Agricultural Economics Bibliography No. 93

WAR AND AGRICULTURE IN THE UNITED STATES, 1914-1941

Selected References

Compiled by
Walter T. Borg
Junior Agricultural Historian

Washington, D. C.
January 1942

F O R E W O R D

This bibliography is a selected list of references on the effects of World War I and the present crisis on agriculture. It consists of references to specific studies, articles in learned publications devoted to agriculture, government reports, and addresses and articles by policy makers of the United States Department of Agriculture.

The references have been limited to those dealing specifically with war and agriculture or with phases of the subject. Included in the latter category are a few references to the nutrition program and its effect on agriculture.

Material pertinent to specific topics may be found through the author and subject index which accompanies the bibliography. Many of the references list additional sources available for studies of the effects of war on agriculture. Current material on this subject are described in Agriculture in Defense (item 191) a weekly release issued by the Library of the United States Department of Agriculture.

The records of the Food Administration, the War Industries Board, and other agencies are valuable as source material for the study of war and agriculture. These records are described in The Guide to the Material in the National Archives issued by the National Archives in 1940.

Although the bibliography is primarily concerned with agriculture in the United States, a few reports on European countries have been included. Among these are the studies of the Carnegie Endowment for International Peace on the effects of the war on agriculture in England, France, and Russia, and a number of reports issued by the Office of Foreign Agricultural Relations of the United States Department of Agriculture.

Call numbers following the citations are those in the United States Department of Agriculture Library, unless otherwise noted. "Libr. Cong." preceding a call number indicates that the publication is in the Library of Congress.

In this paper, "chief attention has been given to wheat and flour, copper and coal.... The tentative conclusions reached are as follows: The price-fixing policy has been a success in wheat and flour; it has been successful in coffee; it has done good in the case of anthracite coal; it has done much harm and little good in the case of bituminous coal, but the situation is improving...."

Economic and social history of the World War, Russian series). 281 An8

"We begin by giving the reader a picture of the state of agriculture in Russia at the opening of the twentieth century and determining its place in the general scheme of world economics.... Chapters 5-12 review the war period and the changes that took place, first, in the whole system of agricultural production, and secondly, in the position occupied by Russian agriculture in relation to home and foreign markets.... These changes were not the result only of outward events, but...they often proceeded from the changes in the psychology of the masses."

Partial contents: Introduction, pp. 3-9; Efficiency in government operated industries, pp. 10-16; Organizing a nation for war, pp. 17-33; Railways in Great Britain, pp. 34-42; Railways in the United States, pp. 43-60; Public utilities in the United States, pp. 61-69; Shipping, pp. 70-81; Labor, pp. 82-90; Capital, pp. 91-93; Food, pp. 94-103; Fuel, pp. 104-115; Some unforeseen results, pp. 116-120; The popular verdict and the truth, pp. 121-124; Inevitable extension of government control, pp. 125-127; Conflict between the executive and the legislative branches of government, pp. 128-134 Bibliography, pp. 135-36.
12. Bartley, Joseph C. A study of price control by the United States Food administration. 139pp. Gettysburg, Pa., Gettysburg compiler print. 1922. 284.3 B28
Thesis (Ph. D.) Catholic University of America.
"The aim of this study is to present an historical account of the work of the United States Food Administration from an economic view-point.... Special mention must be given to [War Industries] Bulletin No. 3... which the writer has used frequently as a guide in following the thread of a sometimes hazy narrative. Care has been taken to examine its view-point and to supply what are, perhaps, intentional omissions."
13. Bean, Louis H. Agriculture in the World War and today. Sphere 24(4): 21-23. Oct. 1939. 280.8 N215
The writer reviews the agricultural situation today and 25 years ago under the following headings: The supply situation; exports; World War and 1936-38; exports as the source of farm income; agricultural and other prices in 1914-16; farm and food prices still relatively low; farmers have reserves for war needs; and farmers now have machinery for planning.
14. Bean, Louis H. Relation of industry to agriculture with special reference to defense and the lower third. Amer. Soc. Agron. Jour. 33:403-413. May 1941. 4 Am34P
Also issued in processed form by the U. S. Bureau of Agricultural Economics.
15. Bennett, H. H. Soil conservation and national defense. 2Opp., processed Washington, U. S. Dept. of agriculture, Soil conservation service, 1940. 1.96 Ad62
An address before the annual meeting of the Forest Preserve Association at Lake George, N. Y., on Aug. 17, 1940.

16. Bennett, Merrill K. International contrasts in food consumption. Geog. Rev., 31: 365-376. July 1941. 500 Am35G
"Either military or economic warfare intensifies problems both of mass nutrition and of national income spendable on consumers' goods. It is devoutly to be hoped that the peace which follows the present wars may be world-wide, and economic as well as military and political. The other way of enlarging world and national incomes, elevating world and national levels of living, and improving human nutrition seems to hold equal promise."
17. Bennett, Merrill K. Wheat and war, 1914-18 and now. Stanford University, Food Res. Inst. Wheat Studies 16(3): 67-112. Nov. 1939. 59.8 F73
"The possibilities or probabilities that history will repeat itself in the world wheat situation warrant discussion even in the stage of a European war barely three months old. We present here a condensed study of (a) the history of the world wheat situation during the World War; (b) contrasts in the world wheat situation as it was in years immediately preceding 1914 and 1939; and (c) prospective developments in years to follow 1939, so far as the history and the contrasts seem to illumine these prospects, and so far as the prospects can be appraised on the basis of insecure assumptions concerning participants in and duration of the present war. Emphasis falls on the history and the contrasts, not upon the prospects." p. 67.
18. Bercaw, Louise O. Price fixing by government in the United States, 1926-1939. A selected list of references on direct price fixing and agricultural products by the Federal and State governments. U. S. Dept. of agriculture, Bureau of agricultural economics, Agr. Econ. Bibliog. 79, 214pp., processed. Washington, 1939. 1.9 Ec73A
A section of this bibliography "includes a few references on the fixing of prices during the war which were omitted from Agricultural Economics Bibliography No. 18, and some recent material on the prevention of profiteering and the fixing of prices in time of war."
19. Berkelbach, Ann, and Hutton, O. G. The pinch of plenty; the world agrarian crisis. 172pp. London, Sidgwick & Jackson, ltd., 1932. Lib. Cong. HD1411.B4
Agriculture and economic development; agricultural problems; the nineteenth century; the post-war situation; the nature of the crisis; the future of world agriculture.
20. Bernhardt, Joshua. Government control of sugar during the war. Quart. Jour. Econ. 33: 672-713. Aug. 1919. 280.8Q2
"The statistical evidence at hand indicates; therefore, that the American consumer did not pay for all the increase in costs of production of sugar, nor did he pay a premium for the increased production that resulted during government control. The general conclusion, to be drawn, both from the viewpoint of production and the viewpoint of prices, is that government control of sugar during the war was a decided success."

