## ORNAMENTAL TREES AND PLANTS.

Ornamental Trees, First Class .....	44	Herbaceous flowering plants .....	78
Second " .....	47	Medicinal and culinary plants .....	
Flowering Shrubs .....	49	Hemerocallis, or Day Lily .....	77
Evergreens .....	55	Honeysuckles .....	59
Auriculas .....	78	Iris, or Fleur de Louis .....	76
Camellia japonica, Japan Rose .....	91	Pæonies .....	70
Carnations .....	72	Pinks .....	74
Chrysanthemums .....	75	Polyanthus .....	77
Cowslips .....	77	Primroses .....	77
Dahlia .....	91	Roses .....	61
Hawthorn quicks, and others, for hedges .....	40	Vines and Creepers .....	58

## ABBREVIATIONS

ATTACHED TO THE NAMES OF FRUITS.

- P** denotes those described in Prince's Treatise on Fruits, or Pomological Manual.  
**M** " those described in the London Pomological Magazine.  
**L** " those described in Lindleys Guide, &c.  
**R** " those described in Ronald's Pyrus Ma.us Brentfordiensis.  
**V** " those from the collection of Professor Van Mons.  
**A** " American native varieties.

## CURSORY REMARKS.

The Proprietors in tendering their new Catalogue with *reduced prices*, desire to state that their Fruit and Ornamental Trees, &c. are of *large size and vigorous growth*, and superior to any before offered to the public. The Establishment contains at the present period *more than a million of Trees and Plants*, and the Proprietors are willing to enter into arrangements of the most liberal description both as to prices and credit with all such persons as desire large quantities of Trees, &c. and with those proprietors of Nurseries who wish to extend their collections, and with such other persons as may wish to establish *new Nurseries*, they will enter into arrangements *on terms which will allow ample time for advantageous reimbursement*. Any persons who are desirous to act as Agents in towns where no agency at present exists, will please to communicate their views in regard thereto.

The fruit trees in this catalogue are either grafted or inoculated, and are propagated from such European and American kinds as have acquired a well merited celebrity, the whole collection of which has recently gone through a most careful revision, and the selections have been made with great care and attention. Every precaution is taken which is necessary to preserve the different varieties completely distinct, and all the peach and other trees are perfectly healthy, and free from disease. Many persons, however, are apt to purchase trees without regard to any point but their cheapness, and not unfrequently, after the toil and expense of years, find them, when they arrive at bearing, absolutely worthless. The strongest proofs the proprietors can give the public of their anxiety to guard against misconception, are the *exact descriptions* contained in the Treatises recently published, and other works of a similar character, in which they are now engaged; the result of which will be, that any person, however ignorant on the subject, cannot fail to know if he has been deceived.

In regard to the identity of the various kinds of fruits, the Proprietors do not pretend to a perfect infallibility, but *they do constantly aim at that point*, and therefore if an inadvertent error occasionally arise, it is because their unwearied scrutiny has not been able to guard against it.

One great advantage possessed by the trees sent from this establishment, is their particular *hardihood*. From the proximity of the nurseries to the ocean on the one side, and to the East River on the other, with a free and open exposure to all winds, accompanied by the particular advantage of being so far north as to acclimatize the trees to any still more northern section of our country, they acquire a degree of hardihood which renders them extremely eligible for removal to colder latitudes, and to support the rigors of less favored regions, and trees thus hardened by nature are also found to succeed best in our southern states. It is doubtless to these causes that is to be attributed the general success which has attended the trees sent from this establishment, even when transmitted to Nova Scotia, the Canadas, &c. and the past winter of 1831-32, has incontestibly proved their superior hardihood, they having withstood the severity of the season uninjured, while immense numbers of trees elsewhere in the middle, and in the Eastern States, were destroyed thereby.

Specimen trees of every variety of fruit comprised in this catalogue, are now standing in the experimental orchards of the establishment, and all the kinds are ready for sale. The stock of some of the newest sorts, however, is limited, and the trees, in consequence of their recent introduction are of less size. Many other varieties will be announced hereafter in a Supplement Catalogue, additional time being necessary as well for their propagation as for judicious investigations. New fruits are not added to the collection, merely, because their names differ, but a selection is made of those only which merit and have received the encomiums of persons acquainted with the subject.

A large number of the apples are the same as described by Mr. Coxe, and the Treatise on Fruits, or Pomological Manual contains descriptions of near 800 varieties of the different fruits.

