

CITY OF SOMERVILLE

ANNUAL REPORTS.

1885.

BOSTON:

FRANKLIN PRESS: RAND, AVERY, AND COMPANY.

1886.

CITY GOVERNMENT AND OFFICERS FOR 1885.

MAYOR.

MARK F. BURNS.

Residence, 95 Perkins Street ; office, City Hall.

ALDERMEN.

HIRAM D. SMITH, *President*.

WARD ONE.

NATHAN A. FITCH Franklin Street.
MOSES G. STEELE Rush Street.

WARD TWO.

SAMUEL G. A. TWYXCROSS Warren Avenue.
FRANKLIN R. PERRY Pleasant Avenue.

WARD THREE.

HIRAM D. SMITH Cross Street.
DANIEL C. STILLSON Tennyson Street.

WARD FOUR.

IRVING L. RUSSELL Broadway.
ALBERT M. ROBINSON Belmont Street.

CLERK OF BOARD OF ALDERMEN.

CHARLES E. GILMAN.

COMMON COUNCIL.

HERBERT C. HALL, *President*.

WARD ONE.

FRANK A. TITUS	Flint Street.
ELBRIDGE G. PARK	Arlington Street.
JOHN MANNING	Medford Street.
NATHAN H. REED	Florence Street.

WARD TWO.

DANA W. BENNETT	Washington Street.
SAMUEL W. HOLT	Washington Street.
CHARLES A. WOODBERRY	Berkeley Street.
NEWELL F. CASWELL	Union Square.

WARD THREE.

JOHN F. KENNARD	Howe Street.
HARRISON ALDRICH	Gilman Street.
ALBERTO P. CLARK	Main Street.
EDWARD O'BRIEN	Lowell Street.

WARD FOUR.

HERBERT C. HALL	Summer Street.
ISRAEL C. EARLE	Irving Street.
BERNARD W. LAWRENCE	Holland Street.
WALTER C. MENTZER	Hall Street.

CLERK OF COMMON COUNCIL.

DOUGLAS FRAZAR.

JOINT STANDING COMMITTEES FOR 1885.

ACCOUNTS. — Aldermen Twycross, Robinson ; Councilmen Park, Aldrich, Woodberry.

BURIAL-GROUNDS. — Aldermen Perry, Stillson ; Councilmen Kennard, Reed, Lawrence.

CITY ENGINEERING. — Aldermen Russell, Steele ; Councilmen Titus, Kennard, Mentzer.

CLAIMS. — His Honor the Mayor, *ex officio*; Alderman Fitch; the President of the Council, *ex officio*; Councilmen Woodberry, Clark.

FINANCE. — His Honor the Mayor, *ex officio*; Aldermen Smith, Twycross; the President of the Council, *ex officio*; Councilmen Park, Bennett, Earle, Clark.

FIRE DEPARTMENT. — Aldermen Robinson, Perry; Councilmen Holt, Kennard, Mentzer.

FUEL AND STREET-LIGHTS. — Aldermen Steele, Robinson; Councilmen Woodberry, Aldrich, Reed.

HIGHWAYS. — Aldermen Smith, Russell; Councilmen Holt, Manning, O'Brien.

LEGISLATIVE MATTERS. — His Honor the Mayor, *ex officio*; Alderman Robinson; the President of the Council, *ex officio*; Councilmen Titus, Bennett.

ORDINANCES. — Aldermen Fitch, Twycross; Councilmen Park, Bennett, Mentzer.

PRINTING. — Aldermen Stillson, Steele; Councilmen Aldrich, Earle, Caswell.

PUBLIC PROPERTY. — Aldermen Perry, Stillson; Councilmen Titus, Caswell, Lawrence.

SOLDIERS' RELIEF. — Aldermen Fitch, Russell; Councilmen Manning, Earle, Clark.

WATER. — Aldermen Steele, Robinson; the President of the Council; Councilmen Reed, O'Brien.

COMMITTEES OF THE BOARD OF ALDERMEN.

(STANDING COMMITTEES.)

ELECTIONS. — Aldermen Russell, Fitch.

ENROLLED ORDINANCES. — Aldermen Smith, Perry.

LICENSES. — Aldermen Russell, Perry.

POLICE. — His Honor the Mayor, *ex officio*; Aldermen Fitch, Twycross.

SEWERS. — Aldermen Twycross, Fitch, Stillson.

STATE AID. — Aldermen Steele, Russell, Smith, Perry.

(SPECIAL COMMITTEE.)

BUILDING PERMITS. — Aldermen Smith, Robinson.

STANDING COMMITTEES OF THE COMMON COUNCIL.

ELECTIONS AND RETURNS. — Councilmen Caswell, Holt, O'Brien.
 ENROLLED ORDINANCES AND RESOLUTIONS. — Councilmen Manning, Clark, Lawrence.

SCHOOL COMMITTEE.

MARK F. BURNS, Mayor, Chairman, *ex officio*.

HERBERT C. HALL, President of the Common Council, *ex officio*.

(Term, three years.)

WARD ONE.

JOHN H. BUTLER (elected 1884) . . . Pearl Street.
 HENRY M. MOORE (elected 1882) . . . Myrtle Street.
 HORACE C. WHITE, M.D. (elected 1883) . . Pinckney Street.

WARD TWO.

REV. GEORGE W. DURELL (elected 1882) . . Summer Street.
 MRS. CORNELIA B. SKINNER (elected 1883) . . High Street.
 CHARLES I. SHEPARD (elected 1884) . . High Street.

WARD THREE.

NORMAN W. BINGHAM (elected 1882) . . . School Street.
 Q. E. DICKERMAN (elected 1883) . . . Central Street.
 WILLIAM P. HILL (elected 1884) . . . Sycamore Street.

WARD FOUR.

MARTIN W. CARR (elected 1884) . . . Craigie Street.
 PROFESSOR BENJAMIN G. BROWN (elected 1882) . Professors' Row.
 H. P. MAKECHNIE, M.D. (elected 1883) . . Elm Street.

Superintendent and Secretary, J. H. DAVIS, Myrtle Street.

PRINCIPAL ASSESSORS.

(Term, three years.)

STILLMAN H. LIBBY (elected 1883), *Chairman*, Elm Street.
 GEORGE W. HADLEY (elected 1885) . . . Perkins Street.
 BENJAMIN F. THOMPSON (elected 1884) . . Summit Avenue.

ASSISTANT ASSESSORS.

(Term, one year.)

GEORGE W. BARTLETT, Ward One	.	.	Mt. Vernon Street.
WILLIAM A. FLAHERTY, Ward Two	.	.	Union Square.
REUBEN A. MELVIN, Ward Three	.	.	Bonair Street.
SAMUEL T. RICHARDS, Ward Four	.	.	Summer Street.

BOARD OF HEALTH.

(Term, Physician, three years; other members, two years.)

GEORGE A. KIMBALL (appointed 1885),	<i>Chairman.</i>	Office, City Hall.
GEORGE C. SKILTON (appointed 1884)	.	Walnut Street.
THOMAS M. DURELL, M.D. (appointed 1885),		Bow Street.
<i>Clerk,</i> GEORGE I. VINCENT	.	Office, City Hall.
<i>Inspector,</i> WILLIAM H. BRINE	.	40 Houghton Street.

COMMISSIONERS OF THE SINKING-FUNDS.

(Term, three years.)

NATHAN TUFTS (elected 1883)	.	.	Summer Street.
HENRY F. WOODS (elected 1885)	.	.	Sycamore Street.
EZRA D. CONANT (elected 1884)	.	.	Pearl Street.
<i>Treasurer,</i> AARON SARGENT, Broadway.			

OVERSEERS OF THE POOR.

MARK F. BURNS, *Mayor, Chairman, ex officio.*
 HERBERT C. HALL, *President Common Council.*

(Term, three years.)

THOMAS CUNNINGHAM (elected 1884)	.	.	Oak Street.
GEORGE W. WASHBURNE (elected 1883 for unexpired term)	.	.	Lincoln Street.
EDWARD GLINES (elected 1885)	.	.	Highland Avenue.

SOMERVILLE MYSTIC WATER BOARD.

(Term, one year.)

J. ORLIN HAYDEN, <i>President</i>	Hill Building, Union Square.
WALTER S. BARNES	Highland Avenue.
CHARLES H. BROWN	Sycamore Street.
JOHN M. WOODS	School Street.
MILO CRANE	Rush Street.

Superintendent of Water-Works, NATHANIEL DENNETT.

Office, Prospect Street, cor. Somerville Avenue.

TRUSTEES OF THE PUBLIC LIBRARY.

(Term, three years.)

GEORGE A. BRUCE (elected 1884 for unexpired term)	Highland Avenue.
WILLIAM E. WELD (elected 1884)	Harvard Street.
WILLIAM VEAZIE (elected 1884)	Walnut Street.
WILLIAM H. BRINE (elected 1883)	Highland Avenue.
SANFORD HANSCOM, M.D. (elected 1885 for unexpired term)	Webster Street.
CHARLES S. LINCOLN (elected 1885)	Laurel Street.
CHARLES G. POPE (elected 1885)	Franklin Street.
J. HENRY FLITNER (elected 1883)	Day Street.
CHRISTOPHER E. RYMES (elected 1885)	Summer Street.

Librarian, HARRIET A. ADAMS.*Assistant Librarian*, LIZZIE A. STEVENS.

CITY CLERK AND CLERK OF BOARD OF ALDERMEN.

CHARLES E. GILMAN. Office, City Hall.

CITY TREASURER AND COLLECTOR OF TAXES.

JOHN F. COLE. Office, City Hall.

CITY MESSENGER.

JAIRUS MANN. Office, City Hall.

CITY SOLICITOR.

SAMUEL C. DARLING. Office, 18 Rogers Building, Boston.

CITY AUDITOR.

DOUGLAS FRAZAR. Office, City Hall.

CITY ENGINEER.

GEORGE A. KIMBALL. Office, City Hall.

SUPERINTENDENT OF STREETS.

FRANK G. WILLIAMS, Albion Street. Office, City Hall.

CHIEF OF POLICE.

MELVILLE C. PARKHURST, Police Station, Bow Street.

CHIEF OF FIRE DEPARTMENT.

JAMES R. HOPKINS. Office, Engine House, Highland Avenue.

INSPECTOR OF BUILDINGS.

ELIJAH WALKER, Pleasant Avenue.

CITY PHYSICIAN.

THOMAS M. DURELL, M.D., 14 Bow Street.

CLERK OF ASSESSORS AND COMMITTEES.

GEORGE I. VINCENT. Office, City Hall.

ASSISTANT CLERK OF ASSESSORS AND COMMITTEES.

WILLIAM P. MITCHELL. Office, City Hall.

CONSTABLES.

JAIRUS MANN.	WM. H. BRINE (Houghton St.).

GEORGE W. BEAN.	M. H. KINSLEY.
GEORGE L. SMITH.	G. A. BODGE.
EDWARD M. CARTER.	DENNIS KELLY.
E. F. FALES.	GEORGE H. CARLETON.
J. F. JOHNSON.	H. H. MILLER.
E. A. CARTER.	

M. C. PARKHURST, *Lock-up Keeper*.

MEETINGS.

BOARD OF ALDERMEN.

Second and fourth Wednesday evenings of each month.

COMMON COUNCIL.

Thursday evenings following the second and fourth Wednesdays of each month.

SCHOOL COMMITTEE.

Last Monday evening of each month.

MAYOR'S INAUGURAL ADDRESS.

INAUGURAL ADDRESS
OF
HON. MARK F. BURNS,

DELIVERED JAN. 5, 1885.

GENTLEMEN OF THE CITY COUNCIL,—Having been selected by our fellow-citizens from among so many able and intelligent men to transact the business of this young and growing city for the ensuing year, it seems proper to make acknowledgment to them for the honor they have conferred upon us, and to resolve to so conduct ourselves, and the important affairs intrusted to our keeping, as to prove to them that their confidence has not been misplaced. In accordance with the provisions of our city charter, and following the usual custom, it becomes my duty to inform you briefly of the condition, at present, of the various departments, and to suggest such measures as my experience and judgment indicate should be adopted. It will be your privilege to consider the recommendations; and if in your judgment their adoption would result in benefit to the city you will accept them, but if in your opinion their adoption would be injurious to its best interests it will be your duty to reject them.

I submit the following statement, prepared by the city treasurer from the records in his office, of the financial condition of the city at the close of the fiscal year, Dec. 31, 1884.

The funded debt is as follows:—

City debt	\$1,250,000
Water debt	335,000
	<hr style="width: 100%;"/>
Total	\$1,585,000
Less sinking-funds	507,633
	<hr style="width: 100%;"/>
Leaves net funded debt	\$1,077,367

The unfunded liabilities are for temporary loans \$175,000, and this amount is exceeded by uncollected taxes, assessments and other assets by \$9,278, leaving the net debt of the city \$1,068,089.

The net debt of the city one year ago, according to the treasurer's report, was \$1,101,094, showing that the net indebtedness of the city has been reduced the past year \$33,005. The following table will show the annual reduction in the net debt since 1876, when the city debt was largest:—

1877	\$34,446
1878	44,196
1879	72,345
1880	23,971
1881	50,333
1882	94,169
1883	74,172
1884	33,005

It will be noticed that the reduction of the net debt last year was about \$40,000 less than the average of the three preceding years. This is owing to the fact that the city council, in the annual appropriations or the tax levy, made no provision for the cost of the two new schoolhouses, the library building, or the purchase of text-books; the members deeming it more wise to use the surplus, nearly \$46,000, then on hand, than to increase the rate of taxation. The surplus now on hand is less than \$10,000, or about enough to complete the library building, the contract for which has already been awarded. This year, to fulfil the requirements of the law, the debt must be reduced about \$70,000; and this amount, together with the amount necessary for current expenses, must be raised by taxation.

The real estate in the city was valued last year at \$22,587,700, the personal property at \$1,743,400; total, \$24,331,100. It was taxed \$16.60 on each \$1,000, and together with 7,427 polls assessed, made \$418,750.26, the amount of the tax levy.

Bonds to the amount of \$473,500 came due in 1884; and their payment was provided for by the issue of \$74,500 in bonds bearing five per cent interest, which were all taken by the commissioners of the sinking-funds, and \$399,000 in bonds bearing four per cent interest, which were sold on the market. The fact that these four per cent bonds brought a premium of \$3,710.70 proves that Som-

erville credit is good. The reduction in the rate of interest on these bonds will save the city annually nearly \$10,000.

HIGHWAYS.

The highway department cost the city the past year \$35,500.

Owing to the expenditure of the principal part of the appropriation during the past few years upon new work, the older streets and principal thoroughfares have been somewhat neglected, and some of them are sadly in need of repairs. The city is rapidly growing, and it is probable that petitions for the acceptance and building of many streets will be presented during the year; and while the building of such streets would be a public benefit, still it would, without doubt, be unwise to accept many more streets until those already accepted have been built, and existing streets put in good condition. It is likely that under the present circumstances, having so many calls for money in the other departments, the city council will not deem it proper to appropriate a sufficient amount of money for this department to accomplish all that is desired, and the members may feel obliged to postpone some improvements. It is generally understood that the grade of Linwood Street will be raised, and the street put in good condition; thereby increasing the value of property in that vicinity, and affording great satisfaction not only to our own citizens, but to the travelling public generally. Washington Street, another of our principal thoroughfares, should be attended to as soon as possible. Without mentioning any other streets where money should be used for the same purpose, I will say that, in my opinion, a liberal portion of the appropriation we shall be able to make this year should be used in repairs.

STREET-LIGHTS.

There are three hundred and seventy-six gas and sixty-seven naphtha lamps used in lighting the streets. The care and maintenance of the same, and the lighting of the streets, cost the city a little over \$7,000 the past year, or about \$1,000 less than it did eight years ago.

It seems to be the opinion of the people generally, as it is mine, that we can make an improvement in the management of this department. I doubt the wisdom of carrying on this business under the contract system, as at present; if this is the cheapest way, it

gives the least satisfaction. The work should be done under the direction of the committee on street-lights, with the aid of a superintendent and a more liberal appropriation.

I recommend that an ordinance be enacted providing for the appointment of a superintendent of street-lights and school-buildings, whose duty it shall be to take charge of the street-lights under the direction of the committee, — see that the lamps are properly cared for and lighted, and put out at night according to directions; he should have the care of the school-buildings, and, under the direction of the committee on public property, oversee the repairs and alterations of the same, and direct and instruct the janitors in the discharge of their duties. I believe that many of the difficulties in heating and ventilating the school-buildings might be overcome by energetic and intelligent action on the part of the janitors. It seems to me that the services of an active, competent man, who would devote his whole time to the duties of the position, might be employed to advantage in these departments, the result of which would be a saving to the city.

SEWERS.

As it is not likely that any expensive sewers will be called for during the coming year, it is probable that the expenses of this department will be considerably reduced. Two and three-hundredths miles of new sewers were built in 1884, and three-tenths of a mile rebuilt, the total cost of which was \$22,220. About \$14,400 of this amount was paid by the owners of the property drained. We have in all thirty-six and one-half miles of sewers in our system, all of which have been built since 1867, at a cost to the city and to the property-owners of over \$638,000, beside over \$25,000 expended for maintenance. These facts show that on the whole, the city is well drained, and that it is doubtful, if, under the circumstances, it would be wise to devote as much money to this purpose as has been used during the past few years. The department paid in 1883 \$1,662.56, and in 1884 \$1,714.70, for cleaning and dredging at Craigie Bridge. In the opinion of the Cambridge authorities, this work must be done each year; if so, it will be a large expense, and if possible some way should be provided by which the sewer may be extended or changed to prevent the deposit.

SCHOOLS.

It is hoped that the board of education will be able to devise some means to lessen the expenses, without impairing the efficiency, of our schools. Their support cost the city last year \$106,473.57. We have twenty school-buildings in the city, and one hundred and two schools, in charge of one hundred and fifteen teachers, — eight male, and one hundred and seven female.

Number of scholars in attendance in January last	4,753
Number of scholars in attendance in December	4,984
Whole number registered during year	6,014
Average daily attendance	4,537

The city is rapidly growing; over two hundred new dwelling-houses having been built during the past year, and the number of persons between five and fifteen years of age having increased five hundred and fifty-four. To provide for the constantly increasing number of scholars, two new school-buildings, each containing four schoolrooms, have been erected during the past season; one on the city's land on Tufts Street, at a cost of about \$13,250, and one on School Street, which cost, together with the land, about \$15,250. It is probable that this city council will be called upon to build another during the coming season, in the vicinity of Cedar Street, to relieve the schools in that neighborhood. If one is built, it should be made large enough to not only provide for the present needs, but for future necessities. The danger in a growing community is that the school-buildings will be made too small; they should be double the capacity required at present, or built in such a way that their capacity may be doubled at some future time, as was done in the case of the Edgerly Schoolhouse. All school-buildings containing over two schoolrooms should be built of brick, as brick buildings are not only more substantial and ornamental, but are the most economical in the end.

FIRE-DEPARTMENT.

The apparatus in active service in the fire-department consists of one steam fire-engine, five hose-carriages, and one hook-and-ladder truck; and, in addition to these, one relief-steamer, one hook-and-ladder truck, and one relief hose-carriage. All are in

first-class condition. We have 5,550 feet of good, serviceable cotton hose. The manual force consists of sixty-one men, distributed as follows:—

1 engine company	12 men
1 hook-and-ladder company	15 “
4 hose companies	32 “
1 chief of department.	
1 assistant engineer.	

The force is large enough to handle properly the apparatus that is now in active service.

The amount granted the committee for use in this department in 1884 was \$22,000.

POLICE.

