### The Political Economist.

A SUPPLEMENT containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 23rd of May, 1863, will be published by the Economist immediately.

#### MR SUMNER'S SPEECH AT NEW YORK.

Mn C. . . SUMMER has been delivering a speech before a crowded audience in New York, which will cause much pain wowded autience in New York, which will cause much pain and disappointment to all friends and well-wishers of the Federal United States. It is weak in argument, unfair and unjust in its representations, and bitter in tone and temper. If men of Mr Summer's education and position in America really believe the things they say, and indulge the feelings to which they give utterance, it is clearly hopeless to attempt either to enlighten their under-standings or to allay their irritation. If their assertions and professed sentiments are mere "Buncombe,"—taken up and uttered for a political purpose, or to gain popularity, then and processed sentiments are mere "Buncombe,"—taken up and uttered for a political purpose, or to gain popularity, then all respect for such orators must cease, and scarcely any lan-guage of condemnation can be too strong to apply to their conduct. Mr Summer's harangue, from first to last, is an in-distment against Great Britain, uttered apparently with the resolution to echo and the wish to exacerbate all the violent ignorant and ill-disposed of his countrymen. Nor can he plead the orator's usual excuse for intemperance and misre-presentation, viz., that he spoke impromptu, and was carried away by the excitement of the moment; for his speech was an elaborately prepared composition, announced beforehead passions and prejudices now entertained against us by the most an elaborately prepared composition, announced beforehand, and delivered before an assembly who came purposely to hear his exposition of "The Foreign Relations of the United Blates."

There were many reasons why Mr Summer, of all men, ought to have been the last to deliver such an inflammatory and insulting oration. Mr Summer is not merely a member of the Senate; he holds an official position in America; he is Chairman of the Senate's "Committee on Foreign Relations" —a place to which we have nothing corresponding in this constry, but which is one of great influence and responsibility, because by the Constitution the Senate of the United States in a concurrent authority with the President in the negotia-tion of treaties, the decision of war or peace, and generally in the management of all foreign affairs. What Mr Summer ays on such subjects, therefore, comes before the world with

almost as much weight as if Mr Lincoln had said it, and with more weight than the words of any mere minister would be entitled to. Mr Seward is only a servant and clerk of the President, whom he can lecture or dismiss at pleasure. Mr Summer is a colleague, whom the President must confide in and consult in all his dealings with foreign Powers.

No. 1,049

Again : Mr Sumner is Senator from Massachusetts, and as such is the virtual representative of the most highly-educated, the most respectable, and, it is usually supposed, the most English portion of American society. Mr Summer has long been regarded as pre-eminently the orator and scholar of American public life; he has had the advantage of every influence which could en large and humanise the views of a statesman ; what he thinks and says we may feel sure, —at least we have a right to expect— will be more moderate, more sensible, more fair than what is thought and said by the rest of his countrymen ; and if we find that he is unjust, virulent, determined to misconstrue the conduct of England, and anxious to foster and fan the fury of the American people against us, we are compelled to conclude that most of the higher and more cultivated classes of that Republic are as bitter and as prejudiced in regard to us as himself. If men like Mr Sumner, we say to ourselves, can speak and act thus, what hope is there of maintaining amicable relations i-to whom can we look for justice or moderation ireinstons i to whom can we look for justice or moderation i and what becomes of the pleading of the advocates of the United States in this country that it is only the Irish, the Germans, the ignorant population of New York, the cor-rupt and electioneering politicians of Washington, and the profligate newspaper press generally, that hate us and believe us to be their bitterest enomies, and that the educated classes do no institue and feal kindlike termine area do us justice and feel kindlily towards us ?

Mr Sumner, too, ought to be better aware than almost any one of his countrymen how unjust are his accusations and how unwarrantable his sentiments towards England. He can reason, and must know how futile and flimsy are several of his arguments. He has travelled much ; he can measure things by a European standard, and see them otherwise than through and coloured spectacles of an ordinary Yankee; he the small has visited England more than once; he visited her very recently; he was everywhere received with a courtesy which was rendered even more to his reputation at home than to his ostensible personal qualities, and most of all to the sufferings which he had undergone for his Abolitionist opinions; he met with attentions and politeness which, if he sometimes tried, he never found wanting; and he had ample means of knowing how friendly and how hopeful, and often how admiring, were the feelings of the majority of English-men towards his cherished Republic. He could not speak in ignorance. He certainly has not spoken in haste. What he has said he must intend to stand by, and must wish his follower intermet to believe. If he has another unist wish his fellow-countrymen to believe. If he has spoken unjustly and untruly, he must have intended to be inaccurate and unfair. If he has assailed England with bitter and hostile words, he must have done so with the wish to excite bitter and hostile

## TETHE ECONOMIST.

[Oct. 3, 1803.

Confederates at so early a date as both an unnecessary, an unwarrantable, and an unfriendly act. Yet no one knew better than Mr Summer that the proceedings on our part could not have been either delayed or withheld. He knew that until the Confederates were recognised and proclaimed to be belligerents, his own Government,—that of the United would by the law of nations have been answerable States. every misdeed or injury inflicted upon us by their antafor over, that unless we had recognised the Confederates as belli gerents, and as such entitled to all belligerent rights, we should have no alternative but to treat their cruisers as pirates ; and that to have done this would have been to commit a distinct and peculiarly marked breach of neutrality, and to take sides with one party against the other in the strongest conceivable fashion. (This, indeed, Mr Sumner would no doubt have had us do; for he distinctly intimates that what he blames us for in reality is not for having been strictly neutral, but for not having "intervened" in favour of his party.) Lastly, Mr Summer knew perfectly well, as we showed conclusively last week, that we did not issue our Proclamation of neutrality and our recognition of the belligerent character of the Confederates till sixteen days after the President had himself conceded and recognised that character by establishing a blockade of all the Southern ports,-a blockad eing (as the Supreme Court of the United States has just declared, and as everybody knew already) a distinct and special war right, which can only be exercised by one belligerent against another.

Mr Summer's second charge against us is that we have allowed eruisers for the Confederate States to be built in British ports, and he angrily endeavours to fix on the British Government the responsibility for all the damage done to Federal commerce by the Florida and the Alabama, whom he calls "British pirates" and "British privateers." He uses the most extravagant language on the subject, in order to exasperate the ready passions of his audience; but entirely suppresses the facts-on which one should have fancied a fair nan or an honourable antagonist would have been prone to dwell-that the rule of international law on which he grounds his demunciations is a peculiarly difficult and disputable one; that many of the best authorities, both American and English, hold his interpretation to be a wrong one: that, nevertheless, the British Government did endeavour to stop the Alabama the yery moment their law officers told them there was a primé facie case for doing so; that they have since actually seized another steamer, on the representa-tion of the United States Minister that she was designed for their enemies, and have been *defeated in a Court of law* for doing so, and had a verdict for damages given against them as having acted illegally; and that, notwithstanding this defeat, they have since resolved to detain two other vessels on ilar grounds, and again take their chance of a decis in their favour. In fact, our Government has actually strained their executive authority in taking steps of *doubtful legality*, in order to meet demands of the American Government which it was thought might possibly be just and right.

Two other considerations will fully justify us in describing Mr Sumner's address as marked by the most distinctly unfair and unfriendly avoided doing the slightest justice to the strong anti-slavery feeling which prevails among us, and even insinuates a disposition to favour the Slave Empire of the South. Yet no one knows better than Mr Sumner that this feeling, and this feeling alone, has been found strong enough to counterbalance, not only all the natural sympathy which Englishman habitually experience towards the weaker party in any strife, especially when that weaker party has shown wonderful energy and skill,—but the indignation which could not fail to be aroused by the insulting language of the Federal authorities and the Federal Press towards us, their excessive exercise of belligerent rights against our commerce, and more than one outrage on which they have ventured upon our national flag. He knows, no one better, that this anti-slavery sentiment, which with us reaches almost to a fanaticism, has had no mean influence in inducing our people to bear with patience the sufferings caused by the forcible interruption in our supply of slave-grown cotton. He knows, no one better, that

first place, he treats the concession of belligerent rights to the Confederates at so early a date as both an unnecessary, an unwarrantable, and an unfriendly act. Yet no one knew better than Mr Summer that the proceedings on our part could not have been either delayed or withheld. He knew that until the Confederates were recognised and proclaimed to be belligerents, his own Government,—that of the United States, —would by the law of nations have been answerable for every misdeed or injury inflicted upon us by their antagonists, and have been liable to our claims for indemnity:—and that this recognition was, therefore, so far an act of simple fairness and friendship towards the Federals. He knew, more-

Finally, what construction is to be placed upon the remain able circumstance that throughout his whole address while endeavouring to rouse the wrath of his countrymen by vicious enumeration of the supposed offences of Great Brit he says not a word against France, which has participated in nearly all, and added others of her own? He charges is we hostile designs because we recognised belligerent rights in the Confederates; but he utters no word of complaint again France, who recognized these at the same date and in the same terms. He charges us with actually aiding and abeting the Secessionists, and wishing well to their cause but h disingenuously suppresses the fact, known to no eno being than himself, that France not only wishes well to them but has twice proposed to this country to acknowledge their in pendence, and twice met with a refinsal ; and that it is owing to our rigid adherence to our principles of strict neutrality and our respect for international law and image that the Southern Republic was not long ince resp-nised, and the blockade long since broken. In furnishing the North with arms in vast abundance; in adm a questionable and imperfect blockade which, if we had look only to bare facts and to our own obvious and immediate in terests, we should have had ample warranty for refusing to recognise ; and in dissuading Louis Napoleon from prems action in favour of the Confederates, we have in truth proved ourselves the best friends of the Federals-possibly more so than was in accordance with scrupulous impartiality. Yet for this conduct, or in spite of it, England is singled out for special and bitter animosity by a semi-official and highlyreputed statesman, who does not venture to breathe use sentence of blame against France, whose proceedings have been usually identical with ours, and when they have differed have differed in being incomparably less friendly and less forbearing. When men in Mr Sumner's position can write and speak as he has done, we may well begin to despond as to the possibility of maintaining either a good understanding or even mere peace between the countries. Happily Earl Rus-sell's speech at Blairgowrie is an excellent answer and a strik-ing contrast to the harangue at the Coopers' Institute.

THE PROGRESS OF AUSTRIA IN ITS NEW CAREER THE PROBABILITIES OF A REVISED AND ENLARGED ZOLLVEREIN.

THE four years which have elapsed since the Italian campa of 1859 broke up the Austrian army and cut off from the Empire almost its richest province, have, to the astonishment of all observers, sufficed in a large degree to overcome what seemed to be overwhelming calamities. It is true that behind the present hopeful and cheerful state of things there are many difficulties and some dangers formidable enough; but it is to be admitted without reserve that the statesmen now at the head of Austrian affairs have sagaciously and holdly adopted a line of policy which, if pursued, will regenerate their country. After the crushing defeat of Solferine, the perils of Austria might be classed under not less than in heads. In the first place, the old system of despotic paternal heads. In the first place, the old system of despote particular authority, with its feudal habits of thought, its Aulic councils, and its slow and solemn rules of administration, had utterly broken down. The Crown and the ruling aristocracy stood before Europe and their own countrymen as institutions which In the second place, there had brought Austria to the dust. had brought Austria to the dust. In the second place, there was the quarrel with Hungary, the largest and most impor-tant part of the Empire. In the third place, so extravagant had been the expenditure for a long space of time, that the finances presented year after year a large and growing deficit —a deficit so large that cash payments had been long sus.80

### TE THE ECONOMIST.

preciation, inflicted on the country. In the fourth place, States composing the Zollverein have by no means the means the preciation perseverance in a feudal regulations of industry, inclinations or the same interests. The Baltic province wilds, corporations, restraints, and monopolies, had so kept them the energies and intelligence of the people, that with a rail among the richest in Europe, the Austrian population an proverbial for its poverty and lack of enterprise and In the fifth place, the external commerce of the country man so fattered by prohibitions and restrictions, that the ex-toris were a comparative trifle for so large and varied a terri-tory, and the revenue ostensibly derived from Customs was nearly all consumed in supporting an army of coast and nomier guards, most of them as well paid by the snunggler as by the State. And, in the sixth place, the headship of the German nation, which by descent and by tradition belonged to the Austrian Crown, seemed to have passed away beyond reall. The honour of leading Germany in the path of wise real. The honour of leading Germany in the path of wise and solid progress—the large material advantages inseparable from the chief place in the fiscal administration of forty millions of German people—had long been, and, as far as could be judged, would continue to be, in possession of Prussia. Of these six gigantic evils, it may be said without exaggeration that some progress has been actually made by Austria towards the remedy of each. In some of the cases it must be allowed the process of reform has not proceeded beyond the admission of the true principle, but in others, the work achieved is substantial

The institution by the Emperor of a Parliamentary system, with delegates chosen by real election, with open debates, free speech, and the power of the purse, has changed the whole aspect of Austrian society. With a free Parliament every-time is possible. Without a free Parliament the country might have relapsed to the wolves and the badgers. It was a saying of Sidney Smith's, that no country could be ruined or really oppressed in which five hundred gentlemen could meet every year for several week's discussion of grievances and taxes.

The dispute with Hungary is still open, but the controver-sies to which it has given rise have not been without their use to both parties; and there is now a greater probability than ever that some middle course will be found by means of which the local liberties and rights of Hungary, secured to it from ancient times, will be rendered compatible with the par-ticipation of Hungarian representatives in an Imperial Parlia-ment bound to protect the interests of the whole and of each part of the Empire.

