The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

The last recorded frame on each microfiche shall contain the symbol  $\longrightarrow$  (meaning CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

The original copy was borrowed from, and filmed with, the kind consent of the following institution:

Library of the Public Archives of Canada

Maps or plates too large to be entirely included in one exposure are filmed beginning in the upper laft hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method: Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole —> signifie "A SUIVRE", le symbole V signifie "FIN".

L'exemplaire filmé fut reproduit grâce à la générosité de l'établissement prêteur suivant :

La bibliothèque des Archives publiques du Canada

Les cartes ou les planches trop grandes pour être reproduites en un seul cliché sont filmées à partir de l'angle supérieure gauche, de gauche à droite et de haut en bas, en prenant le nombre d'images nécessaire. Le diagramme suivant illustre la méthode :

# MR. CHAPLEAU'S REVIEW.

IN.

ile Discusses the Various Points in the Electoral Campaign.

THE TWO PARTY POLICIES.

What They Have Done and What They are Calculated to Accomplish in the Fature.

Speaking at the Chateau de Ramezay on Tuesday, Hon Mr. Chaptean said ;-

Let me first thank you for having come in such large numbers, from all parts of the district, to shim your fidelity to the old fing on the opening of the electoral campaign In finding myself among you as in 1887, as on many other occasions, I say to muss if that we are, as in the past, on the road that will not lead to defeat. Strong in yonr support, in your enthusiasm, I predict a victory, the colat of which will not be eclipsed by any in the giorions annals of our Six months ago the Opposition jourparty pals defied the Federal Government, say ing : Bring on your elections and you shall see how the people will condemn your administration of the affairs of the country. The Liberal Conservative party has always beld to the principle to yield to the wishes of the people and to picase even its adversaries, when this could be done. Nevertheless, if I am to judge by a declaration of Mr. Laprier, these journals could not have consulted their leaders when they provoked the Government to battle All the worse for If soldiers often suffer from the them. faults of their Generals, it is nothing but fair that these should hear the responsibility of their followers.

#### THE OPPOSITION COURSE.

resent general electrons, they have but remeives to blame For three years past ey have inturistedly devoted themselves the task-bappily an uncessive be task-bapply an ungrateful operator the task-bapply an ungrateful oper-to tate the country. They have poured out it arguments on the imsginary misfor-nee of our situation, which is satis-tory, when we consider it with impartial-line and for the state of the site of the site of the site in the site of Messra Laurier. Cartwright and Charlare fellow-warriors, condemning the tional policy and vaunting, at one time, mreatricted reciprocity " with the United tes, at another " commercial union," and ncluding their barangues with the preold only have to scratch the soil to see lions issue from it. In presence of these ciarations of the agitation into which they sh to plunge the country, was it not proper consult the people, to assure ourselves ether we should continue our policy, which, ten allogether, has proved so beneficent Ganada. This reason would have been licient, but a far more important one pre-its itself. The Federal Government be-Canada. ta itself. ves that it is consulting the wishes of the nerial authorities, and the desire of the Government, in addressing a erican mal invitation to the Government at shington to enter into negotiations with to establish a basis of a reciprocity treaty. these negotiations succeed it will be ne-

THEY HAVE NO DREAD OF CONTRADICTING THEM-

BRLVES

and correcting their judgments. Thanks to this versatility, truth at last is exposed. Thus, last week, we observed the avowai in La Patrie that Cartier, who was represented during his whole public career as a bired alove of England, was a great patriot This This leads me to hope that they will end by saying something good of the present leaders of the Conservative party-but only when we have disappeared it is the National Policy which has enabled us to construct these thousands of miles of railroad Without it, it would have been impossible for us to aid in their construction. It has also resulted in creating a prosperous national in-dustry; millions of doilars have been invested in manufactures ; the working classes, which during the Lineral regime, suffered, and thought of leaving the country, has never seen their labor so generously rewarded as it is to-day. The increase of wealth in as it is to-day. The increase of wealth in the cities has made itselt felt in the coupour farmers have sold much more to trv : the cities than in the past.

