

**PINCHED FACES.**  
PROCLAIMER TO AMERICAN WOMEN.  
Some of the Causes which Appear upon Investigation.

...the matter? ...  
The eyes droop, and a deep gloom seems to overhang the face. ...  
Further investigation discloses irregularity of periods, dizziness and faintness at times, and perhaps leucorrhoea. ...  
An American woman has discovered that the cause of all this lies in a deranged and diseased uterus or womb. ...  
It has cured thousands, and will cure you as surely as truth is truth. ...  
Mrs. Harriet Wampler, 104 1/2, Lambton, Wis.

**South Weymouth Items.**  
—W. R. Lord, who is engaged in the grocery store of J. Dyer, is enjoying his vacation, and is at Saturday morning with his family for Maine where they will make a visit with relatives.  
—The choir at the Union church was assisted last Sunday by Miss Mand Towne, soprano, soprano, Lovell's Cornet, who rendered a very pleasing solo, after the prayer.  
—Mrs. Benson of Boston, has moved into the Freeman house on Pond street, just below the depot.  
—Louis A. Cook returned home last Saturday, after a three week's trip through Tennessee and other southern States.  
—The regular meeting of Whitley Lodge No. 21, I. O. O. F., held last Monday evening was made more interesting than usual by a little entertainment provided by a committee of two chosen at a previous meeting. During the evening there were selections by the orchestra, harmonica solos by W. G. Holbrook and readings by Geo. Hollis, after which the first degree staff exemplified the work of that degree.  
—After the lodge closed, order stew was served by the banquet committee. Past Grand Master Louis A. Cook was present and gave a most interesting talk on the doings of the Sovereign Grand Lodge at their annual session held at Chattanooga, Tenn., at which session he was present, and also of the many places he visited during his trip. Next Monday evening will be another degree of the same lodge, and it is expected a good attendance. All the members of the second degree staff are requested to be present.  
—Quite a number of our residents took a day off last Tuesday and took that opportunity to witness the parade of the state militia in Boston.  
—Chas. T. Foster has this week moved to Whitman, where he is engaged as foreman in the cutting room of the Commonwealth book and shoe factory.  
—Last Saturday the old barn on Pleasant street, owned by William Dyer was broken into and all of the grain in the barn was stolen. It is thought that the perpetrators were people who had come home from the Brockton fair. On the same evening, the barn of Howard Baker on Union street was broken into and a harness stolen.  
—Miss Mary L. Vining, a graduate of the Class of '90 of Boston University, has accepted a position as teacher in the schools of Southfield, Conn.  
—Miss Nellie Boeche, who has been very ill for the past few weeks, is slowly improving.  
—The Boston Ice Company are tearing down the ice houses on the shores of the pond which have been in use for many years and are to put up a new structure for use this winter. Carpenter Talbot of this town has the contract for building the houses and Bradford Gay, stonemason, is engaged laying the foundation.  
—The black mare, Ennio, owned by D. Frank Daley and trotted in the 22 class race at the Attleboro fair last week Wednesday, took second prize, making the mile in 2:25 1/2.  
—Rev. Bishop Brady, administered the sacrament of confirmation to forty-eight children at St. Francis Xavier church last Sunday morning, before a large audience. The Bishop preached an eloquent sermon on "Confirmation."  
—Court Massaguet, No. 702, A. O. E., at their autumn carnival to be held Oct. 23-25, will give away two handsome Lovell Diamond wheels, one each to the most popular gentleman and lady cyclist. These wheels are on exhibition in the Post-office.  
—The Literary Circle, connected with the Union church, composed of young ladies, held their regular meeting at the parsonage last Monday evening. At the close of the meeting a surprise was tendered one of their members, Miss Lillia Clapp, who is soon to return to her home in the West. A number of young gentlemen came in to help out in the games and refreshments were served during the evening and a good time was had by all.  
—The Board of Registrars meet in the engine house this evening, from 7:30 to 9 o'clock.

