DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 113013

Mr. Adams A File

TELEPHONE CALL FROM MR. JOHANN OF TOKYO..... 25 November 1950

Reparation

Due to heavy typhoon damage to reparation plants in Osaka area, only a very limited funds available for the rep air of reparation machines and buildings in other Regions.

Only in absolutely necessary cases will Regions approve funds under the provisions of letter of this section dated 22 Sept., 1950, subject: Expenditures funds for maintainance, centralization and repair of buildings of reparation.

This does not preclude the approval of funds for the movement of reparation machine to effect consoldation of storage areas which saves Japanese Government money in the long run.

Control of Nickel

The plan on the control of nickel has been approved by SCAP. However the Japanese Government has not yet ~~xxxxxx~~ completed a price and allocationing control. Includes scrap, reclaimed, or Japanese produced nickel. Not imported.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 113013

HEADQUARTERS
KINKI CIVIL AFFAIRS REGION
APO 15 (Osaka, Honshu)

RAS/hj

29 September 1950

SUBJECT: Maintenance, Centralization of Machines and Repair of Buildings in Reparations Plants

TO : Kinki Liaison & Coordination Office

1. Reference: memorandum from the Civil Property Custodian for the Reparations Agency, Japanese Government, file 387.6 (2 Jun 50)CPC/EX, 11 September 1950, subject: "Expenditure of Funds for Maintenance, Centralization of Machines and Repair of Buildings in Reparations Plants", dated 11 September 1950.

2. Provisions of the memorandum referred to above, and the procedures outlined therein, apply not only to emergency actions necessary as a result of the typhoon of 3 September 1950, but will be applicable to all future requests for government funds to accomplish maintenance, movement of equipment and repair of buildings. Applications will be submitted to this headquarters for action following study by the responsible agency to assure that the request for funds meets all criteria cited in the memorandum and that the requested work is essentially required to properly protect and/or preserve reparations equipment, or that savings to the Japanese Government will be effected as a result of the work.

3. This headquarters will also accept applications for interplant movement of equipment in cases where the movement will be accomplished at no expense to the government, provided that the movement will be within Kinki Region and does not include use of the equipment at the new location. Applications fof movement of equipment to points outside of the Region and for use of the equipment regardless the new location will be submitted to GHQ-SCAP through Japanese channels as in the past.

4. Unanswered applications previously submitted to GHQ-SCAP for intra-regional movement of equipment for non-use purposes at no expense to the government should be resubmitted to this headquarters for action.

1. Reference is made to the following:

a. Memorandum for Reparations Agency, Japanese Government, file 387.6 (2 Jun 50)CPC/EK, 11 September 1950, subject same as above, attached as inclosure 1 hereto.

b. Memorandum for Reparations Agency, Japanese Government, file 387.6 (2 Jun 50)CPC/RP, subject: "Reduction of Custodial Personnel at Reparations Plants."

c. Civil Affairs Operational Directive No. 11, 10 April 1950, subject: "Industry."

2. Civil Affairs Regions will exercise surveillance in accordance with reference 1c above over the implementation of the memorandum for Reparations Agency, Japanese Government, reference 1a above and will approve such applications for funds for maintenance, consolidation, and repair of buildings at reparations plants which after a specific investigation are found to comply with the instructions contained therein.

3. Particular reference is made to paragraph 4 of the memorandum referred in 1a above. Funds available for the reparations budget for fiscal year of 1950 amount to ¥108,718,000 for consolidation purposes, maintenance of machinery and repair of buildings. Inasmuch as these funds are extremely limited, it is mandatory that caution be exercised in approving applications for the use of the funds and that approval be based on a detailed physical inspection of required work.

387.6 (2 Jun 50)CPC/EX 11 SEP 1950

MEMORANDUM FOR: Reparations Agency, Japanese Government

SUBJECT: Expenditure of Funds for Maintenance, Centralization of Machines, and Repair of Buildings in Reparations Plants

1. Reference is made to memorandum for Reparations Agency, Japanese Government, 387.6 (2 Jun 50)CPC/RP, 2 June 1950, subject, "Reduction of Custodial Personnel at Reparations Plants."

2. It is anticipated that as a result of the typhoon of 3 September 1950, the Japanese Government will be receiving numerous applications for funds to repair typhoon damages at reparations plants. In order to expedite approval for encumbrance of necessary funds, applications for funds to repair typhoon damage, and application for funds for maintenance, centralization of machines and repair of buildings directed by Civil Affairs Teams, will be submitted by the local Japanese Government agencies concerened to the appropriate Civil Affairs Team for approval.

3. Funds available for maintenance, consolidation and repair of buildings in the 1950 fiscal year budget for reparations are limited; therefore, expenditure of these funds will be accomplished with the guidance of the following:

a. Maintenance work will be accomplished only on machines whose preservation has served its maximum usefulness and will be accomplished only upon the direction of a Civil Affairs Team.

b. Consolidation of equipment within plants will be effected primarily with a view toward reduction in the number of guards; however, consolidation will be accomplished in preference to repair of damaged buildings housing idle machines when considered more economical. Plant-to-plant consolidation will be effected only between government-owned arsenals and laboratories; privately-owned plants owned by the same company, or between privately-owned plants under separate ownership at the consent of the owners.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115013

c. Repair of buildings will be accomplished only on those buildings housing dead storage equipment. The extent of repair will be limited to the minimum.

d. Funds will not be allocated to plants using 30% or more of reparations equipment. Such plants are responsible for necessary maintenance of idle machines and repair of buildings. Plants using less than 30% of reparations equipment must share in the cost for necessary maintenance and repair of buildings in direct proportion to the amount of equipment used less than 30%. This proportion will be the same as the proportion used in determining the number of guard paid for by plants using less than 30% of reparations equipment as directed in paragraph 7c of memorandum referred to in paragraph 1, above.

e. In order to economize, the various ministries concerned will appoint personnel now on reparations payrolls to supervise local labor on maintenance, consolidation, and repair projects, and will utilize all available materials which were purchased with reparations funds. Applications which include cost for purchase of materials will bear a statement that these materials are not available from reparations stocks.

4. Local Finance, International Trade and Industry, Education, and Transportation Bureaus will be responsible for preparation of applications for maintenance, consolidation, and repair of buildings in reparations plants under their jurisdiction. Each application will include a detailed description of the project to be accomplished and a breakdown estimate of the cost involved. These applications will be submitted to the Chief of the Civil Affairs Team concerned for approval prior to their implementation. Chiefs of the local Ministry Bureaus will be held directly responsible for the contents of each application and they must, therefore, ascertain that such applications submitted to the Civil Affairs Teams are correct and represent a valid request for funds to accomplish necessary work.

CIVIL PROPERTY CUSTODIAN
APO 500

387.6 (8 Feb. 50)CPC/RP 25 Feb. 1950

MEMORANDUM FOR: REPARATIONS AGENCY, JAPANESE GOVERNMENT

SUBJECT: Maintenance, Centralization of Machines, and Repair of Buildings in Reparations plants.

