- Tight binding may cause shadows or distortion along interior margin/
La reliure serrée peut causer de l'ombre ou de la distortion le long de la marge intérieure
- Blank leaves added during restoration may appear within the text. Whenever possible, these have been omitted from filming/
Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments:/
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

			✓				
12X	14X	16X	18X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

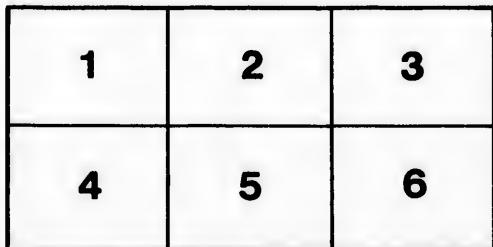

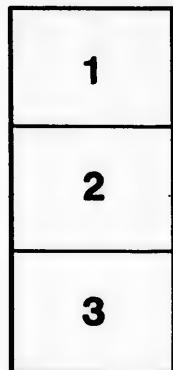

New Brunswick Museum
St. John

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right, and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

New Brunswick Museum
St. John

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

NEW YORK LIBRARY

There will be four eclipses this year, in the summer following:

I.—The first will be a total Eclipse of the Sun, beginning at 5h. 5m. 57s. mean time, in the evening; moon's latitude, 46° 30' S. south, ascending, and therefore invisible here.

II.—The second will be of the Moon, April 28th, partly visible, as follows—Beginning at 7h. 50m. evening; middle, 9h. 10m. evening; end, 10h. 40m. evening. Double eclipsed, 7deg. 51m. on the Sun's northern limb.

III.—The third will be an annular eclipse of the Sun, September 18th, as follows, beginning, 3. 30m. evening; middle, 4h. 51m. evening; end, 5h. 0m. evening. Double eclipsed, 10deg. 51m. on the Sun's south limb.

IV.—The fourth and last will be a partial eclipse of the Moon, October, 3d day, morning, invisible.

and two of the Moon, in

the summer following:

LIGHT HOUSES.

Commissioners for Light Houses in the Bay of Fundy.
—Robert W. Crookshank, Thomas Barlow, John Ward,
Junior, and Lauchlan Donaldson, Esquires.

*Commissioners for Partridge Island and the Beacon
Light Houses.*—John Ward and L. Donaldson, Esquires.

Cape Sable Seal Island Light.—The first Light in approaching the Bay of Fundy, is on the South Point of the Seal Island. This Light is elevated about 80 feet above high water mark, and may be seen in approaching the Island from any point of the Compass. A very dangerous Rock, under water, but upon which the sea always breaks, called *Blonde Rock*, lies about 2 miles S. S. W. by Compass, from the Light House. Between this rock and the Island, there are some dangers—the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

Brier Island Light.—In advancing up the Bay, the next Light is situated on Brier Island, about half a mile N. E. from the N. W. point thereof, with an improved Lantern and Lamp. This Light will therefore be much more beneficial to the trade of the Bay than formerly.

Annapolis Gut Light.—The next Light on the coast of Nova Scotia is placed on the West side of the Gut of Annapolis—from Brier Island North Eastward. The coast is very bold and not indented; the Light is therefore chiefly intended as a guide into Annapolis Basin. The Lamps and Lanterns were renewed in the Spring of 1835, and reflectors furnished, so that this Light is in high order.

NOTE.—The above three Lights are each single, fixed, and show **WHITE** lights.

Gannet Rock Light.—This Light bears from the Light on Brier Island, N. W. $\frac{1}{2}$ W. 21 miles. It is intended to warn vessels of their approach to a very dangerous range of shoals and ledges, which extend from the old Proprietor to the Seal Island off Machias, a distance of about 20 miles.

Bearings from the Gannet Rock Light House.—

To the Old Proprietor, which dries at $\frac{1}{2}$ ebb, (very dangerous) E. by N.
 $\frac{4}{4}$ N. 7 miles.

- " Black Rock, (always above water 25 feet,) off White Head, N. E. $\frac{4}{4}$ E.
- " South West Head of Grand Manan, N. W. $\frac{1}{2}$ N.
- " Northernmost of the Murr Ledges, (dry at two-thirds ebb) N. W. by W. $\frac{4}{4}$ W.
- " Southernmost of ditto, called St. Mary's Ledge, (always out of water,) S. W. by W. $\frac{1}{2}$ W.
- " Machias Seal Island Lights, distant about 13 miles, W. by N. $\frac{4}{4}$ N.

NOTE.—Between the northernmost and southernmost of the Murr Ledges, there is a range of dangerous rocks and shoals, many of them always above water, and which extend westward from the Light House about 4 miles; from this range, farther westerly, about 8 miles, lies a dangerous breaker, called the Roaring Bull. This may be avoided by keeping three remarkable headlands, near the S. W. end of Grand

Manan, open.—The red glass having been removed from the *Lantern*, there is now a *flash light*—*WHITE*—and three times in each minute.