The public expenditure has been already subjected to vigorous criticism in the Beichsrath, and with palpable effects; and by the operation of various causes the agio on the incon-vertible paper currency has been for some time past in course of reduction.

Against the fourth of the evils we have enumerated-the humpering of industry by old and stupid regulations - a com-mencement has been made of remedial measures.

As regards the fifth-the reform of the tariff-we will

But on the last point—the leadership of Germany—that part of the melancholy programme of 1859, upon which hope seemed to be impossible, the recent events at Frankfort have rendered it necessary to adopt new views and to employ a new language. For the present the Frankfort project of Federal reform may remain a suggestion merely; but the sincerity and success with which the Austrian Emperor maintained his views throughout the protracted conferences have already exer-Trei cised a moral influence of the most marked kind.

We have referred above to the subject of the Tariff. The task of Austrian statesmin in regards the fiscal policy of the country is clear enough so far as the principles to be followed are concerned; but the combination of special facts is so pecu-lar, that it will be an employment of no small interest to watch during the next six or twelve months the actual course pursued.

We are all now familiar with the constitution and func-boxs of the German Customs Union, called the Zollverein, ex-tending over fourteen States and groups of States, with a population of say 36 millions, and raising a Customs revenue of nearly four millions sterling per annum. The agreement upon which this Union rests expires in usual course at the end of 1865; and Germany is already agitated by the discussion of questions relating to the revised form in which the Zollve-

The rein shall, after 1865 be renewed for another period. The States composing the Zollverein have by no means the same inclinations or the same interests. The Baltic provinces of Prussia, thriving, as they do, upon the export of timber, corn' and flax to this country, are free-traders of a very decided stamp. They have found out practically that large exports are impossible with small imports; and the cry, therefore, from the Prussian Deputies from Dantzic and Memel is for such a reduction of the Zollverein tariff as will largely admit the goods of England and France. But opposed to this cry are the interests and fears of the Southern States, Bavaria and Wurtemberg, and of some of the small Princedoms in the and Wurtemberg, and of some of the small Princedoms in the centre of the Union. The constitution of the Union requires that any alteration of the tariff shall have the consent of all the associated States; and hence it has naturally happened that in Prussia and one or two of the larger countries there is excessive indignation at being bound hand and foot by the slowness or obstinacy of even the smallest member of the general body. This sense of injury and injustice has pro-ceeded so far in Prussia that within the last twelve months, and in anticipation of the approaching expiry of the Zollverein pact, the Prussian Government have entered into a commercial treaty with France of a very liberal character, and, so far as anything certain can be predicted of Berlin politicians, it seems to be settled that, whether the Zollverein be renewed or not, Prassia will adhere to the French treaty.

But, besides the relations of the Zollverein to non-Germ countries, there are to be considered the relations of the Zollverein system to Austria. It is the misfortune of Austria, of Germany, and of Europe, that the Zollverein does not em-brace all the German Kingdoms-of course including Austria in that category. If Austria could be included, there would then be but one Custom-house system, one tariff, one administration, over the whole of Central and over a large part of Eastern and Southern Europe,-that is over a region in-habited by nearly eighty millions of people. The combina-tion would be the greatest of its kind which has ever existed, and its effects on the progress of Germany are beyond calculation

To watch and, as it is called, protect the long and intricate land frontier between the Zollverein and Austria is at presimple exhaustion of the Austrian Exchequer. Nominally, the gross Customs revenue of Austria is over two millions sterling detailly, when all the expenses of every kind inci-dent to the Custom-house service are fairly reckoned up, it is certain that the net revenue left in the Vienna Treasury is not a quarter of a million sterling.

Then, what is the course for Austria to pursue? Manifestly to unite herself with the Zollverein, and to spare no pains to introduce improvements into the constitution of that body for the new period to commence with 1866. Austria has already sought admission into the Zollverein, and has has already sought admission into the Zolverein, and has been opposed by Prussia on two grounds, —first, because the fiscal policy of Austria is Protectionist; second, because it is impossible to admit a State which is afflicted and disgraced by a depreciated currency. It is said—and we believe truly— that Austria, after some hesitation, not unnatural on so momentous a subject, has declared its willingness to enter the Zollverein as a supporter even of the vigorous free trade de-sired by the Baltic Provinces; and, as regards its paper cur-rency, has expressed its readiness to spare no efforts to restore cash payments.

cash payments. The thoughtful politicians of Germany are beginning to see in a Zollverein so extended as to embrace every Teu-tonic Government, and to apply to 80 millions of p ople, the true beginning of that German Unity after which, with par-donable national pride, they never cease to yearn. The Con-gress at Frankfort was only one side of the discussion which will fill Central Europe for some time to come, —and probably Prussia would have been less hanghty in its refusal of the Frankfort invitation, if it had not felt that, up to the present time at all events, by bold and progressive fiscal views, it has kept firm hold of the headship of the Zollverein. It now re-mains for Austria to follow up its political liberalism by mea-sures which will at least place it on a level with Prussia as a leader of the industrial and commercial interests of the Gersures which will at least place it on a level with rrussia as a leader of the industrial and commercial interests of the Ger-man States. Those who know most of Austria, and the men who now govern it, are not distrustful of the result. In a future article we will discuss in detail some of the more important branches of Austrian trade and finance.

## THE ECONOMIST.

## THE EFFECT OF THE GOLD DISCOVERIES, MORE durable

The first effect is very obvious; and we last week explained it, and dwelt upon one consequence of it. If the value of gold falls, all contracts to repay gold at a distant date are really advantageous to the repayer, and disadvantageous to the lender. A thousand pounds lent at the beginning of the depreciation, and repaid after it has been in progress ten years, will still be the same number of sovereignsthe same nominal sum of money, but its purchasing power (the only attribute that makes money of value) will be less than before : in plain English, it will buy fewer things when repaid than it would buy when lent. The depreciation is thus favourable to the borrowing class, and unfavourable to the lending class.

This is equivalent almost to saying that the depreciation is advantageous to people in business, and disadvantageous to people *out* of business. Taken as a whole, the mercantile class is a very large borrower from the non-mercantile class. It is true that a large number of people of business are professional lenders : bankers, bill-brokers, and all such persons gain their profits in that manner. But it is to be observed that these classes are professional borrowers also; that which they lend. speaking roughly and in the main, is not their own money, but the money of others; they are simple distributors; they lend to some what was before lent to them by others. middleman of this sort is not affected by the depreciation of gold at all; he repays the same sum which he borrowed, and whether it buys more or less is nothing to him. Such -the only class of men of men of business business who are very great lenders-are not at all affected by the gold discos, and the borrowing class of men of business are benefited ; and that class comprehends almost all men of business.

Mr Jevons does not scruple to pronounce this effect advantageous. He regards the unmercantile class as the drones of the hive, and the mercantile class as the working bees ; he is glad of anything that benefits those who do something at the expense of those who do not do something. And it is possible that there may be times and countries in which a bounty on production, an artificial and accessory stimulus to pecuniary energy, may be very advantageous. But such is pecuniary energy, may be very advantageous. But such is not the state of England at this moment. Quiet people living on their means fulfil various valuable functions in a society They maintain the tradition of learning, which like ours. busy men are too hurried either to acquire or to teach; they maintain a standard of delicate refinement, which hurried people can perhaps appreciate, but which they could never establish; they maintain, above all, a steady aggregate of sober thought, which men in the exciting and now almost feverish occupation of busy life need as a medicine, and will not pro-duce as an enjoyment. This leisured class is now too duce straitened in this country, and the augmenting social weight which is now given to mere wealth tends already to deprive cultivated people of small means, of the intellectual authority to which they are entitled. We do not wish to give any class a bonus at the expense of any other class; we do not wish to disturb by any unusual element the common forces of industry ; but if we were to give a bonus-an unnatural and extraordinary stimulus—to any class, we would rather in this country and at this time give it to the learned. The active classes are quite able to take care of themselves ; business has already ample encouragements; it is the quiet people of gentle reflection whom we rather ought to foster, we are likely to be in want of. and whom

Certain classes of men of business are also benefited by the depreciation in other ways. All persons who have already a large fixed capital invested in their business derive a considerable advantage from it in comparison with their competitors who have to start anew. A man who has a factory built when the cost of building was low, will be better off than a man who has to build his factory after the value of money has fallen, and the cost of building risen. Each will sell his goods for the same sum, but the manufacturer of old standing will have higher profits than the manufacturer of new standing. As a rule, persons with large capitals in durable forms will gain in the course of the gold depreciation considerably more than the average rate of profit.

Again, the depreciation of gold, as we showed but recen will not operate upon all articles at the same time or at the same rate. Those articles will be first affected which the same rate. persons who first get possession of the new gold first want. The articles which the Australian community wanted, a rough set of Anglo-Saxon descent, with the habits and tastes characteristic of their class and origin, were those most immediately affected by the fresh power to purchase given by the new gold. The article secondarily affected were those purchased by the class who produced and sold these first commodities. If spirits and h dashery and wooden houses were sent to Australia and sold at high rates, the sellers had large incomes to spend, and they raised the prices of what they wished for. The producers of the first articles affected by the depreciation of gold gained a large real profit from the high price at which they sold their goods. In the end, of course, there is no advantage to the producers at all; the producer of the article *last* affected by the depreciation gains nothing and loses nothing. If gold the depreciation gains nothing and roses nothing. If good a depreciated ten per cent, he will sell his goods for ten per cent, more, but then everything he himself has to buy will be ten per cent. dearer too. But during the transition, those who sell articles which have risen, and who buy articles that as yet have not risen, will be really and truly benefited.

There is a much more recondite consequence of the same principle which proves that England as a whole, and as a country, is benefited in comparison with other countries by the gold discoveries; —benefited, that is, temporarily and during the course of the depreciation; for ultimately, between country and country, just as between individual and individual, the depreciation will have no effect. This rather more abstruse result of the gold discoveries was, some years ago, pointed out by Mr Cairnes, but it has never received the attention which we think it deserves.

Nor are we surprised that it has been somewhat neglected. for it rests upon doctrines which, although admitted and assumed as not worth mentioning by scientific economists, are, nevertheless, not familiar to the mass even of thinking men, and are opposed to some very natural prejudices. theoretical economist lays down, and most justly, that the profitableness of a foreign trade consists entirely in its imports, but a common person undeniably takes an exactly opposite view. He looks at foreign trade as a mode of employing our own people, and of investing our own capital; he regards exports as the end. Unless his attention is directed to the subject, he hardly regards imports at all. A very little reflection will show that the political economist is in reality right. It is of no use employing people in exportation unless they get in return something for that exportation. Selling is of course desirable, but it is only desirable if the purchase money is paid. Imports are the purchase money which we receive in return for our exports. The more we can receive in return for a given quantity the better; the larger the aggregate imports we can obtain in exchange for the same entire exports the more profitable is the trade. The profits of commerce, in a word, to a country should be estimated exactly as an accountant estimates the gain or loss of a year's trade to an in-dividual. He says, How much more have you got at the end of the year than you had at the beginning? If you have earned money it must be somewhere; your liabilities must be less, or your visible property must be more. If a country is getting rich by foreign trade, it must be by obtaining continually more and more valuable commodities ; by possessing finer, better, and more useful things of foreign origin; in a Exporting is only a necessary ive us these imports for nothing, word, by importing more. Exporting evil. If foreigners would give us these We should have the resources now spent so much the better.

A country, therefore, who should have the resources now spent in producing our exports to spend on other things. A country, therefore, which gets its imports on the best terms, is likely to be in the best position for a foreign trade. A dear country—a country in which the general range of prices is high—is in that position. Every addition to the price of commodities in country A, not shared by countries B and C, is a bounty on the transfer of goods from country A to countries B and C. The more you raise the price of articles in England,—the more articles, the more aggregate imports, England will obtain from the rest of the world.

Now, as England is the first country which communicates with the mining countries, or at any rate the country which first communicates with them to the largest extent, it is the ocentr by the o in th

try in which the range of prices will soonest be affected he new discoveries. "Any improvement," says Ricardo, emity in which the range of prices will sconest be affected by the new discoveries. "Any improvement," says Ricardo, "in the facility of working the mines by which the precious "metals may be produced with a less quantity of labour, will "sink the value of money generally. It will then exchange "for fewer commodities in all countries; but when any particular country excels in manufactures so as to occasion an a mar country excess in manuactures so as to occasion an a influx of money towards it; the value of money will be a lower, and the prices of corn and labour will be relatively a higher in that country than in any other." England is precisely in this position : she excels in the manufacture of most recisely in this position : she excels in the manufacture of most of the articles most desired by the persons into whose hands the new gold at first comes; it is on her commodities that the new gold is first spent; it is to her shores that it at first

ames. Accordingly, prices here being higher than prices elsewhere, the imports to England tend to increase. As things are descenthere, foreigners are more anxious to send us things. We attract wealth in a less degree, but in the same manner as the gold countries themselves attract it. There gold is easily obtained, and, in consequence, all articles desired by possessors of gold rush thither. The gold countries purchase their imports at the smallest prices ever known, at the price there more gold which was at first attainable with extreme of mere gold, which was at first attainable with extreme ease, and which is still obtainable with great ease. As England first receives the gold, it obtains with it an advan-tage in international trade, of less magnitude but of a similar nature.

In this manner, therefore, the depreciation of gold not only tends to augment the profits of certain English capitalists by giving them a bounty at the expense of those from whom they have borrowed, by increasing the proportionate profits of their durablecapital; but in the case of articles first affected by lowering the price of what they sell without lowering the price of what they buy, it likewise tends to augment the profitable-ness of all English foreign commerce, by enabling us to obtain more useful and costlier imports on easier terms than we should otherwise obtain them.

