## ANNUAL REPORTS

1874.

BOSTON:

ALFRED MUDGE & SON, PRINTERS, 34 SCHOOL STREET.

1875.

STACK 206076

Ref. 352 S69 1874.

INAUGURAL ADDRESS

OF

HON. WM. H. FURBER,

DELIVERED JANUARY 5TH, 1874.

---

*Gentlemen of the City Council:—*

Deeply sensible of the honor conferred on me by my fellow-citizens, not without anxiety, and many misgivings, I assume the responsibilities of the position assigned me, earnestly believing that it is the duty of every man when called upon, with any degree of unanimity by his fellow-citizens, to take part in public affairs, to do so, if he can consistently, regardless of his own personal comfort. Advocating, therefore, this principle and duty, I obey the call made upon me, and relying upon your hearty co-operation and the considerate judgment of my constituents, shall labor faithfully and impartially to protect and promote the interests of our entire city.

Thus, having crossed the threshold of the third year of our city government, we have reason to congratulate ourselves and the people whom we represent upon the excellent condition in which our public affairs have been left by those who have preceded us, and whose positions, by the voice of the people, we have been called upon to fill.

MAR 17 1922

Our finances are in a sound and healthy state. All of our branches of education are in a flourishing condition. Our highways and sewers have been greatly improved. Our pure water supply has been considerably extended. The sanitary condition of our city has received constant care and attention. Our Police and Fire Departments have been made more effective and efficient. Our departments for the relief of the poor and needy have been judiciously managed, and our Military, both retired and active, have received a due share of attention from those in authority.

That we may better acquaint ourselves with the work devolving upon us, and be prepared to perform it in a manner that shall gratify our constituents and reflect credit upon our labors, let us examine in detail the present condition of the various departments.

#### FINANCES.

By a careful examination of our financial condition it will be seen that the whole amount of the funded debt of our city at this time is \$809,354.00, showing an increase during the past year of \$166,000.00, of which \$40,000 was for the extension of the water works, \$35,000 on account of sewers, \$5,000 on account of Beach Street school-house, \$40,000 on account of school-house in Prospect Hill district, \$40,000 on account of sidewalks, and \$6,000 on account of new hose house on the corner of Highland Avenue and Grove street. The amount of the floating debt and the amount of taxes and assess-

ments due the city are about equal. There will mature the present year of the public debt \$72,000, and I earnestly hope that you will at the proper time arrange for the payment of a part at least, and not favor the renewal or extension of the entire amount.

In this connection permit me to call your attention to the tendency prevailing in many cities of making the **DISTANT** future bear **ALL** the burdens of the **PRESENT**, and to suggest that duty demands that we profit by the lesson it presents to us. While I desire to favor all judicious improvements, and would not recommend that the cost of those improvements, which are to benefit coming generations, should **WHOLLY** be borne by the people of the *present* time, I do most earnestly urge you to protest against thrusting upon posterity the responsibilities that legitimately belong to ourselves. Let us rather boldly meet the issue, and promptly discharge *our portion* of the obligations, that the good credit of our city may remain unimpaired, and the future *not* be encumbered with liabilities that the present should unhesitatingly assume.

To explain more clearly my views, I would recommend that all loans for school purposes be made for a term of ten years, that all loans for highway purposes be made for a term of twenty years, and that all loans for sewer purposes be made for thirty years, the interest in all cases to be paid semi-annually, and a proportionate part of the principal to be paid annually. Such a method would make the expenditure less onerous, and bear more equitably on those

benefited, and I consider it equally desirable, whether our affairs are merged in those of our sister city, or we continue to manage them as an independent corporation.

The Committee on Public Property, assisted by the Assessors, have carefully examined and re-valued the property belonging to the city, and find that independent of the water works, it amounts to \$812,750. Cost of Water Works to date, \$275,000. Total value at this time, \$1,087,750.

I desire to state that these amounts are not in the least inflated, but represent the minimum value of property, and without desiring to censure our Board of Assessors — whose duties are always arduous and trying — to suggest that they guard against the tendency of carrying up the valuation of our taxable property to the maximum point as a policy that is fallacious, and sure to lead to unsatisfactory, if not disastrous, results.

The entire amount of taxable property in the city, by the Assessors' valuation of 1873, is \$29,643,100, thus showing the entire debt of our city to be less than two and three-fourths per cent. of the taxable property, and \$278,396 less than the value of the property owned by the city — an exhibit which cannot fail to be satisfactory to every citizen.

#### SCHOOLS.

Our Public Schools have received the same fostering care and attention that has been bestowed upon them during former years, and it is gratifying to

know that they still retain their high standard in the Commonwealth.

When we consider that from such institutions the very wealth and strength of the nation is to emanate, it behooves us to watch over them with the utmost care and vigilance, and see to it that nothing is lacking on our part to bring them up to the very acme of perfection; for whatever of good or evil proceeds from them reaches every member of the body politic.

The amount appropriated the past year for school purposes was \$70,000. The number of schools in operation is 67, showing an increase of 8 the past year. Number of teachers employed, 74. Attending these schools there are,

In the High School	.	.	.	186 pupils.
“ “ Grammar Schools	.	.	.	1716 “
“ “ Primary “	.	.	.	1479 “
				<hr/>
Making an aggregate of	.	.	.	3381 “

The accommodations in the various districts are ample, with the exception of those in the Prospect Hill and East Somerville districts. To meet the wants of the former, a ten-room brick building is in process of erection on Vinal Avenue, and a similar structure is urgently needed in the last named section. I trust that the completion of the one, and the erection of the other, will receive your earliest attention.

#### PUBLIC LIBRARY.

The interest manifested in our Public Library has greatly exceeded the expectations of its warmest

friends, and the Board of Trustees have much to stimulate and encourage them in their labors to make useful and attractive this auxiliary to our ordinary branches of education.

The library was thrown open to the public on Thursday, the first day of May last, with 2386 volumes upon its shelves, to which there has since been added 1247 volumes, making the whole number belonging to the institution at this time 3633, of which 716 volumes were donated, and the remainder, 2917 volumes, were paid for out of the library fund.

The number of books given out during the eight months was 18,036, making a weekly average of about 515. The largest number in any day was 271; largest number in any week, 767; largest number in any month, 3,008, in the month of December; and the number of persons who have registered their names for books up to the close of the past year is 1940. I have aimed to show by this brief statement, the great good which must necessarily be imparted to that portion of our community, who seek to obtain information through this medium, which is to many the only source of education. And I feel that I need not urge you to do all that you can legitimately, to forward this enterprise and to aid in placing it on a firm and substantial basis. Should you deem it advisable to provide accommodations for the police court, nearer the police station, as has been heretofore suggested, I would recommend that the room now occupied by that department be fitted up as a reading-room, and assigned to the library to be used in connection with it.

## HIGHWAYS AND STREETS.

It needs but a cursory view of our highways and streets to discover the immense labor that has been performed on them since the organization of our first city government, and to observe that much still remains to be done. To the latter I would call your prompt attention, not that I would recommend hasty action, or urge you to make too large an expenditure in a single year, either in *this* or in any department, but on the contrary, would suggest that a moderate amount of improvements be carried on annually, and in a permanent and substantial manner. The peculiar nature of our soil, together with the fact that our main avenues are great thoroughfares, leading into the very heart of the county, over which are constantly passing heavily laden teams, to and from the adjoining cities on our southern and eastern boundaries, makes it necessary that large amounts be expended annually, for repairs, until the road-beds of such thoroughfares are made more permanent by paving. There has been expended during the past year in this department, independent of street widenings, \$130,603.88, which includes \$52,677.37 for sidewalks, one half of the last named sum being assessed upon the abutters. No expense, in my opinion, has been more cheerfully borne by our citizens, than that created by this improvement, and I trust the good work in this direction will be vigorously prosecuted the coming season. Brick sidewalks have been laid, edgestones set and gutters

paved, during the year just closed—in thirty-five streets of our city. Among the great improvements made in our highways during the same interval, may be mentioned the widening of Highland Avenue to a uniform width of sixty feet, and increasing the width of Milk Street its entire length, from East Cambridge line to North Cambridge.

Although the cost of these changes was necessarily great, it seems insignificant when compared with the benefits to be derived, and must be looked upon with great satisfaction by every unprejudiced citizen. I desire, in this connection, to call your attention to the straightening of the northerly line of Broadway, between Mount Benedict and a point near Temple Street, as suggested by my predecessor. I trust you will favor and secure the change, provided it can be accomplished without too great cost, and will ensure the general improvement of the entire territory lying adjacent thereto, so as to attract to our city many who are seeking homes out of the densely populated districts of the great Metropolis, and who would make a valuable acquisition to our community. I would also ask your earnest attention to the approaches to the various public schools, and especially those to our High School and Public Library, and recommend that brick sidewalks be laid in those streets, where such buildings are located, when the work can be done consistently. I also entertain the hope that it will be found convenient early the coming spring, in connection with the filling that must be required in other localities, to grade the public

land known as Central Hill, bounded by School, Medford, and Walnut Streets and Highland Avenue, and lay out the same in a manner that will evince a wise economy, as well as exhibit some degree of horticultural taste. This work has been delayed that the surplus material which was sure to be required for use by the city, some in the immediate vicinity, might not be otherwise disposed of, but I trust that the work can now be performed without detriment to the interests of the city, and that the present year will show a decided improvement in the grounds alluded to. It is also due our citizens that a proper ordinance be prepared, compelling the removal of snow and ice from our sidewalks, that they may fully meet the wants of the public as intended.

#### SEWERS.

A good system of sewerage is indispensable to the sanitary condition of every city, and much time and thought have been spent by those who have preceded us in authority, in devising the best plan for the purpose, and great progress has been made in improving and increasing the sewerage of our city the past year. During the past twelve months, sewers have been constructed in sixteen streets and parts of streets, the aggregate length of which is 13,326 feet, or about two and one third miles, costing about \$40,000, of which the abutters pay about seventy-five per cent, making the net cost to the city about \$10,000 for this improvement. This work has been performed with great care by competent and experienced work-

men, and will be a lasting benefit to those sections in which the sewers are located, or which may be reached by lateral branches. There has also been commenced the past year a sewer of large dimensions, for the purpose of draining the Miller's River District, and to enable the filling up (as authorized by the Legislature) of the basin which of late years has become so notorious. That portion of this sewer devolving upon our city to construct, is being done by contract, and, it is expected, will be completed before the lapse of many months. You will doubtless be called upon to furnish sewerage in sections of our city that are without this benefit, and I need not suggest that in all such cases the utmost care should be exercised in causing the work to be done in the most judicious and reliable manner.

#### WATER WORKS.

There has been laid, during the past year, 16,585 feet, or about three and one seventh miles of pipe, and eighteen hydrants have also been placed in position, the entire cost of which is about \$28,000. The aggregate length of pipe now laid in the city is about thirty-eight miles, with two hundred and two fire hydrants. The total amount expended by this department up to this time, is \$275,000, and we still have authority to issue water bonds as the wants of the city require it, to the extent of \$120,000 additional.

As no one can deny the great benefits to be derived from an unfailing supply of pure water, and the protection it affords our whole community when required

to battle with its opposing element, I trust no effort will be spared on your part to place it within the reach of every family within our borders as speedily as may be consistent with a wise economy.

#### FIRE DEPARTMENT.

The fire department consists of seventy-four members, including the chief engineer and four assistant engineers, showing an increase during the past year of ten members, caused by the organization of an additional hose company, which seemed absolutely necessary as a precautionary measure for the western portion of the city, in which section a brick hose house was erected the past year, of sufficient capacity to accommodate a steam fire engine when needed, at a cost, including that of the land, of \$16,000.

The apparatus of the department consists at the present time of one steam fire engine, five horse hose carriages and one hook and ladder carriage, with their necessary appendages. The chief engineer reports that all but the last named are in complete order and suited to the wants of the department. The hook and ladder carriage he reports as *not* being adapted to our requirements, the ladders being too short to be of much use in case of a fire in any of our high buildings, and should any such calamity befall us, as the burning of one of our large school-houses during the sessions of the schools, they would be wholly ineffective in rescuing children from the upper rooms. He therefore recommends the purchase of one more

modern and reliable. The same officer reports that considerable of the hose in the department is in very bad order, and he recommends the purchase of twenty-four hundred feet of new hose early the coming spring.