Head Harbour Light.—Next in order after passing Grand Manan, is Head Harbour Light. This is placed on the N. E. extremity of Campo Bello, and is a guide to vessels entering the main channel to West Isles, Moose Island, and the inner Bay of Pusanmaquoddy; it enables vessels also at all times to enter Head Harbour—it is a fixed *WHITE* light.

Point Le Preau Lights.—Upon this projecting Head Land, two Lights have lately been placed, one above the other, and distant 18 feet. Both Lights can be seen from every point of the Compass, where they may be useful—both are fixed and *WHITE*.

Partridge Island Light.—This Light, at the entrance of the River and Harbour of Saint John, having been established upwards of forty years, requires no particular notice, further than that it is a fixed *white* light.

Beacon Light.—Within Partridge Island, and upon a Spit or Bar, which extends about half a mile S. S. E. of Sand Point, and which dries at two thirds ebb, stands the Beacon Tower. Upon this Tower a Light is established, which is eminently useful to the coasting trade of Saint John, and to all other vessels having pilots on board, as it enables them to enter the harbour at all hours of the night. A fixed *WHITE* light.

Quaco.—A revolving *WHITE* Light is placed on a small rock off Quaco Head, showing twice full and twice dark in a minute. This Light can be seen from any quarter where a vessel can approach.

West Quoddy Light.—This is an American Light, and is placed on the West side of the entrance into the Saint Croix by Lubec and Eastport;—a new Light House has lately been erected here, and the light much improved.

Two fixed *white* lights, upon the Machias Seal Island, were put into operation in 1832—they are elevated about forty-five feet above high water, and bear from each other E. S. E. and W. N. W. distant about 200 feet, by which they will be immediately distinguished from all other Lights upon the coast, (British or American)—the following are the bearings from them, viz :—

- To the Southernmost Murr Ledge, (St. Mary's) E. S. E. easterly
- " Gannet Rock Light, E. by S. $\frac{1}{4}$ S. 13 miles.
- " Southern Head of Grand Manan, E. by N. $\frac{1}{2}$ N.
- " Northern Head of Grand Manan, N. E. $\frac{1}{2}$ E.
- " N. E. Rock, distant 2 miles, N. E. by N.
- " Little River Head, N. by W.
- " Libby Island Light House, (American,) N. W. by W.

Vessels in standing in to the Northward, between these Lights and the Gannet Rock, should tack or haul off the moment they bring these Lights in one, as they will then not be more than three-fourths of a mile from the Murr Ledges, if more than 5 miles to the E. of the lights.

TIME FOR GOING THROUGH THE FALLS.

(NEAR THE CITY OF SAINT JOHN.)

The Falls are level (or still water) at about $3\frac{1}{2}$ hours on the *flood*, and about two and a half on the *ebb*, which makes them passable four times in 24 hours, about ten or fifteen minutes each time.—No other rule can be given, as much depends on the floods in the river St. John, and the time of high water or full sea, which is often hastened by high winds, and in proportion to the height of them.

RATES OF CARRIAGE IN SAINT JOHN.

District.	First			Second			Third			Fourth			Fifth		
	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.	s.	d.

and the north line of Duke street, and including King-street to the westward of the west line of Germain-street.

Second District to comprise all that part of the City between the North line of Union-street, and South line of St. James's-street, which lies without or beyond the First District, to the Westward of the East line of Charlotte-street.

Third District to comprise all that part of the City which lies without or beyond the Second District to the Westward of the East line of Sidney-street.

Fourth District to comprise all that part of the City, lying without or beyond the said Third District, to the Westward of the East line of Carmarthen-street.

Fifth District to comprise all that part of the City, lying without or beyond the said Fourth District.

PUBLIC PORTERS AND HAND-CART MEN.

For loading, carrying, and housing, any goods or any other articles on any hand-cart, from the Market-slip in King's and Queen's Wards, or from any other place within the limits of the first district, to any other place within the said several five districts, the rates of prices are as follow :—For the first district, three-pence; second district, three-pence half-penny; third district, four-pence; fourth district, four-pence half-penny; fifth district, five-pence.

Rates of Pilotage,

Established by a Law or Ordinance of the Common Council of the City of Saint John, passed July, 1835.

Five Shillings per foot, for bringing any ship or vessel into the Harbour of Saint John, and mooring her in a safe place or berth, or securing her alongside of one of the wharves; and five shillings per foot for removing and taking any ship or vessel out of the harbour.

In cases where Pilots shall be detained on board of vessels, under and by virtue of the Quarantine or Health Laws of the Province, they shall be entitled to demand and receive from the Masters of such vessels, the sum of Ten Shillings per day, for every day of such detention, in addition to the allowance aforesaid.

Coasting vessels, going from one part of the Bay of Fundy to another—British or Foreign steam-boats, or British vessels drawing under six feet of water, are not compelled to take Pilots: when employed, they are to be paid according to the rate above mentioned.

For removing vessels from any mooring ground to any wharf, or from any wharf to any mooring ground, or from one wharf to another wharf, and seeing them properly moored or secured, the following rates:—For vessels not exceeding 100 tons, 7s. 6d.; for vessels over 100 and not exceeding 200 tons 10s.; for vessels over 200 tons, and not exceeding 300 tons 15s.; and for all vessels over 300 tons the sum of 20s.

