Jan.-Feb.-Mar. 1950

TO OUR BORROWERS

Communications to and from the Library are official business and may be sent under frank. Books weighing less than four pounds may also be sent under frank. Always indicate your official address - never your home address.

One of our services is to obtain bocks from other libraries when we do not have them in our own collection. Like anyone else we are subject to the rules and regulations - and FINES - of these libraries. Your cooperation in returning these books on time will be appreciated. If there is a fine it becomes the responsibility of the borrower.

Books should be returned to the address indicated on the "Date Due" slip - that is, some go to San Francisco and some to our Berkeley office.

NEW BOOKS

- CALIFORNIA ACRICULTURAL EXPERIMENT STATION. Ground Water in California: the present state of our knowledge, by Patricia McBride Bartz. 67 p. Berkeley, Calif., 1949. (Giannini foundation. Ground water studies No. 1)
- CALIFORNIA. DEPT. OF PUBLIC WORKS. DIV. OF WATER RESOURCES. Alternative Plans for Control of Floods in Upper Sacramento Valley. 217 p. Sacramento, 1948.
- CALIFORNIA. LEGISLATURE. JOINT LEGISLATIVE COMMITTEE ON WATER PROBLEMS. Water Problems of the State of California. 233 p. Sacramento, 1949. 292 C122R
- CRAIG, GEORGE A. & MAGUIRE, WILLIAM P. The California Pine Region Forest Handbook. 193 p. Sacramento, Calif. Div. of forestry, 1949.
- HANNA, MARK. Public Speaking Without Foar and Trembling. 166 p. N. Y., Mac-millan, 1949. 145.2 H192

"Mr. Hanna shows what vital things interest human beings the world over, and how to use those vital elements in a speech. He explains what kinds of words bore people, and what words are power and fire. He tells how to get a smash beginning, how to gather information and how to put that information together to make a fascinating talk. He includes the main in-

gredients for success in delivering the speech once it has been prepared. This book ... will appeal ... to all members of the great public who want to learn how to meet an audience with pleasure and self-confidence."

INGRAM, K. C. Winning Your Way With People. 258 p. N. Y., McGraw-Hill, 1949.

"Why do some people get things done so easily? What is the secret of their magic-like touch in dealing with other people? Can we learn it and use it in our every day lives? Mr. Ingram answers these important questions. He describes, with numerous stories and examples, the methods of understanding yourself in relation to others. He puts modern psychology and the findings of the world's great teachers in terms of a simple philosophy of personal action. His suggestions for getting your ideas across to other people, for working harmoniously with people, point up how you can gain maximum effectiveness in dealing with others in your everyday life."

The author is Assistant to the President of the Southern Pacific Railroad, dealing with public and employee relations.

JENSEN, LLOYD B. Meat and Meat Foods; processing and preservation from meat plant to consumer. 218 p. N. Y., Ronald Press, 1949. 50 J45

"The purpose of this book is to explain in non-technical language the processes that bring meats and meat products into the consumer's kitchen in sanitary and appetizing condition; and which have made meat one of the safest as well as the most nutritious of foods.

"Chemists, physicists, bacteriologists, veterinary scientists, engineers, and operating men in meat plants have all contributed to our knowledge of the complex changes that occur in the processing of meats. Their observations and research findings, however, are scattered through scores of technical journals and books, and the aim here is to present a summary of the facts discovered which have practical and informative value for those readers who need a working knowledge of the subject".

LEOPOLD, ALDO. A Sand County Almanac and sketches here and there. 226 p. N. Y., Oxford Univ. Press, 1949. 409 L552

"'There are two kinds of people: those who can live without wild things and those who cannot. These essays are the experiences and dilemmas of one who cannot. So wrote Aldo Leopold in the introduction to this collection of his writing, ranging from a brief description of a wild flower to a philosophical discussion of land conservation.

"Aldo Leopold, one of the world's great naturalists, was a leader in the conservation movement. He also had the ability to express in words of exceptional beauty his appreciation of the way of life of all wild things. In this book have been gathered the best of what might well be called his prose poems".

Magazines should be forwarded to the next person on the list within three days. Do not return them to the Library until the circulation is completed. Although your name may appear at the end of a particular routing. slip the Library probably has three or four more lists - so please give a thought to the fellow at the end.

