TELEGRAPHIC ADDRESS:—DANIELS, NORWICH.

TO OUR CUSTOMERS.

We have much pleasure in presenting our Catalogue of Dutch and other Flower Roots, Roses, Fruit Trees, &c., for the present Autumn, and again beg to thank our numerous patrons for their very kind and extended patronage of last season, at the same time assuring them that their future commands will receive the same careful attention as their esteemed favours of the past.

We are personally acquainted with the best growers in Holland, whose grounds we visit from time to time, and our Retail Bulb Trade is one of the most extensive in the United Kingdom. We have, therefore, much pleasure in drawing the attention of the public to the splendid selection we offer in Hyacinths, Narcissus, Tulips, &c., and which includes the very best in their respective classes, whilst several important additions have been made, our prices being fixed at the lowest rate compatible with sound well-ripened bulbs.

CHOICE NAMED HYACINTHS are a special feature in our bulb trade, and we would point out to our patrons, that the bulbs we offer of these are true to name, fully matured, and of an age and size to ensure, under fair cultural conditions, a fine display of bloom. This is an important matter, but one that is frequently overlooked in purchasing "cheap" bulbs at Auction Rooms, or from unscrupulous dealers.

October is the best month for general planting, and to secure special varieties orders should reach us as soon as convenient before the middle of that month.

TERMS OF BUSINESS, &c.

All orders from unknown Correspondents must be accompanied by a sufficient Remittance or satisfactory References; and to save cost and trouble of Booking, a Remittance should in all cases be sent with Orders under 10s. in value.

ACCOUNTS—DISCOUNTS.—All accounts are due net in three months, we however allow a discount of 1s. in the pound on all orders of 20s. and upwards when accompanied by a remittance, or when paid within fourteen days of date of invoice.

CHEQUES, MONEY ORDERS, AND POSTAL ORDERS.—Please make payable to DANIELS BROS., and cross "GURNEY & Co.," Norwich.

POSTAGE-STAMPS AND COIN.—All letters containing postage-stamps should be registered before being posted. The registration fee is now only 2d., and this ensures a safe delivery. Letters containing coin *must* be registered.

BULBS PACKAGE AND CARRIAGE FREE.—We make no charge for packages, and in consequence of the great facilities now offered by the Parcel Post, and the cheaper rates of carriage by many of the Railway Companies, we are pleased to state that we have made arrangements for sending all Bulbs Post or Carriage free to any address in the United Kingdom; this will prove an especial boon to our customers residing in Scotland, Ireland, and distant parts of England and Wales.

CARRIAGE OF ROSES, FRUIT TREES, MUSHROOM SPAWN, &c.—We do not undertake to pay carriage on general orders for Roses, Fruit Trees, Ornamental Shrubs and Plants, but continue to enclose extra plants free of charge to compensate for carriage; nor can we undertake to pay carriage of such horticultural requisites as Mushroom Spawn, Silver Sand, &c. All plants, trees, shrubs, &c., will be so packed as to stand a journey of a week or ten days without injury. Should the packages arrive at their destination during a severe frost, it will be advisable not to unpack them, but keep them cool and moist out of the reach of the frost, until a change of weather takes place.

CHANGE OF RESIDENCE.—We shall esteem it a favour if our customers, on changing their residence, will kindly favour us with their new address, that we may be able to send them our Catalogues as usual.

RECOMMENDATIONS.—The many kind recommendations to new customers with which we have been honoured during the past season have been very gratifying. Should any of our customers have friends requiring Bulbs, &c., and to whom a copy of our *Illustrated Catalogue* would be acceptable, we shall feel much obliged for intimation of the fact.

Carnations and Picotees.

Our Grounds are peculiarly well suited for the cultivation of these charming and highly popular flowers, and we have much pleasure in stating that our stock for the present season, consisting of many thousands of the choicest varieties in commerce, is in unusually fine condition, the plants being thoroughly healthy and well-rooted. As we have a very great demand for Carnations and Picotees, we respectfully beg that, to prevent disappointment, our Customers will kindly favour us with their orders as early as convenient.

NEW YELLOW BORDER CARNATION.

PRIDE OF GREAT BRITAIN. In size and form this is a fac-simile of the old *Mahmaison*, but the colour is a splendid yellow. Without doubt the finest yellow Carnation in existence. A grand novelty each 2s. 6d. and 3s. 6d.

NEW VARIETIES FOR 1893.

	each—s. d.
CANTAB. Deep bright scarlet self, a large flower of great substance; being as powerfully scented as the <i>Old Clove</i> , it is unique amongst scarlet varieties	3 6
EMPRESS. Beautiful pure white, with shell-like petals, a large smooth flower of first-class quality, medium height, splendid habit, and a non-burster	3 0
HORACE. Rich dazzling scarlet, a very free bloomer of strong vigorous habit, and which does not burst; a splendid variety for cutting, First Class Certificate, <i>Chiswick</i>	2 0
QUEEN MAB. Golden yellow, flaked and splashed with carmine; strong grower of medium height. This is a very fine and strikingly handsome flower	3 6
QUEEN OF ROSES. A lovely flower of great size and substance that does not burst; colour, a brilliant carmine rose; good habit, and a free bloomer	3 6

NEW AND VERY CHOICE SORTS.

	each—s. d.
Alice Ayres. Pure pearly white, the centro petals delicately marked with carmine, most beautiful form	1 0
Amy Herbert. A fine deep-bodied rose self, showing bright <i>cerise</i> by artificial light; large flower	2 0
Annie Douglas. Yellow, heavily edged with bright shaded pink, a beautifully formed smooth-petalled flower; a fine grower	2 0
Cara Roma. A beautiful glowing maroon with a soft blending of mulberry; a large flower of fine substance	1 6
Countess of Paris. Delicate flesh colour, fine bold flower	2 0
Dorothy. Buff ground, edged and flaked reddish-pink	1 0
Duc de Raqueuse. Velvety-crimson, compact flower	1 0
Duke of Fife (new). Clear soft salmon-scarlet, one of the largest and finest ever introduced	2 6
Favourite. White ground, edged rose; a good flower	1 0
Firefly. Bright scarlet flower of medium size	1 0
Fireman. Deep bright scarlet, a very erect and sturdy grower	1 0
Germania. Large, bold, perfectly formed flowers, with broad flat petals; colour, a soft pure yellow. First Class Certificate, <i>R.H.S.</i> 3 for 2s. 6d.	1 0

	each—s.	d.
Gloire de Nancy. Large pure white clove-scented ...	0	6
Goldfinder. Sulphur ground, striped and edged with carmine lake ...	1	0
Leander. Intense deep yellow self, a fine heavy shell-like petal, especially useful in wet seasons, as it withstands the heavy rains better than most of its class ...	2	6
Miss Joliffe (Perpetual). Pale pink, dwarf habit, very fine flowering, splendid for Winter blooming ...	1	6
Miss Thoday (new). Pure white, large smooth petals and firm calyx; splendid for cutting or for exhibition ...	2	0
Mr. Dennis. Primrose yellow self, medium size ...	1	0
Mrs. Frank Watts. The finest White Border Carnation in cultivation. The flowers are very large and full, smooth edge, of a beautiful pure white, very fragrant, and do not burst ...	1	6
Mrs. Reynolds Hole. Quite a new and altogether novel shade of colour amongst Carnations, somewhat difficult to describe—salmon-apricot is the nearest blending of colour to likou it to; possessing a vigorous constitution, producing a great quantity of flowers, and has been awarded several First Class Certificates ...	1	0
Mrs. Thornhill. Beautiful bright salmon-pink, delicately fringed, very much like "Raby Castle," does not split the calyx ...	1	0
Raby Castle. Clear soft salmon-pink, neatly fringed; very pleasing ...	1	0
Redbraes (Picotee). White ground, edged with purple ...	1	0
Sandringham Scarlet. Deep bright scarlet colour, very intense, a good grower and free ...	1	0
Sir Beauchamp Seymour. Orange buff, edged with carmine, extra free. Has been awarded a First Class Certificate. A novel and distinct variety ...	1	6
Souvenir de la Malmaison. Well known grand old variety with very large delicate pink flowers ...	1	6
Souvenir de la Malmaison, New Crimson. A grand novelty, bearing immense rose-like flowers; colour, a deep velvety crimson-scarlet, splendid variety ...	2	6
St. Gatien. White, flaked with delicate rose. A charming flower of good form ...	2	0
Terra-Cotta. Terra-cotta ground colour, beautifully edged with bright pink, large, full, and of perfect form ...	1	6
The Coroner. Rich scarlet, early and free ...	1	6

Crimson Clove. The fine old spice-scented variety ... per doz. 5s.; each 6d.

White Clove. Pure white, deliciously scented ... ,, 5s.; ,, 6d.

Bulbs and Plants for Early Forcing.

The following are specially recommended to the notice of those desiring a supply of flowers at Christmas and early in the New Year.

HYACINTHS.
EARLY WHITE ROMAN.

Early White Roman Hyacinths.

Deliciously fragrant and very early flowering variety. By planting early in September and gently forcing, the Early White Roman may be had in bloom in November, and a few successive plantings at intervals of about a fortnight will ensure a continuance of bloom till after Christmas. Both in bulb and flower they are smaller than the ordinary Hyacinth, and should consequently be planted five or six in a pot. The delicately scented flowers, which are produced in great profusion, are exceedingly valuable to cut for bouquets, &c.

	per doz. s. d.	per 100. s. d.	per 1000. s. d.
HYACINTHS, EARLY ROMAN, Single. Pure White, extra fine selected roots ...	2 6	17 6	160 0

" " " Pink or flesh coloured ...	2 0	15 0	—
" " " Blue, light blue ...	2 0	15 0	—

Hyacinths—Early Single.

A beautiful variety of charming colours, named varieties, specially selected for early forcing
Per doz. 6s., 9s., and 12s.; per 100, 40s., 65s., and 80s.

Narcissus—Paper-White and Double Roman.

Well-known splendid varieties for early forcing, and may be had in bloom in November, the Paper-White with its pure white deliciously-scented flower being an especial favourite.

PAPER-WHITE. Splendid for cutting, deliciously scented, fine roots ...	per doz. 1s. 6d.; per 100, 10s. 6d.
PAPER-WHITE. New large-flowered. Splendid new variety, producing large handsome trusses of pure white flowers; superior to the old variety ...	2s. 6d.; " 15s. 0d.
DOUBLE ROMAN. Double flowers, white with orange nectary, very fragrant ...	1s. 6d.; " 10s. 6d.

LILIUM LONGIFLORUM HARRISII (the true Bermuda Easter Lily). For prices, &c., see page 29.

FREESIA LEICHTLINI MAJOR. Primrose and orange, very beautiful ... per doz.—s. d. 3 0
" REFRACTA ALBA. Pure white, strong, home-grown roots ... per 100, 14s. 6d. 2 0
Pot six or eight bulbs in a five-inch pot of turfy loam. All the Freesias are deliciously scented.

HELLEBORUS NIGER. Extra strong clumps ... each 2s.; per doz. 21s.
BOUVARDIAS. All the best sorts, strong plants ... per doz. 18s., 21s., and 24s.
AZALEA INDICA. Double and semi-double pure white and other varieties. A. Borsig, Deutch Perle, Narcissiflora, &c., splendid for forcing, good plants, well set with buds ... each 2s. 6d. and 3s. 6d.; per doz. 24s. to 36s.

Lily of the Valley.

For early forcing, single crowns of these should be planted about twelve in a five-inch pot, with the buds well above the surface. Cover the crowns with a little moss or an inverted flower pot and place them in a good heat of say 85 or 90 degrees; water frequently with tepid water, and if judiciously looked after they will bloom in four or five weeks from time of potting. Good single crowns are much the best for this purpose.

Selected single crowns for forcing ... per doz. 1s.; per 100, 6s.

Spiræa Japonica.

Perhaps the most elegant and useful of all plants for early forcing. Lovely and chaste spikes of elegant white inflorescence, and is singularly adapted for pot display, table or hand bouquets, &c., and by judicious forcing may be had in abundance at Easter. It will last well in almost any situation when in bloom. It is besides perfectly hardy, and as such can be grown on the open border.

Strong clumps for forcing ... each 9d.; per doz. 6s.

NEW AND SELECT HYACINTHS.

Especially recommended.

	each—s. d.		each—s. d.

A new gigantic variety, the finest of all the Incomparable section; large yellow cup, tinged with orange, sulphury perianth; splendid exhibition variety per doz. 10s. 6d.	1 0

NEW POLYANTHA ROSE—TURNER'S CRIMSON RAMBLER.

THIS remarkable Rose, now offered for the first time, was originally received from Japan. The plant is of very vigorous growth, making shoots from eight to ten feet in height during a season, and is consequently a most desirable climbing variety, and when pegged down or grown as a bush, a marvellous head of bloom is the result, the two year old wood producing trusses of flower on every growth. It is also exceedingly hardy, having successfully withstood the test in exposed situations of two very severe winters in England.

The bright green glossy foliage with which the plant is covered very early in the Spring, forms a pleasing and striking contrast to the flowers which are produced in large trusses of pyramidal form, and of the brightest crimson colour, the blooms remaining on the plant for a great length of time, without falling or losing their brightness. The foliage is also retained to a great extent during the winter, making the plant almost an evergreen.

Three Gold Medals, as well as numerous First Class Certificates, have been awarded to this Rose, which will be distributed during the present Autumn at the following prices—

STRONG PLANTS IN POTS OR FROM OPEN GROUND, 7s. 6d. each.

NEW PEDIGREE SEEDLING ROSE—Marchioness of Londonderry, H.P.

THE raisers of this new variety describe it as being a magnificent Rose, and one which will take a very high place in the Rose world. The flowers are of great size, perfectly formed, and carried on very stout erect foot stalks. Colour, ivory white, petals of great substance, shell-shaped and reflexed, highly perfumed and free-flowering. The foliage is very fine, and the plant is of vigorous growth. First Class Certificates at Royal Horticultural Society (Ireland), Bray, Antrim, Armagh.

Plants 7s. 6d. each.

Daniels' Choice Flower Roots

In Collections.

Subject to slight alterations as the season advances.

We have much pleasure in recommending the following liberal collections of Flower Roots, which are in every instance carefully made up from sound picked bulbs, are guaranteed under ordinary circumstances to produce a fine variety and display of bloom, and will be found of much better quality and cheaper than those usually purchased at Sale Rooms.

CULTIVATION OF HYACINTHS.

THE Hyacinth is as conspicuous amongst early Spring flowers as is the Rose amongst our Summer favourites. It is pre-eminently "The Flower of Spring," and richly does it merit this high distinction, for few classes of plants, if any, embrace at once so wide a range of beautiful and distinctive variety of colouring with such delicious fragrance as is common to them all. No plant can be grown to so high a state of perfection with so little trouble, or will adapt itself so readily to almost any system of what may be termed artificial culture; grown in-doors in pots, pans, boxes, and glasses, jardinettes, baskets, in soil, cocoa-nut refuse, or damp moss, or out of doors on the open border, it appears equally at home, and will bloom "free and fragrant," as if grateful for the small amount of attention it receives. The Hyacinth forces well, and by judicious treatment may be had in bloom by Christmas, but "forced" spikes of bloom are not generally so fine as those which develop more slowly in the cool house, pit, or frame. Pot culture is by far the most important and successful of the many ways adopted in growing Hyacinths, and cultivated in this way no plant will produce more splendid effects in the greenhouse or conservatory in the Spring months, or is so indispensable as a window plant. Single, or double, they are all exceedingly beautiful, but if there is any excuse for distinction, the single-flowered varieties must bear away the palm for elegance and brilliancy, and perhaps for fragrance, although the individual bells are not always so large.

In selecting Hyacinth bulbs, it should be borne in mind that the largest and finest-formed are not always those which produce the finest spikes of bloom; for, although some are possessed of both these qualities, many of the finest varieties have rough, and in some instances, small and ill-shaped bulbs; all must, however, be well-ripened, firm, and solid, to produce really good flowers.

Cultivation in Pots.—Although the Hyacinth will ordinarily thrive in any good, light, rich soil, a long experience has taught us that the best possible mixture for growing Hyacinths in pots consists of about one-third each of good fibrous loam and well-decayed cow-dung, and the remainder of about equal parts of coarse gritty sand and leaf-mould. Thoroughly mix these at least a month before potting, keeping the mixture in a cool shed, or where it is not exposed to the weather. Forty-eight sized pots (five-inch) are generally preferred, but we have seen magnificent Hyacinths grown in much smaller, some indeed preferring three-and-a-half-inch pots for ordinary decorative purposes; where fine selected bulbs, however, are grown for exhibition, thirty-two sized (six-inch) are not considered too large. In potting, the soil should be in a moderately moist condition, and great care should be taken to ensure perfect drainage. Prepare the pots by placing a large hollow crock at the bottom, and a few smaller round it, and on these a little rough rich manure, or a few pieces of charcoal. Use the soil in its rough state as mixed, filling the pots quite full; take each bulb firmly in hand and press it well down into the soil, and finish off by firmly pressing down the soil round the bulb and filling up level, leaving the crown of the bulb just visible. After potting select for them a cool, sheltered position out of doors, and place them on a layer of coal ashes, cocoa-nut fibre, tan, or any similar light material, covering the pots with the same to the depth of five or six inches, and placing over them a few boards or slates to keep

off excessive rains. In about four or five weeks they will be found on examination to be nicely rooted, and those required for earliest blooming may be removed to the cool pit or frame preparatory to forcing, or their removal to the greenhouse; or they may remain in the plunging material and be brought forward as required in succession for later blooming; all should, however, be removed before they push their way through, and be gradually introduced to light and air, keeping them in a cool shady position till the leaves have fairly acquired their proper greenness. It may be here remarked, that a slow and steady development is at all times preferable for the production of really fine spikes of bloom; and that although the Hyacinth forces well, it should never be subjected to a higher temperature than seventy degrees, and should be removed from this to a cooler atmosphere as soon as the flower-spikes are formed, or a weakly growth of plant with a poor colour of flower will be the probable result. Hyacinths delight in an abundance of root moisture when growing, and are much improved by frequent manure waterings, and keeping the surface soil of pots loose by occasional stirring. Keep near the glass, give plenty of air, and tie to neat stakes if the spikes become too tall. A slight shading when in flower will assist in lengthening the time of blooming.

Time of Planting.—Those intended for early forcing should be planted in September, but October is decidedly the best month to plant for a general display in the greenhouse, etc. For later Spring-blooming a planting may be made about the second week in November, but late flowers may always be had by keeping back a few of the earlier-planted in a cool frame.

Cultivation in Glasses.—The single-flowered varieties are at all times to be preferred for this purpose. Fill the glasses with pure river or rain water so as to almost touch the base of the bulb, and place a small piece or two of charcoal in each to keep the water pure, after which place them in a cool dark closet for a few weeks, or till their roots have nearly reached the bottom, when they should be gradually brought to the light. As growth advances they should be kept as close as possible to the glass, have plenty of air and the benefit of wire supports before the spikes become top-heavy, replenishing the glasses from time to time as the water becomes absorbed. As Hyacinths in glasses will not thrive in rooms that are at times excessively heated by gas, etc., they should be removed at such times as occasion may require, but should never be subjected to great or sudden heat or cold.

