Agricultural Statistics, 1992

Agricultural Statistics, 1992 was prepared under the direction of MICHAEL A. HUNST, Agricultural Statistics Board, National Agricultural Statistics Service.

BRENDA V. POWERS was responsible for coordination and technical editorial work.

The cooperation of the many contributors to this publication is gratefully acknowledged. Source notes below each table credit the various Government agencies which collaborated in furnishing information.

Introduction

Agricultural Statistics is published each year to meet the diverse need for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use.

Inquiries concerning more current or more detailed data, past and prospective revisions, or the statistical methodology used should be addressed directly to the agency credited with preparing the table. Most of the data were prepared or compiled in the U.S. Department of Agriculture.

The historical series in this volume have been generally limited to data beginning with 1976 or later.

Foreign agricultural trade statistics include Government as well as non-Government shipments of merchandise from the United States and Territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. Territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, and the result of office research.

Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture.

The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on data obtained by sample surveys of farmers and of people who do business with farmers. The survey data are supplemented by information from the Censuses of Agriculture taken every five years and check data from various sources. Being estimates, they are subject to revision as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on area, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled.

DEFINITIONS

“Value of production” as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, quantities not harvested because of low prices or other economic factors are not included in value of production. The word “Value” is used in the inventory tables on livestock and poultry to mean value of the number of head on the inventory date. It is derived by multiplying the number of head by an estimated value per head as of the date.

The word “Year” (alone) in a column heading means calendar year unless otherwise indicated. “Ton” when used in this book without qualifications means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U.S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from State schedules of legal weights, various sources within the U.S. Department of Agriculture, and other Government agencies. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

CONVERSION FACTORS

Commodity	Unit	Approximate equivalent
Apples	1 pound dried	7 pounds fresh; beginning 1943, 8 pounds fresh
Do	1 pound chops	5 pounds fresh
Do	1 case canned ²¹	1.4 bushels fresh
Applesaucedo ²¹	1.2 bushels fresh
Apricots	1 pound dried	6 pounds fresh
Barley flour	100 pounds	4.59 bushels barley
Beans, lima	1 pound shelled	2 pounds unshelled
Beans, snap or wax	1 case canned ²²	0.008 ton fresh
Buckwheat flour	100 pounds	3.47 bushels buckwheat
Calves	1 pound live weight	0.557 pound dressed weight (1954-63 average)
Cattledo	0.561 pound dressed weight (1954-63 average)
Cane syrup	1 gallon	5 pounds sugar
Cherries, tart	1 case canned ²¹	0.023 ton fresh
Chickens	1 pound live weight	0.72 pound ready-to-cook weight
Corn, shelled	1 bushel (56 lbs.)	2 bushels (70 pounds) of husked ear corn
Corn, sweet	1 case canned ²²	0.030 ton fresh
Cornmeal:		
Degermed	100 pounds	3.16 bushels corn, beginning 1946
Nondegermeddo	2 bushels corn, beginning 1946
Cotton	1 pound ginned	3.26 pounds seed cotton, including trash ²³
Cottonseed meal	1 pound	2.10 pounds cottonseed
Cottonseed oildo	5.88 pounds cottonseed
Dairy products:		
Butterdo	21.1 pounds milk
Cheesedo	10 pounds milk
Condensed milk, wholedo	2.3 pounds milk
Dry creamdo	19 pounds milk
Dry milk, wholedo	7.6 pounds milk
Evaporated milk, wholedo	2.14 pounds milk
Malted milkdo	2.6 pounds milk
Nonfat dry milkdo	11 pounds liquid skim milk
Ice cream ²⁴	1 gallon	15 pounds milk
Ice cream ²⁴ (eliminating fat from butter and concentrated milk)do	12 pounds milk
Eggs	1 case	47 pounds
Eggs, shelldo	39.5 pounds frozen or liquid whole eggs
Dodo	10.3 pounds dried whole eggs
Figs	1 pound dried	3 pounds fresh in California; 4 pounds fresh elsewhere
Flaxseed	1 bushel	About 2½ gallons oil
Grapefruit, Florida	1 case canned juice ²²	0.64 box fresh fruit
Hogs	1 pound live weight	0.579 pound dressed weight, excluding lard (1954-63 average)
Linseed meal	1 pound	1.51 pounds flaxseed
Linseed oildo	2.77 pounds flaxseed
Malt	1 bushel (34 lbs.)	1 bushel barley (48 lbs.)
Maple syrup	1 gallon	8 pounds maple sugar
Nuts:		
Almonds, imported	1 pound shelled	3½ pounds unshelled
Almonds, Californiado	2.22 pounds unshelled through 1949; 2 pounds thereafter
Brazildo	2 pounds unshelled
Cashewsdo	4.55 pounds unshelled
Chestnutsdo	1.19 pounds unshelled
Filbertsdo	2.22 pounds unshelled through 1949; 2.5 pounds thereafter
Pecans:		
Seedlingdo	2.78 pounds unshelled
Improveddo	2.50 pounds unshelled
Pignoliasdo	1.3 pounds unshelled
Pistachiosdo	2 pounds unshelled
Walnuts:		
Blackdo	5.88 pounds unshelled
Persian (English)do	2.67 pounds unshelled
Oatmeal	100 pounds	7.6 bushels oats, beginning 1943
Oranges, Florida	1 case canned juice ²²	0.53 box fresh
Peaches, California, freestone	1 pound dried	5¼ pounds fresh through 1918; 6 pounds fresh for 1919-28; and 6½ pounds fresh from 1929 to date
Peaches, California, clingstonedo	7½ pounds fresh
Peaches, clingstone	1 case canned ²¹	1 bushel fresh
Dodo	0.0230 ton fresh
Peanuts	1 pound shelled	1½ pounds unshelled
Pears	1 pound dried	6½ pounds fresh
Pears, Bartlett	1 case canned ²²	1.1 bushels fresh
Dodo	0.026 ton fresh

See footnotes on page IX.

Wool, domestic apparel pulled.....	do.....	

¹ Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans, green peas, spinach, etc.

² Approximate inside dimensions, 4½ by 12½ by 16½ inches.

³ Approximate inside dimensions, 4½ by 16 by 16½ inches.

⁴ Approximate dimensions, 4½ by 13½ by 16½ inches.

⁵ Approximate inside dimensions, 13 by 12 by 32 inches.

⁶ Approximate inside dimensions, 13 by 18 by 21½ inches.

⁷ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.

⁸ Approximate inside dimensions, 9¼ by 16 by 20 inches.

⁹ Approximate inside dimensions, 4¾ by 11½ by 14 inches.

¹⁰ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it required 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

¹¹ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

¹² This is the average weight of cottonseed, although the legal weight in some States varies from this figure of 32 pounds.

¹³ Approximate inside dimensions, 9¼ by 10½ by 15 inches.

¹⁴ Approximate inside dimensions, 1¾ by 11 by 16½ inches.

¹⁵ Approximate inside dimensions, 11½ by 11½ by 24 inches.

¹⁶ In California and Arizona from 1942 through 1953, the net weights as used by this Department were 77 pounds for oranges, 79 pounds for lemons, and 65 pounds for Desert Valleys grapefruit. Grapefruit in California areas, other than the Desert Valleys, averaged 68 pounds. The new weights effective in 1954 reflect the shift from the "box" to the other ½-box carton as the container used.

¹⁷ Approximate inside dimensions, 4¾ by 16 by 16½ inches.

¹⁸ Approximate inside dimensions, 9¾ by 13 by 25 inches. 6 by 16 by 16½ inches.

¹⁹ Includes both sorghum grain (kafir, milo, hegari, etc.) and sweet sorghum varieties.

²⁰ This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.

²¹ Case of 24 No. 2½ cans.

²² Case of 24 No. 303 cans.

²³ Varies widely by method of harvesting.

²⁴ The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

²⁵ This is equivalent to 4.51 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions, beginning July 1, 1957. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790-1879, 5 bushels; 1880-1908, 4.75 bushels, 1909-17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921-44, 4.7 bushels; July 1944-Feb. 1946, 4.57 bushels; March 1946-Oct. 1946, average was about 4.31 bushels; and Nov. 1946-June 1957, 4.57 bushels.

CHAPTER I

STATISTICS OF GRAIN AND FEED

This chapter contains tables for wheat, rye, rice, corn, oats, barley, sorghum grain, and feedstuffs. Estimates are given of area, production, disposition, supply and disappearance, prices, value of production, stocks, foreign production and trade, price-support operations, animal units fed, and feed consumed by livestock and poultry.

Table 1.—Total grain: Supply and disappearance, United States, 1977-91

Year ¹	Supply				Disappearance			Ending stocks

1992/93 ⁹	2.21	4.00	28	50

¹ Percentage of parity price at beginning of marketing year. ² Represents loans made, purchases, and agreements entered into. ³ Acquisition of all loans forfeited during the marketing year including farmer-owned reserves and other loans made in previous years. ⁴ Uncommitted CCC inventory. ⁵ Reserve loan levels: 1981—\$3.30; 1982—\$3.50; 1983—\$4.00. Reserve loans for other years beginning with 1977 crop same as shown in table.

Target Prices: 1978—\$2.47 on under-planted allotment acreage; 1981—\$3.08 available to producers on farms where plantings exceeded the NCA. ⁶ Acquired through direct purchases by CCC for future Food Security Reserves. ⁷ Includes 147 million bushels in Food Security Reserve, except 131 million bushels in 1988/89 and 71 million bushels in 1989/90. ⁸ Includes acquisitions for payment-in-kind (PIK) program entitlements. ⁹ Preliminary.

Agricultural Stabilization and Conservation Service.

¹ Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1988 is combined with estimates for the Southern Hemisphere Harvests, which begin late in 1988 and end early in 1989.

² Harvested area as far as possible. ³ Preliminary.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés and Foreign Service Officers, results of office research, and related information.

¹ Data in this table are limited to exports and imports of wheat and flour during July 1, 1988 through June 30, 1989 by countries which are members of the International Wheat Agreement (IWA); they exclude approximately 30 million metric tons of wheat and flour exported to or imported from countries which are not members of the IWA. Flour reported in terms of grain equivalent. ² Included are Hong Kong, Gibraltar, Bermuda, and Virgin Islands.

Foreign Agricultural Service. Data from International Wheat Council Report.

¹ Consolidated supply and disappearance of rough and milled rice. Milled-rice data converted to a rough-rice basis using annually derived extraction rates as factors. ² Based on Bureau of Census reports. Estimates for 1969, and 1970 adjusted by ASCS data, based on bills of lading submitted to the USDA for export payments. ³ Results from losses in drying, storage, handling, and milling and from errors in estimation. ⁴ Less than 50,000 cwt.

⁵ Preliminary.

Totals may not add due to independent rounding.

¹ Crop year beginning Aug. 1. Crops harvested in the Northern Hemisphere during the latter part of the year are combined with those harvested in Asia principally from November to May, and in the Southern Hemisphere harvested during the first part of the following year. ² Harvested area as far as possible. ³ Preliminary.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés and Foreign Service Officers, results of office research, and related information.

¹ Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1987 is combined with estimates for the Southern Hemisphere harvest, which begins late in 1987 and ends early in 1988.

² Harvested area as far as possible. ³ Preliminary.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés and Foreign Service Officers, results of office research, and related information.

