REPORT OF THE DIRECTOR OF THE MINT.

## MESSAGE

FROM THE

# PRESIDENT OF THE UNITED STATES, 

transmitting<br>The report of the Director of the Mint.<br>February 9, 1855. -Laid upon the table, and ordered to be printed.

To line House of Representatives:
I transmit herewith the report of the Director of the mint, showing the operations of the mint and its branches for the past year.

FRANKLIN PIERCE.
Washington, February 8, 1855.

Mint of the United States, Philadelphia; January 30, 1855.

Sir: I have the honor to submit the following report, in compliance with the first section of the mint law, which requires that, "in the month of January of every year the Director shall make report to the President of the United States of the operations of the mint, and its branches, for the year preceding."

There are obvious reasous in favor of a change in the law above referred to, so as to require the report of the Director to be made as soon as convenient after the close of the fiscal year, and that it should exhibit the operations of the mint, its branches, and the assay office, during the fiscal instead of the common year. I beg to recommend this modification of the law to your favorable notice.

The deposites received and coinage executed at the principal mint, (Philadelphia,) during the year 1854 , were as follows: Gold deposites received, $\$ 36,269,38868$; gold coins struck, $\$ 20,049,799$; fine gold bars, \$17,643,270 5S. Silver deposites, including the silver parted from California gold, and the silver purchased pursilant to the act of 3d March, $1853, \$ 4,480,741$ 14; silver coinage exccuted was, \$5,373,270; the copper coinage, $\$ 42,63835$. Total deposites of gold and silver during the year, $\$ 40,750,12982$; and the total coin-
age, including the fine gold bars, was $\$ 43,108,97793$; this coinage was comprised in $33,919,921$ pieces.

The deposites of gold received at the branch mint at New Orleans during the ycar were of the value of $\$ 1,139,13543$; and the deposites of silver, including silver parted from the California gold, and the amount purchased, were of the value of $\$ 1,311,70356$. The gold coinage amounted to $\$ 1,274,500$; the silver coinage to $\$ 3,246,000$; aggregate deposites of gold and silver, $\$ 2,450,83899$; total coinage of gold and silver, $\$ 4,520,500$, comprised in $10,332,750$ pieces. The coinage exceeds the deposites in consequence of this branch having a large amount of bullion remaining from the deposites of the previous year; and this remark applies also, to some extent, to the mint and the other branches.

The deposites at the branch mint at Dahlonega, in gold, were of the value of $\$ 281,93206$, including silver parted therefrom, of the value of $\$ 1,70661$. The coinage (gold) amounted to $\$ 292,760$, comprised in 62,228 pieces.

The deposites of gold received at the branch mint at Charlotte, were of the value of $\$ 213,60621$; the coinage executed amounted to $\$ 214,65250$, comprised in 46,578 pieces.

The last year has been marked by the establishment of an additional branch mint and an assay office. The former, at San Francisco, in California, commenced receiving deposites on the 3d of April last, from which time to the end of the year it has received deposites to the value of $\$ 10,404,560$. The coinage thereat during the same period amounted to the sum of $\$ 4,084,207$; and the manufacture of fine bars of the value of $\$ 5,86316$; and of unparted bars, prepared, assayed, and stamped, to the value of $\$ 5,641,504 \quad 05$-making a total of $\$ 9,731,57421$. There were some causes connected with the supply of materials, particularly of the article of parting acid, which has to be manufactured at San Francisco, that retarded and diminished the coinage operations of this branch of the mint during the last year. Every effort has been made to remove these causes, and I have reason to belicve that its operations will hereafter be greatly increased.

The assay office, at New York, commenced operations on the 10 th of October last. The deposites received up to the end of the year amounted to $\$ 9,337,200$ 69, of which amount $\$ 76,307$ was in silver, principally parted from California gold. The amount of fine bars prepared, assayed, and stamped at that office, during this period, was $\$ 2,888,03918$; and the further sum of $\$ 1,050,000$, in fine bars, was transmitted from the mint at Philadelphia, and paid out at that office during the commencement of its operations. Of the amount received, the sum of $\$ 6,362,56557$ was deposited for coins. This last amount, pursuant to the 11 the section of the assay office law, was transferred to the mint of the United States for coinage.

In stating the aggregate deposites of gold at all the mints and the assay uffice, a deduction must be made for unparted birs prepared at San Francisco, and afterwards deposited at the mint and the assay office for coin or fine bars ; and also of the amount received at New York for coinage and afterwards transferred to the mint. Making
this allowance as well as it can be ascertained from the reports of the several institutions, the entire deposites of the year in gold were $\$ 49,987,22223$; silver deposites, including silver purchases, $\$ 5,871,-$ 75982. : total gold and silver deposites, $\$ 55,8,58,98205$. The coinage for the sume period was as follows: Gold coins, including hars, $\$ 52,094,59547$; silver coins, $\$ 8,619,270$; copper coins, $\$ 42$, 63883 ; total coinage $\$ 60,756,50382$, comprised in $44,645,011$ pieces.

