WE HAVE DATA ON 34.000 ARTWORKS!

And thought that would be a good opener ;)

Last year 7 Belgian museums agreed to clean their data and start thinking of a strategy for persistent identification of the artworks they hold in their collection

This year they install a resolver tool to activate persistent URIs for the work of art, as well as for images and metadata

This and next year we contribute available data via Wikidata

WHO'S IN?

The museums:

- Mu.ZEE (Ostend)

- GroeningeMuseum (Bruges)

- S.M.A.K. (Ghent)

- Museum Schone Kunsten Gent

- KMSKA (Antwerp)

- Middelheimmuseum (Antwerp)

- M HKA (Antwerp)

- the Collection of the Flemish Government

WHY ARE WE HERE?

Museum's data is already linked to Q-numbers from Wikipedia (used Open Refine)

But we'd like to get to know you – the GLAMWiki community member who is willing to help us in the process of data donation!

[And yes we do have some funding for your hard labour]

barbara@packed.be / bert@packed.be

THERE'S MORE …

Hopefully data donation leads to actual content upload

A Belgian Wiki loves Art is *maybe* in the pipeline and a good kickstart to get some uploads going

We will document the entire project trajectory – and are happy to share w the community for future inspirations
