 The report of the Trcesurrer, Mr. VIor, for lastyear, showcel the finances of the society to be in
 tive Fruits, repported that the dutics of said Con
mittce had not been fuly executed, owning
adverie circumbtances, chicf of which was want adverse circumstauecs, chicf of which was want of
duc notice in nost instances. The Committee had
exauniued Mr. Kurcn's sceding examiued Mr. Kurcin's scedling struwberries at the
snmmer meeting of the Society, and so for as they were able to judge of their merits by that cursory cxamination thonght favorably of the sort named Gin. Meade; the Gen. Sheridan, though fincr in flavor, was not so strong, and the two other varie
ties were of still less value. The colleetion of new
sorts cxuisisted on the same oceasion by Jico
 Was thought superior in flavor to the Trionpheu
de Gand, and posassed good size and fine apprar\& Barrr, named the Nicunor, appeurs to posses side of the principal standard sorts appears to
markable ; it was a little carricr than the Horly let, nearly twice the iize, aud from the erpps see growing on thair grounds it evidently posesesser
great prodnctiveness. If these good qualitics are sons, it will obviously prove a very inportant
aequisition. The Chairnau of your Comnittec also visited the grounds of ElLWASomR is Barkry
in antumn, for the purpose of examining their vew seedling grapes. Thecs are onostly crosses of thit
Delaware, Concord, Diana and debecca, selectiona having been made from many huvared secdliugs.
Two of these apyear to give promise of muck valuć onc, known at present as No. 4 , is a medium sized,
dark colored grape, growing in a conpact, hava dark colored grape, growing in a compact, hand
some, shouiderved bunch, possessiug a rich Havor, pable llavor of the litter. Its valuc is enhaneed bs its early ripening, which is nibut the time of the
Hartford. The other, known as No. 19, ripeuin: bnnch, oft cu large, with medium sized purple brown bcrrics. For richness of tavor, this surt stands yery
high, and is not often cequalled. The berries are he Comminittec may look with much intercest to the further deyelopment of these two new yrapes,"
Lewfis F. Aluse, Black Rock, offered the follow-

 the Lleceussion aroscinctind out through the gronuds of Mr. OHRLLES Dowsise
of Newburgh. It was alleged that the desired road would maiuly sulserve private intercsts only, and
would render worthlcess the fine experimental orchards, where eo many yaricties of fruits are tetted,
and from whence su manny yaluable scions aud plants and from whenee so ranny valuable scions aud plants
have becen disseminated. The subject was referred prepared and adopted petitioning the Lesislature of from being used for any fround of Mr. . patible with public interestst, as sthecir prosercration was
belicyed to be invaluable to the pomological After listene hemrioon semsion ceded to the discussion of the first suluject on the list presented by the Busiuess Commiltce, riz.;
"What methods of colture, aud what kinds of soil are best adapted to the Grapc in vineyards in WestProf. CLask, Parma, had grown grapes both at customens preferted the Naples Isabellas to those grown at Purmul. He believed the Creveling, Con-
cord, Hartford Proilite, Delavare, nud other carly
sorts ,
 cially to the deep, porous subsoil, which made the climate carly. hined very fine specimens, well ripened, yellow retiring President, Mr. Hoocker, thic neeeting pro-
 WESTERN N. y. HORTICULTURAL SOC'y
ANNCAL MEETING.

 Moonv, Lockport, wns sure they had as good a
gripe loecality at Lockport as anywhere in the State: it was a region cxemplt from frost. The highest
elevations were not the best localitics
L. F. ATLeE, Black Rock, suid lue lived at the bel.
 if it was not dry they would droin it. Clay and atiff
limestone soils, wherect the white oalk grows, are the
 Valley on the 10th of Oetober, when the vines were
all killed ht that place, and found his grape vines nntouchect by the frost.
Larrowe, Pleasant Valley, thought. grapes rotted more on heavy soils than on light ones.
L. F. AJIEN did not belleve it was clay soil that
caused rot; thought that discase pcouliar to the Catawba
Qusmb, Irondequolt, sald there were hundreds of
acrus of grapes planted in this county on sandy soil, and it was important to know if they had made a grent mistake.
YY Lrvsrene, Lyons, was ghad to find the area o grape land in this state so large. It was a fact that
we had a lage arca of good grape land in this State,
but pcople werc apt to prefer their owu localities, Pusidy, Palmyni, suid he had grown very fine
grapes on alightit sand tit South Bend, Indiuna. mittcd in gripe culture was in planting ton shallow. Thought no grape root should be within tell inclues
of the eurface. Had seen entire vincyards killed autright by shallow plantiug.
W. P. Loun, Egypt, Monroc Co., spoke of the
adrantages of his locality for urapc growins. adrantages of his loculity for grape growing. A
range of iflls near by is pueculiarly exempt from
frost, Their summit the couuty; the soll is warmand dry, with a liberal
adrnisture of clay,
Szvvestres, Lyons, had traced roots of vincs three feet in the ground, at which distance they were
yery numerous; had traced bome four fect and three
inches, The vincs were ouly two sears old He inches. The vinos were only two years old. He
thonght the roots would penctrate the subsoil deeply withont its boing worked if water was
present therein. The grape vine abliors watur.
Ross, Peutield, and large erops, which did not ulways ripen. Last
sensou had a light crop of fruit, and it yot well
ripench ripencd. Thought grape growers were in the habit
of allowing their rincs to curry too much rult The second question-" "I Fruit Growing becom-
ing more dificult by the clearing away of foreste, and thus cxposiug to severe winds, and is it practi-
cable to plant belts of Evergreens or other hedges
for screens $\%$-wnis ing any new or especially valuable infornation. Examples were given illustrating both sides of the in favor of sheltecr.

## The qnestion-"What plants are bost adapted

 Hooser, Rechester, said the Honcy Locnst Hooker, Rochester, said the Honcy Locnst orthree thorued Acacta, and the Osage Orunge, werc
the only plants strong and hardy cuough to make a good hedgo in this ellinatc.
L. F. Arusen, Blick Rock, said the Honey Loenst suckerea bady in Ohio.
Messre, 'luomas and
$\qquad$
makins a hhin, ragged hedge.
sucker.
Warser, Rochester, had grown the threc thorned
Acacia for teweut ycars, aud it never suekered.
The true Honcy Locust sneleced

| The President said that Mr. Wusder had very strongly objected to it on that ground. <br> Hooker suggested that hedges for screens or for ornament should be composed of a mixture of decidnous and evergreen trecs. The evergreens conld fill tho spaces below, and the other trees-heach, |

| In billy rearions where crapes are planted, the direetion of the declivities, especially if they are guite abrapt, determines that of the vine trellisee. If terracees are bnilt there is but little choice to be had in their dircetion, and if the vines are planted without theee, it is generally found nececesary to make the rows ap and down whe slope hor coosenvi face drainase. In sueh localiticz the direction of trellises is not a matter of as much importance as on Rendent of others in respect to athade and eircula pendent of others in reepect to inde and tion of uir But a very large area of our promising gTape lands is on comparatively lefel surfaces, and grape lands is on comparatively lerel surface, and there the dircetion of the trelis rows is a matter which in some degree may affiect the prosperity of the vinegard. <br> Practieal men differ in regard to whieb direction is best, an ease and west or a north and south one; bnt probably a majority would deeide in faroor of the north and south one without giving good reasons Why. The weightitest considicrations seem, hows Mouns, in his cxeellent little work on the grape vine, sage that if the trellises run north aud bouth the " arrangement has the disadvanatage that in the liotteat part of the day the sun ehiues into the spaces between the rows, heating the gronnd, while the rows are ln their own shade. It is, howerer, mueh more important that the vine should be warmed than the ground. I have, therefore, chosen just the opposite dircetion, that is, frow cast to west in a plantation of vines. As the line of the rows is a little in- clined towards the meridian, it so happeus that the clined towards the meridian, it so hapneas uat the sun at one $\sigma^{\prime}$ clock $P$. M. shiues vertically upone the in the foliowing namper. Before seren o'eloek A. M. the sun shines on the back part of the trellises; at seven it suines between the rows from the art of from seren A. M. till seven P. M. the front part the trellis enjoys the sunshine; at seven $P$. s. and after beven the baek part of the trellises again. In the huttest part of the day, from ten o' lock A. M. the rows, and they are then in the condition of trel- |  |