1. Reference is made to letter for Civil Property Custodian, General Headquarters, Supreme Commander for the Allied powers, file R.A.R. No. 64(RA), 8 February 1950, subject, "Application for Encumbrance of Funds for Maintenance of Idle Reparations Machines," from Reparations Agency, Japanese Government.

2. Funds totaling ¥ 62,325,000 have been encumbered for maintenance, centralization of idle machines, and repair of buildings of reparations plants. Expenditure of these funds will be limited as follows:

a. Maintenance work will be conducted only on machines whose preservative has served its maximum usefulness and will not be performed on working surfaces of machines and equipment that are now preserved with heavy grease, light oil, or any other type of preservative which is in good condition. The following table will be used as an example for estimating cost for cleaning and preserving reparations machines:

(1) Unit: 100 point machine (such as a 6' lathe)

(2) Cost of labor: 4 man-hours.....¥ 150.00

(3) Cost of material (if not furnished by Japanese Government):

Item	Quantity	Unit Price	Total
Kerosens	1 litre	¥ 16.35	¥ 16.35
Machine Oil	1 litre	55.59	55.59
Grease	1 kg	114.08	47.13
Rags	1.5 kg	31.42	22.85
Soap & others			
Total			256.00

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(4) Miscellaneous (overhead) 4.00

(5) Grand Total ¥410.00

b. Note that in the example above, anti-corrosive paper and abrasives, such as emery cloth and sandpaper, were omitted. This omission is in accordance with the desires of the Office of the Civil Property Custodian. The use of abrasives is detrimental to machined surfaces and the use of anti-corrosive paper is considered an unnecessary expense, since the preservative provides ample protection. Paper in stock which could be used to cover a machine entirely should be expended, but this, too, is an unnecessary expense and no further purchase of paper for this purpose will be made.

c. Centralization of equipment within plants will be effected primarily with a view toward reduction in the number of guards; however, centralization may also be accomplished in preference to repair of damaged buildings housing idle machines when considered more economical. Plant-to-plant consolidation will be effected only between government owned arsenals and laboratories, provided that consolidation will result in overall reduction in custody cost.

d. Repair of building will be conducted only on those buildings housing dead storage equipment. The extent of repair will be limited to the minimum.

e. Funds will not be allocated to plants using 30% or more of reparations equipment. Such plants are responsible for necessary maintenance of idle machines and repair of buildings.

f. In order to economize, the various ministries concerned should appoint personnel now on reparations payrolls to supervise local labor on maintenance, centralization, and repair projects, and should utilize all available materials which were purchased with reparations funds. The use of supervisors would preclude the necessity of hiring a contractor who would have to be assured a profit for his services.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

3. Local Finance, International Trade and Industry, Education, and Transportation Ministry bureaus will be responsible for preparation of applications for maintenance, centralization of idle machines, and repair of buildings in reparations plants under their jurisdiction. Each application will include a detailed description of the project to be accomplished and a breakdown estimate of the cost involved. These applications will be submitted to the Chief of the Civil Affairs Region concerned, or to the Commander, United States Naval Forces, Far East, for plants under his surveillance, for approval prior to their implementation. The ¥ 62,325,000 encumbered, includes the cost of maintenance, centralization of equipment, and building repair projects initiated during the 1949-1950 fiscal year, for which funds have not been encumbered and which are to be completed by the end of the fiscal year 1950, or within a reasonable period thereafter. No other funds will be encumbered for these projects. Of the encumbered amount, no more than ¥ 1,000,000 may be utilized toward administrative expenses.

4. It is requested that the Reparations Agency, Japanese Government, notify the appropriate Japanese Government agencies to accomplish necessary maintenance, centralization of idle machines, and repair of buildings in reparations plants at the earliest possible date, and that upon completion a cost report of each project accomplished be submitted to the Civil Property Custodian, General Headquarters, Supreme Commander for the Allied Powers.

E.C. MILLER, Jr.
Colonel, Infantry
Deputy Custodian.

387.6 (2 Jun 1950)CPC/RP

GM/dms
2 June 1950

MEMORANDUM FOR: REPARATIONS AGENCY, JAPANESE GOVERNMENT

SUBJECT: Reduction of Custodial Personnel at Reparations Plants

1. Reference is made to:

a. Directive Number 3(SCAPIN 47), 22 September 1945, no subject, Office of the Supreme Commander for the Allied Powers.

b. Memorandum for Japanese Government, file AG 004(20 Jan 46)ESS/GD, SCAPIN 629, 20 January 1946, subject, "Custody, Control and Protective Maintenance of Japanese Aircraft Plants, Arsenals and Laboratories"

c. Memorandum for Japanese Government, file AG 387.6 (20 Sep 46) ESS/IN, SCAPIN 1219, 20 September 1946, subject, "Responsibilities of Imperial Japanese Government for Preservation and care of Plant's Equipment and Records Taken Into Custody for Reparations Purposes by the Supreme Commander for the Allied Powers."

2. It is directed that all custodians and assistant custodians on Japanese Government payroll at reparations plants be discharged, effective immediately.

3. It is also directed that privately owned plants under reparations custody be relieved of the current obligation which makes retention of custodians at reparations plants mandatory.

4. Custodial inventories and records heretofore maintained by plant custodians will be maintained in the case of nonoperating plants, by the regional or prefectural Japanese Government agency concerned, which will have original records available at each plant in the custody of the chief guard; and in the case of operating plants, by the management concerned. The responsibility for keeping all such documents secure, coordinated, current, accurate, properly authenticated, and readily available within each plant for examination by inspectors representing the Supreme Commander for the Allied Powers will continue to rest with the Japanese Government.

5. Generally, there is an excess in the number of guards at reparations plants. This is due, among others, to the following reasons:

a. The criteria which have been established and applied in the past were not generally adequate in determining the minimum number of guards consistent with actual security requirements at individual plants, and with the realities of public finance.

b. Reparations funds in payment for excess guards have been used in a number of cases both as an indirect government subsidy to assist private plants, and as a social measure for unemployment relief.

C-O-P-Y

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

c. Reductions in plant areas under reparations custody effected through consolidation and/or scrapping of equipment and subsequent release of land and buildings have not always been accompanied by appropriate reductions in guard personnel, and in other custodial costs, as had been intended and made feasible by such reductions.

6. Changes in operating status of reparations plants occur from time to time, requiring in most instances, changes in number of guard personnel. Thus, a fully operating plant which currently is permitted no guards paid out of reparations funds, will require an appropriate complement of guards as soon as operation ceases; whereas a plant which is presently idle will, from the time it begins operation, be subject to a reduction of elimination of guard personnel who are paid out of reparations funds.