Rates of Wharfage, Established by Act 54, Geo. 6, cap. 9.

For every decked vessel, or vessel of the description called Wood Boats, not exceeding 50 tons, -	1s.	6d. per day.
Above 50 tons, and not exceeding 100 tons,	2	6

—000—

THE MAILS.

In the Winter, a Mail for Fredericton closes at St. John on Monday at 11 A. M.; and for Fredericton and Canada, on Friday at 1 P. M.

For Halifax, Pictou, Miramichi, Richibucto, Dorchester, &c. on Wednesday at 3 P. M.; and for Digby, Yarmouth, Windsor, Halifax, &c. on Saturday at 6 P. M.

For St. Andrews and the United States, three times a week.

Mails arrive at Saint John from Fredericton, on Tuesday at noon; and from Fredericton and Canada, on Thursday at noon.

From Halifax, Digby, Yarmouth, &c. on Tuesday; and from Halifax, Pictou, Miramichi, Richibucto, Dorchester, &c. on Saturday at noon.

From the United States, St. Andrews, &c. three times a week.

—00— Mails are sent and received per steam boats in summer.

STEAM BOAT ARRANGEMENTS.

During the season, Steamers run daily between Saint John and Fredericton, leaving Indian Town (near St. John) at 7 o'clock in the morning, and Fredericton at the same hour. During part of last season, one of Mr. Whitney's steamers pleyed at night between those places, leaving St. John on Monday, Wednesday and Friday evenings, and Fredericton on Tuesdays, Thursdays, and Saturdays.

A Steamer leaves Saint John for Eastport and Saint Andrews every Monday, Wednesday, and Friday morning, at 7 o'clock and returns on Tuesdays, Thursdays, and Saturdays.

For Digby and Annapolis;—Leaves St. John on Monday and Friday morning, at 7 o'clock, and returns on Tuesday and Saturday.

During the past season, Mr. Whitney has despatched a boat to Windsor on Tuesday evenings—returning on Thursdays.

—00— The Annapolis County Steam Boat Company's Steamer "Nova Scotia," has commenced running in the Bay of Fundy, but when these pages were printed her particular route and days of starting were not determined on.

The Saint John Stage Coach Company despatch a Coach weekly between the City and Amherst, N. S. via Sussex Vale, Dorchester, &c.—Leaves St. John on Monday morning at 9 o'clock, and returns to the City on Friday evening.

The Saint Andrews and Saint John Coach Company's Coaches leave St. Andrews on Mondays, Wednesdays, and Fridays, at 6 A. M., and Saint John on Tuesdays, Thursdays, and Saturdays, at 7 A. M.

7th Month.

JULY.

1838.

" How sweet to walk the pleasant fields,
 Where sparkling dew-drops hail the morn,
 The new-mown hay a fragrance yields;
 And thirsty looks the dark green corn ! "

THE ROYAL FAMILY OF GREAT BRITAIN.

QUEEN VICTORIA, born May 24th, 1819.

DOWAGER QUEEN ADELAIDE AMELIA LOUISA TERESA CAROLINE, sister of the reigning Duke of Saxe Meiningen, born August 13th, 1792.

Royal Princes and Princesses.—Augusta Sophia, born Nov. 8, 1768; Elizabeth, born May 22, 1770,—married, April 7, 1819, to Frederick Joseph Louis, Landgrave of Hesse Homburg, who died April 2, 1829, in his sixty-first year; Ernest Augustus, Duke of Cumberland, King of Hanover, born June 5, 1771,—married, May 29, 1816, to Frederica Sophia Caroline, daughter of the Duke of Mecklinburg Strelitz, and widow of Frederick William, Prince of Salm Braunsfels, born March 2, 1778;—Issue—George Frederick, born May 27, 1819; Augustus Frederick, Duke of Sussex, born January, 27, 1773; Adolphus Frederick, Duke of Cambridge, born February 24, 1774,—married, May 7, 1818, to Augusta Wilhelmina Louise, niece of the Landgrave of Hesse,—born July 25, 1797.

HER MAJESTY'S MINISTERS.—First Lord of the Treasury—Viscount Melbourne; Chancellor of the Exchequer—The Right Hon. T. Spring Rice; President of the Council—Marquis of Lansdowne; Secretaries of State—Home Department, Lord John Russell; Foreign Affairs, Viscount Palmerston; the Colonies—Lord Glenelg; First Lord of the Admiralty—Earl of Minto; President of the India Board—Sir John Cam Hobhouse, Bart.; President of the Board of Trade—Right Hon. Charles Poulett Thompson; First Commissioner of Woods and Forests—Lord Duncanon; Secretary at War—Lord Howick; Joint Secretaries of the Treasury—Francis Baring, and E. J. Stanley, Esquires; Attorney-General—Sir John Campbell; Solicitor-General—Robert Monksley Rolfe, Esquire; Judge Advocate General—Right Hon. Robert Culler Ferguson; Paymaster General—Sir Henry Parnell; Post-Master General—Earl of Litchfield; Lord Lieutenant of Ireland—Earl of Merton; Lord Chancellor of Ireland—Lord Plunkett; Secretary for Ireland—Lord Morpeth.

