hence be seek that ample SECURITY is guaranteed to the Poley holders. Attention is invited to the Prespectus of the Company, from which it will appear that all kinds of Assurances may be effected on the mass moderate terms and the most liberal conditions. The Company miss grants Annuities and Endowments.

Prospectuses may be obtained at the Offices as above, all of the Agents throughout the Kingdom. ANDREW BADEN. Actuary and Manager.

IMPERIAL

ANDREW BADEN. Actuary and Manager.

IMPERIAL FIRE INSURANCE COMPANY.

No. 1 Old Broad street, E.C., and Nos. 16 and 17 Pall mail, W.

Long the Company of the Manager of Pall mail, W.

Capital, £1,600,000; paid-up and invested, £700,000.

Insurances against Fire can be affected with this Company on every description of property, at moderate rates of premium.

The recent abolition of the duty on Fire Insurance should induce Policy-hol-ors and sil intending Insurers to protect themselves fully from loss by fire, which can now be done at a net amount cost of from Is 6d per cent. upwards.

Septemial Policies charged only six years' premium. Prompt and liberal settlement of claims.

The usual commission allowed on Foreign and Ship Insurances.

A BSOLUTE SECURITY POLICIES,

ABSOLUTE SECURITY POLICIES,
Unforfeitable. Unconditional, and Unchallengeable,
issued by the PRUDENTIAL ASSURANCE COMPANT, et Ludgate bill, Locion, E.C. Established 1848.
Branch office—7 King street, 8t James's.
The Directors of this Company, in deference to an objection not unfrequerity urged by persons invited in assure, that the ordinary mede of Life Assurance is in their opinion defective or uncertain, by reason of the operation of the customary conditions, have resolved to promulgate the present Tables, and to issue Assurances under them which shall be absolutely Unforfeit able, Unconditional, and Unchallengable.

For the reason reierred to, many persons besitate of elicite to assure on the ground that, in the event of inability or unwillingness in continue payment of their premium, the Assurance will become forfeited. To this chase of the public the system mer introduced will especially commend itself, being entirely free from all canditions of forfeiture on secount of non-payment of premium, or from any other cause whatever; while at the same time it absolutely guarantees al decease, even when a default is made in payment of the premium, a fixed sum in respect of every premium paid, Bearing the same proportion to the total amount assured as the whole number of girally contracted to be paid.

Besides this important advantage, every policy will expressly state what som can at any time the withdrawin on the discontinuance of the Assurance.

The Assurace will thus always have the option of retaining either an ascertance fixed sum payable at decease, or, in case of need, of withdrawing a cartain amount, according to the duration of the Policy, such amount, according to the duration of the Folicy, such amount, and the such as a total case with ordinary Assurances.

Creditors assuring the lives of debtors will appreciate this feature an one greatly protective of their interests, and it will likewise commend itself to bankers, capitalists, and others who are in the habit of making advances of the remediate or

value, either immediate or reversionary, of a Policy of this description.

Every Policy issued on this plan will be without any smallisions as to voyaging, foreign residence, or other usual limitations. By this freedom from restrictions of all kinds the objections before referred to will be only the property representation of the property representation. By this freedom from restrictions of all kinds the objections before referred to will be come at once positively valuable as sectnal securities.

In addition to the foregoing statement of advantages, the number of premiums is strictly defined. Thus longest terms provided for is twenty-five years, and the shortest five years, as shown by the Tables. Thus bankers, creditors, and others holding Policies of this class as security, may always know the unmost amount they may be called upon to advance so as to maintain the full benefit of the Assurances—a matter of great importance where Policies are held as collateral security.

importance waster runness at fifty.

It is only necessary to add that, as a consequence of the Pelicies under these Tables being unforfeitable and amountained the property of the Pelicies of the Pelicies under these Tables being unforfeitable and amountained the property of the Pelicies.

The PRUDENTIAL ASSURANCE COMPANY pressers as income of 2220,000 a year, its position is unquestionable, and it obtains the largest amount of new limitings of any sifties in the kingtom.

SPECIAL AGENTS WANTED.

HENRY HARBEN, Secretary.

1 — Security should be the first consideration in insurance transactions.—The Directors of the Royal Insurance company have the pleasure of supplying the following information to the public, as evidence of the ample security they afford to their assurers. The capital of the Company, available for the purpose of meeting any unsuanic claimity happening to the assured, is Two Millions Sterling: the amount actually paid up is £288, 495. This with the accumulated funds in inani makes the invested resources of the Company upwards of One Million Six Hundred Thousand Pounds, which amount is invested as follows:— INVESTED FUNDS of the ROYAL INSURANCE COMPANY, 30th June, 1869. £ s d 28,085 1 3 100,000 0 0 101,330 7 10 31,106 11 6

A Supplement, containing the reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 15th May, 1869, will be published by the Economist on the 28rd of October.

To ADVERTISERS.—To secure insertion for this important unber, advertisments should be sent not latter than midday Friday, the 22nd inst.

THE INVESTOR'S MANUAL is now sold separately, price 9d stamped, 8d unetamped. If taken as a Supplement to the Economist, it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.

THE HISTORY OF THE NEW YORK GOLD PANIC. We have already drawn attention to the principal points illustrated by the recent panie at New York-1, the liability to violent speculation of a commodity like gold, retained as money for special purposes only under a system where the al money is inconvertible and depreciated paper; and 2, the incredible power of the American Chancellor of the Exchequer as the largest holder, and in fact the only large holder, of gold, both over the gold market and over the ordisary money market. It may be useful however to look at the history of the panic which is now told in detail a little more

minutely. It was easy to understand wihout waiting for details that these matters must be the principal ones, but we may bring out this from the actual history, and show how such panies are in the nature of the present monetary system of the United States. The panie itself in its incidents and results is one of the most remarkable which the history of speculation contains.

The first of the causes of the panic must undoubtedly be reckoned the combination or ring, by whose manosuvres the market was rigged. They could not have acted without favouring circumstances, but whether those circumstances would or would not of themselves have produced stringency, if not panic, there is no doubt of the heaviness of the weight thrown into the scale by combination. As we explained a fortnight ago the Americans are more used to combining than other people. In the money market for the last two or three other people. In the money market for the last two or three years there have almost always been combinations at work. The conspirators have got quite accustomed to the practice of bulling and bearing certain stocks on a scale, and with agencies unknown elsewhere, and they have also become familiarised with modes of producing or increasing stringency in the ordinary money market so as to assist their operations. It is not surprising then that the gold ring which has caused the recent mischief should be almost a public association—the papers giving the names of principals public association—the papers giving the names of principals and brokers, among whom it is not difficult to recognise the and brokers, among whom it is not difficult to recognise the agents in former railway wars. According to the New York Sun the principals were "James Fisk, junior, Jay Gould, "William Belden, William S. Woodward (who was chosen generalissimo), Marvin, Brothers, and Co., Smith, Gould, "Martin, and Co., William M. Tweed, Peter B. Sweeny, "Arthur Kimber, agent for various foreign houses, and Lock-" "wood and Co., whilst sundry brokers were employed to carry
out the orders of the clique, among them being Alfred
Speyers and Co., Belden and Co., Dakin, Gillespie and Co.,
Chase, M'Clure, and Co., Chapin, Bowen, and Day, E. K.
Willard, and others." Although there is not improbably some inaccuracy, the list may be assumed to be correct enough so far as concerns any names which are notorious out of New York. Newspaper report is probably less correct in asserting that "forty million dollars" were at the command of the con-spirators, but they had undoubtedly considerable means and opportunities as well as good information.

The second fact apparent is the extreme delicacy of the gold market in the actual circumstances. Gold as a commodity must, as we pointed out, always be a "tender" article. It is an article which it is unprofitable to keep a stock of, and especially so in New York, where the interest of money is high. The opportunity of speculators for the rise will how-ever occur when the stocks are less than usual, and are threatened with farther depletion; and this opportunity seems really to have arisen in the middle of September. The New York banks were then possessed of barely 3,000,000*l* in gold; and the store had declined as follows in the previous

the stock was only being added to at the rate of 500,000l amonth through Government sales. The process of depletion was thus continuing, and saving some small shipments of gold from abroad, no relief was expected until the usual payments of Government interest in November.

To these causes must be added the tightness of the money market and the depression of securities. The autumn is usually a difficult season in New York, owing to the requirements of the crops, which increase the demand for currency and accommodation, The present season was not exceptionally difficult, an accidental circumstance, the calling in of some small denominations of currency, having even relieved the banks a little, for the kind of currency usually run upon at this season did not exist, and the banks were allowed to retain all they had for their New York business; but the difficulties were still such as to produce a natural stringency, which speculators as usual might artificially increase to produce a depression of securities. These facts would seem at first sight inconsistent with an attempt to raise the price of gold, nor does it appear how a rise in gold could react so as also to depress securities and increase the demand for ordinary money. As a commodity it might be thought the price of gold would tend to fall with other com-modities when ordinary money was dear. But gold not being a commodity merely, but money for But gold certain purposes, the effect is different. The two demands for ordinary money, and for gold for special purposes—in short aggravate each other. Realisations are made to obtain both or either; the depression of securities causes loans to be called in; and a panic in the one money, when there is naturally a strong demand for both, produces or aggravates a panic in the other. This was the case in the present instance, and it was the cause of the intensity of the

panic. The field being thus prepared for them, the ring soon brought about a sharp and severe crisis. What their exact game, or the game of all the members was, it may not be possible to tell; but any one can see the advantage to a bold speculator in suddenly and greatly depressing stocks, and with equal suddenness raising the price of gold and money. They can buy the depressed stocks cheap, having either sold them dear or with a view to future sale; and they can exact high rates for loans or a high premium for the gold which they have, or which other speculators have become bound to deliver them. The idea of combining to make both money and gold dear does not seem to have occurred all at once--the first experiment tried being mainly a tight money market. In the week ending September 11 greenbacks were largely locked up—the ring making sales to give them a control of ordinary money according to a plan which has now often been tried. As there is a legal reserve which the banks must keep, conspirators who have large funds in cash can easily attack the reserve and compel the banks to resort to desperate measures to protect themselves. Accordingly in the week stated the legal tenders in the banks fell from 55,800,000 dols to 51,400,000 dols, while the loans were increasing to the extent of 6,000,000 dols. Immediately following this, various stocks, which were afterwards subject to more serious attack, fell—Pacific Mail, $11\frac{1}{2}$; Lake Shore, $5\frac{1}{4}$; North-Western, $6\frac{1}{4}$; and St Paul's, $4\frac{1}{4}$ —the whole market sympathising. Gold was likewise a little firmer. The pressure, however, passed off, and it was not till the 22nd of September that the attack was renewed in combination with an attempt to lock up gold. The effect was instantaneous, and was all the greater as the minor tactics of the combination were successful; a simulated weakness among them had induced the bears to commit themselves deeply. The price of gold was at once carried from 137½ to 142½, and the struggle was carried on about the latter figure the following day. Coincident with this there was a fall of 25 per cent. in New York Central; 10 per cent. in Hudson River; and other stocks in sympathy; stocks were carried from day to day at of 1 to 1 per cent. on miscellaneous stocks and 1 to 2 per cent. on New York Central. There was not so much difficulty in the mercantile loan market, but exchange business was completely interrupted. The excitement of panic had however set in—the gold transactions having amounted on the 23rd to 320,000,000 dollars, about 48,000,000*l*, although the whole stock of gold outside the Treasury vaults was less than 3,000,000%.

The following day the panic on the New York Gold Exchange was without parallel until the event of the day which showed

Mr Boutwell's power—the order to sell 4,000,000 dols gold—occurred. What the panic was and the effect of the Sees. tary's order are best described in the words of a tary's order are best described in the words of a competent eye-witness, the New York correspondent of the Daily News:—
"For about half-an-hour after the opening of the Board there was not more noise than in the London Stock Exchange; but this comparative calm did not last long. Gold was rapidly up to 160, and the respectable and well-draws crowd below me degenerated into a wild surging mas a conduction Gondon Man ware hanging on to the iron well-" shricking fiends. Men were hanging on to the iron rail "ings; standing up on the window-sills; some were fighting " to get in; others were fighting to get out; all were screen "ing, gesticulating, and thrusting each other out of the way; ing, gesticulating, and thrusung the thought were while those who had managed to get to the iron railings were while those who had managed to get to the iron railings were while those who had managed to get to the iron railings were " shaking their memoranda and howling at each other. " was at 160; the bears were worsted, for a margin of "25 per cent. had been exacted on all operations, this margin had now been exceeded. They still de "rately held their ground, and, with purple faces and eyes starting out of their heads, yelled defiance; but they felt " and knew that their last financial hour had sounded. "that nothing remained for them but to die game, for their ammunition was all expended, when—like the Prussians at "Waterloo-just in the nick of time, the Secretary of the "Treasury poured in reinforcements. He had at length jielded to the applications which had been made to him by "the respectable merchants of New York and other im-portant towns, and let loose the gold stored up in the At the same time it was rumoured that Baring Treasury. "Brothers had telegraphed to their agents here to ende "to stem the upward current by large sales—the bubble had burst—in half an hour gold tumbled down to 185—and the bears, so lately in the agony of despair, literally danced One old gentleman I watched leaping " with delight. "up in the air for five minutes at least, and clapping his hands over his head. As for the poor bulls, but a few minutes before so jubilant, they appeared stuned by the " leading broker, who had remained calm and collected duri "the battle, now began wildly to offer to buy gold at 170. His "friends got him away, for his mind had gone. But now a mew element of disorder was imported. The Gold Exchange Bank, where almost all the brokers keep their accounts, re-" fused to pay any further cheques until they could ascert "the precise standing of their customers, and thus virtually " suspended. It was noised about, too, that many of the pro "minent bull-brokers would be unable to meet their enga "ments, and that Fisk, the chief of the bull-ring, refused recognise sales made for him and his party on verbal order "This damped the triumph of the bears; none could tell "whether he was a rich man or a beggar. Those who had " sold gold above 150, and bought it below 140, now felt that "they had built their castle on the sand, and that very pos-"sibly they had lost their fortunes instead of doubling them.
"In vain the leading bulls now offered to buy at 160; mone " would sell to them at the price, while the bears were selling "to each other at 135. The fight was over, and I left the battle-field with the conviction that 500 human beings, in s " frenzy of avarice and greed, is the most repulsive sight it is "possible to imagine. When I emerged from this pass" demonium Broad street was full of people, eagerly gazing at the indicator outside the building, which marks on a dial the price of gold. Crowds were endeavouring to force their the offices of the bull-brokers who had suspended, way into the omces of the bull-brokers who had suspended, "and were resisted by posses of sheriffs' officers, who had been sent for to keep the peace." Such was the crisis of the speculation. The absolute impossibility of struggling with the American Finance Minister could not but be remarked. An addition of 4,000,000 dols, or 800,000l, to a stock of 3,000,000l, was a tremendous difference; yet it would hardly be felt by the Treasury, which had then nearly 22,000,000l in keeping. The speculators had been in truth carrying on their operations at the pleasure of the Minister.

We need say little of the confusion of the following week among the speculators. The transactions on the last day had been upwards of 500,000,000 dols, and as the Gold Board had The transactions on the last day he been unable to adjust the previous transactions, the adjournment to square accounts was inevitable. One peculiar danger of all such very clever speculations then appeared. The losers—many of them—had been so badly hit that they could not pay, and others it is said would not. It is clear

urnliar red. they that if the losers—the planners of the crisis—had been the winners, they would have equally made nothing of it compared with their nominal gains. But while this is the misfortune of over-successful speculation, the consequences are none the less prejudicial. The speculators had brought about what was very nearly a suspension of basiness all over the Union, partly it would seem through the sheer excitement of watching the play, but partly also through the actual impossibility of making money begains. Things were not so bad as they might have been, because even the New York banks kept aloof from the speculators; but while the crisis endured, gold and legal tender were procured or borrowed with more difficulty than usual, even by those who had means to obtain them, and there was natural apprehension in making money contracts so long as it appeared uncertain under what circumstances they would have to be met. Had the speculation not been so suddenly interrupted the consequences would have been most disastrous. No doubt when the panic was over the rally was naturally as sudden, and there were few bad after effects. A week after, on October 2, the prices of stocks had almost wholly recovered, owing to buying orders "from the country," and merchants were congratulating themselves on an easier fall trade through the temporary ruin of the conspirators. But a great danger had still been run, and one to which it is most unwise to expose commerce artificially.

