THE INVESTOR'S MONTHLY MANUAL.

The December Number of the INVESTOR'S MONTHLY MANUAL, published December 31st, gives in addition to the usual information the Highest and Lowest Prices of all Stocks and Shares for the Three Years, the Latest Quotations for 1882 (so as to indicate the Exact Movement during the Twelve Months), a Financial History of the Year, including a Tabulated Chronicle of the Year's Events, the Names of the Markets where each Security is chiefly dealt in, besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. In addition, there are furnished the Names of the Chairmen and Secretaries, or Managers, of the various Companies. Price 18 6d ; by post, 18 9d.

OFFICE-340 Strand.

to the appreciation which he believes to have taken place during the past ten years or so in the value of gold, and on Wednesday evening he dealt with this subject very exhaustively in an address to the members of the Bankers' Institute. Italy, Germany, and the United States, he reminded his audience, have all during recent years absorbed immense quantities of gold for currency purposes. Their aggregate requirements have amounted to about 200,000,000%, and concurrently with the upspringing of this enormous new demand, there has been a falling off in the annual gold production. That now amounts to not more than 20,000,000l a year, the output having gradually diminished to this point from an average of 30,000,000l per annum in the five years 1852-6. Upon the available gold supplies, therefore, a great strain has been put, and the tension has been all the greater, because year by year population has grown, and the volume of the world's trade has expanded. On the other hand, it is true considerable economies in the use of gold have been effected. Banking facilities have been extended, payment by cheques has to an increasing extent superseded payment in coin, and stock exchange securities have been made to play a far more important part in the settlement of international transactions. In Mr Goschen's opinion, however, these economies have not counterbalanced the reduction in the available gold supplies and the increase in the currency requirements, and the result of this is, he holds, that gold has appreciated in value. This is, of course, equivalent to saying that there has been a fall in the gold prices of commodities, and Mr Goschen, by comparing the prices of a large number of representative articles now and in 1873, shows conclusively that there has, as a matter of fact, been a general and very heavy fall.

Such, in the scantiest outline, is a sketch of Mr Goschen's admirably lucid and closely-reasoned argument. And probably few will deny that it does support the conclusion that the scarcity of gold has been one of the causes which have tended to reduce prices. Whether, however, it has been so important a factor in promoting the decline as Mr Goschen believes it to have been is certainly open to question. On a matter of this kind it is, of course, impossible to form any

THE ECONOMIST.

really well-founded opinion, and Mr Goschen, with his really wen-founded opinion, and mr dosenen, with mis customary care, expressly guarded himself against being supposed to be dogmatising upon it. There is one test, however, which, we think, may fairly be applied, in order to arrive at some idea as to the influence which the new gold demands has exerted upon prices. Up to the end of 1877 only the accumulations of Germany were abstracting gold. The United States, in anticipation of the resumption of specie payments, had certainly been beginning to hoard before then; but the great bulk of the American stock was gathered together after 1877, and it is only recently that Italy has collected her supply. Broadly speaking, it may be said that of the 200,000,000l which Mr Goschen gives as the total of the new demand, about 80,000,000l or 90,000,000l had been taken by 1877, and that the remaining 110,000,0002 or 120,000,000l have been accumulated since. And as the effect of the earlier withdrawals was to make bare the markets for gold, the later withdrawals, coming as they did upon largely-diminished stocks, must have told with greater effect than the earlier. So far, then, as the influence of gold upon prices is concerned, it must have been much greater since 1877 than it was before that date. If, however, we compare the prices of commodities, we find that the fall was far heavier between 1873 and 1877 than it has been since. Taking a few representative articles selected simply because they are those we habitually use in our half-yearly comparison of prices, we find the fluctuations have been as follows :--

Pr	ices at	En	d of D	ecen	aber-
Articles.	1882.		1877.		1873.
Scotch pig ironper ton					107/6
Coals-Hetton Wallsend	18/		18 6		27/6
Copper-Chili bars					841
Wheat-Gazette average per qr	40/11		51 9	***	62/1
Beef-inferior per stone			2 10		3/9
Do, prime small "			5/		5/5
Cotton-middling upland per lb	53d		676d		8 ¹ / _g d
Wool-Southdown hogs			$13\frac{1}{2}$		1/71
Sugar-Manila muscovadoper cwt	18/6		146	***	18/
Coffee-Ceylon good ordinary "	64/	***	84 9		112/6

Perhaps a still better comparison than that of the prices of particular articles is afforded by the comparative tables of market fluctuations, which we publish year by year in our "Commercial History and Review." These show by means of index numbers the combined variations in the prices of twenty-two of the most important articles, and the results are :--

			Index
Da	ite.	1	Number.
1883, J	annary 1	******	2,343
1882	17		2,435
1881	79		2,376
1880	39	******	2,538
1879	59	******	2,202
1878	29	***************************************	2,520
1877	10	***************************************	2,723
1876	**		2.711
1875			2,778
1874	33		2,891
1873			2.947

What we find, then, in both these tables is, that between 1873 and the end of 1877, when the gold abstractions were relatively small, and when, moreover, they were made from markets comparatively well supplied, the fall in the prices of commodities was very much greater than it has been in the longer interval, between 1878 and now, although in the latter period a much larger amount of gold was taken, and taken, moreover, from denuded markets. Indeed, if we compare the prices at the beginning of 1879 with those at the commencement of this year, we see that there has been a distinct rise, although within that period probably about 100,000,000l of the 200,000,000l of gold to which Mr Goschen refers have been withdrawn. We are very far from saying that because there has been this rise the inference is that the withdrawal of 100,000,000l of gold has produced no effect on the prices of commodities. It would be absurd to argue thus. But surely it is clear that if a heavy fall of prices accompanied the withdrawal of about 80,000,000%, whereas there has been no fall whatever attending the withdrawal of a further 100,000,000%, then the fluctuations in prices must have been in the main pro-duced by causes other than the alterations in the supplies of gold. To many of these causes Mr Goschen alluded, and all who look back upon the course of trade affairs during the past ten years will be able to recognise them. Here it

is not necessary that they should be particularised. What we have sought to show is, that the appreciation of gold, although it has probably helped the fall, has been only one of the minor influences producing it. And not only are we disposed to estimate the past effect

upon prices of the gold scarcity somewhat lower than Mr Goschen, we are inclined also to think that he has somewhat overestimated its probable future results. He seems to anticipate from it a further decline in prices. But ought we not now to look rather for the opposite result? Italy, Germany, and the United States have now got the gold they needed. They will no longer, therefore, it is to be presumed, continue to intercept the supplies available for other purposes. No doubt the maintaining of their gold currencies will necessitate the acquisition by them from year to year of certain amounts of the metal. That will be a new demand as compared with what existed ten or fourteen years ago. It will, however, be a relatively small demand, and one altogether insignificant in comparison with that which they have pressed during recent years when accumulating their stocks of gold. If things, therefore, remain on their present footing, there should now be a very considerable increase in the free supplies of the metal, and if the diverting of the supplies into new courses has in the past been productive of a fall in prices, surely their return to their former channels should tend not only to arrest that fall, but also to produce some reaction. It is, of course, impossible to look into the future, and it may be that before long some other new demand for the metal for currency purposes may arise. On the other hand, however, fresh gold discoveries may be made, and the supplies be increased. These are matters upon which no one will venture to express a definite opinion. But with the knowledge we at present possess, there seems reason to hope that the gold scarcity will now be diminished rather than increased, and will exert, therefore, less influence upon prices.

There are many points in Mr Goschen's address to which it is desirable, but not at present possible, to refer. The conclusion to which he arrives, that a fall in prices does not at all imply a restriction of trade, or even after the transition period is over a diminution in profits, is obviously sound. And there is some consolation to us in the fact to which he directs special attention, that any increase in the purchasing power of gold is a benefit to creditors. Nearly every nation on the face of the globe is indebted to us, and the result of an appreciation of gold is that we obtain a larger quantity of their commodities in settlement of our plaims.

THE GRAND COMMITTEES.

Some rulings of considerable importance were given by the Speaker in the course of the debate on Monday night upon the question whether the Criminal Procedure Bill should be referred to the Grand Committee on Law, or to a Committee of the whole House. The main point which arose was as to the competence of Members at this stage in the history of a Bill to avail themselves of the opportunity to discuss either its general principles or its details. The Speaker gave it as his opinion that neither course was in order, and his decision seems to us to be supported both by The key to many of the diffauthority and good sense. culties which were suggested by Members on both sides is supplied, when it is remembered that the new Standing or Grand Committees are, so far as most of their functions are concerned, merely enlarged Select Committees, to which the House has delegated the duty of overhauling the details of two large classes of non-contentious business. The question, therefore, whether a particular Bill should be referred to a Grand Committee is raised at the same stage, and the dis-cussion of it cought to be a stage. cussion of it ought to be subject to the same rules, as the question whether a Bill should be referred to a Select Com-Nothing is clearer than that, according to the mittee. well-established practice of the House, a debate as to the general principles of the measure is out of place upon this latter question. Before the new rules it was a compar-tively upcommon this for the new rules it was a compartively uncommon thing for such a question to arise at all,

the great majority of Bills being ordered, as of course, to be committed to a Committee of the whole House. It was after this order had been made, and when, in compliance with it, the Speaker put the question "that I do now leave the Chair," that a debate on going into Committee began, and the merits of the Bill as a whole, which either had been, or ought to have been, sufficiently thrashed out on the second reading, were argued over again. If, however, the Bill had been ordered to be referred to a Select Committee, this opportunity for rediscussing its principle did not arise, and the House was spared the needless, and in most cases fruitless, revival of a controversy which it had already decided. In our view, one of the great advantages of the institution of Grand Committees is that it makes this exceptional procedure the rule in the case of all measures over which those Committees are given jurisdiction. And it would both be contrary to precedent, and tend to defeat the object with which the new rules were framed and adopted, if the debate on the merits of a Bill which was always and still is allowed, where the Bill is committed to the whole House, on the question that the Speaker leave the chair, were thrown back a stage, and permitted for the first time to take place on the preliminary question whether the Bill should be referred to the whole House or to a Committee. At the same time it may be admitted that the more frequent references of Bills to Committees, which may now be expected, make it incumbent on those in charge of a measure to state frankly at the time when the second reading is moved whether it is intended so to refer it. Fair warning will thus be given to the House that there will or may be no further opportunity of discussing the merits of the Bill in the form in which it is presented, and it will be impossible afterwards to complain that it has been allowed to slip through without adequote examination, under the belief that its principle could be again debated at a later stage.

It is obvious that there is still less to be said for the contention, which was apparently raised by some of the Home Rule Members, that the details of a Bill might be gone into on the motion to send it to a Grand Committee. It is to relieve the House of the task of discussing and settling details that the Grand Committees have been set up, though it is doubtless true that cases may occur in which the inexpediency of delegating a measure to those bodies can only be properly demonstrated by reference to particular provisions in it. The more important question of the extent to which the House is to consider itself bound by the decisions of the Committees, and of the amount of authority which it retains to modify or altogether undo their handiwork, can hardly be said to have been finally settled as yet. The Speaker is reported to have said on Monday night that "when a Bill came back from a Standing Committee it would be open to Members to move that it be recommitted as a whole, or with reference to certain clauses." And Mr Gladstone admitted that there might be in a "Bill generally fit for disposal by a Standing Committee special and important clauses which ought not to be exempted from the consideration of a Committee of the whole House," and that in such cases it might be right to recommit the Bill, even when the Grand Committee had performed its work in a most satisfactory manner. It follows from these dicta, if they are to be taken as authoritative, that the House has an absolute power to recast and redebate every clause and every line of a Bill which has been settled by a Grand Committee, and that, in the opinion of the Prime Minister, the power is one which it will be at times, and in special instances, a duty to exercise. We are far from saying that a more stringent construction of the authority of the Committees over the final form of the measures submitted to them is desirable, or even possible. If each Committee were an exact microcosm of the House, reproducing upon a smaller scale but in the scale, but in a precise, or reasonably precise, proportion the various forces, influences, and interests which are at work in the larger assembly, from which it is derived, it might be practicable to treat its decisions as definitive, at least so far as the details of the Bills submitted to it were concerned. But apart from the difficulty, which would constantly present itself even under the most delicately-adjusted system of representation, of drawing the line between points of detail and points of principle, it is quite clear that the Grand Committee of principle, it is quite clear that the Grand Committees as now constituted are not, nor can they

easily be made, anything like infallible reflectors of the opinions and sentiments of the House of Commons as a whole. They do not even pretend to be formed with any regard to the proportionate strength of parties, and the success which seems hitherto to have attended the Government in all the divisions in both Committees is probably, in part at least, due to the more regular attendance of the official Members, and the more energetic application of the Ministerial Whip. The experienced body who selected the Committees no doubt believe that it was their duty to have regard rather to the personal capacity of Members and the special claims of localities than to mere Party distinctions; and there can be no question that, if the object is to get a competent and trustworthy tribunal, they have adopted a correct principle. But, fortunately or unfortunately, legislation, however good or wise in itself, is impossible in this country, unless it satisfies the judgment and meets the wishes of a majority of the House of Commons; and so long as this is so, we cannot wonder that the House declines to part with the whole control over the form of its measures to Committees which can, at the best, only imperfectly represent the dominant opinion. It may be said that upon the third reading the majority has ample opportunity to make its influence felt, but as the question then is simply whether the Bill as a whole shall or shall not be adopted, and as the main objections of the majority to it may arise upon and be confined to particular provisions, the power of rejecting it altogether is by no means sufficient for the purpose. It must, therefore, be regarded as probable that the rules will, in this respect, not be changed from their present form; and in that form, according to the Speaker's ruling, they permit the recommittal of a Bill, amended and settled by a Grand Committee, to a Committee of the whole House, in which the process of debating its details and trimming its clauses may be gone through a second time. This is a power which may be so easily and so disastrously abused, that, unless the majority are willing to forego the luxury of recommitting Bills in any but cases of extreme urgency, the prospects of legislation under the new rules will be less hopeful than they ever were before.

455

THE FRENCH REPUBLIC.

THE doubt as to the durability of the Republic in France is producing such serious effects, not only in France, but in Europe, that it is well worth while to inquire once more whether any solid ground can be discerned for fear. In France itself the alarm, whether well grounded or the reverse, is unquestionably real. The educated of all classes state that they almost despair. They believe that nothing but the efforts of the few influential statesmen left prevent the Chamber from entering on a course of legislation which would dissolve all institutions, and allow the anarchical elements of society to come openly to the top. They say that Socialism is gaining ground in the cities, and that every fresh Ministry displays a stronger tendency to coquet with it. The moneyed men, with much more reason, are deploring the condition of the finances, which, they say, the Chamber will not allow to be put straight, are realising their wealth in forms which will admit of its removal, and are restricting alike business and purchases, till the distress among the workmen grows politically dangerous. Outside France the belief grows so strong, that a coming Revolu-tion is made the foundation for grave international An agreement for mutual defence has arrangements. been made between Germany, Austria, and Italy, and alike in Berlin and Rome the statesmen confess that their motive is fear lest a Monarchy should be set up in France, and should seek to strengthen itself by foreign war. Prince Bismarck makes it his first object to be well informed as to French affairs, and is usually, though not always, well served, and he makes no secret of his opinion that the reactionary Revolution is very near at hand. The Italian Government watches France with the eagerness of fear, and declares publicly that Italy is not safe from the hostility of French clerics without a close alliance with Germany.

ECONOMIST. THE

Finally, the French priesthood, who mingle in all societies and hear the secret minds of all classes, evidently believe that whatever may come the Republic is about to pass away. These authorities may all be mistaken. Prince Bismarck despises Republics too much to judge them; the Italians are too angry with events in North Africa to be reasonable; and the French priesthood has repeatedly shown as a body that it cannot thoroughly understand either the objects or the prejudices of the laity. Nevertheless, as all these acute observers are acting on their belief, it deserves attention, the more so because they all expect the new movement not from the people, but from the Army. They all believe that the generals will, on any occurrence giving them a fair excuse, declare the Republic impotent, and place some king, probably the Comte de Paris, on the throne.