#### THE FARMER'S POSITION.

Undoubtedly there are some improvements to be made, but show me a single counin the world where the agricultural trv crisis bas not raged with greater severity than with ourselves. France, England, Germany, the United States, see a decaying agriculture It forms a unanimous source of complaint, In the United States agricul-urists, crushed by all sorts of burdens, hindered in the sale of their products by the railroad tariffs, have formed themselves into an alliance for the purpose of finding, by a united action the means of escaping from the crisis. They sought to deceive them by trying to make them believe that the Mc. Kialey tariff protected their interests; but they soon saw that it was a measure solely in the interests of some manufacturers ; that it gave them no relief, and that it imposed new burdens. They were told that they would have the American market exclusively to themselves; but, to their great sur-prise, our neighbors came as usual to buy, from us the surplus of a number of our profrom the the surplus of a humber to the point ducts. Every inhabitant of Canadian citize knows by experience that produce sells at as high a price this winter as in former years Trade is so dall in the United State that, in many districts, farms are abandoned estimations having exceed to pay on this agriculture having ceased to pay. On this subject, the assessors of the State of New York said lately in their official report, as follows

"Out Investigations during the year just ex-pletd, corroborate the assertion already made, viz. That there has been no improvement in the value of farms, nor in the financial posi-tion of their proprietors and occupants. Else-where, they have declared, that the farms are deprecialized, that the farms and the financial states are few, and that ble. In a great number of cases the farms are mortgaced to their full value and that it is rarely that we find any that are not ao."

In New Hampshire and Massachusetts hundreds of farms have been abandoned Thank, God, we are not in this condition, in the province of Quebec.

THE LIBERALS AND PROTECTION.

The position of the Liberals in presence of the National policy or of protection is very strange Is it not a fact well known in all Lower Canada, that fro. ) 1868, the Liberals, up to 1875, never ceased clamoring for protection? I need not cite the opinion of Mr. Laurier in the Legislative assembly of Quahec ; that of Mr. Joly of Lothiniere, the From THE GAZETTE, Montreal, Frid

1

THE LOSS OF REVENUE. From the point of view of customs duties we should lose \$7.000,000, which we collect every year on merchandlee coming from the United States This is a point admitted by This is a point admitted by Messrs Cartwright and Charlton. There is more than this; English merchandise would no longer enter by Canada, and we should see our revenue lose, by this means, another \$7,000,000, in all \$14,000 000. How abould we fill this void? Mr. Thomson, an ex-editor of the Globe said it, the other day, in a reply published by the *Horld* to the speech of Mr Charlton, at the Club of the Young Liberals of Toronto, Mr. Thomson accuses Mr Chariton of concessing a part of the trath, in not frankly stating that direct taxation is the necessary and inevitable complement of unrestriced reciprocity. It will not be out of place to quote, in such a serious discussion, extracts from Mr. Thomson's letters. In one passage, he BRYF: -

end of Mr. Thomson's letter was as follows :-

The end of Mr. Thomeon's lefter was as follows :--"The setive politicians who offer a pro-gramme implying direct iaxation on a grand-easie, cannot-or can they not-reasonably they are not prepared to favor direct iaxation on a grand scale (which the Dominion Govern-mept has no means of applying, neither mi-neigel norlocal). We seen inderstand that the tax would put the genius of Mr. Charlton himself to a rude test, Bhi, as a simple addi-tion to the project of unrest ided reciprocity, I venture to ask him to tell us why the result of this reciprocity, the direct taxation on a grand seale, had not been seriously and not be patiently recommended reciprocity. The direct is adding to the the project of unrest ided reciprocity, I venture to ask him to tell us why the result patients from the line the red rel force into the project of unrest ided reciprocity, the the neople of Canada do not wint direct it at the approaching elections, when the members and the journals do not vigorously employ themse vesi to declaring that it is the means for raising the public revenue s" DIBECT TAXATION.

# DIRECT TAXATION.

These are the Liberal plane franka Liberal. ly exposed to view by a Liberal. Why had not Mr. Laurier the honesty of Mr. Thomson, at the banquet at the Windsor 28th December last? M.

plans frank-y a Liberal. the honesty of id he, in stating consegnences i e blindfolded? of the Globe itcommercial relations between the United States and Canada."

The following year Sir Charles Tapper made a new appeal to the Americans, and in the course of his financial exposition in the House of Commone, he spoke as follows: "I need not recall to the House, that both parties, whether in power or not, have been exceedingly anglous to obtain a renewal of the treaty of 1854, or commercial relations similar to those which Cas-ada and the United States enjoyed under the treaty. The House knows that not only made efforts to obtain we have a re-establishment of a reciprocity treaty, in the shape of a treaty, but we have also tried to establish more liberal commercial rela-tions between Canada and the United States, requesting t e latter to grant the same as ourselves in regard to certain articles. The articles do not comprise all those that the reciprocity treaty embraced, but since 1849 Canada, before Confederation, had adopted this clause which has been reinserted in every change of the tertif act up to the present time. The object of this proceeding was to direct the attention of our American neighbors to the fact that we were anzious to have freer commercial relations between the two conntries"

Thus, almost every year, we addressed the United States, either by direct invita-tion or hy a notice in the tariff, to manifest our good intentions, and we believe the American Government would have responded to it if the intervention of interested politicians had not created an agitation in the United States.

