May 2020 Product Metrics: Readers

YoY

Interactions	21.7 B	19.3%
—Pageviews ¹	19.3 B	18.2%
—Desktop	7.6 B	14.6%
—Mobile web	11.4 B	21.1%
—Desktop previews	2.4 B	29.7%
Unique devices (all Wikipedias)	1.7 B	7.10%
(ali wikipedias)	1.7 B	7.10%

Notes

In May 2020, 4.7% of pageviews were "automated". There were 18.4B "user"-only pageviews.

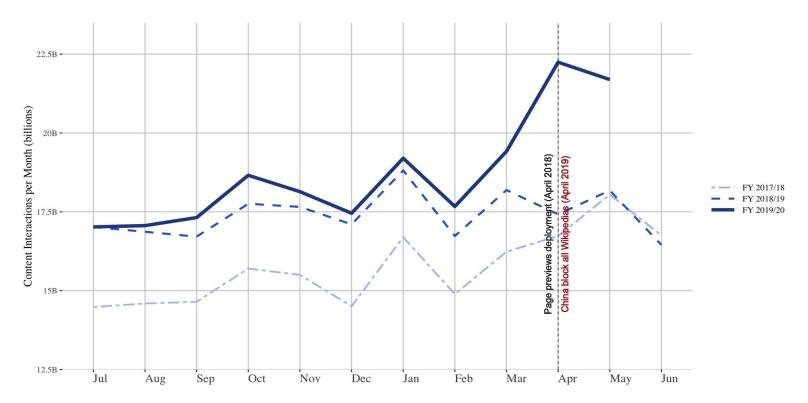

Key trends

- The total pageviews and content interactions continued to spike in May. The increase was driven by an overall 21% YoY increase across countries and project from external search engine and internal referral; especially from US, Japan, Germany and UK.
- Desktop pageviews began increasing YoY in March, related to growth in traffic around the announcement of COVID-19 as a pandemic, and continued to increase in May. The increase in traffic was mainly from external search engines and internal referral in en.wiki and es.wiki.
- The desktop previews continued to grow YoY. The growth was most prominent in en.wiki, fr.wiki, and es.wiki with traffic from multiple countries.
- Consistent with the spikes we saw in overall traffic, unique devices continued to increase YoY.

¹ On 29 April 2020, Analytics Engineering implemented new bot detection to identify previously-unidentified bots. For consistency in reporting with prior years' metrics, we will include "automated" agents in our high-level reporting through the end of FY20-21. See Wikitech for details about bot detection.

May 2020 Product Metrics: Editors

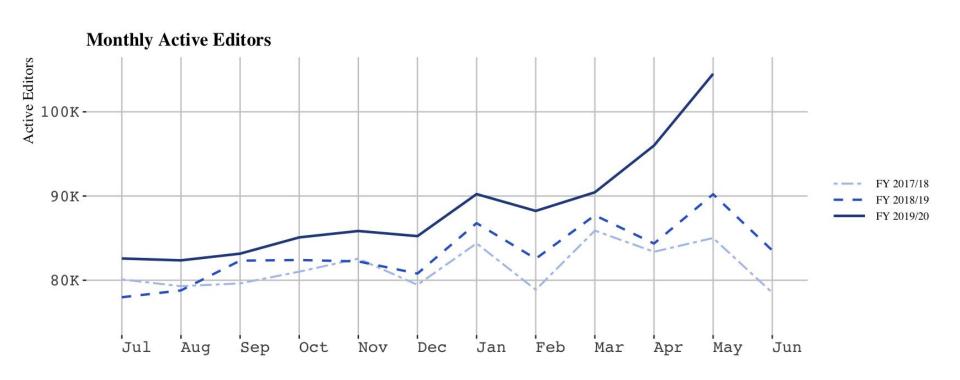

YoY

Active editors	105,000	15.8%
—New	24,800	28.2%
—Returning	79,700	12.5%
New editor retention	6.9%	2.5%