¹ Percentage of parity price as of the beginning of the marketing year. ² Represents loans made, purchases, and purchase agreements entered into. Percentage of production is on a grain basis. ³ Acquisition of all loans forfeited during the marketing year including loans made in previous year. For 1979, acquired through direct purchases by CCC. ⁴ Smaller value is regular loan; larger value is loan rate for crops in the farmer-owned reserve. ⁵ Producers who exceed their NCA will be eligible for the Lower Target price. ⁶ Includes Payment-In-Kind purchases. ⁷ Change in 1986 marketing year from October 1 to September 1 reflect adjustments made in supply/ use and prices starting in 1976. ⁸ Preliminary.

¹ Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1987 is combined with estimates for the Southern Hemisphere harvest, which begins late in 1987 and ends early in 1988.

² Harvested area as far as possible. ³ Preliminary.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés, and Foreign Service Officers, results of office research, and related information.

Table 55.—Barley: Area, yield, production, disposition, and value, United States, 1977-91

¹ Years shown refer to year of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1987 is combined with estimates of the Southern Hemisphere harvests, which begin late in 1987 and end early in 1988.

² Harvested area as far as possible. ³ Preliminary.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés and Foreign Service Officers, results of office research, and related information.

n.a., not available. ¹ Excludes quantities used in alcoholic beverages. ² Includes white, whole wheat, and semolina flour. ³ Includes an allowance for the quantity used as hominy and grits. ⁴ Oats used in oatmeal, prepared breakfast foods, infant foods, and food products. ⁵ Malt for food, breakfast food uses, pearl barley, and flour. ⁶ Malt equivalent of barley food products. ⁷ Preliminary. Estimates of corn syrup, sugar, and starch are unofficial estimates; industry data were not reported after April 1968. Economic Research Service. All figures are estimates based on data from private industry sources, the U.S. Department of Commerce, the Internal Revenue Service, and other Government agencies.

1992/93 ⁸	2.91	4.66						

¹ Percentage of parity price as of the beginning of the marketing year. ² Represents loans made, purchases, and purchase agreements entered into. ³ Acquisition of all loans forfeited during the marketing year including loans made in previous years. ⁴ Uncommitted CCC inventory. ⁵ Smaller value is regular loan; larger value is loan rate for crops in the former-owned reserve. ⁶ Producers who exceed their NCA will be eligible for the lower target price. ⁷ Includes Payment-In-Kind purchases. ⁸ Change in 1986 marketing year from October 1 to September 1 reflect adjustments made in supply/use and prices starting in 1976. ⁹ Preliminary.

¹ Cincinnati 1974-1980.² Based on prices of the following feedstuffs at leading markets, weighted by average consumption: Soybean meal, cottonseed meal, meat meal, tankage, fishmeal, wheat meals; bran, middlings, and millrun; gluten feed and meal; hominy feed, brewers' and distillers' dried grains; alfalfa meal; rice bran and feeding molasses.

Agricultural Marketing Service.

CHAPTER II

STATISTICS OF COTTON, TOBACCO, SUGAR CROPS, AND HONEY

In addition to tables on cotton, tobacco, sugar, and honey, this chapter includes tables on fibers other than cotton and syrups. Cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Table 81.—Cotton: Area, yield, production, and value, United States, 1977–91

Year	Area		Yield per harvested acre	Production	Marketing year average price per pound received by farmers ¹	Value of production ¹
	Planted	Harvested

¹ Average of the crop from 1966 through 1970; Middling 1-inch, micronaire 3.5-4.9, net weight for 1971 through 1973, established "target" price for 1974 and succeeding years. ² Includes price-support payments as follows: On production from area planted within the farm base area allotment, 15 cents in 1973. ³ Percentage of parity price as of the beginning of the marketing year. ⁴ Includes loans made. ⁵ Acquisitions from crop harvested in the year indicated and not acquisitions during that year. ⁶ Running bales. ⁷ Less than 500 bales. ⁸ Established price or "target" price. If the average market price is below the target price, eligible producers will receive payment at a rate equal to the difference between the target price and the higher of the loan level or the average market price. No payments were made on the 1973-80 crops. ⁹ Estimated.

Agricultural Stabilization and Conservation Service.

¹ In Hawaii, harvest continues throughout the year and production statistics are on a calendar year basis. In other states, harvest is seasonal and the production statistics year relates to the year in which the season begins.
² Preliminary. ³ Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.
⁴ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.
⁵ Blackstrap (80° Brix) high-test molasses from frozen cane and edible molasses. ⁶ 85° brix.
 National Agricultural Statistics Service.

¹ All sugars converted to refined basis. ² Includes Hawaiian sugar for direct consumption. ³ Includes Puerto Rican sugar for direct consumption. ⁴ Sugar for direct consumption only. Mainland cane sugar mills stocks and production not separately reported. ⁵ Stocks include sugar in bond and in Customs custody and control. ⁶ Includes deliveries for export, for livestock feed, and for use in alcohol. ⁷ Includes beet sugar, forfeited to and marketed by CCC.

National Agricultural Statistics Service and Agricultural Stabilization and Conservation Service.

¹ For 4th quarter 1977 through 3rd quarter 1979, derived by converting the London spot for sugar to a Caribbean basis in U.S. dollars. ² For 4th quarter 1977 through 3rd quarter 1979, derived by converting the London spot to a Caribbean basis in U.S. dollars, and adding freight, insurance, and applicable U.S. duties and fees. For June-Dec, 1985, prices for No. 12 nearby futures. Starting Jan. 1986 prices are for No. 14 nearby futures. ³ F.o.b.-basis list prices in 100 pound bags, not delivered prices—beginning calendar 1982 in bulk. To obtain delivered prices, add 'freight pre-pays' and deduct discounts and allowances. ⁴ Calendar 1978 and 1979 only, derived by using the Bureau of Labor Statistics consumer price index (all-urban, unadjusted) for Sugar and Artificial Sweeteners.

Economic Research Service. Compiled from the following sources: (New York) Coffee, Sugar & Cocoa Exchange; John Crowe and Company; and U.S. Department of Labor, Bureau of Labor Statistics.

¹ Preliminary. ² Production data in metric tons, on farm-sales-weight basis, which is about 10 percent above dry-weight data normally reported in trade statistics. ³ FSU-12 includes the 12 newly independent states of the former USSR. ⁴ Includes: Guyana, Haiti, Trinidad & Tobago, Benin, Mauritius, Mali, Sierra Leone, St. Vincent, Chad, Cyprus, Solomon Islands, Israel, Switzerland, Austria, and Liberia.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches, Foreign Service Officers and results of office research, and related information.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Table 139.—Cottonseed: All cotton area and cottonseed production, farm disposition, marketing year average price per ton received by farmers, and value, United States, 1977-91

¹ U.S. averages not fully representative of entire crop because of relatively small volume of seed graded in some areas. ² These basic factors are combined to form indexes of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.

³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil, and ammonia. ⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter and free fatty acids. ⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0. ⁶ Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.

Agricultural Marketing Service.

¹ Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere countries in 1986 was combined with the Southern Hemisphere harvest which began late in 1986 and ended early in 1987. ² Preliminary. ³ Area includes that harvested for seed and that portion of fiber area which is harvested for seed as well as fiber. Production includes seed from fiber flax. ⁴ Includes fiber flax area and seed production. ⁵ Flaxseed from area grown for seed only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches, and Foreign Service Officers, results of office research, and related information.

¹ Percentage of the parity price as of the beginning of the marketing year. ² Includes loans made and direct purchases. ³ Includes shelled peanuts converted to farmers' stock basis. ⁴ The 1977 legislation authorized a two-price poundage quota program with declining minimum quota levels for 1978-81 crops. The 1981 legislation suspended allotments and continued the declining poundage quotas and the two-price program for 1982-85 crops. The 1985 legislation continued the suspension of allotments and the two-price program, but sets the poundage quota at estimated domestic edible, seed and related uses for the 1986-90 crops. 1990 legislation basically extended 1985 legislation with minor changes through the 1995-96 crop. Quota peanuts are those peanuts grown within the farm poundage quota. Additional peanuts are those peanuts grown in excess of the quota. ⁵ Not applicable. For 1978-86, support level was not based on parity.

Agricultural Stabilization and Conservation Service.

¹ Peanuts in the shell. Split year includes Northern Hemisphere crop harvested in the late months of the first year shown combined with Southern Hemisphere and certain Northern Hemisphere crops harvested in the early months of the following year. ² Harvested area as far as possible. ³ Preliminary. ⁴ Includes countries not listed separately.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés, and Foreign Service Officers, results of office research, and related information.

¹ For soybeans, year begins Sept. 1; for soybean oil and oilseed cake and meal, year begins Oct. 1. ² Preliminary.

³ Crude and refined oil combined as such. Includes shipments under P.L. 480 as reported by the Bureau of the Census. ⁴ Includes quantities exported to countries not shown. ⁵ Total may not add due to rounding.

⁶ Includes 89,632 metric tons, 38,465 metric tons and 7,789 metric tons transshipped via Canada to unidentified countries in 1988/89, 1989/90, and 1990/91 respectively.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce.

CHAPTER IV

STATISTICS OF VEGETABLES AND MELONS

This chapter contains statistics on potatoes, sweetpotatoes, and commercial vegetables and melons.

For potatoes and sweetpotatoes, the estimates of area, production, value, and farm disposition pertain to the total crop and include quantities produced both for sale and for use on farms where grown. Potato statistics are shown on a within-year seasonal grouping of winter, spring, summer, and fall crops, by States. Some States have production in more than one seasonal group.

For processing vegetables, the estimates of area, production, and value for each of 5 crops relate to production used by commercial canners, freezers, and other processors, except dehydrators. These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual area harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made is included in the fresh market estimates. The processed segment of production for asparagus, broccoli, carrots, and cauliflower, combined with fresh market production during the year, is published at the end of the season, separately. In 1982, processing estimates for asparagus, beets, cabbage for kraut, cucumbers for pickles, lima beans and spinach were discontinued. Asparagus and cucumbers for pickles were reinstated in 1984.

Seasonal Groups and Marketing Period

Prospective Area For Harvest

Winter: January, February, March

Summer: July, August, September

Spring: April, May, June

Fall: October, November, December

Annual Acreage, Yield, Production, and Value

The seasonal patterns of harvest do not correspond precisely in all States to the estimating period or periods designated. In some cases, only one seasonal group is shown for a State, but marketing may be active in earlier or later months. Because of the small volume from this earlier or later period, the crop estimate has been placed in the seasonal group where the largest portion is harvested.

Commercial vegetables for fresh market include 10 principal vegetable and melon crops in the major producing States. Earlier years include the following additional crops: artichokes, lima beans, snap beans, Brussels sprouts, cabbage, cantaloups, cucumbers, eggplant, escarole/endive, garlic, green peas, green peppers, spinach, and watermelon. These estimates relate to crops which are grown primarily for sale, and they do not include vegetables and melons produced in farm and nonfarm gardens. The bulk of the production of the principal vegetable and melon crops is for consumption in the fresh state. However, quantities used by processors of celery and onions are included, and separate estimates of commercial processing are not made for these crops. The commercial estimates of the principal crops include local market production from areas near consuming centers as well as production from well recognized commercial areas which specialize in producing supplies for shipment to distant markets.

For fresh market vegetables and melons, value per unit and total value are on a f.o.b. basis. For processed vegetables, value per unit and total value are at processing plant door.