The amount of gold of domestic production reccived at the several mints and the assay office during the year was $\$ 49,217,021$; of which sum $\$ 48,892,794$ was from California; the remaining part from the Atlantic States, except a few deposites from the Territory of New Mexico. There was desposited during the year at the principal mint and the branch at New Orleans, gold from Australia to the value of $\$ 42,000$.

The silver contained in the gold from California is not included in the statement of the amount of the gold deposites from that State. It is separated from the gold in preparing the latter for coinage, or for manufacturing fine bars. The value of the silver thus parted from the gold during the year was $\$ 328,198$ 83. This does not include the amount of silver purchased for coinage pursuant to the act of March 3, 1853. During the last year the sum purchased was $\$ 5,494,83992$, and the silver coins issued amounted to $\$ 8,619,270$. The sum issued of silver coins at the reduced standard weight, authorized by the act before mentioned, is as follows: In 1853, $\$ 8,654,161$; in 1854, $\$ 8,619,270$; making a total of $\$ 17,273,431$ of the half-dollar and lower denominations struck, distributed, and put into circulation, except the sum of $\$ 584,80833$ in the treasury of the mint, and ready for distribution and circulation.

In my last report, I presented some views showing the propriety of the reduction in the standard weight of the silver comage, and the beneficial results which hard attended it. We have continued to experience such results, especially in those more favored portions of the United States where the circulation of small notes is prohibited. The soundness of the apprehension expressed in my last report, that the reduction in the standard weight of the silver coins might prove insufficient, has been confirmed by the quoted value of silver during the past year at London, the market of which city regulates its commercial value. We purchased silver at the close of 1853 at 121 cents per standard ounce, and issued it at 125 cents, in accordance with the law before referred to ; but as it continued to appreciate, we were obliged to offer $122 \frac{1}{2}$ cents per ounce, in order to obtain silver for coinage. Continuing to appreciate, it attained its maximum in November last ( 1854, ) when it was quoted at $123 \frac{3}{4}$ cents per ounce. It has sinco fallen to about $122 \frac{1}{4}$. An appreciation of $1 \frac{1}{4}$ cents per ounce above the quotation of November would have rendered it fully equal in value to that of our present issue; and it is highly probable that a still further appreciation, however slight, would have induced the exportation of our new silver coin, and rendered a further reduction in its weight necessary. Fortunately, no such reduction is required ; and we have reason to believe that the standard weight as fixed by the act of March 3, 1853, was well chosen. That the reasons presented in
my last report why no great or sudden ehanges need be apprehended in the relative value of gold and silver are well founded, the eontimued influx of gold from California and Australia, eompared with the slight ehanges in the relative value of the two metals during the past year, abundantly proves.

The three-dollar coin, authorized by the last Congress, was issued from the mint in May last; sinee which time there have been struck of this coin, in value, the sum of $\$ 415,854$ at the principal mint, and $\$ 75,360$ at the branehes. The demand for it has not been great, owing, perhaps, to the fact that it does not harmonize with the decimal system, or the division by halves and quarters, to whieh the people have been so long aceustomed.

The devices of the gold dollar have been changed, so as to correspond with those prepared for the three-dollar piece, viz: on the obverse, an ideal head, emblematie of Ameriea, enelosed within the national legend ; and on the reverse, a wreath eomposed of wheat, cotton, corn, and tobaeco, enelosing the denomination and date of the eoin. The size has been increased one-tenth of an ineh, whieh renders the coin more easily handled, and, therefore, more convenient for eirculation. The weight and standard value are, of eourse, unchanged.

The aet of March 3, 1853, required the three-cent picee to be of standard fineness ( $\frac{900}{100}$ ths, ) instead of $\frac{750}{100}$ ths, as direeted by the law which authorized their issue. The new eoin is distinguished from the former by having a sprig of laurel and a bundle of arrows on the reverse.

The coinage charge of the half of one per cent, authorized by the aet of February 21, 1853, is as follows:
Mint at Philadelphia
\$104,853 32
Braneh mint at New Orleans. 6,372 50
Branch mint at Dahlonega. 1,46380
Branch mint at Charlotte 1,073 26
Branch mint at San Franeiseo
20,42103

## Total at all the mints for the year 1854 <br> 134,183 91

These sums will be paid into the treasury of the United States pursuant to the sixth scetion of the act before referred to.

The increased price paid for silver bullion for coinage after the first of July last, has diminished the profit to the govermment on the siber coinage, the eost of distribution being also a charge upon the same; there will, however, be a balance at the principal mint of about $\$ 108,000$, to be transferred to the treasury of the United States.