The Baroness Emma Sporti of Norway is said to be the best known woman painter in northern Europe.  
 The favorite daughter of the late Professor Helmholz of Berlin is the wife of the eminent Dr. von Siemens.  
 Princess Victoria of the Great Northern railroad has donated \$,000 acres of land to families rendered homeless by the destruction of Hinkley.  
 The Princess of Wales has a great fondness for having her picture taken in "groups." The prince disposes the ceremony as much as his spouse enjoys it.  
 Dr. James R. Cooke, a successful physician, who has been the only man in the country who, though blind from infancy, took up the study of medicine and excelled in its practice.  
 The widow of General Jackson says that when he was courting her he made a rule never to read one of her letters on Sunday or to send one to her, that it would be likely to be carried through the mails on that day.  
 The Rothschilds, by mutual consent, insist on keeping up a very strict custom. They own five beautiful chateaux at Ferrieres, a French town some 15 miles south of Paris, and here all the members of the family meet together once a year.  
 The title of the Duke of Buckingham is said to have brought disaster to all the families that have borne it. In the family that owned the ducal seat at Stowe the dukedom ended in misfortune and is now extinct, but the property still owned by the daughter of the late duke.  
 Empress Eugenie is not going to Scotland this year, so she has decided to spend the winter at the Albergold castle, and as that place will not be visited by the Duke and Duchess of Connaught "has been" by her majesty to Lord and Lady Carrington for six weeks.  
 Miss Ellen Triantifilo of Boston and Sullivan Billie of Springfield, Mass., were married the other evening in the latter city by Rev. Agathadinos A. Papageorgopoulos of New York. After receiving the Greek national dance was footed, and everybody kissed the groom instead of the bride.  
**STAGE GLINTS.**  
 Owing to the illness of W. T. Carleton the Carleton Opera company will not go on this season.  
 Courtney Thorpe is a member of Emily Bancroft's company, playing in "Our Flax." He is "featured."  
 Pretty Annie Irish has been engaged to appear with Olga Netherole during that actress' tour in this country.  
 Marie D. Stotwell has been engaged by Manager Rose for the production of "Paul Jones" at the Castle Square theater, Boston.  
 Lang Whaley of Pomfret, O., was graduated recently from a school of music in Cincinnati. She is going abroad to prepare for a year.  
 The Boston Post's manager says that she will resume her interrupted tour in December, but not with "May Blossom." A new piece is being arranged for.  
 Dr. Wolf Hopper has withdrawn from the position of financial broker of the town of Tim Murphy. George Richmond and Eugene Canfield have joined Mr. Murphy's company.  
 Julia Arthur before she sailed for London said: "I have no definite plan for my next season, as I shall not return to America this season."  
 A clever Californian, Stella Alexander, has taken Eva Davenport's place as Octavia in "The Little Trooper." When "A Woman in a Woman" has run its course at the Lyceum, New York, E. H. Southern will be seen in a revival of one of his earlier pieces.  
**ODDS AND ENDS.**  
 From one to four miles to the windward of a fog signal there is often a "dead space" where the signal cannot be heard.  
 Smokers' cramp is reported to be the disease of the moment in France and Spain and is caused by incessantly rolling cigarettes between the fingers.  
 England's penal colony in the Andaman islands contains 12,107 persons banished from British India. There are 8,725 men, 4,414 women, 1,841 convicts and 202 burglars.  
 There is in Paris a Russian horn band, each horn being capable of producing a single note only. As a result of the training that the band produces the effect of one equipped with ordinary instruments.  
 The German foreign office has received from Africa a trunk containing Emin Pasha's diaries and records dating from October, 1874, to December, 1889. The government intends to publish all the documents at its own expense.  
 A proposed law that any new building erected in London shall have its front not less than 20 feet from the middle of the street has brought out the fact that there are in the heart of the city 22 miles of streets less than four feet from the first book made of ground wood paper has been placed in the Berlin testing office for examination recently. It is said to be in good condition. As it was printed in 1862, very nearly half a century ago, the argument that wood paper was no durable qualities appears to be seriously shaken.