7. Effective immadiately, appropriate changes in the number of guard personnel for reparations plants as required by changes in operating status of plants, or as otherwise required or justified, will be accomplished with the guidance of the following principles and criteria:

a. Criteria heretofore used in determining the number of guard posts required for reparations plants will be revised to include consideration of all factors that affect security, or make maintenance of security difficult, at individual plants. Therefore, in addition to considering the total items of inventoried machinery and equipment at a plant, the total point values represented by them, and the total floor space of the plant, consideration will also be given to the following:

(1) The nature and value of the plant reparations equipment

(2) The number, disposition, type and condition of the buildings containing reparations equipment

(3) The size and character of plant area or areas under custody, and the nature of protective inclosure, if any

(4) The existence of firms, institutions, or installations adjacent to plant which constitute a potential fire hazard, such as saw mills, woodworking plants, etc

(5) The existence of undesirable social conditions and forces, and of non-law-abiding groups, in areas adjacent to a reparations plant, such as widespread unemployment, poverty and social unrest, pirates, thieves operating in gangs, etc

(6) Any other factor that has pertinent relation to the security of a plant.

b. In determining the number of guards to be employed at non-operating plants, the following will be used as a guide:

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

C-O-P-Y

387.6 (2 Jun 1950) CPC/RP 2 Jun 1950
Subj: Reduction of Custodial Personnel at Reparations Plants

(1) In the case of nonoperating government-owned arsenals, Table 1, attached as Inclosure 1, which is based on the 24-hour shift system, and which lists the maximum number of guards to be employed in order to provide a given number of guards on alert duty night and day, at all times. This maximum may be lowered where the arsenal concerned is able to make mutual, cooperative arrangements with guards of a plant or plants located within, or immediately adjacent to its compound.

(2) In the case of nonoperating private plants, the maximum number of guards to be employed out of reparations funds for alert duty night and day, at all times, will be three guards per guard post required, plus an adequate number of relief guards. Relief guards are normally limited to one per six guards or fraction thereof employed for a 24 hour period. Thus, the transfer of funds by the Japanese Government to the owner of a nonoperative private reparations plant for the employment of guards for two guard posts should enable that owner to employ seven guards, and on the 8-hour shift system, to have a minimum of two guards on alert duty at any time, night and day, at all times. This maximum may be lowered where the plant is very small, and/or has resident guards.

c. Operating reparations plants must share the custody costs with the Japanese Government. The following principles will govern the payment of guards for operating plants from reparations funds:

(1) Where 30% or more of the equipment of a reparations plant is in use, the plant will pay for all guards necessary for adequate security.

(2) Where less than 30% of the equipment is in use, but where the items in use are key items of the central facility or facilities of the plant, that plant will be regarded as using more than 30% of the equipment, and will pay for all guards necessary to the security of the reparations facility.

(3) Where less than 30% of the equipment is in use, the using agency will not pay for all guards, but must share in the cost of custody in direct proportion to the amount of equipment used less than 30% (Example: A plant 15% in operation requiring 20 guards would pay for 10 guards.), except where, on the basis of the criteria as listed in Par 7a, the employment of additional guards paid from reparations funds is justified.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(4) Where a plant which is in 30%, or more than 30%, operation, has a nonoperating main plant, or a dispersal area located in a completely separate geographical area, such a main plant or dispersal area will be treated as an independent plant, and provided with an appropriate complement of guards paid out of reparations funds. However, where the non-operating main plant or dispersal area of an operating plant is located in the same custodial area, or adjacent thereto, no guards paid out of reparations funds will be furnished, except where, as in the case of some private plants, the nonoperating plant is under separate ownership, or where the nonoperating plant has a considerable amount of reparations equipment occupying an extensive floor area, and/or consists of a number of widely separate buildings, or otherwise should, under criteria as listed in Par 7a, be supplied guards from reparations funds.

(5) Integrated facility plants, such as caustic soda plants, iron and steel plants, shipbuilding plants, precision bearing plants, machine tool plants, etc, which are in operation, and which have a key facility, or an important part of a key facility or facilities in operation, will pay for all guards.

(6) The fact that an operating plant is paying for all or part of the guards does not excuse such plants from maintaining adequate security.

8. A report of the actual number of guards to be paid from reparations funds for each plant under reparations custody will be submitted not later than 15 June 1950 by prefectural and regional Japanese Government agencies of the Ministries of Finance, International Trade and Industry, Transportation, and Education to the Regional Civil Affairs Team concerned for approval. Report will also list information for each plant as follows:

a. Plant code number

b. Plant name and address

c. Number of guards paid from reparations funds as of thirty days after the date of this memorandum

d. Number of guards paid by operating plant funds as of thirty days after the date of this memorandum

e. Number of custodial personnel paid from reparations funds as of 1 April 1950

f. Number of custodial personnel paid by operating plant funds as of 1 April 1950.

MEMORANDUM FOR: Reparations Agency, Japanese Government

SUBJECT: Expenditure of Funds for Maintenance, Centralization of Machines, and Repair of Buildings in Reparations Plants

1. Reference is made to memorandum for Reparations Agency, Japanese Government, 387.6 (2 Jun 50)CPC/RP, 2 June 1950, subject, "Reduction of Custodial Personnel at Reparations Plants."

2. It is anticipated that as a result of the typhoon of 3 September 1950, the Japanese Government will be receiving numerous applications for funds to repair typhoon damages at reparations plants. In order to expedite approval for encumbrance of necessary funds, applications for funds to repair typhoon damage, and applications for funds for maintenance, centralization of machines and repair of buildings directed by Civil Affairs Teams, will be submitted by the local Japanese Government agencies concerned to the appropriate Civil Affairs Team for approval.

3. Funds available for maintenance, consolidation and repair of buildings in the 1950 fiscal year budget for reparations are limited; therefore, expenditure of these funds will be accomplished with the guidance of the following:

a. Maintenance work will be accomplished only on machines whose preservation has served its maximum usefulness and will be accomplished only upon the direction of a Civil Affairs Team.

b. Consolidation of equipment within plants will be effected primarily with a view toward reduction in the number of guards; however, consolidation will be accomplished in preference to repair of damaged buildings housing idle machines when considered more economical. Plant-to-plant consolidation will be effected only between government-owned arsenals and laboratories, privately-owned plants owned by the same company, or between privately-owned plants under separate ownership at the consent of the owners.

c. Repair of buildings will be accomplished only on those buildings housing dead storage equipment. The extent of repair will be limited to the minimum.

d. Funds will not be allocated to plants using 30% or more of reparations equipment. Such plants are responsible for necessary maintenance of idle machines and repair of buildings. Plants using less than 30% of reparations equipment must share in the cost for necessary maintenance and repair of buildings in direct proportion to the amount of equipment used less than 30%. This proportion will be the same as the

Subj: Expenditure of Funds for Maintenance, Centralization of Machines, and Repair of Buildings in Reparations Plants

Proportion used in determining the number of guards paid for by plants using less than 30% of reparations equipment as directed in paragraph 7c of memorandum referred to in paragraph 1, above.

e. In order to economize, the various ministries concerned will appoint personnel now on reparations payrolls to supervise local labor on maintenance, consolidation, and repair projects, and will utilize all available materials which were purchased with reparations funds. Applications which include cost for purchase of materials will bear a statement that these materials are not available from reparations stocks.