| Tue union of Felir and Fanny Mendelssolun was omethiny wonderful, like the wondertul genius of sensibility and music which codowed them both. Such pure, teuder and noble souls are made for each other. The more fervid and esactiuy houds of marother. The more fervid and exactuyy binds or mar- riage and parentage did not interfere owith the profound sympathy in which they lired, both when together aud apart. They corresponded in muscc. Their cmotions, too deep aud strange to be conreyed in words, like articulate thoughts, they expressed in tones. Seating themselves at their instrunents, they would carry on an intereouroe perfectly intellithai any roeal conrersation. When Felix, at Nacomposed in uotes, she translated it nret with her transcripts of thcse affectionate and nuusical souls appeared on this earth. Their relations of spirit were sensitive and organic, far beneath tlue reach of intellicctual conscionsness. They seened able to eonmmanicate tidings through the cthereal mediun by some subtle tulegraphy of feeling, wiich tran secnas understanding, aud belougs to a mirraeulona rcgion of lifc. For When Fanuy died in her German home, Feliz, amidst a Lappy company in England. suddenty aware of rome terribe calamis, from hish disturbance of cquilihrium and dread sinking of his <br>  Which held the assembly spyll -bound and in tuars In a few days a letter reacelcd him, nuounciuy trat his sister had died at that very hour. On receiving the tidings he uttered a shriek, and the shock was so great as to burst a blood ressel in his train, Life had no charm potent cuought to stauch and heal the cruel laceration left in his already friling frame by this sunderiug blow. The web of torn fibrils bled invisibly. He soon faded away and followed his gister to \& world of tiver melody, fitted for naturcs like thcirs, -Alan |

| :---: | :---: |
| Written for Moore's Rural New- Forker VOCAL MUSIC.BY L. HALSEY. |  |
|  |  |
|  |  |
| Music, harmony, sweetucss of sound! What a great and grorious subject of thonght! We can never fulls appreciate or aualyze the power of music, but we kno the |  |
|  |  |
| and more the miuds of men. <br> Said a distingnished writer: - "Give me the writ- |  |
|  |  |
| ing of the sougs of a nation and I eare not who make its laws." In Fiance, where musical talent is |  |
| more curvinly cultirated than in our orm land, its influmee ean be more clearly distiuguished. Look over the history of that country, and you mill find |  |
|  |  |
|  |  |
| that French soldiers have ever been accustomed to fight beal and brarcet wh:L cheered on by some |  |
|  |  |
| national authem which tilled their hearts with thoughts of graudeur and glory. At Waterloo, |  |
| thoughts of graudeur and glory. At Waterlioo, where the ouce bright star of Acestiny sank to rise no more, the noblle Old Guard, falling fastbefore the furious onset uf overppoweriuy foce, formed betorethe has bents arond their helored Em. |  |
|  |  |
| before the furious onset of overpowering foes, formed a rampart of brave hearts around their heloved Emperor, and sang one of their farorite ails,- <br> ar the hosom of his fanily |  |
|  |  |
|  |  |
| And abore the groans of the dying and the roar of cannon, the death song of that deroted band raug |  |
|  |  |
| out loud, clear and sublime. <br> Should we inresticute the history of the "Mar- |  |
| seilles Hyzan," "God Save the Queeu," "Hail Co- |  |
| lumbia," "The Star Spaugled Bauuer," and other patriotic sougs, we would discorer that these national airs hare all exerted a powerful inflnence |  |
|  |  |
| on the minds of the people. <br> We find the Bible full of melody and song, from |  |
| tic commencement cren to the close of its inspired pages. We read of the moruing stare singing to |  |
|  |  |
| gether; of choirs of angels siucing, of tue people of GOD siuging, and tuat, at hu list grat day all kosc who love and honor the Lamb are to have goldenharps in their hands and to sing the praises of GoD forever. Truly, "music hath charms." Truly, the great poet was right When, inepired by the Muse of Song, be wrote, |  |
|  |  |
|  |  |
|  |  |
|  |  |
| Wherecan be found the verson so intoxicated with pleasure or orcrwhelmed by misfortunc, us to resistthe soothing intlucuers of music? No matler how |  |
|  |  |
|  |  |
| the soothion how debased the soul, there is still in the human herrt, itself described as a won |  |
| derful musieal instrumment, - " $a$ harij of a thouenand Etrings," -a chord which tremulues and hrills unbid bearcen-berru melods. |  |
|  |  |
|  |  |
| ALL ALONE NOW." |  |
| Trie words fell unoo my ear the other day from the lips of a wanderer-one whose home and dear ones live ouly in the memory of far-off ehildiood |  |
|  |  |
|  |  |
| throng earth's crowded high ways, and I asked myself why is the world so cold and selfish-why does |  |
|  |  |
| it bush so rudely past those homeless, fricudless ones: They need so much kindness, so much |  |
|  |  |
| reader, what if you aud I had been drifted ont from |  |
|  |  |
| bome-lore and infuence ts early as thev, alone upon the sea of life, a prey to the world's cruelts and |  |
| hearts to pray, or told them who would licep them from sin and make them pure. Blame the world, |  |
|  |  |
|  |  |
|  |  |
| We would have drifted away with the enurent too, |  |
| caunot be altogether bed. Hidden array under all |  |
|  | Moxer:-Men work for it, beeg for it, steal for it, stare for it, and die for it, tand all the whill, from the eradle to the grave, naturc ing in our ears the solemn quastion:-" "riat slain his own soull" Thic madness for money is the strongest and lowest of prassions; it is the insatiate Moloch of the liuman hicarts before whose remorse - |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
| teries, and its slumberers sleep without monu- |  |
| ments. All other grave-rards, in all other lands, show some distinction letween the great and the |  |
|  |  |
|  |  |
| roll over all - the saue reyuiem by the minastrelis of |  |
| the ocean 15 sung to their honor. Urer their re loane the same storn bcat and the samesun shines, and there umarked, the weak and powerful, the ca by the eame trump. |  |

 the eame dircection as the laynd was plowed. This
 roved ont foor feet apart each way. Every ot
hill in every other roviv should be of hor, ns