63. How spends your day, Captain Lavish ? A little bit of a pinch is not unusual about these times ; and he that makes calculation on that account is seldom sorry for it. Remember the saying of Spon-ap-Morgan, the Welch preacher—" He that has a coat take heed is the brother of—" It is requisite that farmers have a *good take heed* above all men, in their hope as in the clouds and the sunshine, in the rain and in the fair weather. Their crops are uncertain, and all the fair promises of plentiful harvest may end in blight and mildew. Then look to the idea of March.

A.P.R.I.L.

Now, to work, or not to work—that is the question. Shall a man, pretending to be a farmer, disdain to dirty his hands, and give the whole business to servants, by which means he is sure to come out at the little end of the horn ? Or shall he, himself, take hold of the plough, and guide it on to prosperity ? Shall he be at the head of affairs, handling his tools without mittens, and trusting not to proxy ? I tell you what, friend Longacre, he is a true farmer who bones down to the work himself, puts his own shoulder to the wheel, and recollects not from the tug of business. It will never do to depend altogether on other people. There is a great cry about *help*, and the expense of it, but let a farmer help himself, and cultivate no more land than he can well manage with the help of his family ; let him give his boys, if he have any, a proper education, a farmer's education, not foolishly suffer them to imbibe the false notions that some have, viz. that it is ungentlemanly to know how to handle a hoe or a pitchfork, and that a young man's good reputation depends on the fit of his dickey, or the shape and trim of his whiskers. Get them up early, and inculcate habits of business rather than money spending. Let them know that they were not made in vain, but must work out their own salvation.

M.A.Y.

What of the farmers' daughters ? Are they to sit in idleness, while their mothers are busy about the affairs of their families ? Are they to be indulged in the notion, that they will find no sweethearts, if they are seen milking that odious creature, the cow ? Are they to be made to believe that it is disreputable for a young lady to earn her living ? That industry and gentility are incompatible with each other ? that the fingers of the fair were only made to sport a cambric needle, or to tap the keys of pianoforte ? [Apropos, what senseless stuff do these melody-squeakers bring forth, and call it music !] Tush ! let a farmer's daughter be fitted for a farmer's wife, and then she will do for a nobleman. By no means would I have the cultivation of her mind neglected ; but the fashion of keeping a girl at school all the time is a most miserable one ; for the preceptress, or school dame, is generally a despiser of common sense, and would think it degrading in a lady to know how to cook a dinner of pot-luck. Do not take offence, my fair pedagogues ; I would by no means offend true delicacy. But, tell me, seriously—do you not think it an indecent offence for any one to talk, before the ladies, about fried pork and parsnips, bean porridge and buttermilk ? Look to your daughters, ye mothers, who have had experience, and know well the truth of what is here laid down.

J.U.N.E.

Hail, lovely, lovely June ! fairest month of all the year. It is full of promise, full of beauty, full of pleasure. The verdant lawns, the busy labourers, the feeding cattle, the robin, the thrush, the bobolink ; and then the inimitable flute bird, the *Catalina* of the forest ;

three and a thousand other charms make this month the queen of the year.—“Pooh ! towsh !” says farmer Glumkin. “This is all glib
nonsense and fashionable humbug. I had rather have one month of
September or October, when the crops come in than a thousand Junes ;
and I wouldn't care a fig if your June was struck out of the calendar.”
So it is, and so it will be; we cannot all think alike. Some will look
at the beautiful impression upon a golden coin, and admire it, while
others, totally regardless of external beauty, regard nothing but its solid
contents. It is well that we are not all scrambling for the same thing.
What say ye of the brotherhood, did any of you get into the rubbers ?
Did any of you, in your longing to grow suddenly rich, cast your net
into the fish-pool of speculation, and draw out nothing but *crobs and pouts*? Hah ! far better had you been cutting faggots with a bill hook;
or raking polypod in the bog lands ; for then you would have remained
within the boundary of your occupation.

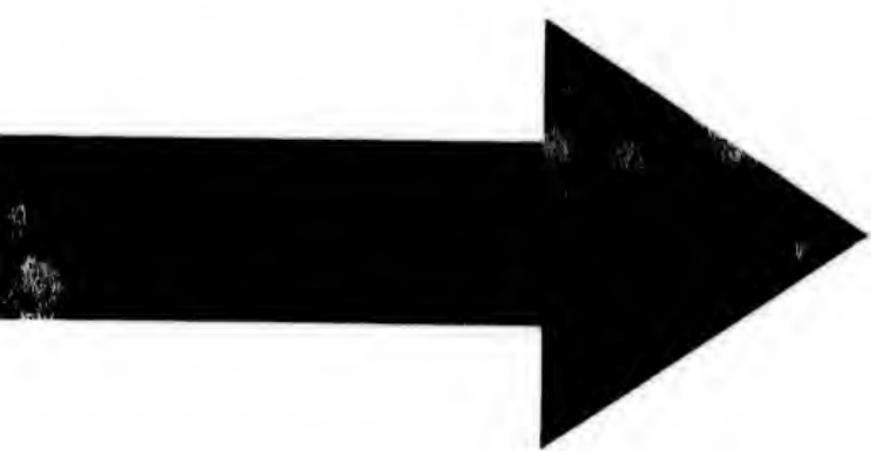

JULY.

