JAPAN-CHINA PASSENGER THROUGH TRAFFIC

JAPAN-CHINA THROUGH SINGLE TICKETS

Stations and City Offices, where Booked.

Imperial Govern- ment Railways of Japan	Tōkyō, Yokohama, Nagoya, Kyōto, Ōsaka, Sannomiya, Kōbe, Shimonoseki, Moji, and Nagasaki. City Offices in Tōkyō, Yokohama, Nagoya, Kyōto, and Ōsaka. (Peking-Mukden Line) Hsinmin, Shanhai- kuan, Tientsin and Peking. (Peking-Suiyuan Line) Nankow and Kalgan. (Peking-Hankow Line) Chekiatchouang, Tchengtcheou, and Hankow. (Tientsin-Pukow Line) Tsinanfu, Hsu- chowfu, and Pukow. (Shanghai-Nanking Line) Nanking and Shanghai. (Shanghai-Hangchow-Ningpo Line) Hang- chow.
Chinese Govern- ment Railways	

ROUTE OPEN TO THROUGH TRAFFIC

The route open to the present through traffic is via Fusan, Antung, and Mukden. Passengers will travel by the Imperial Government Railways to Shimonoseki or Moji from their respective departure points in Japan. Passage from Shimonoseki to Fusan is effected by one of the channel steamers run by the Imperial Government Railways. On landing at Fusan pier, passengers will board the through trains, running twice a day between Fusan and Mukden, and proceed to Mukden via Antung, across the peninsula. Mukden is the terminus of the Chinese Peking-Mukden Line, the trains of which come round to the Mukden station of the South Manchuria Railway, where passengers have to change cars. On the Peking-Mukden Line, through trains are run daily between Mukden and Peking (Chengyangmen station). Passengers for the stations of the Tientsin-Pukow Line and beyond have to change at Tientsin. Again for the Shanghai-Nanking Line, passengers will proceed from Pukow to Nanking Ferry or Hsiakuan by steam-launch. The ferry is 1 mile distant from Nanking station and from the ferry station depart principal express trains only. For the Shanghai-Hangchow-Ningpo Line, passengers will change cars at Shanghai North Station. For the Peking-Suiyuan Line, through passengers have to proceed from Peking Chengyangmen station to Hsichihmen station by the Round

City Branch and take the main line trains at the latter station. To reach the destinations on the Peking-Hankow Line, there are two routes, viz., via Peking and via Fengtai. If following the former route, passengers are required to arrange for their own conveyance in Peking between the Peking-Mukden Line station and the Peking-Hankow Line station. Passengers via the latter route have to change at Fengtai, and again at Changsintien to join the main line trains.

QUARANTINE AND CUSTOMS EXAMINATIONS

Quarantine officers are on board the channel steamers between Shimonoseki and Fusan, which, therefore, do not stop for medical inspection. Also to facilitate the customs procedure, customs officers are always on board the steamers to inspect passengers' luggage during the voyage, which saves time and trouble either at Shimonoseki or at Fusan.

Customs examination at Antung takes place in the cars, except for passengers alighting there, in which case the examination is made in the station building. Passengers' attendance at the examination of their luggage is always obligatory.

GENERAL INFORMATION REGARDING THROUGH TRAFFIC

Passengers intending to avail themselves of the present arrangements have to book at the through traffic stations, or at the city offices open to the through traffic, and obtain coupon-books.

The tariff for the present through traffic is shown in Tariff No. 1. A lowest rate of exchange is adopted for conversion between Japanese and Chinese currencies, and when the current rate of exchange fluctuates far apart from the aforesaid rate, the through fares and rates may be adjusted on basis of the Table of Surcharges or Discounts in Tariff No. 2.

The kinds of the coupon-books are as follows:—

1st class 2nd class 3rd class

The through fares do not include express and sleeping-berth charges. Passengers may travel by express trains and use sleeping-berths on payment of the requisite charges therefor.

For the benefit of through passengers, special arrangements have been made, so that seats or sleeping-berths in express trains may be reserved at the respective departure stations for their journey to and from the Peking-Mukden Line. (See P. 15 and 16)

The period of availability of the coupon-books is 40 days including day of issue.

