The Political Writings of JOHN ADAMS

# The Political Writings of JOHN ADAMS

. Representative Selections

Edited with an Introduction by GEORGE A. PEEK, JR. Assumi Professor of Political Science University of Michigan

#### PREFACE

This volume is one of a series designed to present in reasonably short compass some of the best of American literary and political wnungs, John Adams is chosen because, along with John C. Calhoun he best represents the American republican conservative statesman who despite a full and active political life attempted to formulate a consistent political theory Though it is not difficult to formulate some sort of political philosophy from the public speeches and private correspondence of many political figures it is a rare thing to find that one of these has devoted himself to the more laborious and reflective task of attempting to erect a more or less complete political system proceeding logically from stated assumptions to political conclusions. This rery thing John Adams attempted to do in his Defence of the Constitutions of Government of the United States of America and Discorrses on Davila This is his political system in essence. At the same time he was an active leader of the struggle for andependence and made a significant contribution to a constitutional analysis of the nature of the relation between the Amer scan colon es and Great Britain. And again in old age he reflected fon the consutunousl system Americans had constructed To tover the varous phases of his thought and to present a picture , of that thought rather fully as it developed it was decided to proceed chronolog cally

The first piece included written by a young and vigorous dams receals his insistence on self-government for the colonies and a devotion to the rule of law or as some would put it constitutionalism. The other pieces of his pre revolutionary mit ngs indicate a changing position until the formulation of the nature constitutional view on the nature of the Entity Empire ound in the Novanglus letters.

The post revolutionary writings establish his hastily written hough not hastily conceived, plan of government, the working

v

out of this plan in the constitution of Massachusetts of 1780, and the climax of his thought in his Defence and Davila. The fina selections are reflections on the Constitution of the United State and, at a later date, a spirited defense of the Defence. Take together these pieces form a consistent whole and, it is believed give a fairly good view of Adams' political thought

The selections are chosen not only for their content but alse to illustrate Adams methodology as a political theorist. Like Aristotie long before him Adams studied many constitutions and many political systems in order to get the raw material out of which to construct his own. Surely he was selective in his choice of raw material and tended to ignore that which did not buttress his view, but keep in mind that he usually wrote with a purpose—namely, to defend constitutional balanced government. If he was less an objective writer than he was an advocate, the answer probably lies in his decionor to a cause—the cause of independence and the rule of law

On the whole I have chosen his public pieces in preference to his private correspondence for the reasons, first, that the former, usually of some length are a fuller statement of the case than the latter and secondly that the private letters on the whole appear to add little to these more comprehensive statements. Furthermore, it is my belief that one gets a better view from a few pieces quoted at length than from many pieces with frequent elisions. For a detailed account of the editorial arrangement of the text, the reader is referred to the Note on the Text, page viii.

I am indebted to the General Editor, Mr Oskar Piest for hencouragement and wise counsel in the preparation of the volume Finally I should like to thank my wife Marion and my good neighbor Mrs Henry Malcolm, for their valuable assistance in reading proof

#### INTRODUCTION

"He is vain irritable, and a bad calculator of the force and probable effect of the motives which govern men. This is all the ill which can possibly be said of him He is as disinterested as the being who made him he is profound in his views, and accurate in his judgment, except where knowledge of the world is necessary to form a judgment. He is so amuable that I pronounce you will love him if ever you become acquainted with him He would be as he was a great man in Congress "1 This perceptive judgment was rendered by Thomas Jefferson on John Adams It is based on first hand experience rooted in thoughtful moight, and tempered by real affection. It reaches the mark, History on the other hand has dealt more harshly with Adams First of all he occupied the Presidency of the United States between George Washington and Thomas Jefferson and in the public mind suffers grievously from the comparison. In addition no political party has rallied to his support. The demise of the Federalist Party as charged to John Adams, who insisted on being a patriot first and parts adherent second. In the election of 1800 he was roundly attacked by the Republican Party & which had the windfall of Alexander Hamilton's ill advised letter criticizing Adams and in later years when Adams approved of some Republican actions, that party was still suspecious. He was well aware that he could expect support from neither party "For my part I always thought and am still determined to support every administration wherever I think them in the right he wrote to his friend Benjamin Rush 2 I care not whether they call me Federalist, Jacobin or Quid "6 His view that titles were neces

some ancient, medieval and eighteenth-century writers on the one band and John Adams on the other In fact Zoltán Haraszti has suggested "that the Defence would benefit enormously ... by placing the borrowed texts and Adams comments in dialocue form". The bulk of these two pieces consists of quotations frequently in extenso with Adams pungent comments interspersed at will Rather than an author of extended tracts on government he was a pamphleteer letter water and above all political thinler He was too much a man of action too impatient with continued and laborous writing, despite a voluminous correspondence to produce any single pece ubolly his own of length But his reactions to the political events of his times, to which he added deep reflection based on wide and intensive reading result in outstanding discussions on politics-using that word in its

onginal and Anstotelian sense Adams political writings form a remarkably consis ent whole and one can perceive that the Defence was a logical development of theones advanced in the Dissertation and Novanglus Of course there was a change in emphasis as current affairs forced Adams to think and write on different problems-he is answer ing a Tory charge in the Boston Galette or summing up thoughts on constructing a constitution or replying to Turgots attack on separation of powers-but there was no change in fundamental belief As he wrote about himself "John Adams temains semper idem "4 Hence the classification sometimes used of his writings into early democratic views and later post Revolutionary reactionary views is not only without utility but does violence to the facts

A Dissertation on the Canon and Feudal Law published in the Boston Galette in 1765 was John Adams first major contri button on politics. It received attention in both Boston and London The title is misleading, for it is essentially an attempt to

<sup>&#</sup>x27;John Adams and The Prophets of Peogress (Cambridge Mass 1952) p 155 "lohn Adam on D

ment and complete independence, though he did admit that for the sake of convenience Parliament should control strictly im penal matters. Adams' argument was not free of difficulties, both legally and in principle, but it was penetrating and imaginative. Randolph G Adams writes that "he [Adams] has . . . a claim to a position among the pioneers of a new class of Britannie thinkers (in the commonwealth of nations concept). . . . And Charles H. McIlwam holds that "John Adams' answer (to Massachusettensis, representing the British view) is the most elaborate exposition extant of the American interpretation of the constitutional problem of the empire. . . "10 The idea of a commonwealth of nations bound together through the person of the hing was premature Constitutional solutions proved unaccept able and the colonies proceeded to "appeal to heaven," to declare "That these united colonies are and of right ought to be free and independent States" In the battle in Congress for independence efferson in later years recalled that Adams was "the creat Colos

us of that Concress-the creat pillar of support to the Declaraon of Independence, and its ablest advocate and champion on he floor of the House' 12

In a time of social revolution two types of activity prevail, demolston of the old and formation of the new It is not usual for a person to engage well in both of these, but this John Adams did Even before independence was declared, he had in Novem ber, 1775, sketched some of his ideas on constructing a framework of government for each of the colonies, a framework later claborated in his letter to George Wythe and published in 1776 as Thoughts on Government This piece, the Defence, the Dis courses, and many of his later letters may be viewed as constituning the essence of his speculation on politics

Political Ideas of the American Revolution (Dutham North Carolina

1922), p 108

The Writings of Thomas Jefferson, Memorial Edition (Washington, D C., 1905), Vol XIII, p. 2511

<sup>&</sup>quot;The American Resolution A Constitutional Interpretation (New York, 1923), p. 139 The Massachusettensus, or Broads position, is defended by Pobert L. Schoyler in his Parliament and the British Empire (New York,

would be sufficient to make men just and benevolent But the nature of man is one thing his reason is another Passion and appetite are as much a part of man as reason and moral sense "In the institution of government it must be remembered that, although reason ought always to govern individuals, it certainly never did since the Fall and never will, till the Millenium and human nature must be taken as it is as it has been and will be"15 The passions of men must be restrained This is the funcnon of government.

Given these premises with regard to the nature of man and the necessity for the restraining power of government, John Adams could have employed the social compact, either in the tradition of John Locke or possibly Thomas Hobbes whose view of the nature of man he tends to follow But Adams in his political system rejected the contract, desp to his reference to it in the

reamble of the Massachusetts Constitution of 1780 a reference probably inserted to reflect the climate of opinion in New Eng. land following the break with the hing "Men in their primitive conditions, however savage were undoubtedly gregations and they continue to be social not only in every stage of civilization but in every possible situation in which they can be placed 10 Adams agreed with Aristotle that God intended that men should live in society But while for Aristotle society or the state which commences for the sake of mere life exists for the sake of the good life for Adams, society exists for the sake of life or even for the satisfaction of egoism Man seeks his own kind to herd with Adams reasoned for only in the social condition can man sausfy to the full his universal passion pride-the passion for dispueston

Having established the nature of man and the consequent necessity for social existence. Adams proceeded to analyze the nature of society All men have one common nature and from that may be inferred equal rights and duties. "But equal ranks and equal property can never be inferred from it any more than equal understanding againty vigor or beauty Equal laws are all

upper house represents the natural anstocracy the lower house, the people but more dificult to determine what order in society is represented by the executive. There is no one or "kings friends" in a republic corresponding to the one in society TI e primary function of the one, it might be suggested is not so much to represent an order in society as it is to preserve the balance between the few and the many

This system of government was not of course, original with Adams. One may trace its origins back to Anstotle it was elaborated fully by Polybius it was current in 17th and 18th century polineal thought. In the tradition Adams divided simple governments into monarchy ansiocracy and democracy Each of these in turn decenerates of necessity into its evil counterpart tyranny, oligarchy and anarchy The way out of this dilemma lies in formulating a government made up only of the good forms, monarchy anstocracy and democracy This in Rome would be a government made up of consuls, senate, and tribunes in England king, Lords and Commons in the United States chief executive upper house and lover house. In each system monarchy ans tocracy and democracy or the one, few and many are properly represented and balance is ach eved.

It was in elaborating on the simple forms of government that Adams may have laid himself open to charges that he was ann republican On the whole the least evil of the simple governments is monarchy he argued because the people have more liberty under t than under the other two Even under a simple mon archy a modicum of balance exists in the nobil ty and the course of indicature In the struggle for power the anistocrats by their very nature have an advantage, and the result is oftentimes an ol garchy It is the people wearied of anstocratic intingues bribes, and outrages, who have set up monarchy and fortified tt vith an army Monarchy is " the eternal resource of every ignorant people harassed with democratical distractions or anstocratical encroachments"22 The people need a champion to defend them against the nobility and this champ on is a king Monarchy and anstocracy are not natural all es. A man rought as well take up abode with Daniel in the Lion's Den as monarchy

ment. After an examination of the simple forms Adams again concluded "We have all along contended that a simple govern ment, in a single assembly whether anstocratical or democratical must of necessity divide into two parties, each of which will be headed by some one illustrious family and will proceed from debate and controversy to sedition and war . Having no third order to appeal to for decision no contest could be decided but by the sword"20 In this fashion did Adams make out his case for balanced government that is, a government consisting of a strong executive, a selective upper house and a broadh representative lower house Each of the three separate branches in Adams system had a

distinct and peculiar function. In the first place, he asserted, The great desideratum in a government is a distinct executive power of sufficient strength and weight to compel both these parties (gentlemen and sumplemen) in turn to submit to the laws "at The executive is the mediator the arbitrator between the senate representing the few and the lawer house representing the many Not only is the executive distinct but he must be a single person with power to protect his office by an absolute veto His authority like all governmental authority is derived from the people in whom covereignty finally rests for the executive represents the people as well as the legislature. The upper house, the senate, is derived from and represents the rich, the well born, the natural anstocracy. This group must not sit in a single body with the representatives of the "simplemen" "The rich, the well-born and the able acquire an influence among the people that will soon be too much for simple bonesty and plain sense in a house of representatives. The most illustrious of them must therefore be separated from the mass and placed by themselves in a senate this is, to all honest and useful intents an ostra rism" to In addition it is the peculiar function of the senate

#### CHAPTER TWO

#### The Malady of Democratic States

Public Opimon in War and Peace

Written in 1915, just before the outbreak of the war, and having in mind Queen Victoria and King Edward the VII, Six Harry Johnston thus described how foreign affairs were conducted in the Nineteenth Century:

In those days, a country's relations with its neighbors or with distant lands were dealt with almost exclusively by the head of the State-Emperor, King, or President -acting with the more-or less dependent Minister-of-State, who was no representative of the masses, but the employe of the Monarch Events were prepared and strong on a submissive, a confident, or a study people. The public Press criticized, more often applauded, but had at most to deal with a fast accomple and make the best of it. Occasionally, in our own land, a statesman, out of office and discontented, went round the creat desiral to been sit tenung against the trend of British foreign policy-perhaps wisely, perhaps unfairly, we do not yet know-and scored a slight success. But once in office his Cabinet fell in by degrees with the views of the Sovereign and the permanent officials fafter the fifties of the last century these public servants were a factor of ever-growing importance), and, as before, the foreign policy of the Empire was shaped by a small camarilla consisting of the Sovereign, two Cabinet Min isters, the permanent Under-Secretary of State for Foreim Affairs, and perhaps one representative of le plus haute finance 1

Without taking it too literally, this is a fair description of how foreign affairs were conducted before the First World War There were exceptions. The Aberdeen gov-

### 3 The Pattern of the Mistakes

In order to see in its true perspective what happened, we must remember that at the end of the First World War the only actorious powers were the liberal democraces of the West Lepin, who had been a refugee m Switzerland until 1917, was still at the very beginning of his struggle to become the master of the empire of the Romanolis Mussolini was an obscure journalist, and nobody had dreamed of Hiller The men who took part in the Peace Conference were men of the same standards and traduon They were the heads of duly elected govenments in countries where respect for civil liberty was the rule Europe from the Atlantic to the Pripet Marshes by within the military orbit of their forces. All the undemocratic empires, enemy and ally, had been destroyed by defeat and revolution In 1918—unlike 1945—there had been no Yalta, there was no alien foreign minister at the peace conference who held a veto on the settlement

Yet as soon as the terms of the settlement were known, it was evident that peace had not been made with Germany it was not for want of power but for want of statesmanship that the liberal democracies failed They failed a restore order in that great part of the world whichresults of revolutionary Russia was still within the orbit if their influence, still amenable to their leadership, still abject to their decisions, still working within the same soften to their occounts, sun working when the same international community, till thinking in the same universe of discourse In this out manage in the same districts of another in the same and in the cycle of vars in which the West has suffered so sudden and so

As a result of this impassioned nonsense public opinion became so envenomed that the people would not countenance a workable peace, they were against any public man who showed "any tenderness for the Hun," or was inclined to listen to the "Hun food sainel."