#### THE LATERT ATTEMPT.

Finally, on the 13th December last, the Government of Lord Stanley made a final appeal to President Harrison and it remains for us to hope that it will have greater success than its prédecessors. In short, if you wish to judge the value of Mr Laurier's plan of unrestricted reciprocity, listen to what was said about it a few days ago at a banquet given to Sir Richard Cartwright by the Buston Board of Trade, by Mr. Lane, vice-president of that association :-

"It would be but a small matter for the United states to shandon some \$5,000,000 that we now collect for duty on the products of Canada It mould be duty on the products

An manue as to be able to releve from an revenue duty the products of American manu-factures of all kinds, which would replace to a large proportion the importations from other countries. Such is the grave financial responsibility that the Canadian Liberals are about to sesume; are not all the advantages all on our side ?"

#### THE INSVITABLE RESULT.

All the advantages on the side of the Americans. Why should they not desire such a reciprocity? The project of unre-stricted reciprocity will lead with fatal celer-ity to annexation. As to commercial union it means annexation whenever the Americans desire it. It may, perhaps, be rash se say that the Ontario Liberals wish to be come a portion of the American Union Mr. Mackensio is squarely opposed to it. As for Mr. Biake he has declared that he has no more ardent desire than to live and die under the British flag. Mr. Charlton is a native American, and is suspected of annes-ationist tendencies. Sir Richard Cartwright has made no declaration, but it is at least has made no declaration, but it is at least singular to see him, without official position, intrigning against his Government with American politicians. If we have justifiable doubte on the sime of the Grits, we cannot ignore the secret hopes of the Borges of all shades. The Union Liberals, of Quebec, printed the following on 31st January last,

pect that should cool the ardor of the numerous Liberal aspirants to public life.

## THE ATTRACTION OF CAPITAL.

The great Liberal argument is that annezation would attract American capital in our direction. This is a pretension that is somewhat problematical. Capital has no prejudices, no prepossessions. It goes any place where there is a prospect of placing itself to advantage. It is English gold that has built a portion of the American railhas built a portion of the American rail-roads, that has taken up Torkish and Spanish loans, etc We offered the Americans the chance of constructing the Northern railroad, to subscribe to the Mercler loan. Do you think that if they had seen any advantage in them that they would not have taken hold of them? No; they were not willing to accept a moderate interest and they refused the offer. But when it is a paying affair that we offer them they are always ready. This is the reason they work our forests so well and that we see so many Americans among the lumber merchants of Ottawa I maintain that if we had had annexation instead of Contederation in 1867, the Northern railroad and most of the other r diroads of the province would never have been constructed.

## THE WEIGHT OF TAXATION.

In reality, under the American regime, the state governments receive no subsidy from the central government and it would have been impossible to have collected by direct taxation the necessary sums for the construction of this road, Accordingly, from the point of view of material interests, the henefits of annexation are problematical, and from a sentimental point of view it is impossible to perceive any In this connec-tion it will be our system of education, the support of our clergy, onr institutions in general, that would be menaced : and we would risk losing that which has cost us fifty years' of struggles and sacrifices.

#### FINANCIAL ADMINISTRATION.

These two words recali matters of a quite different nature, whether we refer to Quebeo From the moment when it is a or Ottawa. question of the financial administration of the Mercler regime, one cannot avoid thinking of the anarchy that reigns in the beyond all proportion with the revenue and defoit upon deficit. Financial admin-istration at Ottawa signifies: surpluses of four, of three, five and six militons of revenue over the expenses; construction of immense public works ; order and economy in the expenditure of public funds.

#### WHAT EXPERIENCE SHOWS.

The Liberals wish to replace the Conservatives at Ottawa. Sensible people among the Liberals say : May Heaven save us from such an infliction, for we know what would happen with the contents of the Federal strong box! It would soon close on empti-nees! Canada already knows by experience the result of a Liberal administration at Ottawa. The Mackensie regime has been known in history as the era of deficite. In order to show the relative value of the two administrations, let us place the table of revenue and expenditure from 1868 to 1889 inclusive :--

|         | m      | 66      | 88      | 28    | 8.      | 00      | (CE)    | 89      | 88      | 87      | 87      | 87      | 30      | 87      | 87      | 87      | 87      | 07      | 0       | 10    | 1868        |  |
|---------|--------|---------|---------|-------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|-------|-------------|--|