The propriety of the establishment at the mint of a medal department is respectfully suggested, and as a emuvenient mode of bringing the subjeet to your notice, I attach to this report a eopy of my letter of the 5 th of April last to the Secretary of the Treasury in relation to it. Since the date of that communication, the importance of having some legistation on the subject has been further exhibited by the in:creased applications from cities, institutes, and soeieties, to strike medals at the mint. I have also received communications from the
historical societies of several of the States in relation to the suljeet of striking copies of the various historical metals heretofore ordered by the government. The dies of nearly all of these medals are in the mint. To provide for the striking of copies of them in bronze or other metals, and sumplying them to our various national and State institutions, is one of the objects embraced in the projet of a law which accompanies the letter above mentioned. I may add that a few of the dies are in the musem of the mint at Paris, among which is that of Washington before Boston, and Gencral Green at Entaw Springs. It is probable that on application to the French government these dies couldelue recorered.

A change in the copper coinage seems desirable, with it view to the substitution of a lighter and more convenient coin for the cumbrous cent now nsed. As I have recently presented my views upon this subject in a report to the Treasury Department, I have deemed it proper to append to this report a copy of that commonication.

I also annex to this report several tabular statements exhibiting in detail the operations of the mint and its branches, and presenting some other statistics relating to the sulject of coinage, the purchase of silver, and the domestic production of the precions metals.

I lave the honor to be, with great respect, your faithfinl servant, JAMES ROSS SNOWDEN, Director of the U. S. Mints.
To the President of tie United States.

No. 1.
Mint of the United States, Philaddplica, April 5́, 18 ̄4.
Sir: Being invited by your favor of the 18 th ultimo, in reply to the suggestions contained in my letter of a previous date, I present a few additional remarks in relation to the propriety of establishing a medal department in the mint.

No provision by law has heretofore been made for the preservation of the dies from which medals were ordered to be strinck, nor for taking or preserving copies of them. In fact the dies have, by some of the recipients of the honor of a public medal, been regarded as their property, and not that of the government. But throngh the personal efforts of some of the officers of the mint, assisted and encouraged by several of the Secretaries of the Treasury, most of the dies have been retetined or recorered, and they are now in the custody of the chief coiner of the mint.

I present herewith a copy of the proceedings of the Pennsylvania Historical Society on the subject under consideration, torether with a list of the dies now in the mint. The list embraces sixty-eight in number, including the Presidential medals. Some others, which were made in France, anong which is that of Washington before Boston, and General Green at Lutaw, are now in the mint museum at Paris. A few are supposed to be lost; but, by renewed efforts,
might possibly be regained. But as it requires great eare in their preservation, they are, no doubt, if in existence, greatly injured, and perhaps defaeed.

It seems proper that the government should take eharge of this important subject, by establishing a medal department connected with the mint, provision to be made for taking copies in bronze of the dies preserved in the mint, as well as those whieh may hereatter be ordered. It would seem appropriate that each State, or the Historieal Society of each State, should be supplied with such copies ; and other eopies in gold, silver, and bronze should be struek and disposed of under sueh general regulations as the Director of the mint, with the approbation of the Secretary of the Treasury, might prescribe. Such an enactment, in addition to the public objects secured, would relieve us from the embarrassment which attends the present system of striking medals in the mint, in relation to which I had the honor to present some objections in my letter of the 30th of August last. I repeat here, that the striking of medals at the mint ought not to be the source of profit or gain to any officer or workman engaged therein, but should be performed muder the official salary or per dien eompensation which they reeeive.

I herewith enclose a projét of a law, which I present to your consideration.

I have the honor to be, with great respect, your faithful servant, JAMES ROSS SNOWDEN, Direetor.

> Hon. James Gutirie, Secretary of the Treasury, Washington City.

## HISTORICAL SOCIETY OF PENNSYLVANIA.

Philadelpha, Felruary 27, 1854.
The matter of a commmication addressed by the secretaries and librarian to Hon. J. Ross Snowden, Director of the United States mint, containing inquiries and a request coneerning the national medals, eoming up for diseussion-

Mr. Snowlen said, it gave him much pleasure that this subjeet had been bronght to the attention of the society. National and public medals are important monuments of history, and their preservation is well worthy the attention of this soeiety, and others of similar character in the United States. Most of the gold and silver medals, either from reverse of fortune or from some other cause, find their way to the inelting-pot. It wonld be a higher compliment to the reeipients of the honorable distinction in question, if Congress shonld authorize copies in bronze to be struck and presented to each Historical Society in the United States. Heretofore no legal provision has been made for the preservation of such copies, or the taking care of the dies from which the medals were struck. Fortmately, however, most of the dies heretofore made have been procmed and preserved at the mint of the United States. Some of them were procured with mueh diffieulty.

Mr. Snowden's belief was, that nearly sixty medals of a national and public character have been made, of which the dies of all but five or six are at the mint in this city. A full set of copies in bronze would eost about one hundred and forty dollars. A small appropriation by Congress would supply each State in the Union with a set ; and hereafter when medals are voted, provision could be made for supplying copies, to be distributed in the manuer proposed.

On motion, it was
Resolved, That Hon. J. Ross Snowden be requested to correspond with the Secretary of the Treasury, or take such other measures as may seem to him advisable, to effeet the objects developed in his remarks on the distribution of the national medals.