MASEFIELD, GEOFFREY BUSSELL. A Handbook of Tropical Agriculture. 196 p. Oxford, Clarendon Press, 1949: 38 M37

"As the title implies, this book is designed as a practical handbook on agriculture in the tropics, for farmer, businessmen, or administrator. For the first time in recent years, simple facts and figures on crops and livestock are combined under one cover for easy reference. The first of four sections is a general survey of soils, implements, irrigation, and some economic aspects. Trepical crops - cercals, oil plants, fruits, vegetables, fibers, rubber, tobacco and such - are described in the second part, while the third deals with agricultural diseases and posts. The fourth section censiders the livestock situation in the equatorial belt, with chapters on cattle types and management, dairying, small stock, minor farm animals, and pasture management."

Foreign Agriculture, Aug. 1949

MRAK, E. M. & STEWART, GEORGE F. ed. Advances in Food Research. vol. 2. 558 p. N. Y., Academic Press, 1949. 389 M87 v.2

Partial contents: Thermobacteriology as applied to food processing; The pharmacology of DDT; Chemistry of fruit and vegetable flavors; Histological changes induced in fruits and vegetables by processing; Spray drying of foods.

- MATIONAL CHINCHILLA BREEDERS OF AMERICA, INC. The National Guide to Chinchilla Breeding. Salt Lake City, Utah, 1949.
- POST, KENNTH. Florist Crop Production and Marketing; the application of scientific facts to the production and marketing of florist cut flowers, potted plants and bulbs grown in the greenhouse or in the field. 891 p. N. Y., Orange Judd Pub. Co., 1949. 96.04 P84

This complete guide and reference is directed to the commercial producer but the variety of information could also be useful to the owner of a few potted plants or bulbs. Asplendid book.

SMYDER, LLEWELLYN R. Essential Business Mathematics. 434 p. N. Y., Gregg Pub. Co., 1947, 325 Sn9

"The essential purpose of this textbook is to provide knowledge and skill in the computation of practical financial problems of a business, civic, and personal nature. No attempt has been made to provide an all-inclusive study of the various topics presented. The material has been so prepared that it should form a sound basis for either subsequent or concurrent courses in accounting, investments, business finance, money and banking, insurance, retailing, real estate, statistics, and related business subjects"

THORNE, DAVID WYNNE. Irrigated Séils; their fertility and management. 288 p. Philadelphia, Blakiston Co., 1949. 56.7 T393

The authors "assume that the reader has an elementary knowledge of botany, chemistry, methematics, and physics, and that he is familiar with such concepts as PH, base exchange, and the physical properties of soil".

They "believe the book will be useful net only in cellege courses dealing with irrigation and the management of irrigated soils, but also as a refer-

ence and guide to those giving technical advice to farmers on the management of irrigated soils. County agents, and field workers for the Seil Conservation Service, the Burcau of Reclama tion, and other agencies in irrigated regions have been asking for information of this type".

TRELEASE, SAM F. & BEATH, ORVILLE A. Selenium: its goological occurrence and its biological effects in relationate betany, chemistry, agriculture, nutrition, and medicine. 292 p. W. Y., Pub. by the authors, 1949.
391 T71

"The rare and little known element selenium became the subject of immediate interest and intensive research when it was discovered to be the cause of a scrious and frequently fatal disease of livestock. Investigations showed that selenium is absorbed from some soils by food and grazing plants in sufficient amounts to make them highly poisonous to animals. Cereal grains and hay grown on certain seleniferous soils cause serious losses of livestock; and native forage plants that accumulate selenium take a heavy toll of cattle and sheep on the ranges of fifteen western states. The selenium problem is of special importance because of the possibility of human injury from consumption of grains, vegetables, eggs, dairy products, and meat from seleniferous areas..."

SELECTED PAMP (LETS.

GARDENING

Growing strawberries in the home garden. 15 p. 1949. (Calif. Agr. Col. Ext. Cir. No. 151) 100 Cl2E No. 151.

