★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and fish. center - Good, Fair or Poor

Date	Remarks
23 Apr 1951	Inspection visit + Conference - Inoculation has been completed on new H.C. probably to be finished in late May + 2 MOs. Personnell on staff after opening will be increased by 1 PHN 1 Cl. Nurse (has a PHN license) 1 pharmacist + 1 VET. + 1 nutritionist + 1 Statistics Cl. Clinic activities show lower attendances than last visit. Practically no V.D - state an M.D. must come from Kawauchi H.C. for this work they have none for V.D. Maternal + Child Health program poor - discussed improvement + Have mass BP clinics 2 x mo in H.C. + pt gets drugs, Hb. test, pressure + urine but no physical is suggested to come to regular clinic for other the 12 times but statistics show they probably don't get there. - Only 2 patients on prem on Tuberc. PHN. time wasting schedule + planning poor - Discussed use during use of file box + discussed function of Chief Nurse. About 40 new TB reported each month but nurses come visit only 15-16 of these. - (has only 4 PHN on staff for post 2 MOs - one is sick). Discussed TB as priority program - urging fewer PHN visits in clinics where attendances are usually only 12/day. PHN needs bike + bicycles. Discussed "Sanitation Plan."; + Referred to "PHN guide" in H.C. for minimum equipment and procedures in clinics for use in new H.C. building.

14 July	Rockwell	Dr Sakai	3	5	0	0		1	1	5	5	7 VD Workers, 1 pharmacist	9	29	FAIR	FAIR	FAIR	POOR	FAIR

★ Code - W. Ministry Grade A or C A = staff over 31, C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
14 July 50	Expect to move to new HC building this fiscal year, to be located near town hall. Old building with meagre facilities, fairly clean. Director not in, talked with Dr Hakeri. Consolidated monthly report grossly incorrect — example - one month's rept showed 32 H.C. VD exams + 32 doing V.D cases yet actual record there 181 exams + 47 diagnosed cases; one month's record shows 63 doing cases TB who only 44; another showed 476 mass TB exams compared to 576. Statistics of nursing visits inaccurate also - Consol monthly rept shows only 96 TB home visits tho actually 679 cases were visited - the former figure including contacts - similar discrepancy with V.D. Town nurse reports. Two VD Nurses do tracing for men + professional prostitutes, nurses do VD follow-up of prenatals. Malty clinic held 2 X mo Staff includes 1 woman M.D. who does only Inj. + Malty clinic, tends clerical work. Edu. more frequent Malty clinic. Clinic attendances poor - see below. Only 5 patients getting pneumo, must go to nearby Chikushino Hosp. PHN - TB program poor. Rept only 11 TB cases at home (for all PHN's) who got visited 7-8 X mo. States that all the cases who have remained at home (the 175 new cases was reported in past 6 months). Discussed in detail TB + VD prob health nursing programs, urged following PHN guide for clinic set ups + procedures. Four nurses remain in HC in AM, 1 in PM - urged fewer transient with clinics which are small. Parasite Trafficking goes to schools + issues stool specimens there. HC prescribes medication, school buys it + teacher gives it. H. Center diag cases only about 20% of all report cases of VD. Ingoing re penicillin Treatment for syphilis received - giving total dose of 600,000 units - (30,000 units every 2 days) + 12 tabs this information recd from Kuroda

Clinic Schedule (usual attendance)
TB - Mon - Wed. Fri AM - 10
VD - Tues Th - (Exams) - 4
VD - Daily (Treatment - 2-3

Pneumo inj Malty: Mon - Wed - Fri AM - 5 patients total end; Tues - Thurs - Sat AM - 8-; 2 X mo - 70