Extracted from the minutes.
[L. S.]

THOMAS BIDDLE, Jr.,<br>Recording Secretary.

## List of Dies of National Medals, preserved at the Mint of the United States.

1. Horatio Gates,-Obverse: Horatio Gates duci strenuo ; Comitia Americana. Reverse: Salus regionum septentrional, hoste ad Saratogam, in dedition. accepto. Die xvir Oct. mbccuxxvir.
2. Daniel Morgan.-Obverse: Danieli Morgan duci exereitus; Comitia Americana. Reverse: Victoria libertatis vindex. Fugatis aut captis eaesis ad Cowpens hostibus. xVII Jan. ndecluxxi.
3. Isaac Hull.-Obverse: Peritos arte superat Jul. mdccoxir, Aug. certamine fortes. Isaacus Hull. Reverse: Horæ momento vietoria. Inter Const. Nav. Amer. et Guer. Angl.
4. Jacob Jones.-Obverse: Jacobus Jones virtus in ardua tendit. Reverse: Vietoriam hosti majori celerrime rapuit. Inter Wasp Nav. Ameri. et Frolic Nav. Ang. Die xvir Oet. mbccoxir.
5. Stephan Decatur.--Obverse: Stephanus Deeatur, Navarchus, pugnis pluribus, victor. Reverse: Occidit signum hostile sidera surgunt. Inter Sta. Uni. Nav. Ameri. et Macedo. Nav. Angr. Die xxv Oetobris mDCccilif.
6. William Bainbridge.-Obverse: Gulielmus Bainbridge patria victisque laudatus. Reverse: Pugnando. Inter Const. Nav. Ameri. et Jav. Nar. Angl. Dic xxix Decem. mdcccxir.
7. Oliver H. Perry.-Obverse: Oliverus H. Perry princeps stagno Eriense-classim totam contudit. Reverse: Viam invenit virtus aut facit. Inter class. Ameri. et Brit. Die x Sept. mpccexmr.
S. Oliver Hazard Perry-Obverse: Oliverus Hazard Perry pro Patria vicit; presented by the government of Pennsylvania. 1st reverse: "We have met the e..emy, and they are ours."-Perry. To _-. In testimony of his patriotism and bravery in the naval action on Lake Eric, September 10, 1813. 2d reverse: "We have met the enemy, and they are ours." British fleet on Lake Eric captured September 10, 1813.
8. Jesse D. Elliott.-Obverse: Jesse D, Elliott nil actum reputans si quid superesset agendum. Reverse: (Same as Perry die, No. 7.)
9. IV. Burrous.-Obverse: Vietoriam tibi elaram, Patriæ mæs-tam-W. Burrows. Reverse: Vivere sat vineere. Inter Enterprise Nav. Ameri. et Boxer Nav. Brit. Die ry Sept. mbecceriri.
10. Educard R. McCall.-Obverse: Edward R. McCall, navis enterprise prefectus-sie itur ad astra. Reverse: (Same as of die No. 10.)
11. James Lawrence.-Obverse: Jac. Lawrenee, dulee et decorum est pro Patria mori. Reverse: Mansuetud. maj. quam vietoria. Inter Hornet Nav. Ameri. et Peacock Nav. Ang. Die xxiv Feb. mdccexiri.
12. T'homas Macdonough.-Obverse: Tho. Maedonough, stagno Champlain clas. reg. Brit. Superavit. Reverse: Uno latere percusso alterum impavide vertit. Inter elass. Ameri. et Brit. Die XI Sept. mbcccaniII.
13. Robert Henley.-Obverse: Rob. Henley, Eagle prefeet. palma virtu, peraternit, florebit. Reverse: (Same as of die No. 13.)
14. Stephen Cassin.—Obverse: Step. Cassin, Tieonderoga prefect. quæ regio in terris nos, non pleana lab. Reverse: (Same as of die No. 13.)
15. L. Warrington.-Obverse: Ludovieus Warrington, Dux Navilis Amer. Reverse : Pro patria paratus aut vincere aut mori. Inter Puaeock Nav. Ameri. et Epervie Nav. Ang. Die xarx Mar. mdccirv.
16. Johnston Blakeley.-Obverse : Johnston Blakeley, Reip Fœed. Am. Nar. Wasp Dux. Reverse: Eheu! Bis vietor patria tua te luget plauditg. Inter Wasp Nav. Ameri. et Reindeer Nav. Ang. Die xxyif Junius mbeccarv.
17. C'herles Stewart.-Obverse: Carolus Stewart, Navis Amer. Constitution Dux. Reverse: Una victoriam eripuit ratibus binis. Inter Constitu. Nav. Ameri. et Levant et Cyane, Nav. Ang. Die xx Febr. mDCocxy.
18. Winfield Scolt.-Obverse: Major General Winfield Seott. Reverse: Resolution of Congress, November 3, 1814: Battles of Chippewa, July 5, 1814 ; Niagara, July 25, 1814.
19. James Miller.-Obverse: Brigadier General James Miller. "I'll try." Reverse: Resolution of Congress, November 3, 1814: Battles of Chippewa, July 5, 1814; Niagara, July 25, 1814; Eric, September 17, 1814.
20. Edmund P. Gaines.-Obverse: Major General Edmund P. Gaines. Reverse: Resolution of Congress, November 3, 1814: Battle of Erie, August 15, 1814.
21. ''eter B. Porter.-Obverse: Major General Peter B. Porter. Reverse: Resolution of Congress, November 3, 1814: Battles of Chippewa, July 5, 1814 ; Niagaria, July 25, 1814; Erie, September 17, 1814.