¹ Area for fresh market is area for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Area for processing is area harvested. ² Area, production, and farm value of the following 22 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, snap beans, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole/endive, garlic, honeydew melons, lettuce, onions, green peppers, spinach, tomatoes, and watermelons.

³ Area, production, and farm value of the following 9 crops in all States: Lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates. ⁴ Production for fresh market excludes some quantities not marketed because of low prices or other economic factors. ⁵ Value for all fresh market vegetables, except garlic, on f.o.b. basis. For processing vegetables, value at processing plant door. ⁶ Beginning with crop year 1982, acreage, yield, production, price and value estimates have been discontinued for the following crops—fresh market vegetables: Artichokes, asparagus, snap beans, brussels sprouts, cabbage, cantaloups, cucumbers, eggplant, escarole/endive, garlic, green peppers, spinach, and watermelons; processing vegetables: Lima beans, beets, cabbage (sauerkraut), cucumbers (pickles), spinach, and asparagus. Estimates for these crops are not in *Agricultural Statistics*.

⁷ Due to program modification, 1983 data are not comparable with 1982 and earlier or 1984 and later for fresh market vegetables. ⁸ Estimates for asparagus and cucumbers for pickles reinstated with the 1984 crop. ⁹ Preliminary.

National Agricultural Statistics Service.

¹ Production of the following crops for which regular seasonal estimates are prepared in major producing States: Asparagus, broccoli, carrots, cauliflower, celery, sweet corn, honeydew melons, lettuce, onions, and tomatoes.

² Preliminary. ³ Includes snapbeans, sweet corn, cucumbers for pickles, green peas, and tomatoes. Other vegetables processed (dual purpose) included in fresh market series of estimates. ⁴ Estimates discontinued in 1990.

⁵ AZ, KY, LA, ME, MA, MS, MO, and OK.

¹ Use of car/carlot equivalents for reporting unloads of fresh vegetables and melons was discontinued at the close of calendar year 1977. Total unloads of specified commodities at 8 markets for 1963-77 are published in carlot equivalents in *Agricultural Statistics*, 1978, table 274. The term "unloads" was discontinued in favor of the term "arrivals" at the close of calendar year 1981. ² Includes Washington. ³ Includes Newark. ⁴ Estimated percentages of completeness for reported truck arrivals for 1991 are as follows: Baltimore 90, Boston 95, New York 85, and Philadelphia 90.

¹ Use of car/carlot equivalents for reporting shipments of fresh vegetables was discontinued at the close of calendar year 1977. Rail and boat shipment totals of specified commodities for 1963-1977 are published in carlot equivalents in *Agricultural Statistics*, 1978, table 275. ² Not otherwise specified.

Agricultural Marketing Service.

¹ Fresh vegetable consumption computed for total commercial production for fresh market, including an estimate for commercial production in States where estimates are not made separately. Does not include production for home use. Consumption obtained by dividing the total apparent consumption by total July 1 population as reported by the Bureau of the Census. All data for calendar year. ² Preliminary. ³ Includes artichokes, garlic, eggplant, cucumbers, bell pepper, cabbage, snap beans, cantaloupe, and watermelon.

Economic Research Service.

CHAPTER V

STATISTICS OF FRUITS, TREE NUTS, AND HORTICULTURAL SPECIALTIES

For most fruits, production is estimated at two levels—total and utilized. Total production is the quantity of fruit harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested or utilized because of economic and other reasons. Utilized production is the amount sold plus the quantities used on farms where grown and quantities held in storage. The difference between total and utilized production is the quantity of marketable fruit not harvested and fruit harvested but not sold or utilized because of economic and other reasons. Production relates to the crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to commercial production. The estimates for strawberries cover production on area grown primarily for sale. Statistics on utilization of fruit by commercial processors refer to first utilization, not necessarily final utilization. For example, frozen fruit includes fruit which may later be used for preserves.

The price shown for each crop is a marketing year average price for all methods of sales. Prices for most fresh fruit are the average prices producers received at the point of first sale, commonly referred to as the "average price as sold." Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit crop is sold f.o.b. packed by growers, part sold as bulk fruit at the packinghouse door, and some sold retail at roadside stands, the fresh fruit average price as sold is a weighted average of the average price for each method of sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when the Census of Agriculture data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

¹ Oranges, tangerines, tangelos, grapefruit, lemons, limes, and tangelos. Area is for the year of harvest.

² Commercial apples, apricots, cherries, grapes, nectarines, peaches, plums, and prunes. ³ Avocados, bananas, cranberries, dates, figs, kiwifruit (beginning 1980), olives, papayas, pineapples, and pomegranates.

⁴ Persimmons discontinued after 1977. ⁵ Almonds, hazelnuts (filberts), macadamia nuts, pistachios, and walnuts.

⁶ Preliminary.

National Agricultural Statistics Service.

¹ For some crops in certain years, production includes some quantities unharvested for economic reasons or excess cullage fruit. ² Estimates of the commercial crop refer to production in orchards of 100 or more bearing-age trees.

³ Preliminary. ⁴ Year harvest was complete. ⁵ Year of bloom. ⁶ Total production and yield were not estimated for the 1988 and 1989 crops. ⁷ Estimates discontinued after 1977 crop. ⁸ Estimates discontinued after 1989 crop.

National Agricultural Statistics Service.

¹ See footnote 1, table 277. ² Equivalent returns per box at the intake packinghouse door for all methods of sale. ³ Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment. ⁴ Includes small quantities of tangerines in Texas. Excludes Florida templets. ⁵ Preliminary. ⁶ Statistics for 1981-82 and after include honey tangerines grown in Florida. Florida "All tangerines" include Sunburst tangerines beginning with the 1989-90 season.

¹ Season begins with the bloom of the first year shown and ends with completion of harvest the following year. For oranges, harvest in California usually starts in late October of the first year shown and continues into December of the following year. In other States, harvest of oranges begins about Oct. 1 and ends in early summer. Grapefruit harvest for the California desert and for all other States begins in the fall and ends by early summer. Harvest of other California grapefruit begins in March of the year after bloom through October. California lemons are harvested from Aug. 1 to July 31; Arizona lemons are harvested from Aug. 15 to Mar. 1. Florida limes are picked mostly from April through March. Florida tangelos are harvested largely from October through April. ² Preliminary. ³ Equivalent returns per box at the intake packinghouse-door for all methods of sale. ⁴ Navel and miscellaneous varieties in Arizona and California; early and midseason varieties in Florida and Texas, including small quantities of tangerines in Texas. ⁵ Net content of box varies. Approximate averages are as follows: Oranges—Arizona and California, 75 pounds; Florida, 90 pounds; and Texas, 85 pounds; grapefruit—Arizona and California desert, 64 pounds; other California areas, 67 pounds; Florida, 85 pounds; Texas, 80 pounds; lemons—76 pounds; limes—88 pounds; tangelos—90 pounds; tangerines—Arizona and California, 75 pounds; Florida, 95 pounds; and temples—90 pounds. ⁶ No commercial production due to December 1989 freeze.

National Agricultural Statistics Service.

¹ Split years refer to harvest periods which usually begin in the fall and extend through the following spring. This corresponds roughly with October-June in the Northern Hemisphere and April-December of the second year shown in the Southern Hemisphere. ² Preliminary. ³ Includes temple oranges. ⁴ Includes tangelos. ⁵ Sao Paulo only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés, and Foreign Service Officers, results of office research, and related information. U.S. data are from USDA Crop Reporting Board.

Omitted data is misleading. Although reporting of concentrated juices was changed from concentrated to single-strength gallons in January 1978, some customs ports failed to switch recording methods until later. Frozen and hot pack exports from October 1980 onward are in single strength rather than concentrated equivalents.

U.S. export data to Canadian destinations prior to 1990 used in this chart are not accurate because late-night shipments were not recorded.

In 1989/90 the tariff code system was changed. Harmonized tariff code 2009190000 includes both hot pack and single-strength orange juices, which are now both included only in the hot pack column.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce.

¹ Net processed weight. ² Canned peaches are 40 percent of total canned fruit for salad. ³ Dried peaches are 21 percent of total dried fruit for salad. ⁴ Dried fruit converted to unprocessed dry weight by dividing by 1.08. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.0 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh.

Economic Research Service, Commodity Economic Division.

¹ Preliminary. ² Fresh fruit prices are equivalent packinghouse-door returns for California and Washington except equivalent returns for bulk fruit at the first delivery point for California and Washington and the average price as sold for other States. Quantities processed are priced at the equivalent processing plant door level. ³ Mainly for canning. Total production includes harvested not sold and unharvested production as follows (million pounds): 70.0 in 1987, 74.0 in 1988, and 65.0 in 1989. ⁴ No significant commercial production due to frost. ⁵ Estimates discontinued after the 1989 crop.

National Agricultural Statistics Service.

¹ Net processed weight. ² Dried pears are 16% percent of total dried fruit for salad. ³ Canned pears are 35 percent of total canned fruit for salad. ⁴ Dried converted to unprocessed dry weight by dividing by 1.03. Unprocessed dry weight converted to terms of fresh on the basis that 1 pound dried equals about 6.5 pounds fresh. Canned converted to terms of fresh on basis that 1 pound of canned equals about 1 pound fresh.

Economic Research Service. Commodity Economic Division.

¹ Michigan, Idaho, Washington, and Oregon. Mostly prunes; however, estimates include small quantities of plums in all States. ² Includes "Home use." ³ Some quantities otherwise processed are included to avoid disclosure of individual operations. ⁴ Prices for fresh sales are average prices as sold for Idaho and Michigan; equivalent packinghouse door returns for Oregon and Washington. Quantities processed are priced at the equivalent processing plant door level. ⁵ Not published to avoid disclosure of individual operations, but is included in total.
National Agricultural Statistics Service.

¹ Net processed weight. ² Exports and imports of dried prunes converted to unprocessed dry weight by dividing by 1.04. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2.7 pounds fresh. "Otherwise prepared or preserved" converted to terms of fresh fruit on the basis that 1 pound equals 0.899 pound fresh. ³ Dried prunes in salad estimated at 43 percent of total dried fruit for salad.

Economic Research Service. Commodity Economic Division.

¹ Fresh citrus fruits, canned fruit, canned juice, and chilled juice are on a crop-year basis. Dried fruits are on a pack-year basis. The per capita consumption was obtained by dividing the total consumption by total population. ² Oranges, tangerines, tangelos, temple lemons, limes, and grapefruits. ³ Apples, apricots, avocados, bananas, cherries, cranberries, figs, grapes, beginning 1983 included kiwifruit, mangoes, nectarines, peaches, pears, pineapples, papayas, plums and prunes, strawberries, and miscellaneous fruits. ⁴ Apricots, cherries, fruit cocktail and salads, peaches, pears, plums and prunes, and olives. ⁵ Preliminary. ⁶ Orange, grapefruit, blended citrus, lemon and limes, fruit nectars, grapes, and prunes, beginning 1989 excludes noncitrus juices. ⁷ Orange and grapefruit. ⁸ Cherries, apples, peaches, apricots, strawberries, other berries, grapes and pulp, miscellaneous fruits and citrus juice. ⁹ Apricots, peaches, pears, dates, figs, prunes, and raisins. Excludes unmerchantable figs, substandard prunes, and prunes used for juice and concentrate. Dried data are in terms of processed dried weight. ¹⁰ Not available.

Economic Research Service, Commodity Economic Division.