This last is the lesson which the events ought to have for the Americans. They have got over this panic, and apparently fancy that because some speculators are hit they will not soon be at their old tricks,—that they will remember the lason they have got even when they are in a position to resume their tricks; but we can hardly understand how American merchants and bankers should ever be free from apprehension. The speculators have mainly been taught not to go too far—that their greatest danger is that of over doing the thing,—making too terrible a use of the powerfu agencies at their command. What is to prevent a succession of more moderate combinations at almost any moment? The Secretary to the Treasury could not be depended upon to modify at least ordinary speculation, his late interference though the occasion was so exceptional being far from having met with unanimous approval; and there are circumstances conceivable when his power of modifying would be less. If the Treasury had happened to be so empty that the Secretary was even desirous to fill it instead of having a surplus to sell, the speculators would have it all their own way. This is not now very likely when gold accumulates so fast for the reduction of the debt, but it is far from impossible. But if there is little danger of a great crash, the proved danger and mischief of smaller combinations should make Americans most anxious to get rid of their inconvertible paper.

THE BIRMINGHAM EDUCATION REFORMERS.

Without committing ourselves to all the principles of the new National Education League, on many of which it would be quite impossible not to hesitate long, we may safely assert that the Birmingham Educational Conference will be of the utmost use in pressing on the country the most urgent of those of the questions now before it which affect almost all its parts equally. The chief tendencies promoted by the Conference are almost all purely good. The tendency towards unsectarian education—by whatever system it may be ultimately worked out—is of the first moment to the country, and the strong feeling manifested in its favour at the Birmingham Conference cannot but influence very powerfully even those who are going to take up the defence of the denominational system at Manchester, and induce them, so far as their practical influence goes, to modify even the denominational system in the direction of catholicity of teaching and comprehensiveness of plan. Again, the tendency towards a system of compulsion, which was so strongly represented at Birmingham, cannot but issue in pure good, whether or not the system of naked compulsion is adopted in all parts of the country alike,—a matter in which the Government must obviously be guided by prudential considerations and by regard to the end in view much more than by any rigid principle laid down for their adoption by a League which

cannot possibly command the whole bearings of the proposal. The only point on which we feel quite clear that the League has made a practical mistake is its demand for free schools—s.e., schools to which every child shall be admitted free without the payment of school-pence,—and that we regard as a mistake rather due to the wish to see the principle of compulsion rigidly enforced than to any ignorance on the part of the founders of the League of the advantages we should lose by surrendering the schoolpence. It seems clear enough that children are much better taught to prize that for which the parents pay, and it would be a very great mistake to substitute for the efficient moral compulsion exercised by a parent who wishes to see his child gain the full advantage of his sacrifice, the mere legal compulsion of the law. The former sort of compulsion does indeed go far beyond the latter in its operation; it tends not merely to enforce regular attendance, but to give the parent some interest in testing the results of that regular attendance, and in seeing that the child does not waste his hours at home. To sacrifice such an influence as this would be wasteful in the extreme; nor do we see that even where the most rigid system of compulsion might be adopted,—such a system of compulsion as Mr Mundella described,—there would be any difficulty in enforcing as a rule the parent's payment. The case of the child who might be compelled to attend without his father's having enough to pay for that attendance, might easily be provided for. The school authorities might be empowered to recover the school pence by a summary process from the parents whenever it was possible, and to excuse payment of them whenever there was clear evidence that the poverty of the parents was too great to admit such payment. No doubt such a system might have minor mischiefs of its own, as introducing distinctions between different classes of children, and as exciting a dislike to schools which might thus be in the habit of sueing for the school pence,

With regard to compulsion,—the point which is really of the highest importance now,—we confess it seems to us that the League and its advocates generally go too far. It may be quite true, and nothing can be pleasanter to hear, that England is ready even now for a system of absolute and naked compulsion in the great towns, that public opinion there would support the authorities in demanding the regular attendance of every child between certain ages at some certified school, and in fining or otherwise punishing the parent who, after a certain warning, continues to neglect the law. If this be so, and we are strongly inclined to hope it is, the progress of popular opinion in the great towns has been very encouraging. But the leaguers at Birmingham must be perfectly aware that Government, in these matters, cannot go far beyond what public opinion will enforce without producing a reaction far more dangerous than any legal enactment can be beneficial. Once set the people of any district against education as a tyranny imposed by the State, and you will do more to injure the cause than you can ever do to benefit it by any statutes however stringent. And undoubtedly such a public opinion unfavourable to education might very easily be produced in many of the rural districts by compulsion of too naked and oppressive a kind. We are told by the inspectors who have carefully examined these districts that the extension of the factory acts,—prohibiting any employers from paying wages to any child who cannot produce certificates of a certain number of school attendances in the year,—is the strongest sort of compulsion which is as yet fitted to most of the rural districts, that any stronger kind of interference than this would generate angry opposition and a spirit anything but friendly to the school-master. Of course this would be a monstrous evil. The Birmingham Reformers do not, we suppose, seriously question that the kind of compulsion to be applied must be permitted to vary with the circumstances of the district in which it

negligence, but would especially suffer from the condemnation and contempt of his fellow citizens. If we do not secure the latter end, all legal penalties would be simply useless and probably mischievous.

Again, it may be admitted that the conference is right demanding that the place or district where there might not be schools enough and schools good enough for the education of the children of that place or district should be com-pelled to aid the Central Government in providing such schools, and that, too, without enforcing any denominational teaching to which the parents object. Common education of children of different religions in secular subjects is easy enough on any system,—the alternatives being that they should be educated together in schools managed by person of a particular faith, on the understanding that no child should be taught the doctrines of that faith whose parents would rather that he should not learn them; and that they should be educated together in schools managed by the municipal or district authorities without any doctrinal partialities, whether the subject of religion should be totally excluded at the discretion of those authorities, or should be taught only in its broader moral and spiritual features at the discretion of the same authorities. We confess that we hardly attach the immense importance to the decision of this question which some of the speakers at Birmingham seem to give it. Municipal and county boards have not as yet inspired us with so much confidence that we should unhesitatingly prefer their local management to the management of voluntary bodies. In either case what we should have to look to for the real guarantee of the education given would be the inspection of the Central Government-the conditions imposed by the Privy Council, and administered by Her Majesty's Inspectors of Schools. As we should have this guarantee for the secular education to be given in either case, it seems to us to a great degree unimportant whether the local management be in private or municipal hands. And as to the religious teaching the difference of the two systems would not be very great. The plan proposed by the National Education League would favour the rise of two new classes of schools, purely secular schools, in which all religious teaching was left to private arrangement between the parents and the religious teachers they might prefer; and again, secular schools, with a certain element of moral and religious teaching of an undenominational character, which may be conveyed perhaps by reading the Bible without comment. On the other hand the extension of the present system would favour the rise of schools in which all whose parents chose would be taught religious doctrine together,-the religious doctrine of the denomination represented,—and the rest, whose parents did not choose them to be so taught, would learn their parents' doctrinal views privately if at all. Now, as regards this latter class of children,-those withdrawn from the denominational teaching and educated with the rest in the secular branches of learning,-the system would, as far as we can see, be precisely the same on one plan as the other. On the other hand, as regards the children who did attend the denominational teaching, the tendency might perhaps be, at present at least, to a narrower doctrinal teaching than we should approve, but then, as far as we can see, they would probably get the same or a still narrower teaching out of the school if they did not get it There is more reason to hope for a liberalising tendency in the religious teaching of schools which embrace, on other subjects, many denominations, than in the private religious teaching of men who have no motive for being as comprehensive as they conscientiously can be. The more we consider the programme of the National League on this subject, the more we are disposed to think that they attach undue importance to the mode in which the deficient educational organisation of the country should be provided,-whether by so-called denominational schools inspected by the State and worked with a strict conscience clause,—or by municipal or district schools either strictly secular or at least "unsectarian," also inspected by the State and not requiring a conscience clause at all, because not permitting doctrinal teaching.

On the whole, the Birmingham Conference cannot but do good; but we are satisfied that its rigid programme of principles,—which are rather methods than principles,—will hardly bear the uncompromising advocacy they have received. Some of them will undoubtedly be modified by public discussion. But all the tendencies promoted by the popular leaders who attended the Conference are good.

THE FINANCIAL POSITION OF PRUSSIA. THE Liberal party in Prussia are evidently trying to "make" capital" out of the financial position of the kingdom, as revealed in the King's speech and in the recently-published Budget. It is quite possible that they are as they say seriously frightened, for they have thrifty ideas and are entirely unaccustomed to deal with a deficit; but it is more probable that they are endeavouring to use two levers, the extreme dislike of the German people for taxation and the traditional horror entertained by the Hohenzollerus for any embarrassment in the Treasury, a horror unusually strong in the present King, because the old "Reserve" which has been kept for so many years, and which amounted, we believe, to say millions, was expended in the war. The King, who thinks suddenness of great importance in war, and considers the reserve a guarantee of his own power, enabling him as it does to fight without asking for a loan, would probably concede much rather than not renew this treasure, and the Liberals hope to strike a bargain with him. Moreover, the Liberals are very sensitive to new taxation, for they feel it very much. In-comes are moderate all over Germany, the officials are very badly paid, and the professionals who lead the advance are compelled to practise a thrift which Englishmen would find intolerable. They are more ready to fight strenuously against taxation than against any other grievance, and the cry of a "deficit" is the very best to rouse them into energy. In truth however the cry is unreal, and there are few States in the world which might not envy Prussia her financial position. There is some difficulty in stating the figures, owing to the confusion between Prussia and the "Confedera-"tion;" but the Confederation as such has no debt, and the entire State debt of Prussia is less than three years' revenue, or 56,740,000l*, and the Government could borrow any reasonable sum at 5 per cent. or less. In the En market, for example, it could at that price raise ten millions at a few days' notice. The revenue again of Prussia amounts to 24,640,000l, which, paid as it is by about twenty-three millions of industrious people living on a middling and not overpeopled soil, cannot imply any very excessive pressure of taxation. A very slight increase in the excise, for example, ought to bring the Treasury a fair surplus, and indeed it is doubtful if any increase is required. No doubt there are the Federal taxes, amounting to about seven millions, of which Prussia pays the largest share; but a taxation of thirty millions is still far from excessive. The expenditure, it is true, is beyond the receipts, but it only amounts to 25,450,000l, leaving a deficit of only 810,000l, an amount which a French Chancellor of the Exchequer would regard almost as a triumph, and which would not frighten even British Treasury. Even this deficit is probably only for the hour. The ordinary expenditure is only 24,660,800l, the remaining 790,000l being "exceptional" outlays rendered necessary by some Federal army reforms, by the refilling of the arsenals, and by some purchases for the fleet. The real deficit, therefore, is not a formidable amount though the Liberals think it one, because they wish to interest the people, and the Court thinks it one because it would like to accumulate a reserve.

The extreme sensitiveness of the Prussian Government to the position of its Treasury is probably one of the causes which have induced it to seek a renewal of friendly relations with the Cabinet of Vienna. We say one of the causes, because the main cause is no doubt the uncertain condition of politics in France, which deprives the Austrian Government of all hope of upsetting the arrangements that followed upon The improvement is as yet slight, consisting mainly in a renewal of friendly intercourse between the two reigning families; but it must not be forgotten that both King a Kaiser do to a great extent actually govern, more especially in the department of Foreign Affairs. Well aware as we are of the difficulties which impede the renewal of an understand-ing between the two Powers, it is impossible not to feel pleasure at any sign of amity, for if it became real Europe would be delivered from a nightmare. Of all the many plans sug-gested for the restoration of confidence to the Continent, the most practicable and the most complete would be an alliance the two German Powers. If it were hearty, war would be and really intended to secure peace, war would almost impossible for the time, for no Power we be strong enough to attack such a combination. ald

France and Russia would be able even to think of it, france and they only in an alliance which it would be most difficult and they only in an alliance which it would be most difficult as arrange. The Powers in fact might as well disarm, and would we believe be ready to do so, and the terrible incubus which now weighs upon Europe, the fear of a general war, would at last be lifted. Such an arrangement is, we fear, too good to hope, for Austria is not prepared to see the Southern States absorbed, or Prussia to pledge herself not to absorb them, while France is jealous and Russia anxious, but every approach to it deserves to be hailed as a sign of re-turning sense in Europe, and the approach will certainly not be retarded by the Prussian nervousness about finance. That nervousness is, as we have shown, exaggerated; but to find a Continental State fidgetty about its solvency, anxious not to borrow, fretful because it is twopence or so behind the world, is a most welcome phenomenon. Financial meanness in States means peace.

BUSINESS NOTES.

We understand that Vice-Chancellor James yesterday afterneen dismissed, with costs, the application to wind up the European Assurance Society. The decision is too late for us to comment upon this week, but the argument of the defendants' counsel appears to us to raise a most important issue with regard to insurance companies. The doctrine is that a company to be unable to meet its debts within the meaning of the Acts must be unable to meet debts which have meaning of the latest make to describe to the test destine which latest must be left out of account. This may be good law, but if it is the law ought to be altered, as there are certainly cases in which it will work injustice. In an insurance company, the peculiarity of whose liabilities is that they are contingent, the creditors or possible creditors should have the right of bringing about a stoppage at an earlier date. It would not be just to compel people to go on paying premiums, under penalty of losing what they have paid, when the comwith which they may have contracted has rendered pany with which they may have contracted has rendered itself unable to fulfil its part of the bargain. We reserve our comments, however, only calling attention now to the import-me of the legal question discussed.

Rather more than a year ago we drew attention to the influence of Trades' Unions on the decline of shipbuilding on immence of Trades' Unions on the decline of shipbuilding on the Thames, as illustrated by the ninth report of the Trades' Union Commission and the accompanying evidence. The facts showed very clearly one of the peculiar dangers of Trades' Unions—their tendency to fetter a business and so bring about its ruin sooner or later through failure to adapt itself to changing circumstances. The wages of London shipsuidets had first been fixed on a high scale for wooden ships of an expensive and dynable character, the scale being ships of an expensive and durable character, the scale being moreover based on the most expensive class of work, viz., moreover based on the most expensive class of work, that, the separate is and this character of expensiveness remained and limited the trade while cheaper wooden ships were coming into fashion, and impressed itself on the iron shipbuilding of the Thames when iron ships in turn displaced the others. For a time all went well; an artificial and unprofitable business in black less income the Cassands and the high-class iron ships was encouraged by Overends, and the Thames Shipbuilding Unions had it all their own way until the crash came, when the real trade is found to have become extinct, and there is no work for the Thames shipbuilders. extinct, and there is no work for the Thames shipbuilders. The lesson was a very complete one to Union men as to the care and even apprehension with which they should engage in wage-augmenting action, and the interest they have in letting business be profitable. One point in the case—the fact that the sole important difference between the Thames and other rivers in the country is the difference in the cost of labour—is well brought out in an interesting paper read by Mr John Glover at the British Association at Exeter, and now reprinted in the "Journal of the Statistical Society." Mr reprinted in the "Journal of the Statistical Society." Mr Glover appends two tables, one of the price of material and one of the rate of wages, which clearly show this:—

things are equal, though the circumstance of course increases the danger of adding to the Thames disadvantages. the danger of adding to the Thames disadvantages. The second table makes it appear that while the sum of the daily wages of the various classes of employée is 72s on the Thames, it is only 55s 8d on the Wear, and 58s 8d on the Olyde; but the difference of the cost of labour may be even more against the Thames, on account of the work of the classes in which there is the greatest difference entering most largely into the construction and repairing of ships. The disadvantage of the Thames is aggravated by another statement which Mr Glover thinks he is entitled to make after inquiry, that the Thames establishment charges—that is, the salaries of foremen, clerks, draughtsmen, &c., and other general charges-are probably double those on the Northern rivers. There is no wonder that in such circumstances the power of the London Unions failed, and that an accidental tide of prosperity by attracting workmen from all parts only swelled the distress when it came. The history perhaps contains another lesson. The workmen, though they made a mistake originally with their inflexible cost book, were not to blame for pressing to the utmost while it lasted the advantage which the mistakes of capitalists in attempting unprofitable business gave them. It was only business to make the most of the good time. But workmen like capitalists should reckon on a mixture of the bad with the good. In the present conditions of business fluctuations are inevitable, and the collapse of 1866 ought to have been made less calamitous than it was, both by the forethought and thrift of the workmen, and their willingness when the collapse came to accept work in their trade at any wage they could get.