The holder of the Through Single Ticket may freely stop over at any stations on the Japanese Government Railway lines, and at the regular stop-over stations on the other railway lines.

Children under 4 years of age are carried free, and for those of 4 years or over and under 12, children's fares (half of adults' fares) shall be paid.

Free luggage allowance for the present through traffic is as follows:—

For a 1st class passenger—up to 160 lbs.

" 2nd " " — " " 120 "

" 3rd " " — " " 80 "

For children paying children's fares—half the above weight.

Through passengers wishing to unload their luggage *en route* should get at the departure station the certificate for unloaded luggage, necessary for rebooking; otherwise the excess rates shall be charged for the whole weight of rebooked luggage.

Holders of the Through Single Tickets, desiring to obtain refund for the unused portion of their tickets, should get their tickets cancelled at the station or steamship agency at the port, where the farther journey has been given up.

JAPAN-CHINA THROUGH RETURN TICKETS

Japan-China Through Return Tickets are issued at 20% reduction of ordinary fares, between stations open to the Japan-China Through Traffic, with the privilege of prolonged validity of 110 days including day of issue.

Regarding stop-overs, children's fares, free luggage allowance, unloading of luggage *en route*, refund of fares and reservations of sleeping berths and seats, etc., the same rules as for Through Single Tickets apply correspondingly to the Return Tickets.

JAPAN-CHINA PARTY TRIP TICKETS

Japan-China Party Trip Tickets are issued as follows:—
Fares For 10 or more passengers

at 25% reduction on all rly. lines

For 20 or more passengers

at 30 or 50% reduction on Japanese Rly. lines

at 30% reduction on Chinese Rly. lines

Local Rates of Party Reduction on every railway shall be applicable when such rates are higher in percentage than those shown above.

Validity of Tickets 2 months including day of issue.
Routes Return trips between Japan and China via Chosen, or Circular Tours.

Any other information and assistance in planning party trips will be cheerfully supplied by the Traffic Departments of the Head Office, Kōjimachi-ku, Tōkyō, and Divisional Superintendent Offices of the Imperial Government Railways, the through booking stations and city offices, etc.

JAPAN-CHINA CIRCULAR TOURS

For the benefit of tourists from Japan to China, or vice versa, Circular Tour Tickets between Japan and China are issued at 30% reduction for railways and 25% reduction for steamers over the circular routes joining the railway route via Chosen and the steamer routes on the Yangtze and between Shanghai and Japanese ports, roughly as follows:—

Stations, etc. where Booked

Imperial Government Railways of Japan:—

Stations and city offices, where Japan-China Through Single Tickets are booked and Fusan Port. (For the routes covering the N.Y.K. steamer line to Shanghai as the first section from Kobe, Shimonoseki, Moji, and Nagasaki, the N.Y.K. offices book tourists, but the railway stations do not.)

Chinese Government Railways:—

Stations and City Offices where Japan-China Through Single Tickets are booked. (Except Chekiatchouang and Tchengtcheou on the Peking-Hankow Line and Hsuchowfu on the Tientsin-Pukow Line. For the routes covering the N.Y.K. and N.K.K. steamer lines as the first section from Shanghai and Hankow, the steamship companies' offices book tourists, but the railway stations do not.)

Circular Tour Routes There are two circular routes from Japan. From Japanese points to Peking tourists will travel via Chosen (see P. 1), the two routes diverging at Peking. By the first of the two routes, Hankow is reached by the Peking-Hankow Line, whence tourists sail by the N.K.K. steamer down the Yangtze to Shanghai. By the second route, tourists turn back from Peking to Tientsin, whence they proceed to Shanghai via Tsinanfu, Pukow, and Nanking by the Tientsin-Pukow and the Shanghai-Nanking Line. The passage from Shanghai to Japanese ports is performed by the N.Y.K. steamers, passengers landing Kōbe when bound for stations east of Kōbe. The routes are reversible, viz., first sailing to Shanghai and coming back via Chosen.

Passengers from Fusan Port will reach Shimonoseki by the I.G.R. channel steamers, whence they sail for Shanghai

and then return to Fusan by way of Peking and Antung, via Hankow or via Nanking-Tsinanfu.

