Stocks of leaf tobacco, by types and groups of grades - - - - -	5-12
Stocks of Burley tobacco, by groups and qualities - - - - -	13
Stocks of leaf tobacco, by types, converted to a farm-sales-weight equivalent - - - - -	14
Conversion factors for adjusting for losses in weight - - - - -	15
Production, stocks, supply, disappearance, and price, of specified types - - - - -	16-19
Stocks of leaf tobacco, by types, showing separately quantities owned by dealers and manufacturers - - - - -	20
Stocks of leaf tobacco, summary by types - - - - -	21

EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:

A-Wrappers  
B-Leaf and smoking leaf  
C-Cutters  
X-Lugs and primings  
S-Scrap  
N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:

A-Wrappers  
B-Heavy leaf  
C-Thin leaf  
X-Lugs  
S-Scrap  
N-Nondescript

GROUPS OF TYPE 31:

A-Wrappers  
B-Bright leaf, red leaf and tips  
C-Lugs and cutters  
X-Trash and flyings  
S-Scrap  
N-Nondescript

GROUPS OF TYPE 32:

B-Heavy leaf or dull crop  
C-Thin leaf or bright crop  
X-Seconds and ground leaves  
S-Scrap  
N-Nondescript

GROUPS OF TYPES 35, 36, and 37:

A-Wrappers  
B-Heavy leaf  
C-Thin leaf  
X-Lugs  
S-Scrap  
N-Nondescript

GROUPS OF TYPE 41:

B-Binders or tops  
C-Fillers (farm wrappers)  
X-Stemming grades  
Y-Farm fillers or ground leaves  
S-Scrap  
N-Nondescript

GROUPS OF TYPES 42, 43, and 44:

C-Fillers (farm wrappers)  
X-Stemming grades  
Y-Farm fillers or ground leaves  
S-Scrap  
N-Nondescript

GROUPS OF TYPE 46:

C-Superior  
X-Inferior  
Y-Defectuosos  
S-Scrap (Picadura)  
N-Nondescript

GROUPS OF TYPES 51, 52, and 53:

A-Wrappers  
B-Binders, seconds and brokes  
C-Fillers and short darks  
X-Stemming grades  
Y-Sand-leaf fillers or ground leaves  
S-Scrap  
N-Nondescript

GROUPS OF TYPES 54 and 55:

B-Binders  
C-Fillers  
X-Stemming grades  
Y-Sand-leaf fillers or bottom leaves  
S-Scrap  
N-Nondescript

GROUPS OF TYPE 56:

B-Binders  
C-Fillers  
X-Stemming grades  
Y-Ground leaves  
S-Scrap  
N-Nondescript

GROUPS OF TYPES 61 and 62:

A-Wrappers  
B-Stout wrappers and binders  
C-Fillers or tips  
X-Filler brokes  
S-Scrap  
N-Nondescript

GROUPS OF TYPES 81, 82, and 83:

A-Wrappers  
C-Fillers  
S-Scrap

October 1 Holdings at Low Level;  
Indicated Domestic Consumption of Most Products Down;  
Shipments to Armed Forces Substantially Larger

Stocks of all types <sup>1/</sup> of leaf tobacco owned by dealers and manufacturers in continental United States and on the Island of Puerto Rico on October 1, 1944, <sup>2/</sup> totaled 2,360,045,000 pounds, as reported by the War Food Administration. This is about 142 million pounds, or 5½ percent, below the 2,501,822,000 pounds reported on October 1, 1943, and the lowest October 1 stocks since 1939. Stocks were about 23 million pounds above those reported on July 1, the increase being due principally to the addition of a substantial part of the 1944 flue-cured crop. A total of around 518 million pounds, mostly flue-cured but including some Maryland and cigar-leaf, had entered stocks in the July-September quarter through sales. Last year about 463 million pounds were sold during the third quarter.

Revenue stamp sales for cigarettes and snuff, which recently reached an all-time high, fell during the July-September quarter below sales for the comparable quarter a year ago, and reports of manufactures indicate that consumption of the chewing tobacco products was greater than for the same period last year. Data on products withdrawn tax-free direct from factories and from sea store warehouses for shipment to American and allied forces in foreign countries show that, compared with last year, about double the volume of cigarettes and three times as many cigars are being shipped. Tax-free withdrawals of other manufactured products, however, are only about one-half as great as those of last year.

Stocks in the hands of dealers were reported as 253,657,000 pounds on October 1, 1944, about 10.7 percent of the total stocks reported for the quarter. This tobacco may include some which is earmarked for sale to domestic manufacturers or for export. Manufacturers' stocks were reported as 2,106,388,000 pounds, 89.3 percent of the total. Included in this latter amount is tobacco held under dealer registries of manufacturers and tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. Also included in this category are stocks purchased under agreement with the Commodity Credit Corporation which are earmarked for export and not actually available to domestic manufacturers. On October 1, 1944, CCC stocks were reported as about 185 million pounds, of which 181 million were flue-cured.

