DECLASSIFIED E.O. 12065 SECTION 3-402/NMDC NO. 17-0-1-9

TUBERCULOSIS CONTROL --BED SURVEY

I. a. Name of institution: TB beds in institutions of under 50 beds.

b. Location of institution (city, town and gun): Kumamoto Ken

c. Type (Prefectural, private, etc): Private

d. Total bed capacity (actual physical capacity): 205

e. Total bed occupancy (average): 108

f. TB bed capacity: 83

g. TB bed occupancy (average): 52

h. Total number of full-time doctors: 14

i. Total number of full-time doctors for TB: 6

j. Total number of full-time nurses (including students): 30

k. Total number of full-time nurses for TB: 12

l. Daily average number of all out patients: 298

m. Daily average number of TB out patients: 51

n. Reasons for any large discrepancy in f and g above: None

II. a. Total number of available TB beds in the prefecture: 1,361

b. Total number of hospitalized TB patients in the prefecture: 1,148

c. Estimated number of patients not under any care who should be hospitalized: approximately 3,500

d. A brief analysis of the reasons for the discrepancies between a and c and d considering such factors as the attitudes of patients, the attitudes of public health officials, the availability of food and welfare funds in the hospitals, etc., will be made: Patients fear of hospitalization is that there is no chance of recovery due to lack of public health education. National sanatoriums receives special rations for in-patients. Welfare situation are being taken care by area Minsei Iin representatives who visits hospitals and patients.

APO 24 Unit 5
21 March 1949

SUBJECT: Patients Associations in National Hospitals and Sanatoria

TO : Commanding General, I Corps, APO 301
Attn: Public Health Section

1. References:

a. Ltr, I Corps, AG 319.1 - BA, subject, "Studies of Military Government Programs", dated 10 February 1949.

b. Ltr, I Corps, PH, subject, "Studies of Military Government Programs", dated 12 February 1949.

c. Special Report, Kyushu Region, 48/PH/A/#1, subject, "Patients Associations in National Hospitals and Sanatoria", dated 28 October 1948.

d. Ltr, Saga Military Government Team, subject, "Patients Unions", dated 15 November 1948, with 1st indorsement KSMG to I Corps on 16 November 1948.

2. This report is submitted in compliance with reference 1a above.

3. A comprehensive report, reference 1c, on the activities of Patients Associations has been submitted to higher headquarters.

4. To date no official advice or assistance on this problem has been forthcoming from higher headquarters.

5. Execution of the program outlined in paragraph 22 of reference 1c has led to the dissolution of all but two local Patients Associations on Kyushu. The two remaining associations are inactive and are expected to dissolve soon.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDC NO. [illegible]

6. Improvements in hospital administration and the establishment of uniform rules and regulations have contributed the greatest part of the program and are an effective measure to prevent the formation of new Patient Associations or other similar associations.

7. It is again recommended that action be taken against Patients Associations on a national level. Local action can be effective, as demonstrated in this Region, but the problem is a national problem and the hospitals and sanatoria are directed and supervised by a national agency, the Ministry of Welfare.

SUBJECT: Schools of Nursing

TO: Commanding Officer, Kyushu Mil Govt Region, APO 24 Unit 5
Attn: Public Health Section

FILE

1. In compliance with letter, Headquarters Kyushu Military Government Region, subject as above, 21 February 1949, the following report is submitted.

2. The following are the schools of nursing in Oita prefecture now functioning:

a. (1) Name: Beppu Midwife-Nurse School

(2) Location of school: Beppu City, Oita prefecture.

(3) Size of hospital to which it is attached: 9 different hospitals (101 beds).

(4) Number of usual bed occupied: 9 different hospitals (45 beds).

(5) Attendance at out-patient department per month: Unknown.

(6) Number of graduate nurses: 27 clinical nurses, 13 midwives.

(7) Number of student nurses: 10 clinical students, 10 midwife students.

(8) Length of present course: 2 years.

(9) Number of nurse instructors: None.

(10) Remarks: Students attend classroom lectures for 700 hours a year, in a temple coming from and returning to 9 different hospitals that vary in size from 2 to 25 bed capacities. Their experience is varied in that they are rotated to the different hospitals. No nursing procedures are taught.

DECLASSIFIED E.O. 12065 SECTION 3-402/NMDG NO: 1[illegible]

b. (1) Name: Kamegawa National Hospital School of Nursing.

(2) Location of school: Beppu City, Oita prefecture.

(3) Size of hospital to which it is attached: 1,000

(4) Number of usual bed occupied: 500

(5) Attendance at out-patient department per month: 7,500

(6) Number of graduate nurses: 177

(7) Number of student nurses: 35

(8) Length of present course: 2 years.