#### FURTHER COMPLICATIONS IN CHINA.

The recent intelligence from China is calculated to inspire the most serious apprehensions. The introduction of Europeans into the Chinese service already begins to produce the result which has followed that experiment in every other country in Asia,—viz., the collapse of all native military power. The aid of Europeans to Asiatics is like the aid of fire-arms to aid of Europeans to Asiatics is like the aid of fire-arms to men whose enemies use only arrows,—it makes them, irre-spective of cause, or numbers, or local circumstances, irresistible. One body of these troops, commanded by Major Gordon, described as a mere handful of semi-disciplined men, seemed, only one mail ago, as if they might re-establish the Imperial power through the valley of the Yang-tse-Kiang,—a valley as valuable to the Chinese Government as that of the Ganges to the Moral. On the 28th July the leader cartured a walled the Mogul. On the 28th July, the leader captured a walled city defended by 3,000 rebels, after engagements outside which proved that no Taeping force would withstand the onset of the Chinese sepoys. In the province of Ningpo, a Major Cooke, with 1,500 men, had been even more successful, and wren or eight great cities had been recovered. Shanghai began to believe that the rebellion would by winter be cooped up within the walls of Nankin, when news arrived which at began to believe that the rebellion would by winter be cooped up within the walls of Nankin, when news arrived which at omee dashed all hopes on the spot, and which will be consi-dered at home as of the most serious import. As in India so in China, the rebels, finding the European discipline irre-sistible, employed it on their own side. "General" Burgevine, an American adventurer of great audacity—he cut out a steamer under the very nose of Dr Macartney, "military man-darin,"—some brains, and a great hold over all with whom he comes in contact, quarrelled with the mandarins. Our impression of his story as related at the time, is that he was somewhat unscrupulous, but really designedly ill-treated. At all events he thought so, and he joined the Taepings. In-stantly, the process which in the East never fails, began to occur once more. A European had got high command among fighting men, and immediately little currents of the adven-turous, the disappointed, and the blackgnardly, set in to that European. Officer after officer resigned the Imperial service, to follow Burgevine — loyalty developing itself, not to the Government which pays, but to the European who distributes— deserters, sailors on the loose, drinking vagabonds, and broken

gentlemen, flowed up in the same direction, and in a few weeks Burgevine had gathered three hundred Europeans. The tide of victory at once flowed back. Major Gordon, understanding Asia, instantly dropped his conquest, and ra-treated on his depôt, and Shanghai at once began to doubt its own security, and clamour at General Brown for not assisting Major Gordon. For, as usual, that Imperial instanct which works. makes Englishmen in India hold together under all circumstances, so that in all our Indian wars we have never yet had to fight an Englishman in command of native troops, has operated in China. Shanghai has taken its side, and the very men who deprecated the aid to the Imperialists, will now never rest until the whole force of Great Britain has been excerted to make the Imperialists successful. General Brown refused his aid, being Imperialists successful. General Brown refused has aid, being a man given to routine, whose conduct in sending home a regiment in relief, instead of complying with the urgent demand of the Chargé d'Affaires at Yokehama, is just now a subject of official inquiry; but officers are not often likely to be so self-restrained. They sympathise with their countrymen's success, and if they did not, it is not in human nature to resist long the fierce current of local opinion surging hour by hour over their minds over their minds.

The consequences need no prophet to foresee. To those who know Asia they are as clear as if they had already occurred. The first will be an enormous accession to the power of the rebellion which, wherever it is not opposed by Europeans, must, being led by Europeans, succeed: Moreover, it will not only succeed, but it will organise itself, the intolerance of must, being act by the vill organise itself, the intolerance of anarchy which marks all European soldiers, and their abso-lute refusal to endure irregular payments, always producing external order. The second will be the flow of all conti-nental, and especially French, adventurers to the Taepings. The English stick together, and, as we have said, accept instinctively the side chosen by their own country, and will eather towards Sherard Osborne and his lieutenants. The French like plunder better than pay, and the chance being more open, will be drawn towards the Taepings, a process more open, will be drawn towards the Taepings, a process greatly assisted by the curious inability of our countrymen to confide in French assistance abroad. Already there is a M. d'Aigabelle commanding 1,500 Chinese at Shao-shing, and already the English distrust him. "The Anglo-Chinese are in much better odour, are better officered, and kept well in hand; the Taotai would be delighted to get rid of the French and increase the strength of this contingent, if he could ac-complish that object." The writer but does express the feel-ing universal among his countrymen and which of itself and increase the strength of this contingent, if he could ac-complish that object." The writer but does express the feel-ing universal among his countrymen, and which of itself would drive men like M. d'Aigabelle into the opposite side. The rebels being thus strengthened, all the work of the year will be undone, the Yang-tse-Kiang again closed, the Grand Canal once more shut up, trade at a stand, and Shanghai, with its million and a half of people, once more insecure. That state of affairs cannot be tolerated either at Pekin or in London, and one of two things will occur. Either the British Government will assist that of Pekin, as a Government, in which case our sovereignty in China is an inevitable and speedy necessity, or the Imperialists will place themselves which case our sovereignty in China is an inevitable and speedy necessity, or the Imperialists will place themselves unreservedly in Captain Osborne's hands, in which case our sovereignty is an inevitable but slowly accruing necessity. For—and this is the key to all Asiatic acquisition —to render China habitable at all, the winning side must be in a position to prohibit the employment of Europeans on any other side. Otherwise civil was will never end. To secure this *sine quâ non*, the power which lends aid must be, as in India, practically sovereign, with sovereign re-sponsibilities, or the native jealousy will induce them to play off one European against the other, and so embroil Europe as well as Asia. That was the precise game Jaffier Ali played which broke up Clive's plan of governing through a mative. He imported 4,000 Dutchmen from Batavia as a counterpoise to his own allies, and Clive had to order Col. Fords to attack them, and so accept the virtual sovereignty of Bengel. The them, and so accept the virtual sovereignty of Bengal. The Chinese are already showing this jealousy, and the Shanghai comment on it is not a little significant. The Times informant comment on it is not a little significant. The Times informant quite hates the Chinese Governor for not employing the Euro-peans enough, and obviously would rejoice if Major Gordon, or Major Cooke, or Captain Osborne were strong enough to set the mandarins aside, and do the work themselves, re-sponsible to the Emperor alone. That desire will soon be a practical plan, ending in a demand to Prince Kung to appoint a European as Governor, to which, the gain in revenue from European honesty being enormous, he is

very likely to accede. It is not that the Anglo-Chinese hate the natives, or mean consciously to supersede them, but they fret under inefficiency and delay. Major Gordon, for example, gathers some 10,000 men, thrashes them into discipline, and is ready to drive all rebels into the sea, when the Taotai—not from malice, but because he is a Chinese—delays the men's pay, and all is anarchy again. Or he indente on the civil authority for a quantity of grain needed for a particular march. Civil authority is quite willing, but he must first take the opportunity of extracting a bribe from every peasant whose field is not seized, and another bribe from rich cart-owners not to impress their carts, and a third bribe from poor cart-owners, who think, if he will give them certain orders, they can plunder somehody else out of their hire. The veration is endless, and always results in a substitution of a European, with a native visier, for the direct native authority. If the game now playing in China goes on for another year, there will not be an organisation in the Delta not presided over by an Englishman.

We are not at all prepared to say, as Mr Goldwin Smith says, that all this is evil. A dungheap cannot be stirred without stench, and Chinese administration in this valley had noted into an offensive and useless compost. It may be, for ought we know, absolutely essential to our own health to ear in away, for, when all has been said, an addition of sixpense to the income tax from the destruction of Chinese tea plantstions, and the bankruptcy of India from the seizure of all optim chests, are occurrences which demand a much grave consideration than the able Professor thinks proper to give. But we are prepared to say, that any further suppression of the subject in Parliament will be as discreditable to the nation as to the House of Commons. Occurrences such as are now transpiring on all sides of Shanghai, demand discussion and explanation, and if that be possible, some faint form of decision as to the object we intend to seek. "Speech is "silver, and silence is golden," but to conquer China while breaking up Japan, in silence, is not, at all events, a consttutional mode of doing national business.

### Agriculture.

#### RECLAMATION OF WASTES.

THE cost and profit of reclaiming waste lands have a far more extensive bearing than superficial observers of our rural districts would readily believe. Wastes in mass are confined to certain districts, and there are generally complex rights, such as common rights and the like, which interfere with individual efforts to which interfere with individual efforts to reclaim them. And it is in reclaiming large commons-heaths forests-that the advantages of such operations are most striki -heaths or ng forests—that the advantages of such operations are most striking and attractive. But there are many, perhaps the majority, of the large estates in England containing wastes the reclamation of which is desirable, and which in most cases would as surely repay the cost incurred as do the large tracts of unproductive land usually referred to as waste land. Look at the wide hedgorows which are common throughout the western counties of England and in many other districts. Take the small fields and vast masses of timber trees which encumber such naturally fine districts as the vale of Berkeley, in Gloucestershire, or the smaller fields of Kent, Sussex, and Surrey, of parts of Hertfordshire, and numerous other counties Berkeley, in Gloucestershire, or the smaller fields of Kent, Sussex, and Surrey, of parts of Hertfordshire, and numerous other counties within a few hours' ride of the metropolis, and consider what an enormous aggregate of waste land is represented by those hedgerows, fences, and timber trees. And such wastes are not only nonproductive themselves, but they diminish incalculably the productiveness of the fields they surround and encumber. There is no doubt that the removal of three-fourths of the hedgerows and fences in districts abounding in small enclosures, especially where there is much timber, would be an operation highly profit-able to the owners of such lands, considered as an investment. In many cases the sale of the timber would go far to meet the out. many cases the sale of the timber would go far to meet the out-lay, while the increased rental derived from the disencumbered and would give a high rate of interest on the eventual amount thus expended. In all such clearances the work ought to be effectually done. Nothing can be more absurd than such half-and-half improvements as we sometimes are where badeaverse effectually done. Nothing can be more absurd than such half-and-half improvements as we sometimes see, where hedgerows have been cleared away, but the large timber trees have been left standing in the midst of an arable field, to the serious impediment of its culturation. All real-metions of the serious impediment of its cultivation. All reclamations of waste land, whether con-sisting of a large mass of unproductive land, or of such smaller tracts interspersed amongst cultivated fields as we have referred to, should be thorough and complete, and being such, they erally pay well. ge

ntly published number of the "Journal of the Royal In th Agricultural Society," there is a paper a prize essay — On the Reclaiming of Waste Lands, as instanced in Whichwood Forest, by C. Belcher," which may well draw the attention of landowners to have wastes and forests on their estates to their reclamation and improvement. Which wood Forest is a Crown property, situate in the South-west corner of Oxfordshire, containing 3,778 acres. It was stocked with deer, subject to the rights of the Crown, of the hereditary ranger, and of a large number of commoners. There were coppies occupying altogether an area of 1,804 acres; there were 1,760 acres of open forest, much covered with timber and brushwood; and these, with the lodges and their 195 acres, and were coppies of were 1,760 acres brushwood; and these, with the lodges and their 195 acres, and 11 acres of small encroachments, made up the total area of the Boyal forest. The yearly income derived by the Crown from the forest was 1,8137. Deer-stealers and poachers, idlers and thieves, abounded in the forest and its environs; contests between these and the keepers were frequent and serious. Crime and its attendant pauperism were rife. And such had been for many years the normal condition of the forest district. In a topogra-bical construct of Orfordbian analytical mark area in the second to the forest district. phical account of Oxfordshire, published many years ago, anid : " An enclosure of Whichwood Forest would make a e a large tract of land productive to the public; the morals of the county demand it, this vicinity being filled with poachers, deer-stealers, thieves, and pilferers of every kind; the poor-rates, too, are higher in the parishes which surround the forest than in others under similar circumstances, except that of being cut off from the forest.

In 1853, an Act of Parliament for its disafforestment and enclosure was passed, and three Commissioners were appointed to tarry into effect the provisions of the Act. First, public road<sub>s</sub>

## THE ECONOMIST.

## [Oct, 3, 1863.

were set out, the whole length of which extended to about miles, and enclosed with a boundary wall on each side. To collitic stone which abounded in the forest enabled such roads colitic stone which abounded in the forest enabled such roads a be made and walls to be built at a comparatively moderate m-pense, the cost being 6,9851, or nearly 7001 per mile. In July, 1857, the Commissioners made their award, by which an alloune of 2,543 acres was made to the Crown. This was subsequently increased, by purchases of other allouments, to 2,937 acres. Of this tract, 1,970 acres "were unreclaimed forest land, dem-dark, and gloomy; its silence seldom disturbed except by the me of the woodman, the gun of the gamekeeper, or the stealthy four of the deer-stealer." The first ster was to clear away the deer, which were all ends

of the woodman, the gun of the gamekeeper, or the stealthy tree of the deer-stealer." The first step was to clear away the deer, which were all cauge or killed in a short time. Then the clearing of the land we commenced in October, 1856, and completed in January, 1858, a the cost of 5,815. "Hundreds and hundreds of men and bey were engaged, some cutting the light wood and laying it in drift some tying the firewood into faggots, some preparing the large pieces for posts and fencing, and others busy felling the time trees, or stripping off the bark." Many of the smaller trees at larger bushes were pulled down by Fowler's tree-throwing machine "which did the work quickly and effectually." The land was had out in seven farms, and divided into enclosures by quicks hedges protected by rough posts and rails on each sid it y and suitable for sheep. The climate, too, is mild and healty. The farms were let by tender from the 10th October, 1867, for si years. The tenants were to pay 6/ per cent. per annum mone expended in the erection of dwelling-houses and farm-building, and 5/ per cent. on that expended on building labourers' ottage. The covenants were such that " fair opportunity was afforded for enterprising tenants to gather the fruits of any extra outlar they might feel inclined to make." The game was left entirely in the courtol of the tenants.