Our police force, considering its size, is very efficient. It consists of a chief, captain, three sergeants, and sixteen patrolmen.

The appropriation last year was \$22,500.

THE POOR.

The overseers were granted \$15,000 the past year, and they have given relief to about six hundred persons. While we have no reason to suppose that any thing but the most commendable care has been exercised in the management of this department, and every measure of economy adopted, still it is evident, that, with the constantly increasing demands upon our charity, an increased amount must be expended, and increased labor performed by the overseers. In view of these facts, I suggest for your consideration the plan of enacting an ordinance providing for the appointment of a superintendent of the poor department, whose duty it should be, under the direction of the overseers, to look up the settlements of those to whom relief is extended, keep the records, keep the stores and deliver the goods, and be on duty at all times ready to give immediate assistance when necessary, and to devote his whole time and attention to the business. It would seem that the expenditure is large enough, and the business important enough, to warrant the adoption of such a plan.

HEALTH.

The sanitary condition of the city has been greatly improved during the past few years, as is evidenced by a reduced rate of

mortality, the cause of which may be traced to our extended system of sewers and intelligent action on the part of the board of health. While at present the city is remarkably free from contagious diseases, it is possible that we may be visited in the near future by the one most dreaded of all, the cholera. It seems to be the opinion of our most learned physicians that we cannot hope to escape it. This being the case, unusual care and activity is expected from the board of health, and every facility should be afforded them, and the necessary funds furnished them to carry out any measures intended to protect the public health. The sanitary condition of every dwelling should be examined by a competent person, and all defects remedied; sewers should be ventilated, and all decomposing animal and vegetable matter removed at once, and the streets kept clean.

PUBLIC LIBRARY.

The appropriation in 1884 was \$1,500, and the amount received from dog licenses \$1,307.75, making in all \$2,807.75. This amount was expended for salaries and in making valuable additions to the circulating and reference books. To show how well the institution has been patronized during the past year, I give the following statistics:—

Whole number of books in library	11,197
Number issued during the year	72,591
Largest issue in one month (March)	7,381
Largest issue in one day (March 15)	667
Daily average	237
Number of books purchased during year	722

Never since the public library was established have our citizens received the full benefit from the institution, on account of the fact that the room occupied by it has been too small to allow of its being properly managed. It has been impossible to suitably classify the books, there has been no reading-room, and the people have not been able to examine the reference books with any degree of comfort. Owing to the unfavorable condition of our finances, and the great demand upon our resources, we have been unable until quite recently to provide any better accommodations. Early in the past year the trustees, all interested in the welfare of our municipality, decided to ask the city council to build a new library

building upon the land owned by the city on Central Hill, feeling that the time had come when the city could afford it. A petition was presented to the city council making the request, which was favorably acted upon, and resulted in the erection of a new building upon the city's land near the City Hall, which, when completed, will cost about \$26,000. It will be an elegant building and a substantial addition to our public property, of which the citizens may well be proud. Its management and growth will require an increased appropriation; but it must be remembered that it is a part of our educational system, which should be supported as liberally as the public schools.

CITY HALL.

On completion of the library-building the room now occupied for the library in the City Hall will be vacated, and it is very much needed for the use of the city officers. I recommend that it be utilized in part by the building of large fire-proof vaults for the use of the assessors and treasurer, using the vault now occupied by the treasurer to increase the accommodations in the city clerk's office. Many valuable books and documents are now kept in wooden bookcases, in danger of loss by fire; and, as they could not be replaced, they should be put into a fire-proof safe as soon as possible, thereby fulfilling the requirements of the law.

CENTRAL-HILL IMPROVEMENT.

The amount devoted to this purpose in 1884 was \$1,000. A part of this appropriation has been used by direction of the city council, in beginning the erection of a battery near the High Schoolhouse, the guns of which have been donated by the Government of the United States, and the object of which, in part, is to mark the spot where earthworks were thrown up and occupied by our troops in the beginning of the Revolutionary war, but more particularly to serve as a monument to the memory of those patriotic citizens who offered their lives to their country in the great civil war, that the Union might be preserved. It is hoped the work will be speedily completed; and, with the memorial tablets that are to be placed in the library-building, it will, to some extent at least, show our appreciation of the matchless services of the noble and patriotic men to whom the nation is under the most

solemn obligations. It will also be the occasion of congratulation on the part of all such citizens that their services are at last properly recognized.

SUITS AT LAW.

At present the city is remarkably free from litigation, with no important suits pending.

There are only eleven cases on the solicitor's docket, four of which are accident cases, which will be tried during the present term. During the past year there has not been a verdict against the city for damages, personal or otherwise, on the highways, and only two during the past nine years, in one of which cases the verdict was \$225 and in the other but \$108. Seventeen cases have been disposed of during the past year. There are at present no assessment cases pending in court.

WATER CONTRACT.

The following statistics show conclusively to my mind that the contract now existing between Somerville and Boston for the supply of Mystic water is unjust, and that a determined effort should be made during the coming year to secure a new contract, or a modification of the old one.

Our water-works cost	\$342,608 76
We have paid for maintenance	89,928 13
We have paid for interest	265,402 62
	<hr/>
Total cost	\$697,939 51
From which take amount received from city of Boston	162,748 24
	<hr/>
And it leaves as the net cost	\$535,191 27

which has been paid, or will be paid, from the tax levy of our city; and in addition to this the property-owners have paid \$47,165.26 for the services, which in Charlestown are paid for from the earnings of the water-works. The cost of construction and maintenance to the tax-payers of Boston for the water-works in the Charlestown District, up to the present time, according to the statement furnished me by the chairman of the Boston water board, is the amount contributed to the sinking-funds since 1878; namely, \$146,497.89, or \$435,858.64 less than the cost of the water-works to our tax-payers. It should also be remembered

that the cement pipes originally laid in Charlestown have nearly all been replaced, during the past seven years, with first-class iron pipes, at the expense of the Mystic Water-works. This manifest injustice leads me to suppose that a united effort on the part of Somerville, Chelsea, and Everett will secure a modification of the contract.

WATER-WORKS.

The water board, on account of the increasing number of breaks in the cement pipes, have wisely concluded to lay in the future iron pipes only. It is hoped that if this change necessitates the use of more money, it will be provided for in the annual appropriations for maintenance, instead of opening a construction account, and increasing the water debt.

WATERING STREETS.

Although the watering of streets adds to the attractions of the city, and to the comfort of every person using them, it is not a necessity, and cannot be called a measure of economy; still, it is a luxury which our tax-payers seem to be willing to support, and, to a reasonable extent, their wishes should be gratified, although it seems to me the larger part of the expense should be borne by the citizens themselves. A few years ago the street-watering was in charge of the committee on water; but, by vote of the city council, it was transferred to the committee on highways. I believe this was a mistake; for the last-mentioned committee have a large amount of business to look after, and during the past few years the committee on water have had none at all. I am aware that the work has not been done during the past year in as satisfactory a manner as possible, owing to the fact that the committee having charge of it have been overworked. I recommend that they be relieved by transferring the charge of this department to the committee on water. The amount set aside for the purpose of watering streets last year was \$3,000.

CONCLUSION.

In closing, I would say to you, gentlemen of the city council, that one of the most important duties we have to perform is to provide for the payment of the city's debt. Past city councils,

since 1875, have devoted their energies to this object; and future ones must continue to do so until the debt is so far reduced as to cease to be a burden to the people, and cease to stand in the way of needed improvements. As long as the contributions to the sinking-funds, and the appropriation for interest account, are as large as they now are, and our city continues to increase in population as rapidly as it now does, the rate of taxation will continue to be high; and it may, and probably will, be necessary to refuse some of the requests of our citizens for improvements.

The responsibility of fixing the amount to be expended in any department will rest with the city council, not with the committee having the matter in charge; but the committee will be held responsible for the manner in which it is expended. Committees should be cautious in the early part of the year in their expenditures, in order that they may not be obliged to postpone necessary improvements later in the season for the want of funds. Measures should be adopted for the good of the public, not for the benefit of private individuals; although needed improvements should not be postponed for the reason that they may benefit private interests, and assist private enterprise.

In making appointments and electing officers, it should be remembered that political influence and power are not necessarily qualifications for office; but men should be selected solely on account of their peculiar qualifications for the positions they are to hold. We should all work for the best interests of the city; each member should devote the necessary time to the transaction of the business; he should investigate all subjects for himself, and decide all questions, as far as his vote will decide them, according to the dictates of his own judgment; and let us all perform our official duties in such manner as to show that we have a just appreciation of the important trusts that have been placed in our hands. The consciousness of having served our fellow-citizens faithfully and efficiently will be a source of pleasure to us all in the years to come, and such service will greatly advance the material interests of the city and the prosperity of the people.

REPORT

OF THE

TREASURER AND COLLECTOR OF TAXES.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 20, 1886.

Referred to the committee on finance, and sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 20, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

IN COMMITTEE ON FINANCE, Feb. 12, 1886.

To the City Council of Somerville,—By an examination of the report, books, and vouchers of the treasurer and collector of taxes, made by this committee in conjunction with the auditor, and a comparison of the same with the statements presented by the various committees, boards, and officers of the city as required by ordinance, and with the books of the auditor, it appears that the accounts of the treasurer and collector are correct; and we would add that his books are kept in a remarkably neat, systematic, and business-like manner. We have also ascertained, by actual count and by visiting the banks of deposit, that his cash on hand agrees with the cash-balance shown by his books. We therefore recommend that his report be accepted, and printed with the other annual reports.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

TREASURER'S OFFICE, Jan. 18, 1886.

To the Honorable the Mayor and City Council of the City of Somerville.

GENTLEMEN, — The undersigned presents herewith the fourteenth annual report of the financial condition of the city, and a statement showing in detail the receipts and disbursements of the several departments for the year ending Dec. 31, 1885.

The value of the property of the city, Dec. 31, 1884, as appears by the schedule published with the last annual reports, was \$1,200,190.96; and the accessions thereto during the year were as follows: —

Amount expended for completing and furnishing	
Public-library building	\$15,429 14
Lincoln Schoolhouse	12,453 97
Schoolhouse on Tufts Street ("Davis")	4,106 32
" " School Street ("Cummings")	2,746 25

making the value of the public property, Dec. 31, 1885, as per Table A, \$1,234,926.64.

There has also been expended the sum of \$5,037.54, for alterations and improvements of the City Hall, which has not been added to the inventory of public property.

The funded debt of the city has been reduced \$60,000, that amount having been received from the commissioners of the sinking-funds for the "ten years' maturities," retired this year; leaving the funded debt, Dec. 31, 1885, as per Table B, \$1,525,000.

City-loan Bonds at 6 per cent interest, amounting to	\$87,000
" " " 5½ " " " "	4,500
" " " 5 " " " "	49,000
Water-loan Bonds at 6 per cent interest, amounting to	20,000
Amounting to	\$160,500

became due during the year, and were provided for by the issue of

City-loan Bonds, Nos. 856 to 880	\$25,000
Water-loan Bonds, Nos. 214 to 219	6,000
“ “ “ 220 to 226	7,000
	<hr/>
Amounting to	\$38,000

bearing interest at four per cent, which were sold at a premium amounting to \$1,689; and also

City-loan Bond, No. 881	\$54,000
“ “ “ 882	1,500
Water-loan Bond, No. 227	7,000
	<hr/>
Amounting to	\$62,500

bearing interest at five per cent, which were purchased by the commissioners of the sinking-funds at par, making the

Total amount of bonds issued	\$100,500
“ “ “ “ retired	60,000
	<hr/>
Total amount provided for	\$160,500

To provide for the payment of the State and county taxes, and for the expenses of the city for the year 1885, the assessors' warrant was received for the tax levy on a valuation on real estate of \$23,063,900; valuation on personal property, \$1,814,500; making a total valuation of \$24,878,400, at a rate of \$16.60 on \$1,000 valuation, and 7,812 polls at \$2.00 each, amounting to \$428,605.44. To this amount must be added the sum standing to the credit of excess and deficiency account, being the amount of unexpended appropriations Jan. 1, 1885, \$13,758.46; the amount received from the city of Boston for returns on water contract, \$21,542.28; and the additional credits received from all other sources by the various departments, amounting to \$53,054.09; making the total amount of resources for the year 1885 \$516,960.27.

The appropriations for the year provided for by the tax levy, the amounts transferred from other resources of the city, the additional

REPORT OF TREASURER AND COLLECTOR OF TAXES. 31

amounts credited, the amounts expended, and the unexpended balances of the various accounts were as follows:—

Accounts.	Appropriations.	Additional credits.	Expenditures and balances.

REPORT

OF THE

COMMISSIONERS OF THE SINKING-FUNDS.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Feb. 9, 1886.

Referred to the committee on printing, to be printed in the annual reports.
Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 9, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

IN BOARD OF COMMISSIONERS OF THE SINKING-FUNDS,
Jan. 16, 1886.

To the Honorable the Mayor and the City Council of the City of Somerville.

GENTLEMEN, — The undersigned present herewith the tenth annual report of the condition of the sinking-funds of the city : —

The amount of the funds, Jan. 1. 1885, as per the ninth annual report was	\$505,852 52
The additions thereto during the year 1885 were : —	
Contribution by the city for the year	45,100 00
Interest on investments in city bonds (\$407,500 one year, \$47,000 nine months. \$59,000 six months, and \$13,000 three months, at 5 per cent per annum ; and \$40,000 one year, and \$4,500, six months at 5½ per cent per annum).	26,098 75
Interest on deposits in banks	106 91
A total of	\$577,158 18
Paid to the treasurer of the city, providing for the extinguishment of that part of the funded debt of the city which matured on final matur- ity, July 1, 1885	60,000 00
Leaving the amount of the sinking-funds, Jan. 1, 1886	\$517,158 18
Invested as follows : —	
In bonds of the city of Somerville (\$473,000 at 5 per cent, and \$40,000 at 5½ per cent),	\$513,000 00
On deposit in Maverick National Bank	4,158 18
	\$517,158 18

The several sinking funds are :—

City-loan maturity of 1895	\$442,563 18
Sewer-loan maturity of 1896	12,100 00
Water-loan maturity of 1905	59,400 00
“ “ “ 1906	1,660 00
“ “ “ 1907	1,435 00
					<hr/>
					\$517,158 18
					<hr/> <hr/>

Respectfully submitted.

NATHAN TUFTS,	} <i>Commissioners.</i>
HENRY F. WOODS,	
E. D. CONANT,	

REPORT

OF

THE SCHOOL COMMITTEE.

CITY OF SOMERVILLE.

IN SCHOOL COMMITTEE, Jan. 2, 1886.

The superintendent submitted his annual report, which was read and accepted. It was voted that the committee adopt the report now submitted by the Superintendent of the Public Schools, and present it to their fellow-citizens as the report of the school committee for the year 1885.

J. H. DAVIS, *Secretary.*

IN BOARD OF ALDERMEN, Jan. 12, 1886.

Referred the report to the committee on printing, to be printed in the annual reports. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 12, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

BOARD OF SCHOOL COMMITTEE, 1885.

CITY OF SOMERVILLE.

To the School Committee of Somerville.

IN conformity to your requirements, I respectfully submit the following report upon the condition of the public schools of this city, for the year 1885, being the forty-third annual report of the school-department.

SUMMARY OF STATISTICS.

POPULATION.

Population of the city, United-States census, 1880 .	24,985
“ “ “ State Census, 1885 . . .	29,992
In Ward One	9,014
“ Two	10,077
“ Three	5,564
“ Four	5,337
Increase for five years	5,007
Number of persons in the city between five and fifteen years of age, on the first day of May last .	5,608
In Ward One	1,643
“ Two	1,901
“ Three	1,005
“ Four	1,059
Number in Prospect-hill District	1,985
“ East Somerville District	1,264
“ West Somerville “	860
“ Spring-hill “	760
“ Winter-hill “	739
Number between eight and fourteen years of age .	3,641

VALUATION.

Valuation of the city, May 1, 1885	\$24,878,400
Real estate	\$23,063,900
Personal estate	1,814,500
Rate of taxation0166
Estimated value of school property	\$398,199

EXPENDITURES FROM JAN. 1, 1885, TO JAN. 1, 1886.

BY THE SCHOOL COMMITTEE.

Salaries of teachers and superintendent, \$79,087 75	
“ janitors	4,000 17
“ truuant-officers	412 45
Water	672 07
Gas	39 64
Text-books	3,379 68
Writing-books	360 50
Drawing-books	541 89
Printing	311 75
Stationery, and other supplies	2,036 36
Miscellaneous	1,657 09
Total expenditures	<u>\$92,499 35</u>

RECEIPTS.

Tuition of non-resident pupils	293 75
Net expenditures	<u><u>\$92,205 60</u></u>

In common with other cities comparatively new, our wants are disproportionate to our accumulations. The consequence is a high rate of taxation, and the necessity for the exercise of rigid economy in all expenditures for city purposes.

It is apparent that all persons having in charge the financial interests of our city entertain an earnest and commendable desire to exercise true economy in all their expenditures, and to keep the expenses of the various departments at the lowest point consistent with the best interests of the city.

The construction of school-buildings, and the ordinary expenses

of the public schools, absorb nearly twenty-five per cent of all the money raised by taxation for city purposes.

The duty of constructing, repairing, furnishing, and heating the school-buildings devolves upon the city council. All other expenditures for school purposes are made by the school committee.

The disbursement of such large sums of money, and for an interest so vital as the education of the children and youth of the entire city, demands the constant exercise of economy and great vigilance in ascertaining that the value received, in all cases, is commensurate with the sums expended. In view of the great cost of the schools, it is wise to consider whether or not the amount expended for their support can be diminished materially, without detriment to their efficiency.

Those who bear the burden of taxation have a right to expect that the large appropriations for the maintenance of the public schools will be economically and judiciously expended. From a knowledge of their liberality, however, in all matters pertaining to the interests of education, it is safe to assume that their general sentiment is adverse to a reduction of the cost of the schools, if, thereby, their efficiency will be impaired.

Mr. Philbrick, for many years superintendent of Boston schools, says, "Good educational advantages are nowhere cheap; and it is wise to assume that good schools must, in the nature of things, be costly schools. In the more advanced communities, school boards very generally assume that it is their first duty to provide schooling of a very high degree of excellence, rather than to run the system at the cheapest rate per scholar."

After the most careful consideration of this subject in all its relations, we are unable to discover wherein the cost of the schools can be reduced materially, without serious detriment to their efficiency.

Substantial and commodious school-buildings must be constructed for the accommodation of all persons in the city of school age, at convenient distances from their homes. By statute requirements, the maintenance of evening schools for instruction in grammar-school studies and mechanical and free-hand drawing is made obligatory; text-books and all supplies necessary for pupils' use in school must be furnished at public cost. Since the true secret of improvement consists in performing, to the utmost limit of ability, whatever is undertaken, no careless work should be tolerated

in the schoolroom. Pupils should be required at all times to do their best, and should be encouraged in painstaking efforts by a liberal supply of good materials. Hence it would be unwise to reduce the supplies, as now furnished, either in quality or quantity.

Teachers' salaries constitute by far the largest item of expense in carrying on the work of the schools. The amount paid for tuition the present year is eighty-three per cent of all expenditures by the school board.