|  | Tree above design of a movahle fence which i simple and capable of being constructed by an farmer, was landed to ns by Mr. P. M. Ackerman, Monroe Co., N. Y. It is made entirely of ineh boars fastened togetber with wrought rulls, and cross-stakes which brace against the hoards imme diately above and below their point of eroseing. The stakes are also wired near the top and bottom <br> ashes is more viluable to most soils than three bush cls of lime. We do not wish to discourage the nse heavy soils and those containing ruuch vegetahle mold; but we think farmers do not sulfeeiently ap- preeiate the ralue of wood ashcs. E. W. s. <br> RURAL FARMERS' CLUB. <br> An Adjustul) (iute <br> Leonidas, Mich., sends us a plan of a swing gate weep snow, as it can be opened and shat withont the provess of shoveling which ofted becomes neces- sary nearly every time one wishes to pass through. The gate is cheap and casily constriteted, being ing the upright picce, $\Delta$, whieh should be threc, or three and onc-half inches sfuare, and six, or six from the top to the upper slat; also from the bottom to the third slat, the secoud slat being ent onc inch short of the upright, $A$, so as to allow the up- risht to pass up and down through the cyes, $B, B$, Which shonld be made of threce-fiourths inch round iron and large enough to allow the upright to pass up and down freely. The upper eye should be made so as to fasten with a nut at the back of the post, C , and the lower cye in the form of a staple, with a small block titted in so as to come between the post and upright. The gute can be raised or lowered at of asmall bolt, passing through upright, A, over the lower cye. The gate will swing cither way and will be fomnd very convenicat in allowing sheep or hogs to pass through, while it will stop cattle or horses, and furthermorc costs nothing for a farm right." <br> Grasshopper's in Texns, <br> (t. A. W., Millican, Texas, writes as as follows, Nover dater last the grasshoppers made their appenrance in this county in large numbers; they deposited their egga, ate off the vegetation and disappeared. Now, thusc eggs bave hatehed, and to-day the surfree of the earth is covered with young grasshoppers, from three to five days old; they are innumerable, but I may safely say there is all of one hindred to the square foot of surfacc. Our young corn is just coming un; all the common garden vegetables are young and tender, and in a fow days, not a vestive of them will remain; all will be deronred. We can plant ugain, but the second crop will share the same fate. I learn that the wheat crop is already destroyed the owners of large herds of eattle are killing them at the rate of from one to five hundred per day, to secure the hide before the auimals starve to death, from Texas during the winter. What are we to do? Can ingenuity devise ways and means to relieve us of this pust? <br> Chemistry of $\qquad$ $\qquad$ <br> Sea" occurs this paracraph:-" Sea" occurs this paragraph:-"What a remarkable combination of chemical substances are stored ap in a kernel of corn! It may almost be said to be an apothecary's shop in miniature. * * * With a moistened cloths we can rab off, from the kerncl, about thee and a-half per cent, of woody or strawy material, of not inucls nutritive palue, and then we potash, soda, lime whosphoric seid and the rich nitrogenous fugredicnts. This wrapper is the storeand come these chumical agents? They tome of course from the soil, and by the mysterious and silent power of vital foree, they have been raised, atom | MOVABIE FENCE. <br> to further add to their stability. The fence is de signed to stand on a ridge formed by plowing two furrows together, which adds to its height and tend to prevent stoek from approaehing closely. Fla stone shonld we placed, when practicable, under neath the uprights of the pancls. The methorl in the engraving, also strengthens the fence. Apply erude petroleum to the stakes. <br> - by atora, from their low estate, and fitted to per form the high organization." $\qquad$ <br> H. C., Cortland Co., N. X., asks us if the Germa Wever is auy better than our common led clover Werst, that the true name of this varicty i Alsike or Bweedish clover, not German; second that it is a hardier sort than the common red, it chief value eonsistiner in thataud in its being adapted to moist locations where the former will not flourish It has pale red fowers, a lank stajk, oval, outuse leaves, which are lighter in color Lhan thase of red clover. It will not prodacu second urope aftormew ing, nor will it cover the gronnd until the sceond or third jefr, hence it should be sown with other grasses. It is suid that the honey bue can collect its swects. As a rertiliziny or fodder crop it is not superior to red clover where the latter thrives, out It may be grown on soils not adapted to the common kind. Wintering Bees in Cellars. <br> P. W. Sperny, Utica, Ohio, writes:-"I have been in the bee business for twunty years and lose some hives every winter. Last fall I pat three bive in my cellar, aceording to 3. J. Palker's plan moulding, and on the lith day of Mareh (it wene coce warm) I took them out and pluced them on a board They made a rush for the light, and flew around wntll they got chilled, aud inavy fell to the ground dead. I wonlil like Mr. Pakkelk to state, throug cellar. I kent twalve lives out in the open air the winter, packing straw around them for protcction Although a great many chilled and died, there are success the coming summer." <br> WESTERN RURAL MEMORANDA. <br> ILLTNOIS TNDUESTRTAL ENIVERBITY. <br> I ATCENDED the formal inanguration of this insti tution. Mud threc feet deep, elouds dripping, and yet Liniversity Hall was erowded with rupresentathe culmination of the struserple to realize cclebrat cultnral School. There are about seventy student in attendunce-bright-faced, wile-awake, rourh-aud tumble follows, willing to work, and evidently of the right kind of material for this experiment which educational hypochondriacs regard so dubious. I nerd not detail the inamurution ceremonics. They Were approprlate and impressive. I simply want to that this sehoot is now open, and is controlled by a Board of 'Irustees with a Regent for exceutive ofli cer, who will ncyleet no means at command to make it an uid to agrieulture and an bonor to the State 1 wlll say more of this school and its organization hercafter. <br> THE WUEAT SOWING <br> Commenced in sections of Illinois and lowa some weeks since. The wild geese are flying northward; the ponds and streams are full of ducks ; plowing has "been doing" for some days, and the stir of spring-time quickens every depurtment of labor. Was putting in wheat. There was a good hard botfrozen four inches helow the surface; but he was seattering wheat on fall plowed land and harrowing it in. Then bo sowed on his thuothy and clover seed. He always does do this whether he desigus the ficha for pastnre or meadow thereafter or not However it is only clover which he sows if the field is to bo plowed the succeeding year. <br> pher. I asked him why he always sowed close with whent. " $a$, well, it don"t do any harm; and I get a fine in February or March. Sometimes I change my plans and do not plow the field in the fall ; if I do if I turn it over in the spring for corn, the crop, to plow under the first to the fifteenth of May, that need be desired to ferment green and stimulate the germination of the seed. It is a profitable plan | any way. I like elover in my soil. Some people do some people are foolish. I find it a good substitute for weeds," <br> Do you know Josis? I know sevcral who look and act like him in this matter. And somchow he manages to get just the tallest erops of wheat o manages to get just any of our farmers. <br> sucill a mop peter <br> As there is out West here, is likcly to result favor ably to the bcer makers bat not so favorably to brcad consumers. I doant like it - not heenuse have any conseientions seruples in the mutter, for with our inereasing army of idlers, men engaged in commerce aud manufactures, all or whoro consum serious diversion from food produetion in tbis coun try. We cannot afford it. Our population is con stantly ivereasing. Onr railway cyterprises are mul tiplying and elaploying armics of men in thei territorics are lloating oif frora flelds of productio a vast population that mnst constantly consume years withont producing a particle of food. Food It must eontinue to be so, unless men can be cnlisted in soil-culture. And this leads me to say word to the <br> THE SHEEP MEN <br> I've bcen among the shepherds. The flocks in is a jolly good fecling in faror of keceping a stif upper lip relative to the taritly and prices. Green ones are selling tloeks; sharp once are keening the best and adding such as they can buy chenp. There is a furor in favor of cows and associated dairics, It is nall well, too, for we can jnst as well produce our own - and do it at less cost, too - as to pay for transporting it from the central counties of your own state; lut we have not got a bnof too many slicep in the Wust, and there is abuudant faith that floeks will pay good dividends yet. <br> sorghex en michion <br> There is persistence for yon! I went over to see result frorn Sorghum calturc. There were asser rel. Samples of sirup sweetened our lips. There was much talk about processes of eultnre and mantion are that in order to make sorchlinm culture profitable, there mast be established reffncries made into an artiele of commerve in the shape o relined sugars and sirups <br> Accordingly a Committee was appointed to report upon the feasibility of orranizing a stock eompany to build a refinery. It wass asserted that there wer men with faith enough to take the stock. $\qquad$ <br> facts in farming. <br> [M. G. VAv Sxckie of Ulster tormship, Bradford in., Pa., sends the following items for publieation truth of his statements by actual cexperiment:] plastering wieat. <br> The greatest bencit of using plaster in connec thon with wheat, is derived onfy when it is sown wheat is sown, and then larrowed in with the Wheat. I have pursacd this method for alout five ycars, and have carefully olserved the advantage sained by it. Whenever portions of the same field were left unsown with plaster at the time the wheat was pat in, there was a remarkable difference at the C. L., in the Ling. Thus, 1 answer the query of $S$, a bundle of innts. <br> Manure should he spread upon plowed land, for crops, invariably when the moon points and upon louttomed meadows when the ruon points at all times, and have found that purting the seed in the gronind when the moon points downward, alwaye sccures the best erop. Clover secd, also, docs ward poiuting. The best time for the soving of pens, is after the full of the moon; aud the best time for the planting of corn is when the sun's sign is in the arms. To have the best result, in the case of planting for root crops, the secd should be put in the ground when the moon points lownward; and I have noticed that fence-posts will hold most surely when set or driven at the time of the moon's downward pointing. [Though we publish onr cor- respondent's opinions, we do not endorse them, nor desire to incite a discussion on "moon farming."] compost for corn, <br> A good compost for eora, at the time of planting, may be made of two bushels of hen цuano, mixed with two of wood noshes and one of plaster. Use a handful in chech hill, and cover along with the corn. a buckiweeat item. <br> Buekwhent should be sown always at evening, for time in the day that it is sown, and the elliect of the dew on the tender opening bloom is better than that of the sun. |