Passengers from China are scheduled to reach Tōkyō via Chosen and, turning back to Kōbe, sail for Shanghai, thence returning to their respective departure points. The route is reversible.

The above is a general description of the circular tour routes. 1st and 2nd class steamer passengers between Japanese ports and special class steamer passengers between Nanking and Shanghai are entitled to travel by rail instead of by steamers. Also the two routes between Nagoya and Ōsaka via Maibara-Kyōto and via Kameyama-Nara are open to tourists' option.

Classes Accommodation

Classes of Tickets	1st	2nd (Superior by steamers)	2nd	3rd
I.G.R and S.M.R. (Chosen and Manchurian Lines)	1st	2nd	2nd	3rd
C.G.R.	1st	2nd	2nd	2nd
N.Y.K.	1st	1st	2nd	3rd
N.K.K.	Spec.	Spec.	Spec.	1st. (Chinese) (or Foreign 2nd*)

* Foreign 2nd class accommodation is limited to the S.S. "Fengyang," and holders of 2nd class (not superior by steamers) circular tour tickets may obtain a refund of the difference between special and foreign 2nd class (¥ 12.00 for passengers departing from Japan and \$12.60 for passengers departing from China) on application to the N.K.K. branch office at the port of embarkation.

Circular Tour Fares, shown in Tariff No. 5, all the fares excluding Express and Berth Charges.

Period of Availability

Regarding stop-overs, children's fares, free luggage allowance, unloading of luggage *en route*, refund of fares, and reservations of sleeping berths and the seats, etc., the same rules as for Through Single Tickets apply correspondingly to the Circular Tickets.

Reduction Certificates, attached to each ticket entitle the holders to 30% reduction for return tickets on the following sections and for the classes corresponding to those of their Circular Tour Tickets.

When starting from I.G.R. Yeitōho-Jinsen, Mukden-Dairen, Koupangtzu-Newchwang, Peking-Kalgan, Shanghai North-Hangchow.

When starting from C.G.R., Ueno-Nikkō, Kameyama-Yamada, Yeitōho-Jinsen, Mukden-Dairen.

Free Luggage, up to the same limit as for the Japan-China through passengers on railways. On steamer lines: 1st or special cl.—up to 350 lbs. or 40 c. ft.; 2nd or foreign

2nd cl.—up to 250 lbs. or 30 c. ft.; 3rd or Chinese 1st cl.—up to 150 lbs. or 20 c. ft.

Exchange Orders are issued at certain stations and city offices instead of regular Circular Tour Tickets. Each order is drawn for separate sections of the tour routes. Passengers furnished with the Exchange Orders are requested to exchange each order for a regular ticket at the departure point of each section.

Cabin Reservation Tourist passengers are cautioned to apply beforehand to the steamship companies' offices for accommodation; otherwise they may be required to transfer to another class or to wait for the next steamer, if no cabin is found available for them on their arrival at the port of embarkation.

JAPAN-CHINA OVERLAND TOURS

By this arrangement, travellers, west-bound from Japan, east-bound from China, or past Japan and China, and holding 1st class steamer tickets between Yokohama and Shanghai, are enabled to travel overland for sight-seeing between Yokohama and Shanghai or Hankow, on the railway tickets issued by steamship companies, roughly as follows:—

Steamship Companies Nippon Yūsen Kaisha; Tōyō Kisen Kaisha; Canadian Pacific Ocean Services, and Pacific Mail S.S. Co.

Overland Routes:—

Yokohama-Shanghai or vice versa. Landing at Yokohama tourists are scheduled first to visit Tōkyō, and thence to travel to Shimonoseki by the Tōkaidō and San-yō Lines including a ferry trip from Miyajima to Itsukushima (if desired, via Yamada and Nara by the Kwansai Line between Nagoya and Kyōto or Ōsaka). Crossing the channel from Shimonoseki to Fusam by the I.G.R. Steamers, travellers resume their railway journey to Peking via Antung, Mukden and Tientsin. Turning back from Peking to Tientsin, they take the Tientsin-Pukow Line down to Pukow, via Tsinanfu, and next the Shanghai-Nanking Line to Shanghai, where they embark again. The route is followed in the opposite direction, when landing at Shanghai.