(9) Number of nurse instructors: 3

(10) Remarks: These students will finish their training on 31 March 1949. On 1 April 1949 a new class is to enter for a class A nurse course. The hospital expects to have 40 students for this class since they have 70 applications.

c. (1) Name: Oita Prefectural Hospital School of Nursing.

(2) Location of school: Oita City, Oita prefecture.

(3) Size of hospital to which it is attached: 165 beds.

(4) Number of usual bed occupied: 100 beds.

(5) Attendance at out-patient department per month: 600

(6) Number of graduate nurses: 44

(7) Number of student nurses: 24

(8) Length of present course: 2 years.

(9) Number of nurse instructors: 2

(10) Remarks: This hospital is asking in budget from Ken Government for 6 million yen to build a new student nurse dormitory and school building.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. [illegible]

d. (1) Name: School of Nursing Attached to Hita Medical Association.

(2) Location of school: Hita City, Oita prefecture.

(3) Size of hospital to which it is attached: 6 different hospitals (100 beds).

(4) Number of usual bed occupied: 6 different hospitals (80 beds).

(5) Attendance at out-patient department per month: Unknown.

(6) Number of graduate nurses: 19

(7) Number of student nurses: 10

(8) Length of present course: 2 years.

(9) Number of nurse instructors: None.

(10) Remarks: Students come to this school (only one classroom) for 2 hours lectures -- for 120 hours a year -- and return to their respective hospitals that vary in size from 6 to 35 bed capacities. No nursing procedures are taught.

3. The following schools of nursing are closing 31 March 1949:

a. Prefectural Doctors Cooperative School of Nursing.

b. Mutual Relief Hospital School of Nursing.

b. Letter, Hq I Corps, AG 710-BA, subj: "Tuberculosis Control", dated 17 February 1949.

2. An immediate survey of the availability of beds for tuberculosis patients will be made. The Prefectural Health Department should be able to supply all the statistics required.

3. The following information is desired for each hospital and sanatorium caring for TB patients:

a. Name of institution.

b. Location of institution (City, town and gun)

c. Type (Prefectural, private, etc.)

d. Total bed capacity (actual physical capacity)

e. Total bed occupancy (average)

f. TB bed capacity

g. TB bed occupancy (average)

h. Total number of full-time doctors

DECLASSIFIED E.O. 12065 SECTION 3-402/NNBS NO.

Ltr, Kyushu Mil Govt Region, APO 24-5, dtd 7 Mar 1949, subj: "Tuberculosis Control - Bed Survey".

i. Total number of full-time doctors for TB

j. Total number of full-time nurses.(inclusing students)

k. Total number of full-time nurses for TB

l. Daily average number of all out-patients

m. Daily average number of TB out-patients

n. Reasons for any large discrepancy in f and g above

Information desired should be supplied individually only for institutions of 50 beds or more. A total figure is desired for TB beds in insitutions of under 50 beds. Subject information on national hospitals and sanatoria is available now at this headquarters and need not be given except for f, g and n above.

4. Additional information desired is:

a. Total number of available TB beds (from 3 above) in the prefecture.

b. Total number of hospitalized TB patients (from 3 above) in the prefecture.

c. Estimated number of patients not under any care who should be hospitalized.

d. A brief analysis of the reasons for the discrepancies between a and c and d considering such factors as the attitudes of patients, the attitudes of public health officials, the availability of food and welfare funds in the hospitals, etc., will be made.

5. Recommendations for improving the local situation should be made. Recommendations for expanding the TB bed capacity of specific insitutions should be made on the basis of where TB beds are most needed and where they can be made available with the least amount of new construction and expenditure of funds.

6. Report will be prepared in duplicate to reach this headquarters by 1 April 1949.

DECLASSIFIED E.O. 12065 SECTION 3 NND NO

DECLASSIFIED E.O. 12065 SECTION 3 402/NARS NO.

BASIC: Tuberculosis Control - Bed Survey - Fukuoka Prefecture

o. Total TB beds in institutions of under 50 beds: 243

p. Total TB beds in Fukuoka Prefecture : 4008

q. Total hospitalized TB patients : 3354

r. Total non-hospitalized TB patients who should be hospitalized (at least) : 10000

s. Reasons for r:

(1) Poor distribution of tuberculosis hospitals and sanatoria.

(2) Inability of most existing sanatoria and hospitals to treat all phases of tuberculosis.

(3) Inadequate total number of hospitals, beds, tuberculosis doctors and nurses.

(4) Inability of existing hospitals to expand because of shortages in budget, personnel food and water facilities, construction materials, medical equipment, etc.

t. Recommendations:

(1) National tuberculosis hospitalization program adequately subsidized at national, prefectural and local levels.