## AGRICULTURAE.

 hospltable wastes, and nan is a nomad and a barba-
rian. It gives to man, crilized or savige, meat,
wool and milk and its products; it is the great wool and milk and its products; it is the gren
renovator of eoil worn by tillage and cropping,
thns lsing at the very foundation of all other usee thus lying at the very foundation of all other useful
regetable growth, nad in the landscape it
ourseneals to our semse of beaaty with greater force than any other
fenture. It graws spontaneously, yet yiclds ensily
As a renovator of the soil, grass is of greater ng.
gregate valne with ns than stable or barm arard
mannre, and it is a queetion worthy of a rood deal mannre, and it is a queetion worthy of a yood
of thought how to nee it with the most profit in
enriching our lands. It seems, indeed, to enrich solu, at least for the prodncetion of other cropr, by
merely occupying it. If we mow, or pastrore it decay Where it grows, althongh he see greater
benefit from some methods than othcre, yet all fecem soil lor cerrenls. Grasse acts as a a soll renorator, both
by what it convegs to it, and also by a certain mechanical action. Of course it can add nothing to
what was in the ofil previous to its grovth from it, except what it derives from the atmosphcre; but
this is considerable and besidee, it clanges, by tis
growth and decas, the crude clements of soil into a state better adappted to norrish plauts of a lighee
character, and bearing loud directly for the nge character, and bearing food directly for the ne o
manc. Bnt the dense bottoun growth and surface roots of grase, which form wbat we call turf, protect
the soil from loot snnohine and drying winds, and under this shclter it rapidy secumulatec nitrogen,
and to this cause, probably, ass much as to any other
do we owe the increase of fertility in our lands laid

It is the popular notion that pasturing enrichcs
land laid with grass more than mowiug. Perhaps it some work Ehould be reserved, so that once ed over a little and repairs made. You know the
adage, 'A stitch in time. Loose coble stone, a
hey come from the tields, shonld not se the they come from the Helds, should not be thrown
into mud holes or other low places in the road be and then covered slightly with dirt. In Imuddy
weathcr the wheels cut down, the stones arre dis-
phaced and work to the surface, and when the soil

| erds of the same brecd or fam onstantly breed $n p$ to ligher needs to be brought forclbly ion of farmers. 'lhink of th which would be the result the best milking stock with all ; or if all the beef cattle from the Short-HLoru in the vast lierds which ro west alone, wonld soon ad arly to the value of the meat ions." $\qquad$ <br> The Oplum Poppy. <br> Brooklyn, California, asks in inm poppy. The opium of the White Poppy, (Rupaver Som cause the eced is whltc. stern conntries, being a nati are asaally red of various tin ned juice of the poppy head it when in a greers state, fro exudes. This julce dries and anging to a dark color, and necessarily collected by han heads, hence the businuss o be at all protitable. Chem h eome more expeditious a xtracting the opluin in o |

ch ances of success are not very flattering. If any
of our readers can give information on this subject
we hope they will avnil themselves of the opportu-
nity through the Rupat nity through the RumaL
$\qquad$ HownY, one of the articles to be fonnd in every
ADyssioinn market, is a farorite article of food or
relish, and bees are plentlful. One correspondent relish, and bees are plentiful. One correspondent
notlced as many as twenty hires nanging from the
branclues of a single tree branches of a single tree. These are cylinder pots,
made of earth, being closed at the bottom by strav/
matting. They are about two feet in length, and

 geese, grousc and goines fowls are considered
just as good eatiug here as in England. of the
"nobler") game, there are lions in the deeper
"noter
 dangerons proximity to towns and villages, wolves,
the hippopotainas, the buffalo, the elephant, the The hippopotainns, the bulfalo, the elephant, the
antelope, and, finally, mookeys, which are so nnt
merous that a rmunc was once caused among tho
Abyssininu soldiers by their compact appearance.
 Aud now let ns look at the natives themselvees.
Bot what a contrast doo we find betwen the natural
heauties of the couotry and the demoralization of
the beaties oithe couocry and the demoraization of
the inhabitants. Yet what can we expet where
feudal aristocracy leries its contribntions at will, and where the priesthood take what is lect behiud.
The peasants of Abyssinlu says
the
 by every one; they just mavage to keep themselves
alive; but $t$ with all their latar, after jeevis of semi-
starvation, clad ln rags, they often in the end pcrist ailive but with all their labor, after yeurs of semi-
staration, clad In rags, they often in the end perisi
from anter starration, It is dillicult to see why a
few should few shonld labor and so many live by exaction and
plunder. Every province bas stz army to feed, and
when supplics are scarce the last piece of bread is Enatched from the peasants's raouth, and to puniss
him for having withheld it, his poor hut is set on ire, and the rising harvest in his fields wantonly
destroyed. Thisi is not an exaggerated picture of
the lasd which Trieoonrs has tried the lasd which Treodone has tried In vain for so
many years to regenerate, frat in sagacious measares, and latterly throagh blood and rapine. That
the land neede a moral regeneration is evident, anat whe land needs a moral regeneration is evideat, ant
we may perrapes be pardoned for introdncing tho
followion paracraph from the pen of a correspondfollowiog paragraph from the pen of a correspond-
ent, in proot. Fle refers to a market where the British arny were parchasing: - "A 'trattic' was car
ried on so openly as to show that morallty had sunk
to for to a fearfaluly low ebb among the women of $\Delta$ bys-
sinia, and that the vinuruem malrimonti is in this eountry a threede which may be tied or s samped
aanuder at the will of either party. Abysinlanse arducer at the will of either party. Abysinlans
are ready at any time to bargain for the charms of
their wives or of other female members of their household!"
What the future of the Abysinian may be cannos now be premlsed. Earopean methods are well ex-
plinined by Taroonare himself:- 1 know the tac-
tics of European governments when they wish to ticc of European governments when they wish to
annex an Eastern Kiugdom. They send mision-
arics first then consals to support the missionjies,

Written for Moore's Rural New- Forker,
CHINESE AT WASHINGTON
THE CHINESE AT WASHINGTON.
Eds. RURaL:-On Monday I was at the capitol
and iu the gallery of the Representatives and iu the gallery of the representatives' Hall.
Perlaps some trirty persons were present, and on
the floor below was yciny Tax Bill-important, but uat of special intersut to
"outside barbarians." Yusterday I went nguin, with my " better half," a half hour or more before
the time of openiug the scssion, and found the egl leries crowded with the heaty, and power and pras
tige or our best and brighteat manhood and wolman
hood, hood, - $t$ welve hundred spectators waitiug in ex-
pectancy of some notable event, and hundreds more crowding vainly for entrauce around the doors.
By paticuce and good behavior wo found eutranc
and eaw the honorable members below all in the places, evidently waiting in due expectaucy. The
session opeued at eleven o'clock, an hour earlie than anual, aud as the Chaplalu closed the opening
servies, the Speaker announced that they met to
receive Mr. BCRLIN Empire of Chinas and the delegation of Chineese

Lord Broverass was most earnestly and usefal
mployed for many years of his life in the work eatending caueation among the working classes
and the amendment of the commou law and judcla and the amendment of the comilloul law and Judeclar
udministration. He was instrumental, more than dministration. He w23 instrumental, more than
any other Eingle man, it the rormation of tiae pres.
int prosperous Soclety for the Diftision of Useful Kowledge, the origination of the sehools and me hanics' institutes of the present time, the starting of the fanous Peluy Magazine, and the ercation or te London University. Broounan goes down ormer, the triend of popalar edueation, and the
nemy of slavery, than as a violent partican politician and lawser; and this brighter phase of hi
anaracter is what posterity will best love to look
pon and read about.
brussels lace.

fording for the glowng

THE FIRST DRINK.