It is probable that the discontent of the generals is real, and possible that they have some half-expressed under-standing among themselves. The pacific tendency of the Republic does not please them; they are hurt by the enfeebling of France, and they do not like to see civil government so completely in the ascendant. Though not attacked, they are conscious that they are objects of suspicion and dislike, and they resent the loss of the military ascendancy amid which they have all been bred up since they quitted the military schools. Their discontent may have been expressed to each other, and if so, the strong feeling always manifest in France, that the Army should act as a body, may have produced some understanding. This understanding need not, however, be formidable for the present. The generals, it is certain, have no candidate whom they care about; they have no immediate and producible grievance; and they are not likely to attack the Republic openly and as such. They are not agreed enough for that; they desire exceedingly that the Minister of War should be with them in whatever they do, which at present would not be the case, and they are by no means quite certain of the disposition of the troops. A majority, perhaps, especially of the Bretons, would obey any order, but a minority, including an unusual proportion of the non-commissioned officers, would not, and it is a first object to prevent any contest whatever among the wearers of uniforms. The history of the Spanish Army is much better known to the higher French officers than to Englishmen in general, and that example is greatly dreaded. It is most unlikely, therefore, that the discontent should become active, unless it also seizes the people, and it is on their emotion that everything must in the last resort turn. If the peasantry fancy the Republic a failure the Army will act, and the only question is whether this is probable. On the surface it is not so, but we confess we think the Republicans have some ground for their uneasiness. The French as a people have always shown an excessive devotion to material interests, and are apt to think that any failure in their projects indicates a feeble or an ill-meaning Government. They have not been pleased in this direction of late. Profits have not been large in any department of work, while in the wine-growing districts the losses have been severe. The financial panic caused by the crash of the Union Générale, and of a whole system of speculation, greatly affected the richer peasants and the saving townspeople, who, moreover, have been greatly annoyed by the project of conversion, which they look upon as repudiation of a debt contracted when France was in difficulties. They hold this debt, and the fact that France may save by the operation a million and a-half a year seems to them no compensation for their own diminution of income, which, again, occurs just when they are least able to bear it. They are, too, beginning to be alarmed by what they hear about finance in general, a fact shown by the disinclination to absorb the last issue of Rente, and by the disinclination to absorb the last issue of Rente, and by the increasing pressure of taxation. France is spend-ing, when all taxes are thrown together, thirty per cent. more than England; and although France is a rich country, still the taxation presses upon people at once poor and miserly, and is raised, in addition to the heavy personal tax involved in the conscription, which now falls upon everyone. Under these circumstances, any new tax would evoke bitter resentment; a new and heavy loan, which many consider indispensable, and which would send down Rente, would be felt as a blow; and a short harvest would produce a dangerous amount of distress, and of regret for the more prosperous times of the Empire, when the wealth of France

was so steadily increased. Under such circumstances the opportunity of the generals might speedily arrive. It is in the economic situation that the danger arises, and we see no sign that the Governments which rise and fall every day are able to meet this adequately. The Ministers do not insist upon economy, but, on the contrary, ask the country to undertake new and considerable responsibilities, under the pretext of housing the artisans of Paris. The Chamber is not awake to the situation, but persists in voting fresh credits for unnecessary improvements, such as larger school houses; while the people, though anxious for economy in the abstract, constantly press new demands upon their Members, all of which mean expense. Searching retrenchment is held to be out of the question; new taxation will not be tried; and the great resource of conversion, in which reliance was placed, is mismanaged, partly through popular resistance, and partly through M. Tirard's miscon-ception of the market. He has forgotten that no conversion reassures fundholders, unless they are satisfied it is final. and that 41 per cent. is visibly only a temporary arrangement. The resources of the French Treasury are so great, and it has so many privileges to sell, especially to the railways, that the evil day may be postponed for a time; but the reckoning must come at last, and may produce a panic deep enough to be of political importance. Should it arrive, the peasantry will for a time be both discontented and disenchanted, will accuse their rulers of imbecility, and will submit to almost any change which does not mean a return to the old regime.

THE LOCAL TAXATION DEBATE.

MR PELL's motion on the subject of local taxation, whatever may have been its intention, was better fitted to serve party purposes than to benefit the ratepayers. It was all very well for Mr Pell to maintain that the question is one that ought to be divested of party feeling and party considerations. This no one who really wishes to see the burden of local taxation lightened and more equally distributed is likely to dispute. But no sooner had he laid down this excellent principle than he hastened to depart from it. To tell the House, as he immediately proceeded to do, that the adoption by it in 1872 of a motion somewhat similar in character to his had paved the way for the fall of the first Gladstone Administration, was not the way to eliminate party considerations. On the contrary, it turned what ought to have been a fiscal question into a political issue, and that it was in this latter aspect that it came to be viewed by the House is shown by the strictly party character of the division. The course which Mr Pell ultimately followed was thus the very one which he started, by declar-ing to be antagonistic to the best interests of the ratepayers, and he can hardly be said to have erred from inadvertence. His motion was to the effect that "no further delay should be allowed in granting adequate relief to ratepayers in counties and boroughs." Immediate action was thus what he demanded, and he emphatically denounced an amend-ment which declared that a measure dealing with the whole question of local taxation is most urgently required as falling altogether short of the requirements of the case. But he cannot surely have failed to see that this immediate relief cannot be secured by means of an abstract resolution. No matter whether the help to be given takes the form of a transfer to the State of some of the charges which the local authorities have now to defray, or of the application to local purposes of some of the revenues which now go into the Imperial Treasury, it can only be afforded by the imposition of new taxes. It must, therefore, be provided for when the financial arrangements for the year are being fixed. It was accordingly, when the Budget was under consideration, and not after it has been practically settled, that Mr Pell's motion, if really intended to be effective, for the relief of local rates ought to have been brought formed and and it his real ought to have been brought forward. And why, if his zeal on behalf of the ratepayers is so fervid at it was made to appear, that opportunity of advocating their cause was allowed to pass by it in the opportunity allowed to pass by, it is for Mr Pell and those who support him to explain.

From the tone of the discussion it would appear that

THE ECONOMIST.

somewhat exaggerated notions still prevail, both as to the growth of local burdens and the extent and character of the relief which Government can afford. It is true that of recent years the amount raised by local taxation has enormously increased. In 1868, which is the first year for which we have complete returns, the rates levied in England for local purposes amounted to 16,200,000/, whereas in 1881 the amount taken from the ratepayers was 26,800,000/. During the same interval, however, the rateable value of the property assessed arose from 100,700,000/ to 135,600,000/, and the rate per pound of rental, which in 1868 was 3s 4d, did not in 1881 exceed 3s 11d. In other words, while there was an increase of 65 per cent. in the total amount raised, the levy per pound did not rise more than 17 per cent. If the rates are analysed, moreover, it will be found that a considerable portion of the increase in the charge must be regarded as of the nature of interest on money expended upon the improvement of the property upon which the rates are levied. Taking, for instance, the two years 1871 and 1881, we have the following comparison :—

	1881. £	1871. I £	ncr	ease in 1881. £
Rates wholly or chiefly urban Rates urban or rural	15,688,100 7,274,000			8,143,700 622,200
Rates chiefly or wholly rural	3,585,900	 3,003,700		582,200
	26,548,000	 17,199,900		9,348,100

The great bulk of the growth, it will thus be seen, has been in the urban rates, and a good deal of the expenditure in towns has been upon works calculated to increase the value of the property of the ratepayers. Large sums have no doubt been spent for other purposes, not of special, but of general advantage, such, for example, as upon education, and the hardship of making the burden of such expenditure fall upon real property only is not denied. The Government have explicitly stated that they fully recognise the inequity of the arrangement, and intend to remedy it. This, however, does not alter the fact that the growth of the local expenditure, other than that incurred for the improvement of real property, and which consequently forms a legitimate charge upon such property, is very much less indeed than the great increase in the total amount raised would seem to indicate.

In the course of the debate much was said as to the benefit which would accrue to the occupiers of land from a reduction of the local burdens. But that the farmers would really gain from such a readjustment of rates and taxes as is proposed is extremely doubtful. Although they are paid by the occupiers of land, it is upon its owners that the rates ultimately fall. They are, in fact, a deduction from rent, because rent is only the free balance of produce which remains after all charges have been met. Of course, new rates imposed during the currency of a lease do fall upon the tenants, and there are other cases in which the farmer has to pay a portion of the rates. Broadly speaking, however, it is upon the landlords that the burden of local taxation in rural districts is laid, and it would be they, and not the occupiers, who would benefit by its diminution. We are not, of course, arguing that the landlords may not be entitled to some relief. In considering their case, however, it is necessary to bear in mind, that while in recent years the land has been been been and it is a second to all abarges land has been burdened with new charges, the old charges upon it have been materially lightened. The rate for the relief of the poor, for instance, which at the beginning of the present century amounted to about 3s 4d in the pound, does not now exceed 1s 2d in the pound, and in other hereditary charges upon the land a similar reduc-tion has taken place. When, therefore, relief from the new charges is asked for, it comes to be a question whether compensation for these has not already been given by the diminution in the old already been given by the diminution in the old charges, which were formerly recognised as a legitimate burden upon the land, and subject to which the land has been acquired and held. But however that may be, farmers evidently have not much to expect from a revision of the system of local taxation. For one thing, as houses contribute far more to the local revenues than land, it is to urban and not to rural property that the bulk of any remissions must go; and further, what relief land may receive will be a relief to landlords rather than to tenants. Besides, the farmers must not

forget that they pay taxes as well as rates, and that if rates are reduced by a draft, in some shape or other, upon the Imperial Treasury taxes will have to be raised. Unless, therefore, very great care be taken in the rearrangement of local and Imperial taxation, there is the danger that the relief which those who affect to speak in the name of the agriculturist demand may take the form of a relief from rates which he practically does not pay, by means of the imposition of taxes which he will have to pay.

That is one point to which those who, with Mr Pell, demanded immediate action on the part of the Government did not think it expedient to refer. And another fact which they ignored is, that personal property has to bear by far the largest portion of Imperial taxation. Although, therefore, it may fairly be called upon to contribute to some extent to the local expenditure, it cannot rightly be asked to pay in the same proportion as real property, Besides, there is the difficulty as to the mode in which it can be made to contribute. A Conservative contemporary has sought to solve this problem by the ingenuous suggestion that a portion of the income tax levied in each district should be handed over to the local authorities. But how under such a system would the case of, say, a merchant, whose place of business is in the City, but who resides in the country, be dealt with ? Would his quota of income tax go to the rural or urban authority ? would it be divided between them, and if so, in what proportion; or would the merchant have to pay twice over, being mulcted both at his place of business and his resi-dence? These and similar difficulties were attempted to be got over the other night by a very simple device. "As to the mode of relief," Sir M. Lopes is reported to have said, "provided the relief was real and substantial, they did not care by what means they might get it." He does not care whether it takes the form of grants in-aid, which he admitted have been attended with bad results, because they have led to the undue meddling of Government departments in local affairs, and have thus tended to extravagance in expenditure, or some other form equally or even more objectionable. Money raised anyhow and distributed anyhow, so that it reaches the pockets of some ratepayers, is what he and those who go with him seem to wish for. That was the immediate for which Mr Pell, in his motion, asked, but which relief surely no one could ever expect the Government to grant. The question of local taxation is not to be solved in this off-hand fashion. It is an extremely difficult and complicated question, and it can only be satisfactorily dealt with in the way in which the Government means to deal with it-that is, by a comprehensive measure of reform which shall remodel the local government as well as the local finances.

CONFLICTING JURISDICTION AND THE NEW BANKRUPTCY BILL.

WHEN the Judicature Act was passed, with a view to reform legal procedure in England and to fuse law and equity, Scotch and Irish M embers of Parliament did not imagine that it was an Act which concerned their constituents. Yet it has materially affected them, for the rules and orders made by the judges under the authority of that Act, which were submitted to, but never considered by, Parliament, have rendered Scotchmen, Irishmen, and all foreigners, subject to the jurisdiction of the English courts under certain circumstances. If a foreigner makes a contract either wholly or partially in England, he can be sued in the English courts under Rule 1, which gives the judge power, on an *ex parte* application, to grant leave to serve a writ upon a defendant who resides beyond the jurisdiction of the English courts. Thus, if a tradesman, say, in Edinburgh, writes to a dealer in London ordering goods to be sent by rail to Edinburgh, this, according to English law, is a contract made in London, and it is completed when the goods are delivered to the railway company in London addressed to the Edinburgh tradesman. Under Rule 1, the London dealer who may find it necessary to sue for the goods so sold and delivered is not bound to do so in the Scotch courts. He can proceed with the case in the English courts, and if the Edinburgh tradesman has any defence to the action, it is

in the English courts that he must appear and establish. A Paris tradesman could be summoned in like manner to appear and defend a suit here, but if he did not appear, and allowed judgment to go by default, the English plaintiff would not necessarily recover from the defendant, as the French courts would not recognise the English judgment, and the case would have to be tried on its merits in the French courts before the judgment would be enforced in France. A Frenchman, therefore, does not suffer from the operation of Rule 1. It is otherwise, however, with Scotchmen and Irishmen.

458

By a previous Act of Parliament, judgments made in any of Her Majesty's courts in the United Kingdom are to be morced accordingly. Thus, the Scotch courts are bound to grant execution to the judgment of an English court, and, vice versa, the English courts are bound to recognise and enforce a decree of the Scotch courts. A Scotchman summoned under Rule 1 must not, therefore, if he has any defence, allow a judgment to go against him by default. To make good his defence he must appear to the English writ, and establish his defence in the English court. This rule, which is very obnoxious to Scotchmen especially, has been slightly modified by a subsequent Rule, known as 1a, which provides that in considering applications for leave to serve writs in Scotland or Ireland, the judge in exercising his discretion is to have regard to the existence in the place of residence of the defendant of a local court of limited jurisdiction, having jurisdiction in the matters in question. In the case of White v. McGregor and Son, decided on appeal in November last by Justices Field and Stephen in the Queen's Bench Division, it was held that the courts presided over by the Scotch sheriffs under the Debts Recovery (Scotland) Act, 1867 (by which the jurisdiction is limited to cases not exceeding 50l), are courts of limited jurisdiction within the meaning of Rule 1a. So that while domiciled Scotchmen are apparently not liable to be sued for sums under 50%, they are undoubtedly amenable to the jurisdiction of the English courts in cases above 50/ in amount, where the cause of action has arisen wholly or partially in England.

This has led Scotchmen to watch very carefully the passing of the New Bankruptey Act, lest they should, in some obscure manner, become amenable to its provisions. It has been established beyond doubt, notwithstanding the baneful operation of Rule 1, that a Scotchman cannot be made a bankrupt under the English Bankruptcy Act of 1869, unless he carries on business or resides in England. A judgment can be recovered against him in England, but the English creditor who wishes bankruptcy to follow the non-payment of the judgment debt must take bankruptcy proceedings in the Scotch courts, and the estate of the Scotchman will be administered according to the Scotch Bankruptcy Act. A Scotchman who carries on business or resides in both countries is liable to be made bankrupt in either, and where attempts have been made to make a man bankrupt both in Scotland and England, the English and Scotch courts have decided that as two bankruptcies cannot conveniently exist concurrently, that bankruptcy is to have precedence which was first in point of time.

There is no intention on the part of Mr Chamberlain to make Scotchmen domiciled in Scotland amenable to the New Bankruptcy Act, which was intended for England only. although now it may probably be extended to Ireland, but the Scotchmen are only taking prudent precautions in being properly represented on the Grand Committee on the English Bankruptcy Bill. It is admittedly only a skeleton Bill. The rules and orders under which it is to be worked, and which will make or mar its provisions (just as the careless drawing of the rules and orders under the Act of 1869 has spoiled the beneficial working of that Act), are not yet drawn up. They will in due course be laid on the table of Parliament, but possibly no Member will read them or call attention to them. And these rules and orders might contain some rule as annoying as Rule 1 of the Judicature Act. Mr Chamberlain has, however, adopted an amendment proposed by the Solicitor-General for Scot-land, which will effectually prevent a domiciled Scotchman being made bankrupt under the English Act. As the Bill now stands, a creditor will not be entitled to present a bankruptcy petition unless the debtor is domiciled in Eng-land, or has within a year before the date of the presenta-

tion resided, or had a dwelling-house or place of business, in England.