It seems almost superfluous to remark, that the trees and plants in this catalogue not particularly designated as tender, are hardy.

Every tree, when sent from the garden, is duly labelled; and from fifteen to thirty trees are usually packed in each matted bundle.

Where trees are requested for exportation, they are carefully packed in mats, casks, or boxes, so as to be sent to Europe, the West Indies, or any part of America, with perfect safety, for which a reasonable charge is made.

All packages of trees are delivered at Fulton-market wharf, New York, by water, *free of freight*; and, when particularly desired by persons at a distance, they will be shipped to any port they may designate: and agreements have been made with the lines of packets to Boston, Baltimore, Washington, Richmend, Charleston, Savannah, &c. to take bundles of trees at very moderate freights; and if desired to be transmitted to Philadelphia, they can be sent there by the transportation Line in one day, and the canals now forming in every section of our country, present cheap and easy modes of conveyance. No care is wanting on the part

of the proprietors to give such directions as may cause them to arrive safely; but it is to be expressly understood, that after being thus delivered or shipped at New York, they are wholly at the risk of the person who orders them.

To such persons as desire fruit trees, &c. and are not themselves acquainted with the qualities of the different kinds, it is recommended that they specify in their orders the number of trees wanted of each species of fruit, and leave the selection to the proprietors, who will make it according to the views and tastes of the applicants; and in such cases they may rely that only those will be sent which are of the most approved kinds; and when desired, those that will ripen in succession; and larger trees can generally be selected in such cases. They can however if they prefer it, obtain all the necessary information by referring to the "*Treatise on Fruits*," &c.

It is also well, where the orders are small to unite those of several neighbors in one, which will both abridge the trouble of execution and the expense of packing and transportation; and as each tree is labelled, it can cause no confusion.

Persons who may wish to make selections of fruits of *American* origin, will find them particularly designated. It sometimes occurs that the demands for particular kinds of fruit trees are so much greater than anticipated, that it renders those kinds for the moment comparatively scarce, except such as are of small size. In such cases, in order to prevent any delay, it would be well that the orders should authorize, that such kinds may be replaced by others of equal quality, which trust will be executed in a manner worthy of the confidence reposed.

American Indigenous Trees, Shrubs, and Plants, or their seeds, suitable for sending to Europe, will be supplied in assortments from five to one thousand dollars or more, as enumerated in the catalogue, No. 4.

The proper seasons for transplanting trees, are the months of October, November, and December, in autumn; and March and April in the spring. For bulbous flower roots, the best season is from July to October inclusive. Greenhouse plants can be forwarded with safety at any season, except the winter months, and even then, if the conveyance is wholly by water.

In addition to these, Scions of Fruit Trees, Grape Vines, &c. can be transmitted from October to April. Many persons are prevented from ordering trees, from a supposition that they will not bear distant transportation, an idea so extremely erroneous, that it ought to be exploded; the proprietors are in the constant habit of sending trees, and even the most delicate plants, to the remotest parts of the Union with success, and they annually transmit large quantities to the different cities of Europe, where in some cases they have from 300 to 500 miles land carriage, after crossing the Atlantic. The success which attends these expeditions is an ample proof of the superior manner in which the articles are packed for their respective voyages; and persons sending orders, need only state the extent of land and water carriage, and the articles will be packed accordingly.

Catalogues may be obtained *gratis* of either of the agents, or by direct application to us; and orders left with them, or forwarded (post paid) to the proprietors, will meet attention; but it is expected that persons with whom no acquaintance exists, will, in forwarding orders otherwise than through an agent, designate some person in New-York who will be responsible for the payment, or tender a suitable reference. It is requested that those who, in sending orders, mention only the numbers by which the trees, &c. are enumerated in the catalogue, should be particular to state the *edition* from which they make their selections, as there are some numerical variations in the different editions. All letters requiring information will be promptly replied to, and the proprietors prefer that applications be made to them *direct* on every subject.

*The postage of a letter is a trifling thing, but to one who receives a great number, it becomes burdensome; persons are therefore desired to send their letters post paid.*

As many persons in the Union act as agents for the different nursery establishments, it is particularly requested, that where orders are intended for us, it be plainly specified: and every invoice hereafter will have a *printed heading, and our signature, to prove that it is genuine.* We mention these cautions for good and conclusive reasons, knowing that we have been injured by deceptions. And we therefore wish that in every case the above proof be insisted on, for the proprietors take upon themselves no guarantee, unless such an invoice from them can be produced.