Revenue

Mr. Shehyn at the last session by by Mr. Snearn at the last session —a speech which has just been published, and which any person can procure At page 13 we come upon two small tables, which throw a sed light on the fluancial administration at Quebec. These tables have been prepared by the Treasurer bimself. It is bimself who presents them. And these tables constitute the most crushing accusation against the Mercler Government Mr. Shehvn commences by giving a state-ment of ordinary receipts for three years-1888, 1889, 1890 .-

Let us hasten to state that we do not socept these figures. We will show in an instant that they are inexact. But we take the tables just as they are presented by the Treasurer, and each person will be con-vluced that the statement above indicates a progressive decline of receipts Three milseven hundred, three millions siz lions house seven housed, here millions fire hou-dred thousand. A failing revenue! Let us examine the expenditors Mr. Shehyn fur-nishes us this statement '---

This statement shows clearly the disgreeable fact of an increase in expenditure. Three millions three hundred thousand, three millions for bundred thousand, three millions eight hundred thousand, three millions eight hundred thousand An in-creasing expenditore 1 So it is Mr Shebyn bimself who perspously announces it.

Since 1887 the receipts have diminished each year, and each year the expenditure has increased. All the world state that we have invented nothing, by looking at page 13 of the speech on the budget, delivered by the Treasurer on the 5th December isst. On one hand a diminicion of revenue, on the other increase of expenditure. Can this be called good administration ? Is it not on the contrary the most abominably careless administration that is possible to imsgine, and it is admitted by the Treasurer Impeter and the admitted by the treasdort which ought to be rectified. Mr. Shebyn has have nup his little tables is order to fabri-cate another surplus, by taking three years operations, instead of confining himself to be the more than of the more 1960 00 mbess operations, instead of confining himself to the transactions of the year 1889-90 where he was obliged to admit a deficit. Taking the total of the three years, then, Mr. Shehyn says: "The amount of the ordinary ex-penditure is less than the receipts and shows a surplus for the three years of \$12,332.43." But in the figures \$10,902,656 of receipts for the three wars Mr. Shehyn newrists in in. the three years, Mr. Shehyn persists in including \$500,000 of arrearages for tax of the commercial corporations tax and of the province of Ontario. This sum must be sub-tracted. It is the Treasurer himself who imposed this rule at page 303 of the debates of 1887, where he says : " In financial year in question we have received \$54,11.0.8 of arreatages of interest on the subsidias granted by the Federal Government, for the construction of the railroad from Quebeo to Ottaws." This sum is a receipt on which we cannot properly count for another year; it must be eliminated from the ordinary receints.

We therefore subtract this \$500,000 con-formably to Mr. Shehyn's own opinion:

Ordinary receipts of 1888, 1889 and 1890 mentioned by the

that need a resty may modify in a large manne, our facal policy. From this arises the evident necessity of convoking a new Parliament, which can give a legal exection as well as a durable guarantee to, any treaty that may follow these negotiations.

#### THE LAMENTATIONS OF THE LIBERAL LEADERS

the condition of the country have little foundation even in their own minda. When they ere not contemplating the overthrow of the Government they are far from being such pessimists. Listen, for example, to the friends of Mr. Mercler, Read the journals devoted to him. What do they say? If we believe what they say, since Mr. Mercler has been in power the increase of prosperity has been everywhere present in our province ; population increases, public wealth is being developed, and our province is contented and happy. It is certainly true that the provincial debt is rolling up, but it is a sign of prosperity ; it proves the solidity of the shoulders of Jean Baptiste But these friends of Mr. Mercler fail to tell us by what wonderful change of view this picture of unalloyed good fortune is transformed into a spectacle of deplorable misery when they refer to the Federal Government. It is true that the administration of Sir John adds surplus to surplus and displays its narrowness of strife in the diminution of the public debt, which the friends of Mr. Mercier would consider as a palpable proof of the mischief of disorganization and public pov-We shall have occasion to point out erty. many contradictions. During the twelve years that Sir John has been in power the country has rapidly progressed on the road to prosperity, even to the extent of exciting the asionishment of the Americans, the most progress-exciting people of the world.

#### THE BAILBOAD RECORD.

He has brought to a successful termination the immense enterprise of the Canadian Pacific without sensibly augmenting the public debt, for, if the total sum he considerably larger, it has remained the same pro rate of the population, for the contributors having increased in number, the load has remained the same for each indi-vidual. Ten years ago we had 6891 miles of railroad; to-day we possess 13,500, that is to say, that the increase has been 100 per cent. Is this not a grand result? Of all these roads the largest number have received generous subsidies of the Federal Government. The Canadian Pacific alone figures nearly 5,000 miles of this num-Is not this a manifest sign of prober. gress? During the single year of 1890, more than 600 miles of railroad were added to the general network of railroads. And simultaneously with the creation of these new roads opened to commerce. the old companies have seen their operations augment-The Grand ed and their revenue increased. Trunk, the first born of the Conservative policy, in the impetus given to the construction of railroads, has never been so prosperons as during the last decade. Allow me to make a remark