According to a telegram by the French Atlantic Cable (which is profiting by the accidents to its older competitor), Mr Boutwell, in a speech at Philadelphia, has been repeating his statements as to the ease with which the American debt can in a few years be paid off, and immediately be funded at less than $4\frac{1}{2}$ per cent. We commented on these points last week, but Mr Boutwell is now credited with another statement which appears to call for some notice for its bearing on the peculiarities of American fiscal policy. "He favoured a greater taxation of luxuries and accumulated property, in order to relieve the taxation of the poorer classes." It is easy to see at once the popularity of such a proposition in a com-munity like that of America, where the working men do govern, but it none the less proves ignorance of finance just as Mr Boutwell's preference of debt-reduction to the extinction of the irredeemable currency and to the funding of the debt of the irredeemable currency and to the funding of the debt at a low rate proved it in another way. It does not seem to strike Mr Boutwell that possibly the "greater taxa-"tion of luxuries and accumulated property" may not be the best way to relieve the poorer or any other classes of the burden of taxation. The taxation of luxuries will necessarily diminish the demand for them, and this in turn will diminish the employment for labour, while the labourers will feel the tax most directly through being deprived of luxuries which they might otherwise have enjoyed. By taxation you can make naturally cheap wine a luxury, and the poor not drinking it are in one sense not

taxed, but the relief thus given is of a peculiar description. The taxation on accumulated property again directly dis-courages capital, diminishing the employment for labour directly and indirectly, and is not to be carried very far with All the while the right modes of relieving the American labourer, and all other classes at the same except a small manufacturing class, are on the surface, but the Americans cannot see how enormously they burden themselves beyond the necessary burden that their debt must be.

It is disagreeable to be hard on individuals, but the alleged release of Mr Shipman, the late manager of the Agra Bank, when his sentence of imprisonment is only half run, is too much like other commutations of punishment which well-to-do commercial criminals have enjoyed, to pass without remark. The plea, as usual, is the ill-health of the person released, but it seems a very inadequate one. What the public perceive is that the plea is used for the benefit of a certain description of criminals only, and even if no favour is intended by the authorities, who are doubtless much besieged to procure the release, the result is an appearance of a relaxation of justice. Are there not infirmaries, it is asked, for prisoners who are ill? and why should not prisoners of one class be sent to them as well as others? The belief naturally arises that the sentences on a certain class of offenders are fictitious, and there would be some foundation for an impression among those like them who are tempted to offend that the punishment at the worst will not be very severe. The impression would be a mistaken one perhaps, for a little punishment may be severe enough for the class if they only knew it; but Government in awarding punishment by way of example should always keep in mind not the effect that ought to be, but the effect that is, produced.

In a very few months it has been remarked the City will be in possession of a number of completed improvements which will increase very much the facilities of business. Holborn Viaduct will be opened, the new street from the embankment to the Mansion House, the new Blackfriars Bridge, and last, and perhaps the most important, the Metropolitan District Railway from Westminster, either to Cannon Street, or it may be hoped to the Mansion House also. The two really understood to be ready; the first will be opened for foot passengers immediately, and the second temporarily for all traffic on Monday; but the Blackfriars Bridge and the Metropolitan District Bailway seem also to be both assured at an early date. The combination of improvements should make each be more felt, and the wonder will be not only how it was pos-sible to endure the old state of things but the excessive interruption to traffic during the execution of excessive interruption to traine during the execution of the improvements. Naturally, with the completion of one set of improvements, attention is turned to new ones, and Mr. Heywood's report on the communications of the City has been very appropriately reprinted, with illustrative maps and plans. Such a report we think must produce the conviction that a great deal has yet to be done to make the access to the City what it ought to be. His favourite idea is the necessity of a new bridge below London Bridge, but the approaches to the City from both East and West are equally capable of much improvement. Perhaps the report will also help much improvement. Perhaps the report will also help to show what some of the City bodies apparently find it so difficult to understand—that the important thing is to get roads to and from the centre; that an inner circle railway keeping comparatively wide of the centre is not the remedy for difficult approaches. The Metropolitan District Railway has not earned much confidence by its conduct, but the scheme of a Mansion House station shows the sense of the present directors and the security they voluntarily offer, knowing the discredit they are in, entitles their project to better consideration than it appears to be getting. Let the directors however complete their line to Cannon street, and when Parliament meets they will be in a good position to urge their claim to an

The Calcutta correspondent of the Times in connection with the famine which has unfortunately commenced in Rajpootana (and which among other causes is prejudicially affecting Indian finance) draws attention to a belief which is current in India-he does not say whether among Anglo-Indians only or

among natives as well, though we infer both classes hold itthat famine is more prevalent in India under the English rule than in the good old days. The correspondent himself apparently accepts the belief as well founded. There is a thing more, he intimates, than what we should be prepared to thing more, he intimates, than when in the famines through find—an appearance of more frequency in the famines through the greater fines made about them. The fuse accounts for a good deal but not for all the causes of the current belief;

good deal but not for all the causes of the current belief:—
These causes are the increased demand since the Crimean War for Indian produce, such as jute, seeds, and cotton, the high prices offered for which have tempted the peasantry to encroach on the land proviously devoted to food. For food itself the prices are so high that they keep no stocks as of old. Rapid and cheap communication puts the peasant in the heart of India or the swamps of Eastern Bengal arapport with the Euopean market. Hence the producing class has enormously benefited. It is out of debt or fast getting out of debt; it takes an extra meal a day, or uses cooked food where it munched dry it takes an extra meal a day, or uses cooked food where it munched dry it takes an extra meal a day, or uses cooked food where it munched dry it takes an extra meal a day, or uses cooked food where it munched dry it takes an extra meal a day, or uses cooked food where it munched dry it takes an extra meal a day, or uses cooked food where it munched dry it takes an extra meal a day, or uses cooked food where it munched dry it takes an extra meal a day, or uses cooked food where it munched dry it takes an extra meal a day, or uses cooked food where the mine comes its stocks of food are wanting, and if famine lasts long, as in Orisas, the once comfortable peasant sells all his possessions, and even then cannot in isolated spots like Ajmure, get food for his money. He, however, holds out long, and has not been very seriously affected as yet by the drought, although this is the second seasan of it in Ajmere. But not so the labouring class without capital, the infirm poor, and the fast-increasing paupers of the towns. It is they who now crowd the raise works and poor-houses. It is they who have reason to curse the high prices even in times of plenty, wherever they are paid in cash, for their wages have not risen in proportion. On the first pressure of careity the peasant proprietors turn them off, and the State must feed them.

For ourselves we should like to see For ourselves we should like to see the minute evidence of these statements. It is evident even from what is stated that Indian famines are not so bad as in the old days, for there are workhouses now in which the starving get so relief, and the producers who now mostly escape would formerly have suffered as they did in that terrible famine which Mr Hunter describes in his Annals of Rural Bengal. What we should doubt a little is the alleged diminution in the stocks of food owing to the cultivation of other products. There could hardly have been at any time a larger area under cultivation for food than what the population required, and a proportionate area will still be maintained—the main effect of the increased demand for the produce of Indian agriculture being to increase the productiveness and quantity of the labour of those employed in it. We do not say that this has happened, and perhaps there is evidence for the correspondent's statements; but we should hesitate to believe that the economic change passing over India is, as a rule, even temporarily disadvantage the labourer through his wages not rising in proportion to the increase of prices. We can quite well believe, however, that the peasant proprietor turns off the labourer at the first sign of pressure; the labourer, as we pointed out last week in regard to the Irish question, is never worse treated than by peasant proprietors Indian labourer's case. asant proprietors; but this can be no new evil in the

The Railway News contains a curious account of the growth of a participating insurance policy—the case being that of "s "right reverend prelate just deceased." It would seem to prove that the objection of some people to insure that they prove that the objection of some people to mean like always to win their bets whereas they will lose if they live long, is not always well founded. The bonuses may byand-bye cancel the premiums, and yet there will be divisible at death a sum larger than the original amount in the

In 1821 the bishop insured his life in the Rock Office for 5,000l. In In 1821 the bishop insured his life in the Rock Office for 5,000l. In 1826 a bonus was added to his policy of 200l; in 1833 a second bonus of 715l; in 1849 a third of 675l; and in 1847 a sum of 838l was added. This brought up the total additions in the way of bonus to 2,423l in twenty six years, or at the rate of nearly 100ls year. For this accumulated bonus of 2,423l the bishop received in 1851 a net payment of 1,816l. An arrangement was made with the office at the same time, by which all future payments of premiums on his part should cease, and he commuted these sums for a payment of 1,066l, thus realising a net sum of 751l and freedom from all further payments. In the year 1856 the bonus added to the policy was 1,066l; in 1861 it was 1,137l; and in 1868 a sum of 1,341l, making a total addition since 1851 of 3,545l, or, including the bonus purchased in 1851, of not less than 5,968l. On his death, which occurred a few weeks since, his representatives are entitled to receive from the Rock a sum of 8,345l.s

to deliver bonds in exchange for the fully paid up scrip receipts

City of Glasgow Union.—Works are reported to have made considerable progress. The board propose to exercise borrowing nowers to the extent of 200,000l, and to issue 100,000l College station stock.

powers to the extent of 200,000, and to issue 100,000; College istation stock.

Desside.—The report states that the traffic receipts on the Desside line, for the the year ended the 31st of August last amounted to 18,4704, and on the Deeside Extension line to 7,0684, showing a total of 25,5384. From this was deducted 14,7841 for debenture and other interest, and the guarantees for the year, leaving a surplus for rent, taxes, and working expenses to the Great North of Scotland of 10,7544. The increase on the Deeside line was 1,0484, and on the Extension line 3004. In the agreement for the lease of the line (999 years) it was provided that if in any year ending the 31st of August the gross revenues of the undertaking leased should exceed 27,0004, then one-half of such excess should belong to the Deeside Company and the one-half to the Great North of Scotland Company, and such one-half belonging to the Deeside Company should be appropriated among the holders of the original Deeside capital, and of the Extension capital, in the proportion of 17.32ds to the Deeside and 15-32ds to the Extension capital respectively. The dividends recommended are 7½ per cent. on the Deeside ordinary, and 3½ per cent. on the Extension shares. Capital expended 289,3204.

Delhi,—The following telegram has been received from Lahore:

Delhi.—The following telegram has been received from Lahore:

"Section of Delhi Railway, Umballa to Loodiana, opened without ceremony on 1st October. Perfect success."

Dunaburg and Witepsk.—The numbers of 24 shares of 1001 each were drawn on the 11th inst., and have been published for

each were drawn on the 11th inst., and have been published for redemption at par.

East London.—The company has notified to the Board of Trade that the first section is ready for inspection from the 13th inst.

Eric.-At the meeting in New York the board were re-elected without opposition.

Great Western of Canada.—An ordinary dividend, at the rate of 3 per cent per annum, free of income tax, is recommended; surplus, 1,8512.

Indian Transway.—A special general meeting is called for the 18th instant, for the purpose of considering a letter from the Secretary of State for India, dated 23rd ult., containing offers to the company for the construction, under a guarantee of 5 per cent., of a railway from Conjeveram to Cuddalore, or some other point in that direction to be hereafter settled, upon the Indian cange.

gauge, &c.

San Paulo.—The Chairman said at the meeting that they had exceeded their guaranteed capital by 100,000l, for which they had to pay 7,000l a year interest. The 7,000l amounted to three eighths per cent. and the dividend being 6% per cent. accounted for the 7 per cent. not being fully paid. Resolutions were passed adopting the report and declaring a dividend at the rate of 6% per cent. per annum.

Seinde—Delhi Section.—The following is copy of a telegram received by the chairman of the Delhi Railway Company from Major-General S. A. Abbott, agent at Lahore:—"Section of Delhi Railway, Umballa to Loodiana, opened without ceremony on the 1st Oct.—perfect success."

Waterford and Passage Railway.—Mr W. J. White, accountant, of King street, Cheapside, is appointed interim official liquidator.

BANKS.

Bank of British Columbia.—The re-Banks.

Banks of British Columbia,—The report adopted at the meeting on the 12th instant stated that the balance at the credit of profit and loss account for the six months ended June amounted to 11,930l, and a dividend was declared at the rate of 4 per cent. per annum, which will absorb 5,960l. The sum of 5,000l was also appropriated to the reduction of the balance of the bad debt account and 070l was certainly forward.

also appropriated to the reduction of the balance of the bad debt account, and 970l was carried forward.

Delhi and London.—An ordinary meeting is called for the 27th inst to receive the report and the accounts for the half-year ending the 30th June last. Notice is also given that "the directors will submit for the consideration and decision of the same meeting the proposals of two meetings of shareholders held at Delhi and Mussorie on the 10th July and 7th August, 1869."

Frontier Commercial and Agricultural Bank.—Advices from the Cape announce the stoppage and liquidation of this colonial undertaking.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Australian Mortgage Land and Finance.—The directors have decided on paying the usual interim dividend at the rate of 10 per cent. per annum, carrying forward 6,312t.

Credit Foncier of England.—The directors have been prevented from distributing the bonus of 30,000t amongst its shareholders, as authorised at the late general meeting, by an unforeseen difficulty. This difficulty, however, they hope to overcome early next month, on the reopening of the courts. Meanwhile it will be a satisfaction to the shareholders to know that the necessary funds for this purpose have been received from the exdirectors.

ASSURANCE COMPANIES

British Empire Mutual Life Assurance.—The year's report shows that after having returned to members bonuses in cash to the extent of 81,870l, and having paid in claims 340,160l, the company had, at the close of 1868, an accumulated fund of 409,121l, being equivalent to 42 per cent. of all the premiums received from the commencement of the company, and between 50 and 60 per cent. of the premiums received on policies now in force.

Scottish National Insurance.—The adopted annual report stated that 492 new life policies had been opened during the year, amounting to 257,846l. Sixty deaths had occurred, the claims amounting to 35,204l. Out of the interest on the capital and reserve, and the net profits of the fire business, a dividend of 10 per cent. was declared on the present amount of paid-up capital, and a considerable balance was carried to the reserve.

United Ports and General Insurance.—A meeting of proprietors is called for the purpose of voluntary liquidation; and the Vice-Chancellor has appointed Mr Cape, of Cape and Harris, provisional liquidator. These steps are taken to facilitate the arrangements entered into with the English Assurance Company.

MISCELLANEOUS COMPANIES

Bayano Estate, Limited.—Capital 50,000l, in 2l shares. The object is to take over from the Central American Association about 176 square miles of property on the isthmus of Panams. It is stated to extend from the Pacific coast to within 12 miles of the Atlantic, and the purchase price is 26,000l, payable in 8,000 fully paid shares, and 10,000 shares with 1l paid.

Brighton Arcade, Limited.—Mr George Whiffin, the liquidator, has announced a second dividend of 4s in the pound, making 11s in all returned to the creditors.

Chartered Gas Light and Coke and City of London Gas Com-panies.—A scheme for the amalgamation of the two under takings has been submitted to the Board of Trade.

Egyptian 9 per Cent. Loan.—The numbers of 541 bonds, representing 84,200l, have been drawn and published for redemption at par on the 22nd November.

French Atlantic Cable.—The number of messages for the week ended October 9 was 982, the cable charge being 2,600l.

Gloucester and Berkeley Canal.—Revenue balance for the half-year, 6,752l, allowing of a dividend of 22s 6d per original share, free of income tax. The extension of the canal and improvement of the Severn continued to occupy the attention of the com-

Harper Twelvetrees, Limited.—A second dividend of 3s 4d in the pound is being paid to the creditors.

the pound is being paid to the creditors.

Native Guano, Limited.—Capital 60,000l, in 5l shares. All to be called up on allotment. The prospectus states:—

"The company, which was formed 18th March, 1869, with a capital of 6,000l, for the purpose of demonstrating the value of the 'A.B.C. Sewage Process,' after six months spent in the successful establishment at Leamington of works for purifying town sewage, and manufacturing from it a dry and portable manure for sale, have determined to extend the application of the process, and to give it a national character. The patents for the United Kingdom, several Continental countries, and the United States of America, with the works at Leamington, are assigned to this company. The cost of manufacturing native guane ought never to exceed 30s per ton. At Leamington it has actually been 20s 3d per ton, and the price obtained s 3l 10s per ton."