---

<sup>1/</sup> Figures quoted for type totals in this summary are the sums of unstemmed and stemmed leaf, as reported. Tables in the body of the report show stocks in detail, subdivided according to recognized groupings; stocks on a farm-sales-weight basis; and stocks owned by dealers and manufacturers, separately.

<sup>2/</sup> The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the War Food Administration, specify that the report shall be made as of the opening of business on the first day of each quarter.

Domestic Cigarette Leaf Stocks Down 7 Percent;  
Foreign-grown Holdings Higher,

Stocks of flue-cured tobacco on October 1 totaled 1,178,083,000 pounds, compared with 1,266,930,000 pounds on the same date a year earlier,-- a decrease of about 89 million pounds, or 7 percent. Of the flue-cured types, Type 11 was reported as 311,047,000 pounds; Type 12, as 410,882,000 pounds; Type 13, as 314,255,000 pounds, and Type 14, as 141,899,000 pounds. Flue-cured stocks reported on October 1 were about 173 million pounds above those reported on July 1. Flue-cured leaf entering stocks through auction sales during the season up to October 1 totaled 502.7 million pounds.

Burley holdings reported by dealers and manufacturers on October 1 were 559,542,000 pounds, about 5 percent below holdings of this type reported on October 1 a year ago. Maryland stocks were 41,194,000 pounds on October 1, as compared with 43,825,000 pounds held on the same date last year. October 1 stocks were higher than those reported on July 1. About 11.6 million pounds of Maryland leaf of the 1943 crop entered stocks during this quarterly period.

Stocks of foreign-grown cigarette and smoking tobacco (Turkish and other) were about  $8\frac{1}{2}$  million pounds higher than on October 1 a year ago, when dealers and manufacturers held the smallest quantity of this type ever reported in the 15 years of the series. October 1, 1944, holdings totaled 64,907,000 pounds, as compared with 56,390,000 pounds on the same date a year ago.

Indicated consumption of cigarettes, based on tax-paid withdrawals, totaled 62.6 billion for the July-September quarter of 1944, which is a decrease of 9 percent from the record high consumption of 69.1 billion indicated for the comparable quarter in 1943. These tax-paid withdrawal figures, however, are not an accurate indication of the volume of cigarettes actually produced by the manufacturing concerns throughout the country, since they do not take into account the increasingly larger quantities of this product which are being withdrawn, without payment of tax, direct from factories and from sea store warehouses, and destined for American and allied military forces at sea and overseas.

Dark Tobacco Stocks Reported Lower;  
Indicated Snuff Consumption Down

Stocks of fire-cured tobacco in the hands of dealers and manufacturers on October 1, 1944, totaled 163,045,000 pounds, as compared with 168,875,000 pounds reported a year ago,--a decrease of about  $3\frac{1}{2}$  percent. Of the total fire-cured tobacco reported, 24,587,000 pounds were Virginia, Type 21; 101,698,000 pounds, Eastern District of Tennessee and Kentucky, Type 22; 36,633,000 pounds, Western District, Type 23; and 127,000 pounds, Henderson Stemming, Type 24.

Dark air-cured holdings were over 7 million pounds below stocks reported October 1, 1943. Dealers and manufacturers showed 50,813,000 pounds of these types on hand on October 1, of which 25,653,000 pounds were Type 35, One Sucker; 22,502,000 pounds, Type 36, Green River, and 2,658,000 pounds, Virginia Sun-cured. With the single exception of Type 37, stocks of all types of fire-cured and dark air-cured tobacco on hand October 1, 1944, were lower than a year ago.

Production of fire-cured and dark-air-cured tobacco reached a record low level in 1943, when the crops totaled 65 and 30 million pounds, respectively. This represented in each case a decrease of more than 75 percent from the highest recorded production for the two classes.

Following an indicated consumption which was record-high for the fiscal year ending June 30, 1944, snuff withdrawals for the July-September quarter were more than a million pounds under those for the same quarter a year ago. Revenue stamp sales were reported at 9.1 million pounds for the 3-month period, as compared with 10.3 million pounds covered for the corresponding quarter last year. The July withdrawals of 2.6 million pounds were the smallest reported for nearly 10 years.