#### CONCERNING THE CANADIAN PACIFIC.

When it was proposed to construct it our adversaries said that we were travelling the road to hankruptcy and that the country would be involved in the catastrophe. would not earn enough, said 'he Globe, to pay for the grease on its wheels. And the other day Mr. Mercler said, at the grand Liberal banquet at the Windsor: "The Capadian Pacific was an enterprise that was very useful to the people." When Cartier was making his celebrated and unfortunate campaign in 1872, at Montreal, he told our city that it would enjoy a large share of the traffic of the Canadian Pacific. I was at his side when he made this prophecy, and I well remember the outrageous shups that was hurled at him in reply! What do we be-hold to-day? The Canadian Pacific despatches or receives shout forty trains daily from its stations of Windsor and Dalbousie ; from its stations of Windear and Dahousie; and from its offices Mr. Van Horne despatches orders that the electric wire transmits to Hong Kong and Yokobama Yes, gentlemen, I do not exag-gerate, and this it is that more than verifies the prophecy of Cartier and the dislike of Mr. Mercier to the Canadian Pacific,—he who said at Beanport. In the presence of delable Canadian

gramme, and it was so until the day wher. Mr. Mackenzie reached power On the simple command of the Liberal leader, then, thu Liberals of Lower Canada hecame free traders from the protectionists that they were formerly, and this, without giving a single reason or explanation of their somersault. Nevertheless, protection was, on their part, an affair of tradition. Papineau had be-questhed it to them, and he practised prac-Itcal protection, when, with the patriots of the day, he refused to purchase English merchandles and wore only the home-made cloth of his country. Thus those great friends of our province, those men whom, according to their own account, possesse monopoly of patriotism, sacrificed that which ought to be the honor of our province hecause the Grits had other ideas than those of political economy. After all they are adherers to fact. Nothing troubles them less than to change their programme, provided they can raise the wind that will carry then to power It is thus that Mr Mercier, the greatest opponent that the Castors ever had, afterwards took their colors, fully decided, as his confidents affrm, to sacrifice them as soon as they were no further use to him.

#### DALLVING WITH THE PAD.

Thanks to this absence of staple ideas in politics, what have we seen among the Liberals for three years past? They first presented us with commercial union is an unparalleled discovery. You will re-member what it was. In virtue of commecial union, the United States and Canaca would have had a common tariff of enstor. Our neighbors would have collected all the customs duties, that they might give us on proportion at the end of the year. We would have taxed English manufactures and accepted free of duty those of the United On hearing this system extolled. States. Canadiana, from all the provinces, raised their shoulders with pity, and commercial union was forthwish buried. To-day, it is another remedy for all our ills that the Liberals offer us, under the name of unrestricted reciprocity. It is, so to speak, commercial union without customs union. We will have in the United States and Canada a common tariff ; a tariff of 50 to 80 per cent., and we will shut our ports to merchandise from the rest of the world.

#### THE QUESTION OF THE TARIFF.

There are those who pretend that we can retain our present tariff. If this were the case, unrestricted reciprocity would be an incomparable benefit. Fancy to yourselves what would be the result. We have a protective fariff of 17, 26 and 25 per cent that allows English merchandise to enter into Canada. This same merchandise would, in the United States, be anbject to duties of 80 per cent., which is virtually a prohibitive In presence of this double system, tariff. English merchandise would enter in 'o the United States by way of Canada ; we would he intermediaries of trade of Manchester and Sheffield and the American consumers, and we should reap an anormous commission! But who will believe that the Americans, so keen, so clever, will shut their doors to English merchandise on one side, to admit them on the other allowing the Canadians the profits on this immense commerce ? No. there is no sense in it. Nevertheless, the project of unrestricted reciprocity is often presented in this shape in order to deceive. It will be quite otherwise in reality. The United States will accept it if they really wish to negotiate on this basis, which is very far from appearing, except with a uniform tariff for the two countries On this last hypothesis this is what will occur. We shall see in less than six months the ruin of most of our manufactures, for the Americans, who are richer than ourselves, will flood our markets with their merchandise at ruinous prices, for some time, with the view of ultimately getting control of the Canadian market, after which they will return to or-dinary prices Not later than 20th January last Mr. Wiman, the father of reciprocity, said, in a speech delivered at Boston .-

"The United States will accept of no re-"ciprocity treaty with Canada unless it be an "unrestricted reciprocity. There should be a clause in it declaring that merchandles im-ported from foreign countries [by treaty] "shall continue to be inxed and inxed atthe earmer state as the tax imposed by the United "States on foreign merchandles. Otherwise "Canada would be the secret door for all

the honesty to say so. Some days ago, it published the following :--

The numeray to say so. #### EVERYWHERE LIBERAL CONTRADICTIONS.