21. Bernhardt, Joshua. Government control of the sugar industry in the United States; an account of the work of the United States Food administration and the United States Sugar equalization board, inc. 272pp. New York, The Macmillan co., 1920. 65 B452
Pt. 1, The War Period: Ch. 1, "Mobilization" of the sugar industry by the Sugar Division of the Food Administration; Ch. 2, The reason for and the events leading to the formation of the Board; Ch. 3, Incorporation and organization; Ch. 4. "Mobilization" of the sugar industry for the year 1919; Pt. 2, The Reconstruction Period: Ch. 5, Attempts at "demobilization" of government control of the industry; Ch. 6, Temporary arrest of process of "demobilization"; Ch. 7, Reimposition of war-time restrictions; Ch. 8, End of government control; Ch. 9, Conclusion; Appendix.
Review by H. B. Vanderblue in Amer. Econ. Rev. 11: 685-686 Dec. 1921.
22. Bernhardt, Joshua. The transition from government control of sugar to competitive conditions. Quart. Jour. Econ. 34: 720-736. Aug. 1920. 280.8 Q2
Subtopics: The world sugar market during 1919; the problem of the surplus; the problem of the shortage; the problem of decontrol; conditions in 1920; conclusion.
23. Bernstein, Irving. Control of coffee in World War I. 25pp., processed. Washington, U. S. Dept. of labor, Bureau of labor statistics, Sept. 1941.

Division of economics and history. Economics and social history of the World War, British series). 389 B462
Contents: Ch. 1, The five acts of food control; Ch. 2, Business mainly as usual; Ch. 3, The movement to control; Ch. 4, The expert in charge; Ch. 5, Lord Rhondda and his ministry; Chs. 6-8, Control of supplies; cereals, imports, home produce; Ch. 9, Regulation of prices; Ch. 10, Rationing and distribution; Ch. 11, The enforcing of control; Ch. 12, Mr. Clynes and his problems; Ch. 13, The battle of decontrol; Ch. 14, Recontrol and liquidation; Ch. 15, The feeding of the people; Ch. 16, Some lessons of food control; Statistical appendix, pp. 346-429.
Review by W. R. Sharp in Polit. Sci. Quart. 45: 143-145 Mar. 1930.
25. Black, John D. Agriculture. In Design for defense...A symposium of the Graduate School, U. S. Department of agriculture, pp. 29-40. Washington, American council on public affairs, 1941. 280.12 Am35D
The author discusses the part that agriculture will play in the national defense effort.
26. Black, John D. American agriculture in the new war and defense situation. Jour. Farm Econ. 23: 28-36. Feb. 1941 280.8 J822

Forecasts the effects of a "stepped-up peace time defense program" and a "total defense" program on farm labor, farm income, agricultural program, and international aspects, including the South American trade.

27. Black, John D. Can Europe feed herself? Atlantic Monthly 166(2): 159-163. Aug. 1940. 110 At
Discusses Europe's food supply, the prospects of famine, the question of whether the noncombatant countries are producing enough food to make up the deficiencies on the continent and in the British Isles, how the United States should plan its next year's production, and the place of the United States in hemisphere planning and direction of exports and production.
28. Black, John D. The effect of the war on agriculture. Acad. Polit. Sci., New York, Proceedings, 18: 432-438. Jan. 1940. 280.9 Acl
29. Blakey, Roy G. Sugar prices and distribution under food control. Quart. Jour. Econ. 32: 567-596. Aug. 1918. 280.8 Q2
Subtopics: Sugar supply and distribution in recent years; prospects in Europe and United States in 1914-17; organization of the Sugar Division of the Food Administration; agreements with beet sugar producers; international sugar committee on raw sugar organized; margin fixed for refiners; Cuban price and Louisiana price fixed; readjustment of beet prices demanded in the west; regulation of dealers' prices and profits; criticism of personnel; how price of sugar was kept low; complications from transportation difficulties; conclusions.
30. Booth, Alfred W. Can the United States have butter and guns? Sci. Monthly 52: 442-449. May 1941. 470 Sci23
Problems associated with vegetable oils and fats are stressed in this discussion. The writer points out that this country would be faced by an acute problem if the imports of vegetable oils and fats were cut off, and considers its ability to increase domestic production of these commodities.
31. Booth, J. F. Wars and their effect on agriculture with particular reference to Canadian experience. Sci. Agr. 20: 445-452. Apr. 1940. 7 Sci2
After a discussion of the price movements and the production increases of the post war period and the depression that followed, the author concludes by saying, "However, despite the probability that some temporary advantage would accrue to farmers as a group from a development such as that envisaged, the experience of the past suggests that the long-time effect of war is likely to be a lowering of the standard of living and of the general welfare of those associated with agriculture."
32. Brandt, Karl. Food as a political instrument in Europe. Foreign Affairs 19: 516-529. Apr. 1941. 280.8 F76
An appraisal of the European food situation.

