Nagasaki Prefecture — Owned by Prefecture — Population 122000
Omura Health Center — Grade C — Location Omura City
Date opened 1938 — Size: BLDG tsubo Land tsubo — Type of construction wood

Date	Visitor	Director	no. Doctors	Nurses PHN	Nurses MW	Nurses CN	Vet. FI	Vet. Vet.	Sanitary Staff ESI	Sanitary Staff ASI	Sanitary Staff ST	Other tech.	no. clerk	Total Staff	Sanitation Bldg.	Sanitation Land	Administration Gen	Administration Clinic	Administration PHN
5 Feb 57	Eto	Dr Murata (acting)	2 (+2 on call)	8	0	1	1	2	1	1	5			31	FAIR	FAIR +	POOR	FAIR	GOOD

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
5 Feb 1957	Inspection visit + Conf. Director (acting) is elderly man + appears to have a limited knowledge of PH. or much enthusiasm. Chest + VD clinic statistics are low - reasons for "other" is comparatively high - (includes many who come for physical exam for employment) Health contacts - discussed compiling of statistics for uniformity with the HC. reports. Home visiting program appears fairly good with TB taking priority. Have treated 4-5 leptic cases with penicillin - "too costly". Improvements given, they have a machine but no MD who can give - (PB goes to Omura rate (1/3)) - Of the newly reported TB nurses can get to about 50%. Travel expenses limited, consequently most home visits are in the city area. Only 1 bicycle for nurses - urged to ask for more in budget. Cooperation w/ private MDs is fair. Old health center building - clinic rooms not too convenient. Hope for new building next year.

6 Feb 57	Ito	Dr Iwata	2 + 1 all TB	12	0	0	2	2	2					44	Good	Good	Fair -	Fair -	Fair -

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
6 Feb 57	Inspection visit & Conference. Only 2 MDs here, plus on off with TB - quota is 5. Statistics on H.S. classes is low. Only 46 pregnant patients carried, expect many go to midwife keep for this, same for VD. - discussed responsibility of VD - TB follow-up. Outside PHN (6) do the TB follow-up in their areas. U.S nurses only able to reach about 30 % of newly reported TB, "travel expenses limited" (for the most distance 4 hrs on train + bus + a walk) 20 days/mo for nurses. Preferably the nurses to do TB follow up only in the city - Stressed TB case priority in home visiting - See statistics for other types of visits - Being nurse file box. Not giving penicillin for syphilis "Kenchi doesn't send it in oil" (Kenchi nurse reports this also happens in other health centers) BCG program is poor "people are afraid of the same test given 2 yrs ago" Ahead re re-assaying of tuberculosis + need for clinic program. Difficulty encountered in giving BCG because of 100 dose size vaccine "patients don't come back on specified day beyond for BCG" - Building is a new rent one but activities + programs are apparently not up to par. Sanitation is good - Referred to literature "Guide for PHN in HC" for better clinic procedures - Director was not in today - conference with other on staff

5 Mar 51	Eto.	"	3	7	0	0	2	1	2			2		36	FAIR	GOOD	POOR	POOR	POOR

★ Code - W. Ministry Grade A or C A = staff over 31, C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
13 Oct 50	This HC is to near City Health Center. Too much duplication of services. Recommend it merge with another Center. RB
5 Mar 51	Inspection visit & conference. Program in this HC is very poor, undoubtedly because of its location, that is within Nagasaki City which is served by the City HC. Its district is geographically an elongated area with poor transportation facilities. A "Branch H. Center" is located in Nagura Mura to which 1 MD, 1 Insp., 1 Lab, 1 Clerk & 1 PHN visit on fixed each week, probably not doing much so far as HC issues are concerned - Statistical report shows very little activity in either clinics or PHN program. Limiting many clinics constitutes only a PHN going out to the Island Units - (not enough training expenses for MD to go). PHN program is impeded by 500 yen/mo. limit on traveling expenses - (fare is 400 yen for one trip into furthest area) 1949 Budget was 4,500,000. and from observations of statistics is poorly spent. Director hopes possibly this next fiscal year to have present Branch H Center in north section, staffed with full time personnel + to establish a similar one in the southern sector. Referred to literature "Skeleton Plan" + "Guide for PHN in HC." for better management of clinics + PHN program. (Note - see card for statistics) EO

Miyazaki Prefecture — Owned by Prefecture — Population 73000
Seto Health Center — Grade C — Location:
Date opened — Size: BLDG 44 tsubo Land tsubo — Type of construction Timber

Date	Visitor	Director	no. Doctors	Nurses: DHN	MW	SN	Vet.: FI	Vet.	Sanitary Staff: ESI	ASI	ST	Other tech.	no. clerk	Total Staff	Sanitation: Bldg.	Land	Administration: Gen	Clinic	PHN
2 May 51	EVO	Dr Iwaki	1	4	0	0	1	1	1		18	1 Xray		21	Fair	Fair	FAIR	POOR	FAIR
				(+ 1 Anticurvosis PHN (apprentice)								1 Pharm							
				(Chief Nurse in Tokyo				course now)				1 Lab.							