## 3 The Pattern of the Mistakes

In order to see in its true perspective what happened, we must remember that at the end of the First World War the only victorious powers were the liberal democracies of the West Lenin, who had been a refugee in Satzerland until 1917, was still at the very beginning of his striggle to become the master of the empire of or ms strugge to occome the master of the computer of the Romanoffs Mussolim was an obscure journalist, and nobody had dreamed of Huller The men who took part in the Peace Conference were men of the same standards in the reace Commercials were then heads of duly elected govtramments in countries where respect for civil blerty was he rule. Europe from the Atlantic to the Pripet Marshes ay within the mistary orbit of their forces. All the tin democrane empires, enemy and ally, had been destroyed by defeat and revolution. In 1918—unlike 1945—there had been no Yalta, there was no alien foreign minister at the peace conference who held a veto on the settlement

Yet as soon as the terms of the settlement were known, it was evident that peace had not been made with Ger many It was not for want of power but for want of statesmanship that the liberal democracies failed. They failed to restore order in that great part of the world which outside of revolutionary Russia—was still within the orbit of their influence still amenable to their leadership, still subject to their decisions still working within the same score of the same microatonal community, still thinking in the same universe of discourse In this failure to make peace there was generated the cycle of wars in which the West has suffered so sudden and so spectacular a decline

Public opinion, having vetoed reconciliation had made the settlement unworkable And so when a new genera-

public opinion has been mattered aroused, recover באמונים ב wal sense in the crises. # 75W human propensity to crr-have been compelled to make the big mistakes that public opinion has insisted upon Even the greatest men have not been able to turn back the massive tides of opinion and of sentiment.

There is no mystery about why there is such a tendency or popular opinion to be wrong in judging war and cace. Strategic and diplomatic decisions call for a kind il knowledge-not to speak of an experience and a seasoned judgment-which cannot be had by glancing at newspapers, lutening to snatches of radio comment, watching politicians perform on television, hearing occasional lectures, and reading a few books. It would not be enough to make a man competent to decide whether to ampulate

a leg, and it is not enough to qualify him to choose war or peace, to arm or not to arm, to intervene or to withdraw, to fight on or to negotiate

Usually, moreover, when the decision is critical and urgent, the public will not be told the whole truth. What can be told to the great public it will not bear in the complicated and qualified concreteness that is needed for a practical decision. When distant and unfamiliar and umplex things are communicated to great masses of rople, the truth suffers a considerable and often a radical Listortion The complex is made over into the simple, the hypothetical into the dogmatic, and the relative into an absolute Even when there is no deliberate distortion by censoratup and propaganda, which is unlikely in time of war, the public opinion of masses cannot be counted upon to apprehend regularly and promptly the reality of things There is an inherent tendency is opinion to feed upon rumors excited by our own wishes and fears

#### 4. Democratic Politicizne

AT the crucal moments in this sad history, there have seen men, worth listening to, who warned the people against their mistakes. Always, too, there have been men inside the governments who judged correctly, because they were permuted to know in time, the uncensored and 26 THE DECLINE OF THE WEST

tion of Germans grew up, they rebelled But by that time -riske to make the Y

had become neac ave prevented too : wage against the Europe Having refused the risk of trying to prevent war, they would not now prepare for the war The European

democracies chose to rely on the double negative of unarmed appeasement, and the American democracy chose to rely on unarmed isolation When the unprevented war came, the fatal cycle was

repeated Western Europe was defeated and occupied before the British people began seriously to wage the war And after the catastrophe in Western Europe eighteen agonizing months of indecision elapsed before the surprise and shock of Pearl Harbor did for the American

people what no amount of argument and evidence and reason had been able to do Once again it seemed impossible to wage the war energetically except by inciting the people to paroxysms of hatred and to utopian dreams So they were told that

could be popular only if the enemy was altogether evil and the Allies very nearly perfect. This mixture of envenomed hatred and furious righteoniness made a public opinion which would not tolerate the calculated compromises that durable settlements demand. Once again the people were drugged by the propaganda which had aroused them to fight the war and to endure its miseries Once again they would not think, once again they would not allow their leaders to think, about an eventual peace with their enemies, or about the differences that must arise among the Allies in this coalition, as in all earlier ones How well this popular diplomacy worked is attested

had disarmed their enemies, they were imploring their former enemies, Germany and Japan, to rearm The record shows that the people of the democracies, having become sovereign in this century, have made it increasingly difficult for their governments to prepare properly for war or to make peace Their responsible officials have been like the ministers of an opinionated and willful despot Between the critical junctures, when

by the fact that less than five years after the democracies

become highly susceptible to encroachment and usurpaton by elected assemblys, they are pressed and harnssed ton oy energical assembly, anny are pressed and managed inter-by the heighing of parties, by the agents of organized inter-ects, and by the spokesmen of sectamens and ideologues The malady can be fatal It can be deadly to the very surand of the state as a free society if, when the great and hard issues of war and peace of security and solvency, of evolution and order are up for decision, the executive and judicial departments with their civil servants and echnicians, have lost their power to decide

community gives rational meaning to the necessary obrecures of government. If we deny it, identifying the people with the prevailing pluralities who vote in order to serve, as Bentham has it, "their pleasures and their secunty," where and what is the nation, and whose duty and business is it to defend the public interest? Bentham leaves us with the state as an arena in which factions contend for their immediate advantage in the struggle for

<sup>11814 ,</sup> Ch. III, Sec. L. \* Edmand Burke's speech on Conciliation with America (1775)

once at the beginning of the imperial power would have to happen again whenever the throne was vacant. As the imperium "escheats or reverts to the people", and the people had then to choose a new emperor, they might cut "straighte" the empire from one hadion to another, in this instance from the Greeks to the Germans Needless to say "the people" had were presumed to have this power, had neither voits not any other means of making their will know it is was presumed that they washed to have their power exercised for them. In the coronation of Chastiemagen, the Pope did thus he 'incretif declared and

exercised the people's will."

All this secons long ago and har away but if we reject virtual representation, the question remains if the Pope or the king or the parliament of magnates, cannot represent The People, how do a plurality of voters truly declare and exercise The People swill? It sounds strongerious to modern ears that the Pope should represent the people But it is occupance that the Pope should represent the people But it is occupance that the Pope should be represented by a count of the votes of some persona? The consumbrant springs from the fact data what Phe Popple as a componing body are the true owners of the sovertime power, the Popple, so as aggregated of voters, base of proving the Supplementary in the province of the pr

The distinction upon which I am dielling does not, as one might suppose, crase to matter when the voters become encommonally many Cannot a multitude of solers be regarded as the practical cruwlent of all the people? They cannot be To multiply the voters makes it on observable that a plurality of them will tuly represent the public interest. Our expensions with mass electrons in the venture transpression, at think, to the contrary temclusion that public optimon becomes less relative as the mass to whom information must be conveyed, and argument must be addressed, grows larger and more beleroge-

MAI this will seem less odd if we remind ourselves that political democracy in we know it in this century, is a sery recent political phenoment. The moral presumper a factor of unresent swiftings may perhaps be said in the control of the control of the property of the control of the control

once at the begroung of the imperial powers would have
to happen again whenever the throne was weard. As the
imperium "exclusive or creets the people", and the
people had then to creen a more more too, they might
over "translate the comparison one mation to another,
in this contained to the comparison of the mation to another,
in the contained people "who were presumed to have the
power, which were presumed that they what of
the well known It was presumed that they washed to
these their profest extracted for them In the coronation of
Chairmage, the Pope did this he "merely declared and
purcessed the people's will."

All this seems long ago and far away But if we revert wheal representation, the question creams in the Pope or the king, or the parlument of magnates, cannot represent The People bow do a plurality of voters truly declare and energies The People's will It is unads uncompruent to modern ears that the Pope should represent the people. But is it so corginous that the people should be represented by a count of the voter of some person? The temperature springs from the fact that while The People power, The People, as an aggregate of voters, have diverse, conflicting soft-centered unicrests and opmions. A plurality of them cannot be counted upon to represent the toprocedure nation.

The dataneous upon which I am dwelling does not, as one mught suppose cease to matter when the voters become enominating many. Lamot a multirade of voters become enomentally many. Lamot a multirade of voters became the process of the public interest. Our experience with mans electrons in the teacher centrally compels as I think, to the contrary conclusion that public concesses less realistic as the mass to whom information must be conveyed, and agained must be addressed given a larger and more heterogeneous.

All the will seem less odd if we remind ourselves that positived demonency, as we know it in this century, is a very recent political phenomenon. The moral presumption in favor of an affaired presumption in favor of the analysis may prehaps be said to have been laid down up da American and the French Revolutions at the end to the eighteenth century. But (end) the end as the number the french construction of the second and constructions of the second and constructions.

### CHAPTER FOUR

### The Public Interest

## What Is the Public Interest?

We are examining the question of how, and by whom, the interest of an invisible community over a long span of time is represented in the practical work of governing a

In ordinary curcumstances voters cannot be expected to an oromany streamments one cannot be expected or common As well expect men laboring in the valley to see

opinion as were expect men morning in the variety to see which as provide persons they cannot readily surmount the voters are most likely to suppose that whatever seems obviously good to them must be good for the country, and

I am far from implying that the voters are not entitled A dan set trous unpriguing coast and collective are not considered to the representation of their particular opinions and interests. But their opinions and interests should be taken terests not metr opinions and increase anomic of calculations and they are and for no more. They are not—as ter must view are suit tot no more they are not use sech-piopositions in the public interest. Beyond their besurpropositions in the poons interest beyond then be-groups of toters are funking, they have no intrinsic au groups or voters are turname, may more an incommon on thorsty. The Gallup polls are reports of what people are thinking. But that a plurality of the people sampled in the contract of the people sampled in the thinking, But that a puratity of the people sampled in the pool think one way har to bearing upon whether it is sound public policy. For their opportunities of judging the policy for the properture of the policy of the properture of the properture of the policy of the policy of the policy of the properture of the policy of great assues are in the very nature of things manter, and the statistical sum of their opinions is not the final verdict the statistical sum of most openions to not one union reconct on an issue it is rather, the beginning of the argument. on an same at a name, one organing to the argument. In that argument their opinions need to be confronted by in that argument their opinions need to be commonted by the brews of the executive, defending and promoting the public merest. In the accommodation reached between

public in creat. In the accommodation reacned petwern the two views their practical public policy courses. Let us do ourselves, flow as the public interest described and pidgedy prior what we have been saying we those that we cannot answer the question by attempting tros that we cannot answer the question oy autompting to forecast what the invisible community, with all its in to torecast wast one myssing community, what are us on constituents will would, or nught say if and when it

The Public Interest 41 ways balanced. The true nature of the reckoning would be clearer if, instead of talking about "an unbalanced

history we spoke of a budget balanced not by taxes but

eannot be reduced to precise figures, prudent men make estimates as to where the equations balance. Their decisions as to where to balance the accounts

We may say, then, that public policy is made in a field of equations. The issues are the choices as to where the balance is to be struck. In the reality of things X will ex-

### CHAPTER FIVE

### The Two Functions

### 1. The Elected Executive

Our poursy has shown, I believe, that we cannot take popular government for granted, as if its principles were settled and beyond discussion. We are compelled to agree ago, that "the actual has beyond popular government since ago, that "the actual has beyond popular government since and was included in its modern shape, not everify years it was included in the modern shape, not everify each "that to appear the assumption that popular government has an anticlinately long future before it, of the popular government has a many and the strength of government have become more insecure than they

were score—.

We have been ducling upon the devialization of the
execute power as the cause of the fragility but Maintspeaks of its I have been symp, the dospoter which results from a functional derangement in the relationship
execute power on the one hand, the representative assemblies and the mass electronics on the other

Democratic states are susceptible to this derangement betoon is weaker than the electricity, when dependent on electron is weaker than the electricity and expendent on electron is the electric and downcrate state is away from the electric and downcrate state is away from the formal retainery of electrons is to retaine electric control to the rots of agents of organized planatures Model-

## 2. The Protection of the Executive

During the nineteenth century good democrats were primarily concerned with insuring representation in the assembles and with extending the control of the assembles sentinges and with executing the control of the assembles over the executive power, it is true that the problem of the madequate executive, overridden and dominated by the assembly, was very much m the minds of the Founding Fathers at the Philadelphia convention, and it has ing 1 amers at the runaucripus convenient, and it inches a continuing concern of the critics and opponents of been a communing conserin or one extract and opponents or was not sharply and urgently posed. That there was such n problem was well known But it was not the immediate

For some generations before 1914, the West enjoyed fine political weather Moreover, the full force of the tine pointset weather protecter, the real rotte of the coming enfranchisement, emancipation, and secularization coming entranchisement, emanupation, and securitzation of the whole population had not jet worked its conse-tion of the whole security and the security of the security of the whole were independent of the assembles and the elecforates. They still drew upon the traditional sources of authority-upon prescription, hereditary prerogative, and consecration.

Yet the need to protect the executive and judicial powers from the representative assembles and from mass opinon has long been understood Many expedients have been devoed to soften, to neutralize, to check and to halance the pressure of parties factions, lobbies, sects. The ance any pressure or pattern sacrons, account, expedients have taken, says Bryce, two general forms, the executed more based, 2030 totales, and general rooms, one being to put constitutional restrictions upon the assembly and the other, by a division of the whole power sensory and one other, or a biscount of the words service of the people, to weaken it. This has been done by electing the legulature and the executive separately, or by having the legislative bodies elected by the differing con-

The constitutional mechanisms have never themselves been sufficient to protect the executive. And much mean tion and reforming energy have been applied to finding

to 47 171. 2311-1324, NO. /1, PP 403-400. Sern Democracies (1921), Vol. II, Ch. LXIII.

