# REPORT ON OPERATION for June of 1948

To the Shiga Military Government Team, Otsu,
thru the Shiga Pref. Government, Otsu.

Dated: June 24th, 1948

| Descriptions: | Types: | Quantity: | Amount in Yen: |
|---|---|---|---|
| SEWING MACHINES | 15 kinds, 83 pattern | 250 sets | Yen 1,738,750.00 |

---

OPERATION CONDITION: 1) Harder as we have exerted outselves for this month in order to recover the preceding insufficient product, we could get ~50 sets for this month fortunately. Of course we would not feel any 100% satisfaction out of this turnover, and yet we can form a better future in our planning.

Occasionally the electric supply stopped due to lack of rains and the socalled 'Summer crises' and we still see no mush rainfalls, showing a cute electric condition for the present.

2) No better effect on the regular supplies in the burning cokes, pig irons and painting materials as ever, plus the abovementionned electric trouble confronting now, we see no much bright future now---such are our present shortcomings after all. Only recently we discovered a considerable less ration in the oils and fats for machineries, which prevents our medium makers from furthering a better condition.

RECOMMENDABLE SUGGESTIONS for Improvement:

Due mainly to the cute loan given by the city bankers and also to the unsteady treatment of economic plans on the part of our Government, our necessary capital is getting dried which must be readjusted quickly. We, the medium and small makers in this line, feel quite desperate in finding the economic 'ぺこぺこ empty Stomach' nowadays, a fatal obstacle in the promotion of our activities.

Yasuo Takeuchi, pres.
CHIYODA SANGYO CO. LTD, Hakone Unit.

Subject : Additional Application of Machines and Equipments for Authorized use.

An additional application of machines and equipments for authorized use was transmitted to us from a specified Reparation factory, and we deem that the present numbers of machines and equipments authorized to use in the said factory are not sufficient enough and the factory is meeting difficulties for manufacturing its products.

Under such circumstances we shall be very much obliged if you would kindly pay your special consideration on the additional application.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

To:

The General Headquarters for the Allied Powers, Tokio

thru the Shiga Military Government Team, Otsu, Shiga Pref.

Dated March 14th, 1948

From: CHIYODA SANGYO COMPANY LIMITED,
Hikone-city, Shiga Prefecture.

RELATING TO THE APPLICATION FOR EXEMPTION OF OUR MACHINERIES OUT OF THE REPARATIVE DIRECTIVES.

The abovementioned Chiyoda Sangyo KK was originally organized in 1936 under the private workshop 'Oshita Tekkojo' in the city of Nagoya (Aoikemachi, Nagoya) for the purpose of manufacturing machine parts for the Sewing Machines. They had more than 1 dozen buyers for their productions then, including Osaka Angel Machine Co., Yamaoka Machine Co., Ikari Machine Co. and others in the cities of Osaka, Nagoya and others.

During the years of 1936, 1937 and 1938, they engaged in sole manufacturing of Sewing-machine-parts only, or 100% fully only in this line and not else.

When the Chinese-Japanese Affairs became serious, they had to accept, much against their will, to manufacture some munition parts in 1939. It was quite clear that they had never received any order from army or navy directly in their new manufacturing; the company was compelled to accept orders, as subcontractors, from such large companies as Toyoda Shokki KK, Hisakado Iron Works, Yamada Boshokuki KK, and Hirano Seisakusho and many others, who ordered them to make simpler munition parts---thus the Co. earned wages just to pay same to their factory-workers then.

INCL-1

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

During the year of 1940, the company found the Aichi Tokei Denki KK as their parent-Co., thus severing connections with the Toyoda, Hisakado, Yamada and other companies- -they only worked for the Aichi Tokei Denki's interest.

The Hikone plant of this Company was being established as evacuating factory in the year of 1945, but before it was completed, the war was over---from September of this year, they started manufacting Sewingmachine parts again.

The Co. has factory workers 800 in number, their operative percentage is now 94%; here they manufacture 250 units of the superior Sewing Machines a month, and in the latter part of 1948, they intend completing 300 sets a month, and during the coming 1949, 500 units a month they are having plan of increasing production.

The Co. has various inconvenlences involved thru the Reparative directives, for the economic uncertainty causes the fatal obstacle for their active production.

The undersigned appeals to you, therefore, to be kind enough to exempt this plant out of the Reparative objects, in referring to the attached lists, such as:

1) List of statistic, showing the productions of Sewingmachine parts and munition parts.

2) Certificates issued by the companied concerned.

# REPORT on the 1947 - Productions:

Productive Reports:

From Jan.till Apr.1947----Entering the winter frozen season, when the electric supply was too worse, we had to change our factory-hours from daytime to nightwork, and yet the prospected production could not have been realized; during those four months, the productive power was minimum when compared to the other seasons.

From May till Aug.1947----Hanging up the plan of 200 sets production per month, we exerted ourselves to the utmost by increasing our factory workers, and still the real quantity was only 150 units a month.

Some influence caused by the summer electric scarcity, but the main reason was that the raw materials could not follow the demand. The main part of this difficulty was involved in the Reparative directives; because of this directives, the economicsupport was quite insufficient thruout the season, which was the fatal to the less production.

From Sept.till Dec.1947----With the new effort given towards the end of this year, we tried our very best in every branch of our work, and yet, the electric supply had come to the worse condition, and the other difficulties, such as Day-

and-Night work changing, less materials coming in, etc.

Still, we paid our utmost attention to the increase of our production.

After all, our whole-year-round plan met various obstacles throughout this year and we had to experience bitterly. The economic aid has been tightly closed to our works, because of the Reparative Directives, even though we tried our very best in raising money enough to realize our 1947-plans.
