⁽o) RESULTS: (For all hits claimed on ship targets and for land targets of special interest, draw diagram, top or side view or both, as appropriate, showing type and location of hits. For all targets give location and effect of hits, and identify by numbers above. Use additional sheets if necessary).

- 1. All of the bombs and rockets hit in the immediate area where the command post was thought to be, but no buildings could be seen from the air and the extent of the demage could not be observed. To fires resulted.
- 2. Two buildings burned and three small buildings were blown to bite by the bomb explosions. Many other buildings mostly small thatched roof houses, were damaged by hits or mear misses but the extent of the damage could not be observed.
- 3. Three buildings about 20 ft. by 40 ft. and one long shed were totally destroyed. He fires resulted, apparently because the force of the bomb explosion completely demolished the buildings.
- 4. The bombs did not hit directly in the caves, but hit the face of the cliff where the eaves were. The demage to the ceres could not be observed.

3 VF from VC-95 and 3 VT from VC-35 launched as one group to furnish direct aircraft support of the 19th Army's renewed assault on the Japa entremehed in strong defensive positions on southern Okinawa.

The weather was far from ideal for direct aircraft support. Los hanging clouds which at 1000 to 1500 ft. covered about 3/10ths of the area made coordinated attacks impossible. In addition, the air was hazy and this was aggravated by a thick pall of amoke resulting from intensive air and artillary beabardment. This was especially bad immediately in front of our front lines where visibility was senetimes reduced to a mile.

This support group was directed to locate and destroy an enemy command post thought to be in area 8364. It. PARKER, leader of the group, circled less over the area but could not locate the command post. Realizing that a coordinated attack could not be made because of the low clouds and poor visibility, he secured permission for each plane to attack targets of opportunity in the general area. Later, in making his own attack, it. PARKER spotted a ridge which locked like an ideal location for the command post, and he peppered the spot with bomb and rocket hits. Other planes hit buildings hidden in small ravines and buildings in hearby villages with good effect. One plane spotted some caves which might very well have concealed gum positions and hit the cliff just above the cave entrances, with 10 - 100 lb. bombs.

Piloto: Licut. E. A. PARKER, Jr.; Licuts.(jg) V. M. SCHUHART, C. H. BOHEH, H. BOTHAN, D. O. HANCOCK, Ensigns R. FORZHAND, C. H. BUNGH, G. H. ROBERTS.