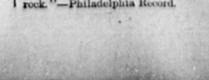

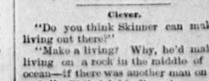

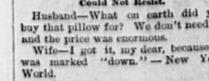

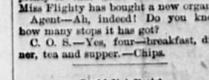

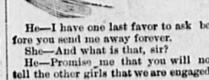

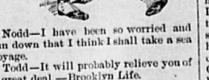

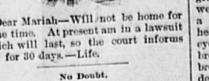

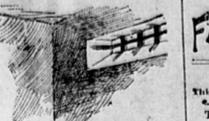

**THE GREAT ARTISTS.**

Craiger painted several of the best pictures after he had passed 80 years and died at 85.  
 Pollaiuolo was the son of a painter, whence his name, and began his career as a wood carver.  
 Brough was the first artist to give attention to the different phases of peasant life and represent them on canvas.  
 Francia did not begin painting until nearly 60 years of age, and in ten years executed a long series of admirable works.  
 Lorraine was left an orphan at the age of 13 and was reared by his brother, who instructed him in wood engraving.  
 Bordone painted so much after the manner of Titian that many works proved to be his were long credited to the latter.  
 Oregano's "Last Judgment," now in the Campo Santo at Pisa, was in the opinion of some the greatest picture in the world.  
 Diepenbeek started out to make a reputation as a painter on glass, but the demand for his work was so great that he turned to the more profitable nature of the material.  
 Signorelli, born in 1440, was the first artist who systematically studied anatomy, with a view to depicting the human form with greater accuracy.  
 Fiesole made a beginning by decorating the cells of the convent of St. Mark in Florence. Every cell was painted in a magnificent fresco, and the fame of this work made the reputation of the artist.  
 Carillo died of injuries caused by a fall from a scaffold in a church in Cadiz. He had just finished a picture and was admiring it with pride, when he mistook a ladder for a beam, and fell.  
**THE FASHION PLATE.**  
 The black silk petticoat is an indispensable feature of the wardrobe of every well-dressed woman.  
 A pretty dress for a child has spaces cut into the material, with ribbon or velvet run through.  
 Foundation girts for lace dresses do not need to be very wide. Indeed many ladies like them better when they are narrow. For this reason it is possible to make an old silk skirt that might not be available under other circumstances.  
 Trimmings made of very long strands of beads are increasing in popularity. A novelty is a girdle of pastermentine, with 18 inch strands set around its scallops. This brings the lower edge of scallops against the skirt, and the effect is very pretty.  
 A handsome imported costume is made of broad satin. There is a very wide single belt on either side of the front, and the back is arranged in a series of narrow plaits. The skirt is very full at the bottom, and the hem is very narrow at the top. These features make this all in modern fashion.  
**RAILROAD TIES.**  
 The Southern Pacific railroad has a drawing-works of the Nicholas River, Beaumont, Tex., which is worked by water power.  
 The Ashland, Topinka and Santa Fe road will erect a costly hospital at Topinka for the benefit of its injured and sick employees.  
 The average railway charge for freight transportation per mile in the United States is 1.22 cents and is the lowest in the world. In Great Britain it is 1.70 cents; in France, 1.44; Germany, 1.70; Italy, 2.40; Austria, 3.10.  
 The Baltimore and Ohio has adopted a call bell system by which it can notify any agent on the line who is needed at the wire. The system will be of special value where the operator is also agent and frequently called from his office by other officials.  
**How to Choose Good Lip Salves.**  
 Bad digestion will often assert itself in broken or chapped lips, sores in the corners of the mouth, fever blisters and a coated tongue. Chronic sore mouths should be rubbed with sweet oil or pure glycerin at night. In the morning wash with a solution of alum or borax, a teaspoonful in a tumbler of water. Camphor ice is both healing and cleansing. Good cold cream is not a bad salve. All the druggists have supplies and cheaply dispense 5 cent quantities. Citron ointment is one of the old reliable lip salves kept by all chemists. It is applied to the sore with a soft linen cloth. When the mouth is sore, the diet should be changed to vegetable foods.  
**How to Boil Haddock.**  
 Tie it nicely in a linen cloth, put it in a kettle with water, either salt or cover it, and add a tablespoonful of vinegar and a little salt, and after the water begins to boil let it boil ten to fifteen minutes, and the fish is done. Lift it out carefully and let it drain a couple of minutes before serving. Egg sauce is a dressing made of milk instead of cream, with hard-boiled eggs chopped fine and stirred in just before serving. Pour this sauce over the fish, garnish with sprigs of parsley, and it is ready to serve. The potatoes should be peeled, and if not small enough cut as thin as an wafer, boiled or steamed, and rolled in melted butter and chopped parsley before serving.  
**How to Remove Dried Paint.**  
 To remove paint that has dried in a fabric put the fabric in a solution of turpentine over it and let it stand for several hours. Then take the fabric in the hands and rub briskly. To remove paint that has been dried on a carpet, pour a quart of turpentine over it and let it stand for several hours. Then take the carpet in the hands and rub briskly. To remove paint that has been dried on a wall, rub with a clean cloth until the paint is rubbed off. Then wash the wall with a solution of turpentine and water. If in haste, rub in gasoline and hang in the sun.