#### The Protection of the Executive

During the nineteenth century good democrats were primartly construed with insuring representation in the assembles and with extending the martial of the assembles over the executive power, overridder and dominated by the nandequate over the construency of the problem of the marting over the construency of the Foundtion a continuing concern of the critics and opponents of democracy But until the treatest century the problem was not hardly and urgently posed. That there was such a problem was well known. But it was not the trained-

For some generaturus before 1914, the West enjoyed fine political seather Moreover, the full foruse of the fine political seather Moreover, the full foruse of the coming enfranchisement, emancication, and secularization of the whole population had not jet worked its consequences. Governments still had authority and power, which were independent of the assemblies and the electorates. They still drew upon the traditional sources of authority—upon prescription, heredulary percentative, and

consecration.
Yet the need to protect the executive and judicial powers from the representative assemblies and from mass opinion has long been understood. Many expedients have

been devised to solten, to westralize, to check and to balance the gressure of paties factions, lobbies, seets. The pedicinal hair existen, says Payce, two gentral forms, the ne being to put constitutional restrictions upon the asmely and the other, "by a division of the whole power I the people," to weaken it." This has been done by electate because.

ag the legislature and the executive separately, or by using the legislature bodies elected by the differing con nitacrotics and at different times. The constitutional mechanisms have never themselves

been sufficient to protect the executive And much invention and reforming energy have been applied to finding

classics society without coercion and violence and with freedom for all This formula reappears whenever conditions are revolutionary—that is to say, when uncessary reforms are festived. The formula is the strategy of tribelized to those who are unable to obtain the redress of grevances. The rulers are to be stacked. So they are isolated. They are to be stacked. So they are isolated. They are to be stacked.

masses is victorious over the few, there will exist the

58

first in order to gain admittance into, and then to take

possession of, the organs of government

When they declared that "a prince (George III) whose character is thus marked by every act which may define a tyrant, is unfit to be the ruler of a free people," they were not saying that there was no one who was fit to be the ruler of a free people. They were imbued with the English idea that the governing class must learn to share its special prerogatives by admitting new members The American Revolutionists were themselves the new mem bers who had been unjustly, in fact illegally, excluded from the government of the colonies. They themselves meant to govern the colonies after they had overthrown the government of the King They were not minlists to whom the revolutionary act of overthrowing the sovereign is the climax and consummation of everything

### 2. The Paradigm of Revolution

OF THE two rival philosophies, the Jacobin is almost everywhere in the ascendant It is a ready philosophy for men who, previously excluded from the ruling class, and tecently enfranchised, have no part in the business of governing the state, and no personal expectation of being called upon to assume the responsibilities of office The Jacobi doctrine is an obvious reaction, as de Tocqueville's observation explains, to government by a caste When there is no opening for the gradualness of reform and for enfranchisement by assimulation, a revolutionary collision is most likely

The Jacobin doctrine is addressed to the revolutionary collision between the inviolable governing caste and the excluded men claiming the redress of their grievances and their place in the sun Though it professes to be a political philosophy, the doctrine is not in fact, a philosophy of government It is a gospel and also a strategy for revolution It announces the promise that the crusade which is to overthrow the ruling caste will by the act of revolution

create a good society The peculiar essence of the dogma is that the revolution itself is the creative act Towards the revolution as such, because it is the culmination and the climax all the labor and the sacrifice of the struggle are to be directed The revolutionary act will remove the causes of ev

"be led of the spirit" and would not be 'under the law". But in the Jacobin gospel, this transformation was to be achieved by the revolutionary act of emancipation from authority The religious end was to be reached, but without undergoing the religious experience. There was to be no dark might of the soul for each person in the labor of his own regeneration Instead there were to be nots and strikes and votes and seizure of political power Instead of the inner struggle of the individual soul, there was to be one great public massive, collective redemption,

### 3 Democratic Education

We live long enough after the new gospel was proclaimed to have seen what came of it. The post revolutionary man, enfranchised and emancipated, has not turned out to be the New Man He is the old Adam Yet the future of democratic society has been staked on the promises and the predictions of the Jacobin gospel

For the Jacobin doctrine has pervaded the theory of mass education in the newly enfranchised mass democracies In America and in most of the newer liberal democracies of the Western world, the Jacobin heresy is, though not unchallenged and not universal, the popular and dom-

mant theory in the schools

its popularity is easily accounted for it promises to solve the problem which is otherwise so nearly insoluble --- how to educate rapidly and sufficiently the ever-expanding masses who are losing contact with the traditions of Western society The explosive increase of the population in the past bundred and fifty years, its recent enfranchisement during the past fifty years the dissolution, or at least the radical weakening of the bonds of the family, the churches and of the local community have combined to make the demand upon the schools almost impossibly big.

Not only do the schools have to teach the arts and sciences to a multiplying mass of pupils. They have also to act in the place of the family, the household economy, the church and the settled community, and to be the bearers of the traditions and the disciplines of a civilized life What the school system could do has never been anywhere nearly equal to the demands upon it. The modern democracies have never been willing to pay the price of

### 5 The Overpassing of the Bound

This is the root of the matter, and it is here that the ultimate issue her Can men, acting like gods, be appointed to establish heaven on earth? If we believe that they can be, then the rest follows To fulfill their mission they must assume a godlike omnipotence. They must be jealous gods, monopolizing power, destroying all rivals, compelling exclusive loyalty. The family, the churches, the schools, the corporations, the labor unions and co-operative societies, the voluntary associations and all the arts and sciences, must be their servants. Dissept and deviation are treason and quietism is eachlese

But the monopoly of all power will not be enough. There remains the old Adam Unless they can remake the fallen nature of a man, the self-elected gods cannot make a beaven of the earth. In the Jacobin gospel of the eighteenth century and even in the Marxist gospel of the nineteenth century the new man would be there when the artificial garments were removed-when once he was emancipated by the tevolutionary act from the deformation imposed upon him by the clergy the nobility and the bourgrouse A hundred years later the new man was nowhere in sight So the early and softer gospel gave way to a later and infinitely harder one. The new man and the new beaven on earth demanded the remaking of pre-Leninist and pre Hitleman man. The decrees of history as revealed to Mart, and the decrees of nature as revealed to Hitler, had to be carned out

But m order to do that, the human species had first to be transformed-or failing that, exterminated. Destiny called upon the mortal god to make surviving mankind "an active unlading carrier," as Hannah Arendt says, "of a law to which human beings would otherwise only passively and rejuctantly be subject," 19

In the eyes of its devotees, this is not an inhuman and satanic doctrine It is above and beyond humanity. It is for the superman that its gospel announces. The ruthlessness the arbitrariness, the cruelty are not monstrous

#### BOOK TWO

# The Public Philosophy

### CHAPTER EIGHT

## The Eclipse of the Public Philosophy

### 1. On the Efficacy of Ideas

THERE are those who would say, using the nords of philosophers to prove it, that it is the characteristic illusion of the tender-minded that they believe in philosophy. Those who can, do, those who cannot, teach and theorize And being theorists by profession, they exaggerate the efficacy of ideas, which are mere my nothings without mass or energy, the mere shadows of the existential world of substance and of force, of habits and desires, of machines and armies

Yet the illusion, if it were one, is inordinately tenacious.

It is impossible to remove it from the common sense in

· non-

and churches All their effort would be irrelevant, indeed nonsense, like an argument about what Nebuchadnezzar

nonsense, tike an argument about what Nebuchadnezzas should be served for tomorrow morning s breakfast. The most thoroughgoing skeptie is unable, in practice, to make a clean sweep—to say that since ideas have no consequences there is no such thing as a good idea or a bud one, a true idea or a false one. For there is no escaping the indubtable fact of expermistaken, and that it makes a difference to have been

The chemistry of our bodies is never mistaken. The And cuemtary or our courses to move amount of reaction of one chemical element to another chemical element is always correct, is never misled by mismformation, by untruth, and by illusion. The doctor can be misand by macous, and by mostors have control and be the saken about the chemistry of his patient, having failed to detect a substance which falsifies his diagnosis. But it is only the doctor who can be wrong, the chemical process

Why do men make mustakes? Because an important way uo men make unbookes; because an unpostern part of human behavior is reaction to the pictures in their part or numan ocuavior is reaction to the presence in the heads. Human behavior takes place in relation to a pseudoneans riuman ocuaron takes place in relation to a pocuou-environment—a representation, which is not quite the environment—a representation, make its not quite the same for any two individuals, of what they suppose to be —not want tr—the teamy of mange. And man more, man cultural environment, which has its being in the minds of men, is interposed between man as a biological organism men, a muriposeo octovern man as a monogram organism and the external reality. It is in this realm that ideas are efficacious. They are efficacious because men react to their ideas and images, to their pictures and notions of the

world, treating these pictures as if they were the reality The any nothings in the realm of essence are efficacious an the existential world when a man, believing it to be frue or good treats the idea as if it were the reality In this way faith in an idea can quite literally remove a mountain. To be sure no man's idea can remove a mountain on the to oc sure no main's use can remove a mountain on use moon. But if the American people took it into their heads that life would not be worth living until Pike's Peak was and the suburbs of Chicago, they could more Pike's Peak, at the about of they and their descendants were suffi-fred could do it if they and their descendants were suffi-ciently devoted to the idea for a long enough time

nothing would happen to Pike's Peak if the idea of removing a were merely proclaimed and celebrated. The temoving it were merely providing and reference. The idea of winning a nees would have to become made the manon's energies war, the object and the focus of the nation's energies war, the object and the tocus of the manon's energies. Then the idea would operate in the minds of men who then the toes would operate in the minus of men who world, who planned, who would engineer the undertaking, voted, who pianned, who would engueer the uncertaking, who would rake the money, would recruit the labor, would who would raise the inches, would retruit the facor, would procure the equipment, and—shall we say—would suppress the mounting resistance of the objectors to the opect. Because ideas have the power to organize human be-J1 a

and copinion Chapters I to X.

so Englashnen, and that when Homer was alive there were no Romant, Dute certainly, men have acquired the ways of thinking, feeling and acting which he recognize as their than, mentally speaking these computional characteristics, mentally speaking these characteristics are, moreous, executly squared. Even within the brief span of lustioned time characters have been sequired and have been related by other characters? This is what gives to man's history, despite his common humany, its infinite variety.

Because human tabure is, as Hocking puts it. "the most pathste part of the burg world, the most adaptable, he most educable," at a sko the most mai-adaptable and mos-educable. The cultural hentige which contains the whole structure and fabric of the good life is acquired 1 in any be acquired budy. It may not be acquired to the property of the prope

which was first worked out by the Stoles As Ernest Barker

The rational faculty of man was conceived as proquend a common concebbon of fish and order agree possessed a mayerial validity . This common conceptoon included, as its three great notes the three values of Liberty, Equality and the brotherhood or Fragging of all mankind. This common conception, and its three great notes, have formed a European set of ideas for over two thousand years. It was a set of of meas not over two impression years at was a sec of sizes which lived and moved in the Middle Ages, and St. Thomas Aquinas cherished the idea of a sovereign law of nature imprinted in the heart and nature of man. to which kings and legislators must everywhere bow It was a set of ideas which lived and acted with an even greater animation from the days of the Reformation to mouth of Locke, [they had justified] the English Revolubon of 1688, and had recently served to mapure the the proper conduct of states and governments in the

area of internal affairs. They were ideas of the natural ngha of man-of liberty political and ervic, with soweregory rending essentially in the nation, and with free communication of thoughts and opinions, of equality before the law and the equal repartition of public ex-Penner among all the members of the public of a g-nreact entancy at the members of the public, of a gra-rial fraternity which tended in practice to be sadily

restricted within the nation, but which could, on occason, be extended by decree to protect all nations strug-

These traditions were expounded in the treatises of palice traditions were expounded in the ballocophers, were developed in the tracts of the publicists. Are absorbed by the lawyers and applied in the courts At ansotreed by the lawyers and appued in the courts at times of great stress some of the endangered traditions when you great suress some or the endangered dantions were committed to writing, as in the Magna Carta and the Declaration of Independence For the guidance of judges and lawyers large portions were described—as in Lord cocke examination of the common law The public phis

boophy was in part expounded in the Bill of Rights of 1689 It was re-enacted in the first ten amendments of the . Sir Ernest Barker, Traditions of Civility (1948), pp. 10-12.

busy man, wanting to know how to do this or that, they are now lamentably out of date. The language is archaic, the idiom is strange, the images are unfamiliar, the practi-

cal precepts are addressed to forgotten assues

But this prelevance and remoteness might be the dust which has settled during the long time when philosophers and scholars and popular educators have relegated the public philosophy to the attic, when they have treated it as no knger usable by modern and progressive men it is a neglected philosophy For several generations it has

the fall of the Western empire Later on they were remed and renovated and remade in a great flowering of discovery and enterprise and creativity. The revival of learning did not provide maps for Columbus to use in discovering America But it did produce much human to

has become a dwindling minority who were overthrown and displaced by men who were alien to the traditions, having never been insuated and adopted into them. May it not be that while the historical circumstances are obviously so different something like that is happening again?

## 4 The Universal Laws of the Rational Order

For over two thousand years, says Barker, European thought has been acted upon by the idea that the rational faculties of men can produce a common conception of law and order which possesses a universal validity. This conception was first formulated as a theory by Zeno and the Stores It was absorbed by the Roman lawyers, was stian fathers, was re-established and

The Eclipse of the Public Philosophy 83 it is a necessary assumption in the government of large and heterogeneous states. Alexander came to it in spite of Ansole's teaching to the contrary His practical expenence compelled him to see that in an empire which inchieded the Persons as well as the Greeks there had to be a common law which was valid for both To be valid for both the Greeks and the Perstans, the law had in some agmificant degree to have their consent. The Persians

£

As in fact the laws were promulgated to the Persians Alexander, who was a Greek, it was necessary to conyace the Persuas that Alexander's laws reflected something that was higher than the will and the intentions of the Greeks, something that was binding on both the Greeks and the Pernans That something was the faculty of disinguishing by reason the good and the bad For this aculty was not peculiar to the Greeks but was common to

Alexander had discovered empirically what Zeno was formulate theoretically—that a large plural society cannot be governed without recognizing that, transcendand the governed without recognizing that, transcending its binal interests, there is a randoal order with a nigeror common law. This common law is "natural" in he sense that it can be discovered by any rational mind, that it is not the willful and arbitrary positive command of the sovereign power ii This is the necessary assumpone sorticing power - 11115 to the purceaser, essential without which it is impossible for different peoples with their competing interests to live together in peace

The Roman lawyers worked out what Alexander had anhopated and what the Stores taught By the time of Cero there were says Barker, three different bodies and Conceptions of law is The first, called aux croile, was appicable only to Roman citizens. The second was a body of commercial laws known as the sur genium, that were differed by the Roman courts in all commercial cases a common law of contract throughout the empire "13

The its gentum was meant to contain what was common and universal separated from what was peculiar and

The Renewal of the Public Philosophy 89

in the prevailing popular culture all philosophies are

wrong beyond that which the preponderant mass of voters, consumers, readers, and listeners happen at the mo-

ment to be supposed to want.