That is what the Globe says, and what Messrs. Cartwright, Laurier and Chariton Means, Carwinghi, Lainer and Charloo think, without wishing to say it. As for Mr. Biske, be has declared against direct taxation. What a similarity of views is held by the Liberal party! Not only do they not agree on the choice of a leader; but it is impossible to find in it two men who have the same opinion on the policy to offer the country. When we look at the Liberal leaders at Ottawa, with those of Quebec, we observe contradictions there also, and as much confusion in their systems. Thus, Mr. Merciar declared, at the famone interprovincial conference at Quebec, that the subsidies granted to the provinces by the Federal Covernment must be augmented; herenewed the precension in his programme-speech in Tara ball, at Quebec. On the other hand, we see Mr. Laurier boast of the merits of a system which would deprive the treasury of fourteen millions of dollars. How can one reconcile such contradictory propositions? Where can one proceed with such confusion in one's ideas? Probably where the province of Quebec is going to, that is to say to disaster.

# RELATIONS WITH THE REPUBLIC.

Our position as neighbors of the United States should exercise a considerable influence on our economic situation . It is one of the most prosperous countries in the world. Its business men are the cleverest that can be found and its wealth produces a formidable competition. We are all interested in managing such a powerful neighbor and in seeking its friendship. It is with this object, that the Federal Government has always concerned itself, and it is ridiculous to pretend, as the Liberal leaders do, that we have purposely irritated the Americans. There can be nothing more false; we have always shown ourselves disposed to negotiate with them, but not to the extent of abandoning all our advantages-all our patrimony. When we concluded the treaty, ing the question of the fish-with the Cleveland administra-n treaty ratified by our l'arlia-but rejected by Congress, did regulating erics, tion. ment, but rejected by Congress, did the Liberals not say that we had sacrificed the interests of Canada. It is not always easy to negoliate with the Americans. With men so close in their dealings as they are, they wish to keep all the advantages that wo offer and grant nothing in return. The Liberals found this out to their cost. In 1874 Mr. Mackenzie sent bis friend, George Brown, to Washington, to negotiate a treaty of reciprocity; we know that he returned without a treaty. 'I'be Americans last year invited republics of South America to ne-gotiate with the United States, nevertheless not one of them, with the exception of Brazil, consented to conclude an arrangement with the American Government. Why? Evidently because these States found that the Americans demanded too much and did not vield enough.

#### NEGOTIATIONS FOR RECIPROCITY.

In 1887 Sir Charles Tupper transmitted to the President of the United States the following resolution :--

"That, with the view of removing all causes of disagreement on the subject of the fiberles, it is proposed by the pleupotentiaries of Her Majesiy, that the fishermeu of both countries shall continue to enjoy all the privileges that they now enjoy during the existence of the articles of the treaty of Wishington concern-ing, the fisherles, in consideration of a mm-

arons contest which is preparing on Federal "We are also with them. Notwitheinod-log the clashings, rather apparent that real, and always inevitable in a parity in power, which have invoked our ranks during the last seasion, the Patric ought to recordize that the result of its contravy efforts has been its triumph of ideas for which it has a ways so valuantly funcht, the triumph of our owo ideas, liberal ideas "Men who are cellaloy slowers but who do no system to your the minimierial policy we are so re tor them. We regret it all the more, seeing that among them may be tound these who have rendered us undenlable ser vices."

The ideas of the Patrie triamph : Long live the Patrie. But pardon is granted to Mr. Mercler and the National party ; therefore, iong live the National party and Mr. Merciarl The Patrie congratulates li-elf at seeing Liberalism, which they thought dead, seeing Lineration, which they thought dead, raise its head again and exhibit itself proudly, for its Liberalism was of the old-fashioned kind which did not hide itself, which had annexation as its object and dis-played it to all comers The Liberal party, then, is not contented with simply going to seen, is not contented with simply going to seek its inspirations at Washington, as re-gards our commercial policy. It secretly conspires for our absorption by the neigh-boring republic Nol Notwithstanding what may be said of it, and whatever its ap-mearsonce may be the nerit of Paningen what may be said of it, and whatever its ap-pearances may be, the party of Papineau, Doutre, Dessaulles, Dorion, those fathers of annexation, is not dead. Its spirit dominates their successors and, if they had the convergen-they would oldly holst the American 8-s. When the Patrie formerly paraded its Lib-eralism too much for the taste of Mr. Mercler, and, above all, annoyed those whom it was the wish to deceive, it said in its opportunism, "that it was better not to have the marriage feast before marryin z the bride." It is still for the same reason that it puts a damper on the speeches of Liberals when-ever they touch this delicate question. But put them in a fix and they will not dare to deny their anti-Canadian tendencies, their secret love for the neighboring republic. Let them educate public opinion and you will see the marriage of the daughter of Canada to the United States.