The result is that the seven farms have been let at the aggregate rental of 5,104l 7s 6d.

The following is a summary of the expenditure which has pro-duced that increased income :--

and the second	3	8	a.	
Purchases and exchanges		15	2	
Buildings, houses, homesteads, &c		9	1	
Grubbing 1,903 acres of forest		10	0

Net outlay . T 10.452 10 0 -pieces that appear insignificant when looked at separately, but of great consequence when considered collectively? There are the wide-spreading hedgerows causing waste; there is the sluggin inland stream, which, by its tortuous course and half-choked channel, causes waste on the right hand and on the left; there is waste by the river side and the sea shore, by the mountain size and in the sheltered valley; there is decaying timber, which, w its roots and shade, causes waste; there is much grass land little better than waste." To reclaim such wastes should be the object better than waste." To reclaim such wastes should be the obj of every intelligent landowner, and, where sufficiently protect by a lease, of every enterprising tenant-farmer.

## Jorcian Correspondence.

(FROM OUR OWN CORRESPONDENT.)

A great commotion has been excited in the financial world by singular affair. At the time Savoy formed part of the dominent of King Victor Emanuel, there existed a Bank of Savoy with a capital of only 4,000,000f (160,000), but possessed of the portant privileges of issuing notes, of establishing branches, of increasing its capital at will, and of being of indefinite duration. In the treaty annexing the province to France, no spacial simular In the treaty annexing the province to France, no special signal tion was made with regard to this bank, and accordingly it can within the clause by which France guaranteed to all compania and establisments in that province the maintenance of the right

### THE ECONOMIST.

ad privileges they had enjoyed. After a while the directors of . Bank of Savoy fancied that they had no chance of maintaining the ground against the Bank of France, and they accordingly pro-yord to sell purely and simply their business and their privilege to the establishment. Negotiations took place and extended over an argenued against the Bank of France, and they accordingly propord to sell purely and simply their business and their privilege to be stablishment. Negotiations took place and extended over an arreasonably long time; but at last they were broken off, because the Bank of France would not consent to give the price demanded by the Bank of Savoy, —a price at first fixed at 2,000f per share, but subsequently reduced to 1,500f, a premium of only 500f, the fare having originally cost 1,000f. On the rupture of these negotiations, the directors of the Bank went to M. Emile Pereire, and this great financier saw at once that the Bank of France had committed a gross blunder as regarded its own interests, and that the Bank of Savoy might be turned to account in a manner which is had not the sagacity to foresee. He entered into a provisional agreement for purchasing the privilege of the Bank, and within the last few days that agreement has become definitive. The Bank of Savoy, therefore, is his. When his purchase had become a *fail* accompli, the great fact that the Bank of Savoy can issue notes presented itself, with appalling sternness, to the directors of the Bank of France. This latter Bank, as your readers are aware, has hither to had the exclusive privilege of issuing notes; and it has certainly good reason to be troubled at seeing that great privilege invaded by a financier of such high authority and vast resources as M. Emile Pereire. The financial circles have been as much moved as the Bank, though for different reasons. One portion thereof consider the x. Hendile Pereire, in acquiring the Bank of Savoy, has diplayed financial genus of the highestorder, and they hope and pray that he will not let its privilege remain idle, but will exercise it to the enterme limits of prudence, so as to keep in check what they consider the exorbitant monopoly of the Bank of France. The other privilege individual invested with the power of issuing notes; and they do so because they more favour of liberty of banking—including in tha

great step will have been taken towards making banking free. It is dit on the intention of M. Emile Pereire forthwith to raise the capital of the Bank of Savoy to 40,000,000f (1,600,000), and he will probably not stop there. But a meeting of the shareholders of the bank is to be held on the 4th, and it is expected that he will take advantage of it to explain his views. Whatever he resolves on, there is no question that the passing into his hands of this Bank of Savoy, with its power of issuing notes and fixing its capital at what it pleases, is a financial event of extreme gravity, and that event will certainly for a long time to come keep the financial world in agitation. The approaching establishment in France of a Company to

te came keep the financial world in agitation. The approaching establishment in France of a Company to "develop commerce and manufactures" has caused inquiries to be made respecting an old and very powerful Company with the same object in Belgium, hearing the name of "Société Generale pour favoriser l'Industrie Nationale." To satisfy public curiosity, a long account of the operations of that Company has been printed, and the upshot is that it has rendered great service to many useful emergieses, and in so doing has enriched itself. On the whole, it ap-pean that the Société Generale has formed or patronised not fewer than fifty-six companies, and has taken an interest in six others. Of these sixty-two companies, six are financial or industrial, eight milway, three canal, three steam mavigation, twenty-one coal-pits. the metallargic establishments, else are inflated of industrial, eight ten metallargic establishments, elseven various. It further appears that the average dividends have been, in addition to interest of 5 per cent. per share, 18f 99c from 1823 to 1832, 22f 94c from 1833 to 1842, 34f 48c from 1843 to 1852, and 91f 30c from 1853 to 1860

The r w law on limited liability companies is being acted on, Inte new law on imited liability companies is being acted on, -not, however, so extensively as was expected, nor, perhaps, as could be wished. The most recent application of it is the forma-tion of a Company for establishing general warehouses at Paris; and an Imperial decree sanctions the new company. The shareholders of the great engine-building Company bearing the name of Messrs Cail, held their annual meeting last weak. The report stated that in 1862-3 the business done was frater than in any preceding year and that as lower how

greater than in any preceding year, and that, as large orders have been obtained from Russia, it will continue to be important. The profits realised were, it was announced, sufficient to allow a divi-dend of 110f per share to be declared, which, with interest, is equal to 22 per cent.

equal to 22 per cent. According to an official return, the quantity of beetroot sugar made from the beginning of the "campaign" up to the end of August was 173,677 tons, which was 27,262 tons more than last year; and the quantity remaining in bond at the end of the month was 9,818 tons—5,241 more than at the same date of 1862. The monthly Customs returns have appeared to-day. They have that the value of imports made into France, and taken out of bond for consumption, was in the first eight months of the present year 1,525,695,5577; in the corresponding period of last year 1,464,181,0177; and in that of 1861, 1,580,241,8356. The value of exports of articles of French production was in the first

eight months of the present year 1,635,301,489f; in the same period of last year, 1,401,781,986f; and in that of 1861, 1,244,006,061f. Thus France in the present year has sold more than abe bought,—a result which will greatly astonish the adver-saries of the commercial treaties with England and Belgium, seeing that they confidently predicted that she would be mun-dated with the productions of these two countries, and that her exports would be insignificant. The prediction was absurd, and, economically speaking, impossible of realisation; but it was de-youth believed by the Protectionist. economically speaking, impossible of voutly believed by the Protectionists.

#### **STOCKHOLM**, Sept. 24.

STOCKHOLM, Sept. 24. The Diet has adopted a very needful measure ; it has abolished the absurd law which enacted that no foreigner could establish himself in business in the country without special anthorisation, and could not remain in business for more than three years with-out forfeiting his nationality. It is needless to say that this law was injurious to Sweden herself, since it kept away foreigners and for any the second seco and foreign capital.

#### COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a copy of a despatch from Her Majesty's Chargei d'Affaires at Turin, melecing an Italian royal decree, dated the 8th August, equalising the duties upon the exportation and transit of olive oil, rags, and sulphur in the several provinces of the kingdom of Italy, and fixing the following rates.—Olive oil, If; rags of vegetable substance, 8f; sulphur, If per 100 kilogs. A Calcutta report, dated August 22, says:—A fair amount of busi-ness has been transacted in nearly all descriptions of produce, in some instances at improved rates. Our import market has been extremely quiet, and prices only maintained by the firmness of holders. There is no indication of any change in the condition of the money market. The supply is rather in excess of the demand, and money is seeking employment on very easy torms.

The supply is rather in excess of the demand, and monay is seeking employment on very easy terms. The latest advices from Barbadoes represent the canes to be improv-ing in appearance since the rains, and the provision crops in good pro-gress. The quantity of groduce shipped to date wis-sugar, 38,752 hads 3,332 tierces 9,074 barrels 1,551 bags; molasses, 11,814 pum 432 hhds 441 barrels. The exports of colonial produce from Demerara from the lst of January to the lst of August, inclusive, had been-sugar, 36,680 hhds 2,2714 tierces 7,775 barrels 18,450 bags; rum 17,427 pums 2,393 hhds 1,463 barrels; molasses, 2,243 casks; charcola 14,974 barrels; cocca-nuts, 332,993; timber, 246,437 cubic feet shingles, 5,076,350.

alingies, 5,076,350. Annexed is a report of the Albany lumber market for the weel ending Sept. 16: — Lumber arrives freely from all sections. The stoc in market is fair and the assortment pretty good, though hemloc boards and joist, walnut and shingles are scarce. The sales have bee large, with an advance in the price of common lumber. The receip by the Erie and Champlain canals, from the opening of navigation ( September 8, in the vears named, were as follows: —

Provident Capital and pails Deposits, including Ex-shequer. Savings Banks, Comissioners of National Det, and Dividend Accounts Other Deposits. Saven Day and other Bills..... 11,141,284 22,513,119 7,711,440 095 545 Notes Gold and Silver Coin 9,270,486 18,717,460 794,847 49,064,388 Dated the 1st October, 1863. M MARSHALL, Chief Cashier. Desid the lat October, 1863. THE OLD FORM. The above Bank accounts would, if made out in the old Assets. 233,751,403 15,277.885 22 312,747 9,270,486 13,717,460 45,300,693 49.029,288 The balance of Assets above Liabilities being 3,728,695/, as stated in the abo account under the head Rxsr. account under the head HEAT. FRIDAY NIGHT. The preceding accounts, compared with those of last week, exhibit

An INCREASE of Circulation of	2797,016	
AB INCREASE of Public Deposits of	978,995	
An INCREASE of Other Deposite of	857,880	
No change in the amount of Government Securities.		
AP INCHEASE of Other Securities of	2,790,594	
A PECENTASE of Bullion of	154.953	
An INCREASE of Rest of	1,750	
A DECREASE Of Reserve of	918,828	
which imported, Come, r. Ballon, r Ta		

The changes in the above account are of considerable im-The changes in the above account are of considerable im-portance. The large increase in the "other securities" is antisiently explained by the late pressure for money, but is not accompanied by a corresponding diminution in the reserve, owing to the additions to the public and private deposits. Notwithstanding the influx of gold into the Bank, the bullion dows a falling off, from the absorption of coin for the usual neutral Covernment. quarterly Government payments.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during 

with the present week		1860.	1861.	1862.	1863.

In the corresponding week of 1853, the uncertainty which had so long agitated Europe was dissolved by the declaration of war by the Ottoman Porte against Russia. England and France had decided to support the Sultan in the struggle. The Bank of France had raised its rate of discount from 3 to 1 be and

I per cent. In 1860, official news of the fall of Ancona, and of the in 1500, official news of the fall of Ancona, and of the surrender of General Lamoriciere with the remains of his army to the Sardinian troops, had been received. Some satisfaction had been expressed at the declaration of the King of Sardinia that it would be madness to attack Venetia and ingrafitude to proceed against Rome. An Imperial decree, fixing the reduced rate on imports of British iron and steel to France, in virtue of the new commercial treaty, had ap-peared. Shipments of corn and cotton from America were turning the scale of bullion remittances argingt this country. taming the scale of bullion remittances against this country. Several mercantile failures had been announced. In 1861, troops for the joint intervention in Mexico had been despatched to Vera Cruz. In France the Bank rate had

been raised to 6 per cent., and further purchases of grain were stated to have been made by the Government and by private persons. Loans on securities could only be effected in Paris on heavy conditions; and, in consequence of the falling off in trade, numerons failures were occurring in that city. In London money was easy, at about 34 per cent. Cotton had risen slightly in value.