(2) Expansion and construction of hospitals to provide at least 10000 beds in Fukuoka Prefecture with emphasis in highly populated districts of the prefecture (northern cities, coal mine districts, such as Tagawa, Iizuka areas, large cities, such as Fukuoka, Kurume and Omuta).

(3) Conversion of inactive contagious disease hospitals into tuberculosis hospitals. In this prefecture there are 141 such hospitals with 3,315 beds of which 80% or 2650 beds are empty the year round.

(4) Require local subsidies to share in the operation of national sanatoria.

(5) Consolidation of the adjacent national sanatoria in Koga-machi, Kasuya-gun to form a tuberculosis center for training of doctors and nurses in all forms of tuberculosis therapy.

SUBJECT: Diphtheria Epidemic

TO : COMMANDING OFFICER, Kyushu Military Government Region,
Headquarters and Headquarters Detachment, APO 24-5
Attn: Public Health Officer

The following information is furnished concerning diphtheria epidemic at Ureshino-machi (population 13,783).

1. 37 cases had been diagnosed as of 26 Feb 1949 by culture methods.

   a. 13 cases are among dependents of the Ureshino National Hospital Staff.

   b. Remaining 24 are in the town of Ureshino.

   c. One death has occured.

   d. Cases are among children (for the most part pre-school age).

2. No toxoid or anti-toxin is available. A telegram was sent to the Welfare Ministry asking for material to immunize 3,000 people.

3. The cases are mild for the most part.

4. Control measures taken are as follows:

   a. Disinfection of the Hospital with carboric acid.

   b. Use of masks and gargle by Hospital Staff.

   c. Isolation or quarantine of the patients.

5. 17 of the patients had received diphtheria immunization in Oct 1948.

6. The hospital has a large outpatient practice who come from areas 10 to 12 miles away.

SUBJECT: Graduates of Assistant Battalion Surgeon Course

THRU: Commanding Officer
Kyushu Military Government Region
APO 24-5

TO: Commanding Officer
Fukuoka Military Government Team
APO 24-5

1. Information available this headquarters indicates the probable graduation of the following officer your organization from the Assistant Battalion Surgeon Course, 28th Station Hospital, on 5 March 1949:

1st Lt Raymond E. Adams, MSC, Fukuoka MG Team

2. Upon successful completion of the course, it is desired that the officer will be given on-the-job training under the supervision of a Medical Corps officer. Since all graduates of the course will be required to assume a vital role in providing medical service when the acute shortage of medical officers develops, it is essential that the minimal training they have received be not only maintained but expanded at their home stations.

3. Graduates of the Assistant Battalion Surgeon's Course will be given the secondary MOS (3506), by Unit Commanders upon successful completion of ninety (90) days in an on-the-job training status, or in the capacity of Assistant Battalion Surgeons.

SUBJECT: Regional Committees for Grading Schools of Nursing

TO : Commanding Officer, Fukuoka Mil Govt Team, APO 24-5
Commanding Officer, Saga Mil Govt Team, APO 929
Commanding Officer, Nagasaki Mil Govt Team, APO 929
Commanding Officer, Kumamoto Mil Govt Team, APO 24-1
Commanding Officer, Kagoshima Mil Govt Team, APO 970
Commanding Officer, Oita Mil Govt Team, APO 24-2
Commanding Officer, Miyazaki Mil Govt Team, APO 24-2
Attention: Public Health Officers

1. The following information has been sent down from Eighth Army Public Health Section regarding the selection of committee members for the grading of schools of nursing.

"Definite plans for grading schools of nursing are beginning to come into existence. The Ministry of Welfare has appointed a council of 15 members. This council will appoint the six members of the regional committee as explained below and will make the final decision as to "A" and "B" schools from inspection reports submitted by the regional committee. As we know few schools will meet all the requirements (I know of one), but recommendations will be made by the committee giving the schools, which have met a certain standard, an extension period in which to make necessary improvements.

The regional committee will be selected in this manner.

Six representatives from each prefecture will be selected to include:

One public health nurse	- To be appointed by the Prefectural Branch Nurse and Midwife Association
One midwife	-
One clinical nurse	-
One doctor	- To be appointed by the Prefectural Medical Association

DECLASSIFIED E.O. 12065 SECTION 3-402/NNBB NO. [redacted]

One person (doctor or nurse)	- To be appointed by the Prefectural Government Public Health Department
One person	- To be appointed by the Board of Education

The six names selected in each prefecture will be mailed to the council in Tokyo. The council in turn will appoint the regional committee (6 members) from the prefectural list. One public health nurse, one midwife, one clinical nurse, one doctor and two other people, one of which may be a doctor or nurse.