I somerrimes wonder if any of my little friends person's whole litetime? A slngle actiou, though felt till the last hour of exisistence. Let ing ind felt till the last hour of existence. BENNY GRAY was ten years old before he took his
rat drink of liquor. His parents were very good an the saloons where intoxieating del d. They told him of the evil effeet of strong to see for himself the fearful wreteh that liquor will
make of a strong, healthy man, for his homete was in staggering down tie streets. One day he was walking siowiy down the street
in company with ia boy of about his own age. bay would hare chosen an ays
 im. Bad hoys very easily yain a strong influence
ver those who associate with them who are not as bad as themselves. They are willing to leod the
way into misehier and wroug-doing, and in a very ttle while their companions will foll Benvy and his ecompanion walked along that street, and talking Very busily, At length the
stopped before a saloon, where varioua kinds sparkling wilues and glitteriag liguors were exhibi
ed in flashing deeanters in the large windows, lito shining decoys, to lure men on to temptation and, "Let's go in and have a drink," said Robert "Oh -no!" answered BENYY, with a little hesita
ion in his manner, " Guess not," "Oh, yes - oome in in" said Roserr. "There
won't be any hnrt in it, you know. You needn't tell any one of it, and no ouc will know."
"My father wouldn't like itt," said Benwr, with glance at the tempting glitter of the liqnors in the
windorv. He had never tasted a drop of intoxica
tind ting drink in bis life, bat now the wor
 again if you don't like it., Nobody can blame you
for just taking ono drinks, you know, Just for the fan or it."
Phor Bexw! where was his good angel then?
where was the strength that would have enabled him to resist the tempter?
You see Bexwy did not try very hard to say
" NO ," firmly and manfully, as he ought to have
done. He wanted to know what was to be seen
and heard inside of the saloon for himself, and not and heard inside of the saloon for himselif, and not
trast to what others said --he wanted to taste for
himself, and sce what the drink that made trutes of himself, and see what the drink that made brutes of
men was like. His curiosity was stronger than his
will will, or his principles of right or honor, for if he
had been strictly honorable he woold not have con-
sented to deceive his parcuts as he did. I do not sented to deceive his parcents as he dad.
supposes he onee thooght of what an awfect
that first. drink, -that first visit to the dram shop, might have ou his whole future life.
He gielded. He went throughi the open door that
seemed to invite the rictims of the dendou Intemperance to eater. And there he drank his first
drink. It was got fery pleasant, he thonght, as he fook the lirst sip. Bat Roberry langhod at his wry
face, and secmed to enjoy his glaos so snuch that Bessy thonght there must be bomething nice about
it, after all, and he kept sipping a little at a time it, ater all, and he kept sipping a itue at a time
till "the glass was empty.
"How'd ye like it it", asked Roberr, as they left "Phe saloon.
"Pretty well," ans wered Bessy. "It was rather "Strong! Ha, ha!" langhed RobsRr. "Not
very! Yoo"ll get so, in a little whilc, that you ean
drink stronger stanf than that-without making ap any faee at tr, etther.
And Roukr was If. In a little while Bexsy
grew to like stronger drink. His parents knew nothing abont the Labit of intemperance he was
forming, for a long time. But oue day he was learmed that their boy had, or a long time, been in
the habit of taking a plass with bis companions. the habit of taking a glass with his companions.
He lad ncyer been completely under the influence of liquor bufore; but at last mind and body had
succumbed to its terrible power, and he was for the time little better than a brute.
Bexsy pever reformed. His parents talked with
him. him; they prayed and entreated; but the babrat he
had formed was too strons to be broken by prayers or tears. In an hour when ho thought not, the
tempter had yained possession of him, and his firs drink was only the trst step in a long career of
misery aud wretcheducss. At lat he died, and I
think his parents saw the sods laid over his grave with thankful hearts.
Oh, ebildren! watch well the trilles! They may seed now, but they will bring forth bitter fruit in
abandance by-and-by.
Hosorisa Moruers.- During a long and varied
life, I have had much to do with children, morc os
pecially with boys pecially with boys. As a rale, I could predict the
future capeer of 9 boy by noting his bis mother. Boys who were dutiffland and aflectionante
to ward their mothers, have nuanlly turnel out well. Unkind and disobedicnt lads $I$ have nsanally fond to
become bad mean. There seems to be the Divine blessing $r$

HORTMCUTTURAL。
$-m$

2 y Tue first indieatlons of this year's erop were very
fasorable the plantit fooking verry healthy and flonishing, and the blossoms very ybundant; bnt owing
to the constant hears rains, the fruit was not so to the constant heavy rains, the fruit was not 8 so
plenty, or or as good qnality, as antiaipated in Now Jensey. The Delaware crop proved to be
Jalse that of Norlolv, Va.
The first berries were reeelved May 11th.
 by the Puraer of the ship that brought them, wo
knew nothing about the falue of the berries, ani knew nothing abont the value of the berries, and
the second was zold by a frait dealer. The next
steamer bronght quite a large qnantity, and the steauer bronght quite a large qnantity, and they
sold from $\$ 1.00$ to $\$ 1.50$ per qnart. The next arri-
 Norfolls thenmer, with a large cargo, anrived very
late ; in fact arter the Baltimore berries had arrived, late in fact after the Baltimore berries had arrived,
caneing \& great Variation in prices, the Batilmore
fruit selling for 30 cents, and the Norfolk from 30 to 12 cents for those not in prime condition; the wag-
ouer dealing in the largely for the tirst time. This
was also the case on June tth, when the Baltimore fruit, arriving firet, led off for the same prices, and
the Dela warc frult coming in alao, that sold foom 30
Be to 40 cents per quart The Norfolk line per carr
faillng to make a connection at West Philadelphin
with the regular line, was coupclled to tagy off, hud with the regular line, was compclled to lay off, aud
did not arrive until arternoon, when the fruit, being
and in bad order, sold mostly to the wagoners at very
low rpicec. A few berries from New Jersey in one
fourthit paskets now arrived, and sold for 13 cents per baskee,
June 9th was one or those remarkably trying days
to dealers. The berries came in sueh quantities that there seemed to be no end to the arrivala, and to add
to their trouble, thic southern trains were bhind
time, and the eity dealers Luap purchased theie stoek and gone home, leaving the dealers to the tender
mereles of the shippers and pedders; the former
paying 20 peente per quart for hard frait, and the latter 10 to 15 ceuts for the soft.
Juue 11 th was very stormy, and large quantities per quart, and the small baskets 6 to 7 cente. Prine
Dela warces brought 25 ceuts for an Eastern market. and berries sold lively. The morning being dull, the
dealers feared the market woold fail wefore all the stock eonld be disposed of, bnt their fears were not
well grounded, is it all sold th Pair prices, , and in the arternoon there was qnite a demand for choice fruit,
bnt there wes none to be had.
On Sunday morning, Jnne leth, the frait arriving On Sunday morning, June 1eth, the frait ariving
from Delaware was delikered on the stands. TTe
dealers eared for it and did all they could to pre-
serve it, but in valn, for on Monday most of it was serve it, but in valn, for on Monday most of it was
ruinced, und it was sold at any priee that the dealers
were offered; many crates of 32 quarts capaeity beiing gold for 81.00 . On the following Thestay we
had the largest arrivals of berries ever known in our
markete Norfolk and Dollywre made market. Norfolk and Delavary made tuecr last
mighty effort. The state of New Jersey trembled
under the mighty load of cars that brought in her portion, and yet, good hard frult sold trom 12 to 15
eents per guart, and the coummon and dainaged frnit sold delpress the tralle, nbout noon a a heavy shower
help depress eame ap, whieh stopped all sales, aud a argo amonnt
of fruit was kept over to be given to the wagoners
in the inoruing. The next mornlng still being sun making its appearrazee abont 10 o'elock, trade
spraug up, aud fruit sold well, leaving a good dedemand was good, and froit sold well. Friday is
the day that the shippers buy the heaviest, and on