1103

In 1862, news of the victory of the Federals under McClel-In 1862, news of the victory of the Federals inder McUlei-lan at Hagerstown, in Maryland, had been received. A meet-ing of deputies from various parts of Germany had been opened at Weimar to discuss the reorganisation of the Federal Constitution. Stormy discussions had taken place in the Prussian Parliament, which had terminated in the withdrawal of the Budget. The suspension had been announced of the large houses of Faria and Brother, of Brazil, and Lindheim and Co. of Vienna with liabilities in each case exceeding and Co., of Vienna, with liabilities in each case exceeding 300,000%. Money here was easy, at little more than 2 per cent

cent. The amount of the "other" deposits, as compared with the "other" securities, showed, in 1853, a deficiency of 7,239,2347; in 1860, a deficiency of 7,938,6627; in 1861, a deficiency of 5,301,5527; and in 1862, a deficiency of 6,196,0042. In 1863, the deficiency is 8,795,6597. DISCOUNT AND MONEY MARKET.—The demand for discount in the earlier part of the week was heavier than has been known for some time past; and on Wednesday, the last day of the quarter, great pressure was experienced. No business has have done helow the Bank rate the tendency heing to ask

the quarter, great pressure was experienced. No business has been done below the Bank rate, the tendency being to ask rather higher terms. Yesterday and to-day, however, the inquiry has been much less active, though still on a full scale. In some quarters it is thought that the approaching release of the dividends will bring greater ease; but, on the other hand, attention is directed to the continued absorption of coin for harvest and other purposes, the Bank return again showing a decrease in the bullion, notwithstanding the large amount of gold known to have been taken there. An impression also exists that our remittances for cotton will in future be on an increasing scale. The following are the current rates of discount for paper of various dates, the charges for long periods being again comparatively low :--

9			L			1
	$-30 t_0$	o 60	days	4	per cent.	

3 months.	4	par cent.
of months i amounted bothing very	4	Hand Manuel

ILOBIAS	92	per cent.
6 months-Bank hills	44	1 mor ne

On the Stock Exchange, the demand has also been heavy, and considerable sums have been borrowed from the Bank, under the ordinary accommodation afforded during the shutting of the transfer-books. To-day, the terms for loans on Government securities were 3½ to 4 per cent. loans

IL AND MISCHLANEOUS NEWS	COMPLETON
Annexed are the rates of interest allowed on	deposits :
Joint Stock Banks	*3 per cent,
Discount houses at call	3 per cent.
Ditto, with seven days' notice	31 per cent.

At the London and Westminster, 2 per cent. only on sums below 5005.

5002. The arrivals of gold continue to be taken to the Bank, about 97,0004 having been sent there to-day, and 40,0002 yesterday. On the other hand, 8,0002 in bullion and 75,000 sovereigns were withdrawn this afternoon, chiefly for the East.

The amount of Government bills on India, for which tenders will be received at the Bank of England next Wednesday, is Rs 40,00,000 (400,000/), of which not more than Rs 16,00,000 (160,000/) will be drawn on Bombay, and Rs 2,00,000 (20,000/) on Madras. Tenders for a New Zealand, loan of the Auckland Provin-

cial Government for 100,000/, were opened yesterday at the Bank of New Zealand. The total applications sent in were for 144,500/, of which 71,750/ was at and above the minimum of 105, at prices varying from 105 to 115. Of the un-successful tenders, the lowest was at par. Offers for the un-

successful tenders, the lowest was at par. Others for the un-allotted portion of 28,250/ will be received up to to-morrow (Saturday) at 12 o'clock. It is stated that the Government of the Cape of Good Hope are about to negotiate a loan of 150,000/ in 6 per cent. de-bentures, secured on the generals revenue of the colony, and a supplemental issue of 24,000/, the latter to enable a local company to continue their operations for improving a valu-able harbour on the east coast, called the "Kowie Harbour," on which a considerable sum has already been laid out. <sup>1</sup> The following are the rates of discount in the principal cities of the Continent, showing a slight rise at Hamburg.

ENGLISH FUNDS .- The transactions in Consols have been unimportant this week, attention having been chiefly occupied with the foreign settlement. The daily variations have been mostly in answer to the demand for money, a decline which had been caused by the pressure in the early part of the week having been subsequently recovered. To-day, however, there having been subsequently recovered. To any, however, there has been rather less steadiness, owing to unfavourable finan-cial accounts from Paris. The closing quotations this even-ing were 931 to 933 for money, and 933 to 931 for the 8th inst., being the same as last Friday. Reduced and New Three per Cents. have been quoted  $91\frac{7}{3}$  to  $92\frac{1}{3}$ ; India Five per Cents., 1083 to 1085, or a fraction higher; Exchequer bills, par to 3s prem.; and India bonds, 17s to 20s prem.

FOREIGN STOCKS .- The principal dealings in the foreign market have been in connection with the fortnightly settlement, which has again been unusually heavy. The current of speculation has been chiefly in the low-priced and non-The current dividend paying stocks, and appears to have been mainly carried on by weak operators. Hence the rates of "continuation" for carrying over purchases have been high, 12, 15, and even 20 per cent. having been in some cases paid. It is satisfactory, however, to notice that no instance of difficulty d. Since the completion of the settlement, busi has occurre ness has been comparatively quiet. To-day, the principal fluctuations have been in the Confederate loan, which at one period improved to 22 to 18 discount, on the announceof the defeat of General Rosencrans, but afterwards ment went to 25 to 23. Turkish Consolidés were yesterday quoted 55 buyers, then relapsed, and left off this evening  $54\frac{1}{2}$  to  $54\frac{1}{2}$ . Other descriptions have been dull, particularly Mexican, New Granada, Bussian Five per Cents. of 1862, and Spanish On the other hand, a rise has taken place in Vene-Passive. zuela bonds. Greek is likewise a shade firmer. At the close this afternoon the market presented a rather flat appearance. The final quotations of the stocks dealt in to-day are sub-The final quotations of the stocks dealt in to-day are sub-joined :—Austrian Five per Cents.,  $85\frac{1}{2}$ ; Brazilian  $4\frac{1}{2}$  per Cents., 94 to 95; Equador New Consolidated, 16 $\frac{1}{4}$  to 16 $\frac{3}{4}$ ; land warrants, 9; Egyptian 7 per Cents., 101 to 102; ditto, second issue, '100 $\frac{1}{2}$  to 101 $\frac{1}{2}$ ; Greek, 37 $\frac{1}{4}$  to 38; ditto, cou-pons, 17 $\frac{3}{4}$  to 18 $\frac{1}{4}$ ; Italian Maremmana 5 per Cents., 81 to 82; ditto Native, 72 $\frac{1}{2}$  to 72 $\frac{2}{3}$ ; Mexican, 46 $\frac{1}{4}$  to 46 $\frac{2}{3}$ ; New Granada, 16 $\frac{1}{2}$  to 17; ditto, 2 per Cents., 33 to 34; deferred, 10 to 10 $\frac{1}{2}$ ; Portuguese, 49 to 49 $\frac{1}{2}$ ; Russian 5 per Cents. 1862, 92 $\frac{3}{4}$  to 93 $\frac{1}{4}$ ; Sardinian 5 per Cents., 89 to 90; Spanish, 54 $\frac{3}{4}$  to 55 $\frac{1}{4}$ ; passive, 35 $\frac{7}{5}$  to 36 $\frac{1}{6}$ ; certificates, 14 $\frac{3}{6}$  to 14 $\frac{5}{8}$ ; Turkish 6 per Cents 1854, 95 to 96; ditto, 1862, 70 $\frac{3}{4}$  to 71 $\frac{1}{4}$ ; Venezuela 3 per Cents., 26 $\frac{1}{2}$  to 27; and the 6 per Cents. of 1862, 61 $\frac{1}{4}$  to 62 $\frac{1}{2}$ . of 1862, 611 to 621.

The closing quotation of French Three per Cents. on the Paris Bourse this evening, was 67f 95c for the new account, being rather better than last Friday, and a fraction higher than yesterday.

The following notices with reference to the Venezuelan, Mexican, and New Granadian debts have been posted in the Stock Exchange. The smallness of the remittance from New Granada is said to be partly attributable to the scarcity of bills on London. The collections on account of the Venezuelan dividends are considered satisfactory :----

Mexican Dobt.—Messrs Baring: Brothers and Co. have received by this packet, on account of Mexican dividends, 60,403 dola. New Granada Dividends.—Messrs Baring Brothers and Co. have re-ceived by this mail, on account of New Granada dividends, from the Custom-house of Santa Marta, 581/; and from Cartagena, 400/; making a total of 9812. Vancenda Dabt.—Marra Baring Brothers and Co. is constant in Vancenda Dabt.

total of 9812 Venezuela Debt.—Messrs Baring Brothers and Co.'s agents in Vene-zuela advise that they have received, for 55 per cent. of the import duties for two weeks, from the Custom-heuse of La Guayra, 64,625 dols, and from Puerto Cabello, 14,501 dols; making a total of 79,126.

In consequence of the announcement that Earl Russell has authorised Her Majesty's Chargé d'Affaires at Bogota to receive for a period the revenues which the Government of Colombia will hold at the disposal of the subscribers to the new loan,

the price of the scrip advanced on Monday to 11 to 2 press. Some realisations then caused a decline to 1 pre-final quotation this afternoon was about 1 to  $1\frac{1}{2}$ .

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :---COM

ctions RAILWAYS AND OTHER SHARES .--- With few tran the railway market has generally recovered from the flatness of last week. In several of the leading stocks an advance has been established, especially in London and North-Western, Midland, North-Eastern, South-Eastern, and Great Western. South-Western is also again firm. The principal rise, how ever, has been in Metropolitan stock, which now stands at 133 to 135. A reaction, however, has taken place in Grant Western, and Caledonian is also rather flatter. In other dascriptions, the variations are of little importance.

In the colonial department, Canadian railway securities have been in better demand, and higher. Foreign are rather dull, but without material change in value.

The transactions in the shares of the new financial and banking companies have again been rather numerous, and in banking companies have again ocen rather numerous, and most descriptions a further improvement has occurred. Imperial Ottoman Bank closed at  $9\frac{1}{2}$  to  $9\frac{1}{2}$  prem.; Exyptian Trading,  $2\frac{1}{5}$  to  $2\frac{3}{5}$  prem.; International Financial,  $5\frac{1}{2}$  to  $5\frac{3}{5}$  prem.; and General Credit,  $3\frac{1}{5}$  to  $3\frac{3}{5}$  prem. Subjoined is our usual list of the closing prices of the minimum rather forms of the relaxed for the relaxed form.

-Annexed is the weekly circular of Messrs BULLION. Firley, Abell, and Langley on the transactions in bullion and India rupee paper, during the week:---

and India Tapes papes, using the water Gold.—The purchases of gold by the Bank of England still continue, shout 356,000/ having been bought by that establishment since our circular of 24th September. The demand for export is but limited. The arrivals comprise 32,000/, per New York, from New York; 30,000/, per Africa, from New York; 44,000/, per City of New York, from New York; 26,000/, per Germania, from New York; 243,000/, per Tas-manian, from West Indies. The Parana, with 22,051/ from the Brazils in this country, has arrived at Lisbon. The Ellora has taken 99,750/ for Bombay, and 68,000 sovereigns for Alexandria. 86,000 sovereigns, and some amounts of Russian gold coin, have been withdrawn from the Part and some as Bank.

Bank. Silver—There was an active demand for silver for the Bombay steamer at the 27th Sept., and prices ranged from 5s 14d to 5s 14d per os standard -the Ellora leaving on the day in question, having no less than 389,850/ m beard. Some additional amount has also been aold via Marseilles for Bombay. The Tasmanian, from the West Indies, brings about 334,100, but this will not be deliverable by the Bank before the middle dnext week. Our market is now quiet, but we do not anticipate any reduction in price. The Calcutta and China steamer leaving South-ampton on the 4th inst., will have but a limited amount of specie on bard.

Mexican Dollars—We have no transactions of importance to report this week, and, pending further telegrams from China (expected about ad inst.), the market is inactive. The Tasmanian, from the West fades has about 120,000/ on board. The last price we can quote is 63d per oz.

Exchange on India for drafts by the banks, at 60 days' sight, may be guoted as follows:-Bombay, 2s; Calcutta, 1s 112d; Madras, 1s 112d to 1s 112d, nominal.

India Government loan notes remain without much change, and quotations are for  $5\frac{1}{2}$  per Cents., 117 to  $117\frac{1}{2}$ ; for 5 per Cents.,  $107\frac{1}{2}$  to 108; and for 4 per Cents., 98 to 99

to 108; and for 4 per Cents., 98 to 99 Quotations for Bullion. — Gold — Bar gold, 77s 9d per oz std; dito, âno, 77s 9¼d per oz std, last price; ditto, refinable, 77s 10¼ per oz std; Spanish doubloons, 76s 3d to 76s 6d per oz, hat price; South American ditto, 74s 6d per oz; United States gold coin, 76s 2¾d. Silver-Bar silver, 5s 1¼d to 5s 1¾d per oz std, last price; ditto, containing 5 gra gold, 5s 1¼d per oz std, last price; ditto, containing 5 gra gold, 5s 1¼d per oz std, last price; fine cake silver, 5s 5½d per oz; Maxican dollars, 5s 3¼d per oz, last price; fine cake silver, 5s 5½d per oz; Maxican dollars, 5s 3¼d per oz, last price; Spaniah dollars, (Carolus), 5s 2d per oz, last price; five-franc pieces, is 11½ per oz, last price.

About 3,600l in gold was sent to the West Indies by the outward packet of to-day.

The steamer Pera, with the mails for Calcutta and China, will take, on the 4th inst., 109,9057 in specie, of which 58,6457 is gold, and the rest silver.

PUBLIC COMPANIES.—The report presented at the meeting of the Great Ship Company to-day, stated that circumstances over which the Directors had no control have compelled them to call the proprietors together to submit an approximate view of the financial position of the concern, and to take immediate steps to relieve the undertaking from its present embarrass-ments, or to wind up its affairs in such manner as may be deemed most desirable. While the number of passengers conveyed across the Atlantic exhibits satisfactory progress, the mings have materially diminished by the severe competition etween the two great rival Companies throughout the season. Allusion is also made to the accident at Montauk Point, to which the present unfortunate state of affairs is mainly attri-butable from the delay and heavy expanses attending the the repairs required. The result of the present season's work-ing has been a loss of about 20,000%. In conclusion, the Dire ectors remark that the position of the Company's affairs is most critical, and that immediate steps must be taken either to raise additional capital or to wind up, the latter alternative being equivalent to a total sacrifice of the property of the ordinary shareholders. The ship cannot be longer retained in possession of the Company unless funds be immediately provided to pay off the existing trade debts of 30,002*l*, and to repair and fit the vessel for future employment. After considerable discussion, resolutions were passed receiving the report, and appointing a committee to investigate the affairs of the Company, and to report the result within ten days.