The regional committed will appoint a chairman. This individual will attend a meeting in Tokyo at which time he will be given all pertinent information which is necessary for the functioning of the regional committee.

I would suggest a representative of the military government nursing section be present at the officers' meeting of the Prefectural Branch Nurse and Midwife Association when the selection of the three representatives is made. Information is being mailed to the Prefectural nurse and Midwife Association through Japanese channels so it might be well to contact the president of each prefectural branch to learn the date of the meeting and tell her of your interest in attending. Proper people must be selected to serve on this committee. The final outcome depends on this committee and unless strong pressure is put on the schools by the committee the schools will continue to operate as they are today.

It is also suggested that the matter be brought to the military government public health officer's attention, and that he be requested to lend his support by using his influence in having the best medical man selected. The military government education section might also be asked to give assistance in the selection of the representative by the Board of Education."

2. The Public Health Nurses on Oita and Nagasaki Teams will be expected to attend the meetings in their prefectures and Miss Baca, Regional Public Health Nurse, will try to attend all other meetings according to the inclosed scheduled. Public

DECLASSIFIED E.O. 12065 SECTION 3-402/NMDG NO.

Health Officers are requested to arrange for such meetings with the Board of Directors of the Prefectural Midwives and Nurses Association.

LFH/mo

AG 700 - BA

18 FEB 1949

SUBJECT: Medical Intern Education

TO : See Distribution

1. Reference is made to Welfare Ministry Directive, Ihatsu No. 263, dated June 1948, which provides a basis for the establishment of medical internship in Japan.

2. Since directors of hospitals approved for training interns do not have experience in such a program and no provision is made in the reference directive for its operation and management, full advantage is not taken of this important phase of a physician's early training. Therefore, although begun with good intent, the program has not developed to a point where either the hospital or the intern receive the desired benefit.

3. A study will be made of the presently approved hospitals and health centers in each prefecture, with a view to more efficient distribution and utilization of these young doctors. Attention should also be directed toward the improvement of other hospitals in order to attain future approval.

4. It is further desired that attention be given to the already established intern training institutions, to insure that both intern and hospital are deriving maximum benefit from the intern system. Two of the major deficiencies appear to be (1) failure to give the intern concise responsibilities in his various services and (2) failure to properly schedule services in conformity with a rotational system.

5. The reference Japanese directive provides that one month of the internship be spent in Public Health. This becomes a potential source of personnel for the presently understaffed health centers.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 770615

MISSION

The overall mission of military government in public health is to assist the Japanese public health personnel in developing with their own equipment and supplies the highest possible standards of health and sanitation for their nation and to aid in the institution and practice of democratic ideals in Japan.

Shortly after the arrival of the occupation forces in Japan, SCAP established the objectives of the public health program by requiring that the Japanese institute a public health program which would:

a. Prevent disease and unrest in the civil population.

b. Establish or re-establish normal civil health control measures to prevent the occurrence of disease and unrest and to assure that the civilian population was not a health hazard to the occupation forces.

c. Establish and maintain the essential medical and welfare activities at a level necessary to meet the humanitarian requirements of the indigenous population and additionally, as necessary, prevent disease and suffering which would interfere with the accomplishment of the occupation mission.

d. Maintain necessary standards of sanitation and quarantine in repatriation and movement of displaced persons to protect their health and to prevent their becoming a hazard to the civil population.

e. Control narcotics.

Some of the means whereby these goals might be realized are defined in more detail by the SCAPINs and other directives.

It is the mission of military government to insure that these directives are enforced on prefectural and local levels and to aid and advise the Japanese on any problems which they might encounter in seeking to attain these objectives.

However, these duties and directives do not define the entire responsibility of military government, but merely indicate some of the basic jobs which must be performed. Military government is additionally interested in aiding the establishment of an adequate public health service in Japan, in laying a foundation for good health practices in the law, and in developing a governmental organization which will carry out the business of utilizing this education to provide adequate health protection to everyone.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 770919

FUNCTION

The public health section of the military government region is the planning and supervising agency for the prefectural teams. It develops the directives from higher headquarters into programs which are workable on a team level and supervises the teams to see that operation meets minimum standards. Further, it aids the prefectural teams in solving their problems and guides them to more effective discharge of their responsibilities.

The prefectural military government team is the operating agency for public health in the field. The team public health section must be organized into a unit which will be able to supervise the entire public health program for a prefecture. In general, the public health officer will carry out the preventive medicine, medical service, public health administration, and laboratory programs himself. Furthermore he will be responsible for training his enlisted men. Many functions of sanitary engineering, pharmaceutical affairs, and veterinary affairs can be adequately handled by the enlisted men under the careful supervision of the medical officer. Some teams may have a veterinarian and a sanitary engineer.