 and Connecticat seat us some very une fruit.
In the way or packayes, Beecher's bukkets stand
pre-minently atheedo of all otthers; audd saleh has
been the demand for them, that they could not be been the demand for them, that they could not be
proecred in time for the ceros. Thoonands have
been disappointed, and were obliged to proeure patent hais rade one elmilar in size and shape to the
Beecher, with the tin band. They are tine lookiog
and fubstantial baskets, but cost $\$ 10,00$ per thousand more than Beecher's, and he is inct a s sou
eoach trat very few or them could be proeured, as he bad them all to make after the season oom-
neneed, and the . hall- pints were not made until
ater the close of the scason. Ther the close of the season.
The Americian baskithas given good satisfaction
this eeabon, particularly when packed in theclr own tyle of crates. When sent in tight chests they are
better than any others. They are making a third. nart jasket that is very neat, and well adapted for ets in our market, and about the only ones worth fnse to buy any of the tight chests, or gift box
arrangemente. The gift boxte are a nuisance in our ealers can afford to sell them at 5 per cent. on

## VARIOUS SELECTED RECLPES.

 To make root beer, take a quantity of sarapaprillaroots and sassafras bark and some hopg, and boil till the streugth is sxtraneted. To three gallons or the the
llquor, alter it is strained, add oue onart of molasees and a enp of yeast. Aftet standing in a w warm place
eight or ten hoara, struin again and bottle. It will be fit or or nse the followiug day.
For ginger beer, take one
spoonfuls of ginger, put into a pail to be half tilled with boillng water; When well stirred together, fill
the pail with eold water, learing room for one pint
of yeant t, which must not bo put in till luke-warm. it in the emoring.
For sprucen becr, take threc ponnds of sngar, four
gallous of water, one ounee of gluger, a little lemon peel, or essenee of lemon, and a llttle essenee of ed, bettle up closo.
Mend is made by dissolving one part of honey in Mead is made by dissolving one part of honey in
threc of bolling water, tlavoring it with spiece, and
adding a portlon of ground matt, and a piece of toast To Freshies sitr Fishi, - Many persons who are
in the habit of freeshening mackerel, or otber salt dish, never dream that there is a right and wrong way
to do itr Auy person who has seen the process of
evaporating golng on at the salt works, knows that

who have contributed to this department of the
lưat, that econom hurat, that economy of time is greatly to be de-
sired in the management of domestic affairs, 1 send
recipe, which was given me a recipe, which was given me by a frlend, and which
I find a great saving of time. I advise all who arc tond of salt-rising bread to try lt , as it will enable
them to bake their bread twice as quiek as by the Rallsoad Yeastr.-Onc teaspoon saleratns; one
of ginger; one of sugar; one of salt. Pour on the above articles one pint of hot, not bolling watcr
Sirit the whole thick with coarse \#lour. Let it rise. as ubual. Put in three tathlesploonfuls of the above,
nd by the time breakfast is over por Coloning Madoer Ren. - Take oue ponnd o
madder for every two pounds of yarn or cloth madder for every two pounds of yarn or cloth
soak the mader in a brass or eopprer kettlo ove
night in enough wwarm watcr to eover the yano
goods yon wish to color; next morning put in two ounces of madder componad for every pound o
madder you have souked; then wet your yarn o
eloth in elear water, nod wring it out after whicl put it in the dye; now put the kettle on the fire,
and bring it slowly to a zealding heat, which will
take half an bour; keep it at this heeat about hall dark one - the color depending upon the time it
remains in the dye. When the color is mude, rins the eloth immediately in cold water, and it will then
be fliished. - L. S. B. Woupoca, Wis A Coonse Drink.-As ncarly crery person i
inquiring for some coollog drink danring this ho
wanther, we publish the following recipe fer handing ns by a ppysieing of this elty. It is is an
hiflervescing drink, but far better than soda water, unecs of tartaric aeid, two pounds of white sugar,
the juiee or balr a lemon, and three pluts of watcr
ooil then cold andem the whiter five minntes, and whiten nearl alf a cnp of llour, and half an onnce of essence of
wintergreen or other ilavoring Botle mand keep it
n a coll place. Take two tablespoonstol of this syrup for a tumbler of water, and add one-qnarter o
a teaspoonful of soda, stir it and then drink. - Syro

## HORTICULTURAL NOTES.

|  it feeds on thc upper part of the leaf. $* * *$ The apple borer and one species of curcalio have been found In a few plaees. Grasshoppers and crickets, and the army worm, have at times been uestructive, not orer any exteaded area. The wheat Hy will not imported, though some new parasite may be nolversally reerenlcd. Vegetablcse are as seet but little affected by disenses or inseet parasites, but the forece eultivation by market gardenels must lead to their productlon." <br> THE CLARKE RASPBERRY. <br> Tur ealtor of the Practical Farmer makes the following notes of that variety, after having visited a large plantation of small fruite in Now Jerses: It was probably a lietle after the helght of the hich alone there arc 30 acres, haviog been mostly ed to be in its prime. This varlety is rapididy gaining In public favor, and, as there werc about ive acres or it, its productiveness, babit of growth, size, qualts, etc, were very fully examinied by the com pany preest, amoug them being Crakips Downing and A. M. Fullers ur New York. The Clarse in 1585 , from the Ealstarf. While not guite so henvy a bearcr as the Philadelphla, we ehould call it an excellent bearer, some of the caness beting heavilly load- ed, whilc the llavor, color and appearnce were decidedy in its favor, and snperlor to anything we saw among many other yarieties in frinit. The color ib a light crimson-the most popular color for a rasp. berry; and on aceonnt of this, and also its suyerior market at 75 ceots per quart- - the Philiadelphia and other varieties hriugiyg 30 to 40 cents. The Clarke does not uppear t to ripen count would suit well for tho family garden. It leaves arc rather pecullar, being of a deep green color, thlek, coarse and uucrenly serrate, and are so tongh as to endure the lot weather in summer withont injury Cornetin perfect hardinesss - having stood 10 to 15 derrees below zero without protection - It will be seen that the Clarke has the elements of a dirst class frit |  |