Good teachers are indispensable to good schools. To keep the schools supplied with such, is the most important and the most difficult part of the duties of the school committee. It has been truthfully said, "The external machinery of education — its schoolroom and forms and books — has of course its value; but, after all, it is nothing but machinery, utterly destitute in itself of automatic power. It is dead, and indeed useless, until the teacher's vital influence pervades it. He is the very soul of the whole apparatus of means, and indeed the only indispensable element in it. *Hence it is found that the quantity of force generated by a given system of educational means and agencies is as the teacher's knowledge, virtue, and intelligence — not as the external machinery.*"

Teachers of superior ability and fitness for their important calling are in demand. In order, therefore, to secure and retain the services of such, our inducements must equal those of other cities. A reduction of salaries would result in a low average of teachers and a corresponding grade of schools, which no city can afford to maintain. The children and youth of our community have a claim upon us for the best preparation we can give them for their life-work; and we are bound, by every moral obligation, to meet their claim by placing over them teachers of superior character, aptitude, and qualifications. From every consideration, therefore, we conclude that it is wise to be exacting in requirements, and to award such compensation as will attract and retain teachers of a high order of endowments; and that, in all matters pertaining to education, a liberal policy is true economy. It has been well said, "It is universally true, that any public institution will give back to a community a benefit commensurate with the support and the sympathy which it receives from that community."

SCHOOLHOUSES.

The new building on School Street and the one on Tufts Street were completed in December, 1884, and occupied by schools at the beginning of the winter term, Jan. 5. The building constructed on the site of the Lincoln Schoolhouse, which was burned Oct. 22, 1884, was completed in August last, and occupied by schools at the beginning of the school year, Sept. 14.

CUMMINGS SCHOOLHOUSE.

PRESENT AND PROSPECTIVE WANTS.

Demands for additional school accommodations, consequent upon the rapid increase of population in our city, are ever recurring. School-buildings, containing eighty schoolrooms, have been constructed in this city within the last twenty years.

With one exception, all schoolrooms owned by the city are occupied by schools. Two schools are in basements of school-buildings, and two are occupying unsuitable rooms in Clarendon Block. The attendance of pupils of the ninth class of the Forster School is restricted to one session only, each day. This expedient must be resorted to in other sections of the city, when the customary semi-annual additions are made to the primary schools.

While the population of the city continues to increase as heretofore, the necessity will exist for the erection of one or two new schoolhouses each year. In addition to the two school-buildings called for by the school board at the beginning of this year, for the accommodation of pupils in Wards Three and Four, a building is much needed in the southern section of Ward Two.

Failure to provide promptly for the necessities of the present causes great inconvenience, and imposes upon the future burdens which should be borne, if possible, when urgent demands for them occur.

TEACHERS.

Ten teachers have resigned during the year, nineteen have been elected, and one teacher has died.

ELECTED.

- Mr. Herbert L. Morse, sub-master in the L. V. Bell School.
- Mr. Fred B. Hall, teacher in the High School.
- Miss Minnie L. Wentworth, teacher in the Forster School.
- Miss Amy C. Hudson, teacher in the Prescott School.
- Miss L. Gertrude McIntire, teacher in the Prescott School.
- Miss Elizabeth Waldron, teacher in the Prescott School.
- Miss Priscilla A. Merritt, teacher in the Davis School.
- Miss Hattie E. Adams, teacher in the L. V. Bell School.
- Miss Maria H. Macurdy, teacher in the Prospect-hill School.
- Miss Mary B. Smith, principal of the Bennett School.
- Miss Lizzie W. Parkhurst, teacher in the Bennett School.
- Miss Minnie S. Turner, teacher in the Bennett School.
- Miss Alice I. Norcross, principal of the Webster School.
- Miss Bertha L. Emerson, teacher of the Spring-hill School.
- Miss Hattie L. Furber, teacher in the Franklin School.
- Miss Florence N. Robbins, teacher in the Highland School.
- Miss Annie S. Browne, teacher in the Highland School.
- Miss Annie C. Thayer, teacher in the Lincoln School.
- Miss Evelyn E. Getchell, teacher in the Lincoln School.

RESIGNED.

Miss Augusta A. Roberts, principal of the Bennett School, after twenty-four years of faithful, valuable, and unintermitted service in our public schools.

- Miss Ellen H. Wilde, teacher in the Forster School.
- Miss Clara G. Fogg, teacher in the Prescott School.
- Miss Mary L. Lewis, teacher in the Prescott School.
- Miss Elizabeth Waldron, teacher in the Prescott School.
- Miss H. V. Hathaway, teacher in the Edgerly School.

Miss Frances J. Emerson, teacher in the L. V. Bell School.

Miss Sarah E. Pennock, principal of the Brastow School.

Miss Mary L. Longfellow, principal of the Webster School.

Miss Emma J. Rowley, teacher of the Spring-hill School.

Miss Alice B. Chadwick, a highly esteemed teacher in the Lincoln School, died at her home in Peabody, April 19, after a protracted illness.

The school committee, at their meeting next succeeding the time of her death, passed the following resolutions: —

Resolved, That in the death of Miss Chadwick, the city has lost a faithful and devoted teacher, who, by her wise administration, won the love of her pupils and the confidence of their parents.

Resolved, That the sincere sympathy of the school board of Somerville is extended to the family of the deceased in their great affliction.

Whole number of teachers	121
Male teachers, 10 ; female teachers, 111.	
Number of teachers in the high school	9
Male teachers, 3 ; female teachers, 6.	
Number of teachers in the grammar schools	63
Male teachers, 6 ; female teachers, 57.	
Number of teachers in the primary schools	48
One teacher of vocal music.	

Within the last twenty years, two hundred and thirty-seven teachers have been elected, one hundred and ten have resigned, and seven have died.

Of the one hundred and twenty-one teachers in our public schools, one was first elected previous to 1860 ; eight between 1860 and 1870 ; forty-six between 1870 and 1880 ; sixty-six since the beginning of 1880.

PUPILS.

Number of pupils in attendance in January	5,043
Number of persons between five and fifteen years of age on the first day of May last	5,608
Number between eight and fourteen years of age	3,641
Number in attendance in December	5,186
In the high school	378
In the grammar schools	2,558
In the primary schools	2,250
Number over fifteen years of age in December	538
In the high school	332
In the grammar schools	206

Whole number registered during the year	6,276
In the high school	471
In the grammar schools	2,717
In the primary schools	3,088

The whole number of pupils registered in all the schools during the year is 1,090 in excess of the whole number in attendance in December. This excess includes 46 graduates of the high school; 47 pupils who have left the high school within the year, exclusive of the graduates; 56 graduates of the grammar schools who did not enter the high school; 941 pupils, exclusive of graduates, who have left the grammar and primary school from all causes. Of this last number, a large per cent left the schools in consequence of removal from the city.

TABLE SHOWING THE NUMBER OF PUPILS IN EACH OF THE THIRTEEN CLASSES IN DECEMBER, THE AVERAGE AGE OF PUPILS IN EACH CLASS, AND THE PER CENT THAT THE NUMBER IN EACH CLASS IS OF THE NUMBER IN ALL THE CLASSES.

ATTENDANCE.

It is our constant endeavor to render the schools profitable and attractive. A high order of instruction is furnished in all the grades; all books and supplies are provided free of cost; all moral influences, at our disposal, are employed to induce pupils to remain in the schools, and to avail themselves of all the advantages gratuitously and liberally afforded them for securing a substantial, elementary education; but our statistics disclose the discouraging fact that nearly seventy per cent of all pupils who enter the grammar schools, and fifty-eight per cent of all who enter the high school, fail, from necessity or choice, to complete the courses of study prescribed for those schools, and to secure diplomas of graduation.

SCHOOLS.

Three new schools have been established within the year: one grammar school in East Somerville district, one grammar school in Prospect-hill district, and one primary school in West Somerville district. The three new buildings contain four schools each.

The primary schools contain 43.39 per cent of the pupils in all the schools, the grammar schools 49.32 per cent, and the high school 7.29 per cent.

PRIMARY SCHOOLS.

Thirty-five schools of this grade contain one class each; ten, two classes each; one school contains three classes. Thirty-one of the forty-six primary-school teachers have had a term of service

that entitles them to the maximum of salary. The remaining fifteen have taught from one to three years.

Nine teachers in schools of this grade report no case of corporal punishment during the year; three report one case each; and five two cases each. A large proportion of all cases reported occurred in comparatively few schools.

GRAMMAR SCHOOLS.

At the close of the school year in July last, two hundred and eleven pupils were graduated at the several grammar schools, being thirty in excess of the largest number graduated in any previous year:—

From the L. V. Bell School,	73 :	boys,	37 ;	girls,	36
“ “ Prescott	“ 51 :	“ 25 ;	“ 26		
“ “ Morse	“ 30 :	“ 10 ;	“ 20		
“ “ Highland	“ 29 :	“ 11 ;	“ 18		
“ “ Forster	“ 28 :	“ 11 ;	“ 17		

One hundred and fifty-five of the graduates from the grammar schools entered the high school in September:—

From the L. V. Bell School,	50 :	boys,	23 ;	girls,	27
“ “ Prescott	“ 36 :	“ 16 ;	“ 20		
“ “ Highland	“ 27 :	“ 10 ;	“ 17		
“ “ Morse	“ 22 :	“ 9 ;	“ 13		
“ “ Forster	“ 20 :	“ 6 ;	“ 14

HIGH SCHOOL.

When this school first occupied the present high-school building, March 4, 1872, it contained 150 pupils and 6 teachers, — a teacher for every 25 pupils. At the present time it contains 378 pupils and 9 teachers, — a teacher for every 42 pupils. The whole number of pupils in attendance in September last was 385, being 70 in excess of the largest number belonging to the school at any previous period. The class that entered the school at the beginning of the fall term, numbered 165 pupils. The largest number entered at any former time, was 122.

In consequence of the large addition to the school at the beginning of the school-year, it was necessary to place a portion of the pupils in the high-school hall, and to employ an additional teacher.

From present indications, it will be necessary to construct schoolrooms in the high-school hall the coming year, and to employ another teacher.

“ at the present time	166

Forty-two per cent of all pupils who have entered the high school for the last twenty years have received diplomas of graduation.

Forty-nine per cent of the pupils who entered the school in September, 1881, graduated at the close of the school-year in June last.

Six of the graduates entered Harvard College and the Annex; two, Tufts College; two, Boston University; one, Smith College; one, Wellesley College; one, Newton Theological Institution; four, the Institute of Technology; two, the Salem Normal School.

THIRTY-THIRD ANNUAL EXHIBITION OF THE SOMERVILLE HIGH SCHOOL, TUESDAY, JUNE 30, 1885, AT 9 O'CLOCK A.M.

ORDER OF EXERCISES.

- SINGING.¹—CHORAL: “Lord, how great thy love!” *Flotow.*
 CHORUS: Peasant’s Wedding March (unaccompanied). *Soderman.*
1. SALUTATORY IN LATIN. J. DWIGHT PRINDLE, JUN.
 2. ESSAY. *Maximilian.* A. BERTHA HARDY.
 3. READING. An Unexpected Acquaintance. *Twain.*
ANNIE W. SLEEPER.
 4. BRUTUS ON THE DEATH OF CÆSAR (in Burmese, with introduction in English). HEMMAY KLAIPO.
- SINGING.—SOLO AND CHORUS: *Inflammatu*s, “*Stabat Mater.*” *Rossini.*
5. READING. The First Settler’s Story. *Carleton.*
ELLA GERTRUDE MATHISON.
 6. FROM “SCHWARTZ AUF WEISS.”
ABBIE E. FOLSOM, R. GERTRUDE PARKHURST.
MAY E. POWERS,
 7. READING. How Girls study. *Belle Macdonald.*
M. LOUISE SPEAR.
- SINGING.—DUET: The Pilot (male voices). *Millard.*
 UNISON SOLO: The New Kingdom (female voices). *Tours.*
 (With orchestra and organ; instrumentation by S. Henry Hadley.)

¹ Singing accompanied by Hadley’s Orchestra.

8. FROM "TROILUS AND CRESSIDA." (Original version in Greek.)
 WALTER P. HUTCHINSON, KATHARINE R. MILES,
 S. ALBERTIE TUTTLE, LEILA L. RAND.
 LEONORA VINAL,

9. READING. A Georgian at the Opera. *Harper's.*
 EDWARD B. RUSSELL.

RECESS.

- MUSIC. — IDYL: The Blacksmith in the Forest. *Michaelis.*
 At night. In the morning. At the brook.
 Morning prayer. Forest smithy.

- SINGING. — SEMI-CHORUS: Ave Maria. *Marchetti.*
 CHORUS: Old Daddy Longlegs (humorous). *Macirone.*

10. ESSAY. *Music as an Art.* EDITIE A. WOODMAN.

11. FROM "LES FEMMES SAVANTES."
 BERTHA E. BUTMAN, LURA A. GORDON,
 HELENA McMASTERS, FRANK A. SMYTHE.

12. READING. The Old Actor.
 LIZZIE G. KNAPP.

13. POEM. MARY J. CHENEY.

- SINGING. — "Protect us through the coming night." *Curschmann.*

14. MEZENTIUS. *Virgil.*

FRANKLIN O. WATSON.

15. PROPHECIES. EMILY H. LEONARD.

16. VALEDICTORY. ALICE M. BUSWELL.

17. PRESENTATION OF DIPLOMAS.

By Mayor MARK F. BURNS.

18. PARTING HYMN.

MEMBERS OF THE GRADUATING CLASS.

Lucy Ella Brooks.

COURSE PREPARATORY TO COLLEGE.

Walter Perkins Hutchinson.	Angie Bertha Hardy.
Hemmay Klaipo.	Clara Anne Jolinson.
James Dwight Prindle, Jun.	Emily Henrietta Leonard.
Franklin Oliver Watson.	Katharine Rebecca Miles.
	Leila Logan Rand.
Alice Maude Buswell.	Sarah Albertie Tuttle.
Clara Zenora Elliot.	Leonora Vinal.

EVENING SCHOOLS.

The public statutes require every town and city in the Commonwealth, having ten thousand or more inhabitants, to establish and maintain evening schools for giving free instruction in industrial or mechanical drawing to persons over fifteen years of age; and in orthography, reading, writing, geography, arithmetic, drawing, the history of the United States, and good behavior, to persons over twelve years of age.

In compliance with these requirements, four evening schools have been established in different sections of the city, and are now in successful operation: one, for instruction in mechanical and free-hand drawing, in the high-school building; and three, for instruction in grammar-school studies, in the Prescott, Luther V. Bell, and Highland schoolhouses.

COURSE OF STUDY.

The following law has been enacted by the Legislature of Massachusetts, and approved by the governor : —

SECTION 1. Physiology and hygiene, which, in both divisions of the subject, shall include special instruction as to the effects of alcoholic drinks, stimulants, and narcotics on the human system, shall be taught as a regular branch of study, to all pupils, in all schools supported wholly or in part by public money, except special schools maintained solely for instruction in particular branches, such as drawing, mechanics, art, and like studies. All Acts, or parts of Acts, relating to the qualifications of teachers in the public schools, shall apply to the branch of study prescribed in this Act.

Sect. 2. All penalties now fixed for neglect to provide instruction in the branches of study now prescribed by law shall apply to the branch of study prescribed in section one.

Sect. 3. This Act shall take effect on the first day of August, 1885.

In compliance with these requirements, suitable text-books have been placed in the hands of all teachers in our public schools, to be used by them in imparting oral instruction to their pupils in physiology and hygiene.

Sets of Van Antwerp & Co.'s physiological charts have been placed in all the larger school-buildings.

The "Business Standard" writing-books have been substituted for the "Duntonian" writing-books, in the schools of Prospect-hill district.

Some important modifications have been made in the course of study in arithmetic, whereby the work is more equally distributed among the several classes.

In order to secure a more complete correspondence between the work required of the schools, the time allotted for its performance, and the average ability of pupils, some changes in the management of the schools have been introduced, and some further modifications in the course of study are required.

The length of our school-year is nominally forty weeks; but the holidays, and the stormy days in which the sessions of the schools are omitted, amount usually to two weeks. Consequently there are only thirty-eight weeks available for school-work during the year. In September, 1872, the length of the school-year was reduced two weeks. In July, 1875, the afternoon sessions were shortened thirty minutes. In January, 1884, a session of two hours Wednesday afternoon was substituted for the session of three hours previously held Saturday forenoon. Hence, during the last thirteen years, the school-year has been shortened one hundred seventy-six hours, or fifteen per cent; but no diminution of requirements has been made within that period of time. On the contrary, the course of study has been much extended.

As a result of these changes, pupils of average ability are unable to meet the requirements of the schools in the time assigned without undue assistance from their teachers. Teachers feel compelled, by much oral instruction, minute illustrations, and by various other expedients, to simplify the work of their pupils and to render them much assistance during their entire course.

The natural effect upon the mental habits and character of pupils, resulting from such practice continued through a series of years, is strikingly apparent, and claims our thoughtful and serious attention. The more obvious results of thus constantly relying upon the guidance and assistance of others, are superficial scholarship, want of self-reliance and self-confidence, lack of close and vigorous application to study, inability to gain knowledge from the printed page without much assistance, and marked deficiency of mental vigor and strength of will, so essential in overcoming the difficulties which constantly confront the learner in all his course.

These results must be remedied by avoiding the causes which produce them. To induce habits of close and vigorous application, more study must be required of pupils. The arrangements in all the schools must be such as will secure the greatest amount of time for study in school hours. We must insist upon greater thoroughness in the essentials of all studies pursued in the schools. The course of study must be contracted by eliminating, from all the studies pursued, whatever is of minor importance and of doubtful utility. School requirements, school time, and the ability of the learner should so harmonize that the work demanded may be accomplished by industrious, faithful pupils of average ability, within the hours assigned to the schools.

As a rule, we would confine school work to school hours. Pupils who faithfully and industriously devote themselves to the performance of school duties during school hours should be released from them when they leave the schoolroom. The time that intervenes between the sessions of the schools should be devoted to rest, recreation, and the performance of home duties. If, in a well-organized and wisely conducted school, industrious pupils of average ability are unable to meet its requirements in school hours, we are constrained to conclude that the demands are excessive and should be reduced.

Several changes of encouraging promise have been introduced to afford pupils more time for study in school, and to reduce school requirements.

All schools which contain a single class are divided into two sections. While the pupils of one section are reciting, those of the other section are preparing their lessons. By this arrangement every pupil can recite at each recitation without prolonging it to the point of weariness. The expectation that at some stage of the recitation he will be required to communicate to his teacher and associates something of what he has learned, becomes to the pupil a healthy incentive to careful preparation of the lesson assigned. School time is definitely apportioned to the several studies according to their estimated relative importance. Time is gained for securing greater thoroughness in the essentials of the several studies by omitting much of doubtful value.

the interests of the schools are committed: "Are the large appropriations for the maintenance of the public schools economically and wisely expended? Are the results obtained commensurate with the expense incurred? Are the studies pursued wisely chosen, and such as will be most helpful to pupils in the performance of their life-work? Are the methods of instruction adopted the best that have been devised? Are our teachers, all of them, the best that can be secured for the compensation awarded? Have they that high degree of intelligence and culture, that enthusiasm and devotion to their work, which are indispensable to the highest success? Are they apt to teach, and wise in their selections of what they teach? Do they discipline with judgment and discretion? Are they conscientious in their work, and do they exercise, at all times, a salutary moral influence upon their pupils?"

These are all pertinent and vital questions. Criticisms and censures even should be gracefully received whenever these questions do not admit of decided, affirmative answers.

To us who have accepted from our fellow-citizens the responsibility of directing the education of the children and youth of this community, the question, "What may justly be demanded of the public schools?" is one of vital interest. It is wise to consider whether or not the schools under our supervision are fairly meeting those demands.

An intelligent writer and critic says, "It may justly be demanded of the school, that it lay the foundation of character, quicken the moral sense, and help the child to become an honorable citizen; that it train for life, — that the acquisition of power be placed before the gaining of knowledge; that it furnish the child with a good store of information; and that it guard with vigilance the health of every pupil."