33. Brandt, Karl. How Europe is fighting famine. Foreign Affairs 19: 806-817. July 1941. 280.8 F76
A discussion of the various methods which European countries use to ward off famine: (1) Rationing; (2) accumulation of "war reserves;" (3) retrenchment of animal husbandry; (4) extension of cultivation; (5) fishing.
34. Brodell, A. F. Because tractors don't eat oats. U. S. Dept. Agr. Bur. Agr. Econ., Land Policy Rev. 4(8): 25-28. Aug. 1941. 1 Ec7La
"Farm mechanization has come in for much attention, here and elsewhere, but in this discussion, Mr. Brodell gives in short compass the meaning of surplus acres and why they now may be a vital asset."
35. Brown, Everett S. Archives of the Food Administration as historical sources. Amer. Hist. Assoc. Rpt. 1917: pp. 124-135. 1920. Libr. Cong.
36. Brunner, Edmund deS. Defense concentrations in rural districts. Rural Sociol. 6: 156-157. June 1941. 281.28 R88
Problems of rural villages that "have suddenly become bustling centers of defense industries," with particular reference to the village of Charlestown, Ind.
37. Bryant, Ralph C. The war and the lumber industry. Jour. Forestry 17: 125-134. Feb. 1919. 99.8 F768
38. Bulkley, M. E. Bibliographical survey of contemporary sources for the economic and social history of the war. 648pp. Oxford, Clarendon press, London, Humphrey Milford, 1922. (Carnegie endowment for international peace. Division of economics and history. Economic and social history of the World War, British series). 241.3 B87
Agriculture and food supply, pp. 135-170. Food control, pp. 177-200. The agricultural labourer, pp. 459-468. Prices and costs of living, pp. 583-588.
39. Burmeister, Gustave. Canned fruits and vegetables and the war. U. S. Dept. Agr. Bur. Agr. Econ., Agr. Situation 24(7): 18-20. July 1940. 1 Ec7Ag
"War in Europe resulted in some expansion in exports of canned fruits and vegetables from the United States in contrast to the opposite effect on exports of most other agricultural commodities during the season now coming to a close."
40. Christie, G. I. Finding labor to harvest the food crops. U. S. Dept. Agr., Off. Sec. Cir. 115., 8pp. Washington, Aug. 1918. 1 Ag86C
41. Christy, Donald F. After the war -- what? U. S. Dept. Agr. Bur. Agr. Econ., Agr. Situation 24(4): 9-10. Apr. 1940. 1 Ec7Ag
"To sum up, it appears that U. S. agricultural exports are not likely to benefit materially from the war, that after the war we will face increasing competition from other agricultural exporting countries for a number of years, and that other countries will be faced with the problem of how to pay for needed imports."

42. Christy, Donald F. The impact of war and the defense program on American agriculture. 17pp., processed. Washington. U. S. Dept. of agriculture, Office of foreign agricultural relations. 1941. 1.943 C46
Address before the Purdue University Agricultural Conference at Lafayette, Ind. on Jan. 15, 1941.

"One may say, therefore, that the present cautious policy of the United States Department of Agriculture which discourages abrupt production increases is justified not only for the present moment of uncertainty for which it is mainly conceived, but also for a longer period with a view to the international economic situation which will arise when this struggle is ended."

Contents: Pt. 1: Introduction; war and scarcity; menace of blockade; sea and air strategy; food from overseas; home farming and war; storage of food; dispersal of stores; future of the food trades; conclusion. Pt. 2: Stamina of the British people.
46. Clark, John M. The costs of the World War to the American people. 361pp. New Haven, Yale university press, London, Humphrey Milford, Oxford university press, 1931. (Carnegie endowment for international peace. Division of economics and history. Economic and social history of the war. American series). 284 C546
Ch. 15, The war and agriculture, pp. 227-234.
"In general, the effect of the War on agriculture was the reverse of its effect on the country as a whole, save that in both cases it meant more hard work during the emergency. For the country as a whole it meant privation during the emergency and probably some partial recompense in the way of heightened prosperity afterward. For agriculture it meant prosperity during the emergency and heightened privation afterward." p. 233.
Review by V. S. Clark in Amer. Hist. Rev. 38: 120-121 Oct. 1932.

53. Danhof, Ralph H. Defense and decentralization. U. S. Dept. Agr. Bur. Agr. Econ., Land Policy Rev., 4(1): 3-10. Jan. 1941. 1 Ec7Ag
"The national defense program has reawakened interest in possibilities of effecting a greater decentralization of industry, which many farm laborers have advocated for years. Little was accomplished, but suddenly the matter again became a public issue."
54. Davis, Chester C. Agriculture and the defense program. U. S. Fed. Reserve System, Fed. Reserve Bul., Nov. 1940, pp. 1168-1170. 173 F31F
Radio address of Mr. Davis, member of the Board of Governors of the Federal Reserve System and Commissioner in Charge of Agriculture of the National Defense Commission.
55. Davis, Joseph S. Food in a world at war. Harvard Business Rev. 19: 133-142. Winter 1941. 280.8 H262

The writer "presents a comprehensive survey of the world food situation. He emphasizes conditions in Continental Europe and the British Isles, and relates the disruption of food supplies caused by the war to the problems of undernourishment and malnutrition. German policy in respect to food supplies in subjugated countries is appraised from the facts now available."

56. Doob, Leonard W. War reactions of a rural Canadian community. Jour. Abnormal and Social Psychol. 36(2): 200-223. Apr. 1941.
This is a study of the war reactions of a rural Canadian community, made from the middle of June to the middle of September 1940.
57. Duffus, William M. Government control of the wheat trade in the United States. Amer. Econ. Rev. 8: 62-87. Mar. 1918. 280.8 Am32
A summary of the various provisions of the Food and Fuel Control Act giving arguments for and against passage.

60. Edwards, J. Donald. Survey of vegetable oils, 1915-1918. 20pp., processed. Washington, U. S. Dept. of labor, Bureau of labor statistics, Apr. 1941.
Subtopics: Summary; vegetable oil prices; Food Administration controls; export-import control; footnotes.
61. Edwards, J. Donald. Wartime controls of beef and pork, 1916-1918. 45pp., processed. Washington, U. S. Dept. of labor, Bureau of labor statistics, July 1941.
Subtopics: Summary; Food Administration control; export-import regulation; the price of meats 1916-1918; the public and the packers; labor in packing plants; sources.
62. Eldred, Wilfred. The Grain corporation and the guaranteed wheat price. Quart. Jour. Econ. 34: 698-719. Aug. 1920. 280.8 Q2
"Thus came to an end the largest, and, on the whole, probably the most successful instance of government interference with an essential industry due to the necessities of war. Perhaps the most striking feature of the whole enterprise apart from its magnitude, is the fact that the operations of the Grain Corporation were conducted with such efficiency and smoothness, such freedom from arbitrary interference with the usual economic forces of production and consumption...that the individual citizen or trader was scarce aware that a \$500,000,000 corporation had ceased to function."