☆ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
15 MAR 51	Inspection visit + Conference - Old J.C. Building in fair condition & minor remodeling for new X-ray room. Sanitation within is fair, also various improvement in clinic rooms. Statistics + inquiry reveals very limited activity in H.C. Consultations; they report traveling clinics for 10 days in the month. H.C. clinic schedule is poor for full use of personnel - 2 MDs + 4 PHN stay in all day to cover clinics with total attendances about 30/da. Strongly advised separate clinic schedules (from the 1st one tried before) Discussed + urged setting up "Shikoku Plan" for better utilization of PHN. Visited 1 of villages in the district here a nurse also do the PHN follow-up in her area - they are supervised by H.C. Chief nurse + come for staff conference at H.C. 2 x mo. File boxes dry sterilizer but not correctly used - discussed use. Urged following suggestions in "Guide for PHN in H.C." for clinic procedures + procedures. No syphilis case has had penicillin - discussed Schatzki's - urging this for APs + primary cases. VD program is poor.

☆ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm either - Good, Fair or Poor

Date	Remarks
14 Mar 57	Inspection visit + conf - Directors position vacant since 15 Dec 56 - are trying to get another - The city health dept is building another H.C in another part of the city - Chikuma - expected to open before end of April - then district responsibilities will be reduced 1/2 in this H.C Review of statistics of clinic activities showed good activity also of PHN program - "Other Exams - H.C. Consultations" figures are quite high - but includes mostly employment exams figures here - Immunization statistics excludes those given in "outside" clinics & these PHN assist with these clinics. - There are 27 outside PH Nurses but they do not do Pt. Type work - mostly in industrial diagnosis - Inquiry re individuals in mun record reveals they get the patient one after each immunization + use separate record for each kind of immunization - Clinic rooms are over crowded - Annex will be used for latter clinic & equipment in clinics - They report that some time in the future (date not known) another building will be erected adjoining which will take care of Matg + Child Clinics

Date	Remarks
1950 Dec. 1950	Mrs. Kido, Chief welfare of Fukuoka city acct. Dir. Dr. Yoshimoto resigned. Dr. Hashimoto - Div. P.H. Service at this H.C. Application of new Director being Considered. Pkg Loan 2,000,000 yen budget for new H.C. in Hakata, plans drawn, should be Completed April 1951. Suggested Dr. Brown Southern plan Relationship of H.C. staff with Private physicians seemed good. Miss Shimizu dos twice demonstrated home visiting at Med. assoc. Meetings, H.C. importance has been emphasized at Med. assoc. Meetings - Inservice plan seemed good. Intervening 200 V.D. pts being taught at present. Nurse staff meetings each wed. 1st wed. Experience & work of previous mo. 2nd wed. Reports records - files etc. 3rd wed Chief nurse teaches improvement of home visiting. The dis plan to invite clinic nurses to interesting Conferences. Hear are assigned each nurse, 1 visit 5-6 pts each am. 11 nurses 5-6 pts each plan. They seemed pleased that their program and relations seemed improved with Tokai nurses. 1949 - 25000 Tokai child Maternal Plan. 700 direct 4 Kg no. 200 g Rice. There seemed no way to separate V.D. pts from Maternal & child hygiene pts - all waiting in center. Corridor suggestion: Screen portion corridor. Use separate entrance as clinic Maternal & child Clinic time This H.C. apparently carrying heavy Case load well managed.

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
23 Jan 51	Inspection visit + conference - New building, fine clean. Statistics on H.C consultations + examinations are found high + require PH nurse attendance. Arrangements made for her to go for home visiting - advised female PHN to stay in H.C all day. Also that clerk instead of PHN attend to information etc desk + TB follow-up program apparently poor. Last month more than half of all home visits were for infants - advised re TB Control priority program. Have tested only 1 syphilis case in prevention so far - apparently doctors don't understand this type of test work - referred to W.M director + advised to contact Kuroda re this. Director is an older man + appears to have limited knowledge of aspects of P.H. program. Equipment in V.D clinic + laboratory incomplete. Inquired re typhoid control program - "Sanitary teams use DDT etc" - advised re possibility of setting up meeting for DDT testing of inquiries which we are supplied as many. Discussed various aspects of PH nursing - referred to literature "Guide to PHN in H.C"