Cultivation in the Open Ground.—Few objects are more beautiful in Spring than beds of choice Hyacinths, either in distinct colours or mixed. They succeed well in any good garden soil, but have a decided preference for that which is well-drained, light, and rich. Fork up the ground to the depth of eighteen inches, adding a liberal quantity of well-decayed manure, and if the ground is heavy a good portion of coarse sand. Plant the bulbs as early as convenient in October, about six inches apart, and with their crowns at least four inches below the surface; no protection will be necessary unless in very exposed situations, and then only in extremely severe weather. When blooming is over, and the leaves show signs of decay, the bulbs may be lifted to make way for the Summer hedging plants, and stored in a cool, dry place for future planting.

EARLY ROMAN HYACINTHS.

This deliciously fragrant and very early flowering variety should be much more extensively grown than it is at present. By planting early in September and gently forcing, the Early White Roman may be had in bloom in November, and a few successive plantings at intervals of about a fortnight will ensure a continuance of bloom till after Christmas. Both in bulb and flower they are smaller than the ordinary Hyacinth, and should consequently be planted five or six in a pot. The delicately scented pure white flowers, which are produced in great profusion, are exceedingly valuable to cut for bouquets, &c., coming at a season when there is usually a great scarcity.

From Mr. C. H. CARPENTER, Spilshy.

April 20th.

"The Hyacinths you supplied me with last year were the admiration of all who saw them."

From Rev. W. LAXTON, Oddington Rectory.

Nov. 2nd.

"The Hyacinths I had from you last year bloomed very satisfactorily."

From Mrs. EDGE, Upper Mount Street, Dublin.

Oct. 4th.

"The Bulbs supplied to Mrs. Edge have always given the greatest satisfaction."

Daniels' Superb Named Hyacinths

For Exhibition.

Specially arranged Collections for Amateurs and Exhibitors, containing only the most distinct and beautiful varieties, selected from the choicest prize groups of the past season's exhibitions, or specially noted by us for their superior excellence.

"Your Dutch Crocus were splendid last year."

Daniels' Choice Named Hyacinths.

The following list, which has been carefully revised, includes all the finest sorts noted by us during our last visit to the Dutch Bulb Grounds, besides the best of the fine Varieties shown at the Royal Horticultural Society's and other great Exhibitions during the last Spring, and we have much confidence in recommending them as the best that can be grown for Exhibition and decorative purposes.

EXHIBITION HYACINTH.

* It is supposed by many of the inexperienced that the best Hyacinths are those which produce double flowers; this is by no means correct, there being many more of the single varieties producing fine, free, and brilliant spikes of bloom than of the double.

D denotes double, S single flowered varieties.

GENERAL LIST.—Section I.

SCARLET, RED, ROSE, CRIMSON, CARMINE, ETC.

	each—s.	d.
Alida Catharina (D). Fine deep rose	per doz.	5s. 0 6
Amy (S). Scarlet, handsome truss	per doz.	3s. 6d. 0 4
Bouquet Royale (D). Pink, good	per doz.	5s. 0 6
Caviagnac (S). Fine rose, splendid form	...	1 0
Cardinal Wiseman (S). Dark pink, large flower	...	2 0
Charles Dickens (S). Creamy rose, with pale carmine stripes, fine long spike, superb	...	0 10
City of London (D). Delicate rose, fine truss	...	1 3
Countess of Rosebery (S). New. Dark red, large truss, fine	...	1 3
D'Israeli (D). Fine red, good spike, much superior to Waterloo	...	0 8
Duchess of Albany (S). Dark red, large compact spike	...	1 0
Duke of Albany (D). New. Rich crimson, centre black, handsome compact spike	...	3 0
Duke of Avondale (S). Bright red, crimson shaded; splendid	...	1 6
Etna (S). Brilliant rose, carmine-striped, very fine	...	1 6
Fabiola (S). Light rose, with deep red stripes, mag- nificent spike	per doz.	5s. 0 6
Garibaldi (S). Glowing carmine, magnificent spike	...	1 0
General Pellisier (S). Deep crimson, fine spike	...	0 8
George Peabody (D). Semi-double, clear bright rosy crimson, very fine	...	0 10
Gertrude (S). Light red, good truss	per doz.	5s. 0 6
Grand Concurrent (D). Light rose, shaded pink	...	0 8
Howard (S). Orange crimson, fine colour, large spike, splendid variety	...	1 0
Incomparable (S). Scarlet, fine dark	...	0 9
King of the Reds (S). New. Magnificent variety, First Class Certificate, Royal Horticultural Society	...	2 6
Koh-i-noor (D). Semi-double bright salmon pink; distinct and splendid	...	1 3
La Belle (S). Pink, rose, orange-tinted, enormous large spike	...	4 0
Lady Palmerston (S). Beautiful bright rose, with distinct white eye	...	1 3
Le Prophete (S). Carnation rose, beautiful	...	0 6
Linnaeus (S). Dark red, fine truss, beautiful	...	1 0
Lord Percy (S). Deep rose pink, fine truss	...	0 9
Macaulay (S). Rose and carmine, splendid	...	0 8
Madame Hodson (S). Fine red	per doz.	5s. 0 6
Maria Cornelia (S). Bright rose, magnificent spike	...	0 6
Moreno (S). Rosy blush, immense spike, superb	...	1 3
Mr. Stanley (S). Dark carmine red, fine spike	...	1 3
Mrs. Beecher Stowe (S). Delicate rose, superb per doz.	8s. 0 9	
Noble par Merite (D). Dark rose, striped, extra fine spike	per doz.	5s. 0 6
Ornament Rose (S). Delicate rose, immense large spike	...	2 6
Prince Albert Victor (S). Crimson scarlet, fine truss	...	1 3
Prince of Orange (D). Bright red, fine	...	0 7
Prince of Wales (S). Bright rosy crimson with carmine stripe	...	0 9
Princess Alexandra (D). Delicate pink, large spike, and beautiful bells	...	0 6
Princess Charlotte (S). Beautiful bright red, good spike	per doz.	7s. 0 8

Hyacinths (Section I.) (continued).

	each—s.	d.		each—s.	d.

DANIELS'

Special Collection of Hyacinths

For Amateurs.

We have also much pleasure in recommending the following special Collections of choice named Hyacinths for pot culture, which have been carefully selected to ensure a splendid variety and succession of bloom, and are guaranteed to give entire satisfaction.

A. 50 HYACINTHS in 50 splendid varieties as follows, Carriage Free, 30s.—

Double Red and Rose—Groot Vorst, Koh-i-noor, Lord Wellington, Princess Louise, Susannah Maria. *Single Scarlet, Crimson, and Rose*—Countess of Rosebery, Duke of Avondale, Fabiola, General Pollisier, Gertrude, Gigantea, Le Prophete, Norma, Prince Albert Victor, Princess Charlotte, Prosper Alpino, Queen of Hyacinths, Solfaterre, Charles Dickens, Von Schiller. *Double White*—La Dcesse, La Tour d'Anvergne, Prince of Waterloo. *Single White*—Alba maxima, Elfrida, Grand Vainqueur, La Candeur, Mirandoline, Mont Blanc, Nectar, Queen Victoria, Queen of the Netherlands. *Double Blue*—Blokberg, Crown of India, Laurens Koster, Prince Albert. *Single Blue*—Grand Lilas, Feruck Khan, Jeschko, King of the Blues, Prince of Wales, Leonidas, Mimosa, President Lincoln, Prince of Saxe Weimar, Tollens. *Yellow*—Daylight, John Stuart Mill, Ida, Queen of Yellows.

B. 25 HYACINTHS in 25 fine varieties as follows, Carriage Free, 15s.—

Double Red and Rose—Groot Vorst, Lord Wellington, Susannah Maria. *Single Scarlet, Crimson, and Rose*—General Pellisier, Gigantea, Countess of Rosebery, Norma, Charles Dickens, Princess of Wales. *Double White*—La Tour d'Anvergne, Prince of Waterloo. *Single White*—Alba maxima, La Grandesse, Grand Vainqueur, La Candeur, Mirandoline. *Double Blue*—Blokberg, Prince Albert. *Single Blue*—Grand Lilas, Leonidas, President Lincoln, King of the Blues, Prince of Wales. *Yellow*—Ida, Grand Duc de Luxembourg.

C. 12 HYACINTHS in 12 select varieties, Carriage Free, 7s. 6d.—

Double Red—City of London. *Single Red*—Countess of Rosebery, Lady Palmerston, Norma, Caviagnac. *Double White*—La Tour d'Anvergne. *Single White*—Alba maxima, La Grandesse. *Double Blue*—Prince Albert. *Single Blue*—Grand Lilas, King of the Blues. *Yellow*—Optimist.

BED OF HYACINTHS

Daniels' Choice Named Hyacinths.

IN DISTINCT AND BEAUTIFUL COLOURS, WITH NAMES, FOR BEDDING.

SPECIALLY SELECTED FOR SIMULTANEOUS BLOOMING.

These when planted judiciously in large or small beds, are very striking and effective. The single-flowered varieties being the most distinct in colour, and the best for beds, we invariably send these in preference to the double.

Early White Roman Hyacinths.

This deliciously fragrant and very early flowering variety should be much more extensively grown than it is at present. By planting early in September and gently forcing, the Early White Roman may be had in bloom in November, and successive plantings at intervals of about a fortnight will ensure a continuance of bloom from that time till April. Both in bulb and flower they are smaller than the ordinary Hyacinth, and should consequently be planted five or six in a pot. The delicately scented pure white flowers, which are produced in great profusion, are exceedingly valuable to cut for bouquets, &c., coming at a season when there is usually a great scarcity; they are always in demand where cut flowers are in request.

CULTIVATION OF TULIPS.

NOTHING can surpass the brilliant and charming effect produced by the judicious planting of these in beds of well selected colours and varieties, and grown in this way or planted in clumps or lines of distinct colours, in association with Narcissi and other Spring flowers, or as broad marginal lines in front of shrubbery borders, their effect when in bloom is strikingly beautiful. Tulips are perfectly hardy and are easily cultivated, and will grow to perfection out of doors in almost any soil that is fairly rich and open and not too wet; a light rich sandy soil is, however, the best, and if possible an open sunny position should be selected for them, where they are sheltered from cutting east winds in Spring. The best time for outdoor planting is in October or November, and the bulbs should be planted at a depth of four or five inches and about six inches apart. No after culture is necessary, beyond a slight stirring and regulating of the surface of the beds with the point of a trowel or anything similar, when the plants are fairly above the ground. When blooming is over and the leaves show signs of decay, they may, if necessary, be carefully taken up and stored, to make room for the Summer bedding plants. When grown in pots they should be potted firmly three to five or seven bulbs in a pot, according to size and the soil used, and their after treatment may be precisely like that adopted for Hyacinths. For forcing purposes the Van Thols are the earliest, and by early potting and gentle forcing these may be had well in bloom at Christmas. The Pottebakkers, from their earliness and dwarfness of habit also rank high for this purpose; but all the early single-flowered varieties are almost equally suitable, as are also many of the earlier double-flowered section, notably the Tournesols, Blanche Hative, Imperator Rubrorum, and Duc van Thol. Planted closely in shallow trays or boxes of light rich soil or well-decayed manure and leaf-mould, and placed in a gentle heat, early Tulips are exceedingly useful to transfer, when coming into bloom, to jardinettes, hanging-baskets, &c., filled with cocoa-nut refuse or soil. Generally speaking the single-flowered varieties are by far the most brilliant and showy for outdoor planting, although perhaps individually not so massive and rich in appearance or so durable as [the double-flowered sorts. The old species "Gesnoriana," with its dazzling crimson flowers, is the best of all the late varieties: it is somewhat tall, but grown in large beds or masses is grandly effective; it also possesses the merit of being very cheap.

Choice Single Tulips for Bedding.

All blooming about the same time. Specially effective for planting in beds or masses of distinct colours.

New Darwin Tulips.

A grand new strain of uni-coloured varieties that bid fair to attain to great popularity. The very large flowers are borne on tall stems in the way of the Late or Florists' Tulips, and are of the most surpassing beauty. The colours range from white through all the shades of rose, carmine, scarlet, purple, violet, cerise, &c.; the stont erect petals having a peculiar metallic lustre that is very striking. They are late blooming and come into flower at a most welcome period,—between the bulbs and bedding plants,—and last for a much longer time than the earlier flowering varieties. The bulbs should be planted in October or November, about four inches deep and five or six inches apart; they will thrive in any good garden soil.

Late, or Florists' Tulips.

THIS fine old class of Florists' Flowers, good collections of which have become scarce of late years, was formerly held in high estimation amongst the English and Continental Florists, who at times paid enormous prices for particular varieties when adding to their collections. But although not now so much grown as formerly, late Tulips are well worthy of cultivation, and any one having space for a Tulip bed, would be amply repaid for their small trouble by a display of rare and peculiar beauty.

October is the best month for planting, and to grow them to perfection the bulbs should be planted four or five inches deep, in well-prepared beds of at least a foot deep of sandy loam, leaf-mould, and well-decayed cow-dung, with the addition of a little sharp sea-sand, giving a slight protection to the beds in severe weather in Winter by a covering of litter or other light material, and if intended for exhibition, the blooms should be protected from the weather by a covering of canvas or glass. Grown in this way these fine Tulips will often attain a height of from three to four feet, bearing noble flowers, the markings and featherings of which are in many instances exquisitely beautiful. Late Tulips will, however, bloom finely with a much more easy process of culture, and are admirably suited for planting in groups on mixed beds or borders, in front of shrubs, and as they bloom later than other Tulips, they generally afford a fine display at a time when our flower beds are but poorly filled.

The Late or Florists' Tulips, although not perhaps so neat in their habit of growth as the early single-flowered varieties, are well worthy of a place in every garden. They will thrive in any good ordinary garden soil, and when in bloom afford a rich treat in the rare and peculiar beauty of their flowers.

Extra choice mixed. From named sorts, Bybløemens, Bizards, Roses, &c. per 100 6s. 6d. per doz. 1s. 0d.

TULIPA GREIGI.

Tulips—Distinct Species.

- GREIGI.** A grand species from Turkestan, with beautiful striped or spotted leaves and brilliant orange crimson flowers, the base of each petal conspicuously marked with black. It is perfectly hardy, and planted in a sheltered spot in the garden where it is not disturbed, it will come up and bloom finely every Spring. A highly effective and interesting variety ... 3 for 4s.; each 1s. 6d.
- Clusiana.** White, striped red, with violet centre; beautiful each 6d.
- Cornuta.** Long twisted petals; very distinct ... per doz. 1s. 6d.
- Gesneriana (Gesner's Superb Tulip).** Intense crimson scarlet, flowers large; a fine and effective species ... per 100, 7s.; per doz. 1s.
- Oculus Solis (Sun's-eye Tulip).** An exceedingly brilliant species ... per doz. 1s. 6d.; each 3d.
- Persica (syn. Breyniana).** An exceedingly interesting species, of a dwarf habit of growth, and with yellow and brown flowers, very fragrant ... per doz. 1s. 6d.
- Sweet-scented Florentine.** Flowers yellow, deliciously fragrant ... per doz. 1s. 6d.

From Mrs. TAYLOR, All Cannings.

May 2nd.
"The Tulips supplied by Messrs. Daniels are now in full bloom, and are much admired by every one who sees them; they are certainly most lovely."

From Mr. R. BACKHOUSE, Skipton.

March 24th.
"The Bulbs I have had from your establishment have bloomed exceedingly well."

Parrot, or Dragon Tulips.

Singularly grotesque and handsome varieties, having large showy flowers curiously marked with various beautiful colours. Afford a striking effect planted in lines or groups in front of shrubs, and should always be grown by way of contrast with other varieties.

From Mr. JOHN RAWLINSON, Knowsley.

Oct. 20th.
"Two Bulbs I had from you last Autumn were simply splendid."

Narcissi or Daffodils.

THE prominence given to these beautiful hardy flowers at many of our Spring Flower Shows in recent years, and the many choice and extremely beautiful varieties lately introduced and exhibited, have led to a wonderful increase in their popularity amongst the horticultural public; and it may be fairly assumed that no one having a garden can dispense with at least some few of the many choice sorts, now procurable at a moderate price. The Narcissi are extremely hardy, easy of cultivation, suitable alike for the greenhouse or the open garden, and especially valuable as cut flowers for Church or Home decoration, in which it must be admitted they are possessed of a charming beauty beyond almost any other Spring flower, imparting an air of finish and refinement unattainable by any other hardy plant in existence.

Cultivation Out of Doors.—The cultivation of Narcissi in the open garden is extremely simple, indeed, where the soil is fairly rich, and the position favourable, they merely require to be planted and left undisturbed for several years, to ensure the most pleasing results. Planted in partially shaded positions under trees, or in front of shrubs, they are equally at home, but never appear to greater advantage than when growing in substantial clumps of six or eight roots in a clump, in association with other Spring-flowering plants, and where their elegance and beauty is most attractive. Planting in the open ground should take place as early as convenient in Autumn, and the bulbs should be planted six or eight inches apart, with their crowns three or four inches below the surface, selecting if possible a partially shaded position, where the bulbs are not likely to be disturbed for a few years. Should the soil be poor, it may be enriched by the addition of some well-decayed cow dung, the best that can be used for this purpose. A top-dressing to the beds in Winter of some short manure will greatly add to their vigour, and by a few waterings with weak liquid manure, when the plants are breaking through the ground in early Spring, some grand flowers for exhibition may be had.

Every third or fourth year in August or September—August for choice—the bulbs should be carefully taken up, the clumps divided and replanted in the manner suggested.

Cultivation in Pots.—All the varieties contained in the following list are suitable for pot culture, and grown in this way may be had in bloom much earlier. Use a light rich soil, and pot firmly three or five, according to size, in a six-inch pot. Plunge the pots in some light material in the way recommended for Hyacinths, and when the roots are formed and growth has commenced at the top, remove for a few days to a cool pit, after which transfer to the greenhouse, keeping them close as convenient to the glass. After being in the greenhouse for a week or ten days, those required for early blooming may be plunged in a good bottom-heat, and if kept well supplied with tepid water, may be had in bloom in a very short time, whilst those remaining in the greenhouse or cool pit will afford a later succession. Weak doses of liquid manure may be given with advantage whilst the plants are growing, but should be discontinued before the flowers expand. The beautiful little white *N. triandrus* and the miniatures *juncifolius* and *cyclamineus*, having very small bulbs, should be planted eight to twelve in a six-inch pot, and have a very pretty effect when in bloom. Blooms required for decoration are best cut just before they expand, and placed with their stems in water in a cool room: they will soon open to their fullest extent, and will retain their freshness and beauty for a much longer time than if remaining on the plant.

Choice Narcissi in Collections.

From a horticultural point of view, nothing can be more interesting than a well-grown collection of these beautiful hardy flowers. We have therefore much pleasure in recommending the following choice collections of Narcissi, which are carefully made up to ensure the best variety, and according to price, will include such fine varieties as Horsfieldi, Emperor, Pallidus præcox, Sir Watkin, Rugilobus, Moschatus, Barri conspicuus, Empress, Countess of Annesley, Princess Mary, Princeps, Obvallaris, Bulboedium, Poeticus ornatus, and other fine sorts, from the Leedsi, Incomparabilis, and Trumpet sections.