The public health nurse is responsible for planning and participating in educational programs for clinical nurses, mid-wives, and public health nurses. She assists hospitals and health centers in the improvement of nursing service and acts in an advisory capacity to branch prefectural nurse and midwife associations.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 176019

PRIORITY OF ACTIVITIES

The following programs are basic and of first priority in the foundation of an adequate public health service in Japan. The materialization of these projects will be the basic endeavor of the Military Government Public Health Section during the next year.

a. Establishment of an adequate organization on prefectural, district, and local levels to carry out public health programs.

(1) Organization of an independent Prefectural Health Department.

(2) Organizing and establishing health centers as directed in Welfare Ministry Ordinance 101.

(3) Creation of plans with prefectural governments which will develop these organizations into an adequate system.

(4) Studying of the budgeting and financing of these organizations.

b. Modernization of health legislation.

(1) Study of present health laws.

(2) Encourage the development of prefectural sanitary codes and other legislation.

(3) Insistence on enforcement of the present laws which are worthwhile.

c. Stimulation and improvement of public health education.

(1) Improve educational facilities and opportunities for public health workers, sanitary engineers, doctors, nurses, dentists, and generally strive to raise the standards of medical practice.

(2) Work closely with the education section to improve schools, encouraging the raising of admission requirements and development of adequate curricula, etc.

(3) Encourage the government to see that trained men are well paid and that jobs are available for them.

(4) Enforce national license.

(5) Stimulate education of general public on health matters.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDC NO. [illegible]

(6) Assist in establishing an adequate school health program.

d. Establish minimum requirements for employees of public health service. See that only qualified people get important jobs.

e. Encourage the Japanese to assume full responsibility for their health program, urging prefectures to take more initiative and to demand more leadership from the Ministry of Welfare.

f. Popularize the concept of government responsibility for public health.

g. Encourage research projects and public works projects designed to to protect the general population. Sanitation requires particular emphasis.

h. Improve laboratories and encourage their use.

i. Study the production and distribution of medical supply with a view of correcting present faults. Assist the Japanese in putting the new coupon ration system into effect.

j. Improve hospital service and encourage the development of the health center as a center for district health administration and planning, as well as a treatment center for the needy.

k. Maintain and enlarge health projects already underway.

The accomplishment of these programs constitutes the first and basic step required for the development of an adequate health service in Japan. Many of these projects may never be fully accomplished, but work on them must always be in progress.

At present, military government's chief concern is the development of the first three projects listed, with gradually increasing emphasis on the others.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDC NO. 170-01-9

REPORTS

Required by Eighth Army from Military Government Public Health Officers

1. Monthly Military Government Activities Report. Public Health Activities (Annex B-1, Reports Control Symbol QPH-01 CD #71, Hq 8th Army, 10 December 1947.

2. Statistical Health Reports. To be mailed not later than 12 hours after close of report period, 2400 Friday of the report week. (If applicable). Reports Control Symbol Med 11 AR 40-1080.

3. Report sheet of sick and wounded. Due the last Friday of each month. (If applicable). Reports Control Symbol Med 18 AR 40-1025 C1 and C2 par 98 and 111.

4. Monthly Sanitary Report. Due date at 8th Army 12th of following month in duplicate. Reports Control Symbol Med 3 AR 40-275 and GHQ Cir 80, 1947, 8th Army Cir 71, 12 Oct 48.

5. Monthly VD Reports. To be mailed on the last Friday of each month. Cir 184, 8th Army 1946. Reports Control Symbol N-7.

6. Monthly Report of Med Dept Personnel MD AGO 8-19. Required to be in 8th Army Hq by 2nd of following month with roster of commissioned personnel. Reports Control Symbol Med 34. Reference VD Cir 3 and FEC Cir 66, (As amended by Cir 19, 1948).

7. Classification of MC, DC, and VC Officers WD AGO 66-4. By next higher MC officer only when change in MOS desired. (TN 12-425 4 July 47).

8. Telegraphic Report - Epidemic Diseases. Reports Control Symbol Med 16. Required by OD #40, Hq 8th Army, 5 May 1947 and AR 40-1080 Sec III. Immediate report. (Teams will notify Regions and Regions will consolidate report).

9. Medical Report on Captured or Surrendered Supplies and Equipment. Due date 5th. Reports Control Symbol N-11. OD #28/4 Hq 8th Army, 21 December 1945.

