Storage cans for dry foods not completely covered

Additional pages will be used if needed.

V NEW OR IMPROVED MEASURES

Store-room & Mess-hall has been partially rat proved with tin.

This seems to be quite effective.

VI SUBJECTS NOT COVERED UNDER OTHER HEADINGS

Screening not adequately or correctly installed in windows and doors.

VII RECOMMENDATIONS

Recommend a different type of can and cover be used to store dry foods.

One which is insect & rodent proof.

Item 5. Mosquito Control.

A survey was made of the Japanese houses in the Military Government Compound area and the dependent housing area. With the help of Japanese sanitary teams, general sanitation and insect and rodent control among the Japanese in these areas has been improved. Because of early heavy rains, the number of adult mosquitoes now is fairly large.

Residual spraying is being done as directed by Par. 6a (1), FEC Cir. 80, dated 30 July 1947. Present control measures are adequate.

Item 6 thru 10. Insect and Rodent Control.

There has been a noticeable increase in the house-swallow population since the middle of April. Because of the high incidence of Japanese B in this area last year, a study of bird-mites by qualified laboratories might yield valuable information.

Item 45. Status of Immunization.

<u>Disease</u>	<u>Percentage of Initial Immunizations Complete</u>	<u>Percentage of Reimmunization Complete</u>

WD AGO FORM 8-140
1 AUG 1945

NARRATIVE SECTION (Explain all defects or unsatisfactory situations noted on page one. Enter comments by item number.)

Item 5. Mosquito Control.

Screening of the barracks has been completed following the remodeling program mentioned in the last report period. Residual spraying is being accomplished as directed by Para 6a (1), FEC Cir, 80, dated 30 July 1947. The present mosquito population is very small and the above control measures are adequate. Early heavy rains and warm weather have started early rapid mosquito larval growth and a higher mosquito population for this summer may be expected.

Item 6 thru 10. Insect and Rodent Control.

In a follow-up inspection of the Bachelor Officers' Quarters, only a few rat droppings were found and most of the old nesting places have been destroyed.

Item 45. Status of Immunization.

Disease	Percentage of Initial Immunizations Complete	Percentage of Reimmunization Complete
Smallpox	100	100
Typhoid-Paratyphoid	100	100
Tetanus	100	100
Cholera	100	Not Required
Typhus	100	100
Jap B Encephalitis	100	100
Influenza	100	100

Additional pages will be used if needed.

V. NEW OR IMPROVED MEASURES

Inspection of the dependent commissary train for this isolated unit, was made. Marked improvement was noted in the sanitary conditions following forwarding of suggestions to higher headquarters.

First aid instructions are being given to an officer and an enlisted man in contemplation of the loss of the team's medical officer. Emergency drugs have been obtained and simple instructions have been prepared for their use. The dispensary is being arranged to facilitate emergency - type treatment.

VI. SUBJECTS NOT COVERED UNDER OTHER HEADINGS

None.

FILE

NARRATIVE SECTION (Explain all defects or unsatisfactory situations noted on page one. Enter comments by item number.)

Item 5. Mosquito Control

Barracks have undergone remodeling during this report period and screening is not yet complete. Residual spraying is being accomplished as directed by Par. 6a (1), FEC Cir. 80, dated 30 July 1947.

The present mosquito population is very small and the above control measures are adequate.

Item 6 thru 10. Insect and Rodent Control

Thorough inspection of the Bachelor Officers' Quarters was followed by a general house cleaning and rodent control campaign. This program has greatly reduced the rat population in these quarters and efforts are being made for complete elimination.

Item 43. Venereal Disease

The Control Facilities room was made more attractive and new issue of prophylactic kits was obtained.

Item 45. Status of Immunization.

<u>Disease</u>	<u>Percentage of Initial Immunizations Complete</u>	<u>Percentage of Reimmunization Complete</u>
Smallpox	100	100
Typhoid-Paratyphoid	100	100
Tetanus	100	100
Cholera	100	Not Required
Typhus	100	100
Jap B Encephalitis	100	100
Influenza	100	100

V NEW OR IMPROVED MEASURES

The dispensary and all barracks have been remodeled to add four times the previous window space. This improvement not only has made the barracks more pleasant to look at but will improve ventilation during the summer months.

NARRATIVE SECTION (Explain all defects or unsatisfactory situations noted on page one. Enter comments by item number.)

Section I Item 5

Mosquito breeding sites are being sprayed once a week with 5% DDT Residual Spray.

Section I Item 10

In compliance with Far East Command Circular 80, dated 30 July 1947, local Insect and Rodent control measures are considered satisfactorily effective.

Section II Items 20, 21, 22, 23, 24 and 25

Training films "Personal Hygiene" and "Military Sanitation" were shown this month.

Section IV Item 42

Insect borne disease control, training film, "Malaria Control" was shown this month.

Section IV Item 45