Heme vegetable gardening. 31 p. 1948. (Calif. Agr. Col. Ext. Cir. No. 26 rev.) 100 Cl2E No. 26

Ridding the garden of common pests. 39 p. 1948. (Colif. agr. Col. Ext. Cir. No. 146) 100 Cl2E No. 146

Rose culture in California. 37 p. 1948. (Colif. Agr. Col. Ext. Cir. No. 148)
100 Cl2E No. 148

LIVESTOCK. FELDING

Comparison of methods of supplying phospherus to range.cattle. 22 p. 1949. (USDA Tech. Bul. No. 981) 1 Ag84Te No. 981

Feed for chickens. 30 p. 1949. (Calif. Agr. Cel. Ext. Cir. No. 159) 100 C12E Feeding for milk production. 59 p. 1949. (Oreg. Agr. Expt. Sta. Bul. No. 464) 100 Or3(b) No. 464

Feeding wheat to livestock. 8 p. 1949. (Oreg. Agr. Col. Ext. Bul. No. 695)
100 Or3EB No. 695

Hay rack and feed trough for weaner calves and yearlings. 13 p. 1948. (Nev. Agr. Expt. Sta. Bul. No. 178) 100 N41S(b) No. 178

Once-a-day versus twice-a-day feeding for dairy cews. 7 p. 1949. (USDA cir. No. 830) 1 Ag840 No. 830

MINAGELENT

Work simplification as exemplified by the work simplification program of the U. S. Bureau of the Budget. 49 p. 1945. (Public Administration Service. Publication No. 91)

Appraisal and central of duplicating service: management bulletin, by U. S. Bureau of the Budget. 44 p. 1949. 151.28 M31

SEEDING

A preliminary guide for range reseeding in Arizona and New Mexico. 12 p. 1949. (Southwestern forest & range expt. sta. Research report No. 7) 1.9622

Preliminary report - the Cochran airplane seeding experiment: 36 p. 1949. (Oregon. State bd. of forestry. Research bul. No. 2) 99.9 Or32R

SOIL CONSERVATION

Dust sterms ceme from the poorer lands. 8 p. 1949. (USDA Leaflet No. 260) 1 Ag84L No. 260

Grasses and legumes for soil conservation in the Pacific Northwest. 56 p. 1949. (USDA Misc. Pub. No. 678) 1 Ag84M No. 678

Streambank plantings for erosion control in the Northeast. 8 p. 1949. (USDA Leaflet No. 258) 1 ng84L No. 258

Technical skill for soil and water conservation. 14 p. 1949. (USDA PA-86) 1 Ag84Pro No. 86

SOIL INOCULation

Inoculation of legumes. 8 p. 1947. (Idaho. Agr. Col. Ext. Cir. No. 101)
100 IdlE No. 101

Legume inoculation: what it is; what it does. 20 p. 1948. (USDA Farmers' bul. No. 2003) 1 Ag84F No. 2003

TANNIN

Some basic information regarding tannins and tannin-yielding crops. 112 p. 1948 USDA Off. of foreign agr. relations. 1.943 Se52

Tannin content and other characteristics of native sumae in relation to its value as a commercial source of tannin. 76 p. 1949. (USDA Tech. Bul. No. 986)
. 1 Ag84Te No. 986

WATER

Annual report, San Diego county water authority. Library has 1946 & 1948 Consumptive use of water rates in the Upper Colorado River basin (provisional),

by Harry F. Blancy and Wayne D. Criddle. 50 p. SCS, Div. of Irrig., 1948.

Evapo-transpiration. Summarý of paper presented at the Scil and water conservation meeting, Pasadona, 1944, by Harry F. Blaney. 8 p.

Normalcy tests of precipitation and frequency studies of runoff on small watersheds. 24 p. 1949. (USDA Tech. bul. No. 985) 1 Ag84Te No. 985 Rainfall interception by chaparral in California, by E. L. Hamilton & F. B. Rowe. 43 p. Calif. State Div. of ferestry, 1949.

Report of the Metropolitan Water District of Southern California, fiscal year
July 1, 1948 to June 30, 1949. 124 p. Los angeles, Califo, 1949.
292 M56

Review of the 1947-48 water year in southern California. 15 p. U.S. Geological survey, Los Angeles, Calif., 1949. (water bulletin)

Snow surveys for forecasting stream flow in western Nevada. 120-p. (Nev. Agr. Expt. Sta. Bul. No. 184) 1949. 100 N41S No. 184

South coastal basin investigations - overdraft on ground water basins. 256 p. 1947. (Calif. Div. of water resources. Bul. No: 53) 292.9 Cl2B No. 53

WOOD PRESERVATION

Poles and fonce posts for Oregon farms. 23 p. 1947. (Oreg. Agr. Col. Ext. Bul. No. 681) 100 Or3EB No. 681

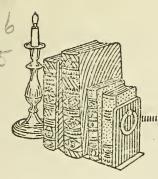

Preservative treatment of Virginia's fence pests. 26 p. 1949. Richmond, Va., Dopt. of conservation & development.