Feb. 26th.
"You will be glad to hear that all the Bulbs you sent me last Autumn are blooming splendidly, not one of them has missed."

Polyanthus Narcissus

(Bunch-flowering or Tazetta).

A BEAUTIFUL free-flowering class of easy cultivation, deliciously scented, and admirably suited for growing in pots or in water. They produce handsome trusses of elegantly-formed flowers varying in colour from deep orange and primrose to the purest white. With the exception of the Double Roman and Paper White varieties, they will succeed well planted out of doors, but thrive best where partially shaded from strong sunshine. Generally speaking, they will thrive under the same treatment as that recommended for Hyacinths. For pot culture a light and rich soil is the best, and they should be potted as early as convenient in the season, if intended for blooming before Christmas. Pot the bulbs singly, according to size, into pots of four or five inches diameter, or three in a pot of seven inches diameter; pot firmly, and bury the bulbs well up to the crown. The pots should now be plunged six or eight inches deep in some light plunging material out of doors, and, in a few weeks, when the pots are filled with roots and top growth has commenced, they may be removed from the plunging material and placed in a cool pit or frame. Any required for early blooming may, in a few days, be removed to a gentle heat and gradually forced into bloom. The very early varieties, Paper White and Double Roman, are, however, the best for this purpose, and may easily be had in bloom in November, and with these and a few successive pottings of the other sorts a beautiful succession of bloom may be had up to March or April. The Polyanthus Narcissus submits readily to being grown in water, and if started in darkness and treated precisely in the way recommended for Hyacinths, will grow capitally and give the most pleasing results.

CHINESE SACRED NARCISSUS.

Chinese Sacred Narcissus

Oriental Lily or "Joss Flower."

THIS beautiful variety is grown by the Chinese, according to the ancient custom, to bloom at the advent of their new year; it is highly prized and called by them "Joss Flower" or Flower of the Gods. The bulbs are specially grown, by a method known only to themselves, whereby they attain great size and strength, insuring luxuriant growth and a remarkable profusion of bloom in a very short period; they are generally flowered in shallow ornamental bowls containing water, the bulbs being surrounded by bright colored pebbles, to prevent them from toppling over when in bloom; the flowers which are borne in clusters on tall spikes are white with a golden yellow centre, and deliciously fragrant; the bulbs will bloom in from six to eight weeks' time after planting, and with a few bulbs started at intervals of about four weeks, a succession of flowers may be had throughout the winter.

Each 1s.; per doz. 10s. 6d.

Gladioli—Early-flowering Varieties.

THE early-flowering section of Gladioli—bloom in June and July—are amongst the most graceful in growth and beautiful in colouring of any plants we possess. They are not only admirably suited for garden decoration, but grown in pots and gently forced, form charming subjects in the greenhouse in April and May, whilst their blooms are almost invaluable where an abundance of cut flowers is desired. The plants, which are very free-flowering, are of a somewhat dwarf branching habit of growth, and the blooms vary in colour from intense crimson through all the shades of rose, scarlet, carmine, purple, pink, to the pure white "Bride." The lower petals of most sorts are marked by a distinct and conspicuous blotch surrounded by a band of a different colour, giving the flowers a strikingly handsome appearance. They will thrive in almost any soil or situation, but out of doors should for preference be planted in a warm sunny position. October and November are the best months for planting, and the bulbs should be planted in clumps or patches of six or eight, and at a depth of four or five inches, covering them over in Winter with some short manure to prevent injury from frost. For growing in pots, they should be potted five in a six-inch pot, using a light rich compost and covering the crowns about half an inch deep. Place the pots on a cool shelf or under the stage in the greenhouse, and give but little water till they start into growth, when they should be placed on the stage, or as near the light as convenient. Here, with a fair supply of water, and ventilation on fine warm days, they will soon grow on into beautiful flowers.

Superb Double-flowered Anemones.

PRODUCING large, handsome, double flowers of various beautiful colours; some of the varieties are strikingly brilliant and attractive. These are admirably suited for pot culture, and planted in patches of three or five form charming groups for the flower border.

DOUBLE-FLOWERED ANEMONES.

Cultivation.—The Anemone, or “Windflower,” forms by far the most splendid and interesting group of our tuberous-rooted flora, and although, perhaps, not quite so chaste and elegant in the form of its individual flowers as the Ranunculus, it certainly surpasses it in its fine effectiveness as a decorative plant. Grown in large or small beds, in patches, clumps of one colour, or mixed, they make charming groups amongst, and contrast finely with, most other plants, whilst the brilliant scarlets and fiery reds are exceedingly telling, when planted in double lines as an edging to large or small beds, shrubbery borders, &c. The Anemone is also invaluable as a pot plant for the decoration of the greenhouse or conservatory in early Spring, and is very useful as a cut-flower, besides being extremely hardy and easy of cultivation. The Anemone prefers a light rich loamy soil with a fair amount of moisture, and out of doors will succeed well with the same kind of treatment and soil as recommended for the Ranunculus, but any good garden soil that is not too heavy or wet will grow them well, and with but a small amount of trouble. For early Spring blooming plant from September to November inclusive, and for Summer and Autumn flowering plant in February, March, and April. The tubers may be planted at a depth of about three inches, and at a distance of about five or six inches between the plants. For greenhouse or conservatory decoration, the tubers should be potted in October, and placed in a cool pit or frame till February, when they should be brought into the cool greenhouse, placed near the glass, and gradually brought into bloom. When it is desirable to take up roots from the open ground after flowering, they should, if possible, be allowed to remain till the leaves show signs of decay, when they may be carefully lifted, and gradually dried or ripened for replanting at some future date.

Ranunculi—Scotch and Persian Varieties.

GIANT FRENCH RANUNCULI.

ALTHOUGH it is somewhat difficult to grow a large collection of choice named Ranunculi to perfection, there are many beautiful varieties of the edged, spotted, and self-coloured classes, the principal of which are contained in our list, that are easily grown, and will bloom freely in any light rich soil with a fair amount of moisture; and, considering their chaste and elegant forms, equalling the most perfect Rose or Camellia, their brilliant and attractive colours, ranging through the various shades of crimson, scarlet, purple, yellow, and even black, to the purest white, their exquisite markings or edgings, and in some instances delicious fragrance, it is a matter of surprise that these inexpensive luxuries should not be found in every English garden. The first essential condition in the cultivation of Ranunculi are a fresh rich soil, and an open and sunny situation. If the soil where it is intended to plant Ranunculi is too heavy, give a good dressing of sharp sand or road silt; if too light, add a fair proportion of sandy loam. For early flowering, plant the tubers (claws downwards) in November or December in drills about six inches apart, two inches deep, with about three or four inches between the tubers in the row; to complete the operation the tubers merely require covering with fine soil and the bed to be raked level. When the plants come up in Spring they must be kept free of weeds, and the surface of the bed occasionally stirred; and as soon as large enough a rich mulching of well-decayed manure should be placed on the bed between the rows, and liberal waterings should be given in dry weather, especially about the blooming period. If not convenient to plant in Autumn, February, March, or April will do very well, but as these will bloom later, particular attention must be paid to keeping well supplied with moisture, &c. The Turban varieties, which succeed with a somewhat rougher treatment, are admirably suited for planting in clumps on miscellaneous beds or borders in association with other plants, or as edgings, &c., and are very floriferous and telling. As the tubers are liable to injury from rain, if left in the ground after blooming, they should be taken up when the foliage turns yellow or ripens, and after being gradually dried, stored away for future planting.

Snowdrops—Single and Double.

BOTH the single and double flowered varieties of these ever popular and charming little "Heralds of Spring" are too well known to need any description. Snowdrops will thrive in almost any soil or situation, and best when planted in clumps and left to take care of themselves for several years in succession, when they will form handsome and increasingly large groups, which on warm, sunny banks or borders, will push forth their numerous beautiful pure white flowers early in the new year. October is the best month to plant, and the bulbs should be placed three or four inches deep, and about two inches apart. We have seen some pretty effects produced in Spring by planting Snowdrops in various designs on lawns, grass plots, &c. The Giant Snowdrop (*Galanthus Elwesi*), a fine variety, growing to the height of a foot, is undoubtedly the finest of all the Snowdrops. It is quite hardy, as easily grown as the common variety, and so cheap as now to be within the reach of all.

From Mrs. TAYLER, Prospect House, All Cannings, Devizes. Apr. 20th.

"The Tulips you supplied me with were most lovely, they have been in bloom for some time, and have been greatly admired by all who saw them."

From Mr. G. MARSHALL, Market Hill, Co. Armagh. Sept. 18th.

"The Bulbs I had from you last year gave me very great satisfaction."

Scillas.

THE dwarf-growing early-flowering varieties of this beautiful class, as *S. sibirica*, *præcox*, *amæna*, and *bifolia*, are extremely beautiful, and should be grown freely in every garden. In height they do not exceed four or five inches, and their lovely bending sprays of rich ultramarine blue flowers appear in the greatest profusion during the month of March. They are quite hardy, grow freely in almost any soil or position, and make charmingly effective edgings to beds of Snowdrops, &c., and if planted three or four inches deep and allowed to remain undisturbed, they will come up and bloom every Spring with increasing vigour and beauty. Planted eight or ten in a six-inch pot and treated as recommended for Hyacinths, they succeed equally well, and have a pretty effect in the greenhouse. The varieties of *S. peruviana* and *S. campanulata* bloom in May and June. These are of stronger growth than the preceding, and suited to the rougher parts of the garden.

Crocus—Superb New and Choice Varieties.

FOR POT CULTURE, SMALL BEDS, &c.

THE following select varieties produce large handsome flowers of distinct and beautiful colours, and in consequence of their hrightness and purity of colour, are unrivalled for striking effects on large or small beds, marginal lines, &c., and also for growing in pots, window-boxes, hanging-baskets, jardinettes, &c.

CHOICE NAMED CROCUS.

Cultivation.—As foremost amongst the harbingers of early Spring, this beautiful class of the genus Iridaceæ is at once the most lovely and hardy of our vernal favourites, and we may also add the most permanent. Almost every kind of soil or situation seems congenial to their development; but soil which is fairly light and rich, and an open sunny aspect, are requisite to grow them to their fullest perfection of size and brilliancy. Planted in clumps or lines on mixed beds or borders, the pure whites, golden yellows, rich purples, soft blues, or the beautifully pencilled "La Majestense" are all and each very handsome; but beds of purples or blues, edged with golden yellow or pure white, or a trio of colours planted in lines in front of shrubbery borders, &c., are exceedingly charming, and when expanding in the sunshine, form a sight not soon to be forgotten. Their culture is simple in the extreme. In planting out of doors, the bulbs, or more properly speaking corms, merely require to be dibbled in about three inches deep, and two or three inches apart, and left to themselves; and if they can remain where planted for two or three years all the better, as they will then be found to have made a good increase, and may, after blooming, be taken up, divided, and replanted. The Crocus is admirably suited for cultivation in pots, pans, window boxes, &c., and when so grown the roots should be planted closely together to produce a good effect. When in pots, six or eight roots should be planted in a pot of about five inches diameter, filled with light rich soil, and the pot plunged or buried to a depth of two or three inches in some kind of light porous soil or material, till the crowns begin to show signs of pushing through, when they should be placed near the glass and kept well supplied with water. The fine named varieties are the best for this purpose. A few planted in shallow boxes of rich soil will be found very useful to lift, when coming into bloom, for planting in hanging-baskets, &c. The bulbs may be planted any time during September, October, or November; early planting is, however, much to be preferred, as those planted towards the end of the year never bloom so satisfactorily as those planted earlier in Autumn.

WINTER ACONITE. (Natural Size.)

Winter Aconite.

THE little Aconite, which blooms earlier than the Snowdrop, is invariably the first flower in the garden to greet us in the New Year, and should always be grown freely in sunny positions near the house, or walks, for the pretty and over welcome display they make with their golden yellow flowers so early in the season. They are extremely hardy, seem to thrive in any soil or position, and planted in large permanent clumps or patches, they will grow freely under overhanging shrubs or trees, and may be left in the ground for years without injury.

Strong Flowering Roots—

Sanctum. The new Black Calla, recently imported from the Lebanon Mountains ... per doz. 10s. 6d.; each 1s.

Lilies (Lilium).

In their far distant native habitats Lilies are generally found growing in such sheltered spots as margins of woods or plantations, rocky ravines, amongst long grass, shrubs, &c., and mostly where for a long period of the year their bulbs are in a comparatively dry state. This fact points out the necessity of good drainage, and partial shade or shelter, and shows at a glance the great suitability of Lilies for planting in such places as on mixed beds or borders in front of shrubs, or amongst evergreens and roses, on Rhododendron beds, &c., and where indeed, when planted in groups of three or five, such fine varieties as *Auratum*, *Chalcedonicum*, *Speciosum*, &c., are matchless in their beauty, and produce a splendid and imposing effect. Planting out may take place any time during the Autumn, Winter, or Spring, when the bulbs are in a dormant state, or growth has but just commenced; but generally speaking, Autumn is the best time; and the bulbs should be planted at a depth of from six to eight inches according to size, so as to admit of their remaining in the ground for several years, if possible without being disturbed. Lilies generally are fond of a rich soil, mulchings, &c., and whether grown in-doors, in pots, or on the open border, will amply repay with an abundance of fine flowers for a plentiful supply of liquid manure once or twice a week during the growing period, and before the plants come into bloom.

LILIUM AURATUM RUBRO-VITTATUM.

Cultivation in Pots.—For growing Lilies in pots, &c., a compost of about equal parts of sandy loam, leaf-mould, and peat, will generally answer admirably; but we have seen some of the finest Auratums ever exhibited grown in pure leaf-mould. It is also worthy of note that this fine variety will succeed equally well out of doors in peat, loam, or indeed any good light soil, and is consequently unrivalled for planting on Rhododendron beds, &c. Single specimens in pots of about six inches diameter form beautiful objects for the drawing-room, &c., but pots of eight or ten inches diameter, with five or seven bulbs in each, are truly magnificent when in bloom, and produce an effect of "flower and fragrance" that is not soon forgotten. In potting provide ample drainage and pot firmly, placing the bulbs about two inches below the surface; after which, select some sheltered place out of doors that is exposed as little as possible to the direct rays of the sun, as the north side of a wall or fence, &c., and plunge the pots with their rims about six inches below the surface in cocoa-nut refuse, ashes, or any light material, in the way recommended for Hyacinths. Here they should remain till the stems have pushed their way some eight or ten inches through the plunging material, when they may be removed to the cool pit orinery till the flower-buds begin to expand, and then removed to the corridor, drawing-room, or conservatory; or the plants may remain in the plunging material till coming into bloom, before removal to the window, &c., should there be no convenience of a forwarding place as suggested. To prevent breakage a neat stake should be placed to each stem when taken up from where plunged; and if extra fine blooms are required, a few of the weaker buds should be pinched out in such varieties as will admit of this being done. When the blooms are off, the bulbs should be gradually ripened by giving less and less water; and when the stem is quite withered, they should be stored in some cool, dry place, for future potting or planting. Lily blooms, if cut and placed in water when just expanding, will last a considerable time, and are very beautiful for table and other decorations, the pure white varieties being especially valuable for this purpose.

	each—s.	d.
AURATUM (Golden-rayed Lily of Japan). The beautiful large-flowered variety, white with yellow stripes and brownish-red spots; deliciously fragrant, extremely hardy, first-class for pot culture. One of the most useful and beautiful Lilies in cultivation.

Lilies in Collections—our own selection.

Carefully arranged Collections of Lilies, 6s., 9s., 12s., 18s., 24s., and 30s. per dozen.

Irises.

THE new Japanese Iris (*I. Kämpferii*) form a splendid group of extremely beautiful and distinct varieties, the flowers of some of which attain an immense size, from six to ten inches across, and the colours vary from crimson, blue, purple, rose, to the purest white; a rich, moist, loamy soil with partial shade is the most favourable. All the Irises are perfectly hardy, and will thrive in almost any soil or situation, those of the *Germanica* and *Kämpferii* types are however the best for planting in damp soil by water margins, &c., where they always have a fresh and pleasing appearance.

From Mr. W. H. DODD, Kadima, South Australia.

Nov. 10th.
“I received the parcel of Bulbs you sent me, and was well pleased with them, especially the **Persian Ranunculus**. They were much admired by every one who saw them.”

From Mr. JOHN LOW, Perth.

Jan. 22nd.
“The **Bulbs** I have had from you have always been first-rate, and much admired by my neighbours.”

From Mrs. ROCHE, Ballyrahan.

March 13th.
“The **Bulbs** you sent to my friend turned out beautifully.”

Cyclamens.

THIS beautiful class of Alpine plants is most admirably suited for Winter and Spring decoration of the greenhouse, conservatory, or drawing-room, and should certainly be grown wherever a cool pit, frame, or greenhouse, or even a suitable window exists. The foliage of most of the varieties is beautifully marbled, the blooms of some are deliciously fragrant, whilst all are chaste and beautiful in form and habit of growth. The corms should be potted in

of five inches in diameter, and a soil composed of rough sandy loam two parts, leaf-mould one part, and one part of well-decayed cow manure; use the soil in a moderately moist condition, place the pots in a cool shady frame, and give but little water till growth commences; give an abundance of air and light on all favourable occasions during the Spring growth, but with as little fluctuation of temperature as possible. While the blooms are forming, water more freely—occasionally with weak liquid manure—and keep the foliage clean by syringing or washing with a soft brush. By placing a few in a gentle heat they will bloom earlier and the display may be prolonged. As soon as they have done blooming, remove them to a cool shady frame for the rest of the Summer, keeping them uniformly and moderately moist. Early in August, or sooner if they are seen to be forming young growths, let them be at once potted, and still maintain them in a mean temperature of about fifty-five degrees, affording gradually all the light possible, eventually, as the season merges into Autumn, removing them to a warm shelf and somewhat elevated in the greenhouse. The varieties of *C. Europæum* and *C. hederifolium* are comparatively hardy, and will succeed well, planted in shady nooks of rock-work under overhanging evergreen shrubs, &c., but where planted in more exposed positions should have some slight protection in Winter.

Lily of the Valley (*Convallaria majalis*).

THIS beautiful and fragrant little gem is much too well known and highly popular to need any comment of ours. Planted out of doors it will succeed admirably on any shady border or spot, under or among trees, woodland walks, &c. A light rich loamy soil is the best; the roots should be planted about three inches deep. When grown in pots for forcing, pot them in thirty-two-sized pots filled to within about three and a half inches of the rim with rich loamy soil, upon which place the shoots or crowns closely, and then cover with about two inches of leaf-mould and sand, and give a good watering; place on a shelf near the glass in a moist stove or forcing house, keep well supplied with moisture, and soon as the plants begin to show their flower-heads, remove to a warm greenhouse, keeping near the glass till the flowers begin to expand, when they should be gradually removed to a more shady place before removal to the drawing-room, &c.

From **T. LODGE, Esq.,** Odiham.
Oct. 21st. The Double Tulips you sent me flowered remarkably well, and were much admired.