N. B. It is expected that no persons having similar establishments will copy the different remarks attached to this catalogue, without crediting the source; as it would be extremely unreasonable that other persons should take upon themselves the responsibility for any errors which may have been inadvertently advanced by the authors of this publication

W. PRINCE & SONS.

#### PRICES OF TREES, &c.

The prices have been greatly reduced for a large number of articles; in many cases 25, 33, and even 50 per cent. below former rates, and the average prices throughout the catalogues will be found as low or lower than the same articles, *equally genuine and of equal quality*, can be obtained elsewhere.

N. B. Where ornamental trees of very large size are wanted for streets, avenues, &c. or where fruit trees are wanted of extra large size, they will be charged in proportion.

## APPLES. *Pommiers. Pyrus malus.*

25 to 37½ cents each; \$20 to \$25 per 100, according to the kind and quality.

### TABLE FRUIT.

C denotes those which have proved good for cider also.

K those which are also proper for cooking or preserving.

31 Splendid flowering, \$1	spectabilis	

N. B. When a hundred of one kind are taken, the price will be reduced one third. The genuine Antwerp varieties, No. 6 and 7, are very different from the inferior kind often sold under the same names.

GOOSEBERRIES. *Groseillers epineux. Ribes Uta-crispa.*

Different kinds mixed, 20 to 25 cents.  
 Largest select kinds, by name, 31¼ cents.  
 Fine kinds, by name, 25 cents.  
 Common do. 20 cents.

Finest assorted kinds, \$20 to \$25 per 100, according to size and rarity.  
 Common English kinds, \$16 to \$18 per 100.

Of this fruit several hundred varieties have been imported from England, where they excel in its cultivation, especially in Lancashire and Yorkshire, and where the berries frequently weigh from one to one and a third ounces. The following have been selected on account of their large size, flavour, or time of ripening. About 50 other kinds have been sufficiently increased for sale, and can now be supplied.

*Red.*

- 1 Alcock's king
- 2 Barton's red
- 3 Boardman's Prince Regent
- 4 Captain
- 5 Chadwick's sportsman
- 6 Crown bob
- 7 Dean's glory of England
- 9 Foxe's true Briton
- 10 Grundy's Ploughboy
- 11 Haply's jubilee
- 12 Highwayman
- 13 Ironmonger
- 14 Rifleman
- 15 Rival's emperor
- 16 Roaring lion
- 17 Rough red
- 18 Royal magnum
- 19 Warrington.

*White.*

- 20 Barton's white
  - 21 Brundrit's white rocket
  - 22 Cheshire lass
  - 23 Glory of Ratchiff
  - 24 Grundy's milkmaid
  - 25 Hilton's blunderbuss
  - 26 Holden's white muslin
  - 27 Jolly gardener
  - 28 Neild's white rose
  - 29 Northern hero
  - 30 Queen Anne
  - 31 Taylor's morning star
  - 32 White smith
  - 33 Yates's ocean
  - 34 thrasher
- Yellow*
- 35 Amber
  - 36 Bamford's golden prince

- 7 Bradshaw's Admiral Nelson
- 8 Delight
- 9 Early yellow
- 0 Golden chain
- 1 lion
- 2 queen
- 3 Gorton's viper
- 4 Jackson's goldfinch
- 5 Mellow yellow
- 6 Prince of Orange
- 7 Smooth yellow

N. B. Many other kinds have been imported that have not yet been increased, but will be inserted in a Supplement Catalogue.

### GRAPES. *Vignes. Vitis vinifera.*

Those marked thus \* 37½ cents each. † 50 cents each. †† 75 cents each.

Those not marked are \$1 each.

† denotes celebrated table grapes. W denotes celebrated wine grapes.

L denotes those from the garden of the Luxembourg.

The above prices are for single plants, or where a few vines only are wanted. Those who wish to establish vineyards, and consequently desire a large number, will be supplied at a great reduction from these prices.

For descriptions of the respective varieties, and directions for their culture, see "Prince's Treatise on the Vine."

In order that persons establishing vineyards may make their selections judiciously and with a proper regard to latitude and locality, we have attached to a great number of varieties the name of the particular department of France where each originated, therefore, by turning to the map, the latitude will be ascertained. The synonyms are carefully arranged, and in no case is the same fruit *knowingly* twice enumerated in this list, and where a doubt exists, it is so stated.