A compound of animal charcoal, blood, clay, and alum is mixed

A compound of animal charcoal, blood, clay, and alum is mixed with the sewage; and the deposit is dried for use. The purchase price is 5,400 shares.

Price is 5,400 shares.

Phenix Gas.—A call of 5 per cent., making 40 per cent. paid, falls due on the new stock on the 1st November.

Surrey Consumers' Gas.—The capital account shows that 266,167l had been expended, leaving a balance of 893l. The revenue account for the half-year ending the 30th of June last shows that 38,797l has been received, and 26,611l expended, leaving a balance of 12,186l. To this is added 317l from the previous half-year, making 12,503l. From this is deducted 1,448l for interest on mortgages and bonds, leaving the net profit of 11,055l for dividend. Out of this a dividend of 5 per cent. is payable; surplus, 555l. The report congratulates the proprietors that Mr Cardwell's rigorous resolutions have been set aside.

Thompson's Patent Universal Air-Tight Stopper, Limited.—Mr F. B. Smart has announced the payment of creditors in full.

Tram-Railway of Great Britain, Limited.—The share list closes on the 18th instant, and the allotment will be made on the 20th instant.

West India and Panama Telegraph, Limited.—Special Settling Day—Friday, the 15th instant. Shares officially quoted.

MINING COMPANIES.

Winter's Freehold Gold Mining, Limited (Ballarat).—Mr T. Dicker, of Royal Exchange avenue, has received authority to issue a further 500 share 1 of 25l each, with 10l paid up.

Reports are again spread that the Minister of Finance is pre-paring a reduction of the duty on wines, and a modification in the mode of buying it. It is also affirmed that he is about to cut down expenses. Measures of this kind have long been greatly mode of buying it. It is also down expenses. Measures of this kind have long been greatly needed. On the other hand it is said that the Emperor, in the hope of winning favour from the working classes, is studying some socialist projects, one of which is the grant from the public treasury of pensions to aged workmen. His Majesty is said to have acquired the conviction that such pensions would "at first" entail a charge of "only" 100,000,000 or thereabouts on the tax-navers.

e Protectionist meeting of Mulhouse, which was held last week, was composed of about 1,000 persons engaged in the dif-ferent branches of the industry of cotton in the Eastern depart-

ments, and was attended by some members of the Corps Legis-latif. The great grievance dwelt on was the well-known one of the temporary admission, free of duty, of foreign tissues to be printed, subject to the condition of their being afterwards ex-ported. The spinners and weavers of cotton complain of this measure as injurious to them by lessening the demand for their products, the cotton printers on the contrary any the measure as injurious to them by lessening the demand for their products: the cotton printers on the contrary say that it is necessary for the prosperity of the printing trade. Why the printers should be sacrificed to the spinners and weavers was not explained in the meeting. In addition to this special grievance the commercial treaties were denounced. A M. Claude, who is interested in a factory in the Vosges, was the principal speaker, and he represented the cotton industry to be in a pitiable state. In the course of his speech he said that in the neighbouring department of the Moselle, out of 29 spinning factories seven had been entirely ruined, and four others, which had cost 685,000f, had been sold for 297,000f. Eventually these resolutions were adopted:—"1. The meeting, considering that the complaints made for many years past of the system of temporary admissions, ought to have convinced the Government that that system is contrary to the general linterest, expresses regret that the decree of February 10, 1861, which established it, and which in reality constitutes a privilege to the detriment of the two most important February 10, 1861, which established it, and which in reality constitutes a privilege to the detriment of the two most important branches of the cotton industry, has not yet been repealed, and requests the committee energetically to pursue the abrogation of it. 2. The meeting demands the co-operation of the deputies of the East to obtain, in the Corps Legislatif, the denunciation of the commercial treaties and the replacing of them by a Customs law, of which the tariffs shall be fixed after a Parliamentary inquiry."

At Rouen there has also been an assembly of Protectionists, but it was not so numerous as that of Mulhouse. M. Pouver-Quertier, in his double quality of champion of Protectionism, and a great manufacturer, was the principal orator. His speech how ever was little more than a repetition of those he made in the Corps Legislatif in bygone years, and like them bristled with figures. His denunciations of the treaties of commerce were received with loud applause, and he declared that they must be abolished. In what way, however, they (with the exception of that with England which has nearly expired) can be put an end to without a breach of national faith he did not explain. He was to without a breach of national faith he did not explain. He was followed by other speakers, who said pretty nearly the same things as he, but not in such good language. The Chamber of Commerce of Rouen has had a report prepared in which it says that the general expenses of an English spinuer are inferior by 23.5 per cent, those of a French one, and that those of a Swis are about the same, from which it follows that the Frenchman cannot compete. The report also complains that navigation dues the best of a Swis are about the gold desert in France than in England. are higher, and coal dearer in France than in England.

In addition to Mulhouse and Rouen other towns are agitating in a Protectionist spirit. M. Ozenne, of the Ministry of Commerce, has been to Lille, and is now at Roubaix, to hear the complaints of the Chamber of Commerce. Very doleful those complaints are, and they are supported by arrays of figures wearisome to read.

Amiens on its part is complaining that its corton velvet trade has suffered and is suffering; and Quentin is in despair at the state of its yarn and muslin industry; Nice deplores a falling off in its cloth and paper manufactures. And all demand the denunciation of the treaties.

The men employed in the coal pits of Aubin, department of the Aveyron, which belong to and are worked by the Orleans Railway Company, revolted a few days back against the chief engineer, owing to some difference with bim as to the manner in which the they extract should be measured and paid for. They seized and ill-treated the unfortunate gentleman, and attempted to drown him. But troops arriving rescued him and fired on the miners, him. But troops arriving rescued him and fired on the miners, the result of the firing being sixteen persons killed and a greater number wounded. This is the second time in three or four weeks, the first being in the St Etienne district, that the military have had to be employed against pitmen, and that slaughter has ensued. Such incidents as these cause a certain perturbation in trade, and disquiet capitalists. The state of Paris also is not satisfactory. In the part of the town called Belleville there was the other night a sanguinary collision between the police and the people, and on the two nights following displays of military forces were considered necessary to preserve order. In some trades workmen are on strike, and bankruptcies are unusually numerous. Political de-monstrations hostile to the Government are moreover threatened by the republican party. All these circumstances should be taken into account by persons who have, or may contemplate making, investments in this country.

investments in this country.

The Suez Canal Company has published in the form of an advertisement in newspapers a denunciation of what it calls the "unscrupulous speculation" that has latterly taken place in its shares on the Bourse, and which has had the effect of bringing down the value of them. It affirms that contrary to what has been stated the canal is in perfect order, and will be finished and opened on the date fixed. And in order to silence doutts respecting its solvency, which have been expressed, it offers to discount from the 15th (to-morrow), at 3 per cent., the half-jear's in crest on shares which will not fall due until 1st January next.

atlantic Cable has issued a circular stating that on the 18th Asgust it called on the directors to summon a general meeting, but that no favourable reply has yet been given. "We desire," says the committee, "to discuss the remuneration of the founders of the affair, and in order to protect our interests we have forbidden the committee of London and that of Paris to deliver to the founders the 5,000 shares they have set apart for the smelves in the satutes." The committee declares also that it wishes to examine the expenses incurred. By the statutes it are holders of 5,000 shares have the right to demand the calling of a general assembly, and it requests holders to give it their co-operation so as to form that number.

The negotiations between the Eastern Railway Company of France and the Company of the State Railways of Holland for carrying into effect the convention between France and Belgium have not succeeded, owing to financial reasons. In consequence the stipulations of that convention relative to the Dutch lines will not take effect, and the French Company will not obtain access the Amsterdam and Rotterdam so easily as it expected. It is said however that negotiations on a different basis will be entered into.

The long-talked of new Ottoman loan has not yet been announced. The parties concerned in it differ, dit-on, about the manner in which it shall be apportioned among them, and it is added besides that some difficulties have occurred at Constanti-

nople.
The new Prussian loan of 100,000,000 thalers, about 375,000,000f, is to be taken by the Banque de Paris, the Credit Foncier, and other establishments of this city.

The Eastern Railway Company is to pay from 1st November 20f ss interest on shares. This company discounts at the Back rate all its coupons falling due to the 30th April next.

The directors of the Credit General Ottoman require the payment of 125f per share (the second fourth of the nominal amount) to be made from 31st October to 5th November.

The General Company des Voitures de Paris (cabs) announces from 4th November the payment of 10f per new share on account of dividend.

The Carmaux Coal Pits Company is to distribute from 2ad November 10f per share as dividend of the first half of 1869.

November 10f per share as dividend of the first half of 1869.

The Company of Mokta-el-Hadid (magnetic iron ore) is to pay from 1st November the coupon of interest No. 7, which is 9f 40c per share, on which 375f are paid up, and 12f 50c on those on which 500f are paid.

A coupon of 6 lire 25c, representing interest from 1st February to 30th June, on the Tobacco shares of Italy, is to be paid in French money by Messrs Stern and Co. from the 15th.

The Bank de Credit Italien is now paying 7f 50c on account of dividend of 1869. At Paris the payment is made by the Credit Industriel Bank.

dividend of 1869. At Paris the payment is made by the Credit Industriel Bank.

The Journal des Fabricants de Sucre, organ of the beetroot sugar makers, says:—"The news we receive is that there is a considerable deficit in the crop, varying from a quarter to a half, except however in the department du Nord, which has less to complain of without however producing the results that had been hoped. On the other hand the quality of the beetroot is in every way excellent, the juice being rich, easy to work, and furnishing sugars of remarkable quality. It is true that there are some exception, owing to local causes, but they are of little importance is the general result. We do not believe that there would be exaggration in estimating the crop at the fourth of an ordinary year; but the yield of sugar will be, according to all probabilities, higher by a fitth. On the other hand, the quantity of plants sows was a tenth more. Taking all these different elements into consideration we arrive at the conclusion that the production will be about 230,000 tons."

The wine merchants of Nantes have complained to the Minister

The wine merchants of Nantes have complained to the Minister of Finance of the law which imposes graduated duties on foreign wines according to the degree of alcohol they contain. They say that it causes endless difficulties and delay, one of the greatest difficulties being the want of sufficient skill in officials and the want of precise instruments to determine the quality. They say that the tax produces little to the Treasury, and they recommend that a fixed duty on quantity without regard to quality shall be substituted for it.

It may be remembered that a short time back a person of the

It may be remembered that a short time back a person of the name of Brochon, Secretary-General of the Immobiliere Company, was as have been tried for embezzlement, but that the absence of M. Emile Pereire, chairman of the company, rendered a postponement necessary. The trial has taken place within the last few days, and has ended in the condemnation of the man to two years' imprisonment. It was proved that he had appropriated 783,369f, but that part of the sum was got back. It had been expected that revelations compromising different persons would have been made, but there were none. It was shown however that the financial operations of the company, or at least some of them, were conducted with extraordinary negligence. Thue, among other things, it appeared that Brochon had received 100,000f as rent from the Jockey Club, had put the sum in a drawer of his desk, and (his own words) "had kept it there during several months." It appeared too that grave abuses must have existed, since the man said that one contractor had offered him a bribe of 100,000f, but that he had refused it.

A Paris banker of the name of David subscribed in January last 25,000 obligations of the railway company called the Ligne Internationale de l'Italie par Le Simplon. He afterwards saw reason not to execute the engagement, and the Company sued him before the Tribunal of Commerce. He urged that the Company was irregularly constituted, that its capital was composed chiefly of obligations not of shares, that its directors had neglected its interests, &c. But the Court held that be knew all that at the its interests, &c. But the Court held that be knew all that at the time he subscribed, and that besides the Company being a Swiss one any vices in its constitution could only be judged in Switzerland. Accordingly it ordered him to pay 2,500,000%. A treaty of commerce has been concluded between Spain and Switzerland. It simply stipulates that the products of each country shall be treated in the other like those of the most favoured nation.

The Swiss journals announce that an arrangement between Switzerland and the United States for the transmission of small sums of money through the Post Office has been come to, and that the details of it will shortly be published.

The Switzs journals announce that an arrangement between Switzseland and the United States for the transmission of small sums of money through the Post Office has been come to, and that the details of it will shortly be published.

The market report is as follows:—
FLOUR.—At Paris, yesterday, eight marks, 57f 25c the sack of 157 kilogs; superior, 56f.

WHEAR.—In most of the country markets prices have declined, and transactions have not been active. At Paris, yesterday, choice white was 32f 75c to 33f the sack of 120 kilogs; choice red, 32f 50c to 32f 75c; first quality, 31f 25c to 32f 25c.

COTTON.—The sales at Have, in the week ending Friday, were 13,321 bales. In the closing quotations, compared with those of the preceding week, United States were 2f to 3f nigher, Surat 2f, Bengal and Scinde 1f lower. New Orleans very ordinary, per 50 kilogs, are consequently 146f, Comrawattee good ordinary 116f, Timnevelly ditto 116f, Madras ditto 114f. This week business has been regular, and yesterday New Orleans very ordinary was 148f, Comrawattee good ordinary 117f.

COPPER.—At Have, in the week ending Friday, 550 sacks Hayti and Port-au-Prince, 62f to 66f the 50 kilogs, in bond; 1,100 Gonaives, 71f; 100 St Marc, 72f to 74f; 450 Hayti, 56f 50c to 61f; 1,300 Guatemala, prices not stated; 820 La Guayra, 71f 50c to 73f; 27f 5Rio, 51f to 64f; 3,865 ditto for delivery, 50f; 270 Rio washed, 71f to 82f; 4,100 Santos, 52f to 76f; 650 Bahis, 51f 50c to 53f; 850 Mysore, 71f to 72f; 50 Winard, 77f; 62 Singapore, 52f; 100 Ceylon, 70f. This week, Hayti, 66f and 61f; St Marc, 72f; Rahin, 50f; Guatemala, 70f to 75f; Santos, 64f; Capitania, 52f and 54f; Jacmel, 69f; Winard, 66f 50c to 72f 50c; Rio, 48f 50c and 53f; Bally, 43f. At Bordenze, last week, 200 sacks Guatemala, 206f; 141 Rio washed, 81f and 62f; 334 Bahis, 51f 50c; 140 Mysore, 104f; 160 La Guayra not garbled, 76f to 78f; 100 ditto, 43f 50c and 51f for bonne quatrieme; and 55f to 66f for, Mysore, 100 ditto, garbled, 78f. This week, Rio not washed, 38f to 50c and 50f for usine.

and 110f.

Tallow.—Sales at Have, in the week ending Friday, were active, but prices were not firm. La Plata saladeros ox, 54f 75c to 55f the 50 kiloga for disposable, and 55f for delivery; La Plata sheep, 54f 12½c to 54f 50c for disposable, 54f to 55f 50c for delivery. This week, Monte Video saladeros ox, 55f 25c; La Plata sheep, 53f and 53f 37½c. At Paris, pesterday, the 100 kiloga, without octroi duty, 107f.

SPIRITS.—At Paris, yesterday, 3-6 first quality, 90 deg., 65f to 65f 50c. At Bordeaux, the day before yesterday, 3-6 Languedec, 85 deg, 84f; 3-6 bestroot, 90 deg., first quality, 72f.

COMMERCIAL AND MISCELLANEOUS NEWS.

At the quarterly meeting of the ironmasters of the Bilsten district, the attendance was the same as it has been in the ordinary way of late years. In reference to the state of the trade, it was mentioned that it is rather more active than it was three months ago. It was mentioned

that the few firms who have re-embarked into rail-making in South Staffordshire are well engaged; and it is now thought that that venture may be to some extent successful, while the demand for rails is brisk, notwithstanding the disadvantage at which South Staffordshire stands for producing that class of finished iron as compared with South Wales. The make of pig iron in this district is about the same as it was three months ago; there has been a small addition to the furnaces in blast, but the price of hot blast, all mine iron, has not varied to the extent of 1s 3d are ton. 1s 8d p

Is 3d per ton.