Prevention of deterioration in stored southern hardwood legs. 6 p. Southern forest & range expt. sta., 1949.

Scrvice life of treated and untroated fonce posts. 22 p. 1949. (Orog. forest products lab. Progress report No. 2) 99.9 Or3522P

NEW BOOKS

AMERICAN SOCIETY OF AGRONOMY. Advances in Agronomy. v.l. 439 p. N. Y., Academic Press, 1949.

"Agronomic science, as other branches of science and technology, has made many and rapid advances in recent years. The pressure of specialization, however, makes it difficult for those in professional positions to keep even reasonably well informed of the newer developments in fields other than their own. 'Advances in Agronomy' has as its objective the survey and review of recent developments in the field; it presents a coherent treatment of that which is new against the background of established information,"

Ten articles are presented here, each written by specialists for their professional colleagues, but so written as to be intelligible to the average agronomist as well as to the specialist. The central theme of the initial volume is soil-crop relationships. It is the first of a regular annual series of volumes that will, in due tourse, cover the entire field of agronomy. As such, they will be indispensable to all who are interested in any aspect of the science."

CALIF. DIV. OF WATER RESOURCES. Flood Flows and Stages in Sacramento and Northern San Joaquin Valleys, 1946-1948. 186 p. Sacramento, Calif., Sept. 1948.

CALIF. SENATE. California's Fish and Game Program. Report to the Wildlife Conservation Board, by Seth Gordon. 246 p. Sacramento, Calif., 1950.

"The 1947 Legislature diverted \$9,000,000 due the State from horse racing operations, from the General Fund to the Wildlife Restoration Fund, and at that session adopted an act known as the Wildlife Conservation Act of 1947, creating a special board constitution assemble the Conservation and conservation essential to the welfare of the State."

This is the report of Mr. Seth Gordon who was engaged to plan and carry into execution California's program.

LIBRARY REQUEST FORM AD-245 is a great convenience. Obtain copies through your regular supply channels. The Library does not have them for distribution

DURUZ, WILLIS PIERRE. The Principles of Nursery Management. 125 p. N. Y., De la Marc, 1950. 90.21 D93

This book is a guide for students and beginners as well as an aid to those already engaged in nursery business. In general common phrasing is used rather than scientific terminology. The material is arranged to present the general procedure in a modern nursery and the logic behind the operation. The author has spent much of his life on the West Coast and has degrees from the University of California and Stanford. He has had extensive teaching experience.

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED MATIONS. Efficient Use of Fortilizers. 182 p. Washington, D. C., 1949. (Agricultural Studies No. 9) 28 F73 No. 9

"The efficient use of manures and fertilizers is one of the most important technical factors in food production. This monograph deals with the subject especially for agricultural administrators and advisers who work with farmers and farm organizations. It is not an exhaustive treatise for technicians. Nor is it a detailed handbook of complete recommendations for particular local areas. Rather, it has a different purpose from either of these - the purpose of helping agricultural administrators and advisers all over the world to spread the available knowledge about fertilizers and their use for crop production. .."

KLOSE, NELSON. America's Crop Heritage; the history of forcign plant introduction by the Federal Government. 156 p. Ames, Iowa State College Press, 1950. 30.9 K69

The general reader will find here the origin of familiar agricultural crops; the student can use it as a text in agricultural history. It is the author's hope "that it will afford an insight into the ancient process of cultural transference - the contribution of other ages and countries to America". David Fairchild has written the introduction.

Schultz, Theodore W. Production and Welfare of Agriculture. 225 p. N. Y., Mac-millan Co., 1949. 281.12 Sch82Pr

"In this book I endeavor, in a series of studies of American agricultural policy, to untangle the economic strands of that policy. I try to isolate and make explicit the objectives that have guided policy since World War I, and to indicate in this connection the stress that has been placed upon equality for agriculture, income, prices and upon the family farm as a social and conomic institution. I undertake the task of determining whether these are meaningful objectives for policy and in doing so consider briefly a more comprehensive formulation of social action in order to classify and identify the economic aspects of policy. Two basic policy objectives having important economic content emerge. One of these pertains to the allocation of resources where the focus is upon efficiency in production and the other to the personal distribution of income where certain ideas with regard to social officiency are clearly in the foreground. The social task of achieving an officient allocation of resources and also that of attaining less inequality in the personal distribution of income are both viewed as problems in welfare. From the Author's Proface.