Decreases in consumption of manufactured tobacco (chewing and smoking combined) were still indicated for the July-September quarter, with sales of revenue stamps covering 64.5 million pounds--the lowest figure ever recorded for this quarterly period. Although the July withdrawals of 18.8 million pounds approached the monthly record-low level reported for April of this year, the August and September figures showed a substantial increase, bringing indicated consumption up to its highest point since November 1943. Reports of manufacturers of plug chewing tobacco show that production is still high, but tending to level off. Although the July figure indicated considerable decrease in the amount manufactured, production for August was slightly above that of the same month a year ago. Data on production of smoking tobacco, based on manufacturers' reports to the Internal Revenue Bureau, indicate that consumption of this product continued at a low level for the first half of the year. However, the figures for August, the last month for which data are available, show an upward trend and reach a point just slightly under those reported for the same month in 1943. The quantities of manufactured tobacco (chewing and smoking) and snuff withdrawn without payment of tax are indicated as about half the volume withdrawn last year.

Stocks of Most Cigar-Leaf Types Lower Than a Year Ago;  
Indicated Domestic Cigar Consumption at Low Point;  
Manufacture of Scrap Chewing at High Level

Total stocks of domestic cigar-leaf tobacco were about 280 million pounds on October 1, 1944, as compared with over 293 million pounds on hand a year earlier. Types 56 and 62 show increases over the July 1 quarter, as the bulk of these types is delivered from July to September. Approximately 3 million pounds of Type 62 and an estimated 200 thousand pounds of Type 56 entered stocks during the quarter.

Of the cigar-filler types, totaling 166,599,000 pounds on October 1, 1944, Type 41, Pennsylvania Seedleaf stocks, were reported as 94,048,000 pounds; Type 42, Gebhardt, 17,498,000 pounds; Type 43, Zimmer, 10,641,000 pounds; Type 44, Dutch, 4,736,000 pounds; and Type 46, in the United States, 18,446,000 pounds, and in Puerto Rico, 21,230,000 pounds.

Cigar-binder stocks in the hands of dealers and manufacturers on October 1 1944, totaled 99,828,000 pounds. Connecticut Broadleaf, Type 51, stocks were reported as 19,213,000 pounds; Connecticut Havana Seed, Type 52, as 21,206,000 pounds; New York and Pennsylvania Havana Seed, Type 53, as 1,873,000 pounds; Southern Wisconsin, Type 54, as 29,753,000 pounds; Northern Wisconsin, Type 55, as 27,178,000 pounds; and Georgia and Florida Sun-grown, Type 56, as 605,000 pounds.

Of the total cigar-wrapper stocks reported, amounting to 13,613,000 pounds, 7,607,000 pounds consisted of Type 61, Connecticut Shade-grown, and 6,006,000 pounds of Type 62, Georgia and Florida Shade-grown.

On October 1, 1944, stocks of all types of foreign-grown cigar-leaf tobacco totaled 21,148,000 pounds, about a million pounds under reported holdings on the same date a year earlier. Of the total reported, 17,313,000 pounds were Cuba (Havana); 3,534,000 pounds, Sumatra and Java; 157,000 pounds Philippine Islands (Manila), and 144,000 pounds, Other Foreign-grown cigar-leaf not otherwise classified.

Figures on tax-paid withdrawals of large cigars for the July-September quarter are the lowest ever recorded for this quarterly period. These withdrawals were reported as 1,180.4 million, which indicated that domestic consumption was 8 percent under that of the corresponding quarter last year, when withdrawal figures stood at 1,278.6 million. Sales of revenue stamps in July, covering 356.6 million cigars, indicated the lowest monthly consumption since December 1939. This decrease in revenue stamp sales for cigars as a whole for the quarter was brought about by lower withdrawals in the 3 lowest priced classes only (those cigars manufactured to retail at not more than 6 cents), while the trend in the higher-priced classes continued upward. Withdrawals of those classes of cigars selling at more than 6 cents - Classes D, E, F, and G - show percentage increases of 50, 74, 66, and 228 percent respectively, over the July-September quarter a year ago.

This shift indicates a change in consumer habits, which is partly accounted for by increased incomes during the war period, and the consequent turning toward higher-priced commodities. But another and probably more important element entering into the change is the fact that with the higher prices being paid for leaf, and with the labor situation in a critical state, manufacturers cannot afford to produce the lower-priced products. As in the case of cigarettes, these tax-paid figures do not accurately indicate consumption; increasingly greater quantities of cigars are being withdrawn tax-free for shipment abroad to fulfill military requirements.

Manufactures of scrap chewing tobacco continue at a high level. Fiscal year figures were reported at 52.9 million pounds, compared with 50.9 million manufactured the previous year--an increase of 4 percent. Production in August, the last month for which data are available, totaled over 5 million pounds. In only two other months during the last decade have manufactures of this product exceeded this figure.