A meeting of the Standard Bank of British South Africa took place to-day, when a dividend was declared of 6s 9d per share, free of income tax, being at the rate of more than 12 per cent. per annum. The bank was stated to have met with very satisfactory success.

At an extraordinary meeting, yesterday, of Price's Patent

FOREIGN EXCHANGES.—There has been no material altera-in the rates this week, but the general tendency is some-that less firm. in the price of candles. The dividend proposed was 10s per share.

1105

The General Credit Company have made a call of 2l per share, payable next month.

It has been officially announced that the net earnings of the Great Western of Canada Railway Company for the six months ending the 31st of July (including the balance brought forward from the previous half-year) have been 7,955/, which the Directors recommend should be carried to the credit of the current half-year.

The prospectus has been issued of the East London Bank (Limited), an institution sufficiently described by its title, with a capital of 600,0001 (subject to increase), in 12,000 shares of 50l each, of which it is not intended in the first instance to call up more than 150,000l, or 12l 10s per share. It is pointed out that east of Fenchurch street there is not, with the exception of three branches, one bank, either jointstock or private, although the commercial transactions of the Eastern district, comprising as it does the shipping interest, docks, Mincing lane and Mark lane markets, extensive manufacturing establishments, and a population of upwards of a million, are necessarily very large. It is, therefore, contended that there is an ample field for a new bank, and that a considerable service will be done to business by utilising more fully the surplus trading capital of the district. The direc-tion is respectable and of a practical character, and the brokers are Messrs Hutchinson and Co.

The Directors of the Imperial Royal Privileged Union Bank of Austria have taken premises for conducting the business at Vienna in the immediate neighbourhood of the Exchange, and have engaged as one of their managers Mr Edward Hofzinser. Mr Hofzinser successfully organised the Discount Bank at Vienna, and has been its manager up to the present time.

The half-yearly meeting of the Panonia Leather Company was held on Monday. From a statement prepared by the manager, Mr Beard, it appears that, including the purchase of the 70 years' lease of the premises at Clapham, the Company was fairly started at an outlay of 8,500/. Of the first issue of shares, 2,000 have been taken up, and on those a call of 12 will be made this month. The Company is able with the present appliances to turn out and finish 10,000 to 12,000 yards of leather cloth weekly, and it was mentioned that the material meets with general approval in the various branches of trade to which it is applicable. The chairman congratulated the shareholders on the favourable prospect before them, and the usual resolutions were carried after a short discussion.

A payment of 16s per share for the six months ending in June last (being at the rate of 8 per cent. per annum), is about to be paid on the original capital (400,000l) of the London and South African Bank, on account of the next yearly dividend.

The Van Diemen's Land Company have declared a dividend of 6s per share free of income tax.

The report of the Indian Carrying Company, issued in anticipation of the general meeting on the 5th instant, states that the operations of the past year have been attended on the whole with a satisfactory result. At Bombay, owing to some alleged injudicious proceedings of the late manager, a loss has been sustained, but the Directors have every reason to believe that under the change made in the local management a profitable course of business will be opened. In Madras there has been a steady improvement from the commencement, and the operations hitherto undertaken have in all respects proved prosperous. From Calcutta the reports received are also en-couraging, although the accounts do not show a profit. This, prosperous. however, arises in some degree from the circumstance that the system under which the business of the Company is conducted was not completed until the end of the first week in February, while the expenses of the establishment are charged against revenue for the entire half-year. The total available balance of profit is 2,008l, of which the Directors recommend that 750l should be appropriated to the payment of a dividend

#### TETTHE CONOMIST.

5.8.2

### Oct. 3, 1863.

.81

for the half-year ending the 30th June last, at the rate of 6

The Southesa Pier Hotel Company, limited, has been formed for the purpose of erecting a first-class hotel. From the success which has higherto attended similar companies, the present undertaking is regarded with much favour. A portion of the required capital, 60,000t, has already been subscribed.

FATEURES AND MERCANTILE EMBARRASSMENTS At the Court of Bankruptcy, a first meeting was held on Wednesday, under the failure of Messas Brandon and Noah, of Abchurch lane and Laurence Pountney place, wine and general mer-chants. The failure is attributable to heavy losses upon conchants. The failure is attributable to neavy losses upon con-aignments; and the debts are returned at 56,827/, as against assets 19,6167, subject to realisation. Messrs Pott (Francis Brothers and Pott), Hopley (English and Irish Bank), and Newton, wine merchant, Silver street, were appointed trade assignees.

MISCELLANEOUS.—At a general meeting of the members of Lloyd's, in the Underwriters' Room, Mr W. C. Harnett in the chair, for the purpose of receiving the half-yearly report, the following votes were unanimously carried :—The sum of 50tin aid of the funds of the Seamen's Hospital ship Caledonia, in the river; and the sum of 50% in aid of a fund now raising on behalf of Mrs A. C. Hanson, the widow of the late Mr A. W. Hanson, agent for Lloyd's at Sherboro, in Western Africa, who lost his life in endeavouring to render assistance to the African Royal mail steamer Cleopatra, wrecked off the coast of Sherboro in August, 1862.

COMMERCIAL ETIIOME. FRIDAY NIGHT. The supply af English wheat on sale at Mark lane, to-day, was small, and the trade, on the whole, ruled steady, at ful quotations. In foreign wheat, a limited business was transacted at previous currencies. Barley sold heavily, at the late dealing prices. Oats, beans, and peas were in limited request, on former terms. Flour met a dull inquiry, at late rates. This week's imports amount to 12,440 quarters of wheat, 1,740 barley, 9,020 outs 0.26 acaks and 130 harrels of flour.

prices. Oats, beans, and peas were in limited request, on former terms. Flour met a dull inquiry, at late rates. This week imports amount to 12,440 quarters of wheat, 1,740 barley, 9,020 oats, 230 sacks and 130 barrels of flour. At Liverpool, this morning, wheat was in fair demand, at fall prices. Indian corn ruled steady, but the flour trade was dull. The annexed report, datad the 18th ult., and forwarded by Messrs Briggs and Co., shows the state of the grain trade at Alexandria :—Arrivals of grain and pulse, particularly of wheat, continue light, and for this reason prices remain pretty stationary for ready stuff, with little business. For future delivery a ton-siderable reduction might be obtained. The quotations we give are those presently ruling, quoted f.o.b. 2,600 quarters Saide wheat, private trade produce, at 28s 2d to 29s; 450 quarters Buhi ditto, 30s 6d to 36s; 400 quarters white Beheireh ditto, 29s to 30s 6d; 3,600 quarters red Beheireh ditto, 27s 9d to 28s 3d; 1,000 gen-tille Beheireh ditto, 24s 3d to 24s 9d; 100 quarters peas, 27 quarters Beheireh ditto, 24s 3d to 24s 9d; 100 quarters peas, 27 to 27s 6d; 1,950 quarters saide beans, 25s 3d. to 25s 9d; 2,200 quarters Beheireh ditto, 24s 3d to 24s 3d; 400 tons cotton-meed, 6l to 6l 10s, scarce and of inferior quality; 1 ton flax (dremed), 53l 13s; 9 tons ditto (rough), 25l to 25l 13s 3d. Freights.—Very little is doing. Beans for orders nominally at 4s 6d to 5s, and cottou seed Ss 6d to 3s 9d direct; beans or grain, 4s 3d to 4s 6d Ballast by steamers, 5s per quarter Liverpool, and 4s 9d Loudon. There has been a fair inquiry in the Liverpool cotton market this week; the total asles amount to 49,000 bales, including 26,000 to spinners, 13,000 on speculation, and 10,000 for export. Quot-tons are the same as on Friday last. To-day the market is very firm, owing to the latest accounts from America being in favour of the South. The sales reach 8,000 bales. The cotton market at Alexandria has of late been in an excited state. Writing on the 18th ult, Mess

 The demand for English wool still continues somewhat active, at very full prices, to a slight advance. Mesars Bradbury and Cok have announced another sale of home-grown wool in London on the 28th inst. About 1,200 packs will be brought forward. Foreign and colonial qualities are a slow inquiry.

 Mesars Bonald and Son, of Liverpool, state that the wool trade, list month, was very active, and that increased quantities had been taken by home buyers. The export demand, however, had not materially improved.

 Bay and flax have continued firm in price, and in the value of jute a further advance has taken place.

 Bay ond flax have continued firm in price, and in the value of state a further advance has taken place.

 Bay ond flax have continued firm in price, and in the value of state of the past month: .--There have been not tannactions of any magnitude to report during the past month, the values of shale leaf, 63 bhds Kentucky strips, 541 hhds leaf, and 277 hhds Mayland. Holders appear still desirous of meeting the views of buyers, and some further small concessions have been made. The buk of the sales have consisted of small lots for immediate requirements. Imports-1,894 hhds. Deliverias-1,378 hhds; 1306 high in 1862; 27,541 hhds in 1863; 20053 hhds in 1860; 19,385 hhds in 1863; 11,617 hhds in 1858. The sound at hand from Calcutta, respecting the indigo cron, vay considerably. In some districts, the erop promises exceeding, well; in others, the prospects are somewhat adice araging. The present estimates are 101,000 to 108,000 maund.

#### STERN ADDODES, EXPORES, CONSERVATION, Mc.+1865. COLONIAL Exports from Jan. 1 to Imports from Jan. 1 to Oct. 2. Descriptions 1862 1863 1862 1863 bales 81420 32290 balei 29048 233979 392506 88225 322930 761329 35600 50090 261750 Brazil, &c. 92290 865533 11:2484 326730 347440 eck. Oct. 2. Cor antion from Jan 1 to Oct. 2. 1862 1862

There has been much less animation in the cotton market this week than for several weeks previously. The trade having more than supplied their immediate wants, have been less disposed to There is operate ; other buyers marie little change to notice in pris other buyers have been also more cautious. prices, our quotations of last week being market evinces much firmness, and there merely repeated. The market evinces much firmness, and there is still a good deal doing in cotton to arrive. The sales to-day are 10,000 bales. The reported export amounts to 9,620 bales, consisting of 190 American, 1,420 Brazil, and 8,010 East India.

The imports, this work, are 25,423 bales, and the quantity of urat now affoat for England is 300,000 bales, against 300,000 Surat now s ast year at this time.

#### MARKETS IN THE MANUFACTURING DISTRICTS.

The Liverpool cotton market having been somewhat active, the demand for years and cloth in the manufacturing districts has further improved, and, in some instances, the quotations have had an upward tendency. Iron has changed hands to some extent, both for home use and export, and a full average business has been passing in coals. further improved, and an upward tendency.

been passing in coals. MANCHESTER, Oct. 1.—Business has not been important, but pretty general in its diffusion. Yarns have been worse to meet with, and have gained a trifle, in some cases, over last week. Cloths have not been wanted largely, but many little wants have had to be supplied, at firm, or even slowly hardening rates. The leading Eastern fabrics have been neglected. For long cloths, narrow printers, and such like, there has continued to be a fair demand. The almost total absence of stocks, and the great amount of contructs on hand, render the market for the present independent of any fresh demands upon it.

Jarda elle and Long Cloth, 36 BRADFORD. — There is a good demand for all classes of wool, at full prices. We cannot find that there is any real advance, but staplers are quite firm at those already established. Business in yaras continues good. The demand for the home trade s'ill im-proves, fair orders arrive from the de laine makers of Lancashire, and the export merchaots are encouraged by the accounts received from Leipsic fair. Although the demand for pieces, in general, is not quite so brisk, moderate miscellaneous lots of goods have been bought to-day, and stray orders for heavy fabrics, fancies, camlets, &c., still come to hand. LEEDS.—Very little business was done in anything except wit-neys, pilo s, and beavers, of which a few small parcels were sold. ROCHPALE.—In the warehouse . 20 6 17 9 9 3 6 9 8 9 8 10

ROCHDALE.—In the warehouses, we find the flannel trade, keeping up to the good standard of the last few months, and it is not surprising, after such a sustained demand, that stocks begin to present a slender aspect. The price of wool is rising still bisher

higher. LEICESTER-

higher. LEICESTER.—There is continued activity in the hosiery trade, and the demand for both fancy and regular goods is still brisk. Manufacturers are well employed to order. NOTTINGHAM.—There has been less business doing in lace goods than for some weeks past, e-pecially in cotton fabrics. The demand, also, for black silk laces and edgings has not been so active, but quillings continue in tolerable request. HUDDERSFIELD.—The market has again been poorly attended, and a comparatively small amount of business has been done. Stocks, however, eannet on the whole be said to be large, and prices keep firm. prices keep firm

WOLVERHAMPTON.-Pig-iron has advanced, and best native all mine hot blast pigs are now quoted 3/ 15s to 3/ 17s 6d, and even

42. They might have been freely bought and weeks ago at 37 al Coals is sure to go up 1s a too, and colliers' wages probably to NOW Y per cont. SHEFFIELD .- The home trade gradually improves, es SHEFFIELD. - The nome trace grantery improves, except to the London market is dull, as usual at this iscnen, and that a cotion districts yield only small orders. From other parts tree lers' sheets are larger, and letter orders more numerous BERMINGHAM. - There is no improvement, whatever faul trade of this town, some degree of quiet being felt in an the principal branches. An aralle soft fand be defended in the

e principal oraneues. NEWCASTLE-ON-TYNE.-There is an increased domand for ing of all descriptions in our districts, more especially for wrough iron, and prices are advancing. The steam coal pits are still a good employment, and though the season is past for English seels going out, foreign ships are leaving our ports with coal for Rossia. dong areas too soob it but oble ind

BARNALEY .--- The demand for all descriptions of coal thro remarkably go the South Yorkshire coal district has been remarkably go the coalmasters have not had so brisk an inquiry for a co able time past.