- SOIL SCIENCE SOCIETY OF AFERICA. Proceedings, 1948. 587 p. Madison, Wis., 1949. 56.9 So3 v.13
- U. S. BUREAU OF RECLAMATION. Control Valley Basin: a comprehensive departmental report on the development of the water and related resources of the Central Valley Basin, and comments from the State of California and Federal agencies. 431 p. Washington, D. C., Aug. 1949. (Senate document)
- U. S. BUREAU OF STANDARDS. Care and Repair of the House. 209 p. Washington, D.C. 1949. (N BS Circular 489)

The attractiveness of a heme, and the pride and satisfaction derived from it, depend a great deal on the way the home is maintained. This bulletin effers simple directions for dealing with leaky faucets, doors that stick, reroofing, walls that need repair, refinishing floors, and many other minor repairs and alterations.

U. S. OFFICE OF DOMESTIC COMMERCE. National Associations of the United States. 634 p. Washington, D. C., 1949. 157.55 N212

Although this book is For Reference Only many of you may be interested to knew about this "directory and review of the services and accomplishments of trade associations, professional societies, labor unions, farm cooperative chambers of commerce, better business bureaus, and other organizations which play a prominent part in American life".

Vol. 9. No. 7-8-9

Jul.-Aug.-Sept. 1950

NEW BOOKS

BALFOUR, LADY EVELYN BARBARA. The Living Soil: evidence of the importance to human health of soil vitality, with special reference to national planning. 270 p. 8th ed. rev. N. Y., Devin-Adair Co., 1950. 56.5 Bl9

"Nine printings of Lady Balfour's The Living Soil have been brought out in England since it was first published in 1943; it is now established as a scientific classic in soil biology and fertility relationships. This edition the first in the U. S., is completely revised and up to date."

BROEL, ALBERT. Frog Raising. 152 p. Detroit, Marlboro House, 1943. 415 B78

Discusses the history, commercial possibilities, habits and behavior, locale, breeding, feeding and marketing of frogs.

BROMFIELD, LOUIS. Out of the Earth. 305 p. N. Y., Harper, 1950. 31.3 B780

"Louis Bromfield makes such a good case for his methods of research as almost to persuade one that the experiment stations have the wrong approach to the study of soils, plants, animals, and man. Of course, Bromfield is an intelligent man, and he reads, travels, and talks to many persons in the course of a year, most of whom apparently come to visit him. As a result of his many contacts he is becoming an increasingly well-informed man, and this book shows it. Thus he no longer advocates throwing away the mold-board plow, eliminating the corn crop, farming with Acrtilizers, specializing in earthworm production, or doing a lot of other things that passing fancies suggest, but he puts each of these in its proper place. And he raises some very embarrassing questions for agricultural scientists to pender, such as his method of curing cattle of Bang's diseaso. All of this is set down in print in such an attractive manner that the reader finds himself entranced by the good earth as Bromfield portrays it."

Soil Science, Aug. 1950

CLAWSON, MARION. The Western Range and Livestock Industry. 401 p. N. Y., McGraw-Hill, 1950. (American forestry series) 40 C57

"The objective of this distinctive new book is to analyze and describe the range livestock industry from an economic viewpoint. The author draws upon his 20 years of professional work and 40 years of living in the rangelivestock region in considering the following points: the physical environment upon which the industry is closely dependent, the ownership and management of the extensive areas of land which the industry uses, the economic prob-

lems of ranch organization and operation, credit for the industry, and the factors affecting demand for, and supply of, range livestock products..."

Quoted from the book jacket

FORMAN, JONATHAN, ed. Water and Man: a study in ecology. 408 p. Columbus, O, io, Friends of the land, 1950.

"Water and Man is the invaluable record of what was said when nearly a score of top-light authorities on the subject of water and its relation to Man's life and work upon this Planet, were brought from all parts of the country by Friends of the Land, to address their Eighth Annual Conference on Censer-vation, Nutrition and Health.

"In 28 Chapters, annotated by Jonathan Forman, M.D., and with the addition of essays the editors, Jonathan Forman and Ollie E. Fink believed pertinent, water is brought into fecus. Although water has never ceased to command the attention of scientist, philosopher, and peet ... it is still reluctant to reveal its secrets."