From **Mr. W. LIDDELL,** North Road, Durham.
April 26th. The Bulbs I have had from you are very good indeed.

From **Dr. HOWLIN,** Woking.
Nov. 17th. The Tulips I had from you last year turned out very fine.
From **Major D. MACDONALD,** Stirling.
April 29th. The Hyacinths and other Bulbs supplied by you last Autumn were a great success.

For early forcing single crowns of these should be planted about twelve in a five-inch pot, with the buds well above the surface. Cover the crowns with a little moss or an inverted flower pot and place them in a good heat of say 85 or 90 degrees; water frequently with tepid water, and if judiciously looked after they will bloom in four or five weeks from time of potting. Good single crowns are much the best for this purpose ... Selected single crowns for forcing, per doz. 1s.; per 100, 6s.

Ixias.

THESE beautiful free-flowering Cape bulbs are deserving of much greater attention than they have hitherto received from the horticultural public, as they afford with but very little cultural skill, an abundance of strikingly brilliant and richly coloured flowers, which apart from their elegance of form, are exceedingly valuable to cut for the decoration of the drawing-room, bouquets, &c. In the south and western districts of England they may fairly be considered as hardy, but in most other parts of the British Isles they require to be planted deeply so as to be out of reach of severe frosts, or to have the protection of a cool pit or frame in Winter. They delight in a deep, rich, sandy soil, and when planted out of doors, a warm, sunny, well-sheltered border should always be selected. They thrive well in pots of light rich, sandy soil, planted five or six in a five-inch pot, placing the pots in a cool pit or frame, and giving plenty of air on all favourable occasions. Ixias do not require so much water when growing as most plants of a similar class, and watering may be discontinued when the plants have done flowering. If planted in six or seven-inch pots, several in a pot, they may be bloomed a second year without re-planting.

Crown Imperials

(Fritillaria imperialis).

THESE stately growing hardy plants thrive best in a deep, rich, and moist soil, and in a position where they obtain a fair amount of sunshine, and at the same time sheltered from high winds; they will, however, grow well in any good garden soil, and if allowed to remain undisturbed for several years, will form huge picturesque groups of rare beauty. The pendent bell-shaped flowers vary in colour from deep chocolate red to reddish buff, orange and pure yellow, and are surmounted by a tuft of beautiful green foliage, giving the plants a fine appearance. The gold-striped, with its lovely variegated foliage, is especially handsome. The bulbs should be planted with their crowns four or five inches below the surface, and eight inches to a foot apart.

Miscellaneous Bulbs, Plants, &c.

Achimenes. When well grown there are few more singular or pleasing plants than are the Achimenes. They require a very free open soil, consisting of two parts moderately decayed leaf-mould, one part peat soil, and a very slight addition of sandy particles. A high moist heat of seventy-five to eighty-five degrees suits them best, though they may be grown moderately well in ten or fifteen degrees less heat, if kept close and damp. They are particularly well adapted for hanging-baskets and all similar situations.

Twelve in six choice named sorts, 3s. 6d.

Very choice mixed, from our beautiful collection.

Per doz. 2s. 6d.

Allium. A beautiful class of hardy showy plants that are deserving of extensive cultivation.

Azureum. Large umbels of deep azure-blue coloured flowers, borne on spikes two to three feet high.

Per doz. 6s. 6d.; each 8d.

Moly (luteum). Bright yellow flowers in umbels.

Per doz. 1s. 3d.; each 2d.

Neapolitanum. Pure white, excellent for bouquets.

Per doz. 1s.; each 2d.

Pendulinum. A fine variety; each bulb will produce eight or nine spikes, with five to ten white bell-shaped pendulous flowers, each petal having a green line down the centre; excellent for forcing. Per 100, 5s.; per doz. 8d.

Alstroemerias. Choice mixed. Showy plants for a warm dry border. Planted nine inches deep they may remain undisturbed for years, and will bloom abundantly.

Per doz. 2s. 6d.

Amaryllis. Formosissima (The Jacobea Lily). Rich crimson.

Per doz. 5s.; each 6d.

Lutea (*syn. Sternbergia lutea*). Yellow, fine dwarf Autumn bloomer.

Per doz. 2s.; each 3d.

Purpurea (Fallota) (The Scarborough Lily). Bright scarlet crimson.

Each 1s., 1s. 6d., and 2s. 6d.

Hybrids of Vittata. A magnificent class of hardy bulbous-rooted plants, with large Lily-like, brilliantly coloured flowers, admirably suited for pot culture in the greenhouse, forcing-house, &c.; very splendid.

Choice named varieties, our own selection.

Each 5s., 7s. 6d., and 10s. 6d. to 200s.

Very fine mixed; beautiful large-flowered varieties.

Per doz. 25s. and 30s.

Babianas. Charming spikes of brilliant variously coloured flowers, somewhat like *Ixias*. They require thorough drainage, when planted in the open border, where they should be placed six or seven inches deep, and covered so as to protect them from injury by very severe frosts and wet weather. Dry them off as soon as first symptoms of ripening take place (when growing in pots), and do not water them in the Spring until growth actively commences.

Choicest mixed, per 100, 10s. 6d.; per doz. 1s. 6d.

Brodiaea coccinea. Long tubular flowers, rich crimson and green, beautiful for pot culture.

Each 6d.

Begonias. Tuberous-rooted Hybrids. We have many thousands of our superb strain of these now growing at our Nurseries, and of which dry roots can be supplied in November or December at the following low rates:—

Single mixed. Very choice varieties and most beautiful colours. Per 100, 40s. and 68s.; per doz. 6s. and 9s.

Double mixed. Very choice varieties, selected flowers. Per doz. 9s. and 12s.

Clivia (Imantophyllum) miniatum.

Valuable greenhouse plant, producing large corymbs of delicate reddish orange Lily-shaped flowers, most effective and beautiful.

Each 5s. and 7s. 6d.

Calochortus (Californian Butterfly Tulips, or Mariposa Lilies). An exceedingly brilliant genus of half-hardy bulbous-rooted plants, the flowers somewhat resembling Tulips in form, and the colours ranging from pure white through all the most beautiful shades of lilac, blue, crimson, yellow, &c. Will succeed well planted on a warm dry border, if the roots have some slight protection in winter, or they will bloom freely in pots in a cool pit or greenhouse.

Albus. Pure white ... per doz. 7s. 6d.; each 9d.

Ceruleus. Rich blue ... " 7s. 6d.; " 9d.

Pulchellus. Golden yellow ... " 7s. 6d.; " 9d.

Splendens. White, spotted crimson ... " 7s. 6d.; " 9d.

Venustus. White and crimson ... " 7s. 6d.; " 9d.

Very choice mixed. ... per 100, 40s.; per doz. 6s.

Colchicum speciosum. Beautiful large-flowered hardy plant from Asia Minor, producing noble, Crocus-like, bright rosy purple flowers in Autumn and having handsome foliage in Spring. Will thrive in any soil where undisturbed; splendid for clumps on the mixed border.

Per doz. 8s.; each 9d.

Dahlias. Show and Fancy. Pot roots. All the newest and choicest sorts; a very fine collection

Per doz. 6s., 9s., and 12s.

Erythronium Dens Canis (Dog's-tooth Violets). Beautiful plants for clumps or edgings on the mixed border. Large, heavily marbled and spotted leaves; the flowers, which are very handsome, somewhat resemble the Cyclamen.

White, purple, or mixed. Per 100, 7s. 6d. per doz. 1s.

Eucharis. Amazonica. Large pure white flowers; splendidly scented. Each 1s. 6d., 2s. 6d., and 3s. 6d.

Candida. An extremely beautiful species from British Columbia, flowers smaller than those of the preceding; invaluable for bouquets. Each 1s. 6d. and 2s. 6d.

Sanderi. Very fine new variety. " 2s. 6d. and 3s. 6d.

Eucomis punctata. A fine and strikingly singular Autumn-blooming hardy plant, throwing up long spikes of waxy greenish white flowers, surmounted by a tuft of leaves.

Per doz. 5s.; each 6d.

Freesia. Beautiful half-hardy plants, elegant in habit of growth and deliciously scented; invaluable for bouquets, the blooms lasting in perfection for a long time after being cut; splendid for the cool pit or greenhouse. Potted six or eight bulbs in a five-inch pot of rich turfy loam, at intervals from September to the end of the year, and placed in a warm greenhouse, they may be had in bloom from January to May. Liberal waterings should be given when growing.

Leichtlini. Yellow and orange; deliciously scented. Per doz. 2s.

" **major.** A very fine variety of the preceding. Per doz. 3s.

Refracta alba. Pure white, deliciously fragrant; a gem for cutting. Per doz. 2s.

Fritillaria meleagris (Varieties mixed). Beautiful hardy border plants, throwing up slender stems about two feet high with bell-shaped flowers, beautifully chequered and curiously marked.

Choicest mixed, per 100, 7s. 6d.; per doz. 1s.

Habranthus fulgens pratensis. Certainly the most brilliant amongst rare hardy bulbs that has been introduced to our gardens for many years, admirably figured in *The Garden*, vol. xix., Dec. 7th, 1878. Its gorgeous Amaryllis-like flowers are borne in clusters of five to seven on a stem, and are each four to five inches across, of a shining bright scarlet with a yellow base.

Each 5s.

Miscellaneous Bulbs, Plants, &c. (continued).

- Hyacinthus candicans.** A noble plant, perfectly hardy, magnificent when grown for greenhouse or conservatory decoration, sending up splendid spikes, three to four feet in length, of white bell-shaped flowers, blooming in Autumn. Per doz. 2s. 6d.; each 3d.
- Ixoljriion Tartaricum.** A beautiful hardy bulbous plant from Asia Minor, growing about eighteen inches high, and bearing numerous flowers of a rich purplish blue colour, on long stalks. First class for cutting, and will last a long time. Per doz. 6s.; each 8d.
- Lachenalia Nelsoni.** Deep golden yellow tubular flowers; very beautiful. A gem for pots in the cool greenhouse. Per doz. 12s.
Choice mixed. Very pretty for pots in the cool greenhouse Per doz. 5s.
- Leucojum vernum (Snowflake).** The individual flowers are like the Single Snowdrop, though borne several together upon tall spikes about fourteen inches high. They are very pretty in beds or borders, blooming generally during the month of May. Quite hardy. Per doz. 1s. 6d.; each 3d.
- Lily of the Valley (Convallaria majalis).** Fine strong clumps of the best variety for forcing. Per doz. 10s. 6d.; each 1s.
Single Shoots, German. Produce splendid heads of bloom, much superior to the Dutch. Per doz. 1s.
- Milla laxa.** Umbels of rich purple flowers; very hardy. Capital decorative plant. Per doz. 5s.; each 6d.
(*Triteleia*) **uniflora.** This has fine, substantial, and lasting flowers of beautiful whitish-lilac colour; makes a fine edging, and when a score or more bulbs are grown in a large pot, forms a most striking and desirable object for the decoration of either greenhouse or conservatory. Per 100, 2s. 6d.; per doz. 6d.
- Muscari (Hyacinthus).** Excellent Spring-flowering plants for pots or border-culture. The Feathered Hyacinth has large, handsome, feathery plumes of flowers. The Grape Hyacinth has its bells compactly arranged, so as to somewhat resemble the fruit from which it takes its name; whilst the Musk Hyacinth is esteemed for its peculiar and delicious scent.
- Botryoides cærulea** (Blue Grape Hyacinth). Dark blue. Per 100, 2s. 6d.; per doz. 6d.
" **pallida** Pale blue. Per doz. 2s. 6d.
" **alba** (White). Very pretty 3s. 6d.
Moschatus major (The Musk Hyacinth). Purplish brown. Per doz. 7s. 6d.; each 9d.
Plumosum monstrosum (The Feathered Hyacinth). Purple. Per 100, 7s. 6d.; per doz. 1s.
- Nerine. Fothergilli.** Requires protection of a frame, or is quite at home in any corner of greenhouse; its beautiful vermilion scarlet flowers render it valuable for conservatory decoration. Each 2s. 6d.
- Ornithogalum. Arabicum.** Beautiful large white flowers, with black centre. Per doz. 2s. 6d.
Umbellatum (Star of Bethlehem). Well known, showy, dwarf plant blooming in May. Per 100, 4s. 6d.; per doz. 8d.
- Oxalis.** A beautiful and showy class of hardy plants admirably suited for pot culture.
Bowei. A fine large-flowered variety, bearing a profusion of bright rosy flowers. Per doz. 1s. 6d.; each 3d.
Floribunda rosea. Bright rosy pink, exceedingly free-flowering. Per doz. 2s.; each 3d.
" **alba.** Pure white, exceedingly free-flowering and fine variety. Per doz. 2s.; each 3d.
Rubella. Bright crimson, very showy. Per doz. 2s.; each 3d.
Superfine Mixed. Per doz. 1s.
- Pansies and Violas.** Autumn is the best time for planting Pansies and Violas where a really good effect is desired in the Spring. September is the best month, but any time up to the middle of November will do.
Blue King. Magnificent variety, producing an abundance of large deep ultramarine blue flowers, which continue from early Spring till late in Autumn; should be in every garden. Per 100, 16s.; per doz. 3s.
Cliveden Purple. Fine large flowers of a rich bright purple colour, a constant bloomer. Per 100, 15s.; per doz. 2s. 6d.
Cloth of Gold. Beautiful bright yellow, with dark centre, very effective for Spring gardening. Per 100, 16s.; per doz. 3s.
Dean's White Boddier. Very fine. Per 100, 25s.; per doz. 4s.
Pilrig Park. Large, pure white, pencilled violet. Fine, per doz. 6s.; each 9d.
- Puschkinia libanotica.** Flowers white, shaded blue. A dwarf-growing, charming little bulbous-rooted plant, somewhat resembling the Scilla. Per doz. 2s. 6d.
- Schizostylis coccinea.** A remarkably handsome, perfectly hardy, evergreen bulbous plant, producing occasional spikes of the most lovely crimson flowers, and it can be potted up in the Autumn for house decoration similarly to the Chrysanthemum, and with equal success. Per 100, 7s. 6d.; per doz. 1s. 6d.
- Sparaxis.** A section resembling *Ixias*, but with very fine large blooms, and is most effective in regard to a rare combination of parti-coloured hues. Choicest mixed, per 100, 5s.; per doz. 9d.
- Spiræa. Japonica (Astilbe barbata).** Perhaps the most elegant and useful of all plants for early forcing. Lovely and chaste spikes of elegant white inflorescence, and is singularly adapted for pot display, table or hand bouquets, &c., and by judicious forcing may be had in abundance at Easter. It will last well in almost any situation when in bloom. It is besides perfectly hardy, and as such can be grown on the open border. Fine strong clumps, per doz. 6s.; each 9d.
Japonica multiflora compacta. A fine free-flowering dwarf-growing variety; splendid as a pot plant or for cutting. Per doz. 6s.; each 9d.
- Tigridias, or Tiger Flowers.** These gorgeously beautiful Autumn-blooming plants, which are well worth a place in every garden, are quite hardy when grown in light rich soil or on a warm sunny border. March and April are the best months for planting, and they merely require to be planted four or five inches deep in clumps of six or eight roots, to ensure the most pleasing results, but when grown on heavy or damp ground they should be taken up and stored for the Winter. All the varieties are beautiful, the new creamy-white "*Grandiflora alba*" extremely so; the individual blooms of this variety are very large, of a beautifully creamy-white colour, conspicuously marked in the centre with red and violet, giving it the most charming appearance.
Canariensis. Yellow, spotted with scarlet. Per doz. 3s.; each 4d.
Conchiflora. Brilliant yellow, spotted with scarlet. Per doz. 2s. 6d.; each 3d.
Pavonia. Scarlet and orange Per doz. 1s. 6d.; each 3d.
Grandiflora alba. Creamy white, spotted with red, and having a violet centre; a fine and beautiful novelty. Per doz. 4s.; each 6d.

From Mr. M. ROBERTSON, Kilmarnock.

June 17th.

"The collection of Hardy Climbing Plants you sent me are really splendid."

From H. LAWRENSON, Esq., Wicklow.

May 19th.

"The last Plants you sent me were in splendid condition."

Hardy Perennial Flowering Plants.

We have a fine collection of these popular, interesting, and beautiful plants, which are daily coming more and more into favour with the Gardening Public. All the varieties are perennial, extremely hardy, and many of them produce flowers of the most exquisite beauty, which are very valuable for cutting, whilst the dwarf growing sorts are admirably suited for rockeries, or edgings. No special soil or position is necessary, as with but very few exceptions, they will thrive almost anywhere, and with a moderate collection, a charming variety and succession of bloom may be had throughout the Spring and Summer. The plants we offer are all grown in pots, and may be removed at any time or season.

CHRYSANTHEMUM MAXIMUM.

Achillæa mongolica. Height about 18 inches, pure white flowers in May and June; splendid for cutting each 1s.
 " **ptarmica**—The Pearl (new). Large double, pure white flowers, similar to *A. ptarmica fl. pl.*, but more than double the size; fine for cutting ... each 1s.

Adonis vernalis. This is a beautiful, early, Spring-blooming plant, with clear golden yellow flowers, known as the "God of Love." The individual blooms are very large comparative to the size of the many-times divided foliage, its general height being six inches. It will thrive in any kind of soil and most situations, and is perfectly hardy per doz. 4s. 6d.; each 6d.

Anemone—Japonica alba. One of the very best Autumn-blooming plants we have. Flowers produced in great profusion, and of a beautiful pure white per doz. 5s.; each 6d.
 " " **rosea.** Similar to preceding, but flowers of a beautiful rose colour ... per doz. 7s. 6d.; each 9d.

Anthemis tinctoria pallida. An exceedingly beautiful Marguerite, with pale sulphury yellow flowers. The blooms are very useful for cutting, and last a long time in water. Grows 2½ to 3 feet high ... per doz. 5s.; each 6d.

Asters (Michaelmas Daisies). In variety ... per doz. 4s. 6d.

Anthericum. Beautiful hardy border plants, bearing elegant spikes of pure white flowers in Spring; height about eighteen inches. These are exceedingly useful for cut flowers and should be found in every garden.

" **Liliago** (St. Bernard's Lily) per doz. 5s.; each 6d.

" **Liliastrum** (St. Bruno's Lily) per doz. 7s. 6d.; each 9d.

" " **major.** Very fine; pure white; splendid for bouquets ... per doz. 10s. 6d.; each 1s.

Aubrieta Leichtlini. A beautiful dwarf-growing plant, with numerous bright purplish crimson flowers; a gem for dry rockeries, &c. ... per doz. 5s.; each 6d.

Auriculas, Alpine. Choice seedling, self-coloured, and laced varieties; our inimitable strain of these contains a vast variety of pleasing colours. Universal favourites for the open border ... per doz. 3s. 6d.

Calliopsis lanceolata. The best of the family, and one of the most showy hardy perennials in cultivation. The flowers are large, of a bright golden yellow colour, and produced in the greatest profusion ... per doz. 7s. 6d.; each 9d.

Campanula isophylla. Beautiful dwarf trailing species, bearing large lilac blue salver-shaped flowers; a gem for pots ... per doz. 5s.; each 6d.

" " **alba.** A white form of the preceding per doz. 5s.; each 6d.