63. Eldred, Wilfred. The wheat and flour trade under Food administration control: 1917-18. Quart. Jour. Econ. 33: 1-70. Nov. 1918. 280.8 Q2
"Broadly speaking, the problems of the food Administration at the outset of its career in the regulation of the wheat and flour trade were: (1) to attain price stability, for the protection of both producer and consumer; (2) to enforce conservation, in order both to guard necessary supplies for home consumption and to save for export; and (3) to distribute the available wheat to the mills so as to maintain relative equality among them and secure their milling cooperation."
64. Englund, Eric. Outlook for fruits and vegetables, especially as influenced by the war. 21pp., processed. Washington, U. S. Dept. of agriculture, Bureau of Agricultural Economics, 1940. 1.941 S2F94
Address before the International Apple Association at Pittsburgh, Pa. on Aug. 15, 1940.
65. Englund, Eric. The war and our changing agriculture. Amer. Soc. Agron. Jour. 33: 379-390. May 1941. 4 Am54P
"This topic recognizes that agriculture is constantly changing and suggests that the present war should be considered, not only in relation to a stationary picture of American agriculture taken as of December 1940, but also in connection with the changes that characterized our agriculture in the past and that were influencing its future when the war began."
Also issued in mimeographed form by the U. S. Bureau of Agricultural Economics.
66. Ezekiel, Mordecai. Is price inflation inevitable? U. S. Dept. Agr. Bur. Agr. Econ., Agr. Situation 24(7): 11-15. July 1940. 1 Ec7Ag
"The situation today differs greatly from that which caused price inflation in the first World War. Three differences are outstanding: (1) The difference in the supply situation, especially with reference to farm products. (2) The difference in the way the war is being financed and supplied. (3) The difference in unused industrial productive capacity, both of equipment and men."
67. Ezekiel, Mordecai. Price analyses, wars, and depressions. Jour. Farm Econ. 22: 673-679. Nov. 1940. 280.8 J8j2
"Wars cut across the course of orderly economic development and leave scars in economic growth which subsequent developments cannot erase. Yet wars also arouse acute concern about the adequacy of supplies of foods, fibers and industrial products, as well as of munitions, and lead to new interest in statistics and economic planning. Most of the statistical materials we now utilize, and almost all of the index numbers of quantity and price, grew out of the first World War."
68. Ezekiel, Mordecai, and Reeve, V. D. Production, prices and national defense. U. S. Dept. Agr. Bur. Agr. Econ., Agr. Situation 25(7): 9-12. July 1941. 1 Ec7Ag
"The...article discusses the comparable situation to date as to production and prices in World Wars I and II."

69. Fleming, John R. Let's size up the problems ahead. U. S. Dept. Agr. Bur. Agr. Econ., Land Policy Rev. 4(7): 3-5. July 1941. 1 Ec7La
"We can assemble, the articles in this issue of Land Policy Review suggest, some common notions of the problems of post-defense period even if we can't foresee their size and shape."
70. Franklin, Harry L. Agricultural and food control in Switzerland. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 5: 129-158. Apr. 1941. 1.9 Ec7For
Subtopics: General considerations; wartime control of Swiss economy; agricultural requirements and supplies; blockade and the Swiss trade position.
71. Franklin, Harry L. British food control. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 3: 545-578. Dec. 1939. 1.9 Ec7For
Subtopics: Organization and legislation; food-control orders and operations; British agriculture under government control; control of agricultural products other than food and feed; supply and consumption of foodstuffs and feedstuffs; British food production in wartime; general summary and conclusions.
72. Franklin, Harry L. British price policy and price developments in wartime. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 4: 123-130. Feb. 1940. 1.9 Ec7For
"Public interest becomes focused on prices and price policy to an unusual degree in wartime, inasmuch as the welfare of virtually every individual is directly involved therein. And the socio-economic groups -- agricultural, labor, industrial -- are likewise vitally affected by the price policy and by the price-control measures that the state adopts in wartime as national security measures. The significant features of the British price policy and the development of prices since the outbreak of the present war are discussed in this brief article."
73. Franklin, Harry L. Wartime agricultural and food control in Germany. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 4: 181-220. Apr. 1940. 1.9 Ec7For
Subtopics: Control of domestic agricultural marketing and imports; food consumption control; food requirements and supply sources; fiber and leaf tobacco requirements; food production in wartime.
74. Franklin, Harry L. Wartime control of agricultural trade and production in belligerent countries. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 3: 501-508. Nov. 1939. 1.9 Ec7For
"The present war in Europe has been characterized from the outset by strict government control of international trade and, to a lesser extent, of production, prices, and consumption. Although it is too early to evaluate the effects of these controls on agricultural trade of the United States it is nevertheless important to know how extensive these new obstacles are because of the importance of the belligerents as markets for American agricultural surpluses."

75. Fraser, C. E., and Teele, S. F., eds. Industry goes to war; Readings on American industrial rearmament. 123pp. New York and London, McGraw-Hill book co., 1941. Libr. Cong. HC106.4 F7
A collection of pertinent articles reprinted from The Harvard Business Review.

"Price fixing is, in war time, a necessary evil." The chief grounds of necessity are: 1, to replace competition; 2, control supply and demand; 3, to insure adequate production; and 4, to stabilize markets.

83. Hardy, Charles O. Wartime control of prices. 216pp. Washington, Brookings institution, 1940. (The Institute of economics of the Brookings institution, Publication no. 84). 284.3 H22

"The volume is divided into two major sections. Part I is a condensed analysis of the problems involved in the control of prices in wartime, leading to our conclusions with reference to the possibilities of price control and the methods which should be employed. It considers the influence of fiscal and credit policies, as well as more direct factors affecting the price situation. Part II, on which the analysis in Part I is in substantial degree based, is a review and appraisal of the price controls that were developed in the United States during the World War."

Review by Mordecai Ezekiel in Jour. Farm Econ., 73: 510-512. May, 1941.

84. Hazen, N. William. French wartime control of agriculture. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 4: 31-62. Jan. 1940. 1.9 Ec7For

"Up until the outbreak of the present hostilities in Europe, there was no Government regulation of French agriculture; except for tobacco and wheat. Plans had been laid since the middle of 1938 for the general organization of the Nation in time of war, but these were put into practice only after September 3, 1939. The machinery for the regulation and eventual control of agricultural production and trade is now almost complete and has been applied with some efficiency. The resulting adjustment of French agriculture to wartime conditions may adversely affect the exportation of American farm products to France, one of the world's four largest buyers of these products."

85. Hazen, N. William. Italian agriculture under fascism and war. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 4: 627-702. Nov. 1940. 1.9 Ec7For

Subtopics: Physical backgrounds; importance of agriculture; organization and government control of agriculture; agricultural production; foreign trade; Fascist agricultural policy; Italian agriculture and the war.

86. Hazen, N. William. Wartime aspects of Egyptian agricultural economy. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 5:217-249. June 1941. 1.9 Ec7For

Subtopics: Agricultural self-sufficiency, 1909-1913 and 1934-1938; Anglo-Egyptian relations; war measures affecting agriculture; effects of war on Egypt's agricultural economy; axis interest in Egyptian agriculture; trade with the United States.