Yokohama-Hankow or vice versa

Between Yokohama and Peking tourists will travel by the same route as described above, and the trip between Peking and Hankow is performed by the Peking-Hankow Line. This ticket does not include the passage between Hankow and Shanghai, for which an exchange order is issued independently.

Period of Availability. 3 months including day of issue.

Within the period, passengers are entitled to stop over at the principal cities and places of interest and resume their journey by express trains without any additional supplementary payment.

Overland Railway Fare. Yokohama-Shanghai—¥ 100 (N.Y.K.) or ¥ 120 (T.K.K., C.P.O.S., and P.M. S.S. Co.); Yokohama-Hankow—¥ 110 (including Express Charges but Berth Charges payable separately. About 20%—30% reduction on regular cost of travel on the section.)

Regarding stop-overs, children's fares, and reservations of sleeping berths, the same rules as for Through Single Tickets apply correspondingly to the Overland Tickets.

Japan-China Parcel Through Traffic

With a view to facilitate trade and traffic between Japan and China, arrangements have been made for the parcel through conveyance between the principal stations in Japan and Peking, Tientsin and other principal cities in China via Chosen, roughly as follows:—

Station, etc., open to Through Traffic:—

Imperial Government Railways of Japan:—

Tōkyō, Yokohama, Nagoya, Kyōto, Ōsaka, Kōbe, City Office in Tōkyō, Yokohama, Nagoya, Kyōto, Ōsaka.

Chinese Government Railways:—

Hsinmin, Tientsin, Peking, Kalgan, Hankow, Tsinanfu, Nanking.

Articles not accepted for conveyance:—

The following articles are not accepted for conveyance: Frail articles, perishable articles, articles of value (exclusive of raw silk yarns, textiles, braids, and knittings), contrabands such as ammunitions, opium, morphine, or any other article that may be prohibited by law, dangerous or explosive articles, vehicles, living animals, corpses and articles weighing more than 66 pounds or measuring more than 6 cubic feet per package.

Local Delivery:—

Parcels arriving at the stations of the Imperial Government Railways will be delivered free of charge to any address within the city limits, or within a radius of about 3½ miles from the station, unless the consignor give notice beforehand to the effect that parcels should be stored at the station of arrival.

Chinese Government Railways have no arrangement of local delivery for parcels.

Rates:—

Parcels are charged for at the following rate per 10 lbs. or 1 cubic foot, or fraction thereof:—

	Tōkyō	Yokohama	Nagoya	Kyōto	Ōsaka	Kōbe

ROUGH GUIDE TO THROUGH TRAFFIC ROUTE

FUSAN

(Station Hotel; Inns: Ōike, Moriya, etc.)

Fusan is situated at the southern extremity of the Chosen peninsula and 212 miles distant across the sea from Shimonoseki, with which port connection is maintained by two daily steamers operated by the Imperial Government Railways of Japan, the voyage taking only 11½ hours. Fusan is a place where Japanese have long resided even from the Tokugawa period. The present population is about 40,000.

Ryūtōzan Hill and Zetsuei Island command a wide view of the port. Passengers bound for China should take the Chosen-Manchuria Through Expresses (weekly from Fusan to Changchun via Mukden, 1st and 2nd class sleeping and dining-cars suspended for the time being), or the Fusan-Mukden through trains (running twice a day, with all classes, dining and sleeping-cars).

KEIJŌ (SEOUL)

(Chōsen Hotel, Keijō Hotel, Hajōkwan Hotel, etc.)

The aforesaid trains on the Chosen line from Fusan traverse the southern half of Chosen and reach Nandaimon. Keijō (Seoul), after a run of over 274 miles. Keijō is the seat of the Government-General of Chosen and occupies a most prominent position, being encircled by walls with eight gates. Population about 30,000. A bird's-eye-view of the city may be had from Wajōdai. Places of interest in the city are the Keifuku and Shōtoku Palaces. Pagoda Park, etc. and other historic spots are scattered in the suburbs.