The number of fires in the city during the year was twenty-one, causing the destruction of property to the amount of \$11,290, on which there was \$10,840 of insurance, thus showing a net loss of only \$450. Such a record should cause every one of our citizens to feel grateful, showing, as it does, almost entire exemption from disaster by the devouring element, and evincing the thorough efficiency of the department.

It does not seem consistent with prudence and economy to ignore the suggestions and recommendations of the chief officer in this department. I therefore commend them to your early notice, and advise prompt action relative to them.

With regard to a fire alarm telegraph as an adjunct to the fire department of our city, it seems worthy of our consideration, our fire companies being located remote from each other, owing to the sections built upon being widely separated. By such a method the point of danger would be clearly defined, and any unnecessary delay be avoided. I feel that such an important auxiliary would meet with the favor of our citizens, provided it could be secured without too great an expenditure, and I trust the matter will receive due attention during our term of service.

## POLICE.

The Police Department consists of nineteen members, including a Chief and Captain. Five of the members serve as patrolmen during the day, and twelve during the night, and the good order and quiet of our city during the past is evidence of the fact that the force is well organized and its members faithful in the performance of their duty. The labors in the Department have and will continue to increase with the growth of our city, and we must not overlook the necessity of maintaining the efficiency of this branch of the civil service, but by our watchful care and the appointment of officers and men of unblemished character, meet the wishes of our citizens who depend upon them for protection against the devices of lawless persons. The net cost of sustaining this department the past year, exclusive of the amount paid for improving the building occupied as a Police Station, was \$19,641.36.

Larger accommodations will very soon be required to meet the wants of this department, and this should receive our early attention, and not be deferred until the demand for a change becomes urgent.

## POLICE COURT.

The Police Court of our city has not sufficient accommodations, and its daily business indicates that its present location was not well chosen, being too remote from the Police Station, and too distant from the routes of steam or horse cars, thus rendering it

inconvenient for officers of the Court, witnesses and other persons interested in cases brought before it. It seems almost imperative, that arrangements should be made without much longer delay for better accommodations for this and the department so nearly allied to it. A plan for a building to be erected on the site of the Police Station to meet the wants of the Police Court, Police Department, and to furnish convenient apartments for other branches of the Government, was prepared under the direction of a special committee appointed by the first City Council, which plan was referred to by my predecessor one year ago, and which is now in the possession of the city.

To this I desire to ask your attention, and hope that it will receive your careful consideration for the reasons above mentioned.

#### THE POOR.

The Overseers of the Poor have given special attention to those who have no means of support, and their duties the past year have been exceedingly arduous, owing to the epidemic prevailing in the early part of the year, which compelled the isolation of entire families, thus adding largely to the cares of the Board and to the expenses of the department.

Relief was rendered to 765 persons during the year at a cost, including the entire expense of the Board, of \$10,239.93, making an average of about \$13.38 for each person. There has been paid to the city by various cities, towns, and individuals, liable

on account of the above, \$417.93; and there is still due from similar sources about \$500.00, making the net cost for the relief of the poor during the year 1873, independent of that granted to soldiers and their families, about \$9,322.00.

I am informed that many applicants for relief are able-bodied men, willing to work, but are unable to find employment, and I would suggest that these be employed upon our public improvements, when consistent with the interests of the city, and not be tempted to lead an idle life at the expense of the public charities.

#### STATE AID AND SOLDIERS' RELIEF.

Every just claim for aid or relief for soldiers who served in the late war, or for their families, has been promptly and cheerfully granted by the Government, and very few attempts have been made to obtain assistance from the city by the misrepresentations of the applicant. But on the contrary, I know of worthy men who served our country faithfully in her time of peril, who, owing to a very sensitive nature, have deferred making any request for assistance, until absolutely compelled to do so by the cravings of hunger and want.

There has been paid out the past year on account of State Aid the sum of \$3,779.00, which amount will be reimbursed by the State. In addition to this sum, there has been expended during the same interval, \$1,056.07 for relief of the deserving of this class, whose claims upon us should always be

promptly and cheerfully responded to. I need not suggest that these needy, self-sacrificing heroes will still require our watchful care and assistance, and however pressing our other duties may become, *their* wants should *never* be neglected.

#### PUBLIC HEALTH.

Notwithstanding the prevalence of the small-pox in the early part of last year, its ravages were promptly checked by the decided action of the government in relation to it, and the suffering on its account in our midst was comparatively light. With the exception of a few months, our city has experienced a singular immunity from that much dreaded contagion, and at this time not a single case is known within our limits. We can only hope to maintain and preserve this desirable condition by the same care, foresight, and strict adherence to the sanitary measures *now* existing. I would suggest and respectfully urge your attention to those places in our city where ponds or pools of stagnant water are allowed to remain from month to month throughout the entire year, as in the vicinity of Franklin, Cedar, and Maple Streets, and other sections, making them a tempting receptacle for all the filth and garbage of their respective neighborhoods, thereby jeopardizing the health of the locality and our whole city, by engendering sickness and disease of the most loathsome character. Initiatory steps were taken by the past administration to remedy the evil in the first named locality, but *all* such nuisances should be

abated if possible, before the heat of another summer is upon us. And I trust you will follow up the work begun by our predecessors in the most energetic manner.

#### MILLER'S RIVER.

The filling up of the basins of Miller's River, as authorized by the Legislature, has been commenced by the parties in interest, and the work will doubtless be vigorously prosecuted until completed. This being done, certainly *one* cause of the *greatest* nuisance ever inflicted upon a civilized community will be removed.

Should the work alluded to fail of remedying the impending evil, the most strenuous measures should at once be adopted by the Government to discover the direct or indirect cause, and without fear or favor labor diligently for its speedy removal, that the section in which it has already too long existed may be freed of the foul stain created by it, and the air we breathe be purified of its vile and sickening odors.

#### LOW LANDS.

The past administration have taken the preliminary steps for filling up the low lands in the various sections of our city, and measures freighted with such incalculable public and private benefits should not be unnecessarily delayed, but should be pressed forward with the utmost energy. As a sanitary protection this is urgently demanded, and the cost of the improvement to the owners of such property can

never be made more satisfactory than at the present time, as the material is near at hand, and improvements are being made that necessitates its removal. I trust, therefore, that all parties interested in a work promising such grand results, will lend their hearty co-operation, and that great progress will be made in this direction during the present year.

*Gentlemen of the City Council: —*

With an earnest desire to advance the interests of those whom we represent, I have endeavored to make you somewhat familiar with the present condition of the various departments of our city, and to offer such suggestions and recommendations, respecting the duties devolving upon us, as seemed to me proper and expedient, all of which I trust will receive your careful deliberation, before you accept or reject them, that no unreasonable expenditure of money may be made, and no warrantable improvement be delayed. We cannot be too watchful of the trusts transmitted to us. And the great confidence reposed in us by our fellow-citizens, manifested by placing the management of the public affairs in our hands, should inspire us with a zeal that will secure to them the results of earnest and judicious effort, and not embarrass them with unwarrantable burdens.

TREASURER'S  
THIRD ANNUAL REPORT  
OF THE  
FINANCIAL CONDITION  
OF THE  
CITY OF SOMERVILLE;  
AND THE  
RECEIPTS AND DISBURSEMENTS  
FOR THE FINANCIAL YEAR 1874.

# CITY OF SOMERVILLE.

---

IN BOARD OF MAYOR AND ALDERMEN, Feb. 22, 1875.

The Report of the City Treasurer and Collector of Taxes for the year 1874 was received, accepted, and referred to the Committee on Finance, and sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 24, 1875.

Concurred in.

SOLOMON DAVIS, *Clerk.*

---

IN COMMITTEE ON FINANCE, March 16, 1875.

*To the City Council of the City of Somerville :*

The Committee on Finance to whom was referred the Treasurer's Report for the financial year ending Dec. 31, 1874, have examined the same, comparing it with the Auditor's accounts; and they take pleasure in herewith reporting that they find the same correct, and that his books are kept in the most systematic and accurate manner, and recommend that his report be accepted.

Respectfully submitted,

CLARK BENNETT, *for the Committee.*

---

IN BOARD OF MAYOR AND ALDERMEN, March 22, 1875.

Report accepted and adopted. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, March 22, 1875.

Concurred in.

SOLOMON DAVIS, *Clerk.*

---

IN BOARD OF MAYOR AND ALDERMEN, March 22, 1875.

ORDERED: —

That the Committee on Printing be, and they are hereby authorized to cause to be printed a suitable number of the Treasurer's Report for the financial year ending December 31, 1874.

Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, March 22, 1875.

Concurred in.

SOLOMON DAVIS, *Clerk.*

CITY OF SOMERVILLE,

TREASURER'S OFFICE, Feb. 22, 1875.

*To the Honorable, the Mayor, and the*

*City Council of the City of Somerville:*

GENTLEMEN, — The Third Annual Report of the Financial Condition of the City, and a statement of the Receipts and Disbursements during the year 1874, is herewith presented: —

FINANCIAL CONDITION OF THE CITY.

*Public Property.*

The value of the property of the city, Dec. 31, 1873, as by the annual report for the year preceding, was \$1,056,283.06. The additions during the past year have been \$34,294.06 for extension of the Water Works; \$29,178.59 in completion of the School House in Prospect Hill District (Luther V. Bell School House); \$20,876.49 expended upon the new Police Station; \$107,616.85 expended upon the Public Park; \$13,000.00, cost of Fire Alarm Telegraph; \$35,000.00, cost of Gravel Land in Waltham; \$13,500.00, cost of Gravel Land in Wakefield; \$5,783.06, value of Public Library; \$3,400.00, cost of R. A. Vinal Hook and Ladder Truck and Apparatus; \$1,400.00, cost of George

O. Brastow Hose Carriage and Horse; \$5,050.00, additional land for Jackson School House, and \$566.37 for additional School Furniture; less valuation of old Hand Engine, sold, \$200.00: making the value of the Public Property, Dec. 31, 1874, \$1,325,748.48, as in "Table A," hereto appended. The balances of the appropriations to the credit, respectively, of Police Station (\$29,123.51) and Public Park (\$92,383.15), and the sum appropriated for purchase of land for School House on Tufts Street (\$15,000.00), amounting in the aggregate to \$136,506.66, will, when expended, place the value of the public property at \$1,462,255.14, without further increase of the Funded Debt; the disposal of the bonds authorized and issued for the full sums appropriated for the above-named purposes having been already effected.

#### *Funded Debt.*

The Funded Debt of the city, Dec. 31, 1873, was \$849,354.00. The increase to Dec. 31, 1874, was \$170,000.00, for construction and awards for damages of Milk Street Widening; \$27,000.00 to reimburse the Treasury for payments in the construction of Highland Avenue Widening; and \$27,000.00 to meet an equal amount of that part of the Funded Debt which matured in 1874, amounting to \$224,000.00, and being for liabilities incurred prior to the year 1874; also \$10,000.00 for Fire Alarm Telegraph; \$35,000.00 for Gravel Land in Waltham; \$13,500.00

for Gravel Land in Wakefield; \$200,000.00 for Public Park; \$40,000.00 for Milk, Washington, and Beacon Streets Sewer; \$40,000.00 for Sidewalks; \$15,000.00 for the extension of the Water Works; \$50,000.00 for the new Police Station, and \$15,000.00 for land for School House on Tufts Street; amounting to \$418,500.00, and being for liabilities incurred during the year 1874. \$72,000.00 of the Funded Debt matured Oct. 1 and Dec. 1, 1874, and was paid at maturity: making the total of Funded Debt, Dec. 31, 1874, \$1,419,854.00, as in "Table B." This amount will be increased the present year, to provide for the city's part of the cost of sidewalks, ordered in 1874, and not yet constructed (\$10,000.00), in completion of an order passed in 1872, appropriating the sum of (\$100,000.00); and to provide for the cost of the Milk Street Sewer, the appropriation of 1874 (\$50,000.00), additional to the \$75,000.00 appropriated and borrowed in 1873.

### *Receipts and Disbursements.*

The amount in the Treasury at the commencement of the year was \$109,505.19; the receipts from all sources were \$1,745,910.83, and the disbursements, \$1,841,211.03, leaving a balance of \$14,204.99 in the Treasury at the close of the year.