4. Local Finance, International Trade and Industry, Education, and Transportation Bureaus will be responsible for preparation of applications for maintenance, consolidation, and repair of buildings in reparations plants under their jurisdiction. Each application will include a detailed description of the project to be accomplished and a breakdown estimate of the cost involved. These applications will be submitted to the Chief of the Civil Affairs Team concerned for approval prior to their implementation. Chiefs of the local Ministry Bureaus will be held directly responsible for the contents of each application and they must, therefore, ascertain that such applications submitted to the Civil Affairs Teams are correct and represent a valid request for funds to accomplish necessary work.

AG 387.6 (20 Sept 46) ESS/IN
(SCAPIN - 1219)

MEMORANDUM FOR: THE IMPERIAL JAPANESE GOVERNMENT

THROUGH : Central Liaison Office, Tokyo

SUBJECT : Responsibilities of Imperial Japanese Government for Preservation and Care of Plants' Equipment and Records Taken Into Custody for Reparations Purposes by the Supreme Commander for the Allied Powers

1. Reference is made to memorandum for the Imperial Japanese Government from Supreme Commander for the Allied Powers dated 28 May 1946 (SCAPIN - 987), subject: "Custody, Control and Protective Maintenance of Japanese Aircraft Plants, Arsenals and Laboratories," together with inclosures and annexes thereto subsequently issued by the Supreme Commander, and to memoranda dated 13 August 1946 (SCAPIN - 1029, 1030, 1031, 1032, 1033, 1034 and 1036).

2. The Imperial Japanese Government will be responsible for the servicing and repair of machinery, equipment and accessories including auxiliary equipment, at each plant listed in custodial directives to the Imperial Japanese Government cited above to the extent that such servicing and repair is possible without the substantial purchase of replacement parts.

3. The servicing and repair referred to in paragraph 2, above will include the inspection and testing of existing mechanical equipment, and the assembly of accessories, without extensive replacement purchases, with a view to putting each item of equipment in good opera ing condition and facilitating its ready use when moved to anothe site. Basically the necessary servicing and repair should be performed by competent mechanics associated with the particular plant and should use only materials, parts, etc., available within the plant or readily available elsewhere. Care should be taken to retain an adequately skilled labor or maintenance force to avoid damage by personnel unfamiliar with equipment.

4. The Imperial Japanese Government will be responsible for the assembly and maintenance in good condition at each plant of such data, amplified below, as are domestically obtainable or as can be prepared in the respective establishments designated in custodial directives cited in paragraph 1. Instruction for perparation of technical data necessary for reparations transfers and not obtainable as specified will be given at a later date.

5. The informational data referred to in paragraph 4, above, will in general include:

a. Plant layout.

b. Engineering data, including working drawings, blueprints and instruction booklets relating to the installation, operation, maintenance and disassembly of all pieces of plant equipment.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

c. A record of major production difficulties encountered with equipment and the meansof solution.

d. Other data that may be useful in the dismantling, moving, re-erection and operation of the facility.

6. Special Instruction for Industrial Categories: In addition to the general requirements set forth in the two preceding paragraphs, the following types of data are to be assembled and held available:

a. Ball and Roller Bearing Plants: Engineering data, specifications and blueprints of types and sizes of bearings produced, chemical and physical spedifications of special steels used.

b. Thermal Electric Power Plants:

(1) Records pertaining to construction, such as fourdation plans, arrangement drawings, and detailed drawings of equipment.

(2) Facilities for which servicing is to be performed and data maintained include not only equipment installed in buildings but also yard equipment such as coal handling facilities, outdoor stitchgear and transformers; also special instruments and tools required for operation and maintenance.

c. Chemical Industries (Sulfuric Acid, Soda Ash, Chlorine and Caustic Soda):

(1) Plant flow diagrams in block and line form showing: Operations, schematic equipment arrangements, elevations, all rates and directions of flow, temperatures pressures, material bilances, and recording points.

(2) Detailed operating procedure of plant, giving explicitt instructions on start-up and shut down, including control methods and performance curves of equipment.

(3) Technical and safety data on storage and handling of products.

(4) Existing records showing consumption and production of principal materials shall be preserved.

d. Other industries: For other industries covered by custody directives cited, no special instructions, additional to paragraphs 4 and 5, above, are deemed necessary. This applies to:

(1) Aircraft.

(2) Government Arsonals.

(3) Scientific Laboratories.

(4) Machine Tools.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

(5) Priavately-Owned Munitions,

(6) Shipyards.

(7) Iron and Steel.

7. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Govarnmen will have qualified representatives report to the Commnading Gneral, Eighth United States Army to receive detailed instructions to accomplish the purpose of this memoramdum.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

CIVIL PROPERTY CUSTODIAN
APO 500

387.6 (2 Jun 1950)CPC/RP 2 June 1950

MEMORANDUM FOR: REPARATIONS AGENCY, JAPANESE GOVERNMENT

SUBJECT: Reduction of Custodial Personnel at Reparations Plants

1. Reference is made to:

a. Directive Number 3 (SCAPIN 47), 22 September 1945, no subject, Office of the Supreme Commander for the Allied Powers

b. Memorandum for Japanese Government, file AG 004(20 Jun 46) ESS/GD, SCAPIN 629, 20 January 1946, subject, "Custody, Control and Protective Maintenance of Japanese Aircraft Plants, Arsenals and Laboratories"

c. Memorandum for Japanese Government, file AG 387.6 (20 Sep 46) ESS/IN, SCAPIN 1219, 20 September 1946, subject, "Responsibilities of Imperial Japanese Government for Preservation and Care of Plant's Equipment and Records Taken into Custody for Reparations Purposes by the Supreme Commander for the Allied Powers."

2. It is directed that all custodians and assistant custodians on Japanese Government payroll at reparations plants be discharged, effective immediately.

3. It is also directed that privately owned plants under reparations custody be relieved of the current obligation which makes retention of custodians at reparations plants mandatory.

4. Custodial inventories and records heretofore maintained by plant custodians will be maintained in the case of none operating plants, by the regional or prefectural Japanese Government agency concerned, which will have original records available at each plant in the custody of the chief guard; and in the case of operating plants, by the management concerned. The responsibility for keeping all such documents secure, coordinated, current, accurate, properly authenticated, and readily available within each plant for examination by inspectors representing the Supreme Commander for the Allied Powers will continue to rest with the Japanese Government.

5. Generally, there is an excess in the number of guards at reparations plants. This is due, among others, to the following reasons:

a. The criteria which have been established and applied in past were not generally adequate in determining the minimum number of guards consistent with actual security requirements at individual plant and with the realities of public finance.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

b. Reparations funds in payment for excess guards have been used in a number of cases both as an indirect government subsidy to assist private plants, and as a social measure for unemployment relief.

c. Reductions in plant areas under reparations custody effected through consolidation and/or scrapping of equipment and subsequent release of land and buildings have not always been accompanied by appropriate reductions in guard personnel, and in other custodial costs, as had been intended and made feasible by such reductions.