87. Hibbard, Benjamin H. Effect of government control on marketing methods and costs. Amer. Econ. Rev. 9(1, sup.): 47-55. Mar. 1919. 280.8 Am32

Subtopics: Control over the goods; control over prices and profits; control over the processes of the market; secondary effects.

Discussion by J. E. Boyle and G. C. Smith, pp. 56-60.

88. Hibbard, Benjamin H. Effects of the great war upon agriculture in the United States and Great Britain. 232pp. New York, Oxford university press, 1919. (Carnegie endowment for international peace. Division of economics and history. Preliminary economic studies of the war, no. 11). 281 H52

95. Jesness, O. B. Newly developing international situation and American agriculture. Jour. Farm Econ. 23: 1-14. Feb. 1941. 280.8 J822
"The American farmer has a stake in the foreign market and hence is vitally concerned with the world war now in progress and conditions to which it may lead in the future."
96. Jesness, O. B. War and the farmer. Minn. Univ. Agr. Ext. Bul. 219, 15pp. University Farm, St. Paul, 1940. 275.29 Minn.
Subtopics: Production, supply of farm goods greater now than in 1914; Britain needs war supplies more than our farm products; uncertainty looms as to war's effect on our farm goods market; can we replace Europe's market for So. American goods?; greater production in industry, not farming needed for recovery; defense plans stimulate domestic demand for farm products; defense expenditures will necessitate steep increases in taxes; in the long run defense work may aggravate farm problems.
97. Johnson, Sherman E., and Tetro, Robert C. Adjustments to meet war impacts. U. S. Dept. Agr. Bur. Agr. Econ., Agr. Situation 25(1): 9-22. Jan. 1941. 1 Ec7Ag
"A shift from cotton and tobacco to milk, fruits, and vegetables in the South would make available a much better food income to the undernourished in that region. A shift from wheat to livestock on the Plains would probably not lower our cereal intake but add to our meat items and help conserve the soil. Shifts in the Corn Belt to lean meats, milk, and wool would also meet needs of our conservation work and our national food and fiber budget."
98. Johnson, Sherman E. Farm adjustments to meet war impacts. Amer. Soc. Agron. Jour. 33: 391-402. May 1941 4 Am34P
"The general question raised by this topic is, How can farmers who are operating under widely varying conditions throughout the country and producing different combinations of products best adjust their operations to meet war conditions -- for their benefit, and for the Nation's welfare?"
Also issued in processed form by the United States Bureau of Agricultural Economics.
99. Johnson, Sherman E. Farm consultants: for a national system. U. S. Dept. Agr. Bur. Agr. Econ., Land Policy Rev. 4(8): 21-24. Aug. 1941. 1 Ec7Lan
"Farmers are being asked once again to change their methods and production. How can they do it? Two suggestions are made here, the cooperative employment of qualified consultants to help farmers with management problems and apprenticeships in farming."
100. Joint committee of the Carnegie endowment for international peace and the International chamber of commerce. International economic reconstruction; an economists' and businessmen's survey of the main problem of today. 225pp. Liege, Imp. G. Thone, 1936. 280 J662

See especially ch. 6, The world agricultural crisis.

"The origin of the agricultural crisis dates back to the war of 1914-18; the chief cause of the crisis is to be found in the production of cereals, in particular, wheat, which played a decisive part."

120. National farm Institute. Economic preparedness and agriculture. National Farm Institute, Proceedings 5, February 21-22, 1941. 125pp. [Des Moines, Iowa, Des Moines chamber of commerce, 1941.] 4 N219

Partial contents: What is ahead for agriculture? addresses by Joseph S. Davis, J. K. Galbraith, and G. V. Ferguson; What is ahead for all of us?, addresses by Morris Sayre and Harriet Elliott; Democracy's road ahead in the world crisis, by Henry A. Wallace; Group discussions on foreign trade of agricultural products; Disposal of Western Hemisphere surpluses; Will the production and price upheavals occasioned by war and national defense leave agriculture more out of balance ten years hence?; What can we do to prevent it?; What price policies should the government pursue?

121. New York (State) Food supply commission. The food supply and the war, as shown by the Report of the New York state food supply commission. 32pp. Albany, 1918. 389 N482

"The Commission set in motion forces calculated to increase food production and conservation in New York State. It helped awaken the people; it took stock of the State's resources in a complete agricultural census... gave local help in supplying farm seeds, farm labor, and breeding stock... and promoted the conservation of perishable foods... It prevented and stopped wastes by insects and plant diseases... It arranged for farm loans, furnished farm tractors and ditchers and helped to solve transportation problems...."

122. Ogdon, Montell. Some objectives and problems of price control. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 5:281-298. July 1941. 1.9 Ec7For

Subtopics: Wartime problem of prices; control of consumer prices; price fixing as a control of production; production price problems and approaches to their solution.

123. Ogdon, Montell. Wartime policies and controls affecting agricultural trade. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 5: 175-192. May 1941. 1.9 Ec7For

Subtopics: Problems of production and governmental aid; conservation of supply and satisfaction of consumer needs; control of

imports and exports; obstruction of neutral trade by naval operations; control by international agreements; planning and coordination of controls affecting agriculture; summary of controls and their possible use after war.

124. Orr, Sir John Boyd, and Lubbock, David. Feeding the people in war-time. 88pp. London, Macmillan co., ltd., 1940. 389 Or7F
Topics: The home front; the importance of food in war-time; transition from peace to war; the peace-time national dietary; the reasons for maldistribution of food; government control; price fixing, rationing; our food resources, import policy; our food resources, policy for agriculture; the basis of a war-time dietary; coordination of effort; conclusions.