Your attention is respectfully called to Excess and Deficiency Account in "Table C," by which it will be seen that the excess of current expenses over the

appropriations therefor was \$84,115.45. The most prominent items of this excess are, — \$25,799.29 over Highway appropriation; \$39,277.53 for the construction and partial construction of streets not contemplated at the date of the passage of the order, laying the specific tax of 1874; \$9,300.57 over School Contingent appropriation, and \$6,583.33 over Sewers appropriation. A part of the first two items will be assessed as betterments, and credited to the respective Highways accounts: what part depends upon the action of the Board of Mayor and Aldermen; and an appropriation will be necessary to cover the deficiency.

Other matters of general interest to all desiring the prosperity and continued good name of our city may be found in detail in the accompanying tables, and need not, therefore, be anticipated in this place.

Respectfully submitted,

AARON SARGENT, *Treasurer.*

## APPENDIX TO TREASURER'S REPORT.

Table A.

PUBLIC PROPERTY, DECEMBER 31, 1874.

REV. CHARLES LOWE died at Swampscott on Saturday, June 20th.

At the call of the Chairman, a special meeting of the Board was held on Tuesday, June 23, to make arrangements for attending the funeral of Mr. Lowe, and to initiate measures for placing upon record suitable testimonials of regard and to tender proper expressions of sympathy to his bereaved family. The Chairman, Mr. Spencer, Rev. Mr. Durell, and Dr. Chapin severally expressed their sorrow for the loss sustained by the Board and the community in the death of Mr. Lowe, and paid a high tribute to his exalted character and those qualities of mind and heart which endeared him to all who knew him.

The following Resolutions, prepared by Rev. Mr. Durell and Mr. Spencer, at the request of the Chairman, were unanimously adopted by the members of the Board, at their regular meeting, June twenty-seventh: —

WHEREAS it has pleased Almighty God, in his wise Providence, to remove from this world the soul of our friend and associate upon this Board, the Rev. Charles Lowe; therefore,

*Resolved*, That we desire by these minutes to place upon permanent record our sense of the great bereavement that has fallen upon this city by the early and sudden death of one whose prominent position was rendered yet more conspicuous by the rare combination of excellences that marked his character. The duties of his sacred calling were his joy and delight, and his highest happiness was found in ministering to the happiness of others, in

guiding, sustaining, and comforting those who were distressed in mind, body, or estate.

*Resolved*, That we deeply deplore the loss we have sustained as a Board, and the important interests, also, which we represent, in the final departure from our midst of a member distinguished for scholarly attainments, for sound judgment, and that delicate courtesy and kindness in all relations which made his counsel always wise and his presence something like a benediction.

*Resolved*, That we shall gratefully cherish the remembrance of his pride in the honor and prosperity of this city, his chosen home ; and that we shall hold his singular worth in a most pleasant and sacred recollection.

*Resolved*, That we offer to his afflicted family the assurance of our hearty sympathy in their bereavement.

The City Council and School Committee met in convention Monday evening, August 10, and filled the vacancy in the School Board by the election of Rev. Henry H. Barber.

At the regular meeting of the School Board, August 29, Mr. Barber was appointed to fill all vacancies in the several sub-committees.

Rev. George W. Durell has been a member of the School Committee since March, 1867. His uniform urbanity, mature and accurate judgment, scholarly attainments, and long experience in school matters, rendered him an invaluable member of the Board. We greatly regret that the urgency of other duties compelled him to decline a re-election.

## SUPERINTENDENT'S REPORT.

---

TO THE SCHOOL COMMITTEE OF SOMERVILLE:

*Gentlemen,* — The General Statutes of the Commonwealth require that the School Committee shall annually make a detailed report of the condition of the schools under their charge. Your Regulations require that the superintendent, under your direction, shall prepare the Annual Report.

In accordance with these requirements, the following report is respectfully submitted.

We enter upon a review of the year just closing with more than ordinary satisfaction, and would not fail to recognize, with gratitude, the Source of that prosperity which has marked the important interest committed to our supervision.

The deliberations of the Board have been uniformly harmonious and indicative of the deep solicitude of its members for the prosperity of the schools. No abatement has been witnessed in the interest which our citizens have always manifested in the cause of education. The City Council have generously made all necessary appropriations. The Committee on Public Property have supplied the numerous and ever-recurring wants of the schools with promptness, and have kept the buildings in excellent repair. The Truant officers have performed their duties faithfully, and have rendered valuable aid in preventing tru-

ancy. Teachers and pupils have labored industriously. In all respects, the schools generally are in a more satisfactory condition at the present time than at any previous period during our connection with them.

In our prosperity, however, we have not been exempted from ordinary vicissitudes. Here and there, all over the city, school desks have been vacated by those who never returned to claim them. For the first time in our history the members of the School Board have been called to deplore the loss by death of an associate, — Rev. Charles Lowe.

Mr. Lowe combined in his character whatever is pure and lovely and of good report. He was greatly beloved, and his death is universally lamented. When the end came he received his summons cheerfully, and furnished an additional illustration that

“ The chamber where the good man meets his fate  
Is privileged beyond the common walk  
Of virtuous life, quite in the verge of heaven.”

In compliance with the request of the School Board, the City Council, early in the year, authorized their Committee on Public Property to purchase land within the precincts of East Somerville District, and to erect thereon a school building similar to the Luther V. Bell School-house.

In accordance with their instructions, the committee selected an eligible lot of land on Tufts Street; but causes beyond their control prevented them from

negotiating for its purchase until the season was far advanced. The work of erecting the building will be commenced, probably, early in the coming spring.

Ten years ago a single school-room furnished ample accommodations for West Somerville District. At the present time six school-rooms are insufficient to meet the demands of that thriving section of our city.

A petition has been received from citizens residing in the northwestern portion of that district — remote from the Lincoln School-house — requesting that a school may be established in their immediate neighborhood.

In compliance with that petition, the Committee on Public Property are seeking for a suitable lot of land near the junction of Holland Street and Broadway, on which to erect a school building for the accommodation of the petitioners.

The completion of the Luther V. Bell School-house has supplied all deficiencies of school accommodations in Prospect Hill District.

There are at present eighteen school-houses, containing seventy-six school-rooms, all of which are occupied, except one in the Webster School-house and two in the Prospect Hill School-house.

Six additional schools have been organized within the year, — one in Spring Hill District, one in East Somerville District, and four in Prospect Hill District. Two of these additional schools were formed

by the division of two Primary Schools, which contained severally 104 and 106 pupils. The remaining four were required by the increase in our school population.

The whole number of schools at the present time is seventy-three: —

High School . . . . .	1
Grammar Schools . . . . .	43
Primary Schools . . . . .	29

In consequence of the crowded condition of the primary department in the Prescott School-house, it became necessary, early in the spring, to separate the pupils in the lower classes into two divisions; and from the first week in April to the end of the school year, their attendance was restricted to one session only each day, — one division attending in the forenoons only, and the other in the afternoons only, alternating each successive week.

To avoid the continuance of this arrangement, the Committee on Public Property obtained a lease of the building known as the "Tufts Street Chapel," and during the summer vacation prepared it for school use. At the beginning of the school year, in September, a Primary School, composed of pupils taken from the Prescott School-house, was organized in that building.

Previous to the summer vacation, there was a Primary School in Vinal's Hall, containing 104 scholars, and another in Hawkins Hall containing 59 scholars; and in the vestry of the church edifice on Webster

Avenue there were two Grammar Schools containing 56 scholars each. At the beginning of the school year, in September, these 275 pupils were distributed among the schools that were formed in the Luther V. Bell and Prospect Hill School-houses.

Pupils composing the school that was organized in the Spring Hill Primary School-house, in September, were taken from the Beech Street School.

The Primary School in the Lincoln School-house, containing about 80 pupils, will be relieved by the school that will be established in the northwestern section of West Somerville District.

The Duntonian Writing Primer was introduced into the first and second classes of the Primary Schools in April, and the Writing Books into the Grammar Schools at the beginning of the school year, in September, at the expense of the city. Monroe's and Hillard's Franklin Readers have been substituted for Sargent's; Swinton's Language Lessons, for Greene's Grammar; and Swinton's School Composition, for Quackenbos's.

Teachers have been instructed in Drawing by Prof. Lucas Baker. Pupils have been taught in this branch of instruction by the regular teachers of the schools, and have made good proficiency. Very creditable specimens of drawing by every pupil in the Grammar Schools, were on exhibition at the close of the school year, in June. Instruction in Geometrical Drawing, has been given to pupils of the fourth

class in the High School by Miss Stetson, one of the teachers in the school.

A series of lessons in Elocution was given to pupils in the High School, previous to the annual exhibition of the school, by Mrs. Harriet E. Bean.

Pupils in the High and Grammar Schools have been instructed in vocal music by Mr. Hadley, as formerly, and his instruction has been supplemented by that of the regular teachers of the schools. The singing at the annual exhibitions of the schools gave gratifying evidence of the proficiency of pupils in this interesting and important branch of instruction. The singing at the exhibition of the High School especially indicated rare ability on the part of the teacher, and a high degree of cultivation on the part of the pupils.

Eight teachers have resigned during the year, and sixteen have been elected. Whole number of teachers at the present time is eighty-two: male teachers, eight; female teachers, seventy-four. There has been no change in the corps of male teachers within the year.

The schools in this department are doing excellent work, and some of them may be regarded as model schools. Since no discrimination is now made in the salaries of primary and grammar school teachers, there is less inducement than formerly for a transfer from the primary to the grammar department, and consequently we have a much larger number of experienced teachers in our primary schools at the present time than at any previous period. A teacher who is eminently successful in a primary school possesses a combination of qualities rarely found in the same individual, and should receive the maximum salary, and be retained, if possible, in this department.

Too great stress cannot be placed upon the importance of correct and thorough instruction in these elementary schools. If the opportunity for laying a good foundation for an education during the years assigned to the primary school is lost, it is forever lost. Would we have the tree symmetrical and beautiful at maturity, it must be carefully pruned and nurtured in the early periods of its growth. Omit the appropriate work of the early spring-time, and we shall surely fail to rejoice in the possession of an abundant harvest when autumn comes.

\* Organized in September.

There are forty-three Grammar Schools, — two more than last year. They contain at the present time 1,806 pupils.

Average whole number for the year . . . .	1,671.6
Average attendance “ “ . . . .	1,575.8
Per cent of attendance “ “ . . . .	94.3
Number of tardinesses “ “ . . . .	2,739.
Number of dismissals, “ “ . . . .	2,180.

The number of tardinesses in the Grammar Schools during the present year is 62 per cent of the number in 1873, and the number of dismissals is 73 per cent of the number during the previous year.

In one building the number of tardinesses during the year, in the Grammar and Primary Schools, is only 28 per cent of the number in 1873. In the same building the number of cases of corporal punishment this year is 60 per cent of the number in 1873.

In one school, with an average whole number of 52 pupils, there have been only seven cases of tardiness during the entire year. One school reports thirteen cases of tardiness; two schools report twelve cases each; and two, fifteen each. In nineteen Grammar Schools the number of tardinesses has been less than the number of pupils.

In two Grammar Schools there has been no corporal punishment during the year. One school reports three cases of punishment; two schools report one case each; three, four cases each; and four, six each. The number of punishments in all the schools,

during the present year, is 86 per cent of the number in 1873.

In these comparisons, no allowance has been made for the increase in the number of pupils.

All the schools in this department are in good condition; many of them are entitled to the highest commendations. Teachers are laboring with skill and earnestness, and are producing satisfactory results.

Much work is required of each class in this grade; but results demonstrate that, with skilful teaching, pupils of average ability, who are constant in attendance and faithful in the preparation of each day's lessons, are fully equal to the requirements. A large percentage of the scholars composing each class were advanced at the close of the school year, and are succeeding well in the classes to which they were promoted.

One hundred pupils received certificates of graduation at the close of the summer term.

The Grammar Schools occupy an important place in our system of public instruction, and absorb a large share of interest and attention. They contain about one half of our pupils, and from them a large major-

ity of our youth enter at once upon the active duties of life; consequently they demand and receive our best efforts to render them as efficient as possible. Great care is exercised in the selection of teachers, and in the arrangement and apportionment of studies that will be of the highest practical value in all the various avocations of life.

We omit no inducement at our disposal to influence pupils to complete the grammar-school course and receive certificates of graduation. But the allurements of active business and the prospect of immediate pecuniary compensation, though small, induce many to leave school prematurely, and thereby deprive themselves of the advantages that a more thorough and complete education would furnish them for securing more lucrative and desirable positions in life.