6. Changes in operating status of reparations plants occur from time to time, requiring, in most instances, changes in number of guard personnel. Thus, a fully operating plant which currently is permitted no guards paid out of reparations funds, will require an appropriate complement of guards as soon as operation ceases; whereas a plant which is presently idle will, from the time it begins operation, be subject to a reduction or elimination of guard personnel who are paid out of reparations funds.

7. Effective immediately, appropriate changes in the number of guard personnel for reparations plants as required by changes in operating status of plants, or as otherwise required or justified, will be accomplished with the guidance of the following principles and criteria:

a. Criteria heretofore used in determining the number of guard posts required for reparations plants will be revised to include consideration of all factors that affect security, or make maintenance of security difficult, at individual plants. Therefore, in addition to considering the total items of inventoried machinery and equipment at a plant, the total point values represented by them, and the total floor space of the plant, consideration will also be given to the following:

(1) The nature and value of the plant reparations equipment

(2) The number, disposition, type and condition of the buildings containing reparations equipment

(3) The size and character of plant area or areas under custody, and the nature of protective inclosure, if any

(4) The existence of firms, institutions, or installations adjacent to plant which constitute a potential fire hazard, such as saw mills, woodworking plants, etc.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

(5) The existence of undesirable social conditions and forces, and of non-law-abiding groups, in areas adjacent to a reparations plant, such as widespread unemployment, poverty and social unrest, pirates, thieves operating in gangs, etc.

(6) Any other factor that has pertinent relation to the security of a plant.

b. In determining the number of guards to be employed at non-operating plants, the following will be used as a guide:

(1) In the case of nonoperating government-owned arsenals, Table 1, attached as Inclosure 1, which is based on the 24-hour shift system, and which lists the maximum number of guards to be employed in order to provide a given number of guards on alert duty night and day, at all times. This maximum may be lowered where the arsenal concerned is able to make mutual, cooperative arrangements with guards of a plant or plant located within, or immediately adjacent to its compound.

(2) In the case of nonoperating private plants, the maximum number of guards to be employed out of reparations funds for alert duty night and day, at all times, will be three guards per guard post required, plus an adequate number of relief guards. Relief guards are normally limited to one per six guards or fraction thereof employed for 24-hour period. Thus, the transfer of funds by the Japanese Government to the owner of a non-operative private reparations plant for the employment of guards for two guard posts should enable that owner to employ seven guards, and on the 8-hour shift system, to have a minimum of two guards on alert duty at any time, night and day, at all times. This maximum may be lowered where the plant is very small, and/or has resident guards.

c. Operating reparations plants must share the custody costs with the Japanese Government. The following principles will govern the payment of guards for operating plants from reparations funds:

(1) Where 30% or more of the equipment of a reparations plant is in use, the plant will pay for all guards necessary for adequate security.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(2) Where less than 30% of the equipment is in use, but where the items in use are key items of the central facility or facilities of the plant, that plant will be regarded as using more than 30% of the equipment, and will pay for all guards necessary to the security of the reparations facility.

(3) Where less than 30% of the equipment is in use, the using agency will not pay for all guards, but must share in the cost of custody in direct proportion to the amount of equipment used less than 30% (Example: A plant 15% in operation requiring 20 guards would pay for 10 guards.), except where, on the basis of the criteria as listed in Par 7a, the employment of additional guards paid from reparations funds is justified.

(4) Where a plant which is in 30%, or more than 30%, operation, has a nonoperating main plant, or a dispersal area located in a completely separate geographical area, such a main plant or dispersal area will be treated as an independent plant, and provided with an appropriate complement of guards paid out of reparations funds. However, where the nonoperating main plant or dispersal area of an operating plant is located in the same custodial area, or adjacent thereto, no guards paid out of reparations funds will be furnished, except where, as in the case of some private plants, the nonoperating plant is under separate ownership, or where the nonoperating plant has a considerable amount of reparations equipment occupying an extensive floor area, and/or consists of number of widely separate buildings, or otherwise whould, under criteria as listed in Par 7a, be supplied guards from reparations funds.

(5) Integrated facility plants, such as caustic soda plants, iron and steel plants, shipbuilding plants, precision bearing plants, machine tool plants, etc., which are in operation, and which have a key facility, or an important part of a key facility or facilities in operation, will pay for all guards.

(6) The fact that an operating plant is paying for all or part of the guards does not excuse such plants from maintaining adequate security.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

8. A report of the actual number of guards to be paid from reparations funds for each plant under reparations custody will be submitted not later than 15 June 1950 by prefectural and regional Japanese Government agencies of the Ministries of Finance, International Trade and Industry, Transportation, and Education to the Regional Civil Affairs Team concerned for approval. Report will also list information for each plant as follows:

a. Plant code number

b. Plant name and address

c. Number of guards paid from reparations funds as of thirty days after the date of this memorandum

d. Number of guards paid by operating plant funds as of thirty days after the date of this memorandum

e. Number of custodial personnel paid from reparations funds as of 1 April 1950

f. Number of custodial personnel paid by operating plant funds as of 1 April 1950

387.6 (8 Feb 50)CPC/RP 25 February 1950

MEMORANDUM FOR: REPARATIONS AGENCY, JAPANESE GOVERNMENT

SUBJECT: Maintenance, Centralization of Machines, and Repair of Buildings in Reparations Plants

1. Reference is made to letter for Civil Property Custodian, General Headquarters, Supreme Commander for the Allied Powers, file R.A.R. No. 64 (RA), 8 February 1950, subject, "Application for Encumbrance of Funds for Maintenance of Idle Reparations Machines," from Reparations Agency, Japanese Government.

2. Funds totaling ¥ 62,325,000 have been encumbered for maintenance, centralization of idle machines, and repair of buildings of reparations plants. Expenditure of these funds will be limited as follows:

a. Maintenance work will be conducted only on machines whose preservative has served its maximum usefulness and will not be performed on working surfaces of machines and equipment that are now preserved with heavy grease, light oil, or any other type of preservative which is in good condition. The following table will be used as an example for estimating cost for cleaning and preserving reparations machines:

(1) Unit: 100 point machine (such as 6' lathe)

(2) Cost of labor: 4 man hours.....¥ 150.00

(3) Cost of material (if not furnished by Japanese Government):

Items	Quantity	Unit Price	Total
Kerosene	1 litre	¥ 16.35	¥16.35
Machine Oil	1 litre	55.59	55.59
Grease	1 kg	114.08	114.08
Rags	1.5 kg	31.42	47.13
Soap & others			22.85
Total			256.00

(4) Miscellaneous (overhead) 4.00

(5) Grand Total ¥410.00

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115015

b. Note that in the example above, anti-corrosive paper and abrasives, such as emery cloth and sandpaper, were omitted. This omission is in accordance with the desires of the Office of the Civil Property Custodian. The use of abrasives is detrimental to machined surfaces and the use of anti-corrosive paper is considered an unnecessary expense, since the preservative provides ample protection. Paper in stock which could be used to cover a machine entirely should be expended, but this, too, is an unnecessary expense and no further purchase of paper for this purpose will be made.