" **persicifolia alba grandiflora.** A fine upright growing variety, with large pure white flowers each 1s.

" **turbinata pallida.** A beautiful dwarf compact-growing variety, producing a profusion of beautiful silvery lilac-coloured bells that continue for a long time strong clumps, per doz. 10s. 6d.; each 1s.

Chrysanthemum latifolium. A very showy Marguerite, its bold pure white flowers, with yellow centre, are two to three inches across; splendid for cutting, and invaluable for Autumn decoration ... each 9d.

" **leucanthemum semi-duplex.** A fine novelty, with large pure white semi-double flowers per doz. 10s. 6d.; each 1s.

" **maximum** (true). A beautiful free-growing plant, only two feet high, and covered with a profusion of large pure white Marguerite-like flowers, that continue for a long period; splendid for cutting per doz. 10s. 6d.; each 1s.

" **uliginosum.** A very strong-growing Autumn-flowering species, with pure white Marguerite flowers each 9d.

Cheiranthus alpinus. A dwarf neat-growing species; flowers lemon-yellow, borne in great profusion in Spring; very effective, and ought to be in every garden per doz. 3s.; each 4d.

Delphiniums. Single and Double-flowered. These fine hardy plants are deserving a place in every garden; they continue in bloom for a long time in Summer, many of the varieties producing spikes of bloom one foot to two feet in length, and of the most intense and delicate colours.

Choice named sorts, our selection per doz. 6s. and 9s.

Dielytra spectabilis. A beautiful and indispensable plant, with lovely bending sprays of deep rose-coloured flowers and handsomely divided foliage. First-class for shady borders, pots in the greenhouse, &c. It is perfectly hardy and forces well ... strong plants, per doz. 6s.; each 8d.

- Doronicum austriacum.** Bright golden yellow flowers in Spring; very showy ... per doz. 7s. 6d.; each 9d.
- „ **plantagineum excelsum** (*syn. Harpur Crewe*). Height 18 inches, large golden yellow flowers, 4 inches in diameter; splendid for cutting per doz. 7s. 6d.; each 9d.
- Dodecatheon Jeffreyanum.** A beautiful hardy perennial, a native of the Rocky Mountains, producing large umbels of Cyclamen-like blossoms, rose-coloured, with a yellow ring at the orifice of the reflexed corolla each 2s. 6d.
- „ **meadia** (American Cowslip). From the rich woodlands of North America; an elegant Spring-flowering plant worthy of more extended cultivation; flowers purple, inclining to colour of the peach-blossom, in a loose umbel, each blossom drooping elegantly per doz. 5s.; each 6d.
- Echinops ritro.** A fine perennial, growing three to four feet high, bearing numerous globular heads of blue flowers each 9d.
- Erica. Herbacea (carnea).** A procumbent little shrubby evergreen plant; flowers deep flesh-coloured with black anthers, produced in wreath-like spikes, from middle of January to end of March. The prettiest hardy out-door plant we have in bloom at this season of the year per doz. 7s. 6d.; each 9d.
- „ **Carnea alba.** A pure white-flowered variety of the preceding, very fine ... per doz. 10s. 6d.; each 1s.
- „ **aurantiacus.** A fine new variety, growing about nine inches high and bearing bright orange-coloured flowers as large as a crow's piece. A very free bloomer per doz. 7s. 6d.; each 9d.
- „ (**Stenactis**) **speciosa superba.** Beautiful border perennial, growing about three feet high, covered for a long time with beautiful large bright purple flowers with yellow centre; very fine ... per doz. 7s. 6d.; each 9d.
- Funkia, or Plantain Lily.** Fine hardy border plants, the flowers of *F. subcordata grandiflora* almost equalling those of the Eucharis. The leaves are large, heart-shaped, and are finely effective for clumps on mixed borders, as edgings to large beds of sub-tropical plants, etc.; is also excellent for pot culture in the greenhouse.
- „ **lanceolata.** Dwarf-growing; lilac purple flowers per doz. 5s.; each 6d.
- „ „ **marginata.** A form of the preceding, with beautifully variegated leaves ... each 9d
- „ **Sieboldi.** Glaucous foliage and pink Lily-like flowers; very beautiful ... each 9d.
- „ **subcordata grandiflora.** A beautiful variety with bright green foliage ... per doz. 5s.; each 6d.
- Gaillardias** (*Gaillardia hybrida grandiflora*). Splendid hardy perennials. The very large and beautiful flowers are almost unique in their charming blendings of the many rich shades of brown, maroon, and golden yellow, and being of good substance are first-class to cut for indoor decoration, as the blooms will last a week in water.
- Choice named varieties, our selection** per doz. 12s. and 18s.
- Choice mixed seedlings,** will produce some beautiful flowers ... per doz. 4s. 6d.; 6 for 2s. 6d.
- Gentiana acaulis.** Intense blue, very fine per doz. 7s. 6d.; each 9d.
- „ **verna.** One of the most brilliant of all Alpine flowers; one to three inches high, forming dense tufts of intense blue flowers, each an inch or more across frequently with a white centre per doz. 7s. 6d.; each 9d.
- Geum coccineum plenum.** Height about two feet, bearing a profusion of double, bright scarlet flowers; first-rate for cutting ... per doz. 8s.; each 9d.
- Harpalum rigidum.** Rich golden yellow flowers with a black disc, resembling a small Sunflower per doz. 5s.; each 6d.
- Helenium pumilum.** Beautiful Autumn-blooming plant, eighteen inches high, bearing a profusion of bright yellow flowers ... per doz. 7s. 6d.; 3 for 2s.; each 9d.
- Helianthus multiflorus plenus** (*Perennial Sunflower*). Height three to four feet, beautiful golden yellow double flowers in Autumn ... per doz. 8s.; each 9d.
- „ **Soleil d'Or.** A fine variety, with deep orange yellow double flowers ... per doz. 7s. 6d.; each 9d.
- Helleborus (Christmas Rose).** A beautiful class of Winter-flowering plants, invaluable for cut flowers at a season when they are generally scarce; they will thrive in almost any soil or position, but have a decided preference for a moist and partially shaded situation. *H. niger* and *H. niger maximus* are undoubtedly the finest hardy Winter-flowering plants in cultivation, producing beautiful white flowers through the Winter; useful for potting for greenhouse decoration, and are worthy of extensive cultivation. The flowers are much improved in their purity of whiteness and size, if hand-lights or bell-glasses are placed over them just prior to and during the blooming season.
- „ **Niger** (*Christmas Rose*). Fine pure white, abundant bloomer ... per doz. 10s. 6d.; each 1s.
- „ „ **maximus.** A fine variety, large pure white flowers, splendid; should be in every garden per doz. 24s.; each 2s. 6d.
- „ **atrorubens.** Flowers purplish red, very numerous in clusters; blooms in Mid-Winter per doz. 15s.; each 1s. 6d.
- Hemerocallis Kwanso fl. pl. variegata.** One of the most beautiful hardy variegated plants in cultivation; it is perfectly hardy, and will thrive in almost any soil or situation; is also admirably suited as a decorative plant for the greenhouse or conservatory per doz. 7s. 6d.; each 9d.
- Hemerocallis flava.** A beautiful hardy border plant, producing in June and July large umbels of beautiful Lily-like flowers, of a bright yellow colour, and finely scented ... per doz. 4s. 6d.; each 6d.
- „ **fulva.** Bronzy orange, shading to crimson per doz. 3s. 6d.; each 4d.
- „ **disticha fl. pl.** Large, double, bronzy yellow flowers; very fine ... each 1s.
- Hepaticas.** These are amongst the most charming Spring-blooming plants we possess, and should certainly be found in every garden.
- „ **angulosa.** Sky blue; beautiful per doz. 7s. 6d.; each 9d.
- „ **triloba alba.** Single, white ... each 6s. 9d.
- „ „ **cærulea.** Single, blue ... „ 6s. 6d.
- „ „ **fl. pl.** Double, blue ... „ 1s. 6d.
- „ „ **rubra.** Single, red ... „ 6s. 9d.
- „ „ **fl. pl.** Double, red ... „ 1s. 0d.
- Heuchera sanguinea.** One of the most beautiful plants at present in cultivation. It forms a neat compact tuft of deep cordate leaves, five to seven lobed, and these again sharply crenated, of a light green colour and slightly hairy. The flower stems are slender and much branched, from twelve to eighteen inches in height, covered with bright crimson tubular flowers, and lasts in bloom the whole of the Summer. It is a true perennial, quite hardy, and very easily grown; good plants ... per doz. 10s.; each 1s.
- Inula glandulosa.** A fine hardy plant, growing about two feet high, and bearing large, single, Helianthus-like yellow flowers ... each 9d.
- Lathyrus latifolius albus** (*The White Everlasting Pea*). Beautiful clusters of pure white flowers; exceedingly useful hardy climber ... per doz. 10s. 6d.; each 1s.
- Lychnis dioica rubra fl. pl.** A plant of great beauty, exceedingly useful for cutting; large double crimson flowers; a first-class border plant ... each 9d.
- „ **viscaria splendens plena.** A distinct and splendid variety, growing about eighteen inches high and bearing a profusion of large, double, brilliant rose-coloured flowers ... each 9d.

Oenothera acaulis vera. A beautiful dwarf-growing species, with large white flowers; very distinct
per doz. 7s. 6d.; each 9d.
 „ **macrocarpa.** A fine hardy perennial, forming a trailing mass of foliage covered with large soft yellow flowers ... each 6d.
 „ **Youngi.** Height two feet, with deep golden yellow flowers; a first-class hardy plant per doz. 7s. 6d.; each 9d.

Papaver nudicaule (Iceland Poppies). Most useful and beautiful hardy flowers. Grown in masses, on beds, or borders, or planted on the rockery, they are equally at home, and will furnish a long continuance of their brilliantly-coloured blooms. They are very graceful in habit of growth, having attractive bright green foliage formed in tufts, the flowers rising on slender stems about one foot high, and are charming as cut flowers.

„ **nudicaule.** Bright pale yellow per doz. 7s. 6d.; each 9d.
 „ „ **alba.** Pure white „ 7s. 6d.; „ 9d.
 „ „ **miniatum.** Brilliant orange scarlet per doz. 7s. 6d.; each 9d.
 * „ **bracteata (true).** A charming species, with immense deep blood-crimson flowers... each 1s.
 * „ **Royal Scarlet.** The flowers are unequalled for size and brilliancy, measuring when fully expanded 12 inches in diameter, and are of a glowing scarlet colour each 1s. 6d.

* *Large-flowered Perennial Poppies, very showy and splendid flowers, first-class for mixed or shrubby borders.*

Pæonies, Herbaceous. Double-flowered. Well-known, magnificent, hardy, herbaceous plants for the shrubby border, &c.; will thrive in almost any soil or situation, but to be grown well should be planted in an open position and not disturbed for several years.

Choice named varieties, our own selection
per doz. 12s., 15s., 18s., 21s., and 24s.
Fine varieties, mixed, without names per doz. 9s.

Phloxes, Perennial. Magnificent hardy plants, in bloom from July to November.
Choice named sorts ... per doz. 4s. 6d., 6s., and 9s.

Phlox subulata. (Dwarf Spring-flowering Phloxes). Beautiful compact-growing varieties, forming dense cushions of lovely flowers, that continue in bloom for a long time; splendid for rockeries, edgings, or massing; all are perfectly hardy.

„ „ **frondosa.** Dense evergreen foliage, lovely pink flowers, dark centre ... per doz. 4s.; each 6d.
 „ „ **verna.** A very beautiful trailing species; flowers large, deep rose colour per doz. 4s.; each 6d.

Polemonium Richardsoni. Beautiful hardy perennial, blooming in June, height eighteen inches, flowers sky blue with golden yellow anthers; very pretty each 9d.
 „ **Himalaicum.** Vigorous habit of growth, with large branching spikes of azure blue flowers, 1 inch to 1½ inch across; very handsome ... each 1s.

Polyanthus, Gold-laced. Fine seedlings, all good flowers per 100, 21s.; per doz. 3s. 6d.

Potentillas. Double and Single-flowered. Very free-flowering and useful hardy perennials, growing about two feet high. The flowers are of a rich velvety texture, and vary in colour from crimson and maroon to orange and golden yellow.
12 in 6 choice varieties, our selection 9s.; 6 for 5s.

Primroses. A beautiful and indispensable class of brilliant Spring-flowering plants, blooming at the same time as Narcissi and many other bulbs; many of the single-flowered varieties are exceedingly handsome.

Double White ... per doz. 6s.; each 8d.
 „ **Lilac** ... „ 6s.; „ 8d.
 „ **Yellow** ... „ 6s.; „ 8d.
 „ **Purplish-crimson** ... „ 10s.; „ 1s.

Single "Harbinger." A superb large-flowered, early blooming variety, with lovely white flowers with an orange centre. Strong plants in pots per doz. 10s. 6d.; each 1s.
 „ **mixed hybrids.** Very fine and brilliant per 100, 17s. 6d.; per doz. 2s. 6d.

Pyrethrums. These fine plants produce a great variety of beautiful flowers in all the shades of crimson, carmine, rose, to pure white. The individual blooms are as double and finished as those of good Asters which they resemble, and are extremely useful for cutting.

Double-flowered. Strong established plants in choice named variety, our selection ... per doz. 6s. and 9s.
Single-flowered, in brilliant variety to name per doz. 6s.

Rudbeckia Newmanni. A splendid hardy free-flowering plant, height about two feet; flowers golden yellow with black centres ... per doz. 5s.; each 6d.

Scabiosa caucasica. Large, handsome, pale lilac-blue flowers, four to six inches across, fine for cutting, one of the best perennials grown; good flowering plants... each 1s.

Senecio pulcher. A very fine hardy perennial, flowers purplish crimson with yellow centre; three feet high; Autumn bloomer ... each 9d.

Spiræa aruncus. A handsome, stately-growing, border plant, from three to five feet high, with magnificent plumes of creamy white flowers ... each 1s.

„ **filipendula fl. pl.** Numerous corymbs of double white flowers and pretty fern-like foliage, very hardy and desirable ... per doz. 7s. 6d.; each 9d.
 „ **palmata (Crimson Meadow Sweet).** A very fine border plant, flowers rich crimson. Is well described by its popular name ... each 9d.

Tradescantia virginica alba major. A very showy plant, producing its charming white flowers during most of the Summer ... Strong flowering plants, each 9d.

Trillium grandiflorum (Large-flowered White Wood Lily). A very pleasing plant for moist shady nooks, flowers snowy-white on stems about one foot high ... each 9d.

Tritoma nobilis. The grandest of the group, immense spikes of orange red flowers, on stems six to seven feet long. In bloom from August to December ... each 2s.

„ **uvaria grandiflora.** Crimson and orange flowers, very fine spikes of bloom per doz. 10s. 6d.; each 1s.

Trollius Europæus. Beautiful Spring-flowering plant, with large, globular, lemon-coloured and delicately scented flowers ... per doz. 7s. 6d.; each 9d.

„ **Fortunei fl. pl.** A superb variety, flowers large, semi-double, and of the richest deep bright orange colour; splendid for cutting ... each 1s. 6d.

Wallflowers. Old Double yellow. A fine plant for Spring decoration, or for pots in a cool frame or greenhouse ... per doz. 7s. 6d.; each 9d.

„ **Old Double dark red or purple.** Very useful and fine old sort ... per doz. 7s. 6d.; each 9d.

Herbaceous and Alpine Plants in Collections.

WE have a fine collection of these which from want of space we are unable to catalogue. The following collections, which are offered at a very cheap rate, include the most beautiful and useful sorts for border and rockery decoration, and if our customers when ordering will kindly say for which purpose they are required, they may rely on having the very best selection that can be given for the prices quoted.

Carefully selected collections of the most useful and interesting kinds, our own selection.

HYBRID PERPETUAL ROSES.

1 MERVEILLE DE LYON. 2 A. K. WILLIAMS. 3 MRS. JOHN LAING.
 4 SILVER QUEEN. 5 LA FRANCE.

Hybrid Perpetual Roses.

This magnificent and beautiful class of Roses is better than any other adapted for exhibition and pot culture. They continue in flower from the early part of June to the end of October, and are by far the most desirable for general cultivation. Our stock of these, grown at our Nurseries, comprises many thousands of the newest and choicest varieties in standards and dwarfs, and the past season having been very favourable to their growth, the plants we offer will be found unusually well grown and vigorous, and may be expected to produce a fine display of bloom next season. Our standards and half-standards are all worked on the Dog Brier, dwarfs on Manetti stocks.

HINTS ON CULTIVATION.

Situation.—In planting Roses select, if possible, an open situation, where they get the full benefit of sun and air, and at the same time are sheltered from strong winds. If really fine Roses are desired they should be planted a fair distance apart and have the ground all to themselves. An abundance of beautiful Roses may, however, be grown by planting in almost any convenient place in the flower garden where not too much shaded, if moderate attention is given to pruning, insects, &c.

Soil and Planting.—Generally speaking, Roses will thrive in any good garden soil, but as they have a decided preference for that which inclines to the clayey or loamy, it is advisable in planting, where the soil is not of a suitable nature, to work in a good portion of well-decayed manure, and good rough fibrous loam; where the soil is heavy, a moderate dressing of coal ashes will improve it, and if too wet drainage must be provided. November is the best month for planting, but this may be done in any favourable weather during the Winter months. In planting, open a good-sized hole and fill with freshly prepared and suitable soil, taking care to plant firmly; dwarfs should be planted with the juncture of their stems below the surface, and standards should be firmly staked and tied to prevent their disturbance by the wind.

Pruning.—To ensure a vigorous growth and fine blooms, freshly planted, and indeed all hybrid perpetual and other outdoor Roses, should be closely pruned about the early part of March, or later according to season. When the leaf-buds begin to expand carefully thin out all weak-growing shoots or wood from the middle of the plant, and prune down the main stems to two or three eyes on each stem. An occasional slight pruning and thinning-out during the Summer, when the first lot of bloom is going off, will prolong the time of flowering and improve the quality of the late blooms.

Manuring and Watering.—Roses are gross feeders and will absorb almost any quantity of manure. A good top-dressing of well-decayed manure should be laid on the beds in Autumn, and may be lightly dug in in Spring, or, if appearances are not of much consequence, a rich mulching of short manure may be placed about the roots in Spring, and will stimulate the plants into splendid growth and flower. If the weather is dry when the plants are coming into bloom, they should have liberal waterings two or three times a week, and if fine blooms are desired for exhibition the buds should be thinned out, and liquid manure may be given freely once or twice a week, this, with frequent stirrings of the surface of the beds will keep the plants in good growth and vigour.

Insects.—Early in the season, when growth has fairly commenced, caterpillars should be carefully looked after and picked off by hand, and if the plants later on are attacked by green-fly, they should be syringed at night, or early morning, with tobacco-water, fir-tree oil, or some other cleanser. One of the best remedies for green fly is a solution of quassia chips and soft soap. Boil four ounces of the chips fifteen minutes in a gallon of soft water, then strain, and whilst cooling add four ounces of soft soap, which will readily dissolve, add to this, when cool, another two gallons of soft water, when it will be strong enough to apply with a brush or syringe, and is very effective.