The quarterly meeting of the ironmasters was held in the Birmingham Town-hall on Thursday. There was a general concurrence of opinion that there is more animation. A better demand is experienced for common iron, mainly in consequence of the Welsh houses being full of orders for rails. The nature of the business transacted showed that there is a fair demand for finished iron on the part of home consumers, but as the Baltie ports will be closed in a fortnight or three weeks it is not likely that there will be any more orders this season on account of Russis; the same with regard to Canada, so that while there is a fair prospect of the trade preserving steadiness at its present measure of animation, nothing of positive improvement is probable until the spring. Upon the whole, there was more of satisfaction than otherwise at the result of this day's meeting. The North Staffordshire men in the hall reported that the trade in that quarter is more active, and that they are obtaining somewhat better prices. There is a fair demand for pig-iron. We quote South Staffordshire, all mine, hot blast, 3l 7s 6d to 3l 10s per ton; cold blast, 4l to 4l 5s; Shropshire, hot blast, 3l 10s to 3l 12s 6d; cold, 4l 5s to 4l 10s per ton.

The digest compiled by the Charity Commissioners states the gross

We quote South Staffordshire, all mine, hot blast, 3/ 7a 6d to 3/ 10s por ton; cold blast, 4/ to 4/ 5s; Shropshire, hot blast, 3/ 10s to 3/ 12s 6d; cold, 4/ 5s to 4/ 10s per ton.

The digest compiled by the Charity Commissioners states the gross income of endowed charities vested in the City companies at 99,027. No less than 53,912 is applicable to the support of almshouses, their immates, and pensioners. 1,368/ to distribution of articles in kind, 112/ to distribution in money, and 182/ to the general mass of the poor; 19,008/ to education, 5,647/ to apprenticing and advancement, and 903/ to the clergy. Sums amounting to 17,983/ are paid to other parishes and schools. The Drapers' Company administers as much as 15,182/ of these funds, the Bancroft Charity Estate and funds producing nearly 4,500/ a year, the Howell Charity 3,819/ for schools, and the list of small endowments in the hands of this company, including a host of items, such as 8/ for preachers at 8t Paul's, 40/ for the Arabic professor at Cambridge, sums for poor prisoners, sermons, &c. The Mercers' Company's endowed charities have a gross income of 13,148/; in this is included 6,547/ for Whittington's almshouses, 1,800/ for the Mercers' School, in which (says the return) the company educate 70 boys, Lord Camden's charity of 1,088/ a year for apprenticing and advancing, Sir T. Bennett's trust fund of 1,042/ a year. St Paul's School is under this company, but they claimed the estates as their own property, and there is no statement, the question whether this is a charity under the Act not having been decided when the return was compiled. The Ironmongers' Company administer 8,842/ of charity funds, Betton's charity producing 7,128/, of which 6,694/ is applicable for education. The Goldsmiths' Company's charity endowments produce 7,361/, the chief item being Sir M. Bowes's almshouses, with more than 2,000/ a year; the Skinners' Company of charity endowments appear to be stated in the returns for the parishes in which the money is expended. The Haberdas

The Bank of England return shows as its main feature the effect produced by the payment of the dividends. The total of advances repaid to the Bank-reaching over one-anda-quarter million-has nearly all disappeared by the withdrawal of "other deposits;" and almost the whole decrease of 357,237l shown in the coin and bullion must have been absorbed in the circulation of the country, as the withdrawals for export during the week have only reached 15,000l. The total reserve of notes and coin shows a decrease of 302,3221.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

In 1859, money was very abundant, the open market minimum being 2½ per cent. Large shipments of specie had been resumed to the East, and the instalments on the Indian and Russian loans were in progress. The railway share market evinced great buoyancy.

In 1866, the demand for money was extremely moderate, at a fraction below the Bank rate. The Bank of Frankfort had

raised its rate to $4\frac{1}{3}$ per cent.

In 1867, a meeting of Greek bondholders had taken place to consider a proposal for an arrangement of the 5 per cent. debt. The rumours from the continent were of a warlike character, and the market for foreign bonds was heavy in consequence. The supply of money was large, and the demand for accommodation inactive.

In 1868, the prosecution of the directors of the Merchant's Company had excited great interest. Messrs Rothschilds had introduced a loan of 1,000,000/ for New South Wales. The South Australian loan of 400,000/ had been issued at a minimum of 1074; over two-and-a-half millions were tendered for. The purchase of 40,000,000f of rente by the Bank of France had been much criticised in Paris.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1859, a deficiency of 6,098,303l; in 1866, a deficiency of 2,466,463l; in 1867, an excess of 3,481,690l; and in 1868, an excess of 4,409,243l. In 1869, there is an excess of 3,400,596l.

DISCOUNT AND MONEY MARKET .- The indications of a gradual advance in the value of money on the continent, to which we called attention last week, have been rather strengthened by a further advance of \(\frac{1}{2} \) per cent. in the Bank of Holland rate. Advices from Frankfort state that the precautionary measures which have been adopted at that place, and also at Berlin, have been to prevent the efflux of capital to Vienna, and the fact furnishes evidence of the state of affairs at the last-named city, whether it be progressively bad or only a temporary disturbance. In our market there have been two or three features which have led people to think that the value of money is about again to advance, but the indications are hardly strong enough to claim serious attention at present. It is observed in some discounting quarters that very little of the dividend money is finding its way to the large lending houses, and that an increase in the terms allowed for deposits at 14 days' notice has been talked of in consequence. No such change has however yet been made. The total reserve of the Bank of England has fallen below 10 millions, by a decrease last week of nearly a million and of over 300,000l this, while a considerable amount of coin has passed into circulation. These circumstances, together with a sharp demand for money for the Stock Exchange settlement experienced to-day, gives rise to the impression that we may be on the move upwards again. A generally better demand has been experienced quite recently by the Joint Stock Banks from the country, but it has fallen off to-day, and the rates, although somewhat firmer than last week, show very little actual difference. The demand has been quiet at the Bank of England, and there seems to be very little discount business at Paris, with the terms in the open market still at 2 per cent.

Upon the Stock Exchange a better demand has been experienced the last day or two in connection with the settlement, and the terms have improved to 2 per cent., but they will probably recede again.

The current quotations for mercantile paper having various periods to run are as follow:—

Brussels		24
Madrid	5	5
Hamburg	***	41
St Petersburg	5	5

There has been a rise of $\frac{1}{2}$ per cent, in the Bank rate at Amsterdam.

The following are the changes in the Bank of France return for the week:

INCREASE.	fcs
Trasury balances	10,250,000
Notes	8,000,000
Bills discounted	1,333,000
Advances	700,000
DECREASE.	fes
Private accounts	19,333,000
Cash	5 600 000

There is a small increase in the bills discounted, and a slight decrease in the coin and bullion.

English Government Stocks.—The improvement in the tone of the Government funds which continued up to the middle of this week, and the better figures which have been reached, have been due to some buying as a result of the increase of the supply of the money in the market and consequently of the amount seeking investment. The purchases have been stimulated however by other causes easy of discovery. In the first place, there is a good deal of talk just now of there never having been a better prospect of peace in Europe, the foundation for the inference being found in the fact that Count Bismarck is away at his country retreat,

covery. In the first place, there is a good deal of talk pushow of there never having been a better prospect of peace in Europe, the foundation for the inference being found in the fact that Count Bismarck is away at his country retreat, Napoleon has uttered pacific declarations, and Lord Clarendon has been on a conciliatory mission to one or two foreign courts. Without making too sure of the safety of the basis formed by many persons out of these circumstances, some improvement in Government guaranteed securities is sure to follow. Secondly, we have had a fall of 1s in the corn market, and the other departments of the Stock Exchange have been fairly good all the week, following the generally favourable tendency of prices on the chief continental markets. Latterly a little reaction set in on realisations upon the late rise, which two circumstances assisted in causing. The further advance in the Bank of Holland rate fixes attention to the continental money markets, and speculations are again affoat as to the form in which the Government intends to pay for the telegraphs. To-day the English funds opened at a further fall of \(\frac{1}{2}\), which was due chiefly to the decrease again this week shown in the total reserve held by the Bank of England, which has now fallen below 10 millions. The closing figures for Consols were 93\(\frac{1}{2}\) to 93\(\frac{3}{2}\) for both money and the account.

Foreign Stocks.—It appears that a renewed attempt to float the Santo Domingo Six per Cent. Government loan of 1869, which was brought forward on the 26th of last July, will shortly be made by Messrs Peter Lawson and Son, who have apparently without further loss of time permitted themselves to be influenced by the opinions expressed in July last for the guidance of the public as to the insufficient character of the security, and have somewhat amended their prospectus. It will remain to be seen whether the co-operation of a "powerful American firm" to collect the Customs duties will be censidered a material improvement in the nature of the security, the amendments in which are as follows:—

security, the amendments in which are as follows:—

1. A royalty of 1l per ton of guane sold in England will be set aside for the service of the loan, and as the quantity is expected to reach 60,000 tons per annum, the whole amount required—viz., 59,000l—may be thus secured by the sale of guane.

2. Messrs Spofford, Tileston, and Co., of New York, owners of a line of steamers between New York and the ports of San Domingo, have been appointed as agents to collect the Custom duties hypothecated to the bondholders, and the collection thus passing into the hands of a powerful American firm the contract offers a much more satisfactory security than before.

With reference to the Italian Tobacco Monopoly Company, Messrs Stern Brothers have given notice to the holders of shares that they will be prepared to receive such Provisional Share Certificates as were issued in London, for the purpose of being exchanged for definitive shares, on and after the 18th instant. The Coupon No. 1 will at the same time be paid (at the exchange of the day) at the rate of lire 6.25 per representing interest at 6 per cent. per annum from the 1st February to the 30th June last, upon lire 250, the

amount paid upon each share.

We have again to report lower figures for Turkish stocks, and there are the strongest indications that the class of speculative purchasers, who draw some excitement from selecting such descriptions as have ample room for improvement, are beginning to tire of waiting for the flood in the tide of the The delay which is shown in financial affairs of the Porte. maturing the arrangements for the new loan must obviously create distrust amongst holders who probably do not forget the fiasco which the agents of the Société Générale met with on this market some months back, when an attempt was made to convert into a permanent loan some floating Treasury bonds against which the Turkish Government had received advances. To-day it is stated the Comptoir D'Escompte have undertaken the new loan, but are only awaiting the ratification of terms from Constantinople.

The movements in Spanish stock have been somewhat perplexing this week. In the face of a struggle between insurgents and a Provisional Government which seems, so far at least, unequal to cope with the movement, the tone of the Spanish market has shown some strength. All attention is directed to the army; and since the insurrection has assumed a more serious character, and the faction-fight has threatened the gravest complications in the Cortes itself, those interested in the maintenance of what is left of Spanish credit abroad have not failed to perceive that the preservation of loyalty amongst the troops was the one thing to look to. The somewhat anomalous upward tendency in the quotations recently is due probably to the opinion in some quarters that the next divi-dend will be duly provided for—some go so far as to say it is already in hand. That strenuous efforts are being made to provide it seems certain; but how can such a system last? It is rumoured that the 1869 loan is being sold 3 per cent. under the price of the 1867 stock, in order to provide the necessary funds.

The extent of business generally is only limited, and as there is plenty of money for the moment seeking employment the rates for continuation at the settlement just concluded were easy, or about 4 per cent. The tendency of Egyptian securities has been good during the week, the 1868 loan being more particularly inquired for on account of the purchases for

the drawing which will shortly take place. Messrs B. Raphael and Sons have advertised for payment the debentures and coupons due the 1st November of the Danish Five per Cent. Government Loan; also the coupons on

Riga Mitau Railroad shares and bonds.

ENGLISH RAILWAY STOCKS .- This department continues to be influenced mainly by the traffic receipts, but the operations on the whole are only of a limited nature, and with the com mencement of the fortnightly settlement the business fell to In connection with the adjustment of the a minimum. account concluded to-day it was observed that, whether owing to an increase in the supply of stock or to a diminution in the floating supply of money, the rates of "continuation" in a few instances were slightly higher than on the last occasion. Generally, however, they were still light. Lancashire and Yorkshire and Caledonian stocks were in comparatively scanty supply, while Metropolitan was decidedly scarce, and commanded a "backwardation." The contango of 3-16 to 5-16 which there was at one time on London and North-Western subsequently disappeared and the price improved. On a renewal of speculative sales yesterday, Metropolitan stock receded 5 per cent. On the other hand, Great Western stock. which was so long amongst the least favoured of this class of security, continues slowly to improve. The traffic receipts this week of the Midland line show an increase of 6,8284. The stock advanced on the publication of the figures per cent., but it has hardly been maintained. To-day the feature Midland and Great Northern "A" has been the rise in Midland and Great Northern "A" stocks, which have risen 1 per cent. Great Westerns show as advance of 3 at 561 to 561.

COLONIAL RAILWAYS.—With reference to the Great Western Railway of Canada, it is stated that "from the accounts of the half-year ended the 31st July last, after providing for the dividend on the Preference Stock, the board have decided upon recommending a dividend on the ordinary shares at the rate of 3 per cent. per annum, free of income tax, reserving 2,000l for the renewal of ferry steamers, and carrying forward to the current half-year the sam of 1,850l 12s.

FOREIGN RAILWAYS .- It is stated that the Roumelian Rail way Company have deposited 200,000l in draughts on Paris with the Turkish Government.

With reference to the bonds of the Alabama and Chattanooga Bailway Company, guaranteed by the State of Alabama, Messrs J. H. Schroder and Co. have given notice that they will be prepared on the 20th inst. to deliver bonds in exchange

for the fully paid-up scrip receipts issued by them.
Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

AMERICAN SECURITIES.—The securities of the United States Government have been improving in tone steadily for some days past, and the reason would seem to be that the financial atmosphere of New York, which has been for some months heavy with speculation, has been at last considerably cleared by the destruction of many of the persons who have latterly been conspicuous in connection with the gold corner. It may be hoped that the ruin and misery which some prominent actors have brought upon themselves, and the rough mer in which the resources of those who have been able to beld out have been handled, will place matters upon a more satisfactory footing, a step in this direction having already teen made by bringing the premium on gold down to a point lower than it has been for many months past. It is matter probably for congratulation throughout the States that so serious a disturbance of the currency and prices should have occurred at a somewhat early stage of the country's recovery, and before the credit system has assumed the large pro-portions which will no doubt be developed in the future. portions which will no doubt be developed in the future. The necessity of returning as soon as possible to specie payments will be brought more prominently before the country by late events; and in fact it would almost seem to be a wiser policy to devote some portion of the surplus revenue periodically to this object, if the present scale of taxation is to be kept up, instead of setting apart so much for the redemption of the National Debt. The 5-20 of 1882 were taxation expected at div.. and show strength at $81\frac{7}{8}$ to $82\frac{1}{8}$. to-day quoted ex div., and show strength at $81\frac{7}{8}$ to $82\frac{1}{8}$.

On the receipt of the news from New York that the Erie Railway directors had been re-elected without opposition, the shares improved about \(\frac{1}{2} \) per cent., but there seems to be but little confidence in the line—or perhaps we should say in those who have the management of it—as a security, and realisations follow rapidly upon any advance. To-day Erie shares show a fall of a further \(\frac{1}{2} \) at 22\(\frac{5}{6} \) to \(\frac{7}{6} \).

TELEGRAPH SHARES.—A good business has been done in this department, and prices have in most cases improved. Telegraph Construction have been prominently sought after, leaving off about 1*l* better. West India and Panama are 15s better. Electric and International have also improved about 14. India Rubber and Gutta Percha have, on the other hand, fallen 11.

BANKS.—The confidence of the commercial and trading classes at the Cape seems to have been greatly shaken by the stoppage of a local concern known as the Frontier Commercial and Agricultural Bank. A special general meeting of the shareholders was held at Graham's Town on the 22nd July, to receive the statements of the auditors appointed by the shareholders, at the last general meeting, to investigate and report upon the affairs of the bank. The liquidation of the

bank was resolved upon, and it appeared to be the general opinion that a considerable call would have to be made. After the meeting the bank was closed, and payments stopped. It has transpired that the bank holds a large amount of paper of an unsatisfactory character; that the renewals have been numerous and repeated, and in some instances have been continued for years; that paper has been drawn at extraordinarily long dates, bills amounting to 14,149*i* maturing during the course of the years 1870, 1871, 1872, and 1873; and the total of overdue bills discounted is 100,347*i*. The report of the auditors also shows that the bank's liabilities, leaving the shareholders' capital out of the question, amount to 169,064l, being in excess of their valuation of the assets by 3,425l. In other respects the changes in this market have been unimportant.