| perfeet derclopment and early ripening. Under the gnidance of the Hou. E. B. Potrle, to whom we |  |  |  |  |
| gnidance of the Hou. E. B. Potrle, to whom we are indebted for many conrteous favors, we spent a few honrs among the vinegards. These are chiefly in and close aronnd the village of Naples, which is |  |  | assertion that it will drive the Intter from one markets when the eupply becoraes suilicient. | 9 Come ap here |
| a few honrs among the vinesards. These are chiefly in and close aronnd the village of Naples, which is sitnated four miles up the ralley, rising from the |  |  |  |  |
|  |  |  |  |  |
| west direction. The bottom lands are exccedingly rich and beautiful, and are devoted chietly to grass and corn, bat about one handred acres near the vil- |  |  |  |  |
| and corn, bat about one handred acres near the village are made of stone debris swept down from the highland by torrente, and on these the vine floarishes. Most of the pinejards, however, are on thehillsides west of the valley, - one thousand acres, it |  |  |  |  |
|  |  |  |  |  |
| is estimated, being already under fruit. Screral thousand acres of cqually choice land remain to be planted. The depresilon of this valles is some twohnndred feet more than that at Hammondepport, and |  |  |  |  |
|  |  |  |  |  |
| the hills rise avove it to an altitude of a thousannd feet. The soil is clay well mised with slatc or ehale. Some of the vincyards are eo corcred with small stone that the foot can scarcely tonch the soil. South of the village there is more sand aud less stone. |  |  |  | set off on this wise:-" "As for those girla who really |
|  |  |  | $13,$ |  |
|  |  |  |  |  |
| Naples is famous for the perfection Which the Isa-bella grape attains in its tinegards. This variety was the one irst eultivated here, and it has since been a favorite. Other kinds succeed well, and are being plauted relatively to a greanter cxtent than formerly. The Diand is one of the most promising; |  |  |  |  |
|  |  |  |  |  |
|  |  |  | by addressing some of the nurserymen who advertise in the Rural. |  |
| the Delaware also succeds inely. Other kinds are eultivated, but it is doubtfal if ans will pay as well as the ones mentioned. Some features in the eystem of culture are peculiar to this valles, and we |  |  |  |  |
|  |  |  |  |  |
| doubt if they are ns promiuent in any other grapcgrowing locality iu our country. The vines are trained on high trellises and the rows are wide apart, sisteen feet in many instanecs. In orler to olltain |  |  |  |  |
|  |  |  |  |  |
| must be left on the vines. They are trained fanform, and the trellis is loaded with clusters nearly to the topmost wirc. It is like the old-fashioned |  |  |  |  |
|  |  |  | visable to undertake the work on a large scale. If the question is fruit or no fruit next year plant in Anguet otherwise delay till springs |  |
| plenty of room on the trellis, and the wide space for the expansion of the roots enalles it to ripen its load of fruit. We believc this ssstem of training is |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
| day, but if one findes fault wilth itat Naples they point to the results in quantity and quality of fruit and healthiness of vine, and it is an answer not easy to | C. L. Hod Hos writes s s from |  |  |  |
|  | "A ilight rop ot truitit in inesranc Conaty this season. |  |  | Cucumbers for Winter Use.-Cut yonr cueurabers; then add onc third onions, sliced very thin; salt them plentifully, and mix them well. Let them lay six hours; then put them in a cullcnder and drain four hours. Spice them to the taste, anc cover with cold vinegar. To cvery two gallons pat two tablespoonfuls of ground pepper, quarter pountis of mustard, cloves and allspiee to suit your taste, half pint of good salad oil, and as much vinegar as will cover them. |
| healthincss of vine, and it is an answer not easy to pnt aside. <br> Mr. Porthe is one of the pioneers of grape cul- | aboat |  |  |  |
| ture it tuit valey being the frit to plant a vinagard |  |  |  |  |
| ond |  |  |  |  |
|  |  |  |  |  |
|  |  | -th |  |  |
|  |  |  |  | Phesminvad Atrysa.-Core and parc a dozen goodsized apples and eut into eighths ; make a syrup of a pound of sugar to halr a pint of water; let it boil, aud put in as much apple as caul be boiled withousbreaking; remove them carefully when tendec; after all are done add a little more sugar, boil up? aud flavor with vanilla or lemon, and turi over the apple. |
|  |  |  |  |  |
|  |  |  |  |  |
| siner |  | terrr |  |  |
| a German vintuer, mas remarkab |  |  |  |  |
|  |  |  |  | To Mane Chocolate. - Two small squares of choeolate, cut up tine, aud pont into the chocolate pot; turn on two eups of boiling water, stir it up, and set it to boil; then add two cups of milk, and sugar to taste. Let it boil up once. |
|  |  |  |  |  |
|  |  |  |  |  |
| evenly loaded thronghont their whole extcnt. Bnt the most remarkable feature was the great number of perfect or eharaeteristic clusters. At the present date we think Mr. B. might safcly challenge any locality to exhibit as line a show or Delaware grapes. |  |  |  | FOr a Condial.-Three pounds ripe blaekberries; one pound white sugar; let them stand twelve honrs, press the jnice and strain it. Add one-thire of good spirits; to every quart one tea-spoonful of finely powdered allspice. It is at once fit for use. |

TORTHOULTURAL.

 the price will
entirc Season
Some Doolittles were received rather earlier thar the Ant werpg, from Sonthern New Jefres, but there
proved to be int ititue demand for them at any price as straw berries were stilum plentry ynad cheap. After
the Antwerp were ont or the market, the Doolittle
. urrived in large quantitics from Central New Yorl

 cts. per quart was all they would yive Even al
this price there was more ofitered than they eoald malke nse or, and some were sold to the peddien
As was stated in a former article, this berry is not popular with our citizens, and very few of them are
consnmed in our city. consnmed in our cill Some rery fine Clirk Raspberries were reeeive
and sold readily at 68 ets. per quart. They earrie
well vell. The Pbilladelphia was more plenty, bnt sol
or about 25 cts. per quart. These berrice do no bear transportation as well as either of the above
and the fruit being irregular in shape does not look as fine on arrivalas is it realliy is. This variety is val
ned by the sirap dealers on acconnt of its richnes the slzc or shape being no objections to them. Gooseberries have also becn very scarcc and high
beginning at $\$ 4$, the prices ran mp to 86 per bnshel beginning at $\$ 4$, the prices ran $n \mathrm{np}$ to 86 per bnshel
Wliere they remaned antil the close of the scason
This berry is used in large quantlitics by the pie bakcrs. rule of light crops; in faet, there never has bee
such a small quantity of them reeeived in onr mar sct. The priee at the start was 12 cts., and the
reaehed the enormons price of 23 cts. per pound athough 18 and 20 cts. was the general price a
vhich they were sold. The preservers purchase an they could proeure at is cts. As a general thing our city ladies went withont enrrant jelly this sed.
son waiting for the price to lower. They waite cto long. Cherry crrrants werc sold from 18 to 2 ,
cts. pound. Thes were also very scarce. Tha demand for this fruit inereases every season, and
full crop wonld be hailed wwlth plesarure by thon and crop woald be hailed with pleasure by thon of it this year. Let me again remind farmers hiv
at a distance from our city that this rruit can sent in good order by using grope boxes, packed in
Blackberries解 larger than the New Jersey, which was very light,
for some growers consnme their entlrc erop. The the first of July from Dela ware, and sold rrom 25 to to so cts. per quart. The ealtivatell varicties an.
ived about the midde of the mouth, and sold fron 0 to 45 ets. Fer ynart. Un the slst some Dorehe ittion and sold readily at 45 cts. This friit wal well ripened, and though not large was greatly ad verage at to ets, per quart. July 21 th receive some very tue Wilson's Early from WM. ParY's,
Cinnuminson, N. J., which sold readily at 50 cts. per nart, and cootiuued to sell at that priee the entir a great deal of attention from all parties. In sizu
compared with the Lawtons from the same farm, onld state that it was twoothirds largor and ca rely upon this frult as as snperior berry. New Jer fll are far from 35 ct per quart. The staten IEland crop was laryer and
fruit better, and sold higher. Of the Kittatinny can say nothing, for I sold none of them, nor has the
sale of thicin eome under my personal observation,

STRIPED bUGS-CUCUMBER VINES.
h. Capron, Paris, Province of Ontario, append Jne leval great complaiuts abont the striped cu. 0 the young vines. The New York Sun recomnended feeding them by planting radishes or someway is to destroy them root and branch, which is
asily doue. As soun as the erop is sathered from he vines, pull them up ana baru them all up clean won I tirst tried this a few ycara aro, there wa eighbor ealled on we at that time, stating that hi im I had not onc din my garden. He would not beHeve it 1 offered bim ten etirts a bug for ail h minking be would snalke a good job of it, and look plete enucesss. Tell the sardeners to try it. It wonld

## ACKNOWLEDGEMENT OF PROVIDENCE.

 A urfrup error of the eye, a misguidance of thehand, a slip of the foot, $a$ starting of $a$ horse, hand, a mist, or a great shower, or a word unde-
sndacn migedly cast forth in an army last turned the tide
sign signedly cast forth in an army has turned the tide
of victory from one sile to another, and thereby
隹 disposed of empires and whole nations. No prine
ever returns safe out of a battle but may well remember how many blows and bullets have gone by
that might casily have gone through him; and what that modd unforesen chancés of death hc has secn
intured aside, which seemed in a full, ready and direct career to have bect posting to him. All which
passages, if we do not akknowledge to have been guided to their respective ends and eflects by the
eondnct of a superior and Divine fand, we do, by the aame assertion, cashier all Providence, strip the
Almighty of His noblest prerogative, and malke Almighty or lis noblest prerorative, and mak
God not the governor, but the mere spectator of
the world - - Dr, Sooth.