SEOUL—ANTUNG

At Ryūzan after departing from Nandaimon, the trains join the trunk line from Keijō to Shingishū, by which a northward trip over about 311 miles takes one to Shingishū (Station Hotel) on the River Yalu. This trip carries one through the most historic portion of the peninsula of which the most famous is Heijō (Pyongyang). This town was the oldest capital of Chosen and borders on the River Daidō, with a wide expanse of fertile land to the east and also to the south. Population approximately 42,000. The view near the River Daidō is recognized as the best in the whole land.

The above is only a rough summary of the most important cities along the Chosen Line, but other towns and fine sights are numerous, and an overland trip through Chosen cannot fail to interest travellers.

The River Yalu is the continental boundary of New Japan, and is spanned by a swing-bridge (3,098 ft.). Antung is on the opposite side on the river to Shingishū.

ANTUNG-MUKDEN LINE

The Antung-Mukden Line connects at Antung with the Chosen Line, whence to Mukden is 170 miles. The district penetrated by the line contains the most beautiful sights in Manchuria, which passengers may enjoy from the car windows.

MUKDEN

(Yamato Hotel, etc.)

Mukden is the junction of the Antung-Mukden Line, the Main Line of the Manchurian Line, and the Peking-Mukden Line, and is the foremost city in Manchuria, with a population of about 200,000. As it was an ancient capital of the Manchu Dynasty, there are many historically famous buildings such as old palaces and government offices in the city, and Imperial Tombs in the suburbs.

Changchun, the junction for the Chinese-Eastern Railway is about 190 miles north of Mukden by the main Line of the Manchurian Lines. Dairen, the most prosperous commercial port of South Manchuria is 246 miles south of Mukden. Port Arthur and Liaoyang, both famous as battlefields of the Russo-Japanese War, Yingkow and Tiehling, widely known as markets for the bean trade, and Fushun colliery—all these places may be reached from Mukden by the South Manchuria Railway Line. Mukden is the terminus of the Chinese Peking-Mukden Line, and passengers for Peking will take at the Mukden station the daily through train (all classes, with dining and sleeping cars between Shanhaikuan and Peking).

MUKDEN TO SHANHAIKUAN

The trains of the Peking-Mukden Line reach Hsinmin 36 miles west of Mukden, after crossing a bridge 2,200 ft. long over the River Liao. Then by way of Koupangtzu (70 miles from Hsimmin, junction for Newchwang, the port famous for the export of beans, at the mouth of the River Liao) and Chinchou, the trains proceed to Shanhaikuan (Inn—Yamatokwan, 260 miles from Muken). The town marks the termination of the Great Wall, and passengers by slow trains have to stop over here and continue their journey beyond by the connecting trains in the next morning. This line leads to Tangshan via Chinwangtao, the only port in the Gulf of Pechili accessible in winter, in the neighbourhood of which Peitaiho (Rest House Hotel) is the best seaside

resort in North China. Tangshan, 94 miles southwest of Shanhaikuan, is a colliery of the greatest importance in North China, and a prosperous town. Tangku is 2 miles distant from Taku at the mouth of the River Ho, famous as a battlefield during the Boxer trouble. After a westward run from Tangku along the River Ho, the trains arrive at Tientsin. The whole distance from Mukden to Tientsin East is 435 miles.

TIENTSIN

(Astor House Hotel, Imperial Hotel, Queen's Hotel, Hotel de la Paix, etc.)

There are on the Peking-Mukden Line two railway stations in Tientsin, Central and East, the former being 3 miles distant from the latter, close to the new town. Tientsin is located at the junction of the River Ho and the Grand Canal and 30 miles away from the sea; the River Ho is navigable as far as Tientsin. The population is said to be over 1,000,000, and the city which constitutes the commercial centre of North China is second in importance only to Shanghai as an open port in the whole of China. Some ruins of the Boxer trouble remind travellers of those days when all the forces of the allied army here met the fiercest resistance of the native army. The foreign settlement, the new portion of the city, is about 1 mile down the river from the old town, and its splendour coupled with modern improvements is suggestive to foreign tourists of their own country. Tientsin is the terminus of the Tientsin-Pukow Line, and passengers for Shanghai and intervening points have to change cars here.