2:3. Jacob Brown.-Obverse: Major General Jacob Brown. Reverse: Resolution of Congress, November 3, 1814: Battles of Chippewa, July 5, 1814; Niagara, July 25, 1814; Eric, September 17, 1814.
24. Fileazer IV. Ripley.-Obverse: Brigadier General Eleazer W. Ripley. Reverse: Resolution of Congress, November 3,"1814: Bat-
tles of Chippewa, July 5, 1814; Niagara, July 25, 1814; Erie, September 17, 1814.
25. Alexander Macomb,-Obverse: Major General Alexander Macomb. Reverse: Resolution of Congress, November 3, 1814: Battle of Plattshurgh, Spptember 11, 181t.
26. James Biddlle.-Obverse: The Cungress of the U. S. to Capt. James Biddle for his gallantry, good conduct, and services. Reverse: Capture of the British ship P'enguin by the U. S. slip Hornet, off Tristan D'Acumha, March XxiII, MDecexy.
27. Andrew Jectison.-Obverse: Major General Andrew Jackson. Reverse: Resolution of Congress, February 27, 1815. Battle of New Orleans, January 8, 1815.
28. Isaac Shelly.-Obverse: Governor Isaac Shelby. Reverse: Battle of the Thames, October 5, 1813 : Resolution of Congress, April 4, 1818.
29. William H. Harrison-Obverse: Major General William H. Harrison. Reverse: Resolution of Congress, April 4, 1818: Battle of the Thames, October 5, 1813.
30. George Croghan.-Obrerse: Presented by Congress to Colonel George Croghan, 1835. Reverse: Pars magna fuit: Sandusky, 2 August, 1813.
62. Zachary Taylor--Obverse: Major General Zachary Taylor. Reverse: Resolution of Congress, March 2d, 1847: Monterey, September, 1848.
63. Zachary Taylor.-Obverse: Major General Zachary Taylor. Reverse: Resolution of Congress, July 16th, 1846: Palo Alto, May 8th, 1846; Resaca de la Palma, May 9th, 1846.
64. Zachary Taylor.-Obverse: Major General Zachary Taylor. Resolution of Congress, May 9, 1848. Reverse: Buena Vista, Feb. 22 and 2:3, 1847.
65. Winficld Scott.-Obverse: Major General Winfield Scott. Resolution of Congress, March 9th, 18 48 . Reverse: Vera Cruz, Cerro Gordo, Contreras, San Antonio, and Churubusco, Molino del Rey, Chapultepec, city of Mexico.
66. IV inficld Scott.-Obverse: Winfield Scott. The commonwealth of Virginia presents this medal to Major General Winfield Scott, as a memorial of her admiration for the great and distinguished services of her son whilst Commander-in-clief of the American armies in the war with Mexico, 1847. Reverse: Fecit quod cogitavit. From Virginia.
67. "Bache Medal."-Obverse: The Treasury Department of the United States. Coast Survey to - Reverse: For gallantry and humanity, Dec., 1848.
68. "Somer's medul."-Obverse: Somers IVavis Americana. Ante Vera Cruz, Dec. 10th, 1846. Reverse: Pro vitis Americanorum conservatis.
69. Obverse: G. Washington, Pres. Unit. Sta. Reverse: Commiss. resigned; Presidency relinq., 1797.
70. Henry Lee.-Obverse: Henrico Lee, legionis Equit Prafecto. Comitia Americana. Reverse: (Not in the mint.)
71. Obverse: Let us look to the Most High, who blessed our fathers
with peace; 1757. Reverse: Kittanning destroyed by Col. Armstrong, September 3, 1756.
58. Thomas Truxton.-Obverse: Bust of Capt. Truxton. No inscription. Reverse: By vote of Congress to Thomas Truxton, 24 Mar., 1800. (This medal was presented for revolutionary services.)

## Indian Medal Dies.

Obverse : Containing name and date of inauguration of the President. Reverse: The inscription "Friendship and Pcace" over joined hands, or tomahawk and pipe.