4 of these work in Matsy + Child Welfare Division + not in the H Center
Who in Dec made 460 of the 617 total PHN visits for Fukuoka
supervision of Orphans + preschool

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
24 Jan 51	Chief Director in office in city hall - Reviewed plans of new Health center bldg which is to be located opposite city hall on 600 tsubo site - One building 200 tsubo will house all but the laboratories, will cost 1½ million (4 million from city + 1½ million from W. Min.) - Sub bldg (100 tsubo - 2-3 floors) to be built later will be clinic + enclute + to cost 5 million. Made appropriate suggestions for better location of clinic rooms etc but director does not appear open to suggestions.
	Visited clinic building in other part of town - Clinic attendances comparatively small but building is in an inaccessible part of town - Home visit statistics low - apparently poor TB follow-up program. - Discussed same - Referred to absence of "Guide to PHN in Hc." - Interviewed Doctors + Nurses both for better procedures of clinics + PHN programs. Chief nurse returned from trip to Tokyo Dec. 1950 + apparently is trying to practice knowledge gained. MDs apparently unaware of W. Min. directive on periodic exam for syphilis - advised to consult Kitakyushu for help also discussed failure in syphilis control. Yahata Iron Co has staff of 9 PHN who do the PHN follow-up of cases connected with their employees

+ dependents (for population groups 5100, 000)

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
23 Jan 51	Rather new H.C. director - here since Aug 1950 - considerable improvement in clinic set-ups - some remodeling in old building provides for f. adequate clinic rooms Statistics are poor as for H.C. consultations, Home Visits, Total visits (including recently PHN staff) totaled only 4. Thy report nurses probably are able to visit 50% of all newly reported TB. - total TB home visits last yr 1456 - (Total 2000 approx TB cases reported). Advised to set up home file box + discussed program planning re TB as priority program. Some improvement in private M.D. reaction to PHN program - Director gave talk to Med Assoc + distributed literature on aims of PHN nursing.
	In new H.C. building - possibly start building in March 1951 - financial appropriation still pending - apparently city council has OK'd it - but staff has to get mayors OK. - Yr cost about ¥ 8,000,000 + will be set on a 1000 Tsubo site (part will be a park) + will be located opposite the site for the future city hall. Reviewed the plans + made some suggestions - Staff then will include 15 PHN. - Editor Director Directors "Guide for PHN in H.C." for suggested minimum clinic equipment, re clinic procedures etc. Director appears very open to suggestions.

		Director Gen Affairs Section H.C.; 1 part time							Midwife for MD clinics;			1 Outside (not here) nurse, pharmac, 2 midwife			MD hours	Maternity clinic	Once a month

☆ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
16 July 1956	Statistics show fairly good activity in Health Center + home visits + Nurse Home visits. About 80% of all newly reported TB cases get PHN visit - seven days. The PHN in district. Mostly old nursing duties to the TB follow-ups in their areas. Health center fairly clean. No examinations set up - suggested following "Guide" for details in chain set-up + procedures. Patients records are of old form + rather inadequate. Will start a new forms when this supply is exhausted. + Register is kept but quite inadequate - no entries made if card is dead - discussed same. Discussed TB + OD contact follow-up - OD person does practically all the follow-up - the MD in clinic elicits contacts names etc. Have information of penicillin treatment for syphilis but have not started yet. Small pox vaccinations reported 94% completed. The total statistics from May 1949 show only 103 of TB Guide cases in Maternity program "most mid wives refer patients for exam." Old health center 4 days per week clean except for part of laboratory - Expect new health center building this year.

