# EXPLANATION.

---

THE abbreviations used are in such general use as to require no explanation. At page 5 will be found the names of all railroads, canals, and navigable rivers. The figures at the left are used as indices in the Gazetteer.

The Gazetteer contains the names of all places on the line of railroad, canal, or river, (or lying adjacent thereto,) together with the county and state in which each is situated. The figures refer to that road on which the place is situated, (or which runs nearest,) which will be found opposite a corresponding number in the List of Railroads, etc. Places whose names are in Italics are not stations, but tributary to that station whose name appears in the last column, which also contains the names of agents at the places opposite to which they are set.

It will be borne in mind that, in order to save space, and avoid confusion, the Classification of the New York Central and New York & Erie railroads is taken as a basis, and variations therefrom alone are noted under the tariff of each road.

## PREFACE.

---

IN presenting this work to the public, my aim is not to gain a name, but money; nor do I wish to obtain the latter, except by rendering an equivalent therefor. Having been, for a number of years, engaged in the various departments of the transportation business, both by railroad and canal, and experiencing, in each, the great disadvantage of a lack of reliable information in regard to places, routes, and rates, I was led to inquire into the possibility of obtaining the desired knowledge, without resorting to the costly expedient of purchasing MAPS, GAZETTEERS, etc., and the further inconvenience of searching through an endless array of TARIFFS, for rates and classifications. Under these circumstances, the germ of the present work was produced in manuscript form, some two years since, for the selfish purpose of easing my own labors, in tracing lost and damaged property; but I found that my companions in labor—the tally-man, shipping-clerk, and bill-maker—made greater use of it than I; and this fact, together with the hope that it might be the means of lightening the labors of other “slaves of the pen,” has brought me before the commercial public, in my present position.

Embracing, as it does, all the information contained in a GAZETTEER, and being, also, a complete railroad, canal, and river guide, and furnish-

ing, at the same time, TARIFFS, CLASSIFICATIONS, RATES OF TOLL, its compilation has been no small task, nor has the expense been trifling; and I have not, therefore, hesitated to announce my motive to be a desire for money, well knowing that I must surely pay the PRINTER, if the public should ignore my work. And, if it shall be that any of my colaborers at the desk or in the warehouse is benefited by the result of my labors, they will not have been in vain; and to know that such, indeed, was the fact, would give me more gratification than gold.

I must not fail, however, to give to others all that is theirs, by right, to claim; and can not, therefore, take my leave, without acknowledging the valuable assistance rendered by most of the officers and agents with whom I have had occasion to correspond; as, also, to Appletons' Railway Guide, Colton's Atlas, and the Post-office List of D. D. T. Leech, Esq.

Throwing myself upon the clemency of the public, I take my leave, assuring them that all discrepancies and omissions of the present edition will be fully corrected in the next.