It is quite clear, however, that to be consistent Mr Chamberlain must reform both the Irish and Scotch bankruptcy laws, otherwise there will be some curious anomalies. English debtors who are conscious of their inability to pass through the English court satisfactorily will migrate to Scotland in order to acquire a domicile there, and be whitewashed under the Scotch Act. This was the practice of dishonest English debtors previous to the passing of the English Act of 1869, as the then existing English Bankruptcy Act was much more stringent in its provisions than the Scotch Act. The present Irish Bankruptcy Act is considered very unsatisfactory. It is on the model of what existed in England before 1869. Official assignees wind up the estates, and declare dividends in a very slow and perfunctory manner. A bankrupt can carry a composition arrangement by a three-fifths majority of the creditors present at the meeting to consider the offer.

The Scotch Act has now been in operation for over 20 years, without any complaints as to the cost of winding-up estates, or as to the efficient manner in which the trustees perform their duties. This satisfactory result is attributable to the fact that trustees are paid a reasonable remuneration proportionate to the magnitude of the assets; that the solicitors' bills are taxed; that the moneys of the estates are paid into separate banking accounts ear-marked with the name of each bankruptcy; and above all, that the accountant in bankruptcy is diligent in seeing that these details of administration are complied with.

details of administration are complied with. Official receivers are, therefore, not necessary in Scotland, so far as the administration of bankrupt estates are concerned. But reckless and improvident trading is encouraged by the easy manner in which a debtor obtains his discharge, and the entire absence in the Scotch laws of any punitory regulations directed against the contracting of debts in a dishonest way, or those other offences of extravagant personal expenditure and reckless speculation by debtors who were insolvent long before they were publiely made bankrupts, and of which glaring examples are periodically, but fruitlessly, brought to light by public examinations which all Scotch bankrupts now undergo. In order, therefore, to secure equal justice in all sections of the kingdom, it seems desirable that in this last respect the Scotch bankruptcy law should also be altered. Scotch creditors should be given the same protection against the fraud or recklessness of their debtors as it intended to give English creditors ; and as it is now proposed to extend the operation of the new English Act to Ireland, such a change in the Scotch regulations would ensure something like uniformity in the treatment of bankrupts throughout the whole kingdom.

THE PROGRESS OF OUR MERCHANT SHIPPING.

THE Board of Trade have now issued their annual series of tables, showing the progress of our merchant shipping, and from these it appears that, notwithstanding the increasing efforts of other nations, our maritime supremacy is being well maintained. We were not, as will be seen from the following table, able to secure last year for our ships so large a proportion of the traffic between this country and foreign ports as in 1881, but still by far the larger portion of the increased traffic was carried by British vessels, and the decrease in the percentage of British to total tonnage is very slight.

TONNAGE OF SAILING and STEAM VESSELS ENGAGED in the FOREIGN TRADE ENTERED and CLEARED with CARGOES and in BALLAST at PORTS in the UNITED KINGDOM, distinguishing BRITISH TONNAGE

To accommodate this growing traffic we have added to accommodate this growing traffic we have added at 1889, considerably to our total tonnage. That increased in 1889,

THE ECONOMIST.

as compared with 1881, by about 267,400 tons, the increase in 1881 being 122,500 tons, and in 1880 only 8,000 tons. Comparatively large, however, as was the augmentation of the tonnage last year, it was relatively less than the increase in entries and clearances, the former having risen 4 per cent., and the latter upwards of 5 per cent. It is noteworthy, too, that although the aggregate tonnage increased, the number of ships registered as belonging to British owners fell from 24,830 in 1881, to 24,706 in 1882. One reason for this is, that the new ships placed on the register are of much larger tonnage than those they supplant, and we were further enabled to carry a larger amount of traffic during the year with a smaller number of ships, because the old sailing vessels are being year by year more completely superseded by steamers. How quickly this substitution is being made the following table will show :--

TONNAGE of the BRITISH MERCHANT NAVY, distinguishing SAILING from STEAM VESSELS.

		1	ncrease o	r		In	crease or
	Sailing.		Decrease.		Steam.	D	ecrease.
Year.	Tons.		Tons.		Tons.		Tons.
1882	3.576.755	-	63,135		3,331,895	+	330,518
1881	3,639,890		159,331		3,001,377	+	280,826
1880	3,799,221	-	345,283		2,720,551	+	777,354
1875	4,144,504	-	361.814		1,943,197	+	831,822
1870	4,506,318		371,928		1,111,375	+	659,023
1860	4,134,390				452,352		

In the number of men also, as well as in the number of ships employed, there has been a progressive decrease, as will be seen from the following :---

STATEMENT showing PROPORTION of MEN (exclusive of MASTERS) EMPLOYED in the Years named therein to every 100 tons of BRITISH SAILING and STEAM VESSELS.

	Sailing	Steam			
Year.	Ships.	Vessels.	1000	Total.	
1882	 2.84	 3.00		2.92

1865	 and and and	 5.56		3.65	
1860	 3.77	 6.53		4.03	

Last year, however, the saving effected by the reduction in the number of men in proportion to tonnage was to some extent counterbalanced by an increase in the rate of wages paid. Yet, although offering better terms, shipowners, it would appear, have had greater difficulty than before in manning their ships with British sailors. At all events, the proportion of foreign to British seamen in our vessels, which had been necessary for a number of years before, showed in 1882, as will be seen from the following table, a further growth :---

NUMBERS of BRITISH and FOREIGN SEAMEN Serving in REGIS-TERED SAILING and STEAM VESSELS of the UNITED KINGDOM (exclusive of River Steamers) Employed in the Home and Foreign Trade, showing the Proportions of Foreign to British Seamen (Masters not included) from 1873 to 1882.

In the shipbuilding even more than in the shipping trade 1882 was a year of activity, the net tonnage of the vessels built being nearly 29 per cent. in excess of the output for 1881, which, in its turn, was larger than the production of any previous year. The figures for the past ten years are:

CANADIAN RAILWAYS AND THEIR DIRECTORS.

IF the two great Canadian railway presidents hear much that they may regard as ill-natured during the next few weeks respecting their recent abortive negotiations they will only have themselves to thank for it. On the 11th inst., the public were startled by an announcement made in the following terms :-- "The presidents of the Grand Trunk and Canadian-Pacific companies have this day forwarded to their general managers in Canada a joint cablegram containing instructions to prepare an agreement with a view to settling all matters of difference between the two companies." When notifications of this kind are officially communicated to the public they are naturally regarded as authentic; and so in the letter they were, only the instructions forwarded to the respective managers turned out to be unworkable instructions. The public will think that no one ought to have known better they were unworkable than the presi-dents themselves. The market prices of Grand Trunk stocks advanced considerably, and those securities—at all favourites with gamblers - were dealt in with times redoubled energy. It soon appeared that there were matters requiring further consideration, one of the principal being the purchaser of Ontario and Quebec line, duplicating an important section of the Grand Trunk system, which, though intimately connected with the Canadian-Pacific, was nevertheless not that company's property. This duplicate line it was a prime necessity for the Grand Trunk to secure, and the terms of purchase would naturally involve much con-sideration, as well as a considerable further outlay to complete and connect it with the Grand Trunk system. Still, the disappointment was great when on the 16th, Mr Stephen, the president of the Canadian-Pacific, wrote-"Our united attempts to harmonise the interests of the Grand Trunk and Canadian-Pacific Railways have proved, I fear, for the present at all events, impracticableIt would serve no good purpose to enter into the details of all the objections which have been encountered. beyond stating that the control of the Ontario and Quebec. contrary to my expections, cannot be surrendered to the Grand Trunk Railway It will be my endeavour to maintain the most friendly relations with your company in every way consistent with the interests of the Canadian-Pacific." The fall in market prices has been decided, although not so great as the previous rise had been, because the public still appear to entertain hopes that excessive competition may be prevented.

It would seem from the foregoing that Mr Stephen had promised what he could not perform, and that the blame was therefore his. We do not, however, know the nature of the proposals to the Ontario and Quebec; and both presidents were very well aware that there would be a strong feeling in Canada against the agreement. For ourselves, we were more surprised at the notification of the agreement than at its subsequent rupture. Those who heard the speeches of Sir Henry Tyler and Mr Abbot at the Grand Trunk meeting on the 29th March could not be but impressed with the hostility to the Canadian-Pacific they displayed, and the outspoken reply of Mr Stephen so late as the 5th instant was apparently the last thing in the world to promote conciliation. Yet the rival presidents met on the 6th, and the rest of the short-lived negotiation has already been told.

But, it will be asked, where is the necessity for the hostility hitherto displayed by the Grand Trunk and the Canadian-Pacific companies? The Canadian-Pacific was started with the aid of the Dominion and a powerful financial group in Canada and New York, for the express

purpose of connecting British Columbia, the North-West, and Manitoba in unbroken railway communication with Montreal; and as the Grand Trunk draws little traffic from the North-West, and as its system lies mainly South-West of Montreal, while the Canadian-Pacific starts direct North-West, so as to round Lakes Huron and Superior, their districts would appear to be defined with sufficient distinctness. Besides although, the Canadian-Pacific aims at becoming a great colonising undertaking, that also in no way interferes with the Grand Trunk. This, however, does not go below the surface; and there is more to tell. For many years the Grand Trunk has not been viewed with favour by the people of Canada. Their own money is not embarked in it, and it has been regarded as an autrocratic undertaking, in the management of which the Canadians themselves have had no voice whatever. In addition, the Grand Trunk made powerful enemies South of the Border, there being great competition with the Vanderbilt lines and with the Great Western, competition which was increased when the Chicago and Grand Trunk was brought into operation. Then came proposals for a railway running from Ottawa to Toronto, the directorate of which would be in Canadian hands-a line which would connect the Canadian-Pacific with the Great Western; while at the same time friendly relations were suggested between the Canadian-Pacific and the Vanderbilt lines, not only in the South-West, but also at Montreal. The result would have been that the Grand Trunk would have been gridironed by hostile lines, and the Great Western of Canada would have been in a position to compete with the Grand Trunk all the way up to Montreal. This explains the high and successful bid for the Great Western of Canada made by the Grand Trunk nearly twelve months ago, and the large number of agreements since then submitted to the Grand Trunk proprietory for their approval and sanction. There Trunk proprietory for their approval and sanction. is another important point at which their traffic is threatened, and that is on the great lakes, traffic being now brought down by steamer to Sarnia and Port Huron. Altogether, the Grand Trunk have found it absolutely necessary to strengthen themselves as much as possible against this threatened rivalry, especially as Canadian sympathies run so largely with their rivals. Beyond this it is understood that when the Great Western was absorbed many of that company's officials went over to the Canadian-Pacific, and thus the hostility extended through the different ranks of the service. There is thus every reason why the Grand Trunk should be willing to come to terms with their rivals, and, above all things, to acquire control of the independent route from Toronto to Quebec while yet it is incomplete. In spite of the rapid expansion in Grand Trunk traffic, this is a very anxious time for the management, and one in which a conciliatory policy should, where possible, be adopted.

But though public opinion in Canada would certainly be adverse to any *rapprochement* between the Grand Trunk and the Canadian-Pacific, it is probable that the latter would also be more benefited by an amicable interchange of traffic than by hostilities, with the usual accompaniments of cutting down rates and competing train services. We will take it for granted, therefore, that both presidents were sincere in their efforts to come to terms; and probably it was present to their minds that if they had conducted their negotiations in secret they might have laid themselves open to charges of unduly withholding important information. Nevertheless, the soreness of many a purchaser of stock after the official announcement of the 11th inst. is, we think, fully justified. That announcement was far too imperative in tone, for the words "instructions to prepare an agreement" turned out only to mean "instructions to see if such an agreement could by any possibility be prepared."

THE INDIAN BUDGET.

(FROM OUR INDIAN CORRESPONDENT.)

THE Budget statement published by Major Baring deserves more attention than it is possible in a short letter to give to it. It is profuse in interesting "asides" about the corn trades of America and India, the future of opium, and the

concentration of anxious responsibilities on the Government of India resultant from the decentralisation of finance. It apologises for the absence of any public discussion on the financial situation, without, however, promising any future consideration of the half-dozen remedies which might be provided against the repetition of a similar inconvenience. It admits that the technicalities of Indian finance are a labyrinth in which many inquirers have lost themselves, and remarks that a leading London newspaper, in reviewing the Budget of last year, made a mistake of two millions in its reading of the Estimates, and it naively challenges criticism by the frankness with which its author anticipates that his surplus of 59,8007 will be turned by the adverse critic into a deficit of 1,465,600%. The explanation of this patent reversible balance, be it surplus or deficit, will serve to develop the financial situation of the year that is about to close.

After providing the full premium of one and a-half million sterling for insuring India against the recurrence of chronic famine, after payment of the unexpected charge of 797,0001 for the Egyptian expedition, and meeting an unforeseen loss by exchange, which exceeded the esti-mate by 340,600*l*, the year ending on March 31 next is expected to close with a balance of 60,000/, instead of an estimated surplus of 285,000%. But as a matter of fact, the expenditure of the year has far exceeded the year's income. There is a nominal deficit of 1,465,600%, and by what process this is converted into a surplus must now be explained. The receipts of the year, exclusive of debt, deposits, and advances, are estimated at 67,913,9001; and the total expenditure of the year charged against revenue at 69,379,500%. But the accounts, which thus balance with a deficit of nearly one and a-half million, are the accounts not merely of the Government of India, but also of its junior partners, the local governments, who are put upon an allowance. These partners sometimes spend more than their annual allowance and sometimes less. In the latter case their unexpended balance accumulates as a reserve on which they may draw. As they spend their balances in any particular year the excess expenditure is a charge upon the Government of India, and increasing pro tanto the expenditure of the year in question. But it is a charge not against the revenues of the particular year, but against the balance carried over from previous years. It would be absurd to convert the real surplus of a par-ticular year into a deficit because a local government had drawn a sum equivalent to that surplus, or even exceeding it, from the balance standing to its credit on the last day of the previous year. On the other hand, it is quite possible that the local governments may not spend even the whole of their annual allowances, and it would be equally delusive to regard their economy as constituting a surplus merely because they have deferred drawing on their accounts until after March 31 in any particular year. Under these circumstances Major Baring shows first the total expenditure and the total income. He then deducts the amount which local governments have drawn in excess of their annual income, against their balances of previous years, and adds the portion of their allowance for the year under review, which they have not drawn in that year, and which, there fore, is a debt due by the Government of India to them. The net result is the expenditure of the year added to the unexpended, but appropriated, receipts of the year, reduced by the drawings on the balances of previous years credited to the local the local governments, which gives a surplus of 59,800. That the revenues of 1882-3 have been enabled to bear the strain of war and local local to bear the strain of war and loss by exchange is due to a general increase of almost every branch of revenue, and Major Baring is again able to the structure of India Baring is again able to describe the finances of India, despite the indolence and poverty of the country, as elastic. The revenue of Bombay, which is administered with greater economy than that of other parts of India, THE ECONOMIST.

April 21, 1883.]

again comes to the rescue, with a saving of 172,000l; forests show an improvement of 107,000l; Excise of 288,000l. The salt revenue brings in 80,000l more, and costs 139,000l less to collect; Customs give an increase of 91,000l, and the wise policy of pushing on railways is illustrated by an increase of 225,000l. In a previous letter, I explained that the special correspondents of the *Times* were entirely mistaken in anticipating a deficit in the salt estimates. On the contrary, I estimated a surplus, and the Budget confirms that anticipation. It appears that the expectation of a substantial relief to the consumer of salt has been justified. Last year the price of a maund of salt in Bengal, Punjaub, Bombay, and Madras was 9s, 7s 3d, 6s, and 6s 4d respectively. Consumption has increased by 6 per cent. in Bengal, 7½ in Bombay, and 14 per cent. in Madras. If the same rate of increase continues, the salt revenue at the reduced rate of duty will in less than three years more stand at the same figure that it did prior to the reduction. This is a very satisfactory result of a great experiment, especially when it is remembered that the reduction has created a financial reserve which, amidst the uncertainties of opium exchange and famine, is almost the only direction in which the Indian Government can look for prompt assistance in time of trouble.

