10	If yes, please write the reason for previous response.	-	I like the evaluation in the class.	1) Search will probably waiting for me in the future a few more times 2) Maybe I will edit in the future again.	-	I disagree with the wiki as a credible source, so I will not come right, that we participate in something they do not acknowledge. But on the other hand, I understand that there might be organizationally challenging task to create two alternatives.	-	-	-	Writing the article in Wikipedia was my first encounter with the writing of text as search. This will help me in developing a more complex task and help in writing of bachelors work.	-	-	I recommend pre-set minimum number of pages of text in MS.	-	-	Finally we had to do something with self-preparation, it seems to me is the most effective way of learning. The fact that the results of our work are publicly available and perhaps beneficial, it is excellent motivation (as opposed to the establishment of seminary educators work to his file).	This task came to me about beneficial in all directions. Personally I felt that I was doing something useful and not just for themselves. At the same time appreciate the fact that here you could choose a location which is very close to me and learned about it a lot of new. With that, the article is public, so it forced me to be really good as possible.	
11	Should teachers change the structure of this exercise? At the same time they can leave here any message:	It's good, the tasks are working much better when one knows that they have a benefit to someone else. I appreciate also that I learned to edit the wiki and in the future I would like to add some more articles.	Finally, I found that I was doing something with ecology and environmental protection. Publishing work on the wiki pleases me, since the end of this work is not a teacher's desk.	I liked it. I would like to write more seminar papers as a contribution to Wikipedia.	-	-	-	-	-	-	No	-	Otherwise, I will come useful publication on the wiki, at least it lie not somewhere in a drawer as other essay.	-	No	The only criticism I had to failure 10 minutes presentation, teachers can be strict in this regard.	Working with Wikipedia has been beneficial in that direction, that one realizes how much work it is worth (well) processed articles. Certainly it would be nice if the project collaborated with other classes.