¹ Equivalent wholesale value of all sales. ² 1982-83 data not available because of program reduction. ³ 1985 and 1986 data not comparable with 1984. ⁴ Data for 1979-84 includes a small amount of standard chrysanthemums to avoid disclosure of individual operations. ⁵ Begun in 1985.

National Agricultural Statistics Service.

CHAPTER VI

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

Chapter VI deals with hay, pasture, seeds, and various minor field crops. Table 370 shows the seeding rate for a number of specified crops. The state averages are based on surveys made in 1980. The United States average rates are derived by weighting the average for each State by the area planted to the particular crop. Rates are not shown for States where the crop is not estimated currently.

Table 360.—Hay, all: Area, yield, production, disposition, and value, United States, 1977-91

Year	Area harvested	Yield per acre	Production	Used on farms where produced	Sold	Marketing year average price per ton received by farmers	Value of production

¹ United States average is rate of seeding weighted by final 1991 area planted, by States except for winter wheat and rye which are weighted by preliminary 1992 area planted in 1991. ² Approximately 1,650 kernels per pound. ³ Shelled basis (multiply by 1.33 obtain unshelled basis). ⁴ Fuzzy, non-delinted equivalent basis.

National Agricultural Statistics Service.

CHAPTER VII

STATISTICS OF CATTLE, HOGS, AND SHEEP

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter (including horse slaughter), meat production, and market statistics for meat animals.

Table 384.—All cattle and calves: Number and value, United States, Jan. 1, 1977-92

¹ Includes slaughter in federally inspected and other slaughter plants; excludes animals slaughtered on farms. Average live weight is based on unrounded numbers. Commercial slaughter not estimated in Alaska. ² Includes CT, ME, MA, NH, RI, and VT. ³ States with no data printed are still included in US total, not printed to avoid disclosing individual operations.

National Agricultural Statistics Service.

¹ Includes sheep shorn at commercial feeding yards. ² Price computed by weighting State average prices for all wool sold during the year by sales of shorn wool. ³ Production by States multiplied by annual average price. ⁴ Estimates discontinued in 1982. ⁵ Preliminary. ⁶ Beginning 1982, shorn wool only. ⁷ Conversion factors from grease basis to clean basis are as follows: Shorn wool production—52.8 percent (Stat. Bull. 616) from 1974-1988 pulled wool production—72.9 percent. ⁸ Includes carpet wool exports. ⁹ Prior to 1989, known as dutiable imports. ¹⁰ Prior to 1989, known as duty-free imports. In 1991 includes 18,166,376 pounds of imported raw wool not finer than 46's and 47,245 pounds of miscellaneous imported raw wool. ¹¹ Production minus exports plus imports; stocks not taken into consideration.

Economic Research Service and National Agricultural Statistics Service. Imports and exports from reports of the U.S. Department of Commerce.

1991.....									

¹ Average needed to bring the return up to the support level. The payment to an individual producer is computed by applying the announced percentage to his receipts from marketing of shorn wool. ² For unshorn lambs sold. ³ Unadjusted for weight of unshorn lambs produced. ⁴ Payments for wool marketed during the year shown are made after Mar. 31 of the following year. This includes deductions for American Sheep Council. Agricultural Stabilization and Conservation Service.

¹ Wool grown in the range areas of California, Oregon, Washington, Texas, the intermountain States (including Arizona and New Mexico), and parts of the Dakotas, Kansas, Nebraska, and Oklahoma. These wools vary considerably in shrinkage and color. ² Most wool grown in the farm areas of the Dakotas, Nebraska, Kansas, Oklahoma, and parts of Minnesota, Wisconsin, Iowa, and Missouri is somewhat dark in color and of moderately heavy shrinkage. Most of that grown in the States which are east of the Mississippi River and in parts of Minnesota, Iowa, and Missouri is bright in color and of relatively light shrinkage. ³ Before January 1976 the unit designation terminology for wool prices changed to microns. For example 64's (20.60-22.04 microns) formerly was fine good French combing and staple. Two designations 56's (26.40-27.84 microns) and 58's (24.95-26.39 microns) have been averaged in the price data shown here and together were formerly the category fleece % blood good French combing and staple.

USDA—Economic Research Service and Agricultural Marketing Service.

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes and (2) on the worsted system as the sum of top and noil production. ² Domestic, duty-paid and duty-free foreign. ³ Excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products.

¹ Includes shearing at commercial feeding yards.

² For Texas and California, the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

³ Production multiplied by annual average price.

⁴ Preliminary.

⁵ Price per pound calculated by weighting monthly prices by monthly sales of wool for footnoted States. The prices for remaining States are annual averages.

⁶ Includes AR, DE, FL, GA, HI, MS, RI, and SC.

National Agricultural Statistics Service.

1991.....					

¹ Average needed to bring the return up to the support level. The payment to an individual producer is computed by applying the announced percentage to his receipts from marketing of mohair. ² Payments for mohair marketed during the year shown are made after Mar. 31 of the following year. This includes deductions for Mohair Council of America.

Agricultural Stabilization and Conservation Service.

1991.....									

¹ Carcass weight equivalent or dressed weight. Beginning 1977, pork production was no longer reported as "pork, excluding lard." This series has been revised to reflect pork production in prior years on a dressed weight basis that is comparable with the method used to report beef, veal, and lamb and mutton. Edible offals are excluded. Shipments to the U.S. territories are included in domestic consumption.

² Lard series discontinued after 1989.

Economic Research Service.

1991									

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Includes shipments to U.S. Territories are included in domestic consumption. ² The pork series has been revised to a dressed weight equivalent rather than "Pork, excluding lard." (See Footnote 1, table 452.) ³ Beginning in 1989 the Harmonic codes combines beef and veal.

Economic Research Service. Data on imports and commercial exports are computed from records of the U.S. Department of Commerce, those on exports by the U.S. Department of Agriculture are separately estimated from deliveries and stocks.

National Agricultural Statistics Service.

CHAPTER VIII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. Two series of number of milk cows on farms are included in this publication. One series is an inventory number of a specific classification estimated as one of the major groups making up the total cattle population on January 1. The other series identified as "milk cows" is an annual average number of milk cows during the year (excluding any not yet fresh) and is used in estimating milk production.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or milkfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, and gross income; poultry and eggs under Federal inspection; and the National Poultry Improvement Plan. Estimates relating to inventories, production, and income exclude poultry and eggs produced on places not classified as farms.

¹ Excludes milk sucked by calves. ² Includes the equivalent amounts of milk for cream sold to plants and dealers and milk produced by dealers' own herds, except for New York and California, where such milk is included as sold directly to consumers. ³ Sales directly to consumers by producers who sell only milk from their own herds; also includes milk produced by institutional herds. ⁴ For States not published, sales are nominal. Included in milk sold to plants. ⁵ Sum of parts may not equal sum of totals due to rounding.

National Agricultural Statistics Service.

¹ Includes the equivalent amounts of milk for cream sold to plants and dealers. ² Percentage of milk sold to plants and dealers that is eligible for fluid use (Grade A in most States). Includes fluid-grade milk used in manufactured dairy products. ³ Also includes milk produced by institutional herds. ⁴ Cash receipts divided by milk for milkfat represented in combined marketings. ⁵ Valued at average returns per 100 pounds of milk in combined marketings of milk and cream. ⁶ Cash receipts from marketings of milk and cream plus value of milk used for home consumption and producer-churned butter. ⁷ Includes value of milk fed to calves.

National Agricultural Statistics Service.

¹ End of year. (Date on which pricing provisions became effective.) ² End of year. Data for 1980 and 1990 according to the 1980 and 1990 U.S. Census of Population, respectively. Data for 1977-1979, 1981-1989, and 1991 are estimated. ³ Average for year. ⁴ Weighted averages. ⁵ The decrease in these percentages results from handlers electing, because of blend and Class III price levels, not to pool milk that normally would have been pooled under Federal milk orders.

¹ Preliminary. ² Cottage cheese curd includes pot and bakers' cheese. Creamed cottage cheese contains not less than 4 percent milkfat. Lowfat cottage cheese contains less than 4 percent milkfat and has not been legal in interstate commerce, but beginning 1972, is legal under Federal standards if its content of milkfat is not less than 0.5 percent and not more than 2.0 percent by weight. ³ Includes freezer-made milkshake in most States.

¹ In-area sales include total sales in each of the areas by handlers regulated under the respective order, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas, therefore, some handlers' in-area sales are partially estimated. ² Plain, flavored, and miscellaneous whole milk products. ³ Plain, fortified, and flavored skim and lowfat milk, buttermilk, and miscellaneous lowfat and skim milk products. ⁴ New marketing area that was formed during the period January 1, 1990-December 31, 1991. Data for 1990 are for September-December. ⁵ Effective January 1, 1990, the Iowa marketing area was expanded to include previously unregulated area in Iowa, Illinois, and Missouri. ⁶ Data for 1991 represent sales for January through November. See 7. ⁷ Effective December 1, 1991, the Texas Panhandle, Lubbock-Plainview, and Rio Grande Valley orders were merged to form the New Mexico-West Texas order. Data for 1990 and January-November 1991 are for Rio Grande Valley.

Table 482.—Milk: Supply and

Item	1977	1978	1979	1980
	<i>Million pounds</i>	<i>Million pounds</i>	<i>Million pounds</i>	<i>Million pounds</i>
Milk production	122,654	121,641	123,350	128,406
Net imports of ingredients (milk equivalent) ²	228	232	237	203
Net change in storage cream (milk equivalent) ³	-16	-11	24	-3
Total supply	122,866	121,682	123,611	128,606
Utilization (milk equivalent):				
Used in manufactured products:				
Creamery butter, total milk equivalent	24,396	22,372	22,191	25,824
Milk equivalent of butter from whey cream	2,543	2,660	2,810	2,998
Net milk equivalent	21,853	19,712	19,381	22,826
Cheese:				
American	20,480	20,737	21,856	23,765
Other	8,385	9,180	9,701	10,160
Cottage cheese, creamed	1,056	1,056	1,028	1,016
Canned milk:				
Evaporated and sweetened condensed	1,809	1,725	1,752	1,594
Bulk condensed whole milk:				
Unsweetened	398	348	381	377
Sweetened	182	186	187	147
Dry whole milk	514	549	627	607
Ice cream and other frozen dairy products, total milk equivalent	13,805	13,859	13,767	14,010
Milk equivalent of butter and condensed milk used in ice cream	2,098	2,115	2,088	2,084
Net milk equivalent	11,707	11,744	11,679	11,926
Other manufactured products ⁴	684	707	912	909
Total manufactured products	67,068	65,944	67,504	73,327
Available for use in fluid products:				
Sold by dealers	49,885	49,685	49,884	49,385
Sold by producers directly to consumers ⁵	1,495	1,490	1,489	1,470
Total available for fluid products	51,380	51,175	51,373	50,855
Used on farms where produced:				
Fed to calves	1,541	1,497	1,442	1,395
Used for farm-churned butter	1,283	1,168	1,040	943
Total used on farms	2,824	2,665	2,483	2,338
Residual ⁶	1,594	1,898	2,251	2,086
Total utilization	122,866	121,682	123,611	128,606

¹ Preliminary. ² Whole milk equivalent (milkfat basis) of net imports of dairy manufacturing ingredients such as frozen cream and butterfat-sugar mixtures. ³ Whole milk equivalent of net out-of-storage movement of fluid and plastic cream during the year. A negative figure represents a net movement of cream into storage. ⁴ Whole milk equivalent of dry cream, malted milk powder, part-skim milk, dry or concentrated ice cream mix, dehydrated butterfat, and other miscellaneous products using milkfat. (Continued on page 321.)