c. Centralization of equipment within plants will be effected primarily with a view toward reduction in the number of guards; however, centralization may also be accomplished in preference to repair of damaged buildings housing idle machines when considered more economical. Plant-to-plant consolidation will be effected only between government owned arsenals and laboratories, provided that consolidation will result in overall reduction in custody cost.

d. Repair of buildings will be conducted only on those buildings housing dead storage equipment. The extent of repair will be limited to the minimum.

e. Funds will not be allocated to plants using 30% or more of reparations equipment. Such plants are responsible for necessary maintenance of idle machines and repair of buildings.

f. In order to economize, the various ministries concerned should appoint personnel now on reparations payrolls to supervise local labor on maintenance, centralization, and repair projects, and should utilize all available materials which were purchased with reparations funds. The use of supervisors would preclude the necessity of hiring a contractor who would have to be assured a profit for his services.

3. Local Finance, International Trade and Industry, Education, and Transportation Ministry bureaus will be responsible for preparation of applications for maintenance, centralization of idle machines, and repair of buildings in reparations plants under their jurisdiction. Each application will include a detailed description of the project to be accomplished and a breakdown estimate of the cost involved. These applications will be submitted to the Chief of the Civil Affairs Region concerned, or to the Commander, United States Naval Forces, Far East, for plants under his surveillance, for approval prior to their implementation. The ¥ 62,325,000 encumbered, includes the cost of maintenance, centralization of equipment, and building repair projects initiated during the 1949-1950 fiscal year, for which funds have not been encumbered and which are to be completed by the end of the fiscal year 1950, or within a reasonable period thereafter.

Subj: Maintenance, Centralization of Machines. and Repair of Buildings in Reparations Plants

No other funds will be encumbered for these projects. Of the encumbered amount, no more than ¥ 1,000,000 may be utilized toward administrative expenses.

4. It is requested that the Reparations Agency, Japanese Government, notify the appropriate Japanese Government agencies to accomplish necessary maintenance, centralization of idle machines, and repair of buildings in reparations plants at the earliest possible date, and that upon completion a cost report of each project accomplished be submitted to the Civil Property Custodian, General Headquarters, Supreme Commander for the Allied Powers.

21 October 1949

MEMORANDUM FOR: REPARATIONS BOARD, JAPANESE GOVERNMENT

SUBJECT: Procedures for Securing Funds for Maintenance Work

1. Reference is made to memorandum for Reparations Board, Japanese Government, 387.6 (22 Jun 49)CPC/RP, 22 June 1949, subject, "New Standards for Maintenance of Reparations Machines and Equipment in Dead Storage," from General Headquarters, Supreme Commander for the Allied Powers, Civil Property Custodian.

2. Whenever maintenance is requested by Eighth Army or Commander, United States Naval Forces, Far East, in accordance with the reference memorandum, the procedure for securing funds shall be as follows:

a. The custodian of the plant in which maintenance was requested will submit full information pertaining to the needed maintenance requirements, together with an estimate of the cost of labor and materials and forward same to the appropriate district office.

b. The appropriate district office will make a careful check of the requirements and the cost estimate and make any necessary adjustments.

c. The district office will submit copies of the information and estimates compiled to the appropriate Civil Affairs Team.

d. The papers will then be forwarded to the Reparations Board, Japanese Government, Tokyo.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115015

e. The Reparations Board will forward a copy of these papers to the appropriate ministry, which will check the cost and make any necessary adjustments.

f. Papers will then be returned to the Reparations Board, which will forward them to the Civil Property Custodian.

g. The Civil Property Custodian reserves the right to investigate and make any necessary adjustment in the request and to approve or disapprove the application.

h. If the application is approved, the necessary funds will be encumbered and a notice of such encumbrance will be sent to the Japanese Reparations Board, which in turn will notify the Finance Ministry to release the funds in the amount approved. Funds set aside for maintenance work will not be encumbered or disbursed without such approval.

3. In the case of regular maintenance work, the above procedure will be followed; however, in the case of emergencies, such as typhoon, flood, fire, earthquake, the custodian may initiate the application without a request from the appropriate Civil Affairs Team. In other respects the foregoing procedure will apply.

Reparation

CIVIL PROPERTY CUSTODIAN
APO 500

387.6 (22 Jun 49)CPC/RP 21 OCT. 1949

MEMORANDUM FOR: REPARATIONS BOARD, JAPANESE GOVERNMENT

SUBJECT : Procedures for Securing Funds for Maintenance Work

1. Reference is made to memorandum for Reparations Board, Japanese Government, 387.6 (22 Jun 49)CPC/RP, 22 June 1949, subject, "New Standards for Maintenance of Reparations Machines and Equipment in Dead Storage," from General Headquarters, Supreme Commander for the Allied Powers, Civil Property Custodian.

2. Whenever maintenance is requested by Eighth Army or Commander, United States Naval Forces, Far East, in accordance with the reference memorandum, the procedure for securing funds shall be as follows:

a. The custodian of the plant in which maintenance was requested will submit full information pertaining to the needed maintenance requirements, together with an estimate of the cost of labor and materials and forward same to the appropriate district office.

b. The appropriate district office will make a careful check of the requirements and the cost estimate and make any necessary adjustments.

c. The district office will submit copies of the information and estimates compiled to the appropriate Civil Affairs Team.

d. The papers will then be forwarded to the Reparations Board, Japanese Government, Tokyo.

e. The Reparations Board will forward a copy of these papers to the appropriate ministry, which will check the cost and make any necessary adjustments.

f. Papers will then be returned to the Reparations Board, which will forward them to the Civil Property Custodian.

F.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

g. The Civil Property Custodian reserves the right to investigate and make any necessary adjustment in the request and to approve or disapprove the application.

h. If the application is approved, the necessary funds will be encumbered and a notice of such encumbrance will be sent to the Japanese Reparations Board, which in turn will notify the Finance Ministry to release the funds in the amount approved. Funds set aside for maintenance work will not be encumbered or disbursed without such approval.

3. In the case of regular maintenance work, the above procedure will be followed; however, in the case of emergencies, such as typhoon, flood, fire, earthquake, the custodian may initiate the application without a request from the appropriate Civil Affairs Team. In other respects the foregoing procedure will apply.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

PRECEDURE FOR APPLICATION FOR AUTHORIZED USE ON REPARATION'S EQUIPMENTS

9 Oct.,49. - An official in the Ehime Prefecture,in charge of Reparation's Equipments,came in applying for permission for "Authorized Use".

The recent O/D,however,seems as though to indicate that application of this nature is to be filed directly by the Japanese goverment.