★ Code - W. Ministry Grade A or C A = staff over 31, C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
7 July 50	Health Center Bldg is located outside own H.C. district which boundary starts some 350 meters away. Boundaries were changed 7-4-49 when city of Orio was incorporated into Yahata City - (H.Center in Yahata 30 min by streetcar from this H.C.) Expect new H.C. Bldg perhaps this year. Also to be located in Orio (outside district) "because this site is at junction of roads that lead to 2 major districts. Babies of the H.C. district. Old H.C. Bldg in fair sanitary cond + clinic rooms are fair - No running water. Lab is of clean. Statistics show considerable increase in PHN home visits since X-ray + Lab. Tech. added to staff. Active TB case register kept - about 70 % newly reported TB cases get PHN home visit - reason "inadequate staff + poor transportation - 3 days a week to nurses. Have 4 group nurses' meetings + 2 BCG groups - keep TB contacts - poor (2) + not good records - Research TB + HD - nursing programs - Reference book "PHN guide in H.C." easy for defense detailed information in completion of clinic forms + procedures. Small pox vaccinations totalled 114600 - from May 47 - May 48. Conference included the Orio director (not a M.D.) + chief nurse others. Dentist absent each TB - Part time doctors (2) are in H.C. when clinics are held (definite schedule) + the doctor who takes care of VD + STD is on call if necessary for a VD case

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
July 50	Director absent, Enforcer Mrs Ohyi for affairs between doctor + nurses. New HC bldg is posted to be completed by end of this month. Present building in poor condition. No running water, clinic rooms in fair condition, chairs appear poorly administered. Discussed value of defined clinic hours + schedule. All lab work done in Kuroki lab (Asst Technician left last March) Had only 1 Post up to March 50 when 2 more added + 2 more added to staff yesterday. Because of limited staff only about ½ of newly reported TB cases have had PPD test - discussed TB as priority program. Advise TB register, Post. V.D. Clinic records (PPD) Mantoux - cases coming for G.C do not get syphilis test, tracing for contacts taken by Town clerks (V.D) Nurses) Discussed activities of Pub Nurse TB + VD clinics, clear proper set up of Mantoux + clinic procedures - Referred "Pub Guide in HC" for different information on procedures set up etc. Report small pox vaccinations 1950 to complete yet 5 Tetanus toxoid 366 vacc given to population 57000 - 2a on pox vacc given since Nov. Typhoid vaccine has just arrived today - will start promptly. HC does not hold immunization clinics - vaccines are distributed to permit doctors (stipend by HC on hourly basis). For Wh. Cough vaccine John Mayer suggested making plans now for clinic schedule - Monday clinics if ready when they work into new bldg. No tb or tb bcg. When BCG, Diptheria + Typhoid vaccines are Rec'd!

★ Code - W. Ministry Grade A or C A = staff over 31 C = Under 31 Sani. and Adm enter - Good, Fair or Poor

Date	Remarks
21 Dec 50	Visited this H.C. is very inadequate and in poor Condition, I think it should be Condemned as Health Center building. The waiting space is small Crowded. There are two clinic rooms, today was V.D. & Prenatal Clinic. The prenatal room has no pelvic Exam. table, if mother should need this exam she would be placed on table in V.D. room, this same room is used for T.B. exams, treatments also as pediatric clinic. There is no laboratory space, smears are exam. at clinic, all other laboratory work is done at Pref. Lab. Plans are drawn for a new bldg. to be located at Kashii, County Kasuya (near Hakata). This blue print how workers and Pediatric clinic on second floor, seems to me a Prenatal & Pediatric should be the (Baby Clinic) on first floor, they should design a change of blue print as offices are dark inched space instead of two tenanted Clinics. The adm. and Chief Nurse seem capable, but dread fully hindered by this inadequate building.

N.G. publicity plan deemed good and most load levy for such inadequate clinic space. Relations with private physicians good, these physicians have contributed a fund to be used towards new center.

Nurses Training - Reg. Meetings each week. Miss Yamada instructs basic P.H. Contents of her later No. course at (Institute) twice each week. She sits in at dis staff meetings. Miss Yamada plans to visit village & school nurses to attend weekly staff discussions.

The charge nurse Dr. B. Cline attended 6 mos course given by T.B. Prevention assoc. in Tokyo. Three nurses do home visiting am & p.m. on alternating days.