HARDY, MARTHA. Tatoosh. 239 p. N. Y., Macmillan, 1946. 145 H22

Now you can read how a "lady lookout" lives week after week in a goldfish bowl on some prominent peak in the mountains. Although the author emphasizes the amusing details of her life spotting forest fires she develops a strong case for fire prevention and forest conservation.

HARVEY, ATHELSTAN GEORGE. Douglas of the fir: a biography of David Douglas, botanist. 290 p. Cambridge, Mass., Harvard Univ. Press, 1947. 120 D74H

"A noble tree, the world's greatest producer of structural timber, was named in honor of David Douglas who, in his short life-span of thirty-five years, made more contributions to modern horticulture than any other single individual. This is a biography of David Douglas intrepid explorer and naturalist whose travels extended throughout the Celumbia River territory and across the continent to Hudsen Bay and included California, the Sandwich Islands, New Caledonia and Hawaii".

American Forests, May 1948

PANSHIN, ALEXIS JOHN. Forest Products, their sources, production, and utilization. 549 p. N. Y., McGraw-Hill, 1950. 99.75 Pl9

"Employing a practical yet technical approach, this text is a bread introductory treatise which presents in concise form information on the origin, methods of conversion, and utilization of the principal primary and secondary forest products in America, as well as those from other parts of the world that are important in the American economy. Technical phases of manufacturing are treated without undue emphasis on minute technical and preduction details."

Quoted from the book jacket

PICTON, LIONEL JAMES. Nutrition and the Scil. 374 p. N. Y., Devin-Adair Co., 1949. 56.6 P58

"The soil as a milestone on the road to health is the theme of this book. The volume is based on the author's experience in private practice and in public health work and on reported experiences of other dectors in Europe,

Asia and elsewhere. The school to which Dr. Picton belongs reasons that good health depends upon good nutrition; good nutrition depends upon the quality of food we eat; the quality of our food in turn depends primarily upon the quality of the soil in which it is grown. Unfortunately, the book, while pointing out the value of organic and natural menures, does not properly credit the value of commercial fertilizer."

Fertilizer Review, July-Sept. 1949

SAMMIS, JOHN LANGLEY: Cheese Making: a book for practical cheesemakers, factory patrons, agricultural colleges and dairy schools. 12th ed. rev. 333 p. Madison, wis., Cheese Maker Book Co., 1948. 44 D35C

The title is self-explanatory. The book is divided into two sections, Part I. General facts for cheesemakers, Part II - Cheese varieties, their classification and manufacture.

SAUNDERSON, MONT HARRIS. Western Land and Water Use. 217 p. Norman, Univ. of Oklahoma Press, 1950. 282.003 Sa8

"For the years before the opening until now, the West has been looked upon as a land of wide-open spaces and plenty. But with the tremendous growth of population west of the Mississippi during and after the war years, this Promised Land today faces problems at least as serious as those of the congested East - problems of how best to husband its land and water resources in the interest of its own future and the nation's economy. For the West is a vast and arid land, limited as the humid East will never be, by sparse rainfall ... The chief concern of any corrective program, asserts Mr. Saunderson, must be the protection of water reserves - the prevention of a too rapid runoff and the consequent sedimentation of reservoirs ..."

U. S. BUREAU OF THE BUDGET. Techniques for the Development of a Work Measurement System. 65 p. Washington, D. C., 1950. 151.281 T22

"A hypothetical Case Study covering (1) the analysis of needs for work, measurement in relations of program planning, budget administration, and general management, (2) the selection of valid work units, and (3) the development of necessary forms and reporting procedures."

U. S. BURELU OF THE BUDGET. Work Measurement in Performance Budgeting and Menagement Improvement. 30 p. Washington, D. C., 1950. 151.281 W898

PHOTOPRINT SERVICE

Because of a reduction of the Library budget for the fiscal; year, the free photostat and microfilm services initiated a few years ago by the Library must be discontinued. However, continue to send your requests for these services to the Branch library and we will follow this procedure:

- 1. If available from our collection, we will fill the request by lending the original.
- 2. If not available in the Branch collection, we will forward the AD-245 to the Department Library.
- The Department Library will fill the request by lending the original or by notifying the Branch library that the publication is not available for loan and that a photoprint can be supplied at the prices quoted on the regular photocopy order form, Lib. 60 (rev.).
 - 4. Photoprints, in lieu of loans, will be supplied, on the same basis as they have heretofore been provided, to those bureaus which arrange for the lump sum service (Library Memorandum No. 8, paragraphs 4 and 5). To date these are BPISAE, EPQ, SCS and FCA.