Stocks of Miscellaneous Domestic leaf were reported as 1,273,000 pounds, as compared with 1,792,000 pounds on hand a year ago. Type 71, Eastern Ohio, stocks were 115,000 pounds; Type 72, Perique, 547,000 pounds; and Type 73, Other Miscellaneous Domestic, 611,000 pounds. Stocks of all miscellaneous domestic types were lower than a year ago, October 1.

1/ Subject to revision.

2/ See supplementary Burley report on page 13.

3/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

\* Revisions in July 1 report.

1/ For factors used in converting weights, see table 4. October 1 figures subject to revision.

2/ For explanation of stocks included in this classification, see footnote 3 on page 12

3/ No conversion was made of unstemmed stocks.

\* Revisions in July 1 report.

**Table 4** -- Conversion factors for adjusting for losses in weight incident to stemming, handling, sweating, and drying, all types of tobacco

Type	U.S. type number	Factors to multiply by to convert weights	
		Stemmed stocks to unstemmed equivalent	Unstemmed stocks to farm-sales weight
Flue-cured	11-14	1.282	1.12
Virginia fire-cured	21	1.299	1.18
Eastern District fire-cured	22	1.316	1.04
Western District fire-cured	23	1.316	1.04
Henderson Stemming	24	1.316	1.125
Burley	31	1.351	<u>1/</u> 1.11
Southern Maryland	32	1.351	1.02
One-Sucker	35	1.429	1.09
Green River	36	1.316	1.13
Virginia sun-cured	37	1.316	1.13
Pennsylvania Seedleaf Gebhardt	41	1.387	1.11
Zimmer	42	1.370	1.12
Dutch	43	1.401	1.13
Puerto Rican	44	1.418	1.115
	46	1.275	1.17
Connecticut Broadleaf	51	1.292	1.07
Connecticut Havana Seed	52	1.299	1.07
New York and Pennsylvania Havana Seed	53	1.364	1.135
Southern Wisconsin	54	1.300	1.06
Northern Wisconsin	55	1.333	1.085
Georgia and Florida sun-grown	56	1.275	1.245
Connecticut shade-grown	61	1.224	1.135
Georgia and Florida shade-grown	62	1.205	1.16
Miscellaneous Domestic	71-73	<u>2/</u> 1.333	<u>2/</u> 1.09
Foreign-grown cigar-leaf	81-84	<u>2/</u> 1.205	<u>3/</u>
Foreign-grown cigarette and smoking tobacco	90	<u>2/</u> 1.205	<u>3/</u>

1/ Beginning April 1940, factor changed from 1.12 to 1.11 to take into account lower redrying losses.

2/ Tentative factor.

3/ Factor has not been established.

Table 5 .- Production, stocks, supply, disappearance, and price of specified types, 1939-44 1/ - Cont'd.

CONNECTICUT SHADE-GROWN, TYPE 61

Year	Production	Stocks Oct. 1 <u>2/</u>	Total supply	Disappearance year begin- ning Oct. 1.	Average price per pound
	Million pounds	Million pounds	Million pounds	Million pounds	Cents
1939.....	8.6	7.7	16.3	6.5	66.0
1940.....	5.5	9.8	15.3	7.4	83.0
1941.....	6.4	7.9	14.3	6.3	113.0
1942.....	5.6	8.0	13.6	6.0	150.0
1943.....	6.3	7.6	13.9	<u>3/</u> 5.2	165.0
1944.....	<u>4/</u> 7.6	<u>3/</u> 8.7	<u>5/</u> 16.3		

1/ Types shown this quarter are those in which October 1 stocks are used in determining disappearance. Disappearance is calculated as follows: Production for any given year, for example, 1943, plus stocks on October 1, 1943, equals total available supply for the year beginning October 1, 1943. This supply figure minus stocks on hand on October 1 the following year (October 1, 1944) equals the disappearance for the year, or from October 1, 1943 to September 30, 1944.

2/ Farm-sales weight.

3/ Subject to revision.

4/ November 1 estimate.

5/ Preliminary.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of The Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis. Figures are as reported to date; no revisions of this table will be made.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registriss of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown in the manufacturers' column also include stocks purchased under agreement with the Commodity Credit Corporation which are earmarked for export and are not actually available to manufacturers; these stocks are reported as approximately 185 million pounds, 181 million of which consist of flue-cured. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ For explanation of stocks included in this classification see footnote 3 on page 12

5/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

Table 7 -- Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, October 1, 1944, compared with other quarters 1/

Type name	U.S. : : type : : number :			October 1, 1944 2/			July 1, : 1944 :	Oct. 1, : 1943 :	July 1, : 1943 :

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco, (b) manufacturers who in the first three quarters of 1943, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

2/ Subject to revision.

3/ For explanation of stocks included in this classification see footnote 3 on page 12

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

\* Revisions in July 1 report.