PEKING

(Grand Hotel des Wagons-Lits, Grand Hotel du Peking, etc.)

This, the capital city of China, is 83 miles northwest of Tientsin and contains countless historic remains of this great nation. The population is said to be over 1,500,000 but no statistics are available. The city is heavily walled, and there are many places of interest in and out of the city. Some of these are the former Imperial Palace, Summer Palace, Botanical Gardens, Temple of Heaven, Yellow Temple, Temple of Clouds, etc. The life and manners of the Chinese people in this city form an interesting study. Peking is indeed a mystery in the Orient and has been a centre of political whirlpools in recent years, and no itinerary is complete without a visit to this city.

The Peking-Hankow Line, the trunk line connecting North China with the Yangtze district, and the Peking-Suiyuan Line connecting this city with Kalgan and Tatung, start from here.

TIENTSIN-TSINANFU

The Tientsin-Pukow Line is a trunk line in China Proper, stretching for 631 miles between Tientsin and Pukow on the Yangtze, and connecting at the latter place with the Shanghai-Nanking Line for Shanghai by steam-launches across the river. Through passengers bound for Tsinanfu, Pukow, Nanking, and Shanghai, have to change at Tientsin East to the Tientsin-Pukow through trains (all classes, with sleeping and dining cars.) These trains run southward along the Grand Canal as far as Techow, whence, diverging from the canal, the line crosses the Yellow River and proceeds to Tsinanfu, the capital of Shantung Province, 220 miles from Tientsin. Tsinanfu (Inn—Kinsuikwan) is the junction of the Shantung Railway, whose Tsinanfu West station in Commercial Settlement is not very far from the Tientsin-Pukow Line station. Among the chief objects of interest there are magnificent springs. Paotuchuan and Lake Taminghu, both in the city, and Chinifoshan temple outside. Lokow, 2½ miles north and on the Yellow River, is a prosperous port for junk traffic.

TSINANFU-PUKOW

After leaving Tsinanfu, the trains continue their course southward through a district of remarkable scenic beauty. Mt. Taishan outside Taianfu is one of the sacred and historic 'Five Mountains,' where the ancient Emperor Sun prayed to the gods in Heaven, and at Chufou near Yenchowfu stands the tomb of Confucius. The line crosses the Grand Canal on the boundary between Shantung and Kiansu Provinces and reaches Hsuehfu, the junction for the Lunhai Railway. Crossing the old course of the Yellow River near Hsuehfu, and traversing a hilly district in the Whaiho valley in Anhwei Province it terminates at Pukow on the Yangtze, 631 miles from Tientsin and 410 miles from Tsinanfu.

ACROSS THE YANGTZEKIANG

Pukow is opposite Nanking across the Yangtze, and its wharves fringed with storehouses present a very busy and active scene. Passengers bound for the Shanghai-Nanking Line take a railway ferry-boat from the river front of the station, land at Hsiakuan on the Nanking side, and walk to Nanking station, or land at Nanking Ferry on the southern side, where the principal trains meet through passengers. This ferry station is 1 mile from Nanking station.

NANKING-SHANGHAI

Nanking (Bridge House Hotel, Inn—Höraikwan, etc.) was the capital of the Ming Dynasty at the beginning of the 15th century and contains many palaces, tombs, towers, etc. of

historic interest. The city was the centre of the revolutionary movements in 1912. The Shanghai-Nanking Line runs along the Grand Canal from the port of Chinkiang and operates frequent daily express and through trains. Soochow is 139 miles from Nanking and is rendered celebrated by such interesting places as Huchiu and Hanshanszu temples. Shanghai is 193 miles from Nanking and 13 miles up on the left bank of the River Whangpoo, a branch of the Yangtze. As the junction of these two rivers stands Woosung, to which there are branch train services from Shanghai. Shanghai (Astor House, Hotel, Grand Hotel, Burlington Hotel, Palace Hotel, Höyokwan Hotel, Towa Yōkō) is divided into three sections—Native City, French Settlement, and Foreign Settlement—and is the most important port of Central China. Its activity with regard to shipping and trade is unrivalled throughout China. Shanghai North Station is close to the Foreign Settlement, and the Shanghai-Hangchow-Ningpo Line starts from the southern side of the city. Through passengers for Hangchow should take the branch line trains from Shanghai North Station and change to the main line train at Lung-hwa junction.