There is no reason to think that this condition of mind can be changed until it can be proved to the modern skephe that there are certain principles which, when they have been demonstrated, only the willfully arrational can deny, that there are certain obligations binding on all men who are committed to a free society, and that only the willfully subsersive can reject them.

When I say that the condition of anomy cannot be corrected unless these things are proved to the modern skepte, I mean that the skeptic must find the proof compelhop to chart and

curem occasion sacred something in the way of evidence or of reason to carry full conviction. In the blood of the martyrs to intolerance are the seeds of unbelief

In order to repair the capacity to believe in the public philosophy it will be necessary to demonstrate the pracucal relevance and the productivity of the public philoso-phy It is almost impossible to deny its high and broad generalities The difficulty is to see how they are to be anplied in the practical affairs of a modern state We are back in a manner of speaking, before the Ro-

man lawyers worked out the nus gentum and related it to the us naturale back with Alexander the Great, who understood the pressing need for common laws in a plural society, and with Zeno who formulated the higher non training F ....

recognized theorists developed regressively the conception of prorate property as an absolute right. For a time they excluded from political philosophy, from jurisprudence and from legislation almost any notion that property had duties etden es llar es

Absolute private property inevitably produced intolerable evils Absolute owners did grave damage to their neighbors and to their descendants they ruined the fertility of the land they exploited destructively the minerals under the surface, they burned and cut forests, they destroyed the wild life, they polluted streams, they cornered supplies and formed monopolies they held land and resources out of use, they exploited the feeble bargaining

For such abuses of absolute property the political scienasts and the law makers had no remedy. They had lost the tradition that property is the creation of the law for ich the law

eruse "the sole and despotte dominion" over the land and the resources of nature. The ultimate title does not he in the owner The title is in "mankind," in The People as a corporate community The rights of the individual in that patrimony are creations of the law, and have no other validity except as they are ordained by law The purpose of laws which establish private property is not to satisfy the acquisitive and possessive instincts of the primitive man, but to promote "the grand ends of civil society"which comprehend "the peace and security of individuals"

Because the legal owner enjoys the use of a limited necessity belonging to all men, he cannot be the sovereign lord of his possessions. He is not entitled to exercise his absolute and therefore arbitrary will. He owes duties that correspond with his rights. His ownership is a grant made by the laws to achieve not his private purposes but the common social purpose And, therefore, the laws of property may and should be judged reviewed and, when neces sary, amended so as to define the specific system of rights and duties that will promote the ends of society

This is a doctrine of private property which demes the pretension to a "sole and despotic dominion" When Blackstone, though his conscience was troubled, accepted the sole and despote dominion, he broke with the public plulosophy and the traditions of civility. After his break the recognized theorists developed regressively the conception of private property as an absolute right. For a time they excluded from polytical philosophy from jurisprudence and from legislation almost any notion that property had duties etder es llen es

#### 4. The Linnts of Dissent

The construevolutionary movements have subjected the Everl democracies to severe stresse and strams how to have their security and survival various abandoning their better. They are faced with popular movements, and and shorted by undreadly foreign powers, and employing the machinery of democratic povernments to capture is and morter to abolish it. When they are working to attain power and before they do attain it, the facest and communnal parts moves all the guarantees of the bill of rights all the prengatives of popular parties of elections, of repformations, of the anisothers, it werears this expensional bit when they attain power they destroy the liberal demoration materials are subject.

climbed to power.

This exploration of free institutions is, it seems to infecence of the control of force of the public public of the connection is for generally the case in the contemporary democrates, free institutions are poorly defended by the liberal democrates. They are the easy prey of their enemies Eikher the hacests setue power in order to forcetail the

communists, or the communists seize power to forestall

the Insects.

There is no equivocation in the public philosophy about the principle of the defense of free institutions. The rule is that the right to enjoy them and the duty to manifest that it is reparable. The right to these institutions is, that it is say for those who adhere to their solutions.

The enterior of loyalty is an indibitable communent to defend and preserve the order of polared and covid rights. The question of whether the liberal democratic rates should outlaw, or to other ways contain cognitive resolutionary movements is not one of principle but of expediency assertical produces.

already reached, on all it will be reached if time enough is given. The arbitrary will or other individual peculiariber of a sufficiently large number of minds may postpone the general agreement in that opinion indefinitely. but it cannot affect what the character of that opinion shall be when it is reached. This final opinion then is in dependent, not indeed of thought in general, but of all that is arbitrary and individual in thought; is quite independent of how you, or I, or any number of men, think 13

It is not possible to reject this faith in the efficacy of mason and at the same time to believe that communities ef men enjoying freedom could govern themselves successfully

#### 5 The Mirror of History

The FIND, then, that the principle of freedom of speech, the that of private property, falls within the bounds of the public philosophy. It can be justified applied, reguhad in a plural society only by adhering to the postulate that there is a rational order of things in which it is poswhit, by sincere inquiry and rational debate, to distingood which leads to the realization of human ends and the evil which leads to destruction and to the death of creitity

The free political institutions of the Western world were concerned and established by men who believed that honest reflection on the common expenence of mankind would always cause men to come to the same ultimate

waton that the people of Athens who condemned Soc-ies were right in their judement. As Crito says, when has closed his eyes, "of all the men of his time whom have known he was the wisest and justest and best,"

proprietor of the laws and institutions of Athens and of the ideal of life which they serve. The necessities and the purposes of Athenian life are not something outside of

this is the inwarmess of the ruling man-whatever his tiles and his rank-that for the sake of his realm, of his order, of his regiment, of his ship, of his cause, he is the noble master of his own weaker and meaner passions.

Although this is the anstocratic code, it is not inherent in prerogative and birth It is functional to the capacity to rule. It is because anstocrats have been rulers, and not be-

### CHAPTER TEN

### The Two Realms

## The Confusion of the Realms

Against man living in the civilized tradition, who like Socrates rules his private impulses by the laws of the pubis world, there are arrayed the great adversaries. They the with a total promise—that in a short and groups struggle they will take him into the earthly heaven share be will realize all his hopes. The root of the mat-share he will realize all his hopes. The root of the mat-ity is in these two conceptions of the human condition, and the ulumate usus is in the conflict between them

As the bitter end has become visible in the countries of the Dal revolution, we can see how desperate is the predament of modern men The terrible events show that the harder they try to make earth into beaven, the more

Yet, the yearning for salvation and for perfection is not surely not evil, and it is, moreover, perennal in the laman soul. Are men then doomed by the very nature of things to be denied the highest good if it cannot be matrailized in this world and if, as so large a number of nodem men assume it will not be materialized in another

The answer to this question is known. It can be had by recognizing the difference between the realm of existence where objects are materialized to our senses, and the realy of essence where they are present to the mind. I in using the ambiguous but irreplaceable word "essence" as meaning the true and undistorted nature of things. The understanding of our relation to these two realms of be may a exceedingly difficult to communicate, so difficult that, as a matter of fact it has remained an esotern

Yet if there is a way out of the modern predicament 1 Yet it there is a way out of the anothern premiament a begins I believe where we learn to recognize the differ begins I believe where we seem to recognize the uniter-ence between the two realins. For the radical error of the ence between the two reams. Fur the ranges error or the mod in democratic gospel is that it promises, not the good the of whose.

strong enough to a

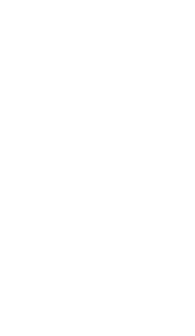

intonomous, a

the issues of good and evil. ---) must also meet on all

These issues arise concretely in the fixing of public policy about the family, marriage, divorce, the authority of the father and of the mother, the guardianship of childra, education, inheritance, the distribution of wealth, time and punshment, standards of taste, loyalty and al-legance, regulators and unrighteous war. These issues, as Pope Leo XIII said in the Encyclical Immortale Des (1835), belong to the jurisdiction and judgment of both" the eccessisted and the civil power In all these maters the final word is in neither of the two tealms of there is in truth no final word Instead there are he provisional points of equilibrium of an unending leanon among variable elements. Where exactly the point of equilibrium will be in a particular place and at a particular time cannot be defined a priori It must be unded empureally within the postulates of the public bulgsophy For the elements which have to come into quilibrium are variables. That is why governing is not regineering but an art That is why the same constitution and codes of laws cannot, like the plans for a jet engine, be used by all countries at any time or by any country

### The Mechanics of the Balance

The mea of the balancing of powers among states and within them has been used so long by so many, in such different circumstances and with such different intentions, barrent circumstances and with such macrent intentions, that it is not, as a recent critic puts it, "free from philo-logical, semantic and theoretical confusion." 14

other they are neutralized, and his power may then be micrent to govern them.

This, we may say, is the mechanical principle by which the perpetual and resiless desire for power after power is he ght into an order The desire for power has to be reduced. This can rarely be done, and never for long, by as commodent ruler Tyranny, as Aristotle observed long ago, is short lived? Nor can the desire for power be referred sufficiently by education and exhortation As Monesqueu said, " constant experience shows us the every man invested with power is apt to abuse it, and to carry his authority as far as it will go Is it not strange though true, to say that virtue itself has needs ed innuts? To prevent this abuse it is necessary from the very nature of things that power should be checked

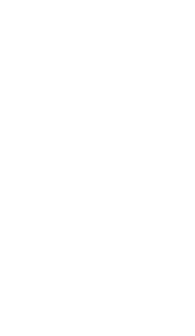

la the measure that power is checked by power, that opposing powers are in balance, neither can prevail Both are constrained within a common situation. In this condihos when the ponderable forces are in balance, neither being able or willing to exert decisive force, the imponderable means of reason become efficacious

later arma silent leges. In the clash of arms the laws 2. silent. We may add that in the truce of arms the laws

Like any technical procedure the bolancing of power to neutralize power can be used for good bad and mand different ends There are many who would say that the rood end which politicians always profess is merely the ationalization of the perpetual and restless desire for The truth of the matter," said Sicholas Spykman,21 "is that states are interested only a a balance which is in their favor estred is the one which neutralizes other states, leaving he home state free to be the deciding force and the

But of what "matter" is this the 'troth ? That particuar states and we may add, particular parties factions,

ad individual politicians are interested "in a balance theh is in their favor." No doubt they are No doubt hey have Hobbes desire for power after power This is Politics Rook V Ch. 12, 1315b13 Montesephone or Took XI Sec. 4

other they are neutralized, and his power may then be

This, we may say, is the mechanical principle by which the perfected and restless desire for power after power is to brought into an order. The desire for power has to be reduced. This can rarely be done and never for lone, by as compreter inter 'tyramy as Aristolle observed long ago, is short lived.' Nor can the desire for power be rebued sufficiently by education and exhortation. As Mos esquent said, constant experience shows us that every main meeted with power is a pt to abuse it, and to carry his authority as far as it will go is it not strate though true, to say that virtue itself has needed to hunsy? To prevent this abuse it is necessary from the very nature of things; that nower should be checked.

by power "o

In the measure that power is checked by power, that proposed powers are in balance neither can prevail Both are constrained within a common satisfaction. In this condition, when the ponderable forces are in balance neither than able or willing to provide a proposed power and the post of the provided provided in the ponderable forces are in balance neither than the ponderable forces are in balance neither than the ponderable forces are in balance neither than the ponderable provided pr

The ore except by men who possess the panosoppy in which democracy was conceived and founded. The SECRET OF MOST CONCERNS AND HOUSE AND ADDRESS OF MOST AND ADDRESS Competerolutions are therefore bound up with the ques-Nouncertevolutions are therefore bound up with the ques-tion hether the public philosophy is obsolete or whether if can be revived, required and renewed

tun os reviveu, remaines and sensored la be revived, and be re I beliefe that the public panosophy can be revived, the recognitional which we have made has been a subsequent to such control of the subsequent to subsequent to such control of the subsequent to subs and the reconnaissance which we have made has been a manufacture of the supplied to such central contracts. demonstration that when it is applied to such central concepts as popular sovereignty applied to such central speech, and education, the public philosoph, freedom of contract the such cannot be such contract to the philosoph clarifies the speech, and education, the public public processors and opens the way forwards rational and not consider a column of the public problems and opens the way towards rational and acceptable solutions. The revival of the public philosophy dutions and procepts and procepts which

or even sinctly speaking imagined in visual or tangible Yet these essences, these abstractions, which are on of sight and out of touch, are to have and to hold men s highest loyalties

The problem of communication is posed because in be modern world, as it is today, most men-not all Ern to be sure, but most active and influential menar a practice positivists who hold that the only world with has reality is the physical world. Only seeing is binning hothing is real enough to be taken seriously. some can be a matter of deep concern, which cannot, seams sen et a matter of uter concern, which contents are least might not somewhere and sometime, be seen, heard, tasted, smelled, or touched

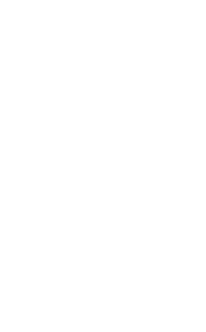

Tables Cassar was a real person because we feel sure second have seen him in Rome had we been there in as Metune By the same kind of popular common sense, regenerates have believed that werewolves were real. da not a woman named Thiebenne Paget admitted that the rest one of the wolves that was seen on July 18, 1603 a the District of Couvres? To common sense the and it we plained of Country. To common sense and it what, but only what, we believe has weight, mass,

What's Hecuba to him or he to Hecuba that he should weep for her?