Some disappointment will be felt that under present circumstances the Government of India have left the licence tax under the ban of condemnation, and yet have shirked the difficulty of reforming it. The unequal distribution of the burden of Indian taxation is not removed by the reduction of the salt tax. Lord Ripon has done so much for native society, that he might with confidence risk a little unpopularity by demanding from the wealthier classes of Indian society a fair contribution towards the expenses of a Government from which they derive such exceptional advantages. The licence tax is the only form of direct taxation levied in Indua. It is probably the worst form, and its retention is only justified as a transition to a more equitably assessed direct tax. The outcry against it has entirely sub-sided. So true is it in India that society acquiesces in any burden with which it is familiar. But the licence tax could never be increased on emergency without difficulty, inasmuch as the wealthier classes of natives, who make fortunes out of litigation, or enjoy in idleness landed estates which are rack-rented, are not called on to pay it. Several changes have been made in the forms of account, which certainly facilitate their comprehension, but add another break of guage to harass the inquirer who wishes to follow the financial history of India through a course of years. One an only trust that the alteration will be the last. Major Baring, in reviewing the history of the last eleven years of Indian finance, finds a deficit of 1,265,837*l*, which, he remarks, must be regarded as satisfactory, when it is remembered that two severe famine campaigns and one serious war have been waged in that period.

The Budget estimates for the coming year are framed to show a surplus of 457,0001. The opium revenue is taken at 182,000l below the revised estimate of the present year, and higher expenditure under exchange is anticipated. On the other hand, the expenditure on land revenue, Customs, and frontier railways will be much reduced, and this enables the Government to expect a surplus without resort to additional taxation. The famine insurance fund is also provided. It is idle to speculate on the uncertainties of Indian administration. The whole tone of the Budget reflects the anxiety with which the Government of India dip into the future. The elasticity of Indian finance is hopefully acknowledged, and it is a fact which cannot be contradicted. But the spectre of famine and the failure of an opium crop ever stand behind the door. At the present moment two out of the three opium crops are attacked by blight and caterpillars, whilst the weather-wise predict a failure of crops in parts of the Punjaub and Bombay. The effects of a failure of the opium crop are not immediate; but a famine immediately upsets all calculations, and its recurrence is not only a calamity which no human foresight can avert, but it is also one which cannot be foreseen until its terrible results are actually visible in paralysed industry and starving population.

Calcutta, March 31, 1883.

BUSINESS NOTES.

THE CONVERSION OF THE FRENCH 5 PER CENT. RENTES. The letter of our Paris correspondent deals sufficiently with the details of the scheme for the conversion of the French 5 per Cent. Rentes, and the probable results of the operation. It is not necessary, therefore, to deal with it further, save to say that to people on this side the proposal of the Government seems to be one of those hesitating, half-hearted measures which almost invariably do harm. The credit of France, although it has latterly been impaired, is still sufficiently good to entitle her to borrow at less than $4\frac{1}{2}$ per cent., and if the rate of interest on the debt is to be cut down, it would be better in every way that it should at once be reduced to a more reasonable level. There would then be some prospect, not of finality, but at least of permanence in the new arrangement, whereas the reduction merely from 5 to 41 per cent. will certainly be regarded as only a tentative step, intended to pave the way for a still greater reduction in the future. The uncertainty which has lately attended the holding of the Five per Cents. will thus be perpetuated, to the detriment alike of the fundholders and of the Government, which will incur all the odium attaching to a diminution of the income of the saving classes of the people, without reaping anything like the advantage from a conversion that might be obtained. If any proof of the evils of a hesitating policy of this kind is needed, it will be found in the different conditions under which the conversion must now be carried out from those under which it could have been effected if it had been undertaken some years ago. Then the state of the finances was, superficially at all events, prosperous, and the operation would have appeared to be but the natural result of the improved credit of the State. Now, on the contrary, the financial position is strained, and the fundholders will inevitably complain that they have been sacrificed in order to effect a balance of the Budget, which ought rightly to have been achieved not by demanding sacrifices from one section of the people only, but by calling upon all for some greater effort.

THE LIABILITY OF STOCKBROKERS.-The Court of Appeal has this week decided a case of considerable importance to stockbrokers. A firm of brokers in Manchester were instructed by a Mr Beckett, who professed to act on the directions of the executors of his father's will, to sell 2,212*l* worth of North British preference stock. The order was executed and the proceeds of the sale, partly in other stocks and partly in cash, were paid over to Mr Beckett. After the transaction was completed, however, the North British Railway Company were informed that Mr Beckett had not been properly authorised to act on behalf of the executors, and they thereupon refused to register the transfer of the shares. Subsequently, Mr. Beckett absconded, and the brokers then raised an action against the executors and the railway company, to compel them either to transfer the stock, or to pay the amount that Mr Beckett had received for it. Mr Justice Manisty, however, before whom the case was first heard, decided in favour of the defendants, and this judgment the Court of Appeal has maintained. In both courts it was held that the brokers had acted on their own risk with a person who was neither a principal nor an agent of the defendants, and that they must bear the loss which this action had resulted in. And in view of this decision, it is evident that stockbrokers cannot be too careful in satisfying themselves of the responsibility of those with whom they do business.

THE "THROUGH-BOOKING" OF INDIAN PRODUCE.—The cheapening of the cost of conveyance of Eastern produce to the English market is about the most important factor in the development of our Eastern trade. Sir William Andrew, the chairman of the Scinde Railway, has recently made a contribution to the question, which is, at any rate, worthy of consideration. He has proposed that the railway companies should be empowered to receive up-country produce booked-through direct to London, thus avoiding the cartage, storage, and middleman's charges at the port

of shipment in India, and cheapening the cost of conveyance. Such a system could only be carried on effectively in conjunction with regular lines of steamers; but it is pointed out, that by issuing through bills of lading the payment of the cost of railway carriage could be transferred to London, instead of, as at present, being met in India, where money rules higher, and where the railway companies are in possession of much larger funds than they need. Some millions sterling yearly of the India Council bills are drawn for the remittance of these railway funds to this country for the payment of interest on capital, and if the railway companies could to any material extent receive payment in London for work done, such drawings on the part of the Indian Government could correspondingly be reduced. There are, however, many points to be considered in a matter of this sort, where long-established custom has to be upset. Bombay and Calcutta merchants would naturally oppose such an innovation, and then there is the difficulty of sorting produce properly in comparatively small quantities up-country; in fitting in train arrivals with shipping departures; and other points which would make the organisation of such a system difficult. We have here one of those proposals which, if directed by men well-skilled in the technical requirements of trade, might possibly be made a success; but in any ordinary hands it would probably be a failure.

OUB TREATY WITH SIAM .- The agreement we have entered into with Siam for regulating the traffic in spirituous liquors with that country, marks, it is to be hoped, a new departure with regard to this branch of our foreign trade. The treaty provides that spirits of all kinds, not exceeding in alcoholic strength those permitted to be manufactured in Siam itself, may be imported and sold by British subjects, on payment of the same duty as is levied by the Siamese excise laws upon spirits manufactured in Siam, spirits of greater alcoholic strength being also permitted to enter on payment of an additional duty, proportionate to their excess over the Siamese standard. By another article, however, it is provided that the Siamese Government may stop the importation of any spirits that on examination are proved to be deleterious to the public health. Care is taken that the examination is to be independently conducted, the testing being carried out by European officials nominated by the Siamese authorities, and an equal number of experts nominated by Her Majesty's Consul. Thus safeguarded, there is no danger of the legitimate interests of the British shippers being injured, while the Siamese will be protected from a traffic which, in too many instances, has proved the cause of deadly injury to others with whom we have traded. We have, in a manner, forced upon them spirituous liquors which might much more appropriately have been designated poisons, and it will be alike to our credit and our advantage if we can aid those with whom we have relations in suppressing so iniquitous a traffic.

THE RETIREMENT OF JAY GOULD .- There will not be many men in this country found to regret the retirement from business of the greatest speculator in America, one who has done more than any other man ever did to discredit American railroad securities in the eyes of British investors. There is, however, always a temptation to such a man, who has so long been accustomed to the excitement of the gambler's life, to return to his old haunts; and the chances are that Gould will not be able to tear himself away for any length of time from the city where he has amassed, according to one high-flown estimate, a fortune of twenty millions sterling. Only a few months back a New York paper stated his fortune at \$40,000,000, or eight millions sterling, and which is the more accurate estimate we need not stop to inquire. We cannot call to mind out of all the railroads he has controlled, or does still control, a single instance in which British investors have ever made money; certainly they have not done so over the Wabash undertaking, a good deal of the capital of which was introduced here in 1881, and has since fallen heavily in the market. But what we must ever most associate the names of Fisk, Junior, and Gould, with is their scandalous mismanagement of the Erie Company some

ten years ago. The record of how the Erie share capital was "watered" from \$16,000,000 to \$78,000,000 in a couple of years; how a judge of New York State was kept in their pay to give decisions as they wanted them; how an opera-house was maintained in New York; and, finally, how Gould was only removed by General Sickles out-bidding him for the votes of his brother directors, have not yet been forgotten, at any rate, in this country.

INDIAN BANKING PROFITS.—It will be seen from the following table that the profits of the Indian banks were in each case larger in 1882 than in 1881, and that in two cases they were distinctly better than in 1880 :—

NET PRO					
	1882. £		1881. £		1960.
Agra	77,424		70,086		85,000
Chartered of India, Australia, and China Chartered Mercantile of India, London,	86,493	*******	56,197	********	61,23
and China	30,002		-1.345		64.58
National of India	24,932		-24,789		97 71
Oriental	61,185		46,194	40 0 0 0 0 0 0 0 0 0	21,71
	280,056		146,343	********	292,75

This result, obtained in the face of the adverse exchange at the close of the year, is certainly encouraging.

FAILURES IN THE UNITED STATES.—We have received from Messrs R. G. Dunn and Co. the following comparative statement of the failures in the United States and Canada in the first quarters of the current and each of the two past years :—

Second should be		er ending 31, 1883.		r ending 31, 1882.	Quarte March	r ending \$1, 1881.
States and Territories.	No. of Failures	Amount of Liabilities.	No. of Failures	Amount of Liabilities.	No. of Failures	Amount of Liabilities
		8		8		1
Eastern States	297	2,048,567	229	5,112,876		2,518,46
Middle States	643	12,774,563	506	10,608,612		10,906,80
Southern States	693	6,551,841	700	11,087,250		5,510,33
Western States Pacific States and Terri-	899	13,805,724	523	5,201,533	438	4,192,84
tories	274	2,388,512	167	1,328,000	124	1,518,60
Total	2,806	37,569,207	2,127	33,338,271	1,761	24,447,95
Dominion of Canada	398	5,356,482	206	2,653,825	166	2,036,54

The showing here made by Canada is particularly unfavouable. As compared with the corresponding period of 1882, there was last quarter an increase of about 100 per cent, both in the number of failures and in the amount of the liabilities. That is an enormous growth, and its importance is all the greater, because it accords with other figures, such, for instance, as those contained in the returns of the Canadian banks, which go to show that of late business in the Dominion has, owing to an excess of speculation, got into a less healthy state than is desirable. The United States also show a considerable increase in the number of failures, for which probably the unsettlement of business caused by legislative tinkering at the tariff is largely responsible.

THE CANADIAN TARIFF.—In his Budget speech, Sir Leonard Tilley announced a number of alterations in the Canadian tariff. The changes are on the following articles the duty has been decreased, and the rate is as follows: Buckram, 10 per cent.; button covers, 10 per cent.; coal dust, 20 per cent ad valoren; fruit, dried, 20 per cent.; cloth of other materials than cotton or woollen, made uniform, 30 per cent.; ether, sulphuric, and nitric, 30 per cent.; india-rubber clothing made water proof, 35 per cent.; magic lanterns and optical instruments, 25 per cent.; woollen hosiery the same as woollen clothing; dress and costume cloths under 25 inches and weighing not more than three ounces per square yard, 20 per cent.; yarns of wool or worsted two ply or more, different colours, combined, or mohair yarns, white or any colour, imported ky manufacturers, 20 per cent. On the following articles the duty has been increased : Acids, acetics, 15 cents per gallon; other acids, 25 per cent.; absinthe, \$2 per gallon; anime dyes, less than five pound packages, 10 per cent.; agriculturalimplements and machines to pay specific and advaloren duties equal to 35 per cent.; portable machines, spades, hos carriages to pay specific and ad valorem duties equal to 35 per cent.; carriages, children's, same as above; cordage,

THE ECONOMIST.

all kinds, 20 per cent.; cotton, printed or dyed, 27½ per cent. on 1st day of January, 1884; cases, jewel, watch and similar cases, 30 per cent.; drain and sewer pipes, glazed, 25 per cent.; furniture, iron bedsteads included, is charged 35 per cent. ; show cases to be charged \$2 each specific and 35 per cent.; show cases to be charged 52 each specific and 35 per cent.; hair cloth, 30 per cent.; jute, carpeting, matting, or mats, 25 per cent., ad valorem; lamp wicks, 30 per cent.; music, printed, 10 cents per lb; paper, wall and fancy papers, 30 per cent.; pumps, 50 cents each specific, to be added to present 25 per cent, ad valorem; steel, in ingots, bars, sheets, and coils, to pay \$5 per ton on and after July 1 next; files, specific, under nine inches in length 5 cents; nine inches and over 3 cents per lb; in length, 5 cents; nine inches and over, 3 cents per lb; tin crystals, 20 per cent.

The above return, compared with that for the preceding week, exhibits the following changes :-

INCREASE. france. Treasury account 5,121,619 Private deposits 8,868,801 Cash 7,115,861	Circulation Decrease.	francs. 7,701,445 25,734,846
--	-----------------------	------------------------------------

Money for discount is scarcely so easy as last week, 23 being, now the minimum rate. London bills have been offered, and the exchange is weaker at 25f 221c. There are no specie movements of note to be recorded, the small exports of gold to Holland having now ceased. The Bank has gained both gold and silver from the circulation, the reserve to-day being com-posed as follows :--

Gold	April 19. francs. 996,751,472 1,045,431,379		April 12. francs. 992,431,470 1,042,635,520
All doubts as to the refu	2,042,182,851	Five p	2,035,066,990
an end to to-day by the M	unding of the		er Cents, were pr

er of Finance presenting a Bill

for a reduction of interest to 41 per cent. from the 16th August next, with a guarantee against any further conversion for five years. Fundholders who do not demand the reimbursement at par within ten days after notice is given will be held to have accepted the conversion. The Five per Cent. Rentes had been in an unsettled state during the week, from a rumour that the Government had at last resolved on a refunding of that stock. A leading Opportunist journal, which is supposed to receive in-spiration from the Cabinet, had even announced the method the Government had decided on—a simple reduction of interest from 5 to $4\frac{1}{2}$ per cent. by stamping the scrip—and the date when the Bill would be laid before the Chamber. This time the This time the Government did not contradict the statement, but confined itself

to publishing a note, declaring that the journal in question had spoken without authority. It remains to be seen what use the Government will make of the 35 millions thus saved. The great financial diffi-culty with which it has to contend arises from M. de Freycinet's great scheme of public works, which it has not the means to carry out, and not the courage to abandon. This comprises the construction of an immense number of railways, which for many years would not cover their working expenses, and it is now treating with the great railway companies to induce them to relieve it of the burden. It was thought that until the negoti-ations were terminated the Government might reserve its decision with regard to the refunding operation, as its future course must depend on their success or failure.