It is a cause of constant regret that so many of our youth fail to avail themselves of all the excellent facilities furnished them for obtaining a good education, and to secure the benefits that would accrue were all their advantages improved. We are not unmindful of the fact, however, that to the parents of many of our pupils life is a severe conflict with penury, and that, consequently, the prospect of even small gains from the earnings of their children is a strong inducement for their withdrawal from school at an early age.

Would parents thus circumstanced submit for a while to personal sacrifices, and heroically endure hardship, and absolute want even, that their children

may enter upon the duties of life furnished with all the advantages for success that a good education secures, they would thereby rear for themselves towers of strength and security for future refuge. Their burdens might press heavily upon them for a season, but their reward would be sure; for it rarely occurs that well-trained children fail to appreciate the sacrifices of parents in their behalf, and to reciprocate the kindness received. Bread cast upon the waters will return again in due season, with its full measure of increase.

#### HIGH SCHOOL.

This school has never been in a more prosperous and satisfactory condition than at the present time. Great harmony has prevailed throughout the year. Teachers have been untiring in their devotion to its interests. Pupils have evinced more than an average degree of scholarship; and their deportment, with rare exceptions, has been orderly and courteous.

With a view to a more thorough preparation for college, particularly in the classics, the advantages of the school have been extended to all pupils whose parents declare their intention to send them to college: *provided*, that they have completed the work of the third class in the Grammar School, and have passed an examination satisfactory to the Principal and Sub-Committee of the School, and the Superintendent.

Pupils thus admitted are expected to complete the classical course of the school in five years. They

recite with existing classes, hence no additional teachers are required on their account.

At the option of the Principal, all pupils who are pursuing the classical course are permitted to omit such studies as are not essential to fit them to enter college.

## Twenty-Second Annual Exhibition of the High School,

FRIDAY, JUNE 26, 1874.

### ORDER OF EXERCISES.

MUSIC. Edmands' Band.

- SINGING. — "Wake, Gentle Zephyr," (with Orchestra). *Rossini*  
The Oaks, (with Orchestra). *Verdi*
- SALUTATORY IN LATIN. FRANK AUGUSTINE HOUSTON
- READING. — From "The Taming of the Shrew." CARRIE E. CONANT
- ESSAYS. — Bees and Butterflies. FLORENCE OLIVIA GAUT  
Going to School. ANNIE STORRS GAGE  
Failure. GEORGE FRANKLIN MEAD
- READING. — Scene in an Irish School. *Gerald Griffin*  
CHARLES HENRY DAVIS.
- SINGING. — Spring Song (Trio.) *Dudley Buck*  
"We'll roam through the forest." *Weber*  
"Where yonder mansion rises" (Quartet.)
- READING. — "The Face against the Pane." *T. B. Aldrich*  
ELIZABETH POTTER BROWN.
- READING. — "Mouse Hunting." *Gail Hamilton*  
CHARLOTTE MAYNARD GLINES.
- DECLAMATION. — "Certamen de Achillis armis." *Ovid*  
WOODMAN H. W. TEELE.
- ESSAYS. — Sleep, MARTHA EMERTON LINCOLN  
Species, HARRIET MARSTON WILLOUGHBY  
Cremation, GEORGE BARNES KING

## MUSIC.

## RECESS.

11. SINGING. — Air and Variations, (with Orchestra). *Proch*  
 Sextet from "Lucia," (with Orchestra). *Donizetti*
12. DECLAMATION. — Fontenoy. RUFUS HENRY STICKNEY
13. FROM "Le Misanthrope."
- LIZZIE ANN COFFIN, CARRIE SPAULDING MERRILL, LUCY EVELINE PARK.
14. READING. — From "Ivanhoe." *Scott*  
 LUCY ALICE RUNEY.
15. READING. — From "Biglow Papers." *Lowell*  
 LIZZIE DANA HARDING.
16. PROPHECIES. LUCIA ADELAIDE MANNING
17. SINGING. — "On, on, in path of duty," (Trio), (with Orchestra). *Mozart*  
*Potpourri* from "Child of the Regiment," (with  
 Orchestra). *Donizetti*

Average per cent from the High School examination,	81.5
Average per cent from monthly and High School examinations	. . . . . 81.9

#### HIGH SCHOOL ASSOCIATION.

This Association was organized in 1864, and incorporated in 1871. All persons who were members of the High School previous to 1862, and all graduates of the school since that time, are eligible to membership.

The object of the Association, as stated in the preamble to its Constitution, is "to promote friendly reunion, to encourage study, to benefit the High School, and to engage in any movement for the welfare of the city becoming the graduates of its highest educational institution."

In pursuance of these objects, the Association has sustained, from time to time, courses of popular lectures and musical concerts, and classes for the study of the languages and natural sciences. It is increasing yearly in numbers and influence, and is favorably regarded in the community as an important agency in the cause of education.

At the annual reunion, in November last, the Association was favored with an interesting and instructive address by Hon. Geo. B. Loring, of Salem.

## SUMMARY OF STATISTICS FOR 1874.

## I. POPULATION AND VALUATION.

Population of the city, U. S. Census, 1870 . . . . .	14,693
Estimated present population . . . . .	19,500
Valuation of the city, May 1, 1874 . . . . .	\$30,824,200.00
Estimated value of School Property . . . . .	\$436,350.00

## II. SCHOOLS.

Number of districts . . . . .	5
Number of schools . . . . .	73
High . . . . .	1
Grammar . . . . .	43
Primary . . . . .	29
Increase for the year . . . . .	6

## III. SCHOOL-HOUSES.

Number of school-houses . . . . .	18
Number of school-rooms . . . . .	76
Number of halls . . . . .	5

## IV. TEACHERS.

Number of teachers . . . . .	82
Male teachers, 8 ; female teachers, 74.	
Increase for the year . . . . .	8
Number of teachers in the High School . . . . .	6
Male teachers, 2 ; female teachers, 4.	
Number of teachers in the Grammar Schools . . . . .	46
Male teachers, 5 ; female teachers, 41.	
Number of teachers in the Primary Schools . . . . .	29
One teacher of Vocal Music.	

## V. PUPILS.

Number of persons in the city between five and fifteen years of age, May 1, 1874 . . . . .	3,402
Number of pupils in all the schools in May last . . . . .	3,469
Number over fifteen years of age . . . . .	234
Number of pupils in all the schools in December . . . . .	3,626
Number over fifteen years of age . . . . .	236

Average whole number for the year . . . .	3,264
Average attendance " " . . . .	3,022
Per cent of attendance " " . . . .	92.6
Number of tardinesses " " . . . .	5,981
Number of dismissals " " . . . .	3,417

## VI. EXPENDITURES.

*By the City Council:*

Extension of Jackson school-yard, \$5,050 00	
Repairs and improvements . . . . .	9,478 71
Fuel . . . . .	5,376 60
Furniture . . . . .	806 44
Piano for the High School . . . . .	400 00
Insurance . . . . .	334 00
	<hr/>
	\$21,445 75

*By the School Committee:*

Teachers' salaries . . . . .	\$55,990 62	
Superintendent's salary . . . . .	2,000 00	
Janitors' salaries . . . . .	2,817 11	
Rent . . . . .	718 50	
Water . . . . .	324 72	
Gas . . . . .	342 69	
Writing books . . . . .	532 84	
Books for indigent pupils and teachers' desks . . . . .	626 66	
Printing . . . . .	262 81	
Mats . . . . .	145 05	
Stationery and other school supplies, . . . . .	987 20	
Miscellaneous . . . . .	511 18	\$65,259 38
	<hr/>	
Total expenditures		\$86,705 13

## RECEIPTS :

State school fund . . . . .	\$639 00	
Rent of school halls . . . . .	301 00	
Tuition of non-resident pupils . . . . .	171 25	
Return premium on insurance policies, . . . . .	361 77	\$1,473 94
	<hr/>	
Net expenditure,		\$85,231 19

## CONCLUSION.

When all the circumstances, adverse as well as propitious, under which teachers and pupils have labored during the year are considered, the results achieved will satisfy reasonable expectations. We therefore cheerfully bestow the merited commendation wherever there has been earnest, persistent endeavor.

“Thy purpose firm is equal to the deed :  
 Who does the best his circumstance allows  
 Does well, acts nobly ; angels could no more.”

Encouraged by the results of the past, we will gather fresh inspiration for future duties ; avoiding the errors and profiting by the experience of the year just closing, we will hope for more perfect success in the year to come ; stimulated by whatever of good has been accomplished, we will pursue our work with still higher expectations and more exalted aims : for the ideal and possible are yet far in advance of what has been accomplished.

Since no teacher has yet attained to the perfection of his art, and no child, even the most highly favored, was ever educated under circumstances that admitted of no improvement, we have not yet learned the full measure of our pupils' capabilities and what might be accomplished were all the conditions of success completely met.

The work committed to our supervision, when considered in the aggregate, oppresses by its vastness. But for each day's duties the day is given, and if

each separate task is faithfully performed in its allotted time, the labor of the year will be complete. With many misgivings we meet the responsibility of guiding an agency which so largely conduces to mould the character and decide the destiny of the rising generation, but are cheered by the consciousness that we have the co-operation of an intelligent community, whose interest and solicitude are enlisted in our work, and the assistance of a corps of faithful, devoted teachers, many of whom have had long and successful experience, and all of whom are anxious to adopt the best methods and to secure the most valuable results.

We are not exempt from ordinary discouragements, but the times are propitious; our age is one of rapid advance. The appreciation by all classes of the community of the vast importance of education in its various departments, transcends that of any previous period; our methods of instruction—the best that the combined wisdom of the past has been able to devise, but, like all other methods of man's originating, imperfect—are undergoing important modifications; many of the best minds in all leading nations are devoted to the consideration of the great problems of education, and are laboring to improve present systems of instruction and to increase their adaptability to the demands of society.

By means of educational publications, essays, lectures, discussions; the interchange of annual reports, teachers' conventions, superintendents' meetings, and the public press, we become familiar with the best

thoughts and acquainted with the most successful practice of educators of large experience and mature judgment in our own country and Europe. "In the multitude of counsellors there is safety." Where such important interests are involved we deem it wise to adopt well-tested and highly-approved systems of instruction, and to copy after models which are the result of years of patient thought and intelligent practice, rather than to risk a waste of the valuable time of our pupils upon untried and doubtful theories.

No fixed system of instruction can meet the demands of different communities, or of the same community at different periods of time. Fortunately our system of public instruction possesses great flexibility, is easily adjusted to meet the necessities of all sections of our country, and has been found equal to the exigencies of each period of our national existence. It was inaugurated and has ever been fostered as a public necessity. The sentiment so universally entertained by the founders of our free institutions, that "*an intelligent Christianity is the only basis for a permanent free government,*" has received the endorsement of each successive generation of their descendants; hence the church and the school-house have always had a prominent place in every village, and the institutions of learning and religion have been nurtured with jealous care.

The common school of the early days of New England was only the germ of our present perfected system. A summer school for children, and a win-

ter school for those who were engaged in some industrial pursuit the remainder of the year, were the extent of the tuition furnished. The instruction imparted was elementary in character and limited in extent, but it answered the requirements of a people whose habits were simple and whose wants were few. As time advanced, however, the length of the schools was extended and the course of study was increased, until what is regarded the maximum of both is now attained.

The last fifty years have produced great changes in our social condition. The extensive use of machinery in the mechanic arts, the minute division of labor, and other causes have abolished the apprentice system so generally adopted throughout New England in former years, — a system which had its origin in the universally accepted principle that “every boy should be put in the way of maintaining himself in honest independence.”

Froude says that formerly in Old England it was thought that “the Ten Commandments and a handicraft made a good and wholesome equipment to commence life with.” To these our fathers added the elementary education of their common schools, and, thus equipped, went forth and accomplished what has placed New England in the front rank of intelligent and thriving communities.

Since the general law, “In the sweat of thy face shalt thou eat bread,” is still universal in its application, the necessity exists as formerly for skilled labor and for special preparation for carrying forward

successfully the various departments of industry; and communities are looking to the schools to supply, in part at least, what was formerly secured by the apprentice system. Industrial Schools and Schools of Technology are being established, and many educators are carefully considering the practicability of introducing technical and industrial training into our public schools. We cannot foresee what future progress may develop in this direction; but the general law of demand and supply will doubtless find a fulfilment here. For the present, at least, we think that the education of our public schools must be mainly literary and general.