Hybrid Perpetual Roses in Collections.

These collections are carefully made up to ensure a fine variety, and customers ordering may depend on their giving the most unqualified satisfaction. In all cases good healthy plants will be sent, and in the best variety of colour, &c., that can be included in the number given, but in all instances the selection must be left to ourselves.

CARRIAGE FREE. IMPORTANT NOTICE.

To meet the requirements of many of our numerous customers, we send all these collections Carriage Free to any part of the British Isles at prices quoted, and we make no charge for packing.

Marie Baumann. Brilliant vivid red ...	2 0	1 0			
Marie Rady. Brilliant red, very large and full; splendid shape ...	2 0	1 0			

Roses—Tea-scented and Noisette.

This beautiful class is distinguished by the peculiar and delightful fragrance of the flowers, and the many charming tints and shades of yellow, rose and salmon colour not to be found amongst the hybrid perpetuals. The individual blooms are of exquisite form, and invaluable for button-holes or bouquets. They are especially suited for pot culture in the conservatory, and planted outside on slightly raised beds in a sheltered position, and given a slight protection in Winter, they will furnish some beautiful flowers throughout the Summer and Autumn.

Our own selection, in choice variety, plants mostly established in pots, per doz. 15s., 18s., and 21s.

MADAME LAMBARD.

	Dwarfs—s. d.
Anna Olivier. Flesh-coloured rose ...	1 6
Belle Lyonnaise. Deep canary yellow, one of the best ...	1 6
Bouquet d'Or (Noisette). Deep yellow, coppery centre ...	1 6
Caroline Testout (Hybrid Tea). Bright satin rose with brighter centre, large, full, and globular, very free and sweet; a charming rose ...	2 6
Catherine Mermet. Flesh-coloured rose ...	1 6
Celine Forestier (Noisette). Pale yellow ...	1 6
Comtesse de Nadailac. Bright rose, with coppery yellow ...	1 6
Comtesse Riza du Parc. Salmon rose, shaded with copper ...	1 6
Devoniensis. White, tinted yellow, beautiful ...	1 6
Ethel Brownlow. Salmon pink, shaded yellow at the base of petals, flowers of perfect form ...	2 0
Etoile de Lyon. Fine saffron yellow, large fine form ...	1 6
Francisca Kruger. Copper yellow, shaded peach, large and full ...	1 6
Gloire de Dijon. Buff, with orange centre. A well-known old favourite 1s. 6d., 2s. 6d., 3s. 6d., 5s., and	7 6
Grace Darling. Creamy white, shaded peach; very pretty ...	1 6

	Dwarfs—s. d.
Homero. Rose, centre salmon ...	1 6
Innocente Pirola. Pure white, slightly rosy ...	1 6
Isabella Sprunt. Sulphur yellow ...	1 6
Jean Ducher. Salmou yellow, shaded with rose ...	1 6
La Boule d'Or. Bright golden yellow, large and of exquisite form ...	2 6
Lady Castlereagh (new). Soft rosy yellow, very large ...	2 6
L'Idéal (Noisette). Yellow and metallic red, streaked and tinted golden yellow; a charming variety of indescribable beauty ...	2 0
Madame Bravy. Creamy white ...	1 6
Ma Capucine. Nasturtium yellow, tinted copper; small but charming bud ...	2 0
Marechal Niel (Noisette). Beautiful golden yellow. Well known ... 1s. 6d., 2s. 6d., 3s. 6d., 5s., and	7 6
Marie Guillot. White, slightly tinted with yellow ...	1 6
Madame Cusin. Rosy purple, with pale yellow at base of petals, exquisitely formed ...	2 6
Madame Falcot. Apricot yellow, very distinct ...	1 6
Madame Lambard. Bright red, a fine variety ...	1 6
Madame Margottin. Deep yellow, centre rosy peach ...	1 6
Madame de Watteville. Salmou white, edged with bright rose and pink; beautiful and distinct variety ...	2 0
Marie van Houtte. Lemon yellow edged with lively rose, medium size, good form, beautiful 1s. 6d. and	2 6
Mrs. James Wilson (new). Deep lemon yellow, margined rose, very fine ...	2 6
Niphotos. Pale lemon, changing to white 1s. 6d. and	2 6
Perle de Lyon. Deep yellow; splendid ...	1 6
Perle des Jardins. Straw colour ...	1 6

Sunset. Rich tawny saffron colour 1s. 6d. and	2 0
The Bride. A pure white sport from <i>Catherine Mermet</i> ; most valuable for cutting purposes ...	2 0
THE PURITAN (Hybrid Tea) (Bennett). This fine white Rose is the result of a cross between <i>Mabel Morrison</i> and <i>Devoniensis</i> , and is exceedingly valuable for forcing. The buds when opening are slightly yellow, changing to pure white as they expand, whilst they have the most delicious perfume ...	2 6
THE METEOR (Hybrid Tea) (Evans). Rich velvety crimson, without the slightest tint of purple; a constant and free bloomer, very vigorous in growth and with no tendency to mildew. A capital Rose for Winter blooming under glass, and first-class for the Summer season out of doors ...	2 6
Vicomtesse de Cazes. Yellow, centre deeper ...	1 6
Vicomtesse Folkestone. Creamy pink ...	1 6
W. F. Bennett. Crimson, large and double ...	2 6
Waban. A sport from <i>Catherine Mermet</i> ; carmine pink splashed with madder red; flowers borne on long straight stems; very fine and distinct ...	2 6
William Allen Richardson (Noisette). Fine deep orange yellow, very showy and distinct; a gem for buttonholes and bouquets 1s. 6d., 2s. 6d., 3s. 6d., and	5 0

Climbing Roses, Hardy and others.

The following list of Climbing Roses includes the most useful and beautiful varieties in cultivation. For pillars, walls, or arches in exposed positions the fine old varieties of Ayrshire, Evergreen, Banksia, Boursault, Cheshunt Hybrid, Gloire de Dijon, and Aimee Vibert are the most desirable; whilst for greenhouse work the beautiful Marechal Niel, Climbing Niphetos, and Climbing Devouisiensis are the best.

WILLIAM ALLEN RICHARDSON.

	s.	d.
Aimee Vibert (Noisette). Small pure white flowers in large clusters; very hardy	1	0
Ayrshire, Dundee Rambler. White, edged pink	1	0
Queen of the Belgians. Pure white	1	0
Banksia alba, or white. Pure white	1	6
lutea, or yellow. Fine yellow	1	6
Boursault (Rosa alpina), Amadis, or crimson	1	0
Catherine Bell. Bright rosy pink	1	0
Cheshunt Hybrid. Bright cherry earmine, large open flowers; a very hardy and strong grower; fine	1	0
1s., 1s. 6d., 2s. 6d., 3s. 6d., and	5	0
Climbing Devouisiensis (T). Magnificent strong-growing variety, flowers creamy white with blush centre; deliciously scented		
1s. 6d., 2s. 6d., 3s. 6d., 5s., and	7	6
Climbing Niphetos. A fine new, rapid growing, climbing tea-scented variety; shoots running to twenty feet in one season, flowering on lateral shoots from their main stems continuously; blooms of a purer white than those of the old variety, not showing the pink tinge, and even more delicate scented. First Class Certificate R. H. S.		
2s. 6d., 3s. 6d., 5s., and	7	6
Evergreen, Donna Maria. Pure white	1	0
Felicite Perpetuelle. Creamy white	1	0
Leopoldine d'Orleans. White, tipped red	1	0
Myrianthes. Blush, edged rose	1	0
Rampant. Pure white	1	0
Gloire de Dijon (T). Buff, with orange centre, well known, superb variety		
1s. 6d., 2s. 6d., 3s. 6d., 5s., and	7	6
Marechal Niel (Noisette). Beautiful golden yellow of the most lovely form and delicious fragrance; well known, superb variety		
1s. 6d., 2s. 6d., 3s. 6d., 5s., and	7	6
*Waltham Climber, No. 1. } Light crimson	2	0
*Waltham Climber, No. 3. } Dark crimson	2	0
William Allen Richardson (Noisette). Fine deep orange yellow, very showy and distinct; a gem for buttonholes and bouquets; a capital variety for the greenhouse: a very strong grower		
1s. 6d., 2s. 6d., 3s. 6d., and	5	0

* Seedlings from the well-known Gloire de Dijon.

Miscellaneous Roses.

AUSTRIAN COPPER. Distinct and beautiful, golden terra-cotta colour, flowers single each 1s.
AUSTRIAN BRIER (PERSIAN YELLOW). Deep golden yellow, full, double flowers each 1s.
PROVENCE OR CABBAGE ROSES—
Old Provence. Rose colour, very fragrant each 9d.
White Provence. White, beautiful bud each 9d.
ROSA RUGOSA, Japanese Roses. Beautiful varieties, bearing very large single blooms, followed by handsome fruit in Autumn; highly ornamental.
Alba. Pure white, very large and sweet each 1s. 6d.
Rubra. Bright rose, very sweet scented each 1s. 6d.
CRIMSON CHINA. Dark crimson, dwarf and pretty; an old favourite each 1s.

MOSS—CRIMSON GLOBE (New Hybrid Moss).
 Buds nicely mossed, flowers deep crimson, large, full, and globular, growth very vigorous. This magnificent Rose will be a great acquisition to the Moss Roses, as it possesses the qualities of a show flower combined with the true moss characteristics. First Class Certificate, Royal Horticultural Society Dwarfs only, each 2s.
 „ **Blanche Moreau.** Perpetual Moss, pure white flowers in clusters, well mossed Standards 2s.; Dwarfs 1s.
 „ **Common Moss.** Rosy blush, mossed well up the bud Standards, each 2s. Dwarfs, per doz. 10s. 6d.; each 1s.
 „ **White Moss.** Pure white, beautifully mossed Dwarfs only, per doz. 10s. 6d.; each 1s.
Perle d'Or (Polyantha). Nankeen yellow with orange centre; small and very beautiful buds each 1s.

From Mr. E. SELLEY, Landport.

Nov. 13th.
 "The last Roses I had from you have done very well; they have been admired by all who saw them."

From Mr. S. PERKINS, Balham.

April 17th.
 "The last Trees you sent were very nice, especially the Gloire de Dijon Rose."

From Miss PEART, The Cottage, Ballybrack.

Feb. 16th.
 "I am very much pleased with the Fruit Trees you sent me, and which reached me in good condition."

From Mr. G. VIDLER, Cheyne Court.

Dec. 19th.
 "The Fruit Trees arrived all right, I like the look of them very much."

A FEW HINTS ON FRUIT CULTURE.

Horticulturally speaking, we know of no more interesting, pleasant, or profitable occupation than that of cultivating a really good collection of choice Fruit Trees, and although the preparation of the soil and the planting may, in some instances, entail a rather heavy outlay, we have abundant evidence to show, that ground planted in the way suggested, and the trees fairly cultivated, will, after a few years, yield the most satisfactory results. The enormously large and increasing annual importations of Apples and other fruit from America, the Continent, and Tasmania, furnish a sure indication of the large and fast increasing demand for all kinds of choice fruit in this country, and although the importations referred to are in many instances of excellent quality, it must be admitted that good English-grown fruit is, year by year, becoming more and more appreciated, and it is clearly shown by the splendid samples being brought to our markets and sold at highly remunerative prices, that by planting only really choice varieties, and with good cultivation, Apples, Pears, and other fruits can be grown in this country of a size, flavour, and quality altogether surpassing those of foreign production.

This is especially the case in regard to Apples and Pears, choice samples of fruit of really good sorts always commanding a ready sale at high prices, whilst the supply every season falls very far short of the greater and greater demand. Intending growers should, however, be careful to note that it is only the best varieties that command the highest prices, and when planting should exercise the greatest care that only the best and choicest sorts are planted, as inferior kinds often do not pay for the trouble of gathering.

With a knowledge of the above facts, and keeping in mind our large and constantly increasing population, it is fairly certain that in some twenty or more years to come, at least, choice fruit growing in this country may be pushed on vigorously without any fear of the market being glutted; and we should certainly advise all landowners, who have not done so already, and all others having a good ground with fair security of tenure, to at once make a start in fruit growing, as we feel sure that if intelligently handled it will pay, and well.

Wherever space in the garden will admit, fruit of some kind should be grown, as, apart from its great usefulness in point of domestic economy, its great value as a health agent cannot be fairly over-estimated where it is freely used in the household. Plums, Gooseberries, and other small fruits are admirably suited for making into jams for winter consumption, or for wines and other drinks, and in which state they are very wholesome, but Apples are undoubtedly the most useful as an article of food; they contain more phosphorus than any other known fruit, are highly nutritious, and eaten freely when ripe and at their best, they almost entirely remove the desire or necessity for any kind of alcoholic or other beverage.

For small gardens such compact-growing fruits as dwarf or pyramid Apples and Pears, Gooseberries, Currants, Raspberries, and Strawberries are the most useful, and where there is a good south wall a Vine or Peach should be planted, whilst a wall with a westerly aspect will do well for Cherries or Pears, and a north wall is well suited for Currants. In planting in the garden be careful to plant at such a distance apart that the plants get the full benefit of light and air, the result of over-crowding being but too often barrenness or inferior quality.

For Fruit Farmers and other growers for sale and gardens where the space is limited, dwarf or pyramid Apples and Pears are decidedly the most profitable to grow. They may be planted much closer than standards, and in many varieties may be cultivated into good bearing in three or four years, in fact, whilst standards planted at the same time will only have made a fair start into growth.

For large occupations, dwarf, bush, or pyramid Apples and Pears may be planted in rows six or eight feet apart, and the trees six or eight feet apart in the row, or they will do still better if planted in rows twelve to fifteen feet apart, and six or eight feet apart in the row, with lines growing between, of such fruits as Strawberries, Raspberries, Gooseberries and Currants or such vegetables and salads as Peas, Beans, Asparagus, Lettuce, Onions, Potatoes, Rhubarb, Endive, &c., and good ground filled in this way and well cultivated is amazingly productive. For smaller occupations the dwarfs or pyramids are best planted six or eight feet apart, in rows on each side the walks, and about three feet from the paths, leaving the space behind for the ordinary garden crops, whilst a line or two of Strawberries may be grown in front.

In selecting ground for fruit growing, a position should be chosen that is fairly open without being too much exposed to high winds, which at certain seasons are very injurious. Generally speaking, a good deep loamy soil is the most favourable, but with a fair amount of preparation, almost any soil will, in a good season, grow an abundance of excellent fruit. Heavy water-logged ground should be well drained before planting, and should have a good dressing of lime or ashes, whilst light sandy soil will be wonderfully improved by having a good addition of loam or well-pulverised clay worked in. In planting, care should always be taken to spread out the roots as naturally as possible, and where the land is heavy, they should be kept close to the surface; standards should have a good stout stake placed to each to secure them till firmly established.

When planting standard Apples, Pears, Plums, and Cherries on meadow land for forming an orchard, the trees should be planted not less than twenty feet apart, and for Apples only the distance should not be less than twenty-five or thirty feet apart. In planting, remove for each tree about six feet square of turf, and about eighteen inches of the top soil, trench or break up the bottom, working in a good portion of well-decayed manure. Chop up the turf removed and mix with the top soil removed, adding some well-decayed manure, fill up the hole with this, plant the tree in the centre, make firm about the roots, stake and give a mulching of well-decayed manure.

In very dry weather young fruit-bearing trees of Apples, Pears, Plums, &c., are much benefited by a liberal supply of water, which promotes a healthy growth and prevents cracking of the fruit; whilst sewage water, house slops, thrown on the ground about the roots in Winter and Spring, will add much to their productiveness. When fruit trees are growing vigorously, some attention should be given to the stopping and thinning out of the branches, to prevent them becoming crowded, and in the case of pyramid or dwarf trees, they should be partially lifted every two or three years, and the roots slightly pruned. This is an important matter, and if properly carried out, and the trees are liberally treated with mulchings, manure waterings, &c., an abundance of fine fruit may almost always be relied on.

Miscellaneous Fruit Trees, &c.

Our Nursery Grounds are especially favourable for the cultivation of Fruit Trees, and to meet the constantly increasing demand amongst our customers, we annually rear many thousands of Apples, Pears, Plums, Cherries, Peaches, Apricots, &c. All are grown hardily, and the plants lift with abundance of fibrous root, a very essential requirement for their successful transplantation, after-growth, and fruitfulness. A glance at our list will show that we offer a very fine selection of the choicest varieties, and we respectfully invite all who have not yet favoured us with their orders for Fruit Trees to give us a trial, as we feel sure they will be highly pleased with the quality of the plants we send.

The prices quoted per dozen for Apples, Pears, Gooseberries, Currants, &c., are for our own selection of kinds, and are governed principally by the size and strength of the plants supplied.

NEW APPLE—VICAR OF BEIGHTON.

NEW APPLE—Vicar of Beighton.

We have much pleasure in introducing this fine Apple to the horticultural public, who, we feel sure, will highly appreciate its many good qualities. A seedling raised in the Vicarage Gardens at Beighton, Norfolk, it has proved itself one of the handsomest, most prolific, and best keeping apples in cultivation. The fruit is large and roundish, and when ripe of a deep bright crimson colour, mottled, and striped with yellow and green, giving it the most beautiful appearance, which, if well kept, it retains till April or May; whilst its pale yellow flesh is of fine flavour, juicy, and all that can be desired in a first-class kitchen Apple. Will prove a most valuable sort for market growers on account of its very handsome appearance and excellent keeping qualities.

Dwarf Bushes or Maidens, each 2s. 6d. Half-Standards, each 5s.

NEW APPLE—Beauty of Bath.

This fine new early Dessert Apple, on account of its earliness, extremely handsome appearance, good flavour, and free cropping qualities, will eventually, both for market purposes and private use, take the leading place among first early Apples.

The "Beauty of Bath" is fit for use at the end of July and early part of August. It immediately follows the Juneating, and is earlier than the Irish Peach, from which it is quite distinct. The fruit is of medium size, round and flattened, the ground colour a yellowish green, beautifully striped and spotted with crimson toward the sun; the flesh is firm and pale yellow, and it has a brisk, sub-acid flavour far superior to that of other early apples. It is a certain and free cropper. Our stock trees have not failed once during the last six years, and it will on this account be a valuable market variety.

Strong Maiden Trees, each 1s. 6d. Standards, each 2s. 6d.

SELECT APPLES.

OUR Apples are mostly worked on the ordinary or crab stock, we can, however, supply several of the best varieties in dwarfs on the paradise stock, and shall be happy to furnish a list of these if requested.

Dwarfs or Bushes in fine variety	per 100, 80s.; per doz. 10s. 6d.; each 1s.
Dwarf Trained	each 3s. 6d. to 5s.
Pyramids, our own selection of varieties	per doz. 21s. to 54s.; each 2s. to 5s.
Standards, our own selection of choice varieties	per doz. 18s., 21s., 24s.; each 1s. 6d. to 2s. 6d.

Special Quotations for Larger Quantities.

General List.

D denotes dessert, K kitchen.