★ Code - W. Ministry Grade A or C A = staff over 31, C = Under 31 Sani. and Adm criter - Good, Fair or Poor

Date	Remarks
2 May 51	Inspection visit + conference - small old health center - new construction started on new site, to cost 2,200,000 - 2 other HC's visited. Hospital has maternity dept by IMD, (nutritionist + 3 PHN (no authorized number). Statistics for clinic attendance + nurses home visits is good but their staff is small. No prenatal clinic - pts go to private MD next door - discussed clinic set up. + adv. to other HC or that when new bldg is opened then function more efficiently - apparently my title VD work done. only Rx pts had penicillin for syphilis + then was congenital case - discussed filaria Rx + 246 (penicillin for them). Many pregnant + not much done. Like that right all prenatals get an exam from private MD + before they can get ration card - H.C. district is elongated + transportation means is poor - it also includes 2 on islands with populations of 1200 + 1700. (requires 3 days to visit islands). Immunization statistics practically valid or considered super - also separate record shows +Rx tests to 12,203 (exclusive of) + transients) with BCG & 6,634 given to those "under 30 yrs + not only school children". Small pox vaccination status (last fiscal yr) 6,400 given - 60% under 1yr, 30% 6-12 yr. age group + 10% to adults. Last yr had approx 25 "illegal entrants" only procedure for this is DDT dusting - discussed possibility of small pox etc coming from Korea. Pt's must have "file box" - right all newly diag TB pts at least 1 home visit + about 30% get further follow up, also that the 5 outside PHN do the TB follow up in their areas. Referred to literature "Guide PHN in HC" also "district Nurse" for better management of clinics + PHN program

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
27 Sept 54	Dr Goichi Ikeda
8 Feb 54	Inspection visit + conference. Review of statistics showed by chest clinic attendance, VD attendance & poor TB treatment (5 sessions routine for a Tb (AP) statistics (for H. Consultation) is very high but this is due to excess of those who come for abortion certificates (X-ray). Penicillin treatment for the Luetic AP is only about 2%. They are treating many "other" cases - adv. to discourage use of Health Center as a treatment center. P.H. nurses appear to have good understanding of program, but visit clinic attendances are high the time for home visits is somewhat limited, Low case T.B. program receives greatest emphasis - Inspection of building - plaza is rather old + some clinic rooms are overcrowded - sanitation is fair - Discussed in detail compiling + use of statistics which are at a variance to those kept in the health centers - BCG program - statistics show 431 in Nov + 2089 in Dec - those given to girls parties up to 30 yrs age - BCG. given in HC are not noted on monthly report - Also they hold a BCG clinic 1st Wed of month - attendances 30 - 100. Sanity staff have been active in V.D education program, especially to the big problem of streetwalkers (4,224 Registered) in this city, A survey they made shows the rate of VD is 5.7% in the most walker group who have attended educ. lectures as compared to a 34.9% who did not attend the lectures. (most pts go to city VD dep't in center / town)

13 Dec 195	[illegible]	Dr. Oki	9	14	1	7	6	2	4		13			122 (?)	Good	Good		F. Good	Good

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
13 Dec 195	Statistics of health consultations + mass examination show considerable activity in the health center. Clinics seem well scheduled. Have a trachoma clinic daily but treatment consists only of eye irrigations + eye drops - only early cases are treated - the more advanced cases are referred to eye specialists. Have had no information from MO Minn re treatment of trachoma with safe drugs. Branch health center building construction started today about 2 kilometers away + not in the city - expect completion in Mar. 1951 - will be a class C type + have a staff of 43, to serve a population of 50,000. PH Nursing program appears very good - nurses file boxes show large case-load of patients with TB cases being in majority - Reaction of public + private MDs improving toward PHN program + cooperation is much better. Nurses are doing some VD follow-up - mostly for contact tracing - Penicillin used for Syphilis esp for prenatals + primary cases. Students from 5 mos PHN school are assigned here for 4 wks field experience. Nurses are using the TB case instruction sheet as distributed from KCAR + find it helpful