MISCELLANEOUS SHARES.—In relation to the Credit Foncier of England (Limited) it is stated that the directors have been prevented from distributing the bonus of 30,000*l* among its shareholders, as authorised at the late general meeting, by an unforeseen legal difficulty. This difficulty however they hope to overcome early next month, on the re-opening of the Courts. Meanwhile it will be a satisfaction to the shareholders to know that the necessary funds for this purpose have been received from the ex-directors.

EXCHANGES.—There is still very little doing in this department, but the feature this week is a rather better demand for bills in Amsterdam notwithstanding the advance of 1 in the Bank rate at that place. As it is however only a small market, the circumstance denotes nothing worthy of notice. In other respects the rates in Austria and Italy are rather more favourable to this country.

BULLION.—There have been no operations at the Bank to-day. The following is from Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The arrivals this week are the Peninsular and Oriental steamer, Nyanza, with Australian gold valued at 455,4644, and the True Briton, from Melbourne, with 54,500%. The export demand is good, and the above amount, per Nyanza, has been sent away. The Peninsular and Oriental steamer, due at Southampton about 5th November, brings about 410,000% in Australian bar gold and coin. The gold ships now at sea are:—The Swiftsure, from Melbourne, with 67,500%; the Norfolk, from Melbourne, with 27,000%; the City of Pekin, from Melbourne, with 31,500%; the Etopian, from Melbourne, with 45,000%; the Dover Castle, from Melbourne, with 44,000%. The Dolta, for Bombay, took 5,000 sovereigns; the Douro, for Brazil, 5,147 sovereigns; the Northam, for the Cape of Good Hope, 15,000 sovereigns. The Bank has purchased no bar gold this week; 15,000 sovereigns have been withdrawn.

Silver.—The silver market is very inactive, and the price is now 60 d per oz standard; an exceptional and limited demand raised the rate temporarily to 60 d per oz standard, but this quotation has not been maintained. We have no shipments to the East to report.

Mexican Dollars maintain the price of 59d per oz; at this rate the amount brought to St Nazaire, per Floride (about 180,000% for England), were disposed of. There is no demand for China.

Exchange on India for drafts by the banks at 60 days' sight is unchanged, and may be quoted is 111d Bombay, Madras, and Calcutta.

India Government Loan Notes are without much change. We quote per Cents., 92 to 92½; 5 per Cents., 106 to 106½; and 5½ per Cents., 4 per Cents., 1104 to 1114.

Quotations for Bullion.—Gold—Bar gold, 77s 9\frac{1}{2}d per os std; ditto fine, 77s 9d to 77s 10\frac{1}{2}d per oz std; ditto refinable, 77s 11\frac{1}{2}d per oz std; Spanish doubloons, 75s to 76s per oz; South American doubloons, 73s 9d to 74s per oz. Silver—Bar silver, fine, 5s 0\frac{2}{3}d per oz std, mearest; ditto containing 5 grains gold, 5s 1d per oz std; fine cake silver, 5s 5\frac{1}{2}d per oz. Mexican dollars, 4s 11d per oz, quiet; five-franc pieces, 4s 11\frac{2}{3}d per oz. Quicksilver, 6l 17s per bottle; discount, 3 per cent.

Vice-Chancellor James yesterday afternoon, after a long argument, dismissed the application to wind up the European Assurance Company, with costs against the petitioners. In the case of the Albert the Vice-Chancellor appointed Messrs Price and Young official liquidators.

MAILS ARRIVED. LATEST DATES.

- LATEST DATES.

 On October 9, from India, Alexandera, &c., via Marseilles:—Calcutta, Sept. 10; Mairas, 9; Bombay, 14; Adea, 24; Suea, Oct. 1; Alexandria, 2.

 On October 21, from the Cars of Good Hope, per Briton:—D'Urban, Aug. 25; Fletermarlixburg, 25; Cape Town, Sept. 4; St Heleas, 14; Funchal, Oct. 3.

 On October 11, from Morfit America, per Scotia:—Boston, Sept. 20; Chicago, 27; New York, 30; Philadelphis, 29; San Francisco, 22; Hamilton, 28; Kingston, 29; Montreal, 28; Torondo, 28; Ottawa, 28; Borson, Cot. 1; New York, 29; Finladelphis, 29; San Francisco, 24; Viccoria, B.C., 15; Halliax, 28; Boston, Oct. 1; New York, 2; Philadelphis, 1.
 On October 15, from Sourh America, per La Placa:—Monte Video, Sept. 10; Babla, 21.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

FRIDAY NIGHT.

The arrivals of English wheat fresh up to this morning's market were limited, but the attendance of millers was small, and the trade ruled far from active. No change took place in the quotations. Foreign wheat sold slowly at the rates current on Monday last. Oats brought an advance of 6d per quarter, but other descriptions of spring corn were unaltered in value. Maize showed more firmness, but the flour trade was very inanimate. This week's imports of foreign and colonial produce into London have amounted to 32,570 quarters of wheat, 1,430 barley, 36,050 oats, 520 peas, 5,390 maize, 930 sacks and 2,590 barrels of flour.

The wheat trade at Wakefield to-day was at about stationary prices, but at Liverpool an advance of 1d to 2d per cental took place.

The Liverpool cotton market during the past week has been

place.
The Liverpool cotton market during the past week has been irregular, and only a limited amount of business has been done at declining rates. The total sales are 55,930 bales; of which the trade have taken 40,210 bales; speculators and exporters, 15,720 bales. The imports for the week are 22,083 bales; the actual exports, 15,741 bales; and to-day's stock is estimated at 425,424 bales. Quotations for American descriptions have receded \$\frac{1}{2}\$d to \$\frac{1}{2}\$d per lb; East Indian, \$\frac{1}{2}\$d to \$\frac{3}{4}\$d per lb since last Friday. To-day there has been a better demand resulting in sales to the extent of 12,000 bales, but prices remain unchanged. unchanged.

Stocks of grain, seed, and flour in London, on September 30 estimated by Mr George Dornbusch :-

At New York on the 14th current, middling Upland cotton was noted at 26½ cents. The annexed telegram is dated Bombay, ptember 28:—Cotton very dull. Fair Dhollerah, 295 rs; fair quoted at 26 cents.

September 28:—Cotton very dull. Fair Dhollerah, 295 rs; fair Oomrawuttee, 300rs.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, September 14:—There have been no transactions in cotton since the issue of our last report, but prices are nominally lower both for ready cotton and for future delivery of new crop. The duller accounts lately to hand from the Liverpool market, ccupled with the prospect now held out of a fuller wield of American than was at one time expected, will dowbless pool market, ecupled with the prospect now held out of a fuller yield of American than was at one time expected, will doubtless shake the confidence in high prices which most of our dealers have hitherto entertained, and we may look for still lower prices as arrivals from the districts increase. In new crop for future delivery we do not hear of any business. In Hingunghaut the last price quoted was equal to 355 rs per caudy laid down here in December for new cotton. In Oomrawuttee districts there are no buyers, while here on the spot sellers offer to contract for delivery new Oomrawuttee in March next at 310 rs per candy. Crop prospects from all quarters continue favourable.

Export of Cotton from Bommar to Sept. 13.

removals constwise, 786,368 lbs. In sugar there has been little doing, low qualities having continued depressed in value. Coffee has sold at fully late rates, but the demand for white Bengal rice has ruled less active.

The annexed is dated Rangoon, August 28:—The supplies of all kinds of rice have been very limited, but there being hardly any demand for the article, prices remained unaltered as last quoted till the end of last week. By that time some natives entered the market to purchase beforehand for Madras vessels, which always visit our port in the latter part of the year. Our part of the year, and its latter part of the year. market consequently assumed a firmer tone, and prices are a little higher to-day. We quote 149 rs to 151 rs, per 100 baskets, for Natsain rice, ready for shipment, i.e., inclusive of godowarent, brokerage, and loss in winnowing and sifting, and 130 rs to 138 rs for other qualities, all per basket of 68 lbs. Exports to Europe from 1st January up to date amount to 160,315 tons.

STATEMENT of RICE AFLOAT from all Ports of Europe on 1st Oct., 1869, and 1st Oct., 1868.

Mr Helmuth Schwartze thus refers to the state of the wool trade:—The 4th series of Liverpool sales of East India wool has been fixed to commence on Tuesday, the 26th inst. The arrivals up to date comprise about 21,000 bales, but a few thousand bales. up to date comprise about 21,000 bales, but a few thousand bales more are expected to come in in time, so as to make the probable total for disposal about 24,000 bales. Sales of miscellaneous wools are to follow as usual, out neither date nor particulars are known as yet. For the last series of London colonial wool sales the following quantities have arrived up to date:—Sydney, 20,179 bales; Port Philip, 4,742 bales; Van Diemen's Land, 282 bales; Adelaide, 743 bales; New Zealand, 4,874 bales; Swan Riyer, 4 bales; Cape, 33,039 bales—total, 63,863 bales. A further 27,000 bales may arrive in time, so that with the 30,000 bales held over the total will probably reach 120,000 bales. The market shows no change; a fair quantity of wool has been turned over at firm prices since the sales closed. The accounts from abroad, especially from France, are satisfactory. Stocks are moderate, and the wools bought in the last The accounts from abroad, especially from France, are satisfactory. Stocks are moderate, and the wools bought in the last series are said to pass rapidly into consumption. There seems little doubt but that we shall see a brisk foreign demand for combing descriptions in November. At home matters are in a less salisfactory state; business is dull, and manufacturers find difficulty in moving their goods. Still most of the mills run full time, and as the rate of consumption thus remains undiminished, the price of the raw material keeps up steadily.

Messrs A. C. Stewart and Co., of Port Elizabeth, have forwarded the following circular, dated Port Elizabeth, August 31:
Transactions in woot have been limited to a few parcels of snow whites, washed from late clips, which have fully maintained their value; in fact, good lots have realised a slight advance, the recent news from England of the position of the wool market being considered favourable. There have also been some odd lots of other descriptions he'd over from the beginning of the season. The following vessels have cleared:—For London—Comet, 1,219 bales of wool; s.s. Briton, 842 bales. For Falmouth, for orders don on 1,488,958 lbs; the exports were 827,822 lbs; and the

The annexed is dated New York, October 1:—The past week will be remarkable as the period of a panic, which has had no equal since the crisis of 1857, and which has been less disastrous than that in its results only because of the peculiarities of our present banking and currency systems, and of the generally healthy condition of affairs outside of Wall street. The wild transactions in the Gold Room on Friday last resulted in disputes, or as some existence are present to the condition when contracts the condition of affairs outside of Wall street. The wild transactions in the Gold Room on Friday last resulted in disputes, or as some maintain repudiation upon contracts for very large amounts; the result of which was to cause the failure of several prominent members in the Gold Room, and to embarrass the clearing of the whole immense transactions of the day. This confusion is the Gold Exchange, with its attendant failures, and its possibilities of still more serious failures, including the leading speculative house in the street, produced a general derangement in the money and stock markets, which developed into a condition of panic more serious than anything experienced since 1857. The panic appeared to have culminated on Wednesday afternoon. Yesterday and to-day large orders came in from the country, and from city merchants and capitalists, to buy stocks at the heavy decline, and this influx of outside capital has produced a remarkably quick recovery of confidence and of values; and at the close of the week the wrecks are forgotten, and the markets are comparatively buoyant. The rates for money have ranged very high; on Governments the rate was 7 per cent. in gold to ‡ per cent. per day, and on stocks from ‡ to 1 per cent. per day on the lower-priced shares, up to 1½ to 4 per cent. per day on the lower-priced shares, up to 1½ to 4 per cent. per day on New York Central. In discounts there has been literally no business; ocansional transactions in prime paper have been reported at 12 per cent. Next week the merchants' wants are likely to receive more consideration. Business in dry goods has been checked, especially foreign goods, which are so materially affected by the price of gold; but with the first appearance of calm purchasers have resumed operations, and a fair degree of activity is again appearent. Prices continue to be firm, and agents have refused to yield at all on standard cotton goods, claiming that they are still not above the cost of manufacture, with cotton at 27½ to 28½ oper lb. Without a materia expectations.

THE COTTON TRADE.

LIVERPOOL .- Oct. 14.

The cotton market has been duil throughout the week, though the sales have daily been to a fair extent. Since Tuesday, with increased pressure to sell, prices have been very irregular, and close with a decline in all descriptions. The medium grades of Sea Island continue in limited demand, and being pressed for American has given way about \$\frac{1}{4}\$d per lb in the better qualities, which are freely supplied out of the recent import; the lower descriptions remain without material change. New York advices to the 14th instant quote middling 20\frac{1}{2}c, costing to sell in Liverpool 12d per lb, by steamer. Brazil continues heavy of sale, at a decline varying from \$\frac{1}{2}d\$d per lb. Egyptian has been only in moderate request, and prices are about \$\frac{1}{2}d\$ per lb lower. The sales in East India have been large, but much irregularity has prevailed, the quotations being reduced generally about \$\frac{1}{2}d\$ per lb. sale prices have declined 2d per lb during the past three weeks.

The transactions "to arrive" are considerable, but prices show a continued decline. The latest quotations are:—American, basis of middling, from New York, November-December shipment, 114d; Savannab, ship named, 11 7-16d; Mobile, ship named, 11 3; i; any port, December-January shipment, 11 4; low middling, Texas, October shipment, 11 5-16d; any port, November-December shipment, 11 1-16d; Bengal, fair new merchants, ship named, 7 2d per lb.

The sales of the week including forwards.

The sales of the week, including forwarded, amount to 55,930 bales, of which 8,130 are on speculation, and 7,590 declared for export, leaving 40,210 bales to the trade.

OCTOBER 15.—The sales to-day will probably amount to about 12,000 bales, with a steady market.

NEW YORK .- OCTOBER 1.

By special telegrams received by us to-night from each of the countern ports, we are in possession of the returns showing the secipts, exports, &c., of cotton for the week ending this evening, let. 1. From the figures thus obtained it appears that the stal receipts for the seven days have reached 56,386 bales, Oct. 1. From the figures thus obtained is appears than total receipts for the seven days have reached 56,386 bales, against 49,219 bales last week, 26,799 bales the previous week, and 12,351 bales three weeks since, making the aggregate since Sept. 1, 1869, up to this date, 146,372 bales, against 96,344 bales for the same period in 1868, being an increase this season over last season of 50,028 bales. The exports for the week ending this evening reach a total of 8,783 bales, of which 6,896 bales were to Great Britain and 1,887 bales to the continent, while the stocks at all the ports, as made up this evening, are now 92,477 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us by our own correspondents at the various ports to-night: the various ports to-night:

	Expor	ted to	Total		Stock.		
Week ending Oct. 1.	Great Britain.	Conti- nent.	this week.	Same week 1868.	1869.	1868.	
New Orleans Mobile Charleston Savannah Team New York All other ports	65 6481 350	1232	1297 7186 350	7236 485 2280	37558 14220 5457 16175 4258 10222 5555	37370 12473 2793 5974 2256 7832 7000	
Total	6896	1887	8783	10001	92477	75698	

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 1,218 bales, while the stocks to-night are 16,779 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports since September 1, according to the latest mail returns. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:

The market during the past week has continued dull and heavy, declining almost daily, and closing to-night a little firmer, but 14c off from last Friday. Many circumstances have conspired to produce the depression of the past few days: the large receipts at the ports have discouraged speculation; the pressure for money and the disturbed feeling arising out of the panic in gold and stocks caused many holders to force their cotton on the market; foreign accounts also have been unfavourable, while the difficulty of negotiating foreign exchange has been a great impediment to the operations of shippers. To-day, however, with sterling exchange more saleable, there has been a better feeling, and it is To-day, however, with sterling exthought that the indications point to a more stable and active market for the coming week. On Saturday and Monday last there was only very little cotton on the spot offering, but the demand was very limited and the close on the latter day wa weak. Tuesday and Wednesday the arrivals were very large, and with no demand except from spinners, and their purchases being confined to supplying their more pressing wants there was a decline of \(\frac{1}{2} \) on each day except on middling, which declined Tuesday \(\frac{1}{2} \) cand Wednesday \(\frac{1}{2} \) c. Thur-day prices further gave way—middling \(\frac{1}{2} \) o. O \(\frac{1}{2} \), and all other grades \(\frac{1}{2} \). To-day there is no change in quotations. For forward delivery there has been less doing, and prices were in buy-rs' favour. The total sales of this description reach 3,400 b·le· (all low middling, or on the basis of low middling, except as hereafter noted), of which 850 bales were for September, 100 bales on private terms, 200 bales (a settlement) at 27\(\frac{1}{2} \) c, 50 bales at 27\(\frac{1}{4} \) c, 100 bales at 27\(\frac{1}{4} \) c, 200 bales at 28\(\frac{1}{4} \), 100 bales at 27\(\frac{1}{2} \) c, 200 bales for October, 800 bales on private terms, 200 bales at 25\(\frac{1}{4} \), 100 bales at 25\(\frac{1}{4} \), 100 bales at 26\(\frac{1}{4} \), 200 bales for October, 800 bales on private terms, 200 bales at 26\(\frac{1}{4} \), 200 bales for October. November, and December (50 bales are nonth) at 25\(\frac{1}{4} \), 650 bales to October 15\(\text{th} \) at 26\(\frac{1}{4} \), 200 bales on private terms, and 250 bales at 25\(\frac{1}{4} \). The total sales for immediate delivery this week for up 10.623 bales (including 2,146 bales to arrive), of which 7,424 bales were taken by spinners, 1,732 bales on speculation, 1,382 bales for export, 85 bales in transit, and the following are the closing quotations: confined to supplying their more pressing wants there was a

The Crop.—Incre appears to be a general disposition to give rather lower estimates of the crop than were current a few weeks since. The picking has progressed very favourably, but the continued drought has so long prevented any new development of the top crop throughout the Atlantic States that little hope is entertained of realising much from it in those districts this season. Still, the lower and middle or main crop have been excellent, and the weather, as a general thing, very favourable for securing the cotton. Estimates of the total yield, however, are, as we stated above, less than a few weeks since, and range from 250,000 to 500,000 bales increase over last year; the Agricultural Bureau puts the total down at 2,750,000 bales. At the present monent we are unable to give an opinion with regard to any of these figures, except to state that it does not look now as if the highest estimates were likely to be realised. That the yield will be, as we have all along stated, in excess of the past year, is, we think, beyond doubt, but it is too early to give exact figures as to the result.