Every person who aims to be an intelligent citizen should possess an accurate general knowledge of many subjects, and minute and exact knowledge of his own special department. To impart this accurate, general knowledge is the appropriate work of the public schools; and when the period arrives for the pupil to select his pursuit for life, he must seek in technical or industrial schools that specific knowledge which will render him proficient in his chosen sphere of labor.

As those from whom we derived our education had no accurate conception of what would be demanded of us, so we can form but an imperfect idea of what will be required of those whom we are educating, or what will be their pursuit in life: hence our aim should be to lay such a foundation as will be adapted to any superstructure and to impart such information as will be valuable and essential in any avocation.

If our youth, with their native, inherited aptness and versatility, can go forth from our instruction well grounded in the elements of learning as taught in our public schools, with minds strengthened and quickened by study, with an ardent love for knowledge, and above all, with unsullied characters and noble aspirations, we need entertain but little anxiety concerning their success in any congenial department of industry.

With grateful acknowledgments to you, gentlemen, for your many kindnesses to me personally, and for the encouragements received from you in the performance of my duties, this report is respectfully submitted.

J. H. DAVIS,  
*Supt. of Public Schools.*

DECEMBER 31, 1874.

## LUTHER V. BELL SCHOOL-HOUSE.

---

THIS commodious and substantial building, located on Vinal Avenue, was formally dedicated June 25.

The exercises commenced with singing by the pupils of Prospect Hill Grammar School, under the direction of Mr. Hadley, teacher of vocal music in the public schools.

Prayer was offered by Rev. Henry H. Barber.

Alderman E. A. Curtis, Chairman of the Committee on Public Property, made a brief statement relative to the construction and cost of the building, and delivered the keys to His Honor, Mayor Wm. H. Furber.

### ADDRESS OF MAYOR FURBER.

*Mr. Chairman of the Building Committee:*—In accepting these keys, permit me, in behalf of the city government, to tender to you and your associates their sincere thanks for the thorough and perfect manner in which you have performed the duties assigned you. You, sir, have watched with care and anxiety the work from the commencement of the foundation to the finishing touch of the builder. That you have faithfully and diligently labored, this elegant and substantial building bears abundant and convincing proof. And, sir, as you may witness, from year to year, the youth of our city issuing from these halls, with minds improved and well-trained, to become valued citizens, may you feel fully compensated for the labor here bestowed. Allow me, also, to convey through you to the architect and builders the thanks of the government for the faithful manner in which they have executed the work which devolved upon them.

*Mr. Chairman of the District Committee:*— Having carefully examined this structure and found it complete in all its parts, with cheerful and healthful accommodations for those for whose use it is intended, the same has been accepted by the city. And now, in behalf of the School Board, I transfer to your keeping this valued and important trust,—another temple of learning reflecting the profuse liberality of our citizens in the cause of education, to which we now dedicate it. Years of experience have convinced us that in your hands this gift of the people, and the interests of the thousands who will come to these halls for instruction, will not suffer, but will receive your watchful care.

And now, Mr. Chairman, I deliver to you these keys, with the hope that the highest anticipations of all interested in this work will be fully realized.

Rev. Geo. W. Durell, as Chairman of the District Committee, presided on the occasion and received the keys from the Mayor and transferred them to Samuel C. Hunt, Esq., Principal of the School.

#### REMARKS OF REV. MR. DURELL.

As the representative of the people of this district, I have great pleasure in receiving from you, sir, the honored Mayor of our city, these emblems of an important trust. I can never forget the marked interest you have shown from the first, not only in the plans for this house, but also in the selection of the most suitable place for the erection of an edifice, which, from its costliness, must be permanent. We are under great obligations to you and your associates for the unwearied care you have manifested in all matters connected with the work of building. This substantial, beautiful structure fitly symbolizes the intelligent zeal and pride of the governor and rulers of our city in all that pertains to its welfare or honor, and it will stand as a monument of your

thoughtfulness for the best interests of our people now, and of all those who shall come after us.

But the pleasure of this occasion is sadly diminished by the absence of one of my associates on this local committee. To the sense of loss to the city is added the feeling of deep personal bereavement by the death of the Rev. Mr. Lowe, the accomplished scholar, the kind, genial, faithful friend.

To you, Mr. Hunt, as the master of this school, I now give these keys. They must seem to you like a formal confirmation of the great trust you have so long held in our midst, the daily care of the dearest treasures in all our homes. The growing importance of this charge may be seen in the need of such a building as this, and in the fact that you are at the head of schools which number together thirteen hundred children. Permit me here to recognize the zeal, thoroughness, and general ability for which you are distinguished as a teacher.

#### REMARKS OF MR. HUNT.

*Mr. Chairman:*—It is with mingled emotions that I accept from you, sir, these keys, as a badge of my office of Principal of the Luther V. Bell School. After eight years of service within the classic but dilapidated walls of the Prospect Hill School-house, it seems but a hard-won mead to pass to the elegant rooms and complete accessories of the "Luther V. Bell"; yet it is not without fear that I assume the trust,—fear, lest with the improved facilities shall come increased demands from committee and people, and I may be found wanting. But, sir, this occasion is somewhat unique: it is seldom that a master may shirk the task of a reply at this point in the ceremony of dedication, and throw the burden of his answer upon younger and more acceptable representatives. I take pleasure in introducing to you and the audience the pupils of the first class in the Prospect Hill Grammar School.

The audience united with the school in singing the following

DEDICATORY ODE.

WRITTEN FOR THE OCCASION BY EDWARD A. KELLEY, ESQ.

To-day another jewel lies  
 Within the sacred crown of lore ;  
 Midst older sisters did it rise,  
 An honor to a needful store.

Beneath the shadow of a hill  
 With deep historic fame replete,  
 This latest gem may nestle still, —  
 The battle-ground for friendly feet.

Favored of fortune ! e'en the act  
 That told abroad thy happy birth,  
 Gave thee a name to live, in fact,  
 And recognized another's worth.

Belle of the vale, in name and deed,  
 To thee, to-day, our hearts go out ;  
 We bid thee now a warm God-speed !  
 Scatter sound learning all about.

May those who teach, themselves be taught  
 By Him who is the "perfect way,"  
 And those to whom the truth is brought  
 Be quick to honor and obey.

May kindly actions, words of cheer,  
 Like incense from the altars old,  
 Send grateful fragrance far and near,  
 More precious than renown or gold.

As year by year, still rolling on,  
 Withdraws the veil that lies before,  
 May battles here be nobly won,  
 And harvests rich for all in store.

The class introduced by Mr. Hunt entertained the audience with the usual interesting graduating exercises.

Brief addresses were made by Alderman Clark Bennett, Oren S. Knapp, Esq., former member of the School Board, Rev. Chas. Smith, and others.

#### DESCRIPTION OF THE BUILDING.

This building, in size and plan, is substantially the same as the Prescott School-house. It is sixty-eight by eighty-six feet on the ground, and is three stories high.

Each of the first and second stories contains four school-rooms, and there are two school-rooms and an exhibition-hall in the third story. The school-rooms are thirty by thirty-two feet, and twelve feet eight inches high, in the clear. The exhibition-hall is forty-one by sixty-five feet, and seventeen feet in height.

There are eighteen dressing-rooms, ten of which communicate directly with the school-rooms; the remaining eight are upon the middle stair-landings. The entrance-halls in the first and second stories are twenty-one by twenty-five feet each, and the hall in the third story is eleven by twenty-five feet. The stairways are spacious, well lighted, and of easy grade.

The basement, which is eleven feet high, contains rooms for the janitor's family, rooms for the furnaces and fuel, and play-rooms for the pupils.

The front entrance is on Vinal Avenue, and there are two entrances to the basement in the rear of the building.

The walls and partitions are constructed of bricks. The exterior walls are faced with pressed bricks. The base and belt courses, and the window caps and sills are granite. The inside finish is ash and walnut. The floors and stairs are hard pine. The halls in each story are furnished with sinks, and supplied with Mystic water.

The plans and specifications were furnished by Lyman Underwood, Esq., of Boston. The contractors were John S. Tuttle for the masonry, and G. T. Burnham & Co. for the carpentry. The building is heated by four No. 24 Peerless

furnaces, furnished by Charles Holmes, Esq. The furniture for teachers and pupils was manufactured by W. G. Shattuck, Esq.

The building was commenced in June, 1873, and completed in June, 1874; it was constructed under the supervision of the Committee on Public Property, and is complete in all its appointments. It was first occupied by the schools Sept. 7.

Dr. Luther V. Bell was a member of the Somerville School Committee from 1843 to 1847. In 1851 a school-building was constructed on Cherry Street, and in honor of Dr. Bell, was named the “Bell Primary School-house.” In April, 1871, that building was moved to Beacon Street, and placed upon the site of the Harvard Primary School-house, which was burnt in March of that year, and received the name of the building for which it was substituted. In consequence of these changes the committee adopted the following: —

*Whereas*, The School-house known as the Bell Primary School-house has been moved to a new locality, and the name thereof changed; *and whereas*, it is the desire of this School Board to perpetuate the memory of Dr. Luther V. Bell, a citizen so eminent in his profession, and so strong in his attachment to the interests of the schools; therefore,

*Resolved*, That this Board recommend that the name of Dr. Bell be given to the next large School-building erected in Somerville.

In accordance with this recommendation, the honored name of Luther V. Bell has been given to the new edifice.

The following items were collected, mainly from a discourse on the life and character of Dr. Bell, read by Dr. Ray to the Association of Superintendents of North American Institutions for the Insane, at its annual meeting in Providence, R. I., June 10, 1862.

We think they will be of sufficient interest to our citizens, many of whom were personally acquainted with Dr. Bell, to warrant their insertion in this connection.

LUTHER V. BELL, M. D., LL. D., was born in Chester, N. H., Dec. 20, 1806. Before he had finished his seventeenth year he graduated at Bowdoin College, with a reputation unsullied by any of those follies which students are so apt to mistake for the fruits of spirit and courage. Notwithstanding his youth, he held a respectable rank in a class of considerably more than the average ability. He commenced the study of medicine with his brother, in the city of New York, and received his medical degree from the Hanover Medical School.

Having completed his courses and taken his degree, he was induced by his friends, who thought him too young to assume the responsibilities of a physician, to spend a year or more in a counting-room.

He commenced the practice of medicine in New York, but was led by family reasons to choose for his field of labor his native place, Chester, which he subsequently changed for Derry.

He soon achieved distinction, particularly in surgery, and early acquired a reputation as a writer on medical subjects. For two years in succession, while still under thirty years of age, he won the Cambridge-Boylston prize medal by medical essays of such merit that they still form a part of the standard medical literature of the country.

About this time the success of the State Lunatic Hospital in Worcester attracted the attention of the philanthropic in New Hampshire to the necessity of a similar institution in their own State, and strong efforts were made to induce the legislature to undertake its establishment. Dr. Bell devoted himself with great zeal to the promotion of this enterprise. Twice he was elected to the legislature for the defence of his favorite plan. The ability he displayed in the discussion of the subject, and his elaborate report as chairman of a committee on the projected institution, made a decidedly favorable impression on the public mind, and led to his election to the superintendency of McLean Asylum.

He entered upon his duties in January, 1837, and for nearly twenty years conducted the institution with rare ability and success. His talents and manners were well calculated to dissipate prejudice, to win the favor of the thinking classes, and to impress upon all the conviction that he was fully adequate to the utmost requirements of his place. The parent, the child, the guardian, left in his charge the dearest object of their affections, well satisfied that they could not have made a better choice.

In 1844 the Trustees of the Butler Hospital, at Providence, R. I., then about to establish an institution for the insane, procured his services to visit Europe and ascertain what improvements had been made in the construction and ventilation of Insane Hospitals. During his absence of three months only, he visited the principal hospitals of England and France, and on his return to New York he had already completed plans for the construction of a hospital which, for size and adaptation, has no superior in this country.