Pretty dull doing, Capt. Trudge, nint it ? you are poking in the
dirt here, quite alone ! Your boys that used to be knocking about
upon the farm, and making it shine, I am told, are gone to Canada and
the far West. A pretty piece of business this ! They want to live
easy ; and so they leave father and mother, and this beautiful homestead
of 300 acres, a plenty for them all, and hie away to the country
where but a little labour is required in cultivating the earth, and where
there is more time for pitching quoits, swapping horses, and longing
at the grog-shop. The good old habits must be given up, and new no-
tions and views of things are to take place. Well, never mind, Capt.
Trudge, experience will do its work, and your boys will be satisfied,
we hope not too late, that exertion is necessary to the attainment of
wealth, wisdom, and happiness ; and that an industrious farmer is as
honorable an appellation as is conferred upon any one. But here is
land enough and enough. The worst on't is, our young men have a
silly notion that *dress makes the man*. Rig up—trig up—sprig up ?
O, what a pity to be obliged to put such delicate fingers into the dirt ?
To dig, to muck, to mow ! to wield a crow-bar ! perchance to log a
log-pail ! What if my father, and my grandfather, and great-grand-
father, were farmers. I'll never wear a checkered frock :—“I'll be a
butterfly.” * * * * *

SEPTEMBER.

Crops, crops ! what crops, Mr. Fairsoil ? Now is the season to make
glad the farmer, who has, day after day, toiled and sweat, that the
earth beneath his hand might bring forth her wholesome fruits, and re-
pay the labourer for his industry. Industry ! ay, this is the farmer's
countrysign. Let it pass from man to man, from farm to farm, over
hill and dale, and into every rural retreat. Have you been industrious,
neighbour Stooks, and attentive to your agricultural concerns, or
have you suffered the important opportunities of improvement to slip
by ? You may not be intemperate, you may not habituate yourself to
grog-shop drowning ; still there are those who like much to be in other
men's way, and hang about, and inquire after the news, while their
corn-fields and cabbage-yards are choking up with weeds. I hope you
are not one of these, neighbour Stooks. O, neighbour Stooks, how
pleasant a thing it is to be crowding the granaries at this season !—
“Fill high ! fill high !” But mind ye, this is not the echo of foul
Bacchanal carousal, but the note of the farmer's glee at Harvest
Home. Pile ! pile ! till the ridge-pole of your scaffolding shall creak,

and the deal boards shall "gape into chinks" at the pressure. Heaven be praised for its blessings! "Tis always the way out;"—he that works shall find his reward.

OCTOBER.

Music has not much to do with digging potatoes or laying stone walls; but then a farmer may be musical in many of his operations.—Capt. Tramp can never mow a rod without humming "Home, sweet Home!" Deacon Cooley always drives his team to the tune of Old Canterbury; and my aunt Loix Waxworthy might as well give up the job, and not churn at all, as to think of going on in the business without her accustomed twang of Chevy Chase. The music of the farmer's boy is always pleasant, while driving his cattle to and fro from enclosure to closure. And there is the ever-cheerful milk maid! Ay, many's the time that we have been charmed with her sweet notes, as she bore home the rich treasure from the bonny brindles, and squinting too across the hedge, to catch a glimpse of her cousin Caleb.—Now, it is a very laudable thing to sing at church too, and to chant the high praises of HIM who has prepared for us this beautiful world, with all its wondrous varieties. But there must be some system about this matter of singing in choirs. Grudge not the little expense there may be for instruction in psalm-singing. If your children have voices, it was intended that they should use them in this most delightful of all employments. What! shall not a farmer raise his notes of gratitude to Heaven? Yes, above all others, it is his bounden duty to express his thankfulness.

NOVEMBER.

Hah! a load of wood brought into the City by Capt. Shirk! A very fine load indeed! "Pretty fair," as the saying is. "Not so very fair as you may be after thinking," cried Pat Sly. I then looked again more critically, and saw the deception. I found that Capt. Shirk understood the art of light and shade to perfection, and could so dispose of the various materials of a load of wood, as to make it a most imposing picture. Short sticks, cat-sticks, soggy sticks, and rotten sticks, he well understood how to arrange, to give the desired effect. I imagined that I could see the captain giving orders to his men how to load up. "Peter, my son," said he, "we must make as much as we can, these hard times. Jonas, arrange the long timber on the outside. See, Caleb, that the front and rear look fair and handsome, for, you know, all must be fair, very fair in our way. Jehovah, you know how to fill up in the centre. Let nothing be lost. We must be saving, you know;—he?" Saving, saving—cousin Jethusaphat, for wood is wood now-a-days." Now, this load of Shirk-wood its owner intended to have sold for sound and solid, of full size and dimensions. I am glad that this same Capt. Shirk forms no sample of a true New-Brunswick farmer. I hope our worthy yeomen practice all proper economy.