31, 32, 33. Thomas Jefferson.-Three sizes.
34, 35, 36. James Madison.-Three sizes.
37, 38, 39. James Monroe.-Three sizes.
40, 41, 42. John Quincy Adams.-Three sizes.
43, 44, 45. Andrew Jackson.-Three sizes.
46, 47, 48. Martin Van Buren.-Three sizes.
49, 50, 51. John Tyler.-Three sizes.
52, 53, 54. James K. Polk.-Three sizes.
55,56,57. New Reverses.-Three sizes.
59, 60, 61. Zachary Taylor.-Three sizes.

Projét of a law to establish a Medal Department in the mint.
Sec. 1. Be it enacted, \&c., That there shall be established at the mint of the United States a medal department, to be under the direction and control of the Director of the mint ; but the Director may designate such officer or person as he may deem proper to have the immediate charge of the same, under his direction, and he may employ such workmen as he may deem necessary.

SEC. 2. Medals of gold, silver, and bronze may be struck for any department of the government, for any State or society, or person or persons, under such general regulations as the Director of the mint, with the approbation of the Secretary of the Treasury, may prescribe.

Sec. 3. The machinery of the mint, not otherwise employed, and applicable to the purposes of this department, may be so applied under such restrictions as the general operations require, at the discretion of the Director.
Sec. 4. An account of the receipts and expenditures of this department shall be kept by such person, and in such manner, as the Director may prescribe, an abstract of which shall be quarterly transmitted to the 'Treasury Department; the profits which may accrue therefrom shall be applied to the enlargement of the cabinet of medals and coins at the mint, and for supplying national and scientific institutions with copies of the public medals.

No. 2.

## Mint of tie United States, <br> Philadelphia, December 13, 1854.

Sir: In compliance with the request contained in your letter of the 11 th instant, I have cansed to be struck, and herewith forward, one hundred specimens of the proposed cent therein referred to; and have the honor now to recapitulate the various points of information on that subject which have heretofore been communicated to the department. In so doing, it will, perhaps, best subserve the wishes of the department, and of the committees in Congress, if I shonld present the projét of a law, in several sections, with explanatory remarks appended to each section.

## AN ACT relating to the coinage of cents.

Sec. 1. Be it encucted, rec., That from and after the passage of this act, the standard weight of the cent coined at the mint of the United States shall be ninety-six grains, or two-tenths of one ounce troy, with no greater deviation than four grains in a single piece; and that the coinage of the half-cent shall cease.

Remarks.-The present weight of the cent is 168 grains; at the current price of copper, the government is barely saved from loss by the coinage, and is every day liable to become an actual loser. Yet the experience of every country has settled this point, that the lowest denominations of coin are not made acceptable on account of their market value, but on account of the government stamp, and the convenience of having such pieces for small transactions. For the proposed reduction of the weight of the cent, we have abundant precedents. In 1792 the legal weight was 264 grains; early in 1793 it was reduced to 208 grains ; in 1796, in pursuance of legal authorization, President Washington issued a proclamation reducing the cent to 168 grains-the present legal standard. In France, at this day, the piece of ten centimes-say two cents of our, money-weighs less than our cent, yet it passes freely. Dealers all over the country will fecl obliged for such an unloading of copper as the change from 168 to 96 grains would produce. The allowance of four grains for deviation is a customary "remedy of the mint," and is neeessary for practical operations. The omission of the half-cent seareely needs a remark. It is useless. People will not take the trouble to make a cent with two pieces of money.

Sec. 2. Be it further enacted, That the said cent shall be composed of copper, with any admixture, not exceeding five per cent. in weight, of metals which may render it more suitable for the purposes of coin. And the devices upon said cent shall express its country, denomination, and date of coinage.

Remarks.-In regard to the various experiments recently made here, as to the desirableness of introducing a german-silver cent, I presume it will not be necessary here to recapitulate the correspondence which is already in the possession of the department, and which, I prcsume, will be laid before the committee in Congress to whom it
is your desire to refer this subject. A decided preference for the copper coin, if its weight can be reduced to 96 grains, is the conclusion to which my mind is brought, after a carcful consideration of the advantages and objections on both sides. The allowance of five per cent. for the admixture of other metals-tin and zinc being intendedis to make an alloy which will improve the color and reduce the liability to corrosion and foulness. It is the same mixture which the French are using for coinage, under the name of bronze, but I have avoided that term as being vaguely applied among us to very different metallie mixtures and colorings.

Sec. 3. Be it further enaeted, That it shall be at the discretion of the Director of the mint, with the concurrence of the Seeretary of the Treasury, to eause the planchets for the cent coinage to be prepared at a private manufactory, as hitherto preseribed by law, or more direetly under the supervision of the Director, or such officer of the mint as he may designate. And the profits arising from the sale and distribution of said coinage, after deducting expenses of transportation as provided for in the 36th section of the act of Jan. 18, 1837, relative to the mint, shall be paid, from time to time, into the treasury of the United States.

Remarls.- It seems quite obvious that the mint ought not to be eompelled, as it now is by law, to procure its copper planchets for coinage from a private or remote manufactory, and especially if the planchets are to be alloyed to a definite per-centage. This section will only confer the choice upon the Director, with the approbation of the Secretary of the Treasury, of having this business done under his own direction. It is not intended to find any fanlt with the present manufacture of planchets, which, in fact, is quite satisfactory.