For five years he was President of the Association of Superintendents of North American Institutions for the Insane. In 1850 he was chosen a member of the Executive Council of the State. In 1852 he was a member of the Baltimore Convention, which nominated Gen. Scott for the Presidency. In the same year he was a candidate for Congress. In 1853 he was appointed one of a Board of Commissioners for examining convicts in the Penitentiary who presented indications of mental disease. In 1856 he was a candidate for the office of Governor. In 1857 he was elected President of the Massachusetts Medical Society.

In 1856, after a service of nearly twenty years, he retired from the McLean Asylum, in consequence of failing health, and thence-

forth resided in Charlestown. Much of his time after his retirement from the Asylum was given to consultations with other physicians, and to attendance on trials in courts of justice as a medical expert.

In the spring of 1861 a new scene opened, in which this feeble invalid was destined, under the spur of a noble sentiment, to encounter exposure, privations, and toil, unknown to his most vigorous years. In that great crisis of our affairs, which was to try men's souls as they were never tried before, he needed no second thought to determine what part he should act. By nature and by education, by principle and by feeling, a friend to law and order and a lover of his country, he sprung at once to the support of the Government without caring to see who stood beside him.

He felt that in the impending conflict no man should be idle. No pressure of duty kept him at home; he was conscious of possessing talents and skill that would be of service to the cause, and his example would have its weight at a time when men, just recovering from surprise and stupor, were earnestly watching the movements of one another. Abandoning the little circle that had become inexpressibly dear to his affections, and renouncing all the little appliances of comfort which seemed indispensable to his invalid condition, he offered his services to the Governor of the State on the 10th of June, received his commission as Surgeon of the 11th Regiment of Massachusetts Volunteers, and left with it for Washington on the 30th of the same month. His regiment was soon removed to the Virginia side of the river, and took its full share in the disastrous battle of Bull Run. He established himself in Sudley Church, and from 2 to 7 P. M. was engaged in performing operations. After encountering many perils and hair-breadth escapes, he reached Washington the next day, with a disorganized, panic-stricken host of fugitives. His regiment was now ordered to Maryland and made a part of Gen. Hooker's Division. Shortly after he was appointed Brigade Surgeon, and finally Division Surgeon.

Up to the last week of his life his health and power of endurance steadily improved under the hardships and privations of the camp; and yet he took them as they came, making no attempt to favor himself by unusual privileges. During his whole period of service in Maryland he slept out of camp but one night. "Seven nights," he says, in a letter to a friend, "I slept beneath the can-

opy of heaven ; twice I was on horseback, or on foot, behind my marching regiment, over twenty-four hours in succession. I have had but one sick day and have been cheerful and happy." Within a month of his death he wrote, "I never had the beginning of a regret at my decision to devote what may be left of life and ability to the great cause. I have, as you know, four motherless children. Painful as it is to leave such a charge, even in the worthiest hands, I have been forced to it by the reflection that the great issue under the stern arbitrament of arms is, whether or not our children are to have a country."

On the morning of February 5, 1862, he was awakened by intense pains in his chest. In the course of a day or two dyspnoea came on, and at the end of six days death ensued. In the midst of the severest pains he continued calm and self-possessed, saw clearly the inevitable result, said he had no messages to send, no orders to give, for he had provided for everything.

Thus, quietly and without ostentation, a life devoted to the cause of humanity and science was beautifully finished by a death in the service of his country.

ANNUAL REPORT

OF

SOMERVILLE MYSTIC WATER BOARD,

1874.

IN BOARD OF MAYOR AND ALDERMEN,  
February 22, 1875.

Accepted. Referred to the Committee on Printing with instructions to print the same in the Annual Report, also to print separate as many copies as the Water Board may direct.

Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

---

IN COMMON COUNCIL, February 24, 1875.

Concurred in.

SOLOMON DAVIS, *Clerk.*

IN WATER BOARD,

SOMERVILLE, Jan. 29, 1875.

*To the City Council:—*

In compliance with the provisions of an ordinance of the city, the Somerville Mystic Water Board has the honor to submit herewith their

## ANNUAL REPORT,

Presenting a statement in detail of the quantity of pipe laid, and the number of fire hydrants and stop gates set during the past year, as also a statement of the general progress and condition of the Works at the present time.

By authority granted to the Water Board by the City Council in 1873, a new 12-inch main pipe has been constructed 2,596 feet in length, connecting directly with the Reservoir on Walnut Hill, and passing through Packard Street to Broadway, where it intersects with a 10-inch pipe running through Broadway to Holland Street, and connecting with the 10-inch pipe previously laid in that street. This is the most important addition which has been made to the Works, and the westerly portion of the city is now provided with the means of an abundant supply of water, both for domestic purposes and for the extinguishment of fires. In fact, since the construction of the above referred to 12-inch pipe, the whole city, so far as its pipe area of supply mains is concerned, is very thoroughly provided for, the

following being the number and size of the branches connected with the Charlestown Works, viz. —

One	12-inch	in Packard Street, direct from Reservoir.		
“	12	“ junction Broadway and Cedar Street, from	30-in.	main.
“	12	“ “ “ Central “ “	30	“ “
“	8	“ “ Pearl and Myrtle “ “	30	“ “
Two	6	“ “ “ “ Walnut “ “	30	“ “
One	6	“ “ “ “ Myrtle “ “	30	“ “
Two	6	“ “ “ “ Cross “ “	30	“ “
One	6	“ “ “ “ Marshall “ “	30	“ “
“	6	“ “ Medford and School “ “	30	“ “
“	6	“ “ “ Central “ “	30	“ “
“	4	“ Broadway, near Temple “ “	24	“ “
“	8	“ junction Broadway and Medford “ “	24	“ “
“	4	“ Heath St., bet. West and Bond “ “	24	“ “
“	8	“ at Charlestown line, near R. R. bridge “	24	“ “
“	8	“ “ “ Washington St. “	8	“ pipe.

Making an aggregate of 791.6 square inches, more than equal to the capacity of a 30-inch pipe. The advantage of having so many sources of supply in case of accident is obvious.

Until recently no fears have been entertained as to the adequacy of Mystic Pond, with its present storage basin, to supply an abundance of water to the several cities and towns furnished therefrom. On account of the unprecedented drought of the past year, the water in the pond is very low, being over two feet below the top of the conduit, and making it necessary for the Charlestown Water Board to erect temporary pumping works for the purpose of keeping the conduit supplied. This temporary work is now being constructed with all possible dispatch, and no fears need be entertained as to a supply, until such

time as a natural relief from this threatened water famine shall come.

During the severe cold weather of the month of January, the increased consumption, or rather the waste of water, amounted to about 4,000,000 gallons daily, and at this time, owing to the increased velocity in the mains, the head was reduced in the high localities in our city to such an extent as to entirely cut off the supply: eventually something must be done to remedy this.

The city of Boston has legislative authority to increase the storage capacity of the Mystic Pond, and the Charlestown Water Board is authorized to procure the conveyance of bonds for such land as may be designated by the engineer for the purpose. Earnest consideration is being given to the subject, and in all probability early decisive action will be taken.

The sanitary qualities of the Mystic water have also received the attention of the Boston authorities. A medical commission of three physicians, appointed by an order of the City Council to investigate as to the sanitary condition of the Sudbury, Mystic, Shawshine, and Charles Rivers, have made a report from which the following paragraph relating to the Mystic is quoted, viz. —

“Thus from the dense population, the sewage, and from the tanneries is a large amount of decomposing animal matter turned into the Abajouna and the Horn Pond branch, to be conveyed, not all but inevitably some of it, to Mystic Pond; and judging

from the past, the amount of pollution will increase from year to year, and with it the difficulty of the problem of purification. To leave matters as they are is to confidently expect in time a degree of contamination which will make itself felt in East Boston, Charlestown, Chelsea, and Somerville, if it be not already felt in these communities. It may be that their statistics of mortality of to-day compare favorably with those of the well-water period, but it is questionable if the figures of the future will compare favorably with those of to-day. Of course the only remedy is to keep all this filth out by perfect sewerage."

Probably whenever the storage capacity of the pond is increased, some provision will be made to drain the territory referred to by the medical commission as furnishing the objectionable polluting matter; yet the Board, in view of the possible serious results which might soon occur to the inhabitants using the water, would recommend that such action be taken by the city council as, in their opinion, may be necessary to urge upon the city of Boston immediate steps towards the commencement and early completion of the necessary sewer.

Since the last Annual Report of the Board, notice has been received from I. P. Converse, Esq., the attorney having in charge the case of Alexander Campbell against the City of Somerville, — the same being a claim for 25 per cent of back pay, and for extra work done under his contract for trenching for water pipes, — that the suit has been decided by

the judges of the Supreme Court in favor of the city. This decision materially reduces the loss sustained by the city in the Brooks case.

Ten stand-pipes for the supply of watering carts have been set the past season, at the request of the Committee of the City Council on watering streets. They have worked satisfactorily, and the Board recommend that others be set wherever there is a call for watering streets, the use of fire hydrants for the purpose being objectionable, on account of the liability of their being put out of order by inexperienced persons, and thus becoming useless when required for fire purposes.

The total amount of distribution pipe laid in the streets of the city to December 31, 1874, is 41 miles 501.4 feet; number of fire hydrants, 226; number of stop gates, 291, of which 3 miles, 1009 feet of pipe, 22 post hydrants, 2 Lowry hydrants and 41 stop gates have been laid and set during the year 1874. On account of change in grades of streets, 4,905 feet of distribution pipe have been relaid, 9 hydrants reset, and 53 service pipes lowered; 364 new service pipes have been laid.

Water is now supplied to 2586 dwelling-houses, 3426 families, 66 stores and shops, 22 manufactories, 267 stables, the City Hall, school-houses, engine and hose houses, several churches, and other public buildings, — a gain of 325 dwelling-houses, 431 families, 9 stores, one manufactory, and 39 stables for the year.

The water fixtures in use are designated as follows: 3310 sinks, 424 taps, 565 bath-tubs, 674 wash-

hand basins, 609 pans, 429 self-acting and 177 hopper water closets, 88 private hydrants, 23 urinals, 10 fountains, and 391 hand-hose.

The general supervision of the work has been under the charge of the superintendent, Mr. Benjamin Almy, whose ability and faithfulness in the performance of his duties merits and receives the full confidence of the Board. His competent and obliging assistant, Mr. Joshua E. Eldridge, has also performed his duties in a very satisfactory manner.

The engineering has been under the direction of Mr. Charles D. Elliott, the city engineer.

You are referred to the report of the superintendent, herewith presented, containing a tabular statement of the amount of pipe laid, and other work performed during the year, as also an inventory of stock and tools on hand at the workshop.

The cost of the Works is as follows: —

Value December 31st, 1873	-	-	-	\$273,378 02
Expended during the year 1874, including				
stock now on hand	-	-	-	34,294 06
				<hr/>
Total	-	-	-	\$307,672 08

The Board desires to acknowledge the friendly and cordial manner in which all inquiries for information, etc., have been met by the officers and members of the Charlestown Water Board.

# REPORT.

---

IN BOARD OF MAYOR AND ALDERMEN,

March 22, 1875.

THE undersigned, as Chairman of the Committee on Sewers for the year ending December 31, 1874, begs leave to submit the following report: —

Prior to the passage of the Act of 1873, for the abatement of the Miller River nuisance, most of our sewers had been of small size and located in the interior of the city, discharging their contents into the several creeks running seaward, — the point of outfall being undetermined.

The construction of the Bridge Street Sewer in Cambridge, and the Milk Street Sewer in Somerville, has definitely determined, for a long period, the location of a Trunk Sewer for the Milk Row Valley Water Shed, embracing more than one half of the territory of the city.