We are not permitted to know the future of our pupils, or what will be demanded of them when they enter upon the duties, and assume the responsibilities, of citizens; but it is safe to presume that they will need all the added strength which education can give to their natural endowments. In our instruction, therefore, we must have due regard to their entire being, and seek the cultivation and invigoration of each department of their threefold nature, — body, mind, spirit; for any system of education is defective which ignores or neglects either of these. By precept and by example we should endeavor to lead our pupils to the habitual observance

of known and accepted laws, whereby they may secure and retain physical health, vigor, and endurance. We should labor earnestly to make them intelligent, to furnish their minds with rich stores of useful knowledge, to develop mental power, and to promote intellectual culture. But our work for them is but partially and imperfectly performed, if, in consequence of our instruction and influence, they are not stronger to resist evil, firmer of purpose to pursue the right and the true, and if in all their future they have not more exalted aims and deeper reverence of heart for whatever is sacred and pure. Our pupils may well forego the renown that accompanies brilliant scholarship and superior intellectual attainments, if they can pass through life with firm moral principles and unsullied characters; if, under all circumstances, they "hold fast to the venerable landmarks of morality, and obstinately cling to moral good."

Respectfully submitted.

J. H. DAVIS,
Superintendent of Schools.

SOMERVILLE, Jan. 2, 1886.

REPORT

OF THE

SOMERVILLE MYSTIC WATER BOARD.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Feb. 9, 1886.

Referred to the committee on printing, to be printed in the annual reports. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Feb. 10, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

To his Honor the Mayor and the City Council.

GENTLEMEN, — The Somerville Mystic Water Board respectfully submits its report for the year ending Dec. 31, 1885, accompanying it with a detailed report of the superintendent to this board, giving an account of the condition of the property, reporting the year's work, presenting a financial statement, and specifying the needs of the department the coming year.

In view of the fact that a much smaller appropriation was granted than seemed to the board necessary at the beginning of the year, we are gratified that the condition of the market, together with favoring circumstances in the doing of work, has enabled us to place the department in a condition to reduce the number of bursts nearly one-half, and the number of leaks one-third, lessening the expense for repairs very materially.

Three-fourths of the six thousand two hundred and eighty-six feet of extension of distribution mains have been cast-iron pipe, while half of the remainder has been galvanized iron. This is in accordance with the vote of the board, Oct. 4, 1884, expressing its confidence in the economy of iron pipe, and the protection of water-takers from the annoyance of frequent breaks. Our experience is the same as that of other cities. Fitchburg finds the cement-lined water-mains a great burden of expense for repairs, costing \$3,520 to keep in repair, for one year, twenty-one miles of cement-lined pipe, and only five dollars for eleven miles of iron pipe. Worcester says the only trouble experienced in the water-department is with the cement-lined pipe, and they are replacing it as fast as possible. The "History and Statistics of American Water-Works" shows the same condition of things throughout the country. It was practically impossible to lay iron pipe when our mains were originally built, owing to the inflation of iron at that

time; and there has been no time since, until recently, when the price was within the reach of our city. The depression of the iron market, and the improved facilities of manufacture, have enabled us to secure it at a slight advance on the cost of cement-lined pipe.

The relaying of Linwood and Fitchburg Streets with twenty-six hundred and eighty-two feet of cast-iron pipe was the most important work of the year. The old pipe, when uncovered, was found to be in a condition worse, if possible, than we had anticipated. The joints were weak, and many of them leaking.

The Beacon-street main should certainly be relaid this year. Ten times during the past year was travel interrupted on that important thoroughfare, by bursts or leaks; nearly one-fifth of all the bursts and leaks of the year were on that main.

The department should lower the pipes in some of the streets the coming year, to avoid freezing. Few annoyances to water-takers are so vexatious, and inexcusable on our part, as to be deprived of water from street freezing. This is no reflection upon the action of the board in the past, but comes from the lowering of the street grade, so as to bring the pipes near the surface. It has already cost the city almost as much to thaw and repair these exposed pipes, as it would have done to relay them. No private enterprise would allow such a state of affairs to continue, and the city cannot afford it.

We must again emphasize the value of the hydrants, and express our purpose to supply many new ones for the better protection of property from fires, appreciating the necessity of this department co-operating with the fire-department in this regard. Special attention has been given to the quality and the setting of the new hydrants, and those substituted for old ones. No one of the three hundred and three hydrants failed to meet the requirements of the fire-department the past year. Much attention has been given to the examination of hydrants; and, in the case of severe weather, they are carefully protected from freezing. We are confident that you will see the necessity of making the appropriation to this department sufficient to enable the board to set the thirty new hydrants asked for by the fire-department.

Permission was given last year in several cases for the use of the hydrants in watering streets. This is in every way undesirable, as injury comes to them by unskilled handling. It is hoped

this practice may be discontinued the coming year. This can only be done by setting four new stand-pipes.

The large iron drinking-fountain in Union Square, at which hundreds of horses have drunk daily, without unchecking, has probably been the greatest public convenience in the city. It has been frequently broken by heedless teamsters, until finally it has been rendered useless. We cannot afford to take a step backward in such a comfort for man and beast; but a more substantial fountain will probably be required for economy's sake, if no other.

There are in the city nearly 50 miles of distribution mains. 27 miles and 1,998 feet of service-pipe, and 4,334 services.

The amount spent for construction the past year was \$5,245.67.

For the work done in laying services, setting gate-boxes, repairing, etc., as well as for the condition of the buildings and the stock account, we refer you to the detailed statement of the superintendent, Mr. Nathaniel Dennett, herewith submitted, whose faithful service and skill are highly appreciated by this board.

J. O. HAYDEN.
WALTER S. BARNES.
CHAS. H. BROWN.
JOHN M. WOODS.
MILO CRANE.

SUPERINTENDENT'S REPORT.

To the Somerville Mystic Water Board.

GENTLEMEN, — I present a report of all the work done under my supervision during the year ending Dec. 31, 1885.

DISTRIBUTION MAINS.

These were extended a total distance of 6,286 feet, or one mile 1,006 feet; the pipe used consisting of 4,593 feet 8 inches of cast iron, 977 feet of cement lined, and 715 feet 4 inches of galvanized iron. The expense of trenching for the cement-lined pipe laid for the Middlesex Bleachery was borne by that corporation, and a proportion of the expense of extension in Tennyson, Jaques, and Thorndike Streets was assumed by private parties.

There were relaid 2,682 feet of cast-iron pipe in Linwood and Fitchburg Streets, the same taking the place of cement-lined pipe, which, when uncovered, was found to be in a very precarious condition, especially at the joints, many of which were weak and leaking. The work of relaying was done in the most thorough and substantial manner, and will prove a great benefit to that section of the city.

The old cement-lined pipe extending from Washington Street through the McLean Asylum grounds having become unreliable, a new line of cast-iron pipe was run from the end of Fitchburg Street, under the Lowell Railroad embankment, and up the rear avenue to a connection near the main building; the McLean corporation paying all the expenses of the extension, and of relaying Fitchburg Street, excepting the actual cost of the pipe in said street.

There were 37 bursts on mains, in repairing which 205 feet of pipe were used. There were also 24 leaks on mains from various causes; pick-holes, rust, etc. The number of bursts the previous

year was 71, and of leaks 35; showing a decrease of 34 in the former, and 10 in the latter, in 1885.

I would again call your attention to the weak condition of the main in Beacon Street. There were five bursts and an equal number of leaks thereon the past year; and much damage and delay to travel are liable to be caused at any time, particularly on account of the proximity of the street-railway. The main in Maple Street is very weak, and both the above-named streets should be relaid on the first opportunity. Walnut Street, also, between Bonair Street and Broadway, a distance of 600 feet, should receive the earliest attention. For the past seven years bursts have been numerous there, and fifty-five dollars have been paid in damages, apart from the expense attendant upon repairs. The depth of the pipe is so great that a burst is liable to destroy the foundations of buildings in the vicinity.

As much as possible of the old cement-lined pipe should be removed each season, and cast-iron pipe substituted. By so doing, and by employing the stronger material for all new work, a marked diminution in the number of bursts and leaks will be observable, and greater safety secured in case of fire.

I again call your attention to certain streets wherein the pipes should be lowered to prevent the services connected with them from freezing. Alterations in grade in parts of Bond and Rush Streets, and in Washington Street near the Lowell Railroad, have left the mains so near the surface that freezing is inevitable and a source of much trouble and expense every winter. There are about five services on Washington Street, and nine on Bond Street, for thawing and repairing which a sum nearly sufficient to relay the pipes has already been expended.

MAIN GATES.

Twenty-three new gates were set, fourteen on the extensions and nine on old mains; viz.:—

On extensions, —

- 1 six-inch gate, corner of Vinal and Summit Avenues.
- 1 “ “ at Middlesex Bleachery.
- 1 four-inch gate in Mount Pleasant Street.
- 1 “ “ corner Eglantine and Gilman Streets.
- 1 “ “ “ Glen and Pearl Streets.

- 1 six-inch gate, corner New Thurston and Medford Streets.
- 1 " " " Jaques Street and Chauncy Avenue.
- 1 one and one-fourth inch gate, corner Pearl Street and Pearl-street Place.
- 1 six-inch gate, corner Sycamore Street and Highland Avenue.
- 1 four-inch gate, corner Walnut Street and Highland Avenue.
- 1 six-inch gate, Pearl Street, near Pearl-street Place.
- 1 " " corner Thorndike and Holland Streets.
- 1 " " " Dartmouth and Medford Streets.
- 1 " " McLean Asylum grounds.

On old mains, —

- 1 six-inch gate, at Sacramento Street and Somerville Avenue.
- 1 four-inch gate, at Chester and Orchard Streets.
- 1 " " Dover, near Orchard Streets.
- 1 " " at Bonair and Dana Streets.
- 1 six-inch gate, Park Street, near Ivaloo Street.
- 1 one-inch gate, Ivaloo, corner of Park Street.
- 1 six-inch gate, Linwood Street, near Poplar Street.
- 1 " " Somerville Avenue, corner Linwood Street.
- 1 " " Fitchburg Street, near Lowell Railroad.

Gate-boxes were placed over twenty-three new gates and twenty old ones, and fifteen received repairs. Four gates were reset, and seven were substituted. Three were moved; many were packed and otherwise repaired; all had great care, and all are believed to be in good condition. The total number of gates in the city is four hundred and sixty-one.

HYDRANTS.

These form an important feature of the public economy, since upon their judicious distribution and proper setting the safety of property largely depends.

Two new hydrants were set, — one for the Middlesex Bleachery, on their extension; and one on Hawkins Court, about three hundred feet from Hawkins Street. Six hydrants were substituted, six reset, seven repaired, five thawed, and one removed. The last named was a Lowry hydrant on Perkins Street, near the Charles-town line, in place of which a post-hydrant was set. The Lowry

will be repaired and used when needed. The total number now in the city is three hundred and three. All are in excellent condition, and no instance was reported of their failure to fully meet all the requirements of the fire-department. They are thoroughly examined every two months, and on the approach of cold weather every precaution is taken to prevent their freezing. As the result of a careful estimate by the chief of the fire-department and myself, based upon the increase of buildings, and the inadequately protected condition of certain localities, I recommend that thirty new hydrants be set in 1886.

I renew my recommendation contained in a former report, that all hydrants set in clay soil have such soil removed from around them, and that it be replaced with soil of a gravelly nature. This is necessary to prevent "heaving" by the action of frost.

STAND-PIPES.

These are all in good order, requiring but slight expense during the year. No new ones were set, but more are much needed, and I therefore recommend the setting of four the present year.

DRINKING-FOUNTAINS.

All these received the customary care, ten having been repaired. Three of the fountains for personal use were discontinued, as it was found impossible to prevent their injury by malicious parties. These were in Davis Square, Union Square, and on the Park.

The large fountain at the easterly end of Union Square required great attention, and caused considerable expense. It was set as an experiment, and, being steadily used by horses, was often injured. It was finally knocked from its foundation by a heavy team. And I recommend that your board confer with the committee on highways, on the subject of replacing it with one better adapted to the requirements of such a thoroughfare as Union Square.

SERVICES.

There were 288 services laid, an increase of 80 over the number in 1884. There were used 11,770 feet of pipe, making a total length in the city of 144,558 feet, or 27 miles 1,998 feet. The

total number of services is 4,334. The average cost per service was \$18.22.

Twenty new services were substituted for old ones; 143 were cleared of eels, rust, sediment, etc.; 37 iron service-boxes were set in place of old wooden ones; 11 new gates and 22 new gate-boxes were set on old services; 3 services were lowered; 68 services and 65 boxes were repaired, and one service hydrant was set. Water was shut off, for repairs and other causes, from 131 dwellings, shops, stables, etc.

The old wooden service gate-boxes in the city, to the number of about five hundred, being all in a decayed condition, are practically useless, and should have improved iron ones set in their places as soon as possible. The loss of their covers (which are often found kicking about the streets) renders them dangerous to pedestrians; and, as they become filled with dirt, it is frequently impossible to shut the gates in sidewalks when repairs are needed.

MISCELLANEOUS WORK.

Seventy-two trenches were repaired, and seventy-four places paved.

WORK OF DEPARTMENT SHOPS.

Ninety pieces, or six hundred and thirty feet, of cement-lined pipe were made, many hydrants and gates repaired, gate-boxes constructed, all the fittings for services prepared, and a large amount of incidental work was performed.

BUILDINGS.

The water-works building, corner of Prospect Street and Somerville Avenue, received some greatly needed interior alterations and repairs, making the office more commodious and convenient for the board and for citizens. New tables, chairs, etc., were furnished. The alterations also gave increased and more desirable shop-room, the want of which had long been felt. The building stands greatly in need of exterior repairs to make it conform to the generally excellent appearance of all other buildings owned by the city.

STOCK ACCOUNT.

Cast-iron pipe	\$5,966 10
Cement-lined pipe	421 90
Sheet iron	337 18

REPORT

OF THE

OVERSEERS OF THE POOR.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 26, 1886.

Referred to the committee on printing, to be printed in the annual reports.
Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 27, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

BOARD OF OVERSEERS OF THE POOR OF THE CITY
OF SOMERVILLE, 1885-86.

HON. MARK F. BURNS, MAYOR,
Chairman, ex officio.

HERBERT E. HILL	Ward One.
CHARLES S. LINCOLN, <i>Chairman</i>	Ward Two.
EDWARD GLINES	Ward Three.
CHARLES G. BRETT	Ward Four.

COMMITTEES.

Finance. — Messrs. GLINES and HILL.

Investigation and Relief. — Messrs. LINCOLN and BRETT.

GEORGE T. LINCOLN, *Secretary.*
CHARLES C. FOLSOM, *General Agent.*
THOMAS M. DURELL, *City Physician.*

OFFICE: Police Building, Bow Street.

CITY OF SOMERVILLE.

To the Honorable City Council of the City of Somerville.

THE present Board of Overseers of the Poor was created under Chap. 61 of the Statutes of 1885. Under the provisions of that Act, the members held their first meeting on the first Monday of May last, for the purposes of organization, at which a chairman was elected to preside in the absence of the mayor, who is a member and *ex-officio* chairman of the board, and a temporary secretary was appointed. By-laws were subsequently adopted, by which the board was to be governed in its work. They provide for the appointment of a general agent and secretary, and in general terms define their duties; it being voted to keep the two offices separate. The board having been informed that the appointment of these officers come under the provisions of Chap. 320 of the Acts of 1884, entitled "An Act to improve the civil service of the Commonwealth and the cities thereof," a competitive examination of the candidates was subsequently held by the chief examiner of the civil-service commission; and from the names reported eligible, selection was made, resulting in the appointment of Charles C. Folsom as general agent, and George T. Lincoln as secretary, at salaries fixed by the city council.

These proceedings necessarily caused considerable delay in entering upon the course which the board had contemplated in the prosecution of its work.

Thomas Cunningham and George W. Washburne, members of the old board, were temporarily employed to discharge the duties of general agent till July 1, when Mr. Folsom's appointment took effect. It is but just to these gentlemen to say that they manifested a sincere desire to carry out the wishes of the new board of overseers, and rendered valuable aid and information whenever required, both to the members and its agent.

In entering upon the trust imposed on them by the city council, the board of overseers desire to say that they deemed it of first importance, in order to make their labor serviceable, that a thorough system should be inaugurated, and an intimate knowledge obtained of the details of the office, as well as an acquaintance with the laws relating thereto, especially to settlement of paupers; also, that care should be taken, in administering aid to the poor, to study the effect upon the character of the recipient, as well as his personal needs. Grave questions arise: how much, and in what cases, aid is to be given for the relief of the unfortunate. A wise discrimination must be constantly exercised. There are doubtless many worthy objects of charity where immediate succor ought to be granted, yet there are many cases where giving too freely operates injuriously upon the character and condition of the persons who may receive supplies.

To guide him in his work, the duties of the general agent are thus defined: —

DUTIES OF THE GENERAL AGENT OF THE OVERSEERS OF THE POOR DEFINED.

In entering upon the duties of his office, the general agent should, as soon as may be, familiarize himself with the laws relating to the poor, especially relating to the laws of settlement.

He should also familiarize himself with the methods or rules to be used in administering the affairs of his office, and especially with the system of books adopted by the board.

The records should be made with care, in detail, and carefully preserved, with proper indexes of cases, and with references to important matters which may arise. All letters received, relating to the affairs of the board, should be filed, or put in a blank binding prepared for the purpose, in the order received, and properly indexed. Copies of all letters and notices sent by the board, either of its members or its officers, should be preserved in a letter-book or otherwise, especially if such letters or notices relate to a settlement. The general agent should make a minute of all important matters that occur in the discharge of his duties, call attention of such matters to the board, and make such suggestions as the case may, in his judgment, warrant.

The general agent should give immediate attention to all applications for aid, investigate their merits, and furnish aid, as the pressing nature of the case may demand. In getting the history of applicants, every important fact should be taken and preserved, especially the facts which may determine the settlement of the applicant; his willingness and capacity or ability to work, his trade or calling, the cause of his poverty, and other circumstances, should be ascertained and preserved in some form approved by the board.

Great care should be taken to avoid imposition; and the general agent should, so far as possible, obtain his information and make his investigation in person and from any other reliable sources. When applicants are able to work, the general agent should require them to do some work, if he has any, as compensation for aid which may be granted.

In giving orders for supplies, duplicate lists should be preserved, and the applicant's receipt therefor taken.

The general agent shall compare all bills rendered with the orders which shall be returned with the bills; and the persons filling the orders shall require the applicant, in whose favor it is given, to receipt for the supplies on such order itself, and return the same with their bills as vouchers. All money-orders shall be drawn on the city treasurer, signed by the general agent, and countersigned by one member of the board. An order-book for money shall be kept, from which such orders shall be taken for the applicant, a memorandum of which, showing the name of applicant, amount, and purpose, shall be preserved in counterpart.

He shall devote his whole time to the duties of his office, so far as it shall be necessary. In case of temporary absence, his place shall be filled by some person to be selected by him, satisfactory to the committee on investigation and relief, and at his own expense.

The books of the old board of overseers, containing their accounts, have, with some slight modifications and additions, been continued in use by this board to the present time.

The appropriation of the city council for the maintenance of this department for 1885, —

Annual appropriation	\$14,000 00
Subsequent "	1,000 00
Received from outside sources (as per statement " D ")	1,495 79
	<hr/>
	\$16,495 79
Total expenditures	16,430 32
	<hr/>
Balance unexpended	\$65 47

The various purposes to which this amount has been applied, and the corporation expenditures for the years 1884 and 1885, will be seen in the tabular statements annexed, which were prepared by the secretary of this board.

ALMSHOUSE.