Nonwich .--- The shoe trade still presents a fair amount of ani ation. In the manufacturing bus ness of the city there is little change.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS. New Yoax, Sept. 13.—There was an improved demand for ul kinds of floar, and prices advanced 10 to 15 cents per barre. Fresh ground parcels were especially in request, owing to a series kinds of flour, and prices advanced 10 to 15 cents per barrel. Fresh ground parcels were especially in request, owing to a some what improved export inquiry. The sales of the week amount to 102,000 barrels, and the carrency at latest date ruled a follows :--State, superfine brands, \$4.25 to \$4.75; State, exa brands, \$5 to \$5.15; State, choice brands, \$5.20 to \$5.35; Ohn, common brands, \$5.40 to \$5.50; Ohio, fancy brande, \$5.75 to \$5.70; Ohio, guod and choice estra brands, \$5.26; Genessei, extra brands, \$5.40 to \$7; Missouri, \$5.46 to \$5.26; Genessei, extra brands, \$5.40 to \$7; Missouri, \$5.46 to \$8.30; Cameda, common, \$4.60 to \$5.35; Canada, good to choice extra, \$5.40 to \$7.35 per barrel. Io the wheat trade, a much better feeling we also observed, and an increased apply was taken for expet: The advance in prices was 5 cents per bashel. The transactions reached 880,000 bushels, at 96 cents to \$1.08 for old Chicage The advance in prices was 5 cents per bushel. The transactions reached 880,000 bushels, at 96 cents to \$1.08 for old Chicago spring; \$1.22 for choice new ditto; \$1 to \$1.18 for Milwauka Clob; \$1.19 to \$1.24 for amber Iawa, the lafter for very choice; \$1.20 to \$1.25 for winter red Western; \$1.26 to \$1.35 for amber Michigan; \$1.35 for choice white ditto; \$1.14 for unseend red. Western; and \$1.05 for unseend red Illinois. For corn there was a good demand, and 775,000 bushels changed hands, at enhanced rates. White Southern realised 83c to 88c; yellow ditto, 78s to 81c; round yellow, 76c to 77c; round white, 78a to 80c; mixed Western, 75c to 76c per bushel. Exrons of Gaux from New Yoax, from Sept. 1 to Sept. 15.

LONDON MARKETS.

SIATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING. The arrivals of home-grown wheat up to our market, this teek, coastwise and by land-carriage, have been on a very indents and by land-carriage. The arrivals of home-grown wheat up to our marger, week, coastwise and by land-carriage, have been on a very moderate scale. Selected samples have commanded rather more attention, and the quotations have been well supported. Other kinds have moved off heavily, at about previous rates. Foreign wheat—the show of which has not increased—has met a dull sale, at about stationary prices. On Monday, barley declined is to 2s per quarter, with a heavy sale. Since then, however, the inquiry has improved, and the currencies have ruled steady. The supplies of barley in the hands of the dealers are limited. The mait trade has been in a sluggish state, at about previous rates. Good sound ns been in a sluggish state, at about previous rates. Good sound bats have sold some what freely, at full currencies; otherwise, the at trade has been in a sluggish state, at the late decline in value. oats have sold son We have no change to notice in the second se

nearly all kinds of wheat, at about stationary prices. Spr corn has sold to a fair extent, at full currencies. Naw Y advices state that, owing to the advance in the value of gold, b wheat and flour were rather dearer. The export demand was

steady. The Sostch markets have been very inactive for wheat and most other produce, at about stationary prices.

### THE ECONOMIST.

in Iseland, wheat has ruled a shade lower, and all other articles as moved aff slowly, at easy ourreades.

In Iseland, wheat has ruled a shade tower, and all other articles moved all slowly, at easy corrections. Means Surge and Co., of Birmingham, write as follows in many states to the state of the corm trade last month: --The yield of the new wheat having proved generally good, and in many moves greater than was ever known, our markets have been by supplied, causing a decline of 4s to 5s per quarter on the movely supplied, causing a decline of 4s to 5s per quarter on the movely supplied, causing a decline of 4s to 5s per quarter on the movely supplied, causing a decline of 4s to 5s per quarter on the movely supplied, causing a decline of 4s to 5s per quarter on the movely supplied, causing a decline of the to 5s per quarter on the movel of the most is weeks they will be engaged in proparing that for wheat sowing. During the week wonther at the ming of the month, large purchases of flour were made on the supported than ours, we calculate that most of it will be read as that side, and it does not seem probable that much the reports of the wheat crops in the countries shipping from the failte are good, but in the countries shipping from the failte are good, but in the entre and South of Europe they have of both in quantity and quality, but it is stated that those of both in quantity and quality, but it is stated that those of both in quantity and quality. The is entired that tho we have a state is grown for export, and, consequently, the produces in the very short ; should such prove the case. It will not only interaily reduce the quantity abiped of this article, but of what also, independently of other causes. The great decline with under a capoge can have here an inport. The produce will adding acong of barley proves quite as large as was expected; and 113 have arrived since at parts of ships many and can draw the thrash for some time to come. At Mark have, to day, English wheat was in moderate demand, the fail prices current on Monday. The show of samples was

At Mark lune, to-day, English wheat was in moderate demand, at the full pices current on Monday. The show of samples was way mederate. In foreign wheat, however, sales progressed donly, on former terms. Barley sold heavily, at the late decline in the currency. For oats, beans, and peas the inquiry was much matriced; nevertheless, prices ruled stationary. The flour trade aduil, at late rates.

maduil, at late rates. In George Dornbusch reports the arrival of 122 vessels off cast laten with grain-44 being wheat, 48 maize, 6 barley, 2 rys <sup>1</sup> whoes, 7 benns, 2 cotton seed, 12 linseed. The demand fir all kinds of produce, in the face of these heavy arrivals, has heaving most inactive state. However, no change of import-tage has taken place in prices. Polish Odessa wheat has realised New Nas taken place in prices. Polish Odessa wheat has realised New Soil and the New York, 395 6d, ditto, Montreal, 41s; maize, 25s 3d to 26s 6d; Tarkish barley, 26s; rye, 30s; Egyptin beans, 29s to 30s per quarter. Danubian millet-seed in nominal at 22s to 22s 6d; and Syrian dari, 24s to 24s 6d. Cotton seed is selling at 7/ 10s to 7/ 12s 6d per ton. The London averages announced this day are -

COLONIAL AND FOREIGN PRODUCE MARKETS, TRANSACTIONS OF THE WERE. FOR REPORT OF THE DAY, MARNERS, BUT "POSTORIPE."

1611

MIRCING LANE, FRIDAY MORNING. SUGAL .-- The refiners continue rather large buyers, and a firmer tone pervades the market generally, prices occasionally showing some slight advance. West India is active; the transactions to yesterday reaching 2105 casks. By auction, 600 casks 125 barrels Barbudoes realised 32s 6d to 32s. 96 casks 274 barrels other sorts : St Lucia, 29s 6d to 33s; Tobago, 31s 6d to 33s 6d per cwt. Fine samples of Porte Rico have commanded extreme rates. There were 4,345 tons delivered last week, and the landings did not exceed 2,470 tons, consequently the stock has decreased to 110,300 tons, against 85,100 tons in 1862 at the sume date. ing me date. Mauritius.-

Mauritius.-8,551 bags, by auction, found buyers at full rates; brown, 29s to 31s 6d; low grey and soft yellow, 32s to 34s; grainy and crystallised, 34s 6d to 39s 6d per ewt. A few parcels have changed

crystallised, 34s 6d to 39s 6d per cwt. A few parcels have changed hands privately. Pennag. -3,025 bags sold at about the valuations: brown, 30s 6d to 31s 6d; low to fine yellow, 33s to 36s per cwt. Massilla.---, 500 bags unclayed have sold at 25s, 9d per cwt. Madras.---, 500 tans Jargary have sold to arrive, at 27s per cwt. Foreign.---, 589 casks 232 barrals Porto Rico, by auction, chickly met with buyers: brown and grey, 34s to 35s ; yellow, low to very fine, 35s 6d to 42s. A floating cargo of Havana, No. 11 to 115, has 6dd for the United Kingdom at 23s 6d. One of Havana, No. 15 to 115, has 6dd for per cwt, for a mear port. Saveral parcels of Guba and other foreign muscovado have sold on the spt.

Refined.—The market is steady, with a moderate demand.

Refined.—The market is steady, with a moderate demand. Low to middling goods, 44s to 44s 6d per cwt. Pieces and crushed sell freely. The stock of dry refined goods is materially reduced. Motasses.—650 puncheons West India have sold at better prices: An-tigue, 15s 6d to 16s; other descriptions, 14s 3http://spect.org Rux.—The market is rather quiet. No sales have accurred to allor; quotations. 1,000 puns 435 hhds of all kinds were delivered last week, leaving the stock at the close 36,600 puns 2,480 hhds, against 35,200 puns 4,20 hhds in 1862.

quotations, 1,000 puns 435 hhds of all kinds were delivered last week leaving the stock at the close 36,600 puns 2,480 hhds, against 35,200 puns 4,220 hhds in 1862. Cocoa.—A few transactions have occurred in West India, at provious rates, by private contract. At auction, 274 bags Trindad sold at 54s 6d to 100s for grey to fine red. Corres.—Further arrivals from Colombe have taken place. The market is dull and unsettled, some of the plantation Ceylon being is per owt cheaper. 961 casks 99 baireds and 407 bags dhiefly mad with buyers : anall berry to good middling, 78s to 34si. 39, oasks 1,478 lange native partly sold : good ordinary to fine, 71s to 74s 6d. Of 1,145 bags 69s to 79s 6d. 430 cases 18 bags East India, partly sold at 95s to 390.

d

blacks, 3s 3d to 3s 7d; Honduras silvers, 3s 50 0s 09; unservice an ex-3s 7d per lb. Office Dirksrukes.—Gambier is unchanged Sufflower has been in demand, at rather higher rates. Turmeric is quist, Bengal quoted 29s to 30s. 1,600 bigs Cutch, of fair quality, sold at 24s per owt; the sea-damaged at proportionate rates. Durus.—Sales of camphor have been effected at 71 to 71 5s, and the market is duil, owing to the full supplies expected. At this festinightly sales held restershy, a fair propertion of the goads submitted found buyers, without any material change in prices. Marats.—The prices of British iron still show an upward tandency. Bers, in Wales, quoted 71 to 71 10s. Scotch pig-remains steady. The

last miss of mixed numbers were at 62s to 62s 6d per ton. Spelter is quict, and we are without business to report. Foreign tin has been unsettled, with sales of Straits at 116*l* to 1177 per ton. Banca maintains its position, despite the unfavourable deliveries in Holland. Copper firm : Bura, 98/ per ton. JUTE.—The domand keeps good, and business of some extent has been done for arrival. 6,145 bales, by auction, on Wednesday sold at the late advance to a further rise of 5s: ordinary to fine, 24*l* 15s to 31*l* per ton.

31/ per ton. MANULA HENP is firm, but there has not been much business done by private contract. At auction, 350 bales were taken in at high

pri

prices. Lansance arrives freely, and the market is dull. On the spot, 69s is the extreme price of Bombay; and for Calcutta, 62s 6d to 63s for ordi-nary, up to 64s 6d for Mirzapore, c. f. and i., including bags. For arrival, no business of any importance has taken place: Calcutta business of any importance has taken place:

arrival, no business of any importance has taken place: Galeutta August-September shipments, Marseilles conditions, may be bought at 64s; for Black Sea, on the coast, 60s per quarter, delivered in the United Kingdom, has been refused. OIL.—Linseed is more plentiful, with sellers at 43/, both here and in Hull. The demand for rape is improving, and there are few sellers of foreign brown rape under 42/ per ton, and refined 45/1 to 45/1 to so the spot. 10s more is asked for monthly deliveries up to December. Olive oils are exceedingly dull. Mogadore offers at 50/ up to 60/ for Gallipoli; as these rates leave considerable loss in the importation, the reduction in the kingdom of Italy of about 3/ per tun in the export duty is not likely, at present, to influence prices. The demand for coccos-mut is very moderate, at 47/10s for Cochin, and 45/10s per ton for Caylon, with three months' prompt; some fine Sydney has been coconstants is very moderate, at 4.71 105 for Cocmin, and 4.01 105 per ton for Caylon, with three months' prompt; some fine Sydney has been sold at 44l per ton, with  $2\frac{1}{2}$  per cent discount. A steady business passing in palm, at 37l per ton for fine Lagos. Sperm sells slowly, at 89l for American, and 81l for colonial; pale Southern, 44l; pale seal, 46l are time 46l per tun. SPIRITS

THITS TURPENTINE continue to recede, and 72s per cwt h scepted for French, on the spot. PERSOLEUM OR ROCK OIL-The market has been much deput

ad PERBOLIZOM OR ROCK OIL.—The market has been much depressed since our last advices, in consequence of a large number of speculative parcels having been forced upon the market for the best obtainable prices. American refined, for immediate delivery, offers at 2s 4d to 2s 5d per gallon, whilst purchases of English refined can be made at 2s 3d. A fair extent of business has been done, for delivery the last three months of the year, at 2s 5d per gallon, at which we have still sallers. Crude Pennsylvanian offers at 21*l*, and crude Canadian at 13 per tare. per tun. Tallow.