10. Venereal Disease Contact Report. Reports Control Symbol M-27, as required in 8th Army Cir 13, 1947.

11. Weekly Quarantine Report, Airport. (Where applicable). Reports Control Symbol MG-9. Forwarded within 5 days from end of week.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 770919

12. Weekly Quarantine Report, Seaport. (Where applicable). Reports Control Symbol MG-10. Forwarded within 5 days from end of week.

13. Annual Report of Medical Department Activities. (When called for).

14. I Corps History. - Due last day of every month.

ALPHABETICAL LIST OF PUBLIC HEALTH DIRECTIVES

1. Administration

Three Months Plan. Ltr I Corps, AG 300-BA, 25 Sep 48.

2. Animal Diseases

Anthrax. TB PH Vet 4, Mar 47.

Communicable Diseases of Animals. AR 40-2090, 1947.

Dairy Inspection. TB PH Vet 2, Jan 47.

Duties of Military Government Vet Officers. TB PH Vet 1, Feb 47.

Establishment of a Uniform Meat Inspection Practice in Japan. TB PH Vet 3, Dec 46.

Food Inspection by the Veterinary Service. FEC Cir No. 2, 10 Jan 47.

Information on Japanese Animal Disease Control. SCAPIN 214, 30 Oct 45.

Rabies. TB PH Vet 5, Jul 47.

Tachikawa Army Veterinary Department (For use by Occupation Forces) SCAPIN 736, 14 Feb 46.

Reportable Animal Diseases. Kinki Mil Govt Region, Ltr, 720, 27 Feb 48.

Equine Encephalo Myelitis. Ltr I Corps, AG 720-BA, 11 Aug 48.

3. Barber Shops

Sanitary Regulations. I Corps Memo No. 60, 1946.

DECLASSIFIED E.O. 12065 SECTION 3 402/AMSC NO.

4. Books and Publications (See also Travelling Med. Dept. Library)

Bulletin of the U.S. Army Med Dept WD Cir 33, 1947.

5. Communicable Diseases (See also Quarantine and Repatriation)

a. Cholera

Prevention of Introduction of Cholera Into Japan. SCAPIN's 1074, 1102 and 1246, 1946.

Cholera Control. 8th Army Cir No. 161, 1946.

Quarantine Procedure for Cholera in Repatriates. SCAPIN 865, 1946.

Minimum Requirements, Cholera Vaccine. Ministry of Welfare Tech Bulletin, 10 Apr 47.

Cholera Vaccination, 8th Army M/F, 21 Apr 48.

b. Diphtheria

Diphtheria Control. SCAPIN 698, 1946.

Minimum Requirements, Diphtheria Toxoid. Tech Bulletin, Ministry of Welfare, Sep 47.

c. Japanese B. Encephalitis

Japanese B. Encephalitis. 8th Army Cir 204, 1946; 8th Army Cir 72, 1947; 8th Army Cir 23, 30 Mar 48.

d. Malaria

Control of Malaria and Insect-Borne Diseases. FEC Cir 91, 1946 and I Corps Memo No. 63, 1946.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNBS NO

e. Schistosomiasis

Schistosomiasis. I Corps Memo No. 63, 1946.

f. Smallpox

Smallpox. TB PH Prev Med 1, Jan 47.

Smallpox Control by Japanese PH Agencies. 8th Army OD #38, 18 Dec 45.

Smallpox Vaccinations of Japanese Civilians. SCAPIN 610, 1946; 8th Army OD No. 15, 1946.

Smallpox Re-vaccination of All Japanese Civilians. I Corps Ltr, AG 720-BA, 25 Sep 46.

Supply of Smallpox Vaccine for Repatriation. SCAPIN 942, 10 May 46.

Vaccination Against Smallpox. SCAPIN 1939, 1 Nov 48; 8th Army OD No. 62, 4 Dec 48.

g. Typhoid

Minimum Requirements, Typhoid Vaccine. Tech Bulletin, Welfare Ministry, 27 Feb 47.

h. Tuberculosis

Approval of Program for Anti-TB Control. PHMJG 14, 17 Mar 47.

Control of TB. 8th Army OD No. 38, 1 May 47.

Tuberculosis. TB PH Prev Med 2, Jan 47.

DECLASSIFIED E.O. 12065 SECTION 3 NND/NARS NO.

i. Typhus

Diagnosis of Virus and Rickettsial Diseases. 8th Army Cir 96, 5 Jun 47.

Minimum Requirements, Typhus Vaccine. Tech Bulletin, Ministry of Welfare, 24 Feb 47.

Prevention and Control of Typhus in Japan. SCAPIN 331, 21 Nov 45; 8th Army OD 27, 14 Mar 47; SCAPIN 1523, 12 Feb 47; SCAPIN 368, 29 Nov 45.

Plans for Typhus Epidemic 1946-1947. Ltr I Corps, AG 710-BA, 28 Sep 46.