To be doubly certain,however,got in touch with the Shikoku Liaison Adjsutment Office to verify on the point,they explain,x based on the document they have on hand,reparation's plants now can file application directly to the International ~~Commerce~~ Trade and Industry Ministry for them to reforward to the Reparation Board with recommendation which then will be submitted to C.P.S.,SCAP.

To prefectural government,the plants are only obligated to submit a copy of such application who in turn will submit the same to the local regional liaison adjustment office for them to pin recommendation for reforwarding to the central government agency. It was further added that therefore, the Ken's role,as far as the reparation program is concerned,is made faint, and that they will no longer have the amount of work which they have had heretofore;merely paying wages to the custodian,and no more.

At any rate,it will become necessary for us to decide whether we shall accept such applications or we tell plants to take up directly thru Japanese channel.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

(Translation)

Notification for; Governor

From : Chief of Procurement and Reparation Department of the Trade and Industry Ministry.

Subject : Maintenance Expenditure and New Standards for Maintenance and Security of Reparations Machines and Equipment.

24 KI-CHO No 239 June 20, 1949.

It is directed by GHQ, SCAP, though the Reparation Board, in and after the second quarter of this year to curtail the maintenance expenditure and to revise its maintenance standards as stated in attached sheets. According to the directive the standards of the maintenance and security of the machine and equipment in dead storage are to be made so simple that they will be reft as they are for a long period of time to come. As a result, the maintenance expenditure will be curtailed to a considerable extent. You are directed to make a contact with the reparation plants under your jurisdiction so as the latters will get every thing ready for moving into the new standards as follows;

1) Reconditioning of machines and equipment now in process will be completed by June 30, and after that no reconditioning will be performed.
2) Thought the machines and equipment must be now well maintained and well preserved with grease, oil and other type of preservative, so that they may be maintained in their present condition for a long time to come, every thing shall be checked up once again so as they are all in a completely good condition.
3) Those ones, which are prohibited by the Military Government Team to be preserved with grease and are now preserved only with machine oil, shall be preserved with grease so as they may be maintained for a long time to come.
4) No expenditure will be appropriated particularly for the above mentioned purposes. But the plants are directed immediately to submit opplication for such materials as oil and other items to be needed for those purposes.
5) The governor will be informed of the payment standards of the maintenance expenditure for the execution of the new maintenance standards as soon as they will be established. However, from now on the payees are to be limited to a custodian and very few clerks(and no clerk in case of a small plant, two clerks in case of a big plant) in each plant and guards of the plants not in operation.
6) Being supposed that some number of reparation personnel may have to be discharged as long as they will prove to be unnecessary, each plant will pay a carefull attention so that there will be no case of violation of the Labor Standard Lows.

ECONOMIC SECTION

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

I. Arsenals, aircrafts and private munitions.
   A. Plants not in operation.
      1. The maintenance and security shall be performed and paid for by the Japanese government from the Reparations Maintenance Budget.
      2. Each plants shall submit a cost estimate of maintenance and security for approval.
   B. Plants having A.U.
      1. The maintenance and custody shall be performed and paid for by the company or companies using the plant and equipment.
      2. Where more than one company is operating in one plant, the work to be performed shall be divided in accordance with the area occupied and the items of equipment used by the company.
      3. When only a small percentage of the equipment contained in the plant is used, an area will be assigned to each company commensurate with the area used by each company and each company will perform all maintenance and security within the area thus assigned. The Japanese Government shall perform all maintenance and security for the remaining area.
      4. A custodian shall be stationed at each plant and be paid for by the Japanese Government from the Reparations Maintenance budget to see that all requirement of maintenance and security are adequately accomplished.
      5. Each plant shall submit a cost estinate of all cost that is chargeable to the Reparations Maintenance Budget for approval.

II. All other plants under reparations custody.
   A. Plants not in operation.
      1. The maintenance and security shall be performed and paid for by the Japanese Goverfnemtn from the Reparations Maintenance Budget.
      2. Each plant shall submit a cost estimate of maintenance and security for approval.
   B. Plants in operation.
      1. The maintenance and security shall be performed by the company or companies using the plant and equipment.
      2. A custodian shall be stationed at each plant and be paid for by the Japanese Government from the Reparations Maintenance Budget to see that all requirements of maintenance and security are adequately accomplished.
      3. Each plant shall submit a cost estimate of all cost that is chargeable to the Reparation Maintenance Budget which should be the cost of the custodian only.

effective 1 July.

CO, Kinki Military Government Region, APO 25
CO, Kyushu Military Government Region, APO 24-5
CO, Shikoku Military Government Region, APO 1050

Forwarded herwwith for your information is a quotation from a letter from GHQ on funds for payment of custody and maintenance of reparations facilities.

"1. The Japanese Government, under strict supervision of Supreme Commander for the Allied Powers, has recently revised its standards of payment for maintenance and custody of reparations plants; these standards have been effective since 1 April 1949. Reduction of personnel will be accomplished under the new point system because the number of personnel per set number of points has been reduced. The point system is not based on a minimum number of employees per point integral but on a maximum allowable number of employees per allotted index points. Variations in plants due to minimum or optimum conditions of maintenance are expected. In formulating standards for payment the external deviations from the norm cannot be taken into account. The policy for paymant is set up for the greatest number of plants approaching a statistical mean. The deviations from the mean must be adjusted by local military government and Japanese Government prefectural authorities as local conditions warrant.

2. Funds for the payment of reparations facilities are paid on the basis of total index points; however, in approving standards for disbursement of reparations payments the Japanese Government is now required to audit expenses periodically at each reparations plant and also to audit the funds paid to the Prefectural Government for reparations expenses. Any funds in excess of the amount actually used for salaries and other approved expenses must be returned to the Central Reparations Account.

3. The Japanese Government has been directed to submit copies of the new set of standards to local military government team commanders; these standards should be reviewed and adjustments made for plants that are not specifically embodied in them."

Funds for the payment of reparations facilities are paid on the basis of total index points; however, in approving standards for disbursement of reparations payments the Japanese Government is now required to audit expenses periodically at each reparations plant and also to audit the funds paid to the Prefectural Government for reparations expenses. Any funds in excess of the amount actually used for salaries and other approved expenses must be returned to the Central Reparations Account.

3. The Japanese Government has been directed to submit copies of the new set of standards to local military government team commanders; these standards should be reviewed and adjustments made for plants that are not specifically embodied in them."

MEMORANDUM FOR: REPARATIONS BOARD, JAPANESE GOVERNMENT

SUBJECT: New Standards for Maintenance of Reparations Machines and Equipment in Dead Storage

1. Effective immediately, the Japanese Government is directed to revise its maintenance standards of reparations equipment in dead storage as follows:

a. It is no longer required to maintain machines and equipment in operable condition.

b. Non-working surfaces of machines and equipment stored under cover will remain in their present condition without further expenditure of materials.

c. Working surfaces of machines and equipment that are now preserved with heavy grease, light oil, or any other type of preservative, will remain in their present condition. Preservatives on working surfaces will not be replaced unless Eighth Army or Commander Naval Forces, Far East, believes that the preservative has served its maximum usefulness. At such time only, these preservatives will be replaced by the most economical non-corrosive preservative available which will last the longest period of time. In the future, the practice of using paper in conjunction with preservatives to protect working surfaces is to be discontinued.

d. Exposed surfaces of equipment which are preserved with waterproof paint and are stored in outdoor locations will remain in their present condition. Repainting of such surfaces will be authorized only upon direction of representatives of Eighth Army or Commander Naval Forces, Far East.

e. The using agency will be responsible for cleaning and applying preservatives to machines and equipment to be returned to dead storage from authorized use status.