Sec. 4. Be it further enacted, That it shall be at the discretion of the Director of the mint, with the concurrenee of the Secretary of the Treasury, at any period not earlier than one year after the passage of this act, and upon due public notice, to exchange the cents provided for by this act for those now eurrent, upon snch terins as may insure a sufficient supply of copper from that source, and with a view to the gradnal withdrawal of the old eoins from circulation. But no other eopper coins or tokens shall be so received.
licmarlis.- The impoliey and incongruity of having two ecuts, of quite different weights, current at the same time, suggests the propriety of conferring this discretionary power. The coinage of cents and half-eents, up to May last, amomonted, in round mumbers, to $\$ 1,520,600$-equal to, say 1,620 tons-the larger part of whieh are probably now in circulation; and it is well known that some parts of the conntry are erowded with them. On this subject we have frequent complaints, without the power of providing a remedy. The proposed cent of 96 grains, assuming the planchets to cost $41_{3}^{2}$ cents in pound, avoirdupois, would afford a profit of 43 per eent. The new bronze eoinage of France, assuming the same cost of planchets, yields a profit of 54 per cent. We are, therefore, within the line of safe precedent, considering that the French coin passes freely. But in addition to this, it should be noted, that much of the importance of the new cent project consists in relieving the country from the present ponderous
cent; and if will require, as is probahle, 50 cents a pound to gret in the old cents, and a considerable per-centage for working them up into new planchets, the profit, as alove statel, will be considerably diminished; so much so as to obviate oljection on that score. It is quite important to keep in riew the two ohjects of the law, namely, the issue of a light and convenient coin, and the withdrawal of a cmmbrons one; and, to accomplish both objects, a considerable apparent profit will he necessary. In the matter of making the exchange, the mint should have a sort of ubiquity, by paying the expenses of transportation both ways; so that nur fellow citizens at Milwankic or Tallahassee would be placed on the same footing as those in Philadelphia.

I may say, in regard to the danger of counterfeiting, that it would scem innossible to push into circulation, to any profitable extent, a coinage of so low a denomination. The numerons copper tokens of 1837 were openly issued in the exigency of the times ; but the issue of a publie notice that the law would be enforced against them, inmediately put a stop to their circulation.

SEe. 5. And be it further enacted, That the coin provided for in this act shall be a legal tender in payment of debts to the extent of ten cents in ary one payment.
liemark:-The olject of this section is to give a legal importance and value to the new cent, in addition to the authoritative stamp of the mint. The present cent is not a legal tender.

In conclusion, I may remark that whilst I at present prefer the proportions of 95 per cent. copper and 5 per cent. of zine and tin, as composed in the specimens presented, yet I have purposely avoided naming these metals in the $2 d$ section, in order that we may, if we think proper, use nickel in the composition. As to which point, I will cause some experimeuts to be made for the purpose of ascertaining whether a further inprovement is not attainable; but these inquiries need not prevent immediate action upon the proposition herein presented.

I have the honor to be, with great respect, yom faithful servant, JAIIES ROSS SNOWDEN, Director.

## Hon. James Guturie,

Secretary of the Treasury, Washington City.

> Mint of the United States, Philadelplia, June $24,18 \check{4}$.

The Director of the mint gives notice that from and after the 1st of July, 1854 , the price to be paid for silver purchased at the mint will be one dollar twenty-two and a half cents ( $\$ 122 \frac{1}{2}$ ) per ounce of standard fineness (nine-tenths,) as determined by assay at the mint.

The silver tendered for sale will be received and weighed and a receipt given therefor. On the report of the assayer the standard weight will be determined, and the net value, calculated at the above rate, will thereupon be paid to the owner or his order in gold or silver coins at his option.

For the information of bulion dcalers, it may be stated tha $\stackrel{\iota}{\iota}$, ac-
cording to the above rate of purchase, the yield per ounce gross, of the various classes of silver coin usually in the market, will be about as follows:
Five francs, whole dollars (except "hammered,") and United States coins issued since 1837, and prior to April, 1853, except three-cent pieces
United States coins of mixed dates, and the Spanish and Mexican parts of a dollar, excluding pistareens.
German crowns
119
German thalers 102
The prices fixed by a former circular of December 21, 1853, will be continued as to the branch mints until further notice.

JAMES ROSS SNOWDEN, Director.
Note.-By instructions to the branch mint at New Orleans, dated December 23, 1854, and to the branch mint at San Francisco, dated January 4, 1855, the prices fixed by the above circular were authorized to be paid for silver bullion furchased at these institutions.
A

## REPORT

## OF THE

## SECRETARY OF THE TREASURY,

COMMUNICATING
A report of the Director of the United States Mint on the fineness and value of certain foreign gold and silver coins.