The subject of an almshouse and burial lot has been called to the attention of the present Board of Overseers, and the necessity for the same discussed by them. The question is becoming one of serious importance, and should receive a careful consideration, whether viewed from motives of economy, or on the grounds of convenience or necessity.

The overseers do not wish to be regarded as indifferent on the subject; at the same time they would hesitate to impose upon their fellow-citizens any extravagant outlay, or appear importunate in bringing the matter to public attention, or suggest an expenditure which the condition of the city finances would not justify, or the public good require, nor would they arrogate to themselves the exclusive recognition of the events and needs of this department, nor have they any favorite scheme to propose; but they feel, in bringing this important subject to the attention of the city council, they perform but a plain duty from which they would not escape.

In closing, the Overseers of the Poor desire to add that their work is carried on by them in great harmony, and they are zealously and faithfully supported by the general agent and secretary.

HERBERT E. HILL,	}	<i>Overseers of the Poor.</i>
CHAS. S. LINCOLN,		
EDWARD GLINES,		
CHAS. G. BRETT,		

REPORT
OF THE
BOARD OF HEALTH.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 26, 1886.

Referred to the committee on printing, to be printed in the annual reports.
Send down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 26, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

OFFICE OF THE BOARD OF HEALTH,
CITY HALL, Jan. 26, 1886.

To his Honor the Mayor and the City Council.

GENTLEMEN, — In compliance with law, we present the eighth annual report of the Board of Health of Somerville, consisting of a condensed statement of our doings, and of the sanitary condition of the city, for the year ending Dec. 31, 1885.

MEMBERSHIP.

No change occurred in the membership of the board during the year. Jan. 28 George A. Kimball was re-appointed for two years, and Thomas M. Durell, M.D., was re-appointed city physician for three years.

ORGANIZATION.

Feb. 2 the board met, and organized by choosing the following-named officers: —

GEORGE A. KIMBALL, *Chairman.*

GEORGE I. VINCENT, *Clerk.*

WILLIAM H. BRINE (40 Houghton Street), *Inspector.*

NUISANCES.

The number and character of nuisances abated will appear by the following table, arranged according to the months when the complaints were received: —

NUISANCES ABATED IN THE YEAR 1885.

	* January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

Total	116	32	101	184	112	114	80	68	99	46	28	11	991

Number of nuisances abated	991
" " " referred to the board of 1886	111
" " " complained of	1,102
" " complaints (many covering more than one nuisance)	489
" " houses ordered vacated	29

* Including nuisances referred to us by the board of 1884.

Number of same since made habitable	14
“ “ same vacated in compliance with our orders	15
“ “ notices mailed	576
“ “ notices served by constables	54
“ “ letters written	96

The inspector has also, in going his rounds, given out notices to the number of 163, calling attention to minor troubles, such as untidiness of premises, garbage, ashes, and offal in yards, etc.

STAGNANT WATER IN STREETS. — We are pleased to note an improvement in the condition of many of our private streets, some of which have been repaired by the highway department, and others by this board.

CLEANING STREETS. — We would recommend that greater care be exercised to keep the streets clean. Many of those that are thickly settled should be cleaned quite frequently. We are informed that in Boston several of the business streets are cleaned daily, and we suggest that portions of our own streets near grocery and provision stores be cleaned at least twice a week.

PERMITS.

We have issued permits to keep swine and goats, and to collect grease, the same as in former years, charging two dollars for a permit to collect grease, and one dollar for each swine or goat.

All permits issued expire on the first day of May of each year.

SWINE. — Applications were received for permits to keep 232 swine. Permits were granted for 229, and refused for two, and the application for one was withdrawn.

GOATS. — Applications were received for permits to keep 19 goats, and permits were granted for all but one, — a permit for which was refused.

GREASE. — Twelve parties applied for, and were granted, permits to collect grease. Five of them resided in Somerville, four in Cambridge, and three in Boston.

We learn from the boards of health of Boston and Cambridge that forty-one Somerville parties were licensed during the year to collect grease in the former city, and six in the latter.

We have recommended three of our citizens as suitable persons to be licensed to collect grease in Cambridge.

ASHES.

Ashes and house-dirt were collected the first four months of the year by the highway department, under the direction of this board, at a cost of \$1,016.79. In April a contract was made with Martin Gill for removing the ashes, etc., for the year commencing April 29, at a compensation of one hundred and fifty dollars per month. Collections are made, the same as heretofore, on Wednesdays in Ward One, Thursdays in Ward Two, Fridays in Ward Three, and Saturdays in Ward Four; and the materials for removal (to be free from filth and offal) must be placed in barrels on the outer edge of the sidewalk before nine o'clock in the forenoons of the days when collections are to be made. The amount paid the highway department for removing ashes in 1884 was \$2,570.59, being an average of \$214.22 per month.

HOUSE-OFFAL.

Christopher Burke has collected the house-offal, under a three years' contract which will expire June 26 of the present year, without any money compensation.

Collections are required to be made at least once a week in December, January, February, and March; twice a week in April, October, and November; and three times per week in the months of May, June, July, August, and September.

NIGHT-SOIL.

Messrs. Russell and Fitch removed the contents of all privy-vaults and cesspools up to the 1st of June, by the old method, at a compensation, collected from householders, of four dollars per load in the months of May, June, July, August, September, October, and November, and two dollars and fifty cents in the five remaining months of the year.

On soliciting proposals for a new contract, it was found that lower prices could be obtained for doing the work by the new, or what is termed the "odorless," process, than by the old. Accordingly a contract for the term commencing June 1, 1885, and extending to Feb. 1, 1888, was made with Mr. R. M. Johnson of Arlington, for emptying the vaults and cesspools by the "odorless" process,

at a compensation of four dollars per load, or part thereof, throughout the year; a load consisting of eighty cubic feet, the same as under previous contracts.

The work is now done in the day-time, and very much quicker than by the old method; no dirt is made upon the premises, and all offensive odors are destroyed; and, altogether, the change is highly satisfactory.

Order-books are kept at the police-station on Bow Street, and at the grocery store at the corner of Perkins and Franklin Streets.

The contractors report that five hundred and sixty-two loads were removed during the year.

SEWERS.

During the year the board of aldermen laid a sewer in Cherry and Fairlee Streets, and a sewer was also built in Wyatt Street by the owners of the abutting estates. By means of the drainage facilities thus afforded, long-standing nuisances, which have been repeatedly mentioned in these reports, have been abated.

Sewers should be built in Lowell Street, Ward Three, and its vicinity, as the sewage now flowing on the surface causes a serious nuisance to the public.

A sewer is also needed in Woodbine Street, which is near Lowell Street, but on the other side of the Lowell Railroad.

SCHOOL-BUILDINGS.

In September a case of diphtheria occurred in the family of the janitor of the Luther V. Bell School; and, as they occupied apartments in the basement of the schoolhouse, they at once vacated the premises by our order, and the entire building was thoroughly fumigated under our direction. Soon afterward, at the request of the school committee, we made a careful examination of the drainage; and, because of defects found inside the building, it was deemed best to close the school until the proper repairs and changes could be made. The school was closed two weeks, and during that time the defects were remedied.

The sanitary arrangements in some of our school-buildings are defective, and should receive the careful consideration of those having the buildings in charge. We are glad to note that the authorities have taken an interest in this matter during the past few years.

DEATHS.

Five hundred and forty-eight deaths have occurred during the year, and twenty-four still-births.

DISEASES DANGEROUS TO PUBLIC HEALTH.

SCARLET-FEVER. — There were 226 cases of this disease reported to our board during the year, 14 of which proved fatal.

The whole epidemic has been of a mild type, and, as was the case last year (1884), no unusual precautions were taken by the board.

We continue the custom of placing cards of warning, with "scarlet-fever here" upon them, on all houses in which the disease exists. We also fumigate after all cases.

DIPHTHERIA. — Only 110 cases of this disease were reported, of which 28 proved fatal.

We are happy to state that nothing of the nature of an epidemic has visited us. Warning cards are used, and houses fumigated, in all cases.

TYPHOID-FEVER. — Forty-one cases were reported, with 11 deaths.

During the latter part of August a case of typhoid-fever occurred in a house just over the city line, in Medford. This house is located in a valley; the land around it, which is used for farming purposes, and on which large quantities of night-soil have been used, slopes toward the house. The house is an old one, with a damp, musty cellar, and a sort of shed in which is situated the well used for cooking and drinking purposes. The vault, or rather the hole in the ground used as a vault, is situated on a higher level than this shed, and is only twenty-four feet away from the well. This well is practically in the centre of this whole slope, and must necessarily catch all the filth from it.

The family living in this house at the time of the outbreak of the sickness consisted of three persons; namely, father, mother, and daughter. All of them took the disease, the mother's case proving fatal. The man who worked for this family, and who drank the water from this well, lived in one of four small houses located near this first one. These houses were close together, and have one common vault. This man was sick some time before calling a doctor, and all of this time used the common vault.

There was another case in this house, one in the next, three in the third, and one in the fourth.

An analysis of the water from the well where the epidemic started (which was kindly made for us by Mr. George H. Cowdin

of Somerville) showed large quantities of impurities and organic matter ; some of these being in such large quantities as to be easily detected in the water as it came from the well, without evaporation.

The main point of interest in this series of cases is their probable origin and method of transmission.

VARIOLOID. — Only one case of this disease occurred in our city during the past year: This case was important, being one of the same series of cases which proved so disastrous to Montreal.

All precautions possible were taken to prevent the spread of the disease. Immediately after receiving notice of the existence of the disease, the patient was visited, and the house isolated by means of a police-officer night and day. The case terminated favorably, and no other cases resulted from it.

Our board ordered a general vaccination in September ; and in this way, during September and October, 2,233 persons were vaccinated free of expense.

We are free to say that in our judgment Somerville is one of the best protected cities, from this scourge, in the Commonwealth.

TABLES. — The inspector's tabulated report of the sanitary condition of houses where diphtheria was reported is presented herewith ; and we also present tables of scarlet-fever, diphtheria, and typhoid-fever reported, with the deaths from the same, during the year, and of deaths from these diseases in the city during the past nine years.

MAP OF SOMERVILLE.

1885.

SHOWING HEALTH DISTRICTS.

1885.

Sewers shown thus: - - - - -

DISTRICTS AND POPULATION.

We present a map, as heretofore, showing the boundaries of the health-districts into which the city was divided by the board of health of 1878, and the locations of dangerous diseases reported during the year.

We also present tables showing the number of deaths in the districts during the past twelve years; the five principal causes of death, the prevalence of dangerous diseases, and the nuisances abated in the same, during the past year; and the rates per thousand of cases of dangerous diseases and deaths therefrom in these districts during the past seven years.

Since the census of 1880 we have assumed that the population has increased, from year to year, at the same rate as the taxable polls; and on this basis we estimated the population in 1884 at 30,468, while the population, by census, in 1885 was only 29,992, and at the same time we know our population increased during the interval.

In making comparisons, therefore, between the rates per thousand of disease and mortality for the two years, this discrepancy must be borne in mind.

REPORT
OF THE
CITY PHYSICIAN.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 20, 1886.

Referred to the committee on printing, to be printed in the annual reports.
Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 20, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

To his Honor the Mayor, and the City Council.

GENTLEMEN, — I respectfully present my fourth annual report as city physician.

I have made during the year 2,404 visits; of these 397 were surgical, and 59 were made to persons at the police-station. I have, in accordance with the law, viewed the bodies, and given certificates of the probable cause of death, of 21 persons who died unattended by any physician. I have examined 15 persons supposed to be insane, and have given certificates in 7 cases. I have vaccinated 2,306 persons free of expense. Forty-one persons had teeth extracted at my office.

I have, in compliance with the city ordinances, examined five applicants for the police force.

Respectfully submitted.

THOS. M. DURELL, M.D.

City Physician.

JAN. 19, 1886.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 12, 1886.

Referred to the committee on printing, to be printed in the annual reports.
Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 12, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

To the City Council of Somerville.

IN rendering their report, the trustees beg leave first to congratulate their fellow-citizens upon the completion and dedication of the new Public Library on Highland Avenue. They desire also to express their thanks to the City Government for their hearty co-operation in bringing about this important event. They also desire to express their personal satisfaction in the increased facilities which have been furnished them in the performance of the important duties of their office, and the fresh impulse which they are calculated to awake.

The erection of the public-library building is the conspicuous event of the year now closing, if not, indeed, an event which may mark an important era in the history of our city. The want that has so long been evident has been freely and generously supplied. In their report of 1884, the trustees gave a detailed description of the building, then in the process of erection; and they have but to add that the important work is now complete, and they are pleased to say that they are now in possession of a building, finely located, richly and appropriately equipped, with appointments far more commodious and elegant than they had dared to anticipate.

DEDICATION.

The ceremony of the dedication of the public-library building occurred on the evening of Sept. 29, at the Unitarian Church on Highland Avenue, at which his Honor the Mayor, Mark F. Burns, presided.

The principal address was delivered by Mr. Justin Winsor, librarian of Harvard College, who was selected as the orator of the occasion. Short addresses were afterwards made by Rev. George

W. Durell, Rev. John S. Thomson, and Hon. George A. Bruce. The exercises were of a most interesting character, and were witnessed by a large and attentive audience, among whom were many prominent citizens of this and neighboring cities.

The address of Mr. Winsor was received with much favor. Aside from its literary merits, it is not too much to say that it contained much interesting information, and throughout furnished instructive and valuable suggestions of a practical character. The author has kindly presented the trustees with a manuscript copy of his address, which is herewith presented as an important supplement to this report.

The distribution of books among the patrons of the library was necessarily suspended from June till September. Several causes contributed to this result. The removal of books from the old to the new quarters, the adjustment and adaptation of the new shelving to the old catalogue, requiring much labor and care, and the many incidental wants which were to be provided, not readily foreseen in the final completion of the building, rendered an earlier time for actual occupancy and work impracticable. According to the last report of the librarian, the whole number of books on hand was 11,863. Additional purchases have since been made by the trustees, increasing the number to 12,134. In making the recent purchases, great care has been exercised to ascertain and supply defects in the various classes, especially relating to standard works. With this view, catalogues of other libraries have been examined, bookstores visited, books and literatures studied, and standard authorities consulted; and the result has been, that valuable acquisitions have been made in history, biography, travels, political economy, geography, fiction, and books of reference. It has also been our purpose to consider the wishes of readers who make their wants known through the librarian or otherwise. At the same time, our purpose has been to maintain a theory sound in principle, upon which the wishes of readers should be met, and keep in mind the true functions of a public library.

It cannot be said that our library is yet complete. The annual process of examination of its condition and wants must still be carried on. Old books must be replaced; new publications are constantly pouring in. A larger reading population must be provided for, and new wants be supplied. Yet the collection may be regarded as a good one, as a whole. In it may be found valuable

works upon almost every variety of topics, and a very few, if any, of a worthless character; and as such we can commend it to the public.

The number of books taken out during the year now closing was 65,450, and the number used in the rooms, 642. This shows a less number than 1884, when it appeared to have been 72,591. This can be accounted for by the suspension of issuing books from June till September, consequent on the transfer of the books from the old to the new building.

Of the books taken out the percentage is as follows:—

Fiction, including juvenile	70
Essays and periodicals	14
History and travels	10
Biography	4
Science and poetry	2

It is noticeable that here, as with public libraries generally, fiction constitutes the bulk of literature sought for by readers. Much has been and may be written upon this tendency, and the question is by no means easily settled. The fact cannot, however, be ignored, that the demand has become quite universal, and is to be treated as a problem to be solved by experience; and this board can only promise to deal with the matter as best they may, with a view to the best practicable solution. With the incipient formation of taste for reading, the trustees can have but little to do. Parents and teachers must here take a part in the work, and exert their influence in accordance with the views they may hold.

The trustees, in entering upon the work of their offices for the coming year, feel it incumbent on them to make their annual appeal for the means by which the institution under their charge is to be maintained. Thus far our library has been supported mainly by the public treasury. Donations have been rare and small. While other cities and towns in the Commonwealth have been favored in their public bequests, our main and almost sole reliance has been the appropriations of the city council.

There are obvious causes which conduce to this condition of things. We are comparatively a new municipality, with a new and somewhat shifting population. The interest which a long and continuous residence tends to create is here notably wanting. If our city were more isolated, and less suburban, the interest of its

people would undoubtedly be more concentrated, and its pride more local. The greater part of its citizens make the city little more than a sleeping-place, and expend the energies of their waking hours in the limits of the neighboring city. It has often been said that Somerville does not abound in men of wealth. We may not be conspicuous in that respect, yet it is certain that we have a large and rapidly increasing population, who exhibit no small degree of thrift and an increasing public spirit; and evidence is not wanting in particular instances showing an awakening interest in this department.

Let us hope that the erection of the public library may mark an era in its history, when the interest already awakened may culminate in some substantial contribution. The expenses for the ensuing year will necessarily be some larger than heretofore. The care and heating of the building will be the main causes; naturally, however, it will be felt, that, with the increased facilities which have been furnished to render this department serviceable to the public, the wants of the library in respect to its literature must also be carefully provided for.

The trustees have entire confidence that the citizens of Somerville are both willing and able to provide abundant means to make our public library worthy of the cause for which it was established. And they will deem it their duty and pleasure to apply the means which may be placed at their disposal in such a way as to render the charge imposed upon them useful in its administration and salutary in its influence.

LIBRARIAN'S REPORT.

WE have delivered, during the past year, 65,450 books for home use; and for study in the building 642 have been used.

The books were called in by the middle of June, preparatory to removal to the new building, and none issued until September. The largest number given out in any month was 7,740, delivered in March; and the largest on any one day was 666, on March 14.

The per cent of circulation, as in all libraries, is largest for fiction. Essays (including drama) and periodicals come next; history and travel next; with poetry, science, and the industrial arts less.

The last year's work may be regarded as the most important in the history of our library, as we now have a beautiful and convenient building for library purposes. The universal satisfaction expressed in our new building, and the favorable comparisons between it and some of more costly appointments, seem to show the wisdom of those who have projected and carried out the important undertaking.

We were unavoidably hurried into our new building before it was quite ready for us, and consequently there was unexpected delay in delivering books again. This being the first time for the twelve years of its existence that the library had been closed for more than a day or two at a time, people did not know how to accommodate themselves to such a state of things; and the remark was universal, "How did we ever get along before there was a public library?"

We take great pleasure in assisting those who constantly come to us for information on special subjects, and only ask a due amount of time to cull from our limited resources the wished-for knowledge.

The work of a librarian is so various that we are not surprised at any question or inquiry (we have even been consulted as to the rights of tenants); and though often quite uncertain whether our search will be rewarded with success, we are sure to find something

else quite as good, which will be useful in another direction. Here, especially, one finds memory an indispensable auxiliary, while the ability to think quickly is particularly desirable.

The schools depend more and more upon our reference books to accomplish their work; and, while our high school is constantly using our library as if it were an "annex" to their own building, we find the younger students of the grammar schools, encouraged by their teachers, looking up biography in cyclopædias and gazetteers. In one instance a class of children of nine years of age were eagerly reading every sketch of the life of Longfellow that we could furnish.

We have in our midst a large number of literary and other societies: these find our books convenient for reference; and while one will want to decide some disputed question by inquiry here, his opponent comes to the same source to verify his statement. Another, after looking in vain for the title of some book in the catalogue, finds, upon inquiry, that he has mistaken the very name of the book he was looking for.

People like that the books they have recommended and asked for should be ready while they are needed, but do not always consider that they must first be selected, and then wait the approval of the board at their next meeting, before they can be entered in the library; and, as this is generally but once in a month, it sometimes looks like delay.