Release of Typhus Vaccine to the Japanese Government. Ltr 8th Army, AG 091.31 (MG-Ec), 26 Apr 47.

Rickettsial Diseases in Japan and Korea. TB PH Prev Med 3, Feb 47.

j. Venereal Diseases

Abolition of Licensed Prostitution in Japan. SCAPIN 1183, 6 Sep 46; SCAPIN 642, 21 Jan 46.

Control of VD. 8th Army Cir 78, 13 May 47; 8th Army Cir 105, 23 Jun 47; I Corps Ltr, AG 726.1-BA, 3 Sep 47; SCAPIN 153, 16 Oct 45; I Corps Memo 47, 3 Jun 47; I Corps Memo 47/1, 27 Aug 47.

Contraction of VD by NCO's and Use of Rehabilitation Camps. I Corps Ltr AG 726.1-BA, 16 Sep 47.

Instruction in VD Control. I Corps Memo No. 72, 26 Jun 46.

Outlines of Tech Data on the Treatments and Diagnosis of VD. Ltr, TEC, 31 Dec 45.

Commanding Officer, Oita Mil Govt Team, APO 24-2
Commanding Officer, Miyazaki Mil Govt Team, APO 24-2
Attention: Public Health Officer

1. A new curriculum for class A schools of nursing has been established with a few changes from the old one. The period of pre-clinical practices is still 16 weeks and four weeks vacation are granted each year. The Public Health officer is requested to check with the Ken Health Department to be sure that they have copies of this curriculum and circulate them to the hospitals that desire class A schools of nursing.

2. Copies of Midwifery Lectures and Prenatal care are being sent to each team to be distributed (one of each) to the midwives whose names appear on the inclosed list. The Public Health officer is requested to have these books distributed thru the Prefectural Midwives and Nurses Association.

Commanding Officer, Oita Mil Govt Team, APO 24-2
Commanding Officer, Kagoshima Mil Govt Team, APO 970
(Attn: Public Health Officer)

1. In most prefectures no satisfactory procedure is provided for the isolation of rabies-suspect dogs during the incubation period.

2. Dogs suspected of having rabies should not be confined in health centers where they might endanger human lives.

3. Isolation of suspect dogs should be under the direct supervision of the Chief Public Health Officer who is responsible for seeing that they are kept in a safe place and that other proper authorities are immediately notified.

4. An animal with a history of having bitten an individual should be held in isolation for a period of fourteen (14) days. An animal which has not bitten anyone but may be classified as a suspect for other reasons should also be isolated for the same period. Daily observations must be made.

5. At the termination of the isolation time a normal animal should be returned to its owner. An animal which has developed symptoms indicative or suspicious of rabies should, with the owners' consent, be destroyed and the head submitted to a laboratory for examination.

6. Inclosed is a plan describing the construction of a cage that is light, easily portable, sanitary and safe from the standpoint of protecting human and animal life.

Nurses in Kyushu Region, dtd
26 Jan 1949

KYUSHU MILITARY GOVERNMENT REGION
HEADQUARTERS AND HEADQUARTERS DETACHMENT
Fukuoka, Kyushu, Japan

APO 929
26 January 1949

SUBJECT: Investigation of Dispatch Nurses in Kyushu Region

TO : Commanding Officer, Kyushu Military Government Region

1. Fukuoka Prefecture. The first investigation of dispatch nurses was made in September at which time the president of the old dispatch nurses association was requested to call a meeting of this group in the near future in order to comply with the law. At this time the nurses were working under the old system. The meeting was held 1 November 1948 at the Team Public Health Office and attended by the Team Public Health Officer, Labor Officer, Regional Public Health Nurse, Ken Labor officials and dispatch nurses. The Ken C. L. O. was represented by the Public Employment Security Office (referred to as PESO hereafter) introduced as the best solution to the problem. A subsequent meeting of all dispatch nurses in the prefecture and Ken Labor Officials was held at which time the PESO registry was adopted. This registry has been set up and is, apparently, functioning satisfactorily.

2. Saga Prefecture. The first investigation of the Saga dispatch nurses was conducted at a meeting on 1st November 1948 in the Team Public Health Section. It was attended by a representative of the Team Labor Section, Regional Public Health Nurse, Ken Labor officials and a few dispatch nurses. At this time some of the nurses had registered at the PESO but were receiving very few calls. Most of their calls came directly from doctors and hospitals. In the Ureshino district the nurses had applied for permission to set up a union. None of them appeared to be working under the old boss system. This group was advised to call a general meeting of all dispatch nurses and under the guidance of the Ken Labor Section set up registry in the PESO. To date this has not been done the reason being that the nurses cannot be located.