PERIODICAL ROUTING

The San Francisco Branch Library is now doing the periodical routing for all of the Far West, i.e., California, Nevada, Oregon, Washington and Idaho. Send requests for this service to San Francisco. Please notify us promptly, by memorandum, of your change of address.

Our routing lists are very long. In order that those at the cone end of the list may see the periodicals before they are completely out of date, your cooperation is needed. Cross out your own name and forward the periodical to the next name on the list within 3 days.

MERRY CHRISTMAS
AND
A HAPPY NEW YEAR

NEW BOOKS

CRAFTS, A. S., CURRIER, H. B. & STOCKING, C. R. Water in the Physiology of Plants. 240 p. Waltham, Mass., Chronica Botanica, 1949. 463.32 C84

This volume "endeavors to bring together in readable form both the historical and the modern ideas about water and its role in the physiological processes of plants. Any satisfactory comprehension of water movements in living systems must be solidly based upon an understanding of the chemical and physical properties of water as a chemical compound. It is the recognition of this important point that has prompted the authors to focus attention upon water rather than upon the plant or on specific processes in the plant. This approach to an important segment of plant physiology is something of a departure from tradition, but is sound and logical in its recognition of the close dependence of physiology upon the physical sciences...."

FRANK, BERNARD, & NETBOY, ANTHONY. Water, Land, and People. 331 p. N.Y., Knopf, 1950. 292 F85

"With bold, masterly strokes the authors paint the dramatic picture of our mounting water troubles and the consequences for life in America. Before man laid careless hold of it, the land was a bountiful sponge. Then came those who tampered with the fine balance of nature. Each misdeed was small, but the cumulative effect was to destroy topsoil, start erosion, increase floods, silt rivers and reservoirs, and lower the store of water in the American earth. Now the land is not a sponge, but a drainboard.

"Water shortages, floods, and dust storms are not separate, unrelated events, but the more notorious symptoms of a process that is going on everywhere in the United States. Engineering solutions have been piccemeal and inadequate. Even the famous TVA is imperfect because it failed to adopt a watershed approach, and in the informed opinion of the authors nothing less will do.

"Their striking account of water problems is filled with fascinating local instances. Readers will be able to see their own familiar neighborhood as they never have before - to see the scars of malpractice on the hillsides and the evidences of the race against floods or water famine. They will be able to travel with a more knowing eye, seeing what has been done and undone on farms and in valleys, on mountaintops and by roadsides. The book ends with a series of specific recommendations for the solution of our water problems".

Book jacket

GRANGE, WALLACE BYRON. The Way to Game Abundance, with an explanation of game cycles. 365 p. N.Y., Scribner, 1949. 412.9 G762

"Game abundance is a function of suitable habitat..." Neither Legislation, law enforcement, game farms, seasons and bag limits, predator control, nor food planting are effective without it. "Suitable habitat is a function of the land. Its preservation and improvement can be accomplished only in terms of land, and with the control of land."

Such is the thesis of this ambitious tome, a thesis with which many game managers are femiliar. Written with perhaps a less than adequate background and too authoritatively, the book is not too easy reading yet its plus values are so outstanding that it is well recommended.

Reviewed by Fred Cronemiller, FS

ISRAELSON, ORSON W. Irrigation Principles and Practices: 2d cd. 405 p. N.Y., Wiley, 1950. 55 Is7 Ed.2

"This book presents the fundamental aspects of irrigation principles and practices. It reflects the progress made in the field since 1932. Special attention is given to the efficient conveyance of water and its application to and storage in soils of arid regions. The author includes much information that is important in the economic use of water in irrigation, and in the perpetuation of arid-region agriculture."

SAUNDERSON, MONT H. Western Stock Ranching. 247 p. Minneapolis, Univ. of Minn. press, 1950. 60.1 Sa8

"Successful management of a stock ranch today requires a thorough, specialized knowledge of the land, the livestock, and the financial methods involved. This facts-and-figures study by an expert with long experience as a range economist deals with the working problems of sheep and cattle ranching and provides authoritative information on how to operate a ranch profitably".