| LIfe is short and art is long. In the seas sphere it is conecded that the powerful min those who rigoronsly confine themselves department of thought. Newton cultivated s and neglected literature. Kant wrought is quicksilver mines of metaphysies for fifty year was happy and mighty in his one work. Thes made epochs, bccause they did not career ov whole encyclopredia. And the same is trac sphere of religion. The giants in theology dared to let many books go unread, that thes be profoundly versed in Revelation. And the $m$ men in practical religion, the reformers, the ively evangelical elements of Christianity, and application to the individnal soul, enough more than enongh, to employ all their powe |

|  |  |  |
|  |  |  |
|  |  |  |

 Don't keep your cyes on the stars and stumble Black your own boots and bid every man black
his. Kecy your own lands in your own pookets.
 of blessed womanhood, beneitb thas Hozue of Love The name of lady beconcs her; cullico brtnge from her no sneer, na scream! Califeo, - What a host o
ewels and treasures it covers! Starched or un tarched, it's my tavortie. This girl will wear a
bat towice without retrimminy! Is shc poors so much the better, then commence together; work,
make, , geep, enjoy together. And when we may
talk together as old men she will be with you.

 Whine hare yon bee

What did yon here?
Tha rose to a appeax
fearat the woodis tell

| Vanole, dear Nanice |
| :---: |
| O tuke me with you |

Corna and to liseen
dunt seca as syou lot

The musie will die
TALKS WITH YOUNG MEEN. - No. IV.
resurrection. It is excited, boastiug, egotison childhood is lost in the stiallow of its present orief loftincs8. It assassinates poverty, courts God-
liness under the sua and stabs it undus the moon, atters knowledge to keep secret its own igmorance.
Cha raeter never dies; $i t$ ts born to live. It is uever eyond improvement. Man makes his claruetor, and his character preserves hitw. Little promises,
little devts, lititle wordis aud lititie netis are small in thembelvcs, but they are the very weights we
throw in the balance over against a man's reputation. Oae uoble deed doesn't establish truc nobil-
itt. No man can je trusted with the cares of a
and igh station until he has proven himself carable
nd lonest in lower ones. Better see him swim and boest before you bid himm try the river.
the brook bet,
And yeme men begin to fise omly when Fate seeks to pull them down. Difiticulties avake
them; and what to others seems certan dofeat, is
all that terpes them to win the battle. True bravery nd true nobility are shy, nuassuming. In ts the
raitor who boasts of his loyalty, and the villain taitor who boasts of his loyalty, and the eillain
tho modiftes his honesty! Honor " vaunteth not Who itself," looks crery man in the face, fearing none
asketh no advertishng and cunnot be llattered. Boys, remember these little thinga, aud don'
boast of your honests. Boost not at sil! And boast of your honesty. Boast not at air! And
think it poor philososphy to lend a man found dollara to
by way of enticing him to pays the one he he already
owes sou. Weigh your promiscs well, and when oves you. Weigh your promisce wevell and when
owou have made, keep them, no matter what it costs. Judge others by what they have done, not by what

| AGRICULTURAL. |  |  |  |
|  |  |  |  |
| There are fast nnd slow mon in all trades and pro- fessions, and among farmers the classes are quite |  |  |  |
| constant cry is progress, whech, with them, sim-ply means change. If such men hear of a very one |  |  |  |
|  | by way of letters which shouk be read in the clnb. |  |  |
| operation in cranberry raising, in thes go for crau- berry swamps, and ridicule or pity all who are |  |  |  |
|  | weekly reports were read by $9,000,000$ of people, andthis accomplishment is only the beginuing of whatit slall be. The future beholds it as the ecntral |  |  |
|  |  |  |  |
| claim to consideration and respectful defercnce. It is owiag to the mistaken notion that change is nccessarily progress thet so many rnsh into new |  |  |  |
| felds of production, never pausing to consider |  |  |  |
|  |  |  |  |
| tinnance in the groove which has been foand pleasant in itself and remmerative in its results. |  |  |  |
| The "groore" farmers musi be content to rest nader a free application of zarcusm from the "pro- gressionists;" bat, even theae, when the exeitement |  |  |  |
| gressionists;" bat, even these, when the exeitement to a high pitch, will be thankful that some drag or | President, was richly descryed. A more judicions chairman never presided over suclı a body. There |  |  |
| $\begin{aligned} & \text { check was interposed to regulate an onward velocity } \\ & \text { likely to ultimate in a disastrous smañ-up. Pro- } \\ & \text { gress is a good watchword, as well in farming as in } \end{aligned}$ |  |  |  |
|  |  |  |  |
| gress is a good watchword, it is not always safe to morals and religion, bnt it assnme that, by jnmping from an old track to a new | and anon, many of its members have retrogradedback to its most primitire era, doubling, dispating, |  |  |
| onc, we are certain to mbe it. Beemate one farme <br>  <br>  |  |  |  |
|  | ignoring all progress, making ap in dogmatic asser- tlons what they lacked in knowledge. Honorable |  |  |
| have glided smoothly, for a road that by over-travel is likely to end in mire |  |  |  |
| There is ample opportanits for improvement, without making rash changes in prodncts and modes of cultivation, and that farmer is likely in | was its master spirit and controlling genins while be lived. If any ouc donbts this, let him read its |  |  |
| so far adheres to a groove as to produce a good rari- | dideme |  |  |
|  | 为 |  |  |
| cty of commodities snited to the raricd wants of those who are cngaged in other callingrs. If a new iroplement is presented, superior to the |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  | lished by the experiments of Prof. Males and scores of other Intcligent farmers. Bot lately a leared |  |  |
|  | doctor of the el ab has discovered that "there is ncither economy, humanity or morality in cookjug |  |  |
|  |  |  |  |
|  |  |  |  |
| Tioss uhb ire on farms emernangang good see <br>  snow for inling hueir wood.zbeds with frel for | lum." What evidence that a cow in a state of natnre (or wild) ever fod mpon dry grass! This |  |  |
|  | must have been when cows were highly civilizedand had the wise forecast io lay up their food forfuture ase! The wild caltle in our day have no |  |  |
| jear'ミ ase, No portion of a farmer's buildinge pays better or is more convenieut than onc for storingwood. It need not be bailt specially for the par- |  |  |  |
|  | such remarkable reasoning powers, and only know enough when the grass becomes tough in the North |  |  |
| pose, but with a little extra expense rau be wad capable af storing many things which are too ofte | (tis) |  |  |
| difticult to Ind. One end of the strncture should | did |  |  |
|  | this illuminated cluts have swang back still fartherinto lhe past and ask, with a javeaile thirat forknowledge, "Who knows that catting hay or coarsc |  |  |
|  |  |  |  |
|  | fodder is an economy and will pay they will next ask, "Who Enows that blood and breed Las anything to do with the qually of ani- |  |  |
|  | conomical to winter cattle in than the pureatmos-phere around a straw stack?" In fact, no one can |  |  |
| clear them of limbe aud draw or snake them bodily |  |  |  |
| sulit them for use. When the gronnd is frozen and er olled with same a cr where the distance is considerable, will draw | (eater |  |  |
|  | of about the same weirlit, five oi them upon twenty- | ments except intcligent hsrd fork and economy,getting the cholcest of secds regardless of cost, andthen planting them rerardlesa of cultivation, grow- |  |
| tree making a cord of wood, more or less, with the greatest ease, especially after a path for the log or tree has been once broken and rendered solid by a |  |  | - + .1.... |
|  |  | Log the rariety of fruit called sonr Tart seedings, auad sveteciug it with sugar, ponan for pound, |  |
| s pressing to be done, to draw three or four trees <br> to the wood-house, leaving them somewhat apart |  |  |  |
|  | months, that those fed upon ent hay liad still gainedapou those on uncut hay. Here was a saving of at |  |  |
| to be done by the teamater, and then chop, split and pile away in the shed what is on hand. This gives room for another installment, and so on till |  |  |  |
|  |  |  |  |