What are the ideas and ideals the laws and the obligahors, of the rational order if, like Hecuba, they are not

Common sense is positivist and credulous, and the and human way of satisfying it has been to materialize deas when those ideas had to be treated as real Men west when those ideas had to be treated as real of the mean and the gods they have re-embodied their acts in Caston between the state of the mean and their ideas. They have made the abstractions and in contrast when the property of the means and the means and the means and the means and the means are the means and the means and the means are the mean mersals intelligible in concrete terms, and so matters of munic concern by connecting them with the realites of

The difficulty of communicating imponderable truths The dimenty of communicating amponuerance trums common sense is not a new one. Through the ages common sense is not a new one infruencine ages aths that could not be materialized have been regarded has that cound not on internation that over regarded esotene, and communicable only to an initiated few

or even strictly speaking imagined in visual or tangible terms. Yet these exerces, these abstractions, which are out of sight and out of touch, are to have and to hold

men s buchest loyalties.

The problem of communication is posed because in the modern world, as it is today, most men—not all more lobe sure, but most extree and indirectual men—are in practice positivate who hold that the only world which has reality is the physical world Only seeing a believing. Nothing is real enough to be taken seriously, nothing as neater of deep concern, which cannot, et at least might not, somewhere and sometime, be seen, tead is such as melled, or touched.

cant, nisted, smeller, or followed the feet sure ledwis Genes was a real person because we feet sure we could have seen him in Rome had we been there in ha lifetine By the same kind of popular common sense, communities have believed that warevolves were real. Had not a woman animed Thebenne Paget admitted that the was one of the wolves that was seen on July 18, 1603, in the Destruct of Couver's To common sense the rail is what, but only what we believe has weight mass, occur?

What's Hecuba to him or he to Hecuba, that he should weep for her?

What are the ideas and ideals the laws and the obligations, of the rational order if, like Hecuba, they are not firsh and blood?

Common sense is possivest and credulous, and the trail human way of satisfying it has been to materialize ties when those ideas had to be treated as real. Mea ties when those ideas had to be treated as real. Mea factions, they have personiced the laws, they have propositized their ideas. They have made the abstractionst and university intelligible in concrete terms, and so matters of groups connecting them with the realizes of groups connecting them with the realizes of groups connecting them.

The difficulty of communicating imponderable truths to common sense is not a new one. Through the ages truths that could not be materialized have been regarded as esotene, and communicable only to an initiated few

<sup>1</sup> The World's Great Folktoles arranged and edited by James R.

#### 126 THE PUBLIC PHILOSOPHY

The Gospels state that there were mysteries which Jesus could unveil only to a few. He said. 'He who has ears to hear, let him hear," But-

"When he was alone, those who were about him with the twelve asked him concerning the parables. And he said to them "To you has been given the secret of the kinedom of God, but for those outside everything is in parables . . " a

Only privately to his own disciples, says Mark, did he explain "everything", to 'the whole crowd he spoke the word "as they were able to hear it, he did not speak to them without a parable "

Why? Because, says Dante, the divine mysteries are beyond the reach of human understanding-

It is needful to speak thus to your wit since only through objects of sense does it apprehend that which it afterwards would make worthy of the intellect. For this the scripture condescends to your capacity, and attributes feet and hands to God, and means otherwise.4

There is a need to condescend to our canacity because as Paul Tillich puts it. It is impossible to be concerned

concern about it. The completely concrete being, the individual person, is the object of the most radical concern—the concern of love. There is in consequence, he says, an 'mescapable inner tension in the idea of God" -hetween God concerved as transcending all that is particular and finite, on the one hand, and the concreteness of an image of God on the other. In order to have a human concern there is needed a "being to being relationship . . . a concrete God, a God with whom man can deal' in his religious experience

While Tillich is a theologian examining the meaning

The Gospel According to St. Mark, IV 9

<sup>\* 1010 17 10-12</sup> translated by C. E. Norton (1941) Paradise Canto IV verses 40-45

\* Paul Tilich, Systematic Theology (1951), Vol I Part II

n 211

of God, which he defines as the "mame for that which concerns note ultimately," his findings illuminate the mobilem which we are studying. How can men the concerned effectively with ideas and ideals that transcend heir personal expenses and cannot be verified empirically in the retain of existence? The principles of the good society cell for a concern with an order of being—which cannot be provided existentially to the sense organs—where it mixed be proved existentially to the sense organs—where it mixed to give the regulate the will, that trust shall prevail

Because it is difficult to care about that which is not concret, there is, in Titlich's language, "a tension or kinnin exprenee" in order to become concerned about, to fed committed to, transcradent objects, we have to believe in them to believe in them they must be concert, they must in fact or in magnitude to drawn into the order of our sense organs. But as we condescend in this fallow to our capacity, attributing foot and hand to "foot, the belied becomes involved with, officin dependent poor, the materialization Because of this dependence, to belief is whiterable For a little knowledge, as for itampie that the foot and hand are a metaphor, may defining the belief.

#### 3 Constitutionalism Made Concrete

Extr m the history of Western society political thinkets in Rome bit upon the idea that the concepts of the Public philosophy—particularly the idea of reciprocal relian and duties under law—could be given concretetess by treating them as contracts. In this way, freedom emanating from a constitutional order has been advocated stiplined, made real to the imagnation and the contence of Western men, by establishing the presumption that civilized society is feunded or a public social contract.

A contract is an agreement reached voluntarily, qualpro quo, and likely, therefore, to be observed—in any event, uplitually enforceable Being voluntary, it has the consent of the parties. The presumption is not only that one party has accorded to what the other party proposed, but also that, in the original meaning of the word, both to the parties of the parties of the party proposed.

e' God, which he defines as the "name for that which concerns men ulumately," his findings illuminate the problem which we are studying. How can men be concomed effectively with ideas and ideals that transcend ther personal experience and cannot be verified empirically in the realm of existence? The principles of the good easy at the teams of existence, the principles of the feorecannot be proved existentially to the sense organs—where if maters supremely that the human person is involable, that reason shall regulate the will, that truth shall prevail oret ettor

Because it is difficut to care about that which is not concrete, the sum of the case about that which is not concrete, there is, in Tillich's language, "a tension in harm expenence." In order to become concerned about, to feel committed to transcendent objects, we have to believe in them to believe in them they must be conthe orbit of our sense organs. But as we condescend in the fathon to our capacity, attributing foot and hand to God, the belief becomes involved with often dependent pon, the materialization Because of this dependence, the belief is vulnerable For a little knowledge, as for example that the foot and hand are a metaphor, may

## Constitutionalism Made Concrete

Early in the history of Western society, political thinkers in Rome hit upon the idea that the concepts of the public philosophy—particularly the idea of reciprocal heart and dones under law—could be given concreteness by treating them as contracts. In this way, freedom reason acause mem as continues in this way, treedom cananing from a constitutional order has been advocated, replaned, made real to the imagination and the contriblaned made real to the imagination and the considered of Western men, by establishing the presumption that crude cocycly is founded on a public social contract as an agreement reached voluntarily, quad A contract is an agreement reasoned voluntarity, quantity, quantity, due, and likely, therefore, to be observed in any pro quo, and mery, uncerner, to be observed in any event, rightfully enforceable. Being voluntary, it has the event rightness emotionate the presumption is not only that consent of the parties. And presumption is not only dust one party has acceded to what the other party proposed, but also that, in the original meaning of the World, both that the other party proposed, the state of the world, but the other party proposed. but also that, in the original meaning of the word, both parties, however, define they have thought, felt and

user is a pecessary somehow to give authority to these movines loss, to invest them is some way with the relay of concreteness. The public philosophers draw by landage upon the Roman Law, which personned that in critica cases an agreement had been reached and an obligation uscurred by acts unaccompanied by any express part logues ex-confractul.

The general idea that the unwritten laws of public

#### + The Language of Accommodation

Men stave been laboring with the problem of how to make concrete and real what is abstract and immaterial

personage. But it could mean, also, the ministion of a which dazure without—as the Cambridge Plationist John Smith wrote, "a mutual local presence," that is to say without meating a devil in person. This was an accommodation to those who, believing in the wickedness of

rurse entitled "A"
teause "truth is or
) wear our mantle
self as it were to
with the most idiot
"ay, and becomes

if truth should do for their good."14

## Language of Accommodation

IEN HAVE been laboring with the problem of how to act mays been taboring with the problem of how to wer since the Greek philosophers began to feel the need set since the Greek philosophers began to reet the frech a accommodate the popular Homeric religion to the vance of science. The theologians, says Aristotle, are the philosophers in that they promulgate certain docmes, but they are unlike them in that they do so in

The method of accommodation employed by the phi-ophers has been to treat the materialization in the somer may ocen in the material and the same knowledge of a salign as a translation of the same knowledge of another language is To converse with the devil, for mple, could then mean what Interally it says-to talk face to face with the devil, a concrete materialized personage But it could mean, also, the imitation of a wided nature without—as the Cambridge Platonist John Smith wrote, "a mutual local presence," that is to say without meeting a devil in person. This was an accommodation to those who, believing in the wickedness of evil, could not believe in the personned devil. The devil toud mean either "some aposiate spirit as one particular could mean either "some aposiate spirit as one particular being " and also "the spirit of apostasse which is lodged and all mean natures." This is the method of plural interpretation, it uses "the language of accommodation " It is justified and legitimate, said John Smith in his discourse entitled "A Christian's Conflicts and Conquests," course counted a Contained a Commerce and Congression because "truth a content, when it comes into the world, to wear our mantles to learn our language, to conform itself as it were to our dress and fashions with the most idiotical sort of men in the most idiotical May, and becomes all things to all men, as every sonne

In Werner Jaeger The Thrology of the Early Greek Philosophers (In Wellow) Lectures, 1916) p 10, Cl. Armolle, Metaphynes E. III Ch. 4 10004 4-16 11 Cf. Basil Willey The Seventeenth Century Background (1952),

hat despite the unumerable learned controversies of the layers, the theologians and the philosophers, "all were syred that there was antural law, which, on the one hand, radiated from a principle transcending eartily power, and on the other hand was true and perfectly binding law, the highest power on earth was subject to the roles of natural law. They stood above the Tope and above the Kaser, above the whole community of mortals. Neither statute not act of government, neither resolving of the people nor cuton, could break the bounds that thus were set. Whalever contraducted the eternal and summitable principles of sturral law was utterly void and would hand so one."

But though there was egreement on this, there was eeps controvery over whether the natural law were the contrained of God or whether they were the dictains of an eternal reason, grounded on the being of God, and washirable even by God hunsel! How were men to magne, to maternalize and make controve the natural law which is above the Pope and the Kaiser and all worstal? As decrees of an omniscent and outprojecting

awaly king? Or as the principles of the nature of unp? There were some who could not conceive of uning laws which had to be obeyed unless there was a sayere made in the image of the human lawgvers bey had seen of heard about There were others to whose apacity it was not necessary to condesseend with quite dat much materialization.

The crucial point, however, is not where the naturalists and supernaturalist disappeed It is that they did agree that there was a valid law which, whether it was the commandment of Good or the reason of thous, was transcendent. They did agree that it was not something devided upon by certain men and then proclaimed by them. It was not someone stancy, someone's prejuder, someones with our rationalization, a psychological experience and no more it is there objectively, not subjectively. It can be discovered. It has to be obeyed

14 Otto von Gierke, Pol tical Theories of the Middle Age, translated with an introduction by Frederick William Manland (Cambridge University Press, 1927) CL pp. 73-87 and more especially

that despite the unnumerable learned controversies of the isagers, the theologians and the philosophers. "All was agreed that there was natural

and allow they stood above the Pope and above the Kaner, above the ruler and above the sovereign people, my, above the whole community of mortals. Neither statute ary act of government, neither resolution of the people nor custom, could break the bounds that thus were set. Whaterror contradicted the eternal and minutable principles of

But though there was agreement on this, there was deep controversy over whether the natural laws were the commands of God or whether they were the dictates of a eternal reason, grounded on the being of God, and malerable even by God himself How were men to amazine, to materialize and make concrete the natural have which a above the Pope and the Kaiser and all portals? As decrees of an omniscient and omnipotent bearing king? Or as the principles of the nature of things? There were some who could not conceive of bading law which had to be obeyed unless there was a hagers made in the image of the human lawgivers they had seen or heard about. There were others to whose capacity it was not necessary to condescend with quite that much maternalization.

The crucial point, however, is not where the naturalists and supernaturalists disagreed It is that they did agree that there was a valid law which, whether it was the commandment of God or the reason of thungs, was transcondent. They did agree that it was not something decoded upon by certain men and then proclaimed by them It was not someone's fancy, someone's prejudice, someat may not someone a rancy, someone a preparate, someone a man or fationalization, a psychological experience and no more it is there objectively, not subjectively. It

is Oito von Gierte, Polisical Theories of the Middle Age, trans-lated with an Introduction by Frederick William Mailtand (Cam bridge University Press, 1927) Ct. pp 73-87 and more especially

that despite the innumerable learned controversies of the largers, the theologism and the philosophem, "all were agreed that there was natural law, which, on the one hand, raduted from a principle transcending earthly power, sad on the other hand was true and perfectly binding law the highest power on earth was subject to the rules of natural law They stood above the Pope and above the Kaser, above the ruler and above the sovereign people any, above the whole commanny of mortals. Neither statute not each government, neither resolution of the people nor custom, could break the bounds that thus were set. Whatever tentraducted the eternal and unmutable principles of natural law was utterly vota and would bund no one."

