Twelve (12) PGF-5's of VF-45, together with six (6) TDM's of VT-45, were launched from the USS SAN JACINTO at 1345 (I), 12 January, 1945, to hit shipping or specified land targets in the Saigon, French Indo-China area. Among the land targets designated was the oil tank farm area (formarly properties of Sacony-Vacuum Cil Co., Shell Cil Co. and The Texas Co.) on the mest bank of the Man Be River approximately 4.5 miles SSE of Saigon.

Essex Group flight leader, set course for Salgen. Sefere reaching the target the Group Commander of Air Group 45, leading the SAN JACINAO flight, was infermed by the Essex VF leader that the latter was going to preced to make a sweep of the Salgen airfields and advised the Group Commander to select and strike suitable targets, and to escert the VI back to base after their run.

The first indication of the target was a single column of black smake rising from the Shell tank farm. The combined group flow up the cost side of the target, and poeled off in a glide bambing and strafing run against the sil installations from North to South. (Just as the Group Commander was pushing ever in his dive he radiced permission for the second 3 plane section of This a to proceed north to mearch for and strike shipping nearer Saigen.)

Ten of the Helicate (all 3 VF divisions except the 2 photo planes) proceeded to drop their querter-ten beabs on the oil storage area, and to make repeated strafing runs on the installations at all three tank farms. The smoke and dust of explosions of the tanks, and the black smoke of barning oil made it difficult to assess accurately the damage, or attribute individual credit, but the 10 beabs and repeated strafing of all the tanks of the three contiguous storage areas, blaged at least 5 tanks in the Shell oil plant, 3 in the Secony-Vacuum farm and at least 1 in the Texas Co. farm. The only previous damage to those oil tanks and installations was one tank on fire in the Shell Oil Company form from an earlier attack. Photographic interpretation, tegether with pilot interpogation, estimated 70% of the joint oil installations to have been destroyed (See photograph stapled to page 3.)

Two of the Hellouts pilots broke off their strafing attacks on the storage areas long enough to strafe and smake a 2500 ten engines after freighter (Sugar Baker - JMST) in the Mas Be River approximately one (1) mile downstream from the Texas Oll Co. tank farm. The ship was run aground on the west side of the Mas Be River and was observed to be smaking when last seen.

The flight them rendervoused, proceeded to the Sang Them Airfield SE of Saigen where one division made section strafing runs on revolted buildings with uncertain results, since no fires were observed. The flight them proceeded to Cape St. Jacques Airfield, which was observed to be negative, them rendervoused and returned to base.

Armsmont functioned normally, but it is considered that 6 5" H.E.

reckets with non-delay fuse would have been much more suitable for

the veriety of terroris casigned than the one 500 lb. SAF bomb with