The Minister of Finance comprises among his receipts in the Ordinary Budget for 1884 a sum of 35 millions, to be obtained from reimbursements of the debt incurred by some of the from reinbursements of the dect incurred by some of the companies under their guarantee of interest, paid from their surplus profits; but if the companies accept the proposed con-vention, and undertake the execution of the new lines, they will be allowed to retain those 35 millions, at least, for a time, to cover the interest on the new capital they will have to raise. The conversion from 5 to 4½ per cent. will produce just the 35 millions required to fill up the void left by the abandonment of the reimbursements from the companies. If, however, the negotiations fall through, which is quite possible, as they negotiations fall through, which is quite possible, as they are said to have made little progress, and the State is compelled to undertake the works, a different course will have to be followed. The Minister of Finance has not yet presented his Extraordinary Budget for 1884, having deferred it until he knows the decision of the railway companies; but he has only a balance of 13 millions in his Ordinary Budget for the interest of a loan of 300 millions, which he admits he will have to raise for public works in 1884. But it is certain that if the companies do not undertake to make the railways, the Minister companies do not undertake to make the railways, the Minister will require not 300 millions, but 700 or 800 millions for 1884, and the present refunding will procure the interest for this new issue of Rentes. The reduction to $4\frac{1}{2}$ per cent. will facilitate the negotiations with the railway companies, by enabling the m to raise the new capital they will require at a lower rate of interest. The conversion had been already almost discounted, and there need be no apprehensions of it giving rise to any difficulty, although the objection was made that the Government could not undertake such a great operation while the greater part of he last loan was still unclassed. The Five per Cents. closed yesterday at 112f 85c, and as a coupon of 1f 25c will be taken off at the end of the month, the present price coming out at about 111f 60c, while the $4\frac{1}{2}$ per Cents. were quoted 111. There was consequently a difference of only 60 centimes between the price of the Fives and of the Four and a Halfs. The Govern-ment will probably extend to the old $4\frac{1}{2}$ per cent stock, of which there is $37\frac{1}{2}$ millions of Rente, or about 880 millions in capital. to raise the new capital they will require at a lower rate of interest. ment will probably extend to the old $4\frac{1}{2}$ per cent stock, of which there is $37\frac{1}{2}$ millions of Rente, or about 880 millions in capital, in the hat 3 of the public, or there would be two classes of $4\frac{1}{2}$ per Cents. on the market at the same time, one redeemable, the other free from redemption for five years. One hope must now be abandoned. M Léon Say when in office refused to refund the Five per Cents., for the reason that the bonus that might be obtained should be reserved for some great scheme for a reducobtained should be reserved for some great scheme for a reduction of taxation. At present there can be no idea of lightening the burden on the taxpayer for very many years. The country the burden on the taxpayer for very many years. The country is now paying the penalty of extravagance, for which the Parlia-ment is as much to blame as the Government.

Although the presentation of the Bill for the conversion was known before the close of business on the Bourse, it produced little effect, the last price being only 30 centimes lower than the opening price of the day. The following were the closing quotations compared with last week :--

The indirect taxes in France in the first quarter of the year produced 537,412,000f, which was a deficit of 57,154,000f on the estimates but an increase on the same three months of 1882. This result is not unsatisfactory, as it shows a fair progression in the revenue, although the deficit in the estimates, if continued to the year, may cause some embarrassment to the Finance. Under the system followed previous the end of Minister of Finance. Under the system followed previous to the present year the receipts would have represented a surplus of 15 millions on the estimates, and it is to those apparent surpluses that much of the present financial difficulties are due, as the announcement of surpluses of a hundred millions are due, as the ashouncement of surpluses of a hundred mining a year encouraged extravagance in the expenditure, and in-opportune demands for reductions of taxation. To check that abuse M. Leon Say, in the Budget for 1883, adopted a new practice. The surpluses were previously obtained by fixing the practice. The surpluses were previously obtained by fixing the estimates below the sum that might be counted on. Under the old system the receipts for 1883 would have been fixed at the amount realised in 1881, no account being taken of the increase in the intermediate year. M. Leon Say for the first time added to the receipts of 1881 the expected increase in 1882, which he calcu-Interfect pix of 100 the expected interacts in 1002, which he event lated on the average augmentation in the five years 1877 to 1881, and which was about 84 millions. But since his Budget was brought forward, at the commencement of last year, the elasticity of the revenuehas ceased; the increase in 1882 on 1881 was only 4 millions instead of 106 millions in 1881 compared with 1880, and the consequence will probably be a deficit at the end of the year instead of a surplus. Compared with 1882, the only diminution of note is that of 74 millions in the revenue from registration dues, which may be accounted for by the falling off in the number of new companies, transfers of house property, and the general stagnation in the circulation of property, which is one of the effects of the financial crisis. The income from taxation on articles of consumption has increased; Customs duties gained 5 millions; alcohols nearly 3; tobacco, $3\frac{1}{2}$; sugar, $4\frac{1}{2}$; and the Post-office, $1\frac{1}{2}$ million. The tax on the interests and dividends of public companies and partnerships showed no diminution, as might have been expected, producing 11,712,000f in the quarter against 11,611,000f in 1882, and the direct taxes were collected in a satisfactory manner. lated on the average augmentation in the five years 1877 to 1881, and collected in a satisfactory manner.

There was a recovery in the amount of new issues of public securities in the first quarter of the years compared with 1882, but it was still far below the amount in 1881, before the crisis. The capital offered for public subscription the first quarter of each of the last four years was as follows :-

Year.	Tumber o Issues.	of	Capital Demanded. francs.	Nominal Capital. francs.	
1883			502,314,960	 714,104,000	
1882			269,213,750	 460,235,000	
1881			1,228,772,888	 1,379,810,000	
1880	. 41	******	1,086,487,636	 1,725,568,000	

The principal issues were, in nominal capital, Crédit Foncier bonds, 600 millions; Belgian Crédit Commercial et Agricole, 30 millions; Thessaly Railways, 23 millions; Paris Omnibus Company bonds, 14,333,000f; French Electrical Power Storage Company, 12,500,000f, &c.

The suicide of a Paris merchant has thrown a light on a big speculation in colza oils, the centre of which was in Paris, but which extended over the principal markets in Germany. A syndicate of "capitalists have for some months past been endeavouring to make a "corner" in that article, and by continued purchases the price has risen from 75 francs to 105f, and even to 110f, per 100 kilos. The syndicate had at last on its hands the greater part of 45.000 tons of oil which had heap hought is 110f, per 100 kilos. The syndicate had at last on its hands the greater part of 45,000 tons of oil, which had been bought in the operation. Realisation was difficult, and the speculation has collapsed from the inability of the buyers to take up the purchases. On Thursday evening last colar for present delivery or two months forward closed at 106f. The catastrophe occurred on Friday morning, and the sensation caused by the death of M. Biderman was such that all business on the market for oils was suspended. The opening prices on Saturday morn for oils was suspended. The opening prices on Saturday morn-ing was 85f. There was a subsequent recovery to 96f on the announcement that a leading merchant and banker had under-taken the liquidation of the engagements, but the price has since declined to 90f.

Transactions in cotton at Havre are difficult, but the advices from abroad being favourable to holders, rates are maintained, and no changes were made in the last weekly revision of the price current by the Syndicate of Brokers. Yarns are also held

firmly, and the better sorts are sold in advance, the Rouen spinners being employed in executing orders. Few buyers have visited the district during the past week, but orders are received by correspondence, and the consignments continue to be active. All hand-made goods meet with a ready sale, and the season for prints being over, manufacturers have turned their attention to goods suitable for the Algerian market. The makers of The makers of woollens in the north are well occupied in the production of fine black cloths, but there is little demand for fancy goods and trouserings, English and German stuffs obtaining a preference. The largest Paris house in the ready-made clothing trade announces that it has opened workshops for making up stock in London, and it may be inferred that only English materials will be employed there and imported here.

Prices of linen yarn and tissues are still rising, and stocks are run out. Better advices are received from the Lyons district, and the number of bales of silk that passed through the weighing house last week was 1,455, against 1,145 in the same week of 1882.

An abstract of the monthly Customs tables, issued in advance, gives the following as the amount of the foreign trade of France in the first quarter of the year :-

I	MPORTS.	
Food Raw materials Manufactures Divers	1883. francs. 419,055,000 573,256,000 168,463,000 60,078,000 1,220,852,000	 1882. francs. 388,567,000 588,316,000 192,477,000 66,302,000 1,230,662,000
1	£48,834,080	 £49,226,480
Food Raw materials Manufactures Divers	1883. francs. 194,860,000 164,426,000 424,373,000 47,400,000 831,059,000 £33,242,360	 1882, francs. 181,240,000 169,425,000 416,291,000 39,550,000 806,506,000 £32,260,240

The foreign trade in March amounted, imports and exports combined, to 838,038,003f in 1883, against 799,665,000f in 1882, an increase of 4³/₄ per cent. There was in March, compared with last year, in the imports an increase of 15 millions in food and of nearly six millions in raw materials, but a decrease of three millions in manufactures ; in the exports, food increased 2 millions, raw materials 7 millions, and manufactures 8 millions.

GERMANY AND AUSTRIA.

(FROM OUR OWN CORRESPONDENT.)

VIENNA, April 16.

The Emperor William's Message to the German Reichstag, in which he begs the Members to accelerate, in the interest of the people, the progress of Parliamentary business, has impressed the public greatly. It is to be hoped that the Message will have some effect, because the Bills affecting the safety and welfare of the workmen are really being discussed with too much loquacious-ness and loss of time. The Reichsrath should consider that laws never were made perfect at the very outset, and that they can be changed at any future time, if recognity, demands a change. be changed at any future time if necessity demands a change. But the Emperor's Message will no doubt meet with opposition, because it demands that the Budget for 1884-5 be voted first. For if the social Bills are in such a very unsatisfactory position, the discussion of the Budget might surely be postponed until after they have been passed. Hence the fear is sure to arise that in some manner the two-years' Budget which has been rejected will be brought forward again.

rejected will be brought forward again. The syndicate which has undertaken to convert the Hun-garian Gold Rente has settled the terms for the exchange of the bonds. The 6 per cent. bonds will be calculated at 102½ per cent., and the 4 per cent. bonds at 76½ per cent. (Berlin quotation.) By far the greater part of the titles of 6 per cent bonds are in Gormany. There is a high tax to be paid for the stamping of the new titles, so that the profits of the syndicate will be very slight—not higher, it is supposed, than ‡ per cent. The complete success of the resumption of cash payments in Italy has caused a deep impression in Austria, and the Press has commented on the subject with mingled feelings of envy and sympathy. The hope is entertained that the triple alliance will enable Austria to reduce its military expenses, thereby reducing the deficit, and creating a possibility of re-establishing cash payments in this country also. The "Conference à Quatre" is to meet in Vienna on the 23rd

THE ECONOMIST.

April, to discuss the details of the junction of the Austrian, April, to discuss the details of the junction of the Austrian, Hungarian, and Servian railways with the Turkish lines. The old plan formerly proposed by Turkey would make Turkey's expenses amount to no more than 6 million francs, but the junction vid Vranja, which Turkey has now consented to, will cost her about ten million francs more. As soon as ever the conditions have been settled, the building of the lines will com-mence without further loss of time, and it is hoped that both the Vienna-Salonichi and Constantinople lines will be opened in October. 1885. in October, 1885.

In October, 1885. Navigation on the Elbe is progressing very favourably, owing to the petty railway tariff policy adhered to in Germany. In March-although traffic was interrupted during one week on account of the ice on the river—the traffic down the Elbe amounted to almost three million cwts in twenty-two days. The chief articles conveyed were brown coal, sugar, corn, and flour.

The Austrian Reichsrath has approved the concession for the Bohemian Moravian Transversal Railway. All the existing railways in Bohemia traverse that country from south to north The newly-proposed one will be the first to cross Bohemia and Moravia from east to west, thereby forming junctions between the five or six important lines traversing the country. It will be of great importance to many industrial and agricultural districts, which have hitherto been left aside by the railways. The cost of construction is estimated to amount to about twenty-seven million florins, the lines extending over 311 kilo-metres. Twenty-five millions are to be defrayed by the State, one million and a quarter by the Bohemian crown lands, and the rest by the traders and agriculturists, who will profit most by the new line.

In Budapest, a central clearing-house for the Hungarian railways is to be established.

The Austrian Amalgamated Alpine Ironworks Company, whose capital was fixed at 60 million florins—of which only 30 millions were given out in shares, now proposes issuing the re-maining 30 millions in debentures, which are to enable it to pay its floating debts.

The commerce of Germany with Australia has been greatly promoted by the institution of a direct line of steamers, and another direct line of sailing boats. Large quantities of wool and tallow are imported from Australia, and exchanged for articles of German manufacture.

After Prussia had introduced iron sleepers upon its railroads some years ago, the other German countries followed suit, and very soon wooden sleepers will belong to the past only. The Bourse has been in an unchanged condition all the week.

It is now waiting for the results of the conversion of the Hungarian Gold Rente. It has been reported that the Italian Government does not intend in future to pay the coupon of its Rente two months before the time, but only on the day when it is due is due.

We have just received Dr. Karl Mandello's Annual of Political Economy for 1882." It is equal to an abstract of all the reports of the Hungarian Chambers of Commerce, and registers the figures showing the progress of Hungarian agricul-ture, mining, manufactures, and commerce, comparing them with the results of former years.

Vienna owns several small establishments in which steampower is let to small mechanics, and now a large establishment is to be founded, from which electrical power will be transmitted to the workshops of small industrials.

The returns of the foreign commerce of the German Empire during January and February, 1883, contain the following statements: The imports of raw cotton during these two months statements: The imports of raw cotton during these two months amounted to 808,022 cwts, against 468,672 cwts in January and February, 1882. The import of cotton yarn amounted to 64,838 cwts, against 55,494 cwts in 1882; the export to 28,944 cwts, against 36,542 cwts in 1882. The export of lead was 108,290 cwts in January and February, 1883, against 74,606 cwts during the same period in 1882. The export of rails was 572,022 cwts, against 568,004 cwts; the export of iron wire was 822,730 cwts, against 568,004 cwts; the export of iron ore was 5,977,082 cwts, against 4,575,592 cwts.

In the table recording the results of the census of cattle made in Prussia, which appeared in last week's letter, the figures were wrongly given. They should have appeared thus :--

40100	olds which keep domestic	1883.		1873.

The amount of the "other deposits," compared with the "other securities," showed in 1873 a deficiency of 5,863,4671; in 1880, an excess of 7,804,7281; in 1881, an excess of 5,467,3911; in 1882, an excess of 3,242,2961. In 1883, there is an excess of 793,5861.

In 1881, the increase in the Bank reserve and the influx of gold from abroad were both about a quarter of a million. The open market was quiet, and Consols rose sharply.

In 1882, the money market was a trifle easier, the Bank's other securities being reduced 400,000%, and the reserve gaining 233,0001.

DISCOUNT AND MONEY MARKET .- During the week the discount market has certainly hardened, but as on Friday last the quotations even for best paper were only $\frac{1}{8}$ to $\frac{1}{4}$ per cent. below Bank rate, there has not been much room for an actual rise. For two or three days some of the leading banks have been quoting 3 per cent., but as in other quarters prime paper could be placed at $2\frac{7}{8}$, they have admittedly not done much business in such bills, though a fair supply of trade paper has come forward. Money keeps supply of trade paper has come forward. short, and this was early in the week explained, by reason of the continued large payments of previous borrowings from the Bank. But the Bank return shows a decrease of only 700,000*l* in the "other securities," so that it is very apparent that those repayments have in a considerable measure been counterbalanced by further borrowings Indeed, the Bank may now be regarded as upon sufficiently level terms with Lombard Street to attract its full share of the business offering. Hence, the internal condition of the market is such as to effectually maintain a 3 per cent. Bank rate for some time to come. Looking to foreign influences, it is found that the exchanges have not been maintained at last week's level, either as regards New York or Paris. The drop is not striking, but it shows that the tide has turned, and this in the direction of New York might become impact this in the direction of New York might become important if money were to harden over there, as there have been some signs of its doing within the past day or two. There were some further withdrawals of Dutch gold coin from the Bank of England early in the week, but these now appear to have ceased. Yesterday week, but these now appear to have ceased. The following are the principal items in the accounts of parcel of sovereigns was received by the Bank from Aus-

Reserve .

THE ECONOMIST.

tralia, which has the effect of reducing the net withdrawals for export since Wednesday last week to about 200,000/.

In the Bank return, the other deposits are found to have decreased rather more than the other securities; and as the government deposits are also slightly down, the eash reserve in the Banking Department is reduced nearly 200,000!. In the Issue Department this is entirely covered by the gold withdrawals. It is to be remarked that the Bank rate is the same as last year, although the reserve is 2,000,000! less, the other securities 500,000! more, and the other desposits 1,900,000! less. The comparison is, therefore, distinctly adverse to the current year.