Acting upon this basis the Sewer Committee, after making careful surveys from Prospect Street, in Milk, Washington, Beacon, Mossland, and Elm Streets to Davis Square in West Somerville, had the satisfaction of finding it entirely feasible to drain most of the territory of Ward Four through the Milk Street Sewer, — Davis Square being about fifteen feet higher than Union Square, and the distance less than 12,000 feet by the proposed route. This course obviates the necessity for any complication at pres-

ent, on the part of our city, in connection with Cambridge, in polluting the waters of Alewife Brook by discharging sewerage matter therein. Knowing the fact that West Somerville was entirely without drainage accommodations, for which it was greatly suffering, it was proposed to meet these requirements as soon as practicable, and to enter upon the work at once. It was not deemed advisable to attempt to construct a large Trunk Sewer of the dimensions required here, in one year, of nearly 12,000 feet in length, the expense of which would fall mainly upon the city. It was decided to recommend the construction of something more than one half of this proposed sewer during the year, beginning at Prospect Street, in Milk Street, and terminating at the corner of Beacon and Sacramento Streets, to accomplish which it was necessary to raise the sum of \$40,000.00, which sum was authorized by the City Council without a dissenting vote. Estimates were obtained for constructing this section of this sewer, and the contract concluded with the Messrs. Patrick and Maurice Terry, varying but a trifle from \$50,000.00, which sum your Committee calculated would be nearly covered by the appropriation and assessments to be collected. They were confident in the opinion that no expenditure of money would be more fully justified than the amount necessary to prosecute to an early completion this proposed sewer, which will in all probability finish this class of sewers in this section of our city for many years to come, and leaving the amount to be expended on Trunk

Sewers in the northerly portion of our city of no formidable magnitude.

The large sewers from Milk Street, in Medford Street, to the line of Cambridge, in Ward and Earle Streets, and the Upper Basins, being 2,688 feet in length, cost for their construction the sum of \$18,091 $\frac{3}{100}$ , of which amount the city must assume nearly three fourths.

These sewers were as necessary as the Milk Street Sewer for the abatement of the Miller River nuisance, and which for its abatement should have been included with the Bridge and Milk Street Sewers, to be paid for jointly by the cities of Cambridge and Somerville.

During the year there were constructed 20,768 feet of sewers by the city, including 2,631 feet of the Milk Street Sewer, under the supervision of the Commissioners. Most of them were of brick, and the material and workmanship were, generally, of good quality, by which the city and abutters received a fair equivalent for money expended.

There were forty-five manholes constructed with these sewers, and fifty-seven cesspools, or catch-basins, to take water from the streets, the covers to both manholes and cesspools being of stone and iron, of the best patterns known to your Committee. Herewith is annexed a table prepared by the Engineer, showing the length, size, material, and expense, as per contract price, of each sewer.

Respectfully submitted.

CLARK BENNETT.

ANNUAL REPORT  
OF THE  
CITY ENGINEER.

CITY OF SOMERVILLE.

1874.

IN BOARD OF MAYOR AND ALDERMEN,

March 15, 1875.

Referred to the Committee on Printing, with instructions to print the same in the Annual Report. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

---

IN COMMON COUNCIL, March 17, 1875.

Concurred in.

SOLOMON DAVIS, *Clerk.*

TO THE HON. THE MAYOR AND CITY COUNCIL :

*Gentlemen,* — The City Engineer presents the following report for the year 1874 : —

The extensive city improvements made during the year demanded an unusual amount of engineering services, probably double those of any year previous. They were performed for various departments of the city, but principally for Highways, Sewers, and the Public Park.

#### HIGHWAYS.

The streets built anew or reconstructed during 1874 are named in the following list ; they were all carefully graded and, with the exception of Adams Street (unfinished), thoroughly macadamized.

The improvements on Milk and Washington Streets and at Union Square were extensive, and included regrading, macadamizing, setting edge-stones, building sidewalks and street-crossings, paving gutters, constructing catch-basins, rebuilding horse-railroads, and on Milk Street, widening to the width of seventy feet northwest of Union Square, and to seventy-five feet southeast of the square ; bricking the walks the entire length of the street on both sides, and on a large portion of the street removing and relaying or resetting water-pipes, gas-pipes, hydrants, and lamp-posts.

#### *Streets Built or Rebuilt in 1874.*

Name.	From.	To.	Length.

Warren Avenue,	Bow,	Washington,	1,579 "
Washington,	Union Square,	Lowell Railroad,	2,100 "
Willow Avenue,	Appleton,	Broadway,	1,511 "
Total, 7.29 miles	. . . . .	. . . . .	38,509 "

\* Commenced in 1873.

With a few exceptions the construction of these streets required constant supervision and services, in furnishing lines and grades and estimating work performed; besides which surveys and plans of twenty-two streets were made (*see list*,) in all, about four miles in length; nine miles of levels were taken for highway purposes on thirty-seven streets, and profiles made, all levels being referred to mean low tide; lines and grades were given for setting nearly eight miles of edge-stones and for rebuilding about two and one fourth miles of horse-railroads; a large number of street

bounds previously removed were reset and located; locations were given for numerous catch-basins, and street lines, and grades furnished for private individuals; lot surveys and plans were made for use in seven highway suits against the city, and considerable time spent in collecting evidence therefor, and attendance at Court; a survey was made of the territory between Milk Street and the Union Glass Works, for the proposed alteration of Prospect Street, and a plan drawn showing parts of Prospect Street, Brick-yard Lane, Webster Avenue, and the Fitchburg Railroad, together with twenty-five lots and the buildings thereon; plans were also made of lots taken at Union Square and on Milk and Linwood Streets for highway purposes, etc. etc.

*Street Surveys and Plans Made in 1874.*

Total . . . . .			19,516 "

\* Includes 23 lots taken for widening.

*Street Bounds.*

Most of our street bounds were set in 1860 or 1861, and generally in the centres of the streets; changes of grade, and the building of horse-railroads, sewers, etc., have displaced many; others are at depths almost inaccessible, and those near the street surface are useless to most persons except surveyors, and a source of much annoyance to them.

Stone bounds have been placed in but few of the streets laid out since 1861.

Some of our principal avenues are deficient in monuments, among these, Milk Street, Highland Avenue, and Mystic Avenue. Even on Broadway there are many which are unreliable.

For these reasons I suggest that a better system of stone monuments be introduced, superseding the old, and placed on the street lines, or at a uniform distance therefrom, and so as to define grade as well as line.

*Grades.*

The uneven surface of the city obliges cutting or filling in nearly every street improvement; as a result estates are often injured, and blame and expense fall upon the city. This is especially the case with side-hill streets.

As property rises in value and old streets are improved, or the number of new streets accepted increases, the annoyance, litigation, and expense to the city caused by imperfect grades must largely increase.

There seems to be a necessity, therefore, for the establishment of grades for all our public streets, for the guidance of builders thereon, and for the adoption of some measure by which abutters on unaccepted streets and land owners opening new streets can be induced or obliged to establish a grade therefor, acceptable to the city, and to record the same. When this is done, a source of much expense to the city will be ended.

STREET STATISTICS.

Number of streets in the city, 281.

Total length, 60 1-10 miles.

98 are public streets . . . . .	length 40 2 miles
183 are private streets . . . . .	“ 19.9 “
7 public streets are more than 60 feet wide . . . . .	“ 9.8 “
5 public streets are less than 40 feet wide . . . . .	“ 1.55 “
110 private streets are less than 40 feet wide . . . . .	“ 9.35 “
80 public streets are macadamized . . . . .	“ 32.9 “
1 private street is macadamized . . . . .	“ 0.15 “
11 public streets are below Grade 16 . . . . .	“ 3.8 “
43 private streets are below Grade 16 . . . . .	“ 3.1 “

SEWERS.

In 1874 sewers were constructed in the following streets :

Name.	From.	To.	Length in feet.
Aldersey,	Vinal Avenue,	Near Walnut.	365
Beacon,	Cooney,	Concord Avenue,	552
“	Concord Avenue,	Temporary outlet,	125
“	Washington,	Near Park,	931
Brick Yard Lane,	Prospect,	Newton,	557
Cross,	Oliver,	Tufts,	400
Earle,	Ward,	Upper Basin,	136
Franklin,	Perkins,	(Northward),	61
Highland Avenue,	Medford,	Walnut,	561
Medford,	Milk,	Highland Avenue,	2,787
“	E. Cambridge line,	Milk,	1,498
Milk,	“	Fitchburg R. R.	1,165
“	Medford,	Prospect,	1,466
“	Prospect,	Union Square,	526
Mt. Vernon,	Old sewer,	Near Pearl,	381
Oliver,	Franklin,	Cross,	1,099
Perkins,	Near Mt. Vernon,	Franklin,	867
Pinckney,	Near angle Northward,		190
Prospect,	Milk,	Brick Yard Lane,	136
Quincy,	Near Summer,	Milk,	736
Union Square,	Milk,	Washington,	175

26	"	1,698	4	72	"	1,466	8
30	"	1,481	4	96 timber bottom		1,165	12

Of the sewers built 315 feet were cement pipe, 18,878 feet were of brick, 1,165 feet were of brick and timber, and 410 feet of plank, in all 20,768 feet, or about four miles. In these sewers were built 45 man-holes.

Surveys and plans were made of all but two of the streets in which sewers were laid, including two hundred and ninety-one lots, for purposes of assessment.

Lines and grades were carefully given for the construction of the above sewers usually every twenty-five feet, and for some sewers oftener, besides which levels were taken and profiles made of nearly ten miles of streets for sewer purposes.

#### *Miller's River Sewer Route.*

A considerable time was spent in preparations for and attendance at legislative hearings upon the routes proposed for the Miller's River Sewer.

A careful examination of these routes was made to ascertain their feasibility. Levels were taken and a profile drawn of Washington Street from Prospect Street in Somerville to Main Street in Charlestown, and soundings made in both cities to ascertain the shape of the underlying ledge in said street, and the same shown on the profile. Levels were also taken over portions of two of the other routes proposed, and soundings made across Charles River, and a

plan drawn showing accurate sections of the river-bed at Craigie Bridge.

A large plan was also prepared for use at the hearings, showing portions of Charles and Mystic Rivers, with their channels, depths, etc., and the proposed sewer outlets.

*Milk, Washington, and Beacon Streets Sewer.*

About eighteen hundred feet of this sewer remain unfinished. The sewer is placed at a very low grade and will prove of great efficiency in draining several large tracts of wet land. If continued to West Somerville, it will give an excellent outlet for a sewerage system in that district; by adopting this route the pollution of Alewife Brook by Somerville sewage is avoided. A large plan has been prepared showing the grades above mean low tide of nearly every street in West Somerville, and of Beacon and Washington Streets. It shows the feasibility of the proposed extension.

*Flushing Reservoir.*

The surface of the Pond in the Public Park will be a little below high tide; it can be connected with and filled from Mystic River. With this unfailing source of supply, I suggest its use as a flushing reservoir for cleansing the sewers which may be built in the Park district; its capacity is ample, as it will contain about 138,000 cubic feet of water, enough to fill a sewer five feet in diameter and nearly seven thousand feet long. The cost of the proper connections and gates will be small compared with the advantages derived.

*Sewer Statistics.*

Previous to 1867 there had been built in the town about seven thousand feet of private sewers, but no public ones. Of these about twenty-one hundred feet were purchased by the town in 1869.

Built by the town in 1867 . . . . .	1,254 feet.	Cost \$2,734 66
“ “ “ 1868 . . . . .	5,500 “	“ 9,864 00
“ and purchased by the town in 1869	6,064 “	“ 12,021 44
“ by the town in 1870 . . . . .	18,380 “	“ 49,304 31
“ “ “ 1871 . . . . .	11,937 “	“ 24,042 29
“ by the city in 1872 . . . . .	12,491 “	“ 28,487 50
“ “ “ 1873 . . . . .	13,514 “	“ 61,162 11
“ “ “ 1874 . . . . .	20,768 “	“ 136,567 73
Total . . . . .	89,908 “	\$324,184 04

The foregoing does not include the cost of catch basins or of the maintenance of the sewers.

#### PUBLIC PARK.

In May last a detailed estimate was made of the probable cost of constructing the Park, of which the following is a summary : —

Gravel for filling . . . . .	\$18,226 50
Hauling same and grading . . . . .	35,069 33
Loam and hauling . . . . .	6,556 10
Gravel for walks and grading . . . . .	6,044 25
Grass seed, sowing same and sodding . . . . .	733 60
Paving gutters and pond . . . . .	9,962 50
Curbing for pond . . . . .	3,150 00
Iron fencing . . . . .	18,195 00
Fountains and lamp posts . . . . .	1,525 00
Drains and water pipe . . . . .	2,800 00
Trees and shrubbery . . . . .	1,500 00
Superintendence, engineering, and contingencies . . . . .	4,523 25
	<u>\$108,285 53</u>

Or say \$108,000.00.

The work will probably be completed at a cost much within the estimate, owing to the gift to the city of all the gravel required for filling, to the favorable contract made for hauling and grading, and to the present low prices of labor and materials.

