U.S. Depart of

Autumn of 1857 and Spring of 1858.

PRINCE'S LINÆAN BOTANIC

GARDENS AND NURSERIES.

FOUNDED 1723,

WILLIAM R. PRINCE & CO., PROPRIETORS,

FLUSHING, LONG ISLAND, NEAR NEW YORK.

Every Description of Trees, Plants, and Seeds can be supplied and forwarded, properly packed, to all parts of the World. See Catalogues.

GENERAL PRICED LIST.

Comprising all the Choicest Select Varieties of Fruit Trees, &c., as comprised in our General Descriptive Catalogues.

Note.—These Trees are uncommonly hardy and vigorous, and Long Island Trees have proved to be hardier than any others in the Union. The extra large-sized Fruit Trees are suitable for prompt bearing, and are seidom obtainable at other Nurseries; and our extra-sized Pears are often re-sold at \$8 to \$5 each.

See Catalogue No. 2.

Eulbous Flowering Plants of every class, including the splendid Japan Lilies, an admirable Collection of New Dahlias, and the most splendid Collection of Tree and Herbaceous Pæonies, surpassing any in Europe, and comprising 300 magnificent varieties. See Catalogue No. 9.

Chinese Imperial Rice-White Potato, as exhibited at the Crystal Palace Fair, and at the American Institute Rooms, and at the United States Fair at Philadelphia. In consequence of our rapid increase of this plant, we will reduce the price, which was \$83 per hundred in 1856, and \$20 per hundred the last Spring, to the following rates for this Autumn; but we may advance next Spring. We will now contract for delivery in October, at the following rates, 25 per cent. to be remitted with the applications, the balance payable on delivery. They can be forwarded by Express. Prices for Tubers, deliverable October, 1857, per thousand, \$50; per hundred, \$6; fifty for \$4; twenty for \$2. We will enter into arrangements with suitable agents, for the sales of this root.

PRICES OF SOME SPECIAL ARTICLES.

Chinese Sugar Cane Seed in any quantity. Licorice, \$3 per dozen, \$10 per 100; Madder, \$8 per 100; Osier Scions, 8 finest basket varieties, \$2 to \$5 per 1000, according to quantity; Tanner's Sumach, \$8 per 100; Linnæus, Victoria, and Early Tobolsk Rhubarb, \$9 per 100, and \$75 per 1,000; Earth Almond, 50 cts. per 100, \$3 per 1,000; Grapes, Gooseberries, Raspberries, and

Currants, cheap in quantity; Yellow Locust Seed, \$1 per lb.; Honey Locust, 75 cts. per lb.; Osage Orange, Norway Spruce and other Spruces, all Pines, Arbor Vitæ, and other Evergreen Seeds, at reasonable prices.

N.B.—All packages can be sent by Express or by the regular Transportation Lines, or by Vessels, as may be desired.

Applicants requesting information or Catalogues, must inclose stamps if they desire their communications to receive attention.

PROPOSAL

In regard to laying out and appropriately ornamenting

PLEASURE GROUNDS, LAWNS, ETC.,

With beautiful Trees, Shrubbery, &c.

WM. R. PRINCE now offers (without any charge), on receiving from the Proprietor of any Country seat a perfect plan of his grounds, to apportion them to the utmost advantage for embellishment, and to designate the appropriate Trees and Shrubs calculated to impart the greatest beauty throughout the entire year.

AMERICAN INSTITUTE---FARMERS' CLUB.

MEETING OF AUGUST 4, 1857.

The Secretary, Hon. Henry Meigs, made the following Report, translated from the latest foreign periodicals:

REVUE HORTICOLE, PARIS, JUNE, 1857—AGRICULTURAL EXHIBITION AT VERSAILLES.

DIOSCOREA BATATAS.

Fine specimens of the *Dioscorea Batatas* were exhibited by Mons. Remont of Versailles, whose practical zeal in cultivating it has been rewarded by his receiving, from the hand of the Empress, the "Grand Prize of Honor," being her gift. This esculent is in great progress in our gardens.

BULLETIN MENSUAL DE LA SOCIETE IMPERIALE ZOOLOGIQUE D'ACCLI-MATATION, PARIS, JUNE, 1857.

DIOSCOREA BATATAS.

"Mons. Chevet, Chairman of the Committee on this plant, reports—That the cultivation of this esculent in our market gardens, is now sure! both on account of its abundant crop and very excellent properties; that its culture is easy, requiring but little care; its hardihood is fully proved; it keeps perfectly sound in the earth where it grows; no cold injures it; it is readily multiplied by its seeds, little tubers, and by cuttings, &c. It is planted in rows 40 to 50 centimetres apart (16 to 20 inches).

"I have, says Mons. Chevet, demonstrated the excellence of this tuber for our table, in plain boiling, baking, roasting in hot ashes, or as a luxurious pudding, &c. It cooks in half the time that a potato does; it is a blessing to the poor more than to the rich. I ask this Society for its vote of thanks to Consul Montigny, who gave it to us from China, and also for thanks to the members of this Society, who have proved its value in their respective Departments of France, showing its precious character."