Silver is again $\frac{1}{16}$ d lower, transactions having occurred at **56** d per oz. India Council bills were offered on Wednesday by the Bank of England to the extent of 40 lacs; but the allotment for the day was rather over 46 lacs, the bills representing 30.15 lacs at 1s 7²/₈ d per rupee—the same rate as last week—and telegraphic transfers 16 lacs at 1s 7¹/₁₆ d per rupee.

The Alliance Bank are about to open a branch at 239 Regent street.

The Bank of Liverpool, Limited, have announced a new issue of 10,000 shares of 100*l* each, to rank with the 50,000 shares already in existence. The price of issue will be 27*l* 10s per share (namely, 12*l* 10s capital and 15*l* premium), and calls will extend up to June 1, 1885. The increase in the capital is explained by the recent purchase of the old-established business of Messrs Arthur Heywood, Sons, and Co.

We subjoin our usual discount quotations for paper having various periods to run, and a comparison with previous weeks.

The Bank of Bengal on Thursday raised its rate of discount from 7 to 8 per cent., thus retracing the step downward made last week.

The discount quotations current in the chief continental cities are as under, market rates showing more firmness at Paris, but a further relapse at Amsterdam :---

	Bank Rate,		Öpen larket.	Lauren 140	Bank Rate,	Market. Open
Paris Berlin Frankfort Hamburg Amsterdam	4 Ja	•••	2500 045	Brussels Madrid Vienna St Petersbrg. New York (cs	31 Feb 41 Ap4 4 Feb 6 Oct.	$\begin{array}{c} 11 3 \\ 182 4\frac{1}{2} \\ 22 3\frac{1}{2} \\ 79 5\frac{1}{2} \end{array}$

Money in New York shows a slight hardening tendency, in spite of the improvement in the position of the associated banks.

THE STOCK MARKETS.—Market prices are less firmly supported in the Stock Exchange than they were last week. This is partly accounted for by the depression on the Paris Bourse (where the opinion appears to be that the Conversion Bill may possibly enough lead to another Ministerial crisis), and to the sharp relapse in the New York market. Beyond this, there are the growing signs of firmness in the money market, resulting in a fractional relapse in Consuls; and the collapse in the negotiations for an amicable partition of districts between the Grand Trunk and Canadian-Pacific railways has also had a depressing effect. All through the week the volume of business going forward has been small, except in special channels; and about the best feature of the week has been the rise in bank shares, which ought to be favourably influenced by the good demand for money. The fall in Electricity shares, and the substantial rise in Telegraph Construction and Maintenance shares, are due to the "Construction Company" advertising their new electric light machinery, which is said to be of a superior description.

467

The principal issue of the week, as far as the London money market is concerned, is the City of Rome Loan, guaranteed by the Italian Government, and brought out by Messrs Hambros. The prospectus of the Montreal and Sorel Railway bonds will also be found elsewhere in this paper.

COLONIAL GOVERNMENT DEBENTURES.—Prices have continued firm, but the only movement of importance has been a rise of $\frac{1}{2}$ in Cape of Good Hope 4 per Cents.

FOREIGN GOVERNMENT SECURITIES .- The rise in Uruguay bonds, and the fall in French 5 per Cent. Rentes, and Russian and Portuguese stocks, appear to be the principal move-ments on the week. There has, in addition, been a large business in Mexican bonds, with, in the end, a slight relapse The Conversion Bill is after last week's sharp advance. quite sufficient to explain the fall in French 5 per Cent. Rente, though why, if that conversion is justifiable at all, there should be a stop made at $4\frac{1}{2}$ per cent. when the 4 per Cents. would command par is a point which those outside political circles in France find it hard to understand. As regards Portuguese, there is a tendency to view the financial condition of the country less hopefully, though Senhor Costa Ricci, the Portuguese financial agent, communicates the following : — "The Minister of - " The of Finance has declared in the Chambers that the Government have no intention of effecting any conversion of the exist-ing 3 per cent. stock. There has been no increase in the ing 3 per cent. stock. public funded debt, and the floating debt, on the other hand, has sensibly decreased. In the Budget for the year 1883-4 the income and expenditure have been equalised.

Messrs N. M. Rothschild and Son notify that they are

HOME RAILWAYS.—The fluctuations have not been at all striking, except in London and Brighton Deferred stock, which to-day fell as much as 2½ per cent. upon a sudden outbreak of speculative selling. Metropolitan District was at one time again lower, but there has now been a rally. The traffic returns ar note unfavourable, having regard to the fact of the contrast being made with Easter week last year. Taff Vale stock has advanced 3 on the week, and Rhymney 2.

The tollowing shows the principal changes for the week in the quotations of ordinary stocks comparing the latest unofficial prices:—

AMERICAN RAILROAD SECURITIES.—After the recent advance, there has been a decided relapse in this department. Louisville and Nashville shares are down as much as $3\frac{1}{2}$; Central Pacific and Wabash, St Louis and Pacific, 3; Illinois Central, Lake Shore, and Michigan Southern, and New York, Pennsylvania, and Ohio First Mortgage, $1\frac{1}{2}$; Denver and Rio Grande, New York Central, and New York, Lake Erie, and Western, 1; and Pennsylvania, $\frac{1}{2}$. On the other hand, an inquiry for Philadelphia and Reading Deferred Income bonds has run the price up $1\frac{1}{4}$, and New York, Ontario, and Western shares are 1 higher.

FOREIGN RAILWAYS.—Copiapo stock has advanced l, Northern of Buenos Ayres shares $\frac{1}{2}$, Ottoman $\frac{1}{4}$, and South Austrian $\frac{1}{8}$. The Obligations have been firm, especially those of South American lines.

BANKS.—Bank of Australasia shares have risen 2, Bank of Egypt, Bank of New South Wales, Bank of Victoria, London and Westminster, and Union of London 1; Bank of South Australia and London and County $1\frac{1}{2}$, and National Provincial, Provincial of Ireland, and Standard of South Africa $\frac{1}{2}$.

COMMERCIAL, INDUSTRIAL, &C.—Anglo-American Brush Light, 7l paid, has fallen $\frac{3}{4}$; Crystal Palace A, 2; Explosives, $\frac{1}{4}$; Hammond Electric, $\frac{1}{2}$; and India-Rubber Gutta Percha, 1. Fore Street Warehouse are $\frac{1}{2}$ higher; Lion Brewery, 2; Native Guano, $\frac{1}{4}$; and Telegraph Construction, $2\frac{1}{2}$.

CORPORATION STOCKS.—Swansea stock is quoted 1 up, and Birmingham, Hull, Leeds, Leicester, Liverpool, and Manchester are all from $\frac{1}{2}$ to $\frac{1}{4}$ higher.

DOCKS.—East and West India stock is 1 higher; Southampton, 2¹/₂, and Surrey Commercial, 1; but London and St Katherine has given way 1.

FINANCIAL, LAND, &c.—Foreign and Colonial Government Trust Preferred and Deferred are 1 and 2 higher respectively, and Peel River has also advanced 1.

GAS.—British shares show a rise of 1, while Gas Light and Coke A have improved 1, and South Metropolitan A2.

INSURANCE.-Phœnix stock has improved 5.

THE ECONOMIST.

IBON AND COAL .- Nantyglo and Blaina have risen 1, and Vancouver Coal $\frac{1}{4}$; while Ebbw Vale are $\frac{1}{2}$ lower.

MINES .- South Caradon shares have fallen 21, and of Foreign and Colonial Mines, Cape Copper are down 1, Rio Tinto shares $\frac{1}{2}$, and Tharsis 1.

SHIPPING .- London Steamboat shares have declined 1/4, Royal Mail 1, and Union Steam 21, upon the absence of a dividend.

TELEGRAPHS .- Anglo-American Deferred Stock shows a rise of $\frac{1}{4}$, Direct United States $\frac{1}{4}$, Eastern Extension $\frac{1}{4}$, and Indo-European 1; but German Union are $\frac{1}{4}$ down.

WATER WORKS .- Lambeth stock is quoted 2 better.

BULLION .- The following is taken from the circular of Messrs Pixley and Abell, dated April 19 :-

Gold.—The demand for gold has continued, and all arrivals have been taken for the Continent. Further withdrawals of Dutch coin, to the value of 193,000*l*, have taken place from the Bank ; the only influx into that establishment being 68,000*l*, sovereigns, chiefly received from Australia. The arrivals have been 5,000*l* from the Cape, 10,000*l* from the West Indies, 70,320*l* from Australia, 2,200*l* from Brazils, 2,070*l* from the East—total, 89,590*l*. The Moselle has taken 7,050*l* to the West, and the Verona 5,000*l* to the East Indies.

Silver.—We have to report a further slight decline in price, the silver by the Pacific steamer having been sold to-day at 50½d. The Council drafts yesterday were allotted in full at 1s 7§d; the price shows no alteration, but the amount offered was not all taken. We have received since our last, 5,000l from the West Indies, 31,330l from Buenos Ayres, 40,000l from New York, 52,000l from Chili—total, 128,330l. The West India steamer has taken 15,710l to the West Indies, and the P. and O. steamer 48,000l to Bombay.

Mexican dollars to a large amount have come to hand during the week, and have been placed at $59\frac{1}{16}$ d per oz, a decline of $\frac{1}{16}$ d per oz from previous rates. The receipts have been 60,000/ from New York, 140,000/ from Vera Cruz, per French steamer, 6,000/ from West Indies —total. 206,000/

Exchanges from the East are quoted as follows: — For transfers on Bombay, 1s 7gd, and Calcutta, 1s 7gd per rupee. For four months' bank bills on Hong Kong, 3s 7fd, and Shanghai, 5s 0gd per tael. 40 lakhs of India Council drafts were tendered for at the Bank of England yesterday, and were allotted as under :—Calcutta, 5,00,000 rs; Bombay, 25,15,000 rs; average rate, 1s;7375d. Transfers—Bombay, 14,00,000 rs; Madras, 2,00,000 rs; average rate, 1s 7406d. Tenders for bills at 1s 7gd receive in full. Tenders for transfers at 1s 7ffd receive in stal as a advertised for next week. Rupee Paper is 85 to 85f for 4f per Cent, and 81f to 82 for 4 per Cent.

Quotations for Bullion.—Gold.—Bar gold, fine, 77s 101d per oz standard; bar gold, containing 20 dwts silver, 78s per oz standard; Spanish doubloons, 73s 10d to 73s 101d per oz; South American doubloons, 73s 81d per oz; United States gold coin, 76s 31d per oz.

Silver.—Bar silver, fine, 50¹/₂d per oz stundard, ; bar silver, contain-ing 5 grains gold, 51²/₅d per oz standard ; cake silver, 54¹/₂d per oz ; Mexican dollars, 49³/₁₆d per oz. Quicksilver, 5*l* 12^s 6d to 5*l* 15^s ; discount, 3 per cent.

NOTICES AND REPORTS.

STOCKS.

Turkish Finance.—The Council of Foreign Bondholders have received the following telegram from Constantinople: "Total receipts, March, £r141,291, against £r177,984 corresponding month 1882." RAILWAY COMPANIES.

RAILWAY COMPANIES. Grand Trunk of Canada.—A letter has been addressed to Henry Tyler by Mr George Stephen, the president of the Canadian-Pacific Railway, informing him, with regret, that, in consequence of objections raised in America, he is unable, for the present at all events, to carry out the arrangements recently made over their joint signatures, which formed the subject of a cablegram of instructions to the general managers of the two companies in Canada. Oregon and California.—The reorganisation trustees give notice, that, in pursuance of Article 27, supplemental to the plan of re-organisation, they will close their books, and transfer the unclaimed stock and assets in their hands to the treasurer of the company on August 1 next. Holders of Reorganisation Scrip and of Deferred Interest Certificates are therefore invited to present such scrip or certificates for conversion into stock before that day. *Royal Sardinian.*—At the general meeting in Rome the report and accounts were adopted, as was also the estimated balance-sheet for 1883. The payment of 5 per cent. on the preference shares on

and accounts were adopted, as was also the estimated balance-sheet for 1883. The payment of 5 per cent. on the preference shares on July 1, 1882, and Jan. 1, 1883, against coupons 18 and 19, were approved, and it was resolved that 5 per cent. of the profits should be carried to reserve, and that out of the balance a dividend of 5 per cent. (10s per share), clear of Italian taxes, should be paid upon the ordinary shares for the year 1882 against coupons 18 and 19. The chairman stated that the 500,000 lire caution money deposited with the Government would, he believed, be shortly realised, and distri-buted amongst the ordinary shareholders. *South Austrian.*—The directors recommend a dividend of 5 frances per share.

per share.

BANKS.

Banque Franco-Egyptienne.—At the annual meeting at Paris the dividend was fixed at 25f. The dividend paid last year amounted to 35f.

Commercial Bank of Alexandra.—The bank notify that an interim dividend of 1s 6d per share, being 5 per cent. per annum, for the six months ended 28th February has been declared.

ASSURANCE COMPANIES.

ASSURANCE COMPANIES. City of Glasgow Life.—The new assurances for the year amounted to 361,950l, or 48,000l in excess of the previous year. The sum paid for claims was 105,926l. The income of the year was 220,209l, and the expenditure 150,798l. The balance of 69,411l has been added to the invested funds. During the first four years of the current quin-quennial period the funds have been increased by 237,409l, and they now amount to 1,228,811l. Employers' Liability Assurance.—The directors recommend a dividend of 2s 6d upon each of the 2l shares, carrying forward a reserve of 20.864l.

reserve of 20,864/.

London and Lancashire Life.—The new assurances during the year, under 1,350 policies, were for 533,210/, giving a new premium income of 20,202/. The funds were increased by 43,818/, and now stand at 300,325/. The result of the actual valuation was a surplus stand at 300,323. The result of the actual valuation was a surplus of 36,119*l*, enabling the directors to declare reversionary bonuses to the participating policy-holders, varying from 1l to 1l 5s per cent. per annum on the sum assured. The directors were authorised to add 3s to each share, making the amount paid up 1l 10s, and to distribute during the next five years a dividend and bonus of 10 per cent. per annum, equivalent to 15s per cent. on the original capital.

New York Life Insurance.—In the year 1882, 12,178 new policies were issued, insuring 8,503,193*l*; the accumulated fund on 1st January was 10,414,281*l*, having increased 724,376*l* during the year. The income for the year was 2,365,050*l*; the interest received was 568,574*l*, being 166,251*l* in excess of the amount paid for death claims. The cash bonuses paid to policyholders amounted to 501,417*l*. The surplus over all liabilities is 2,072,817*l*.

Scottish Provincial Assurance.—The balance of profit and loss is 18,461l, out of which it is proposed to pay a dividend of 10 per cent., making, with the previous distribution, 20 per cent. for the twelve-months. The sum of 5,000l is carried to fire reserve, and 7,437l forward.

MISCELLANEOUS COMPANIES.

Carthagena and Herrerias Steam Tranways.—At the annual meet-ing the report and accounts for 1882 were adopted, and a dividend for the year of 4s per share declared. Formby's Cement Works.—At the annual meeting a dividend at the rate of 10 per cent. per annum was declared, free from income tax.

469

THE ECONOMIST.

[April 21, 1883.

wee froi

Apt

Ma

pro

Great Northern Telegraph.— For 1882, the total receipts were 276,544!, and the expenses, including debenture interest and amortisation, 80,965!. The sum of 55,555! is added to the reserve and renewal fund, an extra dividend at the rate of 3 per cent. is declared on 150,000 shares, in addition to the interim distribution of 5 per cent, and 16,579! is carried forward.

Midland Fruit Preserving, Limited.-Mr Justice Kay has appointed Mr Woodley Smith official liquidator.