¹ Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, and exports, from the total supply. The per capita consumption for each year was obtained by dividing the total apparent consumption by the number of persons. ² Includes all kinds of cheese except cottage and full-skim American. ³ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed), unskimmed, bulk goods; and sweetened condensed milk, unskimmed, case and bulk goods.

Economic Research Service.

¹ October 1-September 30. ² Percentage of the parity equivalent price for manufacturing milk and the parity price for butterfat as of the beginning of the marketing year. ³ The agricultural Act of 1949, as amended, required that the price of butterfat be supported through March 31, 1970. This requirement was superseded by the Agricultural Act of 1970 and terminated by the Agriculture and Consumer Protection Act of 1973. ⁴ Announced purchase prices for products in bulk containers. ⁵ Through March 31, 1985, indicated price is for Chicago (which represents an approximate U.S. average purchase price) based on New York prices less 80 percent of the lowest rail freight rate from Chicago to New York. Effective April 1, 1985, single nationwide price. ⁶ U.S. Grade A or higher, standard moisture basis. ⁷ U.S. Extra Grade, not more than 3.5 percent moisture content. Prices quoted are for product in 100-lb. bags, Nov. 4, 1955 through Aug. 18, 1967 and 50-lbs bags beginning Aug. 19, 1967. ⁸ Milkfat and nonfat solids content of butter, cheese, and nonfat dry milk purchased under price support and related programs. (Excludes purchases of fluid milk partly paid for by CCC under military and veterans milk program). Includes purchases at market prices for domestic school lunch and welfare programs beginning with the 1966-67 marketing year and ending in the 1973-74 marketing year under Section 709 of the Food and Agriculture Act of 1965. Includes purchases with Section 32 funds for distribution to needy persons of evaporated milk beginning in the 1968-69 marketing year and purchases of dry whole milk during 1971-72 through 1974-75. Purchases were also made in 1973-74 through 1975-76 marketing year under Section 4(a) of the Agriculture and Consumer Protection Act of 1973. ⁹ Calendar year. ¹⁰ Effective Apr. 1, 1978 (80 percent of parity as of that date). ¹¹ Effective Apr. 1, 1979 (78 percent of parity as of that date). ¹² Effective Apr. 1, 1980 (79 percent of parity as of that date). ¹³ Effective Oct. 21, 1981. ¹⁴ Effective Dec. 1, 1983. ¹⁵ Effective Apr. 1, 1985. ¹⁶ Effective July 1, 1985. ¹⁷ Effective Dec. 23, 1985. ¹⁸ Effective Dec. 28, 1983. ¹⁹ Effective Jan. 1, 1987. ²⁰ Effective Apr. 1, 1989. ²¹ Effective July 1, 1989. ²² Effective Jan. 1, 1990. ²³ Effective April 21, 1990.

Agricultural Stabilization and Conservation Service.

¹ Broilers are young chickens of the heavy breeds and other meat-type birds, to be marketed at 2-5 pounds live weight, and from which no pullets are kept for egg production. These figures are not included in farm production of chickens. ² Live weight equivalent price. ³ Includes value of consumption in households of producers, which is less than 1 percent of total production. ⁴ Preliminary.

National Agricultural Statistics Service.

National Agricultural Statistics Service.

CHAPTER IX

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm resources, farm income, and expenses. Many of the series are estimates developed in connection with economic research activities of the Department.

For convenience the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

- Economic trends, table 525.
- Farm property, table 526.
- Population and employment, table 539.
- Farm production and distribution, table 550.
- Price and income, table 560.
- Costs and expenses, table 572.

Table 525.—Economic trends: Data relating to agriculture, United States, 1977-91

Year	Prices paid by farmers		Prices received by farmers	Farm income			
	Total including interest, taxes, and wage rates	Production items		Gross farm income ¹	Production expenses	Net income	
						Current dollars	1987 dollars

¹ Total value of land and buildings is derived by multiplying average value per acre of farm real estate by the land in farms. Revised values for 1990-91.

Economic Research Service.

Table 534.—Land utilization, United States, selected years, 1930–87

Major land uses	1930	1940	1950	1959	1969	1978	1982	1987
	<i>Million acres</i>	<i>Million acres</i>	<i>Million acres</i>	<i>Million acres</i>	<i>Million acres</i>	<i>Million acres</i>	<i>Million acres</i>	<i>Million acres</i>
Cropland used for crops ¹	382	368	377	359	333	369	383	331
Idle cropland.....	31	31	32	33	51	26	21	68
Cropland used only for pasture.....	67	68	69	66	88	76	65	65
Grassland pasture ²	652	650	631	633	604	587	597	591
Forest land ³	601	608	601	728	723	703	655	648
Special uses ⁴				147	174			
Other land.....	171	179	194	305	291	503	544	562
Total land area ⁵	1,904	1,904	1,904	2,271	2,264	2,264	2,265	2,265

¹ Cropland harvested, crop failure, and cultivated summer fallow. ² Grassland and other nonforest pasture and range. ³ Excludes reserved and other forest land duplicated in parks and other special uses of land. Includes forested grazing land. ⁴ Includes urban and transportation areas. Federal and State areas used primarily for recreation and wildlife purposes, military areas, farmsteads and farm roads and lanes. ⁵ Remeasurement and increases in reservoirs account for changes in total land areas except for the major increase in 1959 when data for Alaska and Hawaii were added.

Economic Research Service. Estimates based on reports and records of the U.S. Department of Agriculture and Commerce, and public land administering and conservation agencies.

¹ Data as of December 31. Data are from Census of Agriculture. Interpolations between Census years have been discontinued. ² Includes wheel and crawler-type tractors. ³ Data for 1974 and after are for self-propelled combines only. ⁴ Includes corn pickers and picker shellers. ⁵ Does not include balers, producing bales weighing more than 200 pounds. ⁶ Data for 1978 and after do not include flail-type forage harvesters. ⁷ U.S. totals for 1978 are not directly comparable with totals for 1974 or earlier Census years, because they include State-level data from farm operators represented on the Census mailing list, plus estimates from the direct enumeration sample for farms not represented on the mailing list. As a result, figures for nearly all categories are somewhat higher than they would be using the earlier base. ⁸ Discontinued after 1974. ⁹ Discontinued after 1982. n.a. not available.

Economic Research Service.

¹ July figures. ² April-centered five quarter averages for 1976-79; annual averages of monthly data for later years. ³ Farm population is defined as all persons living on rural places of 10 or more acres with at least \$50 worth of agricultural products sold in reporting year, and rural places of under 10 acres if at least \$250 worth of agricultural products were sold. Last year of data was 1983. ⁴ Farm population is defined as all persons living on rural places with \$1,000 or more of agricultural sales in the reporting year reflected in figures for 1981 and later years.

¹ For 1975 through 1980, annual averages are the sum of regional and State averages of the quarterly Multiple Frame Labor Surveys which cover the weeks that include the twelfth of January, April, July, and October. The quarterly farm labor surveys were discontinued after April 1981. An annual survey was implemented in 1982 which surveyed establishments in July obtaining data for the week that included the 12th. Beginning in July 1984, three surveys a year were conducted in the 48 contiguous States and Hawaii. ² Includes farm operators doing 1 or more hours of farm work and other unpaid workers working 15 hours or more during the survey week without cash wages. ³ Includes all persons doing farm work for pay during the survey week. ⁴ Index is not seasonally adjusted. ⁵ Hawaii included in U.S. average beginning 1978.

National Agricultural Statistics Service.

Table 544.—Workers who did only hired farm work: Number of workers, average days worked and earnings received, United States, selected years 1975-88 ¹

¹ Data are obtained from persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year who did hired farm work at some time during the year. This series differs from the hired workers series shown in table 547 which estimates farm employment from a survey of farm operators. ² Beginning in 1977, the survey was conducted biennially. ³ Data series ends with 1987; the survey was discontinued.

Economic Research Service. Based on data from an enumerative sample survey made by the Bureau of the Census, U.S. Department of Commerce for the Economic Research Service.

¹ Corn for grain, oats, barley, and sorghum for grain. ² Wheat, rye, and rice. ³ Crop area included is for corn, sorghum, oats, barley, wheat, rice, soybeans, flaxseed, peanuts, sunflower, cotton, all hay, dry edible beans, potatoes, sweetpotatoes, tobacco, sugarcane, and sugarbeets; popcorn. Beginning 1986 also includes dry edible peas, Austrian winter peas and lentils. ⁴ Crop area included is as follows: Planted acres for corn, sorghum, oats, barley, durum and other spring wheat, rice, soybeans, flaxseed, peanuts, sunflower, cotton, dry edible beans, potatoes, sweetpotatoes, and sugarbeets; harvested acres for winter wheat, rye, all hay, tobacco and sugarcane; popcorn. Beginning 1986 also includes dry edible peas, Austrian winter peas and lentils. ⁵ Area for fresh market is area for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Area for processing is area harvested. ⁶ Includes the following fruits and nuts: Citrus fruits—oranges, tangerines, lemons, lemons, limes and tangelos (area is for the year of harvest); deciduous fruits—commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, bananas, nectarines, figs, kiwifruit (beginning 1980), olives, avocados, papayas, dates, persimmons (prior to 1978), pineapples and pomegranates; nuts—walnuts, almonds, filberts, macadamias, and pistachios (beginning 1977).

National Agricultural Statistics Service.

¹ Includes employee wages or salaries, and their health and welfare benefits. Also includes imputed earnings of proprietors, partners, and family workers not receiving stated remuneration. ² Includes depreciation, rent, advertising and promotion, interest, taxes, licenses, insurance, professional services, local for-hire transportation, food service in schools, colleges, hospitals, and other institutions, and miscellaneous items. ³ The marketing bill is the difference between the farm value or payments to farmers for foodstuffs and consumer expenditures for these foods both at foodstores and away from home eating places. Thus, it covers processing, wholesaling, transportation, and retailing costs and profits. ⁴ Preliminary.

Economic Research Service.

¹ The market basket consists of foods that mainly originate on U.S. farms bought in foodstores in a base period, currently 1982-84. ² Indexes of retail cost are components of the Consumer Price Index published by the Bureau of Labor Statistics. ³ Gross return or payment to farmers for the farm products equivalent to foods in the market basket. ⁴ The spread between the retail cost and farm value is an estimate of the gross margin received by marketing firms for assembling, processing, transporting, and distributing the products. ⁵ Preliminary.

Economic Research Service.