The pond in the Park will contain about one and six tenths acres, and will have an average depth of about two feet, in winter affording a safe resort for skaters. It should have a constant supply of clean water; this can be drawn from the Mystic River during high tide, the pond being below mean

high water. The use of river water presents a double advantage: it is inexhaustible and inexpensive, rendering feasible the use of the pond as a flushing reservoir for sewers, as already recommended.

A large amount of engineering has been required for the Park, viz: Surveys for establishing its boundaries; estimates of its cost; surveys and levels for the same; partial surveys of each of three hundred lots for ascertaining probable betterments; surveys, plans, calculations, and descriptions of thirty-seven lots taken for the park; plans, calculations, specifications, and contracts for filling, pile work, stone work, etc.; surveys, grades, and estimates of earth taken from Convent Hill; lines and grades for filling, for temporary drainage and for the pond; soundings, etc. etc.

#### HEALTH.

For the Committee on Health, surveys, plans, and estimates were made and grades given for filling the low lands south of Oliver Street to grade thirteen feet above mean low tide. Grades were also given for filling eight lots of low land.

The amount of low land filled under the Acts of 1872 and 1873 has been about 47 acres. The amount remaining unfilled, not including flats, is about 330 acres, situated in various parts of the city. The amount of flats within the city limits is about 113 acres.

There are many tracts of low land in the city above the legal grade, but which are flooded at each thaw or freshet; in many cases these can be connected with the nearest sewers at a small expense and with advantage to the sewer, thereby ending a cause of much injury to property and health.

#### WATER.

A plan nine feet by five was nearly completed showing the city, with all the water pipes, hydrants, and gates therein. Lines and grades were given for the partial construction of Packard Avenue, in which the new twelve-inch main

was laid from the Reservoir to Broadway. Grades also were given for pipe or hydrants in Milk, Medford, Oliver, Gilman, and Oxford Streets.

PUBLIC PROPERTY.

A survey and plan were made of the Police Court Lot, grades given, and the building staked out; survey made and grades given, for the Bell School Lot, and surveys of the Tufts Street School Lot, and of the Maple Street School Lot.

OFFICE AND CONCLUSION.

The engineering of the city necessarily requires the services of several assistants, and a large amount of office work has to be performed. The present accommodations for this work are very poor, the office room being small and unfit for its economical performance.

Very respectfully,

CHAS. D. ELLIOT,  
*City Engineer.*

ANNUAL REPORT  
OF  
TRUSTEES OF THE PUBLIC LIBRARY  
OF THE  
CITY OF SOMERVILLE,  
For the Year 1874.

IN BOARD OF MAYOR AND ALDERMEN,

March 8, 1875.

Referred to Committee on Printing with instructions to print the same in the Annual Report; also as many extra copies as the Trustees may designate. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

---

IN COMMON COUNCIL, March 10, 1875.

Concurred in.

SOLOMON DAVIS, *Clerk.*

## THE FREE PUBLIC LIBRARY.

---

IN making their second annual report of the Public Library, the Trustees congratulate their fellow-citizens upon another year of uninterrupted prosperity in its affairs. The universal encouragement given to their labors is very gratifying to those who have had the immediate care of its interests, and leads them to form high hopes of its future usefulness. Having endeavored to place the best books upon its shelves, the Trustees fully believe that no better collection of its size can be found for public use.

The means at their command have enabled them to purchase the choicest publications, as soon as they were issued from the press, thus keeping the patrons of the Library supplied with the freshest books.

When the Library was organized, it was thought best to furnish it with a considerable number of the best works of fiction, in the hope that the taste of the novel-readers might be so improved as to lead them in time to read books of a more solid character. The experience of the past year fully justifies the wisdom of the policy. Many who were attracted to the Library for the purpose of obtaining a novel are now reading books of a different kind. The Librarian reports "that books of travel, adventure, and history are more called for than last year. English History, particularly, has been much read; and at one time, within a few weeks, there was not a complete set on the shelves for reference."

The number of volumes added to the Library since the last report is 823, making the whole number at present 4,730.

Credit balance from 1873 . . . . .	\$2,224 06	
Appropriation for 1874 . . . . .	1,162 29	
Received for catalogues and fines . . . . .	237 59	
Old paper sold . . . . .	75	
Donation from an unknown person . . . . .	2 80	
	<hr/>	\$3,627 49
Expenses for 1874 :		
For purchase of books . . . . .	\$1,680 75	
Salaries . . . . .	897 50	
Incidentals . . . . .	297 13	
	<hr/>	2,875 38
To credit of new account . . . . .		\$752 11

The Trustees would earnestly ask the attention of the City Government to the want of additional accommodations for the Library. Another room is very much needed for a reading-room, and for the extension of the Library, which has already outgrown its present limited quarters. The Trustees venture to hope that the room now used by the Police Court will, in due time, be assigned for Library purposes, and would respectfully request the City Government to take such action as may seem to them best looking towards the fitting up of this room, at no distant time, for the uses of the Public Library.

Respectfully submitted.

JOHN P. MARSHALL.  
AUSTIN BELKNAP.  
CHARLES H. GUILD.  
WILLIAM H. FURBER.  
QUINCY A. VINAL.  
CHARLES G. POPE.  
S. A. CARLTON.

SOLOMON DAVIS, *Clerk.*

# REPORT OF THE OVERSEERS OF THE POOR

OF THE

## CITY OF SOMERVILLE,

*For the Year 1874.*

---

TO HIS HONOR THE MAYOR AND TO THE CITY COUNCIL :

*Gentlemen,*—During the year 1874 the length of time occupied in attending to the duties devolving upon the Overseers of the Poor has probably been greater than that of any previous year. This has been owing mainly to two causes, viz. —

*First.* The increase in the number of the poor, which is usually in a ratio quite equal to the increase in population.

*Second.* To the fact that, owing to the unusual depression in business of all kinds, large numbers of the poorer classes have been unable to find constant employment, even during the summer months.

For these reasons the expense for the support of the poor has been large, although the net expense is less than that of the preceding year. This may be attributed in part to the co-operation with this Board of the Somerville Benevolent Society. The officers and members of that Society, with a liberal and commendable spirit, effected much good in giving employment to women, and in supplying the destitute with clothing. We regret that the Society is not still in active operation. But there is another Society in our city, officered by efficient and energetic ladies, which has been for years, and is still,

performing the part of the Good Samaritan. We cannot too highly commend it to all who wish to contribute judiciously to the welfare of the poor.

Early in the year this Board petitioned the City Council to make arrangements for the employment by the city of those men and boys who were unable to find employment elsewhere, and would be obliged, otherwise, to seek aid and support from the city. The City Council responded by giving employment upon the ledges to this class of persons. Over one hundred persons were employed during the latter part of the winter and early in the spring in quarrying and preparing stone for use on the public streets, at a cost of \$1.00 for each man and 75 cents for each boy per day. A similar plan is now in operation; otherwise the expense of supporting the poor would be greatly increased.

The members of the Board of Overseers of the Poor have, whenever it was in their power, assisted the needy in getting employment, which they have deemed of the highest importance, both to the individual and to the city. And here they wish to say that a very large majority of those who have through their agency been employed in performing work for the city, have acquitted themselves well, not only as workmen, but in using the money which they earned in maintaining their families. Notwithstanding these arrangements for employing men and boys, there is a large class of poor persons, who, on account either of age or sex, cannot be engaged in work requiring exposure to the weather as well as a great degree of muscular strength and endurance. Many of the latter class, could they find employment suited to

their condition, would far prefer it to the humiliation of seeking aid from the Overseers of the Poor.

The individual who will originate and perfect a plan that will give this class employment will richly merit the commendation of all good men.

For some years past, and until within a few months, the sick poor could, whenever deemed advisable, receive board and medical treatment at the Charlestown Almshouse, but after the time of annexation of Charlestown to Boston, the sick were removed to institutions intended solely for that purpose, and orders were issued that no more sick poor should be admitted to that almshouse. We are therefore now without any hospital accommodations. The Board petitioned the City Council of 1874 to provide a suitable building for this unfortunate class, and the matter was referred by them to the City Council of 1875. The Mayor of the city, in his inaugural address, recommended the furnishing of a building with three or four rooms for this purpose. As the matter will therefore come before the City Council again this year, we have every reason to suppose that it will receive a favorable consideration.

An inmate of an Insane Asylum, whose expenses for many years have been borne by the town and city of Somerville, was found to be possessed of real estate of sufficient value to fully remunerate the city for all past expenses on his account; and through the agency of this Board, such legal proceedings have been instituted as will soon, we trust, cause a reimbursement to the city of the total amount expended for his maintenance at the asylum.

Although quite a number of persons have been sent from our city to Insane Asylums during the year, but one of them had a settlement here. The three insane persons who were supported by the city at the time of the last report, and who were supposed to be permanently insane, are still in Insane Asylums. In none of the cases does there seem to be any improvement in the condition.

The contributions to the poor are expended mainly to benefit those who ask for and receive only temporary aid, yet there are a few who depend entirely upon public charity ; and that class, in virtue of the Settlement Law of 1874, will be considerably increased, inasmuch as many persons who previously had no settlement are now, in case of destitution, entitled to relief from our city.

The Board has received semi-official information that the Charlestown Almshouse is soon to be occupied by the poor of Boston exclusively. This change will necessitate the removal of the poor of this city who have been placed in that institution, and consequently accommodations must be sought for elsewhere for our homeless poor. Our plan has been to avoid placing persons in the almshouse who could be comfortably provided for in families at a cost not exceeding the expense at the almshouse. By this plan families have been kept unbroken, and have, in some instances, become entirely self-supporting again. The number of persons placed in the almshouse by this city has therefore been quite limited. It will be the endeavor of the Board to find, if possible, suitable accommodations for all those who cannot be better

provided for elsewhere in the almshouse of some neighboring city or town. Owing to the demands made upon the Board, the present room is found to be inadequate to transact the necessary business, and it is hoped that more suitable accommodations may ere-long be furnished.

During the year 940 persons have received assistance from our city; of this number, 913 received temporary relief or partial support, 9 were fully supported in families, and 18 in the almshouse or other public institutions. Thirteen persons have been removed to the State Almshouse.

The whole amount expended during the year,	
for all purposes, was . . . . .	\$11,311 42
The amount received from the State was . . . . .	430 10
From other cities and towns . . . . .	1,229 16
And from individuals . . . . .	481 25
	<hr/>
Making the net expense . . . . .	\$9,170 91
The amount paid for burial expenses was . . . . .	514 50
And for feeding lodgers at the Police Station . . . . .	203 01

With this brief review of the year just closed, and with increased experience, we enter upon the work of the present year, trusting that we shall receive the co-operation of the City Council in every reasonable effort to relieve the homeless and destitute.

WM. H. FURBER, *Chairman*,

*Overseers of the Poor.*

# ANNUAL REPORT OF THE CITY CLERK.

## STATISTICS OF BIRTHS, MARRIAGES, AND DEATHS IN 1874.

THE statistics of Births, Marriages, and Deaths in the City of Somerville, for the year 1874, are as follows:—

### BIRTHS.

Number of births registered in 1874 . . . . .	1,012	
More than last year . . . . .	289	
Number of males . . . . .	583	
Number of females . . . . .	429	
	1,012	
Born of American parents . . . . .	388	
Born of foreign parents . . . . .	538	
American male and foreign female . . . . .	30	
Foreign male and American female . . . . .	53	
Unknown . . . . .	3	
	1,012	

There were seven cases of twins.

### MARRIAGES.

Number of intentions issued in 1874 . . . . .	216	
More than last year . . . . .	6	
Number of marriages registered . . . . .	193	

### NATIONALITY OF THOSE REGISTERED.

Both parties American . . . . .	91	
Both parties foreign . . . . .	74	
American groom and foreign bride . . . . .	14	
Foreign groom and American bride . . . . .	13	
Unknown . . . . .	1	
	193	

First marriage . . . . .	346	
Second marriage . . . . .	38	
Unknown . . . . .	2	
	<hr/>	386
Number of couples . . . . .	193	= 386
Oldest person married . . . . .	60	
Youngest person married . . . . .	17	

DEATHS.

Whole number of deaths in 1874 . . . . .	490
More than last year . . . . .	65

Ages.		Males.	Females.	Total.
Under 10 . . . . .	283	167	116	283
Between 10 and 20, . . . . .	17	10	7	17