DECEMBER.

Capt. Ploughbeam and Ben Barleycorn say, When shall we three meet again? When, ay, when? It may not hap again on terrestrial soil; for we "would not live always," and we are assured that in our Father's house are "many mansions," and no doubt, kings, priests, nobles, and peasants, alike inhabit there. But as we have come to the very last sheaf of our binding, and the twilight of evening enwraps us, we will agree, if you please, to adjourn, and Providence allowing, our next greeting shall be held at the happy fire-side of my

bold-faced friend and fellow-wielder of the scythe, and a bold, hardy-
ness, the heartiness, the indomitable, the faithful Tom Gleason; this mind
may now be not slack in well-doing in the mean time. If you should
think proper to tip up a jar of saltnut, the door of the Widow Neenish,
do not let me mean as to allow your imagined generosity deal with a pri-
vate sum of \$100 or 1000. If your pity is excited, at beholding the
poor, fatigued, and destitute family of the imprudent Bob Rank
man, and your compassion urges you to some charitable act on their be-
half, remember that your beneficence is commendable, and that the saying
of "Lukking figures" be surely not your object. Hark! Hoogenraad be-
gins to growl. He hates to hear so much on this subject, and drops
the quivering strings of his money-bag close and close. My friends,
good-bye with all my heart.

BRIEF HINTS FOR NOVEMBER.—As the Farmer's work is now
generally completed, implements should be cleaned, dried, and laid aside. Every farmer should have a building for biscuit, ploughing har-
rows, hoes, scythes, &c. There should be a place for every thing. And
every thing in its place, in order to prevent rusting. It is the best
time for sowing turnips. Tools will last much longer if painted; and now
is a good time to do the work.

When first practicable, plough the ground for spring crops. Look
about for early spring; or you will get in your seed too late. Then
employ leisure time in repairing fences, to prevent hurry next season.
Remember your refuse apples for feeding hogs and cattle during the
winter. They are worth more than potatoes; as has been proved by
experiment and weighing also many hundred cwt. down to the ton each
ton salt pork probably it is essential only to imbed the pieces com-
pletely in salt. Place a layer of salt on the bottom, then a layer of
pork in the usual manner, filling the interspaces, and so on till the bar-
rel is filled. Use plenty of salt; it will not be lost. Salsifre, when
dried should be in very small quantities, say a 400 lb. barrel. Consider a
moderate quantity of sugar.

To cure hams, mix a bushel of good salt with a pound of nitre, rub
the ham well with the mixture, and lay them down. Rub them again
in the few days that they may absorb the salt more eventually. In about
two weeks (double, if the pieces are small), wash them and hang them
up in the smoke house. The following mixture has been recommended
as a food for hams. One pound salt, one ounce nitre, pulverised and
mixed. Add to 10 lbs. of ham, and lay them down, the pieces to be thoroughly
rubbed with salt and laid flesh side up, and suffered to remain three weeks.

THE CABBAGE, a few vegetables remain to be gathered & packed
they should be taken up, and washed dry, drained, and inverted pos-
ition of such as far as they contain, and properly protected. Turnips
and carrots dry out, and become brittle. They may be preserved
in the following way. One side placed down in a shallow dish, the other
buried in a box of earth. Another is to place the turnip a few inches
from the earth, in an upright position, the top and stems buried.
Still another covering over with one wooden board or boards, the face of
one side, and burring these with earth. Another is to invert the whole
turnips, and bury them in a convenient place, precisely as luxating patients
are treated. When put in the sunlight, they will dry out quickly, and
otherwise, in warm weather, they will keep without damage, but
if in a tender shrub, need protection before sunshines, & should always
dry by laid down; stiff upright ones may be wrapped in sacking.

the well with the branches of evergreen. All transplanted bushes soon will also send protection.

A sprouted bed, when the tops are dead, should be cleared off, and a layer of dung one or two inches thick spread evenly over.

Seeds of parsnips, carrots, onions, &c. may be sown in autumn to advantage if done so late that they will not vegetate before cold weather. Early peas may be sown to great advantage, if there is no danger from frost. A writer on gardening, says:—"To cultivate parsnips, sow the seed in autumn soon after they are ripe, by which means the seed will come up early the following spring, and let the plants get strong before the weeds will grow to injure them."

All vacant ground should be ploughed or spaded to be subjected to the action of winter frosts, and to be in readiness as early as possible in the spring.

[*Gossage's Farmer.*]

HINTS TO FARMERS.—Never feed potatoes to stock without boiling or steaming, as this increases their nutritive qualities.

One bushel flax-seed, ground with 8 bushels of oats is better for horses than 16 bushels oats alone, and will effectually destroy the hussars.