¹ Marketing year average prices for crops; weighted calendar year average for livestock and livestock products, except chickens, eggs, and hogs, which are on a Nov.-Dec. marketing year basis. Unless otherwise noted, these are averages for marketing season or calendar year computed by weighing State prices by quantities sold, or by production for those commodities for which virtually all the production is sold. ² Preliminary. ³ Parity prices are for January of the year shown as published in the January issue of Agricultural Prices. ⁴ Crop is sold during year following production. ⁵ Estimates discontinued. ⁶ Previous year. ⁷ Average local market price for wool sold excluding incentive payment. ⁸ Average local market price for mohair sold excluding incentive payment. Texas only prior to 1988. ⁹ Crop year begins with bloom in one year and ends with completion of harvest the following year. Prices refer to the year harvest begins. Thus the prices shown for 1988 relate to the citrus crop designated as 1988-89 in the production reports. ¹⁰ Equivalent packinghouse-door returns for California, Oregon (except peaches), Washington, and New York (apples only starting 1985), and prices as sold for other States. ¹¹ Equivalent returns at processing plant-door. ¹² Equivalent returns at packinghouse-door. ¹³ Equivalent per unit returns for bulk fruit at first delivery point. ¹⁴ Average price as sold. ¹⁵ FOB Shipping point. ¹⁶ Prices are in-shell basis except almonds which are shelled basis. ¹⁷ Includes some processing. ¹⁸ Simple average of States weighted by estimated Jan. 1 head for U.S. average. ¹⁹ Sold by farmers directly to consumers. n.a. not available.

National Agricultural Statistics Service.

¹ Fresh market for noncitrus, and fresh market and processing for citrus. ² Ratio of Index of Prices Received to the Parity Index; (Index of prices paid by farmers for commodities and services, interest, taxes, and farm wage rates). ³ Preliminary.

National Agricultural Statistics Service. These indexes are computed using the price estimates of averages for all classes and grades for individual commodities being sold in local farm markets. In computing the group indexes, prices of individual commodities have been weighted by average quantities sold during 1971-73. (See table 566 for data on 1977=100 basis.)

¹ Beginning 1977, based on Consumer Price Index-Urban of Bureau of Labor Statistics. ² Based on Consumer Price Indexes of Bureau of Labor Statistics. ³ Discontinued. ⁴ New index, values for years prior to 1973 are not available. ⁵ Simple average of seasonally adjusted quarterly indexes. ⁶ The index known as the Parity Index is the Index of Prices Paid by Farmers for Commodities and Services, Interest, Taxes, and Wage Rates expressed on the 1910-14=100 base.

National Agricultural Statistics Service.

Table 567.—Prices paid by farmers: Prices, by commodities, United States, 1987-91 ^{1 2}

Commodity and unit	1987	1988	1989	1990	1991
	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	
Building materials:					
Framing lumber, 2 by 4 inches, per 1,000 board feet:					
Pine, Standard and better.....	369.00	366.00	364.00	365.00	370.00
Fir, Standard and better.....	392.00	394.00	402.00	404.00	410.00
Boards, per 1,000 board feet:					
Rough, for farm fences and construction.....	499.00	511.00	520.00	537.00	550.00
Dressed, 1-inch, pine S4S, standard and better or No. 2 and better ³	674.00	702.00	722.00	726.00	742.00
Nails, 8d, common, per pound.....	.650	.660	.665	.686	.699
Roofing, galvanized steel, per 100 square feet.....	41.40	42.70	43.90	45.50	46.00
Shingles, fiberglass, per square.....	24.00	23.40	23.70	23.80	24.40
Insulating sheathing, (asphalt-treated) regular density, ½-inch, per sheet 4 feet by 8 feet.....	5.44	5.44	5.40	5.34	5.29
Concrete blocks, per 100.....	96.30	99.10	99.80	102.00	103.00
Portland cement, per 94 pounds.....	6.29	6.36	6.43	6.50	6.59
Paint, house, exterior, latex per gallon ⁴	15.80	16.00	16.40	16.80	17.30
Barbed wire, 2-point, per 80-rod spool.....	33.70	33.80	34.20	35.00	35.60
Barbed wire, 4-point, per 80-rod spool.....	36.60	36.90	37.50	37.60	38.50
Posts, wood, farm line fence, each.....	3.48	3.57	3.60	3.61	3.65
Posts, steel, each.....	2.50	2.46	2.57	2.65	2.64
Staples, fence, per pound.....	.716	.727	.744	.760	.782
Woven wire fencing, 32-inch, per 20-rod roll.....	72.20	71.60	73.00	74.50	75.30
Iron pipe, galvanized, 1¼-inch, I.D., per foot.....	1.98	2.03	2.08	2.18	2.23
Plastic tubing, 1-inch, I.D., per foot.....	.262	.316	.315	.295	.291
Fuels and energy:					
Fuel, per gallon:					
Diesel fuel.....	.711	.729	.761	.944	.872
Gasoline, service station, unleaded regular.....	.940	.941	1.04	1.15	1.17
Gasoline, bulk delivery, leaded regular.....	.919	.927	1.05	1.17	1.19
L. P. gas, bulk delivery.....	.592	.586	.583	.832	.750
Electricity, per kilowatt hour.....	(¹⁶)	(¹⁶)	(¹⁶)	(¹⁶)	(¹⁶)
Motor supplies:					
Grease, 35 lb. pail.....	31.60	31.60	32.10	33.60	35.90
Motor oil, per gallon:					
All weather, high detergent.....	4.83	4.86	4.96	5.07	5.36
Heavy duty, detergent.....	4.63	4.65	4.73	4.83	5.15
Regular, nondetergent.....	4.33	4.33	4.43	4.55	4.84
Spark plugs, each.....	1.77	1.80	1.87	1.97	2.00
Storage batteries, CPR 220-310 amps, each.....	47.80	49.00	48.80	49.20	49.80
Tires:					
Auto tires, bias-belted const., E78-14, tubeless each ⁵	41.50	41.60	43.20	44.30	45.50
Auto tires, radial, steel-belted, P/195/75R14/ER78-14 tubeless, each ⁶	54.20	53.40	54.30	54.40	54.90
Truck tires, 10.00-20, load range F, each.....	201.00	200.00	208.00	211.00	214.00
Tractor tires, rear, 15.5-38, 6-ply, each.....	280.00	288.00	303.00	310.00	321.00
Tractor tires, rear, 18.4-34, 6-ply, each.....	398.00	404.00	430.00	443.00	454.00
New motor vehicles:					
Autos, 4-door sedans:					
Compact ⁷	9,750.00	9,970.00	10,200.00	10,600.00	11,100.00
Intermediate size ⁸	12,300.00	12,800.00	13,400.00	14,000.00	14,600.00
Standard ⁹	15,100.00	15,800.00	16,800.00	18,000.00	19,300.00
New trucks:					
2-ton, cab and chassis, each ¹⁰	20,400.00	20,200.00	20,500.00	20,400.00	21,700.00
¾-ton pickup ¹¹	12,400.00	12,900.00	13,500.00	14,300.00	15,400.00
Tractors:					
2-wheel, 30-39 P.T.O. or belt horsepower.....	11,100.00	11,450.00	12,100.00	12,600.00	13,000.00
2-wheel, 50-59 P.T.O. or belt horsepower.....	16,600.00	17,000.00	17,400.00	17,700.00	18,500.00
2-wheel, 110-129 P.T.O. or belt horsepower.....	38,900.00	40,100.00	45,100.00	45,400.00	47,000.00
4-wheel, 170-240 P.T.O. or belt horsepower.....	74,700.00	75,800.00	78,900.00	78,200.00	81,100.00

See footnotes at end of table.

Table 567.—Prices paid by farmers: Prices, by commodities, United States, 1987-91 ^{1 2}—
Continued

Commodity and unit	1987	1988	1989	1990	1991
	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>
Farm machinery:					
Plows, moldboard, 3-bottom, each.....	2,610.00	2,750.00	3,080.00	3,240.00	3,320.00
Plows, moldboard, 5-bottom, each.....	6,590.00	7,180.00	7,640.00	8,200.00	8,460.00
Plows, moldboard, 7-bottom, each.....	9,750.00	10,200.00	10,900.00	11,900.00	12,500.00
Disk harrows, tandem, 16-ft., each.....	7,600.00	8,010.00	8,730.00	9,140.00	9,330.00
Disk harrows, tandem, 19-ft., each.....	9,800.00	10,500.00	11,600.00	11,900.00	12,400.00
Cultivators, 4-row, front or rear mounted, each.....	2,510.00	2,750.00	2,960.00	3,070.00	3,210.00
Corn planters, 4-row, plain, each.....	7,390.00	7,960.00	8,310.00	8,720.00	9,140.00
Grain drills, tractor-drawn, 16-tube, plain, each.....	5,750.00	5,990.00	6,260.00	6,470.00	6,800.00
Grain drills, tractor-drawn, 13-tube, with fertilizer attachment, each.....	5,730.00	6,030.00	6,120.00	6,880.00	7,240.00
Mowers, tractor, 7-ft., each.....	2,640.00	2,800.00	3,010.00	3,170.00	3,320.00
Pick-up balers, automatic tie, P.T.O., each ^{1 2}	9,840.00	10,300.00	10,700.00	11,000.00	11,600.00
Combines, self-propelled:					
Medium capacity, each.....	63,500.00	67,000.00	76,600.00	80,200.00	85,600.00
Large capacity, each.....	83,800.00	87,700.00	93,700.00	101,100.00	10,600.00
Corn picker-huskers, 2-row, each.....	13,400.00	12,900.00	13,400.00	13,000.00	12,600.00
Farm wagons, without box and tires, each.....	1,070.00	1,140.00	1,190.00	1,230.00	1,270.00
Power sprayers, boom type, tr. mtd., each.....	2,270.00	2,520.00	2,720.00	2,750.00	2,800.00
Farm supplies:					
Electric motors, 1/2-horsepower, each.....	82.90	80.50	82.80	85.90	87.40
Hammers, nail, 16 oz. head, with handle, each.....	12.50	12.40	13.00	13.30	13.40
Pitchfork, 4-tine, each.....	20.20	20.60	22.30	22.30	23.00
Hoes, 6-inch blade, each ^{1 3}	10.30	10.50	10.80	11.00	11.30
Metal pails, 12 quarts, each ^{1 4}	5.75	5.74	5.85	6.23	6.45
Rope, polypropylene, 1/2-inch, per 100 feet ^{1 5}	20.40	20.40	20.80	21.50	21.90
Baler twine, per 40-pound bale.....	18.40	19.90	21.70	23.40	24.20
New baskets, round stave, bushel, with cover, per dozen.....	(16)	(16)	(16)	(16)	(16)
Farm services:					
Telephone, per month.....	(16)	(16)	(16)	(16)	(16)
Fertilizer:					
Mixed fertilizer:					
0-20-20, per ton.....	156.00	177.00	179.00	175.00	177.00
3-9-9, per ton.....	159.00	158.00	156.00	153.00	164.00
4-8-12, per ton.....	158.00	165.00	173.00	173.00	182.00
5-10-10, per ton.....	128.00	138.00	144.00	143.00	147.00
5-10-15, per ton.....	139.00	150.00	153.00	150.00	150.00
5-20-20, per ton.....	158.00	176.00	182.00	175.00	177.00
6-24-24, per ton.....	177.00	202.00	210.00	198.00	204.00
10-10-10, per ton.....	142.00	151.00	162.00	159.00	161.00
12-12-12, per ton.....	170.00	178.00	184.00	181.00	189.00
16-20-0, ammonium phosphate, per ton.....	207.00	215.00	222.00	220.00	220.00
18-46-0, per ton.....	219.00	245.00	244.00	221.00	232.00
Nitrate of soda, per ton.....	203.00	204.00	207.00	214.00	192.00
Sulphate of ammonia, per ton.....	145.00	142.00	152.00	154.00	152.00
Ammonium nitrate, per ton.....	158.00	164.00	182.00	180.00	183.00
Superphosphate, 44-46% P ₂ O ₅ , per ton.....	194.00	218.00	221.00	203.00	213.00
Muriate of potash, 60% K ₂ O, per ton.....	118.00	152.00	159.00	153.00	153.00
Agricultural limestone, spread on field, per ton.....	16.50	16.30	15.90	16.40	17.60
Livestock:					
Feeders and stockers:					
Cattle and calves, per 100 pounds.....	70.40	78.00	79.20	84.90	86.80
Pigs (40-60 lbs. av.), per 100 pounds.....	104.00	77.00	69.80	109.00	99.90
Broiler chicks, per 100.....	18.40	17.00	17.40	18.40	17.80
Egg-type chicks, per 100.....	51.10	50.70	50.40	50.80	51.10

¹ National averages during the marketing years for the individual crops, beginning in the years shown.
² Support level represents the average loan rate plus any direct price-support payment (or in the case of wheat the value of the domestic marketing certificate) received by participants in the program for the commodity. The basis of such payments varies among the crops and from year to year. ³ Support level for 1975 through 1987 represents the statutory established price (the so-called target price) except for extra-long staple cotton which began in 1984.
⁴ Commodities grouped under "Mandatory" are those which the Commodity Credit Corporation is required by law to support. ⁵ 1½¢ strict low middling, micronaire 3.5 through 4.9.