**THE FARM GARDEN**

**THE EMBLEN GOOSE.**

This handsome variety is fairly prolific and matures early. It is one of the best of the only three varieties of geese which can be called economical. It is true we have several varieties, but the majority are so inferior to the three leading breeds—Emblem, Toulouse and Italian—that they cannot be called profitable breeds, says a breeder in The Kennel, Farm and Poultry Year.  
 The Emblem geese is by far the most beautiful of the species. It is a very large variety, pure white in color, and very handsome. In a large flock on the grass or stubbles they look extremely well. The Emblem gander should have a long straight neck, long, straight head; deep orange bill and light blue eyes. His breast should be full and broad, with a slightly rounded neck. The Emblem is a fairly prolific. They lay about 15 eggs each. If fairly fed, and make good sitters and mothers. They are indeed most satisfactory in the home.  
 How to Make a Delicious Ice Without a Freezer.  
 Pour half a pint of boiling milk, sweetened into a basin containing two well whisked eggs. Stir the ingredients, put them into a clean saucpan and stir steadily over the fire until a thick custard is produced, taking care it does not boil, or it will be spoiled. Remove from the fire and add until cold with a half a pint of whipped cream to the custard and either a little liquor or a teaspoonful of vanilla essence. Ascertain that the mixture is sweet enough, and add some dried cherries and pineapple cut into small pieces, and a few drops of carmine, just sufficient to give a pale pink tinge.  
 Put the mixture into a pudding mold with a cover, or an ordinary round tin that will hold a pint with a tight cover. Stand the tin in a zinc pail, and pack it around tightly with equal quantities of rough ice broken up into fairly small pieces, and freezing salt. About 3 pounds of each will be required. Then cover the pail outside with a thick blanket and stand it in a warm corner of the kitchen, near the fire, but not too close, for 3 1/2 hours. Then turn the pudding out of the tin, and if necessary to loosen it, and serve at once.  
**How to Clean Chamis Gloves.**  
 The best way for cleaning chamis gloves is to put them on the hands and wash them in lukewarm water with white soap. Rub them in clean lukewarm water and squeeze them as dry as possible. Then dry thoroughly while still on the hands with a clean towel, peel them off the hands and hang in an open window, first carefully pulling them into shape.  
**How Artists' Models Are Paid.**  
 The regular rate in the art schools is 25 cents an hour, or \$10 a week for six days' work of four hours each. If no complaints are made by the art student or class member, the model gets a 25 per cent premium. "Good days" are few and far apart, for the poses are 35 minutes long, with only five minutes rest, and in difficult positions more than human nature can endure. To get off the pose an instant or to keep it in a long manner provokes complaint, and although the croaker may be the poorest model, he may be trying to earn a honest livelihood.  
**Musical Criticisms.**  
 The tone and rate of growth of potatoes thins, and hence the effect of the premature death of potato tops upon the yield, was investigated. The tubers increased with the different dates of digging until Oct. 1. The rows used in this test had been thoroughly sprayed with bordeaux mixture, and the plants remained green until the end of September. Harvestings were made beginning Aug. 2 and continued every ten days until Sept. 22. The yield Aug. 2 was at the rate of 58 bushels per acre, the tubers averaging 1.6 ounces. The yield at the last digging, Sept. 22, was 379 bushels per acre, the tubers averaging 3.7 ounces, showing the importance of preventing the early destruction of the vines.  
**Exchanging Straw For Manure.**  
 It is hard to get out of the heads of some farmers that straw has better uses than to be piled down merely for its manurial value. They use it liberally as bedding, so as to save more of the liquid excrement which will otherwise be wasted. But after all this has been done in this way that is possible those who grow grain have large stacks that they do not know what to do with. They will sell it if for every load taken away they buy a load of manure. The manure may cost \$1 a load, while the straw ought to sell for \$3 to \$5 or \$10 according to size of load and quality of the straw. Yet in every case the load of manure has more of plant food than the load of straw. It is not uncommon for farmers in some places to furnish straw for bedding to those keeping hogs or cows in a neighboring village. It is a very good plan where the distance for hauling both ways is not too great. There are always some horses kept in village hotels, and it is worth while for farmers to make arrangements for exchanging straw for their bedding for the manure sold and they will produce, according to American Cultivator.

**HOW TO PRESERVE PENCIL SKETCHES**

**Valuable Ones May Be Kept Indefinitely by a Little Care of First.**

Pencil drawings may be rendered inflexible by a very simple process. Slightly warm a sheet of ordinary drawing paper, then place it carefully on the surface of a solution of white resin in alcohol, leaving it there long enough to become thoroughly moistened. Afterward dry in a current of warm air. Paper prepared in this way has a very smooth surface. In order to be slightly warm for a few moments. This process may prove useful for the preservation of plans or designs when want of time or any other cause will not allow of draughtsmen reproducing them in ink. A simpler plan than this is to brush over the back of the paper containing the pencil sketch with a weak solution of shellac in alcohol. Chalk and pencil drawings may be fixed, though not so thoroughly as by the above methods, by washing them with kalmikol or with water holding in solution a little kalmikol or gum. When milk is used, great care must be taken that no cream remains in it, as it would cause the drawing to blot streaky. The easy way to apply these is to pour them into a shallow vessel and lay the drawing flat upon the surface of the liquid, after which remove gently and lay it in an inclined position on white blotting paper to drain and dry.  
 Pour half a pint of boiling milk, sweetened into a basin containing two well whisked eggs. Stir the ingredients, put them into a clean saucpan and stir steadily over the fire until a thick custard is produced, taking care it does not boil, or it will be spoiled.
