the charge for board of p.o.w. was the same board of detachment. receipt circumstances of things eaten with rice of officer and one Koku is about 200 Litre.

below who lived in out barracks were insufficient as the same popular nation's distribution.

Doc # 1999

A comparative table of food distribution (attached with Japanese military (in barracks), but

Detachment (in barracks)

outbreak of war (Dec. 1941)

rice and wheat 186gr.
rice 600gr.
wheat 186gr.

1944
rice and wheat 79gr.
rice 540gr.
wheat 186gr.

the rule that 10% is substitute by cereals and pulse or sweet potato.

August 1945

popular detachment 700gr.
Specialty set up garrison 540gr.
at supply quantities of which detachment were 630gr.

the end of war (August 1945)

However, the charge for food of p.o.w. was the same board of detachment. receipt circumstances of things eaten with rice of officer and some Koku is about 200 litres.

out barracks military man

outbreak of war (Dec. 1941)

rice 330gr.
out barracks military man engaged military training or out field exercises is 470gr.

1942
hitherto distribution is only rice but from this time added wheat.

1943
food circumstances grew more serious without wheat added cereals and pulse or sweet potato.

May 1945

military man engaged military training or out field exercises also received 330gr. as home distribution by change of distribution system of popular nations. However it was revised to give 400gr. out of 330gr. only as lunch eat of attendance day.

July 1945 (August in pointed city)
popular distribution decreased 10%

the end of war (August 1945)

Japanese military (in barracks), but

p.o.w.

outbreak of war (Dec. 1941)

rice and wheat 180gr.
rice 600gr.
wheat 180gr.

October 1942

rice and wheat 470gr.
officer 470gr.
p.o.w. 330gr.
By connection of work at various places, within 100gr. for one day.

June 1944

rice and wheat 470gr.
p.o.w. and popular 470gr.
Lyengua, work work
if not engaged rough work officer not engaged work

the end of war (August 1945)

below who lived in out barracks were insufficient as the same popular national distribution.

rank's military (in barracks), but

popular nation's distribution

over April 1941

popular distribution
two years old - sixty years old man)
soldier (a) 350gr.
light labourer (b) 330gr.
light labourer (c) 310gr.

hitherto popular distribution were only rice but this time added wheat.

1943
food circumstances grew more serious, without wheat added cereals and pulse or sweet potato.

1944
it can be add-distribution with 100gr. in his work place. (August in pointed city)
popular distribution decreased 10%
330gr. now to 300gr.
180gr. now to 160gr.