Never burn all dry wood in your fire place, nor use a fire place when you can get a stove.

Cut your trees for rails in February, as they are most durable.

Never dew-ret your flax, unless you wish to render it worthless.—Never select your seed corn from the crib, but from the stalk.—Never feed out your best potatoes and plant the refuse, nor sell your best sheep and keep the poorest.—A fat ox is worth more than a poor horse, and does not eat as much—a yoke and chain can be bought for less money than a waggon harness.—Horses that are confined in a stable never have the sluggish.

VALUE OF AN ORCHARD.—I had the pleasure of calling a few days ago on an old and esteemed friend, and a successful farmer, one who does not follow things because they are new, but who first proves and then adheres to them if they are good. He invited me to visit his orchard, one which I have known to be excellent fruit bearing, for more than twenty years. It contains about four acres. From it he had gathered an abundant supply of superior apples for winter use, had put into his cellar some two hundred bushels for feeding his pigs through the winter: had gathered enough of the best cider apples to make a few barrels for boiling into molasses, making sauce, and a supply for vinegar; and the ground was still covered in every direction with the ripe and golden fruit; while but a small part apparently, had fallen from the trees. But what interested me most, was a fine drove of fat-titting hogs, some fifteen or twenty I should think, large, thick, heavy and apparently nearly fit for slaughtering; and yet my friend assured me that his swine had nothing but clover and apples, and a flat supply of the latter but a few days: he not allowing them to go into the orchard, until a supply for other purposes was secured. He was convinced by repeated experiment, he said, that swine would fatten as well and as fast on apples as on any food whatever; but he had made it a rule to feed them for a week or two before killing with corn; as it was the general opinion, it gave greater solidity to the pork. He also stated his belief, drawn from experiment, that good fresh apples during the winter, were as valuable for feeding pigs pound for pound, as Voss' peaches. White potatoes could be boiled or steamed, he thought, probably the potatoes would be the best.

convinced him there was no fair share of my friend's productive farm, that
would yield him near the net profit he would derive from his orchard;
and that the cultivation of good orchards to a proper extent was a species
of sound policy with every one who would derive profit from farming.

RADISHES.—Byman A. Spaulding, of Lockport, showed to the ra-
diated table in the following way. Pit sand was taken from the
depth of seventeen feet, and spread over the surface of the soil six in-
ches deep; on this bed of sand the radishes were planted.

PREVENTION OF DRY ROT IN TIMBER: Kyan's PATENT.

We have perused a great number of official documents and other testi-
monials in favour of Mr. Kyan's method for preventing the dry rot
in timber, and we have been much struck with the success—the never-
failing wisdom, we may say of the application. The discovery consists
in the subjection of the timber, cordage, canvas, &c., to the action of
a solution of corrosive sublimate in water—is the proportion of one
pound of corrosive sublimate to five gallons of water. The effect of
this application, upon comparison with the durability of similar sub-
stances not so prepared, seems to be conclusive. Timber, cordage,
etc., subjected to the action of this solution, have been found perfect-
ly sound at the end of twelve months, while the unprepared samples
have been either destroyed, or exhibited marks of decay. We under-
stand that the additional outlay upon timber intended for ships or build-
ings, so prepared, would be about 10s. per ton, while the timber itself
would continue serviceable for treble the ordinary duration of time.

Horn Radish cut into small pieces and chewed in the mouth, is an
excellent remedy for hoarseness, coughs, colds, and cases of incipient
consumption.

One of the best liquids for diluting ink that has become too thick for
use, is a strong decoction of coffee; it improves its colour, and gives it
an additional lustre.

HOW MEN SHOULD TREAT WOMEN.—A Persian poet gives the
following instruction upon this important subject:—"When thou art
a man, seek to please thy wife; but listen not to all she says. From
the right side a rib was taken to form the woman, and never was
there seen a rib quite straight. It breakes, but bends not. Since then
the place that crooked is woman's temper, forgive her faults, and blame
her not; nor let her anger thee, nor coercion use, as all is vain to
righten her; for she is curved."

QUAKER JUSTICE.—Two Quakers resident in Philadelphia applied
to their society, as they do not go to law, to decide in the following
difficulty:—A is uneasy about a ship that ought to have arrived, meets
B, an insurer, and states his wish to have the vessel insured—the matter
is agreed upon.—A future home, and receives a letter informing him of
the loss of his ship. What shall be done? He is afraid that the policy is
not filled, and should B. hear of the matter soon, it will be over with him;
he therefore writes to B. thus:—"Friend B. if thou hastn't filled up the
policy, then shadn't, for I've heard of the ship." "Oh, oh!"
thinks B. to himself, "unning fellow—he wants de me out of the pro-
mium." So he writes thus to A.:—"Friend A. thou be'nt too late
by half an hour, the policy is filled up." A rubs his hands with delight
—yet B. refuses to pay. Well, what is the decision? The two divided
between them. Perhaps this is even-handed justice; though unquestionably an odd decision.