⁶ For quota portion of crop. ⁷ Target level for wheat planted within allotment was \$2.90; target level of \$2.47 for unplanted allotment acreage. ⁸ Grade No. 2 or better except for oats which is Grade No. 3. Oats target or price support level began in 1982. ⁹ No support program. ¹⁰ For ginners purchases from producers, basis Grade 100, plus appropriate differentials to reflect ginners' normal handling costs. ¹¹ Beginning 1982 Fire cured types 22-23. ¹² Loan rate was reduced from 63 to 61 cents per pound on December 23, 1987, because of the Omnibus Budget Reconciliation Act of 1987. n.a. not available. ¹³ Includes flaxseed, sunflower seed (oil and other), safflower, rapeseed (industrial) canola and mustard seed.

¹ Includes bulbs, plants, and trees. ² For farm business use only. ³ Estimated outlay necessary, at current prices, for the replacement of capital equipment that has been used up during the year. ⁴ Includes contract labor expenses and hired labor cash wages, perquisites, and Social Security taxes paid by employers. ⁵ Includes taxes levied against farm real estate and farm personal property. ⁶ Interest charges payable during the calendar year on outstanding farm-mortgage debt. ⁷ Different data sources were used for the three time periods 1973 and previous years, 1979-1982, and 1983 and after. Estimates are not strictly compatible among the three periods. ⁸ For 1978 and later years, includes interest on nonreal estate debt; electricity; repairs and maintenance of farm buildings, land improvements, motor vehicles, and other farm machinery; machine hire and customwork; marketing, storage and transportation of all commodities; other miscellaneous livestock purchases; livestock rental fees; health and breeding services and supplies, custom feeding and grazing; irrigation water and dairy assessment fees; farm supplies; tools and shop equipment; net insurance; uninsured damages paid; motor vehicle registration and licensing fees; and other management expenses. Prior to 1978, includes interest on nonreal estate debt; electricity; repairs and maintenance of farm buildings, land improvements, motor vehicles, and other farm machinery; machine hire and custom work; fruit and vegetable containers; cotton ginning; livestock marketing; milk hauling; binding materials; dairy supplies; net Federal Crop Insurance Corporation payments; other net insurance; greenhouse and nursery; grazing; harness and saddlery; small hand tools; telephones; veterinarian fees; motor vehicle registration and licensing fees; and other miscellaneous expenses. Estimates are not compatible between the two periods.

Economic Research Service.

¹ The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together; all such persons are considered as members of the same family. Thus, if the son of the head of the household and son's wife are in the household, they are treated as part of the head's family. Total money income includes net income from farm and nonfarm self-employment, wages and salaries, dividends and interest, Social Security and other pensions, and welfare. ² Number of families residing on farms. The term "farm" is the same as that used in the 1960 and 1970 censuses. Farm was defined as a place in rural territory, from which sales of farm products for the preceding year amounted to at least \$50 for 10 or more acres, or at least \$250 for less than 10 acres.

³ Number of families residing on farms. The term "farm" is the same used in the 1980 census. Farm is defined as a place in rural territory with \$1000 or more in the sales of crops, livestock or other farm products during the preceding year. ⁴ Data not available from the Bureau of the Census.

Economic Research Service. Estimates are from Current Population Survey data. Bureau of the Census.

CHAPTER X

TAXES, INSURANCE, CREDIT, AND COOPERATIVES

The statistics in this chapter deal with taxes, insurance, agricultural credit, and farm cooperatives. Some of the series were developed in connection with research activities of the Department, while others, such as data from agricultural credit agencies, are primarily records of operations.

¹ Data for 1991 are preliminary. ² Number of farms on which the insured crop was planted including duplication where both the landlord and tenant are insured. Insured farms on which no insured crop was planted are not included. ³ The insured's share of the planted area on the farm. ⁴ Less than 500. ⁵ Thousands of tons insured for raisins (not included in total of all commodities). n.a. not available. ⁶ The nursery is available in all states and counties except Alaska and Hawaii. The county count does not include Nursery.

Federal Crop Insurance Corporation.

¹ Includes operator households. ² Loans to and discounts for livestock loan companies and agricultural credit corporations; after 1987, included with Production Credit Association loans. ³ Although price-support loans of the Commodity Credit Corporation (CCC) are nonrecourse loans, they are treated as income in the year received. They are not considered farm debt even though borrowers must either pay them or deliver the commodities on which they are based. ⁴ Preliminary. n.a. not available.
 Economic Research Service.

¹ Reports of cooperatives are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following year, with limited exceptions. Reports of cooperatives are included for the calendar year beginning 1978. ² Includes independent local cooperatives, centralized cooperatives, federations of cooperatives and cooperatives with mixed organizational structures. Cooperatives are classified according to their major activity. If, for example, more than 50 percent of a cooperative's business is derived from marketing activities, it is included as a marketing cooperative. ³ Includes cooperatives whose major activity is providing services related to marketing and farm supply activities. ⁴ Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (Some duplication exists because some farmers belong to more than one cooperative.) ⁵ Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities. ⁶ Estimated. ⁷ Number of memberships was up significantly due to inclusion of additional related service cooperatives. ⁸ Revised. ⁹ Increased number due to a reclassification of cotton ginning cooperatives from marketing to related services. ¹⁰ Preliminary. ¹¹ Estimated gross business includes all business reported between cooperatives, such as the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local cooperatives. ¹² Estimated net business represents the value at the first level at which cooperatives transact business for farmers. Figures are adjusted for duplication resulting from intercooperative business.

Agricultural Cooperative Service. Based on records from cooperatives reporting to the Service.

¹ State total represents data for borrowers incorporated within the State. ² Includes loans obtained by REA borrowers' affiliates specifically organized to facilitate non-REA financing. ³ Totals for other types of borrowers are as follows: Public Power Districts, 54 borrowers, \$521,311,509; municipalities and other Government authorities, 36 borrowers, \$494,333,334; power companies, 26 borrowers, \$33,955,037. ⁴ Includes \$31,221,004,249, REA guarantee commitments made as of Jan. 1, 1992. ⁵ Funds loaned to corporate borrowers for relending to individuals. Includes wiring, plumbing, and refrigeration installations. ⁶ Includes miles energized and consumers served, shown in tables 595 and 596.

Rural Electrification Administration.

¹ State totals represent data for borrowers incorporated within the State. ² Actual funds advanced out of REA loans approved, as shown in table 594. ³ Cumulative. ⁴ Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Jan. 1, 1992, there were 116 such borrowers with 135,207 miles energized and 724,271 consumers served. ⁵ Includes 169,657,436 thousands of Kw.-hr. sold by one REA borrower to another. ⁶ Excludes energy sales and revenues of power sold by one REA borrower to another. ⁷ Includes rural nonfarm and farm consumers.

¹ Includes loans made directly by FmHA and those guaranteed by the Agency. Amounts of loans made represent obligations and include loans to new borrowers and subsequent loans to borrowers who received an initial loan in a prior year. Amounts outstanding are loan advances less principal repayments for loans made directly by the Agency.

² Recreation association loans are made only to subsequent borrowers who received an initial loan in a prior year.

³ Funding for this program is no longer available.

⁴ Latest data available as of September 30, 1978.

⁵ Discontinued.

CHAPTER XI

STABILIZATION AND PRICE-SUPPORT PROGRAMS

The statistics in this chapter relate to activities of the Commodity Credit Corporation, cropland diversion and production adjustment programs, and marketing agreement and order programs for fruits and vegetables. Statistics for Federal Milk Marketing Order programs are contained in chapter VIII.

Table 604.—Commodity Credit Corporation: Price support granted on 1989 crop, United States and Territories ¹

¹ Loans made directly by Commodity Credit Corporation. As far as possible, loans have been distributed according to the location of producers receiving the loans. Direct loans to cooperative associations for the benefit of members have been distributed according to the location of the association. ² Includes storage facility loans and distress loans.

Spearmint oil (1991 season) ²	280	30,086
Total (45 programs) ³		5,336,996

¹ Marketing agreement only; covers States of Alabama, Florida, Georgia, Mississippi, South Carolina, Arizona, Arkansas, California, Louisiana, New Mexico, Oklahoma, Texas, Missouri, North Carolina, Tennessee, and Virginia.

² Marketing order regulating the handling of spearmint oil produced in the states of Washington, Idaho, Montana, Nevada, Utah, Oregon, and California. Farm value represents a two State value for Idaho and Washington.

³ Total not shown because of duplication by producers growing more than one commodity.

Agricultural Marketing Service.

CHAPTER XII

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various natural resources, particularly soil, water, timber, wetlands, wildlife, and improvement of water quality. Forestry statistics include area of private and public-owned forest land, timber production, imports and exports, pulpwood consumption and paper and board production, area burned over by forest fires, livestock grazing, and recreational use of national forest lands.

¹ CRP is a voluntary long-term cropland retirement program established in Title XII of the Food Security Act of 1985 (P.L. 99-198). USDA pays CRP participants an annual per-acre rent and half the cost of establishing a permanent land cover in exchange for retiring highly erodible cropland for 10 years. ² Erosion reduction equals erosion rate before implementation of conservation practice minus erosion rate after implementation.

Note: Total acres enrolled may not add due to rounding.

¹ Data may not add to totals because of rounding. ² Forest land is land at least 10 percent stocked by forest trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated. Forest land includes transition zones, such as areas between heavily forested and nonforested lands that are at least 10 percent stocked with forest trees, and forest areas adjacent to urban and built-up lands. Also included are pinyon-juniper and chaparral areas in the West and afforested areas. The minimum area for classification of forest land is 1 acre. Roadside, streamside, and shelterbelt strips of timber must have a crown width at least 120 feet wide to qualify as forest land. Unimproved roads and trails, streams, and clearings in forest areas are classified as forest if less than 120 feet in width. ³ Timberland is forest land which is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as timberland have the capability of producing in excess of 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included. ⁴ Includes Indian lands. ⁵ Includes Alaska. ⁶ Includes Hawaii.

¹ Data may not add to totals because of rounding. ² Live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0-inches diameter or larger at 4½ feet above ground.