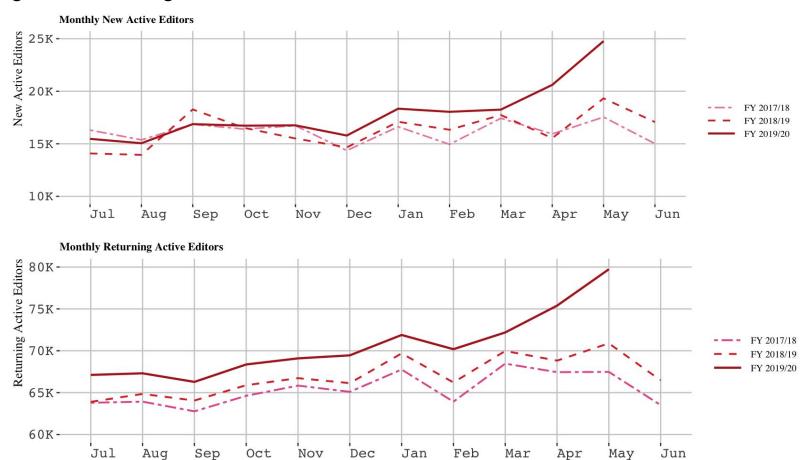

Key trends

- Overall active editors continued its spike in May, with a 15.8% YoY increase taking them above 100,000 for the first time since May 2008.
- The large YoY increase in new active editors are from en.wiki, Wikidata, Commons, es.wiki and ar.wiki.
- Steady growth in returning active editors was relatively evenly distributed across activity groups and wikis, from users registered over 10 years and between 30 to 90 days.
- New editor retention started to increase YoY from its 4 month decline, the growth was from es.wiki, ja.wiki, and ru.wiki.

Wikimedia New Editor Retention year-over-year comparison July 2017 - May 2020

May 2020 Product Metrics: Content

YoY

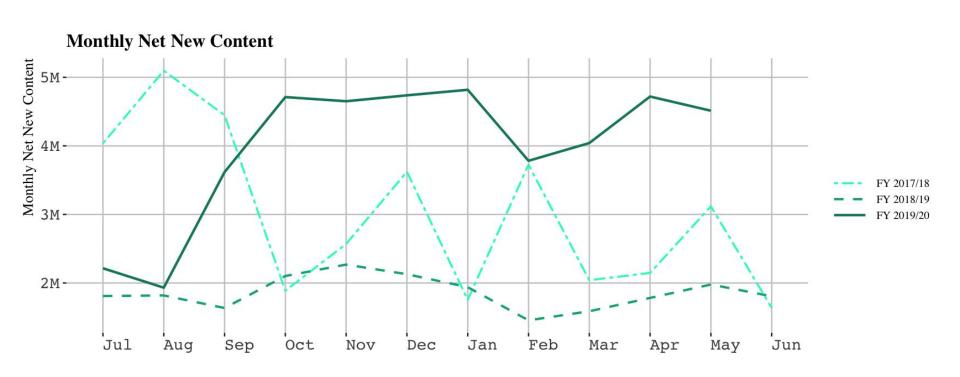

Total content	253.0 M	21.9%
—Wikipedia articles	54.0 M	6.6%
—Commons files	62.3 M	14.6%
—Wikidata entities	87.9 M	53.3%
Net new content	4,510,000	128.0%
—Wikipedia articles	396,000	109.0%
—Commons files	878,000	31.6%
—Wikidata entities	2,930,000	278.0%
Revert rate	6.1%	2.1%
Total edits	54.8 M	16.9%
—Mobile edits	1.9 M	28.9%
—Data edits	25.0 M	6.2%
—File uploads	0.9 M	33.5%
—Other non-bot edits	14.7 M	25.0%

Key trends

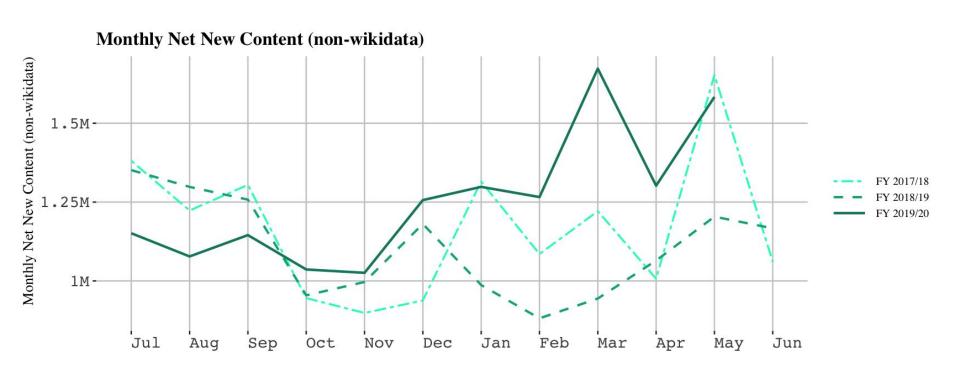

- Total content continues to increase steadily, with Wikidata entities adding volatility to the rate of increase.
- We continued to see spike this month in new Wikipedia articles which are made by admin user in arz.wiki (~140K) and by bots in vec.wiki. And the increase in Commons files and Wikidata are mainly from bots.
- Revert rate started to increase YoY in May from its long-term decrease. Part of the reason is a higher revert rate from Wikidata where non-bot edits are lower in May.
- There was increase in non-bot edits, which mainly are content edits from en.wiki, commons and fr.wiki by users registered over 3 years.