#### THE QUEBEC VIEW OF 1T.

Do not expect that I will draw up here all the arguments that can be brought against the arguments time can be been a point of the state of the same state of the same state of the s who possessed political foresight, were op-posed to it in 1775 and in 1812. They comprehended, as do the true friends of Canada to-day, that there are more guarantees for us under the present regime than under that of the United States. Here we count for somethe United States. Here we count for some-thing, there we would be of no importance. We can to day find allies in the other prov-inces. With annexation these alliances would cases and those who wish to crush us in the confusion that would follow the new order of things would have everything their own way. Thus, one of the strongest arguown way. Thus, one of the strongest argu-ments of Goldwin Smith, our bitterest en-omy, in favor of commercial union is, that it will lead us to annexation which would give us our finishing stroke. Read and meditato on what he said in 1887 :---

on what be said in 1887:---'In truth the only chance that we have of improving the French element and to prevent them from 6 rming a foreign ballon, will be to surround them with the influences of the enlire Anglio-Baxon race of the continent; the English population only of Canada, facts have proved it, will never succeed in the task of assimilation. The reasons for which the Quebec clergy reject commercial uplon with the new born Republic should lead us to accept it as soon as possible. And they are clear enongh."

# Do you know

#### HOW WE WOULD BE REPRESENTED

in the United States? At the end of each decennial census, our neighbors who have their representation based on numbers, adjust anew their representation. Formerly there was a member for every 50,000 scula. This figure has always increased. In 1880, it was fixed at 150,000 for ten years. Last year they raised it to 174,000 i Calculate how many members we shou'd have at Washington. A population of 2,000,000 would give us 10 If we were but a million and a half we would have only eight members of Congress in an assembly which

| pense.  | Surplus.  | Deficits. |
|---------|-----------|-----------|
| 6       | 88 10     |           |

| 13,0    | 36,64     |           |
| 18.3    | :         | 00.78     |
| 19.3    |           | 1,460,027 |
| 03.     |           | 28 14     |
| 55,3    |           | 38,99     |
| 50.6    |           | 43,22     |
| 02.5    | 132.74    |           |
| 67.1    | 316.55    |           |
| 30.1    | 7.0+4.492 |           |
| 21.1    | 754,25    |           |
| 87      |           | 240,05    |
| M11.612 |           | 5,834,572 |
| 57.8    | 97,313    |           |
| 18.4    |           | 810.032   |
| 17.8    | 1,865,035 |           |

That which strikes us first on consuring this table are the five years of the Liberal administration; a deficit occurs in 1880, but the country was still under the influence of the Mackensie regime. But see how the revenue increased the following year under the touch of the National policy. We come That which strikes us first on consulting to 1885 and 1886 There are, then, deficits. The Government might easily have concealed them if it had wished It was the cost of the No-thwest reheliton. The Government, if it had been inspired with the principles of Mr. Mercier, would have made a loan and the deficit would have disappeared They preferred acting honestly and still offer the public a presentable result for the accummulated surplus on the ten years of administration amounted, with that of the year ending 30th June last, to twenty millions.

#### THE LATEST FIGURES.

Let us now give the details of the last financial year, that is to say, the year ending 30th June, 1890.

Juring the seasion of 1889 the Fluance Munister, Mr. Foster, e-timated the revenue for 1889-90 as foilows:--

| Tote   | 1 |     | ••• | <br>• |   | <br> |   | • | ••• |   |   |     | • | ••• |       |   | \$39,175,000     |
|--------|---|-----|-----|-------|---|------|---|---|-----|---|---|-----|---|-----|-------|---|------------------|
| Excise |   |     |     |       |   |      |   |   |     |   |   |     |   |     |       |   |                  |
| Custom | 8 | ••• |     | <br>  | • |      | • | • | ••• | • | • | ••• |   |     | <br>• | • | <br>\$23,900,000 |

This is based on the tariff in force and on This is cased on the tariff in force and on the maintenance of the country in its pres-ont condition. The budget of expenditure, which was laid before the House, amounts to thirty-fore millions. I cannot state with certainty what will be the total figure of the annulamentary hundred which each the supplementary budget which ought to be submitted. In any case to make a moderate estimate let us say that the total budget will amount to \$26,500,000. We have then a surplus for 1889-90 of \$2,875,000. The Conservative Finance Minister, therefore,announced a surplus of \$2,075,000. The fiecal year has terminated, the public accounts are published and we find that the result of 1889 90 is as follows :---

Surplus ......\$ 3,885,894 We have, then, had a surplus of \$1,200,000

more than was predicted.