*Burgundy grapes.*

All of which are very celebrated for wine, and form a greater proportion in the vineyards of France than any other class of grapes—the most of them are also pleasant table grapes. The three varieties, No. 95, 98, and 100, form the vineyards which produce Champagne wine.

| 111 Nigrinho, \$8 per dozen                |   |

*German and Swiss grapes.*

These are principally celebrated wine grapes; and I have information from the highest sources, that those numbered 119, 132, 134, 137, 138, 139, 144 and 145, are considered among the most valuable for vineyards, on account of their abundant and regular crops, and their resisting the severest winters uninjured. In addition to these here enumerated, a number of varieties of grapes are cultivated in Germany which are necessarily arranged under other heads in this catalogue, including the principal part of the Burgundy grapes; and I am assured by a gentleman who has a very extensive vineyard on the Rhine, that the grapes numbered 1, 7, 93, 94, 95, 98, 100, 104 and 105, support there all the rigors of the climate, and produce immense and regular crops.

The following grapes being less known, and the most of them being in no other collection in our country, I have placed them under distinct divisions as to color and form; the name of the Department of France where each originated being Italics. Those marked T are particularly celebrated for the table; the others, though cultivated for wine in France, are many of them fine table fruits also.

*Black, purple, and red round grapes.*

The departments which compose the districts of Burgundy, Champagne, and other celebrated wine districts of France, can be seen by reference to the map, and the names of the departments being attached to the foregoing list of grapes, it will easily be perceived which kinds are used for the wines of the respective localities.

*American native grapes.*

All the following are genuine American species and varieties, except No. 394 which is a native variety of a foreign species, and Nos. 498, and 441, deemed dubious.

} *these intermingled*  
} *furnish the white*  
} *Hermitage wine.*

N. B. Many new American varieties are under cultivation, and will be for sale soon when an extra catalogue of them will be published.

*Grape Vines in quantity.*

Fine varieties for wine, *assorted by the proprietors*, 20 to 25 dollars per 100  
 Fine varieties for the table, *assorted by the proprietors*, 25 dollars per 100.  
 Do. do. of the more rare varieties, 40 dollars per 100.  
 Common French varieties, *such as are usually sent out in mass from their vineyards*, 12 to 15 dollars per 100.

SCIONS &c.

Scions of Grapes of a number of kinds can be supplied, if applied for in season, at from 5 to 12 dollars per 100, or in less quantities; but in no case will scions of any variety be sent to a less amount than the price of a vine; and of the very rare varieties, three scions will be considered equivalent in value to a vine. Scions of several kinds of Grapes, 20 to 25 dollars per thousand.

Scions of all kinds of Fruit trees, suitable for grafting, will be supplied at 50 cents per dozen, where the price of a tree does not exceed that sum; but where it does, the same price will be charged for the dozen scions as for a tree of the same kind; and in no case can a charge of less than the price of a tree be made for grafts of any variety, however few may be desired.

Scions of Currants, Gooseberries, Raspberries, Berberries, Mulberries, Quinces, Figs, Poplars, Willows, &c. will be supplied at prices in proportion to their respective value.

Scions of the five species of Osiers, or Willows, most celebrated for basket-making can

- be supplied, suitable for planting hedge-rows, at from 3 to 5 dollars per 100, or 25 dollars per 1000.
- Hawthorns for hedges, of the celebrated Washington Thorn, at 1 dollar per 100, or 5 dollars per 1000.
- Do. do. extra large, 6 to 8 dollars per 1000.
- English hawthorn quicks, 1 dollar per 100, and 5 dollars per 1000.
- Do. do. extra large and strong, 6 to 8 dollars per 1000.
- Buckthorn, or *Rhamnus catharticus*, for hedges, 3 dollars per 100.
- Do. larger size, 6 dollars per 100.
- Yellow Locust, small trees for hedges, at from 5 to 8 dollars per 100.
- Osage Orange, or *Maclura*, for hedges, 40 dollars per 100.
- Chinese arbor vitæ, small, for hedges, 20 dollars per 100.
- Privet, or prim, for hedges, 12 dollars per 100.
- Scions of do. 4 dollars per 100, and 25 dollars per 1000.
- Honey Locust, or Three thorned Acacia, 5 to 10 dollars per 1000