125. Parran, Thomas. Nutrition for national defense. New Repub. 104 (23): 786-788. June 9, 1941. 280.8 N
Highlights of the first National Nutrition Conference for Defense, May 26 to 28, 1941, in Washington, D. C.
126. Paxson, Frederic L. America at war, 1917-1918. 465pp. Boston, Houghton Mifflin co., 1939. 280.12 P28
"Completing the study of American Democracy and the World War, this volume takes up the story where Pre-war Years, 1914-1917 (1936) dropped it. Together the two volumes afford a comprehensive yet detailed account of four momentous years of American political, diplomatic, and military history.... While not the definitive story of the United States in the World War, America at War may stand as the most useful statement on the subject that has appeared to date."
- L. B. Shippee in Miss. Val. Hist. Rev., 26: 281-283. Sept. 1939.
127. Perkins, Milo. Exports and appeasement. Harper's Mag. 182(1087): 39-47 Dec. 1940. 116 H
After enumerating the three fundamental causes for our farm surpluses -- unemployment, scientific advancement in farming, and decline of foreign trade-- the writer calls attention to our present agricultural surpluses and to the troubles ahead for farmers who have been producing for an export market. The choice we make depends upon how well we understand the implications of each alternative. Everything we treasure is at stake. The answer lies with those throughout the country who believe in to-morrow, and are willing to fight for their convictions - to-day."
128. Perry, Hobart S. Impact of the present war on ocean shipping with special reference to the effects of war shipping conditions on United States agriculture. 123pp., processed. Washington, U. S. Dept. of agriculture, Bureau of agricultural economics, Nov. 1940. 1.941 M21m7
"This study is concerned mainly with surveying the amount of ocean shipping available, the present and prospective needs for the transport of agricultural and nonagricultural products, and the impact of wartime shipping conditions on agricultural exports."

129. Powell, G. Harold. Regulation of the perishable food industries after the war. Amer. Acad. Polit. and Soc. Sci. Ann. 82: 183-188 Mar. 1919. 280.9 Am34
A plea for governmental supervision with voluntary cooperation.
130. Quarendon, R. From field to factory. Geog. Mag. (London) 13: 56-64. May 1941.
"The word ersatz (substitute) has been much used in connection with Germany's lack of raw materials. But not only in Germany are agricultural products turned to industrial uses; such metamorphoses are now successfully exploited in many other parts of the world -- make even more important the coalition of farmers and industrialists."
131. Richter, J. H. Cotton control in the United Kingdom. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr., 5: 193-204. May 1941. 1.9 Ec7For
"This article presents a simple factual account of the history of the controls since the outbreak of the war in 1939."
132. Richter, J. H. Rationing in the United Kingdom. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 5: 13-24. Jan. 1941. 1.9 Ec7For
Subtopics: The economic setting of the problem; the case for rationing; rationing in operation; comparison of British and German food rations.
133. Richter, J. H. War-time price control in the United Kingdom. Jour. Farm Econ. 22: 680-690. Nov. 1940. 280.8 J822
"It is the declared goal of the British Government's war-time price policy to assume reasonable stability of the retail prices for food and other essential commodities of a staple character, or at least a limitation of price increases to what appears justified by unavoidable increases in costs."
This article appears under the name of J. H. Richter-Altschaffer.
134. Robertson, A. T. Planning for defense -- and after. U. S. Dept. Agr. Bur. Agr. Econ., Land Policy Rev. 4(3): 26-31. Mar. 1941. 1 Ec7Lan
"Preparing for defense is more than making guns. It is planning and providing for workers in the new munition plants and for farmers who must make room for the plants. It is charting resources for men and materials. In all this Department workers and planning groups, among others are taking an important part."
135. Rorty, James. Total defense and public health. Harper's Mag. 182(1090): 375-385. Mar. 1941.
A discussion of the importance of nutrition in the present crisis.
136. Sakolski, A. M. British food supply. Amer. Econ. Rev. 9: 157-161. Mar. 1919. 280.8 Am32
A summary of various proposals to increase the production of food supplies in Great Britain.

137. Schmidt, Carl T. American farmers in the world crisis. 343pp. New York, Oxford university press, 1941. 281.12 Sch5
"The purpose of this book is to tell how American farmers have been caught up in the world crisis, and how they have been struggling for ways to a more secure world. And, inasmuch as these ways lead more and more through the fields of politics, a large part of the book deals with the evolving agricultural policy of our national government."
Contents: The American farmers, pp. 3-37; Markets and machines, pp. 38-97; Farmers in politics, pp. 98-119; Agricultural adjustment, pp. 120-206; Credit for the farmer, pp. 207-221; Saving human and soil resources, pp. 222-250; Benefits and burdens of farm relief, pp. 251-309; The outlook for American agriculture, pp. 310-321; Selected bibliography, pp. 333-334.
Review by H. C. Taylor in Jour. Polit. Econ. 49: 615-617. Aug. 1941.
138. Schultz, T. W. Economic effects of agricultural programs. Amer. Econ. Rev. 30: 127-154. Feb. 1941. 280.8 Am32
Subtopics: Distinction between the resource and the income problem; complementariness of objectives; productivity and income; disequilibria pertaining to agriculture; crop production control; farm commodity loans and storage; soil conservation; supplementary farm income - government payments; pyramiding of government payments on farms with highest incomes; positive proposals.
Discussion by J. D. Black, pp. 165-176.
139. Schwenger, Robert B. Control of agricultural prices in the United Kingdom. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr. 4: 377-379. June 1940. 1.9 Ec7For
"Since December 1, 1939, the Government of the United Kingdom has been taking measures to prevent undue increases in the prices of essential foodstuffs and certain other items of importance in the cost of living."
140. Shear, S. W., Hoos, Sidney, and Wellman, H. R. Effects of the war on California fruit industries. Calif. Agr. Expt. Sta., Giannini Found., Agr. Econ. Mimeogr. Rpt. no. 74, 97pp. Berkeley, 1941. 281.9 G34M
Subtopics: Importance of fruit to California; chief export markets; purpose and scope of report; major developments; domestic demand outlook; prospects for remainder of war; post-war developments; possibilities of increased fruit consumption; wartime regulations and restrictions on fruit imports; supplementary tables.
141. Smith, Charles. Britain's food supplies in peace and war; a survey prepared for the Fabian Society. 290pp. London, G. Routledge & sons, ltd., 1940. 389 Sm5B
"This study starts... from the need of additional food in which so large a proportion of our fellow countrymen are obliged to live, in peace as in war. It attempts to calculate the total quantities of food which would be required to feed the whole nation properly."

But it also sets out to discover why these supplies are not forthcoming at reasonable prices, and the sources from which they might be secured."

Review by Margaret Digby in Econ. Jour. 50: 493-496 Dec. 1940.