2. The number of reparations personnel in reparations plants will be reduced to conform with the above maintenance requirements. The pay scale for remaining personnel is not affected by the above revisions.

Mr. Larsen

Believe we have no other alternative than to approve this request in view of the circumstances. This will make a total of six guards.

A

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

Application for increase of guards for Reparations Equipments.

A

From: Chief of Shikoku Finance Bureau.

Date: 15 Sep 50.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 15013

Shi-Zai-Kan 2-315
1 September '50

To; Shikoku Civil Affairs Region
From; Chief, Shikoku Finance Bureau

Re; Application for approval for increase of guards at reparations designated area.

1. Name, code no. and address of the reparations area.

Name; Ohmishima Oil Storage Area
Code No.; 02-12
Address; Iguchi, Mariguchi-mura, Oshi-gun, Ehime-ken.

2. No. of additional guards to be paid from the reparations funds. 3

3. Reason for the above.

The above reporations area is situated on the coast of Ohmishima Island which is two hours and a half from Imabari City. And, there we have three guards on duty who have been paid out of our administrations funds.

Since the illegal intrusion of the area by a few Koreans in the past and recent occurrence of robbery case on the nearby island, we have especially been on top of our alertness in guarding the area. Nevertheless, at last in two times on 21st and 24th August, three stop-values which are accessories to the equipments stored in the area were found stolen.

So, with cooperation of a local police-man our guards have been investigating whereabouts of the culprit and the stolen articles, but have found nothing yet.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 15015

Since occurrence of the above incident, the said three guards have been exercising their utmost alertness and especially keeping a close lookout at night. But, because they are short of hands they will surely get exhausted soon and the present tensity can not be kept up very long.

Meanwhile, local police stationed in the above village is only one, and increase of police force in the area, according to the Headquarters, Elkime N.R.P., can hardly be expected at present due to stringent limit on authorized no. of police personnel. Thus, we cannot expect much of the help from police.

To the future, however, we still have fears that such incident as above may occure again, and we think it is of necessity for us to increase at this time, our guards in the area and make the guarding force really strict.

Re ; Report on robbery case occured in the reparations designated area.

1. Name, code No. and location of the area robbed.
Name ; Ohmishima Island Oil Storage Area
Code No. ; 05-12
Location ; Iguchi, Moriguchi-mura, Ochi-gun, Ehime-Ken.

2. Name and quantity of items robbed ;
10-inch stop-value ..... 3 (code No. 05-12-333, 334, 335)

3. Circumstances ;

A.) The three guards stationed in the Ohmishima area ~~had~~ had especially been concerned with their duty ever since the outbreak of the Korean incident. Nevertheless, when exercising 8 a.m. patrol on 21 Aug., the guard found out a stop-valve (05-12-334) missing from its place. So, he immediately contacting the nearby police-box, searched all around the area to find nothing like such. As there was a robbery case accured recently on the neighboring island, we kept a strict guard oder the area conducting a night-long patrol throughout that night till morning. It is indeed a matter for regret that we couldn't detect anything unusual due to utter darkness.

B.) After the above incident, we moved the remaining two stop-values (05-12-333, 335) into the pump-room and kept them locked in to avoid further robbery. But, again on the morning 24 August, when conducting the 4 a.m. patr the guard found the lock to the pump-i

torn open and the two stop-valves stored there had been gone. The guard, immediately informing the Marizuchi-mura Police-box, searched the area to find nothing as yet.

4. Measures so far taken ;

A.) The three guards in the area are exercising night-long lookout with cooperation of one local police-man.

B). On 26 August, the Finance Bureau's local branch office in Matsuyama talked to the Headquarters, Ehime N.R.P. and asked for the latter's help for hereafter. The answer of the police was, "We will do help you as vigorously as we can, but because our personnel situation is as tight as ever, increase of policeman for this particular incident will be hard to be expected. In view of this, we hope the Finance Bureau will take measures to strengthen the guarding of the area."

C). Mr. Kato, chief of State Property 2nd Section of the Matsuyama Local Branch Office and Mr. Tsunakura of the Regional Bureau called on the Civil Affairs Office and made a in-a-hurry verbal report on the subject incident.

5. Countermeasures ;

A.) Put three additional guards in the area and strengthen the guarding force.

B.) Keep a close contact with the N.R.P. and continue investigation of the missing articles.

C.) To await direction of G.H.Q. or the Ministry of Finance for appropriate disposition of the case.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

SHIKOKU FINANCE BUREAU

22 July, 1950

To : Commanding Officer, Shikoku Civil Affairs Region

From : Director, Shikoku Finance Bureau

Subject: Application for the increase of custodial personnel at reparation plant

1. Name (Code No.) and Location of the plant where the designated reparation machinery actually exist.

Name (Code No.): Kurashiki Aircraft Co., Ltd., Sakaide Plant 17-06(3), 17-08.

Location : 3,800 Sakaide-cho, Sakaide-shi, Kagawa-ken

2. Number of guards paid from reparations funds as of 1 July 1950 : One(1)

3. Number of guards paid from reparation funds as of 1 August 1950 : Three (3)

4. Necessity for increase of guards

Thirteen (13) machines, belonging to ex-military and navy arsenals, (17-06(3), 17-08), have been kept in custody in the said plant as well as forty three (43) machines, belonging to itself (17-01).

It is expected that the said 43 machines will be moved to Kawanishi Aircraft Co., Ltd., Shikoku Office, Yaso-cho, Tokushima-shi, within this month, and the expenses of guards therefere will be suspended in payment by Kagawa prefectural government on and after 1 August.

Therefore, it is deemed necessary to increase the guards up to three for the said 13 machines from 1 August through the time when they will be exempted from reparations items in accordance with the attached application.

7 August 1950

SUBJECT: Guards at Sakaide Plant,
Kurashiki Aircraft Co. Ltd.

TO : Chief, Shikoku C.A. Region.

Sir:

We had a plan of discharging all guards at Sakaide Plant, Kurashiki Aircraft Co. Ltd. by removing or scrapping all machines there within July.

Since, however, authorization has not been granted us as yet for removing and scrapping the remaining five (5) machines and ten (10) machines respectively, we are obliged to continue to employ one (1) guard there for those machines until the authorization is given us.

It is requested, therefore, that you will kindly give us approval of our employing one (1) guard at the said plant for the time being.

Respectfully yours,

M. Kaneko