The exports of cotton this week from New York show an increase from last week, the total reaching 6,558 bales, against 2,037 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1869; and in the last column the total for the same period of the

MARKETS IN THE MANUFACTURING DISTRICTS.

The accounts from the manufacturing districts are scarcely as favourable as they have been for some time past. Business generally has been of a retail character, and the continuance of warm weather has greatly checked the demand for winter goods. The demand for cetton manufactures has continued quiet, owing to the uncertainty that attends the course of prices, and very few parcels have changed hands. Prices are without important change. The coal trade has been more active, and iron has ruled steady in value. steady in value.

MANCHESTER, Oct. 14.—There has been a slight increase in the demand for goods and yarns, and the orders placed have been at the lowest prices yet taken. These have been rather irregular, and depended a good deal on the position of the sellers, some pre-erring to sell at the best possible price, others to hold, and some gain to stop this production rather than take the ruinous prices effering. The demand is not keeping pace with even the limited production, as the position of cotton points to lower prices ere long, and buyers keep aloof, having no confidence in the present values. The market closes depressed with little doing, and prices tending further in favour of buyers.

COMPARATIVE STATEMENT OF THE COTTON TRADE. MANCHESTER, Oct. 14.—There has been a slight increase in the

BEADFORD .- The tone of the wool market is hopeful, and the BRADFORD.—The tone of the wool market is hopeful, and the immediate prospect is regarded as encouraging. There has been rather more inquiry in lustre and demi-lustre wools, and, if anything, a slight increase in the number of the transactions. Middle and inferior sorts are still slow of sale. Quotations are generally well maintained, although in some cases, especially in middle and inferior sorts, the buyer has a slight advantage. In worsted yarns there is still great languor. The transactions are small, and supply current and urgent requirements. There is an entire absence of speculation. There is no indication of improvement in the piece trade. Manufacturers are generally well employed in the production of fancy goods for the spring trade. Prices are tolerably

duction of fancy goods for the spring trade. Frices are tolerably firm.

Leeds.—There has been a somewhat limited attendance of buyers, and no disposition was shown to purchase more than small selections of goods. Though the markets were quiet throughout, prices were without change, and generally they are firm for all classes of new goods. The local wool trade keeps very quiet, manufacturers buying very cautiously, yet prices do not give way. The flax trade keeps in much the same quiet condition which we have for a considerable time had to report.

Dunder.—There has lately been some inquiry for the better

condition which we have for a considerable time had to report. Dunner.—There has lately been some inquiry for the better kinds of flax on the spot, and some transactions have taken place at about previous rates. In common qualities there is very little doing, although, to effect sales, holders would willingly submit to some abarement on the rates they have hitherto required. The yarn market is very dull. Flax yarns are particularly inactive, and there is also less animation in the demand for tow kinds; prices are, consequently, somewhat irregular, as holders do not hesistate to submit to some abatement in order to secure buyers. The demand for linens continues weak, and there are general complaints of the limited and unremunerative state of the trade. In jute goods there is a large business doing, but with present prices of jute, there is little profit to those engaged in the trade. Glasgow.—The iron market is quiet. No. 1, 53s to 53s 3d; warrants, 53s to 53s 1½d; No. 3, 52s to 52s 3d.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS,

New York, Oct. 1.—The market for breadstuffs during the past week has been dull, and prices of most of the leading staples have declined. A break in the Erie canal has interrupted supplies of grain. Flour has arrived only moderately, and stocks are not large; but the panic in gold and stocks, and the floancial embarasements arising therefrom, have caused some large lines to be forced upon the market; and this process has resulted, especially rassments arising therefrom, have caused some large lines to be forced upon the market; and this process has resulted, especially in medium grades, for which there is no shipping demand, in very lew prices, but these should not be quoted as representing the general market. The low grades have been in a good demand for coastwise shipment, as well as the local trade; while latterly Engli-h shippers have been doing something. Ali grades at \$6.50 and under have a quick sale, while above that figure sellers must await customers. Wheat shows a decline of 50 per bushel on leading qualities. Some of the new crop of spring wheat has been received by rail, and graded No. 3 sold at \$1.30 per 60 lbs. The quality was quite poor. Prime old No. 2 sold yesterday at \$1.45, but the great business of the week has been in red and amber winter, at \$1.32½ to \$1.35 for soft Illinois red; \$1.42 to \$1.48 for prime ditto, closing steady at the lower figure. The receipts of spring wheat now begin to be liberal at both Chicago and Milwaukee, but the heavy storms of rain which have visited that section of the country have injured the condition of the wheat (besides destroying large quantities), and much of the fresh receipts are soft, damp, or grown, and it is likely to be very uncertain property to handle. Corn has been in good demand, but with a free movement to the seaboard, and nothing but a home demand; prices have declined. Oats have been active and firm. Barley has sold moderately at \$1.30 for State, and \$1.50 for Canada West. Barley malt is firm. Canada peas remain entirely nominal.

LONDON MARKETS.

STATE OF THE CORN TRADE DURING THE WEEK.

MARK LANE, FRIDAY EVENING.

The corn trade has continued in a very depressed state throughout the week, but as we write a firmer tome prevails. The supply of new English wheat on sale at Mark lane has been limited, but more than equal to the very restricted demands of millers, who have operated with extreme caution. Prices show a further decline of 1s to 3s per quarter on the week. It is difficult to be-

lieve that the quotations have not now seen their lowest point, and it appears more than probable that, after so considerable and so continuous a decline, a reaction will take place. At the same time our imports have been very extensive and largely in excess of last year, and, as the quantity of wheat now on passage shows a heavy increase when compared with 186s, our receipts of foreign produce will continue to be extensive for some time to come. It is worthy of remark, however, that shipments to England are not now being actively pursued in any quarter, and the stocks in millers' hands are not large. Threshing is being proceeded with to a fair extent, but farmers do not show any disposition to force sales.

Oats have recovered in a slight degree from the recent heavy Oats have recovered in a slight degree from the recent heavy depression, owing to the falling off in the supply of foreign descriptions, and to-day a reaction of 61 per quarter took place in the quotations. Malting barley has ruled firm, but grinding qualities and feeding stuffs generally have tended downwards. Town-made flour is altogether nominal in price, while country and foreign sorts have given way 1s per sack. The continental markets have been dull, and very little has been doing in shipments to England. In America exports have been suspended in consequence of the violent fluctuations that have taken place in the New York gold market.

consequence of the violent fluctuations that have taken place in the New York gold market.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—Since last Friday the arrivals at ports of call have amounted to 90 cargoes, viz.—37 wheat, 36 maize, 5 barley, 3 rye, 1 milletseed, 1 beans, 5 linseed, 2 cotton-seed. The floating grain trade has been dull and inactive. Wheat—The quantity offering has been in excess of the limited demand. Fine sorts have been maintained in value, while inferior are 1s to 1s 6d cheaper on the week. To-day the market closed with an upward tendency. Maize has declined in value during the last few days 3d to 6d. Barley has continued slow to sell at about last week's prices. Rye dull, and 2s to 3s cheaper. The reported sales are as follows:—Wheat—22 arrived cargoes: Marianopoli, 45s to 45s 6d; Berdianski, 47s; Don Ghirka Taganroz, 43s to 45s; New Coast Ghirka, 45s to 46s; Sarat of Ghirka, 45s 6d; hard Taganroz, 43s; Yeisk, 42s 6d to 43s 6d per 492 lbs; Polish, 46s; Mersyna, 40s; Saide, 37s 9d per 480 lbs; a cargo Ghirka Odessa, October-November shipment, 48s 6d per 492 lbs (sold last week). Msize—20 arrived cargoes: Ode-sa, 29s 6d to 30s; Moldavian, 30s per 492 lbs; Kachova, 28s; Bulgarian, 27s to 29s 3d; Wallachian, 28s 6d to 30s; Dunubian, 28s to 29s 3d per 480 lbs. Barley—1 arrived cargoes: Taganroz, 24s 6d per 400 lbs. Rye—3 arrived cargoes: Taganroz, 31s 9d to 32s and 32s 6d per 480 lbs. Linseed dul, and prices 6d lower. 3 eargoes Taganrog, off the coast, sold at 57s 6d and 58s per 424 lbs, A.T. Calcutta, arrived, at 62s. Rapeseed rather more inquired after at reduced rates. 50 tons ordinary brown, arrived in London, 60s 3d; 300 tons (2 lots) yellow mixed, on passage, 67s 6d and 68s; 50 tons Tora ditto, 63s 3d; 100 tons Tora, July to October shipment, 63s 3d per 416 lbs, A.T.; 200 tons ordinary Calcutta sold to-day at 60s and 59s 6d. Cotton-seed very dull and prices tending downwards. 300 to 400 tons Egyptian, Dec. shipment, 9t per ton. shipment, 91 per ton.

The London averages announced this day are :-

COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE " POSISCRIFT".

MINGING LANE, FRIDAY MOUNING.

MINGING LANE, FRIDAY MOUNING.

SUGAR.—All low qualities have been inactive, with sales at easier rates. The general tone of the market is also flat, and the refiners have taken very moderate supplies of West India, the sales yesterday reaching only 684 casks, including Barbadoes by auction. Soft yellow, 34s to 38s 6d; grainy, 41s 6d per cwt; Porto Rico, Havana, &c., are dull of sale. Business has been done in low Jaggery Madras under the previous quotation. The deliveries are steady. Stocks of Manila, Madras, and other low descriptions are much larger than at the same date last year. Owing to diminished imports of West India the stock is unusually light.

Mauritius.—2.848 bars in the public sales chiefly met—ith huvers.

Mauritius.—2,843 bags in the public sales chiefly met with buy, rown, 30s to 33s 6d; grey and yellow, 34s to 37s; grainy, 38s 6d to ar cwt.

Bengal.—449 bags partly sold: soft brown, 26s 6d to 28s; Gurpatta, middling yellow, 36s 6d.

Jaggery.—Business has been done privately at 26s.

Penang .- 1,500 baskets sold at 26s.

Manila,-Business done in unclayed, part at 27s to 27s 6d.

Other Foreign.—2,081 boxes Havana were taken in, and a part since sold at 38s to 40s per cwt. A floating cargo has been disposed of for the United Kingdom, No. 11½, at 28s 6d; one of Cuba at 25s 9d; one at 28s 6d nearest 26s 6d per cwt.

Refined.—The market has been flat, and prices are quoted the same as on Friday last.

MOLASSES.—A few parcels of West India have sold at 16s to 17s for St Kitts and Antigua.

Rum.—A sale of Mauritius is reported at or about 2s per gallon proof, being lower. West India is dull, and the business chiefly restricted to Jamaica.

Cocoa.—The market is quiet. 75 bags Trinidad sold at last week's quotations; 260 bags Gnayaquil were bought in at 56s; business has been done privately at 57s, and in Caraccas at 75s per cwt.

Tea.—Further arrivals of new season's tea have increased the supply, and the qualities continue generally poor. Congous of desirable flavour or really fine quality are taken at full prices, while other grades sell alowly. The market may be quoted very dull. The Indian sales comprised 3,466 packages, which went off flatly; common kinds, including broken leaf, were rather lower.

COFFEE.-The total supplies, although liberal, have not been so large COFFEE.—The total supplies, although liberal, have not been so large as in the previous week, and the demand is less animated. 1,920 casks 1,038 barrels and bags plantation Ceylon went at easier rates, and chiefly sold. Coloury kinds sold at 68s to 76s; good to fine and bold, 77s to 85s 6d; grey, 62s to 67s, up to 73s for bold. Of 1,945 bags native a portion sold at 53s to 58s 6d for real good ordinary to bold. Ordinary sorts can only be disposed of upon reduced terms. 511 cases 2,185 bags East India chiefly sold at last week's quotations: grey, 60s to 72s; colour£, small to good midding, 68s to 78s 6d. Native Cochin bought in at 55s. 103 bales Mocha withdrawn. 1,573 bags Guatemala were chiefly sold at 52s to 59s. 2,924 bags Costa Rica found buyers at easier rates: pale to middling, 53s to 63s. 369 bags washed Rio bought in. 826 bags Singapore sold at 52s to 59s 6d. 12 casks 192 barrels and bags Jamaica at 50s to 61s per cwt. A continuance of heavy landings has increased the stock to 28,050 tons, being larger than at any former date, but the export clearances are still extensive.

Rice.—There has been less inquiry. White Bengal maintains the

RICE.—There has been less inquiry. White Bengal maintains the late advance. A few sales reported at 10s to 14s for low middling to fine. 2,407 bags by auction were taken in above the value; broken seld at 9s to 9s 6d; 1,852 bags Rangoon withdrawn at 10s; 5,395 mats Siam, part sold at 8s 6d; 573 bags Saigon sold at 9a; 1,258 bags Necrancie Arracan, of common quality, 8s to 8s 6d per cwt.

Sago.—1,009 bags good small pearl part sold at 18s to 18s 6d. 229 boxes chiefly damaged; sound realised 19s for similar quality. 300 bags Singapore sago flour sold at 13s 6d to 14s per cwt.

Pearl Tapioca.—489 bags 109 boxes part sold at 22s 6d to 27s.
Tapioca.—1,202 bags Penang and Singapore part sold at 2½d to 2½d per lb.

per lb.

SPICES.—The market for black pepper is quiet. At yesterday's sales 2,865 bags Penang were chiefly Trang sorrs, and these partly sold at easier rates, from 4.1 to 44d. 418 bags Siam were bought in. 1,092 bags Singapore white partly met with buyers at former rates, from 5 d to 6d, a few lots 5 d. 42 cases Penang brown nutmegs were chiefly taken in. A few lots sold, 83 and 79 to the pound, 2s 6d to 2s 8d; 112, 1s 9d. There is very little demand. 23 cases Penang mace were bought in at 3s 4d to 3s 10d. Business has been done in Penang cloves at 11d to 11 d. 77 bags Pimento sold at 24d to 24d 426 bags cinnamon chips part sold at 8 d. Bark, 4 d to 4 d per lb. 55 barrels Jamaica ginger part sold at 37s to 53s. 54 cases Cochin at 43s to 59s. 1,639 bags Bengal withdrawn. 210 bags African bought in at 25s per cwt.