But though there was agreement on this, there was deep controvery over whether the natural laws were the commands of God or whether they were the dictates of as eternal reason, grounded on the being of God, and malerable even by God himself. How were men to margine to materialize and make concrete the natural law which is above the Pope and the Kaiser and all mortal? As decrees of an omniscent and omnipotent beavenly king? Or as the principles of the nature of things? There were some who could not concrete of things? I have which had to be obeyed unless there was a thought all the control of the con

The crucial point, disagreed It as that they did agree that there was a vide law which, the crucial results are commandment of Good or the reason of disrip, was transcendent. They did agree that it was the commandment of Good or the reason of chirp, was transcendent. They did agree that it was for something decided upon by certain men and then proclaimed by them It was not someone a fancy, someone's preprinter, some ones which or rationalization, a psychological experience and no more It is there objectively. The came is discovered It has to be observed.

u Otto von G erke Political Theories of the Middle Age, translated with an Introduction by Frederick William Mauland (Cambridee U 1927) CL pp 73-87 and more especially

traditions of civility We are back in the war of all men against all men There is left no ground for accommoda bon among the vaneties of men, nor is there in this proclamation of anarchy a will to find an accommodation

And why, we may ask, is there among such modern philosophers as these no concern like that of their great predecessor to find an accommodaton? It is not only because they themselves have ceased to believe in the metaphors—so the sacred images. They have ceased to believe that behind the metaphors and the sacred images. there is any kind of independent reality that can be

Thus they reject "the concept of 'truth' as something and may reject the concept of trum as sometime, beforedent upon facts largely outside human control which as Bertrand Russell says, "has been one of the says, may be a been one of the control of the says," and the philosophy huberto has inculcated the necessary of the says of the s exary element of humility When this check upon pride is removed a further step is taken on the road towards a certain kind of madness—the mioxication of power which invaded philosophy with Fichte modern men whether philosophers or not, are prone I am persuaded that this intoxication is the greatest danger of our time, and that any philosophy which however un intertionally contributes to it is increasing the danger of

### The Mandate of Heaven

At the end, then the questions are how we concerve of ourselves and the public world beyond our private solves Much depends upon the philosophers. For though they are not kings they are, we may say, the teachers of any are not knigs they are, we may say, the teachers on the teachers "In the history of Western governments" and Francis of Wilson "the transitions of society can be marked by the changing character of the intellectuals," who have served the government as lawyers, advisers, administrators who have been teachers in the schools, who have been members of professions like medicine and who have been memoris or processions that memorie and theology. It is through them that doctrines are made to 14 Bertrand Russell History of Western Philosophy (1945), p

Francis G Wilson, "Public Opinion and the Intellectuals," in

#### 6 The Death of God

As LONG, then, as both the philosopher and the theoloman believe in the objective order there can be accommodation about the de ree and kind of materialization The range and variety of men's capacity to understand is very great. So too must be the tange and variety of the images which condescend to their varying expacities We can, therefore avoid much mounderstanding if we do not confound the national lization which is the mode of communicating belief- with the subject of the belief For not until we go down under the comparatively superficial question of belief or unbelief in any particular materialization do we find the ridical problems of belief and unheitef

When Martin Buber speak of the great images of God fashioned by minkind he reconizes that there can be many into ex or index I that there can be no image

which has concreteness to our sense perceptions

The critical question does not turn on whether men do or do not believe in in int cry it turns on whether they believe that a man is able to experience a reality absolutely independent at himself. When Sartre, following Nietzsche and the Code did the entited point is not that he retreat his in the existence, however attenuated of in it he p murphic God There can be, indeed there is to both in I deep religion without any concrete into it (at the ridical unbelief lies underneith the most of the death. It is no sattle's saying that at 1 to 1 in the with God the Tables compate is noted it inventor.

ally discredized among contemporary men Because of this, what we may call the terms of discourse in public counterery are highly unfavorable to anyone who adbrets to the public philosophy. The signs and seals of leatiness, of uphiness and of truth, have been taken out by men, who reject, even when they are not the swored adversances of, the decrume of constitutional demecarier.

If the decline of the West under the mustule of the people as to be haked at will be necessary to after these terms of decourse. They are now set overwhelmingly against the credibility and against the rightness of the principles of the constitutional state, they are set in favor of the Iscobin connection of the emancipated and sovereign

cople "
I have been arguing, hopefully and withfully, that it
may be possible to alter the terms of discourse if a conmore demonstration can be made that the principles
of the good society are not, in Surtre's phrase, invented
and choren—that the conditions which must be met if
ther is to be a good society are there, outside our wishes,
where they can be discovered by rational inquiry, and
developed and adapted and refined by rational discussions.

Il eventually this were demonstrated successfully, it would, I believe, rearm all those who are concerned with the snowy of our society, with its progressive barbarrabas, and with its descent into violence and tyranny. Amost the quagrine of moral impressionism they would thand again on hard intellectual ground where there are unafficiant objects that are given and are not merely wished their hope would be re-established that there is a public world, sovereing above the minine number of contraductory and competing private worlds. Without this certainty, their struggle must be unavailing.

As the defenders of civility they cannot do vulnors the signs and seaks of legituancy, of inpliners and of truth For it is a practical rule, well known to expensenced men, that the relation is very close between our capacity to act at all and our conviction that the action we are taking is right. This does not mean, of course, that the action is necessarily right, what is necessary to commonous actions at that is tail the behaved to be right.

#### 136 THE PUBLIC PHILOSOPHY

operate in practical affairs. And their doctrine, which they, themselves, have learned in the schools and universities, will have the shape and the reference and the direction which the prevailing philosophy are it.

direction which the prevailing philosophy gives it. That is how and why philosophy and theology are the ultimate and decisive studies in which we engage. In them are defined the main characteristics of the images of man which will be acted upon in the arts and sciences of the epoch. The role of philosophers is rarely no doubt, creative. But it is critical in that they have a deciding influence in determining what may be believed how it can be believed, and whit cannot be believed the philosophers, one might say stind at the crossroads. While they may not close the traffic to move they can stop it and start if they can direct it one wit of the other.

I do not contend thou, h I hope that the decline of Western society will be arrested if the teachers in our schools and universities come buck to the great tradition of the public philosophy. Bit I do contend that the decline, which is already fir advanced cannot be arrested if the previous philosophy applies oppose, this testogation and revival, if they impure rither thin support the vididity of an order which is superior to the values that Sattle tells each man to insent.

tells each man to ment. What the prevaling plut soph is six ibout religion is not uself in Fillich's terms of a six in ulumate concern of worship and of the Burner of the philosophers teach that tells on several phenomenon religious experience. The philosopher constitution than the visit is a separative transposed to the philosopher constitution of the philosopher constitution of the philosopher constitution and But they can keep them away from the

keep them away it is it. Philosophers plus the second and the strength of the good secrety it are given with a second and tree in the mastery of humin notice in the risk by an acquired rational second nature. In his literal was at principles of the good society must be unspecified at all the shore prevailed sufficiently to older the politic impoles. For the popular impulses are opposed to public properties, principles cannot be mide to prevail if it is are discredited,—if they are dismissed as separation to obscurations, as meaningless metaphysics, as reaction its, as

self-seeking rationalizations

The public philosophy is in a large measure location of

ally discredited among contemporary men. Because of that, what we may call the terms of discourse in public controversy are highly unfavorable to anyone who adheres to the public philosophy. The signs and seals of leginnary, of rightness and of truth, have been taken over by men who reject, even when they are not the moved adversaries of, the doctrine of constitutional democency

If the decline of the West under the misrule of the people is to be halted, it will be necessary to alter these terms of discourse They are now set overwhelmingly against the credibility and against the rightness of the principles of the constitutional state, they are set in favor of the Jacobia conception of the emancipated and sovereign

people 19 I have been argume hopefully and wishfully, that it may be possible to alter the terms of discourse at a convincing demonstration can be made that the principles of the good society are not, in Sartre's phrase, invented and chosen-that the conditions which must be met if there is to be a good society are there, outside our wishes, where they can be decovered by rational motory, and developed and adapted and refined by rational discussion.

If eventually this were demonstrated successfully, it would, I believe, rearm all those who are concerned with the anomy of our society, with its progressive barbanzation, and with its descent into violence and tyranny Amidst the quagmure of moral unpressionism they would sland again on hard intellectual ground where there are significant objects that are given and are not merely proected that are compelling and are not merely wished Their hope would be re-established that there is a public world, sovereign above the infinite number of contradictory and competing private worlds Without this cer-

tainty, their struggle must be unavailing

As the defenders of civility, they cannot do without the siens and seals of legitimacy, of rightness and of truth. For it is a practical rule, well known to expenenced men, that the relation is very close between our capacity to act at all and our conviction that the action we are taking is right. This does not mean of course, that the action is necessarily right. What is necessary to con tingous action is that it shall be believed to be fight.

#### IV LETTERS TO JOHN TAYLOR, OF CAROLINE, VIRGINIA

In 1814 John Taylor of Caroline, Virginia Fublished As-Inquity into the Principles and Policy of the Government of injury into the remaines and routy of the Covernment of the United States which contained a funning commentary on John Adams Defence It was Adams' view that Taylor had John duams. Defence it was rounds they must be main thems of the Defence Hence these letters represent Adams' second of the Defence. or the perfence states more states represent a manufacture to the look at his own Defence and are in addition a reporter to Taylor's strictures. The writing is lively, not ponderous at units quite penetrating, and represents well Adams' political tures of the causer tone of some of the letters views in his out age. The causin time of some or the ienters may not be interpreted to mean that Adams and Taylor were hay not be interpreted to mean that retains and rayin were enemies. Adms always took delight in controversal, even heated, debate on matters of government. In fact, he and John heaten, usuate on matters or government. In ract, ne and john Taylor despite political differences became firm in their friend taylor despite pointed contributes occasine min in meat towns a hip in part as a result of this very exchange of views. Two sup in part as a result of this feet exchange of views. I wo years enter to book years in 1020 June 1 2010 ceptersee in enter for his old tyend by requesting him "to file among your archites some facts [which, Taylor had recorded in his letter,] which may meet the eye of a historian as well as to give some pleasure to a patriot, who I believe has seried his country pecasure to a parmer, who a perior has served in secondary mathfully and has done what man can do to please has God,"?

Six I have received your Inquiry in a large volume neatly out a nate received your angulary at a saige volume nearly bound. Though I have not read it in course, yet, upon an apply count inough a nave ma read in the country, yet, upon an apput count to fit of the Sories Virgiliano, scarce a page has been found in which my name is not mentioned and some public found in vincia my sentiment or expression of mine examined Revived as these subjects are, in this manner in the recollection of the public, after an oblivion of so many years by a gentleman of your high anet an opinion of so many loss of a Remicional of your ingo rank, ample fortune, learned education, and powerful connec-

'IVI. 447-449 ]

tions, I flatter myself it will not be thought improper in me to solicit your attention to a few explanations and justifications of a book that has been misunderstood, misrepresented, and abused more than any other, except the Bible, that I have ever read

In the first words of the first section, you say, 'Mr Adams' political system deduces government from a natural fate; the

policy of the United States deduces it from moral liberty"

This sentence, I must acknowledge, passes all my understand ing I know not what is meant by fate, nor what distinction there is, or may be made or conceived, between a natural and artificial or unnatural fate Nor do I well know what 'moral liberty" signifies I have read a great deal about the words fate and chance, but though I close my eyes to abstract my meditations, I never could concerve any idea of either When an action or event happens or occurs without a cause, some say it happens by chance This is equivalent to saying that chance is no cause at all, it is nothing Fate, too, is no cause, no agent, no power; it has neither understanding will, affections, liberty, nor choice, it has no existence, it is not even a figment of imagination, it is a mere invention of a word without a meaning, it is a nonentity, it is nothing. Mr. Adams most certainly never deduced any system from chance or fate, natural, artificial, or unnatural

Liberty, according to my metaphysics, is an intellectual quality, an attribute that belongs not to fate nor chance Neither possesses it, neither is capable of it. There is nothing moral or immoral in the idea of it The definition of it is a self-determining power in an intellectual agent It implies thought and choice and power; it can elect between objects, indifferent in point of morality, neither morally good nor morally evil If the substance in which this quality, attribute, adjective-call it what you will-exists, has a moral sense, a conscience, a moral faculty if it can dis tinguish between moral good and moral evil, and has power to choose the former and refuse the latter, it can if it will, choose the evil and reject the good, as we see in experience it very often does

"Mr Adams' system" and "the policy of the United States" are drawn from the same sources, deduced from the same prin

oples, wrought into the same frame indeed they are the same and ought never to have been divided or separated much less set in opposition to each other as they have been

That we may more clearly see how these hints apply, certain

technical terms must be defined

- 1 Despotsin A sovere guty unlimited that is, the supremales the summa potestatis in one. This has rarely if ever existed but in theory
  - 2. Monarchy Sovereigney in one variously limited

3 Anstocracy Sovereignty in a few

- 4 Democracy Sovere guty in the many that is in the whole muon the whole body assemblage congregation or if you are an Episcopalian's you may call it, it you please, chirch of the whole people This sovereignty must in all cases, be exerted or exercised by the whole people assembled together This form of government has seldom if ever existed but in theory—as rarely, at feast as an unlimited desortion in one individual.
  - 5 The infinite variety of mixed governments are all so many different combinations modifications and internationers of the second, third, and fourth species or divisions

Non every one of these sovereigns possesses intellectual liberty to act for the public good or not Being men they have all what Dr Rush calls a moral faculty Dr Hutcheson a moral sense: and the Bible and the generality of the world a conscience They are all therefore under moral obligations to do to others as they would have others do to them-to consider themselves born authorized empowered for the good of society as well as their own good Despots monarche, pristocrate democrate holding such high trusts are under the most solemn and the most sacred moral obligations to consider their trusts and their power to be instituted for the benefit and happiness of their nations, not their nations as servants to them or their friends or parties. In other words to exert all their intellectual I berry to employ all their faculties relents and power for the public, general universal good of their nations not for their own separate good or the interest of any party

To also possess of view there is no difference in forms of govern

ment. All of them and all men concerned in them—all are under equal moral obligations. The intellectual liberty of aris tocracies and democracies can be exerted only by votes and ascertained only by ayes and noes. The sovereign judgment and will can be determined known and declared only by majorities. This will this decision is sometimes determined by a single vote, often by two or three, very rarely by a large majority scarcely ever by a unanimous suffrage. And from the impossibility of keeping together at all times the same number of voters the majorities are apt to waver from day to day and swing like a pendulum from side to side.

Nevertheless the minorities have, in all cases the same intellectual liberty and are under the same moral obligations as the majorities

In what manner these theoretical intellectual liberties have been exercised and these moral obligations fulfilled by despos, monarchs, anstocrats, and democrats is obvious enough in history and in experience. They have all in general conducted them selves alike

But this investigation is not at present before us.

24

There is no necessity of confronting Mr Adams opinion that anstocracy is natural and therefore unavoidable with the other that it is artificial or factitious and therefore avoidable, because the opinions are both true and perfectly consistent with each other.