THE WEALTH OF THE UNITED KINGDOM.	
Property in Land,	£2,315,922,940.
Do. in Houses,	604,782,278.
Do. in Funds, Banks, &c.	922,000,000.
Do. in Canals, Rail-roads, &c.	118,000,000.
TOTALS.	£3,931,666,218.
In, Furniture, Apparel, &c.	£975,874,277.
Farmers' Stock,	654,533,720.
Capital in Manufactures,	201,000,000.
Stocks in Ships, Warehouses, &c.	350,000,000.
Capital in Ships and Trade,	33,973,032.
Capital in Manufactures and Trade, &c.	£5,215,281,000.
Grand Total for Great Britain and Ireland.	£6,186,937,257.
PRODUCE OF GREAT BRITAIN AND IRELAND.	
From Agriculture, &c.	£474,929,068.
From Houses,	40,000,000.
From Ships,	44,470,961.
From Manufactures,	202,000,000.
From Funds, Banks, &c.	35,000,000.
From Horses and Carriages,	13,500,000.
From Canals, Roads, &c.	12,000,000.
	£582,015,788.

Mr. Macqueen estimates the property in the British Colonies to be worth £4,052,200,000, and its produce to be £1,516,015,788. He estimates the "public property" of great Britain and her Colonies at £170,000,000, and makes the property of the British Empire £1,309,137,257, from which when we deduct the national debt, amounting to £772,196,849, leaves a net amount of property of £5,926,040,406. To this last sum the author appends the following note:—"To this sum, and to the value of land, ought to be added the value of property in timber, £3,000,000 yearly, or a capital of £90,000,000." He further says, "The stock in warehouses, shops, &c. in the Colonies cannot be estimated."

Much as Mr. Macqueen has done, and valuable as his researches are, we are not quite sure that he has given to the trade off the value of land. We find no estimate of the value of corn-mills, of which there may be one or two, if not more, on an average, in every parish in Great Britain and Ireland. These are good for at least £6,000,000 of capital. But, nevertheless, he has done to show, upon the best data, the immense wealth and resources of the country. Let us now proceed to a few other subjects.

It is a well-known fact that there are about 10,000,000 h. d. in the number of barges in the country, Mr. Macqueen calculates to be 2,321,502, (of which 561,018 he takes to be riding-on carriage barges,) and estimated their value £66,392,143.

The total annual value of all the cattle, horses, & swine kept for breeding purposes, 1,400,000, and their value £2,500,000.

The stock of sheep is estimated to be upwards of 35,000,000, and their value £6,575,325.

The stock of swine in the United Kingdom is estimated at 1,200,000, and their value the same as the cattle.

The capital in poultry and rabbits is calculated to be upwards of £10,000,000.

Mr. Macques's estimate of the average value of grain is as follows :

Wheat, 20,000,000 qrs. at £6 per cwt. £12,000,000.

Barley, 10,000,000 qrs. at 3s per cwt. 3,000,000.

Oats, 20,000,000 qrs. at 2s 3d per cwt. 6,000,000.

Total Grain, £21,000,000.

The annual value of potatoes is stated to be upwards of £220,000,000. With respect to the annual value of milk, butter, and cheese, we have the following :

Milk, £12,000,000.

Butter, 18,000,000.

Cheese, 7,000,000.

Total, £222,000,000.

Cheshire is stated to produce 11,500 tons cheese, and 1,4000 of which are exported. Derbyshire sends 2000 tons annually to London. The Vale of Berkeley, Gloucestershire, exports 1200 tons cheese yearly, and also 5000 lbs. of whey butter weekly, of good quality. Gloucestershire exports 8000 tons of cheese. There are 5000 tons of cheese sent down the Trent annually, through Leicestershire, from adjacent Counties.

The annual quantity of sheep's wool, long and short, is estimated at 246,700,000 lbs., and its value at £18,976,166.

The value of garden fruits and vegetables (as set down) at about £80,000,000 per annum.

The author says :—"Taking every thing into account, including fish exported, I believe the produce of the British fisheries (exclusive of the Colonies,) by sea and land, is not overstated at £12,000,000,000."

THE GREAT NORTH AMERICAN LAKES.—Relative extent, elevation, &c.—The Ontario is 180 miles long, 40 miles wide, 500 feet deep, and its surface is confined at 281 feet elevation above the tide water at Three Rivers, 270 miles below Cape St. Vincent.

The Erie is 230 miles long, 80 miles wide, 130 feet deep, and its surface is ascertained to be near 455 feet above the tide water.

The Huron is 260 miles long, 100 miles average breadth, 200 feet deep, and its surface is nearly 595 feet above the tide water.

The Michigan is 400 miles long, 50 miles wide, 200 feet deep, and its surface is 648 above the tide water.

Green Bay is about 100 miles long, 20 miles wide, depth unknown, elevation the same as the Huron.

Lake Superior is 490 miles long, 100 miles average width, 200 feet deep, and its surface is 648 above the tide water.

Bottom of Lake Ontario, 262 feet below the surface of the tide water.

Huron, 365 do.—Michigan, 205 feet do.—Superior, 308 feet do.