#### THE PURLIC DEST.

Let us again give some details on the fin-ancial administration of the country, taking the chapter on the augmentation of the public debt. In 1873, the net debt of Canada was \$99,848,461. In 1878, after five years of Liberal regime, the net debt was \$140,362,069. Net debt in 1878..... \$140.362.069 Net debt in 1873..... 08,848,461

Increase in five years ..... \$ 41,513,608 Which constitutes an annual average angmentation of \$8,102.000. In 1878, the Liberala left the debt at \$140,362,069. In 1890, on 30th June, after twelve years of Conservative rule, it was \$237,533,211.

Increase in twelve years ..... \$ 07,171,142 Which constitutes an annual average in-crease of \$3,097,000. This shows, then, what results this comparison give between the Liberal regime and the Conservative regime :

Difference in favor of the Conserv-And, neverthelees, it was during the Conserv-valives product the great enterprise of the Canadian Pacific, that the opening of the Northwest territories were brought to a successful issue.

#### A COMPARISON WITH QUEBEC.

To show the contrast which exists be-tween what takes place at Quebec and at

penses which he refuses to include. Insteadof the figures given by Mr. Shehvn we have repeatedly proved that it is the following that are correct [

Expenditure, financial year 1887-INSE Expenditure, financial year 1888-1889 1889 Expenditure, financiai year 1889-1890 4.088.456

Let us compare the receipts with the expenditure for this period :

\$11,491,878

vears the Mercier Government gave us \$1,019,217 of a deficit.

#### THE LABOR QUESTION.

Some weeks ago the Montreal journals gave an account of an interview that their reporters had had with an officer of the French administration, charged by his Gov-ernment to sindy the labor question. This officer declared that, from his point of view, the labor question did not exist in Canada. the labor question did not exist in Canada. This simple phrase contained a complete eulogium as regarda our country. This meant that we were ignorant in Canada of those fearful struggles of the old world and some of the United States which occurs be-tween capital and labor—hetween the em-ployer and workmen. We have had, it is true, some strikes, but they were not oblid and some the sone which and true, some strikes; but they were but obl(2 play invalue the strikes of Europe, which are accompanied almost always by the death ot men, or, at least, deplor-able miseries. The social question does not exist, so to speak, in Oanade, because the workman is better treated than in any other country in the world. This has not prevented the Government from europoundue him with its solicitand. It is surrounding him with its solid tade. It is the Conservative Government that has recognized, by the law of 1872, the rights possessed by workmen of organizing into trades unions, which was previously a mis-demeanor. It is also this Government that caused a full enquiry into the condition of workmen employed in manufactories to as-sure itself that there were no abuses to be done sway with. It has in addition a Board of Labor, which will be charged with en-quiring into the complaints of workmen and to intervene in any difficulties that may occur between them and their employers in order that they may be peaceably arranged and prevent those strikes which are such a source of loss to both parties. If they have not named the members of this burean It is because the labor organizations have requested a delay in the application of the law

When on my departure from the Capital I met the Prime Minister he told me : "Your province has been faithful to me; your compatriots quite always gave me a solid vote. Thanks to their generous and loyal help our party was enabled to undertake and accomplish gigantic works and follow a policy I am proud of."

Sir John is now 76 years old. He had to face the bardest enemies and the most intricate plots He has succeeded so far, and he actually makes what may prove to be a last appeal to our people. His name is connected with a grand work ; the consolidation of the Canadian nation, and he (most legitimately) desires to crown this noble work, when alas i some Canadians, sophisticated by blind ambition, are reary to become traitors.

Sir John expects from our people a strik-ing mark of approval and affection. He is right; we won't desert him on the very hour of the realization of a great scheme. We will be equal to the circumstances. Our population, always grateini and long remembering, will offer a most eloquent agawer to Bir John's impartiality when Catholics or French were concerned.

I want to see Sir John victorious on the 5th March and crowning with a striking triumph his long and well fitled life; and I wish to see that a supreme mark of gratirude be given to him by the people whose fate has been so long intrusted to him.

The 5th of March, when the old and noble leader's eye will look on our voung, pro-perous, and promising nation, he, like Simes may prononnce the famous sentence . Domine, nunc dimitte servum tuum. 111