Odessea Water Works.—For the half-year ended 31st December the receipts amounted to 60,197l, against 48,212l in the corresponding period of 1881, and the expenditure to 41,617l, against 35,541l. The extra expenditure has been chiefly owing to the increased demand for water, much of which has yet to be paid for, while every claim against the company has at once to be met with cash. The amount now due to the company, but unpaid, is 33,671l, more than sufficient to discharge the whole remaining claim of the municipality in respect of the guarantee, the disposal of which would leave the net earnings available for a dividend. The report states: "In any country but Russia there would be no difficulty with such debts, and the existing business would ensure the prosperity of the water company who possessed it."

Otago and Southland Investment—For the year ended January 31 a net profit is shownof 22,273!. A dividend for the half-year at the rate of 10 per cent. per annum, with a bonus of 2½ per cent., is recommended, making a distribution for the year of 12½ per cent. 2,500! is added to reserve, which is now 75,000!, and 1,023! carried forward.

Reuter's Telegram.—With 236l brought down, the net profits for the year amounted to 1,380l, increased to 3,880l by the transfer of 2,500l from reserve. A dividend of 4s per share, making, with the interim distribution, 5 per cent. for the twelve months, has been declared, carrying forward 92l. The extraordinary outlay entailed by the late events in Egypt materially affected the profits in 1852, but the termination of the war was followed by a considerable reduction in the extra charges, and the business has now returned to its normal condition.

R. Goldsborough and Co.—At the half-yearly meeting in Melbourne a dividend of 10 per cent. per annum and bonus of 5 per cent. per annum were declared, and 10,000l added to reserve, 9,300l being carried forward.

Royal Mail Steam.—The directors recommend a distribution of 11 los per share for the half-year ended December 31, free of income tax, making, with the distribution of 11 los in October last, a total of 31 per share for 1882. The aggregate receipts were less than in 1881, but exceeded those of 1880 by nearly 50,0001.

Swansea Improvement and Tramways.—The receipts for the halfyear were 5,455/, while the expenditure was 4,859/, leaving a credit balance of 596/, which, with 87/ brought down, leaves 682/ to be carried forward.

Union Steamship.—The half-yearly report states that, owing to the depression of trade with the Cape, the receipts have been considerably lessened, while the expenses have been increased by the quarantine regulations imposed by Natal. The amount at credit of the insurance fund and the reserves are more than sufficient for the purposes for which they were formed, and the directors had intended to pay an interim dividend therefrom, but were advised that the articles of association prevent that course being adopted.

West Coast of America Telegraph.—The company notify that the tariff for telegrams from Great Britain, via Galveston, to Buenos Ayres and all the stations in the Argentine Republic is new reduced to 13s per word.

MINING COMPANIES.

California Gold Mine.-The directors have issued a circular to the shareholders announcing the payment, on 30th inst., of 1s per share on account of dividend.

Javali.—The accounts for the year ended 31st December show a profit of 72l, while 1,739l is due on the year for debenture interest.

Rio Tinto.—The directors' announce that at their meeting to take place on the 8th May, they will recommend a final dividend of 16s per share, making, with the interim dividend paid in November, 14 per cent. for 1882.

Scottish Australian Mining.--The sales of coal amounted to 122,615 ons for the half-year ended 31st December, and the net profit tealised from the colliery during that period to 15,647. The balance rf profit, including 2,448/ brought forward, is 17,197. The directors oropose a dividend at the rate of 15 per cent. per annum, to add to p serve 2,000/, and to carry forward 3,197.

NEW COMPANIES AND CAPITAL.

City of Rome 4 per Cent. Loan.—Messrs C. J. Hambro and Son offer for public subscription on Tuesday, the 24th inst., the sum of 720,000%, in 18,000 bonds of lires 500 (20%, and 3,600 bonds of lires 2,590 (100?) each, at the price of 86% per cent. the bonds being guaranteed free to bearer from all taxes created or to be created by the Government or municipality. The loan is guaranteed as regards both capital and interest by the Italian Government, and is to be paid off at par within 75 years by yearly drawings. Principal and interest are payable in gold in London.

Montreal and Sorel Railway 6 per Cent. First Mortgage Stering Bonds.—Messrs Bayle, Campbell, and Co., will receive application until the 20th inst. for 150,000/, in bonds of 100/ each, at the prise of 97/ per bond, redeemable at par in 1912, or if earlier at 110. The line is 48 miles in length, and has been leased for 21 years, from 1st November last, to the South-Eastern Railway of Canada, which will work the line at 60 per cent. of the gross receipts. The issue form a first mortgage upon the line, and all lands and other property owned by the company.

Wolverhampton Corporation 31 per Cent. Stock.—When the tenders for 600,000l stock were opened at the Bank of England it was found that the applications amounted to 1,720,900l, at prices varying from 97l per cent to 94l (the minimum). Tenders at 95l is received about 93 per cent. of the amount applied for, those above that price in full.

The Commercial Times.

THE CORN TRADE.

MARK LANE, FRIDAY EVENING.

The agricultural reports continue very favourable. After unusualy fine weather throughout the most important period for spring swing, showers, which must now be most beneficial, have been experienced in some localities, and there are indications of the becoming more general, which is desirable. The wheat trade has maintained a firm position, and although there is not much activity, purchases are made more freely than they have been recently. Prios all round have shown a hardening tendency. New York has advance 3 to 4 cents; Berlin has risen rather more decidedly. At Balis ports holders have raised their terms, equal to about 6d to 1sperg. In the principal markets of the United Kingdom there isneally asimilar advance. At Mark Lane to-day, English wheat was firmly held for the improvement, but buyers were very reserved in their operations, and it was only for retail quantities that the advance was pid. Foreign wheats have sustained a small enhancement in the outport, and a partial rise of 3d to 6d has been realised in London. The floating cargo trade has also shown increased firmness. For American red winter off-coast 443 3d has been paid, and for Californian 45s to 46s. For shipment Rostoff Azima has been sold at 43s, and No. 2 Club Calcutta at 42s 3d. On the close to-day the tone was hardly so good, and Azima Ghirkas were offering about 3d under the English point. Statistics have rather assisted prices. Farmers' deliveries have further slightly fallen off, and the imports of wheat and flour into the kingdom, according to the last official returns, give a radie supply. Flour has not been so much pressing on sale, but the trade is still slack. The imports of maize into the kingdom last week was much less than in the previous one; but the London import have this week been rather liberal. In the outport is still slack. The imports of maize into the kingdom last week was much less than in the previous one; but the London import have this week been rather liberal. In the outport is all positions. During the week

The following table estimates the home consumption of wheat since the 1st September, contrasted with 1881-2, 1880-1, and 1879-30:-

Imports.	1882-3.	1881-2.	1880-1.	1879-8
Wheat (32 weeks to April 7)	cwts. 39,857,375/ 10,904,692)	cwts. 36,347,387 6,617,875	7,957,301	
Add week ending April 14—Wheat Flour	50,762,067 1,489,678 878,582	42,965,262 1,047,523 295,752	1,022,170	111,

IRON AND COAL TRADES.

There has been more life in the market for pig iron this week, and at Glasgow the price of warrants had risen yesterday to 47s 5½d, as compared with 47s on the previous Friday. At Middlesbro' also, there has been a slight improvement, the general quotation for No. 3

NOMISM. 473 still in the same unsatisfactory condition reported of late, and the prospects of an improvement seem as remote as ever. Coke plates are quoted at 15s to 16s per box, charcoal plates at 21s to 22s. There have been more orders given out for hardwares this week than for some little time previously, but prices are notwithstanding described as having a downward tendency. In Sheffield, matters appear to be improving. During the week there has been a heavier call for Bessemer material of the best makes, sawn end ingots realising as high as 5l 17s 6d per ton. Steel rails are generally quoted at 4l 17s 6d to 5l per ton, heavier sections at 5l 5s. Steelmakers generally are very busy. The briskness in the shipbuilding trade continues unabated. ontinues unabated.

471

There is little change in the condition of the coal trade. House-old coals have fallen slightly, but in other descriptions are for the nost part unaltered.

THE COTTON TRADE.

LIVERPOOL -APRIL 19. PRICES CURRENT.

PRICES CURRENT. Cotton was in good demand in the early part of the week, with a slight advance in prices, but on Tuesday the market became dull, and quotations now are about the same as on Thursday last. Sea Island has been in moderate request at steady rates. American was in large demand early in the week at improved prices, but has become quieter, and last week's quotations remain unchanged. In Brazilian an increased business has been done, and prices are partially 1/3 d per b higher. Egyptian has been in fair demand, but, being freely offered, prices are rather weaker, especially for better grades, which are reduced \$d to \$d per lb. Peruvian has been in moderate request, but without material change in quotations. West Indian and African are unchanged. In East Indian a good business has been lone, and prices of the current grades are partially 1/3 d per lb nigher. igher.

higher. "Futures."—The market during the early part of the week was strong, and prices advanced $\frac{1}{64}d$ to $\frac{1}{64}d$ per lb. On Monday a quieter tone prevailed, and prices gradually declined, the closing quotations showing an advance on the week of only $\frac{1}{64}d$ to $\frac{2}{64}d$ per lb. In Surat a moderate business has been done; the latest transactions show an advance of $\frac{1}{16}d$ per lb. The closing values are—Deliveries :—Ameri-can, any port, l.m.c., April-May, $5\frac{1}{62}d$; May-June, $5\frac{1}{62}d$; June-July, $5\frac{1}{62}d$; July-August, $5\frac{1}{62}d$; August-September, $5\frac{1}{62}d$; Sep-tember-October, $5\frac{1}{62}d$; October-November, $5\frac{1}{62}d$; November-Decem-ber, $5\frac{1}{62}d$ per lb. Surat : The latest transactions are—Shipments, m.g. Broach, good, g.c.; March-April, Suez, $5\frac{1}{62}d$; April-May, $5\frac{1}{2}d$ — Dhollerah, fully good, g.c. April-May, Suez, $4\frac{1}{16}d$ —Oomrawuttee, fully good, g.c., April-May, Suez, $4\frac{1}{16}d$ per lb.

MANCHESTER, APRIL 19.

The market here is quieter, the improvement noticeable in the last week's report not being sustained. There is, however, less disposition to press for business, and for the present the position of producers has undoubtedly been strengthened. The weakest feature of the market is the want of encouraging advices from the East, both Indian and China telegrams reporting trade unsatisfactory and prices weak. Export yarns keep firm, and for the smaller foreign markets about an average turnover has resulted. In yarns for home consumption man-facturers have bought less freely, last week's quotations being barely maintained ; the finer counts of yarns also tend in favour of buyers. In piece goods the demand has mainly run on the finer makes Shirtings continue neglected. T'cloths and Mexicans in better request, at previous rates. There has been more done in seventy-two reed printers, but the commoner grades have met with little altera-tion. Heavy goods have been worse to sell, buyers declining to renew offers at prices made a week ago.

THE ECONOMIST.

THE WOOL TRADE.

Everything very quiet in all branches of English wool, in fact, trade appears quite at a standstill. No great alteration in prices, however.

trade appears quite at a standard wools, Messrs Jacomb, Son, and Co. With respect to colonial wools, Messrs Jacomb, Son, and Co. report --- Business in this market since the close of the last public sales has been on a very limited scale. Some 1,000 bales, chiefly Capes, have changed hands at about late rates. Eight hundred bales of good Cape mohair have been sold at a slight improvement in price. There is a fair trade doing in most of the home and continental woollen districts, but there is little at the moment to indicate prospect of much change in the values of our article. Several sailing ships from Australas: a remaking very long passages; the prescribed 350,000 bales available for our sales to commence on the 16th proximo may now be reached any day. Sales of 24,600 bales of South American began at Antwerp on the 17th. Of 2,132 bales catalogued on that day only about half were sold. With dull competition, the better descriptions ruled weak, whilst short, poor, and faulty wools were neglected at lower and irregular prices."

There is now but little doing in English wool, and in some instances prices are the turn weaker.

In Liverpool there is no change to report, the business done during the week being still more or less of a retail character, but prices are being well maintained. In mohair a few bags have been disposed of at former rates.

Without any material change, the Bradford market has become duller during the past week. The absence of any transactions beyond those intended to supply present requirements prevents any kind of animation, and, although sellers are quoting the same prices as last week, there is undeniably a tendency in values to favour the buyer. Only the finar descriptions particularly of wether wool met with any week, there is undeniably a tendency in values to favour the buyer. Only the finer descriptions, particularly of wether wool, met with any healthy demand, and strong wools, which are more abundant, are difficult to quit. Southdowns, fine half-breds, Kent, and Irish, and also super skin are the most in request. The export yarn trade pro-duces little to stimulate the values of wool. Wefts for Leipsic, braid yarns for Elberfeld, and "damask yarns for Kemnitz are alike very slow of sale. Something is still doing in hosiery sorts for Berlin, and twofold mohair yarns for plushes are a pretty brisk sale. Spinners of botany yarn, especially for worsted coatings, are also busy. The export trade in pieces continues very dull, but there are some indica-tions of improvement for the American trade. The home merchants also are placing a few nice repeat orders. also are placing a few nice repeat orders.

JUTE, HEMP, AND FLAX TRADES.

Business in jute has been exceedingly limited this week, and prices are without alteration to report. In Dundee trade is fairly active, and the makers well supplied with orders. Yarns steady. The position of the jute market, as regards statistics, remains unchanged. Flax goods do not follow the high prices of the raw material, and unless there is some improvement, diminished production seems inevitable. The foreign markets show continued firmness. Manila hemp is almost nominal. There has been an arrival of 4,500 bales. The week's receipts at Manila were only 4,000 bales. At auction on Wednesday 2,711 bales were bought in, reduced offers being made. Some mixed quality sold at 471 per ton. No trans-actions are reported privately.

SILK TRADE.

Market for raw silk is inactive, but pending the progress of the oming crops holders are resolute in refusing any concession.

LEATHER TRADE.

There has been very little activity in the demand for leather during the week, the transactions being generally of a retail character. Prices are, however, firm. The supplies of fresh goods come forward in small quantities, but the stocks are generally adequate to the requirements.

COLONIAL AND FOREIGN PRODUCE MARKET. FOR REPORT OF THIS DAY'S MARKET BEE " POST

MINCING LANE, FRIDAY.

SUGAR .- During the week three floating cargoes of West India

have sold for the United Kingdom at firm rates, but the market have sold for the United Kingdom at firm rates, but the market generally is dull, with limited transactions on the spot. Some inquiry has prevailed for Madras jaggery, to arrive. Other low brown descriptions do not move in the absence of speculation. Beet hardly supports the quotations of last Friday. There is not any feature of interest to report in the market this week. The business in West India to yesterday was 444 casks and about 1,500 smaller packages, shiefly by auction. Jamaica, at 19s to 21s 6d ; crystallised Demerara, 26s 6d to 28s 6d per cwt. According to last week's return, the quan-tity of sugar landed in the four chief ports of the United Kingdom was about 22,100 tons, against 16,850 tons delivered, and there is some increase in the stock apparent.

Penang .- - 827 bags by anction, partly sold at 16s 6d to 22s 6d for brown to colory.

Jaggery.—About 1,500 tons sold to arrive : cane, chiefly at 14s 6d Palmyra, at 13s 6d. A parcel low cane on the spot at 13s 6d.

Surinam.—213 casks were bought in at 27s for crystallised grey. Cargoes.—Two of 568 casks 340 barrels St Lucia, at 21s 101d : one of 355 casks 153 barrels St Kitt's, at 22s 3d, for the United Kingdom.

Beet.-Several sales are reported, but the demand is now inactive. Refined.—The general features of the market remain unchanged, and yesterday there was a steady business done in London. A more quiet tone prevailed in the Clyde. French loaves are unaltered, with few sales.