As evidence that the books of the library are carefully handled and appreciated, hardly a fine has been assessed during the year for pencil-marking or other injury. 1,576 postal cards have been written and sent for books overdue during the year, and two are missing. 6,081 books have been covered and repaired, and three given.

A collection of pamphlets, relating to the early history of Somerville, have been sent by friends of the library.

HARRIET A. ADAMS, *Librarian.*

ADDRESS OF MR. JUSTIN WINSOR,

DELIVERED AT THE DEDICATION OF SOMERVILLE PUBLIC
LIBRARY, SEPT. 29, 1885, AT THE
UNITARIAN CHURCH.

ONE evening in October, 1631. Gov. Winthrop left his house at the Ten Hills for a stroll in the woods. Darkness coming on, he lost his way; and somewhere in the region where your pleasant streets now run, he was glad to find a deserted Indian cabin, near which he spent the night, walking by the fire which he had kindled, and singing psalms to pass away the hours. Whatever of literature was embalmed in those words of the psalmist, floating upon the still air of the midnight two hundred and fifty-four years ago, it is the earliest record which we have of the forms of letters, disputing with the sounds of nature and wild men, possession of the spot where we now are.

Eight or ten years later, the two hundred and sixty works which that butcher's son, John Harvard, had left to found the library of the neighboring university, were carried over your territory, from his home in Charlestown, to the little college at Cambridge. — the first collection of books which might be called a library that your soil, even transiently, ever knew.

It was the day of beginnings throughout New England. There was at Plymouth a small, struggling colony; and on a shelf, half hidden by his breast-plate and his swords, Miles Standish had a few books, conspicuous among which were "Bariffe's Artillery," "Cæsar's Commentaries," and a "History of the World." His neighbor, Elder Brewster, had something more considerable for a library, chiefly made up of polemical treatises, some of which he had doubtless printed himself, when, during his exile in Holland, he had gained his livelihood at the printer's case. I fear we should deem

to-day the books of the Pilgrim soldier more precious, if we had to read them, than the weightier shelves of their religious guide.

Our Puritan Massachusetts governor too, who sang here his psalms, had his books, as we know by the rather dreary list of such which he gave to the young college. Hardly more than one of them would be read to-day, except by an antiquary, — for we find among them the perennial *Livy*, — unless the “*Institutes of Calvin*,” a French Bible, and the “*Life of the Virgin Mary*” might have on some a special claim. In a list of books which belonged to Winthrop’s associate, Thomas Dudley, there is the same forbidding aspect to the modern scholar, unless the “*Vision of Piers Plowman*” attract his archaic sense.

And yet this was a time when the proportion of what are called liberally educated men was probably greater in this vicinity than it has ever been since; for of the forty graduates of Oxford and Cambridge which came to New England before 1639, one-half of them settled in this immediate neighborhood.

Here, then, were the signs, if anywhere on this broad continent, that England and English literature had gained a foothold; for Raleigh’s venture in North Carolina had come to nought, and the spirit which had settled Jamestown has never flourished in letters. To the North the French were threading the Valley of the St. Lawrence, but they were seeking peltries rather than the inspiration which produces a literature. To the far South, indeed, the printing-press was already a century old. Just one hundred years before the New-England Puritans expressed their discontent with the version of the psalms which Winthrop sang, by setting in type at Cambridge what we now speak of as the old Bay Psalm-book, — just a century earlier the Spaniard, in Mexico, had begun the printing of books.

Somebody has said that the world’s song of praise, rising to the skies, solidified in those Gothic cathedrals with which the religious sense spotted the map of Europe during the middle ages. We may call it typical of our later ages in the newer world, that the floating cadence of that midnight psalm, two centuries and a half ago, has hung over New England ever since, and become manifest in the schoolhouse and the library.

It took a long time, however, for the relations of a library to broaden into sympathy with the great mass of the people. In the eighteenth century, Boston and a few other towns acquired a small number of books in their corporate capacities; but the volumes seem to have had no functions except to be lent for special uses under the sanction of the selectmen. In the next century it was the private libraries of the Mathers, Hutchinsons, Princes, and Greens, which, by the liberality of their owners, afforded most of the literary help that was given in Boston; while the few books of the ministers of the country towns granted the same privileges in their neighborhoods. It was before the Revolution, and just as the seething of political passion began to manifest itself, that the first circulating library was established in Boston, as a book-seller's venture. It took a half a century more before an impulse to combine and administer more widely to the needs of reading people, particularly of young men, caused the institution of a class of libraries known as mercantile and apprentices' libraries, some of which still survive in those parts of the country where the later development of the free library has not yet possessed the public mind.

It is now hardly forty years since public sentiment began to ripen to the necessity of supplying free books to a community which had had a free education. There was the instance of one town in Massachusetts, where they began to do it by voluntary taxation, before there was any enabling Act of the legislature to legalize appropriations of money for such purposes. In 1848 the city of Boston received special legislative authority to found a library; and three years later a general law opened the way to all municipalities, at first under restrictions, but in the end leaving all to the wisdom and aspirations of the individual towns.

It was peculiarly a New England, even a Massachusetts, movement, so far as this country was concerned, but almost at the same time it had gathered head in England. Though successful beyond the sea, the movement has never attained the proportions there which it has acquired here in Massachusetts; and in no other part of the Union, not even in the other New-England States, has the system attained the significance which characterized it in Massachusetts. I do not think that, taking the country through, it ever promised so well for the future as now. The system has become specially attractive to private benefactors; it has re-acted upon the higher seminaries of learning, and at no time have colleges and

universities felt so much as now the necessity of making their libraries the centre of their educational system.

It must not be denied that a system of free libraries is not without some evils, as a system of free schools is. — as, indeed, every system of ameliorating humanity is, which has to work on a basis of averages. The college world at this moment is agitated by a question, which has, for its cardinal interest, what is called the elective system. This is nothing more than an attempt to counteract the evil tendencies of averages, — a purpose to let character and ability assert its own, unimpeded by the yoke which the dullards of every class impose. It would indeed be unwise to assert that there may not be great evils in that direction also; but the discussion of such a question may well be omitted here.

It is the elective system, however, as developed in connection with the free library, that has given rise to what is known as the “fiction question,” and other allied doubts, which have qualified the opinions of not a few respecting the advantages of the free-library system. I suspect the question will never be settled. It springs out of the diversities of the human mind, and out of the contrarieties of experience. As long as there are grades of intelligence and education, as long as there are sensitive and obtuse organizations, the wrong book will get into the wrong hands, and what might stimulate in one case will craze in another. There are perennial books in all tongues, which suit all ages and all climes. for they are the exquisite results of an exquisite genius; but the world is not yet old enough to have produced enough of them to constitute even a small library. New ages develop new wants, which pass away with the age itself; but they are as fixed a necessity to the mind of that age as the books that never die. Therefore the library, be it of the people or of the scholar, takes the impress of the passing time, and makes perpetual one question or another of fitness in the choice of books. I much suspect that a library can never be gathered that will make people of one mind as to the quality of its books, and as to the advantages to classes and individuals to be gained by the reading of some of them. There are, of course, partial remedies; but the strength of the best regulation lies in the counsel of parents and teachers. I hope the time is not far distant when instruction in the choice of reading will not be foreign to the purposes of our schools. We look to

education to counteract the evil tendencies of an extended franchise. We need to devise some special educational check to insure that a free range in the choice of books should be wholesome to the individual, and inspiring to the mass.

There is a tendency in our modern life to devote too much time to the magazine or the book which has a current fame. We read criticisms of it in the newspapers; and in society we hear comments upon it, or tattle respecting the author. One regrets to see the enthralment that these circumstances place upon too many readers. It was one of Emerson's rules, never to read any books but yearlings at least; and this philosophy is at the bottom of the rules of the greater European libraries, which do not make a new book accessible under a year, after which time there are but comparatively few to inquire for it. I suppose of the books published in 1885, we shall find hardly a quarter remembered in a twelve-month. Though the publisher's records are filled with their yearly thousands of titles, it hardly requires a score of years to reduce to a hundred the number of those which the booksellers are ever called upon to supply. Of the books published two centuries ago, there are scarce fifty that would bear reprinting; and of those of the last century, there are hardly more than a hundred and fifty known to others than special students.

It is always a question of vital importance to a library, how far it shall encumber itself with books of which the chance of use is very small, and of which the care and preservation is a charge. With libraries that are large or destined to become large, the question is much simplified. The nation, a great municipality, a dominant university, can seldom afford to neglect the charge of the minutiae of the press, whether they be ephemeral or inane. There is an implied obligation in a great library to meet every expectation. To do this is of course impossible, since it is not probable that the most extensive of modern libraries contains a fifth part of all the productions of the press during the last four hundred years, to say nothing of the earlier manuscripts. The chief librarian of the best equipped library in the world once told me that his collection could not satisfy one investigator in ten, if his research was aiming to be exhaustive.

Nevertheless, the implied obligation to which I refer means that

every great library must use its best opportunities to store up against need every thing that will interest, positively or negatively, any one engaged in the study of human action and human characteristic, and of every department of learning in which the human mind is an agent of acquisition. The truth is, the librarian of a great library has no conception of what will be the next inquiry to which he is subjected; and a large part of the instances in which his personal aid is sought touch material, which, without his peculiar experience, he would have burned up as beyond the possibility of demand.

This question of the care of obscure and ephemeral matter is very properly apart from the interests of the lesser public libraries, but not wholly. The history of every town is dear to its people, and so are the lives and fame of its distinguished citizens. The town that gave birth to the inventor of the cotton-gin or the magnetic telegraph, the sewing-machine or the telephone, is a source whence has issued a power which has moulded a phase of civilization. That town can well afford to be exhaustive in gathering the records illustrative of such indications in its history.

It would doubtless be too much to say that just the matter which kindles our fires, and supplies our paper-mills, is destined to become the great treasures of our libraries in later centuries; but there is a good deal of truth in it nevertheless. The great books are reproduced and can always be found, unless the new age has a revolutionary change of sentiment and taste, to bury them under newer interests; and this is not infrequently the case. It is those books and tracts which are so insignificant in their day of freshness, because we are too near them to discern their relations, that are preserved in obscurity, to become in one time the treasures upon which the binder's skill is exhausted. The commonness which makes us despise them now gives the flavor which makes them representative then.

It is significant that Sir Thomas Bodley, in founding the library at Oxford which now proudly bears his name, counselled against the accession of the waifs and strays of a London season, and particularly of plays. These very tracts that a few pence could have bought then, I have known the custodians of that library in our day to compete for at scores, and even at hundreds, of pounds. The most costly nuggets of our English libraries to-day are the

little play-books of Queen Elizabeth's time, when countless thousands nearly all perished with the reading. The purifiers and collators of our English texts have taught us their value, and perhaps no one more than Macaulay has made manifest the wealth of historic illustration existing in the ephemera of all ages.

In 1846, Panizzi, the great librarian of the British Museum, said, "If a librarian had been guided by critics, he would have burned the early productions of Byron; and had he judged from their first reception, he would have thrown away, as worthless, 'Paradise Lost' and Newton's 'Principia.'" The principal English authority on bibliothecal history and experience, who is now, I am glad to say, preparing a new edition of his "Memoirs of Libraries" (I refer to Mr. Edward Edwards), says, "The trash of one generation becomes the highly prized treasure of another." Such a statement is of course open to limitations, and for a library like yours, hardly I suppose aspiring to be one of the great libraries of the world, the limitations are obvious; but it is to-day the rule of the Bodleian, the British Museum, the great library of Paris, not to name some of the other leading libraries in Europe, as well as in this country, to reject nothing, having long ago learned the folly of discrimination. This omnivorousness is of course expensive; and a policy which may be necessary in a large collection would be simply foolishly extravagant in a small one, unless it be confined to some specialty of local interest.

I think there is no more important purpose of a local library than to preserve its local literature, and the writings of its local authors, as I have already said; and I would extend the provision to those writers who were born within the local precincts. There is no other sure way of preserving such books; for the great libraries, with their enormous field, must of necessity overlook much. The preservation somewhere of all books of a serious purpose, even if that purpose be nothing more than the creation of a healthy pastime, all students, not only of literature, but of the history of manners, will unite in commending.

It was not till after the beginning of the present century, that any public library of England would admit novels to its shelves; and there were few safeguards to insure the preservation of this class of books for the later students of manners and social symp-

toms. What would be known of the manners of England in the last century without Fielding? As little as the twentieth century will know of the nineteenth without Dickens and Thackeray in England, or Howells and James among ourselves. "The time may come," said Thomas Watts of the British Museum, "when future generations will look back to the English novels of our time with as ineffectual emulation as our generation looks on the drama of the Elizabethan age."

The active question, however, of the modern local library is, the kind of influence it shall have on its immediate constituency. There are two main causes to any useful results, — the librarian and the catalogue; for without them the books are a mob, and not an army.

We are told of the confectioner that he does not like his comfits, and of the shoemaker's son that he goes unshod. Some years since, Mr. Winter Jones, the principal librarian of the British Museum, in addressing a body of librarians, said that the librarian who reads is lost. That was his way of saying that it is a librarian's duty to become master of the scope of his library, and not to give himself up to the reading of the comparatively few books which he could deliberately plod through.

The very presence of many books to a susceptible mind is informing, and induces inquisitive and foraging quests. I have often thought, when young persons come to me, that I could tell by their talk if they were accustomed to the surrounding of a considerable collection of books in their own homes. I could see it in the glance of recognition which met allusions, and in the quality of their own responses.

The librarian should be fond, not so much of reading, as of rapid assimilation of what his eye lights upon. You may say, to be a good librarian requires a quick mind, rather than one of that kind which we call slow and sure. Such alertness of mental action adapts itself to the compassing of many books in a short time. He tests a book at once by his familiarity with others of a like character, and places it above, or below, or beside it, in his estimate. His rapidity of glance pierces the preface, the contents-table, the footnotes, the appendixes, the indexes; and a few sentences,

skimmed as he turns the leaves, give him the literary flavor and scope of the book.

Such facility of recognition must of course be supplemented by a knowledge of the ways to approach a subject. He must understand his bibliographical and indexical apparatus. He must know how to get at clues through the indexes of periodicals, and through the references in cyclopædias.

That we have not many librarians equal to such exacting inquiries, as these provisions suppose, is true, and they naturally gravitate to the larger libraries. But the service is steadily improving throughout the country; and our larger institutions are in no small degree sapped by the necessity there is of training their own assistants, to bestow them in the end upon the lesser libraries. It is an evil, which may perhaps be corrected by heeding the advice which a distinguished German gave half a century ago, when he recommended the establishment of schools of librarianship, as we have schools of technology. Such a departure will doubtless, if ever attempted, have the drawbacks which for a while attend all experiments; but, if the fruition is good, we may congratulate ourselves, that our library service will not be in so many instances recruited from spavined physicians, lawyers who have been thrown, and ministers with chronic bronchitis.

The one thing a librarian should dread is a sense of self-satisfaction. When he feels that his batteries are sufficiently charged, and his machinery perfect, he may be pretty sure of having reached the limit of his usefulness. It is said of Thorwaldsen that he was found one day despondent before a newly finished statue.

“What troubles you?” he was asked.

“I feel that my genius is gone, because I am satisfied with this statue, and there is no longing in me for any thing better.”

The old school of librarians is fast becoming extinct. They were satisfied with being the custodians of books: the modern school aim to be dispensers of books. It is not too much to say that we in America were the earliest to give the effect to this intention, however short of fulfilment we come in practice. The younger school of librarians which is growing up in Europe are greatly in sympathy with us, and may sometimes appeal to us for the countenance that traditional views deny them there. I have

a correspondent in Germany, the keeper of a royal collection, who turns hither for encouragement. Another, in Italy, has announced as his own invention a catalogue scheme, likely as he thinks to revolutionize the use of libraries; and, when we read his description, we recognize what we have long known in America as the dictionary system of cataloguy. In England the librarians of the lesser libraries, particularly of the free municipal collections, are advancing rapidly in the same direction.

Next to the librarian in importance, and in some respects his superior in helpfulness, is the modern catalogue; and yet the catalogue is almost never thought of by those who found libraries, nor until within a few years has it entered at all into the plans of those who build them. Even when so considerable a library was built as that of the city of Boston, its constructors assigned all that they thought necessary for a catalogue-room to a half-story space, dim of light, remote of access, and foul of air, which has long since been made a lumber-room, and a poor one at that.

The catalogue question involves too much of technicalities, and there are too many diverse views to be reconciled, to make it a fit subject for discussion on an occasion like this. The simplicity, which serves for a small library, turns gradually into complexity as the collection grows. Even literary men wonder that when a book is acquired in a large library it becomes such a serious matter to make it fully serviceable. Bibliographers often laugh over the record of the discomfiture of Mr. Payne Collier, who undertook to catalogue twenty-five works for the instruction of the staff of the British Museum, and in what he called the "common-sense method," as opposed to Panizzi's ninety-one rules. The result was that Mr. Collier was quite as much chagrined as ever his Shakspeare folio corrector made him. He committed every conceivable mistake, averaging two to a title, all of them such as would have led him astray had he been an investigator in the departments to which the books belonged. The art of cataloguing, when carried to perfection, is not an easy one; and every professional cataloguer will say with Panizzi himself, that, deeply impressed as he is with the difficulties of the case, he is still more deeply impressed with the difficulty of communicating to others a sense of it. Your own library may not yet have reached the size which brings with it

perplexities of this sort, but as you grow you will; and I cannot better advise any one who desires to know what cataloguing may become than to examine the standard code of rules, as prepared by Mr. Cutter of the Boston Athenæum, and published by the Bureau of Education in Washington, in 1876, for it has been recognized both in this country and in Europe as a fitting outcome of a ripe experience. The contemplation of those rules will no doubt make you feel much as the Scottish Highlanders felt when an English general made their fastnesses traversable: —

“ Had you seen these roads before they were made,
You would hold up your hands and bless Marshall Wade.”

By comparing your conceptions of the art of cataloguing before and after the perusal of Mr. Cutter's code, you will find yourself much in the same spirit of Keltic wonderment.

There is another thing which a librarian finds it difficult to make clear to others, especially to business people. The men of affairs are accustomed to bulk details as their operations grow; but in the economy of a library the manipulation of books, and the processes of cataloguing, increase in a larger proportion than the accessions of titles. One of the most experienced officers of the British Museum says, what you may not as yet feel the full force of in a collection like yours, but perhaps you are beginning to feel a part of it, —

“ In the case of a large library,” says Mr. Watts, “ not only must every thing be done more extensively, but many things more minutely. Errors and oversights which are of small consequence in a small catalogue, for instance, are not only more difficult to avoid in a large one, but, when they are not avoided, they are more misleading and more confusing.”

What is true of the catalogue is equally true of the general administration and the cost of maintaining a library. It has been found with a growing library that the increase of expense bears rather a geometrical than an arithmetical relation to the increase of books.

With the rapidly growing library of the neighboring university, and with the aggregate expansions of similar institutions in the adjacent metropolis, availing for all, you may congratulate your-

selves that you have not to confront, in the near future at least, the new requirements which their marvellous growth compels. The novel problem needs unused devices. Library buildings that used to hold a few hundred thousand volumes must be made to hold millions, — as they can be. Library administration which has tried the patience of the public on a small scale must be planned to give even prompter response on a very much larger scale, — as it can be. The infinite abundance of books must have better keys; bibliographies, digests; indexes must shorten labor, and they will.

I am often asked if I am not appalled at the increase of books. It is like the rivalry of the gun and armor. The compensating principle will hold just as good in books and buildings. There may be periods of suspension till the balance is re-adjusted; but the demand in literature will always be in excess of the supply, and the power to administer an infinity of books will come when the infinity itself is reached. We may leave to the architect and the mechanic the outward appliances of shelving and distribution, and the problem on that ground stands in no chance of failure of solution. A more general bibliographical education for the scholars, and development of catalogue systems on the part of librarians, and the rest of the problem is disposed of.