- Alfriston (K.)** A large and useful variety; in season from Nov. to April.
- Annié Elizabeth (K.)** A very fine late Apple of excellent keeping qualities. Dec. to May.
- Beauty of Kent (K.)** A handsome, large, and first-rate culinary Apple; excellent bearer. Oct. to Feb.
- Bess Pool (D.K.)** Medium-sized conical fruit; a capital sort for kitchen or dessert. Nov. to March.
- Blenheim Orange (D.K.)** Well-known and splendid variety; handsome fruit. Dec. to Feb.
- Brussett (D.)** A very valuable dessert Apple of the quality.
- Crabant Bellefleur (K.)** A very fine late Apple of excellent quality.
- Bramley's Seedling (K.)** A large handsome fruit, resembling Bleuheim Pippin. Sept. to Jan.
- Brownlee's Russett (D.K.)** An excellent late Apple.
- Cellini (D.K.)** A fine, showy, and handsome Apple of the first quality. Oct. and Nov.
- Cox's Orange Pippin (D.)** A highly popular and first-rate dessert Apple; fruit, medium-sized, finely coloured, rich, crisp, and juicy, and of delicious flavour. Oct. to Mar.
- Cox's Pomona (K.)** Large, handsome fruit; excellent bearer. Oct. to Dec.
- Court of Wick (D.)** Small, oval fruit of splendid flavour; a first-rate dessert Apple. Oct. to March.
- Court Pendu Plat (D.)** A handsome fruit of good keeping qualities; a capital bearer. Nov. to April.
- Devonshire Quarrenden (D.)** A fine hardy, free-bearing variety of excellent quality; fruit small. Aug. and Sept.
- Doctor Harvey (K.)** A very fine, large, handsome fruit; first-class for culinary uses. Oct. to March.
- Doctor Hogg (D.K.)** A very useful variety. Nov. to Feb.
- Duchess of Oldenburg (K.)** Medium-sized, handsome fruit, of good brisk flavour. Sept. and Oct.
- Dumelow's Seedling (K.)** A large and excellent variety; one of the most useful of culinary Apples; a strong grower, and an excellent bearer. Nov. to May.

“The Most Productive Gooseberry in Cultivation.”**“WHINHAM'S INDUSTRY” GOOSEBERRY.**

THIS superb variety has fairly established its reputation as one of the finest and most profitable Gooseberries in existence. The fruit are of enormous size, and when ripe, of a dark, dusky red colour; it is of fine quality, and cannot be surpassed for preserving. The plant is of robust growth, and, as shown in our illustration, is marvellously prolific. Upwards of three tons of splendid fruit have been gathered from half-an-acre, and as much as twenty-six tons of this fine Gooseberry have been grown on 3½ acres.

“Whinham's Industry” Gooseberry attains a marketable size quite three weeks in advance of any other variety of Gooseberry at present in cultivation, and in consequence commands the highest prices obtainable in the market. It is undoubtedly the heaviest cropping variety in cultivation, and has never been known to fail in producing a splendid crop even in seasons when other varieties were a failure. It possesses a peculiar advantage over other kinds by coming into leaf some time before it flowers, consequently the foliage protects the bloom from destructive Spring frosts. Another property is that it succeeds better than any other variety under the shade of trees.

Strong bushes, per 100, 40s.; per doz. 6s.; each 8d.

CHERRY, MAY DUKE

Nuts and Filberts.

We have a very fine stock of these in good strong fruiting plants, comprising such fine varieties as Cosford, Kentish Cob, Filbert, white, red, purple-leaved and frizzled, Norwich Prolific, &c.

Strong Fruiting Dwarfs or Bushes in first-class condition for removal per 100, 45s.; per doz. 6s.
Standards each 1s. 6d. and 2s. 6d.

Select Cherries.

Either as trained trees for walls, pyramids, or standards, this well-known fruit is a profitable occupant of the fruit garden.

Dwarfs or Bushes per doz. 10s. 6d.; each 1s.
Dwarf Trained ... per doz. 40s. to 54s.; each 3s. 6d. to 5s.
Standards per doz. 21s.; each 1s. 6d. to 2s. 6d.
 " **Trained** per doz. 54s.; each 5s.
Pyramids per doz. 21s. to 54s.; each 2s. to 5s.

General List.

- Archduke.** Large, very richly flavoured and excellent variety. The finest of the Duke Cherries and forms a prolific bush, ripens about ten days after *May Duke*.
- Belle d'Orleans.** A good early variety.
- Bigarreau.** Large and of first-rate quality; a capital bearer. July.
- Bigarreau Napoleon.** Large, rich, and good; a most abundant bearer, very late. August.

Fruit Trees Received in Winter during Frost.

The Trees closely packed as received, should be placed in a cellar, or some place where the frost cannot penetrate, and remain there till a thaw takes place, and then be unpacked and planted. With this treatment, even if they are frozen through when received, they will not sustain the least injury.

Proper Distances for Planting Fruit Trees.

Standard Apples, Cherries, Pears, Plums, Quinces, and Medlars in Orchards should be planted about twenty feet apart.

From Mr. A. W. WEATHERHOGG, Willoughton.
June 8th.

"The Fruit Trees I had from you last Autumn are doing remarkably well; one Apple Tree, the 'Worcester Pearmain,' is carrying far too much fruit."

From Mr. P. WIGGALL, Churchdown.

Feb. 10th.
"I beg to acknowledge receipt of Trees, they came beautifully packed, and in splendid condition. I am very pleased with them, never saw better stuff sent out at the price."

CURRENT BLACK CHAMPION (see page 49).

Strawberry Plants—Prepared Runners.

Strawberries when well-grown are wonderfully prolific, and constitute one of the most profitable crops, really good fruit always meeting with a ready sale at high prices. These delicious and wholesome fruit should be grown freely in every garden where there is room for them. As will be seen, our collection of choice Strawberries, a select list of which we offer below, contains all the finest varieties in cultivation. The best system of culture is to plant in rows 2½ feet apart and 18 inches apart in the row; keep free of runners and give a top dressing of well-decayed manure in Winter.

	per 100—s. d.	per 100—s. d.
LAXTON'S SCARLET QUEEN. The raiser in introducing this new Strawberry thus writes of it:—"A most noble Strawberry! An early and better flavoured 'Paxton,' and the finest early variety yet introduced. Very early, large, bright coloured, richly flavoured, and of handsome appearance. Plant vigorous and prolific." This superb variety has been fairly tested at our Nurseries, and fully bears out the raiser's description. The fruit is the brightest coloured and the most handsome of any variety we know, and it is a very fine early kind that should be extensively grown per doz. 3s. 17 6		
"LATEST OF ALL" (Laxton). A grand new seedling from <i>British Queen</i> crossed with <i>Helena Gloede</i> . The fruit is very large, exceeding in size that of either parent, and is certainly the finest flavoured and largest late Strawberry yet introduced. The flesh is firm and white, the flavour vinous, yet luscious and quite equal to that of <i>British Queen</i> , which it most nearly approaches in appearance, but ripening from ten days to a fortnight after it. It has, indeed, been gathered three weeks after other Strawberries are past. The plants are hardy, vigorous, and prolific, and will thrive on any soil where Strawberries can be fairly grown. Will prove a fine acquisition for market growers per doz. 2s. 12 0		
NOBLE (Laxton). This is a very large and handsome, regularly formed, flattish, globular-shaped early Strawberry, of a rich and vinous flavour, flesh firm, and without the objectionable treacly taste common to many large varieties; colour bright crimson scarlet. Plant very hardy and vigorous, and most prolific, nearly every small runner producing wonderful trusses of large even-sized fruits with comparatively few small per 1000, 40s.; per doz. 9d. 5 0		
A. F. Barron (Laxton). A cross between <i>Sir J. Paxton</i> and <i>Sir Charles Napier</i> . Very fine. First Class Certificate, Royal Horticultural Society per doz. 1s. 6d. 7 6		
Auguste Nicaise. Crimson, large and early ... 5 0		
Black Prince. Early, small, but good cropper ... 3 6		
1000 in 10 choice varieties, our own selection 35s. 0d.		
100 in 10 choice varieties, our own selection 5s. 6d.		
British Queen. Well-known superb variety; the finest flavoured strawberry in existence; requires good cultivation 5 0		
Commander (Laxton). A cross between <i>British Queen</i> and <i>President</i> , and said to be even superior in flavour to <i>British Queen</i> . One of the most distinct and splendid Strawberries yet raised ... per doz. 1s. 6d. 7 6		
Duke of Edinburgh. Fine flavour, abundant bearer ... 5 0		
Elton (syn. <i>Elton Pine</i>). Fruit large, flesh red throughout, a valuable late variety 5 0		
Filbert Pine (syn. <i>Myatt's Seedling</i>). Solid, rich, and briskly flavoured with a fine aroma; a heavy cropper ... 5 0		
James Veitch. Very large, handsome conical form, crimson with white flesh, strong grower		
Keen's Seedling. A well-known early kind, ... for forcing		
King of the Earlies. A splendid early sort, medium-sized, and of a beautiful bright red colour ... 5 0		
Kitley's Goliath. Excellent market sort 3 6		
La Grosse Sucree. An old and well-established early variety 5 0		
Loxford Hall Seedling. Crimson, a great bearer and of excellent quality, medium early 5 0		
Lucas. Immensely large, handsome, and excellent ... 5 0		
President. A great cropper, colour crimson, of superior flavour 5 0		
Sir Charles Napier. Good for general purposes ... 3 6		
Sir Joseph Paxton. Hardy early variety 5 0		
The Amateur. A fine variety of a rich crimson colour, very prolific 5 0		
The Countess. Deep crimson, large and very fine variety 5 0		
Vicomtesse Hericart de Thury. Medium-sized fruit, sweet and richly flavoured, early and fine for forcing 3 6		
Waterloo. Fruit large and of a fine dark crimson colour, almost black when ripe, a good grower and first class for exhibition per doz. 1s. 6d. 7 6		

NEW AND VALUABLE STRAWBERRIES EMPRESS OF INDIA, GUNTON PARK, LORD SUFFIELD.

Raised by Mr. William Allan, gardener to the Right Hon. Lord Suffield, and known as the GUNTON PARK STRAWBERRIES.

ALL have received FIRST-CLASS CERTIFICATES from the Royal Horticultural Society; also the Highest Awards at Edinburgh, Wolverhampton, Earl's Court, and Norwich.

Price, 42s. per 100; 6s. per doz.

"LORD SUFFIELD is a decidedly distinct variety, very sweet in flavour, the flesh firm and highly coloured. The plant exhibited, to show its bearing-qualities and habit, left nothing to be desired. The fruit of GUNTON PARK shown was very fine, having borne the journey well. The plant sent showed this to be an excellent late variety, of robust growth, and an immense bearer. EMPRESS OF INDIA is the result of a cross between *British Queen* and *Countess*, possessing all the good qualities of both parents. Very useful for forcing."—*The Garden*.

"The Strawberries travelled the long distance between Gunton and here (Kingston) admirably, turning out as bright and fresh as if just gathered. EMPRESS OF INDIA has much of the old *Pine* flavour—the flesh is soft and smooth, and of a beautiful scarlet; a high-class dessert Strawberry. LORD SUFFIELD has firm flesh, of a rich crimson hue, and a delicious vinous flavour. GUNTON PARK is a large, somewhat Cockscomb-shaped fruit, of a deep blood-crimson; flesh very firm, and of striking flavour. This, being a great cropper, should make a fine market variety."—A. Dean, in *Journal of Horticulture*.

"I fully agree with Mr. Dean in his estimate of these Strawberries. They travel well, and are in colour, shape, and flavour excellent. They are worthy of a trial in large and small gardens."—John Andrews, Hon. Sec. to the Woodbridge Horticultural Society, in *Journal of Horticulture*.

Clematises.

These magnificent hardy climbers are highly popular amongst amateur growers, and considering their great beauty, freedom of blooming, and the facility with which they may be trained on any kind of wall, trellis, verandah, or pillar, and in almost any aspect, it is surprising that Clematises are not found in abundance in every garden. The plants we offer are established in pots, and can be removed at any time of the year. The sorts blooming after June are the best for bedding purposes; they flower on the young wood, and therefore require before growth commences in Spring, to be cut down to within six or twelve inches of the ground, as likewise do all the late-flowering kinds; and early sorts, flowering from May to July on the old wood, should be pruned similarly to Roses. When the selection of sorts is left to ourselves, customers may rely on our sending a really good variety.

CLEMATIS—JACKMANII SUPERBA.

	Months of Flowering.	each. s. d.
Albert Victor. Deep lavender	My Jy	1 6
Ascotiensis. Azure blue, large	Jy Sp	1 6
Beauty of Surrey. Greyish blue	Jy	2 6

Mrs. Hope. Satiny mauve	Ju Au	2 6
Mrs. Geo. Jackman. Satiny white, beautiful	Ju Oc	2 0
Star of India. Reddish plum	Jy Oc	1 6
Symeana. Delicate lavender blue, deeper bars	Jy Oc	1 6
Venus Victrix. A fine double-flowered variety, delicate lavender blue, beautiful form	Jy Oc	2 6
William Kennett. Deep lavender	Ju Oc	2 6

Choice named varieties from the above list, our own selection, per doz. 18s., 24s., and 30s.

Clematis indivisa lobata.

WE offer fine plants of this beautiful evergreen greenhouse species. The foliage is of a dark olive green and of great substance; the flowers are of the purest white, very fragrant, and produced in wonderful profusion. Highly recommended as a greenhouse climber. The flowers are very neat and exceedingly useful for cutting.

Fine strong plants, each 2s. 6d.

Greenhouse and Stove Plants.

Adiantum cuneatum. Maiden-hair fern
6d., 1s., and 2s. 6d.

Adiantum Farleyeuse. Very fine variety
1s. 6d., 2s. 6d., and 3s. 6d.

Allamanda Hendersoni. Beautiful stove plant
each 2s. 6d. and 3s. 6d.

Aralia Sieboldi variegata. Beautiful plant
each 3s. 6d. and 5s.

Aralia Veitchi. Very graceful
each 5s.

Araucaria excelsa (Norfolk Island Pine.) A fine plant for the conservatory
each 3s. 6d. and 5s.

Aspidistra lurida variegata. A very beautiful and distinct plant, with handsomely variegated foliage
each 3s. 6d. and 5s.

Asparagus plumosus each 1s. 6d. and 2s. 6d.

Azalea Indica. We offer a choice collection, finest varieties, all in good healthy flowering plants, varying in height from about ten inches to sixteen inches from the pots. Our own selection, per doz. 24s., 30s., 40s., 50s., and 60s., according to size and variety; each 2s., 2s. 6d., 3s. 6d., 5s., and 7s. 6d.

Azalea Mollis. Fine healthy plants well set with flower-buds
each 1s. 6d., 2s. 6d., and 3s. 6d.; per doz. 18s. to 30s.

Begonias, Rex varieties. Well-known beautiful foliaged plants, for the greenhouse or conservatory
each 1s. 6d. and 2s. 6d.

Begonias, tuberous-rooted. Fine varieties
per doz. 9s. and 12s.

Caladiums. The most beautiful varieties
each 2s. 6d. and 3s. 6d.

Camellia Japonica. Our collection of these includes all the finest of the English and continental varieties, and our plants are amongst the healthiest and best budded we have ever seen. The height of plants from the pots varies from about a foot to eighteen inches. Our own selection, per doz. 30s., 40s., 50s., and 60s.; each 2s. 6d., 3s. 6d., 5s., and 7s. 6d.

Carnations, Perpetual or Tree. Established plants in pots
per doz. 18s., 21s., and 24s.

Clerodendron Balfouri. Useful climber
each 2s. 6d.

Cobæa scandens variegata. Useful climber for the greenhouse
each 1s. 6d. and 2s. 6d.

Coprosma Baueriana variegata. Beautiful greenhouse plant, with handsomely variegated foliage
each 1s. 6d. and 2s. 6d.

Cælogyne cristata. Some fine plants
each 10s. 6d. to 42s.

Cobæa scandens variegata. Useful climber for the greenhouse
each 1s. 6d. and 2s. 6d.

Crotons. A fine collection of choice sorts in nice young plants
each 2s. 6d. and 3s. 6d.

Crassula jasminioides. Pure white flowers, similar in form to those of Jasmine or Bouvardia; capital greenhouse plant, good for cutting
each 9d.; 3 for 2s.

Daphne Indica alba. Pure white, deliciously scented variety
each 2s. 6d., 3s. 6d., and 5s.

Daphne Indica rubra. Very sweet
each 2s. 6d. and 3s. 6d.

Eulalia zebrina. Very handsome
each 2s. 6d. and 3s. 6d.

Eucalyptus citriodora. Deliciously scented
each 1s.

Ficus elastica variegata. Beautifully variegated with yellow, grand novelty
each 5s.

Ficus elastica (India-rubber Plant)
each 1s. 6d. and 2s. 6d.

Gardenia intermedia. Well-known stove plant, beautiful pure white, deliciously scented, double flowers
each 2s. 6d., 3s. 6d., and 5s.

Greenhouse Ferns. A fine selection
per doz. 6s., 9s., 12s., and 18s.

Gloxinias, grandiflora erecta vars.
per doz. 9s.

Greenhouse Ferns. A fine selection
per doz. 6s., 9s.

Hoya carnosa. A very charming plant, producing thick wax-like flowers, which last long time
each 2s.

Kentia Belmoreana } Beautiful Palms
" **Fosteriana** } each 2s. 6d. and 3s. 6d.
" **Canterburyana** }

Lapageria rosea. Beautiful greenhouse climber
each 2s. 6d., 3s. 6d., and 5s.

Lapageria alba. Lovely pure white, wax-like flowers
each 7s. 6d. and 10s. 6d.

Palms. A nice assortment of choice plants, suitable for the dinner table
each 2s. 6d., 3s. 6d., and 5s.

Pandanus Veitchi variegata
each 1s. 6d. and 2s. 6d.

Pancretium Zeylanicum. Beautiful dwarf growing species, flowers large, pure white, very fragrant
each 2s. 6d.

Passiflora princeps. Lovely stove climber, with large, scarlet flowers
each 2s. 6d. and 3s. 6d.

Primula obconica. Pretty evergreen species, bearing numerous umbels of pale lilac flowers; makes an excellent pot plant for the greenhouse or cool pit, and is in bloom throughout the Winter
each 6d. and 1s.

Stephanotis floribunda. Well-known beautiful climber
each 2s. 6d. and 3s. 6d.

Swainsona galegifolia alba. Lovely clusters of pure white pea-like flowers
each 1s. to 2s. 6d.

Tacsonia van Volxemi. Brilliant climber for the greenhouse
each 1s. 6d. and 2s. 6d.

Greenhouse Plants in choice variety, our selection, per doz. 18s., 24s., 30s., and 40s.

Choice Hardy Climbers, our own selection, including Roses and Clematises, per doz. 10s. 6d. and 15s.; per 100, 75s. and 105s.

Flowering and Ornamental Foliaged Deciduous Trees and Shrubs.

SOME fine effects may be produced in the garden or the shrubbery border by the judicious planting of the following ornamental trees and shrubs. Such graceful plants as Weeping Willows and Mop-headed Acacias are well suited for planting amongst dwarf-growing shrubs, and will also form nice specimens on the lawn, whilst a back ground or line of such choice subjects as Double Scarlet Thorn, *Acor negundo variegata*, *Prunus Pissardi*, Laburnums, Purple Beech, planted alternately, produce the most exquisitely beautiful effects when in full bloom and leaf in May and June.