---

### ESCULENT ROOTS, &c.

- Asparagus, Common, per 100, 60 cts. and per 1000, 5½ dollars.
- Large Dutch, per 100, 75 cts. to 1 dollar; per 1000, 6½ to 7½ dollars according to the age.
- Artichoke, Jerusalem, per dozen, 50 cents; per 100, 3 dollars.
- Green globe, per dozen, 2½ dollars; per 100, 15 dollars.
- Cardoon, per dozen, 2½ dollars; per 100, 15 dollars.
- Chamomile, double, each 25 cents; per dozen 1½ dollars; per 100, 8 dollars.
- Horse radish, per dozen, 1½ dollars; per 100, 5 dollars.
- Dyer's Madder, each 25 cents; per 100, 10 dollars.
- Liquorice, each 50 cents; per dozen, 5 dollars.
- Hop Roots, per 100, 5 dollars; per 1000, 30 dollars.
- Sea Kale, per dozen, 2 dollars; per 100, 12 dollars.
- Rhubarb for Tarts, each, 12 to 25 cts. according to age; per dozen, 1½ to 2½ dollars; per 100, 10 to 18 dollars.
- Common, or Rhapontic, each 50 cents; per dozen, \$4.50.
- Palmated officinal, each 50 cents; per dozen, 5 dollars.
- Thick leaved, each 50 cents; per dozen, 5 dollars.
- True Medicinal, or *Rheum australe*, each 75 cents; per dozen 6 dollars.

---

### FIGS. *Figuiers. Ficus carica.*

The culture of this delicious fruit having recently become an object of particular attention, and requiring no more care to covering in winter than the delicate kinds of grapes, the greatest pains have been taken to extend the collection by importations of the choicest kinds from the south of France, Italy, and elsewhere; and it now forms a concentration of this fruit, unrivalled in extent and excellence.

Those marked thus \* 50 cents. † 75 cents. Those not marked are \$1.

D denotes those described in Duhamel.

29 †Rosemary leaved	<i>rosmarinifolia</i>
30 *Holly leaved	<i>spinosa, vel. illicifolia</i>

N. B. See greenhouse catalogue for other varieties.

## ORANGES, LEMONS, CITRONS, SHADDOCKS AND LIMES.

These require sufficient protection in winter to keep them from freezing in the states north of South Carolina: in the latter state and those south of it, they do not require it. In Italy, extensive nurseries of these fruits are cultivated, some of which contain 200 varieties. A work has recently been published at Paris, edited by Messrs. Risso and Poiteau, which contains engravings and descriptions of 160 varieties, comprising the most valuable and interesting. It is from an inspection of those figured in this work that the new varieties have been selected which are here enumerated; to obtain which has been attended with great difficulties. About 40 new varieties, not here enumerated, will be ready for sale in September 1833, when an extra catalogue of them will be furnished.

Those marked thus \*, if of 1 year's growth from inoculation, \$2

2 do do	do	3
3 do do	do	3 50

Those marked thus † are \$3 50 each. Some of these kinds are of three, and others but of one and two years growth.

Those marked thus † will be each \$5, and being quite new, are not at present large.

And a great number of other kinds, which are enumerated in catalogue No. 4.

## ROSES. *Rosiers. Rosa.*

This favorite flower has been cultivated to such an extent in Europe, that it combines almost every tint of which nature is susceptible, and some of their collection contain above 1400 superb varieties. The following have been selected on account of their fragrance, size, beauty, singularity, or delicacy, and the original plants of many of these kinds cost from \$1 50 cents to \$4 75 cents each, exclusive of the expenses and losses attending importation. The collection occupies an acre of ground where all the kinds are marked with their respective names, and during the period of their bloom they present an accumulation of varied beauties scarcely to be rivalled and those who may desire it, can make their selections when in flower. The various kinds of roses present, also, a great diversity in respect to size as well as in other points, some being naturally of very tall stature, others of medium height, and others quite diminutive. All the following Roses will endure the winters of any part of the Union without protection, with the exception of a few of the China roses. The culture of roses is of the most simple and easy description, and information on that point will be found in the *Treatise* recently published. The different kinds of Roses have been critically examined when in flower, and the remarks as to their qualities is the result of the personal observation of the proprietors.