But, while we associate scholarship with libraries, we should not forget that it is not for scholars only libraries are formed, especially in this country.

There is a much-abused word, and a still more abused thought embodied in that word, for which I confess a sympathy, and that is what is called *smattering*, — the agency which is sometimes said to dissipate the mental energies. It is not given to all to be specialists, nor is it well it should be. To attempt to found scholarship, indeed, on smattering, produces charlatanry; but the man who makes no pretensions to scholarship, but is able to join creditably in the general conversation of scholars, turning from the botanist to the physicist, from the historian to the theologian, is necessarily a smatterer. But, unfortunately, the word has acquired a bad reputation. I do not know that we have in the language the term which implies all that I mean, — the cultivated gentleman, accomplished, as we may say, in comparative knowledge; whose learning is re-

ciprocal ; whose mind is a storehouse and not a lumber-room ; who divines truths as the bird in the air sees the worm in the sod ; who is knowing in many things, and an expert in none ; who perceives the anatomy of a subject as the Greeks perceived it in the externals of the human body.

If we could dignify the word " smatterer," I would call him such. If a better word, *sciolist*, had not become likewise depraved, I should like that better : for he is the diminutive, not of the scholar, but of all scholarship, knowing as much of many-sided learning as is given to one short life to know ; knowing it, not in an arrogant, foolish, empirical way, but in a fashion which is indicative, circumspect, and appreciative. Nor is this method without the effect of training, different though it be from the training of special study.

It is just in proportion as such men exist in a community, that it is generous in culture, ready in receptivity, earnest in sympathy, elegant in thought. They become the balance wheel in intellectual emergencies ; they are the most perfect development of the intellectual condition : for it must be confessed that specialism is an abnormal characteristic, and specialists, like athletes in their physical condition, pass not the robustest of intellectual lives as they grow old.

Men and women of any calling, addicted to prescribed channels of thought, and constant in one purpose, stand in great danger of developing in an ungainly, unbalanced way, unless they cultivate some foil to their daily tendencies. This external interest may be one subject pursued thoroughly, or many subjects followed attentively, if not deeply. The mind gets its refreshment not merely in rest : it finds it in counterpoise, in parallels, in contrasts.

Somebody says, that, when the log gets dull on the hearth, you turn it for a blaze. If I may in conclusion give the younger of my hearers any advice, it is this, Keep a log on your hearth, and sometimes turn it.

REPORT
OF THE
COMMITTEE ON HIGHWAYS.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 1, 1886.

Report accepted, and referred to the next city council, to be printed in the annual reports. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 1, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

IN COMMITTEE ON HIGHWAYS, Dec. 30, 1885.

To the City Council of Somerville.

THE following is the final report of the committee on highways for the year 1885.

HIGHWAYS ACCOUNT.

CREDIT.

Appropriation		\$32,000 00
Receipts and Credits:—		
For Evergreen-avenue betterment assessments	\$2,797 76	
Summit-avenue betterment assessments	1,376 05	
labor and materials furnished in 1884, the bills for which remained uncollected Jan. 1, 1885	117 15	
rent of dwellings at City Farm	\$136 00	
less repairs and water-rates	9 71	
	126 29	
excess of charges for Holland-street ledge-stone over the cost	1,520 27	
excess of charges for crushed stone over the cost	1,051 43	
gross earnings of city teams at \$1.50 per day for each horse	\$7,477 88	
<i>Amounts carried forward.</i>	\$7,477 88	\$32,000 00
	\$6,988 95	\$32,000 00

		<hr/> <hr/>

NEW STREETS, STREET WIDENING, AND SIDEWALKS.

Five streets have been laid out during the year, to wit : —

- Cherry Street, from Summer Street to Highland Avenue ;
- Dartmouth Street, from Broadway to Evergreen Avenue ;
- Morgan Street, from Beacon Street to Park Street ;
- Norfolk Street, from Webster Avenue to Cambridge line ; and
- Park Avenue, from Elm Street to Wallace Street.

Norfolk Street has been partially graded, but no work has been done upon either of the others.

Little Washington Street, from Central Street easterly, has been discontinued.

Glen Street, from Oliver Street to Tufts Street, which was laid out last year, has been graded and prepared for macadamizing.

Summit Avenue, which was also laid out last year under the betterment law, from Walnut Street to Vinal Avenue, has been constructed, and the betterments have been assessed. Its total cost, including land, etc., paid for last year, is \$1,909.85; betterments assessed, \$1,376.05; net cost to city, \$533.80.

Betterments have also been assessed for the extension of Evergreen Avenue from Thurston Street to Sycamore Street, which was laid out and constructed last year. The cost was \$5,046.59; betterments assessed, \$2,797.76; net cost to city, \$2,248.83.

Bow and Summer Streets have been widened at their junction on the northerly side.

Sidewalks have been constructed as stated in the accompanying tables, and gutters have been paved wherever edge-stones have been set.

CENTRAL-HILL IMPROVEMENT.

The masonry of the fort on Central Hill has been completed, except pointing, and the guns have been mounted.

The work yet to be done to complete the fort will consist of grading, sodding, making paths, and the erection of a memorial tablet.

HORSE RAILROADS.

The Middlesex road has laid a second track in Washington Street, from the Boston line to Tufts Street, and moved its track under the Lowell Railroad bridge from the raised siding, upon which it formerly rested, to the middle of the road-bed. We embraced the opportunity, while this work was in progress, to improve the grade of Washington Street, below Tufts Street, and of the part under the Lowell Railroad bridge with the approaches thereto.

We also paved with granite blocks the road-bed under the bridge, and re-macadamized the whole street from Union Square to the Boston line.

The Charles-river Street-railway Company has laid a double track in Webster Avenue, from near Prospect Street to the Cambridge line; and, in connection with this work, the grade of a part of the avenue was raised and the street re-macadamized.

PAVING SOMERVILLE AVENUE.

By an examination of these reports for the past few years, it will appear that the cost of keeping Somerville Avenue in repair is very large; and we have become convinced by experience that it would be true economy to commence paving this thoroughfare at once. We therefore recommend that an annual appropriation of about five thousand dollars be made for that purpose, and that the paving be commenced at the East-Cambridge line, and continued, from year to year, until it be completed to the North-Cambridge line. We think the annual cost of repairs is now more than enough to pay the interest on the cost of paving.

GENERAL.

A large amount of work has been done this year, as will be seen by the accompanying table of streets improved.

The improvement of Linwood Street, which has long been demanded, is finally accomplished. Where the street was low, it has been brought up to grade sixteen; and the entire road-bed has been thoroughly macadamized, the gutters have been paved, and edge-stones have been set throughout the street. The citizens have also shown a commendable pride in improving their estates to conform to the new grade; and, altogether, the work done is highly satisfactory.

The widening of Bow and Summer Streets, on the northerly side at their junction, has been regarded for many years as a much-needed improvement, and its accomplishment has conduced greatly to the comfort and safety of the travelling public.

No particular expense has been caused by storms.

The park on Broadway has been kept in good condition.

Two hundred and eleven trees, furnished by citizens, have been planted in the public streets, at a cost of \$47.90.

When it was the custom of the city to buy field-stone for the crusher, the price paid was sixty cents a load, and the stone de-

livered from the Holland-street ledge was, and has ever since been, charged to the crusher at the same price. During the past year, however, the cost of producing and delivering the ledge-stone has been very much reduced, mainly by using a more effective powder for blasting and by making new and better roadways between the ledge and the crusher. By the foregoing figures it appears that the actual cost of the ledge-stone, delivered at the crusher, was about forty-three cents per load. It will also be seen that the cost of the crushed stone was about eighty-nine cents per load on the basis of sixty cents for ledge-stone, or about seventy-two cents on the basis of the real cost of the ledge-stone. It might be well, another year, to reduce the prices charged for both ledge and crushed stone.

Particulars of the work of the department are given in the following tables:—

STREETS IMPROVED.

NAME.	From	To	Improvement.	Feet.
Central . . .	Somerville Ave. . .	Highland Ave. . .	Re-macadamized	2,000
Cross . . .	Broadway . . .	Webster Ave . . .	“	800

REPORT
OF THE
CITY ENGINEER.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 6, 1886.

Referred to the committee on printing, to be printed in the annual reports. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 27, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

CITY ENGINEER'S OFFICE, Jan. 26, 1886.

To his Honor the Mayor and City Council.

GENTLEMEN, — In accordance with the provision of the city ordinances, in relation to city engineering, I herewith submit my annual report for the year 1885.

SEWERS.

Five thousand seven hundred and seventy-six and eight-tenths feet of sewers were built during the year, of which 2,358.3 feet were of brick, and 3,418.5 feet of pipe. In these sewers were built twenty-four man-holes.

Seventeen hundred and sixty-five and five-tenths feet of pipe sewers have been built by private parties, under the direction of an inspector from this office.

The following table will show the size, length, cost, assessment, etc., of each sewer : —

TABULAR STATEMENT OF SEWERS BUILT IN 1885.

LOCATION.		CONSTRUCTION.							COST.

6 57 cubic yards of rock. * Built by private parties.

Total length of sewers built by city previous to Jan. 1, 1885 193,165.0 feet.

" " during the year 1885 5,776.8 "

" " public sewers in city Jan. 1, 1886 198,941.8 feet, or 37.7 miles.

CRAGIE-BRIDGE SEWER OUTLET.

At the request of the authorities of the city of Cambridge, our city joined with them in cleaning and dredging at the sewer outlet under Cragie Bridge. A stream of water from a hose was used to force the filth from under the bridge and wharves to convenient places, from which it was removed by the dredger and loaded on scows, which were towed to the lower harbor where it was dumped. The amount removed was 5,300 cubic yards, and the cost to this city was \$1,335.16, which was five-ninths of the whole cost.

PRIVATE DRAINS.

Three hundred and nine permits were issued for laying private drains ; 298 for new connections, and 11 for repairs.

CATCH-BASINS.

Five catch-basins were built during the year, at an average cost of \$64.10. The average cost under the contract system the previous year was \$73.

CLEANING SEWERS.

For the past three years the pipe-sewers have been cleaned or flushed annually. The plan adopted was to force through the sewer a wooden ball, two inches less in diameter than the inside diameter of the sewer, the ball being propelled by water from a hose attached to a hydrant ; the water passes rapidly under the ball, and removes all the deposit. We find this a cheap and effectual method of cleaning pipe-sewers ; the cost is about ten dollars per mile.

SIDEWALKS.

The following table will show the sidewalk improvements during the year : —

Street.	Side.	From	To	Materials.	Approx. length of walk in feet.	Cost.
Central .	East .	Summer Street,	Highland Av.	Brick and edge-stones .	930	\$1,070 66
Dover .	East .	Elm Street . .	Camb'ge Line	Gravel and edge-stones,	970	580 98
Linwood.	Both .	Somerville Av.	Wash'ton St.	" " "	4,060	2,548 22
Total	\$4,199 86

The board of aldermen assessed one-half the cost on the abutters.

STREETS.

The following table will show the streets accepted by the city council during the year : —

STREETS ACCEPTED IN 1885.

Name of Street.	From	To	Width in feet.	Length in feet.
Cherry	Summer Street . . .	Highland Avenue . .	40	549.3
Dartmouth	Evergreen Avenue . .	Broadway	40	685.5
Morgan	Park Street	Beacon Street	40	375.0
Norfolk	Webster Avenue . . .	Cambridge Line . . .	40	283.0
Park Avenue	Elm Street	Wallace Street	40	467.4

STREET-NUMBERING.

Eleven streets have been numbered during the year, and notices sent to each house.

SURVEY OF THE CITY.

Surveys were completed on the southerly slope of Spring Hill, also in the vicinity of Cragie and Cherry Streets ; and those on the southerly slope of Winter Hill have been advanced.

Surveys have been made of the territory in the vicinity of Wyatt, Dimick, and Line Streets, and on Linwood Street and the streets and courts leading therefrom. The amount expended was three hundred dollars.

WATER-WORKS.

The usual lines and grades have been furnished the superintendent for laying water-mains and setting hydrants ; service-pipes have been located and recorded.

In 1884 the water board voted to make all future extension of the distribution system, and all renewals, with cast-iron pipe instead of the cement and wrought-iron pipe which had been used for this work for nearly twenty years ; this pipe, when removed, was found in bad condition, and frequently the iron was entirely eaten by rust.

Our experience with this pipe is nearly the same as reported from other places ; we find that the life of the pipe is from fifteen to twenty years.

MISCELLANEOUS.

The large number of buildings erected during the year was the cause for more miscellaneous work than usual, which consists in furnishing lines and grades of streets, numbers of houses, etc.

EXPENSES.

The expenses of the department for the year 1885 were as follows:—

Salary of city engineer, including maintenance of a team	\$2,000 00
Salaries of assistants	1,351 95
Salaries of assistants for survey of city	300 00
Repairing instruments, stationery, spikes, tools, fares, etc.	172 02
Total expense of department	<u>\$3,823 97</u>

Respectfully submitted.

GEORGE A. KIMBALL,
City Engineer.

REPORT

OF THE

COMMITTEE ON FIRE-DEPARTMENT.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 1, 1886.

Report accepted, and referred to the next city council, to be printed in the annual reports. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 1, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

IN COMMITTEE ON FIRE-DEPARTMENT, Dec. 28, 1885.

To the City Council of Somerville.

THE following is the final report of this committee for the year 1885: —

The manual force of the department remains the same as last year, sixty-one men. The changes made last year in the number of call-men has worked well for the efficiency of the department.

Such repairs and improvements have been made in the buildings and equipment as have been necessary; and 1,450 feet of hose have been purchased at a cost of \$967.13.

We consider the department small compared with the territory covered, and we would earnestly recommend the next city council to consider the necessity of additional fire-apparatus.

The following is a statement of the receipts and expenses for the year ending Dec. 31, 1885.

FIRE-DEPARTMENT ACCOUNT.

CREDIT.

Appropriation \$22,500 00

Receipts and Credits: —

for articles sold . . . \$103 04

for amounts of bills not
called for, and of over-

charge refunded . . . 9 01

112 05

Total credit (*amount carried forward*) . \$22,612 05

Amount brought forward \$22,612 05

DEBIT.

Expenses: —

For salaries of permanent men	\$8,590 00	
“ “ call-men	4,734 76	
substitute drivers	284 48	
improvement and repairs of apparatus and vehicles	295 96	
improvements and repairs of buildings and furniture, and new furniture,	1,062 28	
maintenance and extension of fire-alarm telegraph, including one new alarm-bell and tower for same erected on the city's land, Somer- ville Avenue, corner Lowell Street, exclusive of the cost of the striker,	1,199 31	
hose and hose-pipes, and repairing same	1,143 26	
new horses	300 00

maintenance of reservoirs	1 80	
incidentals	281 98	
maintenance of hand fire-extinguishers,	53 85	
	<hr/>	
Total debit		22,593 06
		<hr/>
Balance unexpended		\$18 99
		<hr/> <hr/>

A statement of the condition of the department and the fire-alarm telegraph, and of the losses by fire, with recommendations for the improvement of the department, will be found in the annual report of the chief engineer, which we present herewith, and request to have printed with this report.

It is with great pleasure that we add our appreciation, to that expressed by previous committees on fire-department, of the constant and efficient services of the chief engineer, and the good character and discipline of the men.

We would also call attention to the fact of the rapid increase of buildings in our city, and to the large amount of work required on the fire-alarm telegraph. Our chief has entire charge of the telegraph-apparatus, while in other cities it is generally in care of a special superintendent.

The chief's salary has not been increased for several years, although his duties and responsibilities must of necessity keep pace with the growth of the city and the extension of the telegraph; and we recommend that the next city council carefully consider the matter of raising his salary, as we feel it is not sufficient for the office.

For the committee.

ALBERT M. ROBINSON, *Chairman.*
GEO. I. VINCENT, *Clerk.*

REPORT

OF THE

CHIEF ENGINEER OF FIRE-DEPARTMENT.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 1, 1886.

Referred to the next city council, to be printed in the annual reports.
Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 1, 1886.

Concurred in.

DOUGLAS [FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

SOMERVILLE, MASS., Dec. 31, 1885.

To the Committee on Fire-Department.

GENTLEMEN, — In compliance with your request, I herewith present to you a report of the operations of the fire-department for the year 1885, the condition of the apparatus and buildings, number of fire-alarms with the causes thereof, loss of property and insurance thereon as near as can be ascertained, and recommendations for strengthening the department.

The number of fire-alarms was 44.

The causes of alarms were as follows: —

Ignition of oily rags	2
Children playing with matches	2
Boiling-over of a pan of grease	2
Incendiary	4
Sparks from locomotive	1
“ “ chimneys on shingled roofs	6
Explosion of rendering tank	1
Burning of rubbish	4
Fire-crackers on roof	1
Fire in Boston	1
Explosion of kerosene-lamp	3
“ “ gas	1
Ignition of tar-kettle	1
Defective flue	1
Curtain in contact with gas-jet	1
Carelessness in lighting lantern	1
Burning of dry grass	2
Kindling-wood near furnace	1
Lamp in contact with clothing	2

Overheated furnace	2
Kindling-wood near stove	1
Hot ashes in wooden barrel	1
Fire in Cambridge	1
False alarm	1
Sparks from rubbish in yard entering window	1
Total	44

The loss was	\$7,590 00
Insurance	53,450 00
Insurance paid	7,278 00
Value of property	78,494 00

APPARATUS.

The apparatus — which consists of one steam fire-engine stationed on Central Hill, a horse hose-carriage at East Somerville, one at Winter Hill, one at West Somerville, and one at Union Square, also a hook-and-ladder truck at Union Square — is the same in number as last year and for several years. There is also, not in service, one steamer, one hook-and-ladder truck, and one hose-carriage, either of which can be used in case of accident or repairs required on the apparatus in regular service.

BUILDINGS.

The buildings used by the department are in good condition, only a small expense for repairs being necessary to make them first-class. During the year a storage-shed has been built at the station of Hose No. 1. The building occupied by Hose No. 2 has been painted, and new heating-apparatus placed therein. New stalls and a new floor have been placed in the steamer-house stable.

HOSE.

There is 6,850 feet of cotton hose in the department, including 1,450 feet purchased this year. There is also 600 feet of leather hose. Six hundred feet of the cotton hose is reliable. The balance of the cotton hose, 850 feet, and the 600 feet of leather hose, are only of sufficient strength to carry a hydrant stream; and, as any of our hose is liable to be connected with a steamer, it is important

that the hose used should be of sufficient strength to withstand the required pressure.

FIRE-ALARM TELEGRAPH.

This important branch of the department has worked well during the year. In no instance has it failed to designate the location of a fire when its service was required.

Fire-alarm signal-boxes should be placed in more frequent positions, that there may not be any delay in giving an alarm. This is a matter of importance, as the reputation of a fire-department for success in extinguishing fires often depends on having plenty of signal-boxes, from which alarms can be promptly given.

Fire-alarm boxes are needed in the following localities: Summer Street, corner of School Street; Dartmouth Street, corner of Evergreen Avenue; Somerville Avenue, near Union Square.

The fire-alarm telegraph was first put in service in this city in June, 1874. Most of the wire and poles have become decayed by exposure, and they are being replaced with new material as fast as our means will admit. Sixteen new poles were set, and three miles of wire run, this year. A new bell-tower has been erected on the city's land on the corner of Somerville Avenue and Lowell Street, and a bell with a fire-alarm striker placed thereon. This is a satisfactory solution of a problem that has engaged the attention of the different committees of this department for many years; namely, how to furnish an alarm both for fire and school purposes in the Spring-hill district. This apparatus will give satisfaction to all.