By natural anstocracy in general may be understood those superiorities of influence in society which grow out of the constitution of human nature By artificial anstocracy, those inequal ities of weight and superiorities of influence which are created and established by civil laws Terms must be defined before we can reason By anstocracy. I understand all those men who can command influence or procute more than an average of votes by an anstocrate every man who can and will influence one man

to vote besides hirsself. Few men will deny that there is a natural anstocracy of varturs and talents in every nation and in every purty in every city and village. Inequalities are a part of the natural history of man

#### 31

I believe that none but Helvetrus will affirm that all children are born with equal genius

None will pretend that all are born of dispositions exactly able—of equal weight, equal strength equal length equal depends of neares coins essential of marches coins constraint coins

I have seen in the Hospital of Foundlings, the "Enfant Frourés at Paus, fifty babes in one room—all under four days id, all in credles able, all nursed and attended able all dressed alike, all equally nest I went from one end to the o her of the whole row and attentively observed all their countenances. And I never saw a greater variety or more striking inequalities in the A fiction stary of Breatice values of month assessments are quantities in size streets of Pans or London Some had every sign of gnef sorrow, and depair others had joy and gayety in their faces. Some were and uniques others have ply and gapen in the arms of death others looked as if they might live to fourscore Some were as ugly and others as beaunful as to avoisable some note as usey and voices as occurring as children or adults ever are these were stup d those sens ble. ne or two permanents or manne.
Will any man say would Helvenus say that all men are born Will any man say would recover say that an entil sie form qual in strength? Was Hercules no stronger than his neighbors? Jow many nations for how many ages hate been governed by fow many nations for now many ages have been governed by his strength and by the reputation and renown of at by his poshis strength and by the reputation and renown of it by his los tenty? If you have litely read Hume Robertson or the Scowish tenty? if you nave entry read statute appearant or the security. Chiefs let me ask you if S r William Wallace was no more than Chiefs let me and you it of the surge of Scotchmen, and whether

ment. All of them, and all men concerned in them—all are under equal moral obligations. The intellectual liberty of ans tocracies and democracies can be exerted only by sotes and ascertained only by ayes and noes. The sovereign judgment and will can be determined known, and declared only by majorities. This will, this decision, is sometimes determined by a single vote, often by two or three, very rarely by a large majority, scarcely ever by a unanimous suffrage. And from the impossibility of keeping together at all times the same number of voters, the majorities are apt to waver from day to day and swing like a pendulum from side to side.

Nevertheless, the minorities have, in all cases, the same intellectual liberty and are under the same moral obligations as the majorities

In what manner these theoremal, intellectual liberties have been exercised and these moral obligations fulfilled, by despots, monarchs, anstocrats, and democrats, is obvious enough in history and in experience. They have all in general conducted them selves alike

But this investigation is not at present before us.

24

... There is no necessity of 'confronting Mr Adams' opinion, that anistocracy is natural and therefore unavoidable, with the other, that it is arthfinal or facinious and therefore avoidable." because the opinions are both true and perfectly consistent with each other

By natural aristocracy, in general, may be understood those superiorities of influence in society which grow out of the constitution of human nature. By artificial aristocracy, those inequal titles of weight and superiorities of influence which are created and established by civil laws. Terms must be defined before we can reason. By aristocracy, I understand all those men who can command, influence, or procute more than an average of voices by an aristocrat, every man who can and will influence one man

been the object, your pamphlet on provileged orders would have been a very different thing!

That all men are born to equal rights is true Every being has a right to his own, as clear, as moral, as sacred as any other being his This is as indubitable as a moral government in the universe But to teach that all men are born with equal powers and faculties to equal influence in society, to equal property and advantages through life, is as gross a fraud, as glaring an imposi bon on the credulty of the people as ever was practised by monks, by Druids, by Brahmins, by priests of the immortal honors sake, Mr Taylor, for truth and virtue's sake, let

encan philosophers and politicians despise it.

ifr Adams leaves to Homer and Virgol, to Tacitus and Quinan, to Mahomet and Calvan, to Edwards and Priestley, or, if a will to Milton's angels reasoning high in pandemonium all as acute speculations about fate, destiny, foreknowledge absote, necessity, and predesunation. He thinks it problematical aether there is, or ever will be, more than one Boing capable understanding this vast subject. In his principles of legislation has nothing to do with these interminable controversies. He muders men as free, moral, and accountable agents, and he kes men as God has made them And will Mr Taylor deny at God has made some men deaf and some blind or will he firm that these will infallably have as much influence in xiety and be able to procure as many votes as any who can e and bear?

Honor the day, and believe me no enemy. . . .

41

When your new democratical republic meets, you will find half a dozen men of independent fortunes, half a dozen, of more eloquence half a dozen with more learning half a dozen with eloquence, learning, and fortune Let me see. We have now twenty four; to these we may

- 19 April The anniversary of the action at Leanington.

200

Wallace could have done what he did without that extraordinary strength? Will Helvetius or Rousseau say that all men and women are

born equal in beauty? Will any philosopher say that beauty has no influence in human society? If he does, let him read the histories of Eve, Judith, Helen, the fait Gabrielle, Diana of Posters, Pompadour, du Barri, Susanna, Abigail, Lady Hamil ton, Mrs Clark, and a million others Are not despots, monarchs, anstocrats, and democrats equally hable to be seduced by beauty to confer favors and influence suffrages?

Socrates calls beauty a short lived tyranny; Plato, the privilege of nature, Theophrastus, a mute eloquence, Diogenes, the best letter of recommendation Carneades, a queen without soldiers Theocritus, a serpent covered with flowers Bion, a good that does not belong to the possessor, because it is impossible to give ourselves beauty or to preserve it Madame du Barry expressed the philosophy of Carneades in more laconic language when she said, 'La véritable royauté, c'est la beauté -the genuine rovalty is beauty And she might have said with equal truth that it is genuine aristocracy for it has as much influence in one form of government as in any other and produces anstocracy in the deepest democracy that ever was known or imagined, as infallibly as in any other form of government What shall we say to all these philosophers, male and female? Is not beauty a privilege granted by nature, according to Plato and to truth often more influential in society and even upon laws and government, than stars, garters, crosses eagles, golden fleeces or any hereditary titles or other distinctions? The grave elders were not proof against the charms of Susanna The Grecian sages wondered not at the Trojan war when they saw Helen Holofernes guards, when they saw Judith said, 'One such woman let go would deceive the whole earth "

Can you believe, Mr Taylor that the brother of such a srate the father of such a daughter, the husband of such a life or even the gallant of such a mistress would have but one rote in your moral republic? Ingenious-but not historical, philosphical or political—learned, classical, poetical Barlon I justified and thy death. Had truth, instead of por

been thy object, your pamphlet on privileged orders would have been a very different thing!

That all men are born to equal rights is true Etery being has a night to his own, as clear, as moral, as scared as any other bong has This is as indubtable as a moral gracemones in the immerse. But to teach that all men are born with equal powers and ficulties, to equal influence in society, to equal property and skinstages through life, is as gross a fraud, as glaining an imposition on the credulity of the people as ever was practiced by monks, by Drudas's by Brahmans, by priess of the immertal lama or by the self-styled philosophers of the Ferenth revolution. For honors sake, Mr Taylor for truth and virtue's sake, let Amenican philosophers and politicians despuse it.

Mr Adams leaves to Homer and Virgil to Tacitus and Quin tiliant, to Mahomet and Calvin to Edwards and Preseley, or, it you will to Militons angels reasoning high in pandemonium all their acute speculations about fate, destiny, foreknowledge absolute necessary, and predestination. He thinks it problematical butten the respective to the second of the problematical between the second of the sec

Honor the day," and believe me no enemy ,

4

When your new democratical republic meets you will find half a dozen men of independent fortunes half a dozen of more eloquence half a dozen with more learning half a dozen, with eloquence, learning and fortune.

Let me see We have now twenty-four to these we may are of the action at Lennaron.

add six more, who will have more art, cunning, and intrigue than learning, eloquence, or fortune. These will infallibly soon unite with the twenty four. Thus we make thirty. The remaining seventy are composed of farmers, shopkeepers, merchants, trades men, and laborers. Now, if each of these thirty can, by any means, influence one vote besides his own, the whole thirty can carry sixty votes—a decided and uncontrolled majority of the hundred. These thirty I mean by aristocrats, and they will in stanly convert your democracy of one retronger into an ans tocracy of thirty.

Take at random, or select with your utmost prudence, one hundred of your most faithful and capable domestics from your numerous plantations and make them a democratical republic. You will immediately perceive the same inequalities and the same democratical republic, in a very few of the first sessions, transformed into an anistocratical republic, as complete and per fect an anistocracy as the senate of Rome, and much more so Some will be beloved and followed, others hated and avoided by their fellows.

It would be easy to quote Greek and Latin to produce a

It would be easy to quote Greek and Latin to produce a hundred authorities to show the original signification of the word aristocracy and its infinite variations and application in the history of ages. But this would be all waste water. Once for all I give you notice that whenever I use the word aristocrat I mean a citizen who can command or govern two votes or more in society, whether by his virtues, his talents, his learning, his loquacity, his taciturnity, his frankness, his reserve, his face, figure, eloquence, grace, air, attitude movements, wealth, birth art, address, in trigue, good fellowship drunkenness, debauchery, fraud perjury, violence, treachery, pyrrhonism, deism, or atheism, for by every one of these instruments have votes been obtained and will be obtained You seem to think anstocracy consists altogether in artificial titles, tinsel decorations of stars, garters, ribbons, golden eagles and golden fleeces, crosses and roses and lilies, exclusive privileges, hereditary descents, established by kings or by positive laws of society No such thing! Anstocracy was from the beginning, now is, and ever will be, world without end, independent

LEITERS TO JOIN TAYLOR of all these attificial regulations as really and as efficience or is

Let me say a word more Your democratical republic prehad in the streets and your democratical African repub c or your demente republic, call it which you will, in its first session will become an ansiocratical republic In the second session it will secone an oligarchical republic, because the sevenity-four derrorats and the twenty-six anstocrats will by this time discover that hinteen of the anxiocrats can command four to reach three thricen will now command the majority and convergencist, will manner was now command the majority and consequency, with be sovereign. The thirteen will then be an ol garchy. In the third session it will be found that among these thirteen objectes there are seven each of whom can command eight votes equal in all are seven each or vision can command of the fourth session at will be found that there are among these seven objecteds four who can command thatteen votes ap ear The republic then becomes an objectly whose sovereignty is in four individuals. In the fifth sesson, it will be discovered that two of the four can command twenty-six to es each. Then two will have the command of the soverego obgarchy In the nich session there will be a sharp contennon between the two which shall have the command of he Effy two vores Here will commence the squabble of Danton and not separate with commence the squarouse or solution and Robespierre, of Jul us and Pompey of Anthony and August, of the white rose and the red rose of Jefferson and Adams. of Burr and Jefferson of Clinton and Madeon or if you will to come.

This, my dear air is the history of mankind post, present and

When super or genius gives greater influence in society than when super or genus gives greater innuence in society than is possessed by inferior genus, or a mediocrity of genus that is, is possessed by interior genius, or a mediocity or genius that is, than by the ordinary level of men this superior influence I call than by the ordinary ieres of men this superior initiaence 1 call natural anstociacy. This cause, you say is "fluctuatings". What natural anstocracy 1 nts cause, you say 15 nuctuating. What then? It 15 anstocracy still while 16 exists. And 15 not democracy

'fluctuating" too? Are the waves of the sea, or the winds of the air, or the possamer that idles in the wanton summer air more fluctuating than democracy? While I admit the existence of democracy, notwithstanding its instability, you must acknowledge the existence of natural anstocracy, notwithstanding its fluctuahons I find it difficult to understand you when you say that "knowl-

edge and ignorance are fluctuating "Knowledge is unchangeable; and ignorance cannot change, because it is nothing. It is a non entity Truth is one, uniform and eternal, knowledge of it cannot fluctuate any more than itself. Ignorance of truth, being a nor entity, cannot surely become entity and fluctuate and change hk Proteus, or wind, or water You sport away so mercily upon the topic that I will have the pleasure of transcribing you You say "The aristocracy of superior abilities will be regulated by th extent of the space between knowledge and ignorance; as th space contracts or widens, it will be diminished or increased, and if aristocracy may be thus diminished, it follows that it may b

thus destroyed" destroyed and knowledge increased ad infinitum. And do you expect that all men are to become omniscient, like the almight; and omniscient Hindu, perfect Brahmins? Are your hopes founded

What is the amount of this argument? Ignorance may be upon an expectation that knowledge will one day be equally divided? Will nomen have as much knowledge as men? Wil children have as much as their parents? If the time will never come when all men will have equal knowledge, it seems to follow that some will know more than others and that those who know most will have more influence than those who know least, or than those who know half way between the two extremes, and consequently will be anstocrats 'Superior abilities' comprehend abilities acquired by education and study as well as genius and natural parts, and what a source of inequality and aristocracy is here! Suffer me to dilate a little in this place Massachusetts has probably educated as many sons to letters, in proportion to her numbers, as any State in the Union, perhaps as any nation, ancient or modern What proportion do the scholars bear to the

while number of people? I wish I had a catalogue of our Har red University that I might state exact numbers Say that, in short two hundred years, there have been three or four thou and educated, from pethaps two or three millions of people. Are me these ansiocrats or, in other words, have they not had more influence than any equal number of uneducated men? In fact, here men governed the province from its first settlement, these men have governed and still govern the state. These men, in schools, academies, colleges and universities, these men, in the there of ministers, lawyers, and physicians these men, in textenues of arts and sciences, in agricultural societies, in lus tencal societies, in medical societies and in antiquanan societies, m banking institutions and in Washington benevolent societies govern the state, at this twenty-sixth of December, 1814 The more you educate, without a balance in the government, the more answersed will the people and the government be There never can be, in any nation, more than one fifth-no, not one tenthif the men regularly educated to science and letters. I hope, then, you will acknowledge that "abilities" form a distinction and confer a privilege, in fact, though they give no peculiar rights in society

2 You appear, sst, to have overlooked or forgotten one great ware of natural structures; mentioned by me in my Apology and distance on in subsequent pages—I mean burit 1 inhulps to oblight to you for your candid sentiments upon this important subject Exceptions have been taken to the phrase well born, but it can see no more ampropriety in it than in the epithets well.

weit aimed, well meant, well mounted, well fortified, well iempred, well jatted, well spoken, well argued, uell reasoned, well decked, well ducked, well immued, well urought, or any other well in common parlance.