These Roses are almost wholly on their *own bottoms*, a few of the most rare kinds only being inoculated, and the *prices are lower than ever before offered to the public*. Where a dozen plants are ordered a discount of 25 per cent will be made—where fifty are ordered 30 per cent, and to such Nurseries as purchase an *assortment* of a hundred or more to revend, 40 per cent, and two hundred or more 50 per cent.

Those marked thus \* are 25 cents each. † are 37½ cents each. ‡ are 50 cents each. Those marked thus † are 75 cents each. Those not marked are \$1 each.

*The first section of Roses extending to No. 730, is comprised of Double Roses only and is a selection of the most superb and interesting.*

	801 † Woodsii, <i>pale violet</i>
	802 * pennsylvanica, or <i>Pennsylvanian</i>
	803 Montezuma rose, <i>of Mexico</i>

## CHINA ROSES.

Most of which are monthly, or ever-blooming.

The monthly varieties, when planted in the open ground, are particularly interesting on account of expanding their flowers in March and April, when those of other kinds have not yet made their appearance. They continue to bloom throughout the summer; and in the autumnal months their numerous flowers also afford particular gratification, as nature then seems most to need their cheering influence. Nearly the whole number support our winters with little or no protection, as designated by this mark †; those most tender need only to have a box or barrier placed over them during winter. Where any kinds are designated as climbers, it is meant that they grow tall, and are suitable for training, &c.

530 †Single China rose	Rosa indica	\$0 4
531 †Double red, or daily	<i>pallida</i>	4
Ditto, per dozen		
532 †Hamilton, or <i>Maximus, large deep red</i>	<i>maxima</i>	5

Where the whole collection of roses is taken, or where a large number is wanted, a liberal discount will be made.

PEONIES. *Pivoines.*

This class of flowers has recently attracted more attention in Europe than this, a monograph of which has lately been published in London. Most of the varieties are extremely splendid, and others possess striking peculiarities. Anticipating that a similar taste would be evinced in this country, the proprietors have, by great exertion, obtained every variety possible.

1 Sabine's crimson officinal	<i>Pæonia officinalis, sabini</i>	\$1 00

### CARNATIONS. *Oiellets doubles. Dianthus caryophyllus.*

This most interesting class of flowers, which so deservedly commands universal admiration, has received particular attention; and the entire collection now comprises about 200 superb varieties—the most of which have been considerably increased, and the others are in a course of propagation. It may be well to remark, that sometimes a branch, or even a whole plant, may vary the color of its flowers; but this is not very frequently the case.

Those marked thus \* are 37½ cents each. † are 50 cents each. ‡ are 75 cents each. Those not marked are \$1 each. † denotes those whose flowers are rose leaved.

CHINESE CHRYSANTHEMUMS.

*Chrysanthemum sinense.*

This superb flower (often denominated *Artemisia*) is deservedly esteemed; being perfectly hardy, and affording a most brilliant display, at a time when the chilling blasts of autumn have left us but the vestiges of departed verdure. It is therefore a subject of much gratification, that the number obtained from China exceeds 60 varieties, nearly the whole of which are offered to the public in this catalogue.

The following are 25 to 37½ cents each.

## DAHLIAS,

At the following reduced prices.

The whole assortment comprises about 300 of the very finest that can be procured in Europe and Mexico; for the names of which, see Greenhouse Catalogue.

- Superb double varieties, each 75 cents
- Double varieties of kinds less rare, each 25 to 50 cents
- Some very superior new kinds, each \$1 and upwards
- Fine assorted kinds, per dozen, \$6
- Good do. do. per dozen \$4½
- Common do. do. per dozen, \$3
- Some very superior new kinds, per dozen, 10\$.

## CAMELLIA JAPONICA, or Japan Rose.

The collection of Camellias comprises all the newest varieties, most of which are very remarkable for their splendor. The prices are now greatly reduced, in consequence of the plants being much increased. Owing to the universal admiration which this plant has received, and its requiring so little care, and enduring without injury a great degree of cold, the demand has been unexampled. The proprietors have at all times very large quantities to supply wholesale orders, on which a liberal discount will be made, and their present collection exceeds 3000 plants, which they are rapidly increasing.

For a complete list of the different varieties, with the low prices at which these and other Greenhouse plants are now offered, see Greenhouse Catalogue, No. 3.

## SELECTION OF FRUITS.

THE following selections of fruits of kinds best known, are well calculated for a garden and orchard, where only a limited number is required, and it may aid those who are not acquainted with the subject. The numbers refer to the enumeration in the catalogue.