142. Smith, Raymond C. Social effects of the war and the defense program on American agriculture. Jour. Farm Econ. 23: 15-27. Feb. 1941. 280.8 J822
"It is our hope that the concerted effort to strengthen the nation -- an effort stimulated by the present world crisis -- may progress on such a broad front, not only while we are endeavoring to achieve total defense, but during the inevitable readjustment period to follow, that we may find solutions for the important social problems confronting agriculture and our whole national economy."
143. Spann, Richard N. The administration of food distribution in war-time. Pub. Admin. 18: 167-183, 233-249. July, Oct. 1940 280.8 P963
These articles are concerned with supply, marketing boards, and commissions, control of foreign trade, control of meat and live-stock, and other control schemes.
144. Stein, Herbert. Government price policy in the United States during the World War. 138pp. Williamstown, Mass., Williams college, 1939. (Williams College, David A. Wells prize essays, no 8). 284.3 St3
Partial contents: The nature of the problem, pp. 11-18; The period of neutrality, pp. 19-43; Fiscal policy and inflation, 1917-19, pp. 44-88; Direct price control, pp. 89-123; Bibliography, pp. 127-132
Review by G. O. Virtue in Amer. Econ. Rev. 30: 424-425. June 1940.
145. Stewart, Stella. Government price control in the first world war. U.S. Dept. of labor, Bur. Labor Statis., Monthly Labor Rev., 52:271-285. Feb. 1941. 158.6 B87M
Subtopics: Summary; legal sanctions for price control; defense agencies and their relation to price control; relaxation of price control.
146. Stewart, Stella. Importance of powers to license industry as an aid to price control. 15pp., processed. Washington, U. S. Dept. of labor, Bureau of labor statistics, Sept. 1941.
"In view of the experience with price control during the first World War it is strongly recommended that any current legislation looking toward price control be accompanied by provisions to license industry in all of its stages. Licensing then proved to be the only effective weapon for controlling business where there was typically a large number of small enterprises."
147. Stine, O. C. American food prices and supplies in relation to war conditions. 6pp., processed. Washington, U. S. Dept. of agriculture, Bureau of agricultural economics, 1940. 1.941 F3Am3
Address before the Convention of National American Wholesale Grocer's Association at Chicago on Jan. 23, 1940.

148. Stine, O. C. Future of cotton in the economy of the South. Jour. Farm Econ. 23: 112-121. Feb. 1937. 280.8 J822
Subtopics: Prices; moving the accumulated surplus; the domestic market; the place of cotton in the farm economy.
Discussion by G. H. Aull, C. A. Bonnen, C. T. Murchison, and B. S. White, Jr., pp. 121-137.
149. Stine, O. C. 1917-1918: Lessons for a later day. U. S. Dept. Agr. Bur. Agr. Econ., Land Policy Rev. 3(7): 3-9. Nov. 1940. 1 Ec7Lan
"The time between August 1917 and the Armistice was a period of rising prices, heavy demands for our farm products, signs of profiteering, control of food and fuel, and our first big experiment in price fixing. How our agriculture functioned under this control, how it was instituted, what it accomplished, and what was thought of it at the time are discussed in the article."
150. Stine, O. C. War, food, farming, and prices. U. S. Dept. Agr. Bur. Agr. Econ., Land Policy Rev. 3(8): 25-30. Dec. 1940. 1 Ec7Lan
Continuation of item 149.
"Looking back, it seems obvious that the activities of the Food Administration and of the Department of Agriculture should have been more closely coordinated."
151. Stine, O. C. What's ahead for American agriculture. U. S. Bur. Agr. Econ., Agr. Situation, 25(2): 22. Feb. 1941. 1 Ec7Agr.
"It seems hardly probable, however, that the European markets will offer much of an outlet to the United States for long, whoever wins the war."
152. Strauss, Frederick. The food problem in the German war. Quart. Jour. Econ., 55: 364-412. May 1941. 280.8 Q2
"This article has shown how Germany has integrated food policy with her total war plan. The analysis suggested that Germany's domestic production and imports from neighboring countries in the form of real surpluses, as well as the use of emergency reserves, could not meet her war-time requirements in a protracted war. However, the direct and indirect contribution of the conquered nations make it improbable that Germany's war effort will suffer seriously on account of food deficiencies alone. The use of prisoners and forced labor on German farms, the availability of French fertilizer supplies, the confiscation and utilization of the conquered nation's rolling stock and transportation systems, their food deliveries as well as their enforced cooperation in the industrial field are strengthening the food situation in Germany and helping to sustain the total war effort."
153. Strauss, Frederick. Wartime agricultural surpluses of the Danube basin. U. S. Off. Foreign Agr. Relations, Foreign Agr., 4: 705-778. Dec. 1940. 1.9 Ec7For
Subtopics: The place of the Danube Basin in European economy; the agricultural structure of Roumania; pattern of Roumanian agricultural production; agricultural export trade; geographic distribution of Roumanian foreign trade; potential farm surpluses during and after 1940-41.

Wartime agricultural problems are discussed under similar topics for Hungary and Bulgaria.

154. Surface, Frank M., and Bland, Raymond L. American food in the World War and reconstruction period; operations of the organizations under the direction of Herbert Hoover, 1914 to 1924. 1,033pp. Stanford university press, 1931. 389 Su7
"Detailed records...of every ton of supplies...including the audited reports from the accounting departments...form the basis of this volume." - Preface.
155. Surface, Frank M. American pork production in the World War; a story of the stabilized prices and of the contribution of American farmers to the allied cause and the post-armistice famine. 217pp. Chicago, A. W. Shaw co., 1926. 46 Su7
"It is the writer's hope that this volume...may form some contribution towards a better understanding of the economics of our war-time food measures, and also that it may give the American farmer a clearer view, both of his own great contribution to the war and of the measures which were taken to protect him in his efforts."
Review by R. A. Clemen in Amer. Econ. Rev. 17: 503-506. Sept. 1927.
156. Surface, Frank M. The grain trade during the World War, being a history of the Food administration grain corporation and the United States grain corporation. 679pp. New York, The Macmillan co. 1928. 281.359 Su7
"The purpose of the present work is to place on record a discussion of the policies and accomplishments of the Food Administration Grain Corporation and its successor, the United States Grain Corporation, in carrying out the mandates of Congress regarding a guaranteed price for wheat and in providing an adequate supply of cereal foods for ourselves and the allied nations."
Review by W. R. Sharp in Polit. Sci. Quart. 45: 143-145. Mar. 1930.
157. Surface, Frank M. The stabilization of the price of wheat during the war and its effect upon the returns to the producer. 100pp. Washington, U. S. Grain corporation, 1925. 284.3 Su7
Partial contents: Wheat situation in the United States (and in allied countries) at the passage of the Food Control Act; administrative problems confronting the United States; measures proposed by Mr. Hoover; determination of a "fair" price; methods employed by the Grain Corporation; the justice of the returns to the farmer; the effect of Mr. Hoover's plan on the farmers' prosperity during the war.
158. Taussig, F. W. Price fixing as seen by a price fixer. Quart. Jour. Econ., 33: 205-241. Feb. 1919. 280.8 Q2
"As appears from this survey, government price-fixing during the war was not uniform in its objects, and was little guided by principles or deliberate policies. In the main it was opportunist,

feeling its way from case to case. The Food Administration had indeed clearly defined objects, yet hardly a clear formulation of the principles to be followed....The Fuel Administration...was able to proceed with most system and method....What has been said in the preceding pages about the application of the marginal principle to the Price-Fixing Committee probably states its policy with greater sharpness of definition than is warranted by the actual decisions or formulations."