And here, sir, permit me, by way of digression, to remark another discouragement to honest political literature and the progress of real political science. If a well-meant publication fuations

fluctuating too? Are the waves of the sea, or the winds of the air, or the gossamer that idles in the wanton summer air more fluctuating than democracy? While I admit the existence of emocracy, notwithstanding its instability, you must acknowledge the existence of natural anstocracy, notwithstanding its fluctuations.

I find it difficult to understand you when you say that "knowledge and ignorance are fluctuating. Knowledge is unchangeable and ignorance cannot change, because it is nothing. It is a non entity. Truth is one uniform and eternal knowledge of it cannot fluctuate any more than itself. Ignorance of truth, being a non entity, cannot surely become entity and fluctuate and change like. Proteus, or wind or water. You sport away so merrily upon this topic that I will have the pleasure of transcribing you. You say, "The aristocracy of superior abilities will be regulated by the extent of the space between knowledge and ignorance as the extent of the space between knowledge and ignorance as in space contracts or widens, it will be diminished or increased and if anstocracy may be thus diminished it follows that it may be thus destroyed."

What is the amount of this argument? Ignorance may be destroyed and knowledge increased ad infinitum. And do you expect that all men are to become omniscient like the almighty and omniscient Hindu perfect Brahmins? Are your hopes founded upon an expectation that knowledge will one day be equally divided? Will women have as much knowledge as men? Will children have as much as their parents? If the time will never come when all men will have equal knowledge it seems to follow that some will know more than others and that those who know most will have more influence than those who know least or than those who know half way between the two extremes and consequently will be aristocrats Superior abilities comprehend abilities acquired by education and study as well as genius and natural parts and what a source of mequality and aristocracy is here! Suffer me to dilate a little in this place Massachusetts has probably educated as many sons to letters, in proportion to her numbers, as any State in the Union perhaps as any nation ancient or modern What proportion do the scholars bear to the stide number of people? I wish I had a catalogue of our Har serl University that I might state exact numbers. Say that, in about two handred years, there have been three or four thouand educated from perhaps two or three millions of people. Are me these ansiocrats or, in other words, have they not had more influence than any equal number of uneducated men? In fact, here men governed the province from its first settlement, these wen have governed and still govern the state. These men in abols, academies, colleges, and universities; these men, in the three of ministers, lawyers, and physicians these men, in endennes of arts and sciences, in agricultural societies, in hisbrical societies, in medical societies and in antiquarian societies, " banking institutions and in Washington benevolent societies oven the state, at this twenty-pixth of December, 1814 The core you educate, without a balance in the government, the more answerated will the people and the government be There never can be, in any nation, more than one fifth-no, not one tenthof the men regularly educated to science and letters I hope, then, you will acknowledge that 'abilities" form a distinction and coaler a proviege, in fact, though they give no peculiar rights 10 society

2 You appear, sir, to have overlooked or forgotten one great xero or natural anstocracy, mentioned by me in my Apology and dilated on in subsequent pages—I mean hinth I should be obliged to you for your candid sentiments upon this important subject Exceptions have been taken to the phrase well from, but I can see no more impropriety in it than in the epithets well brief, well educated, well brought up, well saught, well informed, well educated, to have a seek and the did clothed, well area, well for the up the well read well to the well differently did media, well formed, well amed, well frombied, util furtified, at well seeked, well fatted, well stroken, well argued, well frestoned, well decked, well duckeh, well irmmed, well arrought, or any other well in momental pathance.

And here, six, permit me, by may of digression, to remark another discouragement to honest political literature and the progress of real political science. If a well-meant publication "fluctuating" too? Are the waves of the sea, or the winds of the air, or the gossamer that idles in the wanton summer air more fluctuating than democracy? While I admit the existence of democracy, notwithstanding its instability, you must acknowledge the existence of natural aristocracy, notwithstanding its fluctuations.

I find it difficult to understand you when you say that "knowedge and ignorance are fluctuating." Knowledge is unchangeab and ignorance cannot change, because it is nothing. It is a nentity. Truth is one, uniform and eternal, knowledge of it can fluctuate any more than itself. Ignorance of truth, being a nentity, cannot surely become entity and fluctuate and change is Proteus, or wind, or water. You sport away so mertily upon it topic that I will have the pleasure of transcribing you. You so "The aristocracy of superior abilities will be regulated by the extent of the space between knowledge and ignorance; as it space contracts or widens, it will be diminished or increased; at it aristocracy may be thus diminished, it follows that it may thus destroyed."

What is the amount of this argument? Ignorance may I destroyed and knowledge increased ad infinitum. And do ys expect that all men are to become omniscient, like the almigh and omniscient Hindu, perfect Brahmins? Are your hopes found upon an expectation that knowledge will one day be equal divided? Will women have as much knowledge as men? We children have as much as their porents? If the time will new come when all men will have equal knowledge, at seems to follo that some will know more than others; and that those who know most will have more influence than those who know least, at than those who know half way between the two extremes, an consequently will be aristocrats. "Superior abilities" comprehen abilities acquired by education and study as well as genius an natural parts; and what a source of inequality and aristocracy i here! Suffer me to dilate a little in this place. Massachusetts ha probably educated as many sons to letters, in proportion to he numbers, as any State in the Union, perhaps as any nation ancient or modern. What proportion do the scholars bear to the

In that the multiplication of the population so far transcends the malphation of the means of subsistence that the constitut labor of note tenth of our species will forcer be necessary to prevent all of them from starcing with hunger, cold, and pestilence. Make all non-Neusons or, if you will, Jeffersons, or Taylors, or Run dajht, and they vould all pents in a heap?...

#### 710

A few words more concerning the characters of literary men Wait sort of men have had the conduct of the presses in the Mand States for the last thirty years? In Germany, in Lingland, in Frince, in Holland, the presses, even the newspapers, have been under the direction of learned men How has it been in Anena's How many presses, how many newspapers have been directed by orgabonds, fugitives from a bashfi, a pillory, or a laster in Europe.

hade in europe. The knowledge is corruption, that aris, the depherath century that knowledge is corruption, that aris, cames, and taste have deformed the beauty and destroyed the fluory of human nature, which appears only in perfection in the fluory of human nature, which appears only in perfection in the fluory of human nature, which appears only in perfection in the fluory of human nature, which appears only in perfection in the fluory of human nature, which appears only in perfection in the fluory of human nature, which appears only in the fluory of a tobaccopy and and said "thus is mue," ought instantly to have been put to death, another as sile-and, says, the first man who pronounced the word "dieus" ought to have been dispatched on the spot, yet these are advocates of the linearity on and enemes of the linearities.

I never had enough of the ethereal spirit to rise to these heights My humble opinion is that knowledge, upon the whole, promotes virtue and happiness. I therefore hope that you and all other genilemen of property, education, and reputation will exert other genilemen of property, education, and reputation will exert your utmost influence in establishing schools, colleges, acidedines, and universities, and employ every means and opportunity to spread information, even to the lowest dress of the people, if any such there are, even among your own domestics and John Ran

dolph's serfs.\* I fear not the propagation and dissertination of

appears, it is instantly searched for an unpopular word or one that can be made so by misconstruction, misrepresentation, or by any credible and imposing deception. Some ambitious, popular demapogue gives the alarm—"heresy!" Holy, democratical church has decreed that word to be "heresy!" Down with him! And if there was no check to their passions and no balance to their government, they would say, à la lanternel a la guillotine! roast him! bake him! bol him! fyr him! The Inquisition in Spain would not celebrate more joy fully an auto-da f&e.

Some years ago, more than forty, a writer unfortunately made use of the term better sort Instantly, a popular clamor was rused and an odum excited, which remains to this day to such a degree that no man dares to employ that expression at the bar, in conversation, in a newspaper, or pamphlet, no, nor in the pulpit, though the "baser sort" are sufficiently marked and dis iniguished in the New Testament to prove that there is no wrong in beheving a "better sort" And if there is any difference between virtue and vice, there is a "better sort" and a worse sort in every human society

With state reverence let me here quote one of the most profound philosophical, moral, and religious sentiments that ever was expressed "We know not what spirit we are of"

60

That the first want of man is his dinner, and the second his girl, were truths well known to every democrat and anstocrat long before the great philosopher Malthus arose to think he enlightened the world by the discovery

It has been equally well known that the second want is frequently so impetuous as to make men and uomen lorget the first and rush into rash marinages, leaving both the first and second wants, their own as well as those of their children and grand children, to the chapter of accidents. The most religious very often leave the consideration of these wants to Him who supplies the young ravens when they cry

The natural, necessary, and unavoidable consequence of all this

s that the multiplication of the population so far transcends the in higheston of the means of subsistence that the constant labor of the trent method for septens will forest be increasing to prevent all of their from starting with hunger cold and postletence. Make all non Newtons or if you will Jeffersons or Taylors, or Randolphs, and they would all pensh in a heap! . .

#### 710

A few words more concerning the characters of literary men Whit sur of men have had the conduct of the presses in the Rowd Sie is for the List thirty votar? In Germany in England in Finner in Holland the presses, even the newspapers, have been under the direction of learned men. How has it been in Anema? How many presses, how many newspapers have been directed by vigabonds, fuguries from a bashiff a pillory or a half-m Europe Sie.

You know it is one of the sublimest and profoundest discoveness, of the ephrenih century that knowledge is corruption that arts, sciences, and taste have deformed the beauty and destroyed the falsing of human nature, which appears only in perfection in the savings asset—whe children of noture. One water grarely relik us that the first man who fenced a tobacco yard and said. This is time ought instantly to have been put to death another as scienally assy, the first man who prenounced the word "dieat" ought to have been dispatched on the spot yet these are advocates of toleration and enemers of the Innustriant.

I never had enough of the ethereal spirit to rise to these heights. My humble opin on is that knowledge, upon the whole pointers in the and happiness. I therefore hope that you and other gentlemen of property education and reputation will exert your utmost influence in establishing schools, colleges, academies and universities and employ every means and opportunity to spread information even to the lowest dregs of the people if any such there are even among your own domestics and John Randolphs serfs. I fear not the propagation and dissemination of

\*[VI 518-521]

knowledge. The conditions of humanity will be improved and ameliorated by its expansion and diffusion in every direction Max every human being-man, woman, and child-be as well in formed as possible! But, after all, did you ever see a rose without a briar, a convenience without an inconvenience, a good without an evil, in this mingled world? Knowledge is applied to bid pur poses as well as to good ones Knaves and hypocrates can acquire it, as well as honest, candid and sincere men It is employed as an engine and a vehicle to propagate error and falsehood, treason and vice, as well as truth, honor virtue, and patriotism It composes and pronounces, both panegyries and philippies, with ex quisite art, to confound all distinctions in society between right and wrong And if I admit, as I do, that truth generally prevails and virtue is or will be triumphant in the end, you must allow that honesty has a hard struggle and must prevail by many a well fought and fortunate battle and after all, must often look to another world for justice, if not for pardon

There is no necessary connection between knowledge and virtue Simple intelligence has no association with morality. What connection is there between the mechanism of a clock or watch and the feeling of moral good and evil, right or wrong? A faculty or a quality of distinguishing between moral good and evil, as well as physical happiness and misery, that is pleasure and pain or, in other words a conscience-an old word almost out of

fashion-is essential to morality Now, how far does simple, theoretical knowledge quicken or sharpen conscience? La Harpe, in some part of his great work his Course of Literature, has given us an account of a tribe of learned men and elegant writers who kept a kind of office in Paris for selling at all prices, down to three livres, essays or para graphs upon any subject, good or evil, for or against any party, any cause, or any person One of the most conspicuous and popular booksidiers in England, both with the counters and the citizens, who employed many printers and supported many writers, has said to me, "The men of learning in this country are stark mad There are in this city a hundred men, gentlemen of liberal education, men of science, classical scholars, fine writers,

Where are and where have been the greatest masses of science of I terature, or of taste? Shall we look for them in the thurch or the state in the universities or the academics among Greek or Roman philosophers, Hindus, Brahm ns Chinese mandans Chaldean mag British druds Indian prophets, or Christian monks? Has it not been the invariable maxim of them all to deceive the people by any hes, however gross? Tonus

And after all that can be done to disseminate knowledge you never can equalize it. The number of laborers must and will forever be so much more multitudinous than that of the student that there will always be grants as well as pygrues the former of which will have more influence than the latter man for ran and head for head and therefore, the former will be anticorate and the latter democrats, if not Jacobins or say's culottes

These morsels and a million others analogous to them which will easily occur to you if you will be pleased to give them a careful massication and rumination must, I think convince you that no practicable or possible advancement of learning can ever equalize knot ledge among men to such a degree that some will oot have more influence in society than others and consequently that some will always be anstocrats and others democrats. You may read the history of all the universities academies monasteries of the world and see whether learning exampushes human passons or corrects human vices. You will find in them as many some or contexts manager vices from who may in them as many parties and factions, as much jealousy and entry hatted and passes and stations, as much features and early matter and and ce, relenge and intrigue, as you will in any legislative assem has the resemble enabled the most ignorant city or village. Are by or executive council the most ignorant city or visuage the most the men of letters—philosophers durines physicians lawyers, orators, and poets—all over the world at perpetual strife with orators, and poets—at over tine would at perpetual strite with one another? Anowledge therefore as well as genius, strength activity industry beauty and twenty other things will forever 208

knowledge The conditions of humanity will be improved and ameliorated by its expansion and diffusion in every direction May every human being-man, woman, and child-be as well in formed as possible! But, after all, did you ever see a rose without a briar, a convenience without an inconvenience, a good without an evil, in this mingled world? Knowledge is applied to had pur poses as well as to good ones Knaves and hypocrites can acquire it, as well as honest, candid, and sincere men It is employed as an engine and a vehicle to propagate error and falsehood, treason and vice, as well as truth, honor, virtue, and patriousm It com poses and pronounces, both panegynes and philippies, with ex-quisite art, to confound all distinctions in society between right and wrong And if I admit, as I do, that truth generally prevails and virtue is or will be triumphant in the end, you must allow that honesty has a hard struggle and must prevail by many a well fought and fortunate battle, and, after all, must often look to another world for justice, if not for pardon

There is no necessary connection between knowledge and vir tue Simple intelligence has no association with morality.