The multiplicity of telephone and other wires frequently causes interference with our lines, and constant vigilance is required in testing their condition, and promptness in making repairs. While other cities employ men especially to do this work, here it is done principally by the permanent men under the direction of the chief engineer: should the duties of extinguishing fires increase, it would be necessary to employ some person to make the required repairs and keep the alarm in perfect order. The success of the fire-department in extinguishing fires depends upon the faultless working of the fire-alarm.

I again advise that the circuits be made smaller, divided into eight; in which case, should a wire break and the circuit become useless, the close proximity of another circuit would furnish the means to promptly give the alarm.

HYDRANTS.

The number of hydrants in the city, as reported by the superintendent of water-works, is three hundred, one new one having been set this year. New streets have been opened and buildings erected, and water has been furnished for domestic purposes, yet not a drop for the extinguishment of fires. I recommend that the old flush-hydrants be removed and replaced with post-hydrants. New hydrants are required in the following localities ; namely, —

New Church Street.

Thorpe Place.

Hamlet Street.

Summer Street, corner of School Street.

Beacon “ near Charles-river Railroad Stables.

Dover “ near Cambridge “ “

Medford “ corner of Dartmouth Street.

School “ opposite Cummings Schoolhouse.

Tufts “ “ Davis “ “

Austin “ 200 feet north of Benedict Street.

Austin “ corner of Mystic Avenue.

Broadway, “ “ Dartmouth Street.

Evergreen Avenue, “ “ “ “

I have heretofore recommended that another steam fire-engine be placed in service ; I again renew this recommendation and state the following reasons why this addition to the department is necessary : —

First, The water-pressure on the elevated portions of our city is not sufficient to furnish effective streams in case of fire ;

Second, In case of a large fire which necessitates the use of several hydrants, the water-pressure is so neutralized as to render the streams non-effective ;

Third, Our department should be so equipped, that, when called upon for assistance from our neighbors, we can respond without jeopardizing the property of our own citizens.

The matter of better protection against fire in the Spring-hill district is again called to your attention ; and I again urge that a properly equipped piece of fire-apparatus, drawn by horses, be placed in service in this district.

The buildings furnished to meet the requirements of the rapid growth of our population, while they are comfortable to live in, are not constructed to resist fire; the material generally used being wood, with shingled roofs. If a fire should break out during a high gale of wind in the thickly settled sections of our city, our escape from a disastrous fire would be miraculous. Hydrants cannot be relied upon under such conditions to throw effective streams, and the value of a chemical engine at such a time is beyond computation. The celerity with which one of these engines can be moved from one locality to another, and fires that may have started on shingle roofs extinguished, might be the means of preventing a disastrous conflagration.

The additions made to the fire-department in appliances for extinguishing fires have not been commensurate with the combustible growth of the city. Upon the fire-department rest the insurance and real-estate interests; the unnumbered laboring-class look to it for the preservation of the means by which they earn their livelihood; while the members of every household rely upon it for protection as they close their eyes in sleep. May the financial condition of our city soon be such that our department can be equipped to meet these public requirements!

I extend my most sincere thanks to the chairman and each member of this committee for their cordial co-operation in every thing appertaining to the welfare of the department; and to Mr. George I. Vincent, clerk of assessors and committees, and his assistant, Mr. William P. Mitchell, for their kindness so often evinced in furnishing necessary information, my thanks are cordially tendered.

Respectfully submitted.

JAMES R. HOPKINS,
Chief Engineer.

REPORT

OF THE

COMMITTEE ON PUBLIC PROPERTY.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 1, 1886.

Report accepted, and referred to the next city council, to be printed in the annual reports. Sent down for concurrence.

dedication of public-library building		162 75
pay of assistant janitor of public-library building,		67 50
		<hr/>
Total expenditure		<u>\$3,532 24</u>

SCHOOLHOUSE INCIDENTALS.

No special improvements of any magnitude have been made in any of the schoolhouses this year.

At the Prescott School, double doors have been placed in the partition between the master's room and the one adjoining; so that the two rooms can be used as one if required.

At the Forster School, additional radiators have been placed in the two upper rooms on the north side, and more book-closets have been provided.

At the Bell School, tighteners have been placed on the windows, the teachers' water-closets have been moved, and the drainage generally re-arranged and ventilated in a thorough manner.

At the Morse School, tighteners have been placed on the windows, and the girls' entrance to the yard has been improved by constructing a convenient flight of steps from the sidewalk.

The room in the Cummings School which for a time was vacant has been furnished and occupied, and an additional class has also been accommodated with furniture in the hall of the High School; but the hall has not, as yet, been divided with partitions.

The High, Prescott, Bell, and Highland Schools have also been fitted for evening schools, at a cost of about two hundred dollars.

The foregoing statement of this account is exclusive of furniture which was bought and used temporarily in the hired rooms in the Lincoln district, and afterward placed in the new Lincoln Schoolhouse after its completion; the sum paid for the same having been credited back to schoolhouse incidentals account, and charged to Lincoln Schoolhouse account (rebuilding).

SCHOOLHOUSE ON SCHOOL STREET (CUMMINGS SCHOOL).

This building was completed and occupied early in the year; and the items of the cost, which appear in this and the report of 1884, are condensed as follows:—

Land, 11,300 feet at 21 cents	\$2,373 00	
Grading and walks	346 01	
Building	11,109 23	
Heating-apparatus	608 47	
Furniture and utensils (including one room furnished this fall at the ex- pense of schoolhouse incidentals account, \$140.50)	714 16	
Insurance	206 50	
Total cost		\$15,357 37

SCHOOLHOUSE ON TUFTS STREET (DAVIS SCHOOL).

This and the Cummings School were finished and occupied at about the same time.

The cost of this building, exclusive of the land, which the city

has owned several years, collected and condensed from the items given in this and the last report, is as follows :—

Grading and walks	\$250 76	
Building	11,307 66	
Heating-apparatus	841 30	
Furniture and utensils	726 99	
Insurance	206 50	
		<hr/>
Total cost (exclusive of land)		<u>\$13,333 21</u>

LINCOLN SCHOOLHOUSE (REBUILDING).

The rebuilding of this schoolhouse, on the site of the one destroyed by fire in the fall of 1884, was commenced near the close of last year, and finished during last summer's vacation.

The cost may be stated as follows :—

Grading, walks, and granite steps	\$191 73	
Building	11,878 05	
Heating-apparatus	657 81	
Furniture and utensils	744 93	
		<hr/>
Total cost (exclusive of land)		<u>\$13,472 52</u>

PUBLIC-LIBRARY BUILDING.

This structure has also been two years in process of erection. It was commenced in the summer of 1884, and given over to the trustees of the library in October of this year.

The following is a brief statement of its cost :—

Grading, walks, and driveways	\$1,552 88	
Building, furniture, and utensils	25,231 17	
Heating-apparatus	1,204 40	
Insurance	350 00	
		<hr/>
Total		<u>\$28,338 45</u>

As before stated, this cost is exclusive of the granite curbing in front of the lot, and of two granite steps, a bill for which has been rendered at \$291.25, but remains unsettled.

The cost of the land is not included either, as the building was erected on land which was bought by the town for public purposes many years ago.

CITY-HALL ALTERATIONS.

The removal of the public library to its new building gave the long-desired opportunity of providing suitable apartments and fire-proof vaults for the officers in the city hall; and for a comparatively small sum of money accommodations have been secured which are as good as we should be likely to have even in a new building, and will answer every requirement for a long time to come.

SUPERINTENDENT OF BUILDINGS.

In closing this report, we desire to express our approval of the appointment of a superintendent of public buildings. This officer entered upon his duties on the first day of May of the present year, and has not only been of great assistance to this committee, but, as we believe, has promoted economy by looking carefully after the city's property, and making small repairs where a little neglect might create a necessity for large ones, and by seeing that in all work done on public buildings the city receives a fair equivalent for its money.

For the committee.

FRANKLIN R. PERRY, *Chairman.*
GEO. I. VINCENT, *Clerk.*

REPORT

OF THE

COMMITTEE ON FUEL AND STREET-LIGHTS.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 1, 1886.

Report accepted, and referred to the next city council, to be printed in the annual reports. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

FUEL.

Fuel has been purchased as follows : —

From Horatio Wellington & Co., under contract for year ending July 1, 1885, at \$4.93 per ton for furnace and egg coal, and \$5.20 for stove-coal, and at \$8.50 per cord for hard wood, and \$6.00 for soft wood ; and from George M. Winslow & Co., under contract for year ending July 1, 1886, at \$4.45 for furnace and egg coal, \$5.15 for stove-coal, \$8.00 for hard wood, and \$7.00 for soft wood.

STREET-LIGHTS.

The street-lamps have been lighted and cleaned by Christopher Burke under two contracts, the first of which was for the year ending Feb. 1, 1885, but was extended to May 1, and was at forty-two cents per month for each lamp ; and the second being for the year ending May 1, 1886, at thirty-nine cents per month for each lamp.

The price paid for gas the first six months of the year was \$1.90 per thousand feet. July 1, the Cambridge company reduced to \$1.65 ; and the Charlestown company reduced to \$1.75 on the 1st of October, and probably will charge no more than the Cambridge company after Jan. 1.

The following is a table of street-lamps, showing the additions this year : —

	GAS-LAMPS.		Naphtha Lamps.	Total.
	Charlestown Gas.	Cambridge Gas.		
Lamps in the city Jan. 1, 1885, as per last report	168	210	65	443
Add for correction in number of oil-lamps,	-	-	4	-
Lamps erected during the year by city	9	6	1	16
" " " " " " citizens,	1	-	-	1
Total	178	216	70	464

For every lamp erected by the city, the sum of twenty dollars has first been paid by the petitioners to the city treasurer.

We continued the custom established in September of last year, of lighting until three o'clock instead of twelve o'clock, which was the hour for extinguishing prior to that time; and we have also used the lamps on an average four or five more nights in the month than has been customary in previous years.

We found, however, that our appropriation of \$7,500, with the addition of \$1,500 transferred to the account by the city council, would not be sufficient to sustain this expense throughout the year; and, in consequence, the lamps were extinguished at twelve o'clock in October and November, and at one o'clock in December; but the number of nights was not materially changed.

We increased the number of nights to meet a long-standing and universal demand for more light; and we believe a sufficient sum should be appropriated to light the streets at least as well as they were lighted during the first nine months of this year.

We also recommend that a few lights, of considerably greater brilliancy than those generally used, be placed in the public squares and other centres of travel.

Since the 1st of May we have had the services of the superintendent of buildings and lamps, and thereby the committee has been relieved of very much care, and the condition of the lamps has been greatly improved.

For the committee.

MOSES G. STEELE, *Chairman.*
GEO. I. VINCENT, *Clerk.*

REPORT
OF THE
CITY SOLICITOR.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, March 2, 1886.

Referred to the committee on printing, to be printed in the annual reports.
Set down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, March 2, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

SOMERVILLE, Feb. 25, 1886.

To his Honor the Mayor and the City Council of Somerville.

GENTLEMEN, — I beg leave to present the following as my tenth annual report.

Early in the year, acting under your instructions, I attended, with our committee on legislative matters, the hearing before the committee of the General Court on towns, with reference to the division of the town of Medford, and the incorporation into the new town of certain territory of the city of Somerville; and, as a result of our effort in opposition to the project, the petitioners abandoned that part of their petition directed against our territory.

During the year, the General Court passed an Act (chap. 61 of 1885), under which, soon after, the department of the overseers of our poor was re-organized; and, at the same time, a new ordinance was passed by the city council, with reference to the same department. I have also prepared during the year two other ordinances, one of which relates to the superintendent of public buildings and street-lights, and the other to the pay of the police department. Quite a number of ordinances have been passed by the city council since the printing of the last municipal register in 1882; and it would certainly promote the general convenience if the ordinances since 1882 could be printed in some suitable form.

I have given much time and effort during the year to the Mystic water contract, and have aided the Somerville Mystic Water Board to the extent of my ability in their endeavor to secure such a modification of the terms of the old contract as should commend itself to the board and to the citizens. A contract was prepared satisfactory to our own and to the Boston Water Board; but, for reasons which neither board could remove or control, the contract was not acted upon by the city council of Boston.

I have attended all the sessions of the committee on claims during the year, except when detained by sickness. Twelve claims have been heard by the committee. In five of these the city council voted to take no further action; in five the petitioners were given leave to withdraw; and in the remaining two action has been instituted in the courts. Of these claims, seven were for personal injuries, two related to matters of taxation, and three were for grade damages.

Dec. 31, 1885, there were nine cases upon my calendar to which the city was a party; viz. :—

1. *Somerville vs. Boston and Lowell Railroad*, before the county commissioners of Middlesex County. Petition for bridges across railroad location in Somerville.

2. *Mayor and Aldermen of Somerville vs. Fitchburg Railroad*, before county commissioners of Middlesex County. Petition for grade-crossing of railroad location at Sacramento Street.

3. *Parker vs. Somerville*, before Supreme Judicial Court in Middlesex County. Bill in equity to restrain nuisance alleged to be caused by the city upon Mystic Flats.

4. *Parker vs. Somerville*, before county commissioners of Middlesex County. Damages for injury to real estate by nuisance growing out of sewage.

5. *Squire vs. Somerville*, before Superior Court in Middlesex County. Damages for conversion of box-drain.

6. *Deshon vs. Somerville*, before Superior Court in Middlesex County. Action for personal injuries upon Day Street, Feb. 29, 1884.

7. *Ayer et. al., Trustees, vs. Somerville*, before Supreme Judicial Court in Suffolk County. Petition for writ of certiorari to quash sewer assessments upon Cedar and Morrison Streets.

8. *Shea vs. Somerville*, before Superior Court in Middlesex County. Action for personal injuries upon Russell Street, Oct. 14, 1885.

9. *Rowell vs. Somerville*, before Superior Court in Middlesex County. Action for personal injuries upon Pearl Street, Feb. 12, 1885.

During the year 1885, the following cases have been disposed of:—

1. *Kendall vs. Somerville*, before Superior Court in Middlesex County. Action for personal injuries, Jan. 4, 1884, upon Elm

Street. Trial before jury, April 17, 20, and 21. Verdict for plaintiff, \$1,048.18, and costs, \$59.91; in all, \$1,108.09. Damages claimed, \$4,000.

2. *Stepp vs. Somerville*, before Superior Court in Suffolk County. Action for personal injuries from fall into sewer in Shawmut Street, Nov. 13, 1882. This case has twice been tried during the year. The first trial, occupying four days, resulted in a disagreement. The second trial, occupying seven days, resulted in a verdict for the plaintiff for \$579.85, and costs, \$137.69; in all, \$717.54. Damages claimed in writ, \$5,000.

3. *Ryan vs. Somerville*, before Superior Court in Middlesex County. Action for personal injuries upon Day Street, Feb. 28, 1884. Trial before jury, June 10 and 11, 1885. Damages claimed, \$4,000. Verdict in favor of city.

4. *Mahoney vs. Somerville*, before county commissioners of Middlesex County. Petition for jury to estimate land damages occasioned by extension of Evergreen Avenue to Sycamore Street. This action has also terminated in favor of the city.

5. The cases of the Commonwealth against certain employees of the Middlesex Railroad Company for violation of an ordinance of the city in the attempt to lay a track upon Broadway were *not pressed* by me last January upon payment by the company of the taxable costs of court, inasmuch as the mayor and aldermen had, since the institution of the cases, granted a location to the company.

Respectfully submitted.

SAMUEL C. DARLING,
City Solicitor.

REPORT
OF THE
CITY CLERK.

CITY OF SOMERVILLE.

REPORT OF THE CITY CLERK.

ANNUAL report of the receipts of his office for the year ending Dec. 31, 1885; also the registration of marriages, births, and deaths for the same period.

CHARLES E. GILMAN, *City Clerk.*

REPORT

OF THE

INSPECTOR OF BUILDINGS.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 20, 1886.

Referred to the committee on printing, to be printed in the annual reports.
Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 20, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

OFFICE OF INSPECTOR OF BUILDINGS, SOMERVILLE, Dec. 29, 1885.

To his Honor the Mayor and the City Council.

GENTLEMEN, — Since my last annual report buildings have been erected, but not entirely completed, as follows : —

276 dwelling-houses (which I estimate to cost)	. \$665,200 00
28 additions to dwelling-houses (estimated cost)	. 15,080 00
36 stables (estimated cost)	. 27,545 00
10 stores, blocks of stores and dwellings (estimated cost)	. 148,800 00
Total	. \$856,625 00

I estimate the loss by fire to be \$5,000.

The buildings in most cases have been fairly constructed ; but in many instances the builders, many of whom are non-residents, require looking after.

The chimneys in house built by Jonas Parker on Porter Street were taken down and rebuilt, to conform to the building ordinance, leaving no case to prosecute.

I yet adhere to my report in regard to the building on the corner of Pearl and Cross Streets.

The building in the rear of the corner of Broadway and George Street has been temporarily strengthened, but it is not in a safe condition.

In my judgment the building ordinance could be improved to the benefit of the city and to builders ; and I should be pleased to make suggestions in regard to changes, should the council desire.

Respectfully submitted.

ELIJAH WALKER,

Inspector of Buildings.

REPORT
OF THE
INSPECTOR OF MILK.

CITY OF SOMERVILLE.

IN BOARD OF MAYOR AND ALDERMEN, Jan. 26, 1886.

Referred to the committee on printing, to be printed in the annual reports. Sent down for concurrence.

CHARLES E. GILMAN, *Clerk.*

IN COMMON COUNCIL, Jan. 27, 1886.

Concurred in.

DOUGLAS FRAZAR, *Clerk.*

CITY OF SOMERVILLE.

JAN. 23, 1886.

To his Honor the Mayor, and Gentlemen of the City Council.

GENTLEMEN, — Having been appointed by your honorable board, Sept. 23, 1885, as milk inspector for the city of Somerville. I hereby make a report of the duties performed to Dec. 31, 1885. Some time was necessarily consumed in getting the books, blanks, test-glasses, etc., required for the work. Oct. 1, I commenced issuing licenses and registers. Between Oct. 1 and Dec. 31, 151 milkmen, who sell in this city, were licensed, and 106 stores and other places where milk is retailed were registered. The total amount of money received for licenses and registers is \$128.50. This sum has been paid into the city treasury. Expense incurred for books, printing, etc., equals \$46.10.

I have collected and tested 101 samples, and have given four warnings, and sixteen verbal notices to parties whose milk was not up to the standard. I have generally found the dealers not only willing, but desirous, to have their milk inspected, and quite disposed to improve the quality of the same. I think it much better to call personally on the parties whose samples are found below the standard, than to at once issue legal notices. The object of the State law is to prevent the sale of impure milk, *not* to punish men for crimes they have not committed. In the majority of cases the quality of the milk is beyond the personal control of milkmen and dealers. There are many and various causes why milk will not show by test or analysis the standard required by law. To prove this statement, I will refer you to the report of B. F. Davenport, inspector for city of Boston, years 1884 and 1885. This report shows that out of 1,198 samples only 185 were found to come fully up to the standard. As before stated, these causes are various. The *first* cause is that the standard is *too high*. The

average milk solids of all pure milk raised in this State will not exceed 11 or 11.5. The law requires 13. This fact is well-known to all large contractors in milk, and it places the men who retail the same in a very critical position; milk inspectors, therefore, should be governed by good judgment, and exercise caution in the performance of their duties with small dealers. Once place these cases in court, and the maximum of 13 milk solids is required by law. By these principles I have thus far been governed, and I hope this report will meet with your approval.

THOS. CUNNINGHAM,

Milk Inspector.