TALLOW.—The market has been firmer during the past few days, but it closes without much animation. Ist sort new Petersburg Y.C., 44s 9d to 45s : for delivery to the end of the year, 45s ; in the first three months of 1864, 45s to 45s 3d per cwt.

#### POSTSCRIPT.

#### FRIDAY NIGHT.

SUGAR.—The market closes firmly and quite 64 per ext dearer for the week. Transactions in West India reached 3,500 casks. 5,739 bags Mauritius of the lower qualities, by anotion, sold with spirit at 64 advance. 2,949 bags Madras Jaggery, 273 ed to 228 ed. Privately, further parcels of Cuba changed hands. A floating cargo of Maroim

advance. 2,949 bags mannes onggo y further parcels of Cuba changed hands. A floating cargo of Maroim sold at 248 per cwt for a near port. **COFFEE**. -1,711 bags Rio were chieffy bought in at 73s to 77s. 1,558 cases 589 bags East India sold on barely previous terms. 71 casks 60 barrels I bag plantation Ceylon went off without further alteration in value. 126 bags good ordinary native Ceylon, at 69s 6d

Alternation in value. Leo bigs good ordinary matrix correct, and ender per owt, were is per owt cheaper. Rucz-About 10,000 bags have changed hands privately : cargo Bongal at 8s 3d to 9s; low Rangoon, at 8s 6d per owt. SALATERRE-1,000 bags Bengal, by auction, were taken in above the

value.

TALLOW.-171 casks Australian, by auction, sold at 378 9d to 43s. 253 pipes South American part sold at 41s 3d to 42s 6d. 303 casks Tagamrog sheep half sold at 42s to 45s. Town advanced to 46s 6d per ewt

#### ADDITIONAL NOTICES.

-The home market for refined sugar remains unal-some few sales have been made at 28s 3d. In Dutch REFINED SUGAR.-**EXERTINE** SUGAR.—The home market for refined sugar remains unai-tered. For export, some few sales have been made at 28s 3d. In Dutch crushed, about 600 tons have been sold, for delivery in November and December next, consisting of B and H No. 1, ASSR No. 2, and HR No. 1,—all at 27s, in barrels. The market has a flat appearance. GREENE Futur in better demand. Lemons of good quality realise a high price. Some parcels Lisbon and Sicily, sold by Keeling and Hunt at public sale, went at prices in character with condition and quality. Some Malaca went higher being of better gollow. A cargo of summer

at public cale, went at prices in character with condition and quality. Some Malaga went higher, being of better colour. A cargo of summer oranges from St George's, Azores, sold well, although out of condition. Lisbon grapes sell freely, quality being better than former season's. Nuts of all kinds without alteration. Day Faurn.—Currants arrive in large parcels, but sales do not coin-cide, though considerable quantities have been offered at auction. The demand is for low 25s, which is searce; and finest sorts, 32s to 34s; medium sorts neglected. Old is firmly held, and 25s is daily refused; some very fine sold at 27s. Valentias seem steady, at 33s, 34s, and 38s to 40s for selected. Sultanas are not in demand, but large arrivals some very fine sold at 27s. Valentias seem steady, at 33s, 34s, and 38s to 40s for selected. Sultanas are not in demand, but large arrivals have taken place. Figs are poor in quality, and prices, accordingly, are much lower than in former seasons.

COLONIAL WOOL-There continues to be a good demand for FLAX.-Market steady. HEMP.-Market firmer, and rather more inquiry during the w

 FIAL — Market firmer, and rather more inquiry during the weat.

Inquiry for copper is good, and prices have hardened, as sale after sale in been reported. Iron maintains its upward tendency. Most make are shy of engagements, and Scotch pig has advanced to 61s 6d can for warrants. Tin is just steady, with no particular feature. Spelie is rather neglected. Lead a trifle more in demand. Tin plates inquire at rather higher rates. for

#### METROPOLITAN CATTLE MARKET.

THURSDAY, Oct. 1.—There was a fair average supply of beasis an offer here to-day as to number, but the general quality of the stock was inferior. Sales progressed slowly, at Monday's currency. The top figure was 4s 10d per 8 lbs. The show of sheep was moderate. Most kinds changed hands somewhat freely, at full prices. The best Down realised 5s 2d per 8 lbs. Calves were in demand, but no change text place in quotations. The best veal was worth fully 4s 4d per 8 lbs. The sale for pigs was heavy, and prices had a drooping tendency. Mich cows were very dull. cows were very dull.

### 7114 THE ECONOMIST.

Famar, Oct. 2 .- New hops move off freely, at extreme miss. Year-ing and old hops are in limited request, yet prices rule firm.

#### POTATO MARKET.

Bonovon, Monday, Sept. 28.—Full average supplies of potatoes are on sale at these markets, and the quality of the produce is excellent. The immud, generally speaking, is in a sluggishutate at fully the late decline in prices. There were no imports in London last week. Kent and East Regents, 50s to 50s; ditto Rocks, 50s to 60s per ton. Furnar, Oct. 2.—The supply of potatoes is less extensive, and the trade rules steady, at 50s to 60s per ton.

HAY MARKETS.—THURSDAY, Oct. 1. SHITHING.—Meadow hay, 3/ 0s to 4/ 12a; clover, 4/ 0s to 6/ 0s; and straw, 1/ 8s to 1/ 16s per load. Trade steady. CUMERILAND.—Meadow hay, 3/ 0s to 4/ 15s; clover, 4/ 0s to 6/ 0s; and straw, 1/ 8s to 1/ 16s per load. Trade firm. WHITHINGHAPHL.—Meadow hay, 3/ 0s to 4/ 15s; clover, 4/ 0s to 6/ 0s; and straw, 1/ 8s to 1/ 16s per load. A steady demand.

LIVERPOOL MARKETS.

#### WOOL

(FROM ORE ONE ONE COMMERCEDENT.) FRIDAT, Oct. 2.—We have had again a very fair amount of business doing this week, at hardening prices for all descriptions of a useful kind, stocks of which are now getting into a comparatively small

### CORN.

(Fnow our OWN CORRESPONDENT.) Funar, Oct. 2.—Fair business in wheat: no change in value. Moderate business in flour, and Westerns are 6d lower. Indian corn steady. Beans steady. Oats and catmeal dull, and rather lower.

GOUGH AND BOYCE, ORIGINAL PATENTEES AND MANUFACTURERS,

12 BUSH LANE, CANNON STREET. MANUFACTORY-GREENWICH ROAD.

The public are respectfully cautioned that many persons advertise themselves as manufacturers of this favourite article who are not so.

## HUBBUCK'S PATENT WHITE ZINC PAINT Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere large towns, and by their process, which is patented, is cheaper than White Lead.

It is es escially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an aualgam of the two metals, which protects the Iron from decay or insrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Sait

ADULTERATIONS.-Some Paint Grinders have been selling Zino Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can pro-duce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their est work.

Each Cask of Pure White Zinc is stamped-

#### "HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINTand VARNISH WORKS, 24 LIME ATRENT. "For public schools, and all rooms occupied by children, there will now be no excess for using poiscence paints. Parents have remarked, thus their children on returning from the country to newly-painted houses have suffered in health. The remarks evidant-the breach extracts the insidious poison from paint, and the lungs draw in the deadly vapour."-JOHN BULL, September 14, 1880

REVIEWS OF THE WORK.

REVIEWS OF THE WOAK. "We feel no heatiation in anying that there is no member of society by whom the back will and be found useful--whether such person huld the relation of a pa-rent, preceptor, or clergyman."-Sux, oreaning paper. "Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."-DAIX TREESBARK, March 27, 1868.

March 27, 1868. "Curris on Manhood should be in the hands of youth and old age. It is a medical publication, ably written, and developes the treatment of a class of painful realsdles, which has too long here in the prey of the illuterate and designing."-UNITED SERVICE GARKYER.

"Curtis on Manhood. To invalide saflering from youthful errors and excesses it will be found valuable and useful."-Bacour.

The book concludes with numerous varied and inter-rating Cases, to which is added the Author's Receipt of a Preventive Lotion.

At home for Consultation daily from Ten till Three and Six till Eight. Published and sold by J. Alien, 20 Warwick lane, atemaster row Manu, 39 Cornhill; and all Booksellers

#### OPINIONS OF THE PRESS.

OPENDAS OF THE PRESS. 1" Any ess acqui inted with the current litenture of the matropolis, or fail literatural, will have no difficulty in identifying the author of this interesting volume. The pages abcund with sensible observations, attention to which will be found absolutely macrosary to gain even a moderate share of aucoses in this hung would of ours." "This is a work quite suit generis. It is quality written, but is full to an overflow of the wi-down of us-presence and the impulse of wirtze. To all who have 'heads and hears' we command this singular. 'legocy."

<sup>1</sup> heads and hearts ' we command this singular. 'legacy.'' "The author, of this legacy has put together surperview to the bins chequered life luteroding to stimulate the vising generation to good conduct and h number dealing, by aboving know an untaught boy may step, by step to a high position. He enjoins patience and virilance, homesty and sobriety, in every path of life, and to schest what is so little practised—that man should do what his hands find for him to do. The basens ere alike homerinkie to the head and heart of the writer."

"Besides the autobiographical sketch, Pausphilius applies a variety of spirited literary specimens, the principal of which, however, is an imperious manual of Prench Grammar, as used by the author when teacher of the French Innguage, designed for the use of self-ins-ruction."

Instruction." "The book is clear and simple, highly moral in tone, and must encouraging to the young 'appirant. It is interesting as a biographical sketch of a life strangle, and contains many observations on mean an imanners which it would be profitable for every one to know who has the least ambition or desire of havine a soul above his buttons, and a goed arrows at the bank."

#### Vol. II., price 6d, THE ECONOMY OF LIFE :

"To stimulate industry, energy, persoverance, [and self-denial, is the object of Pamphillus in issuing this volume for the guidan, but youth. With these virtues, there is no omisenceto which a rare may nest sayine; and from the examples that, are brought truthfully and viv dly before the reaster, he will find that a truty enviable reputation is only to be acquired by in-dependence, of character, by h.nesty, consistency, and by spotless purity, both in public and in private life."--The Economy of LaFE.

#### PROSPECTUS.

East London, including in its extent nearly one-half the Motropolia, has never enjoyed the advantages of a baak dovoted to its service and located in the centre of its operations.

The operations. Eastward of a line drawn, north and south, across Foncinuch stress, there is not, with the exception of three branches, one private see public bunk. Yot this district is commercially distinguished from West Lon-don by the wast shapping interest at the Themes-the colts-the great produce markets of Mineing lane. Mark lane, and neighbouring localities - the chief manufactures-- and an industrial population of upwards of one million. East London, therefore, both in respect of its wealth and the magnitude of its transactions, requires the aid which the "Last London Bank" is designed to afford. The bank sizes not propose to introduce or adopt any unusual modes of busines: it will rather confine itself to the practice of those soundly coust tured establish-ther sputation of being solid and most incrative institu-tions.

tions. The surplus trading capital of East London far exceeds in amount that of West London. Deposits and banking balances, which constitute the real capital of a bank and the sources of its profits, will therefore be abundantly available for the requirements of the immense business

balances, which constitute the real capital of a bank and the sources of is provide, will therefore be obundantly available for the requirements of the immense mainees of the district. The present share capital of the "**East London Hank**" is of moderate but safficient amount. It is new well understood that all a bank can gain by capital is credit, and when its capital is large enough to pat that upon a solid basis, it is as large as the occasion requires. More would only lead, proportionately with its exceess, to the diminution of dividends. The measure of success to be attained by the "East Loadon Bank." may be anticipated as certain to equal, it least, the greatest yet achieved. Considering the extent, wealth, and growing importance of the commer-cial half of London, and its want of a lead bank, it earnot be otherwise than large. Banking stock is the wost remunerative of investments. The banks of the Western half of London are earning dividends of from to towerly-five per cent, per annum, besides of this amount, obtained in the midst of competition, will be more readily earned in East London, where rivalry searcely exists, and where enumarce is developed through the largest aggregate of mercanable fixed in the work. Applications for shares, and encased to the Directors in

through the largest aggregate of mercantile trade in the world. Applications for shares, addressed to the Directors in the accompanying form, will be received by Messes J. Hutchisson, Son, and Co., 15 Angel court, Throgmorton Street, E.C.; Messer Hoyland and Frince, Manchester, herekwar to the Company; Messes Thomas and Hollame, Minchig lane, E.C., solicitors to the Company; and by Mr Sleigh, Secretary (pro tem.), 2 Anstin Friars, Old Hread street, E.C.; but to application can be considered unless a deposit of £2 per share on the number of shares applied for has been made. In the event of the Directors not being able is nucede to a request, the sum deposited will be promptly returned; and in enses of reduced allotment, the balances will be applied towards the full deposit of £5 per share.

To the Directors of the East London Bank, (Limited), Gentlemen,-Having paid to your bankers the sum of I hereby request that you will allot to me abares of £50 such in the East London 8-nk, (Limited), and I hereby arres to accept such harrs or any smaller number that may be allotted to me, and to pay the re-mainder of the deposit of £5 per share on each of the shares ailotted, and to sign the memorandum and

dation when required.-I am, p Profession ......

THE SOUTHSEA PIER COMPANY Gambady. Incorporated works the action block of base and 1867," and the companies whereby the liability of endowing the limited to the account with being PIER HOTA