## Treasury Department, <br> February 8, 1855.

Sir : I have the honor to transmit, herewith, the report of the Director of the United States mint, " of the fineness and value of certain foreign gold and silver coins, as required by the acts of Congress of January 25, 1834, and March 3, 1843."

I am, very respectfully, your obedient servant,
JAMES GUTHRIE, Secretary of the Treasury.

Hon. Jesse D. Bright,<br>President pro tem. United States Senate.

> Mint of the United States, $$
\text { Philadelphia, January } 29,1855 .
$$

Sir: I present the following report on the fineness and value of certain foreign gold and silver coins, as required by the acts of Congress of January 25, 1834, and March 3, 1843; said coins being therein made a legal tender upon certain terms, to be ascertained by this report.

> GOLD COLNS.

The gold coins of Great Britain, if not less than $915 \frac{1}{2}$ thousandths fine, are receivable at 94.6 cents per pennyweight; gold coins of France, not less than 899 thousandths, at 92.9 cents; gold coins of

Spain, Mexico, and Colombia, " of the fineness of 20 carats $3 \frac{7}{8}$ carat grains," which is equivalent to 869.14 thousandths, at 89.9 cents ; and gold coins of Portugal and Brazil, not less than 22 carats, ( $916 \frac{2}{3}$ thousandths,) at 94.8 cents. Of the above, only the coins of Great Britain and France fulfil the terms of the act, and there is an upward tendency in the fineness of British coins; but neither class has been reccived here for recoinage for more than two years past, except in trifling parcels, owing to the course of trade, which has cut off the importation of forcign gold coins. The standards of gold coinage in New Granada (formerly a State of Colombia) are so entircly altered as to render the act of Congress obsolete in respect to that item. The fineness of the doubloon has raised to about 894 thousandths, but by decrease of weight it has fallen in value from about $\$ 1560$ to about $\$ 1530$.

## SILVER COINS.

The dollars of Spanish-American coinage, and those re-stamped into reis of Brazil, as also the five-franc pieces of France, were also made receivable at certain ratcs, by the acts before mentioned; but as those coins are purchased at the mint for recoinage at a premium, the provision for making them current may be considered nugatory and obsolete. I subjoin, however, a tabular statement of their average weights and fineness, and their value per picce and per ounce, according to the rate at which our whole dollars are coined; and in the last column I have stated their value per ounce, as paid for by purchase at the mint. There is much uncertainty, however, about the dollar of Central America, whose coinage is quite irregular as to fineness.

In general the halves, quarters, \&e., of these dollars, are very near in fineness to the whole picee; but the public should be aware that half and quarter dollars of Bolivia, commencing with the date 1830, and those of South Pern of 1835 to 1838, were greatly debased in quality, and are worth only about three-fourths of their nominal valne. Such pieces are occasionally seen in our circulation. The fractions of a dollar coined within a few years in Central America, or rather in Costa Rica, are still more depreciated, and very irregular, but their mis-shapen appearance will be enongh to exclude them from currency here.

| Denomination. | Weight. | Fineness. | Value in cents, without premium. |  | Price at mint in cents. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Grains. | $\begin{gathered} \text { Thou- } \\ \text { sandths. } \end{gathered}$ | Per piece. | Per ounce. | Per ounco. |
| Spanish pillar-dollars, and Brazilian restamped |  | 900 | 100 | 116. 36 | 122.50 |
| Dollars of Mexico, mixed.......... | 4164 | 901 | 101 | 116. 511 | 122.64 |
| Dollars of Peru, mixed.. | 41.5 | 906 | 101.2 | 117.14 | 123.3.32 |
| Dollates of Bolivia and Chili, mixed. | $416 \frac{1}{2}$ | $9{ }^{10}$ | 101.2 | 116. 63 | 122.77 |
| Dollars of Central America ....... | 416 | 870 | 97.5 | 112.48 | 118.42 |
| Fire-francs of France, mixed.. | 384 | 901 | 93.1 | 116.50) | 122.64 |

I deem it proper to repeat the suggestion contained in my report of the 28 th of Jamary last, that the laws which legalize the circulation of coins of other countries are no longer necessary or expedient. In no other nation is this nixture of legal currencies admitted or allowed. Whatever necessity or expediency there was at the time they were passed, in view of the inconsiderable coinage then executed, has ceased to operate at this time, when onr ammal coinage is scarcely inferior to that of any other nation. If this snggestion is approved and the laws in question are repealed, it will be proper to provide that the Director's ammal report on the coinage operations of the mint shonld embrace a statement of the weight, fineness, and value, or purchasing price at the mint, of such coins as are bronght here in the course of trade or by immigration. This would include not only the coins mentioned in this report, but those also of Germany, Sweden, Norway, Sardinia, Switzerland, \&c. I must beg to repeat that "such a report would be a judicious substitute for the one now presented."

I have the honor to be, with great respect, your faithful servant, JAMES ROSS SNO WDEN, Director Hint U.S.

Hon. James Guthrie, Secretary of the Treasury.