³ Live trees of commercial species containing at least one 12-foot sawlog or two noncontiguous 8-foot logs, and meeting regional specifications for freedom from defect. Softwood trees must be at least 9.0-inches diameter and hardwood trees must be at least 11.0-inches diameter at 4½ feet above ground. ⁴ Includes Alaska. ⁵ Includes Hawaii.

Forest Service.

¹ Data may not add to totals because of rounding. ² Includes live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0-inches diameter or larger at 4½ feet above ground. ³ Includes salvable dead trees, rough and rotten trees, trees of noncommercial species, trees less than 5.0-inches diameter at 4½ feet above ground, tops, and roundwood harvested from nonforest land (for example, fence rows). ⁴ Includes such items as cooperage, pilings, poles, posts, shakes, shingles, board mills, charcoal and export logs. ⁵ Downed and dead wood volume left on the ground after trees have been cut on timberland. ⁶ Growing stock volume cut or knocked down during harvest but left at the harvest site. ⁷ Wood volume other than growing stock left on the ground after harvest, cultural operations, or timberland clearing. This volume is net of wet rot or advanced dry rot, and excludes old punky logs; consists of material sound enough to chip; includes downed dead and cull trees, tops above the 4-inch growing stock top, and trees smaller than 5 inches diameter at 4½ feet above ground; excludes stumps and limbs. ⁸ Unutilized wood volume from cut or otherwise killed growing stock, from nongrowing stock sources on timberland (for example, precommercial thinnings), or from timberland clearing. Does not include volume removed from inventory through reclassification of timberland to reserved timberland. ⁹ Growing stock volume removed by cultural operations or timberland clearing.

Forest Service.

¹ Data may not add to totals because of rounding. ² The net increase in the volume of trees during a specified year. Components include the increment in net volume of trees at the beginning of the specific year surviving to its end, plus the net volume of trees reaching the minimum size class during the year, minus the volume of trees that died during the year, and minus the net volume of trees that became cull trees during the year. ³ The net volume of trees removed from the inventory during a specified year by harvesting, cultural operations such as timber stand improvement, or land clearing. ⁴ The volume of sound wood in trees that died from natural causes during a specified year. ⁵ Includes Alaska. ⁶ Includes Hawaii. ⁷ Excludes hardwood growth on National Forest land in California.

Forest Service.

¹ National Forest System acreage.—A nationally significant system of Federally owned units of forest, range, and related land consisting of national forests, purchase units, national grasslands, land utilization project areas, experimental forest areas, experimental range areas, designated experimental areas, other land areas, water areas, and interests in lands that are administered by USDA Forest Service or designated for administration through the Forest Service.

National forests.—Units formally established and permanently set aside and reserved for national forest purposes. Purchase units.—Units designated by the Secretary of Agriculture or previously approved by the National Forest Reservation Commission for purposes of Weeks Law Acquisition.

National grasslands.—Units designated "National grasslands" by the Secretary of Agriculture and permanently held by the Department of Agriculture under Title III of the Bankhead-Jones Farm Tenant Act.

Land utilization projects.—Units designated by the Secretary of Agriculture for conservation and utilization under Title III of the Bankhead-Jones Farm Tenant Act.

Research and experimental areas.—Units reserved and dedicated by the Secretary of Agriculture for forest or range research and experimentation.

Other areas.—Units administered by the Forest Service that are not included in the above groups. ² Other acreage.—Lands within the unit boundaries in private, State, county, and municipal ownership and Federal lands over which the Forest Service has no jurisdiction. Areas of such lands which have been offered to the United States and have been approved for acquisition and subsequent Forest Service administration, but to which title had not yet been accepted by the United States. ³ Less than 500 acres.

Forest Service.

¹ Fiscal years Oct. 1-Sept. 30. ² Payments under the acts of May 23, 1908 (as amended), July 24, 1956, and Oct. 22, 1976, are 25 percent of total receipts remaining after deducting (a) payments to Arizona and New Mexico on account school section lands administered by Forest Service, (b) appropriations of receipts under laws authorizing such appropriations for acquisition of lands in specified national forests or portions thereof, and (c) receipts from an area of the Superior National Forest, Minnesota, on account of which the State (for the counties) is paid 0.75 percent of the appraised valuation in lieu of 25 percent of the receipts. Payments made in the following year. ³ Less than \$500. Forest Service.

¹ Western Washington and western Oregon. ² Southern region. ³ Pacific Southwest region. Includes Jeffrey pine. Prior to 1979, California region. ⁴ Pacific Northwest region. ⁵ Eastern and Southern regions. ⁶ Eastern region.

Forest Service. Forest Service National Forest prices in this table are for timber sold on a Scribner Decimal C log rule basis, except in the Northeastern States where International 1/4-inch log rule is used. Prices include KV payments; exclude timber sold by land exchanges and from land utilization project lands. Data for the years 1977-83 are statistical high bid prices; beginning in 1984, data are high bid prices which include specified road costs.

¹ Recreational use of national forest land and water that aggregates 12 visitor-hours. This may entail one person for 12 hours, 12 persons for 1 hour, or any equivalent combination of individual or group use, either continuous or intermittent. Fiscal years Oct. 1-Sept. 30. ² Includes team sports, gathering forest products, attending talks and programs, and other uses. ³ Data may not add to total because of rounding.

CHAPTER XIII

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities for food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income.

¹ Computed by Human Nutrition Information Service (HNIS), USDA. Based on Economic Research Service estimates of per capita quantities of food available for consumption (retail weight) and on HNIS estimates of quantities of produce from home gardens and certain other foods. No deduction is made in food supply estimates for loss of food or nutrients in further processing, in marketing, or in the home. Data include iron, thiamin, riboflavin, niacin, vitamin A, vitamin B₆, vitamin B₁₂, and ascorbic acid added by enrichment and fortification.

Human Nutrition Information Service.

51 years and over.....	21.00	25.60	31.60	37.70

¹ Estimates for the thrifty food plan were computed from quantities of foods published in *Family Economics Review* (1984 No. 1). Estimates for the other plans were computed from quantities of foods published in *Family Economics Review* (1983 No. 2). The costs of the food plans are estimated by updating prices paid by households surveyed in 1977-78 in USDA's Nationwide Food Consumption Survey. These prices were adjusted to current levels by using food price information released periodically by the Bureau of Labor Statistics. ² Ten percent added for family size adjustment. (See footnote 3.) ³ The costs given are for individuals in 4-person families. For individuals in other size families, the following adjustments are suggested: 1-person—add 20 percent; 2-persons—add 10 percent; 3-persons—add 5 percent; 5- or 6-persons—subtract 5 percent; 7-or-more-persons—subtract 10 percent.

Human Nutrition Information Service.

1990.....	20,086	14,205,294	15,509,537	58.93
1991 ⁵	22,625	17,338,720	18,768,354	63.86

¹ Data for fiscal years July 1 to June 30 for 1976; October 1 to September 30 beginning 1977. ² Prior to elimination of the purchase requirement in January 1979, Federal benefits were often referred to as "bonus dollars". Current publications frequently refer to benefits as the "value of issuance". ³ The total cost includes matching funds for state administrative expenses (e.g., certification of households, quality control, anti-fraud activities); other program costs (e.g., printing and processing of stamps, the bank monitoring system, computer support systems); and transfers to other Federal agencies to offset their expenses in auditing or investigating the program (e.g., Office of the Inspector General). ⁴ Omits Puerto Rico beginning July 1, 1982 when their nutrition assistance program began. ⁵ Preliminary.

CHAPTER XIV

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; statistics on fishery products; tables on refrigerated warehouses; and statistics on crops in Alaska.

Foreign Agricultural Trade Statistics

U.S. foreign agricultural trade statistics are based on documents filed by exporters and compiled by the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as fibers, raw hides and skins, fats and oils, beer, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in transit through the United States from one foreign country to another when documented as such by U.S. Customs authorities.

The export statistics also exclude shipments to the U.S. Armed Forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 (\$100 prior to October 1969) are not compiled by commodity and are excluded from agricultural statistics but are reflected in shipments under Public Law 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under the Foreign Assistance Act of 1961, as amended; and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by the U.S. Department of Agriculture from data obtained from operating agencies.

The export value, the value of the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form. Since substantial amounts of agricultural commodities such as wheat, corn, and soybeans are transhipped through the Netherlands, West Germany, and Belgium, exports of those countries are overstated. Exports to final destinations including the United Kingdom, France, Spain, East Germany, and other countries are understated. Except for Canada, export shipments valued \$251-\$999 (\$100-\$499 prior to October 1969) are included on the basis of sampling estimates; shipments to Canada valued \$251-\$1,999 (\$100-\$1,999 prior to October 1969) are sampled. Prior to January 1, 1973, shipments of grains and oilseeds to Canada were greatly overstated because of transshipments. After January 1, 1973, shipments to Canada of wheat, rye, barley, oats, corn, soybeans, and flaxseed from certain U.S. ports to certain Canadian ports were designated as exports to "unidentified countries."

Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. Where the country of origin is not known, the imports are credited to the country of shipment. Low-valued shipments under \$251 are reflected in nonagricultural and overall import totals.

¹ Oct. 1-Sept. 30 for 1977-1991. ² Includes food exported for relief or charity by individuals and private agencies. ³ Competitive agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such U.S. commodities. Noncompetitive agricultural imports include all others, about 90 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and vegetable fibers. ⁴ Preliminary. Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

1991 ⁵	129	131	126	153	139	130	151	206	322	162	34	150

¹ Fiscal years Oct. 1-Sept. 30 for 1979-91. ² Based on 86 percent of total value of U.S. agricultural imports in 1977. ³ Competitive agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such U.S. commodities. Non-competitive agricultural imports include all others, about 90 percent of which consist of rubber, coffee, tea, cacao beans, raw silk, wool for carpets, bananas, spices, and vegetable fibers. ⁴ Included in "Animals and animal products." ⁵ Preliminary.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Fiscal years, Oct. 1-Sept. 30. ² Preliminary. ³ Competitive agricultural import products consists of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such U.S. commodities. Noncompetitive agricultural products include all others, about 90 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, spices, and vegetable fibers.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

Table 685.—Agricultural exports: Value of U.S. exports to the European Community, by commodity, fiscal years 1989/90 and 1990/91 ¹

Commodity	Value		Commodity	Value	
	1989/90	1990/91 ²		1989/90	1990/91 ²
	1,000 dollars	1,000 dollars		1,000 dollars	1,000 dollars
Total agricultural exports	6,815,440	6,775,654	Nonvariable levy commodities—Continued		
Variable-levy commodities	775,892	789,692	Fruits, fresh, noncitrus	66,561	83,450
Beef and veal	9,742	7,280	Apples, fresh	17,629	26,622
Pork	1,632	2,260	Grapes, fresh	10,525	15,086
Other meats—fresh or prepared	4,695	2,764	Other noncitrus, fresh	38,406	41,742
Poultry—live	8,312	8,290	Fruits, dried	140,853	156,935
Baby chicks	7,880	8,095	Raisins, dried	89,462	80,965

¹ Fiscal years Oct. 1-Sept. 30. ² Competitive agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all agricultural products interchangeable to any significant extent with such U.S. commodities. Noncompetitive agricultural products include all others, about 90 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, spices, and vegetable fibers. ³ Beginning January 1, 1984 includes Canary Islands. ⁴ Totals may not add due to rounding.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.