3. Kumamoto Prefecture. On 7 December 1948 a meeting was held at the Team Public Health Section to investigate the dispatch nurses. It was attended by a representative from the Team Labor Section, Regional Public Health Nurse, Ken Labor officials and dispatch nurses. The Ken Labor Section had taken initiative to dissolve the old dispatch nurses

association under C. D. 29. Following this the nurses attempted to form a union which was also ordered dissolved by the Men Labor Section as it did not serve the purpose of labor supply. The nurses then reverted to the old boss system. C. D. 29 was discussed and the use of PHSC explained. This group was then instructed to call a general meeting of dispatch nurses in order to explain the need of a new system. On recent inquiry this was done and the new system of working thru the PHSC was to be inaugurated 6 January 1949.

4. Nagasaki Prefecture. The first investigation of dispatch nurses was made 27 October 1948 at the Team Public Health Section and attended by the Public Health Officer, Labor Officer, Regional Public Health Nurse, Men Labor officials and dispatch nurses. C. D. 29 was discussed and the PHSC introduced as a means of solving the problem. A subsequent investigation on 5 January 1949 reveals that there are 9 dispatch nurses in the prefecture and it is probable lack of demand for dispatch nurses that accounts for only 1 call having been received thru PHSC. The nurses do not feel satisfied with the system and have to wait on calls from friends and acquaintances in order to have enough work.

5. Oita Prefecture. Investigation of the dispatch nurses was initiated by Capt. Horton, PHO, Public Health Officer, in August 1948. The results of this investigation were summarized in the special report to I Corps, 2 September 1948. This was accompanied by a copy of the constitution of the Union which was formed on prefectural basis and approved by the Labor Ministry. An investigation of this group on 4 January 1949 reveal that some of the nurses are now trying to work under PHSC and some of the nurses stated that the union had not been approved by the Labor Ministry. The Men Labor Section was instructed to call a general meeting of dispatch nurses, attempt to dissolve the union and establish registries for the dispatch nurses in PHSC.

6. Miyazaki Prefecture. The initial investigation of the dispatch nurses held 5 January 1949 was not entirely satisfactory due to inadequate interpretation. The meeting was attended by the Regional Public Health Nurse, Men Labor officials and dispatch nurses. At present the nurses are trying to form a union which is patterned on the old boss labor system. The Men Labor officials seemed to be weak in their ability to explain 8th Army C. D. 62 and Shoku-Hatsu 655. The group was requested to call a general meeting of all dispatch nurses and discuss the need of a new system and the best means of solving the problem. thru the use of PHSC.

Ltr, Kyushu Mil Govt Region, APO 929, Subj: "Investigation of Dispatch Nurses in Kyushu Region", dtd 26 Jan 1949

7. Nagasaki Prefecture. On 11 December 194° the first meeting to investigate the dispatch nurses was held in the Team Public Health Section and attended by the Regional Public Health Nurse, Team Labor Officer, Ken Labor section and two dispatch nurses. Each city and town in the prefecture has attempted to solve the problem on a local level. In Sasebo a union was formed under the Labor Stabilization Board. So far there has not been an opportunity to investigate this union. In Nagasaki City an Employment Exchange Fee-Charging Agency was set up by Miss Masue Koshii and approved by the Labor Ministry 1 October 1946. This agency retains all the features of the old boss system. A report of further investigation of this agency was requested by Capt. Foltz, Team Labor Officer.

8. Conclusions: The dispatch nurses in each prefecture have been investigated by the Regional Public Health Nurse with the Team Labor Officer and Ken Labor Section being invited to attend the initial investigation. In all cases the Ken Labor Section was requested to continue the investigation and set up a registry in P.H.N. for licensed dispatch nurses. In only a few prefectures has this request been complied with. The Labor Ministry has furthermore, approved the Union in Oita Prefecture based on a constitution which is wholly undesirable. It has also approved the Employment Agency in Nagasaki City which retains features presumably out-lawed by 8th Army C. D. 22. The Ken Labor Section in that prefecture has requested the agency to post a bond of ¥10,000 when it should have been set at ¥50,000 according to the Labor Ministerial Ordinance # 12, 29 December 1947. They, furthermore, made no mention of advising the agency of the additional annual license fee of ¥10,000 as required under the same ordinance.

In most cases the Ken Labor Sections appear to have been delinquent in discharging their duties as regards this group of nurses and in guiding them along approved lines under 8th Army C. D. 22 and 52, Shoku-Letsu 555 and Labor Ministerial Ordinance #12. While this is a nursing problem and holds the interest of the Regional Public Health Nurse the final solution and settlement is in the hands of the Ken Labor Sections.

Josephine E. Baca