159. Taylor, Alonzo E. War bread. 99pp. New York, Macmillan co., 1918. 389.2 T21
Subtopics: Our duty; what the Allies need; what we possess; why we are limited in wheat; food values of the different grains; ways of stretching wheat; waste in wheat.
"It is my purpose to present briefly and in untechnical language a statement of the wheat problem that is now confronting the people of the United States.
160. Taylor, Clifford C. Canada's wartime agricultural measures. U. S. Dept. Agr. Off. Foreign Agr. Relations, Foreign Agr., 4:333-354. June 1940. 1.9 Ec7 For
A brief description of Canadian agriculture precedes an account of wartime agricultural measures, their objectives, organization, procedure, and operations and a brief analysis of the significance of Canada's agricultural program.
161. Taylor, H. C. The adjustment of the farm business to declining price levels. Jour. Farm Econ. 3: 1-9. Jan. 1921. 280.8 J822
The author compares the low prices of 1921 with the prices following the Napoleonic Wars and the Civil War.
162. Thomsen, F. L. Sharing in the defense program. U. S. Dept. Agr. Bur. Agr. Econ., Agr. Situation, 25(4): 9-12. Apr. 1941. 1 Ec7Agr
An equitable distribution of the benefits of prosperity brought on by the defense program would mean: larger output of industrial products; increase in employment; and substantial recovery in prices of farm products.
163. Tolley, H. R. Agriculture in the American economy; an appraisal of the national interest in the agricultural situation. Amer. Econ. Rev., 30: 108-126. Feb. 1941. 280.8 Am32
"Farm people and agricultural enterprises often tend to lag behind or to respond at a slower rate to social and economic changes than to commerce, industry, or finance, or the entire non-agricultural sector of our social and economic system."
Issued also in processed form by the U. S. Bureau of Agricultural Economics.
Discussion by J. D. Black, pp. 165-176.

"The broad effects of war and the national defense program are extremely important to agriculture as a whole, and the specific effects of these impacts need to be considered in terms of farmers and groups of farmers in different regions who may have to make important changes in their farming systems. This report deals with possibilities of such adjustments and is a result of consideration given to these problems by the committees."

1921-1925: The depressed condition of American agriculture after the war gave unusual importance to the economic problems of the farmers. Henry C. Wallace, Secretary of Agriculture, 1921-24, considered it desirable that the causes of the situation which was ruining many farmers and making practically all farming unprofitable should be explained. He, therefore, planned a series of Yearbooks in which detailed consideration was given to economic phases of farm production and marketing. The effect of the war was considered. In the Yearbook for 1921, wheat, corn, beef, and cotton were considered; in 1922, hogs, dairy products, tobacco, small grains other than wheat, and forestry; in 1923, sugar, sheep, forage resources, land utilization, and land tenure; in 1924, highways and highway transportation, farm credit, farm insurance and farm taxation, hay, the poultry industry, and weather and agriculture; and in 1925, the fruit and vegetable industries.

206. Wernette, J. Philip. Guns and butter? Harvard Business Rev. 19: 286-297. Spring 1941. 280.8 H262
"Among the many questions raised by the national defense program are those relating to its impact on the nondefense part of American life. Can we have the guns and the butter, or must we give up some butter? What is going to happen to the cost of living? Will taxation be increased? Will the standard of living rise or fall? What effects will be felt in nondefense lines of industry and trade?"
These questions are considered, as they relate to the defense program as now planned, and also are considered from the point of view of a greatly expanded military program.
207. Wheeler, Leslie A. Agricultural surpluses in the postwar world. Foreign Affairs, 20: 87-101. Oct. 1941. 280.8 F76
"Chief responsibility for initiating and organizing plans to regulate the postwar surpluses seems to lie with the United States and Great Britain. Together they control an important part both of the supply of, and the demand for, the four major commodities [wheat, cotton, sugar, and coffee] discussed in this paper. If there is a democratic victory, they will doubtless have a major part in the negotiation of peace terms. It therefore is incumbent upon them to begin now to plan commodity agreements which can become a part or a condition of the peace terms. At the present time negotiations would have to be limited to the democracies, their allies and friendly neutrals. Even so, it still would be possible to arrive at agreements covering up to 90 percent or more of the surplus commodities normally moving in international trade. Other

importing and exporting countries could be brought into the agreements when the war ends."

227. Working, Hölbrook. War and commodity prices. Amer. Statis. Assoc., Jour. 35: 309-324. June 1940. 251 Am3
"The present paper aims at no detailed analysis of the relations of cause and effect in the phenomena of general price change. Its objective is rather to throw light on the relative importance of various influences that may bear on general price levels in time of war. The history of prices in various countries during 1914-1919 may be studied with profit from this standpoint. But it is not to be casually assumed that price development in the present war will closely parallel those of the last great war. In the final section below, some pertinent differences between circumstances in the two instances are considered."
228. Wright, Almon R. Archival sources for the study of war-time relations of Latin America with the United States, 1917-1920; illustrations of their use. Inter-Amer. Bibliog. Rev. 1: 23-35. Spring 1941. 243.8 In8
The subjects of this paper center around three commodities: sugar, coffee, and sisal.
"The sources to which this paper refers are the records of the Food Administration, a collection of some 17,000 cubic feet, now housed in the National Archives."
229. Wright, Almon R. World War food controls and archival sources for their study. Agr. Hist., 15: 72-83. Apr. 1941. 30.98 Ag8
"The primary object of this essay has been to describe some of the high lights in the control of profits and prices, the method of negotiation and agreement, and the means of encouraging conservation and production. At the same time, many subjects for interesting and valuable research in these fields have been pointed out." - p. 82.