Rum.—No change has transpired in this market, and the sales during the week are about 300 puncheons West India: the bulk Demerara, $1s 6\frac{1}{2}d$ to 1s 7d per proof gallon.

emerara, 1s 6¹/₂d to 1s 7d per proof games. CocoA.--There have been arrivals of West India, and the public Tuesday did not show any further advance. 2,173 bags sales on Tuesday did not show any further advance. 2,17 Trinidad about half sold at and afterwards at 90s 6d to 95s bags Grenada went at 86s to 90s. 331 bags Ceylon sold at 100s for fine; 91s 6d for mixed and inferior kinds in proportion. Guayaquil held for higher rates, and 313 bags bought in above the current value. 109 bags Surinam part sold at 87s to 88s per cwt. 709 bags other foreign were bought in. Landings of West India last week were heavy but the stock kame below average were heavy, but the stock keeps below average.

other foreign were bought in. Landings of West India last week were heavy, but the stock keeps below average. COFFEE.-Since last Friday there has been a more quiet feeling in the market part of the East India and plantation Ceylon sold by auction showing a decline of 2s to 3s per cwt. Brazil cannot be sold at the improvements last quoted, and the demand has slackened. At auction 602 casks 284 barrels 87 bags plantation Ceylon found buyers : pale and low middling, 82s to 87s; middling qualities, greyish to colory, S8s to 93s; good middling to fine, 94s to 100s; bold, 97s to 106s, according to quality. 274 cases 3,745 bags East India principally sold : Coorg and other descriptions, rather small and greyish, 80s to 86s; medium, 87s to 93s; good middling to fine, 94s to 100s 6d; bold, 97s to 111s, according to quality. Naidoobatum fine, 97s to 100s 6d; bold, 106s; middling, 88s to 92s; Mysore, bold, 119s; medium, 107s 6d. 317 bags Singapore were withdrawn above the value. 909 bags Manila were partly sold at 53s to 55s 6d. 101 half-bales Mocha part found buyers at 96s to 97s 6d for mixed small berry. 204 bags African were taken in at 37s 6d. 3,079 bags foreign descriptions included good to fine ordinary Guatimala, at 56s to 60s 6d; low at 52s; grey, 71s to 73s; middling dull colory Porto Rico, 77s to 78s; pale and mixed, 56s 6d to 61s; Rio, 40s to 43s; washed Rio, 63s 6d; Costa Rica, 55s to 65s 6d; Mew Granada, 72s to 77s; gold ordinary mixed to fine ordinary palish, 44s to 49s; fine ordinary greenish and mixed, 50s to 55s. The continental markets are firm. Good average Santos sold during the week at 47s 3d to 49s 6d, c. and f.; Manila to arrive at 47s 9d to 48s 3d per cwt, c. and f. Layours and Desuvence of Corres to April 14, with Sroces on hand. cwt, c. and f.

-Nothing of interest has transpired in the market for China TEA.—Nothing of interest has transpired in the market for China tea, which is firm, with only a moderate amount of business by private contract. At the public sales, comprising 15,072 packages, previous rates were attained, excepting for some very common shantam. Congou went lower than before quoted. Desirable qualities of green brought steady rates. About 1,600 packages Ceylon have sold this month at satisfactory prices, some of the new season's showing an improvement in quality. Broken pekoe realised 1s 34d to 2s 24d; 1,472 packages Java included fine pekoe at 1s 94d per lb. At the public sales of Indian the demand has continued active, and last week's advance maintained. Common are rather dearer for the better grades. Total supply by auction 12,000 packages. The quantity available during the remainder of the season is considerably less than in the previous one. TEA.-

RICE.-A large business again done at firmer rates, and the market continues firm. Many cargoes have sold; Rangoon, February to May sailing, 8s 7¹/₂d, one at 8s 8¹/₂d, February. 490 tons per steamer,

473

THE ECONOMIST.

March, 8s 9d, all open charter; one Ngakyouk, at 8s 4½d; one Bassein, at 8s 6d, and one of Necrancie Arracan, March, at 8s 3d, open charter. 5,000 bags new Rangoon, at 6s 4½d, ex-ship terms. Cleaned in demand, at full to rather higher rates.

SAGO.—The stock continues very large, and prices easier. 965 bags part sold at 14s to 14s 6d per cwt for fair small grain, being the previous value.

	BT	OCKS OI SAG	lo Here.

WHITE PEPPER continues depressed, with sellers at lower prices. 693 bags Singapore and 263 bags Penang were withdrawn. There have not been any transactions by private contract.

NUTMEGS.—There is not much demand, but quotations are firm. 12 cases Penang were principally bought in. 3 cases, 80's, sold at 2s 10d. 20 cases Dutch limed withdrawn at 2s 6d for 112's.

MACE.—Of 27 cases Penang in public sale 4 cases sold, chiefly at 1s 9d for fair. The remainder taken in above the value. 5 cases wild Bombay realised $11\frac{1}{2}d$ to $11\frac{1}{2}d$ per lb.

CLOVES.—The market is lower. 996 bales Zanzibar about half found buyers at a decline of $\frac{1}{2}d$ —from $7\frac{1}{2}d$ to $7\frac{3}{4}d$. 17 cases Penang withdrawn, excepting one case, which sold at 1s 10d for fine. 334 bales clove stems sold at 1 $\frac{1}{5}d$ to $1\frac{5}{5}d$ per 1b.

CASSIA.—189 boxes cassia lignea were part sold at 35s for damaged. 100 packages buds chiefly sold at 39s 6d to 40s 6d per cwt.

GINGER.—127 cases 18 bags Cochin went at rather lower prices: part cut medium and rather bold, 62s; small medium, 51s; small, 48s 6d; ends, 41s 6d; 75 robins fair rough, of the new crop, 50s 6d to 51s 6d; small, 48s 6d to 49s per cwt.

PIMENTO has been quiet. 457 bags partly found buyers at 3³/₄d to 4d per lb for low to fair.

TAPIOCA.-1,342 bags Singapore part sold at 1½d for fair. 648 bags Penang at 1§d to 1¾d. 120 tons Singapore, to arrive distant, at 15s 8d per lb. 1,305 bags pearl tapioca about two-thirds sold, chiefly seed, at 14s 6d to 15s. A few medium, 15s 6d. 849 bags "without reserve": seed, 14s to 14s 6d; bullet, 15s to 15s 6d per cwt.

BLACK PEPPER.—The market is unsettled. 246 bags Malabar by auction sold at a decline of about $\frac{1}{2}$ d, viz., $6\frac{1}{2}$ d to $6\frac{6}{2}$ d for good heavy quality. 200 bags Aleppy withdrawn at $6\frac{2}{3}$ d. 127 bags Penang were bought in at $5\frac{2}{3}$ d, and 295 bags Singapore at $6\frac{6}{2}$ d per lb.

SALTPETRE —200 tons Bengal sold to arrive: March to May, via Cape, at 19s $1\frac{1}{2}d$; April to May (s), at 18s 9d. On the spot, 700 bags, refraction $3\frac{3}{4}$ to $2\frac{3}{4}$, at 19s $4\frac{1}{2}d$ per cwt.

NITRATE SODA is dull at the quotations.

INDIGO .- Since the quarterly sales were brought to a close, the market has been quiet.

OTHER DRYSALTERY GOODS.---331 cases China galls included 227 cases "without reserve" at 52s 6d to 54s. 27 cases Japan at 52s 6d. 1,280 boxes pegue cutch were bought in at 30s. Gambier in course of landing sold at 28s. 400 bales by auction at 26s 9d to 27s 6d. Fine lump plumbago realised 17s per cwt.

DRUGS.—Aloes steady. Balsam Peru very steady. Bark, South American and East Indian cinchona, moderate sales at former rates. China camphor cheaper. Cardamoms, good qualities scarce, and rather firmer. Gum benjamin steady. Ipecacuanha and rhubarb sold well at full prices. Oil of aniseed firmly held. Musk pile, I., Tonquin, cheaper. Opium, a fair business doing, at easy rates.

SHELLAC.—There has not been any improvement in this market. At the public sales on Tuesday, the reduced supply of 565 chests, about half found buyers. A C garnet at 78s to 79s, showed a decline of 1s to 2s; second to good button, 85s to 91s, being lower; fine second dark, 63s to 79s; second orange, 87s to SSs; fine, VSO, 5/ per cwt.

INDIA-RUBBER.-Some business done in fine Para up to 4s 7d per lb.

LINSEED.—The market has been without change, and the busines⁸ chiefly restricted to Calcutta seed. Latest quotations are as follows ex warehouse, 45s to 45s 6d; ex ship, 44s, paid; to arrive, via Cape 43s 3d to 43s 6d; Canal, 42s 6d to 42s 9d per quarter. No sales in Bombay seed. No shipments from Calcutta to the United Kingdom during the first half of April.

SPIRITS TURPENTINE has declined 1s, and the market is quiet, American, 39s to 39s 3d; May, 37s; last four months, 32s per cwt. Stock and landing 13,288 barrels, against 7,703 barrels last year.

HIDES.—At the public sales of East Indian yesterday the Calcutta hides were chiefly bought in. Other kinds sold with irregularity at previous rates to some decline thereon.

METALS.—Prices continue irregular, and the markets without animation, but in has at length showed a recovery from recent depressed quotations. Yesterday sales of foreign at 96/ 10s to 96/ 15s cash, and fourteen days, and up to 97/ 10s, three months, or

about 1/ above the lowest point reached since last Friday. The market closed with firmness. Nothing of interest has transpired in the iron trade. Finished is steady at current low quotations. The shipments of pig iron have been large, both of Cleveland and Sotte, both showing a material increase upon the previous months, which were retarded on account of the unfavourable weather. From Glasgow the week's shipments were 14,700 tons. The stock is gradually on the decrease, being 582,700 tons, against 583,900 tons in the previous week, and 628,000 tons in 1882 at same date. Closing price yesterday, 47s 3d per ton, being rather dearer. Copper has further declined. A telegram dated Valparaiso, 14th inst., advises charters during the fortnight at 400 tons, chiefly for Englad. Yesterday Chili g.o.b. sold at 622 15s to 63/, sharp cash, being the lowest point of the week, and against 64/ last Friday. Silesian spelter easier. 140 tons sheet zinc, rolled at the London mills, were offered by auction yesterday, and about half sold at 5s decline, vir, 18/ 5s per ton. Quicksilver unsettled.

PETROTEUM OIL.—The market is steady, and prices have fluctaated but slightly during the week. This morning's quotations are: on the spot, 6¹/₂d to 6³/₈d, according to quality; May, 6³/₈d; June, 6¹/₄d; last four months, 6¹/₈d to 7d per gallon.

OILS.—In seed oils the feature this week has been a heavy decline upon English brown rape, owing to the depression in the continental markets. Tone now steady. On the spot, 36l; May to June, 35l to 35l 10s; to August, 34l to 34l 10s; last four months, 32l 5s to 32l 10s. English rapeseed about 38l. Linseed oil is lower, and in moderate demand, at the decline. On the spot, 21l to 21l 2s 6d; May to August, 22l 10s; last four months, 22l 12s to 22l 15s. Exports from Hull last week, 410 tons. Palm scarce, and 43l demanded for Lagos. Cocca-nut is firm, at the recent improvement. 50 tons Cochin sold to arrive; April to June, at 40l 10s to 40l 15s. Quotations on the spot are the same as last week. Ceylon to arrive 36l 5s per ton. Olive firm. Sperm unaltered, 80 tuns from Hobat Town will be offered by auction to-day. Common fish oils firm.

TALLOW.—As the stock of Petersburg is very low the price has advanced. To-day it is quoted at 48s 6d per cwt. Australian firm, and there will be a reduced supply at auction to-day.

TOBACCO.—There has been very little inquiry in this market during the past week, and the sales of American tobacco have been extremely limited, being confined to small purchases made by home trade buyers Prices are steady, and holders manifest no inclination to give way. Substitutes have also been neglected, but for colory classes there is a good demand.

COALS.—House coals in good demand to-day at last prices. Best, 17s; seconds, 15s; Hartley's, unaltered, 14s 9d.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is dull, crystallised being in some cases 6d lower on the week. Sales of West India, 386 casks, making 805 casks for the week, besides smaller packages 2,100 bags crystallised Berbice, by auction, partly sold, at 27s to 27s 6d. 600 tons cane jaggery sold, to arrive, at 13s 10¹/₂d, and a cargo of Trinidad usine, at 26s 3d, for the Continent. A cargo of Manila at 14s 3d, for Leith.

COFFEE.—23 cases 1,968 bags East India went at previous rates to 2s decline, and 154 casks 37 barrels 48 bags plantation Ceylon at irregular prices. 532 bags Manila part sold at 52s to 557 Indian. 141 bags Singapore withdrawn, also 115 bags Jara and 60 half-bales Mocha. 5 casks 57 barrels 312 bags Jamaica brought previous quotations. 4,653 bags foreign descriptions, included fine Guatimala of the new crop at 86s to 86s 6d, and 900 bags ordinary mixed Bahia, at 43s 6d to 44s.

RICE .- Two more cargoes Rangoon sold at 8s 6d per cwt, open charter.

METALS.-Tin, 961 15s cash. Scotch pig iron closed 47s 51d per ton, cash. Copper: Chili, g. o. b., 621 5s to 621 10s, cash.

OILS .- 65 tuns colonial sperm were withdrawn.

TALLOW.—Petersburg new, 48s 6d. 800 casks Australian sold by auction at 6d to 1s advance. Fine mutton quoted 46s 6d to 47s, and fine beef, 44s 6d to 45s. Town 1s 6d dearer, viz., 46s 6d per cwt.

ADDITIONAL NOTICES.

DRY FRUIT.—Messrs R. Witherby and Co. report that a considerable improvement in the demand for currants has lately developed itself, the result being better prices for nearly all growths. The scareify of fine Valencias is being felt, but common, being in superabundant supply, are again weaker, at the decline that last week's public sale established. Sultanas are a little more inquired for, and a fair trade has been done in muscatels for export.

GREEN FRUIT.—Messrs Keeling and Hunt report that the prices of oranges are unchanged. Lemons somewhat lower in value. Baree Jona nuts dull of sale. Malta potatoes in request.

METROPOLITAN MEAT MARKET.

On Monday the larger arrival of cattle and dead meat from America and New Zealand, the increased general supply, together with the milder weather, have occasioned considerable depression in trade. There is a very slow sale, and lower rates all round.

Per 8 lbs by the carca	51

POLISHED PLATE GLASS .-Architects, Builders, and the Trade supplied with above at lowest current rates and of the best quality. THE PATENT SILVERING COMPANY (Limited), 10 and 12 Lower Kennington lane, London.

INTERNATIONAL MONETARY STANDARD.

OBJECT.

The promotion of Stability of Value : By establishing the free coinage of Silver, and ts use as Money under the same condition as Gold. By advocating and furthering an International Agreement, whereby a fixed relative value between Gold and Silver may be established, and the two metals may jointly form the currency of Civilised Nations, thus facilitating the adjustment of International Balances, and lessening the excessive and needless risks, which have now become attendant on Home and Foreign trade.

HONORARY SECRETARY. PAUL F. TIDMAN, 34, LEADENHALL STREET, E.C.

THE SILICATE PAINT COMPANY,

(J. B. ORR & Co., Proprietors)

SOLE MANUFACTURERS AND PATENTEES OF

"CHARLTON WHITE,"

(ORR'S PATENT)

"DURESCO," a Washable Distemper,

Silicate Paints and Colours.

LONDON OFFICE-46 CANNON STREET. LIVERPOOL-32 SEEL STREET. GLASGOW-173A ST VINCENT STREET.

WORKS : CHARLTON, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and is cheaper in use than White Lead.

Each Cask of Pure White Zinc is Stamped-"HUBBUCK'S LONDON, PATENT."

HUBBUCK'S PREPARED LIQUID PAINTS.

These Paints are packed in 1 lb, 2 lb, 3 lb, 4 lb, 7 lb, and 14 lb tins, and will be found of great advantage. Being mixed ready for immediate use, no further preparation is needed. This prevents the waste of carrying stiff Paint, Oil, Turpentine, &c.

HUBBUCK'S PALE BOILED LINSEED OIL

Being much purer than raw Linseed Oil, is the only boiled Oil that can be used for White and delicate coloured Paints. It dries quick and hard.

HUBBUCK'S ANTI-OXIDATION COMPOSITION

For coating Iron and Wood Ships' Bottoms ; a preservative against fouling and corrosion This composition is ready for immediate use, and is applicable to all the purposes of other paints.

HUBBUCK'S WHITE LEAD, COLOURS, OILS, AND VARNISHES Are the Best and therefore the Cheapest, and are properly packed for Exportation to all Climates.

THOMAS HUBBUCK AND SON, 24 LIME STREET, LONDON. TELEPHONE No. 4152.