Acer negundo variegata . Beautiful silver-edged leaves. Dwarfs and dwarf-standards, each 1s. to 1s. 6d.; half-standards, standards, and pyramids, each 1s. 6d. to 2s. 6d.	Liquidambar styraciflua . Each 1s.
Ailanthus glandulosa . Per doz. 8s., 10s., and 12s.	Lilac, Marie Legraye . A grand variety bearing immense clusters of pure white deliciously-scented flowers. Dwarfs, each 1s. 6d.
Arbutus unedo . Strawberry-tree, each 1s. 6d.	" Charles X. Numerous clusters of deep purple flowers, very fine variety. Dwarfs, each 1s. and 1s. 6d.
Ash, Weeping . Fine standards, each 3s. 6d. to 7s. 6d.	" Common . Each 1s. and 1s. 6d.
Aucuba Japonica (mas. et fem.) . Each 1s. to 3s. 6d.	Lime, Red-twigged . Each 1s. to 3s. 6d.; per doz. 10s. 6d. to 30s.; extra large 5s. each
Beech, Copper . Each 1s. 6d. to 5s.	Mountain Ash . Common. Each 6d. to 1s. 6d.
" Fern-leaved . Each 2s. to 3s. 6d.	Oak, Scarlet . Each 1s. to 2s. 6d.

Hardy Evergreen Shrubs & Coniferous Plants.

We have a fine collection of these in sturdy, healthy young plants, all of which were transplanted during the past season, and are in splendid condition for removal.

Our own selection of sorts, { height 1 to 1½ ft., per doz. 9s.; per 50, 30s.; per 100, 55s.
 in good variety { „ 1½ to 2 ft., „ 12s.; „ 40s.; „ 75s.
 { „ 2 to 3 ft., „ 18s.; „ 65s.; „ 110s.

RHODODENDRONS—Garden Hybrids.

THE cultivation of these beautiful hardy evergreen flowering shrubs has been greatly on the increase since the discovery that peat soil is not absolutely necessary for their successful growth. Sandy peat free from stagnant moisture probably suits them best, but they will do well in sandy loam or even clayey loam, if free from calcareous matter, whilst we have seen many beautiful specimens growing in ordinary light garden soil. The colours of the flowers range from the richest and most intense crimson to the most delicate shades of rose and pure white, the masses of beautiful bloom having a charming appearance with the rich dark green foliage.

Choice named varieties. Our own selection, according to size
 each 2s. 6d., 3s. 6d., and 5s.; per doz. 24s., 30s., and 40s.
 „ „ „ Standards and half-standards

each 7s. 6d. to 21s.
Unnamed Hybrids. Good kinds, producing a beautiful variety
 per doz. 12s., 18s., 24s., and 30s.

Rhubarb.

Strong plants of the following, each 9d.; per doz. 7s. 6d.

Myatt's Linnæus **Royal Albert**
Scarlet Defiance **Myatt's Victoria**

Paragon (Kershaw). The most wonderfully prolific kind known; as much as £240 has been made off a single acre for market purposes ... each 1s.; per doz. 10s. 6d.

Scarlet Queen. The stems are red inside and out, retains its colour when cooked, and is of a rich cherry flavour each 2s. 6d.

Sea Kale.

Our forcing Sea Kale this season is remarkably fine.

Strong planting roots per 100, 7s. 6d.

Good strong roots, for forcing
 per doz. 1s. 6d.; per 100, 10s. 6d.

Extra strong roots, for forcing per doz. 2s.; per 100, 15s.

Violets—Sweet-scented.

THESE deliciously-scented and ever welcome favourites, so extremely useful as cut flowers for bouquets, button-holes, &c., may, with a little management, be had in abundant bloom throughout the Winter and Spring months—a time when they are especially valuable. The stock Plants should be divided in April or early in May and planted out in rich soil in a partially shaded position, the doubles in rows one foot apart, and nine inches apart in the rows, the singles one foot apart each way. As growth commences, the young shoots or runners should be removed and the plants should be watered in the evening in dry weather, whilst if extra fine plants are required, they should have a mulching of well-decayed manure from an old mushroom bed or enenmber frame. Towards the end of September the plants may be lifted and planted into specially prepared frames placed in a south aspect, and partially filled with stable litter, leaves, &c., with about six or eight inches of soil on the top. The plants should be placed sufficiently close together to fairly fill the space without crowding, and should be as near the glass as the foliage will admit. When planted, give a thorough watering and keep close for a few days, after which admit air freely at every opportunity through the Winter. The glass may be entirely removed in sunny weather when there is no frost, and in all mild weather plenty of ventilation should be given. *Marie Louise*, *Count Brazza's*, and *Neapolitan* are the best of the doubles to be grown in this way, and when treated as recommended above will produce some grand flowers.

VIOLETS—COUNT BRAZZA'S WHITE AND MARIE LOUISE.

Double-flowered vars.

		each—s. d.
Belle de Chatenay White. New double; pure white, tipped with bluish purple; very double ...	per doz. 6s.	0 9

A GRAND FENCING PLANT.

MYROBELLA OR CHERRY PLUM

(*Prunus myrobalana*).

BLOSSOM AND FRUIT.

This was introduced some few years ago by the late Mr. Ewing of the Eaton Nurseries, and has undoubtedly proved itself to be the very best Fencing Plant ever grown. For rapidity of growth it is unrivalled, and, under fair conditions, will make a capital fence in three or four years from planting. It also grows vigorously in the poorest soils, and is first-class for planting in exposed situations or by the sea coast. It is quite hardy and will stand the severest frosts without injury.

The Myrobella does not often fruit in this country save in the South or West of England and in sheltered positions in the Eastern and Midland Counties, and then only when allowed to grow into trees or large bushes, it, however, forms a capital stock for Plums, and if strong single stems are allowed to grow from the fence at intervals of about twelve feet, they may be budded or grafted with choice varieties of this popular fruit, and in a few years will form a most profitable and ornamental hedgerow.

The best time for planting is in November or early Spring, or it may be done in open weather at any time during the Winter months, but in fairly moist weather successful plantings may be made as late as the middle or end of April. In planting plant firmly, placing the sets from six to nine inches apart according to size. At planting, about the time that growth commences, they should be cut down to six or ten inches in height. It will bear almost any extent of clipping, and should be cut at least twice a year—about the end of July and in Winter or early Spring, in a dormant state, and should be fairly trimmed the first year or two to ensure a good bottom for a strong and thick fence, but it may be used to form a fence no thicker than an ordinary garden wall, which will be almost impenetrable. As the plants advance in age the branches become armed with spines, which make the fence impenetrable to cattle, &c. Myrobella is also found splendid for making new or improving old fences, and much superior to Whitethorn or any other fencing plant.

PLANT FOUR OR SIX TO THE YARD.

From "THE GARDENER'S MAGAZINE," Aug. 24th, 1889.

"An interesting example of what may be done with the Myrobella may be seen in these nurseries in the form of a fence four years planted, which is kept to about five feet, is well furnished to the ground-line, and conceals amongst its branches a fearful armoury of powerful spines. This fence at this time, as viewed from a short distance, may be likened to clipped privet or holly, being of a full dark green, and though not very glossy in the leaf, bright enough to pass for holly to the casual eye. At regular intervals, stems have been reserved to form heads above the line of the operation of the shears, and these have been worked with first-class plums, the hedge being intended in this way to pay rent for the land it covers, while serving for shelter and defence at the same time."

Other Plants for Fencing.

We annually raise many hundreds of thousands of the following useful fencing plants, and where large quantities are required shall at all times be pleased to furnish special quotations when requested. Our stocks of these are this season unusually fine, and will be found in the best possible condition for planting.

WHITETHORN OR QUICK. Three years old, splendidly-grown sturdy stuff, height 2½ to 3 feet per 100, 3/-; per 1000, 25/-

 " " " Extra strong, very fine for gapping ... per 100, 6/-

YEW, Common or English. This forms one of the densest, warmest, and most useful of all fences, it is specially valuable where good shelter fences are required for the kitchen garden or near the dwelling-house, and when well clipped, has a very neat appearance. We have a fine stock of these specially prepared for hedge making, grand stuff, well rooted and furnished.

This illustration (from a photograph) represents a group of Mushrooms in all stages of growth (half natural size), placed upon a brick of the Spawn.

MUSHROOMS ALL THE YEAR ROUND MAY BE HAD BY USING DANIELS' BEST MILLTRACK SPAWN.

In Bricks, each 6d., 4 bricks 1s. 6d., 16 bricks or one bushel 5s.

COMPLETE INSTRUCTIONS FOR CULTIVATION WILL BE SENT WITH EVERY ORDER.

"I have great pleasure in sending you a sample of Mushrooms from a bed spawned six weeks and four days, from your excellent Spawn, and am now getting a great quantity from same. The five Mushrooms enclosed weigh $\frac{1}{2}$ -lb., which I think is very good, and shall recommend it to everybody, for I never had better success."—**MR. R. SAMUELS**, Trent Gardens, Cromer.

"I had some Mushroom Spawn from you in March, and spawned my bed on April 7th, and the Mushrooms began to appear in the usual time of seven weeks, and am pleased to tell you it has not yet ceased. The bed was six feet by five feet, and about every week or so I get a nice tray of Mushrooms, this I think must be an extraordinary crop, and at present there is no sign of decay of growth. I am more than satisfied with your Spawn."—**MR. C. RANGER**, Easthoathly.

RELIABLE
COMPOUND.

DANIELS'
TOBACCO
PAPER

RELIABLE
COMPOUND.

Price in 2-lb. packets, 3s. Daniels' Strong Tobacco Paper, for ordinary use, 1s. per lb.

Every packet is accompanied with full instructions for use.

EVIDENCE OF QUALITY.

"I find your Tobacco Paper excellent, effectual, and safe."—**MR. W. ALLAN**, Gardener to The Right Honourable Lord Suffield, Guntou Park.

"I have used your Tobacco Paper here for several years, and I am pleased to say that it has given me great satisfaction, being both safe and effective. Having seen so much mischief done by the use of inferior Tobacco Paper, I have much pleasure in saying so much in its favour."—**MR. H. JONES**, Gardener to J. J. Cozman, Esq., M.P., Carrow House.

DANIELS' EUREKA MANURE EFFICIENT, ODOURLESS, ECONOMICAL.

Sold in Packages, with complete Directions for Use, Postal Boxes, $\frac{1}{2}$ -lb. 1s., 2 $\frac{1}{2}$ -lb. 2s. 3d., 6-lb. 4s. 6d., Post or Carriage Free, at prices quoted. In Boxes, not Carriage Free, but can be enclosed in general order, without extra expense of carriage, 1-lb. 1s., 2-lb. 1s. 8d., 4-lb. 3s., 7-lb. 4s. 6d., 14-lb. 7s., 28-lb. 12s. 6d. Much cheaper by the cwt. Prices on application.

Vegetable Seeds for Autumn Sowing.

DANIELS' NEW PEA—GEM OF THE SEASON.

Peas.

DANIELS' NEW PEA—GEM OF THE SEASON.

The earliest Pea in cultivation, height three feet, and very prolific. This early Pea is the most valuable for general use ever sent out; is always the earliest, whether sown in Autumn, Winter, or Spring; is also the hardiest, resisting frost better than any other kind; and is not affected by mildew. Being very prolific, and of a most delicious flavour, will be found most desirable for marketing, and invaluable for the private garden. Price 2s. per quart.

Kentish Invicta. A very superior Green Marrow. A splendid crepper, and of excellent quality ... per qt. 1s. 3d.
Sangster's No. 1 Improved. Extra select stock. Fine early sort ... 1s. 6d.
SUPREME (Laxton). This is a first-class blue round Pea, and an enormous bearer ... per qt. 1s.
EARLY SUNRISE (Day). It is very hardy and extremely prolific, the haulm being covered with large, well-filled pods ... per qt. 1s.

CARROT. Early Horn ...

WOOD LABELS.

Best English Make, Painted. In bundles of 100, 4-in., 7d.; 5-in., 9d.; 6-in., 10d.; 7-in., 1s.; 8-in., 1s. 3d.; 9-in., 1s. 6d.

Plain. 4-in., 5d.; 5-in., 6d.; 6-in., 8d.; 7-in., 10d.; 8-in., 1s.; 9-in., 1s. 3d.; 12-in., 2s. per 100.

MANURES AND FERTILIZERS.

Ichthemic Guano. Adapted for the cultivation of Flowers, Fruits, and Vegetables. In packets, 1-lb. 6d., 2-lb. 1s. Also in bags, 7-lb. 2s. 6d., 14-lb. 4s. 6d., 28-lb. 7s. 6d., 56-lb. 12s. 6d., 112-lb. 20s.

Clay's Fertilizer. A most convenient manure for Amateurs, sold in packets 6d. and 1s. each; in bags, 7-lb. 2s. 6d., 14-lb. 4s. 6d., 28-lb. 7s. 6d., 56-lb. 12s. 6d., and 1 cwt. 20s.

Florvita (The Life of Flowers). Contains all the elements essential to the healthy growth of a plant; bottles, 1s. and 2s. 6d. each.

Cocoa-nut Fibre. 6d. per bushel; 2s. per sack; cheaper by the truck load.

Standen's Manure. A highly concentrated fertilizer. One of the oldest preparations. In tins 6d., 1s., 2s. 6d., and 5s. 6d.

Bone Dust. Per cwt., 15s.; ¼-in., per cwt., 14s. 6d.; ½-in., per cwt., 14s.; 1-in., per cwt., 12s. 6d.

Large Bones. These are essential for all vine borders, &c. Per cwt. 12s.

Guano, Peruvian. A most powerful manure. Per cwt. 21s.

Charcoal ,, Used very extensively for Orchids, Amaryllis, &c. Per bush. 2s. 6d.

Nitrate of Soda. A powerful assistance in the Vegetable Garden. Per lb. 6d.; per stone 5s.

Sulphate of Ammonia. A wonderful assistance to Chrysanthemums. Per lb. 6d.; per stone 5s.

Thomson's Improved Vine, Plant, and Vegetable Manure, In tins 1s., 2s., and 3s. 6d.; per cwt. 20s.

Miscellaneous
Garden Requisites.

Insecticides,
Manures, &c.

INSECTICIDES.

- BEETLE POWDER.** Very destructive to these troublesome pests. 6d. and 1s. per box.
- CAMPBELL'S PATENT FUMIGATOR.** In packets. No. 3 (for 1000 cubic feet) 1s.; No. 4 (for 2000 cubic feet) 1s. 9d. each.
- DANIELS' NEW INSECTICIDE SOAP.** The safest and most effectual Insect Killer in the market. Will kill Mealy Bug, Brown and White Scale, Thrips, Ants, Green Fly, Red Spider, and Aphides on plants. Sold in Bars (with full directions for use) 6d. each.
- FIR-TREE OIL.** A preparation that has outlived many newer ones, and very effectual. In bottles 1s. 6d., 2s. 6d., and 4s. 6d. each.
- FOWLER'S GARDENERS' INSECTICIDE.** A preparation we recommend. In jars 1s. 6d. and 3s. each.
- TOBACCO POWDER.** Very clean, and always ready for use. In tins 6d., 1s., 2s. 6d., and 5s. 6d. each.
- GISHURST COMPOUND.** A very effectual insect destroyer. 1s. and 3s. per box.
- HELLEBORE POWDER.** The best remedy for Caterpillars. 9d., 1s., and 1s. 6d. per tin.
- LEMON OIL INSECTICIDE.** Spoken of very highly by some authorities. Per pint 1s. 6d., per quart 2s. 9d.
- LETHORION (vapour cone).** New Fumigator. Supplied in sizes for 50, 100, 500, and 1000 cubic feet, at 6d., 1s., and 1s. 6d. each.
- MCDougALL'S TOBACCO SHEETS (a new form of distributing Tobacco Fumes in greenhouses)** approved of by gardeners as being very destructive to all insect pests. 1s. each; 9s. per dozen (13 to dozen).
- TOBACCO JUICE (Highly Concentrated).** 6s. per gallon, 11s. 6d. for two gallons (jars included).
- VAPOUR ROLLS (Hughes').** Easy to manage, and effective fumigators (sufficient for 1200 cubic feet). 1s.

Miscellaneous Garden Requisites and Horticultural S

- BASKETS (Truck).** Made of strong wood, and are indispensable to every garden. No. 2, 11½-in. by 6-in., 1s.; No. 3, 13½-in. by 7½-in., 1s. 3d.; No. 4, 15-in. by 8½-in., 1s. 6d.; No. 5, 17½-in. by 9½-in., 1s. 9d.; No. 6, 20½-in. by 10½-in., 2s. 3d.; No. 7, 23-in. by 12-in., 2s. 6d.; No. 8, 26-in. by 14-in., 3s.; No. 9, 28-in. by 15-in., 3s. 6d.
- EWING'S MILDEW COMPOSITION.** 1s. 6d. per bottle.
- FLORAL CEMENT.** For fixing the petals of flowers, thereby preventing their dropping. 1s. per bottle.
- GARDENERS' APRONS.** In Shaloon, best make, 4s. 6d., 4s. 9d., and 5s. each. These are exceptionally strong.
- GENTLEMEN'S GARDENING GLOVES.** Strong leather, for hedging. 1s. 6d. per pair.
- Real Buck Skin. 6s. per pair.
- 1st quality Leather. A very neat glove, and soft to the hand. 2s. 6d. per pair.
- Inseam Tan. Good cheap glove, soft and pliable. 1s. 3d. per pair.
- Oxford Tan. In several qualities; one of the strongest and most serviceable gloves made. 1s. 6d., 1s. 9d., 2s., and 2s. 3d. per pair.
- Drummond's. A one-button glove by one of the best makers, and in great demand. 1s. 6d., 1s. 9d., 2s., and 2s. 3d. per pair.
- Harvest Tan. Good strong make. 1s. 4d. per pair.

Our improved and perfect system of packing, the Wreaths, Bouquets, &c., we supply, will stand a journey of fully two days if they reach their destination in beautifully fresh condition.

All orders are despatched promptly on receipt, if required, but customers residing at a distance should give, if possible, at least two days' clear notice before the flowers are required, and full particulars for forwarding.

TESTIMONIALS.

From **Mr. GOLDING**, Tredegar.

"The Wreath arrived on Saturday morning and in good condition; it was highly satisfactory."

From **Miss HARVEY**, South Lewestoft.

Sept. 3rd.
"Miss Harvey begs to inform MESSRS. DANIELS she is quite satisfied with the Cross, in fact it is simply perfect, and it arrived most beautifully fresh. Mr. R. H. Reeve is also very pleased with the Wreath sent him."

From **Mrs. PENISTON**, Doneaster.

"Mrs. Peniston begs to thank MESSRS. DANIELS BROTHERS for their attention. The Wreath arrived safely. It was very beautiful, and gave great satisfaction."

From **W. S. LONG**, Esq., Windsor.

April 7th.
"The Bride's and Bridesmaids' Bouquets were duly delivered at Saxlingham, and gave the highest satisfaction. Enclosed is cheque in payment."