PEKING-KALGAN

The Peking-Suiyuan Main Line starts from Fengtai station of the Peking-Mukden Line, and runs to Kalgan and Fengchen. Through passengers had better take its Round City Branch starting from Peking Chengyangmen station, P.M.L. and joining the Main Line at Hsichihmen station. On the Main Line express trains are run thrice weekly between Peking and Fengchen and daily trains between Peking and Kalgan. Nankow (Railway Hotel) is 25 miles northwest over a flat district from Hsichihmen station. This is located near the Ming Thirteen Tombs. The Railway line from Hankow crosses Pataling Pass, famous for the Great Wall, and leads to Kalgan, a large market town on the Mongolian frontier, 125 miles from Fengtai. This line extends to Fengchen, 141 miles away.

PEKING-HANKOW

The Peking-Hankow Line is the trunk line from Peking (Tsienmen) to Hankow, the pivotal centre of commerce on the middle stream of the Yangtze. Peking Tsienmen station is a few minutes' walk from the Peking-Mukden Line terminus. If proceeding to the Peking-Hankow Line via Fengtai, passengers have to change at Changsintien to the main line trains. The land penetrated by this line is the fertile central district, abounding in historic remains, and the journey by this line never fails to interest passengers, enabling them as it does to catch glimpses of Old China. The line from Peking runs southward via Paotingfu and reaches

Chengtingfu and Chekiatchouang (junction for Taiyuan), 173 miles from Peking. Thence it enters the fertile plain of Honan Province via Shunefu, follows its course via Changefu and Shinsiangsien (junction for Tsechow and Taokowchen), and, after crossing the Yellow River, reaches Tchengtehou the junction for Kaifeng, Honanfu, and Hsuchowfu. By way of Sinyangchow, the line enters Hupeh Province and terminates at Hankow, the Chicago of China, 752 miles from Peking (Terminus Hotel, Matsunoya, Hara Hotel.)

Hankow Tachemen station is close to the Foreign Settlement, where express and through trains arrive, while other trains come to Yutaimen. Hankow is the largest port for river traffic on the middle stream of the Yangtze and maintains frequent steamer connections with Yochow, Ichang, Changsha, and Changteh on the upper streams and also with Kiukiang, Anking, Nanking, Chinkiang, and Shanghai on the lower stream.

HANKOW-SHANGHAI

Hankow is the focus of waterways in the middle course of the Yangtze and forms with Hanyang and Wuchang the three cities at the junction of the River Han with the Yangtze. In the summer when the river rises high, the water front offers anchorage even for big ocean liners from Europe, and there are frequent sailings of regular steamers to Shanghai. The Nisshin Kisen Kaisha steamers on this service are all of 2,000—4,000 ton types and sail every other day or so, their special class accommodation being very up-to-date and comfortable. Kiukiang is situated 140 miles down the stream and is an important port in Kiangsi. The steamer passes the port for the famous Tayeh Mines on the way to Kiukiang. Wuhu, the only open port for Anhwei, is 180 miles down the river. Nanking is 375 miles distant from Hankow and special class passengers are enabled to land here for rail journey to Shanghai. The distance between Nanking and Shanghai is 210 miles by the Yangtze, and Chinkiang is an important river port situated near the junction of the Grand Canal and the Yangtze.

SHANGHAI-KOBE

The Nippon Yūsen Kaisha maintains thrice-weekly steamer services between Shanghai and Kōbe. Besides, all big ocean liners for Europe and America of the company call at Shanghai. Thus their connections with the Yangtze steamers from or to Hankow and with the railways from or to Nanking, Tientsin, etc. are close and convenient. The ports of call en route are Nagasaki and Moji (Shimonoseki). Although the circular tour passengers are scheduled to land or embark at Kōbe, 1st and 2nd class passengers are enabled to travel by rail, landing or embarking at any of these ports.