Saltperree.—The market has been inactive. A few parcels of Bengal

SALTPETER.—The market has been inactive. A few parcels of Bengal have sold, refraction 8½ to 7½, 21s 9d to 21s 10½d; 5½ to 5, 22s cash. The stock is still moderate, with steady deliveries.

PR W be fit A J. G

M T

quality, in boxes, has sold at 24s to 24s 6d. Gambier is without alteration, and the demand slack. At auction Cubes partly sold at 20s 8d. Bengal turneric was taken in at 20s 8d to 21s per cwt, the market being dull. Shellac.—424 chests partly sold, including good orange at 85s to 85s 6d per cwt, being about previous rates.

METALS.—The markets are generally inactive, and the business has been of rather limited extent since last Friday. Copper remains dull. Chili bars quoted 66l to 67l, and British nominally unaltered. The iron trade has not presented any new features. Large orders are being executed in railway bars. Other kinds without change. There has been a panic in the market for foreign tin. Straits quoted 125l; Banca is lower and unsettled by the rise in the Bank rate in Holland; quotation about the same as Straits. Spelter dull. Common plates about 20l per ton. Sales of lead have recently been made rather under the quoted prices. Scotch pig iron steady at 55s 3d per ton, cash.

HEMP.—Russian continues quiet. A further advance paid for Manila at which there are still buyers. Good roping has sold at 59l to 62l, and to arrive 56l to 59l per ton. Stocks keep low.

JUTE.—The market is steady. 2,548 bales by auction sold rather higher prices, from 17l to 23l for middling to fine, and 15l to 15l 10s per ton for common quality. A moderate business by private contract, chiefly in the fine qualities.

LINSEED.—There has not been much business done. Calcutta quiet. A few cargoes of Black Sea, off the coast, have sold at 57s 6d to 58s per quarter.

OHS.—Olive.—No sales reported in Olive, and the quotations are

quarter.
OHS.—Olive.—No sales reported in Olive, and the quotations are quite nominal. Sperm inactive at 93/ per tun. Palm quiet, but fine is held firmly at 43/. Cocoa-nut has sold rather slowly. Cochin, 42/ 10s to 43/ 10s. Ceylon, 41/ 10s. Large supplies are expected. Rape oil meets a limited demand. English brown, 38/ 15s to 39/ 10s now and to the end of the year; retined, 41/; foreign, 43/ 10s to 44/. Linseed oil was lower at one period, viz., 29/, but since improved to 29/ 10s and

was lower at one period, viz., 234, but since improved to 291 10s and 301 10s per ton for forward delivery.

PETROLEUM.—Large contracts have been made in American refined at 1s 7\frac{1}{3}\tau to 1s 8\tau, and now 1s 8\frac{1}{3}\tau degree period demanded.

TALLOW.—Foreign has been inactive, but is now rather more in demand. Prices show a decline on those of last Friday. Petersburg new, on the spot, 47s 3d to 47s 6d; for delivery to March next, about the auren.

POSTSCRIPT. FRIDAY NIGHT. POSTSCRIPT. FRIDAY NAME.

SUGAR.—The market is quiet. West India met with slightly more inquiry from the refiners. 1,004 casks sold to-day (including Barbadoes) by auction at previous quotations, making 1,688 casks for the week. 1,493 bags Natal part sold on former terms. 217 tierces Guadaloupe sold at 33s to 37s. 4,000 bags clayed Manila are reported at 30s per cwt. 754 bags low brown Penang were withdrawn.

COFFEE.—94 casks 349 cases 672 bags East India sold at steady prices. Of 1,515 casks 125 barrels 193 bags plantation Ceylon a considerable part sold at the recent decline, and towards the close the demand rather improved. 523 bags washed Rio part sold at 50s to 74s 6d per cwt.

-400 bags Bengal, refraction 4 to 41, sold at 22s per c

SAFFLOWER .- 34 lbs Bengal sold at 12/ 2s 6d to 13/ 17s 6d for good to fine.

SHELLAC .- 394 chests partly sold, including fine orange, at 95s

per cwt.

CUTCH.—By auction fine in boxes part sold 24s to 24s 6d per cwt.

OLLS.—820 casks cocca-nut sold: Sydney, &c., 34s to 41s per cwt.

70 tuns sperm were taken in at 92/10s to 93/10s per tun.

TALLOW.—1,010 casks Australian by auction part sold, and at 6d to 1s decline: besf, 40s to 46s; fine sheep, 46s to 47s per cwt.

Town reduced to 48s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market continues dull, with little doing. Dutch crushed is lower, without transactions to note.

GREEN FRUIT.—The market has been of a lively character. The demand for Almeria grapes continues, and those of sound condition and good quality are freely taken by the trade. Some parcels sold by Keeling and Hunt sustained the price obtained of late. Lemons of all description are scarce, and prices higher. The sale of black Spanish nuts is moderate, and Barcelona have improved in value. Further arrivals of Azores autumn oranges have been received via Lisbon, and realised better prices.

COLONIAL WOOL.—Prices firm, with some inquiry.

FLAX.—Market quiet.

HEMP.—Market for Russian very dull. Manila has been much excited during the week, and the stock is now very small.

SILK.—Market very flat and prices weaker; some sales in Chim. silk have been made at a slight reduction. Tone of the market depressed.

China silk have been made at a slight reduction. Tone of the market depressed.

SEEDS.—The seed trade has ruled steady throughout the week, but the demand is not brisk for the season of the year.

TOBACC..—There has been considerable activity in American tobacco during the last few days, and considering the smallness of the stock a large business has been done; holders now feel disinclined to make the least concession. Advices from the States report firm markets, with an opinion that prices must be higher. In other growths there has been a fair business done.

LEATHER AND HIDES.—During the past week there has not been much animation in the demand for leather. At Leadenhall, on Tuesday, there

was a fair supply of fresh goods, but the transactions were limited in extent at about late prices. Heavy and light dressing hides, English and foreign bellies, and prime light calfskins are the articles the most is

METROPOLITAN CATTLE MARKET.

Mondar, Oct. 11.—The total imports of foreign stock into London last week amounted to 10,491 head. In the corresponding period in 1868 we received 7,924; in 1867, 12,556; in 1866, 12,253; and in 1865, 21,665 head.

At the cattle market this morning a quiet feeling pervaded the demand for all kinds of stock; nevertheless, owing to the shortness of the supplies, prices were well maintained. The show of English beasts was only moderate, and although a few prime breeds were on sale the general quality of the stock was but middling. The trade was firm, and a few Aberdeen beasts and West Highlanders sold at 5s 2d to 5s 4d. The best shorthorns, however, could not make more than 4s 10d to 5s per 8 hs. Owing to the absence of foreign breeds, the market was scantily supplied with sheep, and to this circumstance must be attributed the firmness in the quotations, as the demand was by no means active. The best Downs and half-breds sold at 5s 4d to 5s 6d per 8 lbs. Calves were in short supply and moderate request at late rates. For pigs there was a fair inquiry, at previous quotations.

HOP MARKET.

FRIDAY, Oct. 15.—A fair supply of new hops has come to hand. Fine samples has continued scarce and dear, with a good demand. Other descriptions, although in but moderate request, have been firm in value. New Mid and East Kents, 5l 10s to 7l 10s; New Weald of Kents, 4l 10s to 6l 15s; New Sussex, 4l 4s to 5l 5s; New Farnhams, 5l 10s to 7l 10s; New Country, 5l 0s to 7l 5s; Yearlings, 2l 0s to 8l 3s.

POTATO MARKETS.

FRIDAY, Oct. 15.—The markets are fairly supplied with potatos. The trade is quiet, at about late rates. English Shaws, 65s to 75s; Regents, 70s to 95s; French, 60s to 65s per ton.

PROVISIONS.

PROVISIONS.

We have no alteration in prime bacon; seconds may be quoted is easier. A short supply of Friesland butter sent the price up 4s fine quality making 134s. American cheese a good sale, at an advance of 2s. Lard firm at old prices.

LIVERPOOL MARKETS.

WOOL

FRIDAY, Oct. 15.—Only a moderate amount of business has been done this week at current rates. Public sales of East India wools have been arranged to commence here on the 26th inst., when about 24,000 bales are expected to be brought forward. this

CORN.

FRIDAY, Oct. 15.—Good attendance. Wheat in consumptive demand at dto 2d per cental advance. Flour the turn dearer. Beans is and maize 6d per quarter lower.

Wakefield, Friday, Oct. 15.—We have a good attendance. More doing in wheat without any alteration in prices. Fine barley same as last weak.

last week.

EPITOME OF RAILWAY NEWS.

The Fractic Recursts.—The traffic receipts of railways in the United Kingdom for the week ending Oct. 3 amounted, on 13,564 miles, to 868,5404, and for the corresponding week of last year, on 13,398 miles, to 839,3474, showing an increase of 166 miles and of 23,6934. The gross receipts on 14 of the principal railways amounted, for the week, on 9,895 miles, to 704,0324, showing an increase of 157 miles and of 22,9154. The total receipts for the week show an increase of 18,7294, as compared with those of the preceding week, ending the 26th September.

RAILWAY AND MINING SHARE MARKETS. LONDON.

MONDAY, Oct. 11.—In the share markets to-day transactions were very limited; the final official quotations, however, showed an average rise of \(\frac{1}{2}\). The changes recorded in the official list were:—In railways, an advance of \(\frac{1}{2}\) each in Caledonian and South-Eastern (Deferred), \(\frac{1}{2}\) each in ditto (Ordinary), London and Brighton, London and North-Western and Great Western, and 1 in ditto (West Midland—Oxford), and a fall of \(\frac{1}{2}\) in Manchester and Sheffield. In mines, banks, and telegraphs, Devon Great Consols were 10 lower, Agra (B) \(\frac{1}{2}\) better, Anglo-Egyptian Banking \(\frac{1}{2}\), and Anglo-American \(\frac{1}{2}\); Societe Transatlantique Française relapsed \(\frac{1}{2}\).

Française relapsed 1.

Tumbax, Oct. 12.—The share markets to-day were dull throughout, and the closing quotations showed an average fall of 1. The changes officially recorded were:—A relapse of 2 each in Caledonian and London and Brighton, a decline of 2 in Great Northern (A), and 3 in North British, and an improvement of 4 in North British, and an improvement of 5 in North-Eastern (Loeds). In colonial, a fall of 2 each in Grand Trunk of Canada and ditto (4th preference stock), and 1 in ditto (3rd preference stock), and an advance of 4 in Great Western of Canada. In mines and banks, East Greaville and Fortuna were each 2 better, Don Pedro and Imperial Ottoman 3 each, Oriental Bank Corporation 3 and Union of Australia 1; Anglo-Austrian and Provincial of Ireland were each 1 lower, Bank of British Columbia 3; and London Chartered of Australia 4. In telegraphs and miscollaneous, Anglo-American relapsed 3; Hudson's Bay were 1 lower, and India Rubber Telegraph Works 1; Ebbw Vale and National Steam Ship were each 4 better, Telegraph Construction 3, and Italian (6 per cent.) Tobacco Losn 1.

Tobacco Loan 1.

Wednesday, Oct. 18.—The share markets were very quiet to-day, and the closing quotations showed but few alterations:—Metropolitan commenced at 89½ to 90, declined to 88½ to 88½, and finally closed, after regular hours, at 88½ to 89, a fall of ½ as compared with the final official quotation of yesterday. The other changes recorded in the official list were:—A decline of ½ in Great Eastern, ½ in Great Northern, and a further ½ in Caledonian; a rise of ½ in Great Western, ½ each in London and North-Western and North-Eastern (Berwick), ½ in Midland, and 1 in ditte (Birmingham and Derby). In foreign, an improvement of ½ in Lomburdo-Venetian. In mines, banks, telegraphs, and miscellaneous, South Caradon were 35 lower, Chiverton ½ Herod's Foot, London Joint-Stock, and Lendon and Westminster ½ each, Anglo-Mediterranean ½, and British Indian ½; Electric and International were 1 better; Anglo-American recovered ½, and Hudson's Bay ½; Fore Street Warden use advanced ½, and International Financial and Thames and Mersey Marine Insurance declined ¾ and ‡ respectively.

Thursday, Oct. 14.—The transactions in the share market to-day

and Mersey Marine Insurance declined \(\frac{1}{2}\) and \(\frac{1}{2}\) respectively.

Thursday, Oct. 14.—The transactions in the share market to-day were chiefly on account of the fortnightly settlement to take place to-morrow. The changes efficially recorded were:—In railways, a recovery of \(\frac{1}{2}\) in Caledonian, a rise of \(\frac{1}{2}\) in Lancashire and Yorkshire, \(\frac{1}{2}\) each in Shropshire Union, North-Eastern (Berwick), and ditto (York), I each in ditto (Leeds, and Stockton and Darlington), and a further \(\frac{1}{2}\) in London and North-Western; a fall of \(\frac{1}{2}\) in East London, and a further \(\frac{1}{2}\) in Great Eastern. In colonial and foreign, a decline of \(\frac{1}{2}\) in Grand Trunk of Canada (1st preferance bonds), and a railpase of \(\frac{1}{2}\) in London and Angle-Austrian, and \(\frac{1}{2}\) in Bank of British Columbia, and a fall of \(\frac{1}{2}\) in Imperial Ottoman. In telegraphs and miscellaneous, Anglo-Moditerranean recovered \(\frac{1}{2}\), and British Inlian \(\frac{1}{2}\); Falmouth and Malta were \(\frac{1}{2}\) each, Imperial Continental Gas and South Australian Land I each, Italian Irrigation \(\frac{1}{2}\), and Telegraph Construction \(\frac{1}{2}\).

Famax, Oct. 15.—Railway shares were barely supported. Caledonian

Halina Irrigation 4, and Telegraph Construction 5.

Frinax, Oct. 15.—Railway shares were barely supported. Caledonian 4 lower, Metropolitan 4. South-Eastern 4. In American securities fire shares, after being steady, became very flut, showing a fall of 4. Eric, 227 to 23; Illinois, 937 to 944; United States Fire-Twenties, 812 to 82 ox div.; ditto 1865, 812 to 812 ex div.; ditto 1865, 812 to 813 ex div.; ditto 1865, 812 to 813 ex div.; ditto 1865, 824 to 837, ditto Ten-Forties, 753 to 764; Atlantic and Great Western Eight par Cents., 264 to 274; ditto Seven per Cents., 26 to 264.

AMSTERDAM INTERNATIONAL EXHIBITION, 1869.

THE GRAND DIPLOMA OF HONOUR, BEING THE FIRST PRIZE, AND SUPERIOR TO THE GOLD MEDAL, HAS BEEN AWARDED TO

LIEBIG COMPANY'S EXTRACT OF MEAT:

WHICH LIKEWISE CARRIED THE FIRST PRIZES AT THE

PARIS AND HAVRE EXHIBITIONS.

A single trial will at once convince the consumer of the great superiority in flavour, strength, and clearness, over all other Extracts of Meat, thus fully showing the correctness of the received high distinctions.

EVERY GENUINE JAR BEARS BARON LIEBIG'S SIGNATURE.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their heat work.

Paint from Grinders was a substantial of their best work.

Each Cask of Pure White Zine is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.
"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

PROVIDENT LIFE OFFICE.

No. 50 Regentatreet, London W.—Established 1806.
The Directors of the Provident Life Office feel it to be their duty at the present time to place before their pulley holders and the pull's such a statement of the affire of the office as shall be intelligible to every reader. They have therefore prepared tables in which are produced in detail the sums insured at each age by all their polic es now in existence, and the annual prenums proposed to the office. Those show an utlimate liability of 25,023, 19 6s 1d, and a present annual income, the a sets ralsed and invested account to £1,772,363 19s, poducing in like manner an annual income, the a sets ralsed and invested account to £1,772,363 19s, poducing in like manner an annual income in the shape of interes'.

So far this is a simple statement of an ordinary account to the shape of interes'.

So far the size of the statement of an ordinary account. The question now to its determined by an actuarial operation is how far will these assets and incomes serve to realise the five millions of liability. The answer is given—a surplus of £357,459 being shown as the result.

The soier n dec aration whole accompanies the original statement and the fact that the accounts are open to the critisism of the whole Society of Actuaries and of all the Managers of the Life Offices of the United Kingdom, must be held a sufficient proof of their correspondent of the Head Office of the Society, No. 50 Regent street, W.; or at the C ty Office, No. 14 Corobill, is.C.
